Students transferring from other institutions should seek advisement from the school and athletic training education program advisors to select appropriate coursework and to meet admission requirements. In addition to University, college, and Department Level Requirements (p. 467).

Total Credits: 120

The Freshman year is considered “pre-professional”. Students may apply as early as the freshman year, provided they complete the requirements for application to the BHS in Athletic Training degree program.
Clinical Laboratory Sciences

Clinical Laboratory Science
School of Health Professions
605 Lewis Hall
(573) 882-8011
Director: Steven Starr

Clinical Laboratory Scientists make a valuable contribution to patient care by developing, performing and evaluating clinical laboratory procedures. Certified Clinical Laboratory Scientists are skilled scientists who work with the kinds of tests that would confirm a case of diabetes, verify a potentially dangerous drug level, monitor the level of anti-rejection drugs in transplant patients, determine compatibility for organ donation, detect cases of cancer or leukemia, identify the causative microorganism in a blood or wound infection, or detect a cancerous tumor with DNA techniques. Clinical Laboratory Scientists have various levels of responsibility - as staff technologists, research technologists, supervisors, managers, or educators can work in a variety of settings, including hospitals, clinics, laboratories, and research centers.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of prerequisite coursework, requiring 18 hours of both Biology and Chemistry, and 11 months in the professional phase of the CLS program. The professional year begins in May, with 11 weeks of coursework and clinical lab rotations (in the University of Nebraska’s Medical Center in Omaha). After the initial 11 weeks in the program, students return to Columbia and complete the CLS coursework online and clinical laboratory rotations at Boyce and Bynum Pathology Laboratories, P.C. and the University of Missouri Hospital and Clinics. Students graduate with a Bachelor of Health Science degree in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center.

Faculty

Associate Professor R. E. Oliver*
Clinical Professor M. M. Hdeib*, G. D. Heggie*
Clinical Associate Professor C. M. Allen, K. S. Moss*, S. L. Strickland*
Clinical Instructor S. D. Anderson, J. L. Keely, S. W. Parker, S. Starr

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- **Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Department Level Requirements (p. 469)
- BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology (p. 469)

The Department of Cardiopulmonary and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in clinical laboratory sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

Department Level Requirements - Clinical Laboratory Sciences

There are no requirements at the department level for this degree. Please see the BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology (p. 469) page for degree requirements.

BHS in Clinical Laboratory Sciences with Emphasis in Medical Technology

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Professional Certification: Upon completion of the program, students are eligible to take the Medical Technology Licensure examination given by the American Society for Clinical Pathology (ASCP).

**Total Credits: 124**

**NOTE:** Third Year - Summer to be completed in Omaha.
Communication Science and Disorders

Judith Goodman, Chair
School of Health Professions
301 Lewis Hall
(573) 884-2940
mucsd@health.missouri.edu

Advising Contact
Jill S. Diener
(573) 882-8011

Communication Science and Disorders includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental and behavioral factors. Communication Science and Disorders includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master’s or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS and PhD degrees (p. 471).

Faculty

Associate Professor J. C. Goodman***, S. A. Wagovich**
Assistant Professor M. Fagan**, T. Lever**
Clinical Associate Professor B. L. Brinkman, D. R. Fritz, B. McLay*
Clinical Assistant Professor L. B. Lawrence*, M. A. Scheneman
Clinical Instructor G. Hull, G. Nolan
Research Associate Professor Emerita L. S. Day*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

• MHS in Communication Science and Disorders (p. 473)

About Communication Science and Disorders

The field of Communication Science and Disorders, or CSD, encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation and voice problems. Audiologists specialize in the prevention, identification, assessment and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master’s and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master’s degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master’s degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master’s degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master’s degree, which is the entry-level degree for speech-language pathologists, typically takes two to three years beyond the undergraduate degree depending on the student’s undergraduate field of study. Students wishing to pursue a career in audiology will need to attend a program that offers clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, Missouri Rehabilitation Center, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the state. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation
Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master’s thesis option is available to students interested in conducting research.

Funding

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships

Undergraduate

Department Level Requirements - Communication Science & Disorders

There are no requirements at the department level for this degree.

BHS in Communication Science and Disorders

Major Program Requirements

Students are required to apply to the Communication Science and Disorders major. Applications into the BHS program are considered once a year, and they must be submitted by February 1 of the student’s sophomore year. Applicants must have completed at least 42 hours of college credit before applying, and students who are admitted must have completed 60 hours of college credit before beginning coursework as Communication Science and Disorders majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are required for acceptance into the BHS program. Meeting the minimum criteria and declaring a major of pre-Communication Science and Disorders do not guarantee acceptance into the program.

In addition to university (p. 17), college and degree requirements, including university general education (p. 18), students must complete the following:

### MHS in Communication Science and Disorders

#### Admission Contact Information

Julie Aston mucsd@missouri.edu  
301 Lewis Hall; Columbia, MO 65211  
573-884-2940

#### Admission Criteria

Deadline for Summer entrance (required for all applicants who have completed prerequisite course work in CSD): January 15  
Deadline for Spring entrance (only for applicants without prerequisite course work in CSD): October 15  
- Undergraduate GPA: 3.0 (on last 60 hours of course work)  
- Minimum TOEFL scores:  

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100*</td>
<td>600</td>
</tr>
</tbody>
</table>

- Minimum TOEFL (iBT) score of 100, with minimum score of 28 on speaking  
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1000 (preferred)</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>300 (preferred)</td>
<td></td>
</tr>
</tbody>
</table>

#### Required Application Materials

**To the Graduate School:**  
Online Graduate School application including:  
- 3 letters of recommendation submitted online  
- Statement of Interest submitted online  
- Resume submitted online  
- Official GRE scores  
- Official Transcripts (including ALL college credits)

**To the Communication Science and Disorders Program:**  
Personal interviews may be requested

#### Admission Process

Acceptance for admission to master’s level study is determined by the Departmental Graduate Admissions Committee.

#### Prerequisite Course Work

If the student’s undergraduate major is in a field other than communication disorders, the MHS program will require a minimum of three and a half years. The student will spend the first year and a half of the master’s program completing prerequisite course work prior to beginning clinical practicum and graduate course work.

#### Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

#### Plan of Study

MHS candidates are required to complete a minimum of 48 semester hours in graduate-level courses with grades of B- or higher. No fewer than 24 hours must be earned in 8000/9000-level course work offered by the program. A maximum of 10 hours in clinical practicum courses may be counted toward the 48-hour requirement.

#### Thesis Option

The student may choose the thesis option for the master’s degree; work toward the thesis may count for up to six hours of credit.

#### Examination

During the final semester of course work, we expect master’s degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program’s online Graduate Student Handbook for additional information.
Diagnostic Medical Ultrasound

School of Health Professions
409 Lewis Hall
(573) 884-2994
Director: Moses Hdeib

Faculty

Associate Professor R. E. Oliver*
Clinical Professor M. M. Hdeib*, G. D. Heggie*
Clinical Associate Professor C. M. Allen, K. S. Moss*
Clinical Instructor S. D. Anderson, J. L. Keely, S. W. Parker, S. Starr

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Department Level Requirements (p. 474)
• BHS in Diagnostic Medical Ultrasound (p. 474)

The Department of Cardiopulmonary and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

Diagnostic Medical Ultrasound
School of Health Professions
409 Lewis Hall
(573) 884-2994
Director: Moses Hdeib

• MHS in Diagnostic Medical Ultrasound (p. 475)

The Master of Health Science in Diagnostic Medical Ultrasound is offered by the School of Health Professions, Department of Cardiopulmonary and Diagnostic Sciences. The Diagnostic Medical Ultrasound Program (DMU) is a 35-40 hours per week, 52 weeks per academic year clinical education program.

Future Certification and Careers

Upon successfully completing the requirements of the DMU Program, MHS Graduates will be eligible to apply to the American Registry of Diagnostic Medical Sonographers (ARDMS) for registry in Abdomen, Obstetrics and Gynecology, Vascular Technology and Cardiac Ultrasound.

Financial Aid

Please contact the financial aid office. Some programs require an application and extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Undergraduate

Department Level Requirements - Diagnostic Medical Ultrasound

There are no requirements at the department level for this degree. Please see the BHS in Diagnostic Medical Ultrasound page (p. 474) for degree requirements.

BHS in Diagnostic Medical Ultrasound

Major Program Requirements

The Diagnostic Medical Sonographer uses high-frequency sound waves to perform a variety of diagnostic examinations. The sonographer performs an essential role in the process of data gathering and synthesis required to reach a diagnosis. Ultrasound is a profession requiring a high degree of independence, skill, judgment and knowledge. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. The Diagnostic Medical Ultrasound (DMU) Program offers multiple educational options.

Any student interested in applying to the DMU Program should seek advisement as soon as possible to assure that all general education and prerequisite courses including the criteria for application have been completed.

Students must complete the courses listed below in addition to degree and university requirements (p. 17), which include university general education (p. 18) requirements.

Test of Written English (TWE) - 4.5

- Minimum GRE score: check with Program Director of Graduate Studies
- Undergraduate GPA minimum: 3.00 (A=4.0) for the last 60 hours of college work

Potential applicants who have all the prerequisites for admission to the program should submit their application early (before November) in the fall of the academic year in order to be considered for early acceptance with start in the following spring semester. Please contact the director of graduate studies.

**Required Application Materials**

*To the Graduate School:*
- All required Graduate School documents
- GRE scores

*To the Diagnostic Medical Ultrasound Program:*
- Departmental Application
- Transcripts

**Degree Requirements**

Graduate students must maintain a 3.0 grade point average in all courses required for the degree. Failure to achieve a semester cumulative grade point average of 3.0 in required courses will result in delay of graduation or dismissal from the program. Students are expected to maintain full-time enrollment in the sequenced curriculum and complete the degree requirements as outlined in the course of study.

The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the Bachelor of Health Sciences program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including Public health, Psychology, Sociology, Medical Anthropology, Education, and Social Work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, access to healthcare, and suicide prevention. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS concurrently with the Masters of Occupational Therapy (p. 480).

Students can only earn the BHS concurrently with the Doctor of Physical Therapy (p. 483).

Faculty

Associate Professor E. Schatz*
Associate Clinical Professor R. Hogan, M. Kunnert
Associate Teaching Professor D. Hume*
Assistant Professor N. Cheak-Zamora*, A. Kabel*, N. Khosla, W. Majee, V. Shaffer, L. Taliaferro, M. Teti*, M. Thullen
Assistant Clinical Professor K. Flynn Peters
Assistant Teaching Professor B. Blackburn, R. Bowman

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Department Level Requirements (p. 477)
- BHS in Health Science (p. 478)

The Department of Health Sciences' BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the BHS degree program may also be qualified to enter either graduate or professional health science programs such as Physical Therapy, Health Administration and Public Health. The Health Sciences program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS).

Admission to the BHS in Health Sciences

The BHS in Health Sciences program does not require an application. Students may declare their major in the BHS program by indicating the program on the MU application (for new students), filling out a transfer of division form (for current MU students), or indication of their intention to declare a health science major to their academic advisor (for current SHP students). There is a 2.0 MU cumulative and term GPA requirement to declare a major in Health Sciences. The cumulative GPA is calculated on all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve that GPA may stay in the program for two probationary semesters. If the 2.0 term or cumulative GPA is not achieved after two probationary semesters, students must transfer out of the Health Sciences program.

Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

Department Level Requirements - Health Science

Courses may be delivered using traditional or distance delivery methods. The Health Sciences degree program credits must include a minimum of 120 university-level credit hours including: General education requirements comprise a minimum of 42 credit hours; Health Sciences core course requirement comprise a minimum of 19 credit hours; Health Sciences approved elective courses comprise a minimum of 18 credit hours; Electives fulfilling the student’s concentration area comprise the remaining 41 credit hours.

Students are required to file a graduation plan for the BHS degree by the time they have completed 90 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall, summer and spring semesters. Students who transfer from another institution or another school/college at MU with more than 60 hours must file their graduation plan within their first semester of coursework in SHP and at MU.

Residency Requirement

There is a residency requirement for Health Sciences majors. Students must complete, at minimum, the 30 hours of coursework for the degree as declared Health Sciences majors in the School of Health Professions. Students must be in the Health Sciences major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.
BHS in Health Science

Major Program Requirements

- Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Sciences program. Students who fail to achieve a 2.0 GPA may stay in the program for two probationary semesters, and if they fail to earn a 2.0 term or cumulative GPA after the two probationary semesters, students must transfer out of the Health Sciences program.
- All required core and elective coursework for the BHS in Health Sciences program, including requirements outside the department, must be completed with a grade of C- or higher.
- Students must complete all university requirements, including general education (p. 18), and Department Level Requirements (p. 477), in addition the degree requirements below.
- Students may only repeat a core required course one time.

Capstone Requirement

The BHS capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH SCI 4975 offers ways to complete the capstone experience through internships. The internship will be approved by the internship advisor and faculty internship coordinator. Students may find their own internship experience or work with the course instructor/internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:
- an internship at an agency, company, or corporation of their choice. For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from the Health Sciences Internship advisor;
- service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
- an approved study abroad program

Advising Contact
MUOT@health.missouri.edu

Scholarship Information Contact
MUOT@health.missouri.edu

Occupational therapists are skilled health professionals who provide services to infants, children, adults and older persons experiencing physical, emotional or mental limitations in performing everyday activities. The department’s philosophy supports a holistic model that emphasizes empowerment and the mind, body, spirit. The curriculum focuses on the value of occupation in relationship to health and wellness. The department’s mission is to produce competent practitioners who can meet the challenges and changes occurring in institutions, community-based programs and educational settings in both urban and rural areas of Missouri.

Occupational therapists are employed in public and private schools, hospitals, rehabilitation centers, mental health facilities, nursing homes, home health agencies, community health programs and industry. As independent health practitioners, they are also involved in business, working with disability claims, in work-hardening programs and wellness/health promotion, or as proprietors of their own therapy services. Occupational therapists also work as educators, administrators, consultants and researchers.

The department offers a Bachelor of Health Science in Occupational Therapy (BHS) followed by the entry level master degree (MOT). To become a registered therapist the master degree is required.

Department accreditation is granted by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

Faculty

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Department Level Requirements (p. 480)
• BHS in Occupational Therapy (p. 480)

Graduate

Department of Occupational Therapy
School of Health Professions
801 Clark Hall, Columbia, MO 65211
573-882-3988; FAX 573-884-2610
http://shp.missouri.edu/ot/

• MOT in Occupational Therapy (p. 482)
The School of Health Professions offers an entry level master’s degree in occupational therapy. Students apply to the Department of Occupational Therapy as an undergraduate, receive a Bachelor of Health Sciences in Occupational Therapy (BHS-OT) and continue on to graduate level courses. Student with completed bachelor degree at time of application to the program may opt to take all program courses at graduate level. Graduate courses are only offered to students enrolled in the program. The degree program is approved to meet accreditation requirements requiring a graduate degree. Contact the Department of Occupational Therapy for more information regarding the degree.

Accreditation & Certification

The Department of Occupational Therapy is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association, 4720 Montgomery Lane, Bethesda, MD, 20814-3425, (301) 652-2682.

Graduates are eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy (NBCOT), Inc. 12 South Summit Ave., Suite 100, Gaithersburg, MD 20877-4150, telephone (301) 990-7979; Fax (301) 869-8492.

Financial Aid from the Program

Check the School of Health Professions website at http://shp.missouri.edu for scholarship information.

Undergraduate

Department Level Requirements - Occupational Therapy

There are no requirements at the department level for this degree. Please see the BHS in Occupational Therapy (p. 480) page for degree requirements.

BHS in Occupational Therapy

Major Program Requirements

The professional degree program requires three years of course work after completion of all prerequisites and university general education requirements. Six months of field experiences in affiliated clinical and community-based sites, must be completed within 24 months after required didactic courses.

Students with a bachelor’s degree must complete the prerequisite courses and meet the university and OT admission requirements.

The following are MU courses. Students transferring from other institutions should seek advisement from the school and OT advisors and select appropriate prerequisite courses for admission. Medical
terminology proficiency and 30 hours of observation is required. In addition to university, college and degree requirements, students must complete the following:

**Major core requirements**

**Prerequisites to the major**

- **COMMUN 1200** Public Speaking 3
- Select one of the following:
  - **BIO_SC 1010** General Principles and Concepts of Biology and General Biology Laboratory 2020
  - **BIO_SC 1500** Introduction to Biological Systems with Laboratory
- **PSYCH 2510** Survey of Abnormal Psychology 3
- **PHYSICS 1210** College Physics I 4
- **H_D_FS 2400** Principles of Human Development 4
- **MPP 3202** Elements of Physiology 5
- **SOCIOL 1000** Introduction to Sociology 3
  - or **ANTHRO 1000** General Anthropology
  - **PSYCH 1000** General Psychology 3
  - **ESC_PS 4170** Introduction to Applied Statistics 3
  - or **STAT 1300** Elementary Statistics
- **OC_THR 1000** Introduction to Occupational Therapy 1-2
  - or **HLTH_SCI 1000** Introduction to the Health Professions

**Departmental course requirements**

- **PTH_AS 4222** Gross Human Anatomy (The Health Professions) 7
  - (The Health Professions)
  - **OC_THR 4310** Introduction to the Health Professions 1000
  - **1000**
- **HIST 1100, 1200, or POL_SC 1100** 3
- **ENGLSH 1000** 3
- **COMPUTER SCIENCE 1500** 5
- **Elective course** 3

**Professional Certification**

Upon successful completion of all courses, including field work experiences, students are eligible to sit for the examination of the National Board for Certification in Occupational Therapy, 800 South Fredrick, Suite 200, Gaithersburg, MD 20877-4150, (301) 990-7979. Successful completion of the exam is required by state regulatory agencies before entering into the profession.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

Total Credits: 156

* Denotes elective coursework. These specific courses are not required, though the credit hours are required to reach the minimum amount of credit hours (59) needed to be eligible for the OT Professional Program.

## Graduate

### MOT in Occupational Therapy

Leanna Garrison, Department Manager  
405 Lewis Hall; Columbia, MO 65211  
573-884-2113

### Admission Criteria

Application Deadline for Summer entrance: December 31

- Undergraduate GPA: 3.0 or higher (4.0=A)
- Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>

- Completion of all undergraduate/OT prerequisites
- 30 hours of occupational therapy observation
- Completion of all required application materials
- Acceptance to program

## Required Application Materials

To the Graduate School:

- All required Graduate School documents

Required Application Materials to the Program (Occupational Therapy):

- Go to http://shp.missouri.edu/ot/ for departmental application forms (available Oct. 1-Dec. 31)
- Departmental application
- Observation Forms
- Volunteer Forms
- 3 Completed Reference forms
- Personal Statement
- Interview

### Requirements for Masters Degree in Occupational Therapy

The Department of Occupational Therapy offers the Master of Occupational Therapy degree as the terminal degree of the program. All students must complete the prerequisite courses and meet the admission requirements to apply. The occupational therapy graduate courses include a minimum of 34 credits beyond the bachelor’s degree in OT. The masters degree is required to become certified and licensed to practice as an Occupational Therapist.
Physical Therapy

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
106 Lewis Hall
(573) 882-7103
Fax: (573) 884-8369
mushppt@missouri.edu
http://shp.missouri.edu/pt/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

The University of Missouri offers a Doctor of Physical Therapy degree. No master's degree or terminal undergraduate degree in Physical Therapy are available.

Admissions

Doctor of Physical Therapy Program, Regular Admissions

Most students admitted to the Doctor of Physical Therapy program will have a baccalaureate degree. Students who are interested in pursuing application to the Doctor of Physical Therapy program are encouraged to work on an undergraduate degree that will allow them to fulfill application requirements.

Doctor of Physical Therapy Program, Early Admissions

Admission to the Doctor of Physical Therapy program may be available to a small group of students who have completed at least 90 credit hours, completed at least six full-time semesters of residential course work, all MU general education requirements and have shown excellent academic progress. Students who gain early admission to the Doctor of Physical Therapy program will be awarded the Bachelor of Health Science in pre-professional physical therapy upon completing one year of coursework in the physical therapy program.

Information regarding the admissions procedures and curriculum for the Doctor of Physical Therapy (p. 483) program can be found on the graduate tab.

Faculty

Professor M. Brown**, M. A. Minor**
Associate Professor E. A. Dannecker**, S. P. Sayers**
Teaching Associate Professor C. C. Abbott*, K. Gibson*, M. S. Hargrove*, K. L. Wingert
Teaching Assistant Professor J. Bridges*, T. Briedwell*, J. Krug*, J. B. Mann, D. E. Martin, E. Prost*
Instructor C. A. Blow*, A. C. Connell, N. J. Dietz, S. E. Lindaman, J. J. McElroy

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in physical therapy, the University does offer baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

• DPT in Physical Therapy (p. 483)
Starting in 2007, students who enter the MU Physical Therapy program will complete a Doctor of Physical Therapy (DPT) degree program.

Careers

The DPT degree is an entry-level clinical degree that prepares the student to enter the field of physical therapy as a general practitioner with a background in musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems.

Financial Aid from the Program

Students may apply for scholarships and assistantships. Check the program website or ask the program contact for availability and details.

573-884-8369 (fax)

Application and Admission Information

Applicants who will have an undergraduate degree prior to entering the program will apply to the Graduate School online admission process in addition to the Departmental Application. Graduate School applications must be submitted by January 10th.

Departmental applications are required and are due in the PT office by January 24th.

Students who are admitted without a degree will receive a bachelor's degree at completion of the first year.

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
All students are strongly encouraged to contact the department office for advisement and planning well in advance of application.

**Admission Criteria**

Fall deadline: N/A  
Summer deadline: January 10

- Minimum TOEFL scores:

<td>600</td>
</tr>
</tbody>
</table>

- Minimum GPA: 3.0

**Prerequisites for the Doctoral Degree**

Note: The DPT program accepts students to begin the professional program only for summer terms, which begin in June.

Admission to the DPT program is available through regular admission (applicants will have a bachelor’s degree prior to beginning the professional program) or through an early admission option that allows students to enter the professional program with 90 credit hours.

All applicants must have at least a 3.0 GPA in the core required courses and as a cumulative GPA in the last 60 credit hours.

On-campus interviews are required for admission to the professional program.

Students who enter without a bachelor’s degree must have satisfied the MU general education and graduation requirements and taken two Writing Intensive courses at MU. These applicants must possess a 3.5 GPA.

Applicants are notified of the selection committee’s decision by March.

All students are strongly encouraged to contact the School of Health Professions Student Affairs Office for advisement and planning well in advance of application.

Admission to the program is selective.

**Required Application Materials**

To the Graduate School:

- All required Graduate School documents

To the Program [http://shp.missouri.edu/pt/](http://shp.missouri.edu/pt/)

- Departmental application
- 2 letters of recommendation (included in the application packet)
- Curriculum Vitae (resume) as specified by the application guidelines
- Official transcripts (year of application, fall grades must be recorded on transcript)
- GRE score report
- Departmental application fee

**Plan of Study**

The professional program is offered in sequential blocks and requires full-time enrollment for three academic years and three summer sessions, beginning in the summer session following acceptance. The curriculum contains foundational and clinical sciences combining traditional lectures and course work, laboratory sessions, problem-based learning classes and clinical education. More than 200 clinical sites in Missouri and beyond are available for supervised clinical education.

A graduate must pass the National Physical Therapy Examination to receive a license to practice in the United States. The program is accredited by the Commission on Accreditation in Physical Therapy (CAPTE). Graduates are eligible for licensure anywhere in the United States.

**Degree Requirements**

All students admitted must maintain a 3.0 grade point average with no grade below C (2.0) in courses required for the degree. Failure to achieve a semester or professional cumulative grade point average of 3.0 in required courses will result in probation or dismissal from the program.

Students are expected to maintain full-time enrollment in the curriculum and complete the degree requirements as outlined in the course of study. Any exception must be approved by departmental faculty. Students must demonstrate the personal behaviors and characteristics associated with optimal patient welfare and professional trust.
Radiologic Sciences

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission.

Emphasis in Radiography

Radiography
School of Health Professions
607 Lewis Hall
(573) 884-2623
Director: Patricia Tew

Radiographers are highly skilled health professionals who work closely with physicians and specialize in the use of x-rays. They provide patient services using a variety of imaging modalities. In addition to conventional x-ray procedures, the radiographer also works with computerized axial tomography (CT), magnetic resonance imaging (MRI), cardiovascular-interventional technology, mammmography, bone densitometry, and quality management.

More About Radiography

Established in 1960, the Radiography Program is the only baccalaureate level program at a public institution of higher education in Missouri. This discipline provides preparation for leaders in the field by offering a Bachelor of Health Science degree. Graduates have demonstrated their superior achievement through their performance on national certifying examinations with a 100% overall pass rate. After graduating from the program, students may choose to do an additional clinical externship and complete required prerequisite courses. Students apply to the program, students may choose to do an additional clinical externship and complete required prerequisite courses. Students apply to the program.

Emphasis in Nuclear Medicine

Nuclear Medicine
School of Health Professions
605 Lewis Hall
(573) 884-7843
Director: Glen Heggie

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

More About Nuclear Medicine

Nuclear Medicine uses extremely small amounts of radioactive compounds in order to image and assess the function and state of health of many of the body’s internal organs, and to treat some forms of cancer. It is a multidisciplinary field dependent upon contributions from Physics, Chemistry and Medicine. This highly sophisticated discipline is at the forefront of discovering and understanding the complex physiologic processes of our bodies. This discipline is of enormous importance to medical specialties such as Cardiology (heart), Neurology (nervous system), Oncology (cancer), Orthopedics (bone), Endocrinology (hormone system), Hematology (blood), Nephrology (kidney), and Pulmonology (lung).

Mission Statement

The primary mission of the radiography program is to prepare highly competent, registry eligible professionals in the medical imaging sciences. Our program and curriculum are designed to provide an educational foundation for the advancement into leadership and managerial positions within medical imaging, as well as providing an environment where scholarly activity, professional development, and service are expectations. Our curriculum enables successful graduates to readily interact with a variety of health care and science related fields.

Faculty

Clinical Professor G. D. Heggie*
Clinical Associate Professor C. M. Allen
Clinical Assistant Professor M. Feldman, M. C. Sebacher, P. A. Tew

Undergraduate

• Department Level Requirements (p. 485)
• BHS in Radiologic Sciences (p. 486)
  • with emphasis in Radiography (p. 487)
  • with emphasis in Nuclear Medicine Technician (p. 486)

The Department of Cardiopulmonary and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in radiologic sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

Department Level Requirements - Radiologic Sciences

Instructional Plan

Radiography program faculty advise interested students throughout their college career. During the first two years, students enroll in general education courses (http://missouri.dev9.leepfrog.com/academicdegreerequirements/generaleducationrequirements) and complete required prerequisite courses. Students apply to the
radiography program during spring semester of their sophomore year (by February 1st). Upon acceptance into the program, students begin professional radiography courses summer semester of their Junior year. This professional phase of the program runs for 24 consecutive months.

In addition to general requirements and courses pertinent to radiography, students in the program will take interdisciplinary courses in cardiology, research, healthcare organization and management, radiation safety, and radiation biology. They will also have an opportunity to experience problem based learning (PBL) cases.

While in the program, students will receive clinical instruction at several clinical affiliates such as University of Missouri Hospital Center, Women’s & Children’s Hospital, Harry S Truman Veteran’s Administration Hospital and Boone Hospital Center. Our clinical affiliates provide students with a broad base of learning experiences. Other clinical rotations may include radiation therapy, nuclear medicine, diagnostic medical ultrasound, CT, MRI, veterinary medicine, mammography and trauma/emergency imaging.

**Essential Requirements**

Before beginning the professional phase of the School of Health Professions’ Radiography Program, we want you to have certain information available to you. We encourage you to read through the Essential Requirements (http://shp.missouri.edu/rs/download/ Essential_Requirements.pdf). The Radiography Program is a serious commitment—for you and for us. More than anything else, however, it is a serious commitment to patients, including those you will see and work with as students and, most importantly, those for whom you will be responsible later in your careers.

**BHS in Radiologic Sciences**

**Major Program Requirements**

There are two active emphasis areas in the radiologic sciences: Radiography and Nuclear Medicine. Students planning to complete one of these emphasis areas should contact the program director to determine eligibility for admission. All degree requirements are listed that the emphasis level.

**Semester Plan**

Refer to the Semester Plan for the emphasis areas.

**BHS in Radiologic Sciences with Emphasis in Nuclear Medicine Technician**

**Major Program Requirements**

The nuclear medicine technologist is concerned with the use of radioactivity for patient diagnosis, monitoring of treatment and in some cases the treatment itself. The nuclear medicine technologist uses radioactive compounds to perform body function studies, produce images of internal organs and analyze biological specimens.

The curriculum incorporates the fundamentals needed for specialization as a nuclear medicine professional. Accreditation of the program is granted by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education (p. 18) requirements.

**Emphasis Core Requirements**

**Prerequisites to the nuclear medicine emphasis**

Total Credits: 123

**BHS in Radiologic Sciences with Emphasis in Radiography**

**Major Program Requirements**

Radiographers are highly skilled health professionals who work closely with physicians specializing in the use of x-rays. They provide patient services using a variety of imaging modalities such as general x-ray, computed tomography, magnetic resonance imaging, mammography, interventional radiography, and bone densitometry. The radiographer must apply the principles of radiation protection, must be competent in the use and maintenance of delicate equipment and must have the ability to deal with patients and medical professionals.

Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive, Suite 2850
Chicago, Illinois 60606-3182
312-704-5300
mail@jrcert.org

Students transferring from other institutions should contact the program director to select appropriate prerequisite courses for admission. Students must complete these courses in addition to major, degree and University requirements (p. 17), including University general education requirements (p. 18).

**Emphasis core requirements**

**Prerequisites for radiography emphasis**

+ Course is taught solely on the internet.
Respiratory Therapy

School of Health Professions
614 Lewis Hall
(573) 882-9722
Program Director: Monica Schibig

The University of Missouri Respiratory Therapy Program was established in 1967. The program is credited to be among the country’s first baccalaureate degree programs in Respiratory Therapy. The University of Missouri’s Respiratory Therapy program prepares graduates for the Advanced Practitioner level, Registered Respiratory Therapist (RRT) and students graduate with a Bachelor of Health Science in Respiratory Therapy.

The Mission of the University of Missouri Respiratory Therapy Program is to coordinate superior classroom, laboratory, and clinical experiences to prepare advanced Respiratory Care Practitioners, develop learners who will effectively engage in professional leadership roles, and provide an environment where research and service are expectations.

Faculty

Clinical Professor G. D. Heggie*
Clinical Associate Professor M. A. Schibig, K.S. Moss*
Clinical Assistant Professor L. M. Lair
Clinical Instructor J. L. Keely, S. W. Parker

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Department Level Requirements (p. 489)
- BHS in Respiratory Therapy (p. 489)

The Department of Cardiopulmonary and Diagnostic Sciences offers the Bachelor of Health Science (BHS) with majors in Clinical Laboratory Science (with an emphasis area of Medical Technology), Diagnostic Medical Ultrasound, Respiratory Therapy, and Radiological Sciences. Students majoring in Radiological Sciences must complete emphasis areas in Radiography or Nuclear Medicine Technology.

Graduate

While MU does not offer graduate degrees specifically in respiratory therapy, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Undergraduate

Department Level Requirements - Respiratory Therapy

Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the major program requirements (p. 489) in addition to degree and University requirements (p. 17), which include University general education (p. 18) requirements.

BHS in Respiratory Therapy

Major Program Requirements

Respiratory care is a diverse, growing, health profession with extensive patient contact, often with the critically ill. Respiratory therapists administer prescribed respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. They work in many settings requiring a considerable degree of independent clinical judgment under the direct or indirect supervision of a physician.

The two-year, professional phase of the program begins the summer semester of the junior year. Students complete lecture and laboratory courses designed to develop knowledge and skills necessary for application to the clinical settings. Required courses in management, research, respiratory physiology and pharmacology, pathology and cardiology are integrated with the respiratory therapy curriculum. The final semester of the program consists entirely of clinical externships and online coursework. Students may select affiliated hospitals outside the Columbia area for this clinical experience or remain on campus at MU Health Care. The MU RT program has a satellite campus at Mercy Hospital-St. Louis for those students living in the St. Louis area.

Accreditation of the program is granted by the Committee on Accreditation for Respiratory Care (CoARC).

The following are MU courses. Students transferring from other institutions should contact the program director to select appropriate courses for admission. Students must complete the courses listed below in addition to degree and University requirements, which include University general education requirements.

The College of Human Environmental Sciences addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research, preparing professionals and providing outreach.

The college is unique among its peers in its comprehensive use of professional advisory boards, whose members are leaders in business, government, education and the social services. These experts provide guidance and support from their specialized fields to students and faculty and contribute powerful perspectives to curriculum development.

Undergraduate

• Admissions
• Advising
• Career Services

Admissions

Undergraduate students may enter the College of Human Environmental Sciences as freshmen. Some programs have requirements beyond those of the University. An entering freshman has the first year to explore the departments and the college as well as the combinations of subject areas for positions in fields such as education, health and welfare, business, industry and government.

All freshmen entering the College of Human Environmental Sciences enroll in GN_HES 1100 Introduction to Human Environmental Sciences or SOC_WK 1110 Introduction to the Social Work Major. These courses emphasize career decision-making, provide an orientation to the campus and the college, and bring into focus the role of a professional in the improvement of the quality of life in the near environment.

Transfer Student Application

Human Environmental Sciences

Students in another MU school or college, or from another UM System campus, must have a cumulative GPA and term GPA of 2.0 or better to be eligible for admission to the College of Human Environmental Sciences. For students who transfer to the UM System from another institution and then apply for transfer into the college, transcripts are re-evaluated by the college to determine what courses will apply to the degree.

A student ineligible to enroll in another school or college may not enroll in the College of Human Environmental Sciences during the period of ineligibility. An appeal for admission may be made after the period of ineligibility is over.

School of Social Work

Undergraduate students who have been admitted to the University after attending another college may request a social work major. Those who have completed more than 55 credits need a GPA of 2.5 or higher on all college work attempted.

Advising

Professional advising staff in the Student Services Office assists the students in planning their college programs.

Students earning credit from another institution will have a transfer equivalencies form completed by faculty for course work in their professional program. Transfer work is evaluated by the Office of Admissions. The HES Office of Student Services determines how transferred courses fit into a particular degree program.

It is the student’s responsibility to initiate a graduation check to be certain that all requirements are met. An application for graduation should be submitted to the HES Student Services Office the semester preceding graduation. The application is available online at: http://hes.missouri.edu/students_evalforgrad.html

Career Services

Career services cover a spectrum of career programs. These include business, education and agriculture career services offices on the campus. The Student Services Office and individual advisers provide information regarding procedures. Career exploration and preparation information may be obtained in the Career Center.

Graduate

The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master’s and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

Architectural Studies
Human Development & Family Studies
Nutrition & Exercise Physiology
Personal Financial Planning
Textile & Apparel Management
Social Work

The School of Social Work, housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College’s online graduate degree programs, see Mizzou Online.
The Department of Architectural Studies is a dynamic and personal place engaged in the processes, procedures, observations and techniques essential to the development of environmental designs for human living, work and leisure. It can be placed between the world of physical realities and the imaginary.

Architectural studies uses the arts and the sciences: the exact science for its stability and durability, thermal and acoustic capabilities of buildings; and the social sciences to develop a better understanding of people’s relationship with places and time.

Faculty

Professor B. Schwarz**, R. B. Tofle**
Associate Professor R. G. Phillips**
Assistant Professor B. Balakrishnan**, N. D’Souza**
Teaching Assistant Professor M. Goldschmidt*
Instructor L. Bartlett
Professor Emeritus R. Helmick*
Associate Professor Emeritus G. Hennigh

The Department of Architectural Studies offers a Bachelor of Science in Human Environmental Sciences with emphasis areas of either Architectural Studies or Interior Design. The Department’s mission is to educate future design practitioners, advance research of the built environment, and disseminate knowledge of architectural studies to improve quality of life for people.

The philosophy of the Department of Architectural Studies embraces the synergy created between architecture and interior design. Having a symbiotic relationship, both fields explore the design process and its final products. Promoting the meaning and value of physical settings and responding to the human condition, the program investigates the interaction between people and their surroundings to create a more beautiful and sustainable world. The program encourages an interdisciplinary, scholarly climate celebrating aesthetic values and the human sciences. The department also offers a minor in Architectural Studies.

Students may receive a minor in Entrepreneurship with required courses in Architectural Studies, an internship, and an additional 4 credits of specified coursework. See Undergraduate Minor in Entrepreneurship (p. 632) for more information.

Portfolio Review and Admission to Studio Sequence in the Department of Architectural Studies

Students must apply for admission to the studio sequence required for undergraduate majors. Applications must be made at the end of the spring semester of the freshman level for enrollment in ARCHST 2811 Studio I.

Application forms with deadlines are available from the department and department website. Admittance decisions are based on:

1. Review of design work submitted in a portfolio, which should include:
   • Satisfactory completion of ARCHST 1200 Architectural Drafting and Working Drawings
   • Satisfactory completion of 2-dimensional design coursework from: ARCHST 1100 Visual Design OR ART_GNRL 1030 Basic 2-D Design
   • Satisfactory completion of ART_DRAW 1050 Drawing I

2. Overall grade point average (including transfer courses), grades received in courses completed, and ACT scores (or equivalent for transfer students)

3. Enrollment capacity (approximately 40 students)

Laptop Computer Requirements

A laptop computer is required for the studio sequence at the beginning of the sophomore year. See department website for recommended specifications.

Graduate

College of Human Environmental Sciences
137 Stanley Hall
573-882-7224
http://arch.missouri.edu/

Director of Graduate Studies: Ronald Phillips

• MA in Architectural Studies (p. 496)
• MS in Architectural Studies (p. 497)
The College also offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 512).

About the Program

The department’s mission is to educate future design practitioners, advance research of the built environment and disseminate knowledge of architectural studies to improve quality of life for people. The philosophy of the Department of Architectural Studies embraces the synergy created between architecture and interior design. Having a symbiotic relationship, both fields explore the design process and its final products. Promoting the meaning and value of physical settings and responding to the human condition, the program investigates the interaction between people and their surroundings to create a more beautiful and sustainable world.

The program encourages an interdisciplinary, scholarly climate celebrating aesthetic values and the human sciences. Consistent attention is placed on planning and designing physical environments that support human needs and aspirations. Course work may include courses in supportive areas such as the human and physical sciences, art, humanities and allied design professions.

Professional Opportunities

Career opportunities for master’s and doctoral graduates of the Department and College include leadership positions in design; consultation practices in industry, government and education; and academic and administrative positions in higher education and research. Graduates from the MA degree program may pursue careers in the design professions, education and the advertising and entertainment industries. Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and based on the match between the department’s needs and candidate’s background.

Graduate Program Requirements

The academic program should be developed in consultation with an adviser by the end of the first full semester or at the successful conclusion of at least nine credit hours. See Graduate School website (‘Doctoral Plan of Study and Degree Requirements’) for guidelines and requirements regarding course work and role of dissertation committee. Students complete the online Graduate Student Progress System. Annual reviews of graduate students will be conducted to include the indicators listed by the Graduate School.

Architectural Studies Degrees

Graduate programs offer two emphases: 1) in environment and behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees and 2) in design with digital media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Undergraduate

Department Level Requirements - Architectural Studies

The Department of Architectural Studies has no department level requirements for the BSHES in Architectural Studies. All degree requirements can be found either in the BSHES in Architectural Studies with an emphasis in Architectural Studies (p. 494) page or the BSHES in Architectural Studies with an emphasis in Interior Design (p. 495) page.

BSHES in Architectural Studies

Major Program Requirements

The BSHES in Architectural Studies is offered with two emphasis area options: Architectural Studies (p. 494), and Interior Design (p. 495). All degree information is contained at the emphasis level.

Semester Plan

Refer to the Semester Plans at the emphasis level.

BSHES in Architectural Studies with Emphasis in Architectural Studies

Major Program Requirements

The Architectural Studies emphasis prepares students at the undergraduate level for application to professional architectural programs as well as for other roles in society in related fields - in research, government, development, management, planning, etc. While many of these occupations do not require a professional license, they do require an understanding of, and exposure to, a professional education.

Students may choose to continue their program of study for a master’s degree in architecture (M. Arch) at another university.

A program reciprocity agreement was developed with the University of Kansas (KU). All students interested in continuing their education are encouraged to maintain regular communication with the cooperating institution, because application and transfer procedures are subject to change. Students also continue at many other M. Arch programs in the U.S. where scholarships and other financial support may be available as determined by the institution.

Total Credits: 125-126

Minor in Architectural Studies

A minor in the Department of Architectural Studies is comprised of a minimum of 15 credits.

**Minor core requirements** 3
ARCHST 1600 Fundamentals of Environmental Design 3

**Electives** 12
Select from the following:
ARCHST 1100 Visual Design 3
ARCHST 1200 Architectural Drafting and Working Drawings 3
ARCHST 2005 Topics in Architectural Studies - Humanities 3
ARCHST 2100 Understanding Architecture and the American City 3
ARCHST 2220 Computer-Aided Drafting with AutoCad 3
ARCHST 2310 Building Systems 3
ARCHST 2315 Introduction to Building Systems Laboratory 1
ARCHST 2316 Advanced Building Systems Lab 2
ARCHST 3100 Color and Light 3
ARCHST 4230 Computer Graphic Application for Design I 3
ARCHST 4323 Sustainable Technologies and Systems 3
ARCHST 4320 Materials, Methods and Products 3
ARCHST 4430 Guiding Design with Historic Preservation 3
ARCHST 4440 Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution 3
ARCHST 4555 Recent Trends variable
ARCHST 4620 Environment and Behavior 3
ARCHST 4630 Shaping Human Settlements 3
ARCHST 4700 Place-Making in Community Design 3

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

Graduate

MA in Architectural Studies

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Statement of graduate goals and educational objectives discussing: which of the department’s emphasis areas is of interest; intentions regarding the MA, MS; and request for a specific advisor (upload to online application)

To the Program:

- Application statement of graduate goals and educational objectives discussing: which of the department’s emphasis areas is of interest; intentions regarding MA, MS, or PhD; and request for a specific advisor
- 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online
- Graduate School application or mailed directly to the program.
- For MA applicants only, electronic portfolio of images and/or publications. (Do not mail originals.)

Master of Art

The creative, project-based, MA plan of study is often undertaken in preparation for careers in the design professions and education, as well as in the advertising and entertainment industries. The project is conducted in the area of design with digital media using high-end computer software. The culmination of the degree is a professionally reviewed, visual project employing digital media.

Environment and Behavior Studies Emphasis

The Environment and Behavior Studies focuses on the multifaceted relationships between people and their physical, social, and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and related environmental design disciplines. A design project leads to the MA and research leads to the MS or PhD degrees.

Current study areas in environment and behavior include:

- Design Research
- Design Education
- Learning Environments for Design
- History of the Designed Environment
- Design Planning and Analysis
- Aesthetics of Design
- Universal Design/Accessibility
- Environment and Aging
- Health Care Design
- Housing, Neighborhood Design, and Sustainability
- Organizational Systems and Design
- Facility Management and Design
- Programming, Design and Post-Occupancy
- Evaluation

Contact Dr. Ronn Phillips for more information about the department’s graduate program or the emphasis in environment and behavior.

Design with Digital Media Emphasis

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior design and related disciplines. This program of study has an emphasis on design with digital media leading to MA, MS, and PhD degrees. MA is a project-based program of study, whereas the MS is research-based.

Current study areas in the digital media program include:

- 3D analysis of form, space and design principles in architecture
- 3D modeling and rendering, animation
- Design computing and cognition
- Design process and creativity research
- Digital and integrative audiovisual media for design communication
- Digital design education for architecture and interiors
- Digital design studio
- Impact of digital media on design thinking
- Study, exploration and research of generative digital representation techniques
- Theories of filmic and moving images
- Theory of representation
- Video game technology for architecture and interiors
- Virtual reality and real-time environment

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the coordinator of Design with Digital Media Dr. Bimal Balakrishnan for course content and research proposals.

MS in Architectural Studies

Admission Contact Information

Dr. Ronn Phillips (philipsr@missouri.edu)
137 Stanley Hall; Columbia, MO 65211
573-882-4575

Admission Criteria

Fall deadline: January 15
Minimum GPA: 3.0
Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>

<td>500</td>
</tr>
</tbody>
</table>

Required Application Materials

To the Graduate School:

- All required Graduate School documents
Statement of graduate goals and educational objectives discussing:
which of the department’s emphasis areas is of interest; intentions
regarding the MA, MS; and request for a specific adviser (upload to
online application)

To the Program:
• Application statement of graduate goals and educational objectives
discussing: which of the department’s emphasis areas is of interest;
intentions regarding MA, MS, or PhD; and request for a specific advisor
• 3 letters of recommendation (excluding MU Architectural Studies
faculty). Can be uploaded to the online
• Graduate School application or mailed directly to the program

Master of Science
The design and research-based MS plan of study is often undertaken in
preparation for professional practice or design education. The project is
conducted in emphasis areas as described below. Within each of these
emphases, specific course work is selected based on subject matter, the
type of design project and its research application. The culmination of
the degree is a professionally reviewed design project with supporting
written report. The research-based MS plan of study is often undertaken
as preparation for the doctoral degree.

Research is conducted in one of two emphasis areas — design with
digital media or environment and behavior studies. Within each emphasis
area, specific course work is selected based on subject matter and
the type of research method selected — quantitative, qualitative or a
combination of both methods. The culmination of the degree is the written
research thesis.

MS students must complete a final oral examination by an approved
faculty committee and submit a presentation proposal at a professional
conference or a manuscript in a professional journal.

Environment and Behavior Studies
Emphasis
The Environment and Behavior Studies emphasis area focuses on the
multifaceted relationships between people and their physical, social, and
cultural environments. Environment-behavior research explores a variety
of environments, linking them to a range of behavioral concerns. This
program is suitable for persons who seek careers in research, consulting,
and/or teaching in architecture, interior design, and related environmental
design disciplines. A design project leads to the MA and research leads
to the MS or PhD degrees.

Current study areas in environment and behavior include:
• Design Research
• Design Education
• Learning Environments for Design
• History of the Designed Environment
• Design Planning and Analysis
• Aesthetics of Design
• Universal Design/Accessibility
• Environment and Aging
• Health Care Design
• Housing, Neighborhood Design, and Sustainability
• Organizational Systems and Design

Design with Digital Media Emphasis
Design with Digital Media, as an integral part of the design process,
focuses on graphic ideation and the application of computer technology
for architecture, interior design and related disciplines. This program of
study has an emphasis on design with digital media leading to MA, MS,
and PhD degrees. MA is a project-based program of study, whereas the
MS is research-based.

Current study areas in the digital media program include:
• 3D analysis of form, space and design principles in architecture
• 3D modeling and rendering, animation
• Design computing and cognition
• Design process and creativity research
• Digital and integrative audiovisual media for design communication
• Digital design education for architecture and interiors
• Digital design studio
• Impact of digital media on design thinking
• Study, exploration and research of generative digital representation
  techniques
• Theories of filmic and moving images
• Theory of representation
• Video game technology for architecture and interiors
• Virtual reality and real-time environment

The culmination of the degree is a written and/or visual project employing
computer applications for design methods. Applicants interested in
the Design with Digital Media option should contact the coordinator of
Design with Digital Media Dr. Bimal Balakrishnan for course content and
research proposals.

- PhD in Exercise Physiology (p. 500)

About the Program

The Nutritional Sciences Graduate Program in Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The Exercise Physiology Graduate Program offers both MS and PhD degrees. These exercise physiology degrees are designed to prepare students for careers in exercise physiology or exercise physiology/nutrition. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantships are available on a competitive basis.

Areas of Research

Exercise physiology is a multidisciplinary program that integrates other disciplines such as biochemistry, nutrition, physiology, and biology. The primary focus of this department is prevention and treatment of chronic disease focusing primarily on physical activity/exercise, as well as considering nutrition. Current research focus of the faculty include: obesity, the metabolic syndrome, diabetes, physical inactivity, glucose control and intrahepatic fat accumulation.

Research Facilities

The Nutrition and Exercise Physiology Department has an Exercise Physiology Laboratory (Lab) that is located in McKee Gym within the Department of Nutrition and Exercise Physiology. The Lab is a 4200 sq. ft. multi-room facility, with a large exercise testing room and associated smaller rooms for body composition assessment and other purposes. This space also enables us to do clinical testing such as repeated blood sampling on multiple subjects. Our facility also has a chemistry laboratory dedicated to blood handling and chemical analyses. Additionally there is a dedicated fitness center for supervised exercise training sessions.
In addition, the Department of Nutrition and Exercise Physiology is also currently building the Missouri University Nutritional Center for Health (MUNCH), a metabolic kitchen and research space designed for nutritional studies focused on adult and childhood obesity in Gwynn Hall, and is scheduled for completion in September 2014. The Exercise Physiology Laboratory and the MUNCH facility will provide a unique, integrated platform to examine the effects of exercise and diet on obesity and chronic disease.

Further the University of Missouri Health Care Hospital and Clinics (MUHC) are located a few blocks from McKee, and houses the MU Institute of Clinical and Translational Sciences (MU-ICTS). This facility has a recently renovated Clinical Research Unit (CRU) which allows for more outpatient clinical studies.

Financial Aid from the Program
Assistantships are competitive and can be obtained in research, teaching, and community nutrition and fitness programs. Numerous scholarships also are available to attract incoming graduate students, including the Life Sciences Fellowship program.

Graduate
PhD in Exercise Physiology

Admission Contact Information
Tammy Conrad conradt@missouri.edu
106B McKee
Columbia, MO 65211
573 882-1144

PhD Admission Criteria
Deadline for Fall entrance: Dec 30

• Prerequisites: general and organic chemistry, physiology (5 h), anatomy, nutrition, kinesiology, exercise physiology
• Minimum 3.5 graduate GPA (4.0=A)
• Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  500
  100

• Minimum GRE scores:
  When did you take the GRE?  Verbal + Quantitative
  Prior to August 1, 2011  1000 4.0
  On or After August 1, 2011  150 3.5

Required Application Materials
To the Graduate School (210 Jesse Hall; Columbia, MO 65211):
All required Graduate School documents, including on line application
Required Supplementary Application Materials for the Program (upload online with your application to the Graduate School)
• Statement of Purpose: Upload a current Resume or Vita to the “Supplemental Information” section of your online application.
• Recommendations: Enter the required information for at least three recommenders in the “Recommendation: section of your online application. The recommenders will receive an email with instructions for completing and submitting your recommendation. Please ensure that the recommenders are aware of the December 30 application deadline.
• GRE Scores: Please make arrangements with Educational Testing Services to have official Graduate Record Exam (GRE) scores sent directly to our department. MU’s Institutional code is 6875 and our department code: 0214.

Financial Aid from the Program
Assistantships are competitive and can be obtained in research, teaching, and community nutrition and fitness programs. Numerous scholarships also are available to attract incoming graduate students, including the Life Sciences Fellowship program. In addition, outstanding students can apply for F21C fellowships. Other sources (university fellowships and minority recruiting) award assistantships-students also are sponsored by individual faculty members.

Plan of Study
The PhD program requires 85 hours beyond the bachelor’s degree. A committee of 4 faculty members must approve all graduate courses, including those hours those from other universities. The graduate coursework includes 15 hours in exercise physiology, plus coursework in physiology, nutrition, and biochemistry. Research requirements include NS 7500 (9 hours of research projects) and NS 9090 (12 hours dissertation). One semester of teaching experience is required, as is participation on a major external grant proposal.

Possible Courses to select from:

Exercise Science (Major Field)
NUTR_S 7840  Cardiovascular Health and Fitness 3
NUTR_S 7970  Sports Nutrition 2
NUTR_S 8030  Etiology of Obesity 3
NUTR_S 8850  Advanced Exercise Physiology (this class serves as the qualifying exam and minimum grade of a B is required) 3

Exercise Physiology Research

Comprehensive Exam

The comprehensive exam process includes writing, defending, and submitting a major grant proposal.

Reasonable Rate of Progress

At the end of each year the adviser will evaluate each doctoral student. Doctoral students must maintain a 3.5 GPA. In addition, each graduate student must maintain adequate research progress as judged by the adviser and/or graduate committee. Inadequate progress will result in a probationary period of 30 days to 1 semester.

## Undergraduate

- Department Level Requirements (p. 503)  
- BSHES in Human Development and Family Studies (p. 503)  
  - with emphasis in Child Development and Education (p. 504)  
  - with emphasis in Child Life Specialist (p. 505)  
  - with emphasis in Family and Consumer Sciences Education (p. 507)  
  - with emphasis in Families and Lifespan Development (p. 506)  
  - with emphasis in General Human Development and Family Studies (p. 509)  
  - with emphasis in General Human Development and Family Studies & Social Work (p. 509)  
-Minor in Human Development and Family Studies (p. 509)  

The Department of Human Development and Family Studies (HDFS) combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family studies major also prepares the student for graduate study in HDFS and related fields.

The department offers the BS HES with a major in Human Development and Family Studies. The student working with children and/or adults is encouraged to maximize the resources offered by the family. The student concerned with the quality of family life must also recognize the intricate spiral of changing needs in the developing individual. Students in the HDFS major must select one of the emphasis areas listed below. (Note: Emphasis areas appear on transcripts but not on diplomas.)

## Graduate

- Admission Contact Information  
  Tyler Jamison jamison@missouri.edu  
  405 Gentry Hall  
  573-882-1301

**Director of Graduate Studies:** Marilyn Coleman  
- MA in Human Development and Family Studies (p. 509)  
- MS in Human Development and Family Studies (p. 510)

The College also offers a PhD in Human and Environmental Studies with an emphasis Human Development and Family Studies (p. 513). They also offer Graduate Certificates in the following related areas: Youth Development Specialist (p. 546), Youth Development Program Management and Evaluation (p. 546), Gerontology (p. 546), and Geriatric Care Management (p. 546).  

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Selected in 2002 and again in 2007 as the Most Outstanding Graduate Department on campus, we have a nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. Our department houses
current and former journal editors as well as a past president of the National Council of Family Relations.

We have a well-established mentoring program, which begins as soon as the student is accepted into HDFS. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Since 2000, our program has placed more faculty into research extensive family studies departments than any other program in the U.S. We also prepare PhDs and master's students for applied careers in administration, program evaluation, and program development. Our alumni have positions with universities and colleges in the United States, Canada, and Korea. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define diversity and multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including, but not limited to race, ethnicity, socioeconomic status, age, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department

All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master’s Degrees

The Department of Human Development and Family Studies offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human service institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study

On-campus students selecting the MA or MS degree may specialize in family studies, child life, early childhood development, life span development, family mediation, human services program (emphasis in administration or policy), or a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in gerontology, youth development, or family and community services.

Master’s Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours

About the PhD

The Department of Human Development and Family Studies PhD degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

PhD Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

About the Online Certificate Programs

The Department of Human Development and Family Studies offers four online graduate certificates with specialization in youth development, youth development program management and evaluation, gerontology, and geriatric care management.

Note: Courses taken for any of the above certificate programs may be applied toward the related online MA degrees in youth development and gerontology. Up to 12 credits of coursework from the courses taken for any of the certificate programs may be applied toward their related online MA degrees described above.

For more information please follow the link to the certificate of interest.

Undergraduate

Department Level Requirements - Human Development & Family Studies

The Human Development and Family Studies Department does not have any specific Department Level Requirements. All degree requirements can be found on the BS HES in Human Development and Family Studies (p. 503) page and their respective emphasis area pages.

BSHES in Human Development and Family Studies

Major Program Requirements

 Majors in all of the emphasis areas in HDFS must complete the core courses below:

<table>
<thead>
<tr>
<th>Grade of 2.0 (C) or better required in these core classes*:</th>
<th>Major Program Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>H_D_FS 1600 Foundations of Family Studies</td>
<td>3</td>
</tr>
<tr>
<td>H_D_FS 2200 Research Methods in Human Development and Family Studies</td>
<td>3</td>
</tr>
<tr>
<td>H_D_FS 2300 Multicultural Study of Children and Families</td>
<td>3</td>
</tr>
</tbody>
</table>

*Note: Students must achieve a grade of 2.0 (C) or better in these core courses to progress in their degree program.
BSHES in Human Development and Family Studies with Emphasis in Child Development and Education

Major Program Requirements

This emphasis is designed to prepare graduates for positions of responsibility and leadership in public and private preschool programs, child-care centers, infant-care programs, after-school programs and other educational and social service settings that serve families and children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

The general goal of the emphasis area is to provide instruction and experience to help students gain competence in working with young children and their families. The emphasis is on understanding human development, with primary focus on child development, early childhood education, and children's relationships with family members. Attention is also devoted to the development of working relationships with professional colleagues and community workers.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**BSHES in Human Development and Family Studies with Emphasis in Family and Consumer Sciences Education**

### Major Program Requirements

This emphasis prepares graduates for certification to teach family and consumer sciences from birth to grade 12 in public schools. The program combines courses in the human sciences with courses in teacher preparation from the College of Education. In order to progress to Phase II, students must earn a minimum GPA of 2.75, C-Base minimum score of 235 and PRAXIS minimum score of 162.

This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Students must complete the field experience and internship to earn the degree and be eligible for recommendation for state certification to teach. Failure to provide appropriate documentation, or pass criminal background checks may result in dismissal from the program. The student is responsible for all costs incurred with these requirements.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

**BSHES in Human Development & Family Studies with emphasis in General HDFS**

This degree program is under revision at this time. Contact the HES Student Services Offices for additional information on course requirements.

**BSHES in Human Development & Family Studies with emphasis in General HDFS & Social Work**

**Major Program Requirements**

We are not currently accepting applicants for this emphasis area. Contact the Human Environmental Sciences Advising (p. 502) office for further information.

**Semester Plan**

There is not a semester plan for this emphasis area.

**Minor in Human Development and Family Studies**

A minor in HDFS may be obtained by taking 16 credits in the following courses:

- H_D_FS 1600 Foundations of Family Studies 3
- H_D_FS 1610 Intimate Relationships and Marriage 3
- H_D_FS 2300 Multicultural Study of Children and Families 3
- H_D_FS 2400 Principles of Human Development 4
- H_D_FS 3420 Early and Middle Childhood (or equivalent) * 3
- or H_D_FS 3430 Adolescence and Young Adulthood
- or H_D_FS 3440 Adulthood and Aging

**Total Credits:** 16

* Students who have completed PSYCH 2410, ESC_PS 2500 cannot receive credit for H_D_FS 3420.

**Graduate**

**MA in Human Development and Family Studies**

**Admission Contact Information**
Marilyn Coleman colemanma@missouri.edu
314 Gentry; Columbia, MO 65211
573-882-4360

**Admission Criteria for Campus Programs**

Fall deadline: December 15
Spring deadline: November 15

Minimum TOEFL scores:
Internet-based test (iBT) | Paper-based test (PBT)
--- | ---
61 | 500

Minimum GRE scores:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
- Required Application Materials for Campus Programs (submitted online via the apply yourself system)
- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

**Admission Criteria for Online Programs**

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

**Required Application Materials for Online Programs**

submit online via the applyyourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts
Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
- Family Mediation: 36 hours
- Human Services: 36 hours
- Gerontology: 36 hours
- Youth Development: 36 hours
- Family and Community Services: 36 hours
- Dual MSorMA/JD: approximately 113 hours Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

</tbody>
</table>

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
- Required Application Materials for Campus Programs (submitted online via the apply yourself system)
- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Admission Criteria for Online Programs

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

Submit online via the applyyourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- Personal statement
- Resume or Curriculum Vitae

Plan of Study Options

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master’s degree is as follows:

- Family Studies: 36 hours
- Child Life: 30 (fast track) or 36 hours
- Early Childhood: 36 hours
- Life Span: 36 hours
• Family Mediation: 36 hours
• Human Services: 36 hours
• Gerontology: 36 hours
• Youth Development: 36 hours
• Family and Community Services: 36 hours
• Dual MSorMA/JD: approximately 113 hours Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090 (p. 509)), complete a project (H_D_FS 8090 (p. 509)), or do an internship (H_D_FS 8972 (p. 509)) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Research

Based on their chosen degree option and whether they are pursuing the MS or MA degree, master’s students may write a thesis (H_D_FS 9090), complete a project (H_D_FS 8090), or do an internship (H_D_FS 8972) for up to six credit hours. The thesis requires testing a hypothesis or exploring a research question. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students who wish to pursue the thesis option must petition the department’s graduate faculty for approval. Students completing a thesis earn a Master of Science degree. Those completing a project or internship earn the Master of Arts. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.
Human Environmental Sciences

Human Environmental Sciences Extension Specialist

A student who plans to be an extension specialist may choose a subject-matter area of interest. In addition, a master's degree in a subject-matter area generally is required in Missouri.

The student must fulfill the requirements for the chosen major while pursuing the extension objective. Additional electives can be chosen from such areas as adult education, communications and the social sciences.

Faculty

Millisap Professor G. Carlo**
Curator’s Professor M. Coleman**
Assistant Teaching Professor M. Goldschmidt**, S. L. Green-Ivey, F. Palermo, C. Reeser*
Assistant Research Professor M. Herzog*
Professor Emeritus R. Helmick*, K. Thornburg*
Instructor R. Law, AFC

Associate State Personal Finance Specialist B. Procter, L. Schrader, A. Zumwalt

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in human environmental sciences, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Human Environmental Sciences, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

137 Stanley Hall

Required Application Materials

To the Graduate School:

• All required Graduate School documents
• Statement of graduate goals and educational objectives discussing: which of the department’s emphasis areas of interest; intentions regarding PhD; and request for a specific adviser (upload to online application)

To the Architectural Studies Program:

• Departmental application
• 3 letters of recommendation (excluding MU Architectural Studies faculty). Can be uploaded to the online Graduate School application or mailed directly to the program.

Doctor of Philosophy

The Doctor of Philosophy (PhD) degree is designed for individuals who are interested in acquiring the knowledge and skills that are needed to conduct substantive, innovative, and original research that contribute to the theoretical and methodological foundation of architecture and interior design, and the dissemination of this research through teaching, publication, and practice. To this end, the curriculum is structured so that students move gradually from overview of architectural research to the identification and pursuit of major and minor areas of specialization and, finally, to highly specialized original dissertation research. This framework
promotes stimulating intellectual discourse among individuals with varying research philosophies and interests.

In order to pass examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

- It demonstrates authority in the candidate’s field and shows evidence of command of knowledge in relevant fields;
- It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
- It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
- It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
- It is a careful, rigorous and sustained piece of work demonstrating that a research “apprenticeship” is complete and the holder should be admitted to the community of scholars in the discipline.

Doctoral study in Architectural Studies, College of Human Environmental Sciences, is research-based and expands knowledge in the “major” areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation.

Students will choose a “supportive cognate area” which is intended to reinforce the development of an understanding of the discipline. Supporting cognate area courses are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents.

PhD Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. The doctoral program committee provides departmental approval of the student’s plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

- Prepare the student for research or scholarly investigation in the chosen field of study.
- Satisfy the credit-hour and residency requirement of the department.
- Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
- Satisfy the Graduate School’s requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends to the vice provost/dean, as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination.

The PhD is a research-based plan of study leading to the written doctoral dissertation. The dissertation is distinctive because it demonstrates the ability to conceive of and execute scholarly research, and it makes a contribution of new knowledge to the discipline. Research is conducted in one of the two interest areas — environment and behavioral studies or design with digital media. Specific course work is chosen based on subject matter and the type of research method selected— quantitative, qualitative or a combination of both.

PhD students must complete a final oral examination by an approved faculty committee and submit a presentation proposal at a professional conference or a manuscript in a professional journal.

- GRE score (and TOEFL score for international applicants)
- Personal statement
- Resume or Curriculum Vitae
- Official Transcripts

Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to their specific research interests. Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).
Qualifying Process for Doctoral Students

To be officially admitted to the HDFS doctoral program, students generally must have completed a master's degree in HDFS or a related field, although exceptions are granted.

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student's program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department's description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

PHD Comprehensive Matriculation Exam

The comprehensive exam consists of two parts. Part I involves an in-house written and oral examination over

1. theory, methods, and statistics,
2. the student's area of specialization and core content, and
3. the student's collateral area.

The advisor is responsible for collecting questions from all five committee members, constructing the exam, and getting approval for the final version of the exam from available committee members. It is expected that the written exam will take the student no longer than 8 hours (e.g., two half-days or one full day) to complete. The written exam will be assessed by the committee and the student will meet with the committee for an oral defense of the written exam. If this part of the exam is passed the student moves to Part II of the comprehensive exam, which involves writing a grant pre-proposal and, if approved, a full grant proposal as outlined in the HDFS Graduate Handbook. For a detailed description of the comprehensive exam timeline please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Admission to Candidacy

After students pass Parts I and II of the comprehensive examination, they complete the D3 form to apply to the Division of Graduate Studies for admission to doctoral candidacy. Following admission to candidacy, students complete a prospectus for the dissertation project. The prospectus includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student's dissertation prospectus.

Time Limits on Degree Completion

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master's degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study. HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

Petitions for Extension

On petition of the candidate, an extension of 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate’s department, an extension of this time limit may be granted by the Graduate School.

PhD in Human Environmental Sciences with Emphasis in Human Nutrition Foods and Food Systems Management

The department is not currently accepting applicants for this degree program emphasis. Contact the department (p. 512) for further information.

PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

Application Deadlines

Fall deadline: February 1
Spring deadline: October 1

Admission Criteria

- Minimum TOEFL scores (for ESL applicants only):
  - Internet-based test (iBT) 79
  - Paper-based test (PBT) 550
- Minimum GPA: 3.0 in last 60 hours

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- 3 letters of recommendation
- GRE scores (or GMAT for Applied MS in Personal Financial Planning)
- Statement of Purpose
- Official transcripts

About the Program

The Nutritional Sciences Graduate Program in Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. In addition, the Exercise Physiology research program
collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

The Exercise Physiology Graduate Program offers both MS and PhD degrees. These exercise physiology degrees are designed to prepare students for careers in exercise physiology or exercise physiology/nutrition. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Teaching and research assistantships are available on a competitive basis.

Areas of Research

Exercise physiology is a multidisciplinary program that integrates other disciplines such as biochemistry, nutrition, physiology, and biology. The primary focus of this department is prevention and treatment of chronic disease focusing primarily on physical activity/exercise, as well as considering nutrition. Current research focus of the faculty include: obesity, the metabolic syndrome, diabetes, physical inactivity, glucose control and intrahepatic fat accumulation.

Research Facilities

The Nutrition and Exercise Physiology Department has an Exercise Physiology Laboratory (Lab) that is located in McKee Gym within the Department of Nutrition and Exercise Physiology. The Lab is a 4200 sq. ft. multi-room facility, with a large exercise testing room and associated smaller rooms for body composition assessment and other purposes. This space also enables us to do clinical testing such as repeated blood sampling on multiple subjects. Our facility also has a chemistry laboratory dedicated to blood handling and chemical analyses. Additionally there is a dedicated fitness center for supervised exercise training sessions.

MS Admission Criteria

Deadline for Fall entrance: Dec 30

• Prerequisites: general and organic chemistry, physiology (5 h), anatomy, nutrition, kinesiology, exercise physiology
• Minimum 3.0 undergraduate GPA (4.0=A)
• Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  100  500
  • Minimum GRE scores:
  When did you take the GRE?  Verbal + Quantitative
  Prior to August 1, 2011  1000 3.5
  On or After August 1, 2011  150 3.5

Required Application Materials

To the Graduate School (210 Jesse Hall; Columbia, MO 65211):

All required Graduate School documents, including on line application

Required Supplementary Application Materials for the Program (upload online with your application to the Graduate School)

• Statement of Purpose: Upload a Statement of Purpose, indicating your academic/research interests and career goals to the “Supplemental Information” section of your online application.
• Resume or Vita: Upload a current Resume or Vita to the “Supplemental Information” section of your online application.
• Recommendations: Enter the required information for at least three recommenders in the “Recommendation: section of your online application. The recommenders will receive an email with instructions for completing and submitting your recommendation. Please ensure that the recommenders are aware of the Dec 30 application deadline.
• GRE Scores: Please make arrangements with Educational Testing Services to have official Graduate Record Exam (GRE) scores sent directly to our department. MU’s Institutional code is 6875 and our department code: 0214.

Financial Aid from the Program

No additional materials are required to be considered for an assistantship.

Plan of Study

The core program consists of 23 hours of course work including a research project (3 hours) and a formal research thesis (4 hours). See the courses section for more information.

Reasonable Rate of Progress
At the end of each year the adviser will evaluate each master’s student. Master’s students must maintain a 3.0 GPA. In addition, each graduate student must maintain adequate research progress as judged by the adviser and/or graduate committee. Inadequate progress will result in a probationary period of 30 days to 1 semester.

Masters Thesis
A written thesis, based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Reasonable Rate of Progress
Each graduate student must complete the Annual Review Requirement by updating information in the Graduate Student Progress System. At the end of each year the adviser will evaluate each master’s student. Each student must maintain a 3.0 GPA. In addition, each graduate student must maintain adequate research progress as judged by the adviser and/or graduate committee. Inadequate progress will result in a probationary period of 30 days to 1 semester.

Length of Study Policy
The program for the master’s degree MUST be completed within a period of three (3) years beginning with the first semester of enrollment in which the student is accepted to a degree program. Time spent in the armed services will not count toward the three (3)-year limit (see Graduate School Active Duty Policy). For any extension of this time limitation, the student must petition their faculty advisor/mentor and the academic program’s director of graduate studies in writing prior to the end of the 5th semester of enrollment in the program. The director of graduate studies will notify the adviser in writing of the decision.

In addition, the Department of Nutrition and Exercise Physiology is also currently building the Missouri University Nutritional Center for Health (MUNCH), a metabolic kitchen and research space designed for nutritional studies focused on adult and childhood obesity in Gwynn Hall, and is scheduled for completion in September 2014. The Exercise Physiology Laboratory and the MUNCH facility will provide a unique, integrated platform to examine the effects of exercise and diet on obesity and chronic disease.

Further the University of Missouri Health Care Hospital and Clinics (MUHC) are located a few blocks from McKee, and houses the MU Institute of Clinical and Translational Sciences (MU-ICTS). This facility has a recently renovated Clinical Research Unit (CRU) which allows for more outpatient clinical studies.

MS in Nutrition and Exercise Physiology with emphasis in Nutritional Sciences

Statistics 6
NUTR_S 8087  Masters Seminar in Nutritional Sciences 1
NUTR_S 8090  Masters Research in Nutritional Sciences 4

Total Credits 30

A total of >30 hours of credit beyond the bachelor’s degree are required, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and / or Problems courses.

**Masters Thesis**

A written thesis, based upon original research, that is student's own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

**Reasonable Rate of Progress**

Each graduate student must complete the Annual Review Requirement by updating information in the Graduate Student Progress System. At the end of each year the adviser will evaluate each master's student. Each student must maintain a 3.0 GPA. In addition, each graduate student must maintain adequate research progress as judged by the adviser and/or graduate committee. Inadequate progress will result in a probationary period of 30 days to 1 semester.

**Length of Study Policy**

The program for the master’s degree MUST be completed within a period of three (3) years beginning with the first semester of enrollment in which the student is accepted to a degree program. Time spent in the armed services will not count toward the three (3)-year limit (see Graduate School Active Duty Policy). For any extension of this time limitation, the student must petition their faculty advisor/mentor and the academic program’s director of graduate studies in writing prior to the end of the 5th semester of enrollment in the program. The director of graduate studies will notify the adviser in writing of the decision.

Undergraduate
- Department Level Requirements (p. 520)
- BSHES in Nutritional Sciences (p. 521)
  - with emphasis in Medical Dietetics (p. 521)
  - with emphasis in Nutrition and Fitness (p. 522)
  - with emphasis in Nutritional Sciences (p. 523)
- Minor in Nutritional Sciences (p. 524)

The program leading to the BS in Human Environmental Sciences with a major in Nutritional Sciences offers designated emphasis areas in medical dietetics, nutrition and fitness, and nutritional sciences. A minor is also available in nutritional sciences. The department administers graduate programs in nutritional sciences and exercise physiology.

Students who want to explore the major can take NUTR_S 1034 Nutrition, Current Concepts and Controversies or NUTR_S 1340 Introduction to Exercise and Fitness.

Graduate

Nutrition and Exercise Physiology (p. 516) (Masters programs in Nutritional Science and Exercise Physiology)
Exercise Physiology (p. 500) (PhD in Exercise Physiology)

The catalog provides a complete list of degree options (p. 5) at the University of Missouri.

Undergraduate

Department Level Requirements - Nutritional Sciences

The department has a set GPA requirement for students entering each program. The specific requirements can be found on our department website http://ns.missouri.edu

Dietetics - Admission is competitive and application requirements include a minimum cumulative grade point average of 3.2 on a 4.0 scale and completion of the following prerequisite courses: 15-20 hours of general education requirements, human physiology with laboratory, organic chemistry with laboratory, biochemistry, basic nutrition with physiology prerequisites, and food preparation with chemistry prerequisites.

Nutrition and Fitness - students may transfer into the program as pre-N&F, but will be unable to take the upper level courses until they advance into the program. To advance, a student must earn a minimum 2.65 CUM GPA after 30 credit hours, including completion of CHEM 1320,BIO_SC 1010/BIO_SC 1020 or BIO_SC 1500, MATH 1100 or equivalent, NUTR_S 1340 and Physiology (MPP 3202 or MPP 3333/MPP 3337) or Anatomy (PTH_AS 2201). These classes required a C or better.

Nutritional Sciences (pre_Med) - to enter the Nutritional Sciences Program, students are required to have a minimum GPA of 2.65 and
be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required course per semester to be eligible.

**BSHES in Nutritional Sciences**

**Major Program Requirements**

The BSHES in Nutritional Sciences is offered with three emphasis options: Medical Dietetics, Nutrition and Fitness, and Nutritional Sciences. All degree requirements are listed at the emphasis level.

**Semester Plan**

Refer to the Semester Plans in the emphasis areas.

**BSHES in Nutritional Sciences with Emphasis in Medical Dietetics**

**Major Program Requirements**

The Coordinated Program in Dietetics combines academic course work with supervised practice in healthcare and other practice settings. Enrollment is limited to a maximum of 15 students per year. To apply, students must have completed (or be enrolled in) prerequisite courses and have a GPA of at least 3.2. Students must achieve a course grade of “B-” or better in BIOCHM 3630, or equivalent transfer courses approved by faculty.

Graduates are eligible to take the Registration Examination for Dietitians, which is required to obtain the RD (Registered Dietitian) credential. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics. For additional information, please go to http://ns.missouri.edu/.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

BSHES in Nutritional Sciences with Emphasis in Nutrition and Fitness

Major Program Requirements

Graduates of this program are prepared for employment in the fitness and health promotion area or for graduate studies in exercise science. This is a rapidly expanding area with opportunities in corporate and commercial industries, government and non-profit sectors. Typical employment responsibilities include fitness assessment, nutrition education, health promotion, exercise supervision and program administration.

Students desiring to declare Nutrition and Fitness as a major are required to have earned a minimum overall GPA of 2.65 after 30 credit hours, including completion of the following courses or their equivalents with a minimum grade of “C”:

- BIO_SC 1010 General Principles and Concepts of Biology & BIO_SC 1020 and General Biology Laboratory or BIO_SC 1500 Introduction to Biological Systems with Laboratory
- CHEM 1320 College Chemistry I
- MATH 1100 College Algebra
- NUTR_S 1340 Introduction to Exercise and Fitness
- MPP 3202 Elements of Physiology
- PTH_AS 2201 Human Anatomy Lecture

Prior to achieving these requirements, students will be considered “Pre-Nutrition and Fitness” and are not eligible to take upper-level Nutrition and Fitness courses. Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

BSHES in Nutritional Sciences with Emphasis in Nutritional Sciences

**Major Program Requirements**

This program of study provides a strong foundation in science with a focus on human nutrition. Graduates are prepared for advanced study in human nutrition, medicine, dentistry or other health-related careers. This program is an excellent choice for premedicine students with an interest in family practice or rural medicine.

To enter the nutritional sciences program, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NUTR_S course per semester.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**Science Foundation**

| BIO_SC 1500 | Introduction to Biological Systems with Laboratory | 3-5 |
| CHEM 1320 | College Chemistry I | 4 |

**Total Credits: 120**

**Minor in Nutritional Sciences**

The minor in nutritional sciences is intended for students majoring in biological sciences, biochemistry, health and exercise sciences or related fields. A minimum of 3 credit hours of organic chem and/or physiology are needed to take the required course NUTR_S 2340 Human Nutrition I.

**Minor core requirements**

- NUTR_S 2340 Human Nutrition I 3
- Select 12 credits from the following approved nutrition courses: 12
  - NUTR_S 2450 Nutrition Throughout the Life Span
  - NUTR_S 2460 Eating Disorders
  - NUTR_S 3390 Teaching and Counseling Techniques in Nutrition
  - NUTR_S 4330 Human Nutrition II Laboratory
  - NUTR_S 4340 Human Nutrition II Lecture
  - NUTR_S 4360 Nutritional Assessment
  - NUTR_S 4370 Nutrition Therapy I
  - NUTR_S 4380 Nutrition Therapy II

Admissions
Students must have a University of Missouri cumulative GPA of at least a 2.5 (2.25 for Financial Counseling), based on at least 50 credits attempted, and a C (2.0) or better in FINPLN 2183 and FINPLN 3283 to be admitted to either the Personal Financial Planning or Financial Counseling professional programs of the department. Personal Financial Management Services cumulative GPA of at least a 2.0, based on at least 50 credits attempted, and a C (2.0) or better in FINPLN 2183 and FINPLN 3283. A grade in the D range is allowed in only one course in the professional program, regardless of emphasis area.

Faculty
Associate Professor D. L. Sharpe**, R. O. Weagley**
Assistant Professor R. Yao**, M. Guillemette*
Teaching Assistant Professor S. Ivey, H. Zan*
Instructor R. Law
Extension Assistant Professor L. Schrader, A. Zumwalt
Extension Associate G. McCaulley
Emeritus Professor E. Metzen, P. Lieurance

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

• Certificate in Personal Financial Planning (p. 529)
The College also offers a PhD in Human Environmental Sciences with an emphasis in either Personal Financial Planning (p. 514) or Consumer and Family Economics (p. 514).

About the Program
Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students’ programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.

Certification Information
Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning; an Applied Master's Degree; and a joint JD/MS in cooperation with the School of Law.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid
If you wish to be considered for internal assistantships, fellowships or other funding packages, check the program website or contact the director of graduates studies, Rui Yao (yaor@missouri.edu) for details.

Faculty Areas of Study
Students have opportunity to work closely with department faculty who are widely recognized professionals in various aspects of personal financial planning and consumer and family economics. Faculty research interests cover a broad spectrum of financial and economic issues, including, but not limited to college savings and affordability, retirement savings, health care financing, risk analysis, labor supply and household production choices, consumer behavior, consumer expenditure patterns,
Consumer credit use, insurance demand, and low-income financial literacy.

Undergraduate

Department Level Requirements - Personal Financial Planning

There are no requirements at the department level for this degree.

BSHES in Personal Financial Planning

Major Program Requirements

The Department of Personal Financial Planning offers a major in Personal Financial Planning with three emphasis areas: Personal Financial Planning, Financial Counseling, and Personal Financial Management Services. In each option, the student must complete requirements for each phase of the degree program listed below:

• University general education requirements (p. 18)
• College of Human Environmental Sciences graduation requirements
• Major core courses
• Professional specialization

Major core requirements

FINPLN 2083 Financial Planning Careers 1
FINPLN 2183 Personal and Family Finance 3
FINPLN 4188 Community Agencies and Volunteerism 3
FINPLN 3287 Consumer and Household Economics I 3
FINPLN 4380 Assessing the American Dream 3

Social and Behavioral Sciences requirements

PSYCH 1000 General Psychology 3
SOCIOL 1000 Introduction to Sociology 1-3
ECONOM 1014 Principles of Microeconomics 3
or AG_EC 1041 Applied Microeconomics
ECONOM 1015 Principles of Macroeconomics 3
or AG_EC 1042 Applied Macroeconomics

Total Credits 23-25

* Require a minimum grade of C (2.0).

Semester Plan

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

BSHES in Personal Financial Planning with Emphasis in Financial Counseling

Major Program Requirements

This emphasis prepares students to be financial counselors. Financial counselors require expertise in a variety of financial counseling and planning strategies, therefore students take a mix of classes in financial counseling, financial planning, human development and family studies (HDFS) and social work. This emphasis satisfies the academic requirements for the Accredited Financial Counselor (AFC) designation and allows the graduate to sit for the AFC exam, which is offered by the Association for Financial Counseling and Planning Education (AFCPE). Graduates must complete education requirements, pass the AFC exam, obtain professional experience and agree to adhere to the AFCPE code of ethics before being able to use the AFC mark.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

Professional specialization requirements

ACCTCY 2036 Accounting I 3
or ACCTCY 2010 Introduction to Accounting
ECONOM 3229 Money, Banking and Financial Markets 3
FINPLN 3282 Financial Counseling 3
FINPLN 3283 Financial Planning: Computer Applications 3
FINPLN 4187 Tax Planning 3
FINPLN 4382 Financial Planning: Risk Management 3
FINPLN 4383 Financial Planning: Investment Management 3
FINPLN 4993 Internship in Personal Financial Planning 3
H_D_FS 4610 Stress in Families 3
H_D_FS 4620 Family Interaction 3
H_D_FS 4630 The Process of Divorce 3
MANGMT 3540 Introduction to Business Law 3
MATH 1400 Calculus for Social and Life Sciences I 3
SOC_WK 2000 Exploration in Social and Economic Justice 3
SOC_WK 4710 Social Justice and Social Policy 3
STAT 1300 Elementary Statistics 3
or STAT 2500 Introduction to Probability and Statistics 3

Total Credits 48
BSHES in Personal Financial Planning with Emphasis in Personal Financial Management Services

Major Program Requirements

This emphasis prepares students for entry into a variety of positions that require expertise in the management of individual and family financial resources, combined with a specialized focus in a supportive area of study. Positions are available in a wide array of occupations.

Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

**Professional specialization electives**

These courses are selected by students from a list of approved courses to complement their degree. Suggested tracks are provided below. Each track represents nine of the eighteen required professional electives. Contact the Student Services Office of the College of Human Environmental Sciences or your departmental advisor to focus your additional credits in a specific area. (NOTE: Tracks will not appear on diploma or transcript.)

**Total Credits** 48

**Tracks:** Students may choose one cluster as nine hours of the eighteen hours of Professional Electives. Each cluster, when combined with the Supporting Course Requirements, meets the requirements for a minor in the College of Business, or Economics. Students are strongly encouraged to focus their remaining nine hours in course work that complements their sub-emphasis. At least one of these courses shall be at the 4000 level, or above.

BSHES in Personal Financial Planning with Emphasis in Personal Financial Planning

**Major Program Requirements**

The Personal Financial Planning emphasis is registered with the Certified Financial Planner Board of Standards. This emphasis satisfies the academic requirements for the Certified Financial Planner™ certification and allows the graduate to sit for the comprehensive CFP® certification examination. Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP® marks.
Students must complete all university requirements, including general education (p. 18), in addition to the degree requirements below.

---

**Graduate**

**MS in Personal Financial Planning**

**Degree Information**

**Master of Science (thesis option)**

The thesis-based Master of Science program requires a minimum of 30 hours. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills. Course work culminates in a master's thesis.

**Five-Year Bachelor of Science/Master of Science Option**

The curriculum of this 150-Hour Program provides students with a comprehensive background in financial planning procedures and practice, meeting the Certified Financial Planner Board of Standards' education requirement, allowing a student to sit for the CERTIFIED FINANCIAL PLANNER™ exam. Course work encompasses root disciplines of economics, mathematics, and statistics and focuses on the interaction between the household and the financial sector. Students will acquire a broad background in business related courses, as well as skills in communication, professional practice, and use of computer information systems.

---

**Applied Master of Science (non-thesis option)**

The Applied Master of Science is a 36 hour program. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ exam and to broaden the practitioner’s understanding of the various factors that can affect and enhance a client’s financial security and economic well-being. Course work culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning. (This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA degree option will require 42 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

**Application Deadlines**

- **Fall deadline**: February 1
- **Spring deadline**: October 1

**Admission Criteria**

- Minimum TOEFL scores (for ESL applicants only):
  - Internet-based test (iBT): 79
  - Paper-based test (PBT): 550
- Minimum GPA: 3.0 in last 60 hours

**Required Application Materials**

To the Graduate School:

- All required Graduate School documents
- 3 letters of recommendation
- GRE scores (or GMAT for Applied MS in Personal Financial Planning)
- Statement of Purpose
- Official transcripts
- Resume

**Graduate Certificate in Personal Financial Planning**

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program designed to prepare students to sit for the rigorous, national CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor’s degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard’s education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

Courses Required for the Applied Master’s Degree and the Graduate Certificate in Personal Financial Planning:
FINPLN 7382 Financial Planning: Risk Management 3
FINPLN 7383 Financial Planning: Investment Management 3
FINPLN 7187 Financial Planning: Tax Planning 3
FINPLN 7386 Financial Planning: Employee Benefits and Retirement Planning 3
FINPLN 7393 Financial Planning: Estate and Gift Planning 3
FINPLN 7389 Financial Planning: Case Analysis 3

Elective Courses

Since the Personal Financial Planning Certificate is a registered program under the oversight of a professional organization granting a professional designation, all courses are required. Electives may be taken as part of the Applied Master of Science (non-thesis options), the Master of Science (thesis option) and the doctoral programs.

Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Department Level Requirements (p. 532)
• BSW in Social Work (p. 532)

Social work is a dynamic and growing human service profession that plays an increasingly important and visible role in our everyday lives. The major educational objective of the undergraduate program in the School of Social Work, which is a unit in the College of Human and Environmental Sciences, is to prepare students for competent and skillful first-level professional social work practice.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers.

Career & Employment Outlook

Jobs in social work are expected to grow faster than average into the 21st century. Through social work’s unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students must have a grade of C+ or better in all required social work core classes.

The Professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will participate in a social service agency for a 400 hour supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.
Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional social work program if they meet the following criteria:

1. At least 42 credits completed (second semester sophomore status) by the application deadline and
2. Minimum 2.5 cumulative GPA required
3. Completion of required liberal arts prerequisite courses (denoted with *) with minimum grades in "C" range or higher.
   - Anthropology (student's choice)
   - BIO_SC 1010*
   - College Algebra*
   - COMMUN 1200*
   - Economics (macro or micro)*
   - ENGLSH 1000*
   - History (HIST 1100, HIST 1200, HIST 1400, HIST 2440, HIST 2210) OR Political Science (POL_SC 1100, POL_SC 2100)
   - Philosophy (PHIL 1000, PHIL 1100, or PHIL 1200 recommended)*
   - PSYCH 1000*
   - SOCIOL 1000*
4. Minimum 2.5 cumulative GPA required
5. Submission of BSW Professional Program application, includes personal statement of outlined questions, 3 references, and transcript by early deadline of February 15 or late deadline of May 15.

Students wanting to explore social work as a major may take the following exploratory courses:

- SOC_WK 1110 Introduction to the Social Work Major 1
- SOC_WK 1115 Social Welfare and Social Work 3
- SOC_WK 2000 Exploration in Social and Economic Justice 3

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri's tightly interlocked missions of teaching, research, outreach, and economic development.

**Careers**

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

**Undergraduate**

Department Level Requirements - Social Work

**Departmental Honors**

Candidates for departmental Honors must be students in the BSW professional program with a 3.5 or higher GPA. Students must complete honors designated sections of SOC_WK 4951 Research for Social Work Practice and SOC_WK 4952 Research Methods for Social Work.

**BSW in Social Work**

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW professional program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**Degree Core Requirements**

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri's premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

</tbody>
</table>

1. Students accepted into the professional BSW program must take SOC_WK 2220 and SOC_WK 4951, which must both be designated “WI.” No additional “WI” courses are required.

2. Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Applied art and music performance courses do not count toward the humanities requirement. Students are urged to check with their advisor before selecting courses.

3. One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher.

4. Two courses that reflect the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, foreign civilizations, religious studies and human development and family studies, black studies and women and gender studies. SOC_WK 2000 Exploration in Social and Economic Justice, is strongly preferred as one of the courses. Students are urged to check with their advisor before selecting courses.

5. In addition to the above liberal arts requirements and the 46-credit Professional BSW Core (inclusive of SOC_WK 2220), students select electives to reach the total credit requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

Capstone Requirements

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar as their capstone experience.

Basic Skills Credit Limitations

No more than 4 credits may be taken from “skills” courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.
Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

Graduate

MSW in Social Work

The University of Missouri’s Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private!The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Application Deadlines

Fall deadline: January 15
Spring deadline: September 15
Summer deadline: January 15

Admission Criteria

- Minimum GPA: 3.0
- Bachelor’s degree from an accredited college or university with the applicant’s undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the
Concentrations

The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

Concentration Courses: Clinical

- Advanced Clinical Selective (choose 1 from those offered) 3
- Advanced Policy Elective (choose 1 from those offered) 3
- Advanced Diversity Elective (choose 1 from those offered) 3
- Elective (must be graduate level; could be an additional Diversity Elective or Policy Elective course) 3

SOC_WK 7770 Strategies of Clinical Social Work Intervention 3
SOC_WK 7820 DSM IV and Psychopathology 3
SOC_WK 8952 Evaluative Research in Clinical Social Work Practice 3
SOC_WK 8970 Professional Practice Seminar I 3
SOC_WK 8971 Graduate Field Practicum II 12

Total Credits 36

Policy, Planning and Administration in Human Services: includes intervention strategies that effect change at the organizational, interagency, community, and societal levels to advance social and economic justice for consumers of social and human services and to empower practitioners within those agencies.

Concentration Courses: Policy, Planning & Administration

- Advanced Policy Elective (choose 1 from those offered) 3
- Advanced Diversity Elective (choose 1 from those offered) 3
- Elective (must be graduate level; could be an additional Diversity Elective or Policy Elective course) 3

SOC_WK 7780 Fundamentals of Social Work Administration 3
SOC_WK 7920 Advanced Foundations of Human Behavior for Administrators 3
SOC_WK 8350 Management of a Social Agency 3
SOC_WK 8953 Evaluative Research in Social Work Planning and Administration 3
SOC_WK 8970 Professional Practice Seminar I 3
SOC_WK 8971 Graduate Field Practicum II 12

Total Credits 36

Please note: Clinical electives, policy electives, diversity electives, and other elective courses offered will vary from year to year.
Course Format

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration & elective courses are offered online through Blackboard, learning management system licensed to the University of Missouri for online courses. An occasional elective course is offered in a combined format (ITV and in-person), with the on-campus MSW student attending in-person while the course is broadcast to the Off Campus MSW Program students through Interactive Television (ITV).

Traditional in-person courses offered to the Off Campus MSW Program are held on the campuses of collaborating regional universities for these programs: Southeast Missouri State University (SEMO), Missouri University of Science and Technology in south central Missouri, Missouri Western State College and Northwest Missouri State University in northwest Missouri and Truman State University in north central Missouri.

The Off-Campus program also collaborates with a number of offices throughout the state to provide courses through Interactive Television (ITV). Other courses are offered online through Blackboard, a learning management system licensed to the University of Missouri for online courses. Elective courses offered online or ITV elective courses may have both on and off campus students enrolled in a common section. When this occurs with courses offered through ITV, on campus students attend the ITV classroom where the class is originated.

Practice classes that focus on the development of relationship building skills and/or teach a specific clinical social work technique are offered only through an in-person format. Courses that focus on theory, policy &/ or research may be offered online.

Regular Standing: Non-Social-Work Bachelor’s

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time students to the regular 60-credit hour program at the beginning of the fall semester only. Part-time students are admitted at the beginning of fall and spring semester.

Advanced Standing: Bachelor’s in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted either in fall semester (full-time or part-time study) or spring semester (part-time study only). On-campus students admitted to the Advanced Standing Program are admitted either in the spring or summer session. On-campus Advanced standing students in the policy, planning and administration concentration must enter in the spring semester. Off-campus students admitted to the Regular Standing Program are admitted for fall semester (part-time) in even numbered years and off-campus students admitted to the Advanced Standing Program are admitted for fall semester (part-time) in odd numbered years.

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

PhD in Social Work

Admission Contact Information
Shannon Mezzanotte (mezzanottes@missouri.edu)

About the Program

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria

Fall deadline: Midnight October 31

• Minimum GPA: 3.0; 3.5 in graduate study
• Minimum TOEFL scores:
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

• An MSW or related master’s is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This requirement may be waived for applicants with additional graduate work.
• Minimum of two years post-master’s practice experience encouraged.

Note: These criteria are used flexibly to assess the applicant’s potential for study and research in this program.

Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the Director of the Doctoral Program in Social Work (either via the grad schools online application system or mailed in hard copy):

• Cover letter
Plan of Study

The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master’s degrees. The curriculum consists of a minimum of 51 post MSW semester credit hours or, for applicants without an MSW, 63 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Graduate Certificate in Gerontological Social Work

The Graduate Certificate in Gerontological Social Work at the University of Missouri is designed to expand the pool of professionals who are qualified to work in settings with older adults and their families. The certificate focuses on practice strategies of social work intervention from micro, mezzo, and macro perspectives.

This certificate will be available to students enrolled in the MU School of Social Work master’s program as part of their graduate training as well as a stand-alone certificate to graduate level clinical social work practitioners and graduate level policy and administration social work practitioners who wish to augment their knowledge and skills in this area. Approval of the MSW Program Director and Committee, and Director of the Graduate Certificate in Gerontological Social Work is required for admission to the certificate program.

Participants in the Gerontological Social Work Certificate program build awareness and expertise for work in settings that serve older adults and their families. Participants are trained in micro, mezzo, macro and clinical strategies known to be effective in work with older adults and their families. An interdisciplinary, multi-level emphasis will be provided in the program since a large component of elder care is the coordination and management of services provided by various disciplines. Course work will utilize a bio-psycho-social-cultural perspective emphasizing the ecological perspective, Lawton’s theory of environmental press, resiliency, and the functional age model of family work. In addition, students will build awareness of aging policies and services, and policies that impact persons with disabilities and women.

As a result of earning the Gerontological Social Work Graduate Certificate, practicing MSW’s or Post-MSW degree practitioners can expect enhanced employability due to the development of new skills that respond to growing societal need. Current MSW students benefit from the graduate certificate by completing a concentrated course of study on a population group and obtaining specialty training with population/services needing graduate level social workers.

Because all of the Gerontological Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a current MSW student can conveniently earn the Gerontological SW Graduate Certificate while completing their MSW. No additional coursework is required.

The Gerontological SW Grad Certificate consists of 12 credit hours, including two required courses, one elective and one interdisciplinary course. The required courses include: 1) “Helping Strategies with Older Adults” (counts as a diversity elective); and 2) “Policies and Services for Older Adults” (counts as a policy elective).

For the third course, clinical MSWs choose between “Family Treatment”, “Resiliency and Solution Focused Practice”, “Client Case Management, Networking, and Advocacy”, and “Narrative Approaches to Social Work Practice” (all count as a clinical selective). Policy, Planning and Administrative MSWs choose between “Women, Poverty and Mental Health” and “Disability Rights Advocacy”. For the fourth class, students will choose from a variety of acceptable interdisciplinary courses.

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with older adults. The Director of Field in conjunction with the Director of the Graduate Certificate in Gerontological Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience.

For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Colleen Galambos at galambosc@missouri.edu.

Graduate Certificate in Military Social Work

The School of Social Work offers graduate certificates in Military Social Work and in Gerontological Social Work.

The Graduate Certificate in Military Social Work is designed to expand the pool of professionals who are qualified to work in settings with military personnel, veterans, and their families. The Certificate focuses on clinical practice strategies of social work intervention with military personnel and their families to improve the mental health and health of this population.

This certificate is available both to students enrolled in the MU School of Social Work Masters of Social Work (MSW) Program as part of their graduate training as well as a stand-alone entity to civilian graduate level clinical social work practitioners who wish to augment their knowledge and skills in this area. Only Clinical MSWs and MSW Clinical students will be accepted to the Military SW Graduate Certificate Program. Approval of the MSW Program Director is required for admission into the graduate certificate program.

Because all of the Military Social Work Graduate Certificate courses fulfill other requirements of our MSW program, a student can conveniently earn the Military SW Graduate Certificate while completing their MSW. No additional coursework is required.
The Military SW Grad Certificate consists of 12 credit hours, including three required courses and one elective. The required courses include: 1) “Military Culture: Issues for Helping Professionals” (counts as a diversity elective); 2) “Military Social Work” (counts as a free elective); and 3) “Trauma Practice and Crisis Intervention” (counts as a clinical selective). For the fourth class, students will choose either “Disability Rights Advocacy” or “Organizational Issues in Child Welfare” (counts as a policy elective). The assignments in all classes will be focused on Military SW issues.

During the final semester of the MSW Program, the full-time block practicum experience 40 hours/week (680 total hours) is arranged at a setting where students will gain skills practicing with military personnel, veterans or their families. The Director of Field in conjunction with the Director of the Graduate Certificate in Military Social Work works with students to choose a practicum setting that fits SSW requirements and student interests. Practicing MSWs only complete 12 hours of coursework and are not required to complete an additional practicum experience. For additional information about the Graduate Certificate in Military Social Work, please contact Dr. David Albright at albrightd@missouri.edu.

Undergraduate

• Department Level Requirements (p. 539)
• BSHES in Textile and Apparel Management (p. 540)
• Minor in Textile and Apparel Management (p. 543)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM's award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through course work, field study experiences, internships, leadership conferences and student organizations, TAM students develop the marketing and management skills they need to be a top recruit for industry positions.

Students who major in Textile and Apparel Management may choose from several options and tracks:

• Apparel Marketing and Merchandising
• Apparel Product Development
• International Apparel Marketing and Merchandising
• International Apparel Product Development

*(Note: Tracks do not appear on transcripts or diplomas.) Students who want to explore Textile and Apparel Management may take the following classes:

Graduate

137 Stanley Hall
Columbia, MO 65211
573-882-7317
http://tam.missouri.edu/

Director of Graduate Studies: Pam Norum

• MA in Textile and Apparel Management (p. 544)
• MS in Textile and Apparel Management (p. 544)

The College also offers a PhD in Human Environmental Sciences with an emphasis Textile and Apparel Management (p. 515).

Graduate programs in textile and apparel management offer the following areas of study: apparel manufacturing management; apparel marketing and merchandising; e-commerce, supply chain management, economic/trade issues related to domestic and global textile and apparel industry; historical and cultural aspects textiles and dress; and consumer marketplace concerns.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry analysis, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Undergraduate

Department Level Requirements - Textile & Apparel Management

There are four tracks available in Textile and Apparel Management: (1) Apparel Marketing and Merchandising, (2) International Apparel Marketing and Merchandising, (3) Apparel Product Development, or (4) International Apparel Product Development. These tracks are designed...
to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses (p. 540). Students may not take departmental courses using the Pass/Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 17) including University general education (p. 18).

### Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in other departments. Students who wish to complete a minor should declare the minor by completing the form at [http://hes.missouri.edu/students_minorapp.html](http://hes.missouri.edu/students_minorapp.html). A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. Prerequisites for all courses must be met, or the student must have the permission of the instructor. Below are the required hours by content area.

#### Apparel Industry Studies (Select 6 hours from the list below)

Additional Minors and Certificates - HES

Undergraduate

- Minor in Financial Literacy for Helping Professionals (p. 545)
- Minor in Social Justice (p. 545)

Graduate

- Certificate in Financial and Housing Counseling (p. 546)
- Certificate in Geriatric Care Management (p. 546)
- Certificate in Gerontology (p. 546)
- Certificate in Youth Development Specialist (p. 546)
- Certificate in Youth Development Program Management and Evaluation (p. 546)

Undergraduate

Minor in Financial Literacy for Helping Professionals

The School of Social Work has collaborated with Personal Financial Planning department within the College of Human Environmental Sciences to develop a minor in Financial Literacy for Helping Professionals. As front line helping professionals encounter clients who face challenging economic situations, skills in addressing those challenges and knowledge of foundational personal finance information will aid in helping clients. Knowledge of predatory lending practices, social welfare policy designed to help the working and non-working poor and tax strategies to enhance financial situations will be addressed. This minor hopes to embrace the imperative need to educate our graduates on the role of financial literacy for those professionals who will serve others.

Students who complete the financial literacy minor may not refer to themselves as BSW-level social workers upon graduation. Fifteen credits are required to complete the financial literacy minor.

Minor Requirements

FINPLN 2183 Personal and Family Finance * 3
FINPLN 3282 Financial Counseling * 3
FINPLN 4188 Community Agencies and Volunteerism (taught in spring semester only; students will need to attend workshop in order to certify for IRS compliance) 3
SOC_WK 4750 Interaction Skills Workshop 3

Select one of the following: 3

SOC_WK 2000 Exploration in Social and Economic Justice
SOC_WK 4710 Social Justice and Social Policy

Total Credits 15

Note: Satisfactory completion (as defined by C range grade or above) of Microeconomics and College Algebra is required. Satisfactory completion (as defined by C range grade or above) of each required course is necessary in order to attain this minor. This minor is available to students regardless of major.

Minor in Social Justice

The social justice minor is designed to give non-social work majors the opportunity to develop knowledge and understanding about social justice in the person-environment context. Social justice involves the idea that in a perfect world all citizens would have identical social benefits, protections and opportunities regardless of their backgrounds and membership in diverse groups. Recognizing that the world is not perfect, the primary goals for the minor in social justice are to enhance sensitivity to vulnerable and at-risk populations, to provide opportunity for critical review of social policies and the allocation of societal resources and to stimulate interest in advocacy and the planned change process.

Students who complete the social justice minor may not refer to themselves as BSW-level social workers upon graduation.

A minimum of 15 credits, comprised of the courses below, is required to complete the social justice minor.

Minor core requirements

SOC_WK 1115 Social Welfare and Social Work 3
SOC_WK 2220 Human Behavior and the Environment 3
SOC_WK 2000 Exploration in Social and Economic Justice 3
SOC_WK 4710 Social Justice and Social Policy

Social work electives

Select two of the following: 6

SOC_WK 4101 Topics in Social Work
SOC_WK 4330 Addiction Treatment and Prevention
SOC_WK 4350 Deaf Culture: A Social Work Perspective
SOC_WK 4360 Working with Minority Youth
SOC_WK 4370 Delinquency, Corrections and Social Treatment
SOC_WK 4380 Social Work Practice With Minorities: African-American Emphasis
SOC_WK 4390 Helping Strategies With Children and Adolescents
SOC_WK 4400 Domestic Violence
SOC_WK 4410 Law and Social Work Practice
SOC_WK 4440 International Social Work Practices and Principles
SOC_WK 4450 Professional Perspectives on Child Welfare

Services in the 21st Century
Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student’s financial and housing counseling skills and to prepare a student to sit for the Accredited Financial Counselor and Certified Housing Counselor exam offered through the National Association for Financial Planning and Counseling Education. Students with this background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at http://www.gpidea.org/index.html?page=majorsDegreesCourses.html&anchor=programAnchor1.

About the School
The world’s first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school’s first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession’s rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today’s complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

• Opportunities for Graduate Study on MU Campus

Admissions
(Effective Fall Semester 2013)
Students must be admitted to the School of Journalism to pursue the Bachelor of Journalism degree. Students are admitted in one of two categories:

Directly Admitted Students
A freshman applicant will be directly admitted to the School of Journalism if he or she meets standard MU admissions requirements and any one of the following three criteria:

• Ranks in the top 10 percent of his or her high school class.
• Scores 29 or higher on the ACT Composite.
• Scores 1290 or higher on the math-verbal portions of the SAT.

Pre-Journalism A&S Students
Students accepted by MU who do not meet one of the criteria for direct admission are admitted as pre-Journalism students in the College of Arts and Science and apply for admission to Journalism as the student is completing the fifth journalism course, which is either JOURN 2100-News and Science or JOURN 2150-Fundamentals of Multimedia Journalism. That usually occurs in the second semester of the sophomore year as the student is completing 60 credits and all other requirements.

NOTE: All undergraduate admissions to MU are handled by the Office of Undergraduate Admissions, not the School of Journalism, and no exceptions are made to the standards for direct admission to Journalism. A student either meets one of the admissions standards or does not. There is no appeals process for direct admission.

However, once accepted to MU as a pre-Journalism student, the student may continue to take the ACT or SAT to try to improve his or her score. If the student receives the necessary score for direct admission, once the score is received by the Admissions Office the student may request a change of admissions status. The new test score must be received by the Admissions Office at least one month before the student begins classes at MU. Similarly, a student who was admitted outside the top 10 percent of his or her class but who subsequently achieves top 10 percent standing at the end of the senior year of high school may request a change of admissions status. No change is possible later than one month before the student begins classes at MU.

Differences in the Admission Categories
Directly admitted students have several advantages over students admitted as pre-Journalism students in the College of Arts and Science. Directly admitted students:

• Advance automatically to upper-class status in Journalism if they maintain a cumulative UM GPA of record of 3.0 or higher upon completion of 60 credit hours and fulfill all other requirements.
• Are guaranteed admission to the upper-class interest area of their choice provided they maintain a cumulative UM GPA of record of 3.0 or higher.
• Have access to a far larger portion of the School of Journalism’s freshman scholarship pool. The School of Journalism annually awards more than $450,000 in scholarships in addition to scholarships awarded by the Admissions Office and others. To apply for all scholarships, including those offered by the School...
of Journalism, apply through the Office of Financial Aid (http://
financialaid.missouri.edu/index.php). Priority consideration is given to
those who apply by Dec. 1.

To continue to enjoy these benefits, directly admitted students are
expected to maintain a UM cumulative GPA of 3.0 or higher. Those
without GPAs of at least 3.0 after completion of 60 credit hours lose these
benefits and will be placed in a pool with pre-Journalism students and
considered individually for upper-class status through a process outlined
below.

Unlike directly admitted students, pre-Journalism A&S students:

• Are not guaranteed to advance to upper-class status in Journalism if
  they maintain a cumulative UM GPA of record of 3.0 or higher upon
  completion of 60 credit hours and after fulfilling all other requirements.
  Students in this category instead are accepted on a space-available
  basis. However, to date no one who has earned a 3.0 cumulative
  GPA or higher has been rejected, and space has been available.
  The School merely reserves the right to reject students should
  overcrowding occur in the future.

• Are not guaranteed an interest area of choice even with a cumulative
  GPA of record of 3.0 or higher. Admission to the interest area of
  choice is dependent upon space availability. To date, no one with a 3.0
  GPA or higher has been denied admission to an area of choice.

• Have access to fewer scholarships from the School of Journalism.
  The school has only four scholarships available to pre-Journalism
  Arts and Science students. That’s because most scholarships are
designated for “Journalism students,” and pre-Journalism A&S
  students have not yet been accepted to the School of Journalism.
  To apply for all scholarships, including those offered by the School
  of Journalism, apply through the Office of Financial Aid (http://
  financialaid.missouri.edu/index.php).

The School of Journalism is eager to accept hard-working pre-Journalism
students who have demonstrated aptitude and drive into upper division
interest areas of our program.

Admission to Upper-Division Interest Area

As noted above, directly admitted students who maintain a UM GPA
of record of 3.0 or higher and complete the necessary coursework are
automatically admitted to upper-class status and their interest area of
choice upon completion of 60 credits and other requirements for upper-
division status.

Students who do not meet the criteria for direct admission and directly
admitted students who have not maintained a cumulative UM GPA
of record of 3.0 or higher must apply for upper-class status upon
completion of 60 credit hours and fulfillment of all other requirements for
upper-class status. Committees of faculty in each emphasis area will
review the student’s GPA of record as well as a student’s stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Unless otherwise specified by a formal articulation agreement that
allows additional hours, up to 64 credits may be transferred from
two-year colleges at any time before graduation. Students must also
complete 30 of their last 36 hours in MU coursework. The Office of
Undergraduate Admissions, not the School of Journalism, determines
transfer equivalencies for the University. Transfer students from other
accredited schools and colleges in Missouri should check the MU
website to see how coursework will transfer to MU or contact the Office
of Admissions. Students also should contact an advisor to see how these
courses would apply toward a degree at MU. The School of
Journalism may accept up to six journalism credit hours transferred
from other accredited journalism programs or from Missouri colleges
with which the school of Journalism has working agreements. The
six credits eligible for transfer are those that equate to Principles of
American Journalism, Cross-Cultural Journalism, News, Multimedia
Journalism, History of American Journalism and Communications
Law. Other courses may be accepted on a case-by-case basis by the
Associate Dean for Undergraduate Studies. Current Missouri journalism
students may not transfer journalism credits from other institutions.
Many communications courses are similarly rejected and may not be
used toward graduation requirements even as electives. Some other

Transfer Student Admissions Standards

Transfer students are admitted to upper-division status in Journalism
when they complete 60 credit hours, fulfill all prerequisites and establish
a cumulative GPA of record of at least 3.0. Completion of at least
three terms at MU is required for transfer students to qualify for
admission. Because of that, students who plan to major in Journalism are
encouraged to transfer to MU after taking no more than 30 credit hours
elsewhere.

Transfer students who have completed 60 credit hours and the necessary
coursework but who do not have a 3.0 UM GPA of record are placed in
the same pool of applicants as pre-Journalism students and will be
considered using the same process. Criteria used in evaluating these
applications are similar to those for pre-Journalism applicants and direct
admits who do not maintain 3.0 GPAs. The Admissions Committee will
review the student's GPA of record as well as a student's stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Unlike directly admitted students, pre-Journalism students are
considered using the same process. Criteria used in evaluating these
applications are similar to those for pre-Journalism applicants and direct
admits who do not maintain 3.0 GPAs. The Admissions Committee will
review the student's GPA of record as well as a student's stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Transfer students who are rejected for upper-class status through this
process must transfer to another MU division and will no longer be
considered Journalism or pre-Journalism students. If, however, a student
subsequently spends a semester taking non-journalism courses and
raises his or her cumulative GPA of record above 3.0, the student
may reapply. No such application will be accepted after a student has
completed 70 or more hours of college credit.

Unlike directly admitted students, pre-Journalism students are
considered using the same process. Criteria used in evaluating these
applications are similar to those for pre-Journalism applicants and direct
admits who do not maintain 3.0 GPAs. The Admissions Committee will
review the student's GPA of record as well as a student's stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Transfer students who are rejected for upper-class status through this
process must transfer to another MU division and will no longer be
considered Journalism or pre-Journalism students. If, however, a student
subsequently spends a semester taking non-journalism courses and
raises his or her cumulative GPA of record above 3.0, the student
may reapply. No such application will be accepted after a student has
completed 70 or more hours of college credit.

Unlike directly admitted students, pre-Journalism students are
considered using the same process. Criteria used in evaluating these
applications are similar to those for pre-Journalism applicants and direct
admits who do not maintain 3.0 GPAs. The Admissions Committee will
review the student's GPA of record as well as a student's stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Transfer students who are rejected for upper-class status through this
process must transfer to another MU division and will no longer be
considered Journalism or pre-Journalism students. If, however, a student
subsequently spends a semester taking non-journalism courses and
raises his or her cumulative GPA of record above 3.0, the student
may reapply. No such application will be accepted after a student has
completed 70 or more hours of college credit.

Unlike directly admitted students, pre-Journalism students are
considered using the same process. Criteria used in evaluating these
applications are similar to those for pre-Journalism applicants and direct
admits who do not maintain 3.0 GPAs. The Admissions Committee will
review the student's GPA of record as well as a student's stated desire to
work in the fields of journalism or strategic communication, demonstrated
commitment to journalism or strategic communication (as evidenced
by work with student or professional media, high school or community
college activities, or participation in journalism student groups), needs of
the profession, etc. A transfer student in this category also must submit
a brief letter of application (not to exceed two pages) stating a case for admission.

Transfer students who are rejected for upper-class status through this
process must transfer to another MU division and will no longer be
considered Journalism or pre-Journalism students. If, however, a student
subsequently spends a semester taking non-journalism courses and
raises his or her cumulative GPA of record above 3.0, the student
may reapply. No such application will be accepted after a student has
completed 70 or more hours of college credit.
courses may not count toward the degree. See the Undergraduate Handbook (http://journalism.missouri.edu/wp-content/uploads/2012/12/handbook-2012.pdf) for additional guidance.

Transfer Credit
The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism.

The School of Journalism accepts transfer credit according to the transfer credit equivalency report. Transfer credit from two-year colleges can transfer only as lower-level credit.

The School of Journalism accepts a maximum of six transfer credits from other schools accredited by the Accrediting Council on Education in Journalism and Mass Communications. It also accepts journalism credits from those two-year colleges with which the School has articulation agreements.

Transfer students from other accredited schools and colleges in Missouri should check the website of the Office of Undergraduate Admissions to see how course work will transfer to MU.

International Admission
A minimum score of 100 (internet), 600 (paper) or 250 (computerized) on the Test of English as a Foreign Language (TOEFL) is required for all pre-Journalism and Journalism students whose native language is other than English. Alternatively, students may take the International English Language Testing System (IELTS) exam: overall-7.0, no band below-6.0.

Required Entry-Level Courses
Prior to admission to an interest area in the School of Journalism, the student must complete a course of study that includes at least 60 credits of work at MU or another accredited two- or four-year institution. The courses listed below are required for students to be admitted to an interest area in journalism.

English Composition (3 credits):
• (3 credits) with a grade of “B” or better OR a grade of “C” and a satisfactory score on the Missouri College English Test. AP and IB test credit may satisfy this requirement.

College Algebra (3 credits):
• MATH 1100 College Algebra with a C-range grade is required, or an exemption from College Algebra.

Foreign Language (12-13 credits):
• Unless students have completed four or more years in a single foreign language in high school, they must complete 12-13 credits in a single foreign language at the college level.
• The final 3-credit course may be taken the first semester in an interest area in the School of Journalism. In this case, it will count as elective credit. Placement and proficiency exams are available in French, German and Spanish.
• If you have four or more years of high school credit and elect to take a lower-level course in the same language, you negate the option of satisfying your language requirement based on high school credit. You must either continue through level 3 or request that the credits for the lower-level course not be counted toward graduation.

Biological, Mathematical and Physical Science (9 credits):
• Statistics (3 credits): STAT 1200 Introductory Statistical Reasoning, STAT 1300 Elementary Statistics or its equivalent in transfer may be accepted.
• Additional courses (6 credits) from the following areas: biological anthropology, astronomy, biology, chemistry, CMP_SC 1050 Algorithm Design and Programming I, geology, math and physics. One course must include a lab.
• Note that College Algebra, with a C-range grade, must be the prerequisite for math courses counting in the science area. MATH 1140 Trigonometry, counts as general elective credit only.

Social and Behavioral Science (14 credits):
• American History: HIST 1100, HIST 1200, HIST 1400, HIST 1410, HIST 2210 or HIST 2440
• American Government OR State Government: POL_SC 1100 or POL_SC 2100.
• Economics: ECONOM 1051/ECONOM 1051H OR ECONOM 1014 AND ECONOM 1015, OR AG_EC 1041 and AG_EC 1042
• A 3-credit behavioral science course

Note that ECONOM 1014 is the prerequisite for ECONOM 1015

Humanistic Studies (6 credits):
• Any literature course, including foreign language literature courses.

Additional courses (3 credits):
• Communication/film studies/theatre
• History or appreciation of art or music
• Humanities
• Non-US civilization or classics
• Philosophy
• Religious studies

Journalism (13 credits, effective fall semester 2013):
• JOURN 1100 Principles of American Journalism Restricted to first-time college students with a high school core GPA of 3.00 or higher and 15 college credits (dual, AP, IB or other), or current students with 15 completed credits and UM GPA of 2.75. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
• JOURN 2100 Cross-Cultural Journalism Restricted to sophomore students. Prerequisites: JOURN 1100 and UM GPA of 2.8. Should be taken concurrently with JOURN 2100 or JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
• JOURN 2100 News Required. Prerequisites: ENGLISH 1000 with a B- grade or higher, JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2150. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
• JOURN 2100 Fundamentals of Multimedia Journalism Required. Prerequisites: JOURN 1100 and UM GPA of 2.8. May NOT be taken concurrently with JOURN 2100. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students only.
Laptop Computer Requirement
Journalism courses require the use of a computer. Students must demonstrate word-processing proficiency. Incoming freshmen and transfer students are required to have a wireless laptop computer for their work in the School of Journalism.

Special Programs
The School of Journalism attracts some of the best students at MU. The School encourages high-ability students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU’s best professors. The School recognizes incoming high-ability students with two special designations and the following benefits:

Journalism Scholars Program
Qualifications: Any incoming freshman journalism major who has a composite ACT score of 29 or higher (or 1290 or higher on the combined math and verbal portions of the SAT) and who ranks in the top 10 percent of his or her high school graduating class qualifies for:

• Direct admission to the Missouri School of Journalism
• Designation as a Missouri Journalism Scholar
• Student’s who are eligible for the Honor’s College are automatically accepted into the Journalism Scholars program

Benefits:
• The opportunity to participate in a Freshman Interest Group designed exclusively for Journalism students, space permitting
• Special advisement and programs directed by the school of Journalism’s associate dean for undergraduate studies and administration
• Regular meetings with various members of the journalism faculty
• Space permitting, assignment to residence halls set aside for Journalism Scholars
• The opportunity to participate in many on-campus journalism events, and journalism clubs and organizations
• Social activities planned exclusively for Journalism Scholars

The Walter Williams Scholars Program
The highest-achieving Journalism Scholars win separate designation as Walter Williams Scholars. The Walter Williams Scholars program is named in honor of the school’s founding dean, a Missouri newspaper publisher who went on to become president of the University of Missouri.

Qualifications: To win acceptance into the exclusive circle of top Walter Williams scholars, incoming freshmen must earn an ACT composite score of 33 or higher (1440 or higher on the SAT). They also must rank in the top 20 percent of their high school class (if the school ranks) or must have maintained a high school GPA of at least 3.25 on a 4.0 scale. Admission is by invitation only.

Benefits:
Walter Williams Scholars are also Journalism Scholars and have all of the rights and privileges enjoyed by that group. Additional benefits include:

• Placement in a special Freshman Interest Group, space permitting
• Assigned individual faculty mentors

• A $1,000 scholarship that can be used for study abroad or in our New York or Washington programs. The scholarship can be used at any time before graduation
• Automatic admission to the one-year BJ/MA program at the School of Journalism, which allows students to complete their graduation degrees in one year rather than two. Admission is contingent upon the following criteria:
  • Maintenance of a 3.25 GPA in your journalism coursework and for your cumulative average, throughout you undergraduate career
  • Submission of a complete MA application, including payment of the application fee, and with two (out of three) of your letters of recommendation from journalism faculty. You do not need to take the GRE. Details can be found on the Master’s Application Checklist: http://journalism.missouri.edu/programs/masters/admissions/

Academic Regulations
Dual-Degree - Bachelor of Arts/Bachelor of Journalism
To receive two bachelor’s degrees, a Bachelor of Arts and a Bachelor of Journalism, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the department of major interest in the College of Arts and Science.

Science and Agricultural Journalism
The College of Agriculture, Food and Natural Resources, in cooperation with the School of Journalism, offers an inter-divisional Bachelor of Science degree in Science and Agricultural Journalism. This is not considered a dual degree. For more information, see the College of Agriculture, Food and Natural Resources (p. 31) in this catalog.

Credit Restrictions
Students may enroll in a maximum of 10 journalism credits each semester without permission from the associate dean for undergraduate studies.

Academic Assessment
Students in convergence, magazine, photojournalism, print and digital news, and Radio-TV news must compile a portfolio prior to graduation showing their preparedness for employment or graduate education. This is a requirement for graduation. Information about the assessment process is sent to students from their faculty chair during their final semester in school. Strategic communication students must complete this requirement as part of the capstone course.

Independent Study
Mizzou Online offers a variety of courses that can be taken on your own through correspondence or online. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 3 hours per semester of online semester based or self-paced (9 months) courses. Any more than 3 hours per semester will have to be approved by an academic advisor.
Standards for Academic Performance

The School of Journalism is a competitive environment in which students are expected to maintain high standards of academic achievement. In general, the faculty expects each student to maintain a grade point average of 3.0 or higher to be considered in good standing. The faculty has established rules for handling students who fall below that level. Those rules follow:

1. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.5 during the first 29 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.

2. A student admitted directly to the School of Journalism as a freshman must maintain a cumulative GPA of record of at least 2.75 after completion of 30 to 70 hours of credit. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination. Grades in courses taken elsewhere will not be considered for this purpose. Those who do not meet the standard will be dismissed from the School of Journalism and will not be permitted to re-enroll.

3. Students with 70 credits who have still not earned admission to the School of Journalism will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.

4. Directly admitted freshmen with 70 credits who have still not earned admission to an emphasis area will be dismissed from the School of Journalism. The credits applicable in this sense are all credits earned in any way, including transfer, advanced placement and credit by examination.

5. Students must repeat any required journalism course in which they do not earn a grade of C- or higher.

Probation, Suspension and Dismissal

Journalism students are placed on probation when either their journalism or their overall (term or cumulative) grade point average falls below 2.0. Students may remain on probation no more than one term. They regain good standing when their term and cumulative grade point averages, for journalism and overall, climb to 2.0 or higher.

First semester freshman journalism students are placed on final probation when their first term grade point average falls between 0.50 - 1.99. Students may remain on final probation no more than one term. They regain good standing when their term and cumulative grade point averages climb to 2.0 or higher.

First semester freshman journalism students are dismissed and become ineligible to enroll for a period of one calendar year when their first term grade point average is below 0.50. They may be placed on academic probation and may be declared ineligible to enroll if they neglect their academic duties.

Students are suspended and become ineligible to enroll for a period of one regular semester when their term grade point average (journalism or overall) is below 1.5, when they pass less than one-half of their work in any term or when they are on probation and their term grade point average is 2.0 or lower.

Students are dismissed and become ineligible to enroll for a period of one calendar year when their term grade point average (journalism or overall) is below 1.0, when they pass less than one-fourth of their work in any term or when they fail to perform their academic duties.

A student may be placed on probation, suspended or dismissed for excessive in-completes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. That time limit shall be no more than one calendar year from the scheduled completion of the course and may be a shorter duration. The associate dean also may place limitations on the number of additional credit hours in which the student may enroll before the incompletes are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

A student who fails to achieve an acceptable grade (C- or better) in a required journalism course for the second time will be permanently dismissed from the School of Journalism for lack of acceptable progress toward the degree. That student may be readmitted only with the consent of the faculty chair of the student’s emphasis area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair then will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

A student who fails to achieve an acceptable grade (C- or better) in two or more required journalism courses may be placed on probation, suspended or dismissed at the discretion of the associate dean for undergraduate studies in consultation with the faculty chair and the instructors of record.

Satisfactory/Unsatisfactory Grading System

No required course or courses in a required area may be taken on a Satisfactory/Unsatisfactory basis either before or after admission to the School of Journalism. Only elective, non-journalism courses may be taken S/U and only one per semester. Journalism courses offered only as S/U courses are exceptions.

Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students are expected to observe strict honesty in academic programs and as representatives of school-related media.

Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in assigned work, he or she may be subject to a failing grade from the course teacher and such disciplinary action as may be recommended pursuant to university regulations.

Non-Journalism Majors

Students from other divisions with junior or higher standing may take non-laboratory courses in journalism without being admitted to the school. Permission of the journalism academic unit is required. Courses directly related to the skills in the media are usually not open to students while they are undergraduates in other disciplines. Students from other schools
or colleges admitted to journalism courses are expected to meet the course prerequisites and grade point averages required of students in the School of Journalism.

Advising

Students directly admitted to Journalism as freshmen have a full-time academic advisor in the school.

Pre-Journalism students receive academic advising from the College of Arts and Science. Students admitted to an interest area in the school have a full-time academic advisor in the school and a faculty advisor from their selected emphasis area. Students are expected to seek the advice of the academic advisor in the selection of courses. The faculty advisor provides career counseling and specific journalism related issues.

The school provides advising checklists so that students can maintain a record of academic course work. The forms are used by the student and advisor to plan the student’s program. Students are responsible for determining an appropriate schedule of courses each semester; however, the course schedule should be approved by the student’s advisor. The responsibility for meeting admission and graduation requirements rests with the student.

Opportunities for Graduate Study on MU Campus

The five-year combined bachelor/master degree program was designed for students in the Missouri School of Journalism who desire a graduate education after the undergraduate program is complete. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry an intensive load (12-15 credits) each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, students can focus their program in areas such as strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Graduate

About Our Graduate Programs

The University of Missouri’s School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.
Journalism

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist’s Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication, a combination of those fields.

The Missouri Plan assures a journalism graduate the broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master’s degree.

Undergraduate

- Department Level Requirements (p. 555)
- BJ in Journalism (p. 556)
  - with emphasis in Convergence Journalism (p. 557)
  - with emphasis in Magazine Journalism (p. 560)
  - with emphasis in Photojournalism (p. 562)
  - with emphasis in Print and Digital News (p. 563)
  - with emphasis in Radio-Television Journalism (p. 568)
  - with emphasis in Strategic Communication (p. 571)
- Minor in Journalism (p. 574)

Undergraduate students in the School of Journalism pursue their degrees in one of six Emphasis Areas approved by the University Board of Curators and the Missouri Coordinating Board of Higher Education. These are Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News, Radio-Television Journalism, and Strategic Communication. Degrees are awarded only in one of those six areas.

Each Emphasis Area, however, has separate tracks that permit students to prepare for employment in more specialized fields. These are called Interest Areas, and students select from more than 30 choices among these. Interest Areas do not appear on transcripts or diplomas, although the transcript coursework should provide evidence of competency in the appropriate area.

Administratively, the School of Journalism is divided into Faculties, not Departments as in most other Schools and Colleges at MU. For administrative purposes, all Interest Areas are assigned to one of those Faculties except for two International Interest Areas, which are administered by the School of Journalism’s International Programs Office. International programs, however, merely indicate an international interest.

To ensure maximum flexibility for students, the School also offers an Individually Designed Interest Area. Working with three faculty members, and with the approval of the associate dean for undergraduate studies, a student can design his or her program by selecting from the School’s robust offerings of more than 100 courses. Students who pursue this option must do so within accrediting guidelines and within one of the six approved Emphasis Areas.

Students who desire more information on a particular program should see an Academic Advisor or seek out a member of the supervising Faculty, which is indicated following the description of the Interest Area.

Students interested in one of the international programs should seek out an advisor in the International Programs Office. Interdisciplinary Programs, those that cross traditional media boundaries or depend on skills-based coursework from other MU divisions, are assigned to one of the School’s Faculties as indicated.

Graduate

School of Journalism
179 Gannett Hall
573-882-4852
Master’s Programs: journalism.missouri.edu/programs/masters/
Doctoral Programs: journalism.missouri.edu/programs/doctoral/

Director of Graduate Studies: Esther Thorsen
- MA in Journalism (p. 575)
- PhD in Journalism (p. 576)

While most graduate journalism students will find that these graduate programs meet their needs, some may wish to structure an independent model. Such a model takes into account the student’s prior education and experience, as well as their unique professional goals. Refer to the MA in Journalism (p. 575) for additional models.

About Journalism’s Graduate Degree Programs

The Missouri School of Journalism awarded the first master’s and doctoral degrees in journalism in 1921 and 1934, respectively. The master’s and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

For the master’s program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Graduate Minor in Law and Conflict Resolution

This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a
school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 578).

Facilities and Resources

A variety of special facilities and resources are available to help students meet their educational objectives. The Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service, KOMU-TV, an NBC affiliate, KBIA-FM, a National Public Radio station, Mojo Ad Agency and Vox magazine provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Service Journalism program, based in the magazine sequence, focuses on how to effectively provide information to consumers and offers workshops for professionals, covering such topics as health and nutrition, travel, science and minorities coverage.

The Center for Advanced Social Research provides survey and other services to a broad variety of governmental, corporate and media organizations. It employs more than 50 graduate students from around the MU campus.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP’s interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew’s 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.

Founded in 2003 with a generous gift from the Donald W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

Special Events

Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society

Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding

An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed.

Undergraduate

Department Level Requirements - Journalism

Degree with Honors Requirements

Graduation with honors is based on the grade point average during the final 60 graded credits in residence. Cum laude requires 3.5, magna cum laude 3.7, and summa cum laude 3.9. The student must have a minimum of 60 credits in residence at MU to be considered for graduation with honors. The School computes the grades to three decimal points and does not round up. A student must request consideration for graduation with honors when applying for graduation.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Individually Designed Interest Area

Students who find that none of the existing Interest Areas meet their needs may work with the faculty to construct a tailored Interest Area to meet their educational objectives. To do this, students work with a faculty mentor and at least two other faculty members to design a course plan using existing courses in the School of Journalism, relevant courses outside the School and no more than six credits of Problems, Topics or Communications Practice courses. The student will enroll and be granted a degree in the emphasis area that aligns with their faculty mentor. Because of large enrollment, students are not able to tailor an Interest Area in Strategic Communication. Students wishing to pursue an individually designed Interest Area should start by seeing a journalism advisor in 76 Gannett Hall.

Electives to Achieve the Interest Area’s Goal

The student must complete 16 hours of elective journalism courses mutually agreed to in advance by the student and the three supervising faculty members. These courses must form a coherent plan that leads to competency in the targeted area of expertise and must fit within one of the approved Emphasis Areas of the School.

Journalism or Non-Journalism Electives (6 Non-Journalism Credits)
In consultation with the faculty mentor, the student should choose a minimum of six non-journalism credits that complement the program’s objectives. For example, if a student were to design a program in some aspect of entrepreneurial journalism, six or more credits in business courses might be desirable. In the absence of relevant courses for the targeted interest area, these credits become general electives for students.

**Approval Procedure**

Students who wish to construct a special interest area may pick up a form for that purpose in Students Services, 76 Gannett. After meeting with the three faculty members chosen to oversee progression through the program, the student will submit the form - complete with the signatures of the student and the three supervising faculty members - to the Associate Dean for Undergraduate Studies. The student must win approval of the tailored program from the associate dean before beginning the program. Thus, a student must file a proposal for approval by the time he or she has completed no more than 70 total credits. Once approved, the proposal goes to the student’s academic advisor, who places it in the student’s file and uses it to help the student navigate the remainder of the curriculum.

**Total Credits for the Degree and their Breakdown**

Students pursuing a tailored program must complete 123 credit to include:

- The same 60 credits that all students must complete before entering upper-division status.
- Not more than 44 journalism credits.
- A total of at least 79 non-journalism credits.

**Major Program Requirements**

Effective Fall Semester 2013, the Bachelor of Journalism degree requires 44 journalism credits and 79 non-journalism credits.

To obtain the Bachelor of Journalism degree, a student must:

- Be regularly admitted to an interest area within the school
- Complete at least 31 upper-division credits of acceptable journalism course work
- Complete at least 31 credits of acceptable course work outside the school
- Earn a cumulative GPA of at least 2.0 for all work taken while in the School of Journalism and a GPA of at least 2.0 for all journalism courses
- Complete all University graduation requirements (p. 17), including University General Education (p. 18) requirements

### General Electives

Electives necessary to complete a minimum of 79 credits of non-journalism classes. Any course acceptable to the School and advisor is allowed.

### Special Offerings

**International Journalism (Interdisciplinary)**

The next generation of journalism students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this Interest Area may take courses within any of the existing or prospective areas to complement their international interests. **This degree is granted in the student’s emphasis area of choice (Convergence Journalism, Magazine Journalism, Photojournalism, Print and Digital News or Radio-TV Journalism) but is administered by the School’s International Programs Office.**

**Semester Plan**

A sample plan of study has not been designed for this major. Students should contact the academic department for assistance with academic planning.

**BJ in Journalism with Emphasis in Convergence Journalism**

**Major Program Requirements**

All Convergence Interest Areas teach multimedia storytelling by having students take the three core convergence classes, JOURN 4804 Convergence Reporting, JOURN 4806 Convergence Editing and Producing; and the capstone, JOURN 4992 Reporting, Editing and Marketing of Converged Media. Students then choose to specialize by taking classes from selected requirements and electives.

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**Emerging Media (Interdisciplinary)**

The journalism industry is constantly changing as it discovers new ways of covering the news and new technologies to deliver it. This Interest Area is for the student who wants to learn and work with some of the latest developments in journalism, such as delivery of news via mobile devices and tablets. Classes in this area provide a wide range of opportunities from content creation, and Web and application development to classes working with content created by other journalists. This program of study is primarily for students interested in online, social and mobile delivery of news and information and organizations. Administered by the Convergence Faculty.

**Required Journalism Classes**

- JOURN 4804 Convergence Reporting 3
- JOURN 4806 Convergence Editing and Producing 3
### JOURN 4992 Reporting, Editing and Marketing of Converged Media
Select two of the following:
- JOURN 4502 Multimedia Planning and Design
- JOURN 4700 Participatory Journalism
- JOURN 4810 Advanced Global Converged News
- JOURN 4812 Online Audience Development

**Suggested Journalism Electives**
Select 10 credits from the following:
- JOURN 4430 Computer-Assisted Reporting
- JOURN 4436 Investigative Reporting
- JOURN 4438 Business and Economics Reporting
- JOURN 4508 Information Graphics
- JOURN 4662 Global News Across Platforms
- JOURN 4700 Participatory Journalism
- JOURN 4720 Internet Law
- JOURN 4810 Advanced Global Converged News
- JOURN 4812 Online Audience Development
- JOURN 4940 Internship in Journalism
- JOURN 4974 Advanced Internet Applications for Radio/TV News
- JOURN 4978 Media Management and Leadership

### Suggested Non-Journalism Electives
- INFOTC 4500 Team-Based Mobile Device Application Development
- IS_LT 4360 Introduction to Web Development

### Entrepreneurial Journalism (Interdisciplinary)
More and more of today’s journalism students will go to work in non-traditional news organizations, start their own businesses or freelance. Students in this Interest Area will learn about current markets in journalism and what audiences want. They also will study the relative marketability of content. Students will learn the market value of their own work, how to build their own brands and how to market. Administered by the Convergence Faculty.

**Required Journalism Classes**
- JOURN 4804 Convergence Reporting (3 credits)
- JOURN 4806 Convergence Editing and Producing (3 credits)
- JOURN 4734 Journalism and Chaos: How to Understan and Cover 21st Century Business Models (3 credits)
- JOURN 4812 Online Audience Development (3 credits)

**Capstone:**
- JOURN 4992 Reporting, Editing and Marketing of Converged Media (3 credits)

**Required Non-Journalism Electives**
- INFOTC 4500 Team-Based Mobile Device Application Development (3 credits)

**Suggested Journalism Electives**
Select 10 credits from the following:
- JOURN 4150 Using Infographics
- JOURN 4406 News Editing
- JOURN 4410 Intermediate Writing

### Multimedia Producing (Interdisciplinary)
The focus of this Interest Area is planning and producing content across medium platforms. A student in this area will have the knowledge and skills to work in traditional newsrooms, Web-only newsrooms, non-traditional news organizations and other growing media areas. A student choosing this path is one who is less interested in a traditional reporting track and is more interested in working with content created by others. Administered by the Convergence Faculty.

**Required Journalism Classes**
- JOURN 4502 Multimedia Planning and Design (3 credits)
- JOURN 4804 Convergence Reporting (3 credits)
- JOURN 4806 Convergence Editing and Producing (3 credits)
- JOURN 4992 Reporting, Editing and Marketing of Converged Media (capstone) (3 credits)

Select one of the following:
- JOURN 4554 Visual Editing for Multimedia (3 credits)
- JOURN 4670 Newspaper Photo Desk Management (3 credits)

**Suggested Journalism Electives**
Select 10 credits from the following:
- JOURN 4150 Using Infographics
- JOURN 4406 News Editing
Convergence Photojournalism (Interdisciplinary)

This course of study is for those interested in communicating largely through photography and other visual mediums. Skills acquired include documentary photography, lighting and studio techniques, and photo editing with both still and moving images. Students build an appreciation for and understanding of visual communication and can expand into illustrative graphics, video and multimedia management. Students are prepared for careers as photojournalists for print and online publications and as freelancers. Administered by the Convergence Faculty.

Convergence Radio Reporting and Producing (Interdisciplinary)

This interest area is for the student wanting to work largely in audio reporting. This area includes a wide range of reporting classes and producing/management classes, giving the student a sense of radio work both as a reporter and as a behind-the-scenes producer. Several courses offer the opportunity for training in media management. Administered by the Convergence Faculty.

### BJ in Journalism with Emphasis in Magazine Journalism

**Major Program Requirements**

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

#### Arts and Culture Journalism (Interdisciplinary)

This interdisciplinary Interest Area gives students the opportunity to expand their understanding of the arts as they develop critical thinking skills about society, culture and the media. Students are encouraged to see culture as a central part of the journalistic enterprise as they learn about art, music, theatre, popular culture and critical reviewing. This is intended to lay the groundwork for careers not only in traditional and emerging forms of journalism but also as communicators in cultural institutions, museums, nonprofit agencies, government programs and community arts organizations. *Administered by the Magazine Faculty.*

### Also Recommended

Minor in Art, Music, Theatre or Film Studies

### Magazine Design

This Interest Area focuses on visual storytelling in the magazine industry. Critical thinking skills and application methods are studied and practiced in courses that cover design skills, management issues and theoretical frameworks. This Interest Area prepares students to be designers/art directors at print and online publications. 

**Administered by the Magazine Faculty.**

**THEATR 3770** The Theatre Experience: From Page to Stage and Screen

### Magazine Editing

Students in this Interest Area focus on the finer aspects of microediting: grammar, style, syntax and usage. They also gain hands-on experience in macroediting: pitching and assigning stories, writing display type, coordinating photography and art, working with designers, fact checking, proofreading and following a publication through all stages of print or online production. Classes provide an analysis of the industry and study of innovative techniques and delivery platforms. Recommended for those who seek careers as editors in the magazine and book-publishing industries. 

**Administered by the Magazine Faculty.**

**BJ in Journalism with Emphasis in Print and Digital News**

**Major Program Requirements**

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**Print and Digital News Interest Areas**

**Business and Economics Journalism (Interdisciplinary)**

This Interest Area is for journalism students interested in learning the skills of reporting business and economics news across platforms. It allows students to add a focus on economic, business and consumer reporting and emphasizes the use of financial data analysis in reporting. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as basic accounting, or advanced economics and finance. Students will gain the skills to work covering Wall Street, government economics, consumer and personal finance issues, and local business. A minor in Economics or Business is suggested. Administered by the Print and Digital News Faculty.

**Required Journalism Classes**

Select one of the following:  

- JOURN 4450 News Reporting  
- JOURN 4804 Convergence Reporting  
- JOURN 4300 Broadcast News I

Select one of the following:

* If you are not planning to pursue a R/TV focus in this interest area (i.e. Taking Broadcast I, II & III) you can enroll in JOURN 4300 only on a space available basis.

** Note: Students who want to do business reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III

**Multiplatform Design (Interdisciplinary)**

This Interest Area teaches students to tell stories visually across online and print platforms. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. They learn to design in a way that lets the users take control of their information consumption and to use multimedia tools to enhance a story or persuasive message, not distract from it. Administered by the Print and Digital News Faculty.

News Reporting (Interdisciplinary)
This Interest Area provides the opportunity for reporting and writing across a variety of styles and platforms, including breaking news, enterprise and features. Stories are reported and produced using words, video, audio, graphics and more. The program of study prepares students for jobs in online media, and print publications such as newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

News Editing
Students in this Interest Area learn the fundamentals of editing to correct and present copy for publication; content management, selection and display; how to evaluate content; copy flow and time management needed for publishing on deadline, whether that be at a set time or throughout a 24-hour cycle. The program of study prepares students for jobs in online and print publications, including newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

JOURN 4804 Convergence Reporting
**News Design**

This Interest Area teaches students to tell stories using the tools of visual journalism. Students learn to make decisions about the framing and packaging of information, and the effects of those decisions on user perceptions. Through hands-on work in the Columbia Missourian newsroom, students gain real-world experience that prepares them to organize information and be clear visual communicators. The program prepares students for jobs in online and print publications, including newspapers, magazines and nonprofit organizations. Administered by the Print and Digital News Faculty.

**Required Journalism Classes**

- JOURN 4400 Introduction to News Editing 2
- JOURN 4406 News Editing 3
- JOURN 4450 News Reporting 3
- JOURN 4500 News Design 3
- JOURN 4990 Journalism and Democracy (capstone) 3

**Suggested Journalism Electives**

**Sports Journalism**

This Interest Area is for those interested in pursuing a career in sports journalism at any level. Covering sports today includes not only knowing the games but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 557), magazine journalism (p. 560), or print and digital news), then pick from a wide range of electives to round out their skills. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

**Required Journalism Classes**  
Select one of the following:  

- JOURN 4450  News Reporting  
- JOURN 4804  Convergence Reporting

Select one of the following:  

- JOURN 4460  Advanced News Reporting  
- JOURN 4806  Convergence Editing and Producing

Select one of the following:  

- JOURN 4410  Intermediate Writing  
- JOURN 4814  Multimedia Sports Journalism

**Required:**  

- JOURN 4422  Sports Journalism  
- JOURN 4990  Journalism and Democracy  
- JOURN 4992  Reporting, Editing and Marketing of Converged Media

**Suggested Journalism Electives**  
Select 10 credits from the following:  

- JOURN 4148  Interviewing Essentials  
- JOURN 4150  Using Infographics  
- JOURN 4406  News Editing  
- JOURN 4410  Intermediate Writing  
- JOURN 4416  Science, Health and Environmental Writing  
- JOURN 4436  Investigative Reporting  
- JOURN 4438  Business and Economics Reporting  
- JOURN 4440  Mapping for Stories and Graphics  
- JOURN 4508  Information Graphics  
- JOURN 4510  Visual Communication  
- JOURN 4550  Basic Photography and Photo Editing  
- JOURN 4950  Understanding Audiences

- HSP_MGMT 3515  Sport Venue Operation Management  
- HSP_MGMT 4520  The Business of Sport Venue Management  
- HSP_MGMT 4525  Sport Venue Design and Risk Management

**Note:** Students who want to do sports reporting with KOMU must be in or have taken JOURN 4308 Broadcast News III.

**Watchdog Journalism (Interdisciplinary)**

This Interest Area is for journalism students interested in learning the skills of investigative and computer-assisted reporting across platforms. It allows students to add a strong investigative-watchdog focus and emphasizes the use of data analysis in reporting. The program encourages students to develop a specialty area, such as covering health care or religion, but that is not required. Similarly, it encourages students to take basic courses in other subject areas that will give them important skills, such as introductory accounting (though again, this is not required). Students will gain the skills to work in computer-assisted reporting or investigative reporting. Students choose a core course of study through a specific emphasis area (convergence journalism (p. 557), magazine journalism (p. 560), print and digital news), then pick from a wide range of electives to round out their skills. Electives include everything from...
advanced reporting and editing to business journalism, to social media techniques and community outreach.

**Semester Plan**

See your advisor to set up a semester plan.

**BJ in Journalism with Emphasis in Radio-Television Journalism**

**Major Program Requirements**

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

**Radio-Television Interest Areas**

**Radio-Television Producing**

This Interest Area teaches students how to structure, write and build a newscast. They will receive instruction in newsroom leadership and practice guiding a newscast to completion in the professional newsrooms and control rooms of KBIA Radio and KOMU-TV. *Administered by the Radio-TV Faculty.*

### Radio-Television Reporting and Anchoring

This Interest Area will teach students how to gather the information they will need to write and edit stories for radio, television and the Internet. They also will learn on-air delivery techniques and receive instruction on how best to deliver their journalism. They will do so in the professional newsroom settings of KBIA Radio and KOMU-TV. Administered by the Radio-TV Faculty.

**Required Minimum Credits:** 16
Radio-Television Sports Journalism

This interest area is for those students who are preparing for a career in sports journalism at any level. Covering sports today includes not only knowing the games, but also knowing about the larger financial, legal and ethical issues in sports. Students in this interest area have an opportunity to work across media platforms to gain experience in covering games, finding in-depth issue and feature stories and covering breaking news in sports. Students choose a core course of study in the radio-television journalism emphasis area. Students then pick from a wide range of electives to round out their skills and work in other media. Electives include everything from advanced reporting and editing to business journalism, to social media techniques and community outreach.

Radio-Television Watchdog Journalism

This interest area is for journalism students interested in learning the skills of investigative and computer-assisted reporting for radio and television news. Students choose their core course of study in radio-televison journalism (p. ). The interest area builds student skills in investigative reporting and using data analysis in reporting. It also encourages, but does not require students to use elective coursework to develop a specialty area such as business news, health care or religion reporting. Through this interest area, students will gain the skills to work as an investigate reporter or producer in radio or television news.

BJ in Journalism with Emphasis in Strategic Communication

Major Program Requirements

Students must complete all university requirements (p. 17), including general education (p. 18), in addition to the degree requirements below.

Strategic Communication Interest Areas

Strategic Communication

This Interest Area educates students in the principles and practice of all communication designed to create a desired response from a given audience. It includes focused study and hands-on practice within the Pathways of Account Management, Art Direction, Copywriting, Media Planning, Public Relations, Research and Interactive—and prepares students for careers in these seven areas. Crossover between these Pathways is permissible and encouraged. Administered by the Strategic Communication Faculty.

International Strategic Communication

The next generation of strategic communication students must be equipped to work in a global environment. This Interest Area is designed to capitalize on Missouri’s international reputation and its international resources by placing under one umbrella the school’s existing Study Abroad opportunities, its internationally focused media and multimedia projects with global partners. Students in this area take Strategic Communication courses to complement their international interests. The Strategic Communication Interest Area is administered by the School’s International Programs Office.

Minor in Journalism

Journalism Minor Policies and Procedures

The School of Journalism’s minor consists of 15 credit hours of journalism coursework and is for students within other MU academic divisions who wish to broaden their understanding of the news media’s role in society. Courses for minors parallel MU’s broader liberal arts traditions and are not skills-oriented.

Admissions

JOURN 1000 is open to any MU student who is a non-journalism major in good academic standing. To declare a minor, a student must be in good academic standing at MU and have completed 60 credits.

Pre-Journalism students who follow the School of Journalism’s general education requirements are preferred for admission. Pre-Journalism students who complete either JOURN 1100 and JOURN 2100 or JOURN 1100 and JOURN 2150 with a C or better (and then decide to minor within the School of Journalism) are eligible to take 9 more upper division (3000 or 4000 level course) credits within the School. Pre-Journalism students who decide to minor after completing JOURN 1100 are ineligible to take JOURN 1000.

Other MU students with a 3.0 GPA or higher are eligible on a space available basis. Journalism majors are ineligible for the journalism minor program.

All students apply to be a journalism minor and complete a form that is available from a designated staff liaison in the Journalism Student Services Office, 76 Gannett Hall. Journalism minors must apply to be eligible to register for courses.

All admissions and other requirements apply to both current and transfer students. Transfer students may use up to three credit hours of approved journalism transfer credit toward a journalism minor.

Courses

Up to 15 credits selected from the following classes:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 1000</td>
<td>The News Media: Journalism and Advertising in a Democratic Society</td>
<td>3</td>
</tr>
<tr>
<td>or JOURN 1100</td>
<td>Principles of American Journalism</td>
<td></td>
</tr>
<tr>
<td>JOURN 2000</td>
<td>Cross-Cultural Journalism</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 3000</td>
<td>History of American Journalism</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 4000</td>
<td>Communications Law</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 2100</td>
<td>News and JOURN 2150 Multimedia Journalism</td>
<td></td>
</tr>
</tbody>
</table>

The selected courses focus on news media and society issues. Students are not skills-oriented and frequently have room for non-majors to enroll.

JOURN 1000 also was intended as a class for non-majors.

Other eligible courses: (all require permission of course instructor emailed or sent to the designated advisor for minors):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>JOURN 4568</td>
<td>History of Photojournalism</td>
<td>3</td>

<tr>
<td>JOURN 4658</td>
<td>International Journalism</td>
<td>3</td>
</tr>
<tr>
<td>JOURN 4990</td>
<td>Journalism and Democracy</td>
<td>3</td>
</tr>
</tbody>
</table>

These are the classes the School of Journalism currently offers for international and U.S. exchange, MU interdisciplinary and general studies majors plus non-degree seeking undergraduate students. These courses are not skills-oriented and frequently have room for non-majors to enroll.

The selected courses focus on news media and society issues. Students can choose whatever combination of classes they wish to take 15 credits. Journalism minors are ineligible to take any other courses with the School of Journalism. Journalism minors may take no more than 15 credits within the School of Journalism.

Registration

MU students can register for JOURN 1000 through regular procedures. For all other classes, journalism minors place their course preference on a waiting list. Students are eligible to enroll after course registration by journalism majors is completed. The School’s designated liaison for journalism minors will inform students when course space is available following registration periods each semester.

Academic Status

Journalism minors are subject to probationary or suspension status as determined by the division in which each student’s major resides.

Journalism minors who receive lower than a C- in any journalism course must repeat it and complete with a C- or better. Journalism courses may only be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

Fees

Journalism minors must pay School of Journalism activity fees for all journalism courses.

Advising

Journalism minors will not be assigned a faculty advisor or an academic advisor within the Journalism School. Academic advising occurs in the division of each student’s major. Journalism minors are free to consult with the school’s designated liaison and with the School of Journalism faculty on course-specific matters at any time. Journalism minors also can consult on longer-range career and professional issues with journalism faculty. However, faculty advising priority is given to journalism majors.

Career Services

Journalism minors are ineligible to interview with prospective employers who visit the School of Journalism. Journalism minors should interview employers in their home division. The School of Journalism’s placement website is open for use by journalism minors. Journalism minors can
consult with the School of Journalism’s Career Service Coordinator, although priority is given to journalism majors and Pre-Journalism students.

Other Disciplinary Actions

Disciplinary actions for Journalism minors are the same as for Journalism majors. All cases of alleged academic misconduct will be immediately forwarded and reviewed by the MU Provost’s office. All cases of classroom misconduct will be immediately forwarded and reviewed by the office of the Vice Chancellor for Student Affairs.

Graduate

MA in Journalism

Admission Contact Information

Ginny Cowell (cowellvj@missouri.edu)
179 Gannett Hall
Columbia, MO 65211
573-882-4852
http://www.journalism.missouri.edu/graduate/masters/
http://journalism.missouri.edu/programs/online/

About the Master of Arts

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media and mass communications; expansion of previous professional preparation and experience (e.g. newspaper editing) into a new area (e.g. broadcasting reporting); comprehensive academic preparation for careers in journalism teaching and research; and combinations of the three.

Degree Options

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism. Because the faculty periodically updates these models, students should visit the school’s Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Five-year Bachelor to Master Program

Another option for students who seek a master’s degree is the 5-year bachelor to master’s program (http://journalism.missouri.edu/programs/masters/models-and-programs/five-year-bjma-models). To be eligible for this option, students must have completed a bachelor’s degree in journalism from Missouri. Students following the 5-year plan are expected to carry 10-12 hours per semester and will graduate after completion of two semesters of course work and a third semester of project or thesis. Only graduates of Missouri Journalism’s undergraduate program are eligible for the BJMA program.

Joint Journalism and Law Programs

The School of Journalism and the School of Law have created joint programs (http://journalism.missouri.edu/programs/masters/models-and-programs/journalism-law-models) that provide an opportunity to earn a MA in Journalism and either a JD or a LLM from Law. Students in the joint programs complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health

The School of Journalism and the program in Public Health have created a dual-degree option (p. 629) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Distance Learning

Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format. Health communication, interactive media, media management and strategic communication models are available through distance learning to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master’s programs here http://journalism.missouri.edu/graduate/online/.

Master’s Admission Criteria

Campus program deadlines:
Fall deadline: January 1
Spring deadline: September 1

Online program deadlines:
Fall deadline: July 1
Spring deadline: November 15
Summer deadline: April 15

• Minimum Academic IELTS scores:
  Item                  Score
  Listening             7.0
  Reading               7.0
  Speaking              7.0
  OVERALL Score        7.0

• Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  Speaking: 25             100
    100                   600

• Suggested GRE scores:
  When did you take the GRE?  Verbal + Quantitative
  Prior to August 1, 2011   1100
  On or After August 1, 2001 V: 153-160; Q: 144-148

• Minimum GPA: 3.0 in last 60 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials

To the Graduate School
All required Graduate School documents
To the Journalism Master's Program:

Please upload the following application materials into the online Graduate School application in Apply Yourself:

- 3 essays as specified on Departmental application website
- Résumé
- 3 letters of recommendation (use the online Graduate School application system)

Please submit 2 hard copy sets of official transcripts and official GRE scores to:

Earl English Graduate Studies Center
Missouri School of Journalism
University of Missouri
179 Gannett Hall
Columbia, MO 65211-1200

Financial Aid from the Program

Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

Plan of Study

Two-year students are required to complete a minimum of 37 hours, at least half of which must be in 8000-level courses. Five-year BJ-MA students complete a minimum of 30 hours (15 hours at the 8000-level). Specific course requirements vary depending on the option selected.

Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in 8190, Area Problem (for projects) or 8090, Research (for Thesis). Students earn an additional nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates program in WAshington DC, Brussels and Buenos Aires which are supervised by full-time faculty members. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Length of Study

The degree must be earned within eight years of beginning the program.

PhD in Journalism

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Doctoral Admission Criteria

Fall deadline: December 15
Spring deadline: September 1

- Minimum Academic IELTS scores:

- Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass communication or a related field. A degree (bachelor’s or master’s) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master’s program may be required to complete a project to demonstrate their ability to do independent research.

Deadlines for application are December 15 for fall entry and September 1 for spring. Deadlines are firm, and no applicant is considered for admission until all required information is received.

Required Application Materials

Step 1: Upload the following application materials into the Graduate School’s online application system:

- All required Graduate School documents
- Statement of Doctoral Objectives
- Résumé
- A 500-word abstract of your master’s thesis (or thesis proposal, if your thesis is not yet complete)
3. two courses in statistics;
4. two 7000 or 8000-level research methods courses outside the School of Journalism.
A grade of A or B must be made in any course used for options 2, 3 or 4.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student’s teaching skills will be evaluated in Doctoral Seminar, at which point planning for the student’s future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100, JOURN 2100, and JOURN 3000 during their third semester in the program.

In the student’s fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student’s ability and desire, students might teach a course independently during later semesters.

Financial Aid from the Program

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

Plan of Study

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the adviser and doctoral committee. Course selections are based on the intellectual requirements of the dissertation and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master’s or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Proseminar I (JOURN 9000), Doctoral Proseminar II (JOURN 9006), Doctoral Seminar (JOURN 9010) and Doctoral Research Seminar (JOURN 9087) are required of all PhD students.

Qualifying Examination

Students are admitted to the PhD program in journalism when they have passed the doctoral seminar (qualifying examination), which must be taken the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Foreign Language & Research Tool Requirements

Students are expected to have a background in a foreign language and to develop a research tool. The language requirement may be met by three semesters of college-level foreign language courses or an equivalency acceptable to the doctoral faculty. At the discretion of the student’s doctoral committee and the associate dean for graduate studies, a second tool may be used to substitute for the language requirement.

There are two research tool options:

1. competency in a second foreign language. This may be satisfied by two years of college-level work recently passed with a grade of C or better or an acceptable ETS score. A foreign language is one that is non-native or not the primary language used in the student’s school system;
2. computer proficiency as evidenced by completion of two computer courses or an equivalency acceptable to the doctoral faculty;
Additional Minors and Certificates - Journalism

Undergraduate

Graduate

• Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 578)

Graduate

Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department. Under the program, students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 6 credits of electives. The Minor will appear on the student's transcript.

Required Core Courses

<table>

</tr>
</tbody>
</table>

Electives

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability varies by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student's curricular needs.

School of Nursing

Administration
Judith F. Miller, Dean
Roxanne McDaniel, Associate Dean for Academic Affairs
Vicki Conn, Associate Dean for Research
Office of Student Affairs
S235 Nursing School Bldg.
(573) 882-0277

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The School of Nursing is approved by the Missouri State Board of Nursing and has national accreditation.

The undergraduate program is approved by the Missouri State Board of Nursing. The Baccalaureate Program at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Undergraduate
• Admissions
• Advising
• Health Care

Admissions

Traditional BSN Option
The freshman and sophomore years are designated as the “pre-nursing” years. The junior and senior years are designated as the “clinical nursing major” years. Pre-nursing students apply for admission to the clinical major during the last semester of general education and prerequisite coursework and are admitted to the clinical nursing major on a competitive and space-available basis when prerequisite courses have been completed. Any student who is a Nursing Scholar is guaranteed admission into the clinical nursing major. Please see the Nursing and/or Honor’s College websites for eligibility information and application details.

Each student’s application is reviewed systematically and considered holistically for each admission period. The School values MU’s Commitment to Diversity and the call of the American Nurses Association that the nursing workforce should reflect the diversity of the population. The School is also committed to rural health care and to educating nurses for practice in rural Missouri. Therefore, the School seeks to ensure that the student body includes persons from rural Missouri and persons of backgrounds that are underrepresented in the nursing workforce.

Clinical application and admission criteria include:
• Successful completion of all general education and prerequisite coursework prior to beginning clinical coursework;
• Satisfactory grades from biology, chemistry, and two of the three advanced lab sciences (microbiology, anatomy, physiology) to be eligible to apply for the clinical nursing major;
• Minimum cumulative grade-point average of 3.0 (on a 4.0 scale) for all college/university courses;
• Competitive grade-point average in nursing prerequisite courses;
• Minimum GPA of 3.0 for any nursing prerequisite courses;
• Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
• Evidence of motivation toward a nursing career

RN to BSN Option
The RN to BSN online option is for registered nurses who have earned a diploma or associate degree in nursing with a cumulative GPA of a 2.8 of higher and seek a bachelor’s degree in nursing. RN to BSN courses are offered via the Internet with limited trips to campus for some nursing course.

RN to BSN registered nurse applicants must meet the same admission standards described above for the Traditional BSN Option. They must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. Completion of the program includes 120 credit hours. The length of the program varies, depending on equivalent prerequisite courses completed and choice of part-time or full-time enrollment.

BSN Accelerated Option
The BSN Accelerated Option is a 15 month program designed for individuals who hold a non-nursing degree at the baccalaureate level or higher.

Students are admitted to the Accelerated BSN Option based on the following criteria:
• A baccalaureate or higher degree from an accredited college or university.
• Two letters of reference from individuals that can attest to the student’s motivation and ability to complete a course of intensive study.
• Statement of career goals
• Description of the applicant’s view of nursing as a profession.
• A personal interview.
• Evidence of academic achievement of a 3.0 cumulative GPA or higher on a 4.0 scale on undergraduate degree.
• Completion of prerequisite courses with a minimum of a C or better
• Evidence of capacity to uphold the practice standards and ethical codes of the nursing profession; and
• Evidence of prior work success and/or ability to handle a fast-paced academic program.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Transfer Students
Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:
• Appropriate GPA for credit hours attempted, 3.0 cumulative GPA or higher
• Approval from the associate dean’s office
Transfer students must apply for admission through the MU Admissions Office.

International Students
In addition to the admission criteria described above, international students must meet the following criteria:
• Test of Written English (TWE) score of 4 or higher
• Test of Spoken English (TSE) score of 50 or higher
• TOEFL score of 600 (paper-based) or 250 (computer-based) or 100 (internet-based)
• English Language Support Program Test taken with success

Advising
The academic advisor’s office is in room S235 of the School of Nursing Building, (573) 882-0277. In addition, each clinical nursing major is assigned a faculty advisor who is available for consultation about academic or professional matters.

Health Care
Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at http://studenthealth.missouri.edu/.

Graduate
Nursing Graduate Programs
Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

About the Sinclair School of Nursing
Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s program is accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791.

Technology Requirements
• Student will require a computer with a video card (responsibility of the student).
• Computer plus laptop is ideal for clinical courses and on-campus sessions.
• For home: 384K minimum download/upload speed; a business connection best for quality. If using satellite or wireless – connection delays may be a problem and you are expected to find a site near your home to make connection for classes.
• For work: firewalls need to be evaluated, conducive location when at work – not interfering with work.
• Quality – testing (initial, and 30 minutes before classes and as needed)
• Logitech camera (webcam)
• Headset with microphone or speakers and microphone.
• Windows XP or newer, with 1GB RAM, 80GB Hard Drive, 2.0Ghz or better processor (Core 2 Duo -Dual Core preferred).
• Microsoft Office – latest version (to purchase)
• Endnote (to purchase)
• E-mail capabilities
• Functional Anti-Virus Software (example: Norton-Symantec/McAfee) (software)

Career Preparation
The DNP program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult or Pediatric CNS, FNP, PNP, or FMHNP) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.
Nursing

The school offers a baccalaureate program that prepares students for the general practice of nursing, a master's degree program that prepares advanced-practice nurses and a doctoral degree program. The continuing education program serves practicing nurses throughout the state to update and increase nursing knowledge and skills.

The graduate of the baccalaureate program is a generalist in the practice of nursing, able to design, implement and evaluate nursing systems for individuals, families and small groups. As a generalist, the graduate uses a general concept of nursing as a framework for integrating and organizing specific knowledge in nursing, the sciences and the humanities. Graduates begin their professional careers with a focused nursing perspective and, along with other professional health providers, assume responsibility for meeting the health needs of our society.

Faculty

**Professor** J. Armer**, V. S. Conn**, L. H. Ganong**, J. Miller, M. J. Rantz**

**Assistant Professor** T. Bloom**, K. Lane**, L. Phillips**, L. Popejoy**, A. Vogelsmeier**

**Associate Teaching Professor** J. E. Bostick*, S. Farrah, D. A. Gayer*, T. Ruppar**

**Assistant Teaching Professor** C. Bausler*, L. Kuensting*, K. Metcalf-Wilson*, G. M. Oliver*, D. Pennington*

**Instructor of Nursing** V. Bader, L. Chronister, K. Ellis, P. Evans-Smith, L. Frey, G. Gregory, C. Grider, B. M. Hanson, A. G. Heine, P. Mascendero, D. L. Mendenhall, G. Nickell, D. C. Otto

**Adjunct Associate Professor** C. Brooks, C. Wakefield

**Adjunct Assistant Professor** S. Brier*, S. Ulbrich

**Adjunct Instructor** L. Phillips, S. Revelle

**Teaching Professor** L. Miller*

**Associate Research Professor** B. Wakefield**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• Department Level Requirements (p. 583)

• BSN in Nursing (p. 584)

Academic Regulations

Credit by Examination

RN to BSN and Accelerated BSN students may earn advanced-standing credit in some courses by satisfactorily completing examinations. Those who elect not to take the examinations or who fail to achieve satisfactory results are required to enroll in the courses. The cumulative grade point average is not affected by examination results. A student who has a record of enrollment in a support course with a grade lower than C is not eligible later for credit on the basis of an examination covering the same subject.

The student may acquire advanced standing by taking subject CLEP examinations in university general education courses and required support courses. If no CLEP examination is offered, department examinations may be available. More information on CLEP examinations is available through MU Testing Services.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-nursing Years

• Satisfactory academic standing requires a minimum semester GPA of 2.0 and a cumulative GPA at or above the standards listed below:

<table>
<thead>
<tr>
<th>Class</th>
<th>Semester</th>
<th>Credits</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>1st semester</td>
<td>1-15</td>
<td>2.8</td>
</tr>
<tr>
<td>Freshman</td>
<td>2nd semester</td>
<td>16-30</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>3rd semester</td>
<td>31-45</td>
<td>3.0</td>
</tr>
<tr>
<td>Sophomore</td>
<td>4th semester</td>
<td>46-60</td>
<td>3.0</td>
</tr>
</tbody>
</table>

• A grade of C or better is required for anatomy, biology, chemistry, ENGLSH 1000, human development, microbiology, nutrition, physiology, nursing courses and Writing Intensive courses. A grade of “C-” or better is required in algebra or statistics. A grade of “F” is unacceptable for any course.

• Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned on repetition of a course, students are ineligible to continue enrollment in the School of Nursing.

• Students who are in the traditional BSN option and withdraw in good standing for any reason must contact the Associate Dean for readmission.

Clinical Nursing Years

• Progression into the next semester’s nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester’s courses.

• A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0.

• A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires approval of SAP committee. Students who earn less than a C on repetition of a nursing course are ineligible to continue enrollment in the School of Nursing.

• Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.

Probation and Academic Dismissal

The faculty of the School of Nursing has established criteria governing nursing probation and dismissal.
Pre-nursing Years

- Students who do not meet the requirements set forth in the progression criteria are placed on academic probation. They must attain the cumulative grade point average required for their classification, as outlined previously, within two semesters or they are ineligible to re-enroll in the School of Nursing, and must transfer divisions.
- A student whose semester GPA falls below 1.0 is ineligible to re-enroll at MU for the period of one year.

Clinical Nursing Years

- A student who does not meet the requirements set forth in progression criteria is placed on academic probation.
- A student on academic probation must obtain a cumulative GPA of 2.0 within two semesters or is ineligible to re-enroll in the School of Nursing.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Career Opportunities

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

Undergraduate

Department Level Requirements - Nursing

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:
- Valid CPR certificate
- yearly TB tests
- Hepatitis B series
- School of Nursing medical form showing current immunizations
- Negative drug screen
- Criminal background check

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:
- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Mid-Missouri Mental health Center
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)

Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.
BSN in Nursing

Major Core Requirements - Nursing (BSN)

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Completion of all foundational and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Completion of all University graduation requirements (p. 17), including University general education requirements (p. 18)
- Completion of all Department Level Requirements (p. 583)

Pre-Nursing requirements
Curriculum is based on prerequisite of one year of high school biology with lab and grades of C or better. The student must meet all University general education requirements.

### Graduate

**MS in Nursing**

**Admission Contact Information**

http://nursing.missouri.edu/
S235 School of Nursing
Columbia, MO 65211
573-882-0200

The distance mediated master’s of science (MS(N)) program prepares graduates to fulfill and excel in advanced nursing practice roles requiring advanced skills in nursing education and/or leadership in delivery of health care to individuals, communities and populations.

**Application Deadlines**

Deadline for Summer entrance: February 1

**Admission Criteria**

To be considered for admission to the Sinclair School of Nursing’s master’s degree program, students must meet the following requirements:

- A degree from a nationally accredited baccalaureate nursing program.
- A minimum GPA of 3.3 for the last 60 credit hours of the baccalaureate program.
- Current licensure as a registered nurse.
- Graduate Record Examination (GRE) scores, which may be waived for any student with a GPA of 3.3 higher (4.0 grading scale), based on the last 60 hours of undergraduate coursework.
- Successful completion of a graduate-level statistics course (ESC_PS 7170 or STAT 7020).
- Two reference forms.
- Resume or curriculum vitae.
- A personal statement of your professional goals and how this program will help you achieve them.
- List of Possible Clinical Preceptors/Internship Mentors.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

**International Student Admission for Nursing MS**

- All international admissions are initially the responsibility of the MU Coordinator of International Student Programs. The Student Admissions and Progression Committee of the School of Nursing may not act upon any international application for admission until the applicant has been cleared through the office.
- Non-native English speaking applicants need documentation of English-language proficiency, demonstrated through a satisfactory Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score within the last two years.
- **Minimum TOEFL scores**:
  
<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Internet-based (iBT)</td>
<td>80*</td>
</tr>
<tr>
<td>Paper-based (PBT)</td>
<td>550**</td>
</tr>
</tbody>
</table>

  * No score lower than 15 in any section.
  ** No score lower than 50 in any section.

- **Minimum total academic IELTS score** for graduate admission: 7.0

**Technology requirements**

To complete online courses, you will need access to a computer with a modern web browser, a working Internet connection, word processing software, and disk space to save your work. Your browser should support graphics, run JavaScript and accept cookies. Portions of the courses may require Adobe Flash Player.

To ensure that your computer is set up and ready to begin your online course, it is recommended that you review the Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx).

**Areas of Study for the MS program**

Students in the Master of Science program obtain advanced preparation in one of two areas:

- Nurse Educator (http://nursing.missouri.edu/academics/master-of-science/areas/nurse-educator.php)
• Leadership in Nursing and Healthcare Systems (http://nursing.missouri.edu/academics/master-of-science/areas/leadership.php)

**Master of Science in Nursing Progression Requirements**

The University of Missouri requires a minimum of 30 credit hours beyond the baccalaureate degree for a master’s degree. The MU Sinclair School of Nursing requirements vary from 37 to 41 credit hours depending on the area of study. For satisfactory progress, students must maintain a GPA of 3.0 and be continually enrolled during fall and spring semesters until completion of the degree.

**Thesis or Master’s Exam**

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of a Master’s Exam (MS exam) or thesis. The MS exam consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

To satisfy requirements for the MS, a student must:

• Complete an approved program with a cumulative GPA of 3.0
• Successfully defend a written thesis or complete the MS Exam
• Complete the program within a five-year period

**DNP in Nursing Practice**

**Admission Contact Information**

S246 School of Nursing
Columbia, MO 65211
573-882-0200
E-mail: Nursing@missouri.edu
http://nursing.missouri.edu

The MU Sinclair School of Nursing’s distance mediated Doctor in Nursing Practice (DNP) program began in the Summer of 2010. DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. All clinical courses will have required on campus days that range from one to four days during the semester (see required On Campus dates (http://nursing.missouri.edu/academics/master-of-science/on-campus-dates.php)).

**Career Preparation**

The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Pediatric & Adult-Gerontology Clinical Nurse Specialist (http://nursing.missouri.edu/academics/master-of-science/areas/cns.php), Family Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/family-nurse-practitioner.php), Pediatric Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/pediatric-np.php), and Family Psychiatric & Mental Health Nurse Practitioner (http://nursing.missouri.edu/academics/master-of-science/areas/mental-health-fmnp.php). Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

**Application Deadlines**

Application Date: December 1

**Admission Criteria for the Doctor of Nursing Practice**

• Completed application for admission to the MU Graduate School at the University of Missouri (Apply Yourself).
• Completed application for admission to the DNP program at the MU Sinclair School of Nursing (Apply Yourself).
• Submission of all official transcripts documenting a baccalaureate or master degree in Nursing from a program accredited by a national organization responsible for nursing accreditation (i.e. National League for Nursing Accrediting Commission (NLNAC) or Commission on Collegiate Nursing Education (CCNE)
• A grade point average (GPA) of 3.3 on a 4.0 scale based on the last 60 hours of undergraduate nursing course work for applicants with less than a master’s degree.
• A cumulative GPA of 3.5 on a 4.0 scale for applicants with a master’s degree in nursing.
• Applicants who do not meet the minimum GPA requirements must submit acceptable scores on the Graduate Record Exam (GRE) and the exam must have been taken within the last five years (Recommended minimum scores: If the GRE was taken prior to August 1, 2011: Verbal 500; Quantitative 500; Writing 4.0. If the GRE was taken on or after August 1, 2011: Verbal 153; Quantitative 144; Writing 4.0.).
• Successful completion of a graduate level statistic course (eg. STAT 7020, ESC_PS 7170) within 5 years.
• Submission of copies of current, unencumbered Registered Nurse license(s).
• Submission of copies of all advanced practice nursing certification and/or credentialing/recognition documents for applicants with a master’s degree.
• Verification of faculty supervised preceptor clinical hours in your Advanced practice program (http://nursing.missouri.edu/apply/applications/certification-checklist-for-dnp.pdf)
• Submission of three (3) professional recommendations supporting the applicant’s potential success in the DNP program (using form on the Apply Yourself website).
• Submission of curriculum vitae using the official MU Sinclair School of Nursing format (curriculum vitae guidelines).
• Submission of a three- to five-page essay describing your professional goals and how participation in the DNP program will enhance these goals.
• Documentation of English-language proficiency (of non-native English speaking applicants), demonstrated through a satisfactory Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score within the last two years.
• Successful interview.
• For more information, visit the University’s Admission web pages.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online
programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Technology Requirements

To complete distance-mediated/online courses, you will need access to a computer with a modern web browser, a working high-speed internet connection, Microsoft Office, EndNote, SPSS, and Antivirus software. Software may be purchased from MU DoIT (http://doit.missouri.edu/software) very inexpensively. You may want an extra external hard drive or cloud technology to save your work. Your browser should support graphics, run JavaScript and accept cookies. Portions of the courses may require Adobe Flash Player. A headset with a good microphone is used for online synchronous discussions.

To ensure that your computer is set up and ready to begin your online course, it is recommended that you refer to the Mizzou Online Computer Requirements webpage.

DNP Progression Requirements

The DNP in nursing requires a minimum of 74.5 credits beyond the baccalaureate degree. Of the 74.5 hours, 36.5 credits must be completed at the University of Missouri.

Ultimately, the student, in collaboration with their DNP residency committee, determines the student’s plan of study and total credit hours necessary to adequately prepare the student to successfully complete their DNP residency project.

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

• Current required immunizations
• Satisfactory criminal background check
• Satisfactory drug screen
• Current CPR certification
• Proof of undisciplined nursing licensure

For more information contact:

PhD in Nursing

Admission Contact Information
S245 School of Nursing
Columbia, MO 65211
573-882-4705
Email: nursing@missouri.edu
http://nursing.missouri.edu

The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options.

• Distance-Mediated PhD Program Option: PhD coursework may be accessed online through the Distance-Mediated PhD program option by learning over the World Wide Web using the Blackboard learning platform. This option also requires a 5 Day On Campus visit (held on the Columbia campus) the first summer of enrollment and 3-4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (http://nursing.missouri.edu/academics/phd/on-campus-dates.php)). Because the program is distance-mediated, students are responsible for obtaining the required technology for successful participation in synchronous distance-mediated courses (see Computer Requirements (http://online.missouri.edu/prepare/computer.aspx));
• International Residential PhD Option: Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Distance-Mediated student cohort participates electronically. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

The PhD curriculum and program requirements are the same whether you choose the Distance-Mediated PhD option or the International Residential PhD option. Only the method of course delivery varies.

Career Preparation

The PhD program prepares scholars to conduct original research, thereby; advancing the body of knowledge that guides nursing practice and contributes to improving population health and healthcare systems. Successful completion of the program prepares graduates for college or university faculty positions as well as leadership roles in nursing, health care, industry, and governmental agencies.

January 1 is the application deadline.

International Applicants to the PhD Program

All international admissions are initially the responsibility of the MU Coordinator of International Student Programs. The PhD Program Committee of the School of Nursing may not act upon any international application for admission until the applicant has been cleared through the office.

• Non-native English speaking applicants need documentation of English-language proficiency, demonstrated through a satisfactory Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score within the last two years.
• Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80*</td>
<td>550**</td>
</tr>
</tbody>
</table>

• No score lower than 15 in any section.
• No score lower than 50 in any section.
• Minimum total academic IELTS score* for graduate admission:
The minimum criteria for admission to the PhD in nursing include:

Admission Criteria for the PhD in Nursing

- Completed application for admission to the MU Graduate School at the University of Missouri.
- Completed application for admission to the PhD program at the MU Sinclair School of Nursing.

BS to PhD Applicants: BSN degree from NLNAC or AACN-accredited school, or equivalent for non-nurse applicants; 3.2 minimum GPA (4.0)

MS to PhD Applicants: Master’s degree from NLNAC or CCNE-accredited school, or equivalent for non-nurse applicants; minimum 3.5 GPA (4.0)

- Submission of all official transcripts documenting a baccalaureate or master’s degree
- Acceptable GRE scores within 5 years of application (Recommended minimum scores: If the GRE was taken prior to August 1, 2011: Verbal 500; Quantitative 500; Writing 4.0. If the GRE was taken on or after August 1, 2011: Verbal 153; Quantitative 144; Writing 4.0.); Successful completion of a graduate level statistics course within 5 years of application (e.g., or ESC_PS 7170);
- Submission of three (3) professional recommendations supporting the applicant’s potential success in the PhD program.
- Submission of curriculum vitae
- 3 acceptable written recommendations (using form on the ApplyYourself website)
- Acceptable original essay that includes research and professional goals and identification of an appropriate MU Sinclair School of Nursing research faculty mentor.
- Documentation of English-language proficiency (of non-native English speaking applicants), demonstrated through a satisfactory Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score within the last two years.
- Successful interview.

Each qualified applicant will be invited to interview with members of the PhD Program committee and potential research mentors. Admission decisions are made by the PhD Program Committee with input from the applicant’s potential research mentor(s). Applicants for whom an appropriate research mentor is not available will not be accepted for admission.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in Massachusetts. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Technology Requirements

To complete online courses, you will need access to a computer with a modern web browser, a working internet connection, word processing software, and disk space to save your work. Your browser should support graphics, run JavaScript and accept cookies. Portions of the courses may require Adobe Flash Player.

To ensure that your computer is set up and ready to begin your online course, it is recommended that you review the Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx).

Doctor of Philosophy in Curricula

There are two curricular options (http://nursing.missouri.edu/academics/phd/curriculum.php): (a) post-baccalaureate (BS-PhD) and (b) post-master’s (MS-PhD). For both options, the doctoral curriculum is divided into three categories:

- specialty content areas (theory analysis and development, specialty area applied sciences, substantive science seminars, and education courses, as well as teaching practicum experiences)
- research and inquiry (philosophy of science, statistics and measurement, qualitative and quantitative methods courses, research practicum experiences as well as dissertation research)
- collateral area (coursework taken outside the School of Nursing that helps to support the dissertation research topic).

Substantive Areas of Science

The Substantive Areas of Science are based upon MUSSON PhD faculty research interests and expertise. Each PhD student selects one substantive area of science upon which to focus. Choices are: Innovation Science; Prevention and Treatment of Trauma Across the Lifespan; Managing Symptoms and Promoting Healthy Behaviors.

Innovation Science

Content and research interests of students selecting substantive area might include innovations in:

- Safety
- Quality Improvement
- Assistive Technology
- Healthcare Systems
- Human Factors
- Care Coordination

Prevention and Treatment of Trauma Across the Lifespan

Content and research interests of students selecting this substantive area might include:

- Social Determinants of Health
- Intimate Partner Violence
• Child Abuse and Neglect
• High Risk Populations
• Substance Abuse and Treatment

Managing Symptoms and Promoting Healthy Behaviors

Content and research interests of students selecting this substantive area might include:

• Adherence to health promoting behaviors
• Optimizing physiologic, psychosocial & physical function
• Coping with acute or chronic illness
• Managing disability or disabling conditions
• Physical and emotional effects of cancer survivorship

Partnerships

The PhD Program collaborates with the other UM system schools of nursing. Faculty may serve on dissertation committees for students across the campuses as appropriate. One benefit of this collaboration is that students in one program may take courses offered by the other programs through Mizzou Online or by using the UM System Visiting Graduate Student Program (http://gradschool.missouri.edu/admissions/eligibility-process/um-visiting-student-programs.php).

A number of Graduate Certificate programs (http://online.missouri.edu/degreeprograms/degrees.aspx) are offered in a distance mediated format by other MU Departments which will allow the students to complete their collateral area of interest. In addition to completing the collateral requirement, the students will obtain a Graduate Certificate documenting their expertise within a specific area.

Additional information about the MU Sinclair School of Nursing PhD program including course descriptions, plans of study, student responsibilities, and progression requirements can be found on the School of Nursing PhD webpage (http://nursing.missouri.edu/academics/phd).
Additional Minors and Certificates - Nursing

Undergraduate

Graduate

• Certificate in Adult Health Clinical Nurse Specialist (p. 590)
• Certificate in Family Mental Health Nurse Practitioner (p. 590)
• Certificate in Mental Health Nurse Practitioner (p. 590)
• Certificate of Pediatric Clinical Nurse Specialist (p. 590)

Graduate Certificate in Adult Health Clinical Nurse Specialist

The Post-Master’s Certificate Program at the MU Sinclair School of Nursing enables nurses with a master’s degree to expand their knowledge and scope of practice in one or more specialty areas. Adult Health CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for adults and older adults across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

For more information about certificate, contact:
Office of Student Affairs
Sinclair School of Nursing
S235 School of Nursing
Columbia, MO 65211
email: nursing@missouri.edu
phone: 573-882-0277

Graduate Certificate in Family Mental Health Nurse Practitioner

Advanced practice nurses are traditionally prepared at the graduate level in a specific clinical area. The specialty area may be identified in terms of population (e.g. pediatrics or adults), and/or type of problem (e.g. mental health). The advanced practice nurse is directly accountable for clinical judgments which includes independent and interdependent decision making. Holders of this certificate provide primary mental health care at an advanced level to individuals of all ages and families. Includes differential diagnosis and management of psychiatric & mental health disorders, medication management, and psychotherapeutic interventions. Certificate is available via online learning.

For information about certificate, contact:
Office of Student Affairs
Sinclair School of Nursing

phone: 573-882-0277

Graduate Certificate in Mental Health Nurse Practitioner

This option is no longer available.

Graduate Certificate of Pediatric Clinical Nurse Specialist

The Post-Master’s Certificate Program at the MU Sinclair School of Nursing enables nurses with a master’s degree to expand their knowledge and scope of practice in one or more specialty areas. Pediatric CNSs are clinical experts in the diagnosis and treatment of illness, and delivery of evidence-based nursing interventions for children, adolescents and their families across the care continuum from wellness through acute care. Additionally, CNSs are experts in executing delegated medical regimes associated with the diagnosis and treatment of disease for a specialty population. A CNS may be unit-based or have agency-wide responsibilities for a patient population. The CNS has a unique APRN role to integrate care across the continuum and through three spheres of influence: direct patient/client care, nurses & nursing practice, and systems and organizations (APRN Joint Dialogue Group, 2008). Thus, in addition to direct patient/client care, key elements of CNS practice are to create environments through mentoring and system changes that empower nurses to develop caring, evidence-based practices. Accordingly, CNSs are involved in developing staff education as well as safety and quality improvement activities. Certificate is available via online learning.

Dean: Bart Wechsler

Established by the University of Missouri Board of Curators in May, 2001 the Harry S Truman School of Public Affairs is dedicated to the advancement of study and practice of governance in the state, nation and world. The School offers graduate degrees and certificates in the theory and practice of public and nonprofit management, public policy, and organizational change.

In keeping with Truman’s legacy, TSPA has numerous international linkages. Truman School students and alumni have served as Peace Corps volunteers, United Nations interns, in the US State Department, other national consulates or embassies in Washington, and international non-government organizations (NGOs) such as the Red Cross/Red Crescent. Truman School faculty members participate in international projects in Europe, Asia, Africa, and South America. Scholars from Europe, Asia, and other parts of the world regularly visit the Truman School, helping to inform curriculum and classroom discussions.

Undergraduate

The School of Public Affairs currently offers academic pursuits solely at the graduate level.

Graduate

The Harry S Truman School of Public Affairs offers master’s and doctoral degrees in the theory and practice of public and nonprofit management, public policy, and organizational change. MPA students are prepared for careers in a new public service that spans government, nonprofit, and private sectors. PhD students are trained for careers in academic and research institutions.

Graduate Degrees
Master of Public Affairs (MPA)
Doctor of Philosophy in Public Affairs (PhD)

Cooperative Dual Degrees
Master of Public Affairs and Juris Doctorate
Master of Public Affairs and Master of Public Health

Graduate Certificates:
Grantsmanship Certificate
Nonprofit Management Graduate Certificate
Organizational Change Graduate Certificate
Public Management Graduate Certificate
Science and Public Policy Certificate

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and

- MPA in Public Affairs (p. 592)
- PhD in Public Affairs (p. 593)

MPA in Public Affairs

MU Truman School of Public Affairs students study with outstanding faculty, who are talented teachers as well as active, nationally recognized scholars. Policy forums, round-tables with policy makers, lectures by distinguished visiting scholars, and research symposia also enrich student learning. Small classes taught both on campus and in Jefferson City, the state’s capital, make for a lively learning environment. The Truman School MPA program provides a balance of public service values, interpersonal and analytic skills, and a thorough knowledge of administrative and policy processes.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Contact the Truman School at (573) 884-1656 or http://www.truman.missouri.edu for details.

Application and Admission Information

Admission to the Master of Public Affairs Program
Ms. Nicole Harris, Assistant Program Director for Student Services
101 Middlebush Hall, Columbia, Missouri 65211
573-884-1656
Truman@missouri.edu

Admission Criteria

Fall deadline: Priority admission and funding consideration are given to applications received by January 15. Applications submitted after January 15 will be considered, with preference going to those received by May 1. Prospective students applying after May 1 will be considered for fall admission on a case by case basis.

Spring deadline: Priority admission consideration is given to applications received by November 15.

Assistantship/Fellowship deadline: January 15

- Minimum GPA: 3.0 in last 60 hours
- Minimum TOEFL scores:
  - iBT: 80
  - CBT: 213
  - PBT: 550
- Minimum preferred GRE scores:
  - Prior to August 2012: 1000 (combined)
  - After August 2012: 300 (combined)

Admission to the MPA program is competitive and open to students holding baccalaureate degrees from accredited institutions and meeting admissions standards of the Truman School of Public Affairs and the Graduate School.

Required Application Materials

To the Graduate School:
All required Graduate School documents

To the Truman School MPA Program:

• 3 letters of recommendation
• GRE score report (GRE alternatives accepted: LSAT, GMAT and MCAT scores will be considered)
• Resume
• Statement of interest

Degree Requirements

Consisting of 45 hours of graduate work, the MPA program includes a core (27 hours), an area of specialization (15 hours) and an internship (3 hours). The areas of specialization are Nonprofit and Public Management, and Public Policy.

Students with significant public service experience may have some courses waived, making the MPA program 33 hours for them. The MPA’s Mid-career option is available to students with 3-5 years of public service experience.

Internship

During the summer after their first year in the program, students without significant public sector work experience are required to complete a public service internship. Interns apply what they have learned during the first year in the program, plus they gain practical experience that enables deeper learning during second-year classes.

PhD in Public Affairs

PhD Contact: Dr. Guy Adams
(573) 882-5443
adams.gb@missouri.edu

About the PhD Program in Public Affairs

The Harry S Truman School of Public Affairs at the University of Missouri offers an interdisciplinary PhD in Public Affairs that prepares graduates for careers in universities, colleges and applied research settings in the public, private and nonprofit sectors. Students complete core sequences in public policy and management as well as research methods, and specializations tailored to students’ research interests.

PhD Acceptance

The Harry S Truman School of Public Affairs PhD is an academic and research-oriented degree in public affairs. Applicants without previous coursework in public affairs (public management and policy) are required to complete up to 18 hours of foundation coursework.

Acceptance Criteria

In making its decision, the PhD committee considers:

• The applicant’s record of academic achievement (Applicants typically have undergraduate GPAs higher than 3.0, and graduate GPAs higher than 3.5.)
• The quality of the written statement explaining why the applicant wants to pursue the degree
• The quality of the applicant’s writing sample
• Evaluations contained in letters of recommendation
• Acceptable performance on the Graduate Record Examination (GRE). Applicants typically have combined scores of 1200 or higher.

• Results of a personal interview with the applicant in person or by telephone
• Other factors bearing upon the candidate’s potential for success

Application Procedure

1. Applications for the PhD program are accepted for fall entrance only. For a prospective student’s application to be complete, the Truman School must receive all required materials by January 15.
2. Applicants are required to upload application materials to the MU Graduate School Application for Admission.
3. Official transcripts must be mailed to the Graduate School and GRE/TOEFL scores directed to institution code 6875.

Required application materials

A student’s application is complete when all of the following materials have been received. The Truman School’s downloadable checklist contains more information on the following required application materials:

• University of Missouri Graduate School application (application fee required)
• Statement of interest
• Curriculum vitae/Resume
• Writing sample
• Personal data sheet
• Three letters of recommendation
• Official undergraduate and graduate transcripts (must be mailed directly to the Graduate School)
• Official Graduate Record Examination (GRE) score report (must be sent by ETS)
• Official TOEFL score report (must be sent by ETS; required of applicants whose native language is not English)

Entrance Exams

• The Graduate Record Examination (GRE) is required of all applicants.
• Applicants whose native language is not English must achieve a score of 625 (107 iBT) in the Test of English as a Foreign Language (TOEFL).
• Use the following codes to submit test scores to the Truman School:
  • University of Missouri-Columbia Institution Code: 6875
  • Truman School Department Code: 4801

Cost of Attendance and Financial Aid

Prospective students should visit the University of Missouri Graduate School financial information and support web page for current information about tuition and fees. The University’s Office of Student Financial Aid provides information about other types of aid students can obtain, including federally financed student loans. Financial aid applications are due by January 15.
Additional Minors and Certificates - Public Affairs

Undergraduate
Graduate
• Certificate in Grantsmanship (p. 594)
• Certificate in Nonprofit Management (p. 594)
• Certificate in Organizational Change (p. 594)
• Certificate in Public Management (p. 595)
• Certificate in Science and Public Policy (p. 595)

Graduate Certificate in Grantsmanship

About the Certificate
The Truman School offers one of the few completely online grant writing certificate programs in the country, making it easy to fit classes into a busy schedule. Students will learn to write grant proposals and manage grant funded programs effectively. Learn winning grant writing techniques and proper grant management with this four-course graduate certificate in grantsmanship. As one of the few completely online certificate programs in grantsmanship in the nation, our program is well suited for a variety of audiences, including community-based professionals in nonprofit organizations, state and local government and educators in K-12 settings. Graduate and post-doctoral students and young faculty members who are seeking to become more competitive in research careers dependent on external funding will find this certificate to be useful.

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate.

Plan of Study
Students must complete 12 credit hours to receive the certificate.

Required Courses
- PUB_AF 8830 Grant Writing I 3
- PUB_AF 8831 Grant Writing II 3
- PUB_AF 8832 Sponsor Relationships 3
- PUB_AF 8833 Grant Award Management 3

Graduate Certificate in Nonprofit Management

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate.

Plan of Study
Students must complete 12 credit hours to receive the certificate.

Required Courses
- PUB_AF 8610 Group Dynamics and Conflict Resolution 3
- PUB_AF 8620 Organizational Analysis and Change 3
- PUB_AF 8630 Organizational Change in a Community and Global Context 3
Elective Course
The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Graduate Certificate in Public Management
Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/prospectivestudents/certificates.asp

The graduate certificate in public management encompasses administrative skills for ethical, effective leadership and management roles in the public service. Students completing this graduate certificate will be well positioned to begin or advance a public service career with many expecting to pursue management careers in state and local governments.

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate.

Plan of Study
Students must complete 12 credit hours to receive the certificate.

Required Public Management Certificate Courses
The first two courses are required along with one of the remaining two:

Elective Course
The fourth course is an elective chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.

Graduate Certificate in Science and Public Policy
Harry S Truman School of Public Affairs
101 Middlebush Hall
573-884-1656
http://truman.missouri.edu/prospectivestudents/certificates.asp

The public policy specialization offers students a strong foundation in the skills necessary to work effectively in the policy environment. Students in the public policy specialization learn theories of the policy process, quantitative and qualitative research methods to analyze policy, and program evaluation. Students also have the opportunity to gain expertise in specific policy areas including education policy, environmental policy, health policy, social policy, and regional development policy.

Eligibility
Students do not need to be enrolled in a graduate degree program at MU to participate in the program. Some prerequisite courses may be necessary.

Plan of Study
Students must complete 12 credit hours to receive the certificate.

Required Courses

Elective Course
The third and fourth courses are electives chosen in consultation with the certificate coordinator from among the courses offered by the Truman School or by another graduate unit at MU.
Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.
Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

• anatomy (gross or microscopic)
• physiology/pharmacology (molecular, cellular and integrative)
• biochemistry/molecular biology
• endocrinology
• toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogens and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

Adjunct Associate Professor G. S. Johnson*, G. E. Rottinghaus*
Clinical Associate Professor I. A. Constantinescu, B. L. Frappier*
Assistant Teaching Professor D. Cross, M. C. Kuehl-Kovarik**
Research Professor S. Yang**

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:
• The Biomedical Sciences Area Program offers a master’s program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.

• The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Biomedical Sciences Area Program Degrees

• MS in Biomedical Sciences (p. 598)
• PhD in Biomedical Sciences (p. 599)

Biomedical MS Degrees with Veterinary Medicine Emphasis Areas

• MS in Biomedical Science: Comparative Medicine (post DVM degree only) (p. 600)
• MS in Biomedical Science: Pathobiology (p. 601)
• MS in Biomedical Science: Veterinary Medicine and Surgery (p. 601)

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 626).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student’s graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master’s degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation.

Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

About the Program

The MS program in Basic Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate’s MS program committee.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

• Fall deadline: January 15
• Spring deadline: September 15
• Summer deadline: Not Applicable
• Minimum TOEFL scores:
  - Internet-based test (iBT) 100 600
  - Paper-based test (PBT)
• Minimum GRE scores:
  - When did you take the GRE? Verbal + Quantitative
    - Prior to August 1, 2011 100 3.5
    - On or After August 1, 2011 300 3.5
• Minimum GPA: 3.0
• Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master’s program.

Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the Biomedical Sciences MS Program:

• Program-specific application
• Letter of intent
• GRE scores
• Copy of transcripts
• 3 letters of recommendation

MS Degree Requirements

To attain the master’s degree, 30 hours of graduate credit must be completed; 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses); and 6 to 9 hours of 8090 Research. A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree. In additional to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

Evaluation

The master’s candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master’s program committee. The master’s candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master’s program committee.

Length of Study

The time limit for the master’s degree is five years after initiating the program.

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology.

The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

• Minimum GPA: 3.0
• Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed:

15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses)

The core curriculum includes:

• physiology (10 credit hours)
• biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
• multidisciplinary approaches to biomedical research (2 credit hours)
• departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

• molecular biology
• cellular biology
• integrative biology

Rate and Quality of PhD Progress

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/her adviser and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive
examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student’s doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

**Programmatic Strengths**

- The opportunity for comparative studies in a joint veterinary and human medical environment
- The multidisciplinary nature of the faculty participating in the training program
- The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification

- Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
- A long history of successful training in comparative medicine

**Class Size & Resources**

Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

**Admission Criteria**

- Fall deadline: N/A
- DVM or equivalent from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination and approval by the Comparative Medicine Program faculty
- Meet standards for admission to the Graduate School

**Required Application Material**

*To the Graduate School:*

- All required Graduate School documents
*To the CMP Postdoctoral MS Program:*

- curriculum vitae
- statement of career goals and interests
- complete transcripts
- Graduate Record Examination Scores (if available)
- three letters of reference

**Degree Requirements**

The CMP emphasizes comparative medicine research training and includes graduate course work. Research training is performed under an established investigator in one of several life science departments on the MU campus. Recommended graduate courses include pathology of laboratory animals, methodology of animal experimentation, biology of laboratory animals, laboratory animal resource management, grant and manuscript writing for biomedical researchers, laboratory and project management, biomedical ethics and seminars. Elective courses frequently taken by trainees include basic and advanced courses in immunology, molecular biology, physiology, reproductive biology and/or disease pathogenesis. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined with the student’s advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

**Written Scholarly Work**

The MS degree requires the completion of a significant manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort.
Residency

For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:

• clinical medicine and animal resource management in the Office of Animal Resources (OAR)
• colony management, diagnostic, comparative and research pathology in the Mutant Mouse Regional Resource Center (MMRRC) and Rat Resource and Research Center (RRRC)

Moving to a PhD Program

Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the Pathobiology Area Program.

MS in Biomedical Science: Pathobiology

Director of Graduate Studies: Catherine Vogelweid

About the Program

The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the Department of Veterinary Pathobiology. The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master's thesis while others require preparation of a publishable manuscript.

PhD in Pathobiology

For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to Pathobiology Area Program in this catalog.

Admission Criteria

Fall deadline: n/a

• Minimum TOEFL score (when appropriate):

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>

• GRE scores required
• Undergraduate GPA of last 60 credits of undergraduate work: 3.0
• Designated faculty mentor
• Professional students with a DVM degree may be eligible to waive the GRE

Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the Veterinary Pathobiology Program:

• 3 letters of recommendation (can be submitted through the Graduate School’s online application as well)
• GRE scores
• Mentor letter of support

MS in Biomedical Science: Veterinary Medicine and Surgery

Contact: Connie Sievert
College of Veterinary Medicine
Department of Veterinary Medicine and Surgery
A-384 Clydesdale Hall
573-882-1807
http://www.cvm.missouri.edu/VMS/index.htm

Director of Graduate Studies: Leah Cohn

About the Program

The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. In addition, faculty within the department offer supervision for doctoral and postdoctoral study and research. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine.

Types of Study

The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas.

Resources and Facilities

Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website http://www.cvm.missouri.edu/VMS/index.htm

Admission Criteria

Fall deadline: n/a

• Completion of a bachelor’s or professional degree
• Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery
• Identification of funding (with advice of mentor) for the period of research and study
• Minimum TOEFL score (when appropriate):
Internet-based test (iBT) | Paper-based test (PBT)
---|---
120 | 520

- Minimum GRE score: none

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

**Required Application Materials**

*To the Graduate School:*
- All required Graduate School documents

*To the Veterinary Medicine and Surgery Emphasis Program:*
- GRE scores

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Degree Requirements**

**Advisers and the Advisory Committee**

Formulating a plan of study is the joint responsibility of the student, the adviser and the student’s advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major adviser and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

**Publications**

A thesis reporting the results of original research is required of all candidates. A scientific paper based on the thesis research must be submitted to a refereed journal.
Dispute Resolution

About the Dispute Resolution Program

Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements

Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

- Applicants may be admitted without a JD degree if they have a bachelor's degree and substantial experience in dispute resolution.
- Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
- Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

Faculty

Associate Professor C. Conklin*, D. Crouch*, S. I. Strong*
Adjunct Assistant Professor J. Levin*

- * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Program of Study

The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

Tailoring the Program

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of
these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:

- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice
The Genetics Area Program (GAP) is an interdisciplinary Ph.D. program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

The Genetics Area Program (GAP) is an interdisciplinary Ph.D. program that will prepare you for a research or teaching career in genetics. The catalog provides a complete list of these degree options (p. 5).

Graduate

• PhD in Genetics Area Program (p. 605)

About the Program

We believe that an understanding of genetics is essential in solving global problems such as famine, environmental degradation and disease. The Genetics Area Program (GAP) is an interdisciplinary Ph.D program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU. The curriculum provides broad, individualized training tailored to your career objectives.

As part of the degree, students will spend a semester teaching or assisting with a course in the Genetics curriculum that is relevant to their career goals.

A genetics seminar series is organized and conducted by the graduate students to promote research interest and encourage scientific communication. Speakers include prominent researchers from universities throughout the country, as well as MU faculty. An annual retreat brings faculty and students together to share research results and techniques.

Genetics graduates leave MU with a strong scientific background, excellent laboratory skills and interpersonal communication abilities.

Courses

Courses for the Genetics Area Program curriculum are from a number of other areas at the University including the following: Animal Sciences (AN_SCI) (p. 712), Biochemistry (BIOCHM) (p. 745), Biological Sciences (BIO_SC) (p. 751), Chemistry (CHEM) (p. 770), Computer Science (CMP_SC) (p. 797), Microbiology (MICROB) (p. 1011), Plant Sciences (PLNT_S) (p. 1074). For a complete listing of all courses offered at MU, refer to the Course Offerings (p. 697) in the catalog.

- Minimum GPA: 3.0 in last 60 hours
- Bachelor's degree
- One or more courses in each of the following: organic chemistry, biochemistry, mathematics (calculus and statistics), physics, introductory genetics
- Research experience highly desirable
- Broad background in biology

Note: Deficiencies in the subjects listed can be remedied after admission.

**Required Application Materials**

*To the Graduate School:*

- All required Graduate School documents

*To the Genetics Area Program:*

Genetics Area Program application (download form from website)
- GRE scores
- TOEFL scores (international applicants)
- 3 letters of recommendation (use provided form)
- Personal statement

**Degree Completion Requirements**

The minimum requirements for the PhD degree are:

- advanced courses in genetics, biochemistry and molecular biology
- regular participation in the genetics area seminar program
- successful completion of a comprehensive examination
- at least one semester of teaching in a genetics course
- 3 seminar presentations
- research, dissertation and oral defense

These are *beyond* the Graduate School's requirements. Others are determined in consultation between the student and faculty adviser.
Health Administration

Academic programs at MU in the area of Health Administration are offered through the Department of Health Management and Informatics (HMI) in the School of Medicine.

School of Medicine
CE 707 Clinical Support and Education Building, DC006.00
One Hospital Drive
573-884-0698

About Health Management and Informatics

The HMI Department develops, translates, and disseminates knowledge, innovations, and evidence-based solutions to improve health management and informatics performance in complex health systems. HMI advances the health of Missouri’s communities, the nation, and international partners by:

• Creating a culture of collaborative relationships in research, education, and service to generate innovative ideas and solutions;
• Providing professional health management and informatics education and fostering lifelong learning;
• Delivering technical assistance and consultation by partnering with health, human service, and policy-making organizations; and
• Developing innovative commercial products and services for health- and education-related applications.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in health administration, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MHA in Health Administration (p. 607)

About the Master of Health Administration

The Graduate Program in Health Services Management prepares professionals to meet critical and complex challenges in leadership and improvement in organizations and systems throughout the health industry. The program provides recognized national and global leadership in health management education.

The program is competency-based and distinctively equips graduates for success through (a) providing solid grounding in professional and operational knowledge and skills, (b) integrating health informatics throughout the health services management curriculum, and (c) incorporating overarching complex systems context and analytical approaches.

The residential and executive master’s degrees launch and advance patient-centered, improvement-oriented, financially-responsible, and ethically-grounded careers in evidence-based health services management.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placement organizations include health systems, hospitals, academic medical centers, physician group practices, surgery centers, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Established in 1965, the program is a member of the Association of University Programs in Health Administration (AUPHA) and has been accredited since 1968 by the Commission on Accreditation of Healthcare Management Education (CAHME), formerly Accrediting Commission on Education for Health Services Administration (ACEHSA).

Students may pursue the MHA degree jointly with the following degree programs: MS in Health informatics, MBA, MS in Industrial Engineering, JD. It is also possible to pursue other Master’s degrees, such as a MPA or MPH, concurrently with the MHA program.

Graduate

MHA in Health Administration

Admission Contact Information

Veronica Kramer (KramerV@health.missouri.edu) or hmi-admissions@health.missouri.edu
CE 707, Clinical Support and Education Building, DC006.00
One Hospital Drive
MHA Curriculum

The MHA curriculum is designed for a range of educational backgrounds and provides the knowledge and skills necessary to function effectively as a healthcare executive. The curriculum includes such competency areas as health systems operations, organization theory, information management, financial management, strategic planning and marketing, human resource management, health economics, managerial epidemiology, leadership, and ethics. By combining basic and advanced course work with an internship and executive management study (an applied management study that replaces a thesis), the student may develop expertise in a focused area. Professional elective course selection is a mutual decision between the student and adviser, and in all cases, the intent is to tailor the degree program to the student’s interests. The goal of the graduate program in health services management is to prepare professionals for leadership roles in health administration. Students develop an excellent applied knowledge in such areas as clinical decision support systems, risk assessment and management, clinical outcomes assessment, managing interdisciplinary teams and integrated health systems.

Admission Criteria

Deadline for Fall entrance: Rolling, recommended by March 31st

A minimum of a baccalaureate degree from an accredited institution

- Minimum TOEFL scores:
  - Internet-based test (iBT) 100
  - Paper-based test (PBT) 603

- Minimum Academic IELTS scores:

<table>
<thead>
<tr>
<th>Item</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>OVERALL</td>
<td>7.5</td>
</tr>
</tbody>
</table>

- Minimum GRE scores:
  - When did you take the GRE? Verbal + Quantitative
    - Prior to August 1, 2011 50th percentile
    - On or After August 1, 2011 50th percentile
  - In lieu of GRE, minimum GMAT score: 50th percentile
  - Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

The Health Services Management Program recruits and accepts qualified applicants regardless of race, sex, age, physical ability, or national origin.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the HMI Program
- 3 letters of recommendation
- GRE or GMAT scores
- Current resume or curriculum vitae
- Personal essay
- Official transcripts
- TOEFL report (international applicants only)

Financial Aid from the Program

Students admitted to the MHA program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration and the Department awards GRAs based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. All admitted students who are not Missouri residents are considered for Out-of-state fee waivers, which include a $1,000 scholarship and waive nonresident fees. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

Joint Degrees

Students may pursue the MHA degree jointly with the following degree programs: MS in Health Informatics, MBA, MS in Industrial Engineering, JD. It is also possible to pursue other Master's degrees, such as a MPA or MPH, concurrently with the MHA program.

Degree Completion Requirements

The residential MHA curriculum requires 39 credit hours of core health services management course work, six hours of professional electives, and three credit hours for a summer internship. Three foundation courses (nine credit hours)—fundamentals of microeconomics, accounting, and finance—must also be completed prior to or during the MHA program. To graduate, a student must maintain a GPA of 3.0 (A=4.0) or better.

Plan of Study

In the first year, the graduate program develops the theoretical background and skills necessary for analyzing complex health system problems and for thinking innovatively. After completion of the first two semesters, students complete a 12-week internship under the guidance of a qualified preceptor in an approved healthcare organization. This enables students to gain experience in the field, encounter issues and problems in day-to-day operations, and apply the concepts and skills obtained during the first year of course work. Clinical and field experience sites are provided by healthcare organizations throughout the country. During the internship, students generally are paid a monthly stipend. The second year builds on the conceptual, theoretical, and experiential base of the first year, providing increased flexibility for concentration in various administrative and planning areas and allowing students to pursue more independent learning. Emphasis is placed on the development of an individual with the behavioral and decision-making skills necessary for a leadership position in a changing healthcare environment. Additionally, all students are required to complete an Executive Management Study (EMS) project and to pass an oral examination that enables faculty to evaluate the student’s competency in health management.

In addition to the traditional degree program, an alternative format program is offered for healthcare professionals who have significant clinical or administrative experience in health care. The executive MHA program, which begins in January, combines monthly on-campus weekend sessions, independent study, and online interaction in an innovative two-year course of study. The executive MHA program requires 42 credit hours of core health services management coursework. For additional information about the Executive MHA Program, please call the coordinator of student recruitment at (573) 884-0698, or visit http://www.hmi.missouri.edu.

Clinical Assistant Professor W. G. Phillips*, W. Wells*
Clinical Instructor P. E. Alafaireet*, W. E. Meyer*, D. E. Moxley*
Associate Research Professor J. Jackson-Thompson*
Assistant Research Professor G. F. Petroski*
Adjunct Professor A. Grant
Adjunct Assistant Professor C. Bryan, S. Riley
Adjunct Clinical Instructor M. Harris
Adjunct Instructor K. Lobenstein
Professor Emeritus G. D. Brown*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Health Informatics, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

• MS in Health Informatics and Bioinformatics (p. 610)
• Graduate Certificate in Health Informatics (p. 612)

About the Master of Science in Health Informatics

The program prepares professionals to meet critical and complex challenges in applying information technology within the health industry. It provides recognized national and global leadership in health informatics education.

The residential master’s degree prepares students for careers in developing and evaluating clinical information systems, data and knowledge management, decision support, and doctoral study in health informatics. The executive master’s degree advances the careers of physicians, managers, nurses, information system designers, consultants, entrepreneurs, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

The program admits diverse cohorts of students from Missouri, other states, and other nations. During the admissions process, the program seeks learners with strong academic records, maturity, motivation, leadership capabilities, and career potential. Primary post-graduation placements include doctoral programs, health systems, hospitals, academic medical centers, physician group practices, outpatient facilities, information technology companies, consulting firms, government agencies, insurance entities, and other points of health services delivery.

Whereas the residential master’s degree format is a traditional on-campus residential program, the executive master’s degree is offered in a hybrid model featuring both on-campus and distance learning. In both formats, emphasis is on fostering an individualized and collaborative culture of learning, mentoring, and professional development among students, faculty, staff, alumni, and other practitioners. The intent is to prepare students to enable transformational leadership and improve patient care quality, safety, value, and overall level of population health.

Residential MS(HI) Program

The residential MS in Health Informatics curriculum includes 36 credit hours of health informatics course work, as well as three credit hours of foundation courses that must be waived or completed, and an additional six credit hours of highly recommended foundation courses. The health informatics curriculum is comprised of (a) three credit hours of health
informatics introduction, (b) 18 credit hours of core courses, (c) selected concentration courses of at least six credit hours, and (d) nine credit hours of research courses. The curriculum integrates learning across computer science, health informatics, and health services management. The program also develops students’ research interests in health informatics and encourages those with excellent academic performance to pursue the PhD degree. To graduate, a student must maintain a GPA of 3.0 (A=4.0) or better.

Individuals with three or more years of professional experience are encouraged to apply to the Executive HI Program.

Admission Criteria
Deadline for Fall entrance: Rolling

- A minimum of a baccalaureate degree from an accredited institution
- Minimum TOEFL scores:
  
<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>603</td>

<td>On or After August 1, 2011</td>
<td>50th percentile</td>
</tr>
</tbody>
</table>

- In lieu of GRE, minimum GMAT score: 50th percentile
- Undergraduate GPA: 3.0 during the last 60 hours of undergraduate course work and any subsequent graduate course work

Required Application Materials

To the Graduate School:
All required Graduate School documents

To the HMI Program (CE 707 Clinical Support & Edu. Bldg, DC006.00, Columbia, MO 65212):
3 letters of recommendation
GRE or GMAT scores
Current resume or curriculum vitae
Personal essay
Official transcripts
TOEFL report (international applicants only)

Financial Aid from the Program

Students admitted to the MSHI program are automatically considered for merit-based scholarships. A list of scholarships available through the Department as well as external scholarships and other sources of aid is available at: http://hmi.missouri.edu/prospective/financial_aid.html. A limited number of Graduate Research Assistantship (GRA) positions, which include a full tuition waiver, are available within the HMI Department. All incoming and current students receive consideration and the Department awards GRAs based on merit, the availability of project funding, and alignment of student and faculty research interests and skills. All admitted students who are not Missouri residents are considered for Out-of-state fee waivers, which include a $1,000 scholarship and waive nonresident fees. Applicants admitted on probation are not eligible for GRAs, fee waivers, or scholarships until they attain a 3.0 GPA.

* Credit hours taken for foundation courses as part of the MSHI program do not count toward the credit hours required for the degree.
- HI students are not required to complete a summer internship but may elect to complete one if they wish. If a student chooses to complete an internship, s/he must register for HMI 8689 and must abide by all internship program requirements.

Executive MS(HI) Program

In addition to the traditional degree program, an alternative format program is offered for professionals who have significant experience in health informatics. The executive MS program in Health Informatics, which begins in January, combines 3 on-campus weekend sessions per semester with independent study and online interaction in an innovative 2-year course of study. For additional information about the Executive MS Health Informatics Program, please call the coordinator of student recruitment at (573) 884-0698, or visit http://hmi.missouri.edu

Doctor of Philosophy in Informatics, emphasis Health Informatics

(Degree administered by the MU Informatics Institute)

Contact Information

University of Missouri Informatics Institute
573-882-9007
email muiigraduateprogram@missouri.edu
web: http://muii.missouri.edu

The University of Missouri also offers a PhD in Informatics with Health Informatics as an emphasis area. Thus, official transcripts of students who complete this doctoral program will reflect both the degree (Informatics) and the emphasis area (Health Informatics).
The doctoral program in informatics draws on the considerable resources and strengths of our department along with other academic programs at the University of Missouri. The benefit to students: a rigorous yet flexible program of study. For example, courses may include statistics, computer science, health systems, clinical informatics, consumer health informatics, public health informatics, program evaluation, information architecture, decision support and knowledge systems, and biomedical data/text mining. The integrated doctoral program assures broad exposure to the field and fosters new insights and innovative research concepts.

Careers

The US government predicts that employer demand will remain high for individuals with skills in health and clinical informatics. Mizzou students acquire the skills necessary to establish careers at the forefront of health informatics. This program is ideal for students who aspire to become researchers and thought leaders. Specific career paths may include health research; collegiate informatics teaching faculty; health informatics managers. Job sectors span government, medicine, health professions, and private, nonprofit and public research institutions.

About MUII

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is an interdisciplinary research and education program supported by 38 core faculty members from 14 departments and six colleges/schools, such as the College of Engineering; School of Medicine; School of Nursing; College of Arts and Sciences; College of Agriculture, Food & Natural Resources; and College of Education. The Institute, under the Governance of the Graduate School, offers a doctoral degree program with concentrations in bioinformatics and health informatics. Each concentration stresses the skill sets and research appropriate for the subfield within the broad area of informatics. Students are accepted into the program with diverse backgrounds and varying degrees of experience.

Learn more or apply

Prospective doctoral students can contact MUII
muiigraduateprogram@missouri.edu or visit their web site http://muii.missouri.edu or call 573-882-9007

Graduate Certificate in Health Informatics

The Graduate Certificate in Health Informatics offered by the Department of Health Management and Informatics provides learners with the skills necessary to participate in the selection, use, and evaluation of information technology applications throughout the health services industry. The certificate program is designed for physicians, nurses, managers, information system designers, consultants, and others committed to the application of information technology for improving the quality, safety, and efficiency of health services.

Students enrolled in the MHA degree program may earn an HI Certificate in addition to their Master’s degree. The HI Certificate requires the completion of the following four courses (a total of 12 credit hours):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

Informatics

Academic doctoral programs at MU in the area of Informatics are coordinated through the Informatics Institute.

muiigraduateprogram@missouri.edu
241 Engineering Building West
Columbia, MO 65211-2060
573-882-9007
http://muii.missouri.edu/

About the Informatics Institute (MUII)

Building on a tradition of outstanding informatics education and research at Missouri, the MU Informatics Institute is comprised of over 40 faculty from 16 different departments and 8 schools/colleges, including the Colleges of Agriculture, Food, and Natural Resources; Arts & sciences; Education; Engineering; Veterinary Medicine; and the Schools of Health Professionals; Medicine; and Nursing. The Institute offers emphasis areas in bioinformatics and health informatics, along with a concentration area in geoinformatics. Each emphasis area and concentration area stress skill sets and research appropriate to the subfield within the broad area of informatics. A core curriculum provides all students with a foundation of knowledge and tools in biology, computer sciences, health systems, and statistics, after which they complete further coursework in their chosen area. The integrated program assures broad exposure to the field and fosters new insights and innovative research concepts.

Faculty

Associate Professor J. Jackson-Thompson (https://muii.missouri.edu/index.php?pid=12&person=573)**

• Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

• Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Graduate

• PhD in Informatics (p. 614)

Emphasis Areas & Concentration Areas

MUII offers a doctoral degree (PhD) in two emphasis areas: bioinformatics and health informatics. In addition, students may also opt for a doctoral degree with a concentration area in geoinformatics. Students with areas of interests outside of informatics may also wish to pursue a collaborative degree program between MUII and other degree programs. The purpose of the collaborative degree program is to allow students the opportunity to obtain advanced degrees in fields that complement the study of informatics and expand the student’s knowledge and applicability.

MUII students may also select the collaborative degree between the Master of Public Health program and MUII PhD in Informatics program. Students must be accepted by both MUII and the MPH program to be eligible. Upon completion of the PhD requirements for the Informatics Institute and degree requirements for the MPH in Health Promotion and Policy with Focus on Informatics, students will receive both the PhD in Informatics and MPH degrees. For a full list of courses for the MPH in Health Promotion and Policy with Focus on Informatics, please visit the MPH program website (http://publichealth.missouri.edu/html).
Resources and Facilities

The Institute is located in multiple locations on MU campus with well-equipped laboratories containing state-of-the-art instrumentation and computing facilities for informatics research. Major instrumentation includes a Dell EM64T cluster system with 512 processors, an SGI Altix BX2 SMP server with 64 Itanium2 processors, IBM iDataPlex high-performance computing system, and a number of DELL servers with multiple quad-core processors for computational researches.

Faculty Areas of Research Interest

Faculty research covers a wide range of interests including structural bioinformatics, systems biology, cancer informatics, chemical informatics, epigenomics, phenomics, text mining & understanding, electronic health records, evidence-based medicine, personalized medicine, human-computer interactions in health care, consumer informatics, patient safety, public health informatics, geospatial informatics, information retrievals, biomedical data mining & knowledge discovery, and machine learning. For a list of faculty members and their research areas, please visit our web page (http://muii.missouri.edu/index.php?pid=1/#1).

MUII recently launched four new research initiatives in Clinical Informatics, Big Data, Personalized Medicine, and Next Generation Sequencing, all of which have created opportunities for graduate research positions. For more information, please see the MUII website (http://muii.missouri.edu/index.php?pid=40).

Internal Funding

Fellowships and research/teaching assistantships are available for highly qualified applicants. Application information is available on the Institute’s website (http://muii.missouri.edu/index.php?pid=14).

<td>309</td>
<td>309</td>
<td>3.5-4.0</td>
</tr>
</tbody>
</table>

** or a preferred GMAT score of 570

** Preferred TOEFL scores**: Internet-based test (iBT) Paper-based test (PBT)

| 90 | 577 |

** or a preferred IELTS score: 6.0

* Sufficient background and training to pursue advanced degree in informatics

All Required Documents

All students are required to apply through the Graduate School’s on-line process. To begin your application, please see the ApplyYourself website (http://gradschool.missouri.edu/admissions/apply).

1. Curriculum Vitae
2. Statement of Purpose, which should include a summary of why the applicant is interested in pursuing an advanced informatics degree, a brief description of your previous research experiences, the specific area of informatics you are interested in pursuing, and your future career goals and plans in the informatics field.
3. GRE/GMAT scores
4. TOEFL/ELTS scores for international applicants, if required.
5. Three letters of recommendation from faculty or supervisors who can evaluate the applicant’s credentials and potential to become successful in the area of informatics.
6. Official transcripts from each college and university you have attended: Official transcripts must be sent from each institution directly to the Graduate School.

Optional Documents

Applicants are encouraged to submit representative publications in informatics, if available.

Informatics Doctoral Degree Requirements

The following is a brief synopsis of the general degree requirements; please see the Informatics Institute web site (https://muii.missouri.edu/index.php?pid=37) for complete details:

• Students must take required and area courses
• Students must pass a qualifying examination
• Students must present at least one institutional seminar annually
• Students are required to complete a comprehensive exam, which includes written and oral elements, within a specified time frame
• Students must pass a comprehensive examination at least 7 months before their scheduled defense
• Students must submit and defend a dissertation describing the results of successful and original research in one of the branches of informatics.
• To show research progress, students are expected to be working toward presenting at conferences and publishing in peer-reviewed journals based on their informatics research.
Medical Pharmacology and Physiology

Pharmacology and Physiology
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

The joining of these two disciplines provides a powerful way to address modern questions of biology.

The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Faculty

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in medical pharmacology and physiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Graduate

Monica Elliott
School of Medicine
MA415 Medical Sciences Building
573-882-4957
http://medicine.missouri.edu/mpp/

• MS in Medical Pharmacology and Physiology (p. 616)
• PhD in Medical Pharmacology and Physiology (p. 616)

The joining of these two disciplines provides a powerful way to address modern questions of biology. The department offers MS and PhD degree programs in Pharmacology and Physiology. These programs are designed to prepare students for rewarding teaching and/or research careers in academia, government or the pharmaceutical and biotechnical industries.

Pharmacology

Pharmacology is a basic medical science that deals with actions of drugs, hormones and neurotransmitters on living processes. Knowledge based on the results of pharmacological research leads to increased effectiveness and safety in the treatment of diseases in man and animals. Pharmacology is different from pharmacy, which is a profession concerned with the preparation and dispensing of drugs.

Physiology

The discipline of Physiology focuses on understanding the integrative function of living organisms from the molecular to the organismal level. As such, physiological research addresses how genes, organelles, cells, tissues and organs are integrated to accomplish the complex functions of living organisms. From a medical prospective, understanding normal function is a prerequisite to understanding disease.

Areas of Study

Regardless of their final degree objectives, students admitted into the departmental graduate programs will participate in a core curriculum during the first year and choose a specific tract leading to either a degree in Pharmacology or in Physiology following successful completion of the first year. The department also offers specially designed curriculum for individuals interested in a combined MD/graduate degree or who have previous relevant medical education.

Departmental Research

The departmental faculty has expertise in a variety of mammalian systems, with emphases in cardiovascular and endocrine physiology and molecular and cellular pharmacology. Individual labs utilize a number of different experimental models ranging from the whole animal studies to cellular, subcellular, biochemical and modern molecular approaches. Human research is also emphasized.

Research problems under current investigation include microvascular control of blood flow; modulation of vascular function by the extracellular matrix; role of the microcirculation in inflammation and diabetes; mechanisms involved in angiogenesis membrane regulation and ion transport; barriers separating circulating blood and tissue; energetics and metabolism of vascular smooth and cardiac muscle; electrophysiology of isolated cardiac vascular smooth muscle and endothelial cells; exercise physiology and regulation of contractile protein functions; and hormonal induction of genetic transcription, intracellular signaling mechanisms and genetic regulation of cell proliferation, cell cycle, cell differentiation and apoptosis; and the pathogenetic mechanisms of alcohol on liver cells.

Partnerships

Cooperative interactions exist with other clinical and basic science departments in the School of Medicine as well as with the Truman Veterans Hospital, the Dalton Cardiovascular Research Center, the College of Veterinary Medicine, Nutrition and Exercise Department and various campus-wide programs in Molecular Biology and Food for the
21st Century. The cooperative research atmosphere encourages staff and students to work across departmental lines and provides a unique opportunity for interdisciplinary training of the students.

Teaching Experience

In addition to course work and research training, all graduate students are required to participate as teaching assistants in laboratory or lecture instruction offered by the department. Such experience enhances the students’ presentation and teaching skills, contributes to their professional maturity, and reinforces a sense of collegiality between students and faculty.

Financial Aid from the Program

Financial support in this program for qualified graduate students is available from several sources. Students also may be eligible for institutional teaching and research assistantships. In addition, there are a number of fellowship awards from the Graduate School and the campus-wide Life Science Program available on a competitive basis through nominations by the Department.

Deadline for these fellowships are January to mid-February each year. Applicants do not directly apply for these fellowships. Rather the department applies on behalf of successful applicants for admission. Therefore a prospective candidate should submit an application for admission to the department in the preceding fall. Finally, some of our students are supported by research grants of individual faculty members or by predoctoral fellowships from extramural sources.

Graduate

MS in Medical Pharmacology and Physiology

Admission Contact Information
Monica Elliott
MA415 Medical Sciences Bldg, DCO63.00
Columbia, MO 65211Z
573-882-4957

Application Deadlines
Fall deadline: December 15
Spring deadline: August 15

Admission Criteria
- Minimum TOEFL scores:
  - Internet-based test (iBT) 61
  - Paper-based test (PBT) 500
- Minimum IELTS overall academic score: 5.5
- Minimum GPA: 3.0 in the last 60 hours
- Bachelor’s degree in chemistry, biology, pharmacy or related areas from an accredited college
- Background in biology and chemistry and an understanding of mathematics and physics
- Course work in biochemistry and physiology is highly recommended.
- Previous lab or research experience preferred

Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master’s degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the Medical Pharmacology & Physiology Program:
- Departmental application
- Personal statement
- Transcripts
- 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student’s academic capability.
- Official GRE & TOEFL scores

Degree Requirements

To satisfy requirements for the MS degree, a student must complete the professional plan of study with an average grade of B or better and pass an oral examination over an acceptable master’s thesis. Candidates also must comply with other regulations governing master’s degrees.

Length of Study

MS degree students should normally complete their studies and thesis project within 2-3 years of admission to the degree program.

PhD in Medical Pharmacology and Physiology

Admission Contact Information

• Background in biology and chemistry and an understanding of mathematics and physics
• Course work in biochemistry and physiology is highly recommended.
• Previous lab or research experience preferred
Students are usually admitted to begin their program in the Fall semester, but applications for admission in other semesters will be considered on a space-available basis. Women and minorities are encouraged to apply.

Students with an appropriate educational background are encouraged to apply for entrance into the PhD program. A master’s degree is not a prerequisite for admission to the doctoral program. The department will consider applications for the MS degree programs from U.S. citizens but PhD degree students will be given priority consideration for financial support. Deficiencies in course work may be remedied during the first years of the graduate program.

**Required Application Materials**

*To the Graduate School:*
• All required Graduate School documents

*To the Medical Pharmacology & Physiology Program:*
• Departmental application
• Personal statement
• Transcripts
• 3 letters of recommendation (use form provided). The letters should be written by individuals knowledgeable of the student's academic capability.
• Official GRE & TOEFL scores

**Plan of Study**
The PhD plan of study includes at least two years of basic and advanced courses in physiology and/or pharmacology, as well as courses in cell and molecular biology. The students will also be trained in conducting physiological and pharmacological research in the laboratory of individual faculty members during the first year.

**Qualifying Examination Policy**
The department does not require a formal qualifying examination. Successful completion of the core curriculum and satisfactory performance in conducting scientific research and teaching will qualify students for continuation in the PhD program.

**Choosing a Track and Mentor**
The student will choose a dissertation mentor at or before the end of the first year and decide whether they wish to pursue the doctoral program in Pharmacology or Physiology.

**Comprehensive Examination**
All PhD program students must pass a comprehensive examination before the end of the first semester of the third year of enrollment. The usual format of the comprehensive exam includes the writing and oral defense of a research proposal outside of the student’s dissertation research area.

**Dissertation**
Each student must then carry out a dissertation research project, original in nature, which is expected to contribute significant new knowledge to the area of study. To facilitate this process, each student submits a dissertation research proposal within six months of passing the comprehensive examination.

**Oral Defense**
Finally, all PhD candidates must pass an oral defense of the dissertation and comply with all university and departmental regulations governing the PhD degree.

**Length of Study**
The doctoral program normally requires four to five years beyond the baccalaureate degree.
Microbiology and Immunology

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

The Department of Molecular Microbiology & Immunology (MMI), in partnership with the faculty from the Department of Veterinary Pathobiology (VPB), offers a comprehensive graduate program leading to the Doctor of Philosophy (Ph.D.) degree. This program provides individualized training that is strongly oriented toward basic research in molecular and cellular biology, microbiology, pathogenesis, immunology and host-parasite interactions. MMI offers:

- **PhD in Microbiology**
- Cooperative Degrees: MD and PhD in Microbiology & Immunology (Medicine)
- Interdisciplinary Area Program: PhD in Genetics Area Program

**Note:** The Department is not accepting students into the master’s program.

**Graduate**

School of Medicine
M616 Medical Sciences Building
573-882-8152
http://medicine.missouri.edu/mmi/

- PhD in Microbiology (p. 619)

The department is built around scholarly activities with three important missions: cutting-edge research programs to address relevant biomedical problems in microbiology and immunology, a graduate training program to educate strong, independent research scientists, and a commitment to provide knowledge-based service to the state, national and international communities that will improve global understanding of the microbial world, infectious diseases and host immunity to infection. Graduate (and postgraduate) education programs offer the basic principles of microbiology, pathogenesis, and immunology as well as research training opportunities in the laboratories of established scientists with diverse research interests.

**Faculty Research**

The program is equipped to support a wide range of research activities at the cutting edge of our diverse science. Faculty research activities focus on key problems in pathogenic microbiology, immunology, molecular biology, genetics and virology.

**Research Facilities and Resources**

The research environment at MU with Colleges of Medicine, Veterinary Medicine, Agriculture, Engineering, and Arts and Sciences on one comprehensive campus fosters the development of interdisciplinary scientific interactions that enhance both research and training opportunities for faculty and students alike. The Bond Life Sciences Center represents such an interdisciplinary research enterprise and houses investigators from multiple colleges and departments, including MMI. Critical to the Department’s interests in infectious diseases and immunity research, the recent construction of an NIH-funded Laboratory for Infectious Disease Research provides modern BSL3/ABSL3 containment research space and animal holding facilities for the investigation of highly infectious organisms and human select agents. This resource, and the Department’s partnership with the Midwest Regional Center for Excellence in Biodefense and Emerging Infectious Disease Research, centered at Washington University in St. Louis, position MU in the national network of infectious disease research and training efforts. Please visit the MMI Web site (http://medicine.missouri.edu/mmi) for additional information on MMI’s access to state of the art facilities.

**Career Opportunities**

Graduates completing this training are prepared to pursue challenging and rewarding professional careers that involve research and teaching at supervisory levels in both the academic and private sectors.

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding
packages. Check the program Web site or ask the program contact for details.

Graduate

PhD in Microbiology (MED)

Admission Contact Information
Jana Clark
573-882-3938
mmi@missouri.edu

The Departments of Microbiology and Immunology in the Medical School and Veterinary Pathobiology in the Veterinary School have combined to offer a graduate program designed to prepare students for an advanced professional career in microbiology and immunology. Emphasis is placed on developing outstanding students for productive supervisory roles in universities and colleges, industry, government and research institutes. Enrollment is limited to those students who show evidence of potential for research.

Application Deadline
Fall deadline: January 15

Admission Criteria

- Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>92</td>
<td>580</td>
</tr>
</tbody>
</table>

- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>
<td>1100</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>300</td>
<td></td>
</tr>
</tbody>
</table>

- Minimum GPA: 3.0
- Bachelor's degree from an accredited college or university
- Courses in the following: biology; advanced courses in biochemistry and/or molecular biology are highly desirable; chemistry (quantitative or organic); physics; mathematics

The PhD degree is offered only to students who demonstrate a high level of specialized knowledge and clear evidence of research potential.

Required Application Materials

- All required Graduate School documents
- TOEFL score (if international applicant)

To the MMI Program:

- Departmental application (https://mmi.missouri.edu/apps/grad_app)
- 3 letters of recommendation from individuals competent to comment on the applicant’s potential for graduate work
- GRE scores
- Personal statement
- Copy of TOEFL scores (if international applicant)

Research & Teaching Assistantships

Students in the doctoral program are awarded research assistantships. Research assistants work with faculty members to obtain practical experience in carrying out research proposals through the collection of research data and writing research reports. All students in the graduate program are required to participate as teaching assistants for two semesters during their graduate studies.

Degree Completion Requirements

To be accepted for candidacy into the PhD program in microbiology & immunology, all applicants must perform satisfactorily in a core curriculum that includes advanced-level courses in the sub disciplines of immunology, molecular biology and microbial pathogenesis. Under the guidance of a doctoral program committee, a course of study is individually designed to fit each student's academic background, experience and objectives. Interdisciplinary courses in biochemistry, molecular and cellular biology and genetics provide breadth and balance in the program and enhance the student’s research abilities. In addition, the PhD program consists of the following:

- Practical experience in teaching
- Successful completion of a comprehensive examination that tests the student's ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

- Professional experience in teaching
- Successful completion of a comprehensive examination that tests the student's ability to develop an original scientific hypothesis and devise a feasible research plan that will test the hypothesis.
- A demonstration of research and writing ability by completing a scholarly dissertation on an approved research problem that results in the contribution of significant new knowledge. The final examination primarily covers this dissertation research.

To the Graduate School:

- All required Graduate School documents
- TOEFL score (if international applicant)

To the MMI Program:

- Departmental application (https://mmi.missouri.edu/apps/grad_app)
- 3 letters of recommendation from individuals competent to comment on the applicant’s potential for graduate work
- GRE scores
- Personal statement
- Copy of TOEFL scores (if international applicant)
Neuroscience

Nila Emerich emerichn@missouri.edu
218 Tucker Hall
Columbia, MO 65211
573-882-1847
http://www.neurosci.missouri.edu/program.html

About the Program
One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Degrees
MS and PhD degrees are available.

Faculty

**Assistant Professor** K. Aldridge, S. Christ, S. Ding, Z. Gu, M. Iyer, D. Kline, C. Kuehl-Kovarik, L. Reneker, M. Thakkar, M. Will

**Associate Research Professor** A. Simonyi

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
While MU does not offer undergraduate degrees specifically in neuroscience, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

• MS in Neuroscience (p. 621)
• PhD in Neuroscience (p. 621)
• Graduate Certificate in Neuroscience (p. 621)

About the Program
One of the most exciting and dynamic fields of modern science worldwide is neuroscience, the study of how the nervous system is organized and how it functions. The field of neuroscience encompasses many disciplines, including biology, biochemistry, computer sciences, electrical engineering (neural modeling of neural networks and biomedical instrumentation), neurology, neurosurgery, pharmacology, physics, physiology, psychology, psychiatry, and radiology. Neuroscientists have advanced our understanding of nervous system development, neural function, injuries of the nervous system, and disease processes. At MU, neuroscientists investigate the molecular and cellular organization of the nervous system, the structure and function of neural systems (including vision and hearing), behaviors generated by the nervous system, and neurological diseases and disorders.

Students interested in the program are encouraged to contact members of the faculty directly by phone or e-mail, or visit the Interdisciplinary Neuroscience Program website.

Career Opportunities
MU’s Interdisciplinary Neuroscience Program offers talented graduate students a chance to train for a career in one of the most exciting fields of modern science. Most of our students pursue research and teaching careers in basic neuroscience departments at prestigious research universities. Others opt for challenging and rewarding positions in applied fields, such as drug research or neurodiagnostic technology. Whatever their ultimate goals, the graduate neuroscientists who are trained at MU gain a solid understanding of the nervous system and of the experimental methods by which this knowledge is acquired.

Plan of Study
Typical undergraduate majors that constitute preparation for graduate work in neuroscience include, but are not limited to, biochemistry, engineering, biology, computer science, chemistry, physics, neurobiology, physics and psychology.

After completing comprehensive course work in molecular, cellular, systems and behavioral neuroscience, graduate students join a research laboratory and work with other lab personnel to master the relevant technical skills and theoretical concepts in their chosen field. Students in the Interdisciplinary Neuroscience Program have the opportunity to present their findings at lab meetings, seminars, journal club sessions, and both national and international professional scientific conferences.

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Graduate
MS in Neuroscience

Admission Criteria
Fall deadline: January 15
  • Minimum TOEFL scores:
    | Internet-based test (iBT) | Paper-based test (PBT) |
    |---------------------------|------------------------|
    | 100                       | 600                    |
  • Minimum GRE scores:
    | When did you take the GRE? | Verbal + Quantitative | Analytical |
    | Prior to August 1, 2011    | 1200                   |            |
    | On or After August 1, 2011 | 308                    |            |
  • Bachelor’s degree or its equivalent

Neuroscience comprises a united field that integrates across many disciplines, and students from a variety of academic backgrounds are encouraged to apply to the Interdisciplinary Neuroscience Program (INP). U.S. residents and international applicants are strongly encouraged to apply.

Required Application Materials
To the Graduate School:
  • All required Graduate School documents

To the INP Program:
  • Departmental application
  • 3 letters of recommendation
  • GRE scores
  • TOEFL (if applicable)

Graduate Certificate in Neuroscience

The purpose of this certificate is to provide formal recognition to post baccalaureate students who are taking neuroscience courses and conducting research in neuroscience laboratories. This stand-alone certificate would allow post-baccalaureate students to have a specific, formal indication of their advanced studies and would be very beneficial to students who are considering applying to graduate degree programs or health sciences programs, such as medical or dental school.

PhD in Neuroscience

Admission Criteria

• PhD in Nutrition Area Program (p. 623)

About the Program

The Nutrition Area Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, and the Life Sciences Center.

Areas of Research

Nutrition is, by definition, an applied and multi-disciplinary science that integrates other disciplines such as biochemistry, physiology, biology, psychology, sociology, and economics. A primary research focus in the department of Nutrition and Exercise Physiology is the role of diet in the prevention and treatment of chronic diseases that are prevalent in the United States today: obesity, the metabolic syndrome, diabetes, immune disorders, neurodegenerative diseases, and osteoporosis. Specific dietary components being studied for their role in human health include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids, and nutraceuticals. Another important research area is the determinants of eating behavior, including neuro-psychological, sociologic, and economic factors. Investigative approaches include epidemiology, clinical trials, human studies, experimental and transgenic animal models, and cultured cell models.

Research Facilities

State-of-the-art facilities foster collaborative research across disciplines including Nutritional Sciences, Exercise Physiology, Biochemistry, Internal Medicine, Food Sciences, Biomedical Sciences, Animal...
Sciences, Behavioral Sciences and Public Health. Research Centers at the University of Missouri include Dalton Cardiovascular Research Center, the Bond Life Sciences Center, the Interdisciplinary Center on Aging, the International Institute of Nano and Molecular Medicine, the Health Activity Center, the Botanical Center, the Brain Imaging Center, and the Bioinformatics Consortium. Core research facilities available to MU faculty are the Cell and Immunobiology, DNA, Molecular Cytology, Electron Microscopy, Nuclear Magnetic Resonance, and Transgenic Animal cores. The Department of Nutrition and Exercise Physiology has a human exercise physiology lab, body composition assessment including BODPOD and DXA, as well as the MU Nutritional Center for Health that will house a metabolic kitchen and an observational food-choice behavior lab.

Financial Aid from the Program
Assistantships are competitive and can be obtained in research, teaching, and community nutrition and fitness programs. Numerous scholarships also are available to attract incoming graduate students, including the Life Sciences Fellowship program.

Graduate

PhD in Nutrition Area Program

Director of Graduate Studies: Pamela Hinton

Admission Contact Information
Tammy Conrad conradt@missouri.edu
106B McKee; Columbia, MO 65211
573-882-1144

Application Deadline
Fall admission: December 31 for the MS and PhD programs

Admissions Criteria

- Minimum TOEFL scores:
  Internet-based test (iBT)  Paper-based test (PBT)
  100  600
- Minimum GRE scores:
  Verbal  Quantitative  Analytical
  Prior to August 1, 2011  200  500  3.5
  On or After August 1, 2011  150  150
- Minimum GPA: 3.0 in science and math classes

Prerequisites
Entering students are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course.

Required Application Materials

To the Graduate School
- All required Graduate School documents, including on line application Required Supplementary Application Materials (upload online with your application to the Graduate School)
  - Statement of Purpose: Upload a Statement of Purpose, indicating your academic/research interests and career goals to the "Supplemental Information" section of your online application.
  - Resume or Vita: Upload a current Resume or Vita to the "Supplemental Information" section of your online application.
  - Recommendations: Enter the required information for at least three recommenders in the "Recommendation" section of your online application. The recommenders will receive an email with instructions for completing and submitting your recommendation. Please ensure that the recommenders are aware of the February 1 application deadline.
  - GRE Scores: Please make arrangements with Educational Testing Services to have official Graduate Record Exam (GRE) scores sent directly to our department. MU's Institutional code is 6875 and our department code: 0214.

PhD Degree Completion Requirements
Requirements for the PhD degree in nutritional sciences include a mastery of the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills.

Required Courses:

- NUTR_S 7340 Human Nutrition II Lecture 3
- NUTR_S 8340 Nutrition in Human Health 3
- NUTR_S 8310 Nutritional Biochemistry of Lipids 3
- AN_SCI 9442 Vitamins and Minerals 4
- Statistics 6
- NUTR_S 9087 Doctorate Seminar in Nutritional Sciences 1
- NUTR_S 9090 Doctorate Research in Nutritional Sciences 1-99

Total Credits 27-125

A total of >72 hours beyond the bachelor's degree, including but not limited to courses from the following Emphasis Areas are required; courses from the Masters degree #30 h may be counted towards the doctoral degree at the discretion of the student's committee. At least 15 of the 72 hours of course work must be at the 8000/9000 level (exclusive of research, problems and independent study experiences). Graduate students may elect to take the suggested courses from the following emphasis areas within nutritional sciences. The emphasis areas are not degree programs, nor are the course lists all inclusive; rather, they serve to guide course selection.

Emphasis Areas

**Other Requirements**

Primary investigator on one research grant during the second year of the doctoral program
Teaching (2 semesters)

**Qualifying Exam**

The Qualifying Exam must be passed before a student is officially admitted to the doctoral program. The Qualifying Exam should be completed by the end of the second semester (D1 form should be filed with the Graduate School). The Qualifying Exam consists of a knowledge-based written exam and an oral exam.

**Comprehensive Exam**

The comprehensive examination is the most advanced posed by MU. It consists of written and oral sections. A doctoral student must successfully complete the comprehensive examination within a period of five years beginning with the first semester of enrollment as a PhD student and at least seven months before the final defense of the dissertation. The two sections of the examination must be completed within one month. A report of this decision (pdf), carrying the signatures of all members of the committee, must be sent to the Graduate School and the student no later than two weeks after the comprehensive examination is completed.

**Doctoral Dissertation**

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate's own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

**Annual Review/Rate of Progress**

Annually, each graduate student must complete the Annual Review Requirement by updating information in the Graduate Student Progress System. At the end of each year the advisor will evaluate each master's student. Each student must maintain a 3.0 GPA. In addition, each graduate student must maintain adequate research progress as judged by the advisor and/or graduate committee. Inadequate progress will result in a probationary period of 30 days to 1 semester.

**Length of Study Policy**

A doctoral student must successfully complete the comprehensive examination within a period of three (3) years beginning with the first semester of enrollment as a PhD student. In addition, the program for the doctoral degree must be completed within three (3) years of passing the comprehensive examination. Time spent in the armed services will not count toward the six (6)-year limit (See Graduate School Active Duty Policy). For any extension of either of these time limitations, the student must petition their faculty advisor/mentor and the academic program's director of graduate studies in writing during the semester prior to reaching the time limitation. The director of graduate studies will notify the advisor in writing of the decision.
Pathobiology Area Program

College of Veterinary Medicine
201 Connaway Hall
Columbia, MO 65211
573-884-2444

About the Pathobiology Area Program

The Pathobiology Area Program is university-wide and staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Degrees Offered

Doctorate in Pathobiology

Note: The master of science program in biomedical sciences (p. 601), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Faculty

McKee Endowed Professor G. Stewart

Associate Clinical Professor L. Berent*, D. Kim, T. Reilly**, C. Vogelweid*, M. Whitney

Associate Research Professor A. Ray

Professor Emeritus C. A. Carson

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty member.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathobiology, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Director of Graduate Studies:

• PhD in Pathobiology Area Program (p. 626)

About the Program

The Pathobiology Area Program is university-wide and is staffed by faculty from the College of Veterinary Medicine (Veterinary Pathobiology, Veterinary Medicine and Surgery), School of Medicine (Pathology and Anatomical Science, Molecular Microbiology and Immunology, Biochemistry), College of Arts and Science (Biological Sciences), and College of Agriculture, Food and Natural Resources (Biochemistry, Animal Sciences).

Note: The master of science program in biomedical sciences (p. 601), with an emphasis in veterinary pathobiology, is listed separately in this catalog but shares the pathobiology doctoral courses and faculty list.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. In this program, various stipends are available, including teaching and research assistantships and postdoctoral fellowships. Check the program Web site or ask the program contact for details.

Career Preparation

Graduate training relates to the major departmental thrust — application of advanced biotechnology to solving today’s most perplexing agricultural, biomedical and companion animal questions. The faculty in the Pathobiology Area Program consists of scientists engaged in a wide variety of research programs supported by grants and contracts from government, foundations and private industry.

The Pathobiology Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. Furthermore, it increases availability of advisers, committee members, facilities and equipment for doctoral candidates. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology.

Facilities and Resources

Facilities are available that are suitable for advanced research in pathology, microbiology and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. BSL-3 biocontainment facilities are available.

Areas of Study

Toxicology, environmental toxicology, comparative medicine, epidemiology and pathogenesis of avian and mammalian diseases (companion animal, food-producing animal and spontaneous disease of laboratory animals), molecular biology, ultrastructure, parasitology,
DNA and RNA analysis, biomechanics, physiology, pathophysiology, oncology, bioinformatics, diagnostic anatomic pathology, veterinary neuropathology, pathology of infectious disease, quantitative pathology, molecular genetics, domestic animal genomics, bacteriology/mycology, virology, cell biology, genomics, and antimicrobial resistance.

Courses
Courses for the program are from a wide variety of areas within the university, including veterinary pathology (p. 1163), veterinary medicine and surgery (p. 1158), pathology and anatomical science (p. 1051), microbiology (p. 1011), biochemistry (p. 745), biological sciences (p. 751), and animal sciences (p. 712). Refer to the cumulative listing of course offerings (p. 697) for details.

Admission Criteria
Fall deadline: n/a
GRE scores: GRE scores required
Minimum TOEFL scores (international applicants only):

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61</td>
<td>500</td>
</tr>
</tbody>
</table>

Minimum undergraduate GPA for last 60 credits: 3.0
Designated faculty mentor
Professional students with a DVM degree may be eligible to waive the GRE.

Required Application Materials
To the Graduate School:
All required Graduate School documents

To the Pathobiology Area Program:
3 letters of recommendation (can be submitted through the Graduate School’s online application as well)
GRE scores (required)
Mentor letter of support

Plan of Study
Most of the student’s program and examining committees shall be from the Area Program faculty. Under the guidance of a program committee, a course of study is individually designed to fit each student’s academic background, experience and objectives. Courses may be chosen from one or more departments, as decided by the student in conjunction with the student’s mentor/committee, but shall constitute a definite plan of education for research or scholarly investigation in some particular aspect of microbiology, pathology, or comparative medicine. The final examination covers mainly the dissertation.

Degree Requirements
Research is the foundation of graduate and postdoctoral study and students within the Pathobiology Area Program can expect to spend 75 percent of their time engaged in research activities. The PhD degree requires 72 credit hours of work including a minimum of 15 credits of upper-level graduate course work exclusive of research credits. The student must pass a written and/or oral comprehensive examination in the area of study and write, present and defend a dissertation that embodies the results of original and significant investigation by the candidate. Up to 30 hours of post-baccalaureate credit from an accredited institution may be transferred toward the doctoral degree.

Interdisciplinary Area of Pathobiology
The Department of Veterinary Pathobiology in the College of Veterinary Medicine, along with the Department of Pathology and Anatomical Sciences in the School of Medicine and faculty from many other departments throughout the University, offer a PhD degree through the Pathobiology Area Program.

Prospective students must have a solid background in the life sciences, with advanced level experience in microbiology, immunology, genomics, molecular biology, cell biology, pathology, and/or biology.

Research experience at the undergraduate and/or master’s level is also desirable.

The Pathobiology Area Program is designed to prepare students for advanced professional careers in universities and colleges, research institutes, public health, hospital laboratories and industrial research. The broad scope of the program and its organization across departments creates an atmosphere for meaningful interdisciplinary dialogue between graduate students and faculty. A PhD candidate may choose a plan of research to take advantage of a wide range of interests and specialties in pathology and microbiology. Facilities are available that are suitable for advanced research in pathology, microbiology, and molecular biology. A wide range of equipment for advanced molecular biological procedures is available. Various stipends are available, including teaching and research assistantships and postdoctoral fellowships.

Faculty members of the Program guide the selection of coursework and the development of a dissertation project. A list of doctoral faculty eligible to supervise PhD students is available here (http://www.cvm.missouri.edu/AreaPatho).

For additional information regarding mentorship specifically in the Department of Pathology and Anatomical Sciences program, please contact:

About Pathology and Anatomical Sciences

The Department of Pathology and Anatomical Sciences in the School of Medicine, along with the department of Veterinary Pathobiology in the College of Veterinary Medicine, offers a PhD degree through the Pathobiology Area Program. Faculty also participate in other doctoral programs such as the Integrative Neuroscience Program, Genetics Area Program, and Molecular Pharmacology and Physiology. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Degrees offered

- Master of Science in Pathology
- PhD in Pathobiology Area Program

Faculty

**Professor** G. E. Davis, W. J. Krause**, J. H. Miles, G. Y. Sun, C. V. Ward*

**Associate Professor** E. H. Adelstein**, A. A. Diaz-Arias*, E. A. Ingram, R. Mitra*

**Lecturer** D. L. Dufeau, R. H. Dunn, S. D. Maddux*

**Clinical Instructor** J. Jones, D. V. Shin

**Clinical Professor** D. C. Miller*, M. Petrides*

**Associate Clinical Professor** A. D. Havey*

**Assistant Clinical Professor** M. Esebua, S. R. Frazier, C. C. Stacy*, M. X. Wang*

**Associate Research Professor** R. R. Little

**Assistant Research Professor** J. Cui

**Adjunct Professor** M. J. Ravosa**, M. S. Stack**

**Associate Professor Emeritus** L. E. Spollen

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in pathology and anatomical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 5).

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Application Deadline

Fall entrance: Inquire with Director of Graduate Studies

Admission Criteria

- Admission to candidacy in the master’s program is limited to those who hold at least a baccalaureate degree from an accredited college or university.
- Preference will be given to students with a college GPA of 3.5 or higher
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal +</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
</table>

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.
Prior to August 1, 2011  
On or After August 1, 2011

Required Application Materials to the Graduate School:

- All required Graduate School documents

Degree Completion Requirements

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives. The MS degree is designed primarily to prepare students for supervisory roles in basic-science and clinical laboratories, and to offer greater in-depth study in pathology and anatomical sciences concurrent with studies leading to the PhD and/or MD degree.

Admission to candidacy in the master's program is limited to those who hold at least a baccalaureate degree from an accredited college or university.

Preference will be given to students with a college GPA of 3.5 or higher, GRE scores (verbal + analytical) over 325, and strong letters of recommendation.

Each candidate for the master's degree is required to complete a minimum of 30 semester hours at the 8000 or 9000 level and maintain a B or better GPA in graduate course work, with no more than 12 hours of research, problems, seminars or special investigations.

Candidates also must satisfactorily complete a thesis. A candidate is expected to demonstrate knowledge of clinical and/or research techniques and to defend the thesis.

Faculty members advise students regarding their program of study and thesis research. A list of graduate faculty eligible to supervise MS students is available on the departmental website.

Required courses and those of special interest should complement the student's academic background and career objectives.
Public Health

Two Different Public Health Degree Options

The University of Missouri offers two different degree programs in the area of public health: the Master of Public Health, and a Master of Science in Public Health.

• The Graduate School confers the Master of Public Health (MPH) degree. The MPH Program has two emphasis areas Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, and Veterinary Medicine; and a graduate certificate. This public health coursework reflects the University of Missouri’s strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is a course of study appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, and communication.

• A Master of Science in Public Health (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

Graduate

MPH in Public Health

MPH Application and Admission Information

Admission Contact Information
Enola White (mumphprogram@missouri.edu)

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.
The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce.

The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri’s strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

**Degrees**

The MPH is available in two emphasis areas:

- Health Promotion and Policy
- Veterinary Public Health

**Three dual degrees are also offered:**

- MPH/Doctor of Veterinary Medicine (http://publichealth.missouri.edu/programs_mphdvm.php)
- MPH/Master of Public Affairs (http://publichealth.missouri.edu/programs_mphmpa.php)
- MPH/Master of Arts, Journalism (http://publichealth.missouri.edu/programs_mphma.php)

**Thesis Option**

The Masters Thesis Research (P_SIHT 8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a public health theory. A formal written report using guidelines established by the MU Graduate School is required. Masters Thesis Research enables the student to use the research process in a systematic inquiry of elements and relationships within public health theory. MU Graduate School Guidelines for the Thesis Process is available at http://gradschool.missouri.edu/academics/thesis-dissertation/thesis-dissertation-process/index.php.

The Master’s Thesis Project provides students with the opportunity to:

- generate a research question within a theory,
- formulate and implement a research design, and
- make recommendations for replication, revisions, or future investigations.

**Application Deadlines**

- Fall semester: July 1st
- Spring semester: December 1st
- Summer semester: May 1st

---

**Admission Criteria**

- Minimum TOEFL scores:
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550

- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

**Required Application Materials**

For more information to apply click here (http://publichealth.missouri.edu/apply.php).

---

**Graduate Certificate in Public Health**

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Admission**

Students wishing to pursue a Graduate Certificate in Public Health should complete the MU Graduate School’s online application (standardized test scores are not required). Certificate candidates must provide the MPH Program’s Personal Data Sheet and official transcripts to the MPH Program.

**About the Certificate**

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- Principles of Public Health
- An approved Health Statistics course
- Human Health and the Environment, Social and Behavioral Sciences in Public Health or Epidemiology
- One approved elective

**Applying to the Graduate Certificate Program**

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here (http://publichealth.missouri.edu/apply.php).

---

**MS in Public Health: Family and Community Medicine**

**Admission Contact Information**

Ashley Granger
One Hospital Dr.,
M224 Medical Sciences Building, DCO32.00
The Department of Family and Community Medicine has responsibilities for teaching, research and service activities covering the spectrum from primary medical care to community medicine. This graduate degree program is designed to prepare primary care physicians to work in an academic setting as faculty members with responsibilities for patient care, teaching, research, and scholarly endeavors. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.

**Application Deadline**

Deadline for Fall entrance: Call for deadline dates

**Admission Criteria**

• Board-certified/board-eligible primary care physicians

**Required Application Materials**

To the Graduate School:

All required Graduate School documents

To the Program (call for application):

• 3 letters of recommendation
• Departmental application
• Personal statement
• CV or resume
• Verification from medical school and residency program
• Official transcripts

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

**Plan of Study**

The graduate program leading to the master of science includes a combination of course work, research and field experience. Courses cover areas such as research methods, epidemiology, biostatistics and learning theory.

The program requirements include 30 hours of graduate course work and the completion of scholarly project.
Additional Minors and Certificates - Interdisciplinary Academic Programs

Undergraduate

- Certificate in Digital Global Studies (p. 632)
- Minor in Entrepreneurship (p. 632)
- Certificate in Environmental Studies (p. 633)
- Certificate in General Honors (p. 633)

Graduate

- Minor in Ancient Studies (p. 633)
- Certificate in Autism and Neurodevelopmental Disorders (p. 635)
- Certificate in Center for the Digital Globe (p. 635)
- Minor in College Teaching (p. 637)
- Certificate in Conservation Biology (p. 638)
- Certificate in European Union Studies (p. 638)
- Minor in Gerontology (p. 638)
- Certificate in Health Ethics (p. 639)
- Minor in International Development (p. 639)
- Certificate in Society and Ecosystems (p. 639)

Certificate in Digital Global Studies

This certificate is designed to prepare students in any discipline for our new global reality and equip them with the knowledge and skills needed to be successful in today’s highly competitive global job market. All current MU undergraduate students in any discipline are eligible to participate.

The structure of the requirements includes two required courses (more cross-listed options will be added), two elective courses, and an experiential learning component. Below are the details on the required courses. A list of approved options for the electives is available online at http://cdig.missouri.edu/globalconnect/electives.html.

The experiential learning component varies depending on the student’s field of study and interest, but an emphasis on global relations, cultural awareness, or media technology is required. This component could be study abroad, service learning, internship, etc, with an MU Center or an outside local, national or international organization.

For additional information on the certificate, contact:
Center for the Digital Globe
310 Reynolds Journalism Institute
Columbia, MO 65211
phone: 573-882-8770
e-mail: globalconnect@missouri.edu

Minor in Entrepreneurship

The undergraduate minor in entrepreneurship at the University of Missouri is built upon three pillars: development of creativity, opportunity for innovative action, and management of entrepreneurial enterprises.

Students who wish to complete the minor are encouraged to declare their intention as soon as possible. This allows the required courses to be effectively integrated into their course schedules along with other courses required for their intended major. An advisory committee will be appointed to make administrative decisions related to the minor (course additions/deletions). The members will be recommended by deans of the participating schools and colleges. Primary responsibility for student advising falls within the home college of the student OR in the unit where students claim the minor (e.g. Arts and Sciences students).

The minor consists of 16 credit hours. Students must complete coursework in management, creativity, and innovation, as well as in a workshop series that represents a common learning experience for all MU entrepreneurship minors. Three hours of coursework is required in each area, and a one hour experiential seminar course. Students must select the final three hours to complete the minor from approved courses in one of the pillars.

</table>
Many environmental careers require the kind of discipline-specific education available in traditional majors, but with an added base of knowledge about environmental issues and the skills to address them. The Certificate in Environmental Studies provides that base.

The Certificate is available to all majors. However, because of the variety of majors and the goal of the certificate program to complement a specific course of study, students must select courses in consultation with the Environmental Studies advisor.

**Certificate Requirements**

- 6 hours of Foundation Environmental Courses
- 3 hours of Environmentally-related Seminar
- 6 hours of Upper Level Environmental Courses

**Sample Certificate for a Sciences Major**

- SOCIOL 1120 Population and Ecology 3
- GEOG 2660 Environmental Geography 3
- ENV_ST 2070 Introduction to Ecological Economics 3
- Social Dimensions Course 3
- Social Dimensions Course 3

**Sample Certificate for a Social/Behavioral Sciences or Humanities Major**

- BIO_SC 1060 Basic Environmental Studies 3
- ATM_SC 1050 Introductory Meteorology 3
- ENV_ST 2110 Environmental Sustainability 3
- Natural Dimensions Course 3
- Natural Dimensions Course 3

Natural and Social Dimensions Courses are offered in other departments throughout the university. Check the Environmental Studies website or visit with the director to get an up-to-date list of courses that fit these categories.

- Social Dimensions Course (3000 level) 3
- Elective (3000 level) 3
- Total 120

**Certificate in General Honors**

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student’s final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a “C” or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:

**Graduate Minor in Ancient Studies**

Interdisciplinary Minor within the College of Arts and Science
http://ancientstudies.missouri.edu/index.shtml

**About the Minor**

The Ancient Studies program, created in 1968, is shared among the faculty from six departments at the University of Missouri. This minor provides an opportunity for students to diversify their curriculum and to perceive their field in a broader context than is possible within a departmental program. Students in this program select about one quarter
of the total courses from among a variety of courses designated by the participating departments.

A student pursuing a graduate degree in Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies may elect an Ancient Studies minor at either the M.A. or Ph.D. level. The Department of Classical Studies offers graduate work leading to the master of arts degree in classical languages with emphasis on Latin, Greek or both classical languages. The PhD degree in classical studies requires work in both Greek and Latin.

Faculty

Curators’ Professor M. Smith

Associate Professor S. Langdon, L. Okamura, D. Schenker, D. Hooley, R. Marks, J. McGlew, A. Mori, M. Rautman, D. Trout, B. Wallach

Assistant Professor N. DesRosiers, R. Foley, R. Gregory, D. Kelley

Assistant Teaching Professor M. Barnes

Professor Emeritus W. R. Biers, W. Bondeson, J. H. Kultge

Admissions

Ancient Studies Program Requirements

1. Admission into one of the following graduate departments: Anthropology, Art History and Archaeology, Classical Studies, History, Philosophy or Religious Studies.

2. Fulfillment of all the requirements of the major department. The master’s degree may be completed within approximately two years; the doctorate normally requires three years of course work beyond the master’s level.

3. The minor consists of additional courses to be selected from Ancient Studies courses outside the student’s major department; it usually constitutes about one-quarter of the graduate course work. For recognition of the minor, students should apply formally to the current chair of the Ancient Studies Committee.

A. For the M.A. degree, a minimum of 9 hours from at least two departments.

B. For the Ph.D. degree, a minimum of 24 hours (including the work for the M.A.) from at least two departments outside the student’s home department. These must include at least one course on the 7000-level in each of the two departments.

To the University

General admission and degree requirements for the Graduate School are determined by the Graduate Faculty Senate. However, admission to the Graduate School does not in itself entitle a student to candidacy for an advanced degree. A student must also be accepted as a candidate for the faculty of a department or area. Departments and areas establish admission standards that, in many cases, exceed the minimum requirements of the Graduate School. Admission to the Graduate School is based on three considerations:

- an official transcript showing that the applicant has earned a baccalaureate, DVM, MD or JD degree equivalent to that granted by MU,
- a grade point average of B or better in the last 60 hours of undergraduate courses and
- Official GRE results

To the Ancient Studies Program

Candidates must have earned a bachelor’s degree in an appropriate field; preference is usually given to students who intend to continue their work for a PhD. An application, including a completed MU Graduate School application form, transcript and GRE scores, should be made directly to the department in which the student wishes to study. It must be accompanied by three letters of recommendation concerning the student’s academic ability, a copy of a recent term paper, and a short statement from the applicant that sets out professional goals and reasons for pursuing the Ancient Studies minor. Inquiries may be addressed to the directors of graduate studies at the appropriate department.

Financial Support

The Ancient Studies Committee is able to award one fellowship (renewable for four further years) to a doctoral student entering from a University other than MU. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans. In addition, applicants may be eligible for fellowships administered by the Graduate School, including the Gus T. Ridgel Fellowships for Minority Americans.

In addition to the materials for admission to the Ancient Studies program, applicants for financial support must submit a separate letter to the department applying for fellowship or assistantship support.
Graduate Certificate in Autism and Neurodevelopmental Disorders

Note: This program is no longer accepting applicants

The certificate is designed to allow students from multiple disciplines to gain knowledge of the specialized needs of persons with autism and other developmental disorders. Professionals currently working with children with ASD and other Neurodevelopmental Disorders will enhance their skills, and those who wish to work with this population will enhance their future employability. Additionally, students might use the Certificate to learn about the field, perhaps leading to further graduate study and an advanced academic degree.

Graduate Certificate in Center for the Digital Globe

The Center for the Digital Globe graduate certificate is a 12 credit hour graduate certificate program established by the College of Business, School of Journalism, School of Law and the Department of Textile and Apparel Management in the College of Human Environmental Sciences. The Center for the Digital Globe offers two graduate certificate options. The requirements for each are outlined below.

Stand-Alone Certificate (For non-degree graduate students and students completing professional degrees) OR Graduate-Degree-Dependent Certificate (For students completing a graduate degree)

I. CDIG STAND-ALONE CERTIFICATE
(For non-degree graduate students and students completing professional degrees)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdisciplinary certificate to non-degree graduate students and professional students of the University of Missouri. The prerequisite for the stand-alone certificate is a baccalaureate degree. The certificate program supplements the students' studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students' successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the stand-alone certificate will have demonstrated competencies in:

- **Technology** - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

- **Global Communication** - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

**Business** - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

**Culture and Society** - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Stand-Alone Certificate:

Eligibility:

- Prerequisite for the stand-alone certificate is a baccalaureate degree.
- Professional students who are pursuing the stand-alone certificate must dually enroll in the Graduate School, be admitted to the CDIG Graduate Certificate Program and receive graduate credit for their 12 semester hours of stand-alone certificate courses. Others seeking this certificate who are not professional students and have not been admitted to Graduate School must also apply and be admitted to the CDIG Graduate Certificate Program. Apply online at the following web site: https://app.applyyourself.com/?id=umc-grad

**SPECIAL NOTE FOR LAW STUDENTS:** No more than six non-Law credits may count toward the JD degree.

Credits required for the Stand-Alone Certificate:

At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (Management 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (Journalism 8052). The course of work for graduate certificate students is more specifically described as:

1. Management 8100: Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.
2. At least 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses web page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses that meet this requirement.

3. Journalism 8052: Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades - Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Stand-Alone Certificate Requirements Summary and Final Application for Certificate

To be eligible for the stand-alone certificate in the Center for the Digital Globe, students are required to take four courses for graduate credit: two courses offered through Center for the Digital Globe and two electives. The required courses are Management 8100 (Exploring the Digital Globe) and Journalism 8052 (Case Studies in the Digital Globe). The two electives should be determined in consultation with the student’s CDiG affiliated advisor. To receive the certificate upon completion of the program, students must also print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf. The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and the graduate dean. For students completing a professional degree, a copy of the student’s approved degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

II. CDiG GRADUATE DEGREE DEPENDENT CERTIFICATE
(for students completing a graduate degree)

The Center for the Digital Globe, established by the College of Business, School of Journalism, School of Law and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers a 12 credit hour interdepartmental certificate to graduate students of the University of Missouri. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization. Students receiving the graduate degree dependent certificate will have demonstrated competencies in:

Technology - Students need not have achieved mastery of specific engineering, programming or application skills. Instead, the students must demonstrate a working understanding of how digital technologies function.

Global Communication - One of the primary characteristics of digital technologies, and particularly the Internet, are their function as worldwide communications media. Whether from the perspective of journalism, business or the law, the impact of these new communications channels has been substantial. Students should achieve an understanding of how new media are different from print or broadcast media and the consequences of those differences.

Business - Students should be well grounded in the principles, opportunities and ethical uses of electronic commerce and its impact on journalism, law and commercial practices.

Culture and Society - Digital media raise recurrent questions which call for political and social solutions. Students should be able to understand the broader issues raised by technological change and be prepared to take positions of leadership as such issues present themselves. Examples of such issues are questions of globalization, political boundaries, access, ownership and uses of information, marketing, etc.

To achieve the goals of the certificate and assure its value to students, the University and prospective employers or donors, the certificate program enjoys certain characteristics. Perhaps most fundamental is the interdisciplinary nature of the program. While each department has the capability of offering a course emphasis, track or intra-departmental certificates to students in the area of technology and commerce, one of the fundamental concepts underlying the Center is the value and necessity of approaching these issues from the perspective of various disciplines. With these principles in mind, the program has been designed to assure that the interdisciplinary character of the course of work will be emphasized. The required course work compels students to come together for an interdisciplinary introduction to their studies and permits them to work separately and within their respective disciplines for further study. Students come together for a concluding experience that involves working collectively through a case study.

Academic Requirements for the Graduate Degree Dependent Certificate

Graduate degree seeking students who want to pursue a Center for the Digital Globe Certificate must complete a Change of Program Form and be formally admitted to the certificate program. Print the Change of Program Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf. See your graduate faculty advisor to process the form.

SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree.

Eligibility: Students who have completed their baccalaureate studies and are enrolled in a master’s, doctoral or professional program and working toward a graduate degree at the University of Missouri.

Credits: At least 12 eligible credit hours, consisting of an introductory, interdisciplinary course (Management 8100), 6 credit hours in two or more eligible graduate courses, and a concluding seminar/research project course (Journalism 8052). The course of work for certificate students is more specifically described as:

1. Management 8100: Exploring the Digital Globe, 3 credits (offered fall semesters). This inter-departmental course introduces students to the impacts of technological change and globalization from the perspective of business, law and journalism. Students are introduced to electronic
commerce, digitization and globalization to prepare them to respond to the challenges of the digital globe. Students do not acquire specific technological skills; they acquire a working understanding of how digital technologies function. The course is taught by faculty from the journalism, business and law schools, and from the Department of Textile and Apparel Management of the College of Human Environmental Sciences. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

2. 6 credits of graduate course work - The courses taken to satisfy this requirement are those that have been approved by the Center’s faculty in consultation with the academic programs that offer the courses. The approved courses are graduate level courses that address one or more of the competencies specified above. See the Center for the Digital Globe’s graduate courses page http://cdig.missouri.edu/coursesgrad.html for a list of approved courses to meet this requirement.

3. Journalism 8052: Case Studies in the Digital Globe, 3 credits (offered fall and winter semesters). The course is designed to further develop the levels of understanding and skills obtained in previous course work. In this class, students will achieve a better understanding of how new media are different from print or broadcast media and the consequences of those differences. Students are introduced to the principles, opportunities and ethical use of electronic commerce. Students critically analyze issues raised by technological change, including globalization, political boundaries, access, ownership and uses of information, marketing, etc. As with the introductory class, this course is taught by faculty from a variety of departments. Visiting speakers, including speakers presenting programs for the Center for the Digital Globe, meet with the class to share their research and experience.

4. Grades: Students must maintain a minimum grade of 3.0 or equivalent in each course to receive credit toward completion of the certificate.

Graduate Degree Dependent Certificate Summary and Final Application for Certificate

To be eligible for the graduate degree dependent certificate in the Center for the Digital Globe, students are required to take four courses: two courses offered through Center for the Digital Globe and two electives. The required courses are Management 8100 (Exploring the Digital Globe) and Journalism 8052 (Case Studies in the Digital Globe). The two electives should be determined in consultation with the student’s graduate advisor. SPECIAL NOTE: No more than six of the twelve credits necessary for the CDiG Graduate Degree Dependent Certificate may count toward the graduate degree. To receive the certificate upon completion of their program, students must print and fill out the Application for a Graduate Certificate Form located on the Graduate School web site: http://gradschool.missouri.edu/forms-downloads/repository/cert-plan.pdf. The form asks for a list of courses taken by the student to fulfill the certificate requirements. The form must be signed by the student, the CDiG executive director and graduate dean. A copy of the student’s approved graduate degree program must be attached to the certificate application form when submitting it for the CDiG executive director’s approval. The form then must be submitted to the Graduate School, 210 Jesse Hall.

FOR ADDITIONAL INFORMATION:

See the Center for the Digital Globe web site for further program details, including contact information, courses, affiliated faculty list, etc.
Graduate Certificate in Conservation Biology

A certificate in Conservation Biology from the University of Missouri shows that you have interdisciplinary coursework and experience not already met by any single degree program at MU. As Conservation Biology is an interdisciplinary science the curriculum for our certificate provides coursework and experience beyond what is offered in a single degree program. The interdisciplinary nature of the curriculum is designed to help you reach a higher level of competence in conservation biology.

To accomplish this goal, the program has 2 required components:

1. Interdisciplinary coursework that includes at least one course each from the categories of Natural Sciences, Techniques and Policy/Social Sciences with at least 3 credits are from outside your degree program. A list of approved courses (http://www.conservbio.missouri.edu/forms&papers/Courses%20Fall%202009_updated.pdf) is available on the Conservation Biology website.
   - Ph.D. students: 15 credit hours of coursework at the 7000, 8000 or 9000 level, 12 of which may overlap with the degree course of study
   - M.S./M.A. students: 12 credit hours of coursework at the 7000, 8000 or 9000 level, all of which may overlap with the degree course of study
   - Coursework must include one course each from the following areas: Science, Techniques and Policy (See approved course list)

2. Practical experience through an internship that falls outside your discipline
   - 160 hours of an internship exploring an area complementary to the student’s conservation career goals
   - Designed and completed under the guidance of a mentor other than your major advisor
   - Results in a tangible product (e.g. paper, publication, presentation)

Graduate Certificate in European Union Studies

The Graduate Certificate in European Union Studies requires students to take 12 hours of coursework.

Required Courses

Specialization Courses

The rest of the hours should come from courses that have a strong EU focus

Graduate Minor in Gerontology

The graduate minor in gerontology consists of nine to 15 hours of aging-related course work approved as a graduate minor by the student’s
department/discipline. The MU Interdisciplinary Center on Aging will collaborate and provide assistance to both the student and his or her adviser. Twenty-three courses in more than 10 disciplines can be supplemented by independent and topics courses. Mentoring from experienced researchers on interdisciplinary research teams contributes to the learning curve of students specializing in aging studies. More than 40 teams are located throughout the university. Students are encouraged to contact the Interdisciplinary Center on Aging for help connecting with these productive groups of scholars.

For additional information, contact:

MU Interdisciplinary Center on Aging
M245A Medical Sciences Building
Columbia, MO 65212
phone: 573-884-3337
e-mail: aging@missouri.edu
website: http://medicine.missouri.edu/aging/home.html

Graduate Certificate in Health Ethics

The certificate program is ideal for working professionals such as physicians, nurses, healthcare administrators, those serving on hospital ethics committees or considering such health ethics issues in their daily employment, and students in the health professions. The certificate program will help the learner develop an understanding of the ethical issues related to health and healthcare and will foster skill in analyzing and resolving ethical problems and conflicts in the healthcare environment.

For more information, contact:

Veronica Kramer
Coordinator of Student Recruitment & Admissions
(573) 884-0698
kramerv@missouri.edu

Graduate Minor in International Development

The requirements for acceptance and completion of work for the minor are as follows:

1. The student must be enrolled as a master’s or PhD candidate in good standing at MU.
2. A formal request to be included in the minor must be made in advance of taking courses, to the director, Associate Professor Corinne Valdivia, 214D Mumford Hall. This request should be approved by the student’s adviser. A copy will be sent to the Graduate School.
3. Once the student is admitted to the minor, s/he should seek advisement from the director and his/her adviser concerning which courses to take. The plan of study must be submitted to the Graduate School no later than the semester before graduation.
4. The student must satisfactorily complete a total of twelve credit hours in courses dealing with Third World Development. At least six of the twelve hours must be taken in at least two departments outside the student’s home department.
5. Foreign language courses are not required, but students who are not fluent in a second language are strongly encouraged to take intensive language courses to develop competency. Credit for language courses does not count toward the twelve hours of credit required for the minor.
6. When the required twelve hours of credit are completed from approved courses, the student’s adviser should inform the director, who will in turn inform the policy committee which governs the operation of the minor. This should be done in advance of the student’s orals to give members of the policy committee an opportunity to sit in on the examining committee if they so desire.
7. The certificate is only awarded after all departmental and Graduate School requirements for the advanced degree have been satisfied. An overall grade point average of 3.0 is required for the twelve hours within the minor.

Graduate Certificate in Society and Ecosystems

Contact

Sandy Rikoon, Ph.D.
Coordinator Society and Ecosystems Program
200 A Gentry Hall
University of Missouri-Columbia
Columbia, MO 65211
Telephone: 573-882-0861
Goals

Understanding the complex and dynamic interactions between human activities and natural ecosystems is essential for achieving sustainable development. Developing this understanding in the next generation of scientists, educators and resource management professionals is the primary goal of the University of Missouri’s interdisciplinary graduate certificate program in Society and Ecosystems.

The Society and Ecosystems Program (SEP) is a unique interdisciplinary program that prepares students for careers with private and public organizations through advanced graduate level training and research. The certificate program is designed for students with undergraduate-graduate training in agriculture, biology, business administration, economics, engineering, fisheries and wildlife, forestry, geography, geology, rural sociology and related disciplines. Students who are in a graduate or professional program in their area of specialization take two integrated courses and complete a thesis or dissertation that applies more than one discipline. The program is designed to enhance the student’s familiarity with disciplinary and interdisciplinary concepts and principles from the social and natural sciences and humanities.

The goal of the program is to develop critical thinking and analytical skills related to:

- sustainable natural resource and environmental management and planning,
- dynamic interactions between social, economic and ecological systems,
- quantitative-qualitative analysis of individual and social behavior,
- cultural interpretations of natural resource and environmental issues, and
- application of knowledge gained in the above areas to the evaluation of public policy.

Admission

Admission to the SEP is open to students who have been admitted to a graduate or professional program in the University of Missouri-Columbia, have undergraduate-graduate training in natural and social sciences, and have interest in interdisciplinary studies. Persons interested in the SEP should contact the Coordinator.

Curriculum

Students must be enrolled in a regular academic department and working toward completion of a graduate degree in a natural resource-related discipline. All students are required to take the following core courses: a) six credits from a department/unit other than the one in which the student is enrolled, b) a three-credit interdisciplinary course on the human dimensions of ecosystem management, and c) three credits of a research seminar in Society and Ecosystems.

The interdisciplinary course examines the sociocultural, economic, ethical and biophysical aspects of ecosystem management with emphasis on the human dimension. It is normally taken during the student’s first year. The primary objective of this course is to develop a student’s appreciation of a) major issues in the society-ecosystems nexus, b) roles of various disciplines in understanding and resolving socioeconomic-ecological issues, and c) systems analysis. A course requirement is for students to work in multidisciplinary teams to evaluate human effects on and responses to global warming, loss of biodiversity, water pollution, and other contemporary natural-environmental resource issues.

The research seminar exposes students to interdisciplinary research on the interactions between social, economic and ecological systems. Emphasis is placed on the impacts of economic activity, population growth, technology and public policy on the functioning and resilience of ecological systems, and how ecological systems support socioeconomic development at the local, regional and global scales. Speakers for the research seminar include faculty, students, visiting scholars, and private and public officials. Students are expected to present their thesis or dissertation research at the research seminar. Thesis and dissertation research must be conducted on a topic related to the interactions between society and ecosystems. Students completing the SEP receive a certificate in Society and Ecosystems. Recognition of the certificate appears on the student’s transcript.

Advisory Committee

The student’s plan of study and research topic are selected in collaboration with an advisory committee established in accordance with the requirements of the student’s department/unit and the Graduate School. The advisory committee includes at least one faculty member affiliated with the SEP. Graduate school permission is required in cases where it is highly desirable for the three faculty members comprising a master student’s advisory committee to be from different departments/units.
Opportunities in the Honors College are described below.

Atmosphere within a large university.

Honors courses, taught by many of the University’s best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large university.

The Honors College is a community of motivated, high-achieving students from all the undergraduate colleges at the University of Missouri. It is designed to offer an innovative and challenging academic experience, personal advising, and enrichment programs specially designed for honors students in research, service learning, internships, and study abroad. The Honors College gives students maximum flexibility in order to serve their individual interests. Honors courses, taught by many of the University’s best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large university.

Opportunities in the Honors College are described below.

- **Honors Courses** (GN HON) are limited to honors-eligible students. Honors courses fall into three categories:
  - Honors sections of regularly offered courses
  - Departmental honors and research courses
  - Special Honors College courses

- **The four-semester Humanities Series**, which provides an interdisciplinary approach to literature, philosophy, art history, art, religious studies, archaeology and music.

- **The four-semester Human Sciences Series**, which provides an interdisciplinary approach to the social and behavioral sciences, including psychology, cultural geography, sociology, family studies, economics, linguistics, communications, and h

- **The two-semester Science Series**, which provides an interdisciplinary, hands-on laboratory science course for non-science majors designed to introduce students to the methods, range, and big ideas of scientific knowledge.

- **Honors Discussion Groups** are small, informal discussion groups focused on special topics.

- **Honors Colloquia** are interdisciplinary and experimental courses.

- **Honors Tutorials** are informal discussion groups of 2-5 students and a faculty member. Tutorials are based on the Oxford-style of learning and typically take place in the faculty member’s office or another non-classroom setting.

- **Independent Study** opportunities allow students to study one-on-one with a faculty member.

- **Honors Preceptorships** provide special student-faculty research opportunities. The Honors College helps arrange special research relationships between talented students and professors.

- **Learning by Contract** allows honors students to take a non-honors course for honors credit. The student enters into a contract with the professor to complete work beyond the course requirements. Forms are available online.

---

**Honors College Admissions**

**Fully-Admitted Incoming Freshmen**

Incoming freshmen are eligible for automatic admission to the Honors College upon submission of an application, if they have 29 or higher on the ACT or 1280 on the SAT and are in the top 10 percent of their high school graduating class. Students from high schools that do not rank will be automatically eligible if their core GPA is greater than 3.75. Incoming freshmen who do not meet both of the admissions criteria are required to submit an essay as part of their application. Essays are evaluated on an individual basis. Specific information on the requirements for the essay can be found on the website (honors.missouri.edu).

**Provisionally-Admitted Incoming Freshmen**

Incoming freshmen who apply to the Honors College but who do not meet the automatic eligibility requirements may be given the opportunity to take one honors course during their first semester. Provisionally-admitted students may request permission to enroll in one additional honors course during the Early Registration period for spring semester. Students wishing to exercise this option should schedule an appointment to meet with the director of the Honors College during Early Registration.

Provisionally-admitted students cannot live in the Honors Learning Community or participate in honors Freshmen Interest Groups in student housing and are not assigned to the Honors College for advising until they are given full admission. Provisionally-admitted students are automatically given full admission to the Honors College if they have a 3.5 MU GPA at the end of their first semester. Provisionally-admitted students who do not make a 3.5 the first semester may remain enrolled in the early registered course for the following semester. These students can apply for admission any time after they have completed 30 credits and have a 3.5 MU GPA.

**Transfer Students**

Transfer students are eligible to apply if they have at least 30 credits and a 3.5 cumulative GPA. The cumulative GPA, for the purpose of applying to the Honors College, is the calculated average of transfer work from all institutions the student has attended.

**Special Programs**

**Service Learning**

The Honors MU Community Engagement Project is a service-learning outreach program designed to assist members of the community and offer students problem-solving and leadership experiences. Service projects include mentoring at-risk adolescents, working with low-income preschool children, and investigating and providing service for local public health agencies. Students perform community service, participate in a seminar and complete research projects.

**Honors Housing**

The Honors Learning Community brings together honors students of various academic orientations into intellectually and socially stimulating settings. Honors Students are not required to live in Honors Housing.

**Student Services**

The Honors College offers one-on-one academic advising for all honors students. The Honors College also offers specialized advising for students planning a career in medicine, dentistry, optometry or podiatry. Pre-Health Professions advising through he Honors College provides a
comprehensive program that offers a variety of services to guide students through the academic and applications process necessary to become a health professional.

**Program Requirements**

**Maintaining Honors Eligibility**

**GPA Requirement**

Students must maintain a 3.0 MU GPA to remain in the Honors College. Students whose MU GPA is below 3.0 after fall semester receive a warning letter. Students whose MU GPA is below 3.0 after spring semester lose honors eligibility. Students wishing to reapply to the Honors College must meet the eligibility requirements for current students.

**Initial Course Requirements**

Students are required to complete two honors courses per year for the first two years. Students who are admitted for the second semester of their first year at MU must complete one course during the spring semester, and two courses the following year. All honors-designated courses will count toward this requirement including honors sequence courses, colloquia, honors sections of regularly offered courses (see departmental offerings), GN_HON 1080H/ GN_HON 2085H and GN_HON 2950H/ GN_HON 4950H, and Learning-by-Contract (up to 8 hours). The requirement is modified as follows for transfer students and MU students admitted after first semester.

**Continuing Course Requirements**

Students admitted after their first year must complete two courses the second year.

Students admitted after their second year must complete one course at any time before graduation.

Successful completion of this requirement is verified at the end of each spring semester. Students who have not taken the required number of courses lose honors eligibility.

**Honors Certificate Requirements**

Students who complete 20 credits in honors courses and have a 3.3 cumulative GPA are eligible for an Honors Certificate, which is also noted on their permanent transcript. All honors course work must be completed in the semester prior to graduation for a student to be eligible to participate in the Honors Commencement Ceremony.

**University Honors Designation**

Students who complete the Honors Certificate and a qualified departmental honors program will be eligible for this designation, which will be noted on their permanent transcript (see your department or the Honors College for information about departmental honors programs).

**Faculty**

There are faculty from all disciplines who teach Honors College courses.
School of Law

web: http://law.missouri.edu

Welcome to the University of Missouri School of Law's online catalog for the 2013-2014 academic year.

Information in this searchable, interactive catalog is current as of May 2013. The next catalog will be made available in May 2014. In the interim, changes to the law school curriculum will be made on our website (http://law.missouri.edu).

Use the search box above or click on the left hand menus to navigate through the catalog. There is also a PDF version available through the “Print Options” link above.

Broken links inside the law school’s online catalog may be reported by contacting umclawweb@missouri.edu.

The University of Missouri School of Law offers a collegial environment, reinforced by a small student body and a low faculty-student ratio. The intimacy of this setting, coupled with reasonable cost, consistently high bar passage rates, a network of alumni around the globe and access to top scholars in the legal world, make the School of Law one of the best values in the nation.

Administration

Gary Myers, Dean
Rafael Gely, Associate Dean for Academic Affairs
Rigel C. Oliveri, Associate Dean for Faculty Research and Development
Elisabeth E. Key, Assistant Dean for Career Development and Student Services
Robert G. Bailey, Assistant Dean and Director of the Center for the Study of Dispute Resolution
Randy J. Diamond, Director of Library and Technology Resources
Alisha L. Rychnovsky, Manager of Business and Fiscal Operations
Mark Langworthy, Senior Director of Development
Casey Baker, Director of External Relations
Michelle L. Heck, Director of Admissions and Financial Aid

Mission Statement

The MU School of Law aspires to be the school of choice for outstanding students, both from Missouri and other states. As a national leader in the field of dispute resolution, we seek to complement a strong traditional curriculum with an orientation toward lawyering as a problem-solving endeavor. We strive to foster a diverse faculty of nationally recognized scholars who are committed to effective teaching, and to attract a student body with diverse experiences and views. We also strive to offer an intellectually rigorous and collegial environment for the study of law. Furthermore, we seek to graduate well-rounded lawyers who are sensitive to ethical issues, prepared to serve clients, and ready to be leaders in promoting justice.

Academics

Known world-wide for its Center for the Study of Dispute Resolution, the School of Law's curriculum combines both traditional law school classes with an appreciation of the many dispute resolution techniques in which lawyers engage and includes a certificate program in the rapidly developing area of dispute resolution.

Mizzou Law students are required to complete 89 hours of law school classes in order to graduate. Following the prescribed first year, students are required to take Constitutional Law, Evidence, Criminal Procedure and Professional Responsibility. Several clinical and externship programs are available to upper level students, along with skills training in trial practice, negotiation, interviewing and counseling. The curriculum couples courses traditionally tested on the bar examination so that the law school can continue its long tradition of success on bar examinations nationwide, with cross disciplinary dual degree and certificate programs in several other areas. As a result, the law school’s curriculum is appealing not only to those who want to engage in the traditional practice of law, but also to those who want to use their law degree as a stepping stone into other disciplines.

Faculty

Professor Emeritus P. N. Davis, W. B. Fisch, D. A. Fischer, E. H. Hunvald Jr., D. A. Whitman

The catalog also has a cumulative listing of all faculty at the University of Missouri (p. 1174) that includes information on the faculty member’s highest degree attained.

Detailed faculty profiles for the School of Law faculty is also available at http://law.missouri.edu/faculty/directory/.

Academic Policies

Below is a listing of policies that only apply to students in the School of Law. Be sure to also check the listing of the University’s Academic Policies (p. 657) for policies that apply to all students.

The policies and procedures of the MU School of Law are revised on a regular basis. Provisions regarding such policies and procedures contained on our website are subject to change without notice. If you have questions or note errors or omissions, please contact the Associate Dean for Academic Affairs. All statements concerning requirements, prerequisites, conditions or other matters are for informational purposes.
only, and are subject to change without notice. They are not to be regarded as offers to contract.

Academic Progress (p. 659)
Attendance (p. 661)
Computer Policies (p. 662)
Course-Load Rules (p. 663)
Credit for Non-Law Courses (p. 663)
Disability Accommodations (p. 663)
Dismissal and Probation (p. 664)
Examinations (p. 668)
Grades & Ranks (p. 677)
Residency (p. 682)
Student Conduct (p. 683)
Student Employment (p. 683)
Withdrawal from the University (p. 688)

Juris Doctor (JD)

Upon favorable recommendation of the Faculty of Law, the degree of Juris Doctor will be conferred upon a student who:

a. Has pursued in residence the full-time study of law for at least three academic years (or the equivalent), two of which must have been completed in this School. A full-time student is one who is registered for credit in 12 or more hours in a semester or six or more hours in a summer session. A student registered for less than 12 hours in a semester or less than six in two summer sessions, will receive proportional residence credit. The maximum number of residency credits obtainable in any one summer session shall be seven, provided that for purposes of accelerated graduation (in less than three academic years) no more than twelve residency credits may be obtained in summer sessions.

b. Has received a passing grade in all required courses, except required courses which have been waived.

c. Has received passing grades in law courses aggregating at least 89 credits and has a numerical grade point average of at least 77.5; and

d. Has received an undergraduate degree before or concurrently with his or her graduation from law school.

[Note: The summer school residency provisions allow a student to combine two six-hour summer sessions or a seven-hour summer session with a five-hour summer session and obtain the equivalent of a full semester’s residency credit.]

Completion of a Writing Requirement for students who first matriculated in or after Fall 2006

1. Every J.D. student must complete a rigorous upper-level writing experience in either the second or third year of study.

2. A “rigorous writing experience” means an experience that culminates in an individually authored paper of at least 20 pages (double-spaced), based on independent research, through a process that includes preparation of a substantial draft, review and feedback by a faculty member, and revision of the draft.

3. Any of the following activities may satisfy the upper-level writing requirement, provided that the activity meets the definition of a “rigorous writing experience” in the individual case:
   a. completion of any course designated as a writing course,
   b. completion of a writing section attached to a traditional course,
   c. completion of an independent research project under L5875 Research, or
   d. membership on one of the journals of the University of Missouri School of Law.

5. In every case, the supervising full-time faculty member must certify that the writing requirement has been satisfied before a notation will be made in the student’s record.

6. As stated in the Student Handbook, “[g]rading is done anonymously in all classes where it is possible.” With the exception of Independent Research, if grading is to be done other than anonymously, the syllabus shall so state.
Professional Perspectives Requirement

I. As lawyers, each of you will be required to complete a required number of Continuing Legal Education requirements each year.

II. As law students at MU, you have a similar requirement.

III. You MUST complete a certain number of Professional Perspectives hours each year to be eligible to graduate from this law school.

IV. Professional Perspectives hours are designed to further your legal knowledge by presenting you with information about current legal events; from current practitioners, including judges; and about other legal or legally-related matters. These hours are also designed to present you with needed information about career planning, the job market, and placement;
   A. As a result, matters counting for Professional Perspectives credit are broken into two categories:
   B. Professional Perspectives are those programs that give students a new or different prospective on the law or its practice;
   C. Career Component credits are those programs that give students information about career planning and placement;
   D. Any program approved for credit will designate the category applicable to that program;

V. Matters qualifying for Professional Perspectives credit will appear on the School of Law Calendar. It is your responsibility to select the events you wish to attend, within the guidelines set out below;

VI. Many programs sponsored by the School of Law automatically qualify for Professional Perspectives credit. When listed on the law school calendar, qualifying programs are so designated.

VII. Programs sponsored by student or other groups may qualify for Professional Perspectives credit, but ONLY if an application for credit is filed, in advance, of the event, with the Associate Dean. Application forms are available in the Dean’s Office.

VIII. In every event for which Professional Perspectives credit is offered MUST be overseen by a responsible person who agrees to maintain an attendance record for that event.

IX. Because Professional Perspectives credit is required, it is an event for which attendance counts. As a result, please note that it is an offense under the Honor Code to misrepresent one’s own or another attendance or absence from such an event. This would include signing in for an event and then leaving before the conclusion of that event.

X. The Professional Perspectives requirement for each class of students is as follows:
   A. For First Year Law Students:
      1. A Professional Perspectives program in the fall semester;
      2. A Career Component program in the fall semester;
      3. A Professional Perspectives program in the winter semester;
      4. A Career Component program in the winter semester;
   B. For Second and Third Year Law Students:
      1. 2 Programs each semester;
      2. At least two of the programs during the year MUST be for general Professional Perspectives credit;
      3. At least one program during the year MUST be for the Career Component credit.

The above checklist (http://catalog.missouri.edu/schooloflaw/jurisdoctor/Degree_Requirements_Checklist.pdf) is also available in PDF.

Experiential Opportunities

The School of Law recognizes the importance of providing students with opportunities to apply the knowledge they receive in the classroom in “real-life” situations. Over their course of study, students have the opportunity to enroll in clinical programs or practicums in criminal prosecution, family violence, mediation, the state legislature, landlord/tenant law and the wrongly convicted. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/clinical.html.

In addition to these clinical opportunities, students can participate in our extensive externship program. In this program, students work under the supervision of a lawyer or judge in a public law office, government agency or not for profit organization or for an attorney in private practice engaged in pro bono work. Additional details are available from the School of Law at http://www.law.missouri.edu/academics/externships.html.

Master of Laws (LLM)

The Master of Laws degree is offered through a joint effort of the Graduate School and the School of Law. For detailed information on this program, consult the Graduate catalog (p. 603).

JD Certificate

MU Certificate in Dispute Resolution

Clients and society today need and expect much more than traditional advocacy from their lawyers. Modern lawyers need to be able to address legal problems in ways that accommodate a variety of needs, goals and values, in addition to vindicating legal rights. As a result, today’s lawyer must have the knowledge, skills and perspectives not only to advocate in the courtroom, but to participate in such processes as client counseling, negotiation, mediation, arbitration and creative problem-solving.

The MU Certificate in Dispute Resolution is designed to foster such learning in students by providing the opportunity to work with some of the nation’s leading dispute resolution scholars and practitioners. The MU School of Law has been ranked No. 1 in dispute resolution by U.S. News and World Report since 1999, and has more full-time faculty specializing in dispute resolution than any other law school.

This certificate program will give students an advantage in addressing the complex challenges of today’s legal environment.

Requirements

To receive a Certificate in Dispute Resolution from the MU School of Law, a J.D. student must take at least 10-11 credit hours of dispute resolution courses approved by the Law School. Eight of those credit hours are required core program courses and provide students with a basic understanding of the theory, skills and practice of dispute resolution. Students must take at least 2-3 additional elective hours from among the courses approved for the Certificate program.

Additional details and a list of courses satisfying the certificate requirements are available from the School of Law at http://www.law.missouri.edu/academics/certificates/resolution.html.
Additional Academic Programs - Law

Students in the School of Law have a wide variety of additional academic options before them, including a number of other degree and certificate programs available at the University of Missouri that can make a good accompaniment to the J.D. Below is a description of some of those options.

Certificates:
- Center for the Digital Globe
- European Union

Dual/Concurrent Degrees:
- Business Administration (Masters)
- Economics (Masters)
- Educational Leadership & Policy Analysis (Masters)
- Health Administration (Masters)
- Human Development & Family Studies (Masters)
- Journalism (Masters)
- Journalism (Doctorate)
- Library & Information Science (Masters)
- Personal Financial Planning (Masters)
- Public Affairs (Masters)

Center for the Digital Globe (Certificate)

The Center for the Digital Globe (http://cdig.missouri.edu) (CDiG), established by the College of Business, School of Journalism, School of Law, and Department of Textile and Apparel Management in the College of Human Environmental Sciences, offers an interdepartmental certificate to graduate students of the University of Missouri-Columbia. The certificate program supplements the students’ graduate studies within the various colleges and schools that make up the University. This is not a degree-granting program. Instead, the certificate attests to the students’ successful completion of a required course of study with emphasis on the managerial, theoretical and policy-related issues associated with digital media, electronic commerce and globalization.

European Union (Certificate)

Designed to complement existing degrees, the Graduate Certificate Program (p. 638) consists of 12 credit hours of study to be completed in a variety of settings over four semesters. A portion of the coursework takes place via the electronic classroom, allowing students to pursue their Certificate while maintaining work responsibilities or completing other degree programs. Students typically begin their studies during the winter semester, though the program is flexible to accommodate different scheduling needs.

Dual/Concurrent Degrees:

Business Administration (Masters)

Students completing the Law and Business course of study will be eligible to receive the JD degree from the School of Law and the MBA degree from the School of Business. This course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MBA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-business.shtml.

Economics (Masters)

The Department of Economics and the School of Law offer an integrated program in which students may obtain both an MA degree in economics and a JD degree from the School of Law. Although an MA degree in economics normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

The program meets requirements for the JD degree with 45 credit hours in required courses, 38 credit hours in elective courses within the School of Law, and 6 elective credit hours in economics, for a total of 89 credit hours. Requirements for the MA degree in economics are met with 24 credit hours of courses in the Department of Economics and 6 elective credit hours within the school of Law. The detailed program of study in economics is also subject to approval by the student’s advisor in the Department of Economics and by the Director of Graduate Studies in Economics.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-economics.shtml.

Educational Leadership & Policy Analysis (Masters)

With and Emphasis in Higher Education

The College of Education’s Department of Educational Leadership & Policy Analysis and the School of Law offer an integrated program in which students may obtain both an MA degree in higher education with a concentration in general higher education administration and a JD degree from the School of Law. Although an MA degree in higher and continuing education normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

The program meets requirements for the JD degree with 45 credit hours in required courses, 38 credit hours in elective courses within the School of Law, and 6 elective credit hours in education, for a total of 89 credit hours. Requirements for the MA degree in higher and continuing education are met with 24 credit hours of courses in the Department of Educational Leadership & Policy Analysis and 9 elective credit hours within the School of Law. The detailed program of study in education is also subject to approval by the student’s advisor in the Department of Educational Leadership & Policy Analysis and by the Director of Graduate Studies.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-educational.shtml.
Health Administration (Masters)

Students completing this course of study will be eligible to receive the JD degree from the School of Law and the MHA degree from the Health Management and Informatics graduate program. This course of study may be completed in four years and an additional summer session. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MHA degree.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mha-health-admin.shtml.

Human Development & Family Studies (Masters)

The Department of Human Development and Family Studies and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MS or MA degree in Human Development and Family Studies. Although a Master’s degree normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mams-human-dev.shtml.

Journalism (Masters)

The School of Journalism and the School of Law offer an integrated program in which students may obtain both a JD degree from the School of Law and an MA degree in Journalism. Although an MA degree in journalism normally requires two years of study, and a JD requires three, many students will be able to complete the full program in four years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ma-journalism.shtml.

Journalism (Doctorate)

The University of Missouri-Columbia School of Journalism and School of Law offer an integrated program for students seeking both a Ph.D. degree in journalism and a J.D. degree in law. Students should consider this program if they are interested in teaching or in senior-level practice or policy work in either of these fields, nationally or internationally. Although a Ph.D. degree in journalism normally requires three years of study, and a J.D. requires three, students may be able to complete the full program in as few as five years.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/phd-journalism.shtml.

Library & Information Science (Masters)

The School of Information Science and Learning Technologies (SISLT) and the School of Law offer an integrated program in which students may obtain both an MA degree in library and information science from SISLT and a JD degree from the School of Law. Although an MA degree in Information Science and Learning Technology with an emphasis in Library and Science normally requires two years of study, and a JD requires three, many students will be able to complete the program in four years.

The program meets requirements for the JD degree with 45 credit hours in required courses, 38 credit hours in elective courses within the School of Law, and 6 elective credit hours in library and information science, for a total of 89 credit hours. Requirements for the MA degree in library and information science are met with 36 credit hours of courses within SISLT and 6 elective credit hours within the School of Law. The detailed program of study in library and information science is subject to approval by the student’s SISLT advisor.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mls-library.shtml.

Personal Financial Planning (Masters)

The Department of Personal Financial Planning and the School of Law offer an integrated program in which students may obtain both a J.D. degree from the School of Law and a MS degree in Personal Financial Planning (FINPLN). The Program is registered with the Certified Financial Planner Board of Standards, Inc. and graduates may sit for the CFP@examination.

Normally, students require three years to complete the requirements for the J.D. degree and at least a year to complete the requirements for the MS degree. With careful scheduling of courses, this plan of study may be completed in as little as 3 ½ years. Dual Degree students normally spend their first year in the School of Law, and in their second begin to enroll in courses in both schools. This first year in the School of Law provides an understanding of the basics of the study of law, and the underpinnings for further study.

Students pursuing the Dual Degree Program must be admitted separately to both the School of Law and the FINPLN Program. The School of Law requires the LSAT admissions test; FINPLN requires the GRE or admission to the School of Law.

Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/ms-pfp.shtml.

Public Affairs (Masters)

Students completing the required course of study will be eligible to receive the JD degree from the School of Law and the MPA degree from the Harry S Truman School of Public Affairs. The course of study may be completed in four years. Normally, students require three years to complete the requirements for the JD degree and two years to complete the requirements for the MPA degree. Additional details are available from the School of Law at http://law.missouri.edu/academics/dualdegree/mpa-public-admin.shtml.
School of Medicine

Established in 1841, the school offers an innovative problem-based curriculum that provides medical students with early exposure to clinical training. In addition to undergraduate medical education, the school offers a master’s degree in health administration and boasts well-established, residency and continuing education programs. It is recognized nationally for its primary care and rural training programs. The Health Sciences Center provides health care for patients from every Missouri county.

For more information about the School of Medicine, call (573) 882-9219. http://medicine.missouri.edu
College of Veterinary Medicine

The college was established in 1946. It offers a four-year program leading to the doctor of veterinary medicine (DVM) degree. The college provides diagnostic and patient-care services for animals. The college has a national reputation for excellent student-to-instructor ratio and state-of-the-art facilities. Biomedical science courses available to undergraduate students are listed in this catalog. The college also offers post-graduate training to interns, residents in various specialties and graduate students.

For more information about the College of Veterinary Medicine, call (573) 882-9594. http://cvm.missouri.edu
About MU

Welcome to Mizzou

Our mission

Our distinct mission, as Missouri’s only state-supported member of the Association of American Universities, is to provide all Missourians the benefits of a world-class education enriched by service and global interaction. We are stewards and builders of a priceless state resource, a unique physical infrastructure and scholarly environment in which out tightly interlocked missions of teaching, research, service and economic development work together on behalf of all citizens. Students work side by side with some of the world’s best faculty to advance the arts and humanities, the sciences and the professions. Scholarship and teaching are driven by a sense of public service — the obligation to produce and disseminate knowledge that will improve the quality of life in the state, the nation and the world.

We are MU — Missouri’s Flagship University

We are a diverse group of students, faculty and staff who value the excitement and learning that come from interaction among people with richly different backgrounds and ideas.

We challenge talented undergraduates to stretch their minds and imaginations with the unique strengths of a major research university. Our students experience an interwoven web of learning experiences — in classrooms, in residence hall learning communities, and in collaborative research and creative, artistic and service projects with faculty.

We develop the world leaders of tomorrow through rigorous graduate and professional programs across the broadest range of disciplines offered on a Missouri campus.

We ensure improving the quality of MU through a financial model that supplements taxpayer support with rational tuition and student aid, public-private partnerships and aggressive fundraising. Our responsible fiscal planning assures both excellence and access for all well-prepared students, regardless of socioeconomic status.

We live and work in a community of scholars. We treasure our core values of respect, responsibility, discovery and excellence.

As a 21st century land-grant university, we are an economic engine for Missouri. We generate businesses and jobs by creating and disseminating the knowledge that fuels the new economy.

We use our unique intellectual resources to improve the civic, economic, health and educational well-being of Missourians from all walks of life and all corners of the state. We are committed to improving the quality of life of students and their families and communities through the creative and performing arts and the application of new knowledge.

Important Facts

History

The University of Missouri was established in Columbia in 1839 as the first public university west of the Mississippi River, and the first public university in Thomas Jefferson’s Louisiana Purchase territory. In 1870 the University of Missouri was approved as a land-grant university under the Morrill Act of 1862. The original mission of land-grant institutions was to make higher education accessible to more people. Gradually that mission has expanded to include research, service and outreach; enabling the state’s citizens to benefit directly from the knowledge gained through university research. As Missouri’s flagship university, MU continues its historic mission through its emphasis on excellence in teaching, research, service and economic development.

Students

- Students come from all 50 states and more than 100 countries. The diversity of backgrounds, opinions and lifestyles improves the overall quality of the student experience.
- The university has more than 27,000 undergraduate students who choose courses from a broad range of academic disciplines.
- The university also has more than 7,000 graduate and professional students enrolled in more than 90 different degree programs. The professional schools include more than 1,200 students in law, medicine and veterinary medicine.
- MU is nationally recognized for its Freshman Interest Groups, where students with shared academic interests live in the same residence hall and often attend classes together. These communities provide a strong academic and social foundation for freshmen, as well as increased faculty involvement with students.

The Campus

- The University of Missouri prides itself on respecting the past while embracing the future. The 1,262-acre Mizzou campus is a testament to that belief. From the six Ionic Columns that adorn Francis Quadrangle to the Memorial Union Tower that honors fallen soldiers to the MU Student Center completed in 2010, every piece of campus represents equally the heart and soul of what it means to be a Tiger.
- The campus is also a living museum with hundreds of plant species from all over the world that make up the Mizzou Botanic Garden. The garden features over 42,000 plants and invites a stroll through more than 170 years of history as MU was transformed into the global university it is today. National magazines and newspapers consistently rank Columbia, among the top cities in the nation for its excellent quality of life.

Alumni

There are more than 260,000 living alumni worldwide. Many continue to support the University through membership in the Mizzou Alumni Association.

Harry Tyrer, Chair, Faculty Council
Becky Stafford, Chair, Staff Advisory Council
Nicholas W. Droeg, President, Missouri Students Association
Jacob W. Wright, President, Graduate Professional Council
Tracey Mershon, President, Mizzou Alumni Association

**Accommodations for Students with Disabilities**

The University of Missouri complies with the American with Disabilities Act and other applicable laws and regulations. If you have a disability and need accommodations, please contact Disability Services, S5 Memorial Union, Voice (573) 882-4696, TTY (573) 882-8054, or e-mail disabilitieservices@missouri.edu as soon as possible so that appropriate arrangements can be made. For more information please visit the website at http://disabilityservices.missouri.edu. If you need this information in an alternative format (Braille, large print, or digital format), Disability Services can provide assistance.

**Accreditation**

The University of Missouri is accredited by the Higher Learning Commission of the North Central Association of College and Schools. Various schools, colleges and departments are also accredited by their respective professional associations and accrediting agencies.

**Complaint Resolution**

The University of Missouri desires to resolve student grievances, complaints and concerns in an efficient, fair and amicable manner. For details on procedures to file a complaint, please refer to the section on Complaint Resolution at http://financialaid.missouri.edu/consumer-information-disclosures/index.php.

**Equity in Athletics Disclosure Act**

The University of Missouri complies with the Equity in Athletics Disclosure Act of 1994, Section 360B of Pub. L. 103-382. This act and accompanying federal regulations require that certain information with regard to intercollegiate athletics, including operation expenses, revenue, salaries and participation rates, be made available to current and prospective students and the public. This report is available from the Department of Intercollegiate Athletics at (573) 882-6501.

**Family Education Rights and Privacy Act (FERPA)**

The University of Missouri policies and procedures adhere to this federal law. Students have the right to restrict the release of directory information. Directory information for MU is defined as: a student’s name, address, telephone listing, e-mail address, major field of study, student level, dates of attendance, degrees and awards received, enrollment status in any past and present semester (i.e. full/part-time), and the most recent previous educational agency or institution attended by the student.

To restrict this information, students should change their privacy settings in myZou or contact the Office of the University Registrar-Registration, 125 Jesse Hall. For the full policy, go to http://registrar.missouri.edu/policies/ferpa.php.

Note: University of Missouri students can grant other users direct authorized online access to their student information in myZou, which may include academic information (including, but not limited to grades), account information, directory information and financial aid. See http://registrar.missouri.edu/registration-adddrop/additional-authorize-access.php for more information. The University does not release grades to parents unless the student specifically authorizes it in writing in the Office of the University Registrar or a parent shows proof that the student is a dependent as defined in Section 152 of the Internal Revenue Code of.

**Notifications**

All statements in this catalog are announcements of present policies only, and are subject to change without notice. They are not to be regarded as offers to contract. If you have questions or note errors or omissions, please contact the Office of the University Registrar (http://registrar.missouri.edu). Below is additional information for items on which the University is required to make available.
1954. “Parent” means a parent of a student and includes a natural parent, a guardian, or an individual acting as a parent in the absence of a parent or guardian.

Nondiscrimination

The University of Missouri does not discriminate on the basis of race, color, religion, sex, sexual orientation, national origin, age, disability, protected veterans. Any person having inquiries concerning the University of Missouri compliance with implementing Title VI of the Civil Rights Act of 1964, Title IV of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990, or other civil rights laws should contact the Assistant Vice Chancellor, Human Resources Services, University of Missouri, 130 Heinkel Building, Columbia, MO 65211, (573) 882-4256, or the Assistant Secretary for Civil Rights, US Department of Education.

Oak Ridge Associated Universities (ORAU) Consortium

Since 1981, students and faculty of the University of Missouri have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of 96 colleges and universities and a contractor for the U.S. Department of Energy (DOE) located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members.

Through the Oak Ridge Institute for Science and Education (ORISE), the DOE facility that ORAU operates, undergraduates, graduates, postgraduates, as well as faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines including business, earth sciences, epidemiology, engineering, physics, geological sciences, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines. A comprehensive listing of these programs and other opportunities, their disciplines, and details on locations and benefits can be found in the ORISE Catalog of Education and Training Programs, which is available at http://www.orau.gov/orise/educ.htm, or by calling either of the contacts below.

ORAU’s Office of Partnership Development seeks opportunities for partnerships and alliances among ORAU’s members, private industry, and major federal facilities. Activities include faculty development programs, such as the Ralph E. Powe Junior Faculty Enhancement Awards, the Visiting Industrial Scholars Program, consortium research funding initiatives, faculty research and support programs as well as services to chief research officers.

For more information about ORAU and its programs, contact:

Robert V. Duncan
Vice Chancellor for Research
ORAU Councilor for University of Missouri
Monnie E. Champion
ORAU Corporate Secretary (865-576-3306); or
Visit the ORAU Home Page (http://www.orau.org)

State of Missouri Registration for Professional Engineers

The Revised Statutes of Missouri (Section 327.221) require that “all applicants for registration as a professional engineer in the State of Missouri after Jan. 1, 1977, be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology (ABET).” All MU undergraduate engineering bachelor’s-level programs are so accredited. Applicants who receive advanced degrees in MU’s engineering programs but who do not have a bachelor’s degree in an accredited engineering program are not eligible for registration in Missouri. Candidates for a graduate degree (MS or PhD) in engineering who want to establish eligibility for registration should consult with their academic program chair about a plan of study that also will lead to a bachelor’s degree in an ABET-accredited program. Further information about professional engineering registration may also be obtained from the Missouri Board for Architects, Professional Engineers and Land Surveyors, P.O. Box 184, Jefferson City, MO 65102.

What catalog applies to whom under what circumstances

These policies concern the application of the University of Missouri’s graduation, divisional and departmental degree requirements. MU students’ academic requirements for graduation are typically met as follows:

University-wide policies, including undergraduate general education requirements:

• Students must complete the graduation requirements in effect for the term that they first enroll at MU or they may choose those in effect for the term that their degree is awarded with the agreement of their academic unit.
• This policy applies to newly admitted freshmen, newly admitted graduate students, and transfer students.
• Students who have a lapse in enrollment must meet the degree requirements in effect at the time the students are readmitted to MU.

Divisional, departmental and other degree requirements:

• Students must meet the specified divisional, departmental and major requirements for the degree(s) that were in effect when they were admitted as degree seeking to the program or may choose those in effect for the term in which they will graduate, with the agreement of their division or department.
• Students who have a lapse in enrollment must meet the standards of the degree requirements in effect when they return to MU.

After consulting with an advisor, students may appeal. Requests for exceptions to the above policy may be made to the academic dean for the academic unit in which the student is enrolled. Some academic units may have unique “grandfathering” policies that apply to changes in their programs and that supersede this policy. Students should consult with an advisor in all cases.

A Statement of Values

The University of Missouri, as the state’s major land-grant university, honors the public trust placed in it and accepts the associated accountability to the people of Missouri for its stewardship of that trust.
Our duty is to acquire, create, transmit, and preserve knowledge, and to promote understanding.

We the students, faculty, and staff of MU hold the following values to be the foundation of our identity as a community. We pledge ourselves to act, in the totality of our life together, in accord with these values.

### Respect

Respect for one's self and for others is the foundation of honor and the basis of integrity. A hallmark of our community is respect — for the process by which we seek truths and for those who engage in that process. Such respect is essential for nurturing the free and open discourse, exploration, and creative expression that characterize a university. Respect results in dedication to individual as well as collective expressions of truth and honesty. Respect is demonstrated by a commitment to act ethically, to welcome difference, and to engage in open exchange about both ideas and decisions.

### Responsibility

A sense of responsibility requires careful reflection on one's moral obligations. Being responsible imposes the duty on us and our university to make decisions by acknowledging the context and considering consequences, both intended and unintended, of any course of action. Being responsible requires us to be thoughtful stewards of resources — accountable to ourselves, each other, and the public we serve.

### Discovery

Learning requires trust in the process of discovery. Discovery often fractures existing world views and requires acceptance of uncertainty and ambiguity. Therefore, the university must support all its members in this lifelong process that is both challenging and rewarding. As we seek greater understanding and wisdom, we also recognize that knowledge itself has boundaries — what we know is not all that is.

### Excellence

We aspire to an excellence that is approached through diligent effort, both individual and collective. Pursuing excellence means being satisfied with no less than the highest goals we can envision. Pursuing excellence involves being informed by regional, national, and global standards, as well as our personal expectations. We recognize and accept the sacrifices, risks, and responsibilities involved in pursuing excellence, and so we celebrate each other's successes. We commit ourselves to this process in an ethical and moral manner.

These statements are mere words until we integrate them as values in our individual lives and reflect them in our institutional policies and practices. We pledge ourselves to make them effective in the very fabric of our lives, our community, and all our relationships with others, thereby enhancing the development of individuals and the well-being of society.

Academic Assessment Goals for Undergraduates

All undergraduate students are required to participate in the University’s processes/program for assessing student learning in general education and in the major fields. The purpose of assessment at MU is to provide faculty and administrators with the information they need to ensure high levels of student learning. The key goal is to improve how and what students learn in their programs and to increase how much they learn. At the same time, the process provides documentation of student learning to help programs and the University meet external requirements, including those of accreditation organizations.

Faculty members develop assessment strategies specific to each degree program and conduct assessments at appropriate points in their students’ undergraduate careers. Each program at the University has defined learning objectives for their students that form the basis of assessments. Students participate in assessments of discipline-specific learning objectives and of learning objectives aligned with the University’s learning objectives for all students.

In order to meet the needs of the people of the State of Missouri, the nation and the global society, the University of Missouri shall provide its baccalaureate graduates with a sound intellectual foundation in the liberal arts and sciences and in the student’s chosen major fields of study. Toward that end, in addition to having every bachelor’s degree recipient fulfill appropriate course work requirements for general education and for degree programs, MU strives to have all students achieve the following goals:

Goal 1: Graduates of MU will be able to identify and evaluate new information in light of previous knowledge.

MU graduates will be able to:
- Identify issues and problems important to society, define their scope, and identify information needed to address them.
- Find existing sources of information on a topic.
- Evaluate the accuracy, validity, and reliability of information presented in a wide variety of media.
- Conduct appropriately focused library, field or laboratory research.
- Analyze and synthesize information gathered, demonstrating strategic and logical reasoning skills.
- Demonstrate understanding of costs, benefits, and/or consequences of proposed resolutions of issues and problems important to society.
- Organize information, data and ideas for further analysis and/or presentation.

Goal 2: Graduates of MU will possess the knowledge, abilities, and skills necessary to communicate effectively.

MU graduates will be able to:
- Communicate information to a variety of audiences and purposes.
- Revise and edit their presentations to improve clarity and accuracy.
- Engage in the healthy and positive exchange of ideas.
- Apply communication skills in furthering their post-MU careers.
- Use multiple formats and technologies to communicate ideas effectively.

Goal 3: Graduates of MU will possess the knowledge, abilities, and skills necessary to serve society responsibly.

MU graduates will be able to:
- Understand the duties of being a responsible citizen.
- Identify and analyze the requisite behaviors for carrying out their academic and professional lives with integrity.
- Work collaboratively with others where appropriate.

Goal 4: Graduates of MU will possess knowledge to observe and critically analyze the diverse human experience.

MU graduates will be able to:
- Engage in life-long learning.
- Appreciate fine art and literature.
- Understand the contributions of diverse groups and experiences to life at the individual, community, national, and the world levels.
- In addition, some students will be required to take standardized tests in their major field and/or for general education.

University General Education Assessment

Each year, a sample of seniors will participate in a University general education assessment examination known as the CAAP Exam, which addresses University general education competencies of MU students in the areas of mathematics, science reasoning, reading, writing and critical thinking.
Major Field Assessment

Prior to graduation, all seniors will participate in assessment of their mastery of course work in their major field. The assessment program is determined by the faculty of each department to measure the extent to which students are achieving instructional goals and outcomes for graduates in that field. The methods of assessment are appropriate to the educational goals for students in their respective major fields. Information on subject field assessment is included with the college and school sections of this catalog. Methods may include:

- Nationally-normed examinations
- Portfolio review
- Performance review
- Capstone project
- Faculty-developed exit examinations
- Exit interviews

University Organization

The largest academic units at the University of Missouri are its colleges and schools. Each college and school may consist of smaller units called departments. Some colleges have divisions within them as well, which are a collection of departments within a college or school. By long tradition, some of the smaller units are also called schools.

The academic year is divided into two 16 week semesters (fall and spring) and one 8 week summer semester. The January intersession is considered part of the spring semester for registration and financial aid purposes. The May intersession is considered part of the summer session.

Academic Programs and Degree Structure

To earn a degree from the University of Missouri, students must complete all University, college and/or school, departmental and major requirements. In some cases, the major requirements may include emphasis areas and/or minors. In other cases, there may be options or tracks, which do not appear on transcripts.

Withdrawal from the University (p. 688)
Withdrawal from the University (L) (p. 688)

Absences

Students are expected to attend all scheduled class sessions. A student who does not complete assigned academic work because of absence from class is responsible for making up that work in accordance with instructions provided by the faculty member consistent with any policy established by the faculty of the respective department, school or college. A school or college faculty, a department faculty, a course director or an individual instructor may establish attendance standards and will determine whether a student will be permitted to make up work missed as a result of absence(s). There is no dean’s excuse or official absence. (http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php) See Satisfactory Academic Progress Policy for Financial Aid Eligibility.

However, a student, who is also a member of a national guard, Federal Emergency Management Agency or military reserve unit and is called to active duty while the University is in session, will be permitted to make up work missed as a result of such absences for up to two weeks of absences, provided that to do so does not require the instructor to
engage in individualized tutorial work with the student. Recognizing that some students have contractual obligations to the University, while others are participating in intercollegiate events at the behest of their departments, faculty are encouraged to make accommodations for absences incurred because of these responsibilities. In enforcing their absence policy, it is recommended that faculty give due consideration to the important role that extracurricular activities play in the development of students, as well as to the benefits they provide to both our university and community.

Students must notify instructors of any scheduled absences within the first two weeks of the semester. In the case of later qualifying events, the instructor must be informed two weeks prior to those events. Instructors are encouraged to advise students of their absence policy at the beginning of the semester.

Academic Dishonesty

Academic honesty is essential to the intellectual life of the University. Thus, academic dishonesty, such as cheating and plagiarism, is a basis for disciplinary action. In all cases of academic dishonesty, the faculty member makes an academic judgment about the student’s grade on that work and in that course and reports all incidents to the provost for disciplinary action.

Academic honesty is fundamental to the activities and principles of the University. All members of the academic community must be confident that each person’s work has been responsibly and honorably acquired, developed and presented. Any effort to gain an advantage not given to all students is dishonest whether or not the effort is successful. The academic community regards academic dishonesty as an extremely serious matter, with serious consequences that range from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting or collaboration, consult the course instructor. Refer to the Collected Rules and Regulations, Section 200.010, Standard of Conduct (http://www.umsystem.edu/ums/rules/collected_rules/ch200/200.010_standard_of_conduct), and Section 200.020, Rules of Procedures in Student Conduct Matters (http://www.umsystem.edu/ums/rules/collected_rules/ch200/200.020_rules_of_procedures_in_student_conduct_matters) for more specific details. (The Collected Rules are available on the University of Missouri System website.) According to the UM Rules of Procedures in Student Conduct Matters, when they suspect that academic dishonesty has occurred, faculty members have an obligation to report an incident to the Office of the Vice Provost for Investigation

Academic Progress (G)

Measuring Graduate Student Progress

Annual Requirement: Review of Graduate Student Progress

Since 2006, the Graduate School has required that all graduate students file an annual report on their academic performance, degree program milestones, and related academic/scholarly/research/creative achievements. Faculty mentors (advisers) are required to review their advisees’ annual reports to assess if their advisees are making satisfactory progress toward degree completion. In some cases, the director of graduate studies and/or department chair also reviews the students’ annual reports and faculty member responses.

Each division/area/department degree program must inform all students of the annual progress reporting requirement. This includes printed, published or electronic materials provided to graduate students (e.g., handbooks, orientation materials, guidelines, web site.)

Graduate Student Progress System (gsps.missouri.edu)

The Graduate Student Progress System (GSPS) is a web-based reporting system where students document their progress toward degree completion. All graduate students (i.e., in all disciplines) are required to submit an annual progress report by starting/updating a GSPS record. Faculty members use the GSPS to review students’ annual reports, assess their progress and provide feedback to the students.

At a minimum, students are required to report on academic progress, completion of required forms, award and honors, conferences, presentations, publications, service activities, creative activities, employment, funding activity, and job placement. Academic program faculty or administrators may require additional indicators of performance or achievement to accommodate the unique needs of their programs.

Additional information on measuring graduate student progress is at gradschool.missouri.edu/policies/progress/.

Probation and Termination Dismissal

In addition to dismissal for failure to meet the usual examination and grade requirements, departments and graduate degree-granting area programs have the right to place on probation and, after at least 30 days of probation, to dismiss from their program any graduate student who is deemed to be making insufficient academic progress or whose work is not of the quality required. The faculty adviser or academic program chair must inform the Graduate School as soon as the student is notified and the probationary period begins. The dismissal may occur at any time during a student’s work toward a graduate degree.

For additional information on satisfactory progress, probation, termination, extension and appeals go to the Extension and Appeals of Satisfactory Progress Infractions section of this policy manual (click here to go to that section), or go to the web page version of the catalog, found at http://gradschool.missouri.edu/policies/progress/.

Extension and Appeals of Satisfactory Progress Infractions

The progress of each graduate student is evaluated annually by the student’s adviser and/or director of graduate studies (DGS). The definition of “satisfactory progress” and procedures for its verification may vary among departments/programs. If a department/program has instituted timelines that differ from those applying generally to graduate students (see below), these timelines should be made available to students from their entrance into the graduate degree program. If a student is authorized to diverge from progress timelines established by either the department/program or the Graduate School, this fact should be documented in written form and endorsed by the student’s adviser and DGS.

Progress Toward Degree

Full-time students (those taking 9 hours or more per semester) should follow the time frames associated with degree programs discussed in the Graduate Policy Manual under Master’s Degrees and Doctoral Degrees. They must submit required forms on time and maintain a grade point
average of 3.0 or better. Furthermore, they must successfully undergo their departments’ annual review processes.

Part-time students should file a timeline for successful degree completion with their departments and the Graduate School. This timeline should be endorsed by the director of graduate studies and a prospective adviser by the end of the first calendar year of admission into the department/program. When these timelines conflict with time to degree guidelines laid out in the Graduate Policy Manual’s sections on master’s and doctoral degrees, they must receive the endorsement of the dean of the Graduate School.

**Distinction Between Requests for Extension and Appeals**

A “Request for an Extension” and an “Appeal” are distinct processes for dealing with problems related to “satisfactory progress.” A “Request for Extension” is the appropriate course of action when a student has failed to meet satisfactory progress provisions of the Graduate School. The “Appeal Process” should be followed when a department/program has dismissed a student after the required probationary period.

**Academic Progress (L)**

**Student Progress**

**Annual Review of Students’ Progress**

The progress of each graduate student will be evaluated annually by the Director of the LL.M. Program.

For students who first enrolled in the LL.M. Program after January 1, 2001, the following are the standards of “satisfactory progress” in the LL.M. Program, subject to individual exceptions for good cause as approved by the Director of the LL.M. Program. Normally, students should complete all degree requirements within three (3) years of enrollment. By the end of the first year of enrollment, students must have completed at least eight (8) credits that satisfy requirements for the LL.M. degree. By the end of the second year of enrollment, students must have completed at least sixteen (16) credits that satisfy requirements for the LL.M. degree. By the end of the third year of enrollment, students must have completed at least twenty-four (24) credits that satisfy requirements for the LL.M. degree. Time spent in the armed services will not count toward the period for completing the degree requirements.

For students who first enrolled in the LL.M. Program before January 1, 2001, to achieve “satisfactory progress,” students must complete an average of at least four (4) credits for every academic year since their initial enrollment in the LL.M. Program.

The Graduate School will be informed of all students who are not making satisfactory progress. When there is a question as to whether satisfactory progress is being made, the Director of the LL.M. Program will write to the student and recommend a face-to-face meeting with the student. If there is disagreement, the Director of the LL.M. Program will ask the student to submit a separate letter to him or her. Copies of both letters will be made available to the student, maintained in a departmental file, and forwarded to the Graduate School.

If difficulties persist and the Director of the LL.M. Program determines that probation is appropriate, the Director will notify the student in writing of the probationary period, which may be from 30 days to a full semester. The probation letter will state explicitly that the student is on departmental probation and state precisely what must be accomplished and by what date in order to enable the student to return to good standing in the Program and be removed from probation. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the probation letter or determine that probation is not appropriate.

If the student does not comply with the conditions of probation, a letter signed by Director of the LL.M. Program will be sent to the student (with a copy to the Graduate School) with notification of dismissal from the LL.M. Program. Within ten (10) working days of receipt of the probation letter, the student may submit a written request for a review of this decision by the LL.M. Admissions Committee, which may affirm or revise the notification of dismissal or determine that dismissal is not appropriate (with a copy to the Graduate School). The Graduate School sends the official notice of dismissal from the Program.

A student may appeal a dismissal decision to the Graduate Faculty Senate only after completing the Program’s appeal process. The full text of the Dismissal Policy and Appeals Process for Graduate Students (http://gradschool.missouri.edu/academics/progress/requests-for-extensions-appeals.php) can be found in the Graduate School Catalog on its web site.

**Academic Renewal**

Students who are returning to the University of Missouri to pursue an undergraduate degree after an extended absence may request permission to remove one or more complete academic terms from future degree and GPA considerations.

**Eligibility**

To be eligible for academic renewal consideration, students must meet these requirements:

- Students must not have enrolled as degree-seeking at the University of Missouri for four or more consecutive years.
- Students must not have graduated from the University of Missouri-Columbia.
- Students must either:
  - be admitted as degree-seeking and have earned a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months; OR
  - have attended as a non-degree-seeking student and have earned thereby a minimum of 12.0 credits with at least a 2.5 GPA of record for those credits at the University of Missouri within the past 12 months and subsequently have been admitted as degree-seeking by the University.

**Conditions**

Academic renewal is based on the following conditions:

- All courses and credits taken during the chosen terms will be removed from consideration for GPA and degree requirements. Students may not combine individual courses from multiple terms to comprise the semester(s) dropped. All courses and grades for the chosen terms will remain on the student’s academic record.
- Renewal may be applied only to academic terms completed prior to the student’s extended absence.
- Students may be granted only one academic renewal.
Advanced Standing - Credit by Exam

MU offers the opportunity for advanced credit by examination to any student with fewer than 90 credits. Credit may be awarded, but no grades or honors points are recorded. General eligibility to receive advanced standing at MU does not guarantee its applicability to a degree program. A student who has received credit for any portion of a lower level course will not receive advanced standing credit for that same course. More information can be found at http://admissions.missouri.edu/apply/ap-ib-and-college-credits/index.php. The programs described below are used to award credit.

Advanced Placement Program

The Advanced Placement Program of the College Board is accepted by MU. The examinations are prepared and graded by national committees, and the results are furnished to MU on request of the student. Students who receive a sufficiently high score are eligible for college credit. Students should contact their academic units if they have questions.

College Level Examination Program

The College Level Examination Program of the College Board provides general examinations and subject examinations. Credit may be awarded for CLEP subject exams only. Credit must be applicable in students’ programs of study. (Refer to the appropriate section in this catalog for the school or college, or contact the academic unit to ascertain the specific limitations for CLEP examinations.)

Credit by Examination for Mathematics Courses

It is possible to receive credit in the following math courses by passing the appropriate examination:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1100</td>
<td>College Algebra</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1140</td>
<td>Trigonometry</td>
<td>2</td>
</tr>
<tr>
<td>MATH 1160</td>
<td>Precalculus Mathematics</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1360</td>
<td>Geometric Concepts</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1500</td>
<td>Analytic Geometry and Calculus I</td>
<td>5</td>
</tr>
<tr>
<td>MATH 1700</td>
<td>Calculus II</td>
<td>5</td>
</tr>
</tbody>
</table>

Total Credits 23

To inquire about these examinations, contact either the Group Testing Program, 220 Parker Hall, (573) 882-4801, or the departmental representative on testing for advanced placement. Credit for a course by examination is not available to students who have essentially covered the material of the course in college or university courses.

Departmental Examinations

Departmental examinations are limited to students with fewer than 90 credits and with no official record of previous enrollment in the course(s) in which credit is to be received.

Departmental examinations are comparable to final examinations given in the various courses offered on campus. The examinations are objective or essay formats and are prepared and graded by the faculty of the department concerned and MU Testing Services. Arrangements for departmental examinations should be made through Testing Services.
International Baccalaureate

MU recognizes the International Baccalaureate Program. Students may receive credit and/or advanced standing for proficiency on the higher-level subject examinations. No credit is granted for subsidiary-level examinations.

Additional College Course Work

MU recognizes college course work completed before high school graduation if the college attended provides an official transcript of the course work.

Freshman Placement Tests

Placement in English is based on ACT score in English. Math placement is based on ALEKS Exam score or prior course credit. (See mathplacement.missouri.edu for more details)

Subject Examinations

Subject examinations are limited to students with fewer than 90 credits. The subject examinations are generally accepted by most schools and colleges but may not be considered for credit in all degree programs.

Application for Degree

Students should contact their academic unit at least a full semester before they anticipate graduating to complete the appropriate steps and paperwork to apply for receiving their degree. The University does not automatically anticipate or calculate who will be degree candidates each term.

Auditing a Course (Hearer)

Students who wish to obtain knowledge from a course, but do not need or want the credit for graduation, may enroll in the course(s) as auditors/hearers.

Class Cancellation Guidelines

Refer to the MU Faculty Council on University Policy regarding class cancellation guidelines (http://facultycouncil.missouri.edu/handbook/class-cancellation.html).
Completion of a Course

A course is considered complete if the student earns a grade of A, B, C, D, F or U, and the “+” or “-” sign if appropriate, or S for the course. A course in which the student receives a grade of W, NR, or I is not considered a completed course.

- The faculty of the division concerned will determine how the grade of I in a course and a grade in a repeated course will be considered in determining a student’s academic standing. However, for financial aid purposes the grade of I is not considered a completed course and a repeated course will be counted as additional credits attempted.
- The dean of the relevant division may, after consulting with relevant faculty, waive any of the regulations governing a student’s eligibility to re-enroll. However, the Financial Aid Advisory Committee shall have authority concerning students’ satisfactory progress toward their educational objectives and eligibility to receive federal, state and institutional student financial aid.

Computer Policies (L)

Acceptable Use Policy

- Priority use of lab computing equipment is for academic rather than recreational purposes. If you are asked to relinquish use for this reason, your compliance is expected and appreciated.
- Computing at MU is a community enterprise serving academic, administrative and research needs. Please conserve resources by carefully managing your e-mail, data, web files, and printing.
- Users will respect copyright, slander, libel, anti-discrimination and other appropriate laws as well as the security and proper functioning of the campus network.
- MU is committed to privacy and will not routinely inspect the contents of your computer files.
- MU provides uncensored access to materials on the campus network or the Internet unless those materials violate federal or state laws.

For more detailed information on current acceptable use guidelines, or to report a potential violation, view MU’s Acceptable Use Policy (http://www.umsystem.edu/ums/rules/collected_rules/facilities/ch110/110.005_acceptable_use_policy).

Law School Computer Lab Polices

- Limited Access to the Law School Computer Lab - In order to use the computer lab you must be a current MU law student. Access to the computer lab is a privilege and is not transferable to non-law students. You may not let your family use the lab for any purpose.
- Computer Availability and Priority of Use - Computers in back of the lab are available during regular library service hours on a first-come, first-served basis. Computer training classes held in the front room of the lab take priority over individual use. An ADA workstation is available in Room 119 of the lab. Students who require access to this equipment in order to be able to access library resources have priority. All decisions as to the use of the computers are at the discretion of the Library Director, the Associate Director, or the Automation Librarian.
- Copyright and Licensing Restrictions - The user is responsible for observing all copyright laws. The software and documentation made available in the lab is for use only in the lab and is not to be duplicated for use elsewhere. Duplicating a copyrighted program or documentation is illegal and is an Honor Code violation. Any use of computer-assisted legal research databases (Westlaw and Lexis) is for academic purposes only. Terms of use are governed by individual subscriber agreements for each system.
- Assumption of the Risk - The MU Law Library and MU School of Law make no guarantee with respect to any equipment, programs, or other materials in the computer lab. The entire risk as to the quality and performance of the computer equipment, programs, and documentation is with the user. The lab is not responsible for loss of data due to faulty programs or equipment.
- Data Storage - Users may not store their files on the hard drives of the individual workstations or on the law school’s network. Users may not save their personal settings on individual workstations.
- Reporting Equipment Problems - Report any PC or printer problem, such as paper jams, toner replacement, backed-up print jobs, etc. to the User Support Analyst, student lab assistant, or reference office. Do not attempt to fix any lab equipment on your own. Lab supplies (paper reams, toner etc.) are to be handled by staff only.
- Food, Drink and Tobacco are not allowed in the lab.
- Lab Phones and Help Desk - Lab phones are for staff use only. Public telephones are available in the student area of the subplaza.

Course Repeat Policy

The course repeat policy will not be applied automatically to a student’s GPA. After completing the second attempt of a course, a student must submit a request for GPA adjustment form to the University Registrar’s Office 125 Jesse Hall.

When the grade received in an initial attempt, for an undergraduate course at University of Missouri-Columbia, or any University of Missouri System Campus, is a “C-”, “D+”, “D”, “D-”, “F” or “WF”, the grade will be replaced in the calculation of the GPA by the grade received in any second attempt of the same course at the University of Missouri-Columbia (unless the repeat grade is an I or W). All grades received in second and subsequent attempts will be included in GPA calculations. No more than 15 semester hours will be dropped from the calculation of the student’s GPA. All attempts of a given course will appear on the official transcript with the grade(s) earned. The transcript will have an explanation that the GPA is calculated using all grades earned in a course except the initial attempt when a course has been repeated. This policy is effective with course work where the initial enrollment and completion of the course was fall semester 2000 and thereafter.

Any course being repeated may not be taken on an S/U basis. This policy does not imply a guarantee that openings will be available in courses if and when students wish to retake them, and instructors will not ordinarily know whether a student is enrolled in a course for the second time. When a course is repeated, all applicable tuition and required fees apply.

Degree credit may be earned only once for a particular course unless a department or division has, in other policies, allowed for multiple credit from that course.

Students are strongly encouraged to visit with an advisor to determine whether re-enrollment is advisable (certain department or divisional policies may be important in this connection). Further, students should...
be aware that repeating a course may have an impact on financial aid, insurance, entrance to professional schools, participation in athletics, immigration status, and other non-academic matters.

The academic status of a student in a given semester will not change as a result of repeating a course.

The policy is applicable to undergraduate students only.

Clarifying comments

Students should not re-enroll in a course for which they have been assigned a grade of "I".

Students may not apply the course repeat policy to courses once they have graduated. This also applies to students who are seeking a second undergraduate degree.

For the purposes of this policy, an undergraduate course is any course an undergraduate student attempts for undergraduate credit regardless of the course level. A student may not apply the course repeat policy to a course repeated as an undergraduate student for graduate credit.

If the department or course number has changed since the student completed the first attempt of a course, the department offering the course will verify that the subsequent course is substantially the same and the course repeat policy may apply. If the initial course is a cross-listed course, a student may apply the course repeat policy if the student subsequently completes the cross-listed course offered by the alternate department.

Courses for which a NR, W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

If the initial attempt of a course contained an attribute such as; honors, writing intensive, math reasoning proficiency, service learning, or computer proficiency, the second attempt is not required to contain the same course attribute for the purpose of the course repeat policy. Students should be aware that if the second course does not have the same attribute as the initial course they will no longer be allowed to count the initial attribute toward any graduation requirement.

Grades of C or greater may not be repeated under the course repeat policy because these grades are considered acceptable work and would not prevent a student from graduating from MU.

Students may replace the grade earned from the course at the University of Missouri-Columbia or any other University of Missouri campus with a grade earned in an equivalent course at University of Missouri-Columbia campus. Courses for which a W or a grade of I are assigned are not considered attempts since no final grade has been recorded.

Course-Load Rules (L)

The maximum number of hours permitted for a semester is seventeen (17), and seven (7) for a summer session. The minimum number of hours permitted for a semester in order to be considered a full-time student is twelve (12). There is no minimum for the summer session.

Credit for Non-Law Courses (L)

Law students are permitted to take up to a total of three (3) hours of courses for Law School credit in other schools of the University during law school. Please note that because you are listed at "primary degree program-Law" with the University, you will be charged the per credit hour rate for ANY non-law courses (NOT the undergraduate or graduate per credit hour rate). This does not apply to students officially enrolled in a dual degree program.

1. These credits are taken on an S/U basis and are subject to the following regulations:
   A. The course must be at the graduate level (numbered 7000-9999).
   B. The course must be related to the student’s study and future practice of law.
   C. The semester hours of the non-law course will be counted in the student’s total number for the semester, and the student may not (without permission) take any more than a combined total of 16 hours in a regular semester, or 7 in a Summer Session.
   D. Students wishing to take a non-law course for law credit MUST request approval of the course in writing prior to enrolling in the course. The request should be given to the Associate Dean and include the following (using a form available in Room 203):
      i. Course name, number and instructor;
      ii. Statement of purpose for taking the course as related to (b) above.
   E. e. Requests for the approval of below 7000-Level non-law courses within the guidelines given above must be referred to the Standards Committee. The Associate Dean may approve 7000-9999 level courses.
   F. Any petition for law school credit for non-law courses beyond a cumulative maximum total of three (3) hours, other than the Accounting for Managers 7310, must have approval in advance by the Faculty.

Degrees, Diplomas and Certificates

The process for awarding Degrees, Diplomas and Certificates at the University of Missouri is governed by the Faculty Council. For a full listing of this process please see Article IX of the Faculty Handbook (http://facultycouncil.missouri.edu/handbook/article-9.html).

Disability Accommodations (L)

It is the policy and practice of the University of Missouri School of Law to comply with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. No individual shall be discriminated against by the University of Missouri School of Law because of a disability, nor shall any qualified individual with a disability be denied access to or participation in Law School services, programs, or activities because of the disability. The School of Law is committed to providing reasonable accommodations for individuals with disabilities, though the School is not required to make accommodations that are unduly burdensome or that fundamentally alter the nature of the program.

Students who have been accepted for admission are advised in their acceptance letter to contact the Associate Dean as soon as possible regarding disabilities that might require accommodation. Continuing students who believe they have acquired or developed a disability should also contact the Associate Dean as soon as possible. Early identification of disabilities is necessary to allow adequate time to...
evaluate documentation and to coordinate accommodations required. The accommodation process takes some time, so the Law School may be unable to grant last-minute requests for accommodation.

**Accommodation Process**

To accommodate students with disabilities, the School of Law and the Office of Disability Services have arranged the following accommodation process:

1. A student who believes he/she has a disability that requires any accommodation should notify the Associate Dean.
2. The Associate Dean will then refer that student to the Office of Disability Services, located in Room A038 of Brady Commons.
3. The Director of the Office of Disability Services will meet with the student, request medical records and other information from the student, and make a recommendation to the Associate Dean about what, if any, accommodations seem appropriate. Please note that the Office of Disability Services must first receive all necessary medical documentation from the student.
4. The Associate Dean and the Director of Disability Services will then decide what accommodations to provide, if any, in light of the student's medical information and the student's course schedule, exams, and/or graded exercises.
5. In the event the Director of Disability Services and the Associate Dean disagree about what accommodations are appropriate, the Associate Dean's determination will govern.
6. The Associate Dean will then provide the student with a letter identifying the accommodations the Law School will provide. At that time, the Associate Dean will ask the student to indicate his/her acceptance of the accommodations in writing.
7. The Law School and the Office of Disability Services will work in conjunction to coordinate the accommodations. Any problems that arise should be brought to the attention of the Associate Dean and/or the Office of Disability Services.

**Academic Dismissal and Readmission**

If a student who is academically dismissed raises a previously undisclosed disability as a basis for academic difficulty, the burden will be on the student to explain why the disability was not previously brought to the attention of the administration, to explain why accommodations were not requested or why those provided were not adequate, and to demonstrate that the disability was the cause of the dismissal.

Readmission requests should be directed to the Associate Dean. The Associate Dean will forward the request to the Law School's Standards & Readmissions Committee which acts on the requests. For further information on the readmission process, please see the Student Handbook.

**Bar Examination**

Law students with disabilities who believe they will require accommodations in taking the bar examination should inquire early in their legal education as to what will be necessary to obtain accommodations. Information on how to contact bar examiners in all states is available from the Office of Career Services. Many state boards of bar examiners will request that the law school provide information on accommodations provided during law school upon a written release from the student.

**Career Services**

The Office of Career Services provides assistance to all students and does not discriminate on the basis of disability. Students who believe that an employer working through Career Services has discriminated on the basis of disability should bring their concerns to the attention of the Director of Career Services.

**Grievances**

If a student who requests accommodations from the School of Law believes that he/she has been discriminated against on the basis of his/her disability, the student should bring this matter to the attention of the Associate Dean. The Associate Dean and the Office of Disability Services will attempt to resolve the matter and will communicate their decision to the student. If the student is dissatisfied with the decision, the student may file a grievance with the ADA Coordinator. Grievances filed with the ADA Coordinator must be in writing and must be filed within two weeks of the date the Associate Dean communicated the decision to the student.

**Confidentiality**

Information related to a student's disability is treated as confidential information under applicable federal, state, and university laws.

**Dismissal**

A dean may at any time, and following such procedures as are reasonable, dismiss a student from a class or from a school or college for failure to perform academic duties.

In addition, the director of the Student Health Center (http://studenthealth.missouri.edu) has the authority to exclude a student from classes and other University exercises and activities because of exposure to a communicable or contagious disease, or to require a student to withdraw from the University at any time if the student has a medical condition constituting a hazard to themselves, other students or the campus community.

Adapted from the Faculty Handbook. (http://faculty.missouri.edu/handbook/article-3.html)

**Dismissal and Probation (L)**

A. Rules for Dismissal and Probation

1. For purposes of this section (Policies & Rules – Dismissal and Probation)
   a. "First year" consists of that series of semesters or summer sessions, or both, at the end of which a student first receives grades in courses aggregating to not less than 24 hours.
   b. "Semester" means either the fall or spring semester.
      The summer session is considered to be part of the next succeeding semester for the purpose of computing semester grade point averages.
2. A student is dismissed:
   a. at the end of the student's
      1. first semester if the student's cumulative grade point average is equal to or less than 76.399; or
      2. second semester if the student's grade point average for that semester is equal to or less than 76.399
3. A student is placed or continued on probation:
   a. at the end of the student’s first year if the student’s cumulative grade point average is greater than 76.399; or
   b. at the end of any semester after the student’s first year if the student’s grade point average for that semester is equal to or less than 76.399; or
   c. at the end of any semester during which the student has been on probation if the student’s grade point average for that semester is equal to or less than 77.499; or
   d. at the end of any semester during which the student has been on probation if the student’s grade point average for that semester is
      1. not sufficient to raise his or her cumulative grade point average to an average greater that 77.499 if continued in future semesters until the remaining requirements for graduation have been satisfied; or
      2. is less than the semester or cumulative grade point average which was imposed upon the student as a condition of probation or readmission;
   e. at the end of any semester prior to the completion of the student’s first year if
      1. the student has received grades in at least two sessions and
      2. has received grades in at least 12 hours of coursework; and
      3. has a cumulative grade point average of equal to or less than 76.399;
   f. at the end of that semester where the student has a cumulative grade point average equal to or less than 77.499 after completing 89 or more hours of course work.

4. Any first year student who does not achieve a grade point average greater than 77.499 in the fall semester will be required to take the course in Legal Reasoning during the second semester. Students who are required to take the course in Legal Reasoning under this provision will drop one of their courses. The course to be dropped will be decided in consultation with the Associate Dean for Academic Affairs.

5. A student ceases to be on probation at the end of a semester when the student’s cumulative grade point average and grade point average for that semester are both greater than 77.499

6. After the first semester of the first year, a student is in "good standing" at the School of Law if the student’s cumulative GPA is greater than 76.399. Thereafter, a student is in good standing when both the student’s current semester and overall GPA are greater than 77.499.

B. Rights of Students Petitioning for Readmission

Students who petition the Law School for readmission following academic dismissal have the following rights:

1. Fair notice of the time and place of the meeting.
2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee’s recommendation or decision, or the Faculty’s decision.

C. Readmission Procedures

1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2.a.1
   a. A student dismissed at the end of the student’s first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student’s dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Faculty Readmissions Committee may require reenrolled students or students on probation to drop one or more of their courses.
   b. A student dismissed at the end of the student’s first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show that the applicant’s academic performance was the result of facts other than intellectual inability to perform satisfactory law school work and that these factors will not continue to impair the applicant’s performance in the future. If the Faculty Readmissions Committee denies readmission for the spring semester, or if the student requests readmission as of the next fall semester, the student shall be reenrolled for the following fall semester subject to the same conditions described in paragraph C.1.a above, or under such conditions as the Readmissions Committee may determine. If the student is reenrolled for the spring semester, the student will be subject to the dismissal rules under paragraph A.2.a.2 and A.2.a.3 above, but shall not be subject to dismissal under paragraph A.2.c or A.2.d above.

2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee’s recommendation or decision, or the Faculty’s decision.

C. Readmission Procedures

1. Readmission Procedures for students dismissed at the end of the first semester under Rule 2.a.1
   a. A student dismissed at the end of the student’s first semester whose grade point average for the first semester is equal to or less than 75.299 will not be permitted to attend law school for the succeeding spring semester. Such student will be permitted to enroll for the next fall semester provided the student gives notice of his or her intention to enroll by April 15 of the semester following the student’s dismissal. A student so re-enrolling will retake all the first year courses, and will be required to obtain a grade point average greater than 77.499 for the repeated semester. If the student fails to obtain this grade point average, the student will be dismissed. At its discretion, the Faculty Readmissions Committee may require reenrolled students or students on probation to drop one or more of their courses.
   b. A student dismissed at the end of the student’s first semester whose grade point average is greater than 75.299 and equal to or less than 76.399 may apply for readmission for the spring semester. Such student may attend classes unless he or she has filed a written petition for readmission within the time limits indicated in the letter of dismissal issued by the School of Law. To qualify for readmission, an applicant for readmission must show that the applicant’s academic performance was the result of facts other than intellectual inability to perform satisfactory law school work and that these factors will not continue to impair the applicant’s performance in the future. If the Faculty Readmissions Committee denies readmission for the spring semester, or if the student requests readmission as of the next fall semester, the student shall be reenrolled for the following fall semester subject to the same conditions described in paragraph C.1.a above, or under such conditions as the Readmissions Committee may determine. If the student is reenrolled for the spring semester, the student will be subject to the dismissal rules under paragraph A.2.a.2 and A.2.a.3 above, but shall not be subject to dismissal under paragraph A.2.c or A.2.d above.

2. To submit any supporting written material to the Faculty Readmissions Committee and/or to the Faculty at large in advance of the meeting, or to present such material at the meeting.
3. To appear personally at the meeting and make a presentation of reasonable duration.
4. To be accompanied by a person of their own choosing.
5. To be informed promptly following the meeting of the Committee’s recommendation or decision, or the Faculty’s decision.
2. Readmission Procedures for students dismissed at any time after the first semester

   a. A student who has been dismissed may not attend classes unless the student has filed a written petition within the time limits indicated in the letter of dismissal issued by the School of Law.

   b. To qualify for readmission, an applicant for readmission must show: (1) that the applicant’s poor academic performance was the result of facts other than intellectual inability to perform satisfactory law school work; (2) that these factors will not continue to impair the applicant’s performance in the future; and (3) that there is reasonable probability that the applicant’s grade point average can be raised to the graduation level by the time 89 credits have been accumulated.

   c. A petition for readmission by a student who has been dismissed shall be heard by the Faculty Readmissions Committee. A quorum of the Faculty Readmissions Committee, for purposes of deciding petitions for readmission, shall consist of one less than all voting members. If the Committee’s decision is favorable for readmission, or is unanimous against readmission, that decision shall be final and the student shall have no right of appeal to the faculty at large. If the Committee’s decision is unfavorable against readmission, but not unanimous, the petition shall be referred to the faculty at large for decision.

   d. A student who petitions for readmission has the right to appear personally before the Faculty Readmissions Committee and, if allowed under these rules, the Faculty at large. The student may be summoned to appear before either group by making a personal appearance or by supplying answers to written questions. (See above for a full statement of rights of petitioners.)

   e. A student who has been dismissed for scholastic reasons and whose readmission is approved will be on probation and subject to such conditions as may be imposed. The conditions below will apply unless varied by the Faculty or Faculty Readmissions Committee.

   f. It is the policy of the Faculty Readmissions Committee to make decisions on readmission prior to the end of the summer term for those students who are dismissed at the end of the spring semester and who may be enrolled in the summer term. Therefore, the readmission decision will not be delayed until summer grades are received.

D. Standard Conditions for Law Students Readmitted after Scholastic Dismissal, and for Law Students on Probation

Students who are readmitted or are on probation are subject to the following conditions as well as any specific conditions stated in the readmission action:

   a. They will continue on academic probation until achieving academic good standing, which requires a cumulative grade point average greater than 77.499.

   b. Students placed on probation at the end of the Fall semester of their first year will be required to take the course in Legal Reasoning (5090) ([http://www.law.missouri.edu/academics/curriculum.html#5090](http://www.law.missouri.edu/academics/curriculum.html#5090)) during the second semester. At its discretion, the Faculty Readmissions Committee may require such students to drop one or more of their courses.

   c. Until such time as they achieve a cumulative grade point average greater than 77.499, they must maintain a semester grade point average as set out in the readmission action. If no semester grade point average was specified, the student must maintain a semester grade point average sufficient to raise the student’s grade point average to a cumulative grade point average greater than 77.499 by the time the other requirements for graduation are completed.

   d. Their schedule of courses must be approved by the Associate Dean for Academic Affairs, and the dropping of any course during the semester must also be approved by the Associate Dean for Academic Affairs. In general, students will be required to take required courses before electives and take graded courses rather than pass-fail courses.

   e. During any session in which they are enrolled, they will not engage in any employment for compensation or spend a substantial amount of time on extra-curricular activities without the prior written approval of the Associate Dean for Academic Affairs. "Substantial amount of time on extra-curricular activities" is interpreted by the Standards and Readmissions committee to include participation in any internal or external competition sponsored by the Board of Advocates as well as any position of leadership on any student board or organization.

   f. Unless exempted by the Faculty Readmissions Committee, they are not allowed to take the following courses:

      * Externship
      * Independent Research
      * Courses taught outside Law School for Law School credit (e.g. graduate courses)
      * Courses taught by adjuncts
      * Seminars, except students classified as third-year students
      * Participate in any Study-Abroad Programs
      * Clinics or Clinic related courses including (Criminal Clinic, Clinical Skills, Family Violence Clinic, Innocence Project Legislative Practicum, Landlord/Tenant Practicum)

Drug and Alcohol Policy

Drug Free Schools & Community Act

Pursuant to the Drug-Free Schools and Communities Act Amendments of 1989, the University of Missouri is required to establish a drug and alcohol prevention program for its students and employees. Following is a description of the University of Missouri-Columbia’s program. A biennial review of this program will be done to determine its effectiveness, to implement changes to the program if they are needed and to ensure that the University’s disciplinary sanctions are consistently enforced.

A reference listing of MU resources for alcohol and other drug educational prevention efforts, counseling, and referral are listed below. Please feel free to contact any of the offices listed for more information.

Standards of conduct

University of Missouri-Columbia regulations prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs by University students and their guests and for employees on University-
owned or controlled property and at University-sponsored or supervised activities.

**University Discipline**

Violation of these University regulations can result in disciplinary action up to and including expulsion for students and discharge for employees.

**Legal sanctions**

Local, state and federal laws also prohibit the unlawful possession, use, distribution, and sale of alcohol and illicit drugs. Criminal penalties for violation of such laws range from fines up to $20,000 to imprisonment for terms up to and including life.

**Health risks**

Specific serious health risks are associated with the use of alcohol and illicit drugs. Some of the major risks are listed below. For more information contact the Wellness Resource Center in G202 MU student Center or at www.wellness.missouri.edu.

### Alcohol and Other Depressants (barbiturates, sedatives, and tranquilizers)

Addiction; accidents as a result of impaired ability and judgment; overdose when used with other depressants; damage to a developing fetus; heart and liver damage.

### Marijuana

Impair short-term memory, thinking, and physical coordinations. Can cause panic reaction and increase the risk of lung cancer and emphysema. Can interfere with judgment, attention, span concentration, and overall intellectual performance. Impairs driving ability. May cause psychological dependence and compromise the immune system.

### Cocaine

Addiction, cardiovascular system damage including heart attack, brain damage, seizures, lung damage, severe depression, paranoia, psychosis. Similar risks are associated with other stimulants, such as speed and uppers.

### Nicotine

Tobacco smoke contains thousands of chemical compounds, many of which are known to cause cancer. Nicotine, which is a central nervous system stimulant, produces and increase in heart and respiration rates, blood pressure, adrenaline production and metabolism. People can rapidly become physically and psychologically dependent on tobacco. Compromises the immune system.

### Inhalants

Inhalants are a diverse group of chemicals that easily evaporate and can cause intoxication when their vapors are inhaled. Most inhalants are central nervous system depressants. Use of these drugs slows down many body functions. High doses can cause severe breathing failure and sudden death. Chronic abuse of some of these chemicals can lead to irreversible liver damage and other health problems.

**Resources**

A variety of resources exist for alcohol and other drug prevention education, counseling and referral. For detailed information concerning these resources available from the University and community agencies, students may contact the Wellness resource Center (http://wellness.missouri.edu), G202 MU Student Center, 882-4634 and/or the Counseling Center (http://counseling.missouri.edu/student-services), 220 Parker Hall, 882-6601 and employees may contact the Employee Assistance Program (http://counseling.missouri.edu/employee-assistance-program), 205 Parker Hall, 882-6701. Such referrals will respect individual confidentiality.

**Wellness Resource Center -- Campus Alcohol and Drug Abuse Office**

Alcohol and other drug abuse prevention programs, speakers, peer educators, and referral services and research. Provides leadership in the planning and coordination of Alcohol Responsibility Month, Wellness Month, Safe Springs Break and etc. Provides educational brochures and other printed materials and houses a large resource library of books, brochures, videos and other materials on a variety of wellness issues including alcohol and other drugs of wellness. Provides BASICS (Brief Alcohol Screening Intervention for College Students) workshops and individual assessments for students caught in violation of alcohol or drug policies or individual sessions for students who would like their alcohol or drug use evaluated.

- **Counseling Center** (http://counseling.missouri.edu)
  Individual counseling, group counseling and alcohol or drug evaluations.

- **Student Health Center** (http://studenthealth.missouri.edu)
  Offers medical services and individual consultation, presentations to campus groups, printed materials, peer educators on sexual health related issues and stop smoking, individual and group consultation.

- **University Police crime prevention unit** (http://www.mupolice.com/cp)
  Provides presentations on the legal aspects of alcohol and other drugs as well as other related issues. 5 General Services Bldg.

- **Total Person Program** (http://www.mutigers.com/sports/acad/miss-acad-body.html)
  Services for intercollegiate athletes include counseling, drug and alcohol abuse education and other wellness related issues.

**GAMMA (Greeks Advocating the Mature Management of Alcohol)**

Greek student organization that provides alcohol awareness programs for fraternity and sorority members.

### Dual Enrollment

#### Dual Enrollment for Senior Undergraduates

Beginning Fall 2012, qualified undergraduate students will be eligible to enroll in up to 12 hours of graduate credit during the last 30 hours of their undergraduate program. The eligibility requirements are listed below.

**Eligibility Requirement**

With the approval of the undergraduate advisor, the undergraduate divisional dean, the Director of Graduate Studies, and the Graduate Dean, eligible seniors may dually enroll as an undergraduate for up to 12 semester hours of graduate credit. To qualify, seniors must:

1. Rank in the upper half of their class.
2. Have a B average in the most recent 45 semester hours of credit.
3. Be within 30 hours of completing graduation requirements for the first bachelor’s degree.
Note: Graduate degree programs may establish their own policies with regard to enrollment in and the applicability of senior dual enrollment credits.

Dual enrollment forms (http://gradschool.missouri.edu/forms-downloads/repository/dual-enrollment.pdf) (PDF) must be completed and approved by the Graduate School prior to registering for the graduate level courses.

This program is also available to juniors in other Missouri colleges. Additional information may be obtained from the Graduate School.

Undergraduate/Law Enrollment (90-Credit Program)

With prior written approval, select undergraduate MU Arts and Science students may have up to 30 credits in courses from the School of Law, which are acceptable to the faculty of the College of Arts and Science, applied toward a Bachelor of Arts degree. This combined curriculum enables students to obtain both the Bachelor of Arts (BA) and the Juris Doctor (JD) degrees in six years.

Other university divisions, and some colleges and universities other than MU, accept the Juris Doctorate in lieu of the fourth year of college and award a baccalaureate degree upon graduation from MU’s Law School. Students interested in this program should check with the dean of their college early in their undergraduate careers to ensure compliance with all requirements.

The undergraduate degree is a requirement for the Juris Doctor degree. Students entering law school under this combined degree program must make arrangements with their undergraduate schools to complete all requirements for their undergraduate degree.

Students with Bright Flight or MU awarded scholarships, such as Curators, Excellence, and Diversity, may use these awards in the law school. Check with the Office of Financial Aid.

Please note: While not a problem in the state of Missouri, prior to participating in the 90-credit program, students should determine whether participation would adversely affect admission to the bar in the jurisdiction in which they expect to practice. Some states will not admit to the bar with fewer than 14 semesters of university work or who did not have their bachelor’s degree before entering law school.

Enrollment Requirements (G)

Enrollment Requirements for Master’s and Educational Specialist Degree Candidates

After completing courses, students expecting to take examinations, present a thesis, manuscript, project, or portfolio must be enrolled when that activity occurs. If a master’s and educational specialist candidate only needs to take exams or defend a thesis or project, the candidate can enroll for “Graduate Examination” hours in myZou. Registration in the “Graduate Examination” does not count toward enrollment certification. Students enrolled in the “Graduate Examination” would not be considered full-time or part-time. If students need to use the library or computers on campus, they should enroll in at least one hour of regular credit hour instead of “Graduate Examination”.

Enrollment Requirements for Doctoral Candidates

Candidacy for a doctoral degree is established by passing the comprehensive examination. Status as a continuous enrollment doctoral student begins the term after the term in which the comprehensive exam was successfully completed.

Important Note on Continuous Enrollment Status and Financial Aid

Students with financial aid should check with the Student Financial Aid office before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student’s financial aid status.

Important Note for International Students on Continuous Enrollment and Your Visa Status

International students must check with the International Center before registering for the Graduate Examination option. Failure to do so could cause serious consequences for the student’s visa status.

Examinations (U)

Evening examinations

If a conflict arises between a group evening examination and a regularly scheduled class, the regularly scheduled class has priority. The instructor giving the group evening examination is responsible for scheduling a makeup examination at a mutually convenient time for both the student and the instructor.

Classes, Exams and Finals

For the schedule of evening exams and finals week schedule, refer to the Class, Exams and Finals (http://registrar.missouri.edu/classes-exams) on the University Registrar’s website.

Credits by Examination

Examinations (L)

Exams on Computer

The following policy applies to student use of computers in taking examinations that (1) are administered during business hours within the law school building and (2) restrict student access to some reference materials during the writing of the examination. It therefore does not apply to “take-home” examinations (since it is impossible for the Law school to provide staff support for the examination software in that environment), nor to examinations taken within the building with no restrictions on the use of reference material (since the examination software is not needed in that situation). With respect to examinations that do not fall within the present policy, individual faculty members may establish their own reasonable policies for use of computers. Any such policy should be announced to students and support staff early in the term.
Laptop Computer Requirements

In order to participate in exams on computers, you must meet the following requirements:

System and Hardware Requirements

The following requirements are specifically for laptops used to take exams:

1. 10 MB free hard disk space
2. 800 x 600 screen resolution (minimum)
3. All laptop computers must have a supported internal or PCMCIA Wireless Network card configured for the university’s wireless network including current WEP key. The network card must be in current working order and configured correctly.
4. All laptop computers must have an available and functioning USB port. The USB port will be used ONLY in the event that an exam cannot be sent electronically. The law school will provide a USB flash drive in the event that an exam cannot be sent electronically.
5. All laptop computers must have a fully charged battery. A second fully charged battery is also recommended. NO AC POWER ADAPTERS WILL BE ALLOWED TO ANY STUDENT DURING THE EXAM. While “external” batteries may be permitted, the power source which recharges the laptop’s internal battery or supplies external power shall be originally designed to operate a laptop computer substantially similar to the laptop it is proposed to now support. For example… automotive, marine, motorcycle batteries, or UPS units for power outages and the like ARE NOT acceptable power sources. Exam proctors and MUT IT staff are ultimately responsible for accepting or rejecting any “external” battery use during an exam and may reject any such use for perceived safety concerns.

Recommended system requirements for individual laptop computers may be viewed at the following URL: http://law.missouri.edu/library/technology/recommendations.html.

Currently Supported Operating Systems

Windows Vista (32 & 64 bit)
Windows 7 (32 & 64 bit)
Windows 8 (32 & 64 bit)
Mac OS X 10.5 (Leopard)
Mac OS X 10.6 (Snow Leopard)
Mac OS X 10.7 (Lion)
Mac OS X 10.8 (Mountain Lion)

NOT supported…
Any Windows version prior to Windows Vista
Mac OS X 10.4 and prior operating systems
Any flavors of Linux or Unix
Any pirated versions of any operating system

NOT allowed...
Bootcamp
Parallels
PC or Mac emulators

View the most recent list of Exam4 supported and non-supported operated systems.

Software Requirements

Students are required to have the most current version of the Exam4 software downloaded and installed successfully on their laptops prior to taking the exam. Students arriving on the day of an exam without the current software downloaded and installed will not be able to use their laptops for the exam and must complete the exam using a blue-book.

- Each exam cycle there is an updated version of the Exam4 software created for the MU School of Law. Thus, even if you have previously taken exams with Exam4, you will need to download the updated version of the software for the current semester. Thus, if you took a mid-term examination, you will need to download another version of Exam4 for finals for that semester. Similarly, if you downloaded Exam4 for Fall exams, you need to download a new version for mid-terms or finals for the Winter semester or Summer School.

- Notifications and specific instructions will be emailed to your university email account when the new version of Exam4 is available for each exam cycle.

Laptop Computer Use Policy

1. Use of computers to write an examination must be authorized by the individual faculty member teaching each course. Depending on the number of students in a course, exams on computer may not be offered. A faculty member may authorize computer use for all, part, or none of an examination. Faculty members should announce to students, early in the term, whether computer use will be permitted on the examination(s) in each course.

To offer exams on computer, it must be feasible for the law school to do so. As a result, there must be sufficient student interest in exams on computer to allow such use. Accordingly, the following guidelines may be used:

- a. In classes with less than 15 students, all students must opt in for an exam to be offered on computer.
- b. Where the class size is 15 or more, but less than 25, no determination can be made until AFTER students make their selection about exams on computer. When those numbers are known, the law school will then determine if there are enough students wishing to take the exam on computer to make it feasible to offer the exam.
- c. For classes with 25 students or more, at least 25% of the students must elect to take the exam on computer for it to be feasible to be so offered.
- d. These guidelines are just that: guidelines, and will be viewed as such.

2. No student will be required to use a computer for an examination. Whether an examination is offered on computer is subject to paragraph 1.

3. All students who use computers to write their examinations will be required to use the software approved by the Law school (Exam4) and follow the procedures established by the law school. Individual faculty members may impose supplemental procedures for examinations in their courses that are not inconsistent with those established by the School of Law.

4. AC power outlets WILL NOT be provided to any student taking an exam on computer and MAY NOT BE USED during the taking of an exam on computer. Students who use computers will be expected to furnish their own computers with a fully charged battery. An additional laptop battery (also fully charged) is highly recommended. NO AC POWER ADAPTERS WILL BE ALLOWED TO ANY STUDENT DURING THE EXAM. While “external” batteries may be permitted, the power source which recharges the laptop’s internal battery or supplies external power shall be originally
Pre-Exam Procedures

The individual instructors determine which classes will be available for exams on computers. Notice of those classes using computers will be published on this site.

- Carefully again review the Requirements and Policies contained on this page.
- Download the appropriate and current version of the exam software. A new version of the exam software will be available a few weeks before each exam period. At that time you will be notified via email, and directions will be posted in the News section of this page.
- You must download a new version of the software for each exam cycle. For example, the Exam4 software you download for mid-term exams CANNOT be used for finals in the same semester. Likewise, downloading for Fall finals will not suffice for Winter exams. Availability of the software for download will be announced on this site.
- Take and submit a practice exam (required). You MUST use your Pawprint as your Exam ID in order to receive email confirmation that your exam was successfully submitted. If you do not receive such a confirmation within 48 hours of submitting your exam, please contact the UMC Law Help Desk at 884-7800, or . PLEASE NOTE: The confirmation will be different from the Pop-Up screen that comes up immediately after you submit your exam. That Pop-Up screen will ONLY indicate that the exam has left your computer. It will NOT indicate your exam has been received. It is ONLY when you receive confirmation from the UMC Law Help Desk that we are sure you are communicating with us. YOU MUST submit a practice exam EACH SEMESTER and for Midterm exams. The practice exam MUST be submitted after students are advised that the current version of Exam 4 is available. Again, you MUST use your Pawprint as your Exam ID in order to receive email confirmation that your exam was successfully submitted.
- Attend a training session for taking exams on computer (optional). Times and dates for training sessions will be posted in the News section of this page.
- Submit a Notice of Intent to Take Exams on Computer by the published deadline. Failure to submit the notice by the deadline will result in inability to take exams on computers. There are absolutely no exceptions to this requirement. YOU MUST submit a separate Notice of Intent EACH SEMESTER. The Notice of Intent MUST be submitted after students are advised that the current version of Exam 4 is available.
- Monitor this site for announcements and deadlines.

Exam Day Procedures

Bring your laptop, fully charged battery (and backup battery) and wireless network card (if not internal) to the appropriate exam room. If you normally use an external keyboard and/or mouse, be sure to bring those as well. Arrive at least 15 minutes prior to the beginning of the exam. In the exam room, you will be provided with a blue-book for the exam, exam questions, pencils, and scrap paper. The proctor in your exam room will guide you through the following procedures -- you should practice them on your own prior to exam day:

1. Turn on your laptop, and start the Exam4 software
2. From the Exam4 software menu pick: Prepare to start a new exam
3. Pick the Next button
4. Enter your Exam ID from your blue-book twice in the fields shown
5. From the pull down menu select the exam that you will be taking.
6. From the pull down menu select the exam that you will be taking (again). The 2 selections must match or you will receive an error.
7. Pick the Next button
8. If you would like the set the optional timer and alerts do so. NOTE: The proctor will keep official exam time
9. Pick the Next button
10. Read the Notice of Instructions. Check to see that your computer’s date and time are correct. If not, correct them per the instructions. Additionally, read the information for disabling your computer’s hibernation and sleep settings and make the corrections necessary.
11. When you have read the Notice of Instruction, check the box labeled Got it?
12. Pick the Next button
13. On the Exam Mode screen type in CLOSED and then place a check in the confirmation box.
14. Pick the Next button

University of Missouri 670
15. Review the next screen to make sure that your Exam ID and Course are correct. WAIT until the instructor/proctor gives you permission to begin the exam. If an exam is started before the instructor/proctor advises, an honor code violation will be issued.

16. When the instructor/proctor says to begin pick the Begin Exam button

17. The Exam4 software will perform a security scan for approximately 30-60 seconds on your computer, and will then display a basic word processor screen where you will type your answers.

18. Type your answer to question 1. When you have completed question one, insert an answer separation at the end. Go to TOOLS pull down menu, and select Insert Answer Separation.

19. Start typing the answer to question 2 and insert an answer separator, and so on.

Note the Following:
• In a computer exam room, after the proctor starts the pre-exam start-up procedure, a student who enters the exam room to take an exam on computer MAY NOT then take the exam on computer, because that person will delay the exam for other students arriving on time. The late arriving student MUST, however, remain in the computer room and will be allowed to write the exam.
• Time spent resolving computer failures will not be added to the time allowed to a student to complete an examination. However, individual faculty members will retain their traditional discretion in grading, including the making of such adjustments as they deem appropriate when grading examinations in which there has been a technical failure.
• Reasonable attempts will be made to separate those taking exams on computers from those who are writing their exams. It may not be possible to provide different rooms for both groups. During Make-up or conflicted exams, students taking exams on computers may be commingled with those who are writing exams.
• Earplugs are permitted in any exam room.
• Any attempt to disable or tamper with the security features of the examination software will be prosecuted as a violation of the honor code.
• Students who take examinations on computer will have the same length of time to take the examination as those who hand write their examination.

In Case of Problems
If your computer freezes during the examination contact the proctor immediately. DO NOT reboot your computer or attempt to close or relaunch the Exam4 software. When the proctor arrives you can restart the computer and reenter the exam in the amount of time it normally takes to reboot Windows. Upon reboot, the proctor will guide you through this procedure:

1. In the Exam4 dialog box choose Select previous exam
2. Highlight the exam you were working on
3. Pick Begin Exam
4. Enter the following start code: EXAM4MULCH
5. Type a brief reason for why the exam had to be restarted (i.e. computer froze up, battery died, etc.) The proctor will note the reboot procedure and attach a log sheet to your final exam

6. The Exam4 software will perform the security scan again, and will recover your exam up to the last automatic save. Pick OK to continue the exam

7. Continue with the exam until time is called.

If you are unable to get back into an exam after a lockup, battery failure, or other event, the portion of the exam that was completed prior to the freeze will almost certainly be recoverable for grading purposes. You will need to complete the rest of the exam by hand. Students should understand that an unrecoverable technical failure is possible and in that event should be prepared to complete their examinations using blue-books. Exams will not be delayed or suspended due to computer problems. The proctor will not attempt to resolve technical computer problems, but will simply witness and log any restarting of a computer by a student. When the rest of the exam is completed you MUST take your computer to the IT staff of the law school for recovery of the typed portion of your exam. DO NOT attempt to recover the data yourself.

ANY ATTEMPT TO DISABLE OR TAMPER WITH EXAM4’S SECURITY FEATURES WILL BE CONSIDERED A VIOLATION OF THE STUDENT HONOR CODE.

COMMENCEMENT OR CONTINUATION OF AN EXAM WILL NOT BE DELAYED DUE TO A HARDWARE PROBLEM WITH YOUR LAPTOP.

Completing the Exam
When the proctor calls time you must stop typing immediately. Failure to comply will result in an honor code violation. To complete the exam process, the proctor will guide you through this procedure.

1. From the pull down menu select End Exam Now
2. Check the Confirm button
3. Pick OK, end exam
4. Select Submit Electronically. The law school WILL NOT accept submissions by floppy, USB flash drive, or cdrom unless your computer fails to send the exam electronically. (See ITEM 4 under the Laptop Computer Requirement’s Additional Requirements section of this page).
5. After you pick the submit electronically button you will receive a message indicating that your exam was successfully sent to the server, pick OK.
6. A dialog box will appear with some information regarding your exam (i.e. number of sections and words per sections, etc.). Review the information then pick OK.
7. Close the status dialog box
8. From the File and Save Options pull down menu select Exit
9. Read the Exit Exam dialog box to make sure that your exam has been successfully sent and that you are sure you want to exit the Exam4. Check the I’m Sure dialog box, then pick Exit Exam.
10. Wait for any additional information from your instructor

Post-Exam Procedure
There could still be a problem retrieving your exam from the receiving station. Do not uninstall Exam4, or attempt to tinker with any encrypted files on your computer, until after you receive your exam grades.

Full-time/Part-time Status
Undergraduate students who register for fewer than 12 hours and graduate students who register for fewer than nine hours during the fall or spring semesters will be considered as enrolled part time. Undergraduate
students may not enroll in a program part time without the express
permission of the academic advising unit of the school or college in which
the student is, or plans to be, enrolled.

• A full-time undergraduate student is enrolled in at least 12 semester
hours during the fall and spring semesters, or an equivalent number of
hours during the summer session.
• A three-quarters-time undergraduate student is enrolled in at least nine
semester hours during the fall and spring semesters, or an equivalent
number of hours during the summer session.
• A half-time undergraduate student is enrolled in at least six semester
hours during the fall and spring semesters, or an equivalent number of
hours during the summer session.

Full-time enrollment for graduate and professional students:
• Graduate student — nine hours
• Law student — 12 hours
• Medical student — 14 hours
• Veterinary medicine student — 12 hours

Grades

GPA of Record

The grade point average for any period is obtained by dividing the
quality points earned by the total number of credits for which the student
was enrolled during that period. Grades of S, U, H, W, NR, or I are not
included in determining the grade point average.

The undergraduate CUM GPA is the University of Missouri GPA,
which will include all grades, credits, and honor points attempted at
any University of Missouri campus, including all grades and credits. In
computing the undergraduate GPA the grade points assigned to students’
transfer work are the grade points that would have been assigned if the
courses had been taken on the University of Missouri System campus,
including any adjustments made under policies related to course repeats
and/or Academic Renewal/Forgiveness.

GPA Calculator Web Site

To calculate a grade point average, go to the GPA Calculator Web Site at
http://registrar.missouri.edu/grades-transcripts-records/gpa-calculator.php

Plus-Minus Grading System

The purpose of the grading system is to provide a framework in which the
faculty can report evaluation of student performance and achievement.
For undergraduates, all teachers are expected to use the grading scale
approved by the faculty. This precludes any department or unit from
opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects
and situations that allow discrimination in quality of achievement and
performance. The S/U grading system is more appropriate for students
wishing to take elective courses in a subject matter field in which they
will be competing with majors, for mastery learning situations, and for
courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/+, B+/+, C+/+, D+/+ and S. Grades
calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+
(3.3), B (3.00), B- (2.7), C+ (2.3), C (2.00), C- (1.7), D+ (1.3), D (1.00),
D- (0.7), and F (0). The grades of S, U, NR, and W are not incorporated
in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good
academic standing.

All regulations currently applicable on a course-by-course basis and
currently tied to a specific letter grade would be interpreted to mean
a specific letter grade range. Hence, if a student must achieve a C in
one course in order to proceed to another course, under the plus-minus
grading system, that student must achieve a grade in the “C range,”
which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted
to mean the numerical average currently associated with that specific
grade. Hence, the required “C average or better” on all courses is a “2.00
average or better.”

The grade of S (on S/U basis) is defined as equivalent to the letter grade
of C- or higher.

Satisfactory/Unsatisfactory Grading System

Students may elect to take courses under the S/U (pass/fail) grading
system in several MU colleges and schools. Before electing to take a
course on a pass/fail basis, the student should evaluate the advantages
and disadvantages of the S/U grading system. The S/U grading status is
indicated in the appropriate column on the registration or add/drop form.
Students may change to or from the S/U status only through the tenth
day of classes in a semester.

In general, the teacher of a course does not know which students, if any,
are enrolled on the S/U system, and a grade of A-/+; B-/+; C-/+; D-/+ or F
for each student is reported to the Office of the University Registrar.
The Office of the University Registrar staff members ascertain which students
are enrolled on the S/U system and assign a grade of U to those reported
for grades of D-/+ or F, and a grade of S for those reported A-/+; B-/+ or
C-/+.

Grades of S and U are not included in the computing of grade point
averages.

Enrollment in courses under the S/U system is subject to the following
restrictions by the University faculty:
• Students cannot change from one grading system to the other after the
tenth day of classes in the fall or spring semesters, or the equivalent
thereof in a shorter session.
• Students cannot elect to enroll in more than one course on an S/U
basis in a given semester. This excludes courses taught only with the
S/U grading system.
• First-semester freshmen and students on scholastic probation are not
eligible to enroll in courses on an S/U system. This excludes courses taught only with the
S/U grading system.
• A-/+; B-/+; and C-/+ grades are recorded on the transcript as an S.
S grades are not included in the semester or cumulative grade point
average on the transcript. Full credit is earned for courses completed
with a grade of S.
• D-/+ and F grades are recorded on the transcript as a U. U grades are
not included in the semester or cumulative grade point average on the
transcript and no academic credit is awarded for courses completed
with a grade of U.
• Courses completed with a grade of S may be accepted in an area of
concentration only with the prior approval of the area advisor.

Courses completed with a grade of S may constitute no more than 20
percent of the total credits for the baccalaureate degree.
• Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
• Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

Selecting Grading Options (S/U vs. A through F)

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students’ academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar’s website at http://registrar.missouri.edu/dates-deadlines.php for deadlines for each term.

How Dropping/Withdrawing from a Class Affects the GPA

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

Grades for Students Who Officially Withdraw from the University

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean’s signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. NOTE: Refund dates are different from withdrawal dates. (See Withdrawal from the University section on the University Registrar’s website: http://registrar.missouri.edu/policies/withdrawal-university.php.)

Grade Appeal

Guidelines for grade changes are as follows:
• Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
• If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
• The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student’s work.
• If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
• No one may substitute personal judgment for that of the instructor concerning the quality of the student’s work. However, mathematical or mechanical errors in scoring examinations may be corrected.
• No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

Incomplete Grades (Grade of I)

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting I grades to the University Registrar.

An I grade may be assigned only when:
1. The completed portion of the student’s work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of I grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:
• The name of the student
• The course number, title and credits
• Semester and year of enrollment
• A brief statement of the reason for delaying the grade
• An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an I grade must complete the course requirements either:
1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the I and record a grade of F in classes graded A-F or a grade of U in classes graded S/U. Any
Grading Scale

Graduate students' grades in all courses counting toward an advanced degree may be reported as: A, +/-, B, +/-, and C, +/-.

Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member's evaluation of student performance and/or polices of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C, and C- as passing grades; however, grades in the C range may not be acceptable for specific programmatic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student's grade point average.

S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as “graded on S/U basis only” in the online Schedule of Courses available through myZou.

Incomplete

An incomplete grade (I) may be recorded when the student's work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an “I” grade will require an accompanying letter of justification from the instructor. Although grades of “I” do not automatically convert to an “F” if not completed, academic programs or the instructor may establish conditions or regulations pertaining to “I” grades that are more stringent.

Unreported Grades: NR

When grades are not reported by the instructor, these “Blank Grades” will be recorded as “NR” (Not Recorded). The NR designation will remain on the student's transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student's record indefinitely and will not revert to an “F”.

Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member’s academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8090/9090 research (8990/9990 Research for Engineering students) is reserved for master’s and doctoral degree students working on a thesis or dissertation.

Grade Point Average

A graduate student's grade point average is based on the student's entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a
A grade point average is obtained as follows:

2. The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

- A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student’s cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year, and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student’s first, second and third years.

Course Repeat Policy

The School of Law’s Standards and Readmissions committee has adopted the following course repeat policy:

1. Students who petition the Standards Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances;
4. Students who fail a non-required course are eligible to petition the Standards Committee for permission to repeat the course. The Standards Committee may grant such petition based on exceptional circumstances.
5. Students who fail a required course are required to repeat that course, unless, in exceptional circumstances, repeating the course is waived.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

Dean’s List

A student qualifies for inclusion on the Dean’s List with a semester average greater than 85.999.

Good Standing

After the first semester of the first year, a student is in "good standing" at the School of Law if the student’s cumulative GPA is greater than 76.399. Thereafter, a student is in "good standing" at the School of Law when both the student’s current semester and overall GPA are greater than 77.499.

Grades and Grading

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.
Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and carry course credit. The grades of U and of 65 through 69 are failing grades and carry no course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean’s Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

Explanation of the Grading Scale (http://law.missouri.edu/students/pdf/gradingscale.pdf) (PDF)

Grades from myZou
Students may obtain their grades from MyZou. In addition to the student’s PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude
Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7% of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.

Any student with a graduating grade point average within the top 12% of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

Order of the Coif
The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship and whose achievements as students make them worthy of this distinction. Selections are made after sixth semester grades and rankings have been determined. To be eligible for membership in the Order of Coif students must complete 75% of their law studies in graded courses. Accordingly, transfer students generally will not be eligible for membership.

Order of the Barristers
The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

Graduate Academic Minors

Nondesignated minors
Nondesignated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student’s plan of study; however, they are not listed on a student’s transcript.

Obtaining approval for a minor
Both designated and non-designated minors must be approved by the student’s major adviser, the student’s academic program director of graduate studies, and the Graduate School.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor.

Graduate Assistants and Fellows

Graduate Assistantships
Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

Fellowships
Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

Assistantship and Fellowship Policies
The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School’s website (http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php).

Graduate Certificates
A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student’s official University of Missouri Transcript.

To accommodate a variety of learners’ needs, MU offers two types of graduate certificate programs:

- Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply to the Graduate School.
as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.

- Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

Federal Disclosure Requirements for Stand Alone Graduate Certificates “Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). Those regulations also provide that institutions must disclose to prospective students certain information about the institution’s Ge programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011.”

Source: Federal Student Aid, see http://www.ifap.ed.gov/GainfulEmploymentInfo/index.html

At the University of Missouri, the Graduate School’s Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

Certificate Admission Information

Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School’s online application for admission and meet the Graduate School’s minimum admission requirements for all programs.

Degree-Dependent Certificate Applicants

New applicants applying for a degree program should complete the Graduate School’s online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Adviser Form (pdf) should be submitted to add a graduate certificate.

Financial Aid

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Graduate School or University of Missouri.

Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as “certificate-seeking” graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program’s site for certificate policy updates.

Credit Hours Necessary for Certificate Completion

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program’s site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

Grievances (L)

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at their web page http://www.aals.org/.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312) 988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date in which the complaint is being filed; the name and address of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school’s action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

Students who have a grievance not implicating the ABA accreditation standards may file it with the Student Bar Association which has a Grievance Committee that meets periodically with the Dean or Associate Dean.
Holds

There are several types of holds, which are restrictions that may block registration. Students are notified on myZou if they have a hold. They should go to the office indicated on the individual hold to resolve the hold.

Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (http://myzou.missouri.edu).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence

The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal

Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Adviser and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate adviser and the academic program’s director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

Letters to the Graduate School Office

After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the vice provost/dean of the Graduate School. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

Resolving Financial Support Responsibilities

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their adviser or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program’s director of graduate studies and the Graduate School so that the re-entry process can be initiated.

Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student adviser to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: NOTE: Students must choose either option 1 or 2

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law’s existence and proof of its applicability to him/her. Please note: Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:

State of Iowa “Code Section 261.9(1)’g” (http://www.iowacollegeaid.gov/PostsecondaryRegistration/iowacodechapter261b.html#ComplianceRequirementshttp://www.iowacollegeaid.gov/PostsecondaryRegistration/iowacodechapter261bhtml)
Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student’s academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester.

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student’s academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester.

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

The Office of the University Registrar will require the following information:

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

Re-admission of previously enrolled students

Undergraduate students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (http://admissions.missouri.edu/apply/re-admission) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking graduate students who are returning to MU after an absence of at least two semesters must complete a graduate school re-activation form (PDF) (http://gradschool.missouri.edu/admission/former-grad/reenroll.pdf) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-6544.

View Missouri Revised Statutes Chapter 41 (41.948) (http://www.moga.mo.gov/statutes/C000-099/041000948.HTM). This policy is implemented to assure that students called to active duty prior to
the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.

**Name Changes**

Current students and alumni of the University of Missouri may change their names in the student records system for the University of Missouri during or after attendance according to the following:

1. For a student to change his/her name, legal documentation is required of the student’s new name and verification that he/she was previously known as the name in the MU records system.

   For Undergraduate students, a name change may be processed either in person, at the Office of Admissions, 230 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Office of Admissions, 230 Jesse Hall, University of Missouri, Columbia, MO 65211.

   For Graduate and Professional students, a name change may be processed either in person, at the Graduate School, 210 Jesse Hall, or through the mail provided the necessary documentation is submitted. The mailing address is: Graduate School, 210 Jesse Hall, University of Missouri, Columbia, MO 65211.

2. The student must submit a **minimum of two of the documents** listed below, one from list a. Proof of use of former name and one from list b. Proof of legal change to new name. At least one of the documents must have date of birth, a photograph, and a signature:
   
   a. Proof of use of former name
      
      i. Former government issued government ID card such as a driver’s license, military ID, passport
      
      ii. A federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the signature and photograph of the individual
      
      iii. School yearbook with photo
      
   b. Proof of legal change to new name
      
      i. Current, government-issued ID card such as a driver’s license, military ID, passport
      
      ii. Current, valid Social Security Card with new name
      
      iii. A federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
      
      iv. A certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

3. Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

**Non-Degree Graduate Study**

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment. This program is administered by the Graduate School.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit toward a graduate degree. However, if the student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

**Eligibility**

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

**International Student Eligibility**

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

**Tuition and Fees**

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

**Financial Aid**

Non-degree graduate students are not eligible to receive federal financial aid or veteran’s benefits or to hold campus-sponsored assistantships.

**How to Apply for On-Campus Non-Degree Study**

- Complete and submit the Graduate School Application (https://app.applyyourself.com/AYApplicationLogin/AY_ApplicationLogin.asp?id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf) will slow the application review process.
• Submit the application fee, (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/application-fee.php) which is $55 (US) for domestic applicants and $75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School’s online application.

• Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.

• Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study

If you are planning to take course work online or at a distance, please contact Mizzou Online (http://online.missouri.edu) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student’s cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the dean of the Graduate School. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student’s term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from “Non-Degree” to “Degree-Seeking”

Non-degree graduate students who want to earn a graduate degree (master’s, doctoral or educational specialist) must:

• Submit official scores, if required by the degree program of interest (http://gradschool.missouri.edu/academics/programs), from an appropriate graduate admission examination (GRE, GMAT, MAT). The scores must be sent directly from the examination service to Graduate School Admissions, 210 Jesse Hall, Columbia, MO 65211.

• Meet Graduate School minimum admission requirements (http://gradschool.missouri.edu/admissions/eligibility-process).

• Apply directly to the degree program of interest using a Change of Degree form (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school’s representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the vice provost for advanced studies and dean of the Graduate School to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.

Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean’s certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.

• In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.

2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.

3. Only tuition required related to a student’s assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.

4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.

Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.
Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
   a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student’s enrollment, thus changing the assessment. This provision specifically excludes conditions or chronic illnesses that remain static and are known to the student at the time of enrollment.
   b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
   c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.

3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that has ended must be submitted on a separate form to the Revision of Records Committee, c/o the Office of the University Registrar, 130 Jesse Hall.

4. Generally, grounds for consideration of an appeal will be restricted to those circumstances personally experienced by the enrolled student with whom the University has a direct relationship.

5. Decisions will be rendered by the designated official of the Office of the University Registrar and will be based solely upon any and all pertinent written documentation.

6. Notification of the status of the tuition appeal will be made in writing within 10 calendar days of receipt of the written appeal.

**Appeal of the decision rendered by the Office of the University Registrar**

1. Upon written request a student may appeal the decision rendered by the Office of the University Registrar.

2. A written appeal must be submitted to the Office of the University Registrar.

3. The written appeal must request a review of the original decision and may contain additional written documentation to support the appeal.

4. The appeal will be reviewed by the same designated official. If the appeal information is sufficient to overturn the original decision, the designated Office of the University Registrar official can direct staff to issue a tuition refund or adjustment in accordance with appropriate fiscal procedures.

If denied within 10 calendar days of receipt, the information must be forwarded to the University Registrar. If the appeal is denied a second time by the University Registrar, it may be forwarded to the vice provost for enrollment management for further consideration, upon the student’s request.

The decision rendered by the vice provost for enrollment management is the final University determination on the matter.

**Refund of tuition and fees in the event of a student death**

1. When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:
   a. Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
   b. Any other debts owed to the University that occurred prior to the death of the student.

2. Any refund will be made payable to the student.

3. If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

**Students called to active military duty**

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

**Students called to jury duty**

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

**Residency (L)**

The School of Law residence rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student’s course load -- the number of hours a student enrolls for in a given semester -- and residency rules -- are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Students who plan to attend summer school for two years and graduate a semester earlier, should visit with the Associate Dean for Academic Affairs concerning their summer course loads.

For residency purposes a minimum load of twelve hours is required for a semester. For purposes of accelerated graduation, minimum residency hours for a summer session are five if combined with another summer session of no less than seven hours. Two summer sessions of six hours
each serve the same purpose. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation but may be combined with an appropriate number of hours in a regular semester in order to fulfill a twelve hour semester residency requirement.

Students completing more than twelve hours in a semester may not use surplus hours over twelve toward residency in any other session; hence the three surplus hours from a fifteen hour semester cannot be added to a subsequent nine hour semester to give residency for two semesters. On the other hand, a nine hour semester can be combined with a three hour summer session to give residence for one semester.

In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

**Revision of Records**

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their adviser before appealing to the committee to verify that changes are warranted and will benefit the student.

**Instructions for completing petition to the committee**

Students must:

- Obtain forms from the appropriate school or college advising office and discuss their case with their adviser.
- Complete the forms, being as thorough and specific as possible. You must sign and date the petition(s).
- Leave the petition with the class instructor, who will forward it to the department chairperson. The chairperson will return it to the dean’s office, which will send it to the Office of the University Registrar. Signatures of the instructor, department chairperson and dean must be obtained before the committee will consider the petition.
- Provide specific dates if requesting to backdate a withdrawal from the University. A separate form is required for each class.
- Supply documentation or evidence to support the petition. For example, if a student has a medical justification, please supply the medical certification form. Obtain forms from the academic units.

**General guidelines**

- The committee cannot change a grade given by an instructor. If a student disagrees with a grade, they must contact their instructor and then follow the appropriate appeals process. An instructor cannot change a letter grade to “W” unless a withdrawal has been approved.
- If the committee approves a requested change and additional charges apply, payment must be made before the transcript changes.
- The committee reviews all complete petitions, and its decisions are based on the information presented. Decisions are communicated in writing to the student. If the petition is approved, a transcript reflecting any changes will be included.
- The committee cannot grant refund appeals. Students must complete a refund appeal form (PDF) (http://registrar.missouri.edu/forms/fee-adjustment-appeal-form.pdf).
- The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to Victor Price at PriceV@missouri.edu.

**Student Conduct (L)**

The academic life of students at the MU School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at http://www.law.missouri.edu/students/policies/conduct.html.

**Student Employment (L)**

In December 1998 the American Bar Association Section of Legal Education Accreditation Committee requested the Law School establish a faculty approved policy on student employment in accordance with Standard 304(c) of the ABA Standards for the Accreditation of Law Schools. At its meeting on February 16, 1999, the Faculty of Law adopted the following policy which mirrors the ABA requirement:

“The Law School shall not award full-time residence credit to a student who does not devote substantially all of the student’s working hours to the study of law or engages in employment for more than 20 hours per week, whether outside or inside the Law School.”

Further, the faculty acknowledged ABA Interpretation 304-7 which requires that:

“a law school shall demonstrate that it has adopted and enforces policies ensuring that individuals enrolled as full-time students devote substantially all working hours to the study of law including the implementation of policies relating to...limitation on employment...”

This memo serves as notice to the entire Law School community of the policy, with the expectation that it will be followed. The enforcement of this policy will be undertaken as follows:

For all law students who are employed by the School of Law in any capacity, including research assistant or other part-time student employment, the School of Law cannot process for payment time sheets which indicate more than 20 hours per week of work. Law School faculty and staff are not authorized to permit or require law student employees to work more than 20 hours per week.

The 20-hour rule does not apply to the period of time between semesters, or the summer (unless the student is enrolled full-time in law school,) or spring and fall breaks.

**Student Level**

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

<table>
<thead>
<tr>
<th>Class</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 29 credits</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 to 59 credits</td>
</tr>
</tbody>
</table>
Theses and Dissertations: Submission Deadline, Review and Public Disclosure

Formatting the Thesis

A thesis, when required for a master’s program, must be written on a subject approved by the candidate’s advisory committee. The thesis must be the student’s own work and must demonstrate a capacity for research and independent thought. Refer to the Master’s Degree section for details.

Thesis formatting guidelines may be found at http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

Formatting the Dissertation

A dissertation is required for all doctoral programs and must be written on a subject approved by the candidate’s advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate’s own work. Refer to the Doctoral Degree section for details.

Dissertation formatting guidelines may be found at http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

Substituting for Copyrighted Materials in Theses and Dissertations

The Graduate School encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Graduate School, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and therefore the better the response to the fruits of your hard work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

Acceptable substitutions include:

- Redrawing or tracing of maps, images, graphics, etc
- References to URLs, printed documents, or physical locations where the copyrighted material can be found

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have his or her adviser sign a document reading:

[Student’s name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Graduate School for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found

Adviser’s name (signature line) Date (date line)

Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master’s & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations and supplemental materials. Those deadlines may be found on the Graduate School’s page.

http://gradschool.missouri.edu/about/news-events/events/index.php

After successful defense of the thesis or dissertation, students must comply with their academic program’s and/or the International Center’s enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student will make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required format (http://gradschool.missouri.edu/policies/thesis-dissertation) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needed, the student's advisor and program's DGS must submit a request for an extension letter to the Graduate School Dean.

Submission Requirements and Forms

A thesis or dissertation must be presented before the deadline to the MU Graduate School on a high-quality CD. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/technology-ch7.php), with the appropriate margins and formatting. For the 2009-2010 academic year, the CD must be readable on a standard PC running Windows XP. Additional electronic files must be included (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/supplements-cd-ch4.php) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.
Paper Documents that Accompany the Electronic Submission

Several paper documents must be submitted with the CD, including the original signed Approval of the Committee page, paper copies of the Short Academic Abstract and Title Page, fees forms, release forms, and copyright agreement forms. See http://gradschool.missouri.edu/academics/thesis-dissertation/diss-thesis-guideline/supplemental-paper-materials/index.php for more information.

Review of Theses and Dissertations by the Graduate School

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines in addition to validity of content. In much the same manner, MU Graduate School staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

Copies of Theses and Dissertations

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the Merlin search engine. Theses and Dissertations submitted Fall 2004 and later are available electronically from the MU Graduate School’s searchable Thesis and Dissertation Archive.

Specific Questions about MU Theses or Dissertations?

Specific questions should be directed to the academic advising staff of the MU Graduate School, 210 Jesse Hall, (573) 882-9575 or (573) 882-3885 or 1-800-877-6312.

Thesis and Dissertation Research Must be Open to Public Disclosure

Students are prohibited from using research (data, results, methods or other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents. Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student’s adviser and allowed by University of Missouri policies. Questions regarding the applicability of this policy to thesis or dissertation content should be referred to the MU Graduate School.

Transfer Credit and Degree Applicability

• Transfer from a Regionally Accredited Missouri College
• Transfer from a Community College
• Transfer Within the UM System
• Military Transfer Credits
• Transfer Students and University General Education Requirements

Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

• Advanced Placement (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/advanced-placement-program.php) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.
• Dual credit (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/dual-credit.php) must be evaluated by Admissions prior to being awarded.
• All courses transferring from community colleges will transfer as lower-division credit.
• Students should check MU’s transfer course equivalencies (https://myzmou.missouri.edu/psp/prdpa/EMPLOYEE/HRMS/c/UM_SELF_SERVICE/UM_TRNSFR_EQUIV.GBL?PORTALPARAM_PTCNAV=UM_TRNSFR_EQUIV&EOPP.SCNode=HRMS&EOOP %2520Credit&EOOP.SCPTName=HCCC_TRNSFR_CREDIT&AITs_HDR_CODE=2) for detailed information on most schools in Missouri and select out-of-state institutions. Students interested in seeing how transfer courses might apply toward MU degree requirements can go online to transfer.org (https://www.transfer.org/uselect/login.htm) to enter course data, review equivalencies, and produce an unofficial degree audit.
• The Mizzou Connection Program (http://admissions.missouri.edu/apply/transfer/mizzou-connection) is available for students wishing to transfer from Moberly Area Community College of MU.
• Advanced standing credit in a foreign language awarded by previous institutions will not transfer to MU. It can be requested after you have successfully completed a course at MU at or above that level.
• Military veterans may be awarded some credit if the meet certain criteria (http://admissions.missouri.edu/documents/military-credit.pdf).

Generally, coursework completed at a regionally accredited institution and oriented toward a baccalaureate degree will be accepted if each grade is C or better. Generally, the following types of credit are exceptions that are excluded from transferable courses: Technical, vocation or remedial courses; Courses not intended for a baccalaureate degree and/or terminal vocational degree or certificate program; Courses from non-regionally accredited institutions, though there is an appeal process.

Questions should be directed to the MU Office of Admissions (http://admissions.missouri.edu).

Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board’s policy.

Transfer from a Community College

Community college courses can only have transferable equivalents at the 1000 or 2000 level. At no time can a community college course be the equivalent of a University of Missouri-Columbia course of 3000 or greater.
If a 2000 level course title from a community college is similar to a 3000 level title on this campus, that course can be an elective in that department at the 2000 level. Individual schools and colleges can waive the requirement for a student to take a course with similar or same title on this campus, however there will be no direct transfer equivalency.

If a college or department wants to accept a course from a community college as an equivalency to a course numbered 3000 or greater, they need to give that course a new number of less than 3000.

Courses from a community college can account for six of the last 36 credits, but only for students who have general education or other 1000-2000 level courses remaining for their degree. (The University is not prohibited from accepting community college credit for juniors and seniors if it is at the 1000-2000 level.)

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (http://admissions.missouri.edu/apply/transfer/credits-and-transfers.php) information from the MU Office of Admissions (http://admissions.missouri.edu).

Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student's lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division, general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

Associate of Science Degree

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

Students without Associate Degrees

Students transferring without associate degrees must meet regular MU transfer admission standards.

Transfer within the UM System

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that "Any course that leads to an undergraduate degree on any campus of the University of Missouri shall be accepted in transfer toward the same degree on each campus of the University offering said degree." Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

Military Transfer Credits

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

Transfer Students and University General Education Requirements

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University, general-education requirements and prepare for many of the more specific foundation courses required by their field of study.

Transfer Credit (L)

Credit Earned at Other Law Schools

A student may earn credits at another law school to be applied toward the JD graduation requirements of MU School of Law, on the following conditions:
a. No more than 31 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student’s grade point average.

b. The law school at which the credits are earned must be, at the time of the student’s work there, approved by the American Bar Association.

c. The Standards Committee must approve, in advance of the student’s work, the particular law school and the course of study the student will pursue there. In the case of work done in a Summer session, the approval of the Dean or Associate Dean may be substituted for that of the Standards Committee.

Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit

With approval of the Director of the LL.M. Program, students may apply to the LL.M. graduation requirements up to six (6) graduate credits of university or college courses from outside the MU School of Law. This limit includes independent study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a grade. If taken at the University of Missouri-Columbia, it must be numbered 5000 or above.
- The transfer coursework is from a regionally accredited institution in the U.S. or an overseas institution that is recognized by its country’s Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class-hours per credit (based on 50-minute class-hours).
- The course must be related to the student’s program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law school course will be counted in the student’s total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.

Normally, the Director of the LL.M. Program must approve the course in advance of the student’s work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student’s work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student’s J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

(a) Institution, course name, number, and instructor;
(b) Description how the course relates to the student’s program of study.

MU Course Work Required

MU requires that 30 of a student’s last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online. (NOTE: This policy has replaced the requirement for courses to be taken “in residence.”)

Visiting Graduate Student Program

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses. To participate in the UM System Visiting Graduate Student Program, a graduate student must be a degree-seeking graduate student and in good-standing on the home campus and host campus.

To apply for this program, a “UM System Visiting Graduate Student Application” should be completed and submitted to the home campus Graduate office for certification, at least two weeks before the beginning of the semester. The graduate student’s home campus Graduate office will review the form; if approved, the home campus Graduate office will transmit the approved form to the host campus Graduate office. The host campus will notify the student when they are eligible to register for courses.

All course fees are paid to the host campus. Graduate students should contact their home campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their home campus to determine eligibility for this program.

Important Points:

- No application fee is required for this program.
- The home campus determines maximum enrollment requirements and the transferability of courses taken at other UM campuses. At MU, all courses taken in UM Visiting Graduate Student Program will be considered “transfer courses” and are subject to MU’s graduate course transfer policies.
- Visiting UM Graduate Students are subject all host campus registration requirements and restrictions.
- To officially transfer courses from the host campus to the home campus, students must order an official transcript from the host campus and comply with the home campus’s transfer policies and processes.

Withdrawing from a Course

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as “withdrawing” from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. See Academic Policies: Grades (p. 672) for more information on withdrawing from a course.

NOTE: Students may not withdraw from all courses or their last course via myZou after the tenth day prior to the start of the semester or term. This must be done in the academic advising unit.
Withdrawal from the University

From the Term

A student who wishes to withdraw from the Term (University) must process the appropriate Term Withdraw Form (http://registrar.missouri.edu/policies/withdrawal-university.php) (PDF). Dropping all classes is considered a withdrawal from the Term (University) and must be initiated in the student's academic school or college and completed prior to the last day the class meets, by the last day to withdraw from the term or prior to completing the final in a self-paced course.

Withdrawal forms will normally be dated according to the date the request was first received with the following exception: When health or other critical circumstances constitute the reason for withdrawal, the dean may designate an earlier date to which academic rules will apply.

Withdrawal from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a statement of formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.
## Course Numbering

<table>
<thead>
<tr>
<th>Course</th>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic skills courses</td>
<td>0000-0999</td>
<td>Courses that do not count toward degree requirements—primarily used for skill development.</td>
</tr>
<tr>
<td>Freshmen-level courses</td>
<td>1000-1999</td>
<td>Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community college courses will be considered equivalent to this level.</td>
</tr>
<tr>
<td>Sophomore-level courses</td>
<td>2000-2999</td>
<td>Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>3000-3999</td>
<td>Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>4000-4999</td>
<td>Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.</td>
</tr>
<tr>
<td>Undergraduate Research courses</td>
<td>4950-4959</td>
<td>Upper-division, undergraduate research courses.</td>
</tr>
<tr>
<td>Capstone courses</td>
<td>4970-4990</td>
<td>Courses that are both capstone and departmental honors courses.</td>
</tr>
<tr>
<td>Capstone/Honor courses</td>
<td>4991</td>
<td>Used only for departmental honors courses. Include Dept. Honors in title or course description. No “H” is listed after the catalog number.</td>
</tr>
<tr>
<td>Capstone/Reading courses</td>
<td>4992</td>
<td>Multiple term duration courses based on research.</td>
</tr>
<tr>
<td>Capstone/Internship courses</td>
<td>4993</td>
<td></td>
</tr>
<tr>
<td>Capstone/Research courses</td>
<td>4994</td>
<td></td>
</tr>
<tr>
<td>Extended Research &amp; Departmental Honors course</td>
<td>4995</td>
<td></td>
</tr>
<tr>
<td>Departmental Honors courses</td>
<td>4996-4999</td>
<td></td>
</tr>
<tr>
<td>Professional-level courses</td>
<td>5000-6999</td>
<td>Professional-level courses for Law, Vet. Med and Medicine. Generally, not for undergraduate credit. May be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Beginning Graduate courses</td>
<td>7000-7999</td>
<td>Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Mid-level Graduate courses</td>
<td>8000-8999</td>
<td>Graduate-level courses intended primarily for mid-and upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Upper-level Graduate courses</td>
<td>9000-9999</td>
<td>Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May not be listed as cross-level with 4000-4999 courses.</td>
</tr>
</tbody>
</table>
“H” after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

Undergraduate Topics Courses

Final two digits represent the distribution category within the University requirements.

Guidelines for Cross-Listed and Cross-Level Courses

* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

Cross-Listed Courses must:

- Be at the same level
- Cover the same content

Cross-Listed Courses may:

- Meet different general education requirements (i.e. social science for one and humanities for another)
- Not have the exact same number, but it is preferred that they do
- Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.
- Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

- Only 4000 and 7000-level courses may be cross-level listed.
- The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.

Courses that are not cross-level may not meet in the same room at the same time or near each other are the same time so that they attempt to “get around” this rule.
Curriculum Designator Abbreviations

The abbreviations listed below are used in course descriptions. They may be called Curriculum Designators.

University Terms Defined

Below are definitions of the academic terms used throughout the catalog. Additional policy information can be found in the catalog and in the Faculty Handbook (http://facultycouncil.missouri.edu/handbook).

Academic Action: Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for additional policy information.)

Academic Plan: A primary field of specialized study also referred to as a degree program or major.

Academic Program: The academic organization to which a student applies, is admitted, and ultimately graduates. These will, in most cases, correspond to schools and colleges.

Academic Progress for Financial Aid: Students who have attempted at least 60 credits will not be making satisfactory progress for financial aid purposes if their cumulative GPA is less than 1.67.

Academic Sub-plan: An emphasis area or concentration within a specific academic plan.

Academic Unit: Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AU’s for short.

Add/Drop: The process for changing/dropping class; may require an advisor’s approval.

Applied Course: A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, and courses preparing for certain vocations.

Audit: A method of taking a course in which student receives no grade or credit. Sometimes referred to as Hearer. See Academic Policies: Auditing a Course (Hearer (p. 661)).

Basic Skills Courses: Courses for which credit does not apply to the degree to be earned. These courses may be considered remedial or preparatory for course work that follows. These courses are numbered lower than 1000.

Capstone Experience: An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

Certificate: A program of study that requires completion of a minimum of 12 credits. It is part of a degree program or may be completed in addition to a degree program. Officially approved Certificates are listed on transcripts.

Class Number: A 5-digit unique identifier for each class, for each term.

Commencement: In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

Concurrent Courses: Two or more courses that must be taken in the same term. They may or may not have inter-dependent information. Exceptions may be made with permissions.

Consent Required: Courses that require the permission of the instructor, department or division.

Co-requisite: A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with permissions.

Core Requirements: The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

Course Components: A portion or part, (i.e. subset) of a course.

Lecture/Standard: Faculty delivered instruction to multiple students often in, but not always, a classroom setting. A lecture or standard class is the primary portion of the course that is often delivered face to face, but does not have to be. It may be presented on-line or via other delivery methods. While it is usually presented in a small or large group setting led by a faculty member the course might also be very interactive and include group activities. It may be offered in a traditional lecture format, a seminar format, sections with group interaction, etc.

Discussion: A small group that meets to discuss topics introduced in a related lecture to supplement the instruction and allow for discussion.

Lab: A class or the “practice” portion of a course in which experimentation, class projects or other exercises or skills conjunction with material presented, are performed.

Individual Study: One-on-one instruction allowing for greater individualized learning and self direction. Individual study may be directed studies that are based upon an agreed upon topic between instructor and student. Titles may include but are not limited to research, problems and readings.

Lesson: Typically a musical or other performance art instruction delivered one-on-one or in a small group.

Studio: Hands-on, interactive, project-oriented instruction that is delivered one-on-one or in a small group. May apply to art, architectural studies, textile and apparel management, broadcast media, film creation, and communication instruction.

Exam-only: Graduate student enrollment required to complete the final, comprehensive examination.

Internship/Externship: Provides opportunity for students to gain experience in their field outside the classroom. Instruction is hands-on, experimental learning that may require additional research and written assignments. Titles may include, but are not limited to, preceptorships, clinical, practicums.

Field Study: Off-campus, hands-on instruction directed by a faculty member with one or more students. Typically part of science and social science, as well as some humanities instruction.

Course Attribute: Characteristic of the instructional delivery or related aspects of a course, such as “BlackBoard”, Honors, Writing Intensive, A-F grading, Study Abroad, Mizzou Online, etc.

Credit by Exam: Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include:
departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College Entrance Examination Board of Princeton, N.J. See Academic Policies: Advanced Standing - Credit By Exam. (p. 660)

Credit: One credit represents approximately three hours of a student’s time each week for one semester. This may mean one hour in lecture or standard classroom instruction, in addition to two hours spent in preparation. (Also referred to as Units.)

Cross-level Course: A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses. (They are also referred to as combined sections.)

Cross-listed Course: A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number. (They are also referred to as combined sections.)

Curriculum: An organized program of study arranged to provide integrated cultural or professional education.

Curriculum Designator (Subject Area): A specific area of instruction within an academic organization. These are the subject matter headings that appear in the Course Catalog and the Schedule of Classes.

Degree Audit Report: MU uses a degree audit system called DARS for short, which tracks degree programs. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using myZou.

Dean’s Signature: The dean’s signature is the mark of approval for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a “dean’s signature” refers to a stamped signature from the academic advising office within the academic unit. A dean’s signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean’s signature for approval of a process, students should first inquire in the academic advising office for their degree program.

Degree: A formal award or title conferred upon an individual for the completion of a program or courses of study.

Degree Component: A portion or part, (i.e. subset) of a degree requirement.

Degree Program: A primary field of specialized study also referred to as a major or academic plan.

Discipline: A branch of learning or field of study (e.g., mathematics, history or psychology).

Dual Degree: The completion of two degrees simultaneously. All requirements for both degrees must be met and at least 12 credits beyond the first degree must be successfully completed for the second. See Faculty Handbook (http://facultycouncil.missouri.edu/handbook/article-9.html).

Emphasis Area: A subarea of specialized study within a major that has been formally approved. Emphasis areas are printed on students’ transcripts.

Enrollment Dates: A specific time period in which registration is allowed for a specific upcoming term in myZou. Time period is narrowed by a specific date and time.

Enrollment Requirement: A condition the student must satisfy prior to enrolling in a course. (i.e., “Sophomore Standing, ENGLISH 1000.”) (Also referred to as requisites or prerequisites.)

General Education (University): The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. See General Education Requirements. (p. 18)

GPA of Record: The GPA stands for grade point average. A GPA of record is the official GPA. See Academic Policies: Grades. (p. 672)

Graded Course: A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a “Hearer/Auditor” is not regarded as a graded course for that student.

Grading Basis: The grading system used to assign a grade. See Academic Policies: Grades (p. 672).

Graduation: The act of having the degree(s) conferred.

Honors Course-Departmental: See Academics at MU: Course Numbering section (p. 689). Catalog number is not followed by an “H”.

Honors Course-General: A course limited to honors-eligible students. Course has been approved by Honors college for use towards Honors Certificate or University Honors. Catalog number is followed by an “H”.

Honors Eligibility: See Undergraduate/Graduate: Honors College (p. 641) for more information.

Instructional Mode: The dominant delivery method of instruction of the class content.

- Traditional: No online technology used – content is delivered in writing or orally. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- Web Facilitated: Includes face-to-face instruction. Includes those courses in which zero to 29 percent of the content is delivered online. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- Blended class instruction: Defined as having between 30 percent and 80 percent of the course content delivered online. It is sometimes called hybrid.
- On-Line: A course where most or all (80% or greater) of the content is delivered online. Typically these sections have no face-to-face meeting, but there may be some or face-to-face exams, etc.
- E-Learning (EL): A course where 100% of the content is delivered online. (May have proctored exams)

Interdisciplinary or Multidisciplinary: A course of study that combines two or more academic disciplines.

Location: An indication of where a student is taking a course for billing and informational purposes.

Lower Division: Undergraduate courses numbered less than 3000.

Major: A primary field of specialized study also referred to as a degree program or academic plan.

Minor: A secondary field of specialized study.
**Mizzou Online**: Mizzou Online partners with academic units to develop, market, and deliver programs and courses designed for distance students.

**Mizzou Online-Self Paced**: Students may enroll in self-paced, online courses year-round, (minimum six weeks, maximum nine months) and complete coursework at their own pace. Students with 60 or more approved credit hours may complete a bachelor of general studies degree online.

**Mizzou Online-Semester Based**: Semester-based courses have specific start and end dates and follow the University semester calendar. Students participate with other students and instructors in the courses and have assignment due dates and deadlines. Enrollment periods are the same as campus sections.

**myZou**: MU’s online student information system.

**Option**: A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Prerequisite**: A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with permissions.

**Readmission**: See Admissions Office (http://admissions.missouri.edu/apply/re-admission) for information on the readmission process and standards.

**Recommended course**: A course that is beneficial or preferred for the student to have taken before enrolling in a subsequent course. It is a strong suggestion, but not a requirement.

**Registration**: The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University’s computer system. This may be done through myZou.

**Repeat for Credit**: Courses that may be taken more than once for credit (e.g., music performance courses.)

**Requirement**: A course, activity or accomplishment that must be completed successfully.

**Satisfactory Progress**: The time progression in meeting the requirements of the student’s established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted
- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. See Financial Aid (http://financialaid.missouri.edu).

**Second, Undergraduate Degree**: A second undergraduate degree a student pursues after earning one degree.

**Section**: Multiple sections of the same course will be identified by different class numbers.

**Sequence of Courses**: Two or three closely related courses that must be taken in specified order.

**Service Indicators/Holds**: An indication to the student that enrollment actions may be restricted from the student. Clicking on the details of the indicator will tell the student what the restriction may be and who to contact regarding the restriction. (i.e. financial holds, probation, etc.)

**Session**: A class scheduling/enrollment control time period within an academic term.

**Student Center**: The page in myZou where a student can view a synopsis of all their information. (i.e. schedule, service indicators, enrollment dates, financial information.)

**Student Level**: Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) See Academic Policies: Student Level (p. 683).

**To-Do List**: A place in the Student Center that administrative or academic departments may place a list of things a student still must complete. (i.e. Admissions, Financial Aid)

**Track**: An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

**Upper Division**: Undergraduate courses numbered 3000-4000.

**Variable Credit(Units)**: For some courses, the student may choose the number of credits.

**Waive**: To set aside without credit certain requirements for a degree.
Course Offerings

A
• Accountancy (ACCTCY) (p. 699)
• Aerospace Studies (AERO) (p. 701)
• Agricultural Economics (AG_EC) (p. 702)
• Agricultural Education (AG_ED) (p. 706)
• Agricultural Systems Management (AG_S_M) (p. 708)
• Agriculture, Food and Natural Resources (AFNR) (p. 711)
• Anesthesiology (ANESTH) (p. 712)
• Animal Science (AN_SCI) (p. 716)
• Anthropology (ANTHRO) (p. 716)
• Arabic (ARABIC) (p. 724)
• Architectural Studies (ARCHST) (p. 725)
• Art History And Archaeology (AR_H_A) (p. 729)
• Art-Ceramics (ART_CERM) (p. 734)
• Art-Drawing (ART_DRAW) (p. 734)
• Art-Fibers (ART_FIBR) (p. 735)
• Art-General (ART_GNRL) (p. 735)
• Art-Graphic Design (ART_GRDN) (p. 737)
• Art-Painting (ART_PNT) (p. 738)
• Art-Photography (ART_PHOT) (p. 739)
• Art-Printmaking (ART_PRNT) (p. 739)
• Art-Sculpture (ART_SCUL) (p. 739)
• Astronomy (ASTRON) (p. 740)
• Athletic Training (ATHTRN) (p. 741)
• Atmospheric Science (ATM_SC) (p. 742)

W
- Women’s and Gender Studies (WGST) (p. 1166)
Accountancy (ACCTCY)

ACCTCY 2010. Introduction to Accounting. 3 Credits.
Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either Accountancy [ACCTCY] 2036 or 2037).

ACCTCY 2026. Accounting I. 3 Credits.
An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor’s approval. Credit may not be earned for both Accountancy [ACCTCY] 2026 and 2036. Course only offered through the Mizzou Online (self paced).

ACCTCY 2027. Accounting II. 3 Credits.
This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor’s approval. Credit may not be earned for both Accountancy [ACCTCY] 2027 and 2037. Prerequisite: Accountancy [ACCTCY] 2026. Course only offered through Mizzou Online (self paced).

ACCTCY 2036. Accounting I. 3 Credits.
First half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Prerequisites: sophomores standing.

ACCTCY 2037. Accounting II. 3 Credits.
Second half of two-part course focusing on the business environment and the use of managerial and financial accounting information for decision making in various business settings. Prerequisite: sophomores standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required.

ACCTCY 2136H. Honors Accounting I. 3 Credits.
First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Prerequisite: sophomores standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required.

ACCTCY 2137H. Honors Accounting II. 3 Credits.
Continuation of Accountancy [ACCTCY] 2136H. Prerequisite: C or better Accountancy [ACCTCY] 2136H. Honors eligibility required.

ACCTCY 2258. Computer-Based Data Systems. 3 Credits.
Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed. Prerequisite: Accountancy [ACCTCY] 2036 or 2136H.

ACCTCY 3326. Financial Accounting Theory and Practice I. 3 Credits.
Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets. Prerequisite: Accountancy [ACCTCY] 2037 or 2137H.

ACCTCY 3328. Accounting Information Systems. 3 Credits.

ACCTCY 3346. Financial Accounting Theory and Practice II. 3 Credits.
Continuation of Accountancy [ACCTCY] 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity. Prerequisite: Accountancy [ACCTCY] 3326.

ACCTCY 3347. Cost and Managerial Accounting. 3 Credits.
Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting. Prerequisites: Accountancy [ACCTCY] 2037 or 2137H and 2258.

ACCTCY 4000. Accountancy Professional Speakers and Symposia. 0 Credits.
This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposium delivered by accounting firms and/or professional accounting organizations. Prerequisites: Accountancy [ACCTCY] 2036, 2037, and 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course.

ACCTCY 4301. Topics in Accounting. 1-3 Credit.
Independent investigations, reports on approved topics. Prerequisites: instructor’s consent.

ACCTCY 4353. Introduction to Taxation. 3 Credits.
Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns. Prerequisite: Accountancy [ACCTCY] 2037 or 2137H. Restricted to TCoB professional program students only.

ACCTCY 4356. Financial Accounting Concepts. 3 Credits.
Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors. Prerequisite: Accountancy [ACCTCY] 2037 or 2137H.

ACCTCY 4365. Governmental Accounting and Budgeting. 3 Credits.
Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities. Prerequisite: Accountancy [ACCTCY] 3326.

ACCTCY 4373. Taxation of Business Entities. 3 Credits.
The course focuses on federal tax laws related to various business entities which include (C Corporations, Partnerships and S Corporations) and their owners. We will follow the life cycle of these business entities and discuss the tax issues involved with the formation, operation,
distribution to owners, liquidations, and sales of interest to other owners of each type of business entity. Graded on A-F only. Prerequisites: ACCTCY 4353 or ACCTCY 7353.

ACCTCY 4384. Auditing Theory and Practice I. 3 Credits.
Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits. Prerequisites: Accountancy [ACCTCY] 3328 and 3346.

ACCTCY 4940. Professional Accounting Internship. 3-6 Credit.
Provides full-time professional accounting work experience of at least eight weeks duration. Completion of first 105 hours of 150-hour accountancy curriculum (or equivalent) and consent of Internship Coordinator. Graded on S/U basis only.

ACCTCY 7000. Accountancy Professional Speakers and Symposia. 0 Credits.
This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. Prerequisites: Accountancy [ACCTCY] 2036, 2037, and 2258; Accountancy Majors. This will be a non-credit, non-billed, no hours course. Graded on S/U basis only.

ACCTCY 7310. Accounting for Managers. 3 Credits.
Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures. Prerequisites: MBA or MSPA candidate, or departmental consent.

ACCTCY 7353. Introduction to Taxation. 3 Credits.
Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns. Prerequisites: Accountancy [ACCTCY] 2037 or 2137H.

ACCTCY 7356. Financial Accounting Concepts. 3 Credits.
Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors. Prerequisite: Accountancy [ACCTCY] 2037 or 2137H or 7310.

ACCTCY 7365. Governmental Accounting and Budgeting. 3 Credits.
Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities. Prerequisite: graduate standing and Accountancy [ACCTCY] 3326.

ACCTCY 7384. Auditing Theory and Practice I. 3 Credits.
Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits. Prerequisites: graduate standing and Accountancy [ACCTCY] 3328 and 3346.

ACCTCY 7940. Professional Accounting Internship. 3-6 Credit.
Provides full-time professional accounting work experience of at least eight weeks duration. Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator. Graded on S/U basis only. Prerequisite: graduate standing.

ACCTCY 8358. Systems Analysis and Design. 3 Credits.
Modern information systems analysis and design, focusing on business process modeling. Prerequisite: Accountancy [ACCTCY] 2258. Computer Science [CMP_SC] 1061 or 1060 also recommended.

ACCTCY 8373. Taxation of Corporations and Shareholders. 3 Credits.
Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations. Prerequisite: graduate standing and Accountancy [ACCTCY] 4353 or 7353.

ACCTCY 8383. Taxation of Flow-Through Entities. 3 Credits.
This course covers formations, operations, distributions, and liquidations of partnerships and S-Corporations. Prerequisites: Accountancy [ACCTCY] 4353 or 7353. Course graded on A/F basis only. Graduate Standing required.

ACCTCY 8393. Taxation of Trust, Gifts and Estates. 3 Credits.
This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Prerequisites: Accountancy [ACCTCY] 4353/7353. Graded on A/F basis only.

ACCTCY 8401. Topics in Accounting. 1-3 Credit.
Independent investigations, reports on approved topics. Prerequisite: instructor’s consent.

ACCTCY 8404. Internal Auditing. 3 Credits.
This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only. Prerequisites: Accountancy [ACCTCY] 4384/7384. Graduate standing required.

ACCTCY 8408. Advanced Accounting Information Systems. 3 Credits.

ACCTCY 8414. Information Systems Assurance and Control. 3 Credits.
A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls. Prerequisites: Accountancy [ACCTCY] 3328, and 4384/7384.

ACCTCY 8419. International Accounting. 3 Credits.
Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards. Prerequisites: Accountancy [ACCTCY] 3346 and 3347.

ACCTCY 8423. Tax Research and Planning. 3 Credits.
Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.
Prerequisite: Accountancy [ACCTCY] 8373 (or concurrent enrollment in 8373).

ACCTCY 8424. Fraud Examination. 3 Credits.
A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant’s responsibility for fraud detection and prevention are emphasized. Prerequisite: Accountancy [ACCTCY] 4384/7384, graduate standing. Graded on A/F basis only.

ACCTCY 8425. Accounting for Governments and Other NonProfit Entities. 3 Credits.
The role of accounting information in planning, managing, and controlling nonbusiness organizations: reporting to external parties; concepts of governmental auditing. Prerequisites: Accountancy [ACCTCY] 4365/7365 or instructor’s consent.

ACCTCY 8428. Data Warehousing and Data Mining. 3 Credits.
Enterprise-wide view of data and transaction processing. Concepts and techniques of data warehousing and data mining of business-critical data. Prerequisite: Accountancy [ACCTCY] 3328 or departmental consent.

ACCTCY 8434. Applications of Auditing Concepts. 3 Credits.
Application of auditing concepts and techniques in various phases of audit engagements. Prerequisite: Accountancy [ACCTCY] 4384.

ACCTCY 8436. Financial Accounting Theory and Practice III. 3 Credits.

ACCTCY 8437. Strategic Cost Analysis. 3 Credits.
Analysis to support organizational strategy including cost management, performance evaluation, and control of responsibility centers. Prerequisites: Accountancy [ACCTCY] 3347, Mathematics [MATH] 1320 and Statistics [STAT] 3500, or the equivalent.

ACCTCY 8438. Forensic Accounting. 3 Credits.
Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Prerequisite: Accountancy [ACCTCY] 3328, 4384/7384, graduate standing. Graded on A/F basis only.

ACCTCY 8446. Application of Financial Accounting Pronouncements. 3 Credits.

ACCTCY 8448. Emerging Issues in Accounting Information Systems. 3 Credits.
Current developments in the implementation of accounting information systems. Topics may vary. Prerequisite: Accountancy [ACCTCY] 8408.

ACCTCY 8450. Accounting and Strategic Business Analysis. 3 Credits.
Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis. Prerequisites: Accountancy [ACCTCY] 3346 or equivalent and graduate standing.

ACCTCY 8453. Taxes and Business Strategies. 3 Credits.
This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs. Prerequisites: graduate standing.

ACCTCY 9090. Research in Accounting. 1-99 Credit.
Each student is under direction and guidance of an accountancy professor in writing a dissertation. Periodic seminars discuss research projects. Graded on a S/U basis only. Prerequisites: doctoral candidacy and instructor’s consent.

ACCTCY 9401. Doctoral Research Problems in Accounting. 1-3 Credit.
Independent investigations, reports on approved topics. Prerequisite: instructor’s consent and director’s consent. Restricted to Doctoral level students only.

ACCTCY 9444. Seminar in Auditing Research. 3 Credits.
The economic role of auditing; the audit process; audit reports and the consequences of auditing on financial statements; new audit directions and perspectives. Prerequisites: doctoral candidacy or instructor’s consent.

ACCTCY 9455. Seminar in Governmental and Nonprofit Accounting. 3 Credits.
Critical review of the governmental and nonprofit accounting research literature, with emphasis on auditing issues and research methods. Prerequisite: doctoral candidacy or instructor’s consent. Prerequisites: Accountancy [ACCTCY] 4384/7384 and 4365/7365.

ACCTCY 9457. Quantitative Methods in Accounting. 3 Credits.

ACCTCY 9460. Research Methods in Accounting. 3 Credits.
Application of research methods to the investigation of current accounting issues. A research paper is required. Prerequisite: doctoral candidacy or instructor’s consent.

ACCTCY 9466. Seminar in Financial Accounting Research. 3 Credits.
Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question. Prerequisite: doctoral candidacy or instructor’s consent.

ACCTCY 9467. Seminar in Behavioral Accounting Research. 3 Credits.
Critical review of the Behavioral accounting research literature with emphasis on issues and research methods. Prerequisite: doctoral candidacy and instructor’s consent.

ACCTCY 9468. Seminar in Information Systems Research. 3 Credits.
Overview of research related to advanced systems and how accounting information is processed, with emphasis on current issues and research methods. Prerequisite: doctoral candidacy or instructor’s consent.

Aerospace Studies (AERO)
AERO 1100. The Foundations of the United States Air Force. 2 Credits.
Introduces the Air Force and Air Force ROTC. Topics include professional appearance, military customs and courtesies, core values, equal opportunity and treatment, officer opportunities, group leadership problems. Applies communicative skills. Leadership lab.

AERO 1200. The Foundations of the United States Air Force. 2 Credits.
Continues the introduction to the Air Force and Air Force ROTC. Topics include Air Force origins, organizations, major commands, installations, sister services (Army and Navy), group leadership problems. Applies communicative skills. Leadership lab.

AERO 2100. The Evolution of USAF Air and Space Power. 2 Credits.
A survey course designed to facilitate the transition from Air Force ROTC cadet to Air Force ROTC officer candidate. Explores Air Force heritage, Air Force leaders and Air Power doctrine. Applies communicative skills. Leadership lab.

AERO 2200. The Evolution of USAF Air and Space Power. 2 Credits.
Continues the examination of air and space power from the Vietnam era through the present. Topics include the Vietnam War, the Persian Gulf War, and overseas contingency operations. Applies communicative skills. Leadership lab.

AERO 3100. Air Force Leadership Studies. 3 Credits.
An integrated leadership and management survey course emphasizing development of the individual as an Air Force leader. Special topics include situational leadership, principle centered leadership, corrective supervision and counseling. Leadership lab.

AERO 3200. Air Force Leadership Studies. 3 Credits.
Air Force leadership principles are examined from the foundation developed in AERO 3100. Ethical decision making, personal core values, and character development are discussed. Military evaluation systems are outlined. Leadership lab.

AERO 4100. National Security Affairs/Preparation for Active Duty. 3 Credits.
Examines the national security process, regional studies, Air Force and joint doctrine. Special topics include the military as a profession and civilian control of the military. Continued emphasis on communicative skills. Leadership lab.

AERO 4200. National Security Affairs/Preparation for Active Duty. 3 Credits.
Examines civilian control of the military, officer leadership, military justice system, and current issues affecting military professionalism. Continued refinement of communicative skills. Leadership laboratory.

Agricultural Economics (AG_EC)

AG_EC 1010. Introduction to Agribusiness Management. 1 Credit.
Management concepts and techniques. Coordination of business activity, motivation, and decision-making approaches used by industry leaders in global food chain. Unique aspects of managing enterprises in the agriculture-food sector.

AG_EC 1011. Survey of Global Agribusiness. 1 Credit.
Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.

AG_EC 1041. Applied Microeconomics. 3 Credits.
Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete Agricultural Economics [AG_EC] 1041 may not have credit for Economics [ECONOM] 1014.

AG_EC 1042. Applied Macroeconomics. 3 Credits.
Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete Agricultural Economics [AG_EC] 1042 may not have credit for Economics [ECONOM] 1015.

AG_EC 2070. Environmental Economics and Policy. 3 Credits.
(same as Environmental Studies [ENV_ST] 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels. Prerequisite: English [ENGLISH] 1000 and sophomore standing.

AG_EC 2123. Quantitative Applications in Agricultural Economics. 3 Credits.
Familiarize students with the use of calculus and other quantitative tools in developing and analyzing fundamental economic concepts. Prerequisites: Agricultural Economics [AG_EC] 1041 and Mathematics [MATH] 1400.

AG_EC 2156. Introduction to Environmental Law. 3 Credits.
Environmental issues from a legal perspective, using current controversies from both the USA and other countries. Major environmental laws dealing with water, air, noise, endangered species, waste disposal, and land use.

AG_EC 2183. The Agricultural Marketing System. 3 Credits.
Marketing systems that transforms agricultural products into food products. Examines functions and institutions in marketing and distributing food from both micro and macro perspectives. Prerequisite: AG_EC 1041, AG_EC 1042 and ENGLISH 1000.

AG_EC 2223. Agricultural Sales. 3 Credits.
Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service. Prerequisites: AG_EC 1041.

AG_EC 2225. Statistical Analysis. 3 Credits.
Elementary statistical inference. Prerequisite: AG_EC 1041 and MATH 1100. Math Reasoning Proficiency Course.

AG_EC 2940. Practicum in Agricultural Economics. 1-3 Credit.
Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Prerequisites: 6 credit hours Agricultural Economics, 3 credits communications, and 30 total University credits. Graded on S/U basis only.

AG_EC 3150. International Agribusiness. 3 Credits.
This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across
AG_EC 3224. New Products Marketing. 3 Credits.
Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product. Prerequisites: ENGLISH 1000 and either AG_EC 1041 or ECONOM 1014.

AG_EC 3230. Agricultural and Rural Economic Policy. 3 Credits.
Study and analysis of past and present government policies affecting agriculture and rural economy. Prerequisite: AG_EC 1041 and AG_EC 1042 or equivalent.

AG_EC 3241. Ethical Issues in Agriculture. 3 Credits.
The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit. Prerequisite: AG_EC 1041 or equivalent and junior standing.

AG_EC 3251. Agricultural Prices. 3 Credits.
Variations in prices of agricultural products; underlying factors. Prerequisites: AG_EC 1041, AG_EC 1042, AG_EC 2123 and AG_EC 2225 or STAT 2500.

AG_EC 3256. Agribusiness and Biotechnology Law. 3 Credits.
Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives. Prerequisites: 3 hours of Agricultural Economics or Economics.

AG_EC 3257. Rural and Agricultural Law. 3 Credits.
Everyday practical legal problems facing rural residents, farmers, agribusiness, and local government. Laws include statutes, common law (cases), customs, and administrative regulations. Topics include corporate/contract farming, right-to-farm, leases, fence laws, estate planning and water rights. Prerequisites: 3 hours of Agricultural Economics or Economics.

AG_EC 3260. General Farm Management. 3 Credits.
Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions. Prerequisite: AG_EC 1041.

AG_EC 3270. Conservation and Use of Protected Areas. 3 Credits.
Evaluation of socioeconomic, cultural and ecological values influencing the development and management of protected areas including parks, forests, wildlife refuges, wilderness and wild/scenic rivers. Prerequisites: AG_EC 1041 or equivalent, or AG_EC 2070 and introductory natural resources courses, or instructor’s consent.

AG_EC 3271. International Agricultural Development. 3 Credits.
Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries. Prerequisites: AG_EC 1041 and AG_EC 1042 and junior standing.

AG_EC 3272. International Food Trade and Policy. 3 Credits.
Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment. Prerequisites: AG_EC 1041 and AG_EC 1042.

AG_EC 3282. Agribusiness Finance. 3 Credits.
Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy. Prerequisite: AG_EC 1041 and ACCTCY 2037.

AG_EC 3283. Fundamentals of Entrepreneurship. 3 Credits.
Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities. Prerequisites: AG_EC 1041 and ACCTCY 2036 or equivalent.

AG_EC 3285. Problems in Agricultural Economics. 1-3 Credit.
Supervised study in a specialized phase of agricultural economics. Prerequisite: AG_EC 1041 and AG_EC 1042; instructor’s consent. Graded on S/U basis only.

AG_EC 3286. Economics of Managerial Decision Making. 3 Credits.
Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agri-food system and for natural resource and environmental management. Prerequisite: AG_EC 1041, AG_EC 2123 and AG_EC 1813.

AG_EC 3294. Agricultural Marketing and Procurement. 3 Credits.
Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making. Prerequisites: AG_EC 2183 and AG_EC 2225.

AG_EC 3295. Commodity Futures/Options Trading. 3 Credits.
Familiarizes students with the learning components of commodity future/option trading. Students learn through involvement by investing in a commodity pool and trading futures/options. Students apply both fundamental and technical analysis. Students taking this course are required to invest from $100 to $300 in $100 increments. Prerequisites: AG_EC 2183, AG_EC 3294 or instructor’s consent.

AG_EC 3321. Economic History of Agriculture. 3 Credits.
Emphasizes Europe and U.S. historical interpretation; usefulness in evaluating present and probable future developments in agriculture. Prerequisite: AG_EC 1041.

AG_EC 3383. Rural Entrepreneurship II. 3 Credits.
Rural Entrepreneurship II is designed for students that realize they may need to create their own career or opportunity if they want to return to their rural community and for students who would like to better understand how to create that option in their career choice set. Prerequisites: AG_EC 1041, AG_EC 3283 and ACCTCY 2036.

AG_EC 4110. In-Service Course in Agricultural Economics. 2-10 Credit.
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in
sections A-E as listed, for 2 hours each. Prerequisites: 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor’s consent.

**AG_EC 4230. Understanding the Agricultural Policy Process. 3 Credits.**
The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment. Prerequisites: AG_EC 3230 and instructor’s consent.

**AG_EC 4295. Agricultural Risk Management. 3 Credits.**
This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks. Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor’s consent.

**AG_EC 4301. Topics in Agricultural Economics. 1-6 Credit.**
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics.

**AG_EC 4310. Local Economic Analysis. 1 Credit.**
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. Prerequisite: junior standing.

**AG_EC 4340. Rural Real Estate Appraisal. 3 Credits.**
Principles, techniques, practices of rural real estate appraisal. Field trips. Prerequisites: AG_EC 3260.

**AG_EC 4356. Environmental Law and Policy. 3 Credits.**
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal. Prerequisites: senior or graduate standing. For non-law students. Recommended AG_EC 2156, AG_EC 3256 or AG_EC 3257.

**AG_EC 4490. Internship Experiences in Agricultural Economics. 1-3 Credit.**
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Prerequisites: 2.5 GPA; 75 hours of course work and instructor’s consent. Graded on S/U basis only.

**AG_EC 4620. Planning the Farm Business. 3 Credits.**
Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets. Prerequisites: AG_EC 3260 or AFNR 1111 or equivalent.

**AG_EC 4971. Agribusiness Management Strategy. 3 Credits.**
Analysis of industry forces in agriculture and food sector. Assessing risks and firms’ capabilities. Development of firm’s competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement. Prerequisites: AG_EC 2183, AG_EC 3282, AG_EC 3286, ENGLISH 1000 and AFNR 1111.

**AG_EC 4972. Agri-Food Business and Cooperative Management. 3 Credits.**
Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms. Prerequisites: AG_EC 2183, AG_EC 3256, AG_EC 3286 and AG_EC 4971.

**AG_EC 4983. Strategic Entrepreneurship in Agri-Food. 3 Credits.**
Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets. Prerequisites: AG_EC 3257, AG_EC 3282, AG_EC 3283, and AG_EC 3383; senior standing.

**AG_EC 4990. Agricultural Economics Capstone Seminar. 3 Credits.**
Apply key concepts of agricultural economics in traditional and non-traditional settings. Prerequisites: AG_EC 3230, AG_EC 3251, and senior standing.

**AG_EC 4995. Economics of Agricultural Production and Distribution. 3 Credits.**
Applies economic principles to agricultural production including price theory, linear programming and uncertainty. Prerequisites: ECONOM 3251, STAT 1400 or equivalent.

**AG_EC 7110. In-Service Course in Agricultural Economics. 2-10 Credit.**
A. Profit Maximizing Principles B. Farm Planning C. Farm Records and Analysis D. Business Management E. Using Computers in Farm Management Decision Making. Basic principles of farm management. Applications of principles and subject matter in successful classroom presentation primarily for high school teachers. Course is offered in sections A-E as listed, for 2 hours each. Prerequisites: graduate standing and 10 hours credit in Agricultural Economics, including AG_EC 3260, or instructor’s consent.

**AG_EC 7295. Agricultural Risk Management. 3 Credits.**
This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks. Prerequisites: AG_EC 2183 and AG_EC 2225 or instructor’s consent. Graduate standing required.

**AG_EC 7301. Topics in Agricultural Economics. 1-6 Credit.**
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural Economics. Prerequisite: graduate standing.

**AG_EC 7310. Local Economics Analysis. 1 Credit.**
Economic based theory, including multipliers and how local economies are affected by external events. Methods for local economic analysis: trends, location quotients, shift-share, and retail analyses. On-line course.

**AG_EC 7340. Rural Real Estate Appraisal. 3 Credits.**
Principles, techniques, practices of rural real estate appraisal. Field trips. Prerequisites: graduate standing and AG_EC 3260.

**AG_EC 7356. Environmental Law and Policy. 3 Credits.**
Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal. Prerequisites: graduate standing and AG_EC 3260.

**AG_EC 7375. Environmental Law and Policy. 3 Credits.**
Apply key concepts of agricultural economics in traditional and non-traditional settings. Prerequisites: AG_EC 3230, AG_EC 3251, and senior standing.

**AG_EC 7940. Internship Experiences in Agricultural Economics. 1-3 Credit.**
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Prerequisites: 2.5 GPA; 75 hours of course work and instructor’s consent. Graded on S/U basis only.
AG_EC 7962. Planning the Farm Business. 3 Credits.
Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets. Prerequisites: graduate standing and AG_EC 3260 or AFNR 1111 or equivalent.

AG_EC 7971. Agribusiness Management Strategy. 3 Credits.
Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm’s competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement. Prerequisites: graduate standing and AG_EC 2183, AG_EC 3282, AG_EC 3286, ENGLISH 1000 and AFNR 1111.

AG_EC 7972. Agri-Food Business and Cooperative Management. 3 Credits.
Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms. Prerequisites: graduate standing and AG_EC 2183, AG_EC 3256 and AG_EC 3286.

AG_EC 7995. Economics of Agricultural Production and Distribution. 3 Credits.
Applies economic principles to agricultural production including price theory, linear programming and uncertainty. Prerequisites: graduate standing and ECONOM 3251, STAT 1400 or equivalent.

AG_EC 8001. Advanced Topics in Economics. 3 Credits.
Analyzes economic logic problems. Current agricultural economic problems. Prerequisite: graduate standing.

AG_EC 8005. Masters Problems in Agricultural Economics. 1-99 Credit.
Supervised study, research in specialized phases of agricultural economics. Prerequisite: instructor’s consent.

AG_EC 8007. Seminar in Agricultural Economics. 1 Credit.
Lectures, reports on economic problems in agriculture.

AG_EC 8087. Seminar in Agricultural Economics. 1 Credit.
Lectures, reports on economic problems in agriculture.

AG_EC 8089. Masters Thesis Research in Agricultural Economics. 1-6 Credit.
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

AG_EC 8120. Theory of Markets. 3 Credits.
Development of theories of monopolistic, monopolistic competition; application to agricultural markets. Market structure influence on price, nonprice competition in buying, selling of farm products and inputs. Prerequisites: ECONOM 7351.

AG_EC 8350. Regional Development Issues and Analysis. 3 Credits.
(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development. Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent.

AG_EC 8410. Natural Resource and Environmental Economics. 3 Credits.
Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution. Prerequisites: ECONOM 7351.

AG_EC 8430. International Agricultural Development Policy. 3 Credits.
An analytical review of economic policies directed toward stimulating agricultural development in the world’s low income countries. Prerequisites: ECONOM 7351, ECONOM 7353.

AG_EC 8448. Society and Ecosystems Research Seminar. 3 Credits.
(same as RU_SOC 8448 and NAT_R 8448). This seminar, capstone for the Graduate Certificate Program in Society and Ecosystems, exposes students to interdisciplinary research on interactions between social, economic and ecological systems.

AG_EC 8450. Masters Non Thesis Research. 1-6 Credit.
Independent investigation of advanced nature. Report required.

AG_EC 8520. Economics of Transaction and Contracting. 3 Credits.
This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions. Graduate standing required.

AG_EC 8610. Economic and Sociological Approaches to Collective Action. 3 Credits.
(same as RU_SOC 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals. Prerequisite: AG_EC 7972.

AG_EC 9001. Advanced Topics in Economics II. 3 Credits.
Analyzes economic logic problems. Current agricultural economic problems. Prerequisite: graduate standing.

AG_EC 9040. Advanced Microeconomics Theory and Applications I. 3 Credits.
First semester course that rigorously examines the microeconomic theory of producer and consumer behavior, combined with applications of the
AG_EC 9042. Advanced Microeconomics Theory and Applications II. 3 Credits.
Second semester advanced micro theory covering choice under uncertainty, industry structure, game theory, information econ, and political economy of regulation. Includes applications of micro models to issues in agricultural, natural resource, and development sectors. Prerequisite: AG_EC 9040. Graduate standing required.

AG_EC 9085. Doctoral Problems in Agricultural Economics. 1-99 Credit.
Supervised study, research in specialized phases of agricultural economics. Prerequisite: instructor’s consent.

AG_EC 9090. Doctoral Dissertation Research in Agricultural Economics. 1-99 Credit.
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.

AG_EC 9220. Advanced Price Analysis. 3 Credits.
Applies economic theory and quantitative methods to analyze agricultural price issues. Examines problem formulation, estimation, and model evaluation applied to demand and supply situations. Prerequisites: ECONOM 8451 or ECONOM 8472; STAT 4510.

AG_EC 9230. Welfare and Consumption Economics. 3 Credits.
Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers' choice; measurement of consumption; living standards; household decisions and markets relation. Prerequisites: ECONOM 8451 or instructor’s consent.

AG_EC 9265. Food, Agricultural and Rural Policy. 3 Credits.
Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions. Prerequisites: ECONOM 7351 and AG_EC 8230.

AG_EC 9320. Regional Economic Theory and Methods. 3 Credits.
Theory of spatial economics: Central place theory, spatial labor markets, location theory, social accounting matrices, input-output, computable general equilibrium, geographic information systems and regional econometric models. Prerequisites: ECONOM 7351, ECONOM 7353, and matrix algebra.

AG EC 9475. Econometrics I. 3 Credits.
Emphasis is given to special estimation problems which occur in integrating the theory with various types of economic data.

AG_EC 9476. Econometrics II. 3 Credits.
(same as ECONOM 9476).

AG_EC 9510. Economics of Agribusiness Firm. 3 Credits.
This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions. Prerequisite: AG_EC 8050.

AG_EC 9520. Economics of Agribusiness Markets. 3 Credits.
Relationships of neoclassical and new institutional economics to designing organizational strategy and structure. Internal coordination and structure, organizational boundaries, and competitiveness and sustainability of food system organizations. Prerequisite: AG_EC 8050.
AG_ED 4310. Rationale and Structure of Agricultural Education Programs. 3 Credits.
This course provides future agricultural educators with a comprehensive overview of a complete Agricultural Education program involving classroom instruction, supervised experience, and personal development. Prerequisite: junior standing.

AG_ED 4311. Integrated Field Experience I. 1 Credit.
A field-based experience that provides students with comprehensive experience directed toward the planning, supervision, and evaluation of Supervised Agricultural Experience Programs in secondary agriculture programs. Prerequisite: concurrent enrollment in AG_ED 4310. Graded on S/U basis only.

AG_ED 4320. Methods of Teaching I. 3 Credits.
Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment. Prerequisites: junior standing; acceptance into Phase II of Teacher Development Program or permission of instructor.

AG_ED 4321. Integrated Field Experience II. 1 Credit.
A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Prerequisite: concurrent enrollment in AG_ED 4320. Graded on S/U basis only.

AG_ED 4330. Methods of Teaching II. 3 Credits.
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design. Prerequisite: AG_ED 4320; acceptance into Phase II of Teacher Development Program or permission of the instructor.

AG_ED 4340. Designing and Delivering Nonformal Educational Programs. 4 Credits.
Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes. Prerequisite: AG_ED 2220 or equivalent; junior or senior standing.

AG_ED 4993. Internship in Agricultural Education. 1-4 Credit.
Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator. Prerequisite: departmental consent.

AG_ED 4995. Student Teaching Internship in Agriculture. 1-12 Credit.
A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context. Prerequisite: departmental consent.

AG_ED 7087. Internship Seminar in Agricultural Education. 3 Credits.
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development. Prerequisite: graduate standing and concurrent enrollment AG_ED 4995.

AG_ED 7310. Rationale and Structure of Agricultural Education. 3 Credits.
This course provides future agricultural educators with a comprehensive overview of a complete Agricultural Education program involving classroom instruction, supervised experience, and personal development. Prerequisite: graduate standing.

AG_ED 7320. Methods of Teaching I. 3 Credits.
Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment. Prerequisites: Graduate standing and acceptance into the Teacher Certification option.

AG_ED 7330. Methods of Teaching II. 3 Credits.
Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, and curricular design. Prerequisites: Graduate standing; acceptance into Teacher Certification option and AG_ED 4320/7320.

AG_ED 7340. Designing and Delivering Nonformal Educational Programs. 4 Credits.
Course designed to overview learning theory and practice applicable to teaching adults and youth in nonformal education contexts including: planning programs, methods of instructional delivery, marketing, and evaluation of educational outcomes. Prerequisite: AG_ED 2220 or equivalent.

AG_ED 7350. Inservice Course in Agricultural Education. 1-99 Credit.
Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.

AG_ED 8080. Creative Component in Agricultural Education. 1-3 Credit.
Independent original work that culminates in a scholarly project, document or presentation. Prerequisite: instructor’s consent. Graded on S/U basis only.

AG_ED 8085. Problems in Agricultural Education. 1-99 Credit.
Prerequisite: instructor’s consent.

AG_ED 8087. Seminar in Agricultural Education. 1-99 Credit.
Seminar in Agricultural Education.

AG_ED 8090. Thesis Research in Agricultural Education. 1-99 Credit.
Independent research activities by a master’s student that culminates in a thesis. Prerequisite: instructor’s consent. Graded on S/U basis only.

AG_ED 8210. History and Leadership of the Land Grant University. 2 Credits.
Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society. Prerequisite: graduate standing.

AG_ED 8250. Leadership Theory and Application. 3 Credits.
Survey of concepts, theories and practices of leadership, personal development and group dynamics. Exploration of leadership traits and models with a focus upon how they apply to Agricultural Education.

AG_ED 8330. Advanced Methods of Teaching. 3 Credits.
Explores the principles and psychological aspects of teaching and learning; teaching strategies, methods, and techniques; evaluating
student learning; motivating students; and personal teacher behaviors that influence learning.

AG_ED 8340. Student and Teacher Development in Agricultural Education. 3 Credits.
Examines planning and supervising career exploration, experiential learning, and leadership development activities of secondary agriculture students. The professional development of the secondary agriculture teacher is also examined. Prerequisite: AG_ED 4310 or equivalent.

AG_ED 8350. College Teaching of Agriculture, Food and Natural Resources. 3 Credits.
A course designed to assist current or future college faculty who wish to improve their teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education.

AG_ED 8351. Induction Year Teaching I. 1-2 Credit.
Continuing education course for the professional development of first-year teachers of agriculture. The course focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

AG_ED 8352. Induction Year Teaching II. 1-2 Credit.
Continuing education course for the professional development of second-year teachers of agriculture. The course is a continuation of AG_ED 7351 and focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture. Prerequisite: AG_ED 7351.

AG_ED 8410. Philosophical Foundations of Agricultural Education. 1-3 Credit.
Overview of the history and philosophical development of agricultural education as a discipline. Philosophers, policy makers, movements, trends, and legislation that has influenced agricultural education. Current issues and future trends impacting the field. Graded on A/F basis only.

AG_ED 8430. Evaluation of Educational Programs. 3 Credits.
(same as RU_SOC 8430). Examines program evaluation concepts, principles, and models; and identifies major steps in planning, conducting, and reporting results of evaluation objects.

AG_ED 8510. Research Methods and Design. 3 Credits.
(same as RU_SOC 8510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Prerequisite: AG_ED 8510 RU_SOC 8510 or instructor’s consent. Graded on A/F basis only.

AG_ED 8520. Preparing Manuscripts for Publication. 1 Credit.
An introduction to planning, preparing, and submitting research based articles for publication in professional journals and research proceedings.

AG_ED 8530. Grant Proposal Writing. 2 Credits.
Preparation of proposals designed to solicit grant funding to support teaching, research or outreach programs. Emphasis on proposal development, identifying funding sources, and proposal review processes.

AG_ED 8540. Methods of Qualitative Research. 3 Credits.
(same as RU_SOC 8540). Overview of philosophies, approaches toward design, data collection, analysis and reporting of qualitative research.

AG_ED 8995. College Teaching Practicum. 3 Credits.
Learning experience that combines the study, observation, and practice of teaching university-level courses in food, agriculture and/or natural resources under the supervision of teaching mentors. Prerequisite: instructor’s consent and AG_ED 8330 or 8350. Graded on S/U basis only.

AG_ED 9090. Doctoral Research in Agricultural Education. 1-99 Credit.
Independent research activities by a doctoral student that culminates in a dissertation or other scholarly work. Prerequisite: instructor’s consent. Graded on S/U basis only.

AG_ED 9410. Foundations and Practices of Teacher Education. 3 Credits.
Foundations and practices of teacher preparation programs including student selection and advisement, licensure requirements, accreditation, curriculum, clinical and field experiences, supervision, evaluation and research. Prerequisite: Doctoral student or instructor’s consent.

AG_ED 9510. Data Collection, Analysis and Interpretation. 3 Credits.
(same as RU_SOC 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Prerequisite: AG_ED 8510 RU_SOC 8510 or instructor’s consent. Graded on A/F basis only.

Agricultural Systems Management (AG_S_M)

AG_S_M 1002. Topics in Agricultural Systems Management-Biological/Physical/Math. 3 Credits.
Current and new technical developments in agricultural systems management. Prerequisites: 6 hours in AG_S_M or instructor’s consent.

AG_S_M 1020. Introduction to Agricultural Systems Management. 3 Credits.
Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management.

AG_S_M 1040. Physical Principles for Agricultural Applications. 3 Credits.
Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships. Prerequisite: MATH 1120.

AG_S_M 1120. Agricultural/Industrial Materials and Processes. 3 Credits.
Structure and properties of manufacturing materials; conditioning and machining materials; assembling processes; finishing processes; automation of manufacturing systems.

AG_S_M 2002. Topics in Agricultural Systems Management-Biological/Physical/Math. 3 Credits.
Current and new technical developments in agricultural systems management. Prerequisites: 6 hours in AG_S_M or instructor’s consent.

AG_S_M 2020. Environmental Ethics in Agriculture. 3 Credits.
Influence of agricultural technology and production practices on environmental quality. Stewardship concepts. Long-term vs. short-term consequences. Development of a scientifically sound ethic toward
agricultural production. Prerequisites: ENGLISH 1000 and sophomore standing.

**AG_S_M 2220. Agricultural/Industrial Structures. 3 Credits.**
A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Prerequisite: MATH 1100 required, AG_S_M 1040 recommended or instructor’s consent. Math reasoning proficiency course.

**AG_S_M 2320. Internal Combustion Power. 3 Credits.**
Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing. Prerequisite: AG_S_M 1040.

**AG_S_M 2340. Pesticide Application Equipment. 3 Credits.**
Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license. Prerequisites: MATH 1100 or instructor’s consent.

**AG_S_M 2345. Chemical Application Systems. 2-3 Credit.**
Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures. Prerequisite: MATH 1100 or equivalent.

**AG_S_M 2360. Fluid Power. 3 Credits.**
Basic power hydraulic theory. Hydraulic systems, components and circuits. Prerequisite: MATH 1100; sophomore standing. Math reasoning proficiency course.

**AG_S_M 3350. Problems in Agricultural Systems Management. 1-5 Credit.**
Supervised independent study at the undergraduate level. Prerequisite: instructor’s consent.

**AG_S_M 4020. Agricultural Safety and Health. 3 Credits.**
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system. Prerequisite: junior or senior standing or instructor’s consent.

**AG_S_M 4220. Material Handling and Conditioning. 3 Credits.**
Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material. Prerequisites: MATH 1100, AG_S_M 1040 and junior standing.

**AG_S_M 4225. Preservation of Grain Quality. 2 Credits.**
Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis. Prerequisite: MATH 1100 or equivalent.

**AG_S_M 4320. Agricultural Equipment and Machinery. 3 Credits.**
Operation of agricultural machinery. Selection and management of equipment. Prerequisite: AG_S_M 1040 and junior standing.

**AG_S_M 4350. Problems in Agricultural Systems Management. 1-5 Credit.**
Supervised independent study at the undergraduate level. Prerequisite: instructor’s consent.

**AG_S_M 4360. Precision Agriculture Science and Technology. 3 Credits.**
(same as PLNT_S 4360 and SOIL 4360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: SOIL 2100, PLNT_S 2110 or instructor’s consent.

**AG_S_M 4365. Machinery Management Using Precision Agriculture Technology. 3 Credits.**
Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized. Junior standing required. Prerequisite: Prefer AG_S_M 4360.

**AG_S_M 4370. In-Service Course AG S M.-Farm Power and Machinery. 1-8 Credit.**
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level. Prerequisites: 10 credits from Agricultural System Management courses; a B.S. degree in Agriculture or instructor’s consent.

**AG_S_M 4390. Optimization and Management of Food and Agricultural Systems. 3 Credits.**
(same as F_S 4390 and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function. Prerequisite: MATH 1100.
AG_S_M 4420. Surface Water Management. 3 Credits.
Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures. Prerequisites: MATH 1100 and junior standing.

AG_S_M 4440. Water Quality and Pollution Control. 3 Credits.
Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems. Prerequisites: MATH 1100, and junior standing.

AG_S_M 4460. Irrigation and Drainage. 3 Credits.
Soil, water, plant relationships. Selection and layout of irrigation and drainage systems. Prerequisites: AG_S_M 4420 or instructor's consent.

AG_S_M 4940. Agricultural Systems Management Internship. 2-5 Credit.
Problem course following prior approved internship work experience. Problem selected by internship company representative, faculty problem advisor and student. Supervised by faculty problem advisor and presented in technical report form.

AG_S_M 4970. Agricultural Systems Management - Capstone. 3 Credits.
Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis. Prerequisites: Senior Standing.

AG_S_M 7001. Topics in Agricultural Systems Management. 3 Credits.
Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise. Prerequisite: graduate standing or instructor's consent.

AG_S_M 7020. Agricultural Safety and Health. 3 Credits.
Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system. Prerequisite: graduate standing or instructor’s consent.

AG_S_M 7085. Problems in Agricultural Systems Management. 1-99 Credit.
Supervised individual study at the graduate level.

AG_S_M 7120. Advanced Agricultural/Industriai Materials and Processes. 2-3 Credit.
Primarily for students majoring in agricultural education. Applies shop principles to the design and construction of projects. Prerequisite: graduate standing and instructor's consent.

AG_S_M 7140. Electricity: Wiring and Equipment. 3 Credits.
Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory. Prerequisite: graduate standing.

AG_S_M 7220. Material Handling and Conditioning. 3 Credits.
Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials. Prerequisite: MATH 1100, AG_S_M 1040 and graduate standing.

AG_S_M 7320. Agricultural Equipment and Machinery. 3 Credits.
Operation of agricultural machinery. Selection and management of equipment. Prerequisite: Agricultural Systems Management AG_S_M 1040 and graduate standing.

AG_S_M 7340. Agricultural Mechanization Systems. 3 Credits.

AG_S_M 7360. Precision Agriculture Science and Technology. 3 Credits.
(same as PLNT_S 7360 and SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management. Prerequisites: graduate standing and SOIL 2100, PLNT_S 2110 or instructor’s consent.

AG_S_M 7365. Machinery Management Using Precision Agriculture Technology. 3 Credits.
This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipments geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course. Prerequisite: AG_S_M 7360 recommended.

AG_S_M 7370. In-Service Course AG S M.-Farm Power and Machinery. 1-8 Credit.
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level. Prerequisites: graduate standing and 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor’s consent.

AG_S_M 7390. Optimization and Management of Food and Agriculture Systems. 3 Credits.
(same as F_S 7390 and HSP_MGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function. Prerequisite: graduate standing; instructor's consent.

AG_S_M 7420. Surface Water Management. 3 Credits.
Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures. Prerequisites: MATH 1100 and graduate standing.

AG_S_M 7440. Water Quality and Pollution Control. 3 Credits.
Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems. Prerequisites: MATH 1100, and graduate standing.
AG_S_M 7460. Irrigation and Drainage. 3 Credits.
Soil, water, plant relationships. Selection and layout of irrigation and drainage systems. Prerequisites: graduate standing and AG_S_M 4420 or instructor’s consent.

AG_S_M 8085. Problems in Agricultural Systems Management. 3 Credits.
Supervised individual study at the graduate level.

Independent investigation to be presented as a thesis. Graded on an S/U basis only. Prerequisite: graduate standing.

AG_S_M 8340. Agricultural Mechanization Systems. 3 Credits.

Independent investigation to be presented as a thesis. Graded on an S/U basis only. Prerequisite: graduate standing.

Agriculture, Food and Natural Resources (AFNR)

AFNR 1101. Special Topics in Agriculture. 1-3 Credit.
Selected topics not offered in other courses. Prerequisite: instructor’s consent.

AFNR 1111. Computing and Information Systems I. 3 Credits.
Provide students with a basic understanding of microcomputer usage, electronic communications, and the use of the internet. Topics include operating systems, word processing, database management systems, spreadsheets, electronic mail, online library searches, and the World Wide Web.

AFNR 1115. Foundations for College Success. 1 Credit.
An investigation of principles and practices associated with academic success and the interpersonal challenges encountered in collegiate life. Learning preferences, time investment, study skills, degree requirements, and personal development opportunities available in the College and across campus are explored. Prerequisite: freshman standing. Graded on A/F basis only.

AFNR 1120. Computing and Information Technology. 2 Credits.
Provides students with a basic understanding of computer usage, electronic communications and use of the internet. Topics include understanding of operating systems, word processing, and presentation media. Restricted to freshmen and sophomores.

AFNR 2115. College to Career: Strategies for Success. 1 Credit.
Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.

AFNR 2120. Working with Data Using Excel. 1 Credit.
Provide students with a basic understanding of computer usage and spreadsheet applications.

AFNR 2150. Agricultural Travel Course. 1-99 Credit.
General travel course designed to broaden the perspective of agricultural students. Prerequisites: one course in each of the following areas: agricultural economics, animal science, plant science, and instructor’s consent. Cost of course is borne by the student.

AFNR 2190. International Agriculture and Natural Resources. 1-15 Credit.
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Prerequisites: instructor’s and student’s advisor consent. Selected sections of this course may be graded either on A/F or S/U basis only.

AFNR 2191. International Agriculture and Natural Resources-Humanities. 1-6 Credit.
This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country’s civilization through the examination of its arts, culture, language and history. Prerequisites: student’s advisor or consent of instructor. May be repeated for credit. Selected sections of this course may be offered on A-F or S/U basis only.

AFNR 2192. International Agriculture/Natural Resources-Social Science. 1-6 Credit.
This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. Prerequisite: student’s advisor and instructor’s consent. May be repeated for credit. Selected sections of this course may be graded either on A/F or S/U basis only.

AFNR 2215. Introduction to the Theory and Practice of Sustainable Agriculture. 3 Credits.
This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.

AFNR 3115. Lifelong Career Management and Success Strategies. 1 Credit.
Systematic approach to understanding the importance of effective leadership in the professional world, obtaining transferable skills necessary in the work force, and understanding important aspects that allow one’s career to grow over the course of one’s professional life. Prerequisites: junior standing or higher. Graded on A/F basis only.

AFNR 3215. Community Food Systems. 3 Credits.
Essential concepts in research, implementation and understanding of community food systems and macro-level global trends in food production and distribution will be discussed. Students will examine the social, economic and health implications of conventional and alternative food systems. Prerequisite: AFNR 2215.

AFNR 3315. Advanced Practices in Sustainable Agriculture. 3 Credits.
Course furthers students’ understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life. Prerequisites: AFNR 2215 and Junior standing. Recommended: SOIL 2100, PLNT_S 2110 or AN_SCI 1065 or 2175.
AFNR 4001. Topics in Agriculture-General. 1-99 Credit.
Topics in Agriculture-General.

AFNR 4972. Capstone Project in Agriculture, Food and Natural Resources. 1-3 Credit.
A culminating learning experience focused on student’s area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only. Prerequisite: junior standing; instructor’s consent.

AFNR 4993. Internship in Agriculture, Food and Natural Resources. 1-6 Credit.
Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit. Prerequisite: junior standing; instructor’s consent.

AFNR 7190. International Agriculture/Natural Resources. 1-9 Credit.
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Prerequisite: graduate standing required and advisor and instructor’s consent. Selected sections of the course may be offered on A/F or S/U basis only.

Animal Science (AN_SCI)

AN_SCI 1001. Topics in Animal Science. 1-4 Credit.
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: departmental consent.

AN_SCI 1011. Animal Science. 3 Credits.
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

AN_SCI 1012. Introduction to Captive Wild Animal Management. 3 Credits.
(same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A/F basis only.

AN_SCI 1013. Biotechnology in Animal Agriculture. 3 Credits.
Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A/F basis only.

AN_SCI 1065. Animal Science Laboratory Practicum. 2 Credits.
An introductory course in skill related to the care and management of livestock and poultry plus a section dealing with meats and a section dealing with research methods. Students will be expected to participate in hands-on learning development of fundamental skills and animal husbandry. This class will include one 3 hour lab and 1 hour DIS per week.

AN_SCI 2001. Topics in Animal Science. 1-4 Credit.
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: departmental consent.

AN_SCI 2085. Problems in Animal Science. 1-5 Credit.
Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor. Prerequisite: instructor’s consent.

AN_SCI 2095. Equine Behavior and Training. 3 Credits.
Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Prerequisite: AN_SCI 1065 and instructor’s consent.

AN_SCI 2110. Global Animal Agriculture. 2 Credits.
Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors. Prerequisite: sophomore standing.

AN_SCI 2111. Sophomore Seminar: Societal Issues Facing Animal Agriculture. 3 Credits.
Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Prerequisite: ENGLSH 1000. Graded on A/F basis only.

Anesthesiology (ANESTH)

ANESTH 6203. ABS Anesthesiology Research. 5-10 Credit.
ABS Anesthesiology Research.

ANESTH 6205. ABS Anesthesiology Research & Review. 5-10 Credit.
ABS Anesthesiology Research & Review.

ANESTH 6400. Anesthesiology. 5 Credits.
Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career.
Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesiology as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient’s anesthetic, and a 50 question written examination at the end of the rotation.
AN_SCI 2114. Live Animal and Meat Evaluation. 3 Credits.
(same as F_S 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

AN_SCI 2115. Livestock Judging. 3 Credits.
Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures. Prerequisite: AN_SCI 1065.

AN_SCI 2131. Dairy Products Evaluation. 2 Credits.
(same as F_S 2131. Sensory Evaluation and judging of dairy products.

AN_SCI 2135. Horse Selection and Evaluation. 2 Credits.
Techniques of selecting and evaluating horses based on conformation and performance characteristics. Effects of conformation on soundness. Includes learning to organize observations on the relative merits of a group of horses into an oral presentation. Prerequisite: AN_SCI 1065.

AN_SCI 2140. Companion Animals. 3 Credits.
(same as BIOMED 2140). Focus on companion dog, cat, and horse owners concerns re: health zoonoses, legal responsibilities, inbreeding, choice of breeds, behavioral problems and loss of companion animals. Prerequisite: sophomore standing.

AN_SCI 2165. Introduction to Ruminant Livestock Production. 3 Credits.
This is an introductory theory course which provides fundamental understanding of ruminant livestock - beef cattle and diary cattle, production, management and associate industries. Prerequisite: AN_SCI 1065. Graded on A/F basis only.

AN_SCI 2175. Introduction to Monogastric Production. 3 Credits.
Introductory course which provides fundamental understanding of hogs, horses and poultry. Prerequisite: AN_SCI 1065. Graded on A/F basis only.

AN_SCI 2195. Equine Facility Management and Marketing. 3 Credits.
Focuses on learning equine facility management through student care and management of the University’s equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Prerequisites: AN_SCI 2135 and instructor’s consent. Cannot be taken at the same time as AN_SCI 2095. Graded on A/F basis only.

AN_SCI 3001. Topics in Animal Science. 1-4 Credit.
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: department consent.

AN_SCI 3085. Problems in Animal Science. 1-6 Credit.
Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Prerequisite: instructor’s consent. Some sections may be graded either on S/U or A/F basis only.

AN_SCI 3190. Study Abroad: International Meat, Dairy and Enology. 3 Credits.
(same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit. Prerequisite: instructor’s consent.

AN_SCI 3212. Principles of Animal Nutrition. 3 Credits.
The purpose of this course is to teach students the essential nutrients for animal life and to understand the basic principles of nutrition. Prerequisites: 1 course in biochemistry or at least 4 hours of chemistry and MATH 1100 or equivalent. Graded on A/F basis only.

AN_SCI 3213. Genetics of Agricultural Plants and Animals. 3 Credits.
(same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100.

AN_SCI 3214. Principles of Meat Science. 3 Credits.
(same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food. Prerequisite: one course in Biology.

AN_SCI 3231. Principles of Dairy Foods Science. 3 Credits.
(same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.) Prerequisite: One course is Chemistry or Biological Sciences.

AN_SCI 3232. Animal Feeds and Feeding. 3 Credits.
Description of feed ingredients, formulation of diets, and animal feeding management. Prerequisites: AN_SCI 3212; MATH 1100 or equivalent.

AN_SCI 3254. Physiology of Domestic Animals. 3 Credits.
Basic concepts of physiology and anatomy as related to domestic animals. Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320.

AN_SCI 3255. Physiology of Domestic Animals Laboratory. 2 Credits.
This laboratory course covers the basic concepts of physiology as related to domestic animals. Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500; CHEM 1310 and CHEM 1320; AN_SCI 3254 or equivalent.

AN_SCI 3275. Meat Animal Evaluation. 2 Credits.
Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary. Prerequisites: AN_SCI 2114 and AN_SCI 2115.

AN_SCI 4001. Topics in Animal Science. 1-4 Credit.
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: instructor’s consent.

AN_SCI 4304. Processing Muscle Foods. 3 Credits.
(same as Food Science [F_S] 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of
complex ingredients and develop skills by practicing operations in a pilot plant facility. Prerequisites: One Chemistry course.

**AN_SCI 4312. Monogastric Nutrition. 3 Credits.**
(same as NUTR_S 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Prerequisite: AN_SCI 3212. Graded on A/F basis only.

**AN_SCI 4314. Physiology of Reproduction. 3 Credits.**
Principles of animal reproduction with emphasis on endocrine control of reproductive processes. Prerequisites: AN_SCI 3254 and BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent.

**AN_SCI 4323. Applied Livestock Genetics. 2 Credits.**
Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Prerequisite: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100. Math Reasoning Proficiency Course.

**AN_SCI 4324. Genomics of Plants and Animals. 2 Credits.**
Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics. Prerequisites: BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500, MATH 1100, AN_SCI 3213 /PLNT_S 3213 or equivalent.

**AN_SCI 4332. Ruminant Nutrition. 3 Credits.**
Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients. Prerequisite: AN_SCI 3212.

**AN_SCI 4354. Physiology and Biochemistry of Muscle as Food. 3 Credits.**
(same as F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food. Prerequisite: BIO_SC 1010 or equivalent or AN_SCI 3214 or instructor’s consent.

**AN_SCI 4384. Reproductive Management. 3 Credits.**
Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies. Prerequisites: senior standing and AN_SCI 4314 and instructor’s consent.

**AN_SCI 4387. Equine Breeding Management. 5 Credits.**
Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas. Prerequisites: AN_SCI 2175 and AN_SCI 4314; instructor’s consent.

**AN_SCI 4434. Molecular and Network Evolution. 3 Credits.**
Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized. Prerequisites: BIO_SC 1500 and MATH 1100; instructor’s consent.

**AN_SCI 4437. Environmental Physiology. 3 Credits.**
Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions. Prerequisite: AN_SCI 3254 or equivalent.

**AN_SCI 4910. Senior Seminar in Captive Wild Animal Management. 1 Credit.**
(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Prerequisite: AN_SCI 1012 or F_W 1012 or instructor’s consent; junior or senior standing. Graded A-F only.

**AN_SCI 4940. Internship in Animal Science & Technology. 1-12 Credit.**
Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Prerequisites: instructor’s consent. Graded on an S/U basis only.

**AN_SCI 4950. Undergraduate Research in Animal Science. 1-3 Credit.**
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision. Prerequisites: At least sophomore standing or instructor’s consent.

**AN_SCI 4973. Molecular and Cellular Techniques in Animal Science. 4 Credits.**
A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper. Prerequisites: an introductory course in biology and a course in organic chemistry, at least junior standing and instructor’s consent.

**AN_SCI 4975. Beef Production and Management. 3 Credits.**
Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle. Prerequisites: AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor’s consent.

**AN_SCI 4976. Dairy Production. 3 Credits.**
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects. Prerequisites: AN_SCI 1065, AN_SCI 2165, AN_SCI 3212, and AN_SCI 3232 or instructor’s consent.

**AN_SCI 4977. Horse Production. 3 Credits.**
Systems of horse production: breeding, feeding and management of horses. Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

**AN_SCI 4978. Swine Production. 3 Credits.**
Systems of pork production: breeding, feeding, management of commercial and purebred swine. Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

**AN_SCI 4979. Poultry Production. 3 Credits.**
Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys. Prerequisites: AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

**AN_SCI 7001. Topics in Animal Science. 1-4 Credit.**
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. Prerequisite: instructor’s consent.

**AN_SCI 7312. Monogastric Nutrition. 3 Credits.**
(same as NUTRIT 7020 and NUTR_S 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Prerequisites: graduate standing and AN_SCI 3212. Graded on A/F basis only.
AN_SCI 7314. Physiology of Reproduction. 3 Credits.
Principles of animal reproduction with emphasis on endocrine control of reproductive processes. Prerequisites: graduate standing and Animal Science AN_SCI 3254 and Biological Sciences BIO_SC 1500 or equivalent; or AN_SCI 3254 as a co-requisite and instructor’s consent.

AN_SCI 7323. Applied Livestock Genetics. 2 Credits.
Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Prerequisite: graduate standing and BIO_SC 1010, BIO_SC 1020 or BIO_SC 1500 and MATH 1100.

AN_SCI 7324. Genomics of Plants and Animals. 3 Credits.
Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics. Prerequisites: BIO.SC 1010, BIO.SC 1020 or BIO.SC 1500, MATH 1100, AN.SCI 3213 /PLNT_S 3213 or equivalent; graduate students may enroll with instructor’s consent.

AN_SCI 7332. Ruminant Nutrition. 3 Credits.
Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients. Prerequisites: graduate standing and AN_SCI 3212.

AN_SCI 7344. Processing Muscle Foods. 3 Credits.
(same as F_S 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility. Prerequisites: one Chemistry course.

AN_SCI 7354. Physiology and Biochemistry of Muscle as Food. 3 Credits.
(same as F_S 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food. Prerequisite: graduate standing and BIO.SC 1010 or equivalent or AN.SCI 3214 or instructor’s consent.

AN_SCI 7384. Reproductive Management. 3 Credits.
Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies. Prerequisites: graduate standing and AN_SCI 4314 and instructor’s consent.

AN_SCI 7434. Molecular and Network Evolution. 3 Credits.
Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized. Instructor’s consent required.

AN_SCI 7437. Environmental Physiology. 3 Credits.
Principles of environmental physiology and animal adaptation with emphasis on mechanisms of temperature regulation and related nutritional and metabolic-hormonal functions. Prerequisite: graduate standing and AN_SCI 3254 or equivalent.

AN_SCI 7975. Beef Production and Management. 3 Credits.
Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle. Prerequisites: graduate standing and AN_SCI 1065, AN_SCI 2165 and AN_SCI 3212 or instructor’s consent.

AN_SCI 7976. Dairy Production. 3 Credits.
Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects. Prerequisites: graduate standing and AN_SCI 1065, AN_SCI 2165, AN_SCI 3212 and AN_SCI 3232 or instructor’s consent.

AN_SCI 7977. Horse Production. 3 Credits.
Systems of horse production: breeding, feeding and management of horses. Prerequisites: graduate standing and AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

AN_SCI 7978. Swine Production. 3 Credits.
Systems of pork production: breeding, feeding, management of commercial and purebred swine. Prerequisites: graduate standing and AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

AN_SCI 7979. Poultry Production. 3 Credits.
Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys. Prerequisites: graduate standing and AN_SCI 1065, AN_SCI 2175 and AN_SCI 3212 or instructor’s consent.

AN_SCI 8085. Problems in Animal Science. 1-6 Credit.
Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. Prerequisites: instructor’s consent. Graded on S/U or A/F basis only.

AN_SCI 8087. Seminar in Animal Science. 1 Credit.
Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management.

Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development and livestock production and management. Graded on a S/U basis only.

AN_SCI 8413. Reproductive Biology Seminar. 1 Credit.
Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology.

AN_SCI 8414. Meat Quality. 3 Credits.
(same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Prerequisites: AN_SCI 3214 or equivalent. Graded on A/F basis only.

AN_SCI 8415. Survey of Epigenetics. 3 Credits.
This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The courses designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus. Prerequisite: graduate standing and instructor’s consent.

AN_SCI 8420. Endocrinology. 3 Credits.
Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion. Prerequisite: AN_SCI 7314 or equivalent.

AN_SCI 8424. Meat Investigations. 3 Credits.
(same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field.
of meat science. Graded on A/F basis only. Prerequisites: F_S 3214 / AN_SCI 3214 or equivalent; instructor’s consent.

**AN_SCI 8431. Nutritional Biochemistry of Lipids. 3 Credits.**
(Same as NUTR_S 8310 and NUTRIT 8310). Current concepts in the nutritional regulation of lipid metabolism. Emphasis on integrating information and interpreting current research data. Prerequisites: BIOCHM 4270 and BIOCHM 4272.

**AN_SCI 8437. Ruminant Nutrition. 3 Credits.**
(same as NUTRIT 8230). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings. Prerequisite: AN_SCI 4332/7332 or equivalent and BIOCHM 4270.

**AN_SCI 8438. Nutrient Regulation of Gene Expression. 3 Credits.**
(same as NUTRIT 8438, NUTR_S 8438 and BIOCHM 8438). This second semester of the graduate nutritional sciences core curriculum will cover nutritional biochemistry of minerals and on research literature, with an emphasis on in-depth coverage of several minerals that illustrate emerging themes in mineral nutritional biochemistry and nutrient regulation of gene expression. The course will be taught in tutorial format. Prerequisites: BIOCHM 4270 and BIOCHM 4272 and 1st semester Graduate Nutrition core curriculum.

**AN_SCI 8441. Livestock Production and Management Research Methods. 3 Credits.**
Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research. Prerequisites: STAT 4530/7530 or equivalent or instructor’s consent.

**AN_SCI 8443. Functional Genomics of Mammalian Genomes: Focus on Microarray. 4 Credits.**
The curriculum covers methods for functional genomics. It explores experimental designs, data filtering, ANOVA analysis, power calculations, clustering and classification systems, and functional annotation of genes through lectures, and bioinformatics and regular laboratories. Prerequisites: BIO_SC 4974 and BIO_SC 4374 or equivalent courses, Anova analysis course (STAT 7530) or equivalent experience in using Anova analysis. May be repeated for credit. Graded on A/F basis only.

**AN_SCI 8447. Recent Advances in Environmental and Endocrine Physiology. 1 Credit.**
Seminar. Presentation, discussion, and critical evaluation of current status of selected topics in environmental and endocrine physiology. Prerequisite: AN_SCI 3254 or equivalent.

**AN_SCI 8450. Research in Animal Science. 1-99 Credit.**
Research in Animal Science.

**AN_SCI 8472. Amino Acid Metabolism. 2 Credits.**
An in-depth study of amino acid metabolism and their relationship to animal nutrition. Prerequisites: BIOCHM 4270 and BIOCHM 4272.

**AN_SCI 8725. Science Outreach: Public Understanding of Science. 1-2 Credit.**
(same as BIO_SC 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

**AN_SCI 9001. Topics in Animal Science. 1-99 Credit.**
Prerequisites: instructor’s consent.

**AN_SCI 9090. Dissertation Research in Animal Science. 1-99 Credit.**
Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.

**AN_SCI 9423. Genetics of Populations. 4 Credits.**
Introduction to quantitative genetics with application to animal and plant breeding. Prerequisite: STAT 4530/7530.

**Antropology (ANTHRO)**

**ANTHRO 1000. General Anthropology. 3 Credits.**
General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

**ANTHRO 1000H. General Anthropology - Honors. 3 Credits.**
General survey course in fields of anthropological concern: archaeology, cultural anthropology, physical anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world. Honors eligibility required.

**ANTHRO 1001. Topics in Anthropology - General. 3 Credits.**
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**ANTHRO 1002. Topics in Anthropology - Biological/Physical/ Mathematics. 1-3 Credit.**
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

**ANTHRO 1003. Topics in Anthropology - Behavioral. 3 Credits.**
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.
ANTHRO 1004. Topics in Anthropology - Social Science. 3 Credits.
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1005. Topics in Anthropology - Humanities. 3 Credits.
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 1060. Human Language. 3 Credits.
(same as LINGST 1060, C_S_D 1060 and ENGLISH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

ANTHRO 1150. Introduction to Folklore Genres. 3 Credits.
(same as ENGLISH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

ANTHRO 1200. Significant Discoveries of Archaeology. 3 Credits.
Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

ANTHRO 1300. Multiculturalism: An Introduction. 3 Credits.
Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.

ANTHRO 1350. Deviance: A Cross-Cultural Perspective. 3 Credits.
Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

ANTHRO 1500. Monkeys, Apes and Humans. 3 Credits.
For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

ANTHRO 2001. Topics in Anthropology-General. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2002. Topics in Anthropology-Biological/Physical/ Mathematics. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2003. Topics in Anthropology - Behavioral. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2004. Topics in Anthropology - Social Science. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2005. Topics in Anthropology - Humanities. 1-3 Credit.
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 2020. Fundamentals of Archaeology with Laboratory. 4 Credits.
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. Prerequisites: sophomore standing recommended. No credit for both ANTHRO 2020 and 2021.

ANTHRO 2021. Fundamentals of Archaeology. 3 Credits.
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. Prerequisites: sophomore standing recommended. No credit for both ANTHRO 2020 and 2021.

ANTHRO 2022. Fundamentals of Archaeology Lab. 1 Credit.
Involves hands-on experience with archaeological materials. Prerequisite: must have completed ANTHRO 2021. No credit given to students who have taken ANTHRO 2020.

ANTHRO 2030. Cultural Anthropology. 3 Credits.
Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior. Prerequisites: sophomore standing recommended.

ANTHRO 2040. Anthropological Linguistics. 3 Credits.
(same as LINGST 2040). Language in relation to other aspects of human behavior. Introduction to description and analysis of the basic units of language. Emphasis on non-Indo-European and preliterate languages. Prerequisites: sophomore standing recommended.

ANTHRO 2050. Introduction to Biological Anthropology with Laboratory. 5 Credits.
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. Prerequisite: Math [MATH] 1100/1120; sophomore standing recommended. No credit for both Anthropology [ANTHRO] 2050 and 2051. Math Reasoning Proficiency Course.

ANTHRO 2051. Introduction to Biological Anthropology. 3 Credits.
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Prerequisite: sophomore standing recommended. No credit for both ANTHRO 2050 and 2051.
ANTHRO 2052. Biological Anthropology Laboratory. 2 Credits.
Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Prerequisites: ANTHRO 2051 or equivalent and MATH 1100/1120. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

ANTHRO 2100. Indigenous Religions. 3 Credits.
(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

ANTHRO 2100H. Indigenous Religions - Honors. 3 Credits.
(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred. Honors eligibility required.

ANTHRO 2150. Introduction to Folklore Field Research. 3 Credits.
(same as ENGLSH 2700). Course will focus on the specifics of how to identify, collect, preserve and document folklore within communities. Prerequisite: ENGLSH 1000.

ANTHRO 2215. World Archaeology. 3 Credits.
Major events in cultural evolution such as control of fire, invention of ceramic and metallurgical technologies, colonization of Australia and the Americas, development of agriculture, and emergence of complex sociopolitical organization are described in all regions of the world. Prerequisite: sophomore standing recommended.

ANTHRO 2300. Anthropology of War. 3 Credits.
Anthropological approaches to tribal and modern war; theories of war’s origins; relation to ecology, economy, gender, belief systems, politics; transformation of tribal warfare by state expansion; peace. Prerequisite: sophomore standing recommended.

ANTHRO 2340. Hunters and Gatherers. 3 Credits.
Exploration of how different hunter-gatherer groups interact with their physical and social environment. Topics include food acquisition, allocation of labor, reproduction and family life, and deciding where to live and when to move. Prerequisite: sophomore standing recommended.

ANTHRO 2500. Primate Anatomy and Evolution. 3 Credits.
This course will explore why primates (and humans) are built the way they are, how they evolved, and what their anatomy tells us about their biology. We will cover basic primate anatomy and ecology, and then survey the fossil record of primate evolution. Prerequisite: sophomore standing recommended.

ANTHRO 2520. Forensic Anthropology. 3 Credits.
This course will introduce students to how biological anthropologists apply expertise in human osteology, skeletal variation and plasticity, skeletal pathology, body decomposition, and archaeological recovery of evidence to medicolegal investigations. Prerequisite: sophomore standing recommended.

ANTHRO 2570. Parents and Offspring. 3 Credits.
A comparative investigation of the evolution of parental behaviors and family interactions in humans and other primates. Prerequisite: sophomore standing recommended.

ANTHRO 2580. Evolution of Human Sexuality. 3 Credits.
Biological and cultural aspects of human reproduction are examined from the perspective of evolutionary and ecological theory. Prerequisite: sophomore standing recommended.

ANTHRO 2800. Introduction to Field Methods in Archaeology. 1-6 Credit.
Techniques of field research and laboratory analysis through field experience. Prerequisite: ANTHRO 2020/2021 or instructor’s consent.

ANTHRO 2825. Analyzing Artifacts. 3 Credits.
A brief introduction to the main methods used to analyze artifacts.

ANTHRO 2950. Research Skills in Anthropology. 1-3 Credit.
Participation in faculty research activities. Course coordinator matches students with participating faculty. Three hours of research activities per week per credit hour. May be repeated to a maximum of nine hours. Prerequisite: instructor’s consent.

ANTHRO 3001. Topics in Anthropology - General. 3 Credits.
Problems, topics, issues, or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3002. Topics in Anthropology-Biological/Physical/Mathematics. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3003. Topics in Anthropology - Behavioral Science. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3004. Topics in Anthropology - Social Science. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3005. Topics in Anthropology - Humanities. 3 Credits.
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

ANTHRO 3150. American Folklore. 3 Credits.
(same as ENGLSH 3700). Regional and ethnic American folklore, with emphasis on analysis of folklore in context. Book reports and two analytical papers based on student field research required.

ANTHRO 3380. Native American Religions. 3 Credits.
(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

ANTHRO 3380H. Native American Religions - Honors. 3 Credits.
(same as REL_ST 3380H). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts. Honors eligibility required.

ANTHRO 3470. Culture as Communication. 3 Credits.
(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction. Prerequisites: sophomore standing.

ANTHRO 3540. Human Biology and Life History. 3 Credits.
A general survey of human biology, focusing on the development of the individual from infancy to adult and the biology of human populations. Prerequisites: one course in Anthropology or Biological Sciences.
ANTHRO 3560. Plagues and Peoples. 3 Credits.
Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments. Prerequisite: sophomore standing or instructor’s consent.

ANTHRO 3600. North American Indian Culture. 3 Credits.
Comparative study of American Indians north of Mexico, emphasizes eastern United States.

ANTHRO 3610. Peoples of Canada. 3 Credits.
This course provides an anthropological approach to the culture and peoples of Canada. The course will include in depth studies of several First Nations People, Quebec, various recent immigrant populations, and the modern popular culture of Canada.

ANTHRO 3650. Aztec, Maya, and Inca Civilization. 3 Credits.
Origin of native Americans and development of American civilizations emphasizing Aztecs, Mayas, and Incas; rise of these civilizations known from archaeology, early European and early native American accounts, and the condition of the descendants today. Prerequisite: sophomore standing.

ANTHRO 3660. Peoples of the Andes. 3 Credits.
Archaeological and linguistic prehistory set the stage for the clash of Iberian and indigenous peoples whose descendants make up the Andean countries. Ethnographic studies provides a basis for their understanding. Prerequisite: sophomore standing.

ANTHRO 3680. Plants and People in Native America. 3 Credits.
Explores the present and past interactions between people and the plant world, covering use of plants as foods, medicines, and in rituals, and reviewing the origin of major food plants. Prerequisite: sophomore standing.

ANTHRO 3700. Cultures of Europe. 3 Credits.
Examines ethnic, linguistic, and folk cultural backgrounds of contemporary Europe and the articulation of local sociocultural units with national society and culture. Prerequisite: sophomore standing or instructor’s consent.

ANTHRO 3780. Cultures of Southeast Asia. 3 Credits.
Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

ANTHRO 4001. Topics in Anthropology-General. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4002. Topics in Anthropology - Biological/Physical/ Mathematics. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4003. Topics in Anthropology - Behavioral Science. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4004. Topics in Anthropology - Social Science. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4005. Topics in Anthropology - Humanities. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 4150. Special Themes in Folklore. 3 Credits.
(same as ENGLISH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department’s consent.

ANTHRO 4160. Themes in African Diaspora Folklore. 3 Credits.
(same as ENGLISH 4710 and BL_STU 4710). Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. ANTHRO 4150 and 4160 may be repeated for a maximum of six hours with instructor’s consent. Prerequisite: junior standing.

ANTHRO 4200. Environment and Archaeology. 3 Credits.
Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction. Prerequisite: Anthropology ANTHRO 2020/2021 or instructor’s consent.

ANTHRO 4240. History of Archaeology. 3 Credits.
Growth of archaeology worldwide since AD 1700. Emphasizes include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline. Prerequisites: Anthropology ANTHRO 2020/2021 or instructor’s consent.

ANTHRO 4280. Archaeology of Religion. 3 Credits.
(same as REL_ST 4280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas. Prerequisites: ANTHRO 2020 and/or REL_ST 2100.

ANTHRO 4300. Comparative Social Organization. 3 Credits.
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally. Prerequisites: ANTHRO 2030 or instructor’s consent.

ANTHRO 4320. Ecological and Environmental Anthropology. 3 Credits.
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use. Prerequisites: junior or senior standing or instructor’s consent.

ANTHRO 4340. Cultural Evolution and Change. 3 Credits.
Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence. Prerequisites: ANTHRO 2030 or instructor’s consent.
ANTHRO 4350. Psychological Anthropology. 3 Credits.
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

ANTHRO 4360. Medical Anthropology. 3 Credits.
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail. Prerequisite: junior/senior standing or instructor’s consent.

ANTHRO 4370. Anthropology of Gender. 3 Credits.
(same as WGST 4370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

ANTHRO 4380. Anthropological Theories of Religion. 3 Credits.
(same as REL_ST 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today. Prerequisites: Anthropology [ANTHRO] 2030, Anthropology [ANTHRO] or Religious Studies [REL_ST] 2100, or instructor’s consent.

ANTHRO 4400. Language and Culture. 3 Credits.
(same as LINGST 4400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis. Prerequisite: ANTHRO 2040 or LINGST 2040 or instructor’s consent.

ANTHRO 4412. Gender, Language, and Communication. 3 Credits.
(same as COMMUN 4412 and LINGST 4412). Relationship among gender, language, nonverbal communication, and culture. Prerequisite: junior standing or departmental consent.

ANTHRO 4420. Historical Linguistics. 3 Credits.
(same as LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics. Prerequisites: junior/senior standing or instructor’s consent.

ANTHRO 4500. Human Origins. 5 Credits.
History and theory in the study of human paleontology. Prerequisites: ANTHRO 2050/2052 or instructor’s consent.

ANTHRO 4540. Human Biological Variation. 3 Credits.
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation. Prerequisites: ANTHRO 2050/2051 or BIO_SC 1010 and MATH 1100/1120.

ANTHRO 4560. Anthropological Genetics. 3 Credits.
Population genetics theory and methods applied to human and primate evolution and variation. Prerequisites: Anthropology [ANTHRO] 2050 or 2051 and 2052, or Biological Science [BIO_SC] 1500, or instructor’s consent.

ANTHRO 4580. Evolutionary Medicine. 3 Credits.
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class. Prerequisites: lower level course in Biology or Biological Anthropology, junior/senior standing or instructor’s consent.

ANTHRO 4600. Ethnographic Studies of Selected Cultures. 3 Credits.
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses. Prerequisites: junior standing or instructor’s consent.

ANTHRO 4620. North American Archaeology. 3 Credits.
Ancient peoples and development of American Indian culture. Prerequisites: ANTHRO 2020/2021 or instructor’s consent.

ANTHRO 4640. Prehistory of the Greater Southwest. 3 Credits.
The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well. Prerequisites: ANTHRO 2020/2021.

ANTHRO 4650. Prehistory of Mesoamerica. 3 Credits.
Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

ANTHRO 4670. Archaeology of South America. 3 Credits.
Development of culture in South America from the Pleistocene to European contact. Prerequisites: ANTHRO 2020/2021, or junior/senior standing.

ANTHRO 4680. Cultures and Peoples of the Amazon. 3 Credits.

ANTHRO 4700. Old World Prehistory. 3 Credits.
Beginnings of culture in the Old World through the early Iron Age. Prerequisites: ANTHRO 2020/2021, or instructor’s consent.

ANTHRO 4720. Mesolithic, Neolithic, and Bronze Age Archaeology. 3 Credits.
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods. Prerequisites: junior/senior standing or instructor’s consent.

ANTHRO 4740. Celtic and Iron Age Archaeology. 3 Credits.
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures. Prerequisites: junior/senior standing or instructor’s consent.

ANTHRO 4770. Asiatic Prehistory. 3 Credits.
Prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania. Prerequisites: junior/senior standing or instructor’s consent.

ANTHRO 4790. Culture and Society in South Asia. 3 Credits.
(same as S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life,
urbanization, public culture, popular culture, social change, and the South Asian diaspora. Prerequisite: junior standing.

ANTHRO 4800. Field Methods in Archaeology. 1-8 Credit.
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials. Prerequisites: ANTHRO 2800 or equivalent.

ANTHRO 4810. Paleoethnobotany. 3 Credits.
Application of ethnobotanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoilths, pollen); research questions in ethnobotany; integration of ethnobiological and archaeological data. Critique of original works in the field emphasized. Prerequisites: junior/senior standing or instructor’s consent.

ANTHRO 4820. Zooarchaeology. 3 Credits.
Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication. Prerequisites: ANTHRO 2020/2022 or instructor’s consent.

ANTHRO 4826. Stone Artifact Analysis. 3 Credits.
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools. Prerequisite: ANTHRO 2020/2022 or instructor’s consent.

ANTHRO 4828. Archaeological Analysis of Ceramics. 3 Credits.
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism. Prerequisite: ANTHRO 2030 and/or 2022.

ANTHRO 4830. Ethnographic Methods. 3 Credits.
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials. Prerequisites: ANTHRO 2030 or instructor’s consent.

ANTHRO 4850. Practical Phonetics for Fieldwork. 3 Credits.
(same as LINGST 4850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions. Prerequisites: junior standing or instructor’s consent.

ANTHRO 4860. Techniques in Linguistic Analysis. 3 Credits.
(same as LINGST 4860). Problems in analyzing data from various languages. Prerequisites: introductory course in LINGST or instructor’s consent.

ANTHRO 4870. Field Methods in Linguistics. 4 Credits.
(same as LINGST 4870 and ENGLISH 4670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language. Prerequisites: 9 hours LINGST or instructor’s consent.

ANTHRO 4880. Demographic Anthropology. 3 Credits.
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Prerequisites: MATH 1100/1120 and junior/senior standing or instructor’s consent. Math Reasoning Proficiency Course.

ANTHRO 4890. Human Skeletal Identification and Analysis. 5 Credits.
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification. Prerequisite: ANTHRO 2050/2052 or instructor’s consent.

ANTHRO 4894. Skeletal Biology. 3 Credits.
This course is designed to provide students advanced and in-depth training in skeletal biology. Basic bone biology will be studied and advanced methods of skeletal analysis applicable to forensic anthropology and bioarchaeology will be explored. Prerequisites: ANTHRO 4890 or equivalent background in osteology and/or anatomy.

ANTHRO 4940. Internship in Anthropology. 3-6 Credit.
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Prerequisites: junior standing; Anthropology major, coordinator’s consent. 2.5 GPA. Graded on S/U basis only.

ANTHRO 4950. Undergraduate Research in Anthropology. 2-8 Credit.
Advanced research approved by and under the direction of a departmental faculty member. Prerequisites: junior/senior standing and instructor’s consent.

ANTHRO 4950H. Honors Research in Anthropology. 3 Credits.
Individual study and research leading to Honors in Anthropology, Anthropology majors only. Prerequisites: junior or senior standing; Honors level GPA, instructor’s consent. May be repeated for up to 6 credit hours.

ANTHRO 4960. Undergraduate Readings in Anthropology. 1-99 Credit.
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis. Prerequisites: two courses in Anthropology and instructor’s consent.

ANTHRO 4990. Capstone Seminar in Anthropology. 3 Credits.
Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples. Prerequisites: Anthropology major and senior standing, or instructor’s consent.

ANTHRO 7001. Topics in Anthropology-General. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

ANTHRO 7150. Special Themes in Folklore. 3 Credits.
(same as ENGLISH7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Prerequisite: instructor’s consent for repetition.

ANTHRO 7160. Themes in African Diaspora Folklore. 3 Credits.
(same as ENGLISH 7710 and BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group.
ENGLISH 7700 and 7710 may be repeated for a maximum of six hours with instructor’s consent. Prerequisite: graduate standing.

ANTHRO 7200. Environment and Archaeology. 3 Credits.
Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

ANTHRO 7240. History of Archaeology. 3 Credits.
Growth of archaeology worldwide since AD 1700. Emphasis include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.

ANTHRO 7280. Archaeology of Religion. 3 Credits.
(Same as REL_ST 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas. Prerequisites: ANTHRO 2020 and/or REL_ST 2100.

ANTHRO 7300. Comparative Social Organization. 3 Credits.
Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.

ANTHRO 7320. Ecological and Environmental Anthropology. 3 Credits.
Cultural anthropological approaches to human-environment interaction; cultural adaptations to diverse environments; theoretical developments and current issues; cultural, social, and historical contexts of natural resource use. Prerequisites: graduate standing.

ANTHRO 7340. Cultural Evolution and Change. 3 Credits.
Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.

ANTHRO 7350. Psychological Anthropology. 3 Credits.
Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.

ANTHRO 7360. Medical Anthropology. 3 Credits.
Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail. Prerequisite: graduate standing.

ANTHRO 7370. Anthropology of Gender. 3 Credits.
(Same as WGST 7370) The Anthropology of Gender Introduces the student to the variation in the relationships between males and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures. Graduate standing required.

ANTHRO 7380. Anthropological Theory of Religions. 3 Credits.
(same as REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

ANTHRO 7400. Language and Culture. 3 Credits.
(same as LINGST 7400). Interrelations between language, thought, culture, and society; role of language in cognition; methods and concepts of linguistics in cultural analysis.

ANTHRO 7412. Gender, Language, and Communication. 3 Credits.
(same as COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture. Prerequisite: graduate standing.

ANTHRO 7420. Historical Linguistics. 3 Credits.
(same as LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics. Prerequisites: graduate standing.

ANTHRO 7500. Human Origins. 5 Credits.
History and theory in the study of human paleontology.

ANTHRO 7540. Human Biological Variation. 3 Credits.
Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

ANTHRO 7560. Anthropological Genetics. 3 Credits.
Population genetic theory and methods applied to human and primate evolution and variation. Prerequisite: Anthropology [ANTHRO] 2050/2052 or Biological Science [BIO_SC] 1500.

ANTHRO 7580. Evolutionary Medicine. 3 Credits.
Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

ANTHRO 7600. Ethnographic Studies of Selected Cultures. 3 Credits.
Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplifies ethnographic knowledge gained in lower-level survey courses. Prerequisite: graduate standing.

ANTHRO 7620. North American Archaeology. 3 Credits.
Ancient peoples and development of American Indian culture.

ANTHRO 7640. Prehistory of the Greater Southwest. 3 Credits.
The course will introduce students to the archaeology of aboriginal peoples of the American southwest and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well. Prerequisites: ANTHRO 2020/2021 Fundamentals of Archaeology. Graduate standing required.

ANTHRO 7650. Prehistory of Mesoamerica. 3 Credits.
Covers the archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s. Prerequisite: graduate standing.

ANTHRO 7670. Archaeology of South America. 3 Credits.
Development of culture in South America from the Pleistocene to European contact. Prerequisites: Anthropology [ANTHRO] 2020/2021 or graduate standing.

ANTHRO 7680. Cultures and Peoples of the Amazon. 3 Credits.
Ethnographic survey of indigenous Amazonian cultures Graduate Standing Required.

ANTHRO 7700. Old World Prehistory. 3 Credits.
Beginnings of culture in the old world through the early Iron Age.
ANTHRO 7720. Mesolithic, Neolithic, and Bronze Age Archaeology. 3 Credits.
Analysis of both hunter-gatherer and food-producing prehistoric sociocultural systems in western Eurasia and adjacent areas from the end of the Pleistocene until the development of iron metallurgy. Includes the symbolic material of these periods. Prerequisites: graduate standing.

ANTHRO 7740. Celtic and Iron Age Archaeology. 3 Credits.
Analysis of the pre-and protohistoric sociocultural systems of the Celts and other iron-using tribal cultures of western Eurasia from the inception of an iron based technology until the full historic period. Includes the symbolic material of these cultures. Prerequisites: graduate standing.

ANTHRO 7770. Asiatic Prehistory. 3 Credits.
Survey of the prehistory and early cultures of Asia excluding the Near East. Emphasis on Northern Asia, China, Japan, South and Southeast Asia and Oceania. Prerequisites: graduate standing.

ANTHRO 7790. Cultures and Society in South Asia. 3 Credits.
(same as South Asian Studies [S_A_ST] 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora. Prerequisite: graduate standing.

ANTHRO 7800. Field Methods in Archaeology. 1-8 Credit.
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials. Prerequisite: graduate standing.

ANTHRO 7810. Paleoenthnobotany. 3 Credits.
Application of ethno botanical approaches in archaeology; techniques to recover and interpret floral remains (macroremains, phytoliths, pollen); research questions in ethnobotany; integration of ethnobotanical and archaeological data. Critique of original works in the field emphasized. Prerequisites: graduate standing.

ANTHRO 7820. Zooarchaeology. 3 Credits.
Survey of specialized techniques for archaeological/zoological analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication. Prerequisites: graduate standing.

ANTHRO 7826. Stone Artifact Analysis. 3 Credits.
Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

ANTHRO 7828. Archaeological Analysis of Ceramics. 3 Credits.
To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism. Prerequisites: ANTHRO 2020 and/or 2022. Graduate standing required.

ANTHRO 7830. Ethnographic Methods. 3 Credits.
Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials. Prerequisites: graduate standing.

ANTHRO 7850. Practical Phonetics for Fieldwork. 3 Credits.
(same as LINGST 7850). Self-paced course using computer and tape recorded lessons from world’s languages. Teaches practical articulatory and transcription phonetics. Weekly meeting with instructor to monitor progress, resolve questions. Prerequisites: graduate standing.

ANTHRO 7860. Techniques in Linguistic Analysis. 3 Credits.
(same as LINGST 7860). Problems in analyzing data from various languages.

ANTHRO 7870. Field Methods in Linguistics. 4 Credits.
(same as LINGST 7870 and ENGLISH 7670). Intensive training in collection and analysis of data taken from a native speaker of non-Indo-European language. Prerequisites: 6 hours of LINGST, graduate standing and instructor’s consent.

ANTHRO 7880. Demographic Anthropology. 3 Credits.
The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.

ANTHRO 7890. Human Skeletal Identification and Analysis. 5 Credits.
Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

ANTHRO 7940. Internship in Anthropology. 3-6 Credit.
Students will work for a semester in a community-based organization (NGO, nonprofit, for profit, or governmental). They will conduct a research study in coordination with that agency. Upon completion of the research study, students will prepare a final report to be given to the agency and turned in for course credit. The course coordinator will help students identify and make contact with interested organization and oversee their progress during the internship. Prerequisites: graduate standing and coordinator’s consent. Graded on S/U basis only.

ANTHRO 7950. Introduction to Post-Graduate Anthropology. 1 Credit.
How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graduate standing required. Graded on S/U basis only.

ANTHRO 7960. Graduate Readings in Anthropology. 1-99 Credit.
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis. Prerequisites: graduate standing and instructor’s consent.

Original research not leading to the preparation of a thesis or dissertation. Prerequisite: instructor’s consent.

ANTHRO 8001. Topics in Anthropology-General. 3 Credits.
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and is announced in advance. May be repeated to a maximum of 9 hours.

ANTHRO 8010. History of Anthropology I. 3 Credits.
Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.
ANTHRO 8020. History of Anthropology II. 3 Credits.
Development of anthropological theories, methods, perspectives, major
ingures and contributions in archaeology and biological anthropology.

Credit.
Advanced work leading to thesis. Prerequisite: consent of major advisor.
Graded on a S/U basis only.

ANTHRO 8157. Seminar in Folklore. 3 Credits.
(same as ENGLISH 8700 and REL_ST 8700). Roots of folklore
scholarship and methodology; their evolution in modern approaches
to the study of oral, traditional, verbal genres; and their performance
in natural folk groups. Prerequisites: graduate standing or permission of
instructor. May repeat to twelve hours with departments consent.

ANTHRO 8187. Seminar in Ecological Adaptation. 3 Credits.
Relationships and interactions between humans and their environments,
with emphasis on the physical and cultural adaptations to environment.
May be repeated to 9 hours maximum.

ANTHRO 8257. Seminar in Ethnohistory. 3 Credits.
Introduction to the uses of historical documents and historical methods in
anthropological research. May be repeated to 6 hours maximum.

ANTHRO 8287. Seminar in Theory and Methods in Archaeology. 3
Credits.
Application of theory and conceptual frameworks to archaeological
studies drawn from both Old and New Worlds. Maybe repeated to 6 hours
maximum.

ANTHRO 8357. Seminar in Psychological Anthropology. 3 Credits.
Focuses on developments in psychological anthropology, cross-cultural
psychology. Special attention on cognition, perception, socialization,
personality assessment, psycho-cultural change, psycho-linguistics,
psychometrics, within cross-cultural contexts. May be repeated to 6 hours
maximum.

ANTHRO 8387. Seminar in Health Anthropology. 3 Credits.
We survey the field of health behaviors from an anthropological
perspective. We ask, what are health behaviors? and what models have
social scientists proposed to account for such actions? May be repeated
to 6 hours maximum.

ANTHRO 8487. Seminar in Anthropological Linguistics. 3 Credits.
(same as Linguistics [LINGST] 8487). Topics: Ethnolinguistics, linguistic
prehistory, pidgin and Creole languages, linguistic theories and cultural
and cultural analysis. French structural anthropology. May be repeated
for 9 hours maximum. Prerequisites: instructor’s consent.

ANTHRO 8587. Seminar in Physical Anthropology. 3 Credits.
Readings and discussion concerning current problems in human and
nonhuman primate evolution, with emphasis on taxonomy, morphology,
and behavior. May be repeated to 9 hrs maximum.

ANTHRO 8687. Seminar in Cultural Dynamics. 3 Credits.
Focuses on geographical, topical, and/or theoretical developments within
cultural anthropology. May repeat to 6 hours maximum.

ANTHRO 8787. Seminar in Old World Archaeology. 3 Credits.
Intensive studies in application of anthropological concepts to problems
in Old World archaeology and prehistory. May be repeated to 9 hours
maximum.

ANTHRO 8857. Scientific Writing in Anthropology. 3 Credits.
Students will be taught to construct research papers that reflect logic,
organization, and clarity. Topics covered include outline preparation,
syntax, punctuation, sentence construction, and correct reference
citation.

ANTHRO 8887. Seminar in Anthropological Methods. 3 Credits.
Focuses on specific methods/techniques for collecting and analyzing data
in archaeological, biological, linguistic, and/or cultural anthropology. May
be repeated to 6 hours maximum.

ANTHRO 8888. Analyzing Anthropological Data I. 3 Credits.
Provides students with the conceptual and analytic tools necessary to
conduct and evaluate the analysis of anthropological data. Examples
gleaned from archaeology, bioanthropology, ethnography, and linguistics
will provide a broad perspective of the application and utility of the
various methods discussed.

ANTHRO 8889. Analyzing Anthropological Data II. 3 Credits.
This course introduces a variety of conceptual tools and advanced
quantitative methods that anthropologists use to analyze their data.
It includes an introduction of common software packages used to
manipulate and analyze anthropological data. Prerequisites: ANTHRO
8888 or grad-level intro stats or instructor’s consent. Graduate standing
required.

ANTHRO 8960. Graduate Readings in Anthropology. 1-99 Credit.
Directed readings in ethnology, linguistics, archaeology, or physical
anthropology not leading to thesis. Prerequisites: graduate standing and
instructor’s consent.

ANTHRO 8987. Seminar in Formal Anthropological Research
Design. 3 Credits.
Methods of fitting statistical and formal research designs to quantitative
and qualitative data discussed and illustrated, with research by
participants. Prerequisite: introductory course in statistics. May repeat
to 9 hours maximum.

Original research not leading to the preparation of a dissertation.
Prerequisite: consent of major advisor.

1-99 Credit.
Advanced work leading to dissertation. Prerequisite: consent of major
advisor. Graded on a S/U basis only.

Arabic (ARABIC)

ARABIC 1100. Elementary Arabic I. 6 Credits.
An elementary level course designed to facilitate student’s acquisition
of basic proficiency in communication within culturally significant
contexts. Students learn Modern Standard Arabic language skills in an
environment integrating interactive video and classroom instruction.

ARABIC 1200. Elementary Arabic II. 6 Credits.
This course builds upon the foundation established in 1100. Greater
emphasis is placed on oral and written expression. Cultural issues are
explored in an environment integrating interactive video and classroom
instruction.

ARABIC 2005. Undergraduate Topics in Arabic - Humanities. 1-3
Credit.
Organized study of selected topics. Subjects and credits may vary from
semester to semester. May be repeated with departmental consent.
No language credit. Prerequisite: sophomore standing or instructor’s
consent. Graded on A/F basis only.
ARCHST 1005. Topics in Architectural Studies - Humanities. 1-99 Credit.
Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. Prerequisite: instructor’s consent. May be repeated for credit up to 6 credit hours.

ARCHST 1100. Visual Design. 3 Credits.
Design study on introduction to basic design and visual composition and their application to creation of two- and three-dimensional abstract and / or functional design. Studio exercises expressed through drawings and abstract models, using various media.

ARCHST 1200. Architectural Drafting and Working Drawings. 3 Credits.
Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

ARCHST 1600. Fundamentals of Environmental Design. 3 Credits.
Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. Prerequisite: instructor’s consent. May be repeated for credit up to 6 credit hours.

ARCHST 2085. Problems in Architectural Studies. 3 Credits.
Supervised independent work. Prerequisite: instructor’s consent.

ARCHST 2100. Understanding Architecture and the American City. 3 Credits.
Analysis of the American city and its architecture.

ARCHST 2210. Understanding Visualization for Animated Films. 3 Credits.
Provides a critical overview of design and visualization techniques in animated film making. Emphasizes the role of built environment and spatial design features.

ARCHST 2220. Computer-Aided Drafting with AutoCad. 3 Credits.
Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design. Prerequisite: Architectural Studies [ARCHST] 1200.

ARCHST 2230. Design Communication I. 3 Credits.
Beginning studio course in techniques and conventions of graphic communication as an aid in the design process for interior designers. Prerequisites: Architectural Studies [ARCHST] 1200 or equivalent and admission to Studio Sequence in Architectural Studies.

ARCHST 2310. Building Systems. 3 Credits.
Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating. Prerequisites: Architectural Studies [ARCHST] 1200, Mathematics [MATH] 1100/1120.

ARCHST 2315. Introduction to Building Systems Laboratory. 1 Credit.
Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.

ARCHST 2316. Advanced Building Systems Lab. 2 Credits.
Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Prerequisite: Architectural Studies [ARCHST] 2315. Graded on A/F basis only.

ARCHST 2811. Studio I. 4 Credits.
Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment. Prerequisite: Architectural Studies [ARCHST] 1200 and admission to Studio Sequence in Architectural Studies.

ARCHST 3100. Color and Light. 3 Credits.
The theory, application, and specification of color and light for interior and architectural design. Lecture and studio format. Prerequisite: Architectural Studies [ARCHST] 1100.

ARCHST 3182. Studio II. 4 Credits.
Advanced studio course in techniques and conventions of graphic communication as aids in the design process. Prerequisite: Architectural Studies [ARCHST] 2230, 2310.

ARCHST 3230. Design Communication II. 3 Credits.
Advanced studio course in techniques and conventions of graphic communication as aids in the design process. Prerequisite: Architectural Studies [ARCHST] 2230.

ARCHST 3371. Design Resource Management. 1 Credit.
Field experience (5 hours per week) in organization and management of resources used by interior designers, including references, product information, and samples of materials and finishes. Prerequisite: restricted to Architectural Studies students only.

ARCHST 3600. Environmental Analysis. 3 Credits.
Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection. Prerequisite: Architectural Studies [ARCHST] 1200, 1600.

ARCHST 3860. Human Factors Programming. 3 Credits.

ARCHST 4001. Topics in Architectural Studies. 1-99 Credit.
Selected current topics in field of interest.

Supervised independent work. Prerequisites: 3000-level course in field of problem and junior or senior standing and instructor’s consent.
ARCHST 4230. Computer Graphic Application for Design I. 3 Credits.
Applications of computer graphics for design and art; includes visualization, animation and creative development. Prerequisite: junior standing. May repeat up to 12 credit hours maximum.

ARCHST 4320. Materials, Methods and Products. 3 Credits.
Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focuses on environmentally sensitive materials. Prerequisite/Corequisite: Architectural Studies [ARCHST] 2310 or instructor’s consent.

ARCHST 4323. Sustainable Technologies and Systems. 3 Credits.
An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors. Prerequisite: junior standing required.

ARCHST 4333. Compliance and Specifications. 3 Credits.
Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents. Prerequisites: Architectural Studies [ARCHST] 2220, 4320, 4813 or 4823.

ARCHST 4355. Recent Trends in Digital Media I. 1-99 Credit.
Recent Trends in Digital Media I.

ARCHST 4410. History of the Designed Environment to 1750. 3 Credits.
An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution. Prerequisites: Art History and Archaeology [AR_H_A] 1110 or 1120.

ARCHST 4411. Study Abroad in Architectural History. 1-3 Credit.
Discovery of historic architecture through on-site tour of timeless cities and places. Prerequisites: instructor’s consent. May be repeated for credit.

ARCHST 4420. History of the Designed Environment after 1750. 3 Credits.
An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from the Industrial Revolution to today. Prerequisites: Art History and Archaeology [AR_H_A] 1110 or 1120.

ARCHST 4430. Guiding Design with Historic Preservation. 3 Credits.
Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties. Pre- or co-requisite: American History or Government, or Art History, or instructor consent.

ARCHST 4440. Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution. 3 Credits.
Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or 1120, or Architectural Studies [ARCHST] 4430.

ARCHST 4450. Visual Presentation for Design. 3 Credits.
Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout, storytelling, critiques, and hands on exercise.

ARCHST 4455. Recent Trends. 1-99 Credit.
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.

ARCHST 4620. Environment and Behavior. 3 Credits.
Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design. Prerequisites: junior standing.

ARCHST 4630. Shaping Human Settlements. 3 Credits.
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design. Prerequisite: junior standing.

ARCHST 4660. Housing Concepts and Issues. 3 Credits.
Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections. Prerequisite: junior standing.

ARCHST 4700. Place-Making in Community Design. 3 Credits.
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project. Prerequisite: junior standing.

ARCHST 4710. Design Business Practices. 3 Credits.
Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre- or Co-requisites of Studio IV and anticipated graduation during final academic year.

ARCHST 4813. Interiors Studio III. 4 Credits.

ARCHST 4814. Interiors Studio IV. 4 Credits.
Continuation of Architectural Studies 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces--both vertically and horizontally. Prerequisite: Architectural Studies [ARCHST] 4813.

ARCHST 4815. Construction Documents and Building Information Modeling Studio. 4 Credits.
Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling. Pre or co-requisite: Architectural Studies [ARCHST] 4814 or 4824.

ARCHST 4823. Architectural Studio III. 4 Credits.

ARCHST 4824. Architectural Studio IV. 4 Credits.
Continuation of Architectural Studies [ARCHST] 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space...
to multiple-function layered spaces - both vertically and horizontally. Prerequisite: Architectural Studies [ARCHST] 4823.

ARCHST 4940. Internship in Environmental Design. 1-99 Credit. Field experience in design under professional and educational supervision. Prerequisites: instructor’s consent. Graded on S/U basis only.

ARCHST 4990. Thesis Design Studio. 4 Credits. Capstone experience on a single comprehensive project. Objective is to enable synthesis of previous course work by addressing a design problem defined in Architectural Studies [ARCHST] 4860. Prerequisites: Architectural Studies [ARCHST] 4860, 4814 or 4824.

ARCHST 7001. Topics in Environmental Design. 1-99 Credit. Selected current topics in field of interest. Prerequisite: graduate standing.

ARCHST 7085. Problems in Environmental Design. 1-99 Credit. Supervised independent work. Prerequisites: 3000-level course in field of problem and graduate standing and instructor's consent.

ARCHST 7100. Allied Architecture and Urban Design. 3 Credits. Overview of the built environment in relation to architecture and allied design. Emphasis on architecture, interior, landscape and urban design studies.

ARCHST 7230. Computer Graphic Application for Design I. 3 Credits. Applications of computer graphics for design and art; includes visualization, animation and creative development. Prerequisite: graduate standing. May repeat up to 12 credit hours maximum.

ARCHST 7232. Graduate Design Communication I. 3 Credits. Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

ARCHST 7310. Graduate Building Systems. 3 Credits. Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management. Prerequisites: Mathematics [MATH] 1100/1120.

ARCHST 7315. Graduate Systems Laboratory. 1-9 Credit. Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.

ARCHST 7320. Materials, Methods and Products. 3 Credits. Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials. Prerequisite: graduate standing and Mathematics [MATH] 1100/1120.

ARCHST 7323. Sustainable Technologies and Systems. 3 Credits. An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.

ARCHST 7333. Compliance and Specifications. 3 Credits. Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents. Prerequisites: graduate standing and Textile and Apparel Management [T_A_M] 2100 and Mathematics [MATH] 1100/1120.

ARCHST 7355. Recent Trends in Digital Media I. 2-4 Credit. Recent Trends in Digital Media I.

ARCHST 7410. History of the Designed Environment to 1750. 3 Credits. An in-depth study of the designed environment including housing interiors, and furniture of the major historical periods from prehistory to the Industrial Revolution. Prerequisites: graduate standing and Art History and Archaeology [AR_H_A] 1110 and 1120.

ARCHST 7411. Study Abroad in Architectural History. 1-99 Credit. Discovery of historic architecture through on-site tour of timeless cities and places. Prerequisites: instructor’s consent. May be repeated for credit.

ARCHST 7420. History of the Designed Environment after 1750. 3 Credits. An in-depth study of the designed environment, including housing, interiors, and furniture of the major historical periods from the Industrial Revolution to today. Prerequisites: Art History and Archaeology [AR_H_A] 1110 or 1120.

ARCHST 7430. Guiding Design with Historic Preservation. 3 Credits. Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties. Prerequisites: American History or Government or Art History or instructor’s consent. Graduate standing required.

ARCHST 7440. Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution. 3 Credits. Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design. Prerequisite: Graduate standing.

ARCHST 7550. Visual Presentation for Design. 3 Credits. Emphasizes principles and techniques for effective visual design presentation. Focuses on concepts of design, layout storytelling, critiques and hands on exercises.

ARCHST 7555. Recent Trends in Environmental Design. 1-99 Credit. Upper-division students seeking additional knowledge in specific subject matter areas including digital media software. Prerequisite: graduate standing.

ARCHST 7620. Environment and Behavior. 3 Credits. Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design. Prerequisites: graduate standing.

ARCHST 7630. Shaping Human Settlements. 3 Credits. Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design. Prerequisite: graduate standing.

ARCHST 7650. Psychosocial Function and Older Adults. 3 Credits. (Same as Family Community Medicine [F_CN_MD] 7751, Health Management and Informatics [HMI] 7751, Human Development and Family Studies [H_D_FS] 7751, Nursing [NURSE] 7751, Public Health [P_HLTH], 7751 and Social Work [SOC_WK] 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A/F basis only.

ARCHST 7660. Housing Concepts and Issues. 1-12 Credit. Evaluate housing policies, regulations, codes, programs; global and ecological perspectives of environment and behavior; historic preservation; financial issues; trends and projections. Prerequisite: graduate standing.

ARCHST 7700. Place-Making in Community Design. 3 Credits. Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project. Prerequisite: graduate standing.

ARCHST 7710. Design Business Practices. 3 Credits. Analysis of the basic professional, human, and business skills necessary for the successful design practice. Pre or Co-requisites of Studio IV and anticipated graduation during final academic year and graduate standing.

ARCHST 7815. Studio V. 4 Credits. A continuation of previous studio with emphasis on digital media. Prerequisite: graduate standing.

ARCHST 7840. Graduate Design Studio. 3 Credits. Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies. Prerequisites: instructor’s consent.

ARCHST 7940. Internship in Environmental Design. 1-99 Credit. Field experience in design under professional and educational supervision. Prerequisites: graduate standing and instructor’s consent. Graded on S/U basis only.

ARCHST 7960. Readings in Environmental Design. 1-99 Credit. Readings in recent research materials. Prerequisite: graduate standing.

ARCHST 8001. Topics in Environmental Design. 1-99 Credit. Selected current topics in field of interest.

ARCHST 8050. Research Methods in Environmental Design. 3 Credits. A comparative study of quantitative and qualitative methods in environmental design with emphasis on research results and analyses. Lectures and seminar discussions. Prerequisite: 12 hours advanced design.

ARCHST 8085. Problems in Environmental Design. 1-99 Credit. Prerequisites: 4000-level course in field of problem and instructor’s consent.

ARCHST 8090. Master’s Research in Environmental Design. 1-99 Credit. Independent research leading to a creative project. Graded on S/U basis only.

ARCHST 8230. Computer Graphic Application for Design II. 3 Credits. Creative computer graphic modeling, rendering and animation projects related to the academic background and interests of individual students. May be repeated to 6 hours maximum.

ARCHST 8233. Graduate Design Communication II. 3 Credits. Advanced studio in techniques and conventions of graphic communication as aides in the design process. Prerequisite: Architectural Studies [ARCHST] 7232 or advisor’s consent.

ARCHST 8600. Graduate Environmental Analysis. 3 Credits. Analysis of design principles and organizational factors operating in a building by means of dissection. Volumetric disposition, circulation pattern, axes, structural system, materials, purpose, and symbolism. Prerequisite: graduate standing.

ARCHST 8630. Design Theory. 3 Credits. Formal environmental design theory concerning historical precedents, current aesthetic trends, and design processes. Assignments investigate philosophical influences, architectonic vocabularies, and communication of idea and artifact. Prerequisite: graduate standing or instructor’s consent. May be repeated up to 12 credit hours.

ARCHST 8820. Graduate Digital Design Studio. 1-99 Credit. Graduate level design experience emphasizing project complexity, design skill refinement, and use of digital media for design representation.

ARCHST 8830. Digital Design Studio II. 4 Credits. Advanced graduate level design experience emphasizing design, documentation, and representation using digital media. Optional development of graduate thesis project may be scheduled in this studio.

ARCHST 8840. Graduate Design Studio. 1-99 Credit. Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies. Prerequisites: instructor’s consent.

ARCHST 8850. Seminar in Environmental Design. 1-4 Credit. Reports, discussion of recent work in area of concentration.

ARCHST 8887. Environment and Behavior II. 3 Credits. Synthesis of environment and behavior themes in design research and application to professional practice. Research on socio-behavioral phenomena, user groups, places. Emphasis on integrated interactive character of elements. Prerequisite: graduate standing or instructor’s consent.

ARCHST 8950. Qualitative Research Methods. 3 Credits. Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Prerequisite: graduate standing. Course may be repeated for credit.

**Art History And Archaeology (AR_H_A)**

AR_H_A 1005. Undergraduate Topics in Art History and Archaeology- Humanities. 1 Credit.
Special studies in Art History and Archaeology.

AR_H_A 1010. Introduction to Museum of Art and Archaeology, UMC. 1 Credit.
This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, to its operation and to its collection. Guest lecturers from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.

AR_H_A 1020. Giotto and the Arena Chapel. 1 Credit.
This course is a brief introduction to the life and work of Giotto di Bondone. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

AR_H_A 1030. Early Works of Michelangelo. 1 Credit.
This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.

AR_H_A 1040. Rembrandt. 1 Credit.
This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special Attention is given to the appreciation of his art by his contemporaries.

AR_H_A 1105. Undergraduate Topics in Art History and Archaeology. 3 Credits.
Special studies in Art History and Archaeology.

AR_H_A 1110. Ancient and Medieval Art. 3 Credits.
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.

AR_H_A 1110H. Ancient & Medieval Art - Honors. 3 Credits.
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe. Honors eligibility required.

AR_H_A 1120. Renaissance through Modern Art. 3 Credits.
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times.

AR_H_A 1120H. Renaissance through Modern Art - Honors. 3 Credits.
Introductory survey of architecture, sculpture and painting of Europe and America from the Renaissance to Modern times. Honors eligibility required.

AR_H_A 1230. Introduction to Asian Arts. 3 Credits.
(same as History [HIST] 1820, Religious Studies [REL_ST] 1820, South Asian Studies [S_A_ST] 1152). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.

AR_H_A 2005. Topics Art History and Archaeology - Humanities. 1-3 Credit.
Study of special topics in Art History and Archaeology.

AR_H_A 2150. The Art of the Book. 3 Credits.
Introduction to the illustrated book as a locus of artistic style, cultural currency, and visual literacy.

AR_H_A 2230. Introduction to the Arts of Islam. 3 Credits.
Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.

AR_H_A 2410. Ancient Technology. 3 Credits.
Engineering, architecture, and military technology in the ancient world.

AR_H_A 2720. African-American Visual Culture. 3 Credits.
(same as Black Studies [BL_STU] 2720) This course introduces students to African-American art history, visual culture, and material culture in the cultural, political, and historical contexts. Specific focuses may include Harlem Renaissance, the Black Arts Movement, and other topics.

AR_H_A 2830. American Art and Architecture. 3 Credits.
Architecture, sculpture, painting of America from 17th century to present day.

AR_H_A 2850. Introduction to Visual Culture. 3 Credits.
Introduction to the problems of understanding, analyzing, and writing about visual culture.

AR_H_A 2860. The Lives of Objects. 3 Credits.
Introduction to the problems of understanding, analyzing and writing about art history and material culture.

AR_H_A 2940. Archaeological Methods. 2-6 Credit.
Methods of excavating various types of sites; recording, preserving their materials. Prerequisite: instructor’s consent.
AR_H_A 3005. Topics in Art History and Archaeology- Humanities. 1-3 Credit.
Selected studies in various facets of art history and archaeology. Prerequisite: Art History and Archaeology [AR_H_A] 1110, 1120, 2830 as appropriate.

AR_H_A 3005H. Topics in Art History and Archaeology- Humanities - Honors. 1-3 Credit.
Selected studies in various facets of art history and archaeology. Prerequisite: AR_H_A 1110, AR_H_A 1120, AR_H_A 2830 as appropriate. Honor Eligibility Required.

AR_H_A 3120. Art and Gender in Antiquity. 3 Credits.
Comparative survey of art and archaeology of Rome, Greece, and Hellenistic period to understand how societies constructed gender through material resources and how cultural perceptions of gender affected individual lives and behaviors. Emphasis on research methods and evaluation of sources. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3210. Near Eastern and Egyptian Art and Archaeology. 3 Credits.
General survey of material culture of the Near East and Egypt from the earliest times to the Iron Age. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3310. Greek Art and Archaeology. 3 Credits.
General survey of material culture in Greece from earliest times to the Hellenistic period. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3410. Roman Art and Archaeology. 3 Credits.
General survey of material culture in the Roman world from earliest times through the 3rd century. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3510. Byzantine and Islamic Art and Archaeology. 3 Credits.
General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean from late antiquity through the rise of the Ottoman empire. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3520. Early Medieval Art and Archaeology. 3 Credits.
An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3530. Late Medieval Art. 3 Credits.
General survey of the art and architecture of Europe from Charlemagne through the 14th century. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or equivalent.

AR_H_A 3620. Italian Renaissance Art. 3 Credits.
General survey of the architecture, painting and sculpture of Italy from the 14th through the 16th century. Prerequisite: Art History and Archaeology [AR_H_A] 1110 or 1120 or equivalent.

AR_H_A 3630. Northern Renaissance Art. 3 Credits.
General survey of the art and architecture of Northern Europe from the 14th through the 16th century. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3640. Baroque Art. 3 Credits.
General survey of 17th century European architecture, painting and sculpture. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3720. Cities in the Western Imagination. 3 Credits.
Interdisciplinary introduction to the forms, functions, and meanings of cities in Europe and the Americas from ancient to modern times; plans and predictions for the future also considered. Emphasis is placed on cities as fields for imaginative activity on the part of those who have designed, built, used, and interpreted them.

AR_H_A 3730. Eighteenth Century European Art. 3 Credits.
General survey of 18th-century European painting, sculpture and architecture. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3740. Nineteenth Century European Art. 3 Credits.
General survey of 19th-century European painting, sculpture and architecture. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3750. Modern Art in Europe and America. 3 Credits.
General survey of international directions in painting, sculpture, and architecture from 1885 to ca. 1940. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3760. Contemporary Art. 3 Credits.
General survey of painting, sculpture, and architecture from the Second World War to the present. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or equivalent.

AR_H_A 3775. The Ancient World on Film. 3 Credits.
(Also as Classical Humanities [CL_HUM] 3775 and Film Studies [FILM_S] 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues. Prerequisite: Prior 2000 level coursework in CL_HUM, AR_H_A, or FILM_S. Instructors consent required.

AR_H_A 3780. Architecture in Film. 3 Credits.
(Also as Film Studies [FILM_S] 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

AR_H_A 3785. Arts and Artists on Film. 3 Credits.
(same as Film Studies [FILM_S] 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

AR_H_A 3830. American Art and Culture, 1500-1820. 3 Credits.
General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or 2830 or equivalent.

AR_H_A 3840. American Art and Culture, 1820-1913. 3 Credits.
General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913. Prerequisite: Art History and Archaeology [AR_H_A] 1120 or 2830 or equivalent.

AR_H_A 3850. American Art and Culture, 1913-Present. 3 Credits.
General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913
Prerequisite: instructor’s consent.

AR_H_A 4005. Topics in Art History and Archaeology-Humanities. 1-99 Credit.
Special studies in art history/archaeology; covers subjects not included in regularly offered courses. Prerequisite: instructor’s consent.

AR_H_A 4120. Women, Art and Society. 3 Credits.
(same as Women and Gender Studies [WGST] 4120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras. Prerequisite: instructor’s consent.

AR_H_A 4320. Archaeology of the Aegean Bronze Age. 3 Credits.
Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C. Prerequisite: instructor’s consent.

AR_H_A 4340. Greek Architecture. 3 Credits.
Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period. Prerequisite: instructor’s consent.

AR_H_A 4350. Greek Pottery. 3 Credits.
Examination of pottery and vase painting with an emphasis on production, iconography, and social context. Prerequisite: instructor’s consent.

AR_H_A 4360. Greek Sculpture. 3 Credits.
Survey of sculptor’s art in Aegean and Classical world from earliest times to Hellenistic period. Prerequisite: instructor’s consent.

AR_H_A 4420. Minor Arts of Antiquity. 3 Credits.
Discussion of selected minor arts and crafts of the Greco-Roman world. Prerequisite: instructor’s consent.

AR_H_A 4440. Roman Architecture. 3 Credits.
The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ. Prerequisite: instructor’s consent.

AR_H_A 4460. Roman Sculpture. 3 Credits.
The origins and development of sculpture in the Roman Republic and the Roman Empire. Prerequisite: instructor’s consent.

AR_H_A 4490. Late Antique Art and Archaeology. 3 Credits.
Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm. Prerequisite: instructor’s consent.

AR_H_A 4510. Byzantine Art and Archaeology. 3 Credits.
Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest. Prerequisite: instructor’s consent.

AR_H_A 4520. Art of the Dark Ages. 3 Credits.
Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century. Prerequisite: instructor’s consent.

AR_H_A 4530. Romanesque Art and Architecture. 3 Credits.
Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 800 to ca. 1150. Prerequisite: instructor’s consent.

AR_H_A 4540. Gothic Art and Architecture. 3 Credits.
Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400. Prerequisite: instructor’s consent.

AR_H_A 4620. Michelangelo and the High Renaissance. 3 Credits.
Sculpture, architecture, paintings, and drawing of Michelangelo in the context of his times. Prerequisite: instructor’s consent.

AR_H_A 4630. The Renaissance Artist. 3 Credits.
Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650. Prerequisite: instructor’s consent.

AR_H_A 4640. Renaissance and Baroque Architecture. 3 Credits.
Problems in European architectural history from the 15th through the 18th century. Prerequisite: instructor’s consent.

AR_H_A 4650. Venetian Painting. 3 Credits.
Survey of Venetian Painting from the 14th through the 18th century. Prerequisite: instructor’s consent.

AR_H_A 4660. Renaissance Figural Arts of Northern Europe. 3 Credits.
Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe. Prerequisite: instructor’s consent.

AR_H_A 4670. Baroque Figural Arts. 3 Credits.
Painting and sculpture of Italy in the 17th century. Prerequisite: instructor’s consent.

AR_H_A 4710. The Arts of the Rococo. 3 Credits.
This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were reflected through the periods’ art architecture. Students will pursue a research topic on rococo art for their semester project. Prerequisite: Art History and Archaeology [AR_H_A] 3730; consent of instructor.

AR_H_A 4720. Revolution and Romanticism: Art C. 1800. 3 Credits.
This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions. Prerequisite: Art History and Archeology [AR_H_A] 3730 or 3740; instructor’s consent. May be repeated for credit.

AR_H_A 4730. Realism Through Post-Impressionism. 3 Credits.
Styles and issues in nineteenth-century art. Prerequisite: instructor’s consent.

AR_H_A 4740. Modern Architecture. 3 Credits.
Problems in the history of architecture from the late 18th century to the present. Prerequisite: instructor’s consent.

AR_H_A 4750. Contemporary World Architecture. 3 Credits.
This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Prerequisite: Art History and
Archeology [AR_H_A] 1120; instructor's consent. Graded on A/F basis only.

**AR_H_A 4760. Modern Sculpture. 3 Credits.**
Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium. Prerequisite: instructor's consent.

**AR_H_A 4780. Advanced Course in Contemporary Art. 3 Credits.**
Topics in European and American painting and sculpture after 1950. Prerequisite: instructor's consent.

**AR_H_A 4820. American Material Culture. 3 Credits.**
An exploration of American material culture from a multidisciplinary perspective. Prerequisite: instructor's consent.

**AR_H_A 4840. American Architecture. 3 Credits.**
An exploration of architecture and urbanism from the colonial period to the present. Prerequisite: instructor's consent.

**AR_H_A 4960. Special Readings in Art History and Archaeology. 1-3 Credit.**
Independent readings and research selected in consultation with supervisory faculty. Prerequisite: instructor's consent.

**AR_H_A 4970. Capstone: Art History and Archaeology. 1 Credit.**
Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course. Instructor's consent.

**AR_H_A 4980. Internship. 3 Credits.**
A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit. Instructor's consent.

**AR_H_A 4996. Honors Proseminar I. 3 Credits.**
Research methods, bibliography, use and criticism of source material. Prerequisite: instructor's consent.

**AR_H_A 4999. Honors Reading and Research I. 3 Credits.**
Individual research projects in preparation of senior thesis. Prerequisite: Art History and Archaeology [AR_H_A] 4996 and instructor's consent.

**AR_H_A 7005. Topics in Art History and Archaeology. 1-99 Credit.**
Special studies in art history or archaeology; covers subjects not included in regularly offered courses. Instructor's consent.

**AR_H_A 7120. Women, Art and Society. 3 Credits.**
(same as Women and Gender Studies [WGST] 7120). Analysis of the careers and works of women artists, and images of women (by female and male artists), in selected eras. Prerequisite: instructor's consent.

**AR_H_A 7130. Museum Studies. 3 Credits.**
Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach; role of architecture; and philosophical and legal issues pertaining to administration of museums. Prerequisite: instructor's consent.

**AR_H_A 7170. Historic Preservation. 3-9 Credit.**
(same as History [HIST] 7450). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field. Prerequisite: instructor's consent.

**AR_H_A 7320. Archaeology of the Aegean Bronze Age. 3 Credits.**
Analysis of the material culture of Greek prehistoric civilizations from 3000 to 1000 B.C. Prerequisite: instructor's consent.

**AR_H_A 7340. Greek Architecture. 3 Credits.**
Survey of the art of building in the Aegean and Classical world from earliest times to the Hellenistic period. Prerequisite: instructor's consent.

**AR_H_A 7350. Greek Pottery. 3 Credits.**
Examination of pottery and vase painting with an emphasis on production, iconography, and social context. Prerequisite: graduate standing and instructor's consent.

**AR_H_A 7360. Greek Sculpture. 3 Credits.**
Survey of sculptor's art in Aegean and Classical world from earliest times to Hellenistic period. Prerequisite: instructor's consent.

**AR_H_A 7410. Byronic Art and Archaeology. 3 Credits.**
Discussion of selected minor arts and crafts of the Greco-Roman world. Prerequisite: instructor's consent.

**AR_H_A 7440. Roman Architecture. 3 Credits.**
The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ. Prerequisite: instructor's consent.

**AR_H_A 7460. Roman Sculpture. 3 Credits.**
The origins and development of sculpture in the Roman Republic and the Roman Empire. Prerequisite: graduate standing and instructor's consent.

**AR_H_A 7470. Latin American Art and Archaeology. 3 Credits.**
Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest. Prerequisite: instructor's consent.

**AR_H_A 7510. Byzantine Art and Archaeology. 3 Credits.**
Historical investigation of Byzantine material culture in the eastern Mediterranean and Russia, from the outbreak of Iconoclasm to the Ottoman conquest. Prerequisite: instructor's consent.

**AR_H_A 7520. Art of the Dark Ages. 3 Credits.**
Survey of the visual arts of western Europe during the period of migrations, from the fall of Rome to the Carolingian renovation of the 9th century. Prerequisite: instructor's consent.

**AR_H_A 7530. Romanesque Art and Architecture. 3 Credits.**
Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 800 to ca. 1150. Prerequisite: instructor's consent.

**AR_H_A 7540. Gothic Art and Architecture. 3 Credits.**
Discussion of selected topics in architecture, sculpture and painting and their artistic and cultural relationship from ca. 1150 to ca. 1400. Prerequisite: instructor's consent.

**AR_H_A 7620. Michelangelo and the High Renaissance. 3 Credits.**
Sculpture, architecture, paintings, and drawings of Michelangelo in the context of his times. Prerequisite: instructor's consent.

**AR_H_A 7630. The Renaissance Artist. 3 Credits.**
Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650. Prerequisite: instructor's consent.

**AR_H_A 7640. Renaissance and Baroque Architecture. 3 Credits.**
Problems in European architectural history from the 15th through the 18th century. Prerequisite: departmental consent.
AR_H_A 7650. Venetian Painting. 3 Credits.
Survey of Venetian painting from the 14th through the 18th century. Prerequisite: instructor’s consent.

AR_H_A 7660. Renaissance Figural Arts of Northern Europe. 3 Credits.
Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the fourteenth through the sixteenth century in northern Europe. Prerequisite: graduate standing and instructor’s consent.

AR_H_A 7670. Baroque Figural Arts. 3 Credits.
Painting and sculpture of Italy in the 17th century. Prerequisite: instructor’s consent.

AR_H_A 7710. The Arts of the Rococo. 3 Credits.
This course explores European art from 1710 to 1770, beginning with an exploration of the rococo as an ornamental language and then moving to case studies of artists, media, and objects in order to assess how social identities were expressed through design. Prerequisites: Art History and Archaeology [AR_H_A] 8110 and consent of instructor.

AR_H_A 7720. Revolution and Romanticism: Art Circa 1800. 3 Credits.
This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions. Prerequisite: Art History and Archaeology [AR_H_A] 8110 and consent of instructor. Graduate Standing Required.

AR_H_A 7730. Realism Through Post-Impressionism. 3 Credits.
Styles and issues in nineteenth-century art. Prerequisite: instructor’s consent.

AR_H_A 7740. Modern Architecture. 3 Credits.
Problems in the history of architecture from the late 18th century to the present. Prerequisite: instructor’s consent.

AR_H_A 7750. Contemporary World Architecture. 3 Credits.
This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective, topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films and field trips. Prerequisite: Art History and Archaeology [AR_H_A] 1120 and instructor’s consent. Graded A-F only.

AR_H_A 7760. Modern Sculpture. 3 Credits.
Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium. Prerequisite: departmental consent.

AR_H_A 7780. Advanced Course in Contemporary Art. 3 Credits.
Topics in European and American painting and sculpture after 1950. Prerequisite: instructor’s consent.

AR_H_A 7820. American Material Culture. 3 Credits.
An exploration of American material culture from a multidisciplinary perspective. Prerequisite: instructor’s consent.

AR_H_A 7840. American Architecture. 3 Credits.
An exploration of architecture from the colonial period to the present. Prerequisite: instructor’s consent.

AR_H_A 7940. Archaeological Methods. 2-6 Credit.
Methods of excavating various types of sites; recording, preserving their materials. Prerequisite: instructor’s consent.

AR_H_A 7960. Special Readings in Art History or Archaeology. 1-99 Credit.
Independent readings and research selected in consultation with supervisory faculty. Prerequisite: instructor’s consent.

AR_H_A 7980. Internship in Art History and Archaeology. 3 Credits.
A one semester or full summer intensive internship with specific projects and responsibilities to be arranged by the student and the program director. Prerequisite: instructor’s consent.

AR_H_A 8070. Master’s Tutorial. 1 Credit.
Consultation with faculty advisory and preparation of a scholarly essay based on a graduate research paper. Prerequisite: Art History and Archaeology [AR_H_A] 8110, and other graduate courses in Art History & Archaeology. Graded on S/U basis only.

AR_H_A 8080. Readings for MA Thesis in Art History and Archaeology. 1-99 Credit.
Reading, critical evaluation of literature of special fields of art history and/ or archaeology. Prerequisite: instructor’s consent.

AR_H_A 8090. Master’s Thesis Research and Thesis. 1-99 Credit.
Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only. Prerequisite: instructor’s consent.

AR_H_A 8110. Introduction to Graduate Study. 3 Credits.
Research methods, bibliography, use and criticism of source material. Required of graduate students in Art History and Archaeology who have not had Art History and Archaeology [AR_H_A] 4996. Prerequisite: departmental consent.

AR_H_A 8120. Theories and Methodologies in Art History and Archaeology. 3 Credits.
Literature of art and archaeology in terms of works of leading European and American art historians, archaeologists. Prerequisite: instructor’s consent.

AR_H_A 8130. Museum Studies Seminar. 3 Credits.
Appropriate means for care and display of artifacts. Topics include: accessioning, cataloging, retrieval of information, and laws and ethics of collecting; the museum environment and its monitoring; condition reports, shipping and storage, and conservation. Field trips. Prerequisite: instructor’s consent.

AR_H_A 8140. Art Theory and Criticism. 3 Credits.
Theoretical and critical literature of art from earliest times to the present. Prerequisite: instructor’s consent.

AR_H_A 8170. Historic Preservation Seminar. 3 Credits.
Research techniques to solve research problems and conduct field recording in historic preservation, material culture, historic architecture, and cultural heritage studies. Prerequisite: instructor’s consent.

AR_H_A 8320. Seminar in Greek Art and Archaeology. 1-99 Credit.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8420. Seminar in Roman Art and Archaeology. 1-99 Credit.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8440. Ancient/Medieval Topography. 1-99 Credit.
(same as CLASS 8440). Descriptive and historical analysis of a selected city or site. Subject varies. Prerequisite: instructor’s consent.
AR_H_A 8490. Seminar in Late Antique Art and Archaeology. 3 Credits.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: AR_H_A 7490 or equivalent.

AR_H_A 8520. Seminar in Medieval Art and Archaeology. 1-99 Credit.
Specific subjects of study will be assigned to students for presentation in relation to broader questions of the cultural/historical phenomena of the time, from ca 700 to ca 1400. Prerequisite: instructor’s consent.

AR_H_A 8620. Seminar in Renaissance Art. 3 Credits.
Special subjects of study assigned for Northern or Southern Renaissance for individual research, discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8710. Seminar in 18th Century Art. 1-99 Credit.
Special subjects of study in 18th century art assigned for individual research; reports to be presented and discussed by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8720. Seminar in 19th Century Art. 1-99 Credit.
Special subjects of study in 19th century art assigned for individual research; reports to be presented and discussed by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8740. Seminar in Modern Architecture. 1-99 Credit.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8750. Seminar in Modern and Contemporary Art. 1-99 Credit.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 8800. Seminar in American Art. 1-99 Credit.
Special subjects of study assigned for individual research; discussion of reports by seminar members. Prerequisite: instructor’s consent.

AR_H_A 9080. Readings for PhD Dissertation in Art History and Archaeology. 1-99 Credit.
Reading, critical evaluation of literature of special fields of art history and/or archaeology. Prerequisite: instructor’s consent.

AR_H_A 9090. Doctoral Dissertation Research in Art History and Archaeology. 1-99 Credit.
Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only. Prerequisite: instructor’s consent.

**Art-Ceramics (ART_CERM)**

ART_CERM 2100. Beginning Ceramics. 3 Credits.
Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee. Prerequisite: instructor’s consent.

ART_CERM 3100. Intermediate Ceramics. 3 Credits.
Continuation of ART_CERM 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee. Prerequisite: instructor’s consent.

ART_CERM 4100. Advanced Ceramics. 3 Credits.
Continuation of ART_CERM 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. Prerequisite: instructor’s consent. May be repeated to 15 hours maximum.

ART_CERM 4110. Ceramics Sculpture. 3 Credits.
Sculptural forms constructed of slabs, coils and wheel-thrown elements. Payment of expendable materials expense is required. Prerequisite: ART_CERM 4100. May be repeated to 15 hours maximum.

ART_CERM 4185. Problems in Ceramics. 1-3 Credit.
Prerequisites: departmental consent.

ART_CERM 7100. Graduate Ceramics. 3 Credits.
Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials expense is required. Prerequisite: ART_CERM 4100. May be repeated to 18 hours maximum.

ART_CERM 7110. Graduate Ceramic Sculpture. 3 Credits.
Directed development of individual work. Payment of expendable materials expense is required. Prerequisite: ART_CERM 4100. May be repeated to 18 hours maximum.

ART_CERM 7185. Problems in Ceramics. 1-3 Credit.
Graduate level work in ceramics. Prerequisites: graduate standing and ART_CERM 7100 and 7110 and departmental consent.

ART_CERM 8100. Graduate Ceramics II. 3 Credits.
Continuation of ART_CERM 7100 Graduate Ceramics. Prerequisites: ART_CERM 7100 or equivalent and graduate standing. Repeatable to 15 hours.

**Art-Drawing (ART_DRAW)**

ART_DRAW 1050. Drawing I. 3 Credits.
An introduction to visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shade using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

ART_DRAW 2200. Drawing II. 3 Credits.
An introduction to drawing systems, problem solving and study of the proportions of the human form. Development of skills and concepts in drawing based on historical and contemporary models, lectures, demonstrations and critiques. Prerequisite: ART_DRAW 1050. Expendable materials fee required.

ART_DRAW 2210. Beginning Color Drawing. 3 Credits.
Theory and practice in the use of pastel working from stilllife, landscape, and portrait. Expendable materials fee required. Prerequisites: ART_DRAW 1050.

ART_DRAW 3200. Drawing III. 3 Credits.
Development of drawing techniques with an emphasis on materials and methods. Emphasis in conceptual and formal skills based on contemporary and historical models. May be repeated to 15 hours maximum. Expendable materials fee required. Prerequisite: ART_DRAW 1050 and 2200.
**ART_DRAW 3210. Intermediate Color Drawing. 3 Credits.**
Continuation of Art-Drawing 2210 with emphasis on design and organization. Expended materials fee required. Prerequisite: ART_DRAW 1050 and 2210.

**ART_DRAW 3220. Anatomical Drawing. 3 Credits.**
Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expended materials fee required. Prerequisites: ART_DRAW 1050 and either 2200 or instructor’s consent.

**ART_DRAW 3230. Beginning Illustration. 3 Credits.**
An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A/F basis only. Expended materials fee. Prerequisites: ART_DRAW 1050 and 2200.

**ART_DRAW 4200. Drawing IV. 3 Credits.**
This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expensed Materials Fee Required. Prerequisite: ART_DRAW 1050, 2200 and 3200.

**ART_DRAW 4210. Advanced Color Drawing. 3 Credits.**
Continuation of Art-Drawing 3210 with emphasis on the expressive properties of color in figural compositions. Repeatable to 15 hours. Expended materials fee required. Prerequisites: ART_DRAW 1050, 2210 and 3210.

**ART_DRAW 4220. Advanced Anatomical Drawing. 3 Credits.**
Continuation of Art-Drawing 3220, Anatomical Drawing, with emphasis on formal analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hour maximum. Expended materials fee required. Prerequisites: ART_DRAW 1050, 2210 and 3220. It is also recommended to take ART_DRAW 2200 and 3200 before taking this class.

**ART_DRAW 4230. Advanced Illustration. 3 Credits.**
Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expended materials fee required. Prerequisites: ART_DRAW 1050, 2200 and 3230.

**ART_DRAW 4285. Problems in Drawing. 1-3 Credit.**
Prerequisites: departmental consent.

**ART_DRAW 7200. Graduate Drawing I. 3 Credits.**
Continuation of ART_DRAW 7200 Graduate Painting. Prerequisite: ART_DRAW 7200 or equivalent and graduate standing. Repeatable to 15 hours.

**ART_DRAW 7210. Graduate Color Drawing. 3 Credits.**
Continuation of ART_DRAW 7210 Graduate Color Drawing. Prerequisite: ART_DRAW 7210 or equivalent and graduate standing. Repeatable to 15 hours.

**ART_DRAW 8285. Problems in Drawing II. 1-3 Credit.**
Advanced independent studio practice including critical evaluation of student’s creative work. Individual study in drawing is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Prerequisite: graduate standing for students with strong preparation in Art; departmental consent; Art-Drawing [ART_DRAW] 7285. Graded on A/F basis only.

**Art-Fibers (ART_FIBR)**

**ART_FIBR 2300. Beginning Fibers. 3 Credits.**
Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expended materials fee required. Prerequisite: ART_FIBR 1030.

**ART_FIBR 3300. Intermediate Fibers. 3 Credits.**
Continuation of Art-Fibers 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface design and a means of developing visual statements. Expended materials fee required. Prerequisite: ART_FIBR 2300.

**ART_FIBR 4300. Advanced Fibers. 3 Credits.**
Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expended materials fee required. Prerequisites: ART_FIBR 3300 or approved equivalents. May repeat to 15 hours maximum.

**ART_FIBR 4385. Problems in Fibers. 1-3 Credit.**
Prerequisites: departmental consent.

**ART_FIBR 7300. Graduate Fibers. 3 Credits.**
Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student’s ideas and goals. Expended materials fee required. Prerequisites: ART_FIBR 4300 and graduate standing. May repeat to 15 hours maximum.

**ART_FIBR 7385. Problems in Fibers. 1-3 Credit.**
Prerequisites: graduate standing and ART_FIBR 7300 and departmental consent.

**ART_FIBR 8300. Graduate Fibers II. 3 Credits.**
Continuation of ART_FIBR 7300 Graduate Fibers. Prerequisites: ART_FIBR 7300 or equivalent and graduate standing. Repeatable to 15 hours.

**Art-General (ART_GNRL)**

**ART_GNRL 1010. Introduction to Art. 3 Credits.**
Basic practice in drawing, painting, design. Exploratory course for beginners. Non-majors only.
ART_GNRL 1020. Appreciation of Art. 3 Credits.
Illustrated discussion with examples from varied historic and contemporary art fields on nature of art, functions, methods of creative expression. One section is writing intensive each semester and the other is NON writing intensive each semester.

ART_GNRL 1030. Basic 2-D Design. 3 Credits.
Basic study of line, shape and texture; their use and control according to the basic variables and the principles of design. Two dimensional exercises employing a variety of tools and materials.

ART_GNRL 1040. Basic 3-D Design. 3 Credits.
A foundational course designed to familiarize students with the elements and principles of three-dimensional design as well as some of the materials, tools, processes and techniques used in the creation of sculptural art. Study and development of formal aesthetic ideas, conceptual vocabulary and technical skills is emphasized. Expendable materials fee required.

ART_GNRL 2000. Color Theory. 3 Credits.
An investigation of various color systems and their application to art. Prerequisites: ART_GNRL 1030 or its equivalent, and sophomore standing.

ART_GNRL 2001. Topics in Art. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics course are repeatable for up to 6 credits per individual topic. Prerequisite: instructor's consent.

ART_GNRL 2001H. Topics in Art - Honors. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Prerequisite: instructor's consent. Honors eligibility required.

ART_GNRL 2005. Topics in Art - Humanities. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Prerequisite: Instructor's consent.

ART_GNRL 2005H. Topics in Art - Humanities - Honors. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Prerequisite: Instructor's consent. Honors eligibility required.

ART_GNRL 2020. International Summer Study Abroad. 4 Credits.
A four-week study abroad in studio art with required participation in scheduled excursions to art-related sites. Students create original art for review at scheduled critiques in 1) Florence, Italy and surrounding cities, or 2) The Netherlands and Belgium. May be repeated once for credit. Prerequisites: instructor's consent.

ART_GNRL 3020. Undergraduate Internship in Art. 1-3 Credit.
Special learning situations not covered by coursework. Credit standards pre-arranged with dept. Prerequisites: junior standing and departmental consent. Open only to Art and Art Education majors. Limit on total hours of problems courses applies.

ART_GNRL 4001. Topics in Art. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Prerequisite: consent of instructor.

ART_GNRL 4001H. Topics in Art - Honors. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to 6 credits per individual topic. Prerequisite: consent of instructor, honors eligibility required.

ART_GNRL 4005. Topics in Art - Humanities. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Prerequisite: Instructor's consent.

ART_GNRL 4005H. Topics in Art - Humanities - Honors. 1-3 Credit.
Special studies in studio art; covers subjects not included in regularly offered courses. Topics courses are repeatable for up to six credits per individual topic. Prerequisite: Instructor's consent. Honors eligibility required.

ART_GNRL 4030. Video Art and the Moving Image. 3 Credits.
Video as a fine art form intersection sculpture, performing arts, doc filmmaking, pop culture and the Internet. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Final Cut Pro demonstrating technical ability and aesthetic vision. May be repeated for credit.
ART_GNRL 4040. 2-D Portfolio Development. 3 Credits.
This course will provide an intensive experience in the development of
a portfolio of personal work outside the traditional media boundaries.
Students will explore media relevant to their particular needs and begin
to explore the connections between their work and contemporary art
and culture through readings, discussions and critiques. Prerequisites:
3000-level or above course in one of the following media areas, Drawing,
Painting or Printmaking. Expendable Materials Fee Required. Junior
Standing and instructor's consent required. May be repeated t 6 credits.

ART_GNRL 4975. Senior Seminar in Art. 3 Credits.
A capstone course for the undergraduate art degree with emphasis
on the production of a written statement relating to the students' visual
research. Prerequisite: senior standing.

ART_GNRL 4976. Design - Senior Seminar. 3 Credits.
Capstone for undergraduate art students who are interested in graphic
design. Emphasis placed on research and writing about the theory and
practice of design. All students will participate in a final, formal portfolio
review with outside evaluators. Prerequisite: senior standing.

ART_GNRL 7001. Topics in Art. 3 Credits.
Special studies in studio art at the graduate level; covers subjects not
included in regularly offered courses. Prerequisite: graduate standing and
instructor's consent. Graded on A/F basis only.

ART_GNRL 7005. Topics in Art - Humanities. 1-3 Credit.
Special studies in graduate level studio art; covers subjects not included
in regularly offered courses. Topics courses are repeatable for up to
6 credits per individual topics. Prerequisite: graduate standing and
instructor's consent.

ART_GNRL 7020. International Summer Study Abroad. 4 Credits.
A four-week study abroad in studio art with required participation in
scheduled excursions to art-related sites. Students create original art for
review at scheduled critiques in 1) Florence, Italy and surrounding cities,
or 2) The Netherlands and Belgium. May be repeated for credit.

ART_GNRL 7030. Video Art and the Moving Image. 3 Credits.
Video as a fine art form intersecting sculpture, performing arts, doc
filmmaking, pop culture and the Internet. Theoretical and historical
knowledge is integrated with studio practice. Students create video works
in final Cut Pro demonstrating technical ability and aesthetic vision. May
be repeated for credit.

ART_GNRL 7085. Problems in Art. 1-3 Credit.
Individual study in a subject area to be proposed by the student and
approved by the instructor. The student will meet periodically on a regular
basis with the instructor to review progress on the work assigned. May
be repeated for credit. Prerequisite: graduate standing for students with
strong preparation in Art; departmental consent. Graded on A/F basis
only.

ART_GNRL 8001. Topics in Art. 1-3 Credit.
Special studies in graduate level studio art; covers subjects not included
in regularly offered courses. Topics courses are repeatable for up to
6 credits per individual topic. Prerequisite: graduate standing and
instructor's consent.

ART_GNRL 8005. Topics in Art - Humanities. 1-3 Credit.
Special studies in graduate level studio art; covers subjects not included
in regularly offered courses. Topics courses are repeatable for up to
6 credits per individual topic. Prerequisite: graduate standing and
instructor's consent.

ART_GNRL 8020. International Summer Study Abroad. 4 Credits.
A four week study abroad in studio art with required participation in
scheduled excursion to art-related sites. Students create original art for
review at schedule critiques in 1) Florence, Italy and surrounding cities,
or 2) The Netherlands and Belgium. May be repeated once for credit.
Prerequisite: graduate standing. Graded on A/F basis only.

ART_GNRL 8090. MFA Thesis Exhibition Documentation. 1 Credit.
Preparation of materials deemed necessary to document in a permanent
form the thesis exhibition. Credit will be granted upon the satisfactory
completion of the document, which will be retained by the Department of
Art. Required of all MFA candidates. Graded on S/U basis only.

ART_GNRL 9010. Graduate Studio Seminar. 1 Credit.
Practical and philosophical concerns of the visual artist. Mandated for all
MFA candidates. Prerequisites: graduate standing.

Art-Graphic Design (ART_GRDN)

ART_GRDN 1400. Beginning Digital Imaging. 1 Credit.
Class will cover the basic tools used in digital imaging software. A variety
of different software may be offered. Course may be repeated for up to
3 hours with the consent of instructor. Graded on S/U basis only.
Prerequisite: basic understanding of the Macintosh computer.

ART_GRDN 2400. Advanced Digital Imaging. 1 Credit.
Class will cover the basic tools used in digital imaging software. A
variety of different software may be offered. Course may be repeated
for up to 3 hours with the consent of instructor. Graded on S/U basis
only. Prerequisite: ART_GRDN 1400, and a basic understanding of the
Macintosh computer.

ART_GRDN 2410. Graphic Design I. 3 Credits.
Emphasis on developing a design language and vocabulary. Projects
explore visual images in two-dimensional space, each one focusing on a
specific set of relationships. Introduction to methodological and research
practices for designers. Payment of expendable materials fee is required.
Prerequisite: ART_GNRL 1030, 1040 and ART_DRAW 1050.

ART_GRDN 2420. Graphic Design II. 3 Credits.
Introduction to the discipline, function and tradition of typography.
Topics include evolution and anatomy of typography, communication,
legibility/readability, language sequence and information hierarchy.
Course concludes with portfolio review for admission into Graphic Design
III. Payment of expendable materials fee is required. Prerequisite:
ART_GRDN 2410.

ART_GRDN 2430. Introduction to Calligraphy. 3 Credits.
Technical and historical instruction on five calligraphic alphabets.
Application of hand lettering to both two and three-dimensional design
projects. Emphasis placed on both technical mastery of letters and
creative expression in projects. Prerequisite: ART_GRDN 1030 and 1050
or instructor's consent.

ART_GRDN 3410. Graphic Design III. 3 Credits.
Digital media and motion graphics are explored through the development
of interactive presentations and web site design. Students experiment
with the computer as a medium for delivery of communication. New,
practical and conceptual skills will be discussed in order to develop
meaningful, interactive user experiences. Payment of expendable
materials fees is required. Prerequisite: ART_GRDN 2420 and successful
completion of the graphic design portfolio review.
ART_GRDN 3420. Graphic Design IV. 3 Credits.
Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required. Prerequisite: ART_GRDN 3410.

ART_GRDN 3430. Advanced Calligraphy. 3 Credits.
Technical and historical instruction to calligraphic alphabets including Uncial, Fraktur, Copperplate and Neuland. Application of hand lettering in two and three-dimensional design projects. Emphasis placed on both mastery of letters and creative exploration in projects. Prerequisite: Art-Graphic Design: ART_GRDN 2430.

ART_GRDN 3440. Packaging Design. 3 Credits.
This course will look at the discipline of packaging design from a three dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required. Prerequisites: Successful completion of the graphic design portfolio review and/or instructor’s consent.

ART_GRDN 3441. The History of Graphic Design. 3 Credits.
Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today’s visual communication. Prerequisites: instructor’s consent.

ART_GRDN 3442. Design for Corporate Identity and Branding. 3 Credits.
Planning, strategy and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required. Prerequisites: successful completion of the graphic design portfolio review and/or instructor’s consent.

ART_GRDN 3443. Letterpress. 3 Credits.
This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours. Instructor’s consent required.

ART_GRDN 4410. Graphic Design V. 3 Credits.
Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required. Prerequisite: Art-Graphic Design [ART_GRDN] 3420.

ART_GRDN 4485. Problems in Graphic Design. 1-3 Credit.
Prerequisite: ART_GRDN 4410, and departmental consent.

ART_GRDN 4996. Imprint - Design Practicum. 3 Credits.
Class operates as professional design studio doing work for university, local and regional clients. Focus on client/designer relationships, contracts and teamwork. Students passing with grade in A range will graduate with departmental honors. Prerequisite: Admission based on GPA (3.3 in art courses) and portfolio review; junior standing. May be repeated for credit.

ART_GRDN 7400. Graduate Graphic Design. 3 Credits.
Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student’s individual investigations. Prerequisite: graduate standing and instructor’s consent. Repeatable to 15 hours maximum.

ART_GRDN 7485. Problems in Graphic Design. 1-3 Credit.
Graduate level work in graphic design. Prerequisite: graduate standing and ART_GRDN 4410, and departmental consent.

ART_GRDN 8400. Graduate Graphic Design II. 3 Credits.
Continuation of ART_GRDN 7400 Graduate Graphic Design. Prerequisites: ART_GRDN 7400 or equivalent and graduate standing. Repeatable to 15 hours.

Art-Painting (ART_PNT)

ART_PNT 2500. Beginning Painting. 3 Credits.
Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

ART_PNT 2510. Beginning Watercolor Painting. 3 Credits.
Theory, practice of painting in water color from still life, landscape, figure. Prerequisites: ART_PNT 1050. Expendable materials fee required.

ART_PNT 3500. Intermediate Painting. 3 Credits.
Continuation of ART_PNT 2500 with the addition of portrait painting. Prerequisite: ART_PNT 2500. Expendable materials fee required.

ART_PNT 3510. Intermediate Watercolor Painting. 3 Credits.
Continuation of Art-Watercolor 2510, Beginning Watercolor, theory and practice of painting in watercolor. Expendable materials fee required. Prerequisite: ART_PNT 2510.

ART_PNT 4500. Advanced Painting. 3 Credits.
Advanced problems in oil and acrylic painting. Prerequisite: ART_PNT 3500. May be repeated to 15 hours maximum. Expendable materials fee required.

ART_PNT 4510. Advanced Watercolor Painting. 3 Credits.
Advanced problems in watercolor. Prerequisite: ART_PNT 3510. May repeat to 15 hours maximum. Expendable materials fee required.

ART_PNT 4585. Problems in Painting. 1-3 Credit.
Prerequisites: ART_PNT 4500 and departmental consent.

ART_PNT 7500. Graduate Painting. 3 Credits.
Advanced study continued. Emphasis on individual creative expression. Prerequisite: ART_PNT 4500 and graduate Art major. May repeat to 15 hours maximum. Expendable materials fee required.

ART_PNT 7510. Graduate Watercolor Painting. 3 Credits.
Advanced study in watercolor. Emphasis on individual creative expression. Prerequisites: ART_PNT 4510 and graduate standing. May repeat to 15 hours maximum. Expendable materials fee required.

ART_PNT 7585. Problems in Painting. 1-3 Credit.
Prerequisites: ART_PNT 7500 and departmental consent.
Art-PHOT 7600. Graduate Photography. 3 Credits.
Continuation of ART_PHOT 7600 Graduate Photography. Prerequisites: ART 7500 or equivalent and graduate standing. Repeatable to 15 hours.

ART_PHOT 7610. Graduate Watercolor Painting. 3 Credits.
Continuation of ART_PHOT 7510 Graduate Watercolor Painting. Prerequisites: ART_PHOT 7510 or equivalent and graduate standing. Repeatable to 15 hours.

ART_PHOT 8585. Problems in Painting II. 1-3 Credit.
Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Prerequisites: graduate standing for students with strong preparation in Art; departmental consent; ART_PNT 7585. Graded on A/F basis only.

Art-Photography (ART_PHOT)

ART_PHOT 2600. Beginning Photography. 3 Credits.
Basic photography as an art form; camera and darkroom techniques; surveys photographic history and aesthetics. Camera with adjustable aperture and shutter required. Payment of expendable materials expense is required. Prerequisite: ART_GNRL 1030, 1040, 1050 and instructor’s consent required.

ART_PHOT 3600. Intermediate Photography. 3 Credits.
Continuation of Art-Photography 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required. Prerequisite: ART_PHOT 2600 or approved equivalent and consent required.

ART_PHOT 4600. Advanced Photography. 3 Credits.
Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. Prerequisites: ART_PHOT 2600 and 3600 or approved equivalents, and consent required. May repeat to 15 hours maximum.

ART_PHOT 4685. Problems in Photography. 1-3 Credit.
Supervised research in creative photography. Prerequisite: ART_PHOT 4410 and departmental consent.

ART_PHOT 7600. Graduate Photography. 3 Credits.
Advanced technical study with emphasis on development of the individual student’s creative ideas. Payment of expendable materials expense is required. Prerequisites: ART_PHOT 3600 and graduate standing and consent required. May repeat to 15 hours maximum.

ART_PHOT 7685. Problems in Photography. 1-3 Credit.
Supervised research in creative photography. Prerequisite: ART_PHOT 4410 and graduate standing.

ART_PHOT 8600. Graduate Photography II. 3 Credits.
Continuation of ART_PHOT 7600 Graduate Photography. Prerequisites: ART_PHOT 7600 or equivalent and graduate standing. Repeatable to 15 hours.

Art-Printmaking (ART_PRNT)

ART_PRNT 2700. Beginning Printmaking. 3 Credits.
Introductory Relief, Intaglio and Lithography techniques in color and black and white including woodcut, linocut reduction, etching; aquatint, dry point, photo mechanics and pronto plate lithography. No prerequisites. May be repeated to six hours maximum. Expendable materials fee required.

ART_PRNT 2730. Serigraphy. 3 Credits.
Introduces methods, materials, and techniques of printmaking with the silk screen. Payment of expendable materials expense is required. Prerequisites: ART_GNRL 1030 and one semester of Drawing. May repeat to 6 hours maximum.

ART_PRNT 3700. Intermediate Printmaking. 3 Credits.
Continuing work in litho, intaglio, relief or serigraphy. Expendable materials fee required. Prerequisites: ART_PRNT 2700 and/or instructor’s consent.

ART_PRNT 4700. Advanced Printmaking. 3 Credits.
Advanced study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. Prerequisites: ART_PRNT 3700 and/or consent required. May be repeatable to 15 hours. Expendable materials fee required.

ART_PRNT 4785. Problems in Printmaking. 1-3 Credit.
Prerequisites: departmental consent.

ART_PRNT 7700. Graduate Printmaking. 3 Credits.
Graduate level study in relief, intaglio, lithographic and/or serigraphy printmaking with emphasis on individual creative expression. Prerequisites: ART_PRNT 4700 and graduate standing. May repeat to 15 hours maximum. Expendable materials fee required.

ART_PRNT 7785. Problems in Printmaking. 1-3 Credit.
Prerequisites: graduate standing, ART_PRNT 7700 and departmental consent.

ART_PRNT 8700. Graduate Printmaking II. 3 Credits.
Continuation of Art-Printmaking [ART_PRNT] 7700 Graduate Printmaking. Prerequisites: Art-Printmaking [ART_PRNT] 7700 or equivalent and graduate standing. Repeatable to 15 hours.

Art-Sculpture (ART_SCUL)

ART_SCUL 2800. Beginning Sculpture. 3 Credits.
Principles of sculptural organization, figure studies, modeling techniques, simple plaster casting. Payment of expendable materials expense is required. Prerequisites: Art-General [ART_GNRL] 1030 or 2200.

ART_SCUL 2810. Experimental Media I. 3 Credits.
Ordering and structuring materials into compositional forms, using various media, traditional as well as new. Subject matter will vary each semester. Prerequisites: Art-General [ART_GNRL] 2200 or instructor’s consent.

ART_SCUL 3800. Intermediate Sculpture. 3 Credits.
Continuation of Art-Sculpture 2800. Introduction to carving techniques. Payment of expendable materials expense is required. Prerequisite: Art-Sculpture [ART_SCUL] 2800.
ART_SCUL 3810. Experimental Media II. 3 Credits.
Continuation of Art-Sculpture 2810. Prerequisite: Art-Sculpture [ART_SCUL] 2810.

ART_SCUL 4800. Advanced Sculpture. 3 Credits.
This course will build skills acquired in Art-Sculpture 3800, Intermediate Sculpture including welding, casting, carving and assemblage with emphasis on the development of a personal visual language. Prerequisite: Art-Sculpture [ART_SCUL] 3800, may repeat to 15 hours maximum.

ART_SCUL 4810. Experimental Media III. 3 Credits.
Continuation of Art-Sculpture 3810. Prerequisite: Art-Sculpture [ART_SCUL] 3810. May repeat to 15 hours maximum.

ART_SCUL 4885. Problems in Sculpture. 1-3 Credit.
Prerequisites: departmental consent.

ART_SCUL 7800. Graduate Sculpture. 3 Credits.
Payment of expendable materials expense is required. Prerequisite: graduate standing. May repeat to 15 hours maximum.

ART_SCUL 7810. Experimental Media IV. 3 Credits.
Advanced study of compositional organization at the graduate level. Prerequisites: Art-Sculpture [ART_SCUL] 4810 and graduate standing. May repeat to 9 hours maximum.

ART_SCUL 7885. Problems in Sculpture. 1-3 Credit.
Prerequisites: graduate standing, Art-Sculpture [ART_SCUL] 7800 and departmental consent.

ART_SCUL 8800. Graduate Sculpture II. 3 Credits.
Continuation of Art-Sculpture [ART_SCUL] 7800 Graduate Sculpture. Prerequisites: Art-Sculpture [ART_SCUL] 7800 or equivalent. Repeatable to 15 hours.

Astronomy (ASTRON)

ASTRON 1010. Introduction to Astronomy. 4 Credits.
Survey of the methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques. Prerequisite: high school algebra and plane geometry, or Math [MATH] 1100/1120, or equivalent.

ASTRON 1020. Introduction to Laboratory Astronomy. 2 Credits.
Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques. Prerequisite: high school algebra and geometry.

ASTRON 3010. Introduction to Modern Astrophysics. 3 Credits.
(same as Physics [PHYSICS] 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies. Prerequisite: Physics [PHYSICS] 2760.

ASTRON 3020. Astrophysical Techniques. 3 Credits.
(same as Physics [PHYSICS] 3020). Elements of modern astronomical instruments, observations and analysis. Prerequisite: Physics [PHYSICS] 3010 or concurrently.

ASTRON 4180. Solar System Science. 3 Credits.

ASTRON 4250. Stellar Astrophysics. 3 Credits.
(same as Physics [PHYSICS] 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation. Prerequisite: Physics [PHYSICS] 3150 or concurrently or instructor’s consent.

ASTRON 4350. Galactic Astronomy. 3 Credits.
(same as Physics [PHYSICS] 4350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-stellar objects. Introduction to cosmology. Prerequisites: Physics [PHYSICS] 3010, 4140 or instructor’s consent.

ASTRON 4360. Extragalactic Astronomy. 3 Credits.
(same as Physics [PHYSICS] 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution. Prerequisite: Physics [PHYSICS] 2760.

ASTRON 4460. Interstellar Medium. 3 Credits.
(same as Physics [PHYSICS] 4460). The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves. Prerequisites: Physics [PHYSICS] 1220 or 2760.

ASTRON 4550. Cosmochemistry. 3 Credits.
(same as Physics [PHYSICS] 4550/7550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy. Prerequisites: Physics [PHYSICS] 2760 or 1220; instructor’s consent.

ASTRON 4950. Undergraduate Research in Astronomy. 1-99 Credit.
Special studies in astronomy; covers subjects not included in courses regularly offered. Prerequisite: instructor’s consent.

ASTRON 4960. Senior Thesis in Astronomy. 3 Credits.
Special studies for senior undergraduate students in astronomy. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research. Prerequisites: instructor’s consent and 3 units of Astronomy [ASTRON] 4950. Departmental consent required for repetition.

ASTRON 7180. Solar System Science. 3 Credits.
(same as Physics [PHYSICS] and Geology [GEOL] 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution. Prerequisites: Physics [PHYSICS] 1220 or 2760 or instructor’s consent.

ASTRON 7550. Cosmochemistry. 3 Credits.
(same as Physics [PHYSICS] 7550). Chemistry of cosmic dust and molecules. Prerequisites: Physics [PHYSICS] 2760 or 1220; instructor’s consent.
ATHTRN 1100. Athletic Training Skills I. 2 Credits.
Introduction to the development of psychomotor skills for athletic training. Taping and wrapping skills for the lower extremity; wound care, ice bag/ massage; whirlpool and hydrocollator use are covered. Graded on A/F basis only. Prerequisite: Restricted to Pre-Athletic Training Majors only; consent of instructor required.

ATHTRN 1200. Athletic Training Skills II. 2 Credits.
Continuation of development of psychomotor skills for athletic training: taping and wrapping of the upper extremities and trunk. Record keeping; basic first aid; and other athletic training administrative tasks are discussed. Graded on A/F basis only. Prerequisite: Pre-Athletic Training Majors; consent of instructor required.

ATHTRN 2100. Principles and Fundamentals of Athletic Training. 3 Credits.
Introduces students to common principles associated with the athletic training profession which include important areas essential for the performance of athletic training duties. May be repeated for credit. Graded on A-F basis only. Prerequisite: Restricted to Pre-athletic training majors; instructor’s consent.

ATHTRN 2150. Athletic Training Practicum I. 3 Credits.
Practical application under the direct supervision of a certified athletic trainer. Athletic training room etiquette; practice and game preparation; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only. Prerequisites: restricted to Athletic Training Majors; ATHTRN 1100, ATHTRN 1200, ATHTRN 2100.

ATHTRN 2250. Athletic Training Practicum II. 3 Credits.
Practical application under the direct supervision of a certified athletic trainer. Continuation of athletic training room etiquette; practice and game prep; understanding, recognizing, evaluating, and treating athletic injuries. Graded on A-F basis only. Prerequisites: Restricted to Athletic Training Majors; ATHTRN 2150.

ATHTRN 2500. Elementary Human Anatomy. 3 Credits.
Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement and homeostasis. An Introduction to key terminology and concepts is also presented. Graded on A/F basis only. Prerequisite: Restricted to Athletic Training Majors only.

ATHTRN 2600. Human Physiology. 3 Credits.
Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems as well as the study of special senses. Graded on A-F basis only. Prerequisites: Restricted to Athletic Training Majors Only.

ATHTRN 3150. Athletic Training Practicum 3. 3 Credits.
Two options are available for this clinical rotation. Option 1: Hands-on experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. Graded on A/F basis only. Prerequisites: Restricted to Athletic Training Majors only; ATHTRN 2250.

ATHTRN 3250. Athletic Training Practicum 4. 3 Credits.
Students further develop and perfect learned athletic training skills under the direct supervision of certified athletic trainer. Graded on A-F basis only. Prerequisite: Restricted to Athletic training majors; ATHTRN 3150.

ATHTRN 3300. Lower Extremity, Trunk, Spine Assessment. 3 Credits.
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the lower extremity, trunk and spine are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only. Prerequisites: Restricted to Athletic training majors; taken concurrently with ATHTRN 3300.

ATHTRN 3350. Lower Extremity, Trunk, Spine Assessment Lab. 2 Credits.
Provides athletic training students with the practical experience associated with theoretical concepts in the lower extremity, trunk, and spine assessment course. Comprehensive orthopedic evaluations and interpretations are conducted for the lower extremity, trunk and spine. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; taken concurrently with ATHTRN 3300.

ATHTRN 3400. Upper Extremity and Head Assessment. 3 Credits.
Provides athletic training students with a systematic approach to orthopedic injury evaluation. Each body segment of the upper extremity, head are examined including functional anatomy, neurological innervations, associated pathologies and comprehensive evaluation. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350.

ATHTRN 3450. Upper Extremity and Head Assessment Lab. 2 Credits.
Provides athletic training students with the practical experience associated with theoretical concepts in the upper extremity and head assessment course. Comprehensive orthopedic evaluations and interpretations are conducted for the upper extremity and head. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; Taken concurrently with ATHTRN 3400.

ATHTRN 3500. Rehabilitation of Athletic Injuries. 4 Credits.
The Theory and Application behind rehabilitative tools utilized in the athletic setting (in-season and out-of-season). Emphasis is placed on developing and administering rehabilitative programs based on injury, the healing process, and return to function/play. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; ATHTRN 3300, ATHTRN 3350, ATHTRN 3400, ATHTRN 3450.
ATHTRN 3600. Administration of Athletic Training. 3 Credits.
Examines the administrative aspects of the athletic trainer in developing and managing a healthcare facility specializing in the care and treatment of the athletic population. Graded on A-F basis only. Prerequisite: restricted to Athletic training majors.

ATHTRN 3700. Therapeutic Modalities. 4 Credits.
Comprehensive study of the various therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Understanding the technology, theory and practical applications of appropriate modalities is emphasized. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; ATHTRN 3500.

ATHTRN 3800. General Medical Conditions. 3 Credits.
Students study the general medical conditions, illnesses and disease found within the athletic population. Emphasis is placed on the recognition, treatment, referral options, of these conditions/diseases. Course graded on A-F basis only. Prerequisites: restricted to Athletic Training majors only. ATHTRN 3150.

ATHTRN 4150. Athletic Training Practicum 5. 3 Credits.
Two options are available for this clinical rotation. Option 1: Hands-on experience with an equipment intensive sport, such as football. Option 2: Health science and medical rotation. A minimum of 80 documented hours is required. Graded on A/F basis only. Prerequisite: Restricted to Athletic Training Majors, ATHTRN 3250.

ATHTRN 4500. Nutrition for Athletic Performance and Rehabilitation. 3 Credits.
Nutritional study examining how nutrition impacts sports performance. Basic Nutritional biochemical and physiological principles provide the foundation for the understanding of the role of nutrition in performance. Graded on A-F basis only. Prerequisites: restricted to Athletic training majors; ATHTRN 3500.

ATHTRN 4720/7720. Introduction to Atmospheric Science (ATM_SC). 4 Credits.
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure. Prerequisite: Atmospheric Science [ATM_SC] 1050 or equivalent. 1050 or equivalent or instructor's consent. Graded on A-F basis only.

ATHTRN 4970. Seminar in Athletic Training I. 3 Credits.
A seminar formatted course that requires students to review and critically evaluate current literature in the athletic training profession. Students are instructed in the proper method for written evaluation of scientific literature and peer presentation. Graded on A-F basis only. Prerequisite: Restricted to Athletic Training Majors, ATHTRN 3250.

ATHTRN 4990. Seminar in Athletic Training II. 3 Credits.
The culminating experience in athletic training which reviews the cognitive, psychomotor and affective domains of athletic training to prepare students to challenge the NATA-BOC examination. Graded on A-F basis only. Prerequisites: Restricted to Athletic Training Majors; ATHTRN 4150.

ATHTRN 4970. Seminar in Athletic Training I. 3 Credits.
A seminar formatted course that requires students to review and critically evaluate current literature in the athletic training profession. Students are instructed in the proper method for written evaluation of scientific literature and peer presentation. Graded on A-F basis only. Prerequisite: Restricted to Athletic Training Majors; ATHTRN 3250.

Atmospheric Science (ATM_SC)

ATM_SC 1050. Introductory Meteorology. 3 Credits.
(same as Geography [GEOG] 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.

ATM_SC 2150. Natural Hazards. 3 Credits.
A survey of natural hazards, including severe thunderstorms, tornadoes, flooding, tropical storms, ocean movements, earthquakes, tsunamis, volcanoes, asteroids, solar weather, managing risk and human impacts. Prerequisites: Atmospheric Science [ATM_SC] 1050 or equivalent or instructor's consent. Graded on A-F basis only.

ATM_SC 2720. Weather Briefing. 1 Credit.
Student participation in daily discussions of current weather patterns and forecasts and their applications to weather sensitive activities including aviation, agriculture and industry. Prerequisites: Atmospheric Science [ATM_SC] 1050.

ATM_SC 2792. Weather Communication. 1 Credit.
Methods of surface and upper air weather observation. How such data are distributed to users in the meteorological community is also addressed. Prerequisite: Atmospheric Science [ATM_SC] 1050 or equivalent or instructor's consent.

ATM_SC 3000. Independent Study in Atmospheric Science. 1-3 Credit.
Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem. Prerequisites: upper-level standing, Atmospheric Science [ATM_SC] 1050 or equivalent, and instructor's consent.

ATM_SC 3600. Climates of the World. 3 Credits.
(same as Geography [GEOG] 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity. Prerequisites: Atmospheric Science [ATM_SC] 1050 or equivalent or graduate standing.

ATM_SC 4001. Topics in Atmospheric Science. 1-99 Credit.
Independent study of a topic dealing with meteorological theory or application of meteorological science to the solution of relevant problem. Prerequisites: junior standing and instructor's consent.

ATM_SC 4110. Broadcast Meteorology I. 2 Credits.
An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Prerequisites: Atmospheric Science [ATM_SC] 1110, 2720, or equivalents, and Co-requisite: ATM_SC 4710. Restricted to Atmospheric Science majors or instructor's consent. Graded on A/F basis only.

ATM_SC 4110. Broadcast Meteorology II. 2 Credits.
(Atmospheric Science [ATM_SC] 1050; Physics [PHYS] 1310/1311). An introduction to broadcast meteorology including the business of media, use of meteorological data to produce a forecast, and television and radio presentation skills. Prerequisites: Atmospheric Science [ATM_SC] 1110, 2720, or equivalents, and Co-requisite: ATM_SC 4710. Restricted to Atmospheric Science majors or instructor's consent. Graded on A/F basis only.

ATM_SC 4310. Atmospheric Thermodynamics. 4 Credits.
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics. Prerequisites: Atmospheric Science [ATM_SC] 1050, Mathematics [MATH] 1700 (C or better), and one physics course.

ATM_SC 4320. Atmospheric Dynamics. 4 Credits.

ATM_SC 4350. Mesoscale Meteorology. 3 Credits.
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local wind forecasting and structure. Prerequisite: Atmospheric Science [ATM_SC] 4720/7720 and Mathematics [MATH] 2300.
ATM_SC 4400. Micrometeorology. 3 Credits.
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed. Prerequisite: Atmospheric Science [ATM_SC] 4310 or Physics [PHYSCS] 2760, Mathematics [MATH] 2300.

ATM_SC 4500. Advanced Meteorological Observation and Instrumentation. 3 Credits.
Automated weather observation and instrumentation used in networks of remote automated weather stations. Emphasis on electronic instrumentation, datalogger programming, data collection and data management, generating dynamic reports on the World Wide Web. Prerequisite: Atmospheric Science [ATM_SC] 1050. May be repeated for credit.

ATM_SC 4510. Remote Sensing for Meteorology and Natural Resources. 3 Credits.
Principles of remote sensing with emphasis on the properties of atmosphere and the earth’s surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Prerequisites: Atmospheric Science [ATM_SC] 1110, Mathematics [MATH] 1500, junior standing or instructor’s consent.

ATM_SC 4520. Environmental Biophysics. 3 Credits.
(same as Geography [GEOG] 4520). Students will learn techniques and principles used to describe the environment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water and gas. Prerequisites: College Physics and Calculus I.

ATM_SC 4550. Atmospheric Physics. 3 Credits.
Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing. Prerequisites: 1 year of college Physics and Mathematics [MATH] 1700.

ATM_SC 4590. Radar Meteorology. 3 Credits.
Course concerns the theory and application of radar in meteorology. Prerequisites: Atmospheric Science [ATM_SC] 1110, Mathematics [MATH] 1700, Physics [PHYSCS] 2750. May be repeated for credit.

ATM_SC 4650. Long-Range Forecasting. 3 Credits.
Physical-dynamical principles of long-range forecasting from a month to a year. Empirical and numerical approaches in forecast practice. Prerequisite: Atmospheric Science [ATM_SC] 4050/7050 or 3600.

ATM_SC 4710. Synoptic Meteorology I. 4 Credits.
Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns. Prerequisites: Atmospheric Science [ATM_SC] 1050, Mathematics [MATH] 1700 (C or better), one physics course (pre or corequisite).

ATM_SC 4720. Synoptic Meteorology II. 4 Credits.
Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research. Prerequisite: Atmospheric Science [ATM_SC] 4710/7710.

ATM_SC 4730. Advanced Forecasting Laboratory. 3 Credits.
Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Prerequisites: Atmospheric Science [ATM_SC] 4710/7710, 4720/7720, Mathematics [MATH] 2300. Graded on A/F basis only.

ATM_SC 4800. Numerical Methods in Atmospheric Science and Natural Resources. 3 Credits.
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets. Prerequisite: Math through Calculus III or senior standing.

ATM_SC 4949. Internship in Meteorology. 1-6 Credit.
Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only. Prerequisites: junior standing, 12 hours Atmospheric Science.

ATM_SC 4950. Undergraduate Research in Atmospheric Science. 1-4 Credit.
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance. Prerequisites: Statistics [STAT] 1400, Mathematics [MATH] 1500, 10 hours of Atmospheric Science and instructor’s consent.

ATM_SC 4990. Daily Analysis and Forecast Interpretation. 3 Credits.
A Capstone experience. In depth daily analysis and interpretation by students of the current and forecast states of the atmosphere. Discussions of implications to specific weather sensitive activities. Prerequisite: senior or graduate Atmospheric Science major.

ATM_SC 7001. Topics in Atmospheric Science. 1-99 Credit.
Development of theory and applications for selected topics in atmospheric science. Prerequisites: graduate standing and instructor’s consent.

ATM_SC 7085. Problems in Atmospheric Science. 1-99 Credit.
Independent study by graduate students in atmospheric science. Prerequisites: graduate standing.

ATM_SC 7310. Atmospheric Thermodynamics. 4 Credits.
Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics. Prerequisites: graduate standing and Atmospheric Science [ATM_SC] 1050, Mathematics [MATH] 1700 (C or better), and one physics course.

ATM_SC 7320. Atmospheric Dynamics. 4 Credits.
Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere. Prerequisite: graduate standing and Atmospheric Science [ATM_SC] 4310/7310.

ATM_SC 7350. Mesoscale Meteorology and Dynamics. 3 Credits.
Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure. Prerequisite: graduate standing and Atmospheric Science [ATM_SC] 4720/7720 and Mathematics [MATH] 2300.

ATM_SC 7400. Micrometeorology. 3 Credits.
Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed. Prerequisite: graduate standing and Atmospheric Science [ATM_SC] 4050/7050.

ATM_SC 7510. Remote Sensing for Meteorology and Natural Resources. 3 Credits.
Principles of remote sensing with emphasis on the properties of atmosphere and the earth’s surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research.
assignments. Prerequisites: Graduate standing or instructor’s consent. Graded A-F only.

**ATM_SC 7520. Environmental Biophysics. 3 Credits.**
(same as Geography [GEOG] 7520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas. Prerequisites: college physics, calculus I.

**ATM_SC 7550. Atmospheric Physics. 3 Credits.**
Physics of atmospheric nucleation-condensation, cloud droplet precipitation formation, associated electrical phenomena, radiation transfer and remote sensing. Prerequisites: graduate standing and 1 year of college Physics and Mathematics [MATH] 2760; graduate standing. May be repeated for credit.

**ATM_SC 7590. Radar Meteorology. 3 Credits.**
Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. Prerequisites: Mathematics [MATH] 1700, Physics [PHYSCS] 4050/7050 or 3600.

**ATM_SC 7710. Synoptic Meteorology I. 4 Credits.**
Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns. Prerequisites: graduate standing and Atmospheric Science [ATM_SC] 1050, Mathematics [MATH] 1700 (C or better), one physics course (pre or corequisite).

**ATM_SC 7720. Synoptic Meteorology II. 4 Credits.**
Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research. Prerequisite: graduate standing and Atmospheric Science [ATM_SC] 4710/7710.

**ATM_SC 7800. Numerical Methods in Atmospheric Science and Natural Resources. 3 Credits.**
Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets. Prerequisite: graduate standing and Math through Calculus III.

**ATM_SC 8001. Topics in Atmospheric Science. 3 Credits.**
Development of the theory with its application for selected topics in atmospheric science. Prerequisites: graduate standing.

**ATM_SC 8090. Masters Research in Atmospheric Science. 1-99 Credit.**
Original investigation in atmospheric science in support of a master’s thesis. Graded on S/U basis only.

**ATM_SC 8400. Atmospheric General Circulation. 3 Credits.**

**ATM_SC 8450. Tropical Meteorology. 3 Credits.**
Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms. Prerequisite: Atmospheric Science [ATM_SC] 4710/7710, 4720/7720 and Mathematics [MATH] 2300; graduate standing and instructor’s consent. Graded on A/F basis only.

**ATM_SC 8500. Radiation in the Atmosphere. 3 Credits.**
Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes. Prerequisites: one year College Physics and Mathematics [MATH] 1700.

**ATM_SC 8550. Nowcasting. 3 Credits.**
Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises. Prerequisites: Atmospheric Science [ATM_SC] 8500, graduate standing and instructor’s consent.

**ATM_SC 8600. Advanced Climate Dynamics. 3 Credits.**
Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification. Prerequisites: Atmospheric Science [ATM_SC] 4320/7320 and 8400 or 3600.

**ATM_SC 9001. Topics in Atmospheric Science. 1-99 Credit.**
Development of the theory with its application for selected topics in atmospheric science. Prerequisites: graduate standing.

**ATM_SC 9085. Problems in Atmospheric Science. 1-99 Credit.**
Independent study by graduate students in atmospheric science. Prerequisites: graduate standing.

**ATM_SC 9087. Seminar in Atmospheric Science. 1-99 Credit.**
Prerequisite: graduate standing.

**ATM_SC 9090. Doctoral Research in Atmospheric Science. 1-99 Credit.**
Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.

**ATM_SC 9300. Introduction to Chaos Theory. 3 Credits.**
Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions. Prerequisite: Atmospheric Science [ATM_SC] 4320/7320, Mathematics [MATH] 4100.

**ATM_SC 9350. Advanced Dynamic Meteorology. 3 Credits.**
Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations. Prerequisite: Atmospheric Science [ATM_SC] 4320/7320.

**ATM_SC 9700. Advanced Synoptic Meteorology. 3 Credits.**
Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed. Prerequisite: Atmospheric Science [ATM_SC] 4720/7720.

**ATM_SC 9712. Convection and Lightning. 3 Credits.**
Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Prerequisite: Atmospheric Science [ATM_SC] 4710/7710, 4720/7720, Mathematics [MATH] 2300; instructor’s consent. Graded on A/F basis only.

**ATM_SC 9800. Numerical Weather Prediction. 3 Credits.**
Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes.
Biochemistry (BIOCHM)

BIOCHM 1090. Introduction to Biochemistry. 3 Credits.
Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Primarily for freshman and sophomore biochemistry majors. Prerequisite: departmental consent.

BIOCHM 1094. Introductory Biochemistry Laboratory. 2 Credits.
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Corequisite: concurrent enrollment in BIOCHM 1090 required. Graded on A/F basis only. Departmental Consent Required.

BIOCHM 2002. Topics in Biochemistry - Biological/Physical Mathematics. 1-4 Credit.
Initial offering of a course in Biochemistry designed primarily for undergraduates.

BIOCHM 2110. The Living World: Molecular Scale. 3 Credits.
Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.

BIOCHM 2112. Biotechnology in Society. 3 Credits.
Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

BIOCHM 2480. Introduction to Macromolecular Structure and Function. 2 Credits.
The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Prerequisites: Organic Chemistry I or concurrent enrollment. Graded on A/F basis only.

BIOCHM 2484. Macromolecular Techniques Laboratory. 2 Credits.
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Corequisites: concurrent enrollment in BIOCHM 2480; Biochemistry majors only. Graded on A/F basis only.

BIOCHM 2484H. Macromolecular Techniques Laboratory - Honors. 2 Credits.
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A/F basis only. Corequisites: concurrent enrollment in BIOCHM 2480; Biochemistry majors only. Honors eligible required.

BIOCHM 3630. General Biochemistry. 3 Credits.
Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism. Prerequisites: CHEM 2050.

BIOCHM 4001. Topics in Biochemistry. 1-99 Credit.
Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

BIOCHM 4270. Biochemistry. 3 Credits.
First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells. Prerequisite: CHEM 2110.

BIOCHM 4272. Biochemistry. 3 Credits.
Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism. Prerequisite: BIOCHM 4270.

BIOCHM 4300. Physical Chemistry of Biological Systems. 3 Credits.
To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Prerequisite: Biochemistry BIOCHM 4270 or concurrent enrollment. Graded on A/F basis only.

BIOCHM 4374. Molecular Biology Laboratory. 3 Credits.
(same as BIO_SC 4974). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976.

BIOCHM 4376. Computer Assisted Sequence Analysis and Molecular Modeling. 3 Credits.
Employes the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules. Prerequisite: CHEM 2110.

BIOCHM 4385. Problems in Biochemistry. 1-3 Credit.
Problems in Biochemistry.

BIOCHM 4460. Cancer Biology. 3 Credits.
(same as BIO_SC 4460). Cancer, cell biology, genetics, biochemistry. Prerequisites: BIOCHM 4272, BIO_SC 2300 and BIO_SC 2200.

BIOCHM 4950. Undergraduate Research in Biochemistry. 2-3 Credit.
Individually directed laboratory research for upperclass students under faculty supervision.

BIOCHM 4970. Senior Seminar in Biochemistry. 1 Credit.
Discuss journal papers dealing with current topics of research, techniques, status of field, importance of results. Students report on completed undergraduate research projects.

BIOCHM 4974. Biochemistry Laboratory. 5 Credits.
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. Prerequisite: BIOCHM 4270.

BIOCHM 4996H. Honors Research in Biochemistry. 2-3 Credit.
Laboratory research for upper level honors students in consultation with Biochemistry faculty. Honors eligibility required.

BIOCHM 7085. Problems in Biochemistry. 1-6 Credit.
Problems in Biochemistry.

BIOCHM 7110. Maps in Medicine Summer Institute. 2 Credits.
Lab/lecture course in which high school teachers gain knowledge of two innovative, inquiry-based programs, Mapping Health and Mapping Cell.
Fate, that focus on influenza and developmental biology and Missouri science standards for biology and health. Graduate standing required. Consent of department required. Graded on S/U basis only.

**BIOCHM 7270. Biochemistry. 3 Credits.**
First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells. Prerequisite: CHEM 2120.

**BIOCHM 7272. Biochemistry. 3 Credits.**
Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism. Prerequisite: BIOCHM 7270.

**BIOCHM 7274. Biochemistry Laboratory. 5 Credits.**
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; radioisotope tracers in metabolism; isolation, purification and kinetics of enzymes. Prerequisites: graduate standing and concurrent enrollment in Biochemistry [BIOCHM] 7270.

**BIOCHM 7374. Molecular Biology Laboratory. 3 Credits.**
(same as BIO_SC 7374). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: graduate standing and BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976.

**BIOCHM 7376. Computer Assisted Sequence Analysis and Molecular Modeling. 2 Credits.**
This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures. Prerequisites: graduate standing and CHEM 2120.

**BIOCHM 7978. Cancer Biology. 3 Credits.**
(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions. Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976.

**BIOCHM 8060. Ethical Conduct of Research. 1 Credit.**
(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**BIOCHM 8090. Research in Biochemistry. 1-99 Credit.**
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**BIOCHM 8240. Introduction to Graduate Biochemistry I. 4 Credits.**
Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination. Graduate standing required. Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor.

**BIOCHM 8260. Macromolecular Systems Integration. 4 Credits.**
To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication; proteomics/cell signaling and metabolism. Prerequisite: BIOCHM 8240 and graduate standing. Course graded on A/F basis only.

**BIOCHM 8360. Nutritional Biochemistry of Carbohydrates. 3 Credits.**
(same as NUTRIT 8360 and NUTR_S 8360). Current concepts with in-depth coverage of selected examples of key regulatory steps controlling carbohydrate metabolism; emphasizing molecular mechanisms. Based entirely on research literature and taught in a tutorial format. Prerequisites: BIOCHM 7272.

**BIOCHM 8362. Introduction to Plant Metabolism. 2 Credits.**
(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A/F basis only.

**BIOCHM 8365. Introduction to Molecular Cell Biology. 2 Credits.**
(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A/F basis only.

**BIOCHM 8390. Molecular Biology of Mineral Nutrition. 3 Credits.**
(same as NUTRIT 8390 and NUTR_S 8390). Current concepts of metal ion transport, intracellular metal trafficking and metal-dependent regulation of gene expression. Based entirely on research literature and taught in a tutorial format. Prerequisites: BIOCHM 7272 and a 4000-level nutrition course.

**BIOCHM 8430. Physical Biochemistry. 3 Credits.**
Physical concepts underlying a variety of physical chemical methods as they apply to biochemical research. Prerequisites: BIOCHM 7272 and CHEM 3300.

**BIOCHM 8432. Enzymology and Metabolic Regulation. 3 Credits.**
A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways. Prerequisite: Biochemistry [BIOCHM] 7272.

**BIOCHM 8438. Nutrient Regulation of Gene Expression. 3 Credits.**
(same as Animal Science [AN_SC] 8438, Nutrition [NUTRIT] 8438, and Nutritional Sciences [NUTR_S] 8438). Current concepts with in-depth coverage of several minerals that illustrate themes in molecular mineral nutrition. Based entirely on research literature and taught in a tutorial format. Prerequisites: Biochemistry [BIOCHM] 7272 and a 4000-level nutrition course.

**BIOCHM 8450. Rotation Research. 1-2 Credit.**
Introductory laboratory research. Graded on A/F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

**BIOCHM 9001. Topics in Biochemistry. 1-9 Credit.**
Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

**BIOCHM 9085. Problems in Biochemistry. 1-6 Credit.**
Problems in Biochemistry.

**BIOCHM 9087. Seminar in Biochemistry. 1 Credit.**
Review of current literature; individual presentation of research or classical science topics.
BIOCHM 9090. Research in Biochemistry. 1-99 Credit.
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

BIOCHM 9430. Molecular Biology I. 4 Credits.
(same as Microbiology [MICROB] 9430) Detailed examination of current fundamental concepts of molecular genetics of bacteria, bacteriophages and yeast. Experimental approaches to analysis of the physical structures of genomic nucleic acids, the biochemistry and genetics of mutations, replication, gene transfer and gene expression will be examined in depth from reports in the current literature.

BIOCHM 9432. Molecular Biology II. 4 Credits.
(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

BIOCHM 9462. Hormone Action. 2 Credits.
A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes. Prerequisites: BIOCHM 7272.

BIOCHM 9466. Plant Biochemistry. 3 Credits.
Emphasizes biochemistry unique to plants; biochemical events plants share with other organisms discussed, compared. Photosynthesis, metabolism, composition, compartmentation, regulation of biochemical events included. Prerequisites: BIOCHM 4272.

BIOCHM 9468. Molecular Biology of Plant Growth and Development. 3 Credits.
(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

BIOCHM 9470. Analytical Biochemistry--Chromatography. 2 Credits.
Principles, experimental design, capabilities, limitations, and applications of the general field of chromatography of biologically important molecules. Eight (2-hour) lectures, eight (4-hour) labs. Four weeks.

BIOCHM 9472. Analytical Biochemistry--Mass Spectrometry. 2 Credits.
Instrumentation, fragmentation mechanisms, interpretation of spectra, combined gas chromatography--mass spectrometry. Eight (2-hour) lectures, eight (4-hour) labs.

**Biological Engineering (BIOL_EN)**

BIOL_EN 1000. Introduction to Biological Engineering. 1-2 Credit.
For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

A review of professional opportunities, registration, ethics, and societies. Prerequisite: sophomore standing.

BIOL_EN 2080. Introduction to Programming for Engineers. 3 Credits.
This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Prerequisites: Mathematics [MATH] 1500. Graded on A/F basis only.

BIOL_EN 2180. Engineering Analysis of Bioprocesses. 3 Credits.

BIOL_EN 3001. Topics in Biological Engineering. 3 Credits.
Current and new technical developments in biological engineering. Prerequisite: instructor’s consent.

BIOL_EN 3050. Environmental Control for Biological Systems. 3 Credits.
Systems for controlling the physical environments (heat, moisture, light, contaminating organism, chemicals) for plant and animal systems including livestock, aquacultures, crops and agricultural products. Prerequisites: Engineering [ENGINR] 2300 and Mathematics [MATH] 4100.

BIOL_EN 3070. Biological Fluid Mechanics. 3 Credits.
Basic principles of fluid mechanics applied to transport processes in biological systems. Prerequisites: Physics [PHYSCS] 2750 and Mathematics [MATH] 1700. Graded on A/F basis only.

BIOL_EN 3075. Introduction to Materials Engineering. 3 Credits.
Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Prerequisite: Mathematics [MATH] 2300, Engineering [ENGINR] 1200, 2200; Co-requisite: One of the following Biological Engineering [BIOL_EN] 3180, Chemical Engineering [CH_ENG] 3261, Mechanical and Aerospace Engineering [MAE] 4231, 4300, or instructor consent. Graded on A/F basis only.

BIOL_EN 3170. Biomaterials. 3 Credits.
Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design. Corequisite: Biological Engineering [BIOL_EN] 2180, Engineering [ENGINR] 2200 or instructor’s consent.

BIOL_EN 3180. Heat and Mass Transfer in Biological Systems. 3 Credits.
Principles of heat and mass transfer and their application to biomedical, bioenvironmental, and bioprocessing areas. Prerequisites: Engineering [ENGINR] 2300 or Chemical Engineering [CH_ENG] 3261, or concurrently.

BIOL_EN 4001. Topics in Biological Engineering. 3 Credits.
Current and new technical developments in biological engineering. Prerequisite: instructor’s consent.

BIOL_EN 4070. Bioelectricity. 3 Credits.
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: Physics [PHYSCS] 2760 and Biological Engineering [BIOL_EN] 3180 or instructor’s consent.
BIOL_EN 4080. Engineering Computation. 3 Credits.
An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Prerequisite: Mathematics [MATH] 4100. Graded on A/F basis only.

BIOL_EN 4085. Problems in Biological Engineering. 1-5 Credit.
Supervised independent study at the undergraduate level. Prerequisite: instructor’s consent.

BIOL_EN 4150. Soil and Water Conservation Engineering. 3 Credits.
(same as Civil Engineering [CV_ENG] 4710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

BIOL_EN 4160. Food Process Engineering. 3 Credits.
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration. Prerequisite: Biological Engineering [BIOL_EN] 3180 or instructor’s consent.

BIOL_EN 4170. Biomaterials Interfaces of Implantable Devices. 3 Credits.
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leveraged in the design of an improved biocompatible surface. Prerequisites: Biological Engineering [BIOL_EN] 3170 or instructor’s consent.

BIOL_EN 4231. Transport Phenomena in Materials Processing. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 4231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Prerequisites: Mechanical and Aerospace Engineering [MAE] 3200, 3400, 4300 (or equivalent courses); and Mathematics [MATH] 4100. Graded on A/F basis only.

BIOL_EN 4250. Irrigation and Drainage Engineering. 3 Credits.
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage. Prerequisites: Civil Engineering [CV_ENG] 3700 or Mechanical and Aerospace Engineering [MAE] 3400 or Biological Engineering [BIOL_EN] 2180.

BIOL_EN 4260. Food Process Engineering II. 3 Credits.
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical separation processes. Prerequisite: Biological Engineering [BIOL_EN] 4160 or instructor’s consent.

BIOL_EN 4270. Design of Experiments and Statistical Quality Control for Process Engineers. 3 Credits.
(same as Chemical Engineering [CH_ENG] 4270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

BIOL_EN 4280. Survey of Bioengineering Techniques. 3 Credits.
Laboratory techniques to train students in Bioelectricity, Biomechantronics, Bioenvironment, Biomaterials, Biophotonics, Bioprocessing. Prerequisites: senior standing. Graded on A/F basis only.

BIOL_EN 4310. Feedback Control Systems. 4 Credits.
(same as Electrical and Computer Engineering [ECE] 4310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Prerequisites: Mathematics [MATH] 4100 and junior/senior standing. Graded on A/F basis only. May be repeated for credit.

BIOL_EN 4315. Introduction to Bioprocess Engineering. 3 Credits.
(same as Chemical Engineering [CH_ENG] 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models. Prerequisites: Biological Engineering [BIOL_EN] 2180 (for Biological Engineering students) or Chemical Engineering [CH_ENG] 2225 (for Chemical Engineering students) or instructor’s consent.

BIOL_EN 4316. Biomass Refinery Operations. 3 Credits.
(same as Chemical Engineering [CH_ENG] 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery. Prerequisite: Biological Engineering [BIOL_EN] 2180 or Chemical Engineering [CH_ENG] 2225 (for Chemical Engineering students) or instructor’s consent.

BIOL_EN 4350. Watershed Modeling Using GIS. 3 Credits.
(same as Civil Engineering [CV_ENG] 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

BIOL_EN 4370. Orthopaedic Biomechanics. 3 Credits.
(same as Veterinary Medicine and Surgery [V_M_S] 4370) Engineering sciences will be leveraged to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Prerequisites: Engineering [ENGINR] 1200, Biological Engineering [BIOL_EN] 3170, instructor’s consent required. Graded on A/F basis only.

BIOL_EN 4380. Applied Electronic Instrumentation. 4 Credits.
Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Prerequisite: Physics [PHYSICS] 2760.

BIOL_EN 4420. Introduction to Biomedical Imaging. 3 Credits.
(same as Physics [PHYSICS] 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging. Prerequisites: PHYSICS 2760.

BIOL_EN 4470. Biomolecular Engineering and Nanobiotechnology. 3 Credits.
Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Prerequisites: senior/graduate standing or instructor’s consent. Graded on A/F basis only.
Biol_en 4480. Physics and Chemistry of Materials. 3 Credits.
(same as Physics [PHYSCS] 4190 and Chemistry [CHEM] 4490 and Nuclear Engineering [NU_ENG] 4319). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid term and one final exam. Graduate students will submit a term paper. Prerequisite: Physics [PHYSCS] 2760/Chemistry [CHEM] 1320 or equivalent/prior approval by instructor.

Biol_en 4550. Design of Livestock Waste Management Systems. 3 Credits.
Development and application of design criteria to the design of agricultural waste management facilities. Prerequisites: Chemistry [CHEM] 1310 and Civil Engineering [CV_ENG] 3700, Mechanical and Aerospace Engineering [MAE] 3400 or instructor’s consent.

Biol_en 4570. Fluorescent Imaging. 3 Credits.
Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Prerequisites: Biological Sciences [BIO_SC] 1500 and Biological Engineering [BIOL_EN] 2180 or instructor’s consent.

Biol_en 4575. Computational Neuroscience. 4 Credits.
(same as Biological Science [BIO_SC] and Electrical and Computer Engineering [ECE] 4580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Prerequisites: Biological Science [BIO_SC] 1010, 1500; Mathematics [MATH] 1500. Graded on A/F basis only.

Biol_en 4580. Mechanical Systems Engineering. 3 Credits.
Fundamentals and applications of prime movers and power transmissions for the design of engineering systems. Prerequisites: Thermodynamics course, Fluid Mechanics course. Corequisite: Engineering [ENGINR] 2100 or Biological Engineering [BIOL_EN] 4380 or instructor’s consent.

Biol_en 4670. Photonics and Nanotechnologies in Optical Biosensors. 3 Credits.
Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Prerequisite: Physics [PHYSCS] 2760. Graded on A/F basis only.

Biol_en 4770. Biomedical Optics. 3 Credits.
Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed. Prerequisite: Physics [PHYSCS] 2760 and Biological Engineering [BIOL_EN] 3180; or instructor’s consent.

Biol_en 4870. Molecular and Cell Mechanics. 3 Credits.
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Prerequisite: Engineering [ENGINR] 2200. Graded on A/F basis only.

Biol_en 4940. Engineering Internship. 2-5 Credit.
Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form. Prerequisite: advisor’s consent.

Biol_en 4980. Biological Engineering Design. 3 Credits.
Capstone design course for the Biological Engineering major. Design of biological system devices or processes. Prerequisite: senior standing or instructor’s consent.

Biol_en 4990. Undergraduate Research in Biological Engineering. 1-5 Credit.
Supervised independent study at the undergraduate level. Prerequisite: instructor’s consent.

Biol_en 4995. Undergraduate Honors Research in Biological Engineering. 1-5 Credit.
Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis. Prerequisite: advisor’s consent.

Biol_en 7001. Topics in Biological Engineering. 1-3 Credit.
Study of advanced developments in biological engineering.

Biol_en 7070. Bioelectricity. 3 Credits.
Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: Physics [PHYSCS] 2760 and Biological Engineering [BIOL_EN] 3180 or instructor’s consent.

Biol_en 7080. Engineering Computation. 3 Credits.
An introduction to numerical methods relevant to biological engineering in the context of scientific computing. Prerequisite: MATH 4100.

Biol_en 7150. Soil and Water Conservation Engineering. 3 Credits.
(same as Civil Engineering [CV_ENG] 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures. Prerequisites: graduate standing BIOL_EN 2180 or CV_ENG 3200, or instructor’s consent.

Biol_en 7160. Food Process Engineering. 3 Credits.
Study of transport phenomena and unit operations in food processing systems. Emphasis on fluid flow and heat transfer in food processing, preservation processes, refrigeration, freezing, psychrometrics, and dehydration. Prerequisite: Biological Engineering [BIOL_EN] 3180 or instructor’s consent.

Biol_en 7170. Biomaterials Interfaces of Implantable Devices. 3 Credits.
Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leveraged in the design of an improved biocompatible surface. Prerequisites: Biological Engineering [BIOL_EN] 3170 or instructor’s consent.

Biol_en 7231. Transport Phenomena in Materials Processing. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Prerequisites: Mechanical and Aerospace Engineering [MAE] 3200, 3400, 4300 or equivalent; and Mathematics [MATH] 4100. Graduate Standing Required. Graded on A-F basis only.

Biol_en 7250. Irrigation and Drainage Engineering. 3 Credits.
Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage. Prerequisites: Civil Engineering [CV_ENG] 3700 or Mechanical and Aerospace Engineering [MAE] 3400 or Biological Engineering [BIOL_EN] 2180.

Biol_en 7260. Food Process Engineering II. 3 Credits.
Continuing study of transport phenomena and unit operations in food processing systems. Emphasis on fluid food evaporation concentration food dehydration, contact equilibrium processes and mechanical
separation processes. Prerequisite: graduate standing and Biological Engineering [BIOL_EN] 7160 or instructor’s consent.

BIOL_EN 7270. Design of Experiments and Statistical Quality Control for Processes. 3 Credits. (same as Chemical Engineering [CH_ENG] 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

BIOL_EN 7310. Feedback Control Systems. 4 Credits. (same as Electrical and Computer Engineering [ECE] 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Prerequisites: Mathematics [MATH] 4100. Graduate Standing Required. Graded A-F only. May be repeated for credit.

BIOL_EN 7315. Introduction to Bioprocess Engineering. 3 Credits. (same as CHEM 7315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analysis proceed through the use of mass balances, energy balances, and empirical or theoretical models. Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or instructor’s consent.

BIOL_EN 7316. Biomass Refinery Operation. 3 Credits. (same as Chemical Engineering [CH_ENG] 7316). Design and operation of processes for conversion and/or fractionization of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery. Prerequisite: Biological Engineering [BIOL_EN] 2180 or Chemical Engineering [CH_ENG] 2225 or instructor’s consent.

BIOL_EN 7350. Watershed Modeling Using GIS. 3 Credits. (same as Civil Engineering [CV_ENG] 7720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPF, Procedures for model calibration/sensitivity data analysis. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

BIOL_EN 7370. Orthopaedic Biomechanics. 3 Credits. (same as Veterinary Medicine and Surgery [V_M_S] 7370). Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Prerequisites: Engineering [ENGINR] 1200 and Biological Engineering [BIOL_EN] 3170. Instructor Consent Required. Graduate Standing Required. Graded on A/F Basis Only.

BIOL_EN 7380. Applied Electronic Instrumentation. 4 Credits. Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Prerequisite: graduate standing and Physics [PHYSICS] 2760.

BIOL_EN 7420. Introduction to Biomedical Imaging. 3 Credits. (same as PHYSICS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasonid, MRI and Optical Imaging, as well as recent developments in biomedical imaging. Prerequisites: PHYSICS 2760.

BIOL_EN 7470. Biomolecular Engineering and Nanobiotechnology. 3 Credits. Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Prerequisites: senior/graduate standing and instructor’s consent. Graded on A/F basis only.

BIOL_EN 7480. Physics and Chemistry of Materials. 3 Credits. (same as PHYSICS 7190 and NU_ENG 7319 and CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours undergraduate/graduate level course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper. Prerequisite: PHYSICS 2760 / CHEM 1320 or equivalent/prior approval by instructor.

BIOL_EN 7550. Design of Livestock Waste Management Systems. 3 Credits. Development and application of design criteria to the design of agricultural waste management facilities. Prerequisites: graduate standing and Chemistry [CHEM] 1310 and Civil Engineering [CV_ENG] 3700, Mechanical and Aerospace Engineering [MAE] 3400 or instructor’s consent.

BIOL_EN 7570. Fluorescent Imaging. 3 Credits. Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Prerequisites: Biological Sciences [BIO_SC] 1500 and Biological Engineering [BIOL_EN] 2180 or instructor’s consent. Graded on A/F basis only.

BIOL_EN 7575. Computational Neuroscience. 4 Credits. (same as BIO_SC 7580 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1205. Graded on A-F basis only.

BIOL_EN 7580. Mechanical Systems Engineering. 3 Credits. Fundamentals and applications of prime movers and power transmissions for the design of engineering systems. Prerequisites: graduate standing and Thermodynamics course, Fluid Mechanics course. Corequisite: Engineering [ENGINR] 2100 or Biological Engineering [BIOL_EN] 7380 or instructor’s consent.

BIOL_EN 7670. Photons and Nanotechnologies in Optical Biosensors. 3 Credits. Latest applications of photonics and nanotechnologies in optical biochemical sensors will be reviewed. Prerequisite: Physics [PHYSICS] 2760. Graded on A/F basis only. Graduate Standing Required.

BIOL_EN 7770. Biomedical Optics. 3 Credits. Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed. Prerequisite: Physics [PHYSICS] 2760 and Biological Engineering [BIOL_EN] 3180; or instructor’s consent.

BIOL_EN 8001. Advanced Topics in Biological Engineering. 1-3 Credit. Study of advanced developments in biological engineering.
BIOL_EN 8085. Problems in Biological Engineering. 1-99 Credit.
Supervised individual study at the graduate level. Prerequisite: departmental consent.

BIOL_EN 8087. Seminar in Biological Engineering. 1 Credit.
Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

BIOL_EN 8088. Advanced Seminar in Biological Engineering. 1 Credit.
Student presentation and discussion of topical research. May be repeated for credit. Prerequisites: Biological Engineering [BIOL_EN] 8087 and 8402 or instructor’s consent.

BIOL_EN 8150. Natural Systems for Wastewater Treatment. 3 Credits.
Emphasis is on the design, management and biological performance of lagoons, overland flow systems and constructed wetland. Prerequisite: graduate standing and Civil Engineering [CV_ENG] 7230 and Biological Engineering [BIOL_EN] 7150 or instructor’s consent.

BIOL_EN 8170. Sensors and Biosensors. 3 Credits.
The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors. Prerequisites: graduate standing or instructor’s consent.

BIOL_EN 8180. Numerical Methods in Engineering Research. 3 Credits.
Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations. Prerequisites: Mathematics [MATH] 4100.

BIOL_EN 8230. Advanced Ceramic Materials. 3 Credits.
(same as Chemical Engineering [CH ENG] and Mechanical and Aerospace Engineering [MAE] 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A/ F basis only.

BIOL_EN 8250. Water Management Theory. 3 Credits.

BIOL_EN 8270. Principles and Applications of Fluorescence. 3 Credits.
Physical foundations of fluorescence, fluorophores, steady-state and lifetime measurements, and instrumentation. Applications in the life science from tissues staining to DNA probes. Prerequisite: graduate standing or instructor’s consent. Graded on A/F basis only.

BIOL_EN 8280. Advanced Biological Transport Processes. 3 Credits.
Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required. Prerequisite: graduate standing or instructor’s consent.

BIOL_EN 8360. Food Extrusion. 2 Credits.
Engineering principles and applications of single and twin screw food cooking extrusion systems. Modeling, control and optimization of extrusion systems. Dough rheology. Prerequisite: Biological Engineering [BIOL_EN] 7260.

BIOL_EN 8370. Materials Characterization Techniques. 3 Credits.
Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses. Prerequisites: at least one undergraduate course in material science, engineer, or design.

BIOL_EN 8380. Modeling and Identification of Engineering Systems. 3 Credits.
Generalized description of engineering systems, bond graph modeling, system identification techniques, and neural network approaches. Prerequisite: Mathematics [MATH] 4100.

BIOL_EN 8402. Research Methods. 2 Credits.
(same as Food Science [F_S] 8402). Review of literature; planning research projects; publication procedures. Prerequisite: graduate standing.

BIOL_EN 8470. Ultrasensitive Biodetection. 3 Credits.
Multiplexing single-molecule, single-cell, nanobiotech analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graduate standing and Instructor’s consent required. Graded A-F only.

BIOL_EN 8570. Microscopic Imaging. 3 Credits.
Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy. Prerequisite: Biological Engineering [BIOL_EN] 7570 or instructor’s consent.

BIOL_EN 8770. Photon Migration and Optical Imaging in Turbid Media. 3 Credits.
The essential concepts and techniques in optical imaging in turbid media will be covered including both forward problems and inverse reconstruction theories. Prerequisite: graduate standing; instructor’s consent. Graded on A/F basis only.

BIOL_EN 8870. Molecular and Cell Mechanics. 3 Credits.
Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Prerequisite: Engineering [ENGINR] 2200. Graded on A/F basis only. Graduate Standing required.

Independent investigation to be presented as a thesis. Graded on S/U basis only.

BIOL_EN 9990. Doctoral Dissertation Research in Biological Engineering. 1-99 Credit.
Independent investigation to be presented as a thesis. Graded on S/U basis only.

Biological Sciences (BIO_SC)

BIO_SC 1001. Topics in Biological Science - General. 1-3 Credit.
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A/F or S/U basis.
BIO_SC 1002. Topics in Biological Sciences- Biological/Physical/ Mathematics. 1-3 Credit.
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A/F or S/U basis only.

BIO_SC 1010. General Principles and Concepts of Biology. 3 Credits.
Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. Prerequisite: MATH 1100 or concurrent enrollment. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

BIO_SC 1020. General Biology Laboratory. 2 Credits.
Laboratory exercises dealing with representative organisms and methods of modern biological sciences. Prerequisite: BIO_SC 1010 or BIO_SC 1400 or BIO_SC 1010 concurrently. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

BIO_SC 1030. General Principles and Concepts of Biology with Laboratory. 5 Credits.
Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. Prerequisite: MATH 1100 or concurrent enrollment. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

BIO_SC 1060. Basic Environmental Studies. 3 Credits.
Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

BIO_SC 1100. Introductory Zoology with Laboratory. 5 Credits.
(same as F_W 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

BIO_SC 1200. General Botany with Laboratory. 5 Credits.
Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

BIO_SC 1400. Evolution for Everyone. 3 Credits.
This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.

BIO_SC 1500. Introduction to Biological Systems with Laboratory. 3-5 Credit.
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology. Prerequisites: MATH 1100 and high school chemistry.

BIO_SC 1500H. Introduction to Biological Systems with Laboratory Honors. 3-5 Credit.
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology. Prerequisites: MATH 1100 and high school chemistry. Honors eligibility required.

BIO_SC 2001. Topics in Biological Sciences - General. 1-3 Credit.
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A/F or S/U basis.

BIO_SC 2002. Topics in Biological Sciences- Biological/Physical/ Mathematics. 1-3 Credit.
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A/F or S/U basis only. Prerequisite: a course in general biology.

BIO_SC 2010. Undergraduate Seminar in Biological Sciences. 1-3 Credit.
Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A/F or S/U basis only. Prerequisite: sophomore standing.

BIO_SC 2020. How the Brain Works. 1 Credit.
Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders.. Prerequisite: BIO_SC 1010.

BIO_SC 2060. Community Biology. 3 Credits.
Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems. Prerequisite: BIO_SC 1010 or equivalent. Not open to biology majors.

BIO_SC 2100. Infectious Diseases. 3 Credits.
An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture. Prerequisite: BIO_SC 1010. Not open to Biology Majors.

BIO_SC 2200. General Genetics. 4 Credits.
Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics. Prerequisites: BIO_SC 1500 and CHEM 1320 (or concurrent enrollment).

BIO_SC 2300. Introduction to Cell Biology. 4 Credits.
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized. Prerequisites: BIO_SC 2200.

BIO_SC 2300H. Introduction to Cell Biology- Honors. 4 Credits.
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized. Prerequisites: BIO_SC 2200. Honors eligibility required.

BIO_SC 2600. Ornithology. 4 Credits.
(same as F_W 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab. Prerequisites: 5 hours biology or instructor’s consent.

BIO_SC 2700. Ichthyology. 4 Credits.
(same as F_W 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes
exhibit to aspects of their environment. Includes lab. Prerequisites: 8 hours biology or equivalent.

**BIO_SC 2940. Internship in Biological Science. 1-3 Credit.**
Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Prerequisites: junior standing, instructor’s consent, 12 hours of biological science. Graded on S/U basis only.

**BIO_SC 2960. Readings in Biological Science. 1-3 Credit.**
Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A/F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement. Prerequisites: instructor’s consent.

**BIO_SC 2965H. Honors Readings in Biological Literature. 1-3 Credit.**
Selected readings in biological literature for Honors, in consultation with instructor. Prerequisite: overall 3.3 GPA; instructor’s consent. May not be used in partial fulfillment of Arts and Science foundation requirement. Honors eligibility required.

**BIO_SC 3002. Topics in Biological Sciences- Biological/Physical/ Mathematics. 1-3 Credit.**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A/F or S/U basis only. Prerequisite: instructor’s consent.

**BIO_SC 3010. Professional Skills. 1 Credit.**
This course will focus on application and interview skills for students interested in medical school. Prerequisites: junior standing; 3.4 GPA; instructor’s consent. Restricted to biology majors. Graded on S/U basis only.

**BIO_SC 3050. Genetics and Society. 3 Credits.**
Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course. Prerequisite: a college science course or equivalent (advanced high school biology).

**BIO_SC 3210. Plant Systematics. 4 Credits.**
Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab. Prerequisite: 8 hours of Biological Sciences.

**BIO_SC 3250. Parasitology. 4 Credits.**
(same as BIOMED 3250). Parasitism is considered as a fundamental type of interspecies interaction. Principles of parasitism as they apply to animals are presented with emphasis on parasite morphology, biology and host parasite relationships. Includes lab. Prerequisite: 8 hours of biology.

**BIO_SC 3260. Invertebrate Zoology. 4 Credits.**
Structure, ecology and phylogeny of the invertebrate phyla. Includes lab. Prerequisites: BIO_SC 1100 or BIO_SC 1500.

**BIO_SC 3360. Herpetology. 4 Credits.**
The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips. Prerequisite: 8 hours Biological Sciences or equivalent.

**BIO_SC 3400. Evolution and Ecology. 3 Credits.**
Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes. Prerequisites: BIO_SC 2200.

**BIO_SC 3510. Biology of Fungi. 3 Credits.**
(same as PLNT_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab. Prerequisite: BIO_SC 1100, BIO_SC 1200, or BIO_SC 1500.

**BIO_SC 3650. General Ecology. 5 Credits.**
Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit. Prerequisites: 10 hours in biology and junior standing.

**BIO_SC 3655. Tropical Ecology: Methods and Applications. 3 Credits.**
Field study of tropical community; additional fee for transportation and accommodations required. Prerequisite: BIO_SC 3100, 3650, 4600 or 4660.

**BIO_SC 3660. Mammalogy. 4 Credits.**
(same as F_W 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Includes lab. Prerequisites: 8 hours of biology or instructor’s consent.

**BIO_SC 3670. Animal Physiology. 5 Credits.**
Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab. Prerequisite: BIO_SC 2300.

**BIO_SC 3710. Introductory Entomology. 3 Credits.**
(same as PLNT_S 3710). Holistic biology of insects, including anatomy, physiology, behavior, ecology, and management. Prerequisites: BIO_SC 1100, 1200, or 1500 or equivalent.

**BIO_SC 3715. Insect Diversity. 2 Credits.**
(same as PLNT_S 3715). Laboratory emphasizing external insect anatomy, classification, and identification to the family level. Insect collection is required. Prerequisite: concurrent enrollment or previous satisfactory completion of PLNT_S 3710/BIO_SC 3710.

**BIO_SC 3750. General Microbiology. 4 Credits.**
Principles of microbiology. Includes lab. Prerequisite: BIO_SC 2200 and 2300 completed with C range grades.

**BIO_SC 3780. Genetics Laboratory. 2 Credits.**
Experimental genetic studies of Drosophila, corn and microorganisms. Prerequisite: C range grade or better in BIO_SC 2200 or instructor’s consent.

**BIO_SC 3790. Developmental Biology Laboratory. 2 Credits.**
Laboratory studies of development in sea urchin, chicken and roundworm. Prerequisites: BIO_SC 4972 or co-enrollment in 4972.

**BIO_SC 3800. Developmental Biology. 3 Credits.**
Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms. Prerequisites: BIO_SC 2200, 2300, CHEM 2100.

**BIO_SC 4002. Topics in Biological Science - Biological/Physical/ Mathematics. 1-3 Credit.**
Selected topics not in regularly offered courses. Prerequisite: instructor’s consent and senior standing. May be repeated up to 2 times for credit.
BIO_SC 4085. Problems in Biological Sciences. 1-3 Credit. 
Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A/F or S/U basis only. Prerequisites: junior standing and instructor’s consent.

BIO_SC 4100. Limnology. 3-4 Credit. 
(same as F_W 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: senior standing or BIO_SC 3650.

BIO_SC 4300. Analysis of Biological Macromolecules. 3 Credits. 
Theory/application of techniques used for characterization of proteins, nucleic acids; topics: sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Prerequisites: BIO_SC 2300 or BIOCHM 4270; MATH 1500 and one year Physics.

BIO_SC 4310. Physics in Cell and Developmental Biology. 3 Credits. 
(same as PHYSCS 4310). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions. Prerequisite: instructor’s consent or PHYSCS 1220 or 2760 and BIO_SC 2300.

BIO_SC 4320. Plant Physiology. 3-5 Credit. 
(same as PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory. Prerequisites: BIO_SC 1200 or 1500 and 5 hours Chemistry.

BIO_SC 4328. Introductory Radiation Biology. 3 Credits. 
(same as NU_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man. Prerequisite: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor’s consent.

BIO_SC 4400. Plant Anatomy. 4 Credits. 
(same as PLNT_S 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Prerequisites: BIO_SC 1200 or equivalent.

BIO_SC 4500. Neurobiology. 3 Credits. 
Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, and developmental neurobiology. Prerequisites: BIO_SC 2300 or 3700 or instructor’s consent.

BIO_SC 4560. Sensory Physiology and Behavior. 3 Credits. 
Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Prerequisite: BIO_SC 4500. Graded on A/F basis only.

BIO_SC 4580. Computational Neuroscience. 4 Credits. 
(same as ECE 4580 and BIOL_EN 4575). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences. Prerequisites: BIO_SC 1010 or 1500; MATH 1500.

BIO_SC 4600. Evolution. 3 Credits. 
Surveys various processes in organic evolution and underlying genetic mechanisms. Prerequisite: BIO_SC 2200.

BIO_SC 4640. Behavioral Biology. 3-4 Credit. 
Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. May be taken with Laboratory for 4 credits. Prerequisites: BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology.

BIO_SC 4642. Animal Communication. 3 Credits. 
Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication. Prerequisites: BIO_SC 2300 and PHYSCS 1220 or equivalent.

BIO_SC 4660. Plant Population Biology. 4 Credits. 
Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Includes lab. Prerequisites: 2 courses in Biological Sciences.

BIO_SC 4670. Avian Ecology. 3 Credits. 
Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution. Prerequisites: BIO_SC 3100 or 3650; 2600.

BIO_SC 4690. Undergraduate Research in Biology. 1-3 Credit. 
Independently directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: Overall GPA 2.75; 20 hours of Biological Sciences and/or Chemistry; instructor’s consent. May be repeated to a maximum of 6 hours.

BIO_SC 4690H. Honors Research in Biology. 1-3 Credit. 
Independently directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. May be repeated for credit. Prerequisite: overall GPA 3.3; instructor’s consent; biology or microbiology major. Honors eligibility required. Graded on A/F basis only.

BIO_SC 4950. Undergraduate Research in Biology. 1-3 Credit. 
Independently directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: BIO_SC 4950; overall GPA 2.75; instructor’s consent. May be repeated to a maximum of 6 hours.

BIO_SC 4950H. Honors Research in Biology. 1-3 Credit. 
Independently directed field or laboratory research for upper-level Honors students, in consultation with a faculty member. Project must be arranged by student and faculty member prior to registration. Prerequisites: BIO_SC 4950; overall GPA 2.75; instructor’s consent. May be repeated to a maximum of 6 hours.

BIO_SC 4952. Undergraduate Research in Biology. 1-3 Credit. 
Independently directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisites: BIO_SC 4950; overall GPA 2.75; instructor’s consent. May be repeated to a maximum of 6 hours.

BIO_SC 4952H. Honors Research in Biology. 1-3 Credit. 
Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Prerequisites: BIO_SC 4950H; overall GPA 3.3; instructor’s consent. Honors eligibility required. Graded on A/F basis only.

BIO_SC 4960. Special Readings in Biological Sciences. 1-3 Credit. 
Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A/F or S/U basis only. Prerequisites: senior standing in Biological Sciences and instructor’s consent.
BIO_SC 4970. Neurobiology Laboratory. 3 Credits.
Laboratory experience with experimental neurobiology, with emphasis on neural networks, motor systems, and developmental neurobiology. Prerequisites: BIO_SC 3700 or 4500 or instructor’s consent.

BIO_SC 4974. Molecular Biology Laboratory. 3 Credits.
(same as BIOCHM 4374). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: BIO SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976.

BIO_SC 4976. Molecular Biology. 3 Credits.
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering. Prerequisites: BIO_SC 2200 and 2300.

BIO_SC 4978. Cancer Biology. 3 Credits.
(same as BIOCHM 4978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology. Prerequisites: BIO_SC 2200, 2300.

BIO_SC 4980. Cellular Interactions in Health and Disease. 3 Credits.
The cell as a functional unit. Prerequisites: 10 hours Biological Sciences and 5 hours Physics and 5 hours Organic Chemistry; some background in Biochemistry and/or Molecular Biology is strongly recommended.

BIO_SC 4982. Human Inherited Diseases. 3 Credits.
Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS. Prerequisites: BIO_SC 2200 and 2300.

BIO_SC 4983. Molecular Ecology. 4 Credits.
Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics. Prerequisites: BIO_SC 2200 or equivalent and BIO_SC 3650.

BIO_SC 4984. Mammalian Reproductive Biology. 3 Credits.
Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology. Prerequisites: junior standing and 15 hours of Biological Sciences.

BIO_SC 4986. Neurology of Motor Systems. 3 Credits.
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Prerequisites: BIO_SC 3700 or instructor’s consent.

BIO_SC 4988. Nerve Cells and Behavior. 3 Credits.
The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed. Prerequisite: BIO_SC 3700 or instructor’s consent.

BIO_SC 4990. Vertebrate Histology and Microscopic Anatomy. 5 Credits.
Microscopic anatomy of vertebrate tissues and organs. Includes lab. Prerequisites: junior standing; BIO_SC 2300 and 3700, or equivalent are recommended.

BIO_SC 4994. Senior Seminar. 1-3 Credit.
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis. Prerequisites: Biological Sciences major, senior standing.

BIO_SC 7002. Topics in Biological Sciences. 1-99 Credit.
Advanced topics not in regularly offered courses. Prerequisites: instructor’s consent. May be repeated for credit. Graded on A/F basis only.

BIO_SC 7100. Limnology. 3-4 Credit.
(same as F_W 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: graduate standing or BIO_SC 3650.

BIO_SC 7300. Analysis of Biological Macromolecules. 3 Credits.
Theory/application of techniques used for characterization of proteins and nucleic acids. Topics include sedimentation velocity; equilibrium; sucrose density gradients; electrophoresis; spectrophotometry. Prerequisite: BIO_SC 2300; BIOCHM 4270; MATH 1500; 1 year of physics. Graded on A/F basis only.

BIO_SC 7310. Physics in Cell and Developmental Biology. 3 Credits.
(same as PHYSCS 7310 and MPP 7300). Discusses the role of physical mechanisms in specific cellular and developmental processes and phenomena, in particular those characterizing the embryonic stage of multicellular organisms. Each process and phenomenon is first described in biological terms and then within a physical model, with special emphasis on the interplay between the two descriptions. Prerequisite: graduate standing and instructor’s consent or PHYSCS 1220 or 2760 and BIO_SC 2300.

BIO_SC 7320. Plant Physiology. 3 Credits.
(same as PLNT_S 7320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory. Prerequisites: BIO_SC 1200 or 1500 and 5 hours Chemistry.

BIO_SC 7328. Introductory Radiation Biology. 3 Credits.
(same as NU_ENG, RADIOL and V_M_S 7328). Prerequisite: graduate standing required.

BIO_SC 7350. Summer Institute in Biotechnology. 3 Credits.
Development of experiments in molecular genetics for use in high school biology laboratories. May be repeated for credit. Prerequisite: graduate standing and instructor’s consent.

BIO_SC 7374. Molecular Biology Laboratory. 3 Credits.
(same as BIOCHM 7374). Emphasizes recently developed genetic and biochemical techniques; illustrates how they apply to contemporary problems in biological research. Prerequisites: BIO_SC 2200, BIOCHM 4272 or concurrent registration in BIO_SC 4976.

BIO_SC 7400. Plant Anatomy. 4 Credits.
(same as PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A/F basis only. Prerequisites: BIO_SC 1200 or equivalent.

BIO_SC 7490. Vertebrate Histology and Microscopic Anatomy. 5 Credits.
Microscopic anatomy of vertebrate tissues and organs. Prerequisites: BIO_SC 2300 and 3700, or equivalent. Graded on A/F basis only.

BIO_SC 7500. Neurobiology. 3 Credits.
Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuranatomy, neurobiology and developmental biology. Prerequisites: BIO_SC 2300 or 3700; graduate standing. Graded on A/F basis only.
**BIO_SC 7560. Sensory Physiology and Behavior. 3 Credits.**
Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development. Prerequisite: BIO_SC 4500 or equivalent.

**BIO_SC 7580. Computational Neuroscience. 4 Credits.**
(Same as BIOL_EN 7575 and ECE 7580). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences. Prerequisites: BIO_SC 1010 or 1500, MATH 1500.

**BIO_SC 7640. Behavioral Biology. 3 Credits.**
Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. Prerequisites: BIO_SC 1500 and one additional upper-level course in BIO_SC or PSYCH.

**BIO_SC 7660. Plant Population Biology. 4 Credits.**
Covers the ecological and evolutionary processes that influence the distribution and abundance of plant species. Topics include evolution of life history schedules, gender evolution, population growth and demography, competition, herbivory, plant-pollinator interactions, clonal growth, and plant community structure. Prerequisites: 2 courses in BIO_SC. Graduate standing required.

**BIO_SC 7670. Avian Ecology. 3 Credits.**
Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution. Prerequisites: BIO_SC 3100 or 3650; 2600.

**BIO_SC 7976. Molecular Biology. 3 Credits.**
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering. Prerequisites: BIO_SC 2200 and 2300.

**BIO_SC 7978. Cancer Biology. 3 Credits.**
(same as BIOCHM 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions. Prerequisites: BIOCHM 4270, BIO_SC 2300 and 4976 or equivalent.

**BIO_SC 7980. Cellular Interactions in Health and Disease. 3 Credits.**
Advanced discussion of topics in cell biology and genetics as they relate to health and disease. Prerequisite: instructor’s consent. Graded on A/F basis only.

**BIO_SC 7982. Human Inherited Diseases. 3 Credits.**
Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Prerequisites: BIO_SC 2200 and instructor’s consent. Graded on A/F basis only.

**BIO_SC 7986. Neurology of Motor Systems. 3 Credits.**
Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Prerequisite: BIO_SC 3700. Graded on A/F basis only.

**BIO_SC 7990. Non-thesis Research. 1-99 Credit.**
Independent research not leading to a thesis. Prerequisites: graduate standing and instructor’s consent.

**BIO_SC 8002. Topics in Biological Sciences-Biological/Physical/Mathematics. 1-99 Credit.**
Advanced topics not in regularly offered courses. Prerequisite: instructor’s consent.

**BIO_SC 8050. Professional Survival Skills. 2 Credits.**
Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

**BIO_SC 8060. Ethical Conduct of Research. 1 Credit.**
(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**BIO_SC 8080. Workshop in Area of Specialization. 1 Credit.**
Intensive course in the theory and methodology of biological investigation. Conducted by visiting scientists. Offered in one or more specialized sections. Prerequisites: graduate standing or instructor’s consent. May be repeated for credit.

**BIO_SC 8085. Problems in Biological Sciences. 1-99 Credit.**
Research not expected to terminate in thesis, or individual advanced study in special subjects. Prerequisites: graduate standing and instructor’s consent.

**BIO_SC 8087. Seminar. 1 Credit.**
Current topics in the biological sciences. Open to all graduate students. Offered S/U. Prerequisite: graduate standing.

**BIO_SC 8090. Research in Biological Sciences. 1-99 Credit.**
Research leading to thesis. Prerequisites: graduate standing and instructor’s consent. Graded on S/U basis only.

**BIO_SC 8187. Seminar in Areas of Specialization. 1 Credit.**
Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only. Prerequisite: graduate standing.

**BIO_SC 8300. Advanced Plant Genetics. 3 Credits.**
Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis. Prerequisites: General Genetics and course in Cell Biology or Plant Physiology.

**BIO_SC 8310. Fungal Genetics and Biology. 3 Credits.**
Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A/F only.

**BIO_SC 8320. Developmental Genetics. 3 Credits.**
An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms. Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent; graduate standing.

**BIO_SC 8330. Stem Cell Biology. 3 Credits.**
A comparative approach to stem cell biology, with emphasis on embryonic, neural and bone marrow-derived stem cells in rodents and humans. Ethical considerations associated with the use of stem cells to study development and repair mechanisms will also be addressed. Prerequisite: BIO_SC 2300 and graduate standing. Graded on A/F basis only.

**BIO_SC 8340. Advanced Microscopy Techniques. 3 Credits.**
Electron microscopy and modern light microscopy techniques including epifluorescence, confocal fluorescence microscopy, low light video microscopy.
microscopy, differential interference optics, and computerized image analysis. Prerequisite: BIO_SC 4990 or 8350 and instructor’s consent.

BIO_SC 8350. Advanced Cell Biology. 3 Credits.
Structure and function of membranes; cell ultrastructure; organelar function; cellular movement; microtubules; microfilaments; mitosis and meiosis. Prerequisites: BIO_SC 2300; graduate standing; instructor’s consent.

BIO_SC 8362. Introduction to Plant Metabolism. 2 Credits.
(same as PLNT_S and BIOCHM 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A/F basis only.

BIO_SC 8365. Introduction to Molecular Cell Biology. 2 Credits.
(same as BIOCHM/Plant Science PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A/F basis only.

BIO_SC 8370. Plant Developmental Biology. 3 Credits.
Critical discussions of recent publications in plant development, with particular focus on developmental genetics.

BIO_SC 8440. Integrative Neuroscience I. 3 Credits.
(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Prerequisite: graduate standing. Graded on A/F basis only.

BIO_SC 8442. Integrative Neuroscience II. 3 Credits.
(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Prerequisite: graduate standing. Graded on A/F basis only.

BIO_SC 8450. Developmental Neurobiology. 3 Credits.
Principles of neural development. Development of neuron and nerve patterns, axon growth, synapses, and development of behavior. Prerequisite: BIO_SC 4500 or equivalent.

BIO_SC 8460. Advanced Cancer Biology. 3 Credits.
A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.

BIO_SC 8505. Introduction to Plant Stress Biology. 2 Credits.
(same as PLNT_S 8505.) This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A/F basis only.

BIO_SC 8520. Sensory Ecology. 3 Credits.
A study of information exchange and acquisition in organisms, with an emphasis on communication, orientation, and predator detection. The course will also examine the effects of biotic and abiotic factors on sensory systems.

BIO_SC 8600. Design of Ecological Experiments. 2 Credits.
Principles of experimental design in the context of ecological, behavioral, and evolutionary research. Prerequisite: STAT 1400.

Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.

BIO_SC 8620. Phylogenetic Methods and Applications. 4 Credits.
A review of principles for constructing and testing phylogenies followed by a survey of methods for inferring ancestral characteristics and adaptive features in living species.

BIO_SC 8650. Ecological and Evolutionary Genomics. 2 Credits.
(same as PLNT_S 8650). This course is designed to give a background in evolution and then explore an exciting new field: Ecological and evolutionary genomics. We will study genes that affect fitness and how whole genomes evolve. Graded on A/F basis only.

BIO_SC 8700. Ecological Genetics. 3 Credits.
Population genetics and evolutionary theory, with emphasis on studies of natural populations. Prerequisites: BIO_SC 2200, 3100 or 3650, and STAT 1400 or equivalent.

BIO_SC 8720. Speciation. 3 Credits.
Advanced discussion of species concepts and the processes of formation of species. Prerequisites: BIO_SC 2200 and 4600.

BIO_SC 8724. College Science Teaching. 3 Credits.
(same as LTC 8724). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level. Graduate standing required.

(same as AN_SCI 8725, PHYSCS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

BIO_SC 8726. Integrating Science with Outreach. 1-6 Credit.
(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.

BIO_SC 8730. Advanced Community Ecology. 3 Credits.
Detailed examination of new happenings in population and community ecology. Topics vary but will include species interactions, community structure, reproductive strategies. Prerequisites: BIO_SC 3650 or instructor’s consent.

BIO_SC 8740. Plant/Animal Interactions. 3 Credits.
Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives. Prerequisites: BIO_SC 3650 or 4660 or equivalent.

BIO_SC 8982. Advances in Human Genetic Disorders. 1 Credit.
Critical review of recent publications describing the molecular and cellular processes underlying genetic disorders in humans. Prerequisites: BIO_SC 4982 or concurrent enrollment in BIO_SC 7982. Graded on A/F basis only.

BIO_SC 9090. Research in Biological Sciences. 1-99 Credit.
Research leading to dissertation. Prerequisites: graduate standing and instructor’s consent. Graded on S/U basis only.
**BIOMED 2230. Animal Sanitation and Disease Prevention. 3 Credits.**
(same as MICROB and BIOCHM 9432). Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling processes utilizing the current literature will be examined. Prerequisite: MICROB 9430 and graduate standing.

**BIOMED 2235. Domestic Animal Behavior. 3 Credits.**
An examination of the effects of domestication on the behavior of companion and food animal species. Comparisons to similar animals in feral or wild conditions will be made. The causes, development and potential treatments of abnormal behavior will also be examined. Graded on A/F basis only.

**BIOMED 2240. Biology of Healthy Living. 2 Credits.**

**BIOMED 2940. Internship in Biomedical Sciences. 1-6 Credit.**
Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only. Prerequisites: sophomore standing and instructor's consent.

**BIOMED 3000. Specialty Careers for Veterinary Technicians. 1 Credit.**
Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. AAS degree in veterinary technology or instructors consent required. Course graded on A/F basis only.

**BIOMED 3001. Topics in Biomedical Sciences. 1-99 Credit.**
Topics in Biomedical Sciences.

**BIOMED 3085. Problems in Biomedical Research. 1-99 Credit.**
Assignment of special Topics for Research training in biomedical research. Prerequisite: instructor's consent.

**BIOMED 3100. Biomedical Pathophysiology. 3 Credits.**
Disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Prerequisites: Animal Science [AN_SCI] 3254 or Biological Sciences [BIO_SC] 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent. Course graded on A/F basis only.

**BIOMED 3200. Comparative Hematology. 3 Credits.**
Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Prerequisites: Animal Science [AN_SCI] 3254 or Biological Sciences [BIO_SC] 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent. Course graded on A/F basis only.

**BIOMED 3210. Microbiology for the Health Sciences. 5 Credits.**
Introductory course for students in the applied health curricula. Presents biomolecules of life, enzyme interaction, physiology and structure of representative organisms. Emphasizes bacteria, viruses, fungi and protozoa of health significance. Prerequisite: Chemistry [CHEM] 1100 or equivalent and instructor's consent. Graded on A/F basis only.

**BIOMED 3219. Elements of Comparative Anatomy. 3 Credits.**
This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Prerequisites: five hours of biological science or zoology or equivalent or instructor’s consent or an AAS degree in veterinary technology. Graded on A/F basis only.

**BIOMED 3220. Parasitology. 3 Credits.**
(same as Biological Sciences [BIO_SC] 3250) Parasitism is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common
BIOMED 3300. Animal Welfare and Ethics. 3 Credits.
An introductory examination of contemporary ethical issues related to biomedical science including animal welfare, agriculture, and cloning. Topics related to animal law issues will also be discussed. Prerequisite: junior standing.

BIOMED 3310. Equine Health Topics. 3 Credits.
An in-depth examination of equine disease and health topics that are pertinent to today's horse owner and veterinarian. The course will integrate horse management practices with disease recognition, control and prevention. Students will learn how to recognize problems and when to call a veterinarian. Emerging disease problems such as West Nile Virus will be examined as well as topics of continuing concern. Prerequisites: Animal Sciences [AN_SCI] 4977 or equivalent or instructor's consent. Graded on A/F basis only.

BIOMED 3320. Comparative Microscopic Anatomy. 3 Credits.
The course will provide students with a background in the structure of body organs at the microscopic level. The material will emphasize structure-function relationship of cells and organs using material from diverse animal species, including human, that exemplify unique adaptations to environmental or physiological requirements. Prerequisites: Biological Sciences [BIO_SC] 1500 or equivalent.

BIOMED 3326. Comparative Pharmacology. 3 Credits.
An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed. Prerequisite: an AAS degree in veterinary technology or Animal Science [AN_SCI] 9434. Survey of current and in-depth issues of cell function especially as related to medicine and the underlying molecular causes of disease. Prerequisite: Biological Science [BIO_SC] 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent.

BIOMED 3333. Veterinary Cell Biology. 4 Credits.
(same as Veterinary Biomedical Science [V_BSCI] 5506). Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease. Prerequisite: Biological Science [BIO_SC] 1500, or equivalent, 1 course in biochemistry or 4 credit hours in chemistry; or instructor's consent.

BIOMED 4400. Veterinary Surgical Nursing. 3 Credits.
Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Prerequisites: Biomedical Sciences [BIOMED] 2111, 3219, and 3100, or instructor's consent. Graded on A/F basis only.

BIOMED 4500. Equine Critical Care and Nursing. 3 Credits.
This course provides advanced information for veterinary technicians, veterinary assistants, and pre-veterinary students wishing to enhance and focus their understanding of equine critical care and nursing concepts. Prerequisites: Animal Science [AN_SCI] 2095 and 3254 or Biological Sciences [BIO_SC] 3700 or equivalents, AAS or equivalent degree from AVMA-accredited program or instructor's consent. Course graded on A/F basis only.

BIOMED 4993. Internship in Veterinary Medical Technical Specialties. 1-6 Credit.
Supervised work experience in the MU Veterinary Medical Teaching Hospital of affiliated veterinary medical specialty practices or in MU laboratory animal facilities to develop technical skills and knowledge relevant to becoming a specialist in veterinary medical technology. A written report and oral presentation are required. Graded on S/U basis only. Prerequisites: junior standing, an AAS degree from an AVMA accredited veterinary technical program or its equivalent, and instructor’s consent.

BIOMED 7010. Life Sciences Research: Models and Methods. 3 Credits.
(same as Veterinary Biomedical Science [V_BSCI] 7010). A review of basic laboratory animal and non-animal research models and procedures commonly used in the life sciences area in academia and drug/chemical industry. Prerequisite: Biology or Cell Biology; junior standing required. Graded on A/F basis only.

BIOMED 9090. Research - Biomedical Sciences. 1-99 Credit.
Research hours for BMS doctoral students continuous enrollment. Graded on S/U basis only. Prerequisite: instructor's consent.

BIOMED 9434. Gonadal Function. 3 Credits.
(same as Animal Science [AN_SCI] 9434). Survey of current and in-depth mechanisms involved in ovarian, testicular, and epididymal function. Emphasis will be given to comparative differences in gonadal functions among domestic animals. Prerequisites: Animal Science [AN_SCI] 4314 or equivalent, a course in endocrinology, and biochemistry or cell biology.
BL_STU 1100. Introduction to Swahili and African Culture. 3 Credits.
Introduction to Swahili and African Culture is a three credit hour course, which serves as a survey of an indigenous African language and the culture of East Africa. There are no prior requirements.

BL_STU 1250. World Theatre Workshop. 2 Credits.
(same as Theatre [THEATR] 1250). Provides a diverse ensemble of student performers, writers, and technicians with an intensive immersion in the process of theatrical production through the public presentation of dramatic literature that focuses on global issues of ethnicity and culture.

BL_STU 1332. Social Perspectives on Gender, Race and Class. 3 Credits.
(same as Women's and Gender Studies [WGST] 1332.) Examines the impact of the construction of “female” on different categories of women. Reviews women’s multilayered relationships. Stresses both the roles of creator and “victim” within social structures and value systems. No credit for students who have taken Women's and Gender Studies [WGST] 1344.

BL_STU 1410. African American History. 3 Credits.
(same as History [HIST] 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

BL_STU 1500. The Black Woman in America. 3 Credits.
(same as Women’s and Gender Studies [WGST] 1500). Review and critiques of a variety of materials about Black women from slavery to present. The course allows students to generate their own view about psychological, social and philosophical impact of the Black women’s struggle on all women. Prerequisite: sophomore standing.

BL_STU 1705. Introduction to Black Studies in Culture. 3 Credits.
Introduction to the concepts, terms, themes, and practices in the study of African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.

BL_STU 1720. African-American Theatre History. 3 Credits.

BL_STU 1790. History of Early Africa. 3 Credits.
(same as [HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.

BL_STU 1800. The Making Modern Africa. 3 Credits.
(same as History [HIST] 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources. Prerequisite: sophomore standing or instructor’s consent.

BL_STU 1810. History of South Africa. 3 Credits.
(same as History [HIST] 1810). South African Society from the 16th century to the present with an emphasis on the last two centuries and the consolidation of the apartheid state. Prerequisite: sophomore standing or instructor’s consent.

BL_STU 2000. Black Studies. 3 Credits.
An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African-American studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed.

BL_STU 2001. Undergraduate Topics in Black Studies-General. 1-3 Credit.
Organized study of selected topics. Subjects and credits may vary from semester to semester. Prerequisite: program consent for replication.

BL_STU 2003. Undergraduate Topics in Black Studies-Behavioral Science. 3 Credits.
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

BL_STU 2005. Topics in Black Studies - Humanities. 3 Credits.
Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

BL_STU 2150. African-American Cinema. 3 Credits.

BL_STU 2200. Social Inequalities. 3 Credits.
(Same as Sociology [SOCIOL] 2200.) Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured. Prerequisite: sophomore standing or instructor’s consent.

BL_STU 2210. The Black Americans. 3 Credits.
(same as Sociology [SOCIOL] 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations. Prerequisites: Sociology [SOCIOL] 1000 or equivalent or instructor’s consent.

BL_STU 2310. Literature of the African Diaspora. 3 Credits.
(same as Romance Languages [RM_LAN] 2310) A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas.

BL_STU 2400. Introduction to African Diaspora Literature. 3 Credits.
(same as English [ENGLSH] 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. Prerequisite: English [ENGLSH] 1000. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

BL_STU 2407. Introduction to African Diaspora Literature, 1603-17. 3 Credits.

BL_STU 2408. Introduction to African Diaspora Literature, 1789-1890. 3 Credits.

BL_STU 2409. Introduction to African Diaspora Literature, 1890-Present. 3 Credits.

BL_STU 2410. African American Women in History. 3 Credits.
(same as History [HIST] and Women’s and Gender Studies [WGST] 2410). African American Women in history is a topics course covering
major issues affecting black women since their introduction into English-speaking North America to the present.

**BL_STU 2450. Themes in the Geography of Africa South of the Sahara. 3 Credits.**
(same as Geography [GEOG] 2450). Major concepts of African geography in current and historical perspective. Case studies of major African countries. Prerequisites: sophomore standing or one introductory Geography course.

**BL_STU 2500. Special Problems in Black Studies. 1-99 Credit.**
Research apprenticeship with faculty member, assisting a faculty member in the development and execution of a research project. May be repeated for a maximum of six hours. Prerequisite: sophomore standing, instructor’s consent.

**BL_STU 2501. Undergraduate Topics in Black Studies. 1-3 Credit.**
Organized study of selected topics. Subjects and credit may vary from semester to semester. Prerequisite: program consent for repetition; sophomore standing.

**BL_STU 2570. Black Religion. 3 Credits.**
A history of religion approach to the study of black religion which takes into consideration the unique past experiences of the African American community as it underwent the terror of forced migration, slavery, segregation, and discrimination. Prerequisite: sophomore standing.

**BL_STU 2610. Islam and Black America. 3 Credits.**
A historical survey of the origins, development and impact of the Black Islamic tradition.

**BL_STU 2715. Studies in Black Culture. 3 Credits.**
This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as will as other related disciplines. Program consent for repetition.

**BL_STU 2720. African-American Visual Culture. 3 Credits.**
(Same as Art History and Archaeology [AR_H_A] 2720) This course introduces students to African-American art history, visual culture, and material culture in their cultural, political, and historical contexts. Specific focuses may include the Harlem Renaissance, the Black Arts Movement, and other topics.

**BL_STU 2904. Black Studies in Slavery and Freedom. 3 Credits.**
This course provides study of historical background, economic, political, and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

**BL_STU 2975. Theoretical Traditions in Blacks Studies - Culture. 3 Credits.**
This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, including literature, languages, and music. Course graded on A/F basis only.

**BL_STU 3001. Undergraduate Topics in Black Studies - General. 3 Credits.**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent. Prerequisite: Junior standing and/or Black Studies [BL_STU] 2000.

**BL_STU 3003. Undergraduate Topics in Black Studies - Behavioral Sciences. 1-3 Credit.**
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent. Prerequisites: Junior standing and/or Black Studies [BL_STU] 2000.

**BL_STU 3004. Undergraduate Topics in Black Studies - Social Science. 1-3 Credit.**
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent. Prerequisites: Junior standing and/or Black Studies [BL_STU] 2000.

**BL_STU 3005. Undergraduate Topics in Black Studies - Humanities. 3 Credits.**
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent. Prerequisites: Junior Standing and/or Black Studies [BL_STU] 2000.

**BL_STU 3100. African American Psychology. 3 Credits.**
(same as Educational, School and Counseling Psychology [ESC_PS] 3100 and Psychology [PSYCH] 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed. Prerequisite: Psychology [PSYCH] 1000.

**BL_STU 3200. Black Freedom Movement, 1955-1973. 3 Credits.**
(same as History [HIST] 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

**BL_STU 3230. Studies in Black Sexual Politics. 3 Credits.**
Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. Prerequisite: sophomore standing required. May be repeated for credit.

**BL_STU 3400. Survey of African American Literature, Beginnings to 1900. 3 Credits.**
(same as English [ENGLISH] 3400). A survey of major authors and movements in African American literature from its beginnings to 1900. Prerequisite: English [ENGLISH] 1000.

**BL_STU 3410. Survey of African American Literature, 1900-Present. 3 Credits.**
(same as English [ENGLISH] 3410). A survey of major authors and movements in African American literature from 1900 to the present. Prerequisite: English [ENGLISH] 1000.

**BL_STU 3420. Periods and Genres in African Diaspora Literature. 3 Credits.**
(same as English [ENGLISH] 3420). Topic (e.g. Harlem Renaissance, African Diaspora Poetry) Announced at time of registration. Prerequisite: English [ENGLISH] 1000. No more than 6 hours may be taken in the Periods and Genres in African Diaspora Literature series.
BL_STU 3427. Periods and Genres in African Diaspora Literature, 1603-1789. 3 Credits.

BL_STU 3428. Periods and Genres in African Diaspora Literature, 1789-1890. 3 Credits.

BL_STU 3429. Periods and Genres in African Diaspora Literature, 1890-Present. 3 Credits.

BL_STU 3590. Religious Biography: Black Religion. 3 Credits.
(same as History [HIST] 3410). Studies black American religion through the biographies of representative and influential figures of the nineteenth and twentieth centuries, including Nat Turner, W.E.B Dubois, Marcus Garvey, M.L. King, and Malcolm X.

BL_STU 3624. Comparative Approaches to Black Studies in History. 3 Credits.
(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

BL_STU 3625. Comparative Approaches to Black Studies in Culture. 3 Credits.
Comparative approach to the study of Black Diaspora cultures that focus on the theory, method, structure, and application of modes of cultural production within Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Course may be repeated for credit with consent of program.

BL_STU 3670. History of Black Nationalism in the United States. 3 Credits.
(same as History [HIST] 3410). Examines the struggle of African Americans to construct autonomous institutions, to build all Black communities or to acquire an independent nation-state. We will study the ideology, structure, strategy and tactics. Prerequisites: History [HIST] 1410 or Sociology [SOCIOL] 2210.

BL_STU 3703. Themes in Black Society. 3 Credits.
Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.

BL_STU 3705. Themes in Black Culture. 3 Credits.
Examines various themes, issues and perspective in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.

BL_STU 3800. Women in African History. 3 Credits.
(same as History [HIST] 3800). Focuses on the varied and changing roles of women in sub-Saharan Africa from pre-colonial times to the present. Prerequisite: sophomore standing or instructor’s consent.

BL_STU 3850. Gender, Hip Hop, and the Politics of Representation. 3 Credits.
This class will examine gender in hip hop while exploring the intra- and interracial politics of representation among those of the hip hop generation.

BL_STU 3977. Black Studies Methodologies. 3 Credits.
Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Prerequisites: Black Studies [BL_STU] 2977. Graded on A/F basis only.

BL_STU 4000. Special Problems in Black Studies. 1-99 Credit.
Independent investigation leading to a paper or a project. Prerequisite: junior standing, instructor's consent.

BL_STU 4001. Undergraduate Topics in Black Studies-General. 1-3 Credit.
Organized study of selected topics. Subjects and credit may vary from semester to semester. Prerequisite: program consent for repetition. Prerequisite: junior standing.

BL_STU 4040. Houses Divided: Society and Politics in the Civil War Era. 3 Credits.
(0same as History [HIST] 4040) Examines the sectional crisis, the Civil War and reconstruction through the lens of divided households. Considers the experience of soldiers and civilians, women and men, slaves and freedpeople.

BL_STU 4130. African-American Politics. 3 Credits.

BL_STU 4181. Themes in Literature by Women. 3 Credits.
(same as Women's and Gender Studies [WGST] and English [ENGLISH] 4181). Examines works by a number of women writers with particular attention to their sociopolitical context. May repeat to six hours with department's consent. Prerequisite: junior standing.

BL_STU 4210. African-American Religion. 3 Credits.
(same as Religious Studies [REL_ST] 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities. Prerequisite: junior standing or instructor’s consent.

BL_STU 4220. Religion in Afro-American Literature. 3 Credits.
(same as Religious Studies [REL_ST] 4220). Examination of Afro-American fiction, poetry and drama which present significant racial attitudes toward the Christian religion. Prerequisites: sophomore standing.

BL_STU 4230. Women, Development, and Globalization. 3 Credits.
BL_STU 4270. African-Americans in the Twentieth Century. 3 Credits.
(same as History [HIST] 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

BL_STU 4300. The Black Family: Past, Present & Future. 3 Credits.
(same as Human Development and Family Studies [H_D_FS] 4300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family. Prerequisite: senior standing.

BL_STU 4360. Working with Minority Youth. 3 Credits.
(same as Social Work [SOC_WK] 4360). Develops awareness and understanding of social/psychological/ cognitive realities influencing the behavior of black youth. Content draws upon theories, research, and practice skills relevant to understanding black youth. Minority groups included. Prerequisite: junior standing or instructor’s consent.

BL_STU 4380. Social Work Practice With Minorities: African-American Emphasis. 3 Credits.
(same as Social Work [SOC_WK] 4380). Provides students with an appreciation of the black experience in the United States on a knowledge and feeling level.

BL_STU 4400. Studies in African Diaspora Literature. 3 Credits.
(same as English [ENGLSH] 4400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series. Prerequisite: junior standing or instructor’s consent.

BL_STU 4407. Studies in African Diaspora Literature, 1603 to 1789. 3 Credits.

BL_STU 4408. Studies in African Diaspora Literature, 1789 to 1890. 3 Credits.

BL_STU 4409. Studies in African Diaspora Literature, 1890 to Present. 3 Credits.

BL_STU 4410. Major African Diaspora Writers. 3 Credits.
(same as English [ENGLSH] 4410). An intensive study of selected writers of African Diaspora literature focusing on texts original in English. No more than six hours may be taken in the Major African Diaspora Writers series. Prerequisite: junior standing or instructor’s consent.

BL_STU 4415. African Americans and American Justice. 3 Credits.
(same as History [HIST] 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws. Prerequisite: senior standing required.

BL_STU 4417. Major African Diaspora Writers, 1603 to 1789. 3 Credits.

BL_STU 4418. Major African Diaspora Writers, 1789 to 1890. 3 Credits.

BL_STU 4419. Major African Diaspora Writers, 1890-Present. 3 Credits.

BL_STU 4420. Africana Womanism. 3 Credits.
(same as English [ENGLSH] 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: junior standing or instructor’s consent. May be repeated to six hours with departmental consent.

BL_STU 4460. Economic Characteristics of the African American Experience. 1 Credit.
(same as History [HIST] 4460). Examines how economic considerations have influenced African American history from the transAtlantic slave trade to the present. Prerequisite: junior standing or instructor’s consent.

BL_STU 4480. Major African Diaspora Women Writers. 3 Credits.

BL_STU 4487. Major African Diaspora Women Writers, 1603 to 1789. 3 Credits.

BL_STU 4488. Major African Diaspora Women Writers, 1789 to 1890. 3 Credits.

BL_STU 4489. Major African Diaspora Women Writers, 1890 to Present. 3 Credits.

BL_STU 4500. Special Problems in Black Studies. 1-99 Credit.
Independent project or paper, not leading to dissertation. Prerequisite: program’s approval.

BL_STU 4530. Caribbean Women Writers. 3 Credits.
Examines representative works by female authors from the Caribbean; primarily the English speaking islands. The depiction of Caribbean women will be a major consideration, as well as the unique qualities of Caribbean literature. Prerequisite: sophomore standing or instructor’s consent.

BL_STU 4640. African Politics. 3 Credits.
(same as Political Science [POL_SC] 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives. Prerequisite: Political Science [POL_SC] 1100 and junior standing.
BL_STU 4700. Race, Gender and Ethnicity in Higher Education. 3 Credits.
Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

BL_STU 4710. Themes in African Diaspora Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 4160 and English [ENGLSH] 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: junior standing.

BL_STU 4720. Third World Politics. 3 Credits.
(same as Political Science [POL_SC] 4720). Comparative, interdisciplinary analysis of the politics of selected states in Southeast Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development. Prerequisites: junior standing or instructor's consent.

BL_STU 4877. Black Studies Abroad. 3 Credits.
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their "global competencies" and course of study across the three Black Studies tracks-History, Culture and Society-as well as support their study and/or career development. Graded A-F basis only.

BL_STU 4972. Undergrad. Seminar in Black Studies: History of Race in the U.S.. 3 Credits.
Readings on problems in American history with reports and discussion on selected topics. Prerequisite: junior standing, fifteen hours or instructor's consent. Departmental consent for repetition up to a maximum of 6 hours.

BL_STU 4977. Black Studies Capstone. 3 Credits.
This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Prerequisite: Black Studies [BL_STU] 2977 and 3977; instructor's consent. Graded on A/F basis only.

BL_STU 7004. Topics in Black Studies. 1-99 Credit.
Organized study of selected topics in Black Studies. Subjects and earnable credit may vary from semester to semester. Prerequisite: instructor's consent. Graded on A/F basis only.

BL_STU 7270. African-Americans in the Twentieth Century. 3 Credits.
(same as History [HIST]7270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.

BL_STU 7300. The Black Family: Past, Present & Future. 3 Credits.
(same as Human Development and Family Studies [H_D_FS] 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family. Prerequisite: graduate standing.

BL_STU 7400. Studies in African Diaspora Literature. 3 Credits.
(same as English [ENGLSH] 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series. Prerequisite: graduate standing.

BL_STU 7407. Studies in African Diaspora Literature, 1603 to 1789. 3 Credits.

BL_STU 7408. Studies in African Diaspora Literature, 1789 to 1890. 3 Credits.

BL_STU 7409. Studies in African Diaspora Literature, 1890 to Present. 3 Credits.

BL_STU 7410. Major African Diaspora Writers. 3 Credits.
(same as English [ENGLSH] 7410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major Anglophone African Diaspora Writers series. Prerequisite: graduate standing or instructor's consent.

BL_STU 7415. African Americans and American Justice. 3 Credits.
(same as History [HIST] 7415) This course provides opportunities to examine the judicial system and discuss selected court cases in which black men, women, or children were plaintiffs or defendants in local and national courts. Moreover, the readings will subject conventional wisdom about black Americans and the legal system to scrutiny while allowing students to "witness" the mechanics of the courts and to assess long and short range social, economic, and political implications for Americans, black and white. Graduate standing required.

BL_STU 7417. Major African Diaspora Writers, 1603 to 1789. 3 Credits.

BL_STU 7418. Major Anglophone African Diaspora, 1789 to 1890. 3 Credits.

BL_STU 7419. Major African Diaspora Writers, 1890 to Present. 3 Credits.

BL_STU 7420. Africana Womanism. 3 Credits.
(same as English [ENGLSH] 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: graduate standing or instructor's consent. May be repeated to six hours with departmental consent.

BL_STU 7460. Economic Characteristics of the African American Experience. 1 Credit.
(same as History [HIST] 4460). Examines how economic considerations have influenced African American history from the transatlantic slave trade to the present. Prerequisite: junior standing or instructor's consent.

BL_STU 7480. Major African Diaspora Women Writers. 3 Credits.
(same as Women's and Gender Studies [WGST] 7480 and English [ENGLSH] 7480). Study of selected African Diaspora women writers, focusing on texts originally in English. May be repeated for credit with departmental consent. Maximum of 6 hours for Black Studies [BL_STU] 7180 and 7480. 
BL_STU 7487. Major African Diaspora Women Writers, 1603 to 1789. 3 Credits.

BL_STU 7488. Major African Diaspora Women Writers, 1789 to 1890. 3 Credits.

BL_STU 7489. Major African Diaspora Women Writers, 1890 to Present. 3 Credits.

BL_STU 7710. Themes in African Diaspora Folklore. 3 Credits.
(same as Anthropology [ANTRHO] 7160 and English [ENGLSH] 7710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. English [ENGLSH] 7700 and 7710 may be repeated for a maximum of six hours with instructor’s consent. Prerequisite: graduate standing.

BL_STU 7810. African-American Religion. 3 Credits.
(same as Religious Studies [REL_ST] 7810). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities. Prerequisite: graduate standing or instructor’s consent.

BL_STU 7877. Black Studies Abroad. 3 Credits.
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their “global competencies” and course of study across the three Black Studies tracks - History, Culture, and Society - as well support their study and/or career development. Graded on A/F basis only.

BL_STU 8000. Independent Readings in Black Studies. 3 Credits.
Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours. Department Consent Required. Graduate standing required.

BL_STU 8277. Race, Ethnicity, and Transnational Inequalities. 3 Credits.
(same as Sociology [SOCIOL] 8277). This graduate seminar examines the global contest of our radicalized modern world system. How do people develop and give meaning to race/ethnicity in different regions? Focus on the construction of bodies Creole identities, gender, sexualities, citizenships and immigration. Restricted to graduate students only. Graded on A/F basis only.

BL_STU 8400. Seminar in African Diaspora Literature. 3 Credits.
(same as English [ENGLSH] 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

BL_STU 8410. Seminar in African Diaspora Theory and Literature Criticism. 3 Credits.
(same as English [ENGLSH] 8410). Modern and contemporary African Diaspora criticism and theory including diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent. Prerequisite: graduate standing.

BL_STU 8415. Readings in African-American History. 3 Credits.
(Same as History [HIST] 8415). Readings on selected topics in African-American history from 1619 to the present, with emphasis on conflicting interpretations. May be repeated to a maximum of six hours.

BL_STU 8416. Seminar in African-American History. 3 Credits.
(same as History [HIST] 8416). Directed research in selected topics in African-American history. May be repeated to a maximum of six hours.

BL_STU 8901. Graduate Topics in Black Studies. 3 Credits.
Graduate seminar arranged by topics or themes related to Black Studies. Graded on A/F basis only. Graduate standing required.

Business Administration (BUS_AD)

BUS_AD 3500. Professional Development in Business. 3 Credits.
Provides an introduction to professional competencies important for success as a business professional. Includes the assessment, communication and development of competencies valued by employers. Prerequisite: Upper level in the TCoB.

BUS_AD 4500. Professional Development Program - Practicum. 3 Credits.
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Prerequisite: Business Administration [BUS AD] 3500. Graded on S/U basis only.

BUS_AD 7050. MBA Communications Practice. 1-3 Credit.
Special laboratory instruction in oral and written communication skills with an emphasis on business communications. Prerequisites: graduate standing.

BUS_AD 7330. Business Law/Regulation. 2-3 Credit.
Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions. Prerequisite: graduate standing.

BUS_AD 7340. Organizational Ethics. 1-3 Credit.
Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks. Prerequisite: graduate standing.

BUS_AD 8001. Topics in Business Administration. 1-99 Credit.
Selected topics in administration offered on experimental basis. Prerequisites: graduate standing and instructor's consent.

BUS_AD 8010. MBA Seminar. 1-3 Credit.
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Prerequisites: MBA students only. May be repeated.

BUS_AD 8020. MBA Seminar. 1-3 Credit.
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Prerequisites: MBA students only. May be repeated.
**BUS_AD 8030. MBA Seminar. 1-3 Credit.**
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Prerequisites: MBA students only. May be repeated. Some sections may be graded A/F or S/U only.

**BUS_AD 8500. Business Problem Analysis: Field Project. 1-3 Credit.**
Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience. Prerequisite: graduate standing.

**BUS_AD 8600. Business Consulting. 2-3 Credit.**
Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.

**BUS_AD 8730. International Study Abroad. 3-6 Credit.**
Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Graded on a S/U basis only. Prerequisite: graduate standing; consent required. May be repeated as venues change.

---

**Cardiopulmonary & Diagnostic Sciences (CPD)**

**CPD 2190. Medical Terminology. 3 Credits.**
Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology. Prerequisite: sophomore standing.

**CPD 3200. Essentials of Pathology. 2 Credits.**
Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students. Prerequisites: general biology and one course in either physiology or anatomy.

**CPD 3460. Cardiovascular and Pulmonary Diagnostic Applications I. 3 Credits.**

**CPD 4440. Organization and Administration. 3 Credits.**
(same as Radiologic Science [RA SCI] 4440 and Respiratory Therapy [RS THR] 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

**CPD 4460. Cardiovascular and Pulmonary Diagnostic Applications II. 3 Credits.**
(same as Radiologic Sciences [RA SCI] 4460). Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.

**CPD 4480. Clinical Ethics. 3 Credits.**
(same as Health Professions [HTH_PR] 4480) Analysis of clinical situations per ethical principles and decision-making models. Examination of fundamental doctrines and principles for legal and ethical clinical practice and policy. Prerequisites: instructor's consent.

**CPD 4500. Bioterrorism in Healthcare. 1 Credit.**
This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations.

**CPD 4840. Asthma Education. 2 Credits.**
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Instructor's consent. Graded on A/F basis only.

**CPD 4955. Introduction to Research. 3 Credits.**
(same as Respiratory Therapy [RS THR] 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

**CPD 4985. Healthcare Organization and Leadership. 3 Credits.**
(same as Health Professions [HTH_PR] 4985). In this course, students will explore leadership principles as they relate to the student’s focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A/F basis only. Prerequisite: Health Professions [HTH_PR] 2100.

**CPD 7840. Asthma Education. 2 Credits.**
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Instructor’s consent required. Graded on A/F basis only.

---

**Chemical Engineering (CH_ENG)**

**CH_ENG 1000. Introduction to Chemical Engineering. 2 Credits.**
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations. Prerequisites: Mathematics [MATH] 1500, Chemistry [CHEM] 1320, or concurrently.

**CH_ENG 1000H. Introduction to Chemical Engineering - Honors. 2 Credits.**
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations. Prerequisites: Mathematics [MATH] 1500, Chemistry [CHEM] 1320, or concurrently. Honors eligibility required.

**CH_ENG 1320. Chemistry and Chemical Technology I. 3 Credits.**
Covers fundamental principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Prerequisite: Mathematics [MATH] 1500 or concurrent enrollment. Graded on A/F basis only.
CH_ENG 1330. Chemistry and Chemical Technology II. 3 Credits. Covers fundamentals principals of chemistry, gases, engineering materials, electrochemistry, and applications with instruction including numerical modeling. May be repeated for credit. Prerequisite: Chemical Engineering [CH_ENG] 1320 or Chemistry [CHEM] 1320 and Mathematics [MATH] 1500. Corequisite: Mathematics [MATH] 1500. Graded on A/F basis only.

CH_ENG 2001. Advanced Experimental Course. 1-99.9 Credit. Content and number of credit hours to be listed in Schedule of Courses. Prerequisite: sophomore standing.

CH_ENG 2118. Introduction to Energy Technology and Sustainability. 3 Credits. An introductory course on energy technology and those resources and practices that allow for sustainable commercialization. Prerequisite: sophomore standing in engineering. Graded on A/F basis only.

CH_ENG 2225. Mass and Energy Balance. 3 Credits. Industrial stoichiometry, material and energy balances, thermodynamics, thermochemistry; related topics. Prerequisites: Physics [PHYSCS] 2750, Chemistry [CHEM] 2100, or concurrently.

CH_ENG 2226. Engineering Process Computations and Laboratory. 3 Credits. Engineering applications of ordinary and partial differential equations, spreadsheets, Matlab, discipline-specific software (Aspen), process simulation, data collection, data regression, and modeling of multiple experimental systems. Pre or Co - requisite: Mathematics [MATH] 1700.

CH_ENG 3234. Principles of Chemical Engineering I. 3 Credits. Fluid flow, heat transfer. Prerequisites: grade of C or better in Chemical Engineering [CH_ENG] 2225.

CH_ENG 3235. Principles of Chemical Engineering II. 3 Credits. Mass transfer. Prerequisite: Chemical Engineering [CH_ENG] 3234.

CH_ENG 3243. Chemical Engineering Laboratory I. 3 Credits. Laboratory study of some principal unit operations of chemical engineering. Prerequisite or Co-Require: Chemical Engineering [CH_ENG] 2226 and 3235.

CH_ENG 3261. Chemical Engineering Thermodynamics I. 3 Credits. Study of thermodynamics, with particular reference to chemical engineering applications. Prerequisites: grade of C or better in Chemical Engineering [CH_ENG] 2225.

CH_ENG 3262. Chemical Engineering Thermodynamics II. 3 Credits. Prerequisite: Chemical Engineering [CH_ENG] 3261.

CH_ENG 3307. Chemical Process Safety and Professional Ethics. 3 Credits. A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Prerequisite: Chemical Engineering [CH_ENG] 3234, 3261 or instructor’s consent. Graded on A/F basis only.

CH_ENG 4001. Topics in Chemical Engineering. 3 Credits. Current and new technical developments in chemical engineering. Prerequisite: instructor’s consent.

CH_ENG 4085. Problems in Chemical Engineering. 2-4 Credit. Directed study of chemical engineering problems. Prerequisite: instructor’s consent.

CH_ENG 4220. Hazardous Waste Management. 3 Credits. (same as Civil Engineering [CV_ENG] 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: junior standing.

CH_ENG 4226. Engineering Research Calculations and Reporting. 3 Credits. Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, experiential learning, and supervised research. Prerequisites: Mathematics [MATH] 4100, must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

CH_ENG 4270. Design of Experiments and Statistical Quality Control for Process Engineers. 3 Credits. (same as Biological Engineering [BIOL_EN] 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 4306. Advanced Engineering Math. 3 Credits. (same as Nuclear Engineering [NU_ENG] 4306). Applies ordinary and partial differential equations to engineering problems; Fourier’s series; determinants and matrices; Laplace transforms; analog computer techniques. Prerequisite: Mathematics [MATH] 4100.

CH_ENG 4311. Chemodynamics. 3 Credits. Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems. Prerequisites: Chemical Engineering [CH_ENG] 3234 or instructor’s consent.

CH_ENG 4312. Air Pollution Control. 3 Credits. Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects. Prerequisites: Chemical Engineering [CH_ENG] 3234 or instructor’s consent.

CH_ENG 4315. Introduction to Bioprocess Engineering. 3 Credits. (same as Biological Engineering [BIOL_EN] 4315). This general introduction to bioprocess engineering covers the fundamentals of microbiology and biochemistry in the context of a biomass refinery. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models. Prerequisites: Biological Engineering [BIOL_EN] 2180 (for Biological Engineering students) or Chemical Engineering [CH_ENG] 2225 (for Chemical Engineering students) or instructor’s consent.

CH_ENG 4316. Biomass Refinery Operations. 3 Credits. (same as Biological Engineering [BIOL_EN] 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery. Prerequisite: Biological Engineering [BIOL_EN] 2180 or Chemical Engineering [CH_ENG] 2225 (for Chemical Engineering students) or instructor’s consent.

CH_ENG 4317. Chemical Processing in Semiconductor Device. 3 Credits. This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry...
and the chemical reactions used in plasma etching are discussed.

Mathematics [MATH] 4100/7100.

CH_ENG 4318. Energy Technology and Sustainability. 3 Credits.
An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. Prerequisite: at least one engineering thermodynamics course or a Physical Chemistry course or instructor’s consent. May be repeated for credit.

CH_ENG 4319. Introduction to Polymer Materials. 3 Credits.
An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered. Prerequisites: Chemical Engineering [CH_ENG] 3262 and Chemistry [CHEM] 2110.

CH_ENG 4321. Introduction to Ceramics. 3 Credits.
Introductory course in ceramics materials, crystal structure, processes and properties. The course content and level of presentation would allow an entry level engineering to be conversant with the terminology and concepts of ceramic science and engineering. Prerequisite: Chemistry and Physics.

CH_ENG 4335. Transport Phenomena. 3 Credits.

CH_ENG 4345. Special Reading in Chemical Engineering. 2-5 Credit.
Individually supervised special reading leading to an engineering report. Prerequisite: senior standing.

CH_ENG 4363. Chemical Reaction Engineering and Technology. 3 Credits.
Reactor design and optimization; rate equations; thermal effects in reactor. Prerequisites: Chemical Engineering [CH_ENG] 2226, 3262, or instructor’s consent.

CH_ENG 4370. Process Control Methods and Laboratory. 3 Credits.
Stat-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection. Prerequisites: Chemical Engineering [CH_ENG] 2226.

CH_ENG 4385. Chemical Engineering Design I. 3 Credits.
The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered. Prerequisite: Chemical Engineering [CH_ENG] 2226, 3235, 3262, Physics [PHYSICS] 2760, Chemistry [CHEM] 2110.

CH_ENG 4464. Electrochemical Reaction Engineering Science. 3 Credits.
Phenomenological behavior of electrochemical processes (battery emphasis). Theoretical interpretations of diffusion and reaction processes including system modeling. Prerequisite: A course in thermodynamics or physical chemistry; Chemical Engineering [CH_ENG] 3261 or Mechanical and Aerospace Engineering [MAE] 2300 or Chemistry [CHEM] 3310 or instructor’s consent. Graded on A/F basis only.

CH_ENG 4980. Process Synthesis and Design. 3 Credits.
Continuation of Chemical Engineering [CH_ENG] 4385: application of chemical analysis and modeling to a capstone design project. Prerequisite: Chemical Engineering [CH_ENG] 4385.

CH_ENG 4990. Undergraduate Research in Chemical Engineering. 2-4 Credit.
Directed study of chemical engineering problems. Prerequisite: instructor’s consent.

CH_ENG 4995. Undergraduate Research in Chemical Engineering - Honors. 3-6 Credit.
Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee. Prerequisite: senior standing.

CH_ENG 7001. Topics in Chemical Engineering. 3 Credits.
Current and new technical developments in chemical engineering. Prerequisite: graduate standing and instructor’s consent.

CH_ENG 7220. Hazardous Waste Management. 3 Credits.
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, exponential learning, and supervised research. Prerequisites: Mathematics [MATH] 4100, must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

CH_ENG 7226. Engineering Research Calculations and Reporting. 3 Credits.
Application and analysis of engineering calculations in MS Excel, Matlab, and project-specific software including applications of calculus, exponential learning, and supervised research. Prerequisites: Mathematics [MATH] 4100, must have research advisor define at least one experiment and review at least one report. Graded on A-F basis only.

CH_ENG 7315. Introduction to Bioprocess Engineering. 3 Credits.
Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects. Prerequisites: graduate standing and Chemical Engineering [CH_ENG] 3234 or instructor’s consent.

CH_ENG 7316. Biomass Refinery Operation. 3 Credits.
(same as Civil Engineering [CV_ENG] 7220). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7317. Air Pollution Control. 3 Credits.
(same as Biological Engineering [BIOL_EN] 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7318. Chemodynamics. 3 Credits.
Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems. Prerequisites: graduate standing and Chemical Engineering [CH_ENG] 3234 or instructor’s consent.

CH_ENG 7319. Advanced Topics in Air Pollution Control. 3 Credits.
Current and new technical developments in chemical engineering. Prerequisite: senior standing.

CH_ENG 7401. Chemical Engineering Honors. 3-6 Credit.
Prerequisite: graduate standing and Chemical Engineering 7220. A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7404. Photocatalysis. 3 Credits.
Prerequisite: Chemical Engineering 7220. A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7415. Advance in Fluid Dynamics. 3 Credits.
Prerequisite: Chemical Engineering 7220. A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7425. Design of Experiments and Statistical Quality Control for Process Engineers. 3 Credits.
(same as Biological Engineering [BIOL_EN] 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.

CH_ENG 7431. Bioreactor Design and Operation. 3 Credits.
Prerequisites: Chemical Engineering 7220. A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control. Prerequisite: experience with Excel or instructor’s consent.
CH_ENG 8230. Advanced Ceramic Materials. 3 Credits.
(same as Biological Engineering [BIOL_EN] and Mechanical and Aerospace Engineering [MAE] 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A/F basis only.

CH_ENG 8320. Plasma Polymerization. 3 Credits.
Fundamental aspects of polymer formation in plasma state: gas ionization, reaction kinetics, plasma characteristics and operational parameters of plasma reactors. Properties of plasma - synthesized ultrathin films and their utilization also discussed. Prerequisites: graduate standing and Chemical Engineering [CH_ENG] 4319 or instructor’s consent.

CH_ENG 8336. Advanced Heat and Momentum Transfer. 3 Credits.
Advanced study of these transport phenomena. Prerequisites: graduate standing and Chemical Engineering [CH_ENG] 3235 or instructor’s consent.

CH_ENG 8337. Advanced Mass Transfer. 3 Credits.
Advanced study of mass transfer. Prerequisite: graduate standing and Chemical Engineering [CH_ENG] 4336 or instructor’s consent.

CH_ENG 8338. Analysis of Equilibrium Stage Processes. 3 Credits.
Advanced study of stage processes. Prerequisites: graduate standing and Chemical Engineering [CH_ENG] 2226, 3235 and 3262.

CH_ENG 8429. Membranes and Membrane Processes. 3 Credits.
Thermodynamics and mass transfer of membrane separation processes; Concentration-Driven Processes; Pressure-Driven Processes; Electromembrane Processes; Biological Membrane Processes; Membrane Polymers; Preparation of Membranes; Membrane Separation Application (potable and ultrapure water, effluent treatment, gas separations, electrochemistry, dialysis therapeutic, and other applications).

CH_ENG 8451. Advanced Chemical Engineering Thermodynamics I. 3 Credits.
Advanced thermodynamics; particular reference to its application to chemical engineering. Prerequisite: Chemical Engineering [CH_ENG] 3262 or instructor’s consent.

CH_ENG 8463. Chemical Reaction Engineering Science. 3 Credits.
Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts. Prerequisite: Chemical Engineering [CH_ENG] 4363.

CH_ENG 8471. Process Optimization Methods in Chemical Engineering. 3 Credits.
Steady-state and unsteady-state optimization techniques applied to chemical processes. Prerequisite: Chemical Engineering [CH_ENG] 2226.

CH_ENG 8990. Research-Masters Thesis in Chemical Engineering. 1-99 Credit.
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. Prerequisite: Masters candidate.

CH_ENG 9990. Research-Doctoral Dissertation in Chemical Engineering. 1-99 Credit.
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. Prerequisite: Ph.D. candidate.
Chemistry (CHEM)

CHEM 1000. Introductory Chemistry. 2 Credits.
Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100. Pre/Co-requisites: MATH 1100/1120.

CHEM 1100. Atoms and Molecules with Lab. 3 Credits.
One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

CHEM 1320. College Chemistry I. 4 Credits.
First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Prerequisites: MATH 1100/1120 or equivalent. Math Reasoning Proficiency Course.

CHEM 1320H. College Chemistry I - Honors. 4 Credits.
First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Prerequisites: MATH 1100/1120 or equivalent. Honors eligibility required. Math Reasoning Proficiency Course.

CHEM 1330. College Chemistry II. 4 Credits.
Continuation of 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or 2100. Prerequisite: grade of C- or better in CHEM 1320/1320H.

CHEM 1330H. College Chemistry II- Honors. 4 Credits.
Continuation of 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or 2100. Prerequisite: grade of C- or better in CHEM 1320/1320H. Honors eligibility required.

CHEM 1500H. Honors Intensive General Chemistry with Lab - Honors. 5 Credits.
A one-semester, intensive introduction to chemistry for honors-eligible students that takes the place of CHEM 1320, 1330. Four lectures and one 3-hour lab period per week. Prerequisites: honors eligibility, college algebra and one year of high school chemistry or instructor’s consent. Math Reasoning Proficiency Course.

CHEM 2030. Survey of Organic Chemistry. 3 Credits.
One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life. Prerequisite: Grade of C or better in CHEM 1320 or CHEM 1320H or equivalent; CHEM 1330, or CHEM 1330 concurrently, strongly recommended.

CHEM 2100. Organic Chemistry I. 3 Credits.
First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after 2030 or equivalent.

Prerequisite: grade of C or better in CHEM 1320 or equivalent; CHEM 1330, or 1330 concurrently, strongly recommended.

CHEM 2110. Organic Chemistry II. 3 Credits.
Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats. Prerequisite: grade of C or better in CHEM 2100 or equivalent, or departmental consent.

CHEM 2130. Organic Laboratory I. 2 Credits.
Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week. Concurrent enrollment in CHEM 2110 or 2030 highly recommended. No credit for students who have previous organic laboratory credit.

CHEM 2140. Organic Laboratory II. 2 Credits.
Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week. Prerequisite: grade of C or better in CHEM 2110 and 2130 or equivalent.

CHEM 2160H. Honors Organic Chemistry I - Honors. 4 Credits.
First course of a two-semester sequence. Similar to CHEM 2100 but with increased depth and breadth; emphasis on preparing science students for research and professional careers. 3 lectures, 1 discussion session per week. Prerequisite: honors eligibility, grade of B or better in CHEM 1320 or equivalent.

CHEM 2170H. Honors Organic Chemistry II with Lab - Honors. 5 Credits.
Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2120, but with increased depth and breadth. Prerequisites: honors eligibility, grade of B or better in CHEM 2160H or instructor’s permission.

CHEM 2190H. Honors Organic Chemistry Laboratory - Honors. 2 Credits.
Preparation and identification of organic compounds; multistep syntheses; application of instrumental techniques, including NMR, FTIR, MS and HPLC. 2 lab sessions, 1 discussion session per week. Prerequisites: honors eligibility, grade of C or better in CHEM 2170H or equivalent.

CHEM 2400. Fundamentals of Inorganic Chemistry with Lab. 3 Credits.
A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties. Prerequisite: grade of C or better in CHEM 1330.

CHEM 2950. Undergraduate Research in Chemistry. 1-3 Credit.
A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit. Prerequisites: sophomore standing, 2.75 GPA and/or instructor’s consent.

CHEM 3200. Quantitative Methods of Analysis with Lab. 4 Credits.
Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods. Prerequisite: CHEM 1330 or 1500H.

CHEM 3300. Fundamentals of Physical Chemistry. 3 Credits.
Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430. Prerequisite: MATH 1700, a course in organic chemistry;
PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2175, or PHYSCS 2176 concurrently.

CHEM 3310. Physical Chemistry I. 3 Credits.
Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium. Prerequisites: one semester organic chemistry and PHYSCS 2175, PHYSCS 2176 and MATH 2300, or MATH 2300 concurrently.

CHEM 3330. Physical Chemistry II. 3 Credits.
Continuation of CHEM 3310. Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.

CHEM 3340. Physical Chemistry Laboratory. 3 Credits.
Prerequisites: Grade of C or better in CHEM 3200; 3330 or 3330 concurrently.

CHEM 3700. Undergraduate Seminar in Chemistry. 3 Credits.
Methods for locating and presenting chemical information, data analysis techniques, professional issues. Prerequisites: CHEM 1330 or 1500H; CHEM 2100 or 2160H.

CHEM 3800. Internship in Chemistry. 1-6 Credit.
Cannot be substituted for other chemistry courses required for B.S. or B.A. degree. Prerequisites: departmental consent.

CHEM 3940. Service-Learning in Chemistry. 2 Credits.
A service-learning community outreach program affording chemistry students with an opportunity to enhance their problem-solving skills. May be repeated once for credit. Satisfies no specific chemistry degree requirements, nor Arts and Science general education requirements. Graded on a S/U basis only. Prerequisites: departmental consent.

CHEM 4001. Topics in Chemistry-General. 1-99 Credit.
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered. Prerequisite: departmental consent.

CHEM 4003. Topics in Chemistry-Natural Science. 1-99 Credit.
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered. Prerequisite: departmental consent.

CHEM 4010. Advanced Chemistry Laboratory. 3 Credits.
Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds. Prerequisite: CHEM 2400, 2140, or 2190H, 3200, 3330 (or 3330 corequisite).

CHEM 4050. Problems in Chemistry. 1-99 Credit.
Individual study under the direction of a faculty member that supplements regular course work. Prerequisite: instructor's consent.

CHEM 4160. Intermediate Organic Chemistry. 3 Credits.
Stresses synthetic organic chemistry at an intermediate level. Prerequisite: at least one year organic chemistry.

CHEM 4170. Medicinal Chemistry. 3 Credits.
Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies. Prerequisite: CHEM 2110, or 2170H, 3300 or 3310 or instructor's consent.

CHEM 4200. Instrumental Methods of Analysis with Lab. 3 Credits.
Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques. Prerequisites: CHEM 3200, a semester of physical chemistry.

CHEM 4280. Environmental Chemistry. 3 Credits.
Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment. Prerequisite: 8 hours chemistry including organic and analytical.

CHEM 4290. Environmental-Toxicological Chemistry. 3 Credits.
In-depth study of the chemical aspects of current issues dealing with environmental pollutants and toxic chemical substances. Prerequisite: CHEM 4280 or equivalent.

CHEM 4400. Inorganic Chemistry. 3 Credits.
Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases. Prerequisite: one semester Physical Chemistry, second semester concurrently.

CHEM 4490. Physics and Chemistry of Materials. 3 Credits.
(same as NU_ENG 4319 and PHYSCS 4190 BIOL_EN 4480). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper. Prerequisite: PHYSCS 2760 and CHEM 1320 or equivalent and instructor's consent.

CHEM 4600. Introduction to Radiochemistry with Lab. 3 Credits.
(same as NU_ENG 4391). Introduces application of radio-tracer techniques to chemical research. Prerequisite: CHEM 1330 or 1500H; and one semester of physical chemistry, or instructor's consent.

CHEM 4800. Chemistry Teaching Practicum. 3 Credits.
Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. Prerequisite: senior standing; departmental consent required. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.

CHEM 4950. Senior Research. 3 Credits.
A laboratory research project with approved written goals and a final written report. It may be taken twice. Prerequisites: a 2.75 GPA, departmental consent.

CHEM 4990H. Senior Honors Research I. 3 Credits.
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination. Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required.

CHEM 4991H. Senior Honors Research II. 3 Credits.
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination. Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required.

CHEM 7087. Seminar in Chemistry for Beginning Graduate Students. 1 Credit.
Prerequisite: graduate standing.

CHEM 7200. Instrumental Methods of Analysis with Lab. 3 Credits.
Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques. Prerequisites: CHEM 3200, a semester of physical chemistry.
CHEM 7300. Intermediate Physical Chemistry. 3 Credits.
Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry. Prerequisite: departmental consent.

CHEM 7440. Inorganic Chemistry. 3 Credits.
Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases. Prerequisite: one semester Physical Chemistry, second semester concurrently. Graduate standing required.

CHEM 7490. Physics and Chemistry of Materials. 3 Credits.
(same as NU_ENG 7319 and PHYSICS 7190 and BIOL_EN 7480). Undergraduate/graduate level course offered every winter semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two midterm and one final exam. Graduate students will submit a term paper. Prerequisite: graduate standing and PHYSICS 2760 and CHEM 1320 or equivalent and instructor’s consent.

CHEM 8003. Topics in Chemistry - Natural Science. 1-99 Credit.
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department. Prerequisite: instructor’s consent.

CHEM 8020. Introduction to X-ray Crystallography. 3 Credits.
Designed for students in chemistry and related fields. Aimed at offering a practical understanding of single-crystal x-ray structural studies. Includes hands-on laboratory work (data collection and analysis). Prerequisites: instructor’s consent.

Does not lead to dissertation.

CHEM 8085. Topics in Chemistry. 1-99 Credit.
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department. Prerequisite: instructor’s consent.

CHEM 8087. Seminar in Chemistry. 1 Credit.
Prerequisite: graduate standing.

Research leading to thesis. Graded on a S/U basis only.

CHEM 8120. Physical Organic Chemistry I. 3 Credits.
Bonding theory, physical methods, absorption spectroscopy, conformational analysis, mechanism of reactions.

CHEM 8130. Physical Organic Chemistry II. 3 Credits.
Case studies and methods for determining organic reaction mechanisms.

CHEM 8150. Organic Reaction Mechanisms. 3 Credits.
Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts. Prerequisites: 1 year of Organic Chemistry and Physical Chemistry.

CHEM 8160. Organic Spectroscopy. 3 Credits.
Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques. Prerequisites: CHEM 3330 or equivalent or instructor’s consent.

CHEM 8170. Applications of the Reactions of Organic Chemistry. 3 Credits.
Prerequisite: CHEM 8150.

CHEM 8210. Analytical Measurement. 3 Credits.
Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.

CHEM 8230. Separations and Chromatography. 3 Credits.
Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.

CHEM 8240. Mass Spectrometry. 3 Credits.
This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.

CHEM 8250. Analytical Spectroscopy. 3 Credits.
Selected topics dealing with recent advances in analytical chemistry.

CHEM 8260. Surface Analysis and Characterization. 3 Credits.
Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.

CHEM 8265. Fluorescence Spectroscopy. 3 Credits.
Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.

CHEM 8270. Advanced Analytical Chemistry. 3 Credits.
Continuation of CHEM 8250.

CHEM 8280. Bioanalytical Chemistry. 3 Credits.
This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding for how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.

CHEM 8285. Nanochemistry. 3 Credits.
Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.

CHEM 8300. Advanced Physical Chemistry. 3 Credits.
Advanced Physical Chemistry.

CHEM 8310. Quantum Chemistry. 3 Credits.
Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation...
principle, WKB), and the structure of many-electron atoms. Prerequisite: CHEM 3330 or equivalent or instructor’s consent.

CHEM 8320. Chemical Kinetics. 3 Credits.
Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques. Prerequisites: CHEM 3330 or equivalent or instructor’s consent.

CHEM 8330. Computational Chemistry. 3 Credits.
Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems. Prerequisite: CHEM 3300 or equivalent or instructor’s consent.

CHEM 8340. Statistical Mechanics. 3 Credits.
Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases. Prerequisite: CHEM 3330 or equivalent or instructor’s consent.

CHEM 8350. Magnetic Resonance. 3 Credits.
Basic principles of nuclear magnetic resonance (NMR) and electron spin resonance (ESR), nuclear spin relaxation, current experimental techniques and the application to studies of structures, dynamics and chemical analysis. Prerequisites: One year of organic chemistry, CHEM 3300 or equivalent.

CHEM 8400. Inorganic Mechanisms. 3 Credits.
Experimental stoichiometry and rate law determination. Isotopic applications. Methods and results of fast reaction studies. Basic known inorganic mechanisms. Experimental methods of establishing mechanisms of reaction.

CHEM 8410. Chemistry of the Main Group Elements. 3 Credits.
Descriptive inorganic chemistry of the main group elements. Textbook material extensively supplemented with information from the current chemical literature.

CHEM 8420. Supramolecular Chemistry. 3 Credits.
The basics of supramolecular chemistry will be covered, including host-guest complexes, reorganization, complementarily, thermodynamic interactions, self assembly and biochemical, molecular device and crystal engineering applications. Prerequisites: BS in Chemistry, Biochemistry or Chemical Engineering; graduate standing or instructor’s consent. Graded on A/F basis only.

CHEM 8430. Coordination Chemistry and Reactivity. 3 Credits.
The chemistry of the transition elements (d-block) and their reactivity will be discussed, including bonding, coordination numbers, oxidation states, and reactivity (kinetics). Prerequisites: Chemistry [CHEM] 4400 or equivalent; graduate standing in chemistry or instructor’s consent. Graded on A/F basis only.

CHEM 8440. Inorganic Structural Methods. 3 Credits.
Chemical bonding, application of group theory, spectroscopy; diffraction as applied to structure determination; structural implications of dipole moment and magnetic susceptibility measurements.

CHEM 8450. Organometallics. 3 Credits.
Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

CHEM 8460. Solid State Chemistry. 3 Credits.

CHEM 8470. Actinide Chemistry. 3 Credits.
The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

CHEM 8480. Chemistry of Nanomaterials. 3 Credits.
This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biominalization to make organic-inorganic hybrid materials will also be discussed.

CHEM 8600. Radiochemistry and Detection with Lab. 3 Credits.
An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

CHEM 8610. Advanced Radiochemistry. 3 Credits.
Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry. Prerequisite: Chemistry [CHEM] 8600 or equivalent.

CHEM 8620. Nuclear Chemistry. 3 Credits.
Designed for graduate students in chemistry and related fields. Studies nuclear reaction and nuclear properties. Prerequisites: Chemistry [CHEM] 3300, Mathematics [MATH] 2300 or instructor’s consent.

CHEM 8630. Radiopharmaceutical Chemistry. 3 Credits.
The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Prerequisite: undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor’s consent. Graded on A/F basis only.

CHEM 8640. Biological Radiochemistry. 3 Credits.
Covers the interaction of radiation on biological material. The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Child Health (CH_HTH)

CH_HTH 6000. Child Health Clerkship. 6-10 Credit.
Child Health Clerkship.

CH_HTH 6010. Rural Child Health Clerkship. 6 Credits.
Rural Child Health Clerkship.

CH_HTH 6100. Remediation 6000 Child Health Clerkship. 6 Credits.
Child Health Clerkship remediation. Prerequisite: 6000 Child Health Clerkship, received unsatisfactory grade.
CH_HTH 6221. Advanced Biomedical Science Medicine Problem Premature Infant. 5 Credits.
Advanced Biomedical Science Medicine Problem Premature Infant.

CH_HTH 6223. ABS Child Health Research. 5-10 Credit.
ABS Child Health Research.

CH_HTH 6225. ABS Child Health Research and Review. 5-10 Credit.
ABS Child Health Research and Review.

CH_HTH 6425. Child Health Genetics. 5 Credits.
Prerequisites: Child Health Clerkship Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases. CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available.

CH_HTH 6426. Child Health Infectious Disease. 5 Credits.
Child Health Infectious Disease.

CH_HTH 6427. Pediatric Hematology/Oncology. 5 Credits.
Pediatric Hematology/Oncology.

CH_HTH 6428. Pediatric Diabetes and Endocrinology. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence. CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program. Thus, students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

CH_HTH 6429. Developmental Pediatrics. 5 Credits.
Developmental Pediatrics.

CH_HTH 6430. Pediatric Cardiology. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

CH_HTH 6431. Pediatric Pulmonology. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

CH_HTH 6432. Pediatric Gastroenterology. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management.

3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.

CH_HTH 6433. Child Health Sports Medicine. 5 Credits.
Child Health Sports Medicine.

CH_HTH 6434. Child Adolescent Medicine. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent "check-up", and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents. CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

CH_HTH 6435. Ped Renal and Rheumatology. 5 Credits.
4th year elective for renal/rheumatology rotation, four weeks. Prerequisite: 3rd year Pediatrics/Child Health or Internal Medicine rotation.

CH_HTH 6706. Internal Medicine Hematology and Medical Oncology Rural Elective. 5 Credits.
The student will work as part of a team providing hands-on clinical services in a rural outpatient setting. Students will participate in daily morning report and other didactic sessions provided by the rotation site. Students will learn using a variety of evidence-based resources, direct observations and demonstration. Prerequisites: Child Health [CH_HTH] 6002; restricted to medical students only.

CH_HTH 6725. Developmental Pediatrics - Rural. 5 Credits.
Rural developmental pediatrics general elective. Prerequisite: Child Health [CH_HTH] 6000. Restricted to fourth year medical students.

CH_HTH 6726. Child Health Rural Elective. 5 Credits.
Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well. Prerequisite: Child Health [CH_HTH] 6000; restricted to medical students only.

CH_HTH 6825. General Child Health - Inpatient. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient’s management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.
CH_HTH 6826. General Child Health - Outpatient. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: To provide additional experience in general pediatrics in outpatient care.
CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

CH_HTH 6827. Neonatology/Neonatal Intensive Care Unit. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital).

CH_HTH 6828. Pediatric Intensive Care Unit. 5 Credits.
Prerequisites: Child Health Clerkship. Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

CH_HTH 6829. Pediatric Neurology. 5 Credits.
Pediatric Neurology.

Chinese (CHINSE)

CHINSE 1100. Elementary Chinese I. 6 Credits.
For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

CHINSE 1200. Elementary Chinese II. 6 Credits.
Five hours of classroom instruction, with one hour lab work weekly. Prerequisite: C- or better in Chinese [CHINSE] 1100 or equivalent.

CHINSE 2001. Undergraduate Topics in Chinese-General. 1-3 Credit.
Organized study of selected topics. Subjects and credits may vary from semester to semester.

CHINSE 2005. Undergraduate Topics in Chinese - Humanities. 1-3 Credit.
Organized study of selected topics. Subjects and credits may vary from semester to semester. No knowledge of Chinese required. No language credit.

CHINSE 2100. Everyday Spoken Chinese Level I. 3 Credits.
Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace. Chinese language courses taught on MU campus. Prerequisite: Chinese [CHINSE] 1200. Restricted to students enrolled in MU China Study Abroad.

CHINSE 2160. Intermediate Chinese I Conversation and Composition. 3 Credits.
Prerequisite: C- or better in Chinese [CHINSE] 1200 or equivalent.

CHINSE 2310. Chinese Civilization I. 3 Credits.
Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

CHINSE 2330. Chinese Language and Culture. 3 Credits.
Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese. Must be enrolled in MU China Study Abroad. Sophomore standing required.

CHINSE 3005. Topics in Chinese - Humanities. 1-3 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing and instructor’s consent.

CHINSE 3085. Problems in Chinese. 1-3 Credit.
Supervised study in Chinese language and/or culture. Prerequisite: instructor’s consent.

CHINSE 3160. Intermediate Chinese II Conversation and Composition. 3 Credits.
Continuation of Chinese [CHINSE] 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns. Prerequisites: C- or higher in Chinese [CHINSE] 2160, or instructor’s consent.

CHINSE 3170. Everyday Spoken Chinese Level II. 3 Credits.
For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus. Prerequisite: Chinese [CHINSE] 3160 or consent of instructor. Restricted to students enrolled in the MU China Study Abroad.

CHINSE 3180. Advanced Chinese I. 3 Credits.
Improves vocabulary, listening, spoken and written Chinese Skills. Discusses basic cultural ideas. Prerequisite: C- or higher in Chinese [CHINSE] 3160, or equivalent. Graded on A/F basis only.

CHINSE 3300. Chinese Traditions and Global Integration. 3 Credits.
Focuses on developments in China’s International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China’s sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people. Must be enrolled in MU China Study Abroad. Sophomore standing required.

CHINSE 3300H. Chinese Traditions and Global Integration - Honors. 3 Credits.
Focuses on developments in China’s International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China’s sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people. Prerequisites: Must be enrolled in MU China Study Abroad. Sophomore standing required. Honors eligibility required.
CHINSE 3320. Modern and Contemporary Chinese Fiction (in translation). 3 Credits.
Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

CHINSE 3400. Negotiating Chinese Culture. 3 Credits.
As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts. Prerequisite: sophomore standing or instructor’s consent.

CHINSE 3880. Contemporary Chinese Film. 3 Credits.
(same as Film Studies [FILM_S] 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required. Prerequisite: sophomore standing.

Civil Engineering (CV_ENG)

CV_ENG 1000. Introduction to Civil Engineering. 1 Credit.
Introduces various aspects of Civil Engineering practice. May be repeated one time for credit.

CV_ENG 1001. Experimental Course. 1-99 Credit.
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

CV_ENG 2080. Introduction to Dynamics. 3 Credits.
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods. Prerequisite: Engineering [ENGINR] 1200.

CV_ENG 3001. Fundamental Topics in Civil Engineering. 1-3 Credit.
Special engineering topics for undergraduate students. Prerequisite: instructor’s consent.

CV_ENG 3010. Decision Methods for Civil Engineering Design. 3 Credits.
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations. Prerequisite: grade of C- or better in English [ENGLSH] 1000. Co-requisite: Engineering [ENGINR] 1200.

CV_ENG 3050. Introduction to Geographic Information Systems GIS. 3 Credits. 
(same as Geography [GEOG] 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises. Prerequisite: sophomore standing or instructor’s consent.

CV_ENG 3100. Fundamentals of Transportation Engineering. 4 Credits.
Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning. Prerequisite: grade of C- or better in Engineering [ENGINR] 1100. Corequisite: Civil Engineering [CV_ENG] 3010.

CV_ENG 3200. Fundamentals of Environmental Engineering. 4 Credits.
Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics. Prerequisite: grade of C- or better in Chemistry [CHEM] 1320 or equivalent; co-requisite: Civil Engineering [CV_ENG] 3010.

CV_ENG 3250. Pollutant Fate and Transport. 3 Credits.
(same as Environmental Science [ENV_SC] 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement. Prerequisites: Environmental Sciences [ENV_SC] 1100 or Soil Science [SOIL] 2100 or Civil Engineering [CV_ENG] 3200; and Chemistry [CHEM] 1320; or instructor’s permission.

CV_ENG 3300. Structural Analysis I. 4 Credits.
Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis. Prerequisites: grade of C- or better in Engineering [ENGINR] 1200 and ENGINR 2200.

CV_ENG 3312. Reinforced Concrete Design. 3 Credits.
Basic principles of reinforced concrete design. Design of beams for flexure and shear; design of short and slender columns. Prerequisite: Civil Engineering [CV_ENG] 3300; Corequisite: Civil Engineering [CV_ENG] 3600.

CV_ENG 3313. Structural Steel Design. 3 Credits.

CV_ENG 3400. Fundamentals of Geotechnical Engineering. 4 Credits.
Detailed study of physical and mechanical properties of soil governing its behavior as an engineering material. Prerequisite: grade of C- or better in Engineering [ENGINR] 2200 and Geology [GEOL] 1150.

CV_ENG 3600. Civil Engineering Materials. 4 Credits.
Introduces composition, structure, properties, behavior, and selection of civil engineering materials. Prerequisites: grade of C- or better in Engineering [ENGINR] 2200 or instructor’s consent; co-requisite: Civil Engineering [CV_ENG] 3010.
CV_ENG 3700. Fluid Mechanics. 3 Credits.
Statics and dynamics of fluids, principles of continuity, momentum and energy, pipe flow. Prerequisite: grade of C- or better Physics [PHYSCS] 2750.

CV_ENG 3702. Hydrology. 4 Credits.
Fundamental concepts of hydrology in engineering; quantitative estimation of stream-flow magnitude and frequency; and open channel flow considerations from stream-flow. Fluid Mechanics lab with lab reports. Prerequisites: grade of C- or better Mathematics [MATH] 2300 and Civil Engineering [CV_ENG] 3200 and 3700.

CV_ENG 4001. Topics in Civil Engineering. 1-3 Credit.
Study of current and new technical developments in civil engineering. Prerequisite: instructor's consent.

CV_ENG 4006. Digital Computer Applications in Engineering. 3 Credits.

CV_ENG 4008. Risk and Reliability for Civil Engineers. 3 Credits.
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3010 or other introductory probability/statistics course.

CV_ENG 4080. Advanced Surveying. 3 Credits.
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments. Prerequisites: Mathematics [MATH] 1500.

CV_ENG 4085. Problems in Civil and Environmental Engineering. 2-4 Credit.
Directed investigation of civil engineering. Prerequisite: instructor's consent.

CV_ENG 4100. Traffic Engineering. 3 Credits.
Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4102. Infrastructure Management. 3 Credits.
Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4103. Planning and Geometric Design of Highways. 3 Credits.
Techniques of highway planning in rural and urban areas. Design of the visible elements of highways. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4104. Pavement Materials and Design. 3 Credits.
Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements. Prerequisites: grade of C- or better in Engineering [ENGINR] 2200.

CV_ENG 4106. Intelligent Transportation Systems. 3 Credits.
This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and practical issues and implications of ITS. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4108. Bicycle and Pedestrian Transportation. 3 Credits.
This course teaches how to integrate pedestrian and bicyclist accommodations into the planning and design of transportation facilities. Topics include bicyclist safety, accommodation at intersections, traffic calming techniques and facility design. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4110. Transportation Simulation. 3 Credits.
Theory and application of simulation in transportation engineering. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

CV_ENG 4120. Airport Engineering. 3 Credits.
Airport systems planning, design, and management. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3010.

CV_ENG 4125. Transportation Legal Issues. 3 Credits.
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers. Prerequisites: Civil Engineering [CV_ENG] 3010.

CV_ENG 4130. Transportation Safety. 3 Credits.
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems. Prerequisite: Civil Engineering [CV_ENG] 3010.

CV_ENG 4145. Civil and Environmental Engineering Legal Issues. 3 Credits.
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics. Prerequisite: Civil Engineering [CV_ENG] 3010.

CV_ENG 4155. Transportation Geography. 3 Credits.
(Same as Geography [GEOG] 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

CV_ENG 4175. The Geospatial Science in National Security. 3 Credits.
(Same as Geography [GEOG] 4130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. Prerequisite: junior standing or above required; instructor's consent. May be repeated for credit.

CV_ENG 4185. Location Analysis/Site Selection. 3 Credits.
(Same as Geography [GEOG] 4740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. Maybe be repeated for credit.

CV_ENG 4190. Infrastructure Project Development. 3 Credits.
Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design
CV_ENG 4200. Remote Sensing of the Environment. 3 Credits.
Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing. Prerequisite: junior standing.

CV_ENG 4210. Solid Waste Management. 3 Credits.
Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems. Prerequisite: junior standing.

CV_ENG 4220. Hazardous Waste Management. 3 Credits.
(same as Chemical Engineering [CH_ENG] 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

CV_ENG 4230. Introduction to Water Quality. 3 Credits.
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater. Prerequisite: junior standing.

CV_ENG 4232. Water and Wastewater Treatment Facilities. 3 Credits.
Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities. Prerequisites: Civil Engineering [CV_ENG] 4230/7230 or instructor’s consent.

CV_ENG 4240. Water Quality Analysis. 3 Credits.
Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 4230 or instructor’s consent.

CV_ENG 4250. Environmental Regulatory Compliance. 3 Credits.
Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

CV_ENG 4260. Environmental Public Policy. 3 Credits.
Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law.

CV_ENG 4270. Environmental Engineering Microbiology. 3 Credits.
Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers. Prerequisite: senior standing or instructor’s consent.

CV_ENG 4285. Pollution Prevention: Applied Engineering for Sustainable Business Practices. 3 Credits.

CV_ENG 4290. Wastewater Treatment and Process Design. 3 Credits.
Selection and use of wastewater and sludge treatment processes, disposal methods, sustainable wastewater treatment including anaerobic treatment of wastewater reuse. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3200. Instructor’s consent required.

CV_ENG 4300. Advanced Structural Steel Design. 3 Credits.
Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3313.

CV_ENG 4302. Prestressed/Advanced Reinforced Concrete. 3 Credits.

CV_ENG 4310. Structural Design and Analysis. 3 Credits.
Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 4300.

CV_ENG 4320. Energy Methods in Mechanics. 3 Credits.
Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems. Prerequisites: senior or graduate standing required.

CV_ENG 4330. Structural System Design. 3 Credits.
Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3312 and 3313.

CV_ENG 4350. Matrix Methods of Structural Analysis. 3 Credits.
An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures. Prerequisite: senior standing; grade of C- or better in Civil Engineering [CV_ENG] 3312.

CV_ENG 4360. Bridge Engineering. 3 Credits.
Review of Highway Bridge Analysis and Design Fundamentals. Study of Influence Line Diagrams and Shear and Moment Envelopes. Design of Medium- and Short-Span Girder Bridges based on AASHTO LRFD specs. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3312 and 3313.

CV_ENG 4404. Geotechnical Earthquake Engineering. 3 Credits.
This course provides an introduction to geotechnical aspects of earthquake engineering. Topics include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil liquefaction. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3400 or instructor’s consent.

CV_ENG 4406. Geotechnics of Landfill Design. 3 Credits.
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities. Prerequisite: instructor’s consent.
CV_ENG 4410. Foundation Engineering. 3 Credits.
Subsurface exploration. Design of basic foundation structures, shallow foundations, retaining walls, deep foundations. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3400.

CV_ENG 4412. Applied Geotechnical Engineering. 3 Credits.
Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3400.

CV_ENG 4500. Introduction to Construction Management. 3 Credits.
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques. Prerequisite: junior standing.

CV_ENG 4600. Advanced Mechanics of Materials. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 4600). Analysis of more complicated problems in stresses, strains. Prerequisite: grade of C- or better in Engineering [ENGINR] 2200.

CV_ENG 4610. Sensors and Experimental Stress Analysis. 3 Credits.
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, basic digital signal processing. Electronics and instrumentation circuits. Prerequisite: grade of C- or better in Engineering [ENGINR] 2200 and Physics [PHYSICS] 2760.

CV_ENG 4660. Vibration Analysis. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 4660). Vibration theory with application to mechanical systems. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 2080 and Mathematics [MATH] 4100.

CV_ENG 4692. Introduction to Structural Dynamics. 3 Credits.
Theory of structural response to dynamic loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3300.

CV_ENG 4700. Hydraulics of Open Channels. 3 Credits.
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3700.

CV_ENG 4703. Applied Hydrology. 3 Credits.
Modern methods of applied hydrologic analysis and synthesis of hydrologic records. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3700 and 3702 or instructor’s consent.

CV_ENG 4710. Soil and Water Conservation Engineering. 3 Credits.
(same as Biological Engineering [BIOL_EN] 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

CV_ENG 4720. Watershed Modeling Using GIS. 3 Credits.
(same as Biological Engineering [BIOL_EN] 4350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

CV_ENG 4792. Analysis of Water-Resource Systems. 3 Credits.
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis. Prerequisite: instructor’s consent.

CV_ENG 4980. Civil Engineering Systems Design. 3 Credits.
Design of civil engineering systems. Prerequisite: senior standing in Civil Engineering at the University of Missouri-Columbia or written consent of Chairman.

CV_ENG 4990. Undergraduate Research in Civil and Environmental Engineering. 1-4 Credit.
Independent investigation or project in Civil Engineering. Prerequisites: senior standing in Civil and Environmental Engineering and instructor’s consent. May be repeated to 6 hours.

CV_ENG 4995. Research in Civil & Environmental Engineering-Undergraduate Honors. 1-3 Credit.
Independent project, supervised by the honors advisor, to be presented as a formal written report. Prerequisite: participation in the Civil and Environmental Engineering Departmental Honors Program.

CV_ENG 7001. Topics in Civil Engineering. 1-3 Credit.
Study of current and new technical developments in civil engineering. Prerequisite: graduate standing and instructor’s consent.

CV_ENG 7002. Analysis of Civil Engineering Decisions. 3 Credits.
Formulates and analyzes probabilistic models of civil engineering systems and their environment. Elementary theory of decision making under uncertainty. Application to selected civil engineering problems. Prerequisite: graduate standing.

CV_ENG 7003. Optimization of Civil Engineering Systems. 3 Credits.
Automated design techniques such as linear, nonlinear, and dynamic programming; gradient and random searching. Civil engineering applications emphasized throughout. Prerequisite: graduate standing.

CV_ENG 7004. Engineering Administration. 3 Credits.
Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior. Prerequisite: graduate standing and Mathematics [MATH] 1300 or 1500, or instructor’s consent.

CV_ENG 7006. Digital Computer Applications in Engineering. 3 Credits.
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation, and differential equations. Prerequisite: graduate standing and Mathematics [MATH] 2300.

CV_ENG 7007. Quality Management in Civil Engineering. 3 Credits.
Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Prerequisite: graduate standing. Graded on A/F basis only.

CV_ENG 7008. Risk and Reliability for Civil Engineers. 3 Credits.
This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3010 or other introductory probability/statistics course.

CV_ENG 7080. Advanced Surveying. 3 Credits.
Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of
photoelectricity, Theory of optical surveying instruments. Prerequisites: graduate standing and Civil Engineering [CV_ENG] 2090 and Mathematics [MATH] 1500.

**CV_ENG 7082. Property Boundary Location. 3 Credits.**
Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment. Prerequisites: graduate standing and Engineering [ENGINR] 1500 and Civil Engineering [CV_ENG] 2090.

**CV_ENG 7100. Traffic Engineering. 3 Credits.**
Characteristics and studies associated with highway traffic. Capacity analysis and evaluation of freeways, rural highways, and urban streets. Traffic signal control and coordination. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

**CV_ENG 7102. Infrastructure Management. 3 Credits.**
Civil infrastructure condition assessment, performance modeling, deterioration processes and models, maintenance and rehabilitation strategies, management techniques, data analysis, management systems, financing, case studies, emerging technologies. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

**CV_ENG 7103. Planning and Geometric Design of Highways. 3 Credits.**
Techniques of highway planning in rural and urban areas. Design of the visible elements of highways. Prerequisites: grade of C- or better in Civil Engineering [CV_ENG] 3100.

**CV_ENG 7104. Pavement Materials and Design. 3 Credits.**
Properties of materials used in roads, airports and other pavement construction. Design methods for rigid and flexible pavements. Prerequisites: grade of C- or better in Engineering [ENGINR] 2200.

**CV_ENG 7106. Intelligent Transportation Systems. 3 Credits.**
This is an introductory course in Intelligent Transportation Systems (ITS). Topics include the theory of transportation networks and systems optimization, current implementations of ITS, and its practical issues and implications of ITS. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3100.

**CV_ENG 7108. Bicycle and Pedestrian Transportation. 3 Credits.**
This course teaches how to integrate pedestrian and bicyclists accommodations into the planning and design of transportation facilities. Topics include, including pedestrian and bicyclist safety, accommodation at intersections, traffic calming techniques and facility design. Prerequisite: grade of C- or better in Civil Engineering [CV_ENG] 3100.

**CV_ENG 7109. Urban Development and Planning. 3 Credits.**
Introduction to planning processes; procedures and forces that shape urbanization. Prerequisite: graduate standing.

**CV_ENG 7110. Transportation Simulation. 3 Credits.**
Theory and application of simulation in transportation engineering. Prerequisite: C- or better in CV_ENG 3100.

**CV_ENG 7120. Airport Engineering. 3 Credits.**
Airport systems planning, design, and management. Prerequisite: C- or better in Civil Engineering [CV_ENG] 3010.

**CV_ENG 7125. Transportation Legal Issues. 3 Credits.**
This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers. Prerequisite: Civil Engineering [CV_ENG] 3010. Graduate standing required.

**CV_ENG 7130. Transportation Safety. 3 Credits.**
This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems. Prerequisite: Civil Engineering [CV_ENG] 3010.

**CV_ENG 7145. Civil and Environmental Engineering Legal Issues. 3 Credits.**
Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics. Prerequisite: Civil Engineering [CV_ENG] 3010.

**CV_ENG 7155. Transportation Geography. 3 Credits.**
(same as Geography [GEOG] 7850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

**CV_ENG 7165. Geographic Information Systems I. 3 Credits.**
(Same as Geography [GEOG] 7740). An overview of location analysis and reuse, legislation on solid wastes and groundwater contamination systems, satellite remote sensing and digital image processing. Prerequisites: instructor's consent. May be repeated for credit.

**CV_ENG 7175. The Geospatial Sciences in National Security. 3 Credits.**
(Same as Geography [GEOG] 7130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. Prerequisite: Graduate standing required and instructor's consent. May be repeated for credit.

**CV_ENG 7185. Location Analysis/Site Selection. 3 Credits.**
(Same as Geography [GEOG] 7410). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit. Graduate Standing Required.

**CV_ENG 7190. Infrastructure Project Development. 3 Credits.**
Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

**CV_ENG 7200. Remote Sensing of the Environment. 3 Credits.**
Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photographic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing. Prerequisites: graduate standing.

**CV_ENG 7210. Solid Waste Management. 3 Credits.**
Engineering principles involved in generation, handling, collection, transport, processing, and disposal of solid wastes, resource recovery and reuse, legislation on solid wastes and groundwater contamination problems. Prerequisite: graduate standing.

**CV_ENG 7220. Hazardous Waste Management. 3 Credits.**
(same as Chemical Engineering [CH_ENG] 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of
hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination. Prerequisite: graduate standing.

**CV_ENG 7230. Introduction to Water Quality. 3 Credits.**
Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater. Prerequisite: graduate standing.

**CV_ENG 7232. Water and Wastewater Treatment Facilities. 3 Credits.**
Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities. Prerequisites: Civil Engineering [CV_ENG] 4230/7230 or instructor's consent.

**CV_ENG 7240. Water Quality Analysis. 3 Credits.**
Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management. Prerequisite: graduate standing and C- or better in Civil Engineering [CV_ENG] 4230 or instructor's consent.

**CV_ENG 7250. Environmental Regulatory Compliance. 3 Credits.**
Systems of water law; provisions of major federal environmental laws and regulations; development or regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement. Prerequisite: graduate standing.

**CV_ENG 7260. Environmental Public Policy. 3 Credits.**
Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graduate standing required. Graded on A/F basis.

**CV_ENG 7270. Environmental Engineering Microbiology. 3 Credits.**
Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers. Prerequisite: graduate standing or instructor's consent.

**CV_ENG 7290. Wastewater Treatment and Process Design. 3 Credits.**
Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Prerequisites: graduate standing. Graded on A/F basis only.

**CV_ENG 7300. Advanced Structural Steel Design. 3 Credits.**
Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections. Prerequisite: graduate standing and grade of C- or better in Civil Engineering [CV_ENG] 3313.

**CV_ENG 7302. Prestressed/Advanced Reinforced Concrete. 3 Credits.**

**CV_ENG 7310. Structural Design and Analysis. 3 Credits.**
Design and analysis of building frames and bridges in steel and concrete using case studies. Economic selection of structural type and material. Basic methods of analysis for statically indeterminate structures. Prerequisite: graduate standing and grade of C- or better in Civil Engineering [CV_ENG] 4300.

**CV_ENG 7320. Energy Methods in Mechanics. 3 Credits.**
Design of building structures and bridges in steel and reinforced concrete using case studies. Prerequisites: graduate standing and grade of C- or better in Civil Engineering [CV_ENG] 3300.

**CV_ENG 7330. Structural System Design. 3 Credits.**
Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems. Prerequisite: graduate grade of C- or better in Civil Engineering [CV_ENG] 3312 and 3313.

**CV_ENG 7350. Matrix Methods of Structural Analysis. 3 Credits.**
An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures. Prerequisite: graduate standing and grade of C- or better in Civil Engineering [CV_ENG] 3300.

**CV_ENG 7360. Bridge Engineering. 3 Credits.**

**CV_ENG 7404. Geotechnical Earthquake Engineering. 3 Credits.**
This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Prerequisite: Grade of C- or better in Civil Engineering [CV_ENG] 3400 or instructor's consent. Graduate standing required. Graded on A/F basis only.

**CV_ENG 7406. Geotechnics of Landfill Design. 3 Credits.**
This course will focus on geotechnical and construction aspects in the analysis, design and construction of waste containment facilities (landfills) including expansions of existing facilities. Prerequisite: graduate standing and instructor's consent.

**CV_ENG 7410. Foundation Engineering. 3 Credits.**
Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations. Prerequisites: Grade of C- or better in Civil Engineering [CV_ENG] 3400. Graduate standing required.

**CV_ENG 7412. Applied Geotechnical Engineering. 3 Credits.**
Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures. Prerequisite: grade or C- or better in Civil Engineering [CV_ENG] 3400.

**CV_ENG 7500. Introduction to Construction Management. 3 Credits.**
Structure of the construction industry; construction drawings and specifications; estimating and bidding; construction contracts, bonds and insurance; planning and scheduling of construction operations; project management; computer techniques. Prerequisite: graduate standing.

**CV_ENG 7510. Construction Methods and Equipment. 3 Credits.**
Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses. Prerequisite: graduate standing and Mathematics [MATH] 1300 or 1500, or instructor's consent.
CV_ENG 7600. Advanced Mechanics of Materials. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 7600). Analysis of more complicated problems in stresses, strains. Prerequisite: graduate standing grade of C- or better in Engineering [ENGINR] 2200.

CV_ENG 7610. Sensors and Experimental Stress Analysis. 3 Credits.
Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits. Prerequisite: Grade of C- or better in Engineering [ENGINR] 2200 and Physics [PHYSICS] 2760.

CV_ENG 7660. Vibration Analysis. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 7660). Vibration theory with application to mechanical systems. Prerequisites: graduate standing and grade of C- or better in MAE 2600 and Mathematics [MATH] 4100.

CV_ENG 7692. Introduction to Structural Dynamics. 3 Credits.
Theory of structural response to dynamics loads. Computation of dynamic response of structures to dynamic loads like blast and earthquake. Modal analysis and single degree of freedom methods will be covered. Prerequisites: Grade of C- or better in Civil Engineering [CV_ENG] 3300. Graded on A/F basis only.

CV_ENG 7700. Hydraulics of Open Channels. 3 Credits.
Gradually varied flow and theory of the hydraulic jump. Slowly varied flow involving storage; rating curves. Prerequisite: graduate standing and Grade of C- or better in Civil Engineering [CV_ENG] 3700.

CV_ENG 7702. Pipeline Engineering. 3 Credits.
Theoretical and practical aspects of pipeline engineering including pipeline transport of natural gas and various solids such as coal, sand and solid wastes. Prerequisites: graduate standing and Civil Engineering [CV_ENG] 3700 and Mechanical and Aerospace Engineering [MAE] 3400.

CV_ENG 7703. Applied Hydrology. 3 Credits.
Modern methods of applied hydrologic analysis and synthesis of hydrologic records. Prerequisites: graduate standing and grade of C- or better in Civil Engineering [CV_ENG] 3700 and 3702, or instructor’s consent.

CV_ENG 7710. Soil and Water Conservation Engineering. 3 Credits.
(same as Biological Engineering [BIOL_EN] 7150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures. Prerequisites: Biological Engineering [BIOL_EN] 3200 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

CV_ENG 7720. Watershed Modeling Using GIS. 3 Credits.
(same as Biological Engineering [BIOL_EN] 7350). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP. Procedures for model calibration/sensitivity data analysis. Prerequisites: Biological Engineering [BIOL_EN] 2180 or Civil Engineering [CV_ENG] 3200 or instructor’s consent.

CV_ENG 7792. Analysis of Water-Resource Systems. 3 Credits.
Applies hydrology, hydraulic and sanitary engineering, and economics to water-resource design problems considering man and his environment. Uses methods of systems analysis. Prerequisite: graduate standing and instructor’s consent.

CV_ENG 8001. Advanced Topics in Civil Engineering. 1-3 Credit.
New and current technical developments in civil engineering. Prerequisite: Civil Engineering [CV_ENG] 4006 or equivalent.

CV_ENG 8002. Directed Reading In Civil Engineering. 1-3 Credit.
Faculty supervised readings course. Prerequisite: graduate standing.

CV_ENG 8085. Problems in Civil Engineering. 1-6 Credit.
Supervised investigation in civil engineering to be presented in the form of a report.

CV_ENG 8087. Seminar in Civil Engineering. 1 Credit.
Review of research in progress. Research techniques.

CV_ENG 8100. Transportation Planning and Models. 3 Credits.
Regional and metropolitan transportation studies; land use, traffic generation, distribution and assignment models. Prerequisites: Civil Engineering [CV_ENG] 4002 or 4003.

CV_ENG 8106. Advanced Intelligent Transportation Systems. 3 Credits.
This course is intended to be an introductory course in Intelligent Transportation Systems (ITS). This course includes the background of ITS, current implementations, sample deployments, and practical issues and implications. Graduate standing required.

CV_ENG 8110. Theory of Traffic Flow. 3 Credits.
Scientific approach to study of traffic phenomena with emphasis on applications. Deterministic and stochastic models of traffic flow; optimization of intersection controls; computer simulation of traffic problems. Prerequisites: Civil Engineering [CV_ENG] 4002 or instructor’s consent.

CV_ENG 8120. Traffic Control Engineering. 3 Credits.
Information retrieval and analysis of human and vehicular characteristics; roadway element; system control and optimization of highways, intersections; planning and design of new traffic facilities including ways, terminals. Prerequisite: Civil Engineering [CV_ENG] 3110 or equivalent.

CV_ENG 8130. Land Use Planning. 3 Credits.
Case study of site planning using systems analysis; feasibility for development or redevelopment; restraints imposed by political, social and economic conditions on land use activity as related to urban and regional relationships. Prerequisite: Civil Engineering [CV_ENG] 4106.

CV_ENG 8140. Highway Transportation. 3 Credits.
Economics of transportation on highways. Comparison of vehicle operation costs. Project studies of highway problems in general. Prerequisite: Civil Engineering [CV_ENG] 4103 or equivalent.

CV_ENG 8150. Transportation Networks. 3 Credits.
This course presents techniques used in equilibrium analysis of transportation networks. The details of traffic assignment algorithms will be discussed along with theory and practical algorithms.

CV_ENG 8187. Seminar in Transportation Engineering. 1 Credit.
Review of research in progress in the area of transportation engineering.

CV_ENG 8200. Water Quality Modeling. 3 Credits.
Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries. Prerequisite: Civil Engineering [CV_ENG] 7230.

CV_ENG 8208. Finite Element Methods. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 8280).

CV_ENG 8210. Groundwater Pollution Evaluation and Modeling. 3 Credits.
Fundamentals of groundwater hydraulics and groundwater contamination. Use and development of computer models to simulate
flow and pollutant transport. Prerequisites: Civil Engineering [CV_ENG] 3700, Mathematics [MATH] 4100, or instructor’s consent.

**CV_ENG 8215. Environmental Transport Phenomena. 3 Credits.**
Fundamental processes that control the transport of constituents in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.

**CV_ENG 8220. Advanced Hazardous Waste Treatment Processes. 3 Credits.**
Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, sorbents, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes. Prerequisite: Civil Engineering [CV_ENG] 4220.

**CV_ENG 8225. Aquatic Chemistry. 3 Credits.**
Principles of chemical thermodynamics and equilibrium applied to processes in natural water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Prerequisites: graduate standing or instructor’s consent. Graded on A/F basis only.

**CV_ENG 8230. Unit Process Laboratory. 3 Credits.**
Studies chemical and physical relationships as applied to unit processes of water and wastewater.

**CV_ENG 8240. Physiochemical Treatment Processes. 3 Credits.**
Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

**CV_ENG 8250. Biochemical Treatment Processes. 3 Credits.**
Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

**CV_ENG 8260. Environmental Biotechnology. 3 Credits.**
Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation. Prerequisite: Civil Engineering [CV_ENG] 8250 or instructor’s consent.

**CV_ENG 8270. Design of Water and Wastewater Treatment Facilities. 3 Credits.**
Development of design criteria and their application to the design of water and wastewater treatment facilities.

**CV_ENG 8280. Engineering Aspects of Water Quality. 3 Credits.**
Theoretical aspects of biological, chemical, physical processes; applications in water, wastewater, industrial-waste treatment processes, natural water systems; chemical equilibria, flow models; reaction kinetics on process design, pollutants. Prerequisites: Civil Engineering [CV_ENG] 4230 or instructor’s consent.

**CV_ENG 8287. Seminar in Environmental Engineering. 1 Credit.**
Review of research in progress in the area of environmental engineering.

**CV_ENG 8290. Environmental Practicum. 2-4 Credit.**
Application of advanced analysis and design techniques to practical problems in environmental engineering. Collaborative group investigations that may include experimental and computer-aided studies. No more than 6 practicum hours may be applied toward the MS degree. Prerequisite: graduate standing in Civil Engineering. Graded on A/F basis only.

**CV_ENG 8303. Behavior of Reinforced Concrete Members. 3 Credits.**

**CV_ENG 8311. Nondestructive Evaluation Engineering. 3 Credits.**
This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Prerequisites: Physics [PHYSICS] 2760, Engineering [ENGINR] 1200, Mathematics [MATH] 4100. Graded on A-F basis only. Graduate Standing Required.

**CV_ENG 8312. Advanced Structural Analysis. 3 Credits.**

**CV_ENG 8313. Random Vibration. 3 Credits.**
Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems. Prerequisite: Civil Engineering [CV_ENG] 4606.

**CV_ENG 8314. Numerical Methods in Engineering. 3 Credits.**
Classification and numerical solution of engineering problems--ordinary and partial differential equations, algebraic equations. Includes initial, boundary, eigen- and characteristic-value problems. Prerequisite: MATH 4100.

**CV_ENG 8320. Continuum Mechanics. 3 Credits.**
(same as Mechanical and Aerospace Engineering [MAE] 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated. Prerequisites: Civil Engineering [CV_ENG] 3700, Mathematics [MATH] 7100, Engineering [ENGINR] 2200.

**CV_ENG 8322. Structural Analysis. 3 Credits.**

**CV_ENG 8330. Theory of Elasticity. 3 Credits.**

**CV_ENG 8332. Design of Special Structures Systems. 3 Credits.**
Reviews current trends in design of structural systems and components. Critical evaluation of recent code modifications. Application to design of light gauge metal structures, lateral bracing systems, curved beams and panel systems. Prerequisite: Civil Engineering [CV_ENG] 4310 or 4330.

**CV_ENG 8340. Theory of Plates and Shells. 3 Credits.**
CV_ENG 8342. Space Mechanics. 3 Credits.
Rigid body dynamics analysis of satellites, space vehicles, trajectories, time of flight optimization. Prerequisites: Mechanical and Aerospace Engineering [MAE] 3600 or equivalent, and Mathematics [MATH] 4100.

CV_ENG 8350. Theory of Elastic Stability. 3 Credits.

CV_ENG 8360. Theory of Plasticity. 3 Credits.

CV_ENG 8372. Reinforced Concrete Theory and Design. 3 Credits.
Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence. Prerequisite: Civil Engineering [CV_ENG] 4350 or equivalent.

CV_ENG 8380. Nonlinear Mechanical Analysis. 3 Credits.
Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design. Prerequisites: Mechanical and Aerospace Engineering [MAE] 3600 or equivalent and Mathematics [MATH] 4100.

CV_ENG 8382. Dynamical Theory. 3 Credits.
Engineering principles and application in mathematical expression of energy, force, inertia system. Prerequisite: Mechanical and Aerospace Engineering [MAE] 3600 or equivalent and Mathematics [MATH] 4100.

CV_ENG 8387. Seminar in Structural Engineering. 1 Credit.
Review of research in progress in the area of structural engineering.

CV_ENG 8390. Advanced Topics Structural Analysis. 3 Credits.

CV_ENG 8392. Dynamics of Structures. 3 Credits.

CV_ENG 8402. Advanced Shear Strength of Soils. 3 Credits.
Theoretical soil mechanics as applied to solution of specific engineering problems.

CV_ENG 8403. Consolidation and Settlement. 3 Credits.

CV_ENG 8404. Seepage in Soils. 3 Credits.
General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8406. Unsaturated Soil Mechanics. 3 Credits.
Fundamental principles governing the strength, deformation, and fluid flow behavior of multiphase porous media. Includes specific procedures for analyzing, measuring and modeling strength, hydraulic conductivity, and suction characteristics of unsaturated soil. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8407. Soil Behavior. 3 Credits.
Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8408. Soil Dynamics. 3 Credits.
Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Prerequisite: Civil Engineering [CV_ENG] 3400 and instructor's consent. Graded on A/F basis only.

CV_ENG 8410. Advanced Foundation Engineering. 3 Credits.
Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, buckling, dynamic analysis load tests, pile groups, drilled piers. Prerequisite: Civil Engineering [CV_ENG] 4410.

CV_ENG 8412. Stability and Performance of Earth Slopes. 3 Credits.
Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8413. Design and Analysis of Earth Retaining Structures. 3 Credits.
General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8420. Advanced Geotechnics. 3 Credits.
Advanced study of specific geotechnical engineering topics. Topics may include: Environmental Geotechnics, Landfill Design, Geosynthetics, Laboratory Testing, and Case History. May be repeated for credit when topics vary. Prerequisite: Civil Engineering [CV_ENG] 3400 or instructor's consent.

CV_ENG 8487. Seminar in Geotechnical Engineering. 1 Credit.
Review of research in progress in the area of geotechnical engineering.

CV_ENG 8510. Construction Engineering. 3 Credits.
Selection and layout of construction plant. Design and construction of formwork, falsework, cofferdams, conveyors and other temporary structures used by contractors. Prerequisite: Civil Engineering [CV_ENG] 4510 or equivalent.

CV_ENG 8520. Construction Productivity. 3 Credits.
Work improvement techniques in the construction industry reviewed and applied to local construction site. Construction safety influenced by supervisors and managers studied in detail. Declining productivity in the construction industry evaluated and solutions considered. Prerequisite: Civil Engineering [CV_ENG] 4500.

CV_ENG 8530. Construction Project Management. 3 Credits.
CV_ENG 8540. Construction Administration. 3 Credits.
Organization, management, engineering, business, and legal problems in the construction industry. Purchasing, bonding, insurance, financing, labor relations, and contract administration. Prerequisite: Civil Engineering [CV_ENG] 4500.

CV_ENG 8610. Materials and Measurement. 3 Credits.
About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel. Prerequisites: Civil Engineering [CV_ENG] 3600 or equivalent.

CV_ENG 8620. Advanced Dynamics. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods. Prerequisites: Civil Engineering [CV_ENG] 2080 and Mathematics [MATH] 4100.

CV_ENG 8630. Vibrations of Distributed Parameter Systems. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations. Prerequisite: Civil Engineering [CV_ENG] 4660.

CV_ENG 8710. Advanced Hydraulic Engineering. 3 Credits.
Unsteady flow in pipes and open channels is studied using the method of characteristics and finite difference equations. Hydraulic transient in pipe networks due to valve adjustments, pump startup and pump power failure are analyzed. Control of transient using surge tanks and air chambers is included. Prerequisite: Civil Engineering [CV_ENG] 3720.

CV_ENG 8720. Hydrotechnical Practicum. 2-4 Credit.
Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Prerequisite: graduate standing in Civil Engineering. Graded on A/F basis only.

CV_ENG 8730. Fundamentals of Fluid Mechanics. 3 Credits.
Treatment of fundamental concepts and theories in fluid mechanics at a level suitable for beginning graduate students. Prerequisites: Civil Engineering [CV_ENG] 3700 or equivalent.

CV_ENG 8740. Hydrodynamics. 3 Credits.
Special topics in potential theory and conformal mapping.

CV_ENG 8750. Wind Engineering. 3 Credits.
Study of wind effects on the safety of engineering structures, air pollution and building energy consumption, and the use of wind. Prerequisite: Civil Engineering [CV_ENG] 3700.

Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

CV_ENG 9001. Advanced Topics in Civil Engineering - PhD. 1-4 Credit.
New and current technical developments in civil engineering. For PhD students.

CV_ENG 9990. Research-Doctoral Dissertation Civil & Environmental Engineering. 1-99 Credit.
Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.

---

Classical Humanities (CL_HUM)

CL_HUM 1050. Greek and Latin in English. 3 Credits.
A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

CL_HUM 1060. Classical Mythology. 3 Credits.
Myths of Greece and Rome in literature and art.

CL_HUM 1060H. Classical Mythology - Honors. 3 Credits.
Myths of Greece and Rome in literature and art. Honors eligibility required.

Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

CL_HUM 2100. Greek Culture. 3 Credits.
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.

CL_HUM 2100H. Greek Culture - Honors. 3 Credits.
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization. Honors eligibility required.

CL_HUM 2200. Roman Culture. 3 Credits.
Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, and private life, and their influence on Western Civilization.

CL_HUM 2300. Greek Classics in Translation. 3 Credits.
Reading in translation and critical study of the most important literary works of the ancient Greek World.

CL_HUM 2300H. Greek Classics in Translation. 3 Credits.
Reading in translation and critical study of the most important literary works of the ancient Greek world. Honors eligibility required.

CL_HUM 2400. Roman Classics in Translation. 3 Credits.
Reading in translation and critical study of the most important literary works of the ancient Roman world.

CL_HUM 2940. Service Learning in Classical Studies. 1 Credit.
Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements. Prerequisites: instructor’s consent required.

CL_HUM 3000. Foreigners and Dangerous Women in Greek and Latin Literature. 3 Credits.
(same as Peace Studies [PEA_ST] 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.
CL_HUM 3000H. Foreigners and Dangerous Women in Greek and Latin Literature - Honors. 3 Credits.
(same as Peace Studies [PEA_ST] 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices. Honors eligibility required.

CL_HUM 3005. Topics in Classical Humanities. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: Classical Humanities [CL_HUM] 1060, any Classical Humanities [CL_HUM] 2000 course, or instructor’s consent.

CL_HUM 3005H. Topics in Classical Humanities - Honors. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: Classical Humanities [CL_HUM] 1060, any Classical Humanities [CL_HUM] 2000 course, or instructor’s consent. Honors eligibility required.

CL_HUM 3050. Philosophy Before Socrates. 3 Credits.
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness. Prerequisites: Classical Humanities [CL_HUM] 1060 or any CL_HUM 2000 level course or instructor’s consent.

CL_HUM 3050H. Philosophy Before Socrates - Honors. 3 Credits.
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness. Prerequisites: Classical Humanities [CL_HUM] 1060 or any CL_HUM 2000 level course or instructor’s consent. Honors eligibility required.

CL_HUM 3100. The Age of Pericles. 3 Credits.
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course, or instructor’s consent.

CL_HUM 3100H. The Age of Pericles - Honors. 3 Credits.
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course, or instructor’s consent. Honors eligibility required.

CL_HUM 3150. The Age of Augustus. 3 Credits.
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course, or instructor’s consent.

CL_HUM 3150H. The Age of Augustus - Honors. 3 Credits.
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course, or instructor’s consent. Honors eligibility required.

CL_HUM 3200. Power and Oratory in Ancient Greece. 3 Credits.
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course.

CL_HUM 3200H. Power and Oratory in Ancient Greece - Honors. 3 Credits.
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities [CL_HUM] 2000 level course. Honors eligibility required.

CL_HUM 3225. Roman Comedy, Wit and Humor. 3 Credits.
Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid’s Metamorphoses, Petronius’ Satyricon, Martial, Juvenal and Macrobius. Prerequisites: Classical Humanities [CL_HUM] 1060, any Classical Humanities 2000 level course or instructor’s permission.

CL_HUM 3250. Greek and Roman Epic. 3 Credits.
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent.

CL_HUM 3250H. Greek and Roman Epic - Honors. 3 Credits.
A study of the major representatives of the ancient epic genre. Readings will include Homer’s Iliad and Odyssey, Apollonius’ Argonautica, Vergil’s Aeneid. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required.

CL_HUM 3300. Greek Drama. 3 Credits.
Reading and interpretation of Greek tragedies and comedies in translation. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent.

CL_HUM 3300H. Greek Drama - Honors. 3 Credits.
Reading and interpretation of Greek tragedies and comedies in translation. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required.

CL_HUM 3350. Advanced Mythology. 3 Credits.
Interpretation of selected classical myths and their influence on later literature and art. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent.

CL_HUM 3350H. Advanced Mythology - Honors. 3 Credits.
Interpretation of selected classical myths and their influence on later literature and art. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required.

CL_HUM 3400. Murder and Mayhem: Images of Justice in Classical Antiquity. 3 Credits.
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor’s consent.

CL_HUM 3400H. Murder & Mayhem: Images of Justice in Classical Antiquity - Honors. 3 Credits.
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and
courts, techniques of persuasion. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3450. Greek and Roman Characters and Ideals. 3 Credits. Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent.

CL_HUM 3450H. Greek and Roman Characters and Ideals - Honors. 3 Credits. Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3550. War and Democracy in Late 5th c. BCE Athens. 3 Credits. (same as Peace Studies [PEA_ST] 3550). Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states. Prerequisite: any 2000 level Classical Humanities [CL_HUM] course.

CL_HUM 3600. The Ancient Novel. 3 Credits. Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent.

CL_HUM 3600H. The Ancient Novel - Honors. 3 Credits. Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background. Prerequisite: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3650. Paganism and Christianity. 3 Credits. A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent.

CL_HUM 3650H. Paganism and Christianity - Honors. 3 Credits. A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3700. Women in the Ancient World. 3 Credits. Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent.

CL_HUM 3700H. Women in the Ancient World - Honors. 3 Credits. Using classical literary texts as the central focus this course examines the role of women: the conflict inherent in their obligations and their identity in the context of these obligations. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3750. Classics in a Cross-Cultural Context. 3 Credits. The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent.

CL_HUM 3750H. Classics in a Cross-Cultural Context - Honors. 3 Credits. The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures. Prerequisites: Classical Humanities [CL_HUM] 1060 or any Classical Humanities 2000 level course, or instructor's consent. Honors eligibility required.

CL_HUM 3775. The Ancient World on Film. 3 Credits. (same as AR_H_A 3775 and FILM_S 3775). This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues. Prerequisite: Prior 2000 level coursework in CL_HUM, AR_H_A, or FILM_S. Instructor's consent required.

CL_HUM 3800. Sports and Spectacles in Greco-Roman Antiquity. 3 Credits. Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life. Prerequisites: Classical Humanities [CL_HUM] 1060 and 2100 or 2200. Instructor's consent required.

CL_HUM 4005. Topics in Classical Humanities. 1-99 Credit. Subjects and earnable credit may vary from semester to semester. Prerequisites: Any Classical Humanities 2000 level course or instructor's consent.

CL_HUM 4100. Greece: From the Bronze Age to the Byzantine Empire. 6 Credits. Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Prerequisite: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor Consent, and Application through MU International Center required. Participants chosen by instructor. Graded on A/F basis only.

CL_HUM 4100H. Greece: From the Bronze Age to the Byzantine Empire - Honors. 6 Credits. Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Participants chosen by instructor. Graded on A/F basis only. Application required. Prerequisite: Any 2000 level or higher course in the Department of Classical Studies (courses on similar subjects in other departments accepted as equivalent); 2.75 overall GPA, Instructor Consent, and Application through MU International Center required. Honors eligibility required.
**CL_HUM 4500. Greek and Roman Religion. 3 Credits.**
(same as Religious Studies [REL_ST] 4500). Survey of religious development among the Greeks and Romans. Prerequisite: Classical Humanities [CL_HUM] 1060 or Art History and Archaeology [AR_H_A] 1110 or History [HIST] 1520; sophomore standing.

**CL_HUM 4500H. Greek and Roman Religion - Honors. 3 Credits.**
(same as Religious Studies [REL_ST] 4500). Survey of religious development among the Greeks and Romans. Prerequisite: Classical Humanities [CL_HUM] 1060 or Art History and Archaeology [AR_H_A] 1110 or History [HIST] 1520; sophomore standing. Honors eligibility required.

**CL_HUM 4550. Literature and Culture of the Hellenistic Age. 3 Credits.**
A survey of the literature and culture of the Hellenistic Age. Prerequisites: any Classical Humanities 2000 level course, or instructor’s consent.

**CL_HUM 4550H. Literature and Culture of the Hellenistic Age - Honors. 3 Credits.**
A survey of the literature and culture of the Hellenistic Age. Prerequisites: any Classical Humanities 2000 level course, or instructor’s consent. Honors eligibility required.

**CL_HUM 4600. The Classical Tradition. 3 Credits.**
Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Prerequisite: any Classical Humanities 2000 level course or instructor’s consent.

**CL_HUM 4600H. The Classical Tradition - Honors. 3 Credits.**
Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Prerequisite: any Classical Humanities 2000 level course or instructor’s consent. Honors eligibility required.

**CL_HUM 4650. The World of Late Antiquity. 3 Credits.**
A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage. Prerequisites: any Classical Humanities 2000 level or instructor’s consent.

**CL_HUM 4650H. The World of Late Antiquity - Honors. 3 Credits.**
A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage. Prerequisites: any Classical Humanities 2000 level or instructor’s consent. Honors eligibility required.

**CL_HUM 4770. Oral Tradition. 3 Credits.**
(same as English [ENGLISH] 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf). Prerequisite: junior standing and instructor’s consent.

**CL_HUM 4770H. Oral Tradition - Honors. 3 Credits.**
(same as English [ENGLISH] 4770). Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf). Prerequisite: junior standing and instructor’s consent. Honors eligibility required.

**CL_HUM 4970. Capstone in Classical Humanities. 3 Credits.**
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year. Recommended for Classical Humanities double-majors. Prerequisite: instructor’s consent.

**CL_HUM 4970H. Capstone in Classical Humanities- Honors. 3 Credits.**
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Classical Humanities majors in first term of senior year. Recommended for Classical Humanities double-majors. Prerequisite: instructor’s consent; Honors eligibility required.

**CL_HUM 7005. Topics in Classical Humanities. 1-99 Credit.**
Subjects and earnable credit may vary from semester to semester. Prerequisites: any Classical Humanities [CL_HUM] 3000 level course or instructor’s consent. Prerequisite: graduate standing.

**CL_HUM 7550. Literature and Culture of the Hellenistic Age. 3 Credits.**
A survey of the literature and culture of the Hellenistic Age. Graded on A/ F basis only. Graduate standing required.

**CL_HUM 7650. The World of Late Antiquity. 3 Credits.**
A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity’s development and the transformation of the classical heritage. Graduate standing required.

### Classics (CLASS)

**CLASS 4100. History of the Greek and Latin Languages. 3 Credits.**
(same as Linguistics [LINGST] 4130). Evolution of classical languages and their relationship to each other.

**CLASS 4205. Topics in Classical Studies. 1-99 Credit.**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: departmental consent for repetition.

**CLASS 4300. Introduction to Text Criticism and Paleography. 3 Credits.**
Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library. Prerequisite: 2 years of Greek or Latin or equivalent.

**CLASS 4400. Ancient Pastoral. 3 Credits.**
Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus. Prerequisite: 2 years each of Greek and Latin.

**CLASS 4700. Advanced Study in the Teaching of the Classics. 3 Credits.**
Prerequisites: classroom teaching experience or chairman’s consent.

**CLASS 4960. Special Readings in Classical Studies. 1-3 Credit.**
Readings in authors and texts not covered in other courses. Prerequisite: departmental consent.

**CLASS 4970. Capstone in Classical Languages. 3 Credits.**
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors. Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing: departmental consent.

**CLASS 4970H. Capstone in Classical Languages. 3 Credits.**
Culminating course in the study of Greek and Roman literature and Classical Culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.
Prerequisites: 2 years classical Greek, or Latin, or equivalent; junior standing: departmental consent. Honors eligibility required.

CLASS 4995H. Honors Proseminar in Classical Studies. 3-6 Credit.
Limited to Honors undergraduates. To be taken in senior year. Integrated exploration of classical civilization. May repeat to 6 hours maximum. Prerequisite: limited to Honors undergraduates, to be taken in senior year. Honors eligibility required.

CLASS 7000. Introduction to Graduate Study in Classics. 1 Credit.
Required of all first-year graduate students.

CLASS 7100. History of the Greek and Latin Languages. 3 Credits.
(same as Linguistics [LINGST] 7130). Evolution of classical languages and their relationship to each other. Prerequisite: graduate standing.

CLASS 7205. Topics in Classical Studies. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: graduate standing and departmental consent for repetition.

CLASS 7300. Introduction to Text Criticism and Paleography. 3 Credits.
Latin and/or Greek textual criticism and paleography, using manuscript facsimiles at the University library. Prerequisite: graduate standing and 2 years of Classical Languages or equivalent.

CLASS 7400. Ancient Pastoral. 3 Credits.
Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus. Prerequisite: graduate standing and 2 years each of Greek and Latin.

CLASS 7700. Advanced Study in the Teaching of the Classics. 3 Credits.
Prerequisites: graduate standing and classroom teaching experience or chairman's consent.

CLASS 7960. Special Readings in Classical Studies. 1-3 Credit.
Readings in authors and texts not covered in other courses. Prerequisite: graduate standing and classics/classical humanities--departmental consent; Greek--two years classical Greek or equivalent; Latin--two years Classical Latin or equivalent.

CLASS 8085. Directed Readings in Classics. 3 Credits.
For graduate students to undertake special projects for graduate credit under the supervision of faculty. Prerequisite: graduate standing.

CLASS 8090. Masters Research and Thesis in Classics. 3 Credits.
For graduate students studying for the MA and working on a thesis to receive credit for work directly related to the thesis. Graded S/U only.

CLASS 8440. Ancient/Medieval Topography. 1-99 Credit.
(same as Art History and Archeology [AR_H_A] 8440). Descriptive and historical analysis of selected city or site. Subject varies. Prerequisite: instructor's consent.

CLASS 9090. PhD Research and Thesis. 1-8 Credit.
Individual research in preparation for writing thesis and/or dissertation. Graded on a S/U basis only.

CLASS 9187. Seminar in Classical Mythology. 3 Credits.
Intensive study of classical mythology in origin, development, meaning and influence. Prerequisite: instructor's consent.

CLASS 9287. Seminar in the Hellenistic Age. 3-6 Credit.
Prerequisite: graduate standing.

CLASS 9387. Seminar in Ancient Rhetoric and Oratory. 3 Credits.
Prerequisite: graduate standing.

CLASS 9487. Seminar in Ancient Literary Criticism. 3 Credits.
Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject. Prerequisite: graduate standing.

CLASS 9587. Greco-Roman Didactic. 3-6 Credit.
Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age. Prerequisite: graduate standing.

CLASS 9687. Seminar in Greco-Roman Religion. 3 Credits.
Prerequisite: graduate standing.

CLASS 9787. Seminar in Greco-Roman Satire and Social Criticism. 3 Credits.
Prerequisite: graduate standing.

CLASS 9887. Seminar in the Age of the Antonines. 3-6 Credit.
Prerequisite: graduate standing.

Clinical Laboratory Sciences (CL_L_S)

CL_L_S 1000. Orientation to Clinical Laboratory Science. 1 Credit.
The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Prerequisite: Health Professions [HTH_PR] 1000. Graded on S/U basis only.

CL_L_S 4412. Clinical Laboratory Science Theory, Application and Correlation. 5 Credits.
Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Prerequisites: departmental approval, accepted into the Clinical Laboratory Technology Program. Course may be repeated for credit. Graded on A/F basis only.

CL_L_S 4414. Chemistry I. 1-4 Credit.
Introduction to theory, practical application, technical performance and evaluation of clinical laboratory procedures. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4415. Chemistry II. 3 Credits.
Advanced theory, practical application, technical performance and evaluation of clinical chemistry laboratory procedures. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4416. Clinical Hematology I. 1-4 Credit.
Introduction to the theory, practical application, technical performance and evaluation of clinical laboratory procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4417. Clinical Hematology II. 3 Credits.
Advanced theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on
the correlation of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4418. Clinical Microbiology I. 1-4 Credit.
Introduction to the theory, practical application, technical performance and evaluation of procedures for isolation, identification and susceptibility testing of infectious disease organisms in humans. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4419. Clinical Microbiology II. 3 Credits.
Advanced theory, practical application, technical performance and evaluation procedures for isolation, identification and susceptibility testing of infectious disease in humans; bacteriology, mycology, parasitology, virology and serology and correlation of data with diagnosis and treatment. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4420. Clinical Immunology. 1 Credit.
Theory, practical application, and evaluation of immunological components; principles and methods used to assess immunologically-related disorders, including hypersensitivity reactions, autoimmune, immunoproliferative and immunodeficiency disorders, tumors and transplantations. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4422. Immunohematology I. 1-4 Credit.
Introduction to the theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. Prerequisites: departmental approval, accepted into the Medical Terminology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4423. Immunohematology II. 2 Credits.
Advanced theory, practical application, technical performance and evaluation of blood bank procedures required for transfusion of blood and blood components and for handling and storage of blood and blood components. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4424. Phlebotomy. 1 Credit.
Theory, practical application, technical performance and evaluation of procedures used in collecting, handling and processing blood specimens. Prerequisites: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4426. Body Fluid Analysis. 1 Credit.
Theory, practical application, technical performance and evaluation of procedures used in the analysis of urine and other body fluids, including cerebrospinal, synovial, serous, seminal, amniotic and feces. Prerequisites: departmental consent, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4970. Clinical Laboratory Management I. 2 Credits.
Theory, practical application and evaluation of laboratory management principles and associated models in communication, educational methodology, healthcare systems and financial resources. Opportunities for building critical thinking, problem-solving, and management/ professional leadership skills are provided. Prerequisite: departmental approval, accepted into the Medical Technology Program. May be repeated for credit. Graded on A/F basis only.

CL_L_S 4980. Clinical Lab Management II. 3 Credits.
Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Prerequisite: Clinical Laboratory Sciences [CL_L_S] 4970 or departmental consent; accepted into the Medical Technology Program. Graded on A/F basis only.

Communication (COMMUN)

COMMUN 1200. Public Speaking. 3 Credits.
Principles, process of speech communication in small group and public speaking situations. Three lab/lecture meetings per week.

COMMUN 1200H. Public Speaking - Honors. 3 Credits.
Principles, process of speech communication in small group and public speaking situations. Three lab/lecture meetings per week. Honors eligibility required.

COMMUN 2100. Media Communication in Society. 3 Credits.
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society. Prerequisite: freshman, sophomore or junior standing only.

COMMUN 2100H. Media Communication in Society - Honors. 3 Credits.
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society. Prerequisite: freshman, sophomore or junior standing only. Honors eligibility required.

COMMUN 2315. Basic Audio Production and Performance. 3 Credits.
Radio speaking in varied types of programs; console operations, tape editing, microphone techniques. May be restricted to Communication majors only during early registration.

COMMUN 2701. Topics in Communication - General. 3 Credits.
Topics in Communication - General. May be restricted to Communication majors only during early registration.

COMMUN 2703. Topics in Communication - Behavioral Science. 3 Credits.
Topics in Communication - Behavioral Science. May be restricted to Communication majors only during early registration.

COMMUN 2705. Topics in Communication - Humanities/Fine Arts. 3 Credits.
Topics in Communication - Humanities/Fine Arts. May be restricted to Communication majors only during early registration.
COMMUN 3050. Survey of Communication Studies. 3 Credits.
A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication. May be restricted to Communications majors through early registration.

COMMUN 3310. Message Design and Writing for the Media. 3 Credits.
Styles and functions of various script formats for radio, television productions. Prerequisites: Communication [COMMUN] 2100. May be restricted to Communication majors only during early registration.

COMMUN 3315. Advanced Audio Production. 3 Credits.
The study and application of techniques applicable to radio, television, and multimedia production with an emphasis on digital audio workstation systems. Prerequisite: Communication [COMMUN] 2315. May be restricted to Communication majors only during early registration.

COMMUN 3390. Digital Production I. 3 Credits.
Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing. Prerequisite: sophomore standing. May be restricted to Communication majors only during early registration.

COMMUN 3395. Digital Production II. 3 Credits.
Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure. Prerequisite: Communication [COMMUN] 3390 or instructor’s consent. May be restricted to Communication majors only during early registration.

COMMUN 3422. Communication Research Methods. 3 Credits.
Focuses on writing and administering surveys, conducting field research, and designing experimental studies. Prerequisites: sophomore standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3441. Nonverbal Communication. 3 Credits.
Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication. Prerequisite: sophomore standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3460. Organizational Advocacy. 3 Credits.
Theory and analysis of communication to promote organizational culture and image. Prerequisite: sophomore standing. May be restricted to Communication majors during early registration.

COMMUN 3470. Culture as Communication. 3 Credits.
(same as Anthropology [ANTHRO] 3470, Linguistics [LINGST] 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction. Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration.

COMMUN 3490. Mass Media Theory. 3 Credits.
Survey of the theories of mass communication. Prerequisites: Communication [COMMUN] 2100 or senior status. May be restricted to Communication majors only during early registration.

COMMUN 3525. Conflict and Communication. 3 Credits.
Theory and analysis of communication in conflict situations across a variety of contexts. Prerequisite: sophomore standing required. May be restricted to Communication majors only during early registration.

COMMUN 3561. Relational Communication. 3 Credits.
Analysis of communication influences on relational identities and development. Prerequisite: sophomore standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3570. Performance of Literature. 3 Credits.

COMMUN 3571. Group Decision Making Processes. 3 Credits.
(same as Peace Studies [PEA_ST] 3521). Procedures and techniques for interpersonal communication and decision making in small groups. Prerequisite: sophomore standing. May be restricted to Communication majors only during early registration.

COMMUN 3572. Argument and Advocacy. 3 Credits.
Critical analysis and production of argument emphasizing evidence, reasoning, and refutation. Prerequisite: Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3575. Business and Professional Communication. 3 Credits.
Theory and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations. Prerequisite: sophomore standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3580. Crisis Communication. 3 Credits.
The theory and practice of corporate and political communication responses to crisis situations. Prerequisite: sophomore standing. May be restricted to Communication majors only during early registration.

COMMUN 3636. Contemporary Issues in Mass Communication. 3 Credits.
Introduction to current issues and trends and relationship among the new technologies, policies, and potential impact on society. Prerequisites: sophomore standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 3701. Topics in Communication-General. 3 Credits.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: Communication [COMMUN] 1200, 2100, departmental consent for repetition. May be restricted to Communication majors only during early registration.

COMMUN 3703. Topics in Communication-Behavioral Sciences. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communication majors only during early registration.

COMMUN 3705. Topics in Communication-Humanities. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communications majors only during early registration.
COMMUN 4395. Professional Seminar in Television Production. 3 Credits.  
Application of principles to advanced television production, direction.  
Prerequisites: Communication [COMMUN] 3390 and instructor’s consent. May be restricted to Communication majors only during early registration.

COMMUN 4412. Gender, Language, and Communication. 3 Credits.  
(same as Linguistics [LINGST] 4412 and Anthropology [ANTHRO] 4412). Relationship among gender, language, nonverbal communication, and culture. Prerequisite: junior standing or departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4415. Language and Discourse. 3 Credits.  
(same as Linguistics [LINGST] 4415). Analysis of the rules of social interaction and the functions of language in discourse. Prerequisites: junior standing and departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4440. Ethical Issues in Communication. 3 Credits.  
(same as Peace Studies [PEA_ST] 4400). Exploration and analysis of ethical dimensions intrinsic to human communication. Prerequisite: junior standing or departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4473. Political Communication. 3 Credits.  
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum. Prerequisite: junior standing or departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4474. Theory and Research in Persuasion. 3 Credits.  
Studies the persuasive process, attitude formation, modification. Prerequisites: junior standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 4476. Organizational Communication. 3 Credits.  
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings. Prerequisites: junior standing and Communication [COMMUN] 1200. May be restricted to Communication majors only during early registration.

COMMUN 4481. Principles of Rhetoric. 3 Credits.  
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication. Prerequisites: Communication [COMMUN] 1200, junior standing and departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4520. Family Communication. 3 Credits.  
(same as Human Development and Family Studies [H_D_FS] 4680). Analysis of the functions and processes of communication within families. Prerequisite: junior standing or departmental consent. May be restricted to Communication majors only during early registration.

COMMUN 4530. Health Communication. 3 Credits.  
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

COMMUN 4618. Television Program Analysis and Criticism. 3 Credits.  
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics. Prerequisites: junior standing. May be restricted to Communication Majors only during early registration.

COMMUN 4628. Children, Adolescents and the Media. 3 Credits.  
Focus on social scientific research concerning the mass media in the lives of children and adolescents. The course centers on media effects literature and controversies relevant to child and adolescent media users. Course involves readings, lectures, discussions of theories, concepts, methods, and finding. We will also consider social implication and personal choices in media use. Junior Standing Required. Graded on A-F basis only.

COMMUN 4638. New Technologies and Communication. 3 Credits.  
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge. Prerequisite: junior standing or instructor’s consent. May be restricted to Communication Majors only during early registration.

COMMUN 4701. Topics in Communication-General. 1-99 Credit.  
Organized study of selected topics. Subjects and earnable credit vary from semester to semester. Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communication Majors only during early registration.

COMMUN 4703. Topics in Communication-Behavioral Science. 1-99 Credit.  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communication majors only during early registration.

COMMUN 4705. Topics in Communication-Humanities. 1-99 Credit.  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: junior standing and instructor’s consent, departmental consent for repetition. May be restricted to Communication majors only during early registration.

COMMUN 4940. Internship. 1-99 Credit.  
Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only. Prerequisites: Admission to department, junior standing, instructor’s consent, 2.5 GPA.

COMMUN 4960. Directed Reading. 1-99 Credit.  
Independent reading, reports. Prerequisites: junior standing or instructor’s consent.

COMMUN 4974. Senior Project. 3 Credits.  
Integration and adaptation of communication theories to an applied communication problem. Required for all majors. Prerequisite: admission to department, senior standing, and departmental consent.

COMMUN 4975. Visual Literacy. 3 Credits.  
Integration of theory and practice. The theoretical component of the class is grounded in the study of visual literacy and the practice component will focus on documentary filmmaking. Prerequisite: Communication [COMMUN] 3390, senior standing. May not be taken by graduate students. It is a capstone course for undergraduate students only. Prerequisite: Admission to the department.

COMMUN 4996H. Honors in Communication. 1-2 Credit.  
Special work for Honors candidates in communication. Consent of instructor required.

COMMUN 4997. Honors in Communication. 2 Credits.  
Special work for Honors candidates in communication.
COMMUN 4997H. Honors in Communication. 1-2 Credit.
Special work for Honors candidates in communication. Consent of Instructor Required.

COMMUN 7412. Gender, Language, and Communication. 3 Credits.
(same as Linguistics [LINGST] 7412 and Anthropology [ANTHRO] 7412).
Relationship among gender, language, nonverbal communication, and culture. Prerequisite: graduate standing or departmental consent.

COMMUN 7415. Language and Discourse. 3 Credits.
(same as Linguistics [LINGST] 4415). Analysis of the rules of social interaction and the functions of language in discourse. Prerequisites: graduate standing and departmental consent.

COMMUN 7440. Ethical Issues in Communication. 3 Credits.
(same as Peace Studies [PEA_ST] 4440). Exploration and analysis of ethical dimensions intrinsic to human communication. Prerequisite: graduate standing or departmental consent.

COMMUN 7473. Political Communication. 3 Credits.
Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum. Prerequisite: graduate standing or departmental consent.

COMMUN 7474. Theory and Research in Persuasion. 3 Credits.
Studies the persuasive process, attitude formation, modification. Prerequisites: Communications [COMMUN] 3576 and departmental consent.

COMMUN 7476. Organizational Communication. 3 Credits.
Theories of communication systems and processes in organizational structures; study of communication behavior in formal and informal organizational settings. Prerequisites: Communications [COMMUN] 3571 or departmental consent. Graduate standing required.

COMMUN 7481. Principles of Rhetoric. 3 Credits.
Development of rhetoric from time of Corax with emphasis on Aristotle; derivation, application of standards for judging effectiveness in communication. Prerequisites: Communications [COMMUN] 3576 and departmental consent.

COMMUN 7520. Family Communication. 3 Credits.
(same as Human Development and Family Studies [H_D_FS] 4520). Analysis of the functions and processes of communication within families. Prerequisite: graduate standing and departmental consent.

COMMUN 7618. Television Program Analysis and Criticism. 3 Credits.
Development of critical viewing skills including analysis of program conventions, genres, and television aesthetics. Prerequisites: graduate standing and instructor’s consent.

COMMUN 7638. New Technologies and Communication. 3 Credits.
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge. Prerequisite: graduate standing or instructor’s consent.

COMMUN 8001. Topics in Communication-General. 3 Credits.
Study of selected topics in Communication. Topic and credit may vary semester to semester. Repeatable upon consent of department. Prerequisite: instructor’s consent.

COMMUN 8085. Problems. 1-99 Credit.
Individual study not leading to thesis or dissertation. Prerequisite: instructor’s consent.

COMMUN 8090. Master’s Thesis Research in Communication. 1-99 Credit.
Research leading to thesis or dissertation. Prerequisite: instructor’s consent. Graded on a S/U basis only.

COMMUN 8110. Introduction to Graduate Study in Communication. 3 Credits.
Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.

COMMUN 8120. Seminar in Quantitative Methods in Communication. 3 Credits.
Quantitative methods of speech research.

COMMUN 8130. Topics in Qualitative Research Methods. 3 Credits.
Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. (May be Repeated) Graduate standing required.

COMMUN 8140. Content Analysis. 3 Credits.
Methods of Content Analysis; including consideration of reliability, validity Computer content analysis, codebooks.

COMMUN 8150. Seminar in Television Criticism. 3 Credits.
Examination and application of various critical methodologies to television texts.

COMMUN 8160. Rhetorical Criticism. 3 Credits.
Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.

COMMUN 8170. Seminar in Quantitative Methods in Communication II. 3 Credits.
The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Prerequisite: Communication [COMMUN] 8120. Instructor’s consent required. Graded on A/F basis only. Graduate Standing Required.

COMMUN 8310. Seminar in Interpersonal Communication. 3 Credits.
Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.

COMMUN 8410. Seminar in Organizational Communication Theory. 3 Credits.
Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.

COMMUN 8420. Seminar in Small Group Communication. 3 Credits.
Identifies and analyzes theories and variables which explain, predict, and/or influence small group communication.

COMMUN 8510. Seminar in Mass Communication Theory. 3 Credits.
This course will offer graduate students a broad overview of extant theories employed in the study of mass communication and mass media effects. The class will focus on theories of society, theories of media, and the relationships between mass communication and culture. It will also focus on theories of media structures, media organizations, media content, audiences, and media effects.

COMMUN 8610. Survey of Political Communication. 3 Credits.
Survey of theory and research on political communication; emphasis on messages and audience responses to messages.
COMMUN 9050. Research. 1-9 Credit.
Completes comprehensive exams and writes a literature review.

Research leading to thesis or dissertation. Prerequisite: instructor’s consent. Graded on a S/U basis only.

COMMUN 9170. Research Practicum. 3 Credits.
Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. Consent of mentor required. Advanced graduate students. May be repeated once for credit.

COMMUN 9280. Seminar in Communication Theory. 3 Credits.
Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.

COMMUN 9310. Seminar in Family Communication. 3 Credits.
Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graduate Standing Required. Graded on A-F basis only.

COMMUN 9330. Topics in Interpersonal Communication. 3 Credits.
The course will review theory and research on topics related to the study of communication and interpersonal relationships. Subjects will rotate and include areas such as relational conflict, gender communication, nonverbal communication, intercultural communication, or interpersonal violence and communication. Prerequisite: instructor’s consent.

COMMUN 9340. Topics in Organizational Communication. 3 Credits.
Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated. Prerequisite: graduate standing.

COMMUN 9520. Seminar in Mass Media Effects. 3 Credits.
Explores current research in the processes and effects of mass communication. Readings pertain to the current social and psychological effects of media on viewers.

COMMUN 9530. Topics in Mass Communication. 3 Credits.
Examination of theory and research in selected areas of media communication. Topics vary by semester. May be repeated. Prerequisite: Graduate Standing.

COMMUN 9620. Political Campaign Debates. 3 Credits.
Theory and research on political campaign debates applied to analyses of candidate debates. Focus on primary and general presidential debates.

COMMUN 9630. Political Advertising. 3 Credits.
Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

COMMUN 9720. Seminar in Theories of Rhetoric and Criticism. 1-6 Credit.
Directed research on selected topics in rhetorical theory and criticism. Prerequisite: instructor’s consent.
concurrently with Communication Science and Disorders [C_S_D] 3220; CSD majors only or instructor’s consent.

C_S_D 3220. Speech Acoustics. 2 Credits.
(same as Linguistics [LINGST] 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems. Prerequisites: Must be taken concurrently with Communication Science and Disorders [C_S_D] 3210; CSD majors only or instructor’s consent.

C_S_D 3230. Hearing Science. 3 Credits.
Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

C_S_D 4001. Topics in Communication Science and Disorders. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent. Prerequisites: junior standing and instructor’s consent.

C_S_D 4020. Language Disorders in Children. 3 Credits.
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention. Prerequisites: Communication Science and Disorders [C_S_D] 2120, 3020, Linguistics [LINGST] 4600. Communication Science and Disorder majors only.

C_S_D 4030. Language Disorders of Adults. 2 Credits.
Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures. Prerequisites: Communication Science and Disorders [C_S_D] 2120, 3020, 4430, and Linguistics [LINGST] 4600 or instructor’s consent.

C_S_D 4050. Clinical Applications of Sign Language. 3 Credits.
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Prerequisites: Communication Science and Disorders [C_S_D] 1050 and 1100 or equivalent. Instructor’s consent required. Course graded on A/F basis only.

C_S_D 4200. Professional Voice. 2 Credits.
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science and Disorders students may not take for graduate credit.

C_S_D 4210. Fluency Disorders. 2 Credits.

C_S_D 4220. Voice Disorders. 1 Credit.
Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches. Prerequisites: Communication Science and Disorders [C_S_D] 2120, 3010, 3210, 4430.

C_S_D 4320. Disorders of Phonology and Articulation. 3 Credits.
Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment. Prerequisites: Communication Science and Disorders [C_S_D] 2120, 3010, 3020, 3210. Communication Science and Disorders majors only.

C_S_D 4330. Introduction to Audiology. 3 Credits.
Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation. Prerequisites: Communication Science and Disorders [C_S_D] 3230; CSD majors only or instructor’s consent.

C_S_D 4340. Aural Rehabilitation. 3 Credits.
Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors. Prerequisites: Communication Science and Disorders [C_S_D] 3230 and 4330.

C_S_D 4430. Neurophysiology for Speech, Language, and Hearing. 3 Credits.
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Prerequisites: CSD majors only or instructor’s consent.

C_S_D 4810. Psycholinguistics. 3 Credits.
(same as Linguistics [LINGST] 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language. Prerequisite: instructor’s consent.

C_S_D 4820. Speech Perception. 3 Credits.
(same as Linguistics [LINGST] 4820). Selected topics in the perceptual processing of speech sounds and spoken language. Prerequisite: instructor’s consent.

C_S_D 4830. Individual Differences in Language Processing. 2 Credits.
Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders. Prerequisite: instructor’s consent.

C_S_D 4840. Language and Development in Infancy. 3 Credits.
Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment. Senior Standing Required. Instructor’s consent required.

C_S_D 4900. Clinical Observation in Communication Disorders. 2 Credits.
Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only. Prerequisite: senior standing and departmental consent. Communication Science and Disorders [C_S_D] majors only.

C_S_D 4945. Clinical Apprenticeship in Communication Disorders. 1-3 Credit.
Supervised observation and clinical experience in speech-language pathology for undergraduates. Communication Science and Disorders majors only. Prerequisite: senior standing and departmental consent.

C_S_D 4950. Research Apprenticeship. 1-99 Credit.
Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 6 hrs. maximum. Prerequisite: instructor’s consent.

C_S_D 4960. Directed Reading in Communication Science and Disorders. 1-3 Credit.
Independent reading; reports. Prerequisite: instructor’s consent.
C_S_D 4990. Honors Thesis. 3 Credits.
Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA leads to degree with departmental honors. Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in CSD [Communication Science and Disorders] courses; instructor’s consent. Restricted to CSD students only. Graded on A/F basis only.

C_S_D 7001. Topics in Communication Science and Disorders. 1-99 Credit.
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. Prerequisites: instructor’s consent, instructor’s and departmental consent for repetition.

C_S_D 7050. Clinical Applications of Sign Language. 3 Credits.
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management will also be targeted. Graded on A-F basis only. Prerequisites: C_S_D 1050 and C_S_D 1100 or equivalent. Instructor’s consent required.

C_S_D 7085. Problems in Communication Science and Disorders. 1-99 Credit.
Individual study not leading to thesis or dissertation. Prerequisite: instructor’s consent.

C_S_D 7200. Professional Voice. 2 Credits.
Voice production, common voice problems and their causes; healthy vocal habits and techniques to achieve optimal voice. Communication Science Disorder [C_S_D] students may not take for graduate credit. Graduate Standing Required.

C_S_D 7340. Aural Rehabilitation. 3 Credits.
Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors. Prerequisites: graduate standing and Communication, Science Disorders [C_S_D] 3230 and 4330.

C_S_D 7430. Neurophysiology for Speech, Language, and Hearing. 3 Credits.
Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system. Prerequisite: CSD majors or instructor’s consent.

C_S_D 7810. Psycholinguistics. 3 Credits.
(same as Linguistics [LINGST] 7810). Examination of the knowledge and processes that underlie the human ability to produce and understand language. Prerequisite: graduate standing and instructor’s consent.

C_S_D 7820. Speech Perception. 3 Credits.
(same as Linguistics [LINGST] 7820). Selected topics in the perceptual processing of speech sounds and spoken language. Prerequisite: consent of instructor.

C_S_D 7830. Individual Differences in Language Processing. 2 Credits.
Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders. Prerequisite: instructor’s consent.

C_S_D 7840. Language and Development in Infancy. 3 Credits.
Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment. Graduate Standing Required.

C_S_D 8001. Topics in Communication Science and Disorders. 1-99 Credit.
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. Prerequisites: graduate standing and instructor’s consent, instructor’s and departmental consent for repetition.

C_S_D 8020. Developmental Language Disorders. 3 Credits.

C_S_D 8030. Acquired Language Disorders. 3 Credits.
Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, dementia, and right-hemisphere syndrome. Prerequisite: Communication Science and Disorders [C_S_D] 4030 and 4430, or instructor’s consent.

C_S_D 8050. Research in Communication Science and Disorders. 1-99 Credit.
Independent research leading to a report but not to a thesis or dissertation. Prerequisite: instructor’s consent.

C_S_D 8085. Problems in Communication Science and Disorders. 1-99 Credit.
Individual study not leading to thesis or dissertation. Prerequisite: graduate standing and instructor’s consent.

C_S_D 8087. Seminar: Contemporary Topics in Speech-Language Pathology. 1-3 Credit.
Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits. Prerequisite: instructor’s consent.

C_S_D 8090. Research in Communication Science and Disorders. 1-99 Credit.
Research leading to thesis or dissertation. Prerequisite: instructor’s consent. Graded on a S/U basis only.

C_S_D 8150. Advanced Speech Science. 2 Credits.
Advanced exploration of the physiology of speech production and the corresponding acoustic characteristics of speech. Includes experience with pertinent laboratory instrumentation. Prerequisite: Communication Science and Disorders [C_S_D] 3210 and 3220.

C_S_D 8200. Motor Speech Disorders. 3 Credits.
Review of neuroanatomic mechanisms underlying speech production; etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures. Prerequisite: instructor’s consent.

C_S_D 8210. Disorders of Fluency. 3 Credits.
Identification and remediation of fluency disorders in children and adults. Prerequisites: Communication, Science and Disorders [C_S_D] 3210, 4210, 4430, or equivalent or instructor’s consent.
**C_S_D 8220. Disorders of Voice. 2 Credits.**
Diagnosis and management of communicative disorders resulting from pathologies or abnormalities of the craniofacial structures and from pathologies or misuse of the phonatory systems. Prerequisites: Communication, Science and Disorders [C_S_D] 3210, 4320 and 4210 or instructor’s consent.

**C_S_D 8230. Dysphagia. 3 Credits.**
Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on instrumental and non-instrumental methods for assessing and treating dysphagia. Prerequisites: Communication Science and Disorders [C_S_D] 3210, 4220, 8200; or instructor’s consent.

**C_S_D 8240. Orofacial Anomalies. 1 Credit.**

**C_S_D 8250. Clinical Methods in Speech-Language Pathology. 3 Credits.**
An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only. Prerequisite: departmental consent.

**C_S_D 8260. Diagnosis in Speech-Language Pathology. 3 Credits.**
General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders. Prerequisite: departmental consent.

**C_S_D 8320. Speech Sound Disorders. 3 Credits.**
Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only. Prerequisite: C_S_D 3010 or equivalent or permission of instructor; departmental consent.

**C_S_D 8420. Reading and Language Disabilities in School-Age Children. 2 Credits.**
Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury. Prerequisite: Communication, Science and Disorders [C_S_D] 4020 or 8020.

**C_S_D 8430. Introduction to Augmentative and Alternative Communication. 2 Credits.**
Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Prerequisites: Motor Speech Disorders; Language Disorders in Children; Acquired Language Disorders. Graded on A/F basis only. Prerequisite: Communication Science and Disorders [C_S_D] 8020 and 8030.

**C_S_D 8500. Issues in Professional Practice. 2 Credits.**
Organizational, interprofessional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graduate standing required; departmental consent. Graded on A/F basis only.

**C_S_D 8600. Clinical Language Analysis. 3 Credits.**
This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graduate standing and departmental consent required. Graded on A/F basis only.

**C_S_D 8935. Clinical Practice in Audiology. 1 Credit.**
Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded S/U only.

**C_S_D 8945. Clinical Practice in Speech-Language Pathology. 1-10 Credit.**
Supervised clinical practice in speech pathology for graduate students. May be repeated for credit. Prerequisite: Communication [C_S_D] 4945 or equivalent.

**C_S_D 8960. Directed Reading in Communication Science and Disorders. 1-3 Credit.**
Independent reading; reports. Prerequisite: graduate standing and instructor’s consent.

**C_S_D 9050. Research in Communication Science and Disorders. 1-99 Credit.**
Independent research leading to a report but not to a thesis or dissertation. Prerequisite: graduate standing and instructor’s consent.

**C_S_D 9087. Seminar: Contemporary Topics in Speech-Language Pathology. 1-3 Credit.**
Advanced study involving critical literature review and research on selected topics in speech and language. May be repeated for up to 6 credits. Prerequisite: instructor’s consent.

**C_S_D 9090. Research in Communication Science and Disorders. 1-99 Credit.**
Research leading to thesis or dissertation. Prerequisite: instructor’s consent. Graded on a S/U basis only.

---

**Computer Science (CMP_SC)**

**CMP_SC 1000. Introduction to Computer Science. 1 Credit.**
This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives. Restricted to freshman/sophomore Computer Science [CMP_SC]/ Information Technology [INFOTC] majors.

**CMP_SC 1001. Topics in Computer Science. 1-99 Credit.**
Topic and credit may vary from semester to semester. May be repeated upon consent of department.

**CMP_SC 1040. Introduction to Problem Solving and Programming. 3 Credits.**
An introduction to problem solving methods and programming concepts, providing experience in designing, developing, implementing, and testing programs. Cannot be taken for credit after Computer Science [CMP_SC] 1050.

**CMP_SC 1050. Algorithm Design and Programming I. 3 Credits.**
This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers. Prerequisites: Mathematics [MATH] 1100 or 1160 or 1500 (C- or better). Math Reasoning Proficiency Course.
Topic and credit may vary from semester to semester. May be repeated upon consent of department. Prerequisite: departmental consent.

CMP_SC 2050. Algorithm Design and Programming II. 3 Credits.
A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis. Prerequisite: Computer Science [CMP_SC] 1050.

CMP_SC 2111. Production Languages. 1-3 Credit.
The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit. Prerequisite: Computer Science [CMP_SC] 2050.

CMP_SC 2830. Introduction to the Internet, WWW and Multimedia Systems. 3 Credits.
This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web-based applications) will be discussed in detail. Prerequisites: Computer Science [CMP_SC] 2050.

CMP_SC 3001. Topics in Computer Science. 1-99 Credit.
Current and new technical developments in computer science. For juniors and seniors. Prerequisite: departmental consent. May be repeated for 6 hours credit.

CMP_SC 3050. Advanced Algorithm Design. 3 Credits.
This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies. Prerequisites: Computer Science [CMP_SC] 2050.

CMP_SC 3270. Introduction to Digital Logic. 3 Credits.
Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, adder design, memory elements, and finite state machine design. Prerequisites: Computer Science [CMP_SC] 2050.

CMP_SC 3280. Computer Organization and Assembly Language. 3 Credits.
Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Prerequisite: Computer Science [CMP_SC] 3270. Graded of A-F basis only.

CMP_SC 3330. Object Oriented Programming. 3 Credits.
This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled. Prerequisite: Computer Science [CMP_SC] 2050.

CMP_SC 3380. Database Applications and Information Systems. 3 Credits.
Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Prerequisite: Computer Science [CMP_SC] 2050. Graded on A/F basis only.

CMP_SC 3530. UNIX Operating System. 3 Credits.
Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation. Prerequisite: Advanced C programming experience.

CMP_SC 3940. Internship in Computer Science. 1-3 Credit.
Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Prerequisite: Computer Science [CMP_SC] 2050. Graded on a S/U basis only.

CMP_SC 4001. Topics in Computer Science. 1-99 Credit.
Topic and credit may vary from semester to semester. May be repeated upon consent of department.

CMP_SC 4050. Design and Analysis of Algorithms I. 3 Credits.
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Prerequisite: Computer Science [CMP_SC] 3050 and Mathematics [MATH] 2320.

CMP_SC 4060. String Algorithms. 3 Credits.
This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Prerequisite: Computer Science [CMP_SC] 4050. Graded on A/F basis only.

CMP_SC 4070. Numerical Methods for Science and Engineering. 3 Credits.
Introduces basic numerical methods widely used by computer scientists/engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Prerequisites: Computer Science [CMP_SC] 2050, junior standing or instructor's consent. Graded on A/F basis only.

CMP_SC 4085. Problems in Computer Science. 1-6 Credit.
Independent investigation or project in Computer Science. Prerequisite: senior standing in Computer Science. May be repeated to up 6 hours.

CMP_SC 4270. Computer Architecture I. 3 Credits.
Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems. Prerequisites: Computer Science [CMP_SC] 3270.

CMP_SC 4320. Software Engineering I. 3 Credits.
Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. Prerequisite: Computer Science [CMP_SC] 2050. Co-requisite: Computer Science [CMP_SC] 3380.

CMP_SC 4330. Object Oriented Design I. 3 Credits.
Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.
**CMP_SC 4380. Database Management Systems I. 3 Credits.**
Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL. Prerequisite: Computer Science [CMP_SC] 3380.

**CMP_SC 4410. Theory of Computation I. 3 Credits.**
An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD. Prerequisite: Mathematics [MATH] 2320.

**CMP_SC 4430. Compilers I. 3 Credits.**
Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD. Prerequisite: Mathematics [MATH] 2320.

**CMP_SC 4450. Principles of Programming Languages. 3 Credits.**
An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD. Prerequisite: Computer Science [CMP_SC] 2050.

**CMP_SC 4520. Operating Systems I. 3 Credits.**
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Prerequisites: Computer Science [CMP_SC] 3050 and Mathematics [MATH] 1700.

**CMP_SC 4610. Computer Graphics I. 3 Credits.**
Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms. Prerequisites: Computer Science [CMP_SC] 3050 and Mathematics [MATH] 1500 or 1300 and 1400.

**CMP_SC 4620. Physically Based Modeling and Animation. 3 Credits.**
This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students. Graded on A/ F basis only. Prerequisites: Computer Science [CMP_SC] 4610, good knowledge of C or C++ programming, no physics background necessary.

**CMP_SC 4650. Digital Image Processing. 3 Credits.**
(same as Electrical and Computer Engineering [ECE] 4850).
Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation. Prerequisites: Computer Science [CMP_SC] 2050, Statistics [STAT] 4710 or instructor's consent.

**CMP_SC 4670. Digital Image Compression. 3 Credits.**
(same as Electrical and Computer Engineering [ECE] 4675) Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding. Prerequisite: Computer Science [CMP_SC] 2050.

**CMP_SC 4720. Introduction to Machine Learning and Pattern Recognition. 3 Credits.**
(Same as Electrical Engineering [ECE] 4720) This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Prerequisite: Computer Science [CMP_SC] 2050 and Statistics [STAT] 4710 or instructor consent. Graded on A/F basis only.

**CMP_SC 4730. Building Intelligent Robots. 4 Credits.**
(same as Electrical and Computer Engineering [ECE] 4340). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: junior standing and programming experience in one of the following programming languages: Basic, C, C++, or Java.

**CMP_SC 4750. Artificial Intelligence I. 3 Credits.**
Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI. Prerequisite: Computer Science [CMP_SC] 3050 and junior standing.

**CMP_SC 4770. Introduction to Computational Intelligence. 3 Credits.**
(same as Electrical and Computer Engineering [ECE] 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**CMP_SC 4830. Science and Engineering of the World Wide Web. 3 Credits.**
This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies. Prerequisites: Computer Science [CMP_SC] 2830.

**CMP_SC 4850. Computer Networks I. 3 Credits.**

**CMP_SC 4860. Network Security. 3 Credits.**
Principles and practice of cryptography, network security, and computer system security. It includes symmetric and asymmetric cryptography, authentication, security applications such as secure email, IP security, Web security, and system security issues such as intruders, viruses, worms, Trojan horses, and firewalls. Graded on A/F basis only. Prerequisite: Computer Science [CMP_SC] 4850.
CMP_SC 4870. Wireless and Mobile Networks. 3 Credits.
Concepts and techniques in wireless and mobile networks: cellular concepts, wireless physical layer, wireless MAC protocol, mobility management, power management, wireless network security, wireless telecommunication system, wireless LAN, wireless ad hoc networking, wireless personal area network. Prerequisite: Computer Science [CMP_SC] 4850. Graded on A/F basis only.

CMP_SC 4970. Senior Capstone Design I. 3 Credits.
Design projects emphasizing team work, communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports. Prerequisites: Computer Science [CMP_SC] 4320 and senior standing.

CMP_SC 4980. Senior Capstone Design II. 2 Credits.

CMP_SC 4990. Undergraduate Research in Computer Science. 0-6 Credit.
Independent investigation or project in Computer Science. Prerequisite: senior standing in Computer Science. May be repeated to 6 hours.

CMP_SC 4995. Undergraduate Research in Computer Science - Honors. 1-6 Credit.
Independent investigation to be presented as an undergraduate honors thesis. Prerequisite: honors student in Computer Science.

CMP_SC 7001. Topics in Computer Science. 1-99 Credit.
Topic and credit may vary from semester to semester. May be repeated upon consent of department. Prerequisite: graduate standing.

CMP_SC 7010. Computational Methods in Bioinformatics. 3 Credits.
(Same as Informatics Institute [INFOINST] 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development. Prerequisite: Computer Science [CMP_SC] 4050 and Statistics [STAT] 4710.

CMP_SC 7050. Design and Analysis of Algorithms I. 3 Credits.
This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD. Prerequisites: Computer Science [CMP_SC] 3050 and Mathematics [MATH] 2320.

CMP_SC 7060. String Algorithms. 3 Credits.
This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms. Prerequisite: Computer Science [CMP_SC] 4050. Graded on A/F basis only.

CMP_SC 7070. Numerical Methods for Science and Engineering. 3 Credits.
Introduces basic numerical methods widely used by computer scientists/ engineers. Students will use the MATLAB platform to computationally solve problems, such as finding roots of nonlinear equations, solving systems of equations, fitting curves, solving ODEs, finding eigenvalues, etc. Prerequisites: Computer Science [CMP_SC] 2050 or instructor’s consent. Graded on A/F basis only. Graduate Standing Required.

CMP_SC 7087. Seminar in Computer Science. 1 Credit.
Reviews of recent investigations, projects of major importance.

CMP_SC 7270. Computer Architecture I. 3 Credits.
Architectural features of high-performance computer systems including hierarchical and virtual memory, pipelining, vector processing and an introduction to multiple-processor systems. Prerequisites: graduate standing and Computer Science [CMP_SC] 3210 or 3270.

CMP_SC 7320. Software Engineering I. 3 Credits.
Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD. Prerequisite: Computer Science [CMP_SC] 2050. Co-requisite: Computer Science [CMP_SC] 3380.

CMP_SC 7380. Database Management Systems I. 3 Credits.
Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL. Prerequisite: graduate standing and Computer Science [CMP_SC] 2050.

CMP_SC 7410. Theory of Computation I. 3 Credits.
An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, contextfree grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD. Prerequisite: Mathematics [MATH] 2320.

CMP_SC 7430. Compilers I. 3 Credits.
Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD. Prerequisite: Mathematics [MATH] 2320.

CMP_SC 7450. Principles of Programming Languages. 3 Credits.
An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD. Prerequisite: Computer Science [CMP_SC] 2050.

CMP_SC 7520. Operating Systems I. 3 Credits.
Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD. Prerequisites: Computer Science [CMP_SC] 3050 and Mathematics [MATH] 1700.

Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms. Prerequisites: Computer Science [CMP_SC] 3050 and either Mathematics [MATH] 1500 or 1300 and 1400.
CMP_SC 7650. Digital Image Processing. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 7850).
Fundamentals of digital image processing hardware and software
including digital image acquisition, image display, image enhancement,
image transforms and segmentation. Prerequisites: graduate standing
and Computer Science [CMP_SC] 2050, Statistics [STAT] 7710 or
instructor’s consent.

CMP_SC 7670. Digital Image Compression. 3 Credits.
Covers digital image formation, information theory concepts, and
fundamental lossless and lossy image compression techniques including
bit plane encoding, predictive coding, transform coding, block truncation
coding, vector quantization, subband coding and hierarchical coding.
Prerequisite: graduate standing and Computer Science [CMP_SC] 2050.

CMP_SC 7720. Introduction to Machine Learning and Pattern
Recognition. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 7720). This course
provides foundation knowledge and methods in machine learning and
pattern recognition that address the problem of programming computers
to optimize performance by learning from example data or expert
knowledge. Prerequisites: Computer Science [CMP_SC] 2050 and
Statistics [STAT] 4710 or instructor’s consent. Graded on A/F basis only.

CMP_SC 7730. Building Intelligent Robots. 4 Credits.
(same as Electrical and Computer Engineering [ECE] 7340). Covers the
design and development of intelligent machines, emphasizing topics
related to sensor-based control of mobile robots. Includes mechanics
and motor control, sensor characterization, reactive behaviors and
control architectures. Prerequisites: graduate standing and programing
experience in one of the following programming languages: Basic, C, C+ +,
or Java.

CMP_SC 7750. Artificial Intelligence I. 3 Credits.
Introduction to the concepts and theories of intelligent systems. Various
approaches to creating intelligent systems, including symbolic and
computational approaches, insight into the philosophical debates
important to understanding AI. Prerequisite: graduate standing and

CMP_SC 7770. Introduction to Computational Intelligence. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 7870). Introduction to
the concepts, models and algorithms for the development of intelligent
systems from the standpoint of the computational paradigms of neural
networks, fuzzy set theory and fuzzy logic, evolutionary computation and
swarm optimization. Graduate Standing Required.

Credits.
This course will study the science and engineering of the World Wide
Web. We will study the languages, protocols, services and tools that
enable the web. Emphasis will be placed on basics and technologies.
Prerequisites: graduate standing and Computer Science [CMP_SC] 3330
and 2830.

CMP_SC 7840. Computer Networks I. 3 Credits.
Introduction to concepts and terminology of data communications and
computer networking. Basic protocols and standards, applications of
networking, routing algorithms, congestion avoidance, long-haul and
local networks. Prerequisite: graduate standing and Computer Science

CMP_SC 7850. Network Security. 3 Credits.
Principles and practice of cryptography, network security, and computer
system security. It includes symmetric and asymmetric cryptography,
authentication, security applications such as secure email, IP security,
Web security, and system security issues such as intruders, viruses,
worms, Trojan horses, and firewalls. Prerequisite: Computer Science
[CMP_SC] 7850 or 4850.

CMP_SC 7860. Wireless and Mobile Networks. 3 Credits.
Concepts and techniques in wireless and mobile networks: cellular
concepts, wireless physical layer, wireless MAC protocol, mobility
management, power management, wireless network security, wireless
telecommunication system, wireless LAN, wireless ad hoc networking,
wireless personal area network. Prerequisite: Computer Science
[CMP_SC] 7850 or 4850.

CMP_SC 8001. Advanced Topics in Computer Science. 3 Credits.
Topic may vary from semester to semester. May be repeated upon
consent of department. Prerequisite: varies by topic.

CMP_SC 8050. Design and Analysis of Algorithms II. 3 Credits.
Techniques for the design and analysis of correct, efficient algorithms.
Topics include graph, geometric, and algebraic/ numeric algorithms, NP-
completeness, and parallel algorithms. Prerequisite: Computer Science
[CMP_SC] 4050.

CMP_SC 8085. Problems in Computer Science. 1-4 Credit.
Independent study project work with a professor in computer science.
Prerequisite: instructor consent.

CMP_SC 8090. Computational Geometry. 3 Credits.
Studies fundamental geometric problems within the framework of
analysis of algorithms: convex hull algorithms in the plane and in general
dimension, Voronoi diagram construction and applications to the solution
of proximity problems, intersection problems, and geometric searching
problems. Prerequisites: Computer Science [CMP_SC] 4050 and
Mathematics [MATH] 2300, or instructor’s consent.

CMP_SC 8110. Problem Solving in Bioinformatics. 3 Credits.
(Same as Informatics Institute [INFOINST] 8010). The course covers a
variety of bioinformatics research topics such as biological sequence
comparison, protein structure prediction, protein and gene function
prediction, and inference and modeling of biological networks.
Prerequisites: Informatics Institute [INFOINST]/Computer Science
[CMP_SC] 7010. Graduate Standing Required. Graded on A/F basis
only.

CMP_SC 8120. Structural Bioinformatics of Proteins, Complexes,
System. 3 Credits.
(same as MU Informatics Institute [INFOINST] 8210). Main course
objective is to provide an introduction to the state-of-the-art methods
in structural bioinformatics. The course will cover the methods that are
applied to a wide range of biomolecular objects from protein domains
and small proteins to large biological systems. Graded on A/F basis only.
Prerequisites: MU Informatics Institute [INFOINST]/Computer Science
[CMP_SC] 7010; Computer Science [CMP_SC] 4050/7050 is preferable.

CMP_SC 8130. Computational Genomics. 3 Credits.
(same as MU Informatics Institute [INFOINST] 8310). This course
introduces computational concepts and methods of genomics to students.
The course covers genome structure, database, sequencing, assembly,
amutation, gene and RNA finding, motif and repeats identification, single
nucleotide polymorphism, and epigenomics. Graded on A/F basis only.

**CMP_SC 8150. Integrative Methods in Bioinformatics. 3 Credits.**
(same as MU Informatics Institute [INFOINST] 8150). Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Prerequisite: MU Informatics Institute [INFOINST] / Computer Science [CMP_SC] 7910. Graded on A/F basis only.

**CMP_SC 8160. Content Management in Biomedical Informatics. 3 Credits.**
(same as MU Informatics Institute [INFOINST] 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A/F basis only. Prerequisites: Computer Science [CMP_SC] 7980, MU Informatics Institute [INFOINST] 7910.

**CMP_SC 8180. Machine Learning Methods for Biomedical Informatics. 3 Credits.**

**CMP_SC 8190. Computational Systems Biology. 3 Credits.**
(same as MU Informatics Institute [INFOINST] 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A/F basis only. Prerequisites: MU Informatics Institute [INFOINST] / Computer Science [CMP_SC] 7910; MU Informatics Institute [INFOINST] 8010.

**CMP_SC 8250. Digital Hardware Systems Design. 3 Credits.**
(same as Electrical and Computer Engineering [ECE] 8250). Characteristics and parameters of various hardware subsystems, including main memory, auxiliary memory, arithmetic units, card equipment, etc., and principles of organization into efficient system. Prerequisite: Computer Science [CMP_SC] 4250.

**CMP_SC 8270. Computer Architecture II. 3 Credits.**
Study of array processors, multiprocessors, multicomputers, and networked computing systems. Topics include architectures, interconnection networks, communication mechanisms, distributed memories and security. Introduction to parallel algorithm design. Prerequisites: Computer Science [CMP_SC] 4210 or Electrical and Computer Engineering [ECE] 4210.

**CMP_SC 8320. Software Engineering II. 3 Credits.**
Further discussion of software development methodology. Prerequisite: Computer Science [CMP_SC] 4320.

**CMP_SC 8330. Object Oriented Design II. 3 Credits.**
Software system design using classes and their properties of abstraction, inheritance, dynamic binding, and polymorphism. Focus on object-oriented design of systems such as windows, graphics systems, and operating system. Prerequisite: Computer Science [CMP_SC] 4330.

**CMP_SC 8370. Data Mining and Knowledge Discovery. 3 Credits.**
Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multidimensional database mining, and database mining, and geospatial information mining. Prerequisites: Computer Science [CMP_SC] 7980.

**CMP_SC 8380. Database Management Systems II. 3 Credits.**
Further study in the theory, design, organization and implementation of databases and database management systems. Topics include: high-dimensional database indexing, content-based retrieval from image and video databases, object-relational databases, object-oriented databases, and data mining. Prerequisite: Computer Science [CMP_SC] 7980.

**CMP_SC 8390. Information Indexing and Retrieval. 3 Credits.**
Theory and techniques for the modeling, indexing, and retrieval of text-based and multimedia databases. Topics include introduction to different information retrieval models, retrieval evaluation, query languages, query operations, and indexing/searching methods. Prerequisites: Computer Science [CMP_SC] 2050 and 2110.

**CMP_SC 8410. Theory of Computation II. 3 Credits.**
An advanced study of computational and formal languages by means of automata and related grammars. Turing machines, decidability, computability, computational complexity, language translation, and recent trends in automata theory. Prerequisite: Computer Science [CMP_SC] 7410.

**CMP_SC 8430. Compilers II. 3 Credits.**
Further study of the compilation process. Compiler generation tools, parsing methods, code generation, data-flow analysis, code optimization, error handling, discussion of programming language features and their relationship to the compilation process. Prerequisite: Computer Science [CMP_SC] 7430.

**CMP_SC 8440. Information Security: A Language-Based Approach. 3 Credits.**
This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/promising trends in state-of-the-art computer security. Prerequisites: Computer Science [CMP_SC] 4450/7450.

**CMP_SC 8520. Operating Systems II. 3 Credits.**
Discusses concurrent processes, distributed/network operating systems; models of processor scheduling, memory management and resource allocation, performance measurement, evaluation and simulation methodology; queuing models; security and reliability. Prerequisites: Computer Science [CMP_SC] 4220.

**CMP_SC 8610. Computer Graphics II. 3 Credits.**
Further study of computer graphics, focused on 3-D graphics, transformations, geometric and surface modeling, color models, visible surface determination, lighting and shading, standard graphics software (Phigs/OpenGL). Selected current topics in graphics such as visualization, animation and realism. Prerequisite: Computer Science [CMP_SC] 7610.
CMP_SC 8620. Physically Based Modeling and Animation II. 3 Credits.
This course introduces students to physical based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students. Prerequisites: Computer Science [CMP_SC] 4610/7610.

CMP_SC 8630. Data Visualization. 3 Credits.
Data visualization broadly covers transforming multidimensional and timevarying datasets to dynamic visual representations and encodings that facilitate exploratory data mining, knowledge discovery, improved understanding, summarization, structural modeling, collaboration and decision making using interactive methods. Prerequisites: Computer Science [CMP_SC] 4610/7610 or instructor’s consent. Graduate Standing Required.

CMP_SC 8650. Advanced Image Processing. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8855). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods. Prerequisites: Computer Science [CMP_SC] 4650/7650 or instructor’s consent. Grade on A/F basis only.

CMP_SC 8660. Multimedia Security. 3 Credits.
This course offers a comprehensive coverage of the theoretical foundation of multimedia security technologies, including encryption, authentication, digital watermarking, key management, copy control, fingerprinting/tracing, digital media forensics, and biometrics, provides an in-depth study of the state-of-the-art digital rights management systems and the underlying security technologies. Prerequisites: Computer Science [CMP_SC] 4760 or 4650; graduate standing, instructor’s consent. Graded on A/F basis only.

CMP_SC 8670. Multimedia Communication. 3 Credits.
Topics covered may include multimedia networking and network technologies as pertaining to multimedia communications; multimedia applications such as video conferencing, video-on-demand broadcasting, and web-based distance learning; wireless video and future generation wireless video communication systems. Prerequisite: Computer Science [CMP_SC] 4670 and 4850 or instructor’s consent.

CMP_SC 8690. Computer Vision. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Prerequisite: Electrical and Computer Engineering [ECE] 4655/7655 or Computer Science [CMP_SC] 4650/7650 or instructor’s consent. Graded on A/F basis only.

CMP_SC 8725. Supervised Learning. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Prerequisites: Computer Science [CMP_SC]/Electrical and Computer Engineering [ECE] 4720/7720 graduate standing or instructor’s consent. Graded on A/F basis only.

CMP_SC 8735. Unsupervised Learning. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Prerequisite: Computer Science [CMP_SC] Electrical and Computer Engineering [ECE] 4720/7720 or consent of instructor. Graded on A/F basis only.

CMP_SC 8750. Artificial Intelligence II. 3 Credits.
Further discussion of theories and techniques of artificial intelligence. Investigating state-of-the-art systems with capabilities to perceive, reason, learn and react intelligently to their environment. Prerequisites: Computer Science [CMP_SC] 4750/7750 or instructor’s consent.

CMP_SC 8760. Pattern Recognition. 3 Credits.

CMP_SC 8770. Neural Networks. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8890). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems. Prerequisites: Computer Science [CMP_SC] 4870/7870 or instructor’s consent.

CMP_SC 8790. Filtering, Tracking and Data Fusion. 3 Credits.
This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion. Prerequisites: Computer Science [CMP_SC] 2050, Mathematics [MATH] 2300 or Linear Algebra or Matrix Theory; graduate standing required.

CMP_SC 8850. Computer Networks II. 3 Credits.
In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking. Prerequisite: Computer Science [CMP_SC] 7850.

CMP_SC 8860. Parallel and Distributed Processing. 3 Credits.
This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications. Prerequisites: Computer Science [CMP_SC] 4050.

CMP_SC 8870. Modeling and Management of Uncertainty. 3 Credits.
(same as Electrical and Computer Engineering [ECE] 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Prerequisites: ECE 4870/7870 or CMP_SC 4770/7770 or instructor’s consent. Graduate standing required. Graded on A-F basis only.
Students we may encourage a second four-week elective, Dermatology II. Those considering a career in dermatology may wish to take eight weeks of dermatology, either at our institution or in combination with a rotation away. 1. Dermatology Clinic Outpatient dermatology is an integral and important part of the student’s experience on this rotation. Students participate in the evaluation of patients with skin disease at the University Hospital, the Harry S Truman Veterans Hospital and the Ellis Fischel Cancer Center. 2. Dermatology Inpatient and Consultation Service: On the dermatology inpatient and consultation service, students may participate in the evaluation and management of patients with complex, often serious, dermatologic conditions under the supervision of the dermatology ward resident, the dermatology chief resident and the attending physician. 3. Dermatology Unknowns Conferences: these conferences feature a "show and tell" slide format. A divisional slide show conference is held once weekly, and a separate student-oriented slide show is also held once weekly. Students attend both. A wide variety of dermatologic disorders are reviewed with emphasis on scholarly knowledge of the diseases. 4. Recommended Text: American Academy of Dermatology Student Core Curriculum website, www.aad.org/education/titlepage.htm Dermatology for the House Officer by Peter J. Lynch Color Atlas and Synopsis of Clinical Dermatology by T.B. Fitzpatrick 5. Dermatology Learning Center: The Department of Dermatology maintains a large file of slides illustrating a wide variety of dermatologic conditions. In addition, each student is given a CD to be used while on the rotation. Also, pertinent articles and texts are available for the student’s perusal.

DERMATOLOGY (DERM)

**DERM 6233. ABS Dermatology Research. 5 Credits.** ABS Dermatology Research.

**DERM 6235. ABS Dermatology Research and Review. 5-10 Credit.** ABS Dermatology Research and Review.

**DERM 6450. Dermatology I. 5 Credits.** Prerequisites: Internal Medicine Clerkship. Goals/Objectives: The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Evaluations: Students are evaluated using a standard evaluation. The student's knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences. A slide (Kodachrome) practical and written examination at the end of the block will be administered at UMC on the last day of the block. Material covered is from the student slide set given in CD format, the AAD Core Curriculum website (www.aad.org/education/titlepage.htm), weekly student lectures, and Unknovns Conference. Notes: CURRICULUM: This four-week rotation consists of participation in the various dermatology clinics, attendance at conferences, use of the self-learning facilities in the learning center, and participation in the consultation process. Most students have concluded that four weeks of dermatology are quite valuable. For select students we may encourage a second four-week elective, Dermatology II. Those considering a career in dermatology may wish to take eight weeks of dermatology, either at our institution or in combination with a rotation away. 1. Dermatology Clinic Outpatient dermatology is an integral and important part of the student’s experience on this rotation. Students participate in the evaluation of patients with skin disease at the University Hospital, the Harry S Truman Veterans Hospital and the Ellis Fischel Cancer Center. 2. Dermatology Inpatient and Consultation Service: On the dermatology inpatient and consultation service, students may participate in the evaluation and management of patients with complex, often serious, dermatologic conditions under the supervision of the dermatology ward resident, the dermatology chief resident and the attending physician. 3. Dermatology Unknowns Conferences: these conferences feature a “show and tell” slide format. A divisional slide show conference is held once weekly, and a separate student-oriented slide show is also held once weekly. Students attend both. A wide variety of dermatologic disorders are reviewed with emphasis on scholarly knowledge of the diseases. 4. Recommended Text: American Academy of Dermatology Student Core Curriculum website, www.aad.org/education/titlepage.htm Dermatology for the House Officer by Peter J. Lynch Color Atlas and Synopsis of Clinical Dermatology by T.B. Fitzpatrick 5. Dermatology Learning Center: The Department of Dermatology maintains a large file of slides illustrating a wide variety of dermatologic conditions. In addition, each student is given a CD to be used while on the rotation. Also, pertinent articles and texts are available for the student’s perusal. Student lectures, based on the Lynch text, are available for your review at any time. Evaluations: Students are evaluated using a
standard evaluation form. The student’s knowledge of subject matter is evaluated in the following settings: Informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences. A slide (Kodachrome) practical and written examination at the end of the block will be administered at UMC on the last day of the block. Material covered is from the student slide set given in CD format, student lectures and the AAD Core Curriculum website. Contact the UMC dermatology office at 882-8578 for time and location of exam. Final grades will be determined in the following manner: Grade H - Requires outstanding clinical performance and a score of 90 or better on the final exam. Grade L - Requires superior clinical performance and a score of 80 or better on the final exam. Grade P - Requires satisfactory clinical performance and a score of 70 or better on the final exam. Notes: This Mid-Missouri AHEC-affiliated rotation is in Rolla, Missouri, a town of 17,000 in the south central Missouri Ozarks. This two physician practice is located near Phelps County Regional Medical Center, a 258-bed, multiple-service hospital including surgery, an emergency room, obstetrical deliveries and general medical and pediatric patients. Students may also see patients in the hospital’s emergency room and at nursing homes.

**DERM 6856. Dermatology II. 5 Credits.**
Prerequisites: Successful completion of Dermatology I and consent from Course Director. Goals/Objectives: This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum, Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep. Evaluations: Students are evaluated using a standard evaluation. Dermatology II students will not have a written examination. They will be required to present a brief presentation (30 minutes) on a dermatologic topic of their choice. Notes: CURRICULUM: Clinic, inpatient, and conference involvement as in Dermatology I will be supplemented by a greater degree of involvement in patient care and responsibility. Derm II students will have the opportunity to focus on a specialized area of dermatology should they wish, such as dermatopathology, cutaneous micrographic surgery, or phototherapy. A research project may be initiated during this block at the discretion of the student and a faculty mentor. 

**Diagnostic Medical Ultrasound (DMU)**

**DMU 1000. Introduction to Diagnostic Medical Ultrasound. 1 Credit.**
Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

**DMU 4001. Topics in Diagnostic Medical Ultrasound. 1-99 Credit.**
Organized study of selected topics in medical ultrasound. Topics may vary. Graded on A/F basis only. May be repeated for credit. Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students; program director’s consent.

**DMU 4085. Problems in Diagnostic Medical Ultrasound. 1-99 Credit.**
Independent study leading to a special project or paper. Graded on A/ F basis only. May be repeated for credit. Prerequisites: restricted to Diagnostic Medical Ultrasound undergraduate students only; program director’s consent.

**DMU 4200. Principles of Diagnostic Medical Ultrasound. 3 Credits.**
Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care. Prerequisites: departmental consent.

**DMU 4234. Clinical Pathophysiology. 3 Credits.**
Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

**DMU 4309. Normal Ultrasound Clinical. 5 Credits.**
Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4313 and 4315; instructor’s consent.

**DMU 4311. Pathological Images of Ultrasound. 3 Credits.**
Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4200, 4312 and 4315; instructor’s consent.

**DMU 4312. Sectional Anatomy. 3 Credits.**
(same as Radiological Science [RA_SCI] 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Prerequisite: instructor’s consent.

**DMU 4313. Ultrasound Physics. 3 Credits.**

**DMU 4314. Abdominal Ultrasound. 5 Credits.**
Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4309 and 4311; instructor’s consent.

**DMU 4315. Ultrasound Instrumentation. 3 Credits.**
Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety. Prerequisite: Diagnostic Medical Ultrasound [DMU] 4200; instructor’s consent.

**DMU 4318. Gynecology Ultrasound. 3 Credits.**
DMU 4320. Obstetrics Ultrasound. 3 Credits.
Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4309 and 4311; instructor’s consent.

DMU 4322. Superficial Organs Ultrasound. 3 Credits.
Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4309 and 4311; instructor’s consent.

DMU 4325. Ultrasound Clinical Pharmacology and Contrast Agents. 3 Credits.
Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in Diagnostic Medical Ultrasound and their pharmacodynamics.

DMU 4326. Vascular Ultrasound Physics, Instrumentation and Hemodynamics. 3 Credits.
Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4313 and 4315; instructor’s consent.

DMU 4330. Vascular Ultrasound Lab. 3 Credits.
Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting. Prerequisite: Diagnostic Medical Ultrasound [DMU] 4312, and 4326; instructor’s consent.

DMU 4332. Vascular Ultrasound. 4 Credits.
Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients’ clinical data and ultrasound findings used in differential diagnosis. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4311, 4322, and 4326 or instructor’s consent.

DMU 4338. Cardiac Ultrasound, Principles and Hemodynamics. 3 Credits.
Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryo logic, evaluation methods and hemodynamics. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4313, 4315, instructor’s consent. Graded on A/F basis only.

DMU 4342. Adult Cardiac Ultrasound. 5 Credits.
Provides principles of diagnostic adult cardiac ultrasound in relation to pathology, further presenting the practical aspects of scanning techniques, exam critique, patient care in relation to cardiac US exams. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4313, 4315 and 4338. Instructor’s permission required. Graded A-F only.

DMU 4941. Ultrasound Clinical I. 7 Credits.
Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4312, 4309 and 4311 and instructor’s consent.

DMU 4943. Ultrasound Clinical III. 6 Credits.
Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies. Prerequisite: Diagnostic Medical Ultrasound [DMU] 4993 and instructor’s consent.

DMU 4944. Vascular Ultrasound Clinical IV. 7 Credits.
Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing. Prerequisite: Diagnostic Medical Ultrasound [DMU] 4326 and instructor’s consent.

DMU 4945. Cardiac Ultrasound Clinical V. 6 Credits.
Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4313, 4315, 4944. Instructor and Departmental permission required. Graded A-F only.

DMU 4946. Cardiac Ultrasound Clinical VI. 6 Credits.
Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical diagnosis, patient handling and image processing. Prerequisite: Diagnostic Medical Ultrasound [DMU] 4941; instructor’s consent.

DMU 7200. Diagnostic Medical Ultrasound Principles and Patient Care. 3 Credits.
Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Prerequisites: Diagnostic Medical Ultrasound [DMU] 1000; graduate standing and instructor’s consent. Graded A-F basis only.

DMU 7234. Clinical Pathophysiology. 3 Credits.
(same as Physical Therapy [PH_THR] 7270). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.

DMU 7309. Normal Ultrasound Clinical. 5 Credits.
Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7313 and 7315; instructor’s consent.

DMU 7311. Pathological Images Ultrasound. 3 Credits.
Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 4200, 7312 and 7315; instructor’s consent.

DMU 7312. Sectional Anatomy. 3 Credits.
(same as Radiological Science [RA_SCI] 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Prerequisite: graduate standing and instructor’s consent.

DMU 7313. Ultrasound Physics. 3 Credits.
Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics. Prerequisites: graduate standing and Mathematics [MATH] 1100, Chemistry [CHEM] 1100 or 1320, Physics [PHYSCS] 1210, and departmental consent.
DMU 7314. Abdominal Ultrasound. 5 Credits.
Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311; instructor’s consent.

DMU 7315. Ultrasonography Instrumentation. 3 Credits.
Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety. Prerequisite: graduate standing and Diagnostic Medical Ultrasound [DMU] 4200; instructor’s consent.

DMU 7318. Gynecology Ultrasound. 3 Credits.
Study of normal and abnormal gynecological ultrasound anatomy. Distinction between normal and pathological states and ultrasound differential diagnosis. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311.

DMU 7320. Obstetrics Ultrasound. 3 Credits.
Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311; instructor’s consent.

DMU 7322. Superficial Organs Ultrasound. 3 Credits.
Ultrasound evaluation and diagnosis of normal and abnormal superficial organs; thyroid gland, testes, breasts, soft tissues and musculoskeletal. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311; instructor’s consent.

DMU 7325. Ultrasound Clinical Pharmacology and Contrast Agents. 3 Credits.
Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics. Prerequisite: graduate standing.

DMU 7326. Vascular Ultrasound Physics, Instrumentation and Hemodynamics. 3 Credits.
Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7309 and 7311; instructor’s consent.

DMU 7330. Vascular Ultrasound Lab. 3 Credits.
Vascular ultrasound scanning techniques, protocols, measurements, film/video critique, and Plethysmography in a clinical lab setting. Prerequisite: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311; instructor’s consent.

DMU 7332. Vascular Ultrasound. 4 Credits.
Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients’ clinical data and ultrasound findings used in differential diagnosis. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7311, 7322, and 7326 or instructor’s consent.

DMU 7338. Cardiac Ultrasound, Principles and Hemodynamics. 3 Credits.
Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embolography, evaluation methods and hemodynamics. Prerequisites: Diagnostic Medical Ultrasound [DMU] 4313, 4315, instructor’s consent. Graded on A/F basis only.

DMU 7342. Adult Cardiac Ultrasound. 5 Credits.
Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients’ clinical data and ultrasound findings. Prerequisites: Diagnostic Medical Ultrasound [DMU] 7312, 7313 and 7315 and instructor’s consent.

DMU 7941. Ultrasound Clinical I. 7 Credits.
Application of medical ultrasound in supervised clinical settings. Decisions regarding diagnosis, patient handling and imaging. Prerequisites: graduate standing and Diagnostic Medical Ultrasound [DMU] 7312, 7309 and 7311 and instructor’s consent.

DMU 7943. Ultrasound Clinical III. 6 Credits.
Final clinical application of general medical ultrasound practical in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing. Prerequisite: Diagnostic Medical Ultrasound [DMU] 7993 and instructor’s consent.

DMU 7944. Vascular Ultrasound Clinical IV. 7 Credits.
Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing. Prerequisite: Diagnostic Medical Ultrasound [DMU] 7326 and instructor’s consent.

DMU 7945. Cardiac Ultrasound Clinical V. 6 Credits.
Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing. Prerequisites: Diagnostic Medical Ultrasound [DMU] 7313 and 7315 and instructor’s consent.

DMU 7946. Cardiac Ultrasound Clinical VI. 6 Credits.
Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing. Prerequisite: Diagnostic Medical Ultrasound [DMU] 7945.

DMU 7993. Ultrasound Clinical II. 8 Credits.
Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and image processing. Prerequisite: graduate standing and Diagnostic Medical Ultrasound [DMU] 7941; instructor’s consent.

DMU 8001. Topics in Diagnostic Medical Ultrasound. 1-3 Credit.
Organized study of selected topics. Topic may vary. Prerequisite: restricted to students enrolled in the DMU program only.

DMU 8050. Research in Diagnostic Medical Ultrasound. 1-99 Credit.
Research not leading to a thesis or dissertation. Graded on an A/F basis only. Prerequisite: restricted to students enrolled in the DMU program only.

DMU 8085. Problems in Diagnostic Medical Ultrasound. 1-99 Credit.
Independent study of a special project involving clinical applications or research. Topic may vary. Prerequisite: restricted to students enrolled in the DMU program only.

DMU 8090. Research in Diagnostic Medical Ultrasound. 1-99 Credit.
Research leading to a thesis or dissertation. Graded on an S/U basis only. Prerequisite: restricted to students enrolled in the DMU program only.

DMU 8346. Pediatric Cardiac Ultrasound. 4 Credits.
Study of pediatric cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation
of patients' clinical data and ultrasound findings. Prerequisite: Diagnostic Medical Ultrasound [DMU] 7342 and instructor's consent.

DMU 8947. Applied Clinical Research & Practicum. 5-8 Credit.
Clinical research application of cardiovascular & general ultrasound in clinical environment: clinical research, practicum, decision making, patient handling, and image processing. Prerequisites: Diagnostic Medical Ultrasound [DMU] 7944, 7946, instructor's consent. Graded on A/ F basis.

Economics (ECONOM)

ECONOM 1014. Principles of Microeconomics. 3 Credits.
A basic examination of the economy at the individual consumer, firm and market level. Simple economic models used to analyze the workings of the economy. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, the importance of free trade, the markets response to economic shocks and the effect of government intervention. Not open to students who have completed Economics [ECONOM] 1024, 1051, or Agricultural Economics [AG_EC] 1041.

ECONOM 1015. Principles of Macroeconomics. 3 Credits.
Macroeconomics generally refers to a collection of questions about how scarcity affects a collection of people interacting with one another. In this course, our focus is on understanding how scarcity affects welfare of a nation. Topics include Gross Domestic Product, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, and exchange rates. Not open to students who have completed Economics [ECONOM] 1051 or Agricultural Economics [AG_EC] 1042. Prerequisites: Economics [ECONOM] 1014 or 1024.

ECONOM 1024. Fundamentals of Microeconomics. 3 Credits.
This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed Economics [ECONOM] 1014, 1051, or Agricultural Economics [AG_EC] 1041. Prerequisite: Mathematics [MATH] 1100/1120 or equivalent with grade of C or better. Math Reasoning Proficiency Course.

ECONOM 1051. General Economics. 5 Credits.
One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and, ECONOM 1015 Math Reasoning Proficiency Course. Prerequisites: Honors eligibility required.

ECONOM 2004. Undergraduate Topics in Economics - Social Science. 1-3 Credit.
Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ECONOM 3004. Topics in Economics - Social Science. 1-3 Credit.
Study in applied or theoretical economics; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ECONOM 3224. Introduction to International Economics. 3 Credits.
A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration. Prerequisite: Economics [ECONOM] 1014 or 1024 or 1051.

ECONOM 3229. Money, Banking and Financial Markets. 3 Credits.
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Prerequisites: Economics [ECONOM] 1014 or 1024 and 1015, or 1051.

ECONOM 3229H. Money, Banking and Financial Markets - Honors. 3 Credits.
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets. Prerequisites: Economics [ECONOM] 1014 or 1024 and 1015, or 1051. Honors eligibility required.

ECONOM 3251. Theory of the Firm. 3 Credits.
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed Economics [ECONOM] 4351. Prerequisites: Economics [ECONOM] 1014 or 1024 or 1051, and Mathematics [MATH] 1400, or equivalent. Not open to economics majors.

ECONOM 3323. Capitalism, Democracy and Society. 1 Credit.
This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences. Prerequisites: Economics [ECONOM] 1014 and 1015, or 1051.

ECONOM 4004. Topics in Economics- Social Science. 1-3 Credit.
Study in applied or theoretical economics; covers subjects not included in regularly offered courses. Prerequisite: instructor's consent.

ECONOM 4311. Labor Economics. 3 Credits.
Surveys theoretical explanations of wage and employment determination in contemporary labor markets. Prerequisite: Economics [ECONOM] 3251 or 4351.
ECONOM 4315. Public Economics. 3 Credits.
Analyses economic effects of government expenditures, taxes and debt, expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy. Prerequisite: Economics [ECONOM] 3251 or 4351.

ECONOM 4320. History of Economic Thought. 3 Credits.
Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought. Prerequisites: Economics [ECONOM] 1014 or 1024 and 1015, or 1051.

ECONOM 4322. Economics of Regulation and Antitrust. 3 Credits.
Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries. Prerequisite: Economics [ECONOM] 3251 or 4351.

ECONOM 4325. The International Monetary System. 3 Credits.
Study of macroeconomic and monetary relationships between the U.S. and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system. Prerequisite: Economics [ECONOM] 3229.

ECONOM 4326. Economics of International Trade. 3 Credits.
The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth. Prerequisite: Economics [ECONOM] 3251 or 4351.

ECONOM 4329. The Banking System and the Money Market. 3 Credits.
Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation. Prerequisite: Economics [ECONOM] 1015 or 1051.

ECONOM 4340. Introduction to Game Theory. 3 Credits.
An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications. Prerequisite: Economics [ECONOM] 3251 or 4351.

ECONOM 4345. Economics of Education. 3 Credits.
Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access. Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051, and STAT 2500, or equivalent.

ECONOM 4351. Intermediate Microeconomics. 3 Credits.
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251. Prerequisites: Economics [ECONOM] 1014 or 1024 or 1051, and Mathematics [MATH] 1400, or equivalent. Honors eligibility required.

ECONOM 4353. Intermediate Macroeconomics. 3 Credits.
The study of the structure and performance of national economies. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance. Prerequisites: Economics [ECONOM] 1015 or 1051, and Mathematics [MATH] 1400, or equivalent.

ECONOM 4355. Industrial Organization and Competitive Strategy. 3 Credits.
Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit. Prerequisite: ECONOM 3251 or ECONOM 4351.

ECONOM 4357. Health Economics. 3 Credits.
Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform. Prerequisite: ECONOM 3251 or 4351 and STAT 2500, or equivalent.

ECONOM 4360. Economic Development. 3 Credits.
(same as PEA_ST 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed. Prerequisites: ECONOM 3229, and ECONOM 3251 or ECONOM 4351.

ECONOM 4361. Comparative Economic Systems. 3 Credits.
Study of capitalism, market socialism, and central planning. Prerequisites: Economics [ECONOM] 3229, and 3251 or 4351.

ECONOM 4367. Law and Economics. 3 Credits.
This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary. Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent.

ECONOM 4370. Quantitative Economics. 3 Credits.
The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization. Prerequisite: Mathematics [MATH] 1500 or equivalent.

ECONOM 4371. Introductory Econometrics. 3 Credits.
Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models. Prerequisites: ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent.
ECONOM 4384. Structural Change in Economic History. 3 Credits.
Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory. Prerequisite: Economics [ECONOM] 1014 or 1024 and 1015, or 1051.

ECONOM 4385. Problems in Economics. 1-3 Credit.
Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor. Prerequisites: Economics [ECONOM] 4351, 4371, and instructor's consent. Not open to non-majors.

ECONOM 4940. Internship in Economics. 3 Credits.
Internship experience for Economics majors. 120 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only. Prerequisites: ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall MU GPA of 2.75 and have junior or senior standing. Students must have completed at least 15 credit hours at MU.

ECONOM 4945. Independent Study in Economics. 1-3 Credit.
Individual work, with conferences adjusted to needs of student. Prerequisite: instructor's consent.

ECONOM 4950. Senior Seminar in Economics. 3 Credits.
Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

ECONOM 4971. Supplemental Senior Seminar in Economics. 1 Credit.
Content description is the same as Economics [ECONOM] 4970. Required for Economics honors students and double majors in Economics who take a capstone course in another major. No credit for students who have completed Economics [ECONOM] 4970. Not open to non-majors. Graded on A/F basis only.

ECONOM 4995. Honors Proseminar. 3 Credits.
Seminar for graduating seniors. This capstone course integrates previous economics courses by applying economic theories to problems. Students acquire an understanding of what research in economics can produce and how to produce those results. Course requirements are to produce a list of distinctive activities that count as research and produce a research paper. Multiple writing assignments will emphasize synthesis of theoretical, empirical and institutional economics. No credit for students who have completed Economics [ECONOM] 4970. Not open to non-majors. Graded on A/F basis only.

ECONOM 7001. Topics in Economics - General. 1-99 Credit.
Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester. Prerequisites: graduate standing; instructor's consent.

ECONOM 7085. Problems in Economics. 1-99 Credit.
Individual study in Economics. Prerequisite: Graduate standing and instructor's consent.

ECONOM 7311. Labor Economics. 3 Credits.
Surveys theoretical explanations of wage and employment determination in contemporary labor markets. Prerequisite: Economics [ECONOM] 3251 or 7351. Graduate standing required.

ECONOM 7315. Public Economics. 3 Credits.
Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy. Prerequisite: Economics [ECONOM] 3251 or 4351. Graduate standing required.

ECONOM 7320. History of Economic Thought. 3 Credits.
Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought. Prerequisites: Economics [ECONOM] 1014 or 1024 and 1015 or 1051H. Graduate standing required.

ECONOM 7322. Economics of Regulation and Antitrust. 3 Credits.
Economic issues concerning the role of government regulation. The course examines the rationale for and effects of regulatory policies in public utilities, transportation, and communications industries. Prerequisite: Economics [ECONOM] 3251 or 7351. Graduate standing required.

ECONOM 7325. The International Monetary System. 3 Credits.
Study of macroeconomic and monetary relationships between the US and the world. Topics include balance of payments, foreign exchange rates, history of the international monetary system. Prerequisite: Economics [ECONOM] 3229. Graduate standing required.

ECONOM 7326. Economics of International Trade. 3 Credits.
The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC’s and the trade effects of economic growth. Prerequisite: Economics [ECONOM] 7351 or instructor's consent. Graduate standing required.

ECONOM 7329. The Banking System and the Money Market. 3 Credits.
Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation. Prerequisite: Economics [ECONOM] 1051 or 1015.

ECONOM 7332. Microeconomics for Managers. 3 Credits.
Microeconomic concepts presented at the intermediate level, graphic treatment with limited calculus, managerial issues presented at the MBA level. Prerequisites: Economics [ECONOM] 1014 or 1024, Mathematics [MATH] 1300. Graduate standing required. (Not open to economics majors) must have a consent card for MBA program.

ECONOM 7340. Introduction to Game Theory. 3 Credits.
An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications. Prerequisite: Economics [ECONOM] 3251 or 7351 or instructor's consent. Graduate standing required.

ECONOM 7345. Economics of Education. 3 Credits.
Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access. Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051H and ECONOM 4371 or equivalent.

ECONOM 7351. Intermediate Microeconomics. 3 Credits.
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibrium in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare
economics is provided. Calculus is employed. No credit for students who have completed 3251. Prerequisites: Economics [ECONOM] 1014 or 1024 or 1051H and Mathematics [MATH] 1320 or equivalent. Graduate standing required.

ECONOM 7353. Intermediate Macroeconomics. 3 Credits.
The study of the structure and performance of national economies. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance. Prerequisites: Economics [ECONOM] 1015 or 1051 and Mathematics [MATH] 1400 or equivalent.

ECONOM 7355. Industrial Organization and Competitive Strategy. 3 Credits.
Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit. Prerequisites: Economics [ECONOM] 3251 or Economics [ECONOM] 7351. Graduate standing required.

ECONOM 7357. Health Economics. 3 Credits.
(same as Public Affairs [PUB_AF] 7357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine; and examination of recent proposals and initiatives for health care reform. Prerequisite: Statistics [STAT] 2500 and Economics [ECONOM] 4351.

ECONOM 7360. Economic Development. 3 Credits.
(same as Peace Studies [PEA_ST] 4360). The study of less-developed countries including problems of measuring economic growth, analysis of sources of economic growth, causes of changes in economic and structure, development and trade policies. The consequences of goals and assumptions for development policy are analyzed. Prerequisite: Economics [ECONOM] 3229 and 3251 or 4351; graduate standing required.

ECONOM 7361. Comparative Economic Systems. 3 Credits.
Study of capitalism, market socialism, and central planning. Prerequisites: Economics [ECONOM] 3229 and 3251 or 4351. Graduate standing.

ECONOM 7367. Law and Economics. 3 Credits.
(same as Public Affairs [PUB_AF] 7367). This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomic, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime and the judiciary. Prerequisites: Economics [ECONOM] 4351 or 3251, and Statistics [STAT] 2500, or equivalent.

ECONOM 7370. Quantitative Economics. 3 Credits.
The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization. Prerequisite: Mathematics [MATH] 1500 or equivalent. Graduate standing required.

ECONOM 7371. Introductory Econometrics. 3 Credits.
Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models. Prerequisites: Economics [ECONOM] 3251 or 4351 and Statistics [STAT] 1320 and Mathematics [MATH] 1320 or instructor’s consent. Graduate standing required.

ECONOM 7384. Structural Change in Economic History. 3 Credits.
Explores changes in the structure of the American economy from its earliest colonial beginnings. Structural change, an integral part of growth, is related to technical change, population growth and to the content and form of economic theory. Prerequisite: Economics [ECONOM] 1014 or 1024 and 1015, or 1051H or instructor’s consent. Graduate standing required.

ECONOM 8001. Topics in Economics- General. 3 Credits.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisite: instructor’s consent.

ECONOM 8085. Problems in Economics. 1-99 Credit.
Graduate students may select topics for study and investigation subject to approval by supervising faculty.

ECONOM 8090. Research in Economics. 1-99 Credit.
Thesis research for M.A. degree. Graded on a S/U basis only.

ECONOM 8340. Game Theory. 3 Credits.
Game theory is the study of strategic behavior by agents who perceive themselves as "large" relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. Prerequisites: Economics [ECONOM] 4351 or equivalent; Mathematics [MATH] 1320 or equivalent; graduate standing. May be repeated for credit. Graded on A-F basis only.

ECONOM 8370. Mathematics for Economics. 3 Credits.
The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. Prerequisites: Economics [ECONOM] 4351 or equivalent; Mathematics [MATH] 1320 or equivalent; graduate standing. May be repeated for credit. Graded on A-F basis only.

ECONOM 8413. Research Workshop I. 3 Credits.
Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper is required. Prerequisite: Economics [ECONOM] 8451, 8453, and 8472 or instructor’s consent.

ECONOM 8451. Microeconomic Theory. 3 Credits.
MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption, production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare. Prerequisites: Graduate standing or instructors consent.

ECONOM 8453. Macroeconomic Theory. 3 Credits.
Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics. Prerequisites: Economics [ECONOM] 4353 or equivalent; at least concurrent enrollment in 8451. Graduate standing required or instructor’s consent.

ECONOM 8470. Dynamic Optimization. 3 Credits.
Topics to be covered include calculus of variations, optimal control theory, dynamic programming in discrete time variables, and economic modeling. The Euleess Equation, the Transversally Condition and
The working and structure of institutional arrangements, welfare aspects

ECONOM 9430. Advanced Money and Banking. 3 Credits.
Consent; graduate standing. Graded on A/F basis only.
Prerequisites: Economics [ECONOM] 9452 or instructor's consent.
The course will cover recent research in International Trade and
Development. Topics include the relationship between trade and growth,
and the impact of international trade on firms, households and economic
growth. Prerequisites: Economics [ECONOM] 9452 or instructor's consent.

ECONOM 9411. Advanced Labor Economics I. 3 Credits.
The theory of rational behavior and partial equilibrium in markets.
Topics include consumer behavior, theory of the firm, decisions making
under uncertainty, perfect competition, monopoly and monopsony, and
imperfect competition. Prerequisites: Economics [ECONOM] 9451 or
instructor's consent.

ECONOM 9412. Advanced Labor Economics II. 3 Credits.
Applications of contemporary analytical techniques to labor market topics
chosen by the instructor. Prerequisites: Economics [ECONOM] 9411 and
9452 or instructor's consent.

ECONOM 9413. Research Workshop II. 1-2 Credit.
Introduces doctoral students to practices of preparing scholarly economic
research by moving through the process of selecting a topic, identifying
relevant literature, and communicating results. Prerequisites: Economics
[ECONOM] 9452 or instructor's consent.

ECONOM 9414. Advanced Public Economics I. 3 Credits.
Tax incidence and optimal taxation in static economies and issues of
taxation in dynamic economies. Prerequisites: Economics [ECONOM] 9411 and
9452 or instructor's consent.

ECONOM 9415. Advanced Public Economics II. 3 Credits.
Macroeconomic issues of government finance. Theoretical and empirical
analysis of Ricardian equivalence. Prerequisite: Economics [ECONOM] 9452 or
instructor's consent.

ECONOM 9426. International Trade. 3 Credits.
Pure theory of international trade and commercial policy. Prerequisite:
Economics [ECONOM] 9452 or instructor's consent.

ECONOM 9427. Topics in International Trade. 3 Credits.
The course will cover recent research in International Trade and
important issues related to the impact of trade on economic growth and
development. Topics include the relationship between trade and growth,
the impact of international trade on firms, households and economic
growth. Prerequisites: Economics [ECONOM] 9452 or instructor's consent.

ECONOM 9430. Advanced Money and Banking. 3 Credits.
The working and structure of institutional arrangements, welfare aspects
of structural policies, operation of money and credit markets, and
behavior of returns on assets. Prerequisites: Economics [ECONOM] 9452 or
instructor's consent.

ECONOM 9431. Central Banking Policies. 3 Credits.
Examines central banking procedures, policies and the role they play
in maintaining economic stability. Special attention to connection of
Federal Reserve System with money and capital markets. Prerequisites:
Economics [ECONOM] 9452 or instructor's consent.

ECONOM 9446. Advanced Empirical Methods. 3 Credits.
Empirical and modeling techniques for evaluation of microeconomic
policy questions. Prerequisites: Economics [ECONOM] 8451, 8472,
concurrent enrollment in 8473 or 9473 strongly recommended; graduate
standing.

ECONOM 9473. Applied Econometrics. 3 Credits.
Continuation of Economics [ECONOM] 8472 for MA students. Topics
include: simultaneous equations, nonlinear least squares, qualitative
choice. Prerequisites: Economics [ECONOM] 8472 or instructor's
consent; graduate standing. Graded on A/F basis only.

ECONOM 9001. Topics in Economics. 3 Credits.
Selected current topics in economics. Prerequisite: graduate standing.

ECONOM 9085. Problems in Economics. 1-99 Credit.
Graduate students may select topics for study and investigation subject
to approval by supervising faculty.

ECONOM 9090. Research in Economics. 1-99 Credit.
Thesis research for Ph.D. degree. Graded on a S/U basis only.

ECONOM 9111. Advanced Macroeconomic Theory I. 3 Credits.
Stability and growth. Prerequisite: departmental consent; PhD
standing.

ECONOM 9130. Advanced Money and Banking. 3 Credits.
The working and structure of institutional arrangements, welfare aspects
of structural policies, operation of money and credit markets, and
ECONOM 9473. Econometric Methods II. 3 Credits.
Introduces students to econometric concepts and techniques at a theoretical level, and provides a bridge to understanding the econometric literature. Topics include: probability theory, convergence, simultaneous equations, nonlinear models, and nonparametric estimation. Prerequisite: Departmental consent.

ECONOM 9474. Econometric Methods III. 3 Credits.
This course is designed to familiarize students with useful econometric tools not covered in Econometric Methods I and II. Prerequisite: Economics [ECONOM] 9473 or instructor’s consent; PhD standing. Graded on A/F basis only.

ECONOM 9476. Advanced Topics in Econometrics I. 3 Credits.
Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor. Prerequisite: Economics [ECONOM] 9474 or instructor’s consent.

ECONOM 9477. Advanced Topics in Econometrics II. 3 Credits.
Equips students with some essential tools for conducting publishable econometric research topics at the discretion of the instructor. Prerequisite: Economics [ECONOM] 9476 or instructor’s consent.

ECONOM 9480. Independent Readings for Ph.D. Comprehensive Examinations. 1-6 Credit.
Independent Readings for Ph.D. Comprehensive Exam. Graded on S/U basis only.

ECONOM 9484. Economic History. 3 Credits.
Techniques of the new economic history are explored in the context of European economic development. Prerequisites: Economics [ECONOM] 8451.

Education Honors (EDUC_H)

EDUC_H 3050H. Special Readings in Education Honors. 1-4 Credit.
Directed study of literature and research reports in education. Prerequisites: instructor’s consent and Honors program director.

EDUC_H 3060H. Honors Seminar in Education Honors. 1-2 Credit.
Prerequisites: instructor’s consent and Honors program director.

EDUC_H 3070H. Special Practicum in Education Honors. 1-4 Credit.
Directed practicum experience with students in educational settings. Prerequisites: instructor’s consent and Honors program director.

EDUC_H 3080H. Honors Research in Education Honors. 1-4 Credit.
Joint research in education with a member of the education faculty. Prerequisites: instructor’s consent and Honors program director.

EDUC_H 4996H. Undergraduate Reading Honors. 3 Credits.
This course is designed to introduce students to a variety of readings from a broad array of research, historical, contemporary and philosophical documents and writings. Selection of topics and additional readings are determined by the faculty instructor for the course. Graded on A/F basis only. Prerequisites: instructor’s consent; GPA of 3.5 or higher.

EDUC_H 4997H. Honors Undergraduate Seminar I. 1 Credit.
This class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The cumulating assignment for the class is a proposal for a research poster or presentation to be presented at the undergraduate research fair held each year in May. Graded on A/F basis only. Prerequisites: instructor’s consent; GPA of 3.5 or higher.

EDUC_H 4998H. Honors Undergraduate Seminar II. 1 Credit.
The class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The cumulating assignment for the class is the production of a research poster or presentation at the undergraduate research fair held each year in May. Graded on A/F basis only. Prerequisites: instructor’s consent; GPA of 3.5 or higher.

EDUC_H 4999H. Honors Undergraduate Research Seminar. 1-2 Credit.
This class will be offered over 2 academic semesters and will consist of a 1-2 credit hour lab each semester with a College of Education faculty member working on an undergraduate research project. This course is designed as part of the Honors sequence and is designed to be taken concurrently with Teacher Development Program [TDP] 4997H and 4998H. Graded on A/F only. Prerequisite: instructor’s consent; GPA of 3.5 or higher.

Educational Leadership and Policy Analysis (ED_LPA)

ED_LPA 3100. Foundations of Education. 1-3 Credit.
Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.

ED_LPA 4060. Inquiring into Schools, Community and Society II. 3 Credits.
Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: Learning, Teaching and Curriculum [LTC] 2040/7040.

ED_LPA 7060. Inquiring into Schools, Community and Society II. 3 Credits.
Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: Teacher Development Program [TDP] 2040; 7040.

Problems in Educational Leadership and Policy Analysis.

ED_LPA 7301. Topics in Educational Leadership and Policy Analysis. 1-99 Credit.
Group study of topics in educational leadership, policy analysis, and higher and continuing education.

ED_LPA 7458. Sociology of Education. 3 Credits.
(same as Sociology [SOCIOL] 4410/7410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy. Prerequisite: Sociology [SOCIOL] 1000 or equivalent.
ED_LPA 7822. College Teaching with Technology I. 1 Credit.  
(same as Information Science and Learning Technologies [IS_LT] 7822).  
Examines the use of educational technologies, both class room based  
(e.g., student response systems) and online (e.g., course management’s  
systems), to assist in the dissemination of course resources and the  
facilitation of student interaction.

ED_LPA 7823. College Teaching with Technology II. 1 Credit.  
(same as Information Science and Learning Technologies [IS_LT] 7823).  
Integrates learning technologies into the traditional framework of a face-  
to-face course by creating a course website and developing technical  
proficiency with relevant educational technologies. Prerequisite: College  
Teaching I or instructor’s consultation.

ED_LPA 8409. Learning, Curriculum and Assessment for School  
Leaders. 3 Credits.  
Addresses assessment, learning and curriculum and the integration of  
the instructional and assessment processes. Topics include authentic  
assessment, curriculum alignment, cognition and learning, instructional  
approaches, and application of student learning theory to the curriculum.

ED_LPA 8410. Learning Cultures. 3 Credits.  
Integrates the themes of building a common purpose to enhance school  
culture, empowering teachers and students, and diversity. Topics include  
importance of shared mission and vision, the use of group processes  
and collaboration, the intricacies of school culture, and ethical and moral  
leadership.

ED_LPA 8411. Professional Development for Learning. 3 Credits.  
Focuses on the professional development and reflection on practice.  
Topics include organizational actions and personal responsibility, life-long  
learning, and public education in a democratic society.

ED_LPA 8412. School Improvement. 3 Credits.  
This course addresses the topics of organizational management and  
personal inquiry. It covers issues such as organizational effectiveness,  
organizing for an effective school environment, legal and fiscal decision-  
making and responsibilities of school leaders, creating an environment  
where stakeholders acquire and utilized data to inform decisions and  
practice, and where action research methods are utilized to evaluate and  
inform practice.

ED_LPA 8413. Internship. 1-11 Credit.  
The internship experience provides the opportunity for the student to  
assume a leadership role associated with instructional improvement.  
Graded on S/U basis only.

ED_LPA 8414. Current Issues in Site-Level Leadership. 3 Credits.  
This course is designed to introduce students to the rigors of the  
principalship. Topics will include issues affecting beginning principals,  
school cultures, and the use of technology for communication and  
research.

ED_LPA 8415. Leadership for Collaborative Cultures. 3 Credits.  
This course will instill an understanding of major components of  
purposeful, systemic change, interpersonal relationships, communication  
and organizational management. The development of an appreciation of  
diversity, equity, and democracy for all students will be an ongoing theme  
of the course.

ED_LPA 8416. Foundations of School Leadership. 3 Credits.  
School leader knowledge of student learning theory and related  
instructional practices is the focus of this course. The problem-  
based learning format will include topics on school culture, leadership  
communication, technology, and conflict resolution. Issues concerning  
professional relationships are also addressed.

ED_LPA 8417. Site-Level Organization and Leadership. 3 Credits.  
Student will study state and national regulations that affect Missouri  
school policies. The student will develop a database on various legal  
issues. A study of middle level education will conclude with on-site  
evaluation of a local middle school.

ED_LPA 8418. Supervision for Learning Environments. 3 Credits.  
Students are prepared to articulate, recognize, and support classroom  
practices that reflect the most current principles of learning. Effective  
instructional strategies that link this knowledge to practice will be entered  
into a computer database.

ED_LPA 8419. Structures and Processes for Effective Schools. 3  
Credits.  
Emphasis is placed on the Missouri Comprehensive Guidance Program  
and positive strategies for working with challenging students. A  
continuation of the study of state and national legal and policy issues will  
focus on special programs and services.

ED_LPA 8420. Curriculum for Site-Level Leadership. 3 Credits.  
Student and program assessment are the primary topics for this  
course on curricular leadership. Class participants are engaged in the  
development of authentic experiences using technology to develop  
and apply the testing and assessment knowledge appropriate to school  
leaders.

ED_LPA 8421. Action Research in School Leadership. 3 Credits.  
Databases on legal and policy issues are completed and merged into  
a single database and placed on the specialist program web site. Site  
and classroom level action research is investigated, concluding with an  
assessment of local action research efforts in area schools.

ED_LPA 8422. Advanced Problems of Leadership Practice. 3  
Credits.  
This pre-internship course is a study of team building, program  
assessment, and site-based management. Addressing problems through  
a comprehensive school improvement approach with practicing principal  
will serve to prepare the students for internship experiences.

ED_LPA 8423. Advanced Leadership for Learning Environments. 3  
Credits.  
Students will demonstrate their understanding of instructional  
improvement for all teachers and students by designing and defending a  
comprehensive strategy for instructional changes in a simulated school.  
The ongoing study of learning principles and effective instructional  
practices will be concluded.

ED_LPA 8424. Education Politics and Policymaking. 3 Credits.  
This course examines the politics and policymaking process of education  
in the United States, paying particular attention to the influence of various  
institutions and actors at local, state, and federal levels. Graded on A-F  
basis only.

ED_LPA 8428. Curriculum Leadership. 3 Credits.  
A study of research, theory, and skills necessary for curriculum  
leadership in educational organizations. Course includes generic  
curriculum management processes, design trends, controversial issues  
multi-media, innovative instructional techniques, and program evaluation.  
Prerequisite: graduate standing.
ED_LPA 8430. School Law and Finance for Principal Leadership. 3 Credits.
Designed to engage learners in examination of the legal (judicial and legislative) system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A/F basis only.

Graded on a S/U basis only. Prerequisite: departmental consent.

Prerequisite: instructor’s consent.

ED_LPA 9400. Social Theory in Education. 3 Credits.
Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.

ED_LPA 9401. Educational Leadership. 3 Credits.
Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.

ED_LPA 9402. Educational Policy Analysis. 3 Credits.
Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance these understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.

ED_LPA 9403. Organizational Analysis. 3 Credits.
Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.

ED_LPA 9404. Inquiry into Educational Leadership and Policy Analysis. 3 Credits.
A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students. Recommended for students who have completed at least 2 semesters of coursework.

Seminar in Educational Leadership and Policy Analysis.

ED_LPA 9406. Seminar in Educational Administration. 1-99 Credit.
Seminar in Educational Administration.

ED_LPA 9407. Seminar in Educational Policy. 1-99 Credit.
Seminar in Educational Policy.

ED_LPA 9408. Seminar in Higher Education. 1-99 Credit.
Seminar in Higher Education.

ED_LPA 9424. Superintendent: Instructional Leadership. 3 Credits.
Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A/F basis only.

ED_LPA 9427. School Budget Development and Fiscal Management. 3 Credits.
This course includes an overview of school finance programs of the 50 states, including special funds for exceptional children and compensatory education. Various aspects of planning, accounting, auditing, and reporting related to budget development and fiscal management are covered.

ED_LPA 9429. Superintendent: Communication, Team Leadership. 3 Credits.
Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A/F basis only.

ED_LPA 9430. Superintendent: Fiscal, Legal Leadership. 3 Credits.
Effective superintendents efficiently manage finances and ensure that rules, regulations, and policies adhere to statutory/case law. Fiscal and legal practices ensure equity of educational experiences for all students. Open to all graduate students. Graded on A/F basis only.

ED_LPA 9437. Topics in Educational Leadership and Policy Analysis. 1-99 Credit.
Topics in Educational Leadership and Policy Analysis.

ED_LPA 9439. Applying Higher Education Research to Practice. 3 Credits.
This course introduces quantitative, qualitative, and mixed within a student affairs context. Students will become familiar with, and able to critique research. Course graded on A/F basis only. Graduate Standing Only.

ED_LPA 9440. Race, Gender, and Ethnicity in Higher Education. 3 Credits.
(same as Women and Gender Studies [WGST] 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.

ED_LPA 9441. The Adult Learner. 3 Credits.
The identification of learning, motivation and participation patterns among adults will be examined. Learning theories and adult development life-cycle and stage research data will be explored as well as their implications for practice.

ED_LPA 9442. Curriculum Philosophy and Development in Higher Education. 3 Credits.
A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.

ED_LPA 9444. Program Planning in Higher Education. 3 Credits.
Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.

ED_LPA 9445. College Student Development. 3 Credits.
(same as Educational, School and Counseling Psychology [ESC_PS] 9445). Emphasis on college student development theory and its application in student affairs work.
ED_LPA 9446. Student Affairs Administration. 3 Credits.
(same as Educational School and Counseling Psychology [ESC_PS] 9446). History, philosophy, theory, and issues pertinent to student affairs work.

ED_LPA 9447. College Student Culture and Environment. 3 Credits.
This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment the differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.

ED_LPA 9448. College Teaching. 3 Credits.
Designed to introduce students to theories and practices central to teaching in a higher education setting. Teaching related to institutional contexts and disciplines will be considered. Teaching and learning theories will be introduced.

ED_LPA 9449. History of Higher Education in the United States. 3 Credits.
A study of the transformation of the English college tradition to what higher education is currently in the United States. The emphasis is on how institutions of higher learning changed to meet the needs of the nation or failed to do so.

ED_LPA 9450. Administration and Governance of Higher Education. 3 Credits.
Principles of administration, academic culture and environment, and structures of governance of higher education will be explored.

ED_LPA 9451. Higher Education Finance. 3 Credits.
How students pay for college and how institutions finance their operations is explored through the lens of economics. Topics include: Theories of student access, tuition and financial aid policy, institutional costs and revenue patterns, and resource allocation models.

ED_LPA 9452. Overview of Higher Education. 3 Credits.
This course provides an overview of American Higher education. Emphasis is placed on how these institutions currently operate and what issues dominate current discussions of academe.

ED_LPA 9453. Continuing Education for the Professions. 3 Credits.
Comparative study of education for the professions. Examination of professions as occupations, approaches and goals of preparatory and continuing education, professionals as adult learners and influence of intra-profession issues and societal exchange on education.

ED_LPA 9454. Introduction to Post-Secondary Law. 3 Credits.
Examination of the legal structure within which higher education operates. Includes consideration of legal analysis of case law, institutional responsibilities under the law, and analysis of legal issues within postsecondary education.

ED_LPA 9455. The Community College. 3 Credits.
An overview of the community college. Topics include historical roots and development of the community college, organization and governance, finance, students, faculty, administrators, curriculum, social role, and recurring and emerging issues.

ED_LPA 9456. The Professoriate. 3 Credits.
Overview of faculty roles and work in U.S. colleges and universities. Explores institutional and disciplinary differences and seeks to prepare future faculty for academic life.

ED_LPA 9457. Higher Education Policy. 3 Credits.
An overview of current higher education policy issues facing governmental bodies and institutions. An emphasis is placed on investigating both the policy-making and policy-evaluation processes through multiple theoretical lenses. Specific topics explored include access, equity, and accountability within the higher education setting. Graduate Standing Required.

ED_LPA 9459. Comparative and International Education. 3 Credits.
Theories, methods and issues in the field of comparative and international education. Topics cover PK-16 education and include globalization, centralization and decentralization, equity and equity, teaching and student learning, and social context of education.

ED_LPA 9460. Ethic in Education. 3 Credits.
Examines major ideological movements in modern education; their historical antecedents and philosophical underpinnings.

ED_LPA 9461. Ethics in Education. 3 Credits.
Explores the ethical dimensions of work within and related to educational settings focusing on dilemmas that occur in professional practice, theories that inform thinking about ethical issues, and frameworks that guide ethical decision making.

ED_LPA 9462. History of U.S. Education Policy. 3 Credits.
Provides overview of major US education issues (primary K-12), explores analytic tools for studying history of education and introduces multiple ways of constructing the history of a particular movement reform or era in education.

ED_LPA 9463. Politics of Education. 3 Credits.
Focuses on politics of education in the United States, attending to the influence of various institutions and actors at local, state, and federal levels. Students will examine current reforms in PK-12 education and their impact on the future of education.

ED_LPA 9464. Theory and Practice in Multicultural Education. 3 Credits.
Designed to give educational professionals a better understanding of the theoretical foundations of multicultural education as well as current practices in this field.

ED_LPA 9465. Policy Analysis Using Large Databses. 3 Credits.
Intends to develop students' capacity to process national level large databases and to conduct policy-related research. The prerequisite is an understanding of inferential statistics and experience with SPSS and SAS program.

ED_LPA 9469. Education Leadership Inquiry IV. 1 Credit.
Developing and writing research proposals and conducting pilot studies. Knowledge and skills in writing the research report and sharing research with others. Open only to students in Ed.D. Program in Educational Leadership. Prerequisites: Educational Leadership and Policy Analysis (ED_LPA) 9471, 9472 and 9473. Graduate Standing Required.

ED_LPA 9470. Organizational Analysis for Educational Leadership. 4 Credits.
Schools of organizational theory, six frames to analyze organizations and their underlying concepts, organizational change and leadership for change, and rationale for reframing organizations. Open only to students in Ed.D. program in Educational Leadership.

ED_LPA 9471. Educational Leadership Inquiry I. 2 Credits.
Introductory seminar on evaluating research using, APA Publication guidelines, writing scholarly publications, and using computer technology
ED_LPA 9472. Educational Leadership Inquiry II. 1 Credit. 
MU Graduate School policies related to doctoral research, use of multiple search sources, human subjects review process, and research ethics. Open only to students in Ed.D. program in Educational Leadership.

ED_LPA 9473. Educational Leadership Inquiry III. 1 Credit. 
Knowledge and skills in applying planning procedures for development and implementation of future dissertation research. Open only to students in Ed.D. Program in Educational Leadership.

ED_LPA 9474. Professional Seminar I. 1 Credit. 
Focuses on diversity and ethics in educational leadership and educational organizations. Students learn about professional development, professional practice, and professional service. Open only to students in Ed.D. Program in Educational Leadership. Repeat for credit.

ED_LPA 9475. Professional Seminar II. 1 Credit. 
Problem-based learning via the Internet to make decisions involving professional practice and problem solving. The UCEA Internet program, Information Environment for School Leader Preparation, is used. Open only to students in Ed.D. Program in Educational Leadership. Repeat for credit.

ED_LPA 9476. Leadership Theory and Practice. 3 Credits. 
An advanced study of leadership theories, concepts, and inquiry as applied to educational organizations. Explores power and authority in organizations, leader effectiveness, and organizational reform. Open only to students in Ed.D. Program in Educational Leadership.

ED_LPA 9477. Leadership Theory and Practice Application. 1 Credit. 
Focuses on building understanding of the conduct of leadership in organizations through application and extension of leadership theories in practice. Open only to students in Ed.D. Program in Educational Leadership.

ED_LPA 9478. Policy Analysis for Educational Leadership. 4 Credits. 
Analysis and investigation of educational policy utilizing various knowledge bases; organizational politics and culture’s impact on policy processes; interpretation and application of policy-making activities. Open only to students in Ed.D. Program in Educational Leadership.

ED_LPA 9479. Content and Context of Learning. 3 Credits. 
Students develop the knowledge and skills for examining designing, and implementing organizational, classroom, and training conditions that support quality learning experiences for learners. Open only to students in Ed.D. Program in Educational Leadership.

ED_LPA 9480. Team Building and Group Dynamics. 1 Credit. 
Stages of group development, team building and maintenance, team/group structures, team performance, problem-based learning as team process, and empowerment through development of self-managed teams. Open only to students in Ed.D. Program in Educational Leadership.

Prerequisite: departmental consent. Some sections may be graded on A/F or S/U basis only.

ED_LPA 9482. Quantitative Tools for Applied Research in Educational Leadership. 3 Credits. 
General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision marking and using various quantitative methods to investigate problems of educational leadership practice. Prerequisite: Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll. Graded on A/F basis only.

ED_LPA 9483. Qualitative Tools for Applied Research in Educational Leadership. 3 Credits. 
Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership. Graded on A/F basis only.

ED_LPA 9484. Program Evaluation and Planning for Educational Leaders. 3 Credits. 
Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll. Graded on A/F basis only.

Educational, School and Counseling Psychology (ESC_PS)

ESC_PS 1901. Topics in Educational School, and Counseling Psychology - General. 1-3 Credit. 
Topics place holder for lower division courses.

ESC_PS 2000. Experiencing Cultural Diversity in the United States. 3 Credits. 
The purpose of this course is to examine cultural diversity in U.S. Society, increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A/F basis only.

ESC_PS 2010. Inquiry Into Learning I. 3 Credits. 
This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.

ESC_PS 2014. Inquiry into Learning I - Field Experience. 1 Credit. 
This field experience course supports the Inquiry into Learning I, component of Phase I. Prerequisite: department consent. Graded on S/U basis only.

ESC_PS 2100. Career Explorations. 1-3 Credit. 
Career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center.

ESC_PS 2350. Transforming Stress: Heart Rate Variability Biofeedback. 1 Credit. 
This course will offer an in-depth opportunity to learn the philosophy and management of stress through a computer -based biofeedback system.
Students will develop a personal practice, track their progress and learn skills in using this technology for a range of concerns.

**ESC_PS 2400. Learning and Instruction. 2 Credits.**

**ESC_PS 2500. Child Development. 3 Credits.**
The psychological, intellectual, social, and physical development of children. Prerequisites: Psychology [PSYCH] 1000.

**ESC_PS 2700. Psychological Perspectives in Sport. 3 Credits.**
Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

**ESC_PS 2901. Topics in Educational School, and Counseling Psychology - General. 1-3 Credit.**
Topics place holder for lower division courses.

**ESC_PS 3085. Problems in Educational, School, and Counseling Psychology. 1-3 Credit.**
Prerequisite: instructor’s consent.

**ESC_PS 3100. African-American Psychology. 3 Credits.**
(same as Black Studies [BL_STU] 3100 and Psychology [PSYCH] 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed. Prerequisite: Psychology [PSYCH] 1000.

**ESC_PS 3200. Black Feminism. 3 Credits.**
This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women’s lives and Black women’s collective actions against social structures will occur. Prerequisites: Psychology [PSYCH] 1000 or instructor’s consent.

**ESC_PS 3901. Topics in Educational School, and Counseling Psychology - General. 1-3 Credit.**
Topics place holder for lower division courses.

**ESC_PS 4087. Seminar in Educational, School, and Counseling Psychology. 1-3 Credit.**
Prerequisite: instructor’s consent.

**ESC_PS 4115. Human Learning. 3 Credits.**
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Prerequisite: Education and Counseling Psychology [ESC_PS] 4100.

**ESC_PS 4120. Foundations of Counseling Psychology. 3 Credits.**
Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology. Prerequisite: departmental consent.

**ESC_PS 4160. Developmental Aspects of Human Learning. 3 Credits.**
Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play, aggression, culture, and media.

**ESC_PS 4170. Introduction to Applied Statistics. 3 Credits.**
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Prerequisite: College Algebra or equivalent. Math Reasoning Proficiency Course.

**ESC_PS 4185. Health Behavior: Drug and Sexuality Education. 3 Credits.**
Psychological, social, and physical factors related to drug taking and sexuality behaviors. Prerequisites: Learning, Teaching and Curriculum [LTC] 1310 or equivalent or instructor’s consent.

**ESC_PS 4200. Positive Psychology. 3 Credits.**
Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A/F or S/U basis only.

**ESC_PS 4460. Exploring Mental Health Issues in Schools. 3 Credits.**
This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.

**ESC_PS 4901. Topics in Educational School, and Counseling Psychology - General. 1-3 Credit.**
Topics place holder for lower division courses.

**ESC_PS 4960. Readings in Educational, School, and Counseling Psychology. 1-3 Credit.**
Prerequisite: instructor’s consent.

**ESC_PS 7000. Foundation of Teacher Prep I. 3 Credits.**
Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content. Prerequisite: Psychology [PSYCH] 1000.

**ESC_PS 7087. Seminar in Educational, School, and Counseling Psychology. 1-3 Credit.**
Prerequisite: instructor’s consent.

**ESC_PS 7100. Theories and Applications of Educational Psychology. 3 Credits.**
An introduction into the ideas and purpose of Educational Psychology in human development, learning, assessment/measurement and education. Prerequisites: graduate standing and Psychology [PSYCH] 1000.

**ESC_PS 7115. Human Learning. 3 Credits.**
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Prerequisite: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 4100/7100. Graded on A/F basis only.

**ESC_PS 7120. Foundations of Counseling Psychology. 3 Credits.**
Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology. Prerequisite: departmental consent.

**ESC_PS 7130. Parent Counseling and Consultation. 3 Credits.**
For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed. Prerequisite: graduate standing Educational School, and Counseling Psychology [ESC_PS] 4120/7120.
ESC_PS 7150. Interviewing and Counseling. 3 Credits.
Study of beginning interviewing and counseling skills applied to helping relationships in human services professions. Emphasis placed on learning helping skills in small group format. Lab required. Prerequisites: graduate standing and Psychology [PSYCH] 1000 or 1010.

ESC_PS 7160. Developmental Aspects of Human Learning. 3 Credits.
Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Prerequisite: graduate standing. Graded on A/F basis only.

ESC_PS 7170. Introduction to Applied Statistics. 3 Credits.
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Prerequisite: College Algebra or equivalent. Graded on A/F basis only.

ESC_PS 7180. Foundations of Rehabilitation. 3 Credits.
The vocational and independent living rehabilitation system for disabled persons. Concept of disability, its social psychological implications, and techniques of preparing disabled persons for adult adjustment. Prerequisites: Psychology [PSYCH] 1000.

ESC_PS 7185. Health Behaviors: Drug and Sexuality Education. 3 Credits.
Psychological, social and physical factors related to drug taking and sexuality behaviors. Prerequisites: Learning, Teaching, and Curriculum [LTC] 1310 or equivalent or instructor’s consent.

ESC_PS 7190. Alcohol Abuse and Rehabilitation I. 3 Credits.
Covers historical perspective, definition and measurement of the problem, classifications and theories about the etiology of alcoholism. Prerequisites: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 4120/7120 or 4180/7180 or instructor’s consent.

ESC_PS 7200. Positive Psychology. 3 Credits.
Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Graduate standing required.

ESC_PS 7220. Measurement of Cognitive Abilities. 3 Credits.
Analysis of the function of psychological testing and a critical examination of various achievement, aptitude, and intelligence assessment instruments. Prerequisite: graduate standing.

ESC_PS 7460. Exploring Mental Health Issues in Schools. 3 Credits.
This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools. Graduate standing required.

ESC_PS 8000. Advanced Child Development. 3 Credits.
Psychological development from birth to adolescence. Examines the influence of maturation and learning upon the acquisition of normal development tasks. Emphasizes the application of current research and theory with the school-age child. Prerequisite: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 4100/7100.

ESC_PS 8010. Advanced Adolescent Development. 3 Credits.
Analysis of normal adolescent psychological development, including the cognitive, affective, academic, physiological, moral and social parameters. Applications with typical adolescent problems are emphasized. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 4100/7100.

ESC_PS 8015. Child and Adolescent Development. 3 Credits.
A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral and social/cultural/racial domains. Examples of atypical development will be discussed. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 4100 or equivalent. Graded on A/F basis only.

ESC_PS 8020. Overview of Research Methods. 3 Credits.
Survey of research design and methods of data collection for masters, educational specialists, and doctoral students. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 7170 or instructor’s consent.

ESC_PS 8030. Role and Function of the School Psychologist. 3 Credits.
Introduction to major helping relationship approaches in School Psychology, applied to various professional settings. History, current issues, trends, professional organizations, legal/ethical standards, discussed. Prerequisites: enrollment in Educational School, and Counseling Psychology [ESC_PS] Program.

ESC_PS 8040. Counseling Methods and Practices. 3 Credits.
Introduction to counseling microskills and techniques, with attention to case conceptualization, therapeutic alliance, and counseling process. Laboratory experience in demonstrating skills and the ability to form an effective counseling relationship is required.

ESC_PS 8050. Marriage and Family Counseling. 3 Credits.
Appropriate for students who work with couples and families in a professional setting. Examines major family and marriage theories and research, counseling, skill development communication, and marital/family enrichment. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8040.

ESC_PS 8060. Lifespan Development. 3 Credits.
A comprehensive analysis of normal development across the lifespan with a primary focus on children and adolescents. Will investigate the cognitive, affective, academic, physical, moral, social/cultural/racial, religious/spiritual and sexual domains. Examples of atypical development will be discussed. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 4100 or equivalent. Consent of instructor required. Graduate Standing Required.

ESC_PS 8070. Ethical and Legal Issues in Psychological Practice. 3 Credits.
Legal and ethical concepts and issues relevant to the practice of psychology and student personnel services. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 4120/7120 or instructor’s consent.

ESC_PS 8082. Foundations of Educational and Psychological Measurement. 3 Credits.
Basic principles of educational and psychological measurement including test construction, validity, reliability, item analysis, and derived scores. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 4170/7170 or instructor’s consent. Graduate standing required.

ESC_PS 8085. Problems in Educational, School, and Counseling Psychology. 1-3 Credit.
Prerequisite: instructor’s consent.
ESC_PS 8087. Seminar in Educational, School, and Counseling Psychology. 1-3 Credit.
Prerequisite: instructor’s consent. Graded on A/F basis only.

ESC_PS 8090. Master’s Thesis in Educational, School, and Counseling Psychology. 3-6 Credit.
Independent research leading to Master’s Thesis. Graded on S/U basis only. Prerequisite: advisor’s consent.

ESC_PS 8095. Research in Educational, School, and Counseling Psychology. 1-6 Credit.
Supervised research that is independent of master’s thesis or doctoral dissertation. Prerequisite: advisor’s consent. Graded on S/U basis only.

ESC_PS 8100. Psychological Assessment of Children and Adolescents: Cognitive Assessment. 3 Credits.
Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Prerequisites: instructor’s consent. Graded on A-F basis only.

ESC_PS 8110. Methods in Group Counseling. 3 Credits.
Study of group counseling methods and techniques. Participation in a group is required. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8040, demonstrated knowledge of ethical principles and departmental consent.

ESC_PS 8120. Psychological Assessment of Children and Adolescents: Psychoeducational Assessment. 3 Credits.
Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive behavior, and perceptual/motor assessments with school-age youth and adolescents. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8100 and instructor’s consent.

ESC_PS 8125. Professional Iss. in Sch. Psych. I-Hist., Trends & Ethical Pract.. 3 Credits.
For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed. Prerequisite: Must be admitted to school psychology program.

ESC_PS 8130. Psychological Assessment of Adults. 3 Credits.
Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8100.

ESC_PS 8135. Foundations of Career Psychology. 3 Credits.
Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling. Prerequisites: Psychology [PSYCH] 1000.

ESC_PS 8140. Psychological Assessment in Children and Adolescents: Behavior and Social Emotional Assessment. 3 Credits.
This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.

ESC_PS 8145. Psychological Interventions with Children and Adolescents: Behavioral Intervention. 3 Credits.
This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A/F basis only.

ESC_PS 8160. Psychological Interventions with Children and Adolescents: Educational Instruction. 3 Credits.
This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions. Prerequisites: Educational, School and Counseling Psychology [ESC_PS] 8100, 8120 and instructor’s consent.

ESC_PS 8165. Psychological Interventions with Children and Adolescents: Evidence-Based Therapies. 3 Credits.
An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A/F basis only.

ESC_PS 8170. Career Resources in Business and Industry. 2-4 Credit.
Personnel practices, occupational requirements, and career opportunities and resources in business and industry. Applications are emphasized through on-site visits and use of business-industry-labor personnel. Graded on S/U basis only. Prerequisites: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 8135 or instructor’s consent.

ESC_PS 8180. Theory and Practice in Career Psychology. 3 Credits.
Methods and programs for facilitating the career development of individuals over the life span. Organization and development of activities and programs for all ages emphasized. Prerequisite: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 8135.

ESC_PS 8185. Health Promotion. 3 Credits.
An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change, and the design, development implementation, and evaluation of comprehensive health promotion programs. Prerequisites: Learning, Teaching, and Curriculum [LTC] 1310 or equivalent or instructor’s consent.

ESC_PS 8210. Projective Assessment of Adults. 3 Credits.
Assessment of personality functioning using projective and inferential testing procedures. Rudimentary skills in using the Rorschach method. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8000 or 8100.

ESC_PS 8220. Vocational Assessment of Individuals with Disabilities. 3 Credits.
This course is an overview of the philosophy of vocational assessment of individuals with disabilities. The course also emphasizes to positive integration of vocational assessment into the rehabilitation counseling process. Assessment practice included. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 7180 and 8082.

ESC_PS 8240. Sport in America. 3 Credits.
Sociological perspectives of sport in America. Attention given to the influence of society on sport as an institution, and the role of sport as an agent of social change. Prerequisite: Sociology [SOCIOL] 1000 or Psychology [PSYCH] 1000.
ESC_PS 8250. School Psychology Practicum: Introduction to School Services. 1-6 Credit.
This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. May be repeated for credit. Prerequisite: instructor’s consent.

ESC_PS 8260. School Psychology Practicum: School-Based. 1-6 Credit.
Level II School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. May be repeated for credit. Prerequisite: instructor’s consent.

ESC_PS 8310. Colloquium in Educational Psychology. 1 Credit.
A course that covers current topics in learning, development, and schooling. Topics include cognitive, affective, academic, physical, moral, and cultural domains. Instructor’s consent required. May be repeated for credit.

ESC_PS 8320. Advanced Human Learning. 3 Credits.
A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 2400 or 7100 recommended.

ESC_PS 8350. Cognition, Learning and Instruction. 3 Credits.
Examines the topics of memory and cognition as they apply to the process of learning and instruction. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8320 or instructor’s consent.

ESC_PS 8360. Advanced Counseling Theories and Interventions. 3 Credits.
Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8340 or 8342. Graded on A/F basis only.

ESC_PS 8400. Analysis of Research in Career Psychology. 3 Credits.
Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8135.

ESC_PS 8410. School Guidance Programs. 3 Credits.
Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating. Prerequisite: graduate standing and Educational School, and Counseling Psychology [ESC_PS] 7120.

ESC_PS 8415. Program Evaluation for School Counselors. 3 Credits.
Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A/F basis only. Prerequisite: Educational, School and Counseling Psychology [ESC_PS] 7120 and graduate standing.

ESC_PS 8430. Child and Adolescent Mental Health. 3 Credits.
The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community. Graduate standing or instructor’s consent.

ESC_PS 8440. School Mental Health: Policy, Law and Ethics. 3 Credits.
This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools. Graduate standing required.

ESC_PS 8450. Diversity Issues for School Personnel. 3 Credits.
The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations. Graduate standing required.

ESC_PS 8460. Communication and Collaboration with Children and Families. 3 Credits.
This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration. Graduate standing required.

ESC_PS 8470. Mental Health Preventions and Interventions for School Personnel. 3 Credits.
This course explores the role that educators play in promoting the mental wellness of children and adolescents. It examines the principles of prevention and early intervention practices and considers the basic steps for designing, implementing and evaluating evidence based programs. Graduate standing required.

ESC_PS 8500. Rehabilitation Counseling. 3 Credits.
A study of the history and current status of rehabilitation counseling, and the role, theory, and practice of counseling in rehabilitation settings with persons with disabilities.

ESC_PS 8510. Medical and Psychological Aspects of Disability. 3 Credits.
Presentation of medical aspects of major disabilities and their effects upon social, vocational, personal, and economic adjustment. Study of basic restoration and accommodating services.

ESC_PS 8515. Sport Psychology. 3 Credits.
Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology. Prerequisite: Psychology [PSYCH] 1000.

ESC_PS 8520. Job Acquisition for Individuals with Disabilities. 3 Credits.
Techniques of job development, placement, job analyses of the individual’s skills and abilities and the employer’s needs, and how to build professional relationships with employers. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 7180.

ESC_PS 8530. Developmental Psychopathology and Exceptionality. 3 Credits.
An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A/F basis only.

ESC_PS 8540. Theory and Practice in Feminist Therapy. 3 Credits.
Theory, research, practice standards and current debates within feminist therapy. Includes both examination of topical areas in a seminar format and live observation of feminist therapy. Prerequisites: Educational
School, and Counseling Psychology [ESC_PS] 8940 or instructor’s consent.

ESC_PS 8580. Social and Cultural Identity Development. 3 Credits.
Graduate-level course designed to introduce students to: (a) the dominant social and cultural identity theories and paradigms; (b) how these theories have been operationalized and measured.

ESC_PS 8585. Gender Issues in Counseling and Education. 3 Credits.
Topics include conceptions of gender roles, measurement of gender-related constructs, gender role socialization process, high incidence gender-related problems, and psychoeducational and counseling interventions. Prerequisite: instructor’s consent.

ESC_PS 8590. Multicultural Counseling Competencies: Theory and Research. 3 Credits.
This course will introduce students to the current status of multicultural counseling theories and research issues and help students to increase their knowledge of cultural differences in counseling and psychology. Graded on A/F basis only.

ESC_PS 8630. Qualitative Methods in Educational Research I. 3 Credits.
An introductory course intended to provide a broad understanding of the foundations, purposes, and principles of qualitative research in education, as well as an introduction to a variety of qualitative research designs, data collection methods, and analysis strategies. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 7170.

ESC_PS 8640. Interviewing, Diagnosis, and Assessment. 3 Credits.
Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students utilize psychological reports to inform assessment, diagnosis and treatment. Prerequisite or Co-requisite: Educational School, and Counseling Psychology [ESC_PS] 8082.

ESC_PS 8655. Item Response Theory. 3 Credits.
Introduces modern scaling with Item Response Theory, and includes how it can be used to statistically specify information about latent variables and the stimuli (e.g., tests) used to represent them. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 9640, 9650.

ESC_PS 8690. Educational Planning and Evaluation. 3 Credits.
This course addresses major issues and models used in educational program planning and evaluation, including the appropriate use of various evaluation models and different types of data. Prerequisite: departmental inquiry course, Educational School, and Counseling Psychology [ESC_PS] 8610 and/or 8630.

ESC_PS 8830. Quantitative Analysis in Educational Research I. 3 Credits.
This is the first course in the sequence of statistical analysis methods. Topics covered in this course include statistical inference, simple regression, multiple regression, regression assumptions, regression with categorical predictors, model selection methods polynomial regression, and model validation.

ESC_PS 8840. Quantitative Analysis in Educational Research II. 3 Credits.
This is the second course in the sequence of statistical analysis methods. Topics extend those covered in Quantitative Analysis I and include hypothesis testing, ANOVA, ANCOVA, repeated measures design, random-effects ANOVA, introduction to logistic regression, polytomous and ordinal regression and linear mixed models (if time permits). Prerequisites: Educational, School and Counseling Psychology [ESC_PS] 7170, 8830.

ESC_PS 8870. Public Health Psychology. 3 Credits.
Study of applications of psychology to behavior, environment, and policy to promote health and prevent disease. The course gives particular attention to behavioral epidemiology and risk/resiliency factors associated with negative outcomes of childhood and adolescents.

ESC_PS 8900. Topics in Education, School and Counseling Psychology. 1-3 Credit.
Topics placeholder for upper division courses. Graduate Standing Required.

ESC_PS 8940. Counseling Psychology Practicum. 3-9 Credit.
Supervised practice of counseling in an approved counseling setting. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8040, 8135, 8640 and consent of counseling area faculty. May be repeated.

ESC_PS 8941. Practicum and Theory in Group Counseling I. 4 Credits.
Supervised practice of group facilitation in an approved setting. Formal study of contemporary theories and advanced techniques is integrated with the practice of group facilitation. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8110 and instructor’s consent.

ESC_PS 8942. Practicum and Theory in Group Counseling II. 4 Credits.
A continuation of Educational School, and Counseling Psychology [ESC_PS] 8200. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8200 and instructor’s consent.

ESC_PS 8943. Practicum in Multicultural Counseling Interventions. 1-6 Credit.
Supervised practice of applied multicultural counseling interventions in a wide variety of approved community and university settings. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8340 and either 8570 or 8590. Graded on S/U basis only.

ESC_PS 8944. School Psychology Practicum. 1-6 Credit.
Supervised practice of psychological assessment, intervention and remediation strategies. Prerequisites: departmental consent. May be repeated. Graded on A/F basis only.

ESC_PS 8945. Practicum in Marriage and Family Counseling. 3-6 Credit.
Supervised practice in marriage and family counseling conducted in appropriate laboratories and agencies. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8340, 8342, 8160 or 8050 and departmental consent.

ESC_PS 8946. Rehabilitation Counseling Internship. 3-9 Credit.
Field-based counseling internship in a community setting serving individuals with disabilities. 600 hour supervised experience designed to combine theoretical and applied program training aspects. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8340, 8520, and 8220.
ESC_PS 8947. Practicum in Student Development Programs. 3 Credits.
Supervised practice in student personnel services in an approved agency. Graded on S/U basis only. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8080.

ESC_PS 8948. Field Placement in Counseling/Supervision. 1-12 Credit.
Students will conduct counseling and/or supervision in approved community agencies under the supervision of licensed practitioners. Prerequisite: completion of 9 credit hours of Educational School, and Counseling Psychology [ESC_PS] 8340, and consent of the Counseling Area Faculty. Graded on S/U basis only.

ESC_PS 8950. Prevention Science Practicum: School and Family Centered Interventions. 3-6 Credit.
Prevention Science Practicum is an advanced graduate level practicum intended to provide students with the theoretical and practice skills needed to provide effective prevention services to children and families across multiple contexts. An emphasis is placed on school and family centered supports that prevent emotional and behavior problems in children. Graduate standing required. Consent of instructor required. Graded on S/U basis only.

ESC_PS 8960. Interdisciplinary Child and Family Practicum. 1-6 Credit.
This class includes a focus on child/family services with a systems/interdisciplinary approach. Students provide services via a mentorship model (strong supervision initially moving toward autonomy). Services include evaluations, therapy, consultation, psychiatric cross-training, and others. Prerequisite: Educational, School and Counseling Psychology [ESC_PS] 8040. Consent of instructor required. Course graded on S/U basis only. Graduate Standing Required.

ESC_PS 8980. Field Experience in Counseling. 3-9 Credit.
Graded on S/U basis only. Prerequisite: instructor's consent.

ESC_PS 8990. Career Development Theory for Women. 3 Credits.
Consideration of the relevance of theories of career development for women, and their application to the counseling of women. Supervised clinical experience in the application of theories to counseling high school age women.

ESC_PS 9000. Multicultural Issues in Counseling. 3 Credits.
This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities. Prerequisite: None, Educational School, and Counseling Psychology [ESC_PS] 8340 recommended.

ESC_PS 9010. Building Cross-Cultural Competencies: Taiwan Up Close. 3 Credits.
The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. The first part of the course occurs at MU in preparation for part two, a 10-day professional cultural immersion in Taiwan. Prerequisite: Educational School and Counseling Psychology [ESC_PS] 9000 preferred; instructor’s consent.

ESC_PS 9040. Cross-Cultural Issues in Counseling: International Focus. 3 Credits.
This course focuses on developing students’ awareness, knowledge, and skills in cross-national counseling and research in equipping the next generation of counseling psychologists’ competencies related to the globalization trend of counseling psychology. Prerequisite: Educational, School, and Counseling Psychology [ESC_PS] 9000. Graded on A/F basis only. Graduate Standing Required.

ESC_PS 9050. Biofeedback in Psychological Practice. 3 Credits.
Use of biofeedback in achieving voluntary self-regulation and control of stress-related behaviors. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8340 or 8342 and instructor’s consent.

ESC_PS 9087. Advisor’s Seminar. 1 Credit.
Prerequisite: departmental consent.

ESC_PS 9090. Doctoral Dissertation Educational School & Counseling Psychology. 1-12 Credit.
Independent research leading to dissertation. Graded on S/U basis only. Prerequisite: departmental consent.

ESC_PS 9091. Internship in Counseling Psychology. 1-6 Credit.
Supervised experience in counseling psychology on half- or full-time basis in approved internship station. Graded on S/U basis only. Prerequisite: departmental consent. May be repeated.

ESC_PS 9092. Internship in School Psychology. 1-6 Credit.
Supervised practice in school psychology in an educational setting. May be repeated. Graded on S/U basis only. Prerequisite: departmental consent.

ESC_PS 9093. Doctoral Internship in School Psychology. 1-6 Credit.
Supervised practice in doctoral-level school psychology in an institutional or applied setting. Prerequisite: departmental consent. May be repeated. Graded on S/U basis only.

ESC_PS 9125. Professional Iss. in Sch. Psych. II: Rsrch. Design & Application. 3 Credits.
For first-year doctoral students in school psychology. Includes study of research design and methodological issues in the field of school psychology. Prerequisite: Must be admitted to school psychology doctoral program.

ESC_PS 9126. Prevention Science Research Design and Analysis. 1-3 Credit.
Prevention Science Research is a graduate seminar intended to provide students with the theoretical and empirical foundations of prevention science. In particular, students will learn how to conceptualize problems from a prevention science perspective and design and evaluate preventive interventions using advanced methodologies. Opportunities for community based participatory research including research design and analysis, papers and briefs, grantwriting, and community collaborations regarding prevention programming particularly pertaining to children’s mental health. Graduate standing required. Consent of instructor required.

ESC_PS 9250. School Psychology Practicum: Community-Based. 1-6 Credit.
This course is an advanced practicum for students providing school psychology services in non-school settings. Students develop higher-level skills in the areas of case coordination, diagnostic decision-making, intervention, and systems change. May be repeated for credit. Prerequisite: instructor’s consent.

ESC_PS 9260. Policy Practicum in Professional Psychology. 1-3 Credit.
Policy Practicum is an advanced practicum focused on macro level skills for shaping policy and systems-level intervention. Students work within agencies that establish policy for special education, mental health, and...
other education/psychology-related issues. May be repeated for credit. Prerequisite: instructor’s consent.

ESC_PS 9300. Psychoanalytic Counseling. 3 Credits.
A study of the contribution of classical and contemporary psychoanalysis to counseling theory, research and practice. Examination of theoretical and clinical material in a seminar format. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8340, 8342 and instructor’s consent.

ESC_PS 9400. Theories and Practices in Supervision. 3 Credits.
Instruction and practice in the supervision of psychological services conducted in appropriate laboratories and agencies. Prerequisites: Educational, School and Counseling Psychology [ESC PS] 8940 or 8944 and instructor’s consent. Sections titled Counseling Psychology are graded on S/U basis only. Sections titled School Psychology are on A-F basis only.

ESC_PS 9445. College Student Development. 3 Credits.

ESC_PS 9446. Student Affairs Administration. 3 Credits.

ESC_PS 9450. Motivation. 3 Credits.
Investigates human motivation applied to performance in schools, athletics, and personal life. Topics include goals, attributions, self-efficacy, interest, cultural differences, and rewards. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8320 or equivalent. Graded on A/F basis only.

ESC_PS 9460. Health Behavior Change Research. 3 Credits.
(Same as Nursing [NURSE] 9460). Doctoral seminar focusing on theories, measurement, and methods for conducting health behavior change research. Prerequisite: Nursing [NURSE] 9120, Pre/Corequisite: Nursing [NURSE] 9410, or faculty consent.

ESC_PS 9530. Scientific Fdns of Counseling Psych I: Prof Iss &. 3 Credits.
For first-year doctoral students in counseling psychology. This course focuses on the history of counseling psychology, and scientific reasoning processes as they apply to both science and practice.

ESC_PS 9540. Scientific Foundations of Counseling Psych II: Rsrch, Dsgn & Appl. 3 Credits.
For first-year doctoral students in applied psychology. Includes study of research design and methodological issues in the field of counseling psychology. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 9530.

ESC_PS 9550. Scientific Writing in Counseling Psychology. 3 Credits.
This course focuses on the technical skills needed for developing a scientific research proposal in counseling psychology. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 9530 and 9540 and instructor’s consent.

ESC_PS 9560. Psychological Consultation: Schools. 3 Credits.
The individual psychological consultation process between the mental health professional and school personnel. Techniques, models, research roles, and responsibilities are discussed. Graded on A/F basis only.

ESC_PS 9610. Applied Sport Psychology. 3 Credits.
Building upon the knowledge base of sport psychology, this course integrates and synthesizes student’s understandings of the wide array of concepts and theories of the field into meaningful applications and strategies aimed at enhancing the sport experience of others. A case study approach will be employed. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8515.

ESC_PS 9620. Qualitative Methods in Educational Research II. 3 Credits.
The focus of each section of this course would be in-depth study of a specific method (e.g., case study, ethnographic, grounded theory) and various approaches (e.g., critical theory, dialogical). Students will be expected to undertake a substantive pilot study and prepare a qualitative text. Prerequisite: Educational School, and Counseling Psychology [ESC_PS] 8630.

ESC_PS 9640. Introduction to Theory of Educational Measurement. 3 Credits.
Classical and modern test theory, including IRT, generalizability theory and test bias. Also covered are advanced strategies for investigating reliability and validity. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 7170, 8082.

ESC_PS 9650. Application of Multivariate Analysis in Educational Research. 3 Credits.
The focus of this course will be on applications of multivariate analysis in educational research. Prerequisites: Educational School, and Counseling Psychology [ESC_PS] 8610 and 8620 or equivalent and instructor’s consent.

ESC_PS 9710. Structural Equation Modeling. 3 Credits.
Simultaneous analysis of relationships among variables. Topics included are path analysis, confirmatory factor analysis, hybrid models, and special types of structural models involving longitudinal data, multiple groups and analysis of means. Prerequisites: Educational, School and Counseling Psychology [ESC_PS] 7170, 8610, 8620, 9650; consent required. May be repeated for credit.

ESC_PS 9720. Hierarchical Linear Modeling. 3 Credits.
Hierarchical Linear Modeling (HLM), including multilevel and longitudinal approaches, applied research settings for the social, educational psychological, and health-related sciences. Prerequisites: Educational, School and Counseling Psychology [ESC_PS] 7170, 8610, 8620, 9650; consent required. May be repeated for credit.

ESC_PS 9900. Topics in Educational Leadership and Policy Analysis. 1-3 Credit.
Topics placeholder for upper division courses.

Electrical And Computer Engineering (ECE)

ECE 1000. Introduction to Electrical and Computer Engineering. 2 Credits.
Introduction to the basic principles of electrical and computer engineering through hands-on activity. Course includes fundamentals of programming using Matlab, applied to electrical and computer engineering problems.

ECE 1001. Experimental Course. 1-99 Credit.
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.
ECE 1210. Introduction to Logic Systems. 3 Credits.
Introduces basic tools, methods and procedures to design combinational and sequential digital circuits and systems. Topics include number systems, Boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design. Graded on A-F basis only.

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

ECE 2100. Circuit Theory I. 4 Credits.

ECE 2110. Experimental Electrical Engineering I. 3 Credits.
Application of standard electronic test equipment to basic experimental tasks of measurement and characterization of electronic phenomena and devices. Prerequisites: Engineering [ENGINR] 2100 concurrently.

ECE 3110. Electrical and Computer Engineering Projects. 3 Credits.
Open-ended design projects which encourage innovative solutions to design and measurement problems. Students teams complete several projects from different areas. Both oral and written presentations emphasized. Prerequisites: Statistics [STAT] 4710 and Electrical and Computer Engineering [ECE] 3210 and 3410. Restricted to ECE students only or instructor's consent. Graded on A/F basis only.

ECE 3210. Microprocessor Engineering. 4 Credits.
Introduction to microprocessor architectures and programming; memory, memory management and cache organizations, bus configurations and timing implications; parallel I/O and serial communication interfaces. Prerequisite: Electrical and Computer Engineering [ECE] 1210 and Computer Science [CMP_SC] 1040 or 1050.

ECE 3220. Computing for Embedded Systems. 3 Credits.
Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Prerequisites: Electrical and Computer Engineering [ECE] 3210 and C++ or Java. Graded on A/F basis only.

ECE 3230. Algorithms and Software Design. 3 Credits.
Covers basic algorithms including: arithmetic operations, sorting, string processing, parsing, hashing, and tree and graph manipulations. The C language and UNIX operating system are used as vehicles for illustration and practice in use of the algorithms and in the application of software design techniques. Prerequisite: Electrical and Computer Engineering [ECE] 2210.

ECE 3410. Electronic Circuits and Signals I. 4 Credits.

ECE 3470. Introduction to Power Engineering. 3 Credits.
Real and reactive power in single and three-phase ac circuits; magnetic circuits and transformers; energy conversion, DC machines, induction and synchronous machines; power transmission and distribution. Co-requisite Electrical and Computer Engineering [ECE] 3810. Graded on A/F basis only.

ECE 3510. Electromagnetic Fields. 3 Credits.
Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Prerequisite: Physics [PHYSICS] 2760, Mathematics [MATH] 4100. Graded on A/F basis only.

ECE 3610. Semiconductors and Devices. 3 Credits.
Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors. Prerequisites: Electrical and Computer Engineering [ECE] 3510.

ECE 3810. Circuit Theory II. 4 Credits.
Impulse and step responses, RLC circuits, classical differential equations solutions, complex plane stability, frequency and Bode Analysis, Resonance, Laplace transforms, two-port networks, mutual inductance and transformers. Prerequisites: Electrical and Computer Engineering [ECE] 2100 and Mathematics [MATH] 4100 concurrently. Graded on A/F basis only.

ECE 3830. Signals and Linear Systems. 3 Credits.

ECE 4001. Topics in Electrical and Computer Engineering. 3-4 Credit.
Current and new technical developments in electrical engineering. Prerequisite: senior standing.

ECE 4020. Energy Systems and Resources. 3 Credits.

ECE 4030. Introduction to Nuclear Reactor Engineering. 3 Credits.

ECE 4040. Introduction to Nuclear Physics. 3 Credits.
Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only. Prerequisite: senior standing or graduate standing in engineering or equivalent mathematical preparation.

ECE 4085. Problems in Electrical and Computer Engineering. 1-3 Credit.
Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics. Prerequisites: 12 hours Electrical and Computer Engineering credit or instructor's consent.

ECE 4150. Solid State Area Laboratory. 1 Credit.
Laboratory experiments involved with solid state theory and integrated circuit fabrication and testing. Prerequisites: Electrical and Computer Engineering [ECE] 4650 and 4670.

ECE 4170. Control Systems Laboratory. 1 Credit.
Experiments in computer process control and industrial automation; automated process modeling; control algorithm design; control simulation; direct digital real-time control; transducers; computer interfacing; industrial control mechanisms; Programmable Logic Controllers. Prerequisites: Electrical and Computer Engineering [ECE] 4310, 3210, 3110.
ECE 4220. Real Time Embedded Computing. 3 Credits. 
Embedded systems development with real time constraints including 
RTOS, task management and synchronization, real time scheduling 
algorithms, deadlocks, performance analysis and optimization, interfacing 
to external devices, and device drivers. Prerequisite: Electrical and 
Computer Engineering [ECE] 3220. Graded on A/F basis only.

ECE 4250. VHDL and Programmable Logic Devices. 4 Credits. 
Design techniques including module definition, functional partitioning, 
hardware design language descriptions and microprogramming; design 
examples include arithmetic units, programmable controllers, and 
microprocessors. Prerequisites: Electrical and Computer Engineering 
[ECE] 3210.

ECE 4270. Computer Organization. 4 Credits. 
Advanced computer architectures and programming; memory, memory 
management and cache organizations, parallel processing, graphical 
processor units for general programming. Prerequisite: Electrical and 

ECE 4280. Network Systems Architecture. 3 Credits. 
The course covers network systems interconnects and switch fabrics, 
network considerations: and relevant networking applications at the 
network, transport and application layer. Graded on A-F basis only. 
Prerequisite: ECE 3210, ECE 3220.

ECE 4310. Feedback Control Systems. 4 Credits. 
(same as Biological Engineering [BIOL_EN] 4310). System modeling and time and frequency response, closed loop control, stability, 
continuous system design, introduction to discrete time control, software 
and hardware experiments on compensator design and PID control. 
Prerequisite: Mathematics [MATH] 4100. Graded on A-F basis only.

ECE 4330. Introduction to Mechatronics and Robotic Vision. 4 Credits. 
Covers 1) mechatronic systems; 2) the mathematical tools used to model 
industrial and mobile robots; and 3) vision sensors, their underlying 
models and algorithms that allow us to control and interact with robots. 
Prerequisites: Electrical and Computer Engineering [ECE] 3220 or 4220 
or a C/C++ languages.

ECE 4340. Building Intelligent Robots. 4 Credits. 
(same as Computer Science [CMP_SC] 4730). Covers the design 
and development of intelligent machines, emphasizing topics related 
to sensor-based control of mobile robots. Includes mechanics and 
motor control, sensor characterization, reactive behaviors and control 
architectures. Prerequisites: junior standing and programming experience 
in one of the following programming languages: Basic, C, C++, or Java.

ECE 4350. Programmable Logic Controllers. 4 Credits. 
Hardware and software aspects of PLC's; computer/PLC 
Communications; developing ladder logic programs; interfacing I/O 
deVICES, including sensors, to the PLC; labeling and documentation; 
utilizing analog capabilities; applications; developing Supervisory Control 
and Data Acquisitions (SCADA) applications. Prerequisite: junior standing 
or above.

ECE 4370. Automatic Control System Design. 3 Credits. 
Techniques for feedback system design and analysis; compensation 
using root locus and frequency-domain methods; state-variable design 
methods; techniques for nonlinear systems analysis and design; sample-
data control systems. Prerequisite: Electrical and Computer Engineering 
[ECE] 4310.

ECE 4390. Computer Process Control. 3 Credits. 
Role of digital computer in process control; digital controller design; 
computer interfacing; transducers; programmable logic controllers; 
process modeling; introduction to robotics. Prerequisites: Electrical and 
Computer Engineering [ECE] 4310 and 3210.

ECE 4410. Power Electronics I. 4 Credits. 
Power electronic device characteristics, important circuit and component 
concepts, loss mechanisms and thermal analysis, phase controlled 
rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory 
projects. Prerequisites: Electrical and Computer Engineering [ECE] 3410.

ECE 4430. Electronic Circuits and Signals II. 3 Credits. 
Advanced study of electronic devices including frequency response 
of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and 
feedback amplifiers. Prerequisites: Electrical and Computer Engineering 
[ECE] 3830 and 3410.

ECE 4450. Amplifier Analysis and Design. 3 Credits. 
Design of electronic networks with application to instrumentation, control 
and communications systems. Practical specifications and problems in 
design. Lectures and projects. Prerequisite: Electrical and Computer 
Engineering [ECE] 4430.

ECE 4470. Sustainable Electrical Energy Resources. 3 Credits. 
Analysis of renewable electrical energy resources from both the utility 
and distributed resource perspective. Covers safety, metering and power 
quality issues associated with coupling distributed resources to the utility 
grid. Prerequisites: Electrical and Computer Engineering [ECE] 3470 or 
Engineering [ENGINR] 2100.

ECE 4510. Pulsed Power Engineering. 3 Credits. 
Concepts of energy generation and storage systems used in pulse power 
engineering, high power opening and closing switches, high voltage 
equipment, grounding and shielding, high voltage safety. Prerequisite: 
Electrical and Computer Engineering [ECE] 3510.

ECE 4530. Photonics. 3 Credits. 
Introduction to the physical principles and optical materials used in 
diagnostics, optical communications, semiconductor and solid state 
lasers, optical fiber transmissions, optical detectors, optical signal 
processing. Prerequisite: Electrical and Computer Engineering [ECE] 
3510.

ECE 4550. Introduction to Plasmas. 3 Credits. 
(same as Nuclear Science and Engineering [NU_ENG] 4375). Equations 
of plasma physics, interaction of waves and plasmas; plasma sheaths 
and oscillations; measurements and applications. Prerequisites: Electrical 
and Computer Engineering [ECE] 3510.

ECE 4570. Lasers and Their Applications. 3 Credits. 
(same as Nuclear Engineering [NU_ENG] 4382). An introductory course 
in lasers. The course treats the subject from both a conceptual viewpoint 
and from the application of Maxwell's equations, to develop the optical 
theory for lasers. The course includes approximately 10 classroom hours 
of laboratory work with lasers. Prerequisites: Physics [PHYSCS] 2760 
and Mathematics [MATH] 4110.

ECE 4580. Computational Neuroscience. 4 Credits. 
(same as Biological Science [BIO_SC] 4580 and Biological Engineering 
[BIOL_EN] 4575). Interdisciplinary course in biology and quantitative 
sciences with laboratory and modeling components. Explores basic 
computational and neurobiological concepts at the cellular and network 
level. Introduction to neuronal processing and experimental methods in
ECE 4610. Physical Electronics. 3 Credits.  
Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductors lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields. Prerequisite: Electrical and Computer Engineering [ECE] 3510.

ECE 4620. Introduction to BioMEMS. 3 Credits.  
Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers, chemical and gas sensors and biosensors. Graded on A/F basis only.

ECE 4630. Introduction to Optical Electronics. 3 Credits.  

ECE 4640. MEMS Laboratory. 4 Credits.  
The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Prerequisites: Physics [PHYSICS] 2760, Chemistry [CHEM] 1320, or Electrical and Computer Engineering [ECE] 2100; instructor’s consent.. Graded on A/F basis only.

ECE 4650. Semiconductor Device Theory. 3 Credits.  
Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation. Prerequisite: Electrical and Computer Engineering [ECE] 3610.

ECE 4655. Digital Image Processing. 3 Credits.  
(same as Computer Science [CMP_SC] 4650). This course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation. Prerequisites: Statistics [STAT] 4710 and Computer Science [CMP_SC] 2050 or instructor’s consent.

ECE 4670. Microelectronic Fabrication. 4 Credits.  
Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory. Prerequisite: Electrical and Computer Engineering [ECE] 3610.

ECE 4675. Digital Image Compression. 3 Credits.  
(same as Computer Science [CMP_SC] 4670) This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.) Prerequisite: Statistics [STAT] 4710 or instructor’s consent. Graded on A/F basis only.

ECE 4690. Design and Simulation of VLSI Circuits. 4 Credits.  
Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory. Prerequisite: Electrical and Computer Engineering [ECE] 4670.

ECE 4710. Communications Systems. 3 Credits.  
Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication. Prerequisites: Electrical and Computer Engineering [ECE] 3830.

ECE 4720. Introduction to Machine Learning and Pattern Recognition. 3 Credits.  
(Same as Computer Science [CMP_SC] 4720) This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problems of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications. Prerequisites: Computer Science [CMP_SC] 2050 and Statistics [STAT] 4710 or instructors consent.

ECE 4730. Introduction to Wireless Communication System. 3 Credits.  
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

ECE 4770. Electromechanical Conversion I. 3 Credits.  

ECE 4830. Introduction to Digital Signal Processing. 4 Credits.  
Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform. Prerequisites: Electrical and Computer Engineering [ECE] 2110, 2210, 3830.

ECE 4850. Image Processing. 3 Credits.  
(same as Computer Science [CMP_SC] 4650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

ECE 4870. Introduction to Computational Intelligence. 3 Credits.  
(same as Computer Science [CMP_SC] 4770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Prerequisite: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to preform the computer projects. Graded on A/F basis only.
ECE 4880. Micro/Nano Systems. 3 Credits.
Micro/nano systems including micromachining, material properties, micro- 
actuators, optical, RF, inertial/mechanical and acoustic MNEMS and M/ 
nanofluidic systems. Prerequisite: Electrical and Computer Engineering 
[ECE] 3610 or instructor’s consent. Graded on A-F basis only.

ECE 4910. Microwave Systems. 3 Credits.
Theory and applications of transmission systems with emphasis on 
transmission lines at low and high frequencies. Prerequisites: Electrical 
and Computer Engineering [ECE] 3510.

ECE 4920. Microwave Engineering. 3 Credits.
Wave equation, plane wave propagation, transmission line theory, Smith 
Chart analysis, impedance transformers, waveguides modes, basic 
antenna theory, impedance matching and tuning, basic microstrip 
and stripline circuits.

ECE 4930. Intermediate Electromagnetics. 4 Credits.
Course covers transmission lines, waveguides, microstrip 
electromagnetic circuits, and radiating systems. Prerequisites: Electrical 
and Computer Engineering [ECE] 3510.

ECE 4940. Antenna Theory, Design and Laboratory. 4 Credits.
Introduction to antenna theory, design and laboratory. Emphasis on 
engineering aspects of antenna systems, transmitting and receiving 
antenna parameters, various antennas. Prerequisites: Electrical and 
Computer Engineering [ECE] 3510.

ECE 4950. Microwave Principles. 4 Credits.
Maxwell’s Equations, transmission lines, plane wave propagation and 
reflection, waveguides, resonant cavities, microwave devices and 
components, radiation, radio wave propagation. Lecture and laboratory. 
Prerequisites: Electrical and Computer Engineering [ECE] 3510 and 
3410.

ECE 4970. Senior Capstone Design. 3 Credits.
Group Design Projects. Design methodology, project management, 
development of specifications, examination of alternatives, preparation 
of proposal. Lectures on safety, ethics, professionalism, and economics. 
Oral and written reports. Not for graduate credit. Prerequisites: Electrical 
and Computer Engineering [ECE] 3110 and senior standing. Restricted to 
ECE students only or instructor’s consent.

ECE 4980. Senior Capstone Design II. 2 Credits.
(same as Computer Science [CMP_SC] 4980). Completion of Electrical 
and Computer Engineering [ECE] 4970 design project. Design 
prototyping, testing, evaluation and preparation of documentation. 
Lectures on ethics, professionalism, safety, economic consideration. Oral 
and written reports. Not for graduate credit. Prerequisites: senior standing 
and Electrical and Computer Engineering [ECE] 4970.

ECE 4990. Undergraduate Research in Electrical Computer 
Engineering. 1-3 Credit.
Supervised independent study or project in electrical or computer 
engineering, culminating in a written report. Prerequisites: 
Undergraduate Program Director’s consent.

ECE 4995. Undergraduate Honors Research in Electrical Computer 
Engineering. 1-3 Credit.
Independent investigation or project in electrical or computer engineering 
to be presented as an undergraduate honors thesis. Prerequisites: 
Participation in the Electrical and Computer Engineering [ECE] Honors 
Program.

ECE 7001. Advanced Topics in Electrical and Computer 
Engineering. 3-4 Credit.
Current and new technical developments in electrical engineering. 
Prerequisite: graduate standing.

ECE 7010. Digital Computer Applications in Engineering. 3 Credits.
Use of digital computer for solution of engineering problems involving 
roots of equations, simultaneous equations, curve fitting, integration, 
differentiation and differential equations. Prerequisite: graduate standing 
and Mathematics [MATH] 2300.

ECE 7020. Energy Systems and Resources. 3 Credits. 
(same as Nuclear Engineering [NU_ENG] 7315). Analysis of present 
energy usage in Missouri, USA and the world, evaluation of emerging 
energy technologies and trends for the future. Economics and 
environmental impact of the developed technologies. Prerequisite: 
grade standing and Engineering [ENGINR] 2300.

ECE 7030. Introduction to Nuclear Reactor Engineering. 3 Credits. 
(same as Nuclear Engineering [NU_ENG] 7346). Engineering principles 
of nuclear power systems, primarily for the production of electrical 
energy. Prerequisites: graduate standing and Engineering [ENGINR] 
1200, 2300.

ECE 7040. Introduction to Nuclear Physics. 3 Credits.
Introduction of Quantum mechanics for non-physics majors. Course 
topics include nuclear properties; alpha, beta and gamma radioactive 
decay; and nuclear reactions. Graded on A-F basis only. Prerequisite: 
senior standing or graduate standing in engineering or equivalent 
mathematical preparation.

ECE 7150. Solid State Area Laboratory. 1 Credit.
Laboratory experiments involved with solid state theory and integrated 
circuit fabrication and testing. Prerequisites: graduate standing and 
Electrical and Computer Engineering [ECE] 4650 and 4670.

ECE 7170. Control Systems Laboratory. 1 Credit.
Experiments in computer process control and industrial automation; 
automated process modeling; control algorithm design; control simulation; 
direct digital real-time control; transducers; computer interfacing; 
industrial control mechanisms; Programmable Logic Controllers. 
Prerequisites: graduate standing and Electrical and Computer 
Engineering [ECE] 4310, 3210, 3110.

ECE 7220. Real Time Embedded Computing. 3 Credits.
Embedded systems development with real time constraints including 
RTOS, task management and synchronization, realtime scheduling 
algorithms, deadlocks, performance analysis and optimization, interfacing 
to external devices, and device drivers. Prerequisite: Electrical and 
Computer Engineering [ECE] 3220. Graded A-F basis only. Graduate 
Standing Required.

ECE 7250. VDHL and Programmable Logic Devices. 4 Credits.
Design techniques including module definition, functional partitioning, 
hardware design language descriptions and microprogramming; design 
examples include arithmetic units, programmable controllers, and 
microprocessors. Prerequisites: graduate standing and Electrical and 

ECE 7270. Computer Organization. 4 Credits.
Advanced computer architectures and programming; memory, memory 
management and cache organizations, parallel processing, graphical 
processor units for general programming. Prerequisite: Electrical and 
ECE 7280. Network Systems Architecture. 3 Credits.
The course covers network systems interconnects and switch fabrics, network considerations: and relevant networking applications at the network, transport and application layer. Graded on A-F basis only. Prerequisite: ECE 3210, ECE 3220.

ECE 7310. Feedback Control Systems. 4 Credits.
(same as Biological Engineering [BIOL_EN] 7310). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Prerequisites: graduate standing and Mathematics [MATH] 4100.

ECE 7330. Introduction to Mechatronics and Robotic Vision. 4 Credits.
Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuation function; robots and AI; microprocessor applications. Lecture and Laboratory. Prerequisites: graduate Electrical and Computer Engineering [ECE] 3220 or 4220 or a C++ Language course.

ECE 7335. Nuclear Safeguards Science and Technology. 3 Credits.
(same as Nuclear Engineering [NU_ENG] 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues. Prerequisite: Nuclear Engineering [NU_ENG] 4303/7303.

ECE 7340. Building Intelligent Robots. 4 Credits.
(Same as Computer Science [CMP_SC] 7730) Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: graduate standing and some programming experience.

ECE 7350. Programmable Logic Controllers. 4 Credits.
Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications. Prerequisite: junior standing or above.

ECE 7370. Automatic Control System Design. 3 Credits.
Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 4310.

ECE 7390. Computer Process Control. 3 Credits.
Role of digital computer in process control; digital controller design; computer interfacing; transducers; programmable logic controllers; process modeling; introduction to robotics. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 4310 and 3210.

ECE 7410. Power Electronics I. 4 Credits.
Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3410.

ECE 7430. Electronic Circuits and Signals II. 3 Credits.
Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3830 and 3410.

ECE 7450. Amplifier Analysis and Design. 3 Credits.
Design of electronic networks with application to instrumentation, control and communications systems. Practical specifications and problems in design. Lectures and projects. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 4430.

ECE 7470. Sustainable Electrical Energy Resources. 3 Credits.
Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid. Prerequisites: Electrical and Computer Engineering [ECE] 3470 or Engineering [ENGINR] 2100.

ECE 7510. Pulsed Power Engineering. 3 Credits.
Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 3510.

ECE 7530. Photonics. 3 Credits.
Introduction to the physical principles and optical materials used in diagnostics, optical communications, semiconductor and solid state lasers, optical fiber transmissions, optical detectors, optical signal processing. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 3510.

ECE 7550. Introduction to Plasmas. 3 Credits.
(same as Nuclear Science and Engineering [NU_ENG] 7375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 4830.

ECE 7570. Lasers and Their Applications. 3 Credits.
(same as Nuclear Science and Engineering [NU_ENG] 7382). An introductory course in lasers. The course treats the subject from both a conceptual viewpoint and from the application of Maxwell's equations, to develop the optical theory for lasers. The course includes approximately 10 classroom hours of laboratory work with lasers. Prerequisites: graduate standing and Physics [PHYSICS] 2760 and Mathematics [MATH] 4110.

ECE 7580. Computational Neuroscience. 4 Credits.
(Same as Biological Sciences [BIO_SC] 7580 and Biological Engineering [BIOL_EN] 7575). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology: modeling of neurons and neuron-networks. Prerequisites: Mathematics [MATH] 1500 or equivalent. Graded on A/F basis only.

ECE 7610. Physical Electronics. 3 Credits.
Introduction to physical principles of semiconductors and semiconductor devices; gas, solid state, and semiconductors lasers; electro-optics; plasma physics and gaseous electronics; materials interaction with electric and magnetic fields. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 3510.
ECE 7620. Introduction to BioMEMS. 3 Credits.

ECE 7630. Introduction to Optical Electronics. 3 Credits.

ECE 7640. MEMS Laboratory. 4 Credits.
The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Prerequisites: Physics [PHYSICS] 2760, Chemistry [CHEM] 1320 or Electrical and Computer Engineering [ECE] 2100; instructor’s consent. Graded on A/F basis only.

ECE 7650. Semiconductor Device Theory. 3 Credits.
Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 3610.

ECE 7655. Digital Image Processing. 3 Credits.
(same as Computer Science [CMP_SC] 7650). The course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation. Prerequisites: Statistics [STAT] 4710 and Computer Science [CMP_SC] 2050 or instructor’s consent.

ECE 7670. Microelectronic Fabrication. 4 Credits.
Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 3610.

ECE 7675. Digital Image Compression. 3 Credits.
(same as Computer Science [CMP_SC] 7670) This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.) Prerequisite: Statistics [STAT] 4710 or instructor’s consent. Graded on A/F basis only.

ECE 7690. Design and Simulation of VLSI Circuits. 4 Credits.
Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory. Prerequisite: graduate standing and Electrical and Computer Engineering [ECE] 4670.

ECE 7710. Communications Systems. 3 Credits.
Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3830.

ECE 7720. Introduction to Machine Learning and Pattern Recognition. 3 Credits.
(same as Computer Science [CMP_SC] 7720). This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problem of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications. Prerequisites: Computer Science [CMP_SC] 2050 and Statistics [STAT] 4710 or instructor’s consent.

ECE 7730. Introduction to Wireless Communication System. 3 Credits.
Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

ECE 7770. Electromechanical Conversion I. 3 Credits.

ECE 7810. Multimedia Engineering and Technology. 4 Credits.
(same as Computer Science [CMP_SC] 7810). Survey of multimedia applications. Capture, coding, storage, transmission, and software tools for developing productions involving text, graphics, images, animation, sound and video. Term projects. Lecture and laboratory. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3210 and 3830.

ECE 7830. Introduction to Digital Signal Processing. 4 Credits.
Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform. Prerequisites: graduate standing.

ECE 7850. Digital Image Processing. 3 Credits.
(same as Computer Science [CMP_SC] 7650). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation. Prerequisites: graduate standing.

ECE 7870. Introduction to Computational Intelligence. 3 Credits.
(same as Computer Science [CMP_SC] 7770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Prerequisites: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects. Graded on A/F basis only.

ECE 7880. Micro/Nano Systems. 3 Credits.
Micro/nano systems including micromachining, material properties, micro-actuators, optical, RF, inertial/mechanical and acoustic M/NEMS and M/
Nanofluidic systems. Prerequisite: Electrical and Computer Engineering [ECE] 3610 or instructor's approval. Graded on A/F basis only.

**ECE 7910. Microwave Systems. 3 Credits.**  
Theory and applications of transmission systems with emphasis on transmission lines at low and high frequencies. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3510.

**ECE 7920. Microwave Engineering. 3 Credits.**  
Wave equation, plane wave propagation, transmission line theory, Smith Chart analysis, impedance transformers, waveguides modes, basic antenna theory, impedance matching and tuning, basic microstrip and stripline circuits. Prerequisite: graduate standing.

**ECE 7930. Intermediate Electromagnetics. 4 Credits.**  
Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems Prerequisites: Electrical and Computer Engineering [ECE] 3510.

**ECE 7940. Antenna Theory, Design and Laboratory. 4 Credits.**  
Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, and various wire antennas. Prerequisite: Electrical and Computer Engineering [ECE] 3510.

**ECE 7950. Microwave Principles. 4 Credits.**  
Maxwell’s Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory. Prerequisites: graduate standing and Electrical and Computer Engineering [ECE] 3510 and 3410.

**ECE 8001. Advanced Topics in Electrical and Computer Engineering. 3 Credits.**  
Advanced Topics in Electrical and Computer Engineering.

**ECE 8010. Supervised Study in Electrical Engineering. 1-3 Credit.**  
Supervised individual study at the graduate level to be completed within the course of one semester in the form of a brief report. Graded on S/U basis only.

**ECE 8020. Superconductivity and its Applications. 3 Credits.**  

**ECE 8085. Problems in Electrical and Computer Engineering. 2-5 Credit.**  
Supervised investigation of an electrical engineering problem for an MS project. Study culminates in a project report. Graded on S/U basis only.

**ECE 8110. Preparing Engineering Faculty and Professionals I. 1 Credit.**  
Discussions on a variety of topics: Pedagogy - latest from cognitive science and learning theory, effective teaching, how a university functions, engineering teaching and research; how leading industries perform research and the importance of soft skills, etc. Graded on A/F basis only. Prerequisite: graduate standing in Engineering.

**ECE 8120. Preparing Engineering Faculty and Professionals II. 1 Credit.**  
Continues format of Electrical and Computer Engineering [ECE] 8110 with group discussions and seminars by experts on how to write an effective proposal, including a review of model proposals, model proposal reviews, and a 'hands-on' proposal writing followed by globalization and its effects on professionals. Graded on A/F only. Prerequisite: graduate standing in Engineering.

**ECE 8250. Digital Hardware Systems Design. 3 Credits.**  
(same as Computer Engineering and Computer Science [CMP_SC] 8250). Characteristics and parameters of various hardware subsystems including main memory, auxiliary memory, arithmetic units, card equipment, etc., and principles of organization into efficient system. Prerequisite: Electrical and Computer Engineering [ECE] 4250.

**ECE 8260. Computer Networks. 3 Credits.**  
Concepts and goals of computer networking, structure of computer networks, OSI model and layers, network control, analysis, design, and management, data communication techniques including fiber optics, WAN, MAN and LAN architectures and protocols, inter-networking, case studies, and hands-on studying the performance by analytic modeling and computer simulation. Prerequisite: Computer Science [CMP_SC] 4270.

**ECE 8270. Parallel Computer Architecture. 3 Credits.**  
The course covers parallel computer architecture (general purpose multi-core and many-core processors, shared and distributed memory systems, clusters). Emphasis will be given to both architectural and programmability aspects. Prerequisite: Electrical and Computer Engineering [ECE] 4270/7270, 4220/7220 or Computer Science [CMP_SC] 4250/7250. Graded on A/F basis only.

**ECE 8320. Nonlinear Systems. 3 Credits.**  
Nonlinear systems including topics such as limit cycles, phase plane analysis, bifurcation, Lyapunov stability, input-output stability, passivity. Topics from control such as feedback linearization, sliding control, and Lyapunov redesign. Prerequisite: Electrical and Computer Engineering [ECE] 4310. Graded on A/F basis only.

**ECE 8330. Neural Networks for Learning Control. 3 Credits.**  
Neurocomputing techniques and structures for modeling, learning control, control stabilization, and optimization of performance over time. Prerequisites: at least on 4000, 7000 or 8000- level control course.

**ECE 8340. Multivariable Control System Design. 3 Credits.**  
This course will cover techniques in multivariable control system design and analysis, including LOG H-2 design, H-ooh design, LTR, robust performance, and selected adaptive and learning control techniques for nonlinear control. Prerequisites: Electrical and Computer Engineering [ECE] 8310 or acceptable equivalent.

**ECE 8350. Optimal Control Theory. 3 Credits.**  

**ECE 8360. Stochastic Optimal Estimation and Control. 3 Credits.**  
Surveys random process theory; stochastic control and optimization; estimation and filtering based on Kalman-Bucy techniques; stochastic stability; adaptive and learning control systems. Prerequisites: Electrical and Computer Engineering [ECE] 8310.

**ECE 8370. Digital and Sample-Data Systems. 3 Credits.**  
ECE 8410. Power Electronics II. 3 Credits.
Circuit concepts and analysis techniques for transistor switching regulators, thyristor choppers, transistor inverters, self-commutated thyristor inverters and cycloconverters. Prerequisite: Electrical and Computer Engineering [ECE] 4410.

ECE 8420. Power Electronic Drives. 3 Credits.
Advanced study of DC and AC motor drives controlled by power electronic methods, including phase controlled rectifier, DC chopper, cycloconverter, variable frequency inverters. Prerequisites: Electrical and Computer Engineering [ECE] 8410, 8310.

ECE 8430. Digital Electronics. 3 Credits.
Electronic hardware aspects of digital systems. Includes state-of-the-art information on integrated-circuit logic devices and their applications. Prerequisites: Electrical and Computer Engineering [ECE] 4690.

ECE 8510. Advanced Electromagnetics. 3 Credits.
Advanced theoretical electromagnetic theory. Investigation of summation problems with general boundary conditions, time varying fields, and time harmonic currents. Basic applications and relationships in classical and relativistic physics. Prerequisites: Electrical and Computer Engineering [ECE] 3510.

ECE 8530. Advanced Photonics. 3 Credits.
Concentrated study of optical system design, including integrated optics, semiconductor lasers, quantum wells, optical materials, and electro-optical effects used in modern optical systems. Prerequisites: Electrical and Computer Engineering [ECE] 4530.

ECE 8570. Theoretical Neuroscience I. 3 Credits.
Properties of nerve cells including membrane potential, action potential, ion channel dynamics, GHK equation, dynamical properties of excitable membranes. Equilibria, stability, eigenvalues and phase portraits. Conductance based models, bifurcations, excitability. Prerequisite: Electrical and Computer Engineering [ECE] 4310 and Graduate Standing. Graded on A/F basis only.

ECE 8580. Theoretical Neuroscience II. 3 Credits.
Neural encoding and decoding including firing rate and spike statistics, reverse correlation and visual receptive fields. Cellular and synaptic biophysics. Adaptation and learning including plasticity, classical conditioning, reinforcement learning and representational learning. Prerequisite: Electrical and Computer Engineering [ECE] 8570 and Graduate standing. Graded on A/F basis.

ECE 8610. Power Semiconductor Devices. 3 Credits.
A study of the semiconductor devices used in switch-mode power converter circuits. Course surveys the field and discusses selected devices in depth. Prerequisites: Electrical and Computer Engineering [ECE] 8610, 4630 and 4650.

ECE 8620. Advanced Microelectromechanical Systems. 3 Credits.
MEMS development cycle, overview of microfabrication, microsystem modeling, mechanical analysis, thermal analysis, transduction mechanism, case studies; Micromirror, accelerometers, pressure sensors, force sensors, RF MEMS switches, Infrared sensors, and Microsystem packaging.

ECE 8630. Numerical Analysis of Semiconductor Devices. 3 Credits.
Basic equations of semiconductor device analysis, associated boundary conditions, and physical models; discretization schemes and numerical solution methods; application to one and two dimensional bipolar and field effect device structures in thermal equilibrium and under DC steady state and transient operating conditions. Prerequisites: Electrical and Computer Engineering [ECE] 4630 and 4650.

ECE 8640. Advanced Integrated Circuits. 3 Credits.
Fundamentals of advanced integrated circuit design; diffusion, ion implantation and epitaxy; MOS and bipolar techniques; survey of current LSI design, fabrication and testing.

ECE 8650. Solid State Theory I. 3 Credits.
Principles of quantum and wave mechanics as applied to solid state; Boltzman and Fermi statistics; energy band theory of crystals; electrons, holes in semiconductors. Current flow in P-N junctions, semiconductor devices.

ECE 8660. Solid State Theory II. 3 Credits.
Fundamentals of crystallography; application of X-ray analysis to the study of crystallinity. Quantum mechanical solution for the wave function of an electron in a solid; concepts of reciprocal space. Prerequisites: Electrical and Computer Engineering [ECE] 8650 or Physics [PHYSCS] 8150.

ECE 8680. Quantum Electronics. 3 Credits.

ECE 8690. Computer Vision. 3 Credits.
(same as Computer Science [CMP_SC] 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Prerequisite: Electrical and Computer Engineering [ECE] 4650/7650 or Computer Science [CMP_SC] 4650/7650 or instructor’s consent. Graded on A/F basis only.

ECE 8700. Nonlinear Filtering. 3 Credits.
One of the more recent trends in computer vision research in the pursuit of human-like capability is the coupling of cognition and vision into cognitive computer vision. This course will emphasize the advanced topics in applying machine learning techniques in computer vision. Prerequisite: Electrical and Computer Engineering [ECE] 4850/7850 or Computer Science [CMP_SC] 4650/7650 or consent of instructor. Graduate standing required.

ECE 8710. Advanced Communications Systems. 3 Credits.
Advanced topics on the performance of communication systems, including probability and random processes, signal space representation, optimal receivers, matched filtering, coherent detection of signals in noise, probability of error, and bit error rate. Prerequisites: Electrical and Computer Engineering [ECE] 4830 and 4710.

ECE 8720. Microwave and RF Design of Wireless Systems. 3 Credits.
Introduces fundamentals of Microwave/RF design and analysis of modern wireless systems. Topics include the following: wireless system components, receiver design, performance issues, noise, distortion, measurement techniques and computer-aided design techniques. Prerequisite: graduate standing.

ECE 8725. Supervised Learning. 3 Credits.
(same as Computer Science [CMP_SC] 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support...
vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Prerequisites: Computer Science [CMP_SC] / Electrical and Computer Engineering [ECE] 4720/7720 graduate standing or instructor’s consent. Graded on A/F basis only.

**ECE 8730. Fundamentals of Radar Signal Processing. 3 Credits.**
Study of radar signal processing fundamentals. Topics include radar systems, signal models, sampling and quantization of radar signals, radar waveforms, Doppler processing, detection fundamentals, radar imaging. Prerequisite: graduate standing.

**ECE 8735. Unsupervised Learning. 3 Credits.**
(same as Computer Science [CMP_SC] 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Prerequisite: Computer Science [CMP_SC] / Electrical and Computer Engineering [ECE] 4720/7720 or consent of instructor. Graded on A/F basis only.

**ECE 8740. Digital Signal Processing in Remote Sensing. 3 Credits.**
Study of digital signal processing in remote sensing applications. Investigation of digital signal processing methods for visible, near infrared, thermal infrared, and microwave wavelength sensors. Prerequisite: graduate standing.

**ECE 8750. Digital Signal Processing in Telecommunications. 3 Credits.**
Applications of digital signal processing in telecommunication systems; oversampling and quantizations, Delta-Sigma modulation, linear predictive speech coding, adaptive filtering, echo canceller, adaptive receivers and equalizers for wireless communication, digital cellular, CDMA. Prerequisites: Electrical and Computer Engineering [ECE] 4830 and 4710.

**ECE 8770. Advanced Mobile Communication Systems. 3 Credits.**
Channel extimation and equalization, multi-user detection, diversity combining, multi-carrier and OFDM, Standards of 3G Wireless Communication Systems such as EDGE, CDMA 2000 and UMTS.

**ECE 8780. State Variable Methods in Automatic Control. 3 Credits.**

**ECE 8790. Digital Processing of SAR Data. 3 Credits.**
Study of digital processing of synthetic aperture radar (SAR) data. Topics cover SAR data fundamentals including concepts, signal processing, pulse compression, signal properties, processing algorithms, and image processing. Prerequisites: graduate standing.

**ECE 8810. Advanced Digital Signal Processing. 3 Credits.**
Topics in digital signal analysis and filtering. Including hardware implementation, speech synthesis and recognition, multi-dimensional transforms, random-signal concepts, design methods and computer aids to analysis and design. Prerequisite: Electrical and Computer Engineering [ECE] 4830.

**ECE 8820. Pattern Recognition. 3 Credits.**

**ECE 8830. Visual Signal Processing and Communications. 3 Credits.**
Threats visual digital signal processing and network communications covering both theory and application of coding, compression and communications via the web. Covers such standards as JPEG, MPEG-2 and MPEG-4 as well as motion detection. Graded on A/F basis only. Graduate standing required.

**ECE 8840. Artificial Intelligence. 3 Credits.**
Concepts, theories, and models pertaining to neural nets, pattern recognition, learning systems, and programmed problem solving.

**ECE 8850. Digital Image Processing. 3 Credits.**

**ECE 8855. Advanced Image Processing. 3 Credits.**
(same as Computer Science [CMP_SC] 8650). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods. Prerequisites: CMP_SC 4650/7650 or instructor’s consent. Graduate Standing Required.

**ECE 8860. Probability and Stochastic Processes for Engineers. 3 Credits.**
Introduction to probability, multidimensional complex (phaser) random variables and stochastic processes in electrical engineering. Prerequisites: Electrical and Computer Engineering [ECE] 4830, 4710, or 8620.

**ECE 8870. Modeling and Management of Uncertainty. 3 Credits.**
(same as Computer Science [CMP_SC] 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Prerequisites: Electrical and Computer Engineering [ECE] 4870/7870 or instructor’s consent. Graded on A/F basis only.

**ECE 8880. System Modeling. 3 Credits.**

**ECE 8890. Neural Networks. 3 Credits.**
(same as Computer Science [CMP_SC] 8770). The course will consider computing systems based on neural networks and learning models along with implementations and applications of such systems. Prerequisites: Electrical and Computer Engineering [ECE] 4870/7870 or instructor’s consent.

**ECE 8910. High Frequency Transmission and Radiation. 3 Credits.**
Skin effect; theory of transmission lines, wave guides, resonators.

**ECE 8920. Antennas. 3 Credits.**
Point and aperture sources; simple antennas; antenna array; data-processing antennas; and other broadband and directive antennas.
Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.

ECE 9001. Advanced Topics in Electrical and Computer Engineering. 3 Credits.
Advanced Topics in Electrical and Computer Engineering.

Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.

Emergency Medicine (EMR_ME)

EMR_ME 6243. ABS Emergency Medicine Research. 5-10 Credit.
ABS Emergency Medicine Research.

EMR_ME 6245. ABS Emergency Medicine Research and Review. 5-10 Credit.
ABS Emergency Medicine Research and Review.

EMR_ME 6460. Emergency Medicine. 5 Credits.
Emergency Medicine.

EMR_ME 6760. Emergency Medicine - Rural. 5 Credits.
Emergency Medicine - Rural.

EMR_ME 6860. EMERGENCY MEDICINE. 5 Credits.
Emergency Medicine.

Engineering (ENGINR)

ENGINR 1000. Introduction to Engineering. 0-2 Credit.
This course will introduce the students to university life, discuss learning strategies for success and give an overview of the engineering profession and each of the main engineering disciplines.

ENGINR 1001. Experimental Course. 3-99 Credit.
For freshman-level students. Content and number of credit of hours to be listed in Schedule of Courses.

ENGINR 1100. Engineering Graphics Fundamentals. 2 Credits.
Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information. Restricted to Engineering Students Only, or by departmental consent.

ENGINR 1110. Solid Modeling for Engineering Design. 1 Credit.
Introduction to 3D (three dimensional) modeling techniques using computer aided design software. Topics include model creation techniques and advanced graphical presentation practices. Prerequisite: Engineering [ENGINR] 1100 and instructor’s consent. Restricted to Engineering Students Only or by departmental consent. Graded on A/F basis only.

ENGINR 1200. Statics and Elementary Strength of Materials. 3 Credits.
Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials. Prerequisites: Mathematics [MATH] 1500 and Physics [PHYSICS] 2750 concurrently. Restricted to Engineering Students only or with departmental consent.

For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.

ENGINR 2100. Circuit Theory for Engineers. 3 Credits.

ENGINR 2100H. Circuit Theory for Engineers - Honors. 3 Credits.
DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power. Prerequisite: Mathematics [MATH] 1700. Honors eligibility required.

ENGINR 2200. Intermediate Strength of Materials. 3 Credits.
Elements of mechanics of elastic materials. Prerequisite: Engineering [ENGINR] 1200. Restricted to Engineering Students only or with departmental consent.

ENGINR 2300. Engineering Thermodynamics. 3 Credits.
(same as Mechanical and Aerospace Engineering [MAE] 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. Prerequisites: Physics [PHYSICS] 2750. Restricted to Engineering Students Only or departmental consent.

ENGINR 2500. A History of Modern Engineering. 3 Credits.
This course will introduce the student to significant engineering events that have shaped the late modern-area from the French Revolution to the end of World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Graded on A/F basis only.

ENGINR 2500H. A History of Modern Engineering - Honors. 3 Credits.
This course will introduce the student to significant engineering events that have shaped the late modern-area from the French Revolution to the end of the World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Honors eligibility required. Graded on A/F basis only.

ENGINR 2600H. History of Human Spaceflight - Honors. 3 Credits.
This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A/F basis only. Honors eligibility required.

ENGINR 3000. Short Term Education Abroad. 3 Credits.
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Instructor’s consent required. Students must be in Academic Good Standing. Graded A-F only.

ENGINR 3000H. Short Term Education Abroad - Honors. 3 Credits.
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only. Prerequisite: Instructor’s consent required. Students must be in Academic Good Standing.
ENGINR 4000. Study Abroad Technical Elective. 3-6 Credit.
This course is designed to provide students with an international experience while also potentially fulfilling a required engineering technical elective course. Engineering technical electives are courses that are relevant or related to engineering from a broad range of fields including math and science as well as the various engineering departments. This course will be used as the umbrella course for all Engineering Technical Elective Study Abroad Opportunities and each course will provide a separate section number.

ENGINR 4085. Problems in Engineering. 0-6 Credit.
Special design, experimental or analytical problems in engineering. May be repeated for credit. Graded on A-F basis only. Prerequisite: Must be enrolled in a graduate degree program.

ENGINR 4890. Multi-disciplinary Senior Engineering Capstone Design. 3 Credits.
Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Prerequisites: Senior Standing and Instructor consent. Student's department consent also required. Graded A-F only.

ENGINR 8100. Design and Development of Biomedical Innovations. 3 Credits.
This course takes students through the process of brainstorming and working out a solution to a medical need, and then producing a product. Outputs may include the development of a physical prototype through interactions with the College of Engineering rapid prototype facility. May be repeated for credit. Graded on A-F basis only. Prerequisite: Must be enrolled in a graduate degree program.

English (ENGLSH)

ENGLSH 1000. Exposition and Argumentation. 3 Credits.
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English [ENGLSH] 1000 is a prerequisite for any Writing Intensive course.

ENGLSH 1000H. Honors Exposition English. 3 Credits.
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English [ENGLSH] 1000 is a prerequisite for any Writing Intensive course. Honors eligibility required.

ENGLSH 1060. Human Language. 3 Credits.
(same as Anthropology [ANTHRO] 1060, Communication Science and Disorders [C_S_D] 1060 and Linguistics [LINGST] 1060). General introduction of various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

ENGLSH 1100. Reading Literature. 3 Credits.
Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

ENGLSH 1106. Reading Literature, Beginnings to 1603. 3 Credits.
See English [ENGLSH] 1100 course for description.

ENGLSH 1107. Reading Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 1100 course for description.

ENGLSH 1108. Reading Literature, 1789-1890. 3 Credits.
See English [ENGLSH] 1100 course for description.

ENGLSH 1109. Reading Literature, 1890 to Present. 3 Credits.
See English 1100 course for description.

ENGLSH 1160. Themes in Literature. 3 Credits.
Topics (e.g., The Idea of Progress, Images of Women) announced at time of registration. No more than six hours may be taken in the Themes in Literature series.

ENGLSH 1166. Themes in Literature, Beginnings to 1603. 3 Credits.
See English [ENGLSH] 1160 for course description.

ENGLSH 1167. Themes in Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 1160 for course description.

ENGLSH 1168. Themes in Literature, 1789 to 1890. 3 Credits.
See English [ENGLSH] 1160 for course description.

ENGLSH 1169. Themes in Literature, 1890 to Present. 3 Credits.
See English 1160 for course description.

ENGLSH 1200. Readings in British Literature. 3 Credits.
Focuses on reading and interpreting selected texts in British literature. No more than six hours may be taken in Readings in British Literature Series.

ENGLSH 1206. Readings in British Literature, Beginning to 1603. 3 Credits.
See English [ENGLSH] 1200 for course description.

ENGLSH 1207. Readings in British Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 1200 for course description.

ENGLSH 1208. Readings in British Literature, 1789 to 1890. 3 Credits.
See English [ENGLSH] 1200 for course description.

ENGLSH 1209. Readings in British Literature, 1890 to Present. 3 Credits.
See English 1200 for course description.

ENGLSH 1210. Introduction to British Literature. 3 Credits.
A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of British literature that appropriately demonstrate such concepts, terms, and practices. This course is recommended for prospective majors. Graded on A/F basis only.

ENGLSH 1300. Readings in American Literature. 3 Credits.
Focuses on reading and interpreting selected texts in American literature. No more than six hours may be taken in the Readings in American Literature series.

ENGLSH 1307. Readings in American Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 1300 for course description.

ENGLSH 1308. Readings in American Literature, 1789 to 1890. 3 Credits.
See English [ENGLSH] 1300 for course description.

ENGLSH 1309. Readings in American Literature, 1890 to Present. 3 Credits.
See English 1300 for course description.
ENGLSH 1310. Introduction to American Literature. 3 Credits.
A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of American literature that appropriately demonstrate such concepts, terms, and practices. This course is recommended for prospective English Majors. Graded on A/F basis only.

ENGLSH 1310H. Introduction to American Literature - Honors. 3 Credits.
A basic introduction to the concepts, terms, and practices commonly encountered in literary study, presented by way of texts from the history of American literature that appropriately demonstrates such concepts, terms, and practices. Honors eligibility required. Graded A-F only.

ENGLSH 1510. Creative Writing: Introduction to Fiction. 3 Credits.
Introduces basic narrative techniques, including writing original stories.

ENGLSH 1520. Creative Writing: Introduction to Nonfiction Prose. 3 Credits.
Introduces the range and basic techniques of creative nonfiction, including composing original work in the genre.

ENGLSH 1530. Creative Writing: Introduction to Poetry. 3 Credits.
Introduces basic poetic techniques, including writing original poems.

ENGLSH 1700. Introduction to Folklore Genres. 3 Credits.
(same as Anthropology [ANTHRO] 1150). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people’s daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A/F basis only.

ENGLSH 1800. Introduction to Film Studies. 3 Credits.
(same as Film Studies [FILM_S] 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. Prerequisites:-freshman and sophomores only or instructor’s consent. No credit for students who have completed Film Studies [FILM_S] 2810. Graded on A/F basis only.

ENGLSH 2000. Studies in English. 1-3 Credit.
Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series.

ENGLSH 2000H. Studies in English - Honors. 1-3 Credit.
Underclass topics. Subjects vary from semester to semester. No more than six hours may be taken in the Topics in English Studies series. Honors eligibility required.

ENGLSH 2005. Topics in English - Humanities. 3 Credits.
Underclass topics. Subjects vary from semester to semester. May be repeated to 6 hours maximum.

ENGLSH 2006. Studies in English, Beginning to 1603. 1-3 Credit.

ENGLSH 2007. Studies in English, 1603 to 1789. 1-3 Credit.

ENGLSH 2008. Studies in English, 1789 to 1890. 1-3 Credit.

ENGLSH 2009. Studies in English, 1890 to Present. 1-3 Credit.

ENGLSH 2010. Intermediate Composition. 3 Credits.
Provides intensive guided practice in expository and persuasive writing. Prerequisite: English [ENGLSH] 1000 or equivalent.

ENGLSH 2015H. Theory and Practice of Tutoring Writing Seminar - Honors. 3 Credits.
(same as General Honors [GN_HON] 2015H). Addresses both the theory and practice of tutoring and the foundations of good writing. This course also qualifies students for a part-time job working as Writing Lab/Online Writery tutors in future semester. Honors eligibility required. Prerequisites: English [ENGLSH] 1000; instructor’s consent.

ENGLSH 2030. Professional Writing. 3 Credits.
Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation. Prerequisite: English [ENGLSH] 1000.

ENGLSH 2100. Writing About Literature. 3 Credits.
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis. Prerequisite: English [ENGLSH] 1000.

ENGLSH 2100H. Writing About Literature - Honors. 3 Credits.
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis. Prerequisite: English [ENGLSH] 1000. Honors eligibility required.

ENGLSH 2140. Twentieth-Century Literature. 3 Credits.
A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time. Prerequisite: English [ENGLSH] 1000.

ENGLSH 2150. Popular Literature. 3 Credits.
Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes. Prerequisite: English [ENGLSH] 1000.

ENGLSH 2155. Introduction to World Literatures. 3 Credits.
Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.

ENGLSH 2156. Introduction to World Literatures, Beginnings to 1603. 3 Credits.
See English [ENGLSH] 2155 for course description.

ENGLSH 2157. Introduction to World Literatures, 1603 to 1789. 3 Credits.
See English [ENGLSH] 2155 for course description.

ENGLSH 2158. Introduction to World Literatures, 1789 to 1890. 3 Credits.
See English [ENGLSH] 2155 for course description.

ENGLSH 2159. Introduction to World Literatures, 1890 to Present. 3 Credits.
See English [ENGLSH] 2155 for course description.

ENGLSH 2160. Major Authors. 3 Credits.
Focuses on the works of a single writer (e.g., Shakespeare) or set of writers (e.g., William Faulkner and Flannery O’Connor). Topic announced at time of registration. Prerequisite: English [ENGLSH] 1000. No more than six hours may be taken in the Major Authors series.
ENGLSH 2166. Major Authors, Beginning to 1603. 3 Credits.  
See English [ENGLSH] 2160 for course description.

ENGLSH 2167. Major Authors, 1603 TO 1789. 3 Credits.  
See English [ENGLSH] 2160 for course description.

ENGLSH 2168. Major Authors, 1789 to 1890. 3 Credits.  
See English [ENGLSH] 2160 for course description.

ENGLSH 2169. Major Authors, 1890 to Present. 3 Credits.  
See English [ENGLSH] 2160 for course description.

ENGLSH 2180. Introduction to Women’s Literature. 3 Credits.  
(same as Women’s and Gender Studies [WGST] 2180). A study of  
traditional and nontraditional literature written by women from the  
perspective of feminist themes-love, power, work, family and other  
relations. Prerequisite: English [ENGLSH] 1000. No more than six  
hours may be taken in the Introduction to Women’s Literature series.

ENGLSH 2186. Introduction to Women’s Literature, Beginning to  
1603. 3 Credits.  
(same as Women’s and Gender Studies [WGST] 2186). See English  
[ENGLSH] 2180 for course description.

ENGLSH 2187. Introduction to Women’s Literature, 1603 to 1789. 3  
Credits.  
(same as Women’s and Gender Studies [WGST] 2187). See English  
[ENGLSH] 2180 for course description.

ENGLSH 2188. Introduction to Women’s Literature, 1789 to 1890. 3  
Credits.  
(same as Women’s and Gender Studies [WGST] 2188). See English  
[ENGLSH] 2180 for course description.

ENGLSH 2189. Introduction to Women’s Literature, 1890 to Present. 3  
Credits.  
(same as Women’s and Gender Studies [WGST] 2189). See English  
[ENGLSH] 2180 for course description.

ENGLSH 2200. Studies in British Literature. 3 Credits.  
Topic (e.g., Gothic Literature, The Domestic Novel) announced at time  
of registration. Prerequisite: English [ENGLSH] 1000. No more than six  
hours may be taken in the Topics in British Literature series.

ENGLSH 2200H. Studies in British Literature - Honors. 3 Credits.  
Topic (e.g., Gothic Literature, The Domestic Novel) announced at time  
of registration. Prerequisite: English [ENGLSH] 1000. No more than six  
hours may be taken in the Topics in British Literature series. Honors  
eligibility required.

ENGLSH 2206. Studies in British Literature, Beginning to 1603. 3  
Credits.  
See English [ENGLSH] 2200 for course description.

ENGLSH 2207. Studies in British Literature, 1603 to 1789. 3 Credits.  
See English [ENGLSH] 2200 for course description.

ENGLSH 2208. Studies in British Literature, 1789 to 1890. 3 Credits.  
See English [ENGLSH] 2200 for course description.

ENGLSH 2209. Studies in British Literature, 1890 to Present. 3  
Credits.  
See English [ENGLSH] 2200 for course description.

ENGLSH 2300. Studies in American Literature. 3 Credits.  
Topic (e.g., American Culture, The Frontier) announced at time of  
registration. Prerequisite: English [ENGLSH] 1000. No more than six  
hours may be taken in the Topics in American Literature series.

ENGLSH 2306. Studies in American Literature, Beginning to 1603. 3  
Credits.  
See English [ENGLSH] 2300 for course description.

ENGLSH 2307. Studies in American Literature, 1603 to 1789. 3  
Credits.  
See English [ENGLSH] 2300 for course description.

ENGLSH 2308. Studies in American Literature, 1789-1890. 3 Credits.  
See English [ENGLSH] 2300 for course description.

ENGLSH 2309. Studies in American Literature, 1890 to Present. 3  
Credits.  
See English [ENGLSH] 2300 for course description.

ENGLSH 2400. Introduction to African Diaspora Literature. 3 Credits.  
(same as Black Studies [BL_STU] 2400). Introduces students to African  
Diaspora literature with an emphasis on literature written originally  
in English. Prerequisite: English [ENGLSH] 1000. No more than six  
hours may be taken in the Introduction to African Diaspora Literature series.

ENGLSH 2407. Introduction to African Diaspora Literature, 1603 to  
1789. 3 Credits.  
(same as Black Studies [BL_STU] 2407). See English [ENGLSH] 2400  
for course description.

ENGLSH 2408. Introduction to African Diaspora Literature, 1789 to  
1890. 3 Credits.  
(same as Black Studies [BL_STU] 2408). See English [ENGLSH] 2400  
for course description.

ENGLSH 2409. Introduction to African Diaspora Literature, 1890 to  
Present. 3 Credits.  
(same as Black Studies [BL_STU] 2409). See English [ENGLSH] 2400  
for course description.

ENGLSH 2490. Introduction to Native Studies. 3 Credits.  
(Same as PEA_ST 2490) Introduction to the field of Native Studies.  
Topics include indigenous knowledge, culture change and continuity,  
history and misrepresentation, politics and political history, and global  
indigenous relationships. Graded on A-F basis only.

ENGLSH 2510. Creative Writing: Intermediate Fiction. 3 Credits.  
Provides intensive guided practice in the writing of short fiction.  
Prerequisite: English [ENGLSH] 1510 or equivalent.

ENGLSH 2520. Creative Writing: Intermediate Nonfiction Prose. 3  
Credits.  
Provides guided practice in the writing of creative nonfiction. Prerequisite:  
English [ENGLSH] 1520 or equivalent.

ENGLSH 2530. Creative Writing: Intermediate Poetry. 3 Credits.  
Provides intensive guided practice in the writing of poetry. Prerequisite:  
English [ENGLSH] 1530 or equivalent.

ENGLSH 2560. Beginning Playwriting. 3 Credits.  
(same as Theatre [THEATR] 2920). Study and practice of playwriting  
fundamentals; emphasizes the one-act play.

ENGLSH 2700. Introduction to Folklore Field Research. 3 Credits.  
(same as Anthropology [ANTHRO] 2150). Course will focus on the  
specifics of how to identify, collect, preserve and document folklore within  
communities. Prerequisite: English [ENGLSH] 1000.

ENGLSH 2770. Introduction to Oral Literature. 3 Credits.  
An introduction to works of verbal art from living oral tradition (e.g. Native  
American and African-American) and to some of our most important
literary works with roots in oral tradition (e.g., the Bible, the Iliad, and the Odyssey, and Beowulf). Prerequisite: ENGLSH 1000.

ENGLSH 2830. American Film History I, 1895-1950. 3 Credits. (same as Film Studies [FILM_S] 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed English [ENGLSH]/Film Studies [FILM_S] 1810. Prerequisite: English [ENGLSH] 1000, English [ENGLSH]/Film Studies [FILM_S] 1800.

ENGLSH 2840. American Film History II, 1950-Present. 3 Credits. (same as Film Studies [FILM_S] 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed English [ENGLSH]/Film Studies [FILM_S] 1820. Prerequisite: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800.

ENGLSH 2860. Film and Genres. 3 Credits. (same as Film Studies [FILM_S] 2860). Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 2680. Prerequisite: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800.

ENGLSH 2870. Film and Literature. 3 Credits. (same as Film Studies [FILM_S] 2870). Explores the complex interplay between film and literature in order to gain an understanding of the possibilities and problems involved in the transposition from literature to film. Prerequisites: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800. Graded on A/F basis only.

ENGLSH 2945. Service Learning in English. 1-3 Credit. Students perform volunteer service and complete course requirements, which may include class meetings and written and oral assignments. May be repeated with departmental consent. Graded on a S/U basis only. Does not meet A&S general education requirements. Prerequisite: instructor's consent.

ENGLSH 3010. Advanced Composition. 3 Credits. An intensive writing workshop in which student essays and related texts receive close reading and analysis. Focus (e.g. The Essay, The Research Paper) announced at time of registration. Prerequisite
g

ENGLSH 3080. Sexuality and Gender Theory. 3 Credits. (same as Women's and Gender Studies [WGST] 3080). Examination of major theoretical approaches and debates in the study of gender and sexuality, with particular attention to the intersection of culture, representation, and identity. May be repeated to 6 hours with department consent. Prerequisite: sophomore standing.

ENGLSH 3100. Introduction to Literary Theory. 3 Credits. Introduction to the range of theoretical approaches to the study of literature; intended as a broad survey of literary theory, whether from the Classical era onward or 20th century literary theory and beyond. Prerequisite: English [ENGLSH] 1000 and sophomore standing.

ENGLSH 3110. Special Themes in Literature. 1-3 Credit. Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. Prerequisites: English [ENGLSH] 1000 or equivalent and sophomore standing. No more than six hours may be taken in the Special Themes in Literature series.

ENGLSH 3110H. Special Themes in Literature - Honors. 1-3 Credit. Topics (e.g., Postmodernism, Representations of Nature) announced at time of registration. No more than six hours may be taken in the Special Themes in Literature series. Prerequisites: ENGLSH 1000 or equivalent and sophomore standing. Honors eligibility required.

ENGLSH 3116. Special Themes in Literature, Beginning to 1603. 3 Credits. See English [ENGLSH] 3110 for course descriptions.

ENGLSH 3117. Special Themes in Literature, 1603 to 1789. 3 Credits. See English [ENGLSH] 3110 for course descriptions.

ENGLSH 3118. Special Themes in Literature, 1789 to 1890. 3 Credits. See English [ENGLSH] 3110 for course descriptions.

ENGLSH 3119. Special Themes in Literature, 1890 to Present. 3 Credits. See English [ENGLSH] 3110 for course descriptions.

ENGLSH 3170. World Dramatic Literature. 3 Credits. (same as Theatre [THEATR] 3700). Survey of world drama from Greeks to present, focusing on structure, theory, and performance. Graded on A/F basis only. Prerequisite: sophomore standing.

ENGLSH 3180. Survey of American Literature. 3 Credits. (same as Women’s and Gender Studies [WGST] 3180). A study of writing by women from the Middle Ages to the present. Prerequisite: sophomore standing.

ENGLSH 3180H. Survey of Women Writers - Honors. 3 Credits. A study of writing by women from the Middle Ages to the present. Prerequisite: sophomore standing. Honors eligibility required.

ENGLSH 3200. Survey of British Literature: Beginnings to 1784. 3 Credits. Historical survey from beginnings of British literature through the age of Johnson, with readings representing significant writers, works and currents of thought. Prerequisite: English [ENGLSH] 1000 or equivalent.

ENGLSH 3210. Survey of British Literature: Romanticism to the Present. 3 Credits. Historical survey of British literature from the Romantic period to the present, emphasizing important writers and significant intellectual and cultural movements. Prerequisite: English [ENGLSH] 1000.

ENGLSH 3300. Survey of American Literature: Beginnings to 1865. 3 Credits. A survey of major writers and movements in American literature from Colonialism to Romanticism. Prerequisite: English [ENGLSH] 1000 or equivalent.

ENGLSH 3310. Survey of American Literature: 1865-Present. 3 Credits. A survey of major writers and movements in American literature from realism to postmodernism. Prerequisite: English [ENGLSH] 1000 or equivalent.

ENGLSH 3400. Survey of African American Literature, Beginnings to 1900. 3 Credits. (same as Black Studies [BL_STU] 3400). A survey of major authors and movements in African American literature from its beginnings to 1900. Prerequisite: English [ENGLSH] 1000.

ENGLSH 3410. Survey of African American Literature, 1900-Present. 3 Credits. (same as Black Studies [BL_STU] 3410). A survey of major authors and movements in African American literature from 1900 to the present. Prerequisite: English [ENGLSH] 1000.
ENGLISH 3420. Periods and Genres in African Diaspora Literature. 3 Credits.
(same as Black Studies [BL_STU] 3420). Topic (e.g. Harlem Renaissance African Diaspora Poetry) Announced at time of registration. Prerequisite: English [ENGLISH] 1000. May be repeated for credit with instructor's consent. No more than six hours may be taken in the Periods and Genres in African Diaspora Literature series.

ENGLISH 3427. Periods and Genres in African Diaspora Literature, 1603 to 1789. 3 Credits.

ENGLISH 3428. Periods and Genres in African Diaspora Literature, 1789 to 1890. 3 Credits.

ENGLISH 3429. Periods and Genres in African Diaspora Literature, 1890 to Present. 3 Credits.

ENGLISH 3430. Introduction to African Diaspora Literary Theory. 3 Credits.
(same as BL_STU 3705). Introduction to the range of theoretical approaches to the study of African Diaspora literature, with particular attention to the diverse socio-political contexts that undergird range of literary, historical, and cultural theories; intended as a broad survey of African Diaspora literary theory, whether from the Slavery era onward or 20th century literary theory and beyond. May be repeated for credit with consent. Prerequisite: ENGLISH 1000 and sophomore standing.

ENGLISH 3490. Native Writing and Representation. 3 Credits.
(same as PEA_ST 3490). Survey of native writing and representation from the late eighteenth century to the present, encompassing a diverse range of tribes and forms. Material will be drawn from tribes inhabiting the North American continent, but global indigenous relationships will also be addressed. Graded on A-F basis only.

ENGLISH 3560. Intermediate Playwriting. 3 Credits.
(same as Theatre [THEATR] 3920). Intermediate study of the writing process as applied to theatre, leading to the creation of a full-length play to be considered for production. Prerequisite: English [ENGLISH] 2560.

ENGLISH 3570. Performance of Literature. 3 Credits.

ENGLISH 3700. American Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 3150). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research.

ENGLISH 3820. Major Directors. 3 Credits.
(same as Film Studies [FILM_S] and Romance Languages [RM_LAN] 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Prerequisites: English [ENGLISH] 1000 and English [ENGLISH]/Film Studies [FILM_S] 1800. Graded on A/F basis only.

ENGLISH 3850. Studies in Film History. 3 Credits.
(same as Film Studies [FILM_S] 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major. Prerequisites: English [ENGLISH] 1000 and English [ENGLISH]/Film Studies [FILM_S] 1800.

ENGLISH 3855. Documentary Film. 3 Credits.
(same as Film Studies [FILM_S] 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A/F basis only. Prerequisite: English [ENGLISH] 1000.

ENGLISH 4000. Advanced Studies in English. 1-3 Credit.
Advanced examination of subjects within English studies. Subjects vary from semester to semester. May repeat to six hours.

ENGLISH 4004. Topics in English-Social Science. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat to six hours.

ENGLISH 4040. Studies in Writing. 3 Credits.
An advanced writing workshop in nonfiction prose. Topics (The Personal Narrative, Nature Writing) announced at time of registration. May repeat to six hours with departmental consent. Prerequisite: English [ENGLISH] 2010 or instructor's consent.

ENGLISH 4045. Rhetorical Studies. 3 Credits.
Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes. Prerequisites: English [ENGLISH] 1000, junior standing.

ENGLISH 4050. Historical Survey of Rhetoric. 3 Credits.
A survey of major works of rhetoric from Plato to the present day, with special attention to those works influencing English language rhetorics and theories of rhetoric. Prerequisites: English [ENGLISH] 1000 and sophomore standing.

ENGLISH 4060. Studies in Critical Theory. 3 Credits.
Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLISH 4070. History of Criticism. 3 Credits.
Surveys modern and contemporary theories of literary criticism: historical, archetypal, generic, formalist, phenomenological and interdisciplinary. Emphasizes key writers in each field. Prerequisite: junior standing.

ENGLISH 4100. Genres. 3 Credits.
Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. Prerequisite: junior standing. No more than six hours may be taken in the Genres series.

ENGLISH 4106. Genres, Beginning to 1603. 3 Credits.
See English [ENGLISH] 4100 for course description.

ENGLISH 4107. Genres, 1603 to 1789. 3 Credits.
See English [ENGLISH] 4100 for course description.

ENGLISH 4108. Genres, 1789 to 1890. 3 Credits.
See English [ENGLISH] 4100 for course description.

ENGLISH 4109. Genres, 1890 to Present. 3 Credits.
See English [ENGLISH] 4100 for course description.

ENGLISH 4120. Ethnic Literature. 3 Credits.
Explores in depth the literary traditions of one of America's minority ethnic cultures: Native American, African-American, Hispanic American, Asian
American. Prerequisite: junior standing. No more than six hours may be taken in the Ethnic Literature series.

ENGLSH 4127. Ethnic Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 4120 for course description.

ENGLSH 4128. Ethnic Literature, 1789 to 1890. 3 Credits.
See English [ENGLSH] 4120 for course description.

ENGLSH 4129. Ethnic Literature, 1890 to Present. 3 Credits.
See English [ENGLSH] 4120 for course description.

ENGLSH 4140. Modern Literature. 3 Credits.
A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era.

ENGLSH 4150. World Literatures. 3 Credits.
Study of important works and writers from Asia, Africa, Europe, Latin America or the mid-East. Topics (e.g., Survey of World Literature, The Bible) announced at time of registration. Prerequisite: junior standing. No more than six hours may be taken in the World Literature series.

ENGLSH 4156. World Literatures, Beginning to 1603. 3 Credits.
See English [ENGLSH] 4150 for course description.

ENGLSH 4157. World Literatures, 1603 to 1789. 3 Credits.
See English [ENGLSH] 4150 for course description.

ENGLSH 4158. World Literatures, 1789 to 1890. 3 Credits.
See English [ENGLSH] 4150 for course description.

ENGLSH 4159. World Literatures, 1890 to Present. 3 Credits.
See English [ENGLSH] 4150 for course description.

ENGLSH 4160. Major Authors. 3 Credits.
Intensive study of the work of a single writer (e.g., Milton) or set of writers (e.g., Whitman and Dickinson). Topic announced at time of registration. Prerequisite: junior standing. No more than six hours may be taken in the Major Author series. Prerequisite: junior standing.

ENGLSH 4166. Major Authors, Beginning to 1603. 3 Credits.
See English [ENGLSH] 4160 for course description.

ENGLSH 4167. Major Authors, 1603-1789. 3 Credits.
See English [ENGLSH] 4160 for course description.

ENGLSH 4168. Major Authors, 1789-1890. 3 Credits.
See English [ENGLSH] 4160 for course description.

ENGLSH 4169. Major Authors, 1890-Present. 3 Credits.
See English [ENGLSH] 4160 for course description.

ENGLSH 4170. Comparative Approaches to Literature. 3 Credits.
Study of works separated by the places or eras of their composition, but united by themes or traditions. Topics (e.g., Poets of African Diaspora, Literatures of Exile) announced at time of registration. No more than six hours may be taken in the Comparative Approaches to Literature. Prerequisite: junior standing.

ENGLSH 4176. Comparative Approaches to Literature, Beginning to 1603. 3 Credits.
See English [ENGLSH] 4170 for course description.

ENGLSH 4177. Comparative Approaches to Literature, 1609-1789. 3 Credits.
See English [ENGLSH] 4170 for course description.

ENGLSH 4178. Comparative Approaches to Literature, 1789-1890. 3 Credits.
See English [ENGLSH] 4170 for course description.

ENGLSH 4179. Comparative Approaches to Literature, 1890-Present. 3 Credits.
See English [ENGLSH] 4170 for course description.

ENGLSH 4180. Major Women Writers. 3 Credits.
(same as Women's and Gender Studies [WGST] 4180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series.

ENGLSH 4181. Themes in Literature by Women. 3 Credits.
(same as Women's and Gender Studies [WGST] and Black Studies [BL_STU] 4181). Examines works by a number of women writers with particular attention to their socio-political context. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLSH 4186. Major Women Writers, Beginning to 1603. 3 Credits.
(same as Women's and Gender Studies [WGST] 4186). See English [ENGLSH] 4180 for course description.

ENGLSH 4187. Major Women Writers, 1603-1789. 3 Credits.
(same as Women's and Gender Studies [WGST] 4187). See English [ENGLSH] 4180 for course description.

ENGLSH 4188. Major Women Writers, 1789-1890. 3 Credits.
(same as Women's and Gender Studies [WGST] 4188). See English [ENGLSH] 4180 for course description.

ENGLSH 4189. Major Women Writers, 1890-Present. 3 Credits.
(same as Women's and Gender Studies [WGST] 4189). See English [ENGLSH] 4180 for course description.

ENGLSH 4200. Introduction to Old English. 3 Credits.
(same as Linguistics [LINGST] 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge. Prerequisite: junior standing.

ENGLSH 4210. Medieval Literature. 3 Credits.
Representative works from the Anglo-Saxon and Middle-English periods. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLSH 4220. Renaissance and Seventeenth Century Literature. 3 Credits.
Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature. Prerequisite: junior standing.

ENGLSH 4226. Renaissance and Seventeenth Century Literature, Beginning to 1603. 3 Credits.
See English [ENGLSH] 4220 for course description.

ENGLSH 4227. Renaissance and Seventeenth Century Literature, 1603 to 1789. 3 Credits.
See English [ENGLSH] 4220 for course description.

ENGLSH 4240. Restoration and 18th-Century English Literature. 3 Credits.
Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.

ENGLSH 4250. 19th-Century English Literature. 3 Credits.
Topics (e.g., Victorian Poetry, Non-Fiction Prose) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: junior standing.
ENGLSH 4260. 20th-Century British Literature. 3 Credits.
Topics (e.g. Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department’s consent. Prerequisite: junior standing.

ENGLSH 4260H. 20th-Century British Literature - Honors. 3 Credits.
Topics (e.g. Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department’s consent. Prerequisite: junior standing.

ENGLSH 4300. Early American Literature. 3 Credits.
Topics (e.g., Narratives of Discovery and Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department’s consent. Prerequisite: junior standing.

ENGLSH 4310. 19th-Century American Literature. 3 Credits.
Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department’s consent. Prerequisite: junior standing.

ENGLSH 4320. 20th-Century American Literature. 3 Credits.
Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department’s consent. Prerequisite: junior standing.

ENGLSH 4400. Studies in African Diaspora Literature. 3 Credits.
(same as Black Studies [BL_STU] 4400). Topics (e.g., African American Poetry, Africana Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in Africana Literature series. Prerequisite: junior standing.

ENGLSH 4407. Studies in African Diaspora Literature, 1603 to 1789. 3 Credits.

ENGLSH 4408. Studies in African Diaspora Literature, 1789 to 1890. 3 Credits.

ENGLSH 4409. Studies in African Diaspora Literature, 1890 to Present. 3 Credits.

ENGLSH 4410. Major Africana Diaspora Writers. 3 Credits.
(same as Black Studies [BL_STU] 4410). An intensive study of selected writers of African Diaspora literature focusing on texts originally in English. No more than six hours may be taken in the Major African Diaspora Writers series. Prerequisite: junior standing or instructor’s consent.

ENGLSH 4417. Major African Diaspora Writers, 1603 to 1789. 3 Credits.

ENGLSH 4418. Major African Diaspora Writers, 1789-1890. 3 Credits.

ENGLSH 4419. Major African Diaspora Writers, 1890 to Present. 3 Credits.

ENGLSH 4420. Africana Womanism. 3 Credits.
(same as Black Studies [BL_STU] 4420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: junior standing or instructor’s consent. May be repeated to six hours with departmental consent.

ENGLSH 4487. Major African Diaspora Women Writers, 1603 to 1789. 3 Credits.

ENGLSH 4488. Major African Diaspora Women Writers, 1789 to 1890. 3 Credits.

ENGLSH 4489. Major African Diaspora Women Writers, 1890 to Present. 3 Credits.

ENGLSH 4490. Native Studies. 3 Credits.
In-depth study of topics in Native writing and representation, such as tribal intellectual histories, defined historical periods, or specific genres or media. Examples of course titles include Ojibwe Writing, Native Film and Video, and Contemporary Native Literature.

ENGLSH 4510. Creative Writing: Advanced Fiction. 3 Credits.
An intensive writing workshop in which student stories and related literary texts receive close reading and analysis. Prerequisite: English [ENGLSH] 2510 or equivalent.

ENGLSH 4520. Creative Writing: Advanced Nonfiction Prose. 3 Credits.
An intensive writing workshop in which a student’s creative nonfiction receives close reading and analysis. Prerequisite: English [ENGLSH] 2520 or equivalent.

ENGLSH 4530. Creative Writing: Advanced Poetry. 3 Credits.
Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques. Prerequisite: English [ENGLSH] 2530 or equivalent.

ENGLSH 4560. Advanced Playwriting: Problems. 3 Credits.

ENGLSH 4570. Adaptation of Literature for the Stage. 3 Credits.
(same as Theatre [THEATR] 4930). Explores adaptation principles and practices with literature not originally written for the stage. Identical to Theatre [THEATR] 4930. Graded on A/F basis only.
ENGLSH 4600. Structure of American English. 3 Credits.
(same as Linguistics [LINGST] 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax. Prerequisite: junior standing.

ENGLSH 4610. History of the English Language. 3 Credits.
(same as Linguistics [LINGST] 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English. Prerequisite: junior standing.

ENGLSH 4620. Regional and Social Dialects of American English. 3 Credits.

ENGLSH 4630. Phonology. 3 Credits.
(same as Linguistics [LINGST] 4630). Survey of the sound patterns of English, with some comparison to other languages. Prerequisite: English [ENGLSH] 4600 or another introductory course in linguistics or phonetics.

ENGLSH 4640. Syntax. 3 Credits.
(same as Linguistics [LINGST] 4640). Study of the properties of phrase-and-sentence-level grammar, emphasizing English, with some comparison to other languages. Prerequisite: English [ENGLSH] 4600 or another comparable linguistics course.

ENGLSH 4650. Principles of Teaching English as a Second Language. 3 Credits.
(same as Linguistics [LINGST] 4650 and Learning, Teaching and Curriculum [LTC] 4460). Linguistic and pedagogical principles of teaching English to speakers of other languages. Prerequisite: English [ENGLSH] 4600 and English [ENGLSH] 4610 or equivalent.

ENGLSH 4670. Field Methods in Linguistics. 4 Credits.

ENGLSH 4700. Special Themes in Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 4150). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent.

ENGLSH 4710. Themes in African Diaspora Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 4160 and Black Studies [BL_STU] 4710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. English [ENGLSH] 4700 and 4710 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: junior standing.

ENGLSH 4770. Oral Tradition. 3 Credits.
(same as Classical Humanities [CL_HUM] 4770). Study of verbal art from living oral traditions (e.g., Native American and African American) and important literary works with roots in oral tradition (e.g., the Bible, the Iliad, the Odyssey, and Beowulf). Prerequisite: junior standing and instructor's consent.

ENGLSH 4780. Women's Folklore and Feminist Theory. 3 Credits.
(same as Women's and Gender Studies [WGST] 4780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts). Prerequisite: junior standing or instructor's consent.

ENGLSH 4810. Film Theory. 3 Credits.
(same as Film Studies [FILM_S] 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others. Prerequisite: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800. Junior standing or above required.

ENGLSH 4820. Studies in Film Genre. 3 Credits.
(same as Film Studies [FILM_S] 4820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken for credit toward the major. Prerequisite: English [ENGLSH] 1000 and English/Film Studies [ENGLSH/FILM_S] 1800; junior standing or instructor's consent.

ENGLSH 4840. Culture and Media. 3 Credits.
( same as Film Studies [FILM_S] 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major. Prerequisite: English [ENGLSH] 1000 and English/Film Studies [ENGLSH/FILM_S] 1800. Junior standing or instructor's consent required.

ENGLSH 4835. Adaptation of Literature for Film. 3 Credits.
(same as Film Studies [FILM_S] 4935 and Theatre [THEATR] 4935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

ENGLSH 4940. Internship in English. 1-3 Credit.
Students work in an agency or institution using their English-related skills for one to three credit hours. Prerequisite: junior standing, department's consent. Graded on an S/U basis only.

ENGLSH 4950. Internship in Publishing. 3 Credits.
Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program. Prerequisite: instructor's consent.

ENGLSH 4955. Independent Research in English. 1-3 Credit.
Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only. Prerequisites: junior standing and departmental consent.

ENGLSH 4960. Special Readings in English. 1-99 Credit.
Individual work with conferences adjusted to needs of student. Prerequisites: 4000-level course in area of proposed work and written consent of instructor. Restricted to senior English majors in their final semester.

ENGLSH 4970. Capstone Experience. 3 Credits.
For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter). Prerequisite: English major with senior standing.
ENGLSH 4995. Senior Honors Thesis. 3 Credits.
Independent research under direction of faculty. Second course of two part Honors Sequence. Prerequisite: English [ENGLSH] 4996.

ENGLSH 4996. Honors Seminar in English. 3 Credits.
First of two major semester Honors sequence. Studies literary topic, critical approaches and advanced literary research methodology in preparation for Honors Senior Thesis. Prerequisite: 3.3 overall GPA and in major.

ENGLSH 7004. Topics in English-Social Science. 1-99 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat to six hours. Prerequisite: graduate standing.

ENGLSH 7040. Studies in Writing. 3 Credits.
An advanced writing workshop in nonfiction prose. Topics (The Personal Narrative, Nature Writing) announced at time of registration. May repeat to six hours with departmental consent. Prerequisite: graduate standing and English [ENGLSH] 2010 or instructor’s consent.

ENGLSH 7045. Rhetorical Studies. 3 Credits.
Examines questions related to rhetoric, the study of symbols used for persuasion, justification, or communication. Specific topics are announced at time of registration and may involve the rhetorical study of fiction or nonfiction, oral or written texts, verbal or visual modes.

ENGLSH 7050. Historical Survey of Rhetoric. 3 Credits.
A survey of major works of rhetoric from Plato to the present day, with special attention to those works influencing English language rhetoric’s and theories of rhetoric. Prerequisites: English [ENGLSH] 1000 and graduate standing.

ENGLSH 7060. Studies in Critical Theory. 3 Credits.
Focuses on questions raised by various critical theories, includes practice writing criticism that applies the theories to particular works. May repeat to six hours with department’s consent. Prerequisite: graduate standing.

ENGLSH 7070. History of Criticism. 3 Credits.
Surveys modern and contemporary theories of literary criticism: historical, archetypal, generic, formalist, phenomenological and interdisciplinary. Emphasizes key writers in each field. Prerequisite: graduate standing.

ENGLSH 7100. Genres. 3 Credits.
Advanced survey of major movements and writers. Topics (e.g., American Poetry, The Development of the British Novel) announced at time of registration. Prerequisite: graduate standing. No more than six hours may be taken in the Genres series.

ENGLSH 7106. Genres, Beginning to 1603. 3 Credits.
See English 7100 for course description.

ENGLSH 7107. Genres, 1603 to 1789. 3 Credits.
See English 7100 for course description.

ENGLSH 7108. Genres, 1789 to 1890. 3 Credits.
See English 7100 for course description.

ENGLSH 7109. Genres, 1890 to Present. 3 Credits.
See English 7100 for course description.

ENGLSH 7120. Ethnic Literature. 3 Credits.
Explores in depth the literary traditions of one of America’s minority ethnic cultures: Native American, African-American, Hispanic American, Asian American. Prerequisite: junior standing. No more than six hours may be taken in the Ethnic Literature series.

ENGLSH 7127. Ethnic Literature, 1603 to 1789. 3 Credits.
See English 7120 for course description.

ENGLSH 7128. Ethnic Literature, 1789 to 1890. 3 Credits.
See English 7120 for course description.

ENGLSH 7129. Ethnic Literature, 1890 to Present. 3 Credits.
See English 7120 for course description.

ENGLSH 7140. Modern Literature. 3 Credits.
A study of selected twentieth-century literature within the intellectual and cultural contexts of the modern era. Prerequisite: graduate standing.

ENGLSH 7150. World Literatures. 3 Credits.
Study of important works and writers from Asia, Africa, Europe, Latin America or the mid-East. Topics (e.g., Survey of World Literature, The Bible) announced at time of registration. Prerequisite: graduate standing. No more than six hours may be taken in the World Literatures series.

ENGLSH 7156. World Literatures, Beginning to 1603. 3 Credits.
See English 7150 for course description.

ENGLSH 7157. World Literatures, 1603 to 1789. 3 Credits.
See English 7150 for course description.

ENGLSH 7158. World Literatures, 1789 to 1890. 3 Credits.
See English 7150 for course description.

ENGLSH 7159. World Literatures, 1890 to Present. 3 Credits.
See English 7150 for course description.

ENGLSH 7160. Major Authors. 3 Credits.
Intensive study of the work of a single writer (e.g., Milton) or set of writers (e.g., Whitman and Dickinson). Topic announced at time of registration. No more than six hours may be taken in the Major Authors series. Prerequisite: graduate standing.

ENGLSH 7166. Major Authors, Beginning to 1603. 3 Credits.
See English 7160 for course description.

ENGLSH 7167. Major Authors, 1603-1789. 3 Credits.
See English 7160 for course description.

ENGLSH 7168. Major Authors, 1789-1890. 3 Credits.
See English 4160 for course description.

ENGLSH 7169. Major Authors, 1890-Present. 3 Credits.
See English 4160 for course description.

ENGLSH 7170. Comparative Approaches to Literature. 3 Credits.
Study of works separated by the places or eras of their composition, but united by themes or traditions. Topics (e.g., Poets of African Diaspora, Literatures of Exile) announced at time of registration. No more than six hours may be taken in the Comparative Approaches to Literature Series. Prerequisite: graduate standing.

ENGLSH 7176. Comparative Approaches to Literature, Beginning to 1603. 3 Credits.
See English 7170 for course description.

ENGLSH 7177. Comparative Approaches to Literature, 1609-1789. 3 Credits.
See English 7170 for course description.

ENGLSH 7178. Comparative Approaches to Literature, 1789-1890. 3 Credits.
See English 7170 for course description.
ENGLSH 7179. Comparative Approaches to Literature, 1890-Present. 3 Credits. See English 7170 for course description.

ENGLSH 7180. Major Women Writers. 3 Credits. (same as Women's and Gender Studies [WGST] 7180). Study of a limited number (1-3) of significant writers to be read intensively using contemporary feminist critical theory. No more than six hours may be taken in the Major Women Writers series. Prerequisite: graduate standing.

ENGLSH 7181. Themes in Literature by Women. 3 Credits. (same as Women's and Gender Studies [WGST] 7181). Examines works by a number of women writers with particular attention to their socio-political context. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7186. Major Women Writers, Beginning to 1603. 3 Credits. (same as Women's and Gender Studies [WGST] 7186). See English 7180 for course description.

ENGLSH 7187. Major Women Writers, 1603-1789. 3 Credits. (same as Women's and Gender Studies [WGST] 7187). See English 7180 for course description.

ENGLSH 7188. Major Women Writers, 1789-1890. 3 Credits. (same as Women's and Gender Studies [WGST] 7188). See English 7180 for course description.

ENGLSH 7189. Major Women Writers, 1890-Present. 3 Credits. (same as Women's and Gender Studies [WGST] 7189). See English 7180 for course description.

ENGLSH 7200. Introduction to Old English. 3 Credits. (same as Linguistics [LINGST] 7200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge. Prerequisite: graduate standing.

ENGLSH 7210. Medieval Literature. 3 Credits. Representative works from the Anglo-Saxon and Middle-English periods. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7220. Renaissance and 17th-Century English Literature. 3 Credits. Topics (e.g., The Metaphysical Poets, Themes in Shakespeare) announced at time of registration. No more than six hours may be taken in the Renaissance and Seventeenth Century Literature series. Prerequisite: graduate standing.

ENGLSH 7226. Renaissance and Seventeenth Century Literature, Beginning to 1603. 3 Credits. See English 7220 for course description.

ENGLSH 7227. Renaissance and Seventeenth Century Literature, 1603-1789. 3 Credits. See English 7220 for course description.

ENGLSH 7240. Restoration and 18th-Century English Literature. 3 Credits. Topics (e.g., Restoration Drama, Johnson and his Circle) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7250. 19th-Century English Literature. 3 Credits. Topics (e.g., Victorian Poetry, Non-Fiction Prose) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7260. 20th-Century British Literature. 3 Credits. Topics (e.g., Contemporary British Poets, The Post-War Novel) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7300. Early American Literature. 3 Credits. Topics (e.g., Narratives of Discovery and Exploration, The Puritan Heritage) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7310. 19th-Century American Literature. 3 Credits. Topics (e.g., American Romanticism, Regionalism) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7320. 20th-Century American Literature. 3 Credits. Topics (e.g., American Poetry since T. S. Eliot, The Short Story) announced at time of registration. May repeat to six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7400. Studies in African Diaspora Literature. 3 Credits. (same as Black Studies [BL_STU] 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series. Prerequisite: graduate standing.

ENGLSH 7410. Major African Diaspora Writers. 3 Credits. (same as Black Studies [BL_STU] 7410). An intensive study of selected writers of African Diaspora literature, focusing on texts originally in English. No more than six hours may be taken in the Major African Diaspora Writers series. Prerequisite: graduate standing or instructor's consent.

ENGLSH 7417. Major African Diaspora Writers, 1603 to 1789. 3 Credits. (same as Black Studies [BL_STU] 7417). See English 7410 for course description.

ENGLSH 7418. Major African Diaspora Writers, 1789 to 1890. 3 Credits. (same as Black Studies [BL_STU] 7418). See English [ENGLSH] 7410 for course description.

ENGLSH 7420. Africana Womanism. 3 Credits.
(same as Black Studies [BL_STU] 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. Prerequisites: graduate standing or instructor's consent. May be repeated to six hours with departmental consent.

ENGLSH 7480. Major African Diaspora Women Writers. 3 Credits.

ENGLSH 7487. Major African Diaspora Women Writers, 1603 to 1789. 3 Credits.

ENGLSH 7488. Major African Diaspora Women Writers, 1789 to 1890. 3 Credits.

ENGLSH 7489. Major African Diaspora Women Writers, 1890 to 1920. 3 Credits.

ENGLSH 7490. Native Studies. 3 Credits.
In-depth study of topics in Native writing and representation, such as tribal intellectual histories, defined historical periods, or specific genres or media. Examples of course titles include Ojibwe Writing, Native Film and Video, and Contemporary Native Literature.

ENGLSH 7510. Creative Writing: Advanced Fiction. 3 Credits.
An intensive writing workshop in which student stories and related literary texts receive close reading and analysis. Prerequisite: graduate standing and English [ENGLSH] 2510 or equivalent.

ENGLSH 7520. Creative Writing: Advanced Nonfiction Prose. 3 Credits.
An intensive writing workshop in which a student's creative nonfiction receives close reading and analysis. Prerequisite: graduate standing and English [ENGLSH] 2520 or equivalent.

ENGLSH 7530. Creative Writing: Advanced Poetry. 3 Credits.
Poetry regarded as a mode of understanding. Poetic values related to other values. Practical consideration of verse techniques. Prerequisite: graduate standing and English [ENGLSH] 2530 or equivalent.

ENGLSH 7560. Advanced Playwriting: Problems. 3 Credits.
(same as Theatre [THEATR] 7920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques. Prerequisite: graduate standing and English [ENGLSH] 3560.

ENGLSH 7570. Adaptation of Literature for the Stage. 3 Credits.
(same as Theatre [THEATR] 7930). Explores adaptation principles and practices with a variety of forms of literature that were not originally written for the stage. Prerequisite: Graduate standing and consent of instructor.

ENGLSH 7580. Adaptation of Literature for Film. 3 Credits.
(same as Film Studies [FILM_S] 7935 and Theatre [THEATR] 7935). This upperdivision course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

ENGLSH 7600. Structure of American English. 3 Credits.
(same as Linguistics [LINGST] 7600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax. Prerequisite: graduate standing.

ENGLSH 7610. History of the English Language. 3 Credits.
(same as Linguistics [LINGST] 7610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English. Prerequisite: graduate standing.

ENGLSH 7620. Regional and Social Dialects of American English. 3 Credits.

ENGLSH 7630. Phonology. 3 Credits.
(same as Linguistics [LINGST] 7630). Survey of the sound patterns of English, with some comparison to other languages. Prerequisite: graduate standing and English [ENGLSH] 4600 or another comparable linguistics course.

ENGLSH 7640. Syntax. 3 Credits.
(same as Linguistics [LINGST] 7640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages. Prerequisite: graduate standing and English [ENGLSH] 4600 or another comparable linguistics course.

ENGLSH 7650. Principles of Teaching English as a Second Language. 3 Credits.
(same as Linguistics [LINGST] 7650). Linguistic and pedagogical principles of teaching English to speakers of other languages. Prerequisite: English [ENGLSH] 4600 and English [ENGLSH] 4610 or equivalent. Graduate standing.

ENGLSH 7670. Field Methods in Linguistics. 3 Credits.

ENGLSH 7700. Special Themes in Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 7150). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. May be repeated for a maximum of six hours with department's consent. Prerequisite: graduate standing.

ENGLSH 7710. Themes in African Diaspora Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 7160 and Black Studies [BL_STU] 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. English [ENGLSH] 7700 and 7710 may be repeated for a maximum of six hours with instructor's consent. Prerequisite: graduate standing.

ENGLSH 7770. Oral Tradition. 3 Credits.
(same as Classical Humanities [CL_HUM] 4770). Study of verbal art from living oral traditions (e.g., Native American and African American) and important literary works with roots in oral tradition (e.g., the Bible, the
iliad the Odyssey, and Beowulf). Prerequisite: graduate standing and instructor’s consent.

ENGLSH 7780. Women’s Folktale and Feminist Theory. 3 Credits. (same as Women’s and Gender Studies [WGST] 7780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilt/arts). Prerequisite: graduate standing or instructor’s consent.

ENGLSH 7810. Film Theory. 3 Credits. (same as FILM_S 7810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, and postcolonialism, among others. Graded on A-F basis only.

ENGLSH 7840. Culture and Media. 3 Credits. (same as Film Studies [FILM_S] 7840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major. Prerequisite: graduate standing.

ENGLSH 7950. Internship in Publishing. 3 Credits. Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program. Prerequisite: graduate standing and instructor’s consent.

ENGLSH 8001. Topics in English-General. 1-99 Credit. Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

ENGLSH 8005. Introduction to Graduate Study. 1 Credit. Introduces entering MA and PhD students to the profession of English and the intellectual resources needed to complete their degrees successfully.

ENGLSH 8006. Professional Issues in English Studies. 3 Credits. Introduces advanced graduate students to issues relevant to their professional training, including entering the job market and preparing work for publication. May be repeated for credit. Graduate standing required.

ENGLSH 8010. Theory and Practice of Composition. 3 Credits. Current and historical theories of rhetoric and composition as applied to the teaching of college composition. Prerequisite: department’s consent. Graduate Standing Required.

ENGLSH 8040. Seminar in Rhetoric and Composition. 3 Credits. Topics (e.g., The Institutionization of Rhetoric, Writing Across the Curriculum) announced at time of registration. May repeat to twelve hours with department’s approval. Graduate Standing Required.

ENGLSH 8050. Contemporary Critical Approaches. 3 Credits. A survey of contemporary professional critical methods, such as formalism, poststructuralism, feminism, Marxism, new historicism, psychoanalysis, identity studies, and cultural studies.

ENGLSH 8060. Seminar in Criticism and Theory. 3 Credits. Principles and practices of selected critics. May repeat to twelve hours with department’s consent.

ENGLSH 8070. History of Criticism and Theory. 3 Credits. A survey of the history of literary criticism and theory. While comprehensive in scope, the course might focus on specific topics in the history of criticism, such as the dialectic between rhetoric and poetics, the rise of aesthetics, or the relation of art and culture to society. Figures studied will extend from early philosophers such as Plato and Aristotle, through eighteenth-century thinkers such as Kant and Johnson, up to present theorists such as Derrida and Butler. Graduate Standing Required.

ENGLSH 8095. Problems in English. 1-99 Credit. Individual work not leading to preparation of dissertation. Prerequisite: departmental approval. Graduate Standing Required.

ENGLSH 8110. Forms. 3 Credits. Topics (e.g., The Epistle, The Epistolary Novel) announced at time of registration. May repeat to twelve hours with department’s approval. Graduate Standing Required.

ENGLSH 8200. Seminar in Old English Literature. 3 Credits. Topics in Old English or Anglo-Saxon literature, such as Beowulf, the Exeter Book poems, or the genres of elegy, Biblical narrative, or wisdom poetry. May repeat to twelve hours with department’s approval. Prerequisite: English [ENGLSH] 4200 or equivalent. Graduate Standing Required.

ENGLSH 8210. Seminar in Middle English Literature. 3 Credits. Topics (e.g., Medieval Drama, Chaucer) announced at time of registration. May repeat to twelve hours with department’s approval. Graduate Standing Required.

ENGLSH 8220. Seminar in Renaissance British Literature. 3 Credits. Topics (e.g., Tudor and Stuart Drama, Shakespearean Tragedy) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8230. Seminar in 17th-Century British Literature. 3 Credits. Topics (e.g., The Metaphysical Poets, Restoration Drama) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8240. Seminar in 18th-Century British Literature. 3 Credits. Topics (e.g., The 18th-Century Novel, Historical and Biographical Prose) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8250. Seminar in 19th-Century British Literature. 3 Credits. Topics (e.g., The Later Romantics, Victorian Poetry) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8260. Seminar in 20th-Century British Literature. 3 Credits. Topics (e.g., Chief Contemporary Poets, Modernism and the Novel) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8300. Seminar in Early American Literature. 3 Credits. Topics (e.g., Religious and Philosophical Writings, The Revolutionary Period) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8310. Seminar in 19th Century American Literature. 3 Credits. Topics (e.g., The Transcendentalists, American Realism) announced at time of registration. May repeat to twelve hours with department’s consent.
ENGLSH 8320. Seminar in 20th-Century American Literature. 3 Credits.
Topics (e.g., The African-American Novel, Chief Contemporary Poets) announced at time of registration. May repeat to twelve hours with department’s consent.

ENGLSH 8400. Seminar in African Diaspora Literature. 3 Credits.
(same as Black Studies [BL_STU] 8400). Topic (e.g., Autobiography, Black Women Writers) announced at time of registration. May be repeated to 12 hours with departmental consent.

ENGLSH 8410. Seminar in African Diaspora Theory and Literature Criticism. 3 Credits.
(same as Black Studies [BL_STU] 8410). Modern and contemporary African Diaspora criticism and theory including the diverse approaches to literary and cultural studies. May be repeated to 12 hours with departmental consent. Prerequisite: graduate standing.

ENGLSH 8510. Advanced Writing of Fiction. 3 Credits.
Advanced fiction writing designed primarily for graduate students, with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor. Prerequisite: instructor’s consent and English [ENGLSH] 4510.

ENGLSH 8520. Advanced Writing of Nonfiction Prose. 3 Credits.
Advanced workshop in nonfiction prose primarily for graduate students intending to produce professional quality work. Prerequisite: instructor’s consent.

ENGLSH 8530. Advanced Writing of Poetry. 3 Credits.
Advanced poetry writing designed primarily for graduate students with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor. Prerequisite: instructor’s consent and English [ENGLSH] 4530.

ENGLSH 8560. Graduate Seminar in Playwriting. 3 Credits.
(same as Theatre [THEATR] 8920). Seminar in theory, practice, and pedagogy of playwriting, students a mid-term in playwriting theory, a full-length play, a research paper, and a syllabus and lesson plans for an undergraduate playwriting course.

ENGLSH 8600. Seminar in the English Language. 3 Credits.
(same as Linguistics [LINGST] 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic Analysis) announced at time of registration. May repeat to twelve hours with department’s approval.

ENGLSH 8700. Seminar in Folklore. 3 Credits.
(same as Anthropology [ANTHRO] 8157 and Religious Studies [REL_ST] 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups. Graduate standing or permission of instructor. May repeat to twelve hours with department’s consent.

ENGLSH 8770. Seminar in Oral Tradition. 3 Credits.
Theoretical and interpretive perspectives on works of verbal art that have roots in oral tradition. Emphasis on the variety of approaches employed (performance theory, oral theory, ethnoepoetics, ethnography of speaking, comparative structural studies, etc.) May repeat to twelve hours with department’s consent.

ENGLSH 9090. Doctoral Dissertation Research. 1-12 Credit.
Leads to preparation of dissertation. Graded on S/U basis only.

English Language Support Program (ELSP)

ELSP_0100. Grammar and Composition I. 3 Credits.
Grammar and Composition I. Graded S/U only.

ELSP_0200. Reading and Vocabulary. 3 Credits.
Reading and Vocabulary. Graded on S/U basis only.

ELSP_0300. Grammar and Composition II. 3 Credits.
Grammar and Composition II. Graded S/U Only.

ELSP_0400. Oral Communication. 3 Credits.

Environmental Science (ENV_SC)

ENV_SC 1001. Topics in Environmental Science - General. 1-99 Credit.
Organized study of selected topics in environmental science.

ENV_SC 1100. Introduction to Environmental Science. 3 Credits.
This class provides an opportunity to develop an understanding of environment, physical and social causes of environmental problems, their impacts, and strategies to manage these issues. Prerequisites: Restricted to freshman; sophomores and juniors or instructor’s consent.

Organized study of selected topics in environmental science.

ENV_SC 2002. Topics in Environmental Science - Biological/Physical/Mathematical. 1-99 Credit.
Organized study of selected topics. Subjects and credit may vary from semester to semester.

ENV_SC 3001. Topics in Environmental Science - General. 1-99 Credit.
Organized study of selected topics in environmental science.

ENV_SC 3085. Problems in Environmental Science. 1-99 Credit.
Special individualized projects or readings in environmental science.

ENV_SC 3250. Pollutant Fate and Transport. 3 Credits.
(same as Civil Engineering [CV_ENG] 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement. Prerequisites: Environmental Sciences [ENV_SC] 1100 or Soil Science [SOIL] 2100 or Civil Engineering [CV_ENG] 3200; and Chemistry [CHEM] 1320; or instructor’s permission.

ENV_SC 3290. Soils and the Environment. 3 Credits.
(same as Soil Science [SOIL] 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution. Prerequisites: Soil Science [SOIL] 2100, 3 hrs of chemistry, English [ENGLSH] 1000 or instructor’s consent.
ENV_SC 3330. Environmental Land Use Management. 3 Credits.  
An introduction to environmentally sustainable use and management of land.

ENV_SC 3500. Pollutant Fate and Transport. 3 Credits.  
This course introduces students to concepts governing pollutant fate and transport in the environment, and it provides students with the quantitative tools necessary to estimate the fate and transport of pollutants in the environment. Prerequisite: Environmental Science [ENV_SC] 1100 or Soil Science [SOIL] 2100, and Chemistry [CHEM] 1310 and 1320.

ENV_SC 4001. Topics in Environmental Science - General. 1-99 Credit.  
Organized study of selected topics in environmental science.

ENV_SC 4085. Problems in Environmental Science. 1-99 Credit.  
Supervised professional experience with an approved public or private instructor. May be repeated for credit. Graded on A/F basis only.

ENV_SC 4305. Environmental Soil Physics. 3 Credits.  
(same as Soil Science [SOIL] 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat. Prerequisites: Soil 2100, Physics [PHYSICS] 1210 or equivalent.

ENV_SC 4306. Environmental Soil Physics Laboratory. 2 Credits.  
(same as Soil Science [SOIL] 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes. Prerequisites: concurrent or previous enrollment in Environmental Science [ENV SC] 4305.

ENV_SC 4312. Environmental Soil Microbiology. 3 Credits.  
(same as Soil Science [SOIL] 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc. Prerequisite: general microbiology, Soil 2100, or instructor's consent.

ENV_SC 4318. Environmental Soil Chemistry. 3 Credits.  

ENV_SC 4320. Hydrologic and Water Quality Modeling. 3 Credits.  
(same as Natural Resources [NAT_R] 4320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making. Prerequisites: Environmental Science [ENV_SC] 1100 or Soil Science [SOIL] 2100 or equivalent.

ENV_SC 4396. Agroforestry for Watershed Restoration. 3 Credits.  
Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. Prerequisite: Forestry [FOREST] 4385/7385 or permission of instructor. May be repeated for credit. Graded on A/F basis only.

ENV_SC 4940. Environmental Science Internship. 1-99 Credit.  
Supervised professional experience with an approved public or private organization. Graded on S/U basis only.

ENV_SC 4950. Undergraduate Research in Environmental Science. 1-4 Credit.  
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance. Prerequisites: Environmental Science [ENV_SC] 1100, Statistics [STAT] 2530 and 9 hours of Environmental Science with at least 3 hours above the 3000-level and instructor's consent.

ENV_SC 7001. Topics in Environmental Science. 1-99 Credit.  
Organized study of selected topics in environmental science. Intended for graduate students.

ENV_SC 7085. Problems in Environmental Science. 1-99 Credit.  
Supervised professional experience with an approved public or private instructor. May be repeated for credit. Graded on A/F basis only.

ENV_SC 7305. Environmental Soil Physics. 3 Credits.  
(same as Soil Science [SOIL] 7305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat. Prerequisites: graduate standing SOIL 2100, Physics [PHYSICS] 1210 or equivalent.

ENV_SC 7306. Environmental Soil Physics Laboratory. 2 Credits.  
(same as Soil Science [SOIL] 7306). Introduction to the methodology and equipment for measurement of soil physical properties and processes. Prerequisites: graduate standing and concurrent or previous enrollment in Soil Science [SOIL] 4305.

ENV_SC 7312. Environmental Soil Microbiology. 3 Credits.  
(same as Soil Science [SOIL] 7312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic degradation and bioremediation, soil quality and pathogen regulation in the environment. Nitrogen fixation, mycorrhizal processes are discussed.

ENV_SC 7318. Environmental Soil Chemistry. 3 Credits.  

ENV_SC 7320. Hydrologic and Water Quality Modeling. 3 Credits.  
(same as Natural Resources [NAT_R] 7320). Introduction to models for simulating hydrologic and water quality processes. Emphasis is placed on watersheds to provide experience with the use of simulation models for natural resource decision making. Prerequisites: Environmental Science [ENV_SC] 1100 or Soil Science [SOIL] 2100 or equivalent.

ENV_SC 7396. Agroforestry for Watershed Restoration. 3 Credits.  
Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. Prerequisite: Forestry [FOREST] 4385/7385 or permission of instructor. May be repeated for credit. Graded on A/F basis only.

ENV_SC 8001. Topics in Environmental Science. 1-99 Credit.  
Organized study of selected topics in environmental science. Intended for graduate students.
ENV_SC 8085. Problems in Environmental Science. 1-99 Credit.
Special individualized non-thesis research projects or readings in environmental science.

ENV_SC 8090. Masters Research in Environmental Science. 1-10 Credit.
Original investigations in environmental science for presentation in a thesis. Graduate standing required. Graded on S/U basis only.

ENV_SC 8400. Solute Transport in the Vadose Zone. 3 Credits.

ENV_SC 8500. Chemistry of the Vadose Zone. 3 Credits.
(same as Soil Science [SOIL] 8500). Chemical reactions occurring in geomedia with emphasis on understanding molecular scale processes occurring at the solid-water interface, aqueous geochemistry, and soil organic matter. Prerequisites: SOIL 7318 or Geology [GEOL] 7300 or instructor's consent.

ENV_SC 9001. Topics in Environmental Science. 1-99 Credit.
Organized study of selected topics in environmental science. Intended for graduate students.

ENV_SC 9085. Problems in Environmental Science. 1-99 Credit.
Special individualized non-thesis research projects or readings in environmental science. Graduate standing required.

ENV_SC 9087. Seminar in Environmental Science. 1 Credit.
In-depth development of advanced aspects of environmental science through reviews of results of research in progress and current scientific publications.

ENV_SC 9090. Doctoral Research in Environmental Science. 1-10 Credit.
Original investigations in environmental science for presentation in a dissertation. Graduate Standing required. Graded on S/U basis only.

ENV_SC 9407. Advanced Environmental Soil Physics. 3 Credits.
(same as Soil Science [SOIL] 9407). Transport of mass and energy through soil with emphasis on development of the equations of flow. Evaluation of analytical and numerical solutions to differential equations describing transport phenomena. Prerequisites: SOIL 7305, Mathematics [MATH] 4100/7100, or equivalent.

ENV_SC 9418. Advanced Environmental Soil Chemistry. 3 Credits.

Environmental Studies (ENV_ST)

ENV_ST 2070. Introduction to Ecological Economics. 3 Credits.
(same as Agricultural Economics [AG_EC] 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels. Prerequisite English [ENGLISH] 1000 and sophomore standing.

ENV_ST 2101. Topics in Environmental Sciences. 1-3 Credit.
Selected topics not in regularly offered courses.

ENV_ST 2110. Environmental Sustainability. 3 Credits.
Students will assess availability of key resources, estimate sustainable rates of use and develop plans for aligning current and sustainable rates of use using personal, business and government strategies. Prerequisites: English [ENGLISH] 1000 and one introductory environmental course. Graded A-F only.

ENV_ST 2150. Directed Independent Study. 1-3 Credit.
Working with Environmental Studies you will find and develop a research project or an internship with the university, a government agency, a business or a non-profit agency. The project will be directed towards solving an environmental problem. Prerequisite: instructor's consent.

ENV_ST 3000. Natural History of Missouri. 2 Credits.
This class deals with the characteristics of natural ecological communities of Missouri and with the skills needed to observe, record and interpret those characteristics. Graded on A/F basis only. Prerequisites: Mathematics [MATH] 1100 and English [ENGLISH] 1000.

ENV_ST 4310. Topics in Environmental Studies. 1-3 Credit.
This course covers topics not covered in regularly offered courses. Students are expected to combine skills, knowledge and perspectives from the natural and social science to analyze selected environmental problems.

ENV_ST 4350. Modeling Environmental Problems. 3 Credits.
This course covers modeling environmental problems as systems. Modeling incorporates rates of changes, feedback loops, short/long term signals, inertia, upstream causes, interventions, implementing interventions and unintended consequences. Prerequisites: 9 hours natural science courses and junior standing. Graded on A/F basis only.

ENV_ST 7350. Modeling Environmental Problems. 3 Credits.
Course covers modeling environmental problems as systems. Modeling incorporates rates of change, feedback loops, short/long term signals, inertia, upstream causes, interventions, implementing interventions, unintended consequences and predicting outcomes of major shocks (oil prices, pandemics, climate change). Prerequisites: 9 hours natural science and graduate standing. Graded on A/F basis only.

Family And Community Medicine (F_C_MD)

F_C_MD 6001. Family Medicine Clerkship. 6 Credits.
Family Medicine Clerkship.

F_C_MD 6011. Rural Family Medicine Clerkship. 6 Credits.
Rural Family Medicine Clerkship.

F_C_MD 6101. Remediation 6001 Family Medicine Clerkship. 6 Credits.
Family Medicine Clerkship remediation. Prerequisite: 6001 Family Medicine Clerkship, received unsatisfactory grade.

F_C_MD 6251. ABS Evidence Based Medicine. 5 Credits.
ABS Evidence Based Medicine.

F_C_MD 6253. ABS Family and Community Medicine Research. 5-10 Credit.
ABS Family and Community Medicine Research.
F_C_MD 6255. ABS Family and Community Medicine Research and Review. 5 Credits.
ABS Family and Community Medicine Research and Rev.

F_C_MD 6475. Family Medicine Elective. 5 Credits.
Family Medicine Elective.

F_C_MD 6477. Family Medicine Elective Preceptorship. 5 Credits.
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship. May be available as a rural offsite elective: contact the MU-AHEC Coordinator. Goals/Objectives: During this elective the student works closely with a family physician in private practice. Students both observe the preceptor’s patient encounters and take primary responsibility for several patients each day, discussing diagnosis and formulating management plans with supervision by the preceptor. The Preceptorship also provides opportunities not available elsewhere in the medical school curriculum, including seeing the patient’s illness in its context, assessing a community’s health care system, and learning about practice management. Evaluations: Evaluation of the student is based on the preceptor’s evaluation and comments. Notes: Site must be pre-approved by the Course Director.

F_C_MD 6479. Family and Community Medicine Research. 5 Credits.
Family and Community Medicine Research.

F_C_MD 6481. Clinical Nutrition. 5 Credits.
Clinical Nutrition.

F_C_MD 6483. Preventive/Community Medicine. 5 Credits.
Preventive/Community Medicine.

F_C_MD 6485. Geriatrics-Family and Community Medicine Elective. 5 Credits.
Prerequisites: Must have completed all core clerkships. Goals/Objectives: This is an outpatient experience in a variety of settings. Each week students will: 1. Work with Dr. David Cravens and other health care providers at Lenoir Village, Lenoir Manor, Lenoir Health Care and Maplewood Apartments. These all represent different levels and types of care available to elders. a. Students will develop an understanding of the available care and residential options that elders utilize. 2. Work with several geriatricians in the SAGE Clinic and/or Geriatrics Clinic at Green Meadows. a. Students will improve their understanding of care of elders in the outpatient setting. b. Students will also see patients undergoing geriatric assessment and thus develop a better understanding of the multidisciplinary approach to geriatric assessment. 3. Additional experiences may be arranged depending on the student’s interests. 4. Participate in the various conferences related to geriatrics. Evaluations: Final evaluation will be determined by the attending physicians supervising the student during the block.

F_C_MD 6486. Evidence Based Medical Writing in Family Medicine. 5 Credits.
Student will co-author a draft of an evidence-based article under the supervision of FCM faculty with evidence-based writing experience. Before writing begins, students complete an evidence-based medicine curriculum using online modules. FCM integrated residents will also participate in a departmental editorial review session. Prerequisites: restricted to 4th year medical students.

F_C_MD 6487. Family and Community Medicine Palliative Care Elective. 5 Credits.
This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with terminal condition. Prerequisite: Family and Community Medicine [F C MD] 6001; restricted to 4th year medical students.

F_C_MD 6775. Family Medicine Preceptorship - Rural. 5 Credits.
Family Medicine Preceptorship - Rural.

F_C_MD 6776. RURAL FAMILY MED ELECT. 5 Credits.
Rural Family Medicine Elective.

F_C_MD 6875. Family Medicine Onsite Externship. 5 Credits.
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship. Goals/Objectives: The student who is on the onsite track of the externship will be a member of the Family Practice Inpatient Team that is responsible for providing care to Family Practice patients in the hospital. The team consists of an attending, physician, two third-year residents, and two or three first-year residents. The student will be expected to function as a member of the team, attending rounds on a daily basis and assuming responsibility, under supervision, for the care of some of the patients. Each student will have 4-5 nights of call including weekend days. Students will be responsible for providing care, with supervision, to those patients admitted while they are on call. Students will also be expected to follow their patients after discharge, making home visits or nursing home visits and seeing them in follow-up at the clinic as indicated. Students will also have exposure to ambulatory family medicine. Each student will work closely in the clinic with one of the third-year residents assigned to the inpatient team. The student will attend each of the resident’s clinics whether they are at Green Meadows, Fulton, or Fayette.

F_C_MD 6876. Family Medicine Offsite Externship. 5 Credits.
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship. Goals/Objectives: Several different types of experiences are available for the offsite track of the externship. Students have the opportunity to work at selected Indian Health Service sites that provide the appropriate mix of inpatient and outpatient experiences: Crownpoint, New Mexico Whiteriver, Arizona Keshena, Wisconsin It is anticipated that a number of students will fulfill the course requirements through an Indian Health Service (IHS) rotation. A list of these IHS sites and the students’ evaluations are available in the course office. These offer high volume and high levels of responsibility. Planning needs to begin early in the third year. Dr. Betsy Garrett will announce a “Brown Bag Meeting” in January for third-year students to give information about this rotation. Students are required to complete an application and Dr. Garrett will make assignments after the January meeting. Not all IHS sites will meet the externship criteria. Offsite externship experiences are also available in certain community-based family practices and in certain family practice residency programs. A list of pre-approved sites is available in the course office. All of the sites available for the offsite experience have been carefully selected by the faculty based on previous experiences of fourth-year students. These sites offer an appropriate level of patient care responsibility with supervision. Offsite practices need to be approved in advance by the course director and often require planning 6 to 12 months in advance. Students considering offsite rotations will be expected to have a clear idea of how these experiences will offer unique advantages to their personal and professional development, and how they will meet the course criteria. Many offsite locations used in the past for the Family Medicine Clerkship will not satisfy the externship requirement. They still offer excellent experiences and could be taken as electives. Evaluations: Students on the offsite track will be evaluated with respect to their ability to collect, process, and analyze information, engage in clinical reasoning, and formulate appropriate diagnoses and treatment plans.
The department has had many years of experiences with the evaluation of students in offsite practices. We will build on this extensive experience to further develop a comprehensive and accurate process of evaluation. Notes: Sites must be pre-approved by the Course director.

**F_C_MD 6877. Rural Family Medicine Elective. 5 Credits.**
Rural Family Medicine Elective.

**F_C_MD 6878. Family Medicine Maternity Care-Advanced Selective. 5 Credits.**
Family Medicine Maternity Care-Advanced Selective.

**F_C_MD 7001. Topics in Family and Community Medicine. 3 Credits.**
Selected topics of interest related to family and community medicine. Prerequisites: Understanding of research methods, statistics (basic) and graduate, post graduate or instructor's consent.

**F_C_MD 7300. Problems Community Health Medicine Practice. 1-3 Credit.**
Directed exploration of community health problems. Prerequisite: instructor's consent.

**F_C_MD 7310. The Health Care System. 3 Credits.**
Overview of health care system and relationship between its components. Focuses on changing nature of the system and issues confronting the future health care system. Prerequisite: instructor's consent.

**F_C_MD 7350. Special Readings in Community Health. 1-3 Credit.**
Extensive reading and critical analysis of classical and current studies in selected areas of community health. Prerequisite: instructor's consent.

**F_C_MD 7400. Problems in Community Health. 1-3 Credit.**
Intensive study of an area of community health. Prerequisites: graduate standing and instructor's consent.

**F_C_MD 7490. Research in Community Health. 1-99 Credit.**
Independent investigation of some problem in community health to be presented as a thesis. Graded on a S/U basis only.

**F_C_MD 7492. Field Experience in Community Health Education. 1-99 Credit.**
Field practice in a selected community setting under faculty or other competent supervision. Restricted to students specializing in community health education. Prerequisite: consent of community health education faculty.

**F_C_MD 7750. Physical Function and Older Adults. 3 Credits.**

**F_C_MD 7751. Psychosocial Function and Older Adults. 3 Credits.**

**F_C_MD 8330. Statistical Aspects of Public Health. 3 Credits.**
Classification and summarization of data used in public health practice and research. Probability, sampling, hypothesis testing. Correct and incorrect use of statistics in the literature. Prerequisites: concurrent registration in Family and Community Medicine [F_C_MD] 8420 or instructor’s consent.

**F_C_MD 8410. Principles and Practices in Medical Education. 3 Credits.**
An examination of the past and present influences on the education of physicians, the application of adult education principles and the future approaches to medical education. Prerequisite: graduate standing and instructor’s consent.

**F_C_MD 8411. Learning Strategies in Preclinical & Clinical Educ. of Physicians. 3 Credits.**
Examination of curricular strategies in preclinical and clinical education of medical students and graduate medical education. Emphasis will be placed on different types of instructional strategies. Prerequisite: instructor’s consent.

**F_C_MD 8420. Principles of Epidemiology. 3 Credits.**
Examines methods of study of disease frequency and distribution in populations. Utilizes small group discussions for understanding of current medical literature. Prerequisites: instructor’s consent.

**F_C_MD 8421. Clinical Epidemiology/Evidence Based Medicine. 3 Credits.**
(same as Veterinary Pathobiology [V_PBIO] 8421). Advanced epidemiologic theory and methods in the study and control of infectious and noninfectious diseases. Prerequisite: instructor’s consent.

**F_C_MD 8422. Clinical Research Methods I. 3 Credits.**
Principles of designing, implementing and reviewing research in the health sciences.

**F_C_MD 8423. Clinical Research Methods II. 3 Credits.**
This is a continuation of the Clinical Research Methods I (CRM_I) introductory course on the multi-method approach to clinical research. Similar to the previous course, it covers both quantitative and qualitative research methods, but includes advanced applications.

**F_C_MD 8430. Applications of Evidence-Based Medicine I. 3 Credits.**
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature. Prerequisite: instructor’s consent.

**F_C_MD 8431. Applications of Evidence-Based Medicine II. 3 Credits.**
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature. Prerequisite: instructor’s consent.

**F_C_MD 8450. Research in Community Health. 1-99 Credit.**
Original research in community health not leading to a thesis but requiring a formal research report.

**F_C_MD 8490. Research in Community Health. 1-99 Credit.**
Supervised teaching experience in the preclinical, clinical, and residency programs. Prerequisite: instructor's consent.

**Film Studies (FILM_S)**
FILM_S 1800. Introduction to Film Studies. 3 Credits.
(same as English [ENGLSH] 1800). Introduction to terms and concepts for film analysis, including mise-en-scène, cinematography, editing, sound narrative, genre, and other elements. Prerequisites: Freshmen and Sophomores only or instructor’s consent. No credit for students who have completed Film Studies [FILM_S] 2810. Graded on A/F basis only.

FILM_S 2001. Topics in Film Studies-General. 1-3 Credit.
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

FILM_S 2005. Topics in Film Studies- Humanities. 1-3 Credit.
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.

FILM_S 2010. The Philosophy of Film. 3 Credits.
(same as Philosophy [PHIL] 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.

FILM_S 2520. Introduction to Film Production. 3 Credits.
Provides a comprehensive overview of pre-production and production involved in the development of a film. Students will receive hands-on experience in lighting design, camera operation, grip and electrical, producing, directing, sound capture and design, and fundraising. Students will ultimately be responsible for the production of a commercially viable, competition grade short film at the end of the semester. Some outside class commitments are required. Prerequisite: Film Studies [FILM_S]/English [ENGLSH] 1800.

FILM_S 2820. Trends in World Cinema. 3 Credits.
(same as German [GERMAN] 2820 and Romance Languages [RM_LAN] 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production. Prerequisite: Sophomore standing, English [ENGLSH]/Film Studies [FILM_S] 1800 or instructor’s consent.

FILM_S 2830. American Film History I, 1895-1950. 3 Credits.

FILM_S 2840. American Film History II, 1950-Present. 3 Credits.

FILM_S 2850. Italian Cinema. 3 Credits.
(same as Italian [ITAL] 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required. Prerequisite: Sophomore standing.

FILM_S 2860. Film Themes and Genres. 3 Credits.
(same as English [ENGLSH] 2860) Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 2860. Prerequisite: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800.

FILM_S 2865. The Art of Soviet and Russian Cinema. 3 Credits.
(same as Russian [RUSS] 2865) Topics (e.g. Distorted Picture: Post-War Cinema in a Soviet State, Cinema in the Soviet Times and Beyond, etc.) announced at time of registration. Only 6 hours may be taken toward major.

FILM_S 2870. Film and Literature. 3 Credits.
(same as English [ENGLSH] 2870). Explores the complex interplay between film and literature in order to gain an understanding of the possibilities - and problems - involved in the transposition from literature to film. Prerequisites: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800. Graded on A/F basis only.

FILM_S 3001. Topics in Film- General. 1-3 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: Sophomore standing or instructor’s consent.

FILM_S 3005. Topics in Film Studies - Humanities. 1-3 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: Sophomore standing or instructor’s consent.

FILM_S 3775. The Ancient World on Film. 3 Credits.
(same as Classical Humanities [CL_HUM] 3775 and Art History and Archaeology [AR_H_A] 3775) This course explores how classical antiquity has been represented in twentieth and twenty-first-century film, with particular emphasis on the ways in which ancient narratives and iconography have been appropriated by filmmakers to address contemporary cultural issues. Prerequisite: Prior 2000 level coursework in CL_HUM, AR_H_A, or FILM_S. Instructors consent required.

FILM_S 3780. Architecture in Film. 3 Credits.
(same as Art History and Archaeology [AR_H_A] 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

FILM_S 3785. Art and Artists on Film. 3 Credits.
(same as Art History and Archaeology [AR_H_A] 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

FILM_S 3820. Major Directors. 3 Credits.
(same as English [ENGLSH] and Romance Languages [RM_LAN] 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Prerequisites: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800. Graded on A/F basis only.

FILM_S 3830. History of German Film. 3 Credits.
(same as German [GERMAN] 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit. Prerequisites: Sophomore standing or instructor’s consent.

FILM_S 3840. German Film After 1945. 3 Credits.
(same as German [GERMAN] 3840). Examines a selection of post-War films by German directors, as well as historical, literary, and theoretical texts. Prerequisite: Sophomore standing, or instructor’s consent.

FILM_S 3845. Modern Israeli Film. 3 Credits.
(same as Hebrew [HEBREW] 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces
concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture. Prerequisite: Sophomore standing or consent of instructor required.

**FILM_S 3850. Studies in Film History. 3 Credits.**
(same as English [ENGLISH] 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major. Prerequisites: English [ENGLISH] 1000 and English [ENGLISH]/Film Studies [FILM_S] 1800.

**FILM_S 3855. Documentary Film. 3 Credits.**
(same as English [ENGLISH] 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A/F basis only. Prerequisite: English [ENGLISH] 1000.

**FILM_S 3861. Film Themes and Genres. 3 Credits.**
Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 3861. Prerequisite: English [ENGLISH] 1000 and English/Film Studies [FILM_S] 1800.

**FILM_S 3865. The Holocaust on Screen. 3 Credits.**
(same as German [GERMAN] 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Prerequisites: Sophomore standing. Graded on A/F basis only.

**FILM_S 3870. Russian Women and Film. 3 Credits.**
(same as Russian [RUSS] 3870 Women and Gender Studies [WGST] 3870) Traces image(s) of the Russian woman in 20th-century Russia as constructed in Russian, Soviet and late-Soviet film. Discusses heroines of pre-revolutionary melodrama and "new Soviet man and woman" of the 20s. Considers war-time re-alignment of gender roles in defense of motherland and their subtle revamping in post-war and post-Stalinist period, and the shifting relations between women and men, women and women, and women and the State. Emphasizes cultural-historical and ideological status of women as reflected in onscreen image(s) in Russian film. Designed to serve as an introduction to film studies and to 20th-century Russian culture more generally. Conducted in English (all films have English subtitles). Prerequisite: Sophomore standing or instructor's consent.

**FILM_S 3875. Brazilian Cinema. 3 Credits.**
(same as Portuguese [PORT] 3875). An introduction to Brazilian cinema, culture, and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; redefinition of national identity and history, representations of race and gender. Prerequisite: English [ENGLISH] 1000.

**FILM_S 3880. Contemporary Chinese Film. 3 Credits.**
(same as Chinese [CHINSE] 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required. Prerequisite: Sophomore standing or instructor's consent.

**FILM_S 3890. Russian and Soviet Film. 3 Credits.**
(same as Russian [RUSS] 3890). Introduces three significant genres of Russian cinema: comedy, literary adaptations, and films that explore issues of identity and autobiography. Includes examples from different epochs. Considers Soviet and post-Soviet films. Russia and Russian culture. Course conducted in English; films have English subtitles. Prerequisites: Sophomore standing or instructor's consent.

**FILM_S 3895. Korean Society Through Cinema. 3 Credits.**
(same as Korean [KOREAN] 3890). Examines the way in which Korean film reveals the cultural, political, and ideological orientation of the society in which it is created and circulated. Compares films from North and South Korea, considering modernity, gender, nation-hood, and class. Prerequisite: Sophomore Standing. Graded on A-F basis only.

**FILM_S 3930. Screenwriting for Television and Film. 3 Credits.**

**FILM_S 4001. Topics in Film-General. 1-3 Credit.**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: Sophomore standing or instructor's consent.

**FILM_S 4005. Topics in Film Studies - Humanities. 1-3 Credit.**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: sophomore standing or instructor's consent.

**FILM_S 4810. Film Theory. 3 Credits.**
(same as English [ENGLISH] 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others. Prerequisite: ENGLISH 1000 and ENGLISH or FILM_S 1800. Junior standing or above required.

**FILM_S 4820. Studies in Film Genre. 3 Credits.**
(same as English [ENGLISH] 4820) Topics (e.g. The Western, film noir) announced at time of registration. No more than six hours may be taken toward the major. Prerequisite: English [ENGLISH] 1000 and English/Film Studies [ENGLISH/FILM_S] 1800; Junior Standing or instructor's consent.

**FILM_S 4840. Culture and Media. 3 Credits.**
(same as English [ENGLISH] 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major. Prerequisite: English [ENGLISH] 1000 and English/Film Studies [ENGLISH/FILM_S] 1800. Junior standing or instructor's consent required.

**FILM_S 4860. Film Themes and Genres. 3 Credits.**
Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 4860. Prerequisite: English [ENGLISH] 1000 and English [ENGLISH] / Film Studies [FILM_S] 1800.

**FILM_S 4880. Capstone Experience. 3 Credits.**
This course is for Film Studies students who have completed their concentration requirements. The main objective is to help students independently create and complete a capstone project. The project should allow you to conceptualize and enter professional life after commencement. Film Studies majors only. Consent of instructor required.
FILM_S 4935. Adaptation of Literature for Film. 3 Credits.
(same as English [ENGLSH] 4935 and Theatre [THEATR] 4935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

FILM_S 4940. Internship. 1-3 Credit.
This course is for Film Studies students who have the opportunity to work in an internship position in a related industry or at a government agency where they can gain valuable on the job experience and knowledge. The student must register for the Internship course in the semester in which the work takes place. Prerequisites: English [ENGLSH] 1000, English/Film Studies [FILM_S] 1800. Must have at least 15 hours of Films Studies credit. Online courses do not count for the 15 hours of Film Credit. Graded S/U only. Instructor consent required.

FILM_S 4960. Special Readings in Film Studies. 1-3 Credit.
Arranged. Individual work with conferences adjusted to needs of student. Prerequisites: English [ENGLSH] 1000 and English [ENGLSH]/Film Studies [FILM_S] 1800. Consent of instructor required. Restricted to Film Studies majors in their final year.

FILM_S 4963. Latin American Cinema (in Spanish). 2-3 Credit.
(same as Spanish [SPAN] 4960). Subject varies according to instructor. Prerequisites: Spanish [SPAN] 3420 and 3430.

FILM_S 4995. Senior Honors Thesis. 1-3 Credit.
Independent honors research under direction of faculty. Senior standing required, consent of instructor required, Honors eligibility required. Graded on S/U basis only.

FILM_S 7001. Topics in Film Studies-General. 1-3 Credit.
Prerequisite: graduate standing.

FILM_S 7810. Film Theory. 3 Credits.
(same as ENGLISH 7810). This course explore contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others. Graded on A-F basis only.

FILM_S 7840. Culture and Media. 3 Credits.
(same as English [ENGLSH] 7840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major. Prerequisite: graduate standing.

FILM_S 7935. Adaptation of Literature for Film. 3 Credits.
(same as Theatre [THEATR] 7935 and English [ENGLSH] 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

FILM_S 7975. Distorted Picture: Post-War Cinema in a Police State. 3 Credits.
(Same as Russian [RUSS] 7975) Considers strategies and stylistic devices employed by East European & Soviet directors to produce artistically worthy films under censorship. Discusses how artists adapted methods, boldness of expression, thematic content, and technical sophistication. Attention paid to production techniques. Graduate Standing Required.

FILM_S 8005. Topics in Film Studies - Humanities. 1-3 Credit.
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Prerequisites: graduate standing or instructor’s consent.

Finance (FINANC)

FINANC 1000. Principles of Finance. 3 Credits.
Financing business, consumer, and government activity; stocks, bonds, real estate, and financial markets; risk; insurance; inflation; cash and income management; capital accumulation and appreciation. Students admitted to COB upper level degree program cannot enroll.

FINANC 2000. Survey of Business Finance. 3 Credits.
An overview of the global financial system, financial markets, financial institutions, and principles of financial management. Students admitted to COB upper level degree program cannot enroll.

FINANC 3000. Corporate Finance. 3 Credits.
Financial decision-making in a corporate environment. Time value of money, capital budgeting, cost of capital, working capital management and financial instruments issued by the firm. Prerequisites: completed 45 semester hours, Accountancy [ACCTCY] 2036 and 2037, Statistics [STAT] 2500, in addition to Economics [ECONOM] 1015 or 1014 or 1024 and 1015.

FINANC 3300. Personal Risk Management and Insurance. 3 Credits.
Teaches the importance of risk in personal endeavors and the intelligent handling of such risk. Life, health, auto, homeowner and liability risks are treated. Prerequisite: sophomore standing.

FINANC 4010. Financial Management. 3 Credits.
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing. Prerequisite: Finance [FINANC] 3000.

FINANC 4020. Investments. 3 Credits.
Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: Finance [FINANC] 3000.

FINANC 4020H. Investments - Honors. 3 Credits.
Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: Finance [FINANC] 3000. Honors eligibility required.

FINANC 4030. Financial Intermediaries and Markets. 3 Credits.
Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy. Prerequisites: Finance [FINANC] 3000 and Economics [ECONOM] 3229.

FINANC 4110. Financial Management Policy. 3 Credits.
Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions. Prerequisite: senior standing and Finance [FINANC] 4010; Corequisites: Accountancy [ACCTCY] 3300.

FINANC 4120. Security Analysis. 3 Credits.
Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: Finance [FINANC] 3000. Honors eligibility required.

FINANC 4130. Financial Intermediaries and Markets. 3 Credits.
Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy. Prerequisites: Finance [FINANC] 3000 and Economics [ECONOM] 3229.

FINANC 4110. Financial Management Policy. 3 Credits.
Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions. Prerequisite: senior standing and Finance [FINANC] 4010; Corequisites: Accountancy [ACCTCY] 3300.

FINANC 4120. Security Analysis. 3 Credits.
Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: Finance [FINANC] 3000. Honors eligibility required.

FINANC 4130. Management of Financial Institutions. 3 Credits.
Operating principles of major financial intermediaries, including commercial banking, savings, insuring, lending and investing institutions. Analysis of cases; study of current problems. Prerequisite: Finance [FINANC] 4030 and senior standing. Some sections of the course may be graded on A/F or S/U graded basis only.
FINANC 4185. Problems in Finance. 1-99 Credit.
Independent study, reports on selected topics. Some sections of this course may be offered A-F only or S/U only.

FINANC 4201. Topics in Finance. 3 Credits.
Selected topics in finance, insurance or real estate. Offered on an experimental basis. Some sections of this course may be offered A-F only or S/U only.

FINANC 4220. Portfolio Management. 3 Credits.
Development and application of the principles of modern portfolio theory to financial assets. Analysis of the concepts of diversification, portfolio construction, portfolio revision, and use of types of financial assets in effective portfolio management. Prerequisite: Finance [FINANC] 4020 and senior standing.

FINANC 4320. Financial Futures and Options. 3 Credits.
A basic overview of financial futures and options markets. Topics include: theoretical pricing of financial futures contracts and stock options, institutional aspects of these markets, hedging, and speculative strategies. Prerequisites: Finance [FINANC] 4020 and senior standing.

FINANC 4500. Principles of Real Estate. 3 Credits.

FINANC 4510. Real Estate Appraisal. 3 Credits.

FINANC 4520. Real Estate Finance and Investment. 3 Credits.
Financing of residential, commercial, and industrial real estate and real estate development. Instruments, institutions, and markets; role of government agencies; investment qualities of real estate. Prerequisite: Finance [FINANC] 4500 and senior standing.

FINANC 4530. Real Estate Portfolio Analysis and REITs. 3 Credits.
Management of real estate portfolios and analysis of real estate investment trusts including financial statement analysis, cash flows, and valuation techniques. Prerequisite: Finance [FINANC] 3000.

FINANC 4620. Investment Strategy of Warren Buffett. 3 Credits.

FINANC 4720. International Finance. 3 Credits.
Application of domestic corporate finance to the international arena. Emphasis on international capital budgeting, working capital management, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Prerequisites: Finance [FINANC] 4010, senior standing.

FINANC 4820. Investment Fund Management. 3 Credits.
Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. Prerequisites: Finance [FINANC] 3000, 4120 or 4620, instructor's consent. May be repeated for credit.

FINANC 4940. Professional Finance Internship. 3 Credits.
Provides students experience with financial activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and the complete written assignments detailed in the plan. Prerequisite: Finance [FINANC] 3000, College of Business students with a finance concentration or international business students with a finance emphasis, and instructor's consent.

FINANC 7010. Financial Management. 3 Credits.
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing. Prerequisite: graduate standing and Finance [FINANC] 3000.

FINANC 7020. Investments. 3 Credits.
Security valuation and analysis, formulation of personal and professional investment programs. Prerequisite: Finance [FINANC] 3000.

FINANC 7201. Special Topics in Finance. 1-3 Credit.
Selected topics in Finance, insurance, or real estate. Offered on an experimental basis. Prerequisite: instructor's consent.

FINANC 7210. Microeconomics for Business. 1-3 Credit.
Examination of how the behavior or consumers and the business decisions of firms affect supply, demand, and the resulting prices of goods and services in the market.

FINANC 7220. Economics for Managers. 1.5 Credit.
Applies the concepts and tools of economics to management issues and problems. Prerequisite: Finance [FINANC] 7210 or equivalent.

FINANC 7410. Managerial Finance I. 1-3 Credit.
Introduction to financial management including the time value of money capital budgeting techniques, risk measurement, and the valuation of financial securities. Prerequisite: Accountancy [ACCTCY] 7310.

FINANC 7420. Managerial Finance II. 1-3 Credit.
Continuation of the study of financial management with focus on the risk-return tradeoff, capital structure, corporate layout polices, long-term financing, elementary options pricing, and mergers and acquisitions. Prerequisite: Finance [FINANC] 7410.

FINANC 7440. Managerial Finance. 3 Credits.
Analyzes financial information relative to acquisition, management of assets; costs of alternative financial contracts; effect of mix of outstanding securities on entity's cost of capital; interaction between funding/investment decisions. Prerequisites: Accountancy [ACCTCY] 7310 or departmental consent.

FINANC 7620. Investment Strategy of Warren Buffett. 3 Credits.
Survey and application of the investment philosophy and valuation methods of Warren Buffett. Prerequisites: Finance [FINANC] 3000 or 7440. Undergraduate corequisites: FINANC 4020.

FINANC 7820. Investment Fund Management. 3 Credits.
Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated 1 time for credit. Prerequisites: Finance [FINANC] 3000 or 7440; instructor's consent.

FINANC 8001. Topics in Finance. 1-3 Credit.
Selected topics in finance, insurance or real estate. Offered on experimental basis. Prerequisite: instructor’s consent.

FINANC 8070. Security Markets and Investments. 3 Credits.
Valuation of securities including stocks, bonds, options and futures; risk-return analysis of financial assets. Prerequisite: Finance [FINANC] 7440 or equivalent.
FINANC 8085. Problems in Finance. 1-3 Credit.
For independent investigation and analysis, graduate students select topics suggested by the foregoing undergraduate courses.

FINANC 8320. Financial Markets. 1-3 Credit.
Operation and structure of money markets and capital markets, including markets for stocks, bonds and derivatives securities. Study of the securities that trade in those markets including characteristics, valuation and diversification. Prerequisite: Business Administration [BUS_AD] 7440.

FINANC 8330. Investment Policy and Portfolio Management. 1-3 Credit.
Study of investment policies and the effects of risk and diversification on investment management including measurement of risk, identification of investment policy, and construction and maintenance of investment portfolios. Prerequisites: Finance [FINANC] 8320.

FINANC 8340. Derivative Financial Securities. 3 Credits.
(same as Mathematics [MATH] 8460). Comprehensive overview of derivative securities including financial futures and options, swaps, and financial engineering. Major topics: institutional aspects of these markets, advanced pricing models, pricing relationships among derivative securities, and risk shifting. Prerequisite: Finance [FINANC] 8070.

FINANC 8350. Financial Statement Analysis I. 1-3 Credit.
An introduction to financial statement analysis with emphasis on interpretation and understanding of the balance sheet income statement, and statement of cash flows. Prerequisite: Accountancy [ACCTCY] 7310.

FINANC 8352. Financial Statement Analysis II. 1-5-3 Credit.
Analysis of company financial statements and related accounting information with emphasis on investors' decisions to invest in the company. Prerequisite: Finance [FINANC] 8350.

FINANC 8360. Equity Securities Analysis. 1-3 Credit.

FINANC 8370. Fixed-Income Securities Analysis. 1-3 Credit.
Markets for fixed-income securities and theory and application of models for valuing bonds and other fixed-income securities. Prerequisite: Finance [FINANC] 7420.

FINANC 8410. Advanced Financial Management. 3 Credits.

FINANC 8420. Working Capital Management. 3 Credits.
Financial planning and short-term financial management; integration of quantitative techniques, microeconomics, and financial decisions; analysis of decisions about profit planning, financial forecasting, accounts receivable, cash management, and financial short-term assets. Prerequisite: Finance [FINANC] 8410.

FINANC 8430. Capital Budgeting. 3 Credits.
An investigation of long-term financial decisions. Topics include capital budgeting, leasing, long-term financing. Extensive use of cases. Prerequisite: Finance [FINANC] 8410.

FINANC 8440. Financing Multinational Business. 1-3 Credit.
Study of foreign exchange markets, currency derivatives, global capital budgeting, and international financial decision strategy. Prerequisite: Finance [FINANC] 7420. Some sections of this course may be offered on an A/F or S/U basis only.

FINANC 8450. Ethics and Standards of Financial Practice. 1-3 Credit.
Study of financial ethics with particular focus on standards of practice for investment performance standards. Recommended for students planning to take the CFA exam. Prerequisite: Finance [FINANC] 7420.

FINANC 8510. Management of Financial Institutions. 3 Credits.
Study and analysis of policies, goals, practices and organizational changes in the management of financial institutions and intermediaries. Prerequisite: Finance [FINANC] 7440.

FINANC 8520. Real Estate Investment. 1.5-3 Credit.
Analysis of real estate as an investment including forecasting net operating income and cap rates, risk analysis estimation of return on investment, and syndication. Prerequisite: Finance [FINANC] 7420.

FINANC 8530. Real Estate Portfolio Analysis. 1.5-3 Credit.
Portfolio analysis applied to real estate investment including diversification, portfolio theory, and management of real estate portfolios including real estate investment trusts (REITs). Prerequisites: Finance [FINANC] 7420.

FINANC 8560. Real Estate Securities Analysis. 1.5-3 Credit.
Analysis of real estate securities including in-depth financial statement analysis and valuation of real estate investment trusts (REITs) and real estate operating companies (REOCs). Prerequisites: Finance [FINANC] 8530 or instructor's consent.

FINANC 9001. Advanced Topics in Finance. 3 Credits.
Selected topics in finance. Prerequisite: instructor's consent.

FINANC 9090. Research in Finance. 1-99 Credit.
Thesis research for Ph.D. degree. Graded on a S/U basis only.

FINANC 9100. Seminar in Corporate Finance. 3 Credits.
Advanced theory, investigation of current research in financial management.

FINANC 9101. Topics Seminar in Finance. 1-3 Credit.
Reading and critical evaluation of selected current finance literature and research. Prerequisites: Ph.D. students only. Departmental consent. May be repeated. Graded on S/U basis only.

FINANC 9200. Research in Corporate Finance. 3 Credits.
Advanced topics in corporate finance. Prerequisite: Finance [FINANC] 9100.

FINANC 9300. Financial Economics. 3 Credits.
Utility analysis, efficient frontier mathematics, asset pricing and related topics. Prerequisite: instructor's consent.

FINANC 9400. Seminar in Investment Analysis. 3 Credits.
Develops integrated theory and analytic techniques for evaluating investment potential of financial instruments. Emphasizes corporate securities. Selected cases and readings.

Fisheries And Wildlife (F_W)

F_W 1002. Topics in Fisheries and Wildlife. 1-99 Credit.
Organized study of selected topics intended primarily for lower-level students in Fisheries and Wildlife Sciences.

F_W 1012. Introduction to Captive Wild Animal Management. 3 Credits.
(same as Animal Science [AN_SCI] 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological
parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A/F basis only.

**F_W 1100. Introductory Zoology with Laboratory. 5 Credits.
(same as Biological Sciences [BIO_SC] 1100).** Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.

**F_W 2002. Topics in Fisheries and Wildlife-Biological/Physical/Mathematics. 1-99 Credit.**
Organized study of selected topics. Intended for lower division Fisheries and Wildlife students. Subjects may vary from semester to semester.

**F_W 2100. Colloquium in Fisheries and Wildlife. 1 Credit.**
Case studies in the biology and management of fish and wildlife and their environments. Fisheries and Wildlife majors. Graded on S/U basis only.

**F_W 2500. Introduction to Genetics and Evolution for Conservation. 3 Credits.**
Basic principles and processes of genetics and evolution and their importance for management and conservation. Prerequisite: Natural Resources [NAT_R] 1070, Biological Sciences [BIO_SC] 1500, Chemistry [CHEM] 1310, Mathematics [MATH] 1100. Graded on A/F basis only.

**F_W 2600. Ornithology. 4 Credits.**
(same as Biological Sciences [BIO_SC] 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab. Prerequisites: 5 hours Biological Sciences or instructor’s consent.

**F_W 2700. Ichthyology. 4 Credits.**
(same as Biological Sciences [BIO_SC] 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment. Prerequisite: 8 hours Biological Sciences or equivalent.

**F_W 2900. Principles of Wildlife Management. 4 Credits.**
Expose students to the principles of wildlife management with emphasis on current issues faced by wildlife researchers and managers in the field. Prerequisite: Natural Resources [NAT_R] 1070 and one other course in biological or environmental science; sophomore standing or higher. Graded on A/F basis only.

**F_W 3002. Topics in Fisheries and Wildlife-Biological/Physical/Mathematics. 1-99 Credit.**
Organized study of selected topics. Intended for upper division students. Subjects and credit may vary from semester to semester.

**F_W 3085. Problems in Fisheries and Wildlife. 1-99 Credit.**
Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration. Prerequisite: consent of supervising faculty member.

**F_W 3090. International Studies in Conservation. 1-5 Credit.**
International study abroad that enhances and expands conservation knowledge and experience. Prerequisites: 12 hours biological science and/or conservation-related coursework. Restricted to Fisheries and Wildlife majors only; departmental consent. Must complete a Study Abroad Proposal prior to attending the course. May be repeated for credit.

**F_W 3200. Aquaculture. 3 Credits.**
This course aims to develop an understanding of key aspects of the practice of fish culture, an awareness of aquatic species being cultured worldwide, and an appreciation of why aquaculture is expanding so rapidly on a global basis and the emerging environmental concerns associated with aquaculture growth. Graded on A/F basis only.

**F_W 3300. Wildlife Damage Management. 3 Credits.**
To explore wildlife damage conflicts involving human health and safety, agricultural resources, economics and natural resources. The course studies damage caused by wildlife species and methods to alleviate damage. Covers wildlife diseases, human dimensions and wildlife policies. Graded on A/F basis only.

**F_W 3350. Wildlife Damage Management Lab. 1 Credit.**
To explore wildlife damage management techniques in a field setting. To gain knowledge in assessing wildlife damage and the responsible species and determine the best approach to reduce that damage. Pre/Co-requisite: Fisheries and Wildlife [F_W] 3300. Graded on A/F basis only.

**F_W 3400. Water Quality and Natural Resource Management. 3 Credits.**
Introduction to broad aspects of water quality science, management and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology. Prerequisite: Chemistry [CHEM] 1310 and Natural Resources [NAT_R] 1070 or instructor’s consent.

**F_W 3500. Wildlife Conservation in British Cities. 3-6 Credit.**
Five week study abroad course focusing on approaches to wildlife conservation in London, Birmingham, Manchester, Liverpool and Edinburgh. Students will learn how managers blend ecology, conservation, and participatory approaches to management to conserve species in a human dominated landscape. Hands on involvement with conservation projects included. Prerequisites: Natural Resources [NAT_R] 1060 or 1070, Management course in SNR; instructor’s consent.

**F_W 3600. Introduction to Conservation Biology. 3 Credits.**
Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems. Prerequisite: Biological Sciences [BIO_SC] 3650.

**F_W 3660. Mammalogy. 4 Credits.**
(same as Biological Sciences [BIO_SC] 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States. Prerequisite: junior standing or instructor’s consent.

**F_W 3700. Animal Behavior. 3 Credits.**
Behavior allows animals to react promptly to environmental changes, and is how they interact with others and their surroundings. Because behaving is central to an animal’s life, knowing about behavior is fundamental to understanding animal ecology and to conservation efforts. Prerequisite: Fisheries and Wildlife [F_W] 1100. Graded on A/F basis only.

**F_W 3900. Ecology of Fishes. 3 Credits.**
This course considers fishes’ interactions with their environments in relation to survival, growth and population processes. The course is for mid- to upper-level undergraduates interested in fisheries science, management and fish conservation. Prerequisites: Statistics [STAT] 2530 or 1400; Biological Sciences [BIO_SC] 1500 or Fisheries and Wildlife [F_W] 1100; sophomore standing. May be repeated once for credit. Graded on A/F basis only.
F_W 4002. Topics in Fisheries and Wildlife-Biological/Physical/Mathematics. 1-99 Credit.
Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.

F_W 4100. Limnology. 3-4 Credit.
(same as Biological Sciences [BIO_SC] 4100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: senior standing or Biological Sciences [BIO_SC] 3650.

F_W 4200. Urban Wildlife Conservation. 3 Credits.
Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas. Prerequisites: Biological Sciences [BIO_SC] 3650 or instructor's consent.

F_W 4220. Human Dimensions of Fish and Wildlife Conservation. 3 Credits.
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation. Prerequisite: One 3000-level or above professional Fisheries and Wildlife management or techniques course or instructor consent.

F_W 4300. Fisheries Management. 3 Credits.
Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations. Prerequisites: Biological Sciences [BIO_SC] 3650 and Statistics [STAT] 2530.

F_W 4400. Techniques for Fisheries Management and Conservation. 4 Credits.
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Prerequisites: graduate standing and Biological Sciences [BIO_SC] 3650 and Statistics [STAT] 2530 or Natural Resources [NAT_R] 3110 and Fisheries and Wildlife [F_W] 2700 or 4300. Graded on A/F basis only.

F_W 4500. Animal Population Dynamics and Management. 3 Credits.

F_W 4600. Ecosystem Management. 4 Credits.
Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Prerequisites: Biological Sciences [BIO_SC] 3650. Graded on A/F basis only.

F_W 4650. Wildlife Management Planning. 3 Credits.
Students will be exposed to various wildlife planning tools. Student teams will develop wildlife management plans with strategic and operational components for current conservation issues in Missouri. Plans will be critiqued by peers and outside professionals. Prerequisites: Biological Sciences [BIO_SC] 3650 and senior standing. Fisheries and Wildlife [F_W] 2900. Graded on A-F basis only.

F_W 4700. Wildlife Research and Management Evaluation Methods. 4 Credits.
Techniques for conducting wildlife research and evaluating wildlife management practices. Prerequisites: Statistics, and Biological Science [BIO_SC] 3650 or Fisheries and Wildlife [F_W] 2900. Course designed to prepare students for research or graduate degrees.

F_W 4800. Environmental Toxicology. 3 Credits.

F_W 4810. Wildlife Disease Ecology. 3 Credits.
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation. Prerequisites: for undergraduates, Biological Sciences [BIO_SC] 3650.

F_W 4880. Waterfowl Ecology and Management. 3 Credits.
Ecology and management of North American waterfowl and their habitats. Laboratory exercises focus on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Prerequisite: Fisheries and Wildlife [F_W] 2600; Biological Sciences [BIO_SC] 3650; instructor's consent. Graded on A/F basis only.

F_W 4910. Senior Seminar in Captive Wild Animal Management. 1 Credit.
(same as Animal Science [AN_SCI] 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Prerequisite: [AN_SCI] / Fisheries and Wildlife [F_W] 1012 or instructor's consent; junior or senior standing. Graded A-F only.

F_W 4940. Fisheries and Wildlife Internship. 1-12 Credit.
Supervised professional experience with an approval public or private organization. Prerequisite: Fisheries and Wildlife majors only, instructor's consent. Graded on S/U basis only. May be repeated for credit.

F_W 4950. Undergraduate Research in Fisheries and Wildlife. 1-99 Credit.
Individually directed field or laboratory research for students under faculty supervision. Project must be arranged by student and faculty member prior to registration. Prerequisite: consent of supervising faculty member.

F_W 4960. Ecosystem Management I. 3-9 Credit.
Critical review of current literature and research in ecosystems. Project must be arranged by student and faculty supervisor prior to registration. Prerequisite: supervising faculty member's consent required.

F_W 7002. Graduate Topics in Fisheries and Wildlife. 1-99 Credit.
Organized study of selected topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Prerequisite: graduate standing. Graded on A/F basis only.

F_W 7100. Limnology. 3-4 Credit.
(same as Biological Sciences [BIO_SC] 7100). (lecture/lab: 4 hrs.; lecture only: 3 hrs.) Ecology of inland waters with emphasis on productivity. Prerequisites: graduate standing or Biological Sciences [BIO_SC] 3650.
F_W 7200. Urban Wildlife Conservation. 3 Credits.
Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas. Corequisites: graduate standing and Biological Sciences [BIO SC] 3650 or instructor’s consent.

F_W 7220. Human Dimensions of Fish and Wildlife Conservation. 3 Credits.
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation. Prerequisite: One 3000-level or above professional management or techniques course or instructor consent. Graduate Standing Required.

F_W 7300. Fisheries Management. 3 Credits.
Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations. Prerequisites: graduate standing and Biological Sciences [BIO SC] 3650 and Statistics [STAT] 2530.

F_W 7400. Techniques for Fisheries Management and Conservation. 3 Credits.
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Prerequisites: graduate standing and Biological Sciences [BIO SC] 3650 and Statistics [STAT] 2530 or Natural Resources [NAT R] 3110 and Fisheries and Wildlife [F W] 2700 or 4300.

F_W 7500. Animal Population Dynamics and Management. 3 Credits.
Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Prerequisites: Mathematics [MATH] 1400, Biological Sciences [BIO SC] 3650, Statistics; graduate standing required. Graded on A/F basis only.

F_W 7600. Ecosystem Management. 4 Credits.
Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, social-economic, and institutional factors that influence natural resource management agencies. Prerequisite: graduate standing. Graded on A/F basis only.

F_W 7700. Wildlife Research and Management Techniques. 4 Credits.
Research and Management methods for wildlife populations and habitats. Prerequisite: graduate standing and Biological Sciences [BIO SC] 3650 and Statistics [STAT] 2530 or Natural Resources [NAT R] 3110. One-week pre-semester field session required.

F_W 7800. Environmental Toxicology. 3 Credits.
Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment. Prerequisite: Chemistry [CHEM] 1320 and Fisheries and Wildlife [F W] 3400 or instructor’s consent.

F_W 7810. Wildlife Disease Ecology. 3 Credits.
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation. Prerequisite: instructor’s consent.

F_W 7880. Waterfowl Ecology and Management. 3 Credits.
Advanced study of the interactions between fish and their environment. Topics include behavioral, physiological, population dynamics, harvest management, and critical study of research programs. Prerequisite: instructor consent. Graded on A/F basis only. Graduate Standing Required.

F_W 8001. Topics in Fisheries and Wildlife. 1-99 Credit.
Organized study of selected topics. Subjects and credit may vary from semester to semester. Prerequisite: instructor’s consent.

Independent research not leading to a thesis.

F_W 8085. Graduate Problems in Fisheries and Wildlife. 1-5 Credit.
Individualized problems studies to supplement regularly organized graduate courses in Fisheries and Wildlife. Prerequisite: consent of supervising faculty member.

F_W 8087. Masters Seminar in Fisheries and Wildlife. 1 Credit.
Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.

Research leading to a thesis or dissertation. Graded on a S/U basis only.

F_W 8300. Professional Development and Communications. 1-3 Credit.
Intended to foster professional growth and development of graduate students. The course will present a rigorous introduction to professionalism, ethics, career development, and professional communications skills and techniques. Prerequisite: graduate standing. Graded on A/F basis only.

F_W 8440. Fish Ecology. 3 Credits.
Advanced study of the interactions between fish and their environment. Topics include behavioral, physiological, population and community ecology of fishes, with emphasis on development and application of ecological theory in fishery management. Prerequisites: Fisheries and Wildlife [F W] 2700, 4100, Biological Sciences [BIO SC] 3650 or equivalent.

F_W 8450. Advanced Limnology. 3 Credits.
Physical, chemical and biological processes of lakes and streams emphasizing biological production, water quality and modern problems. Field, laboratory techniques in limnology research. Prerequisites: Fisheries and Wildlife [F W] 4100, Biological Sciences [BIO SC] 3650, 3510 or equivalent.

F_W 8460. Wetland Ecology. 3 Credits.
A survey of the wetlands of North America; emphasis on nutrient dynamics, habitat structure, management, legislation and regulations, and man’s impacts. Prerequisites: Fisheries and Wildlife [F W] 4100, Biological Sciences [BIO SC] 3650 and instructor’s consent.

F_W 8470. Fish Bioenergetics: Concepts and Applications. 2 Credits.
Key concepts of fish bioenergetics are treated by readings, discussions of articles and lectures by the instructor. Concepts are applied through modeling. Novel applications, shortcomings and benefits of bioenergetics models are treated. The course applies to graduate students seeking careers in fisheries management, aquatic ecology, fish conservation
and aquaculture. Prerequisites: graduate standing; instructor’s consent. Graded on A/F basis only.

**F_W 8510. Ecology, Conservation, and Environmental Justice. 2 Credits.**

The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Prerequisite: one undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent. Graded on A/F basis only.

**F_W 8520. Stream Ecology. 3 Credits.**

Ecological principles applied to flowing waters. Emphasis on ecological processes within algal, invertebrate and fish communities. The influence of geomorphic processes, hydrologic principles and physical-chemical factors on the biota.

**F_W 8530. Quantitative Fish and Wildlife Assessment. 4 Credits.**

Methods to assess space use patterns, animal abundance and population status are drawn into quantitative framework for making inferences to wild populations. Practical application and limitations of techniques are emphasized through analysis and interpretation of field data. Prerequisite: Natural Resources [NAT R] 3110 or equivalent.

**F_W 8540. Wildlife Nutritional Ecology. 3 Credits.**

A comprehensive and comparative treatment of vertebrates interact with their environment to satisfy nutrient and energy requirements. Emphasis on nutrient requirements, food processing, bioenergetics and foraging strategies. Prerequisite: Biological Sciences [BIO SC] 3650 or instructor’s consent.

**F_W 8550. Advanced Waterfowl Ecology. 3 Credits.**

Advance studies of waterfowl ecology. Emphasis on mating systems, foraging ecology, energetics, and post-breeding and wintering ecology. Prerequisites: Fisheries and Wildlife [F W] 2600, 3800 and Biological Sciences [BIO SC] 3650 or instructor’s consent.

**F_W 8620. Vertebrate Behavioral Ecology. 3 Credits.**

In-depth study of the behavioral adaptations of vertebrates. Topics include reproductive strategies, mate selection, parental care, predator avoidance, habitat selection, foraging strategies and spacing patterns. Prerequisites: Biological Sciences [BIO SC] 4640 and 3650 or equivalents.

**F_W 9087. PhD Seminar in Fisheries and Wildlife. 1 Credit.**

Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.

**F_W 9090. Ph. D. Dissertation Research in Fisheries and Wildlife. 1-99 Credit.**

Research leading to a thesis or dissertation. Graded on a S/U basis only.

---

**Food Science (F_S)**

**F_S 1010. Introduction to Viticulture and Enology. 1 Credit.**

This course will give a general overview of growing grapes (viticulture) and winemaking (enology) with an emphasis on Missouri wines and wineries. This course is the first course in a sequence of courses in the viticulture and enology track of the food science degree program.

**F_S 1030. Food Science and Nutrition. 3 Credits.**

Basic principles of science and technology as applied to the problem of providing safe, nutritious, and desirable food for man.

**F_S 2114. Live Animal and Meat Evaluation. 3 Credits.**

(same as AN_SCI 2114). The composition and quality meat produced from food animals is the driving component of livestock economic value. This course will teach the principles and procedures involved in evaluation, grading, selection, and economic value of meat animals and poultry and the carcasses they produce. This course is an excellent introduction and (or) prerequisite for all livestock production courses and will provide a baseline of information for students interested in livestock or meat judging.

**F_S 2131. Dairy Products Evaluation. 2 Credits.**

(same as AN_SCI 2311). Sensory Evaluation and judging of dairy products.

**F_S 2172. Elements of Food Microbiology. 3 Credits.**

Basic course stressing principles of microbiology applied to foods.

**F_S 2195. Grapes and Wines of the World. 3 Credits.**

(same as PLNT_S 2195). Explores the world of wine through study of viticultural principles and practices, wine styles, classifying wine, the winemaking process and New World and Old World wine regions. Learn wine tasting skills and experience wines from around the world. World wine consumption, social and physical health benefits of moderate wine consumption.

**F_S 2199. Seminar in Professional Development. 1 Credit.**

Readings and discussion related to professional development for the industry. Prerequisites: sophomore standing.

**F_S 3190. Study Abroad: International Meat, Dairy and Enology. 3 Credits.**

(same as AN_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Prerequisite: instructor’s consent.

**F_S 3214. Principles of Meat Science. 3 Credits.**

(same as AN_SCI 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food. Prerequisite: one course in Biological Sciences.

**F_S 3231. Principles of Dairy Foods Science. 3 Credits.**

(same as AN_SCI 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.) Prerequisite: One course in Chemistry or Biological Sciences.

**F_S 3240. Principles of Viticulture I. 4 Credits.**

(same as PLNT_S 3240). Grapevine growth, development, selection, propagation, training systems pruning, and harvesting; vineyard site selection, xylem design, and development.. Graded on A/F basis only. Prerequisites: F_S 1010 and F_S 2195/PLNT_S 2195 or PLNT_S 2100 or PLNT_S 2110 or PLNT_S 2125.

**F_S 3250. Physical Principles for Food Processing. 3 Credits.**

Introduction to basic engineering concepts used to process raw materials: Energy balance, Pipe flow, Viscosity, Heat exchange, Refrigeration. Prerequisites: one calculus course and one physics course.
F_S 3385. Problems in Food Science. 1-99 Credit.
Supervised study in a specialized phase of food science and nutrition.

F_S 4199. Food Industry Senior Seminar. 1 Credit.
The course explores the structure and the various branches of the food industry. Emphasis is placed on industry trends and the manufacture of specific selected food products and their ingredients. Prerequisite: F_S 1030 or equivalent, F_S 2199 or equivalent; junior or senior standing. Graded on A/F basis only.

F_S 4301. Topics in Food Science. 1-99 Credit.
Instruction in specific subject matter areas in the field of food science and nutrition.

F_S 4310. Food Chemistry and Analysis. 4 Credits.
Structure, composition and chemical properties of food. Prerequisite: 5 hours Chemistry or Biochemistry.

F_S 4311. Investigation of Food Properties. 3 Credits.
Study of the chemical and physical properties of foods and the interaction of food components. Prerequisites: Food Science F_S 4310 or equivalent, or instructor's consent.

F_S 4315. Food Chemistry and Analysis Laboratory. 3 Credits.
The quantitative determination of the constituents of food. Prerequisites: F_S 4310 or concurrent enrollment.

F_S 4330. Principles of Food Processing. 4 Credits.
Basic principles of food processing, with emphasis on blanching, pasteurization, commercial sterilization, refrigeration, freezing, concentration, dehydration and packing. Impacts of processing on product quality are evaluated.

F_S 4331. Technology of Dairy Products and Ingredients. 3 Credits.
Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients. Prerequisites: one Chemistry course and F_S 3231 or equivalent.

F_S 4340. Principles of Viticulture II. 4 Credits.
(same as PLNT_S 4340). Environmental and biological factors influencing vine physiology and winegrape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A/F basis only. Prerequisite: F_S 3240/PLNT_S 3240.

F_S 4344. Processing Muscle Foods. 3 Credits.
(same as AN_SCI 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility. Prerequisites: One Chemistry course.

F_S 4354. Physiology and Biochemistry of Muscle as Food. 3 Credits.
(same as AN_SCI 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food. Prerequisite:BIO_SC 1010 or equivalent or F_S 3214 or instructor's consent.

F_S 4370. Food Microbiology. 3 Credits.
Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups. Prerequisites: Food Science [F_S] 2172 and one Biochemistry course or concurrent enrollment.

F_S 4375. Food Microbiology Laboratory. 2 Credits.
Examination of foods for microorganisms and characterization of major species. Prerequisite: F_S 4370 or concurrent enrollment.

F_S 4380. Sensory Analysis of Food and Beverages. 3 Credits.
Methodological principles of the sensory analysis of food and beverages with an emphasis on wine analysis. Recommended: one statistics course.

F_S 4385. Problems in Food Science. 1-99 Credit.
Advanced problems in a selected field of food science and nutrition.

F_S 4390. Optimization and Management of Food and Agricultural Systems. 3 Credits.
(same as AG_S_M and HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function. Prerequisite: MATH 1100.

F_S 4440. Principles of Winemaking and Wine Chemical Analysis. 4 Credits.
The theoretical and practical basics needed by enologists/winemakers including sensory analysis of grapes; chemical, microbiological and technological aspects of winemaking; and the analytical methods used for juice and wine analysis. Prerequisites: 5 credit hours inorganic chemistry and organic chemistry or concurrent, or instructors consent. Graded on A/F basis only.

F_S 4441. Cellar Operations and Special Vinifications. 3 Credits.
Theoretical and practical basics needed by winemakers to supervise the operations of the winemaking, wine stabilization and packaging equipment. The theoretical and practical basics needed by winemakers to make special wines including rose, dessert, carbonic maceration, and sparkling wines. Prerequisite: 5 credit hours inorganic chemistry and organic chemistry and F_S 4440 or instructor's consent. Graded on A/F basis only.

F_S 4940. Field Training. 1-99 Credit.
Prerequisites: junior or senior standing and instructor's consent.

F_S 4941. Internship in Food Science. 1-6 Credit.
Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation. Prerequisites: one Food Science course and instructor's consent.

F_S 4970. Food Product Development. 3 Credits.
Capstone course integrating the various disciplines of food science to create new food products. Prerequisites: ENGLISH 1000 and instructor's consent.

F_S 4980. Food Quality Assurance. 3 Credits.
Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods. Prerequisites: English ENGLISH 1000, senior standing and instructor's consent.

F_S 7310. Food Chemistry and Analysis. 4 Credits.
Structure, composition and chemical properties of food. Prerequisite: graduate standing and 5 hours Chemistry or Biochemistry.

F_S 7311. Investigation of Food Properties. 3 Credits.
Study of the chemical and physical properties of foods and the interaction of food components. Lecture. Prerequisites: graduate standing and F_S 4310 or F_S 7310 or equivalent, or instructor's consent.
