### Grades

**GPA of Record**

The grade point average for any period is obtained by dividing the quality points earned by the total number of credits for which the student was enrolled during that period. Grades of S, U, H, W, NR, or I are not included in determining the grade point average.

The undergraduate CUM GPA is the University of Missouri GPA, which will include all grades, credits, and honor points attempted at any University of Missouri campus, including all grades and credits. In computing the undergraduate GPA the grade points assigned to students’ transfer work are the grade points that would have been assigned if the courses had been taken on the University of Missouri System campus, including any adjustments made under policies related to course repeats and/or Academic Renewal/Forgiveness.

**GPA Calculator Web Site**

To calculate a grade point average, go to the GPA Calculator Web Site at [http://registrar.missouri.edu/grades-calculators/gpa-calculator.php](http://registrar.missouri.edu/grades-calculators/gpa-calculator.php)
**Plus-Minus Grading System**

The purpose of the grading system is to provide a framework in which the faculty can report evaluation of student performance and achievement. For undergraduates, all teachers are expected to use the grading scale approved by the faculty. This precludes any department or unit from opting to use a modification of the scale.

The A through F grading system is appropriate for those subjects and situations that allow discrimination in quality of achievement and performance. The S/U grading system is more appropriate for students wishing to take elective courses in a subject matter field in which they will be competing with majors, for mastery learning situations, and for courses graded primarily on the basis of attendance.

Grades carrying credit are: A+/-, B+/-, C+/-, D+/-, S. Grades calculated in the grade point average are A+ (4.00), A (4.00), A- (3.7), B+ (3.3), B (3.00), B- (2.7), C+ (2.3), C (2.00), C- (1.7), D+ (1.3), D (1.00), D- (0.7), and F (0). The grades of S, U, NR, and W are not incorporated in the grade point average.

Students must have a cumulative GPA of 2.00 to remain in good academic standing.

All regulations currently applicable on a course-by-course basis and currently tied to a specific letter grade would be interpreted to meaning a specific letter grade range. Hence, if a student must achieve a C in one course in order to proceed to another course, under the plus-minus grading system, that student must achieve a grade in the “C range,” which would include the grade of C-.

All regulations currently tied to a specific grade average are interpreted to mean the numerical average currently associated with that specific grade. Hence, the required “C average or better” on all courses is a “2.00 average or better.”

The grade of S (on S/U basis) is defined as equivalent to the letter grade of C- or higher.

**Satisfactory/Unsatisfactory Grading System**

Students may elect to take courses under the S/U (pass/fail) grading system in several MU colleges and schools. Before electing to take a course on a pass/fail basis, the student should evaluate the advantages and disadvantages of the S/U grading system. The S/U grading status is indicated in the appropriate column on the registration or drop/add form. Students may change to or from the S/U status only through the tenth day of classes in a semester.

In general, the teacher of a course does not know which students, if any, are enrolled on the S/U system, and a grade of A-/+, B+/-, C+/-, D+/- or F for each student is reported to the Office of the University Registrar. The Office of the University Registrar staff members ascertain which students are enrolled on the S/U system and assign a grade of U to those reported for grades of D+/- or F, and a grade of S for those reported A-/+, B+/- or C+/-.

Enrollment in courses under the S/U system is subject to the following restrictions by the University faculty:

- Students cannot change from one grading system to the other after the tenth day of classes in the fall or spring semesters, or the equivalent thereof in a shorter session.
- Students cannot elect to enroll in more than one course on an S/U basis in a given semester. This excludes courses taught only with the S/U grading system.
- First-semester freshmen and students on academic probation are not eligible to enroll in courses on an S/U system. This excludes courses taught only with the S/U grading system.
- A+/-, B+/-, C+/- grades are recorded on the transcript as an S. S grades are not included in the semester or cumulative grade point average on the transcript. Full credit is earned for courses completed with a grade of S. 
- D+/- and F grades are recorded on the transcript as a U. U grades are not included in the semester or cumulative grade point average on the transcript and no academic credit is awarded for courses completed with a grade of U.
- Courses completed with a grade of S may be accepted in an area of concentration only with the prior approval of the area advisor.

Courses completed with a grade of S may constitute no more than 20 percent of the total credits for the baccalaureate degree.

- Taking S/U courses may affect eligibility for Latin or other graduation honors for undergraduate students. Contact the academic advising unit for information.
- Some specified courses may not be taken on S/U basis to meet graduation or degree program requirements. Contact the academic advising unit for S/U approval.

**Selecting Grading Options (S/U vs. A through F)**

Students must choose to change their grading option no later than after the expiration of two weeks following the first day of classes in regular session or the equivalent thereof in a shorter session. Students’ academic advising unit must approve and change their grading option in myZou for the change to become official. See the University Registrar’s website at http://registrar.missouri.edu/academic-calendar/ for deadlines for each term.

**How Dropping/Withdrawing from a Class Affects the GPA**

Students may drop a course through the end of the business day of the fifth week or the 25th class day of the semester. It will have no effect on the grade point average. After the 25th class day, the signature of the course instructor and/or dean of the academic unit is required. After the last day to drop, students are withdrawing from a course if they choose to leave the course. Students may withdraw from a course through the end of the business day of the 10th week or 50th class day of the semester. At this point a grade of W for withdraw is recorded if the student was passing at the time of withdrawal. If the student was failing at the time of withdrawal, the course grade is F. The instructor determines which grade to assign. A W grade does not affect the grade point average, while a grade of F does. The grade generally will not appear until all grades for the course are submitted at the end of the semester.

**Grades for Students Who Officially Withdraw from the University**

No grade will be assigned to a student who officially drops prior to the 26th day of the fall or spring semester or an equivalent period
in a summer session (other non-standard classes are also adjusted accordingly).

Students who officially withdraw from a standard 16-week course on or after the 26th day may be required to obtain the signature of the course instructor on the Course Withdrawal Form, available from the academic advising unit. This will inform the student of the grade (W or F) that will be submitted to the Office of the University Registrar at the end of the semester. A grade of F is assigned if the student is judged to be failing at the time of the withdrawal and will be calculated into the grade point average. Once the course withdrawal form is completed, students should return the form to their academic advising unit to obtain the dean’s signature (stamp of approval) on an add/drop form. The add/drop form is submitted to 125 Jesse Hall for processing.

Dropping or withdrawing from all classes for a term is considered withdrawing from the University. If done after the first day of standard classes the student remains eligible to pre-register for the following term. If a term elapses (other than summer) between enrollments, the student must apply for readmission. 

**Incomplete Grades (Grade of I)**

Whenever students cannot be assigned a grade at the end of a course in which they have been enrolled because their work is for good reason incomplete, the instructor will postpone the grades, reporting I grades to the University Registrar.

An I grade may be assigned only when:

1. The completed portion of the student’s work in the course is of passing quality AND
2. There is such evidence of hardship as to make it unjust to hold the student to the limits previously fixed for the completion of the work.

Each department of the schools and colleges maintains a record of I grades in courses of that department. (Exemptions are made for research courses and problems courses related to research assignments.) This record, kept in the electronic student information system, will include:

- The name of the student
- The course number, title and credits
- Semester and year of enrollment
- A brief statement of the reason for delaying the grade
- An adequate guide for the removal of the I grade along with a suggested final grade in the event of the departure or extended absence of the instructor from the campus

An undergraduate student who receives an I grade must complete the course requirements either:

1. within one year from the date it was recorded (unless the course is numbered 4950-4959 or 4995), OR
2. before the date of graduation (whichever comes first).

When an incomplete is satisfactorily resolved, the faculty member responsible for the grade change will notify the University Registrar of the revised grade.

Otherwise, the University Registrar will remove the I and record a grade of F in classes graded A-F or a grade of U in classes graded S/U. Any student planning to graduate with an unresolved I grade should be aware that translation to an F could drop the GPA below the requirements for graduation. As with any academic deficiency, the low GPA would delay the student’s graduation until all requirements for graduation are met.

**Grade Appeal**

Guidelines for grade changes are as follows:

- Students who believe that they have been graded unfairly or incorrectly should see the course instructor.
- If still dissatisfied, the student may appeal to the chair of the department. (If the course has a large number of sections, it may have a course director. If so, the student should see the director before appealing the grade to the department chair.)
- The chair of the department will conduct an investigation. The chair cannot substitute his or her judgment for that of the instructor concerning the quality of the student’s work.
- If the instructor of the course also is the department chair, the dean of the school or college will handle grade appeals.
- No one may substitute personal judgment for that of the instructor concerning the quality of the student’s work. However, mathematical or mechanical errors in scoring examinations may be corrected.
- No grade shall be otherwise changed unless there is clear, convincing and unequivocal evidence that it was a direct result of arbitrary and capricious conduct by the instructor.

**Inexperienced Grades (Grade of I)**

An I grade along with a suggested grade in the event of the departure or extended absence of the instructor from the campus.

Exceptions to unresolved incomplete grades changing to an F are as follows:

- Courses taken for graduate level credit
  - Courses taken prior to Fall 2003
  - Undergraduate research, honors research or problems courses that are approved for multiple terms of continuous research
- Grades of I and the reason for the delay of grade may also be entered directly into myZou.

Questions may be directed to the Office of the University Registrar, (573) 882-4249.

**Unassigned or Erroneous Grades**

To correct a grade erroneously reported, proper notification is sent from instructors and their department chairs to the Office of the University Registrar on a form provided for that purpose.

**Note:** Grade corrections must be processed within one year of the original reporting date.

In situations when there is a failure to record a grade on the official grade sheet, the University Registrar will record a NR (not reported) and send a written notification of this action to the faculty member and relevant department chair. The faculty member is responsible for submitting a corrected entry. After 12 months NR will change to an F.
For graduate and professional students, the NR grade will remain on the transcript until a letter grade is submitted. If a letter grade is not submitted, an NR can remain on the student's record indefinitely and will not convert to an F.

No student may be re-examined for the purpose of changing a grade after a final grade has been reported to the University Registrar. For further information see the Faculty Handbook, Academic Regulations (http://facultycouncil.missouri.edu/handbook/intro.html). Questions may be directed to the Office of the University Registrar, (573) 882-4249.

## Grades & Credits (G)

### Grading Scale

Graduate students’ grades in all courses counting toward an advanced degree may be reported as: A +/-, B +/-, and C +/-.. Faculty members are not required to use a plus/minus grading scale; that decision should be based on the faculty member’s evaluation of student performance and/or policies of their academic program.

Grade point averages are calculated as: A+ (4.0), A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), and C- (1.7).

The Graduate School considers grades of C+, C and C- as passing grades; however, grades in the C range may not be acceptable for specific programmatic requirements and may result in the student being unable to maintain a 3.0 cumulative average. No D grade may be awarded to a graduate student, and a grade of F means the work has not satisfied the minimum requirements of the course. W denotes withdrawn passing and does not affect a student’s grade point average.

### S/U Grading

Graduate students may be graded satisfactory/unsatisfactory (S/U) in graduate-level courses only when those courses are designated as “graded on S/U basis only” in the online Schedule of Courses available through myZou.

### Incompletes

An incomplete grade (I) may be recorded when the student’s work is incomplete but otherwise worthy of credit, or when the instructor is unable to assign a grade at the end of the semester. The student must finish this work (Problems and Research courses exempted) within the next calendar year of residence.

If the work is not completed after one calendar year, the request to change an “I” grade will require an accompanying letter of justification from the instructor. Although grades of “I” do not automatically convert to an “F” if not completed, academic programs or the instructor may establish conditions or regulations pertaining to “I” grades that are more stringent.

### Unreported Grades: NR

When grades are not reported by the instructor, these “Blank Grades” will be recorded as “NR” (Not Recorded). The NR designation will remain on the student’s transcript until a letter grade is submitted. If a letter grade is not submitted, the NR can remain on the student’s record indefinitely and will not revert to an “F”.

### Grade Changes by Faculty

Faculty members may change grades within the policies set by the faculty. Grade Change Forms, available from the faculty member’s academic unit, must be completed, signed and submitted to the Office of the University Registrar - Records Dept., 126 Jesse Hall.

## Graduate-Level Credit

No graduate credit is given for courses numbered below 7000. Graduate students taking 7000-level courses that are cross-leveled with 4000-level courses will be given additional course requirements in order to warrant graduate credit received for those courses. Courses at 8000/9000 level are primarily for graduate credit. 8909/9909 research (8990/9990 Research for Engineering students) is reserved for master’s and doctoral degree students working on a thesis or dissertation.

### Grade Point Average

A graduate student’s grade point average is based on the student’s entire graduate record at MU. To remain in good standing, a graduate student must maintain a cumulative GPA of 3.0 or better.

### GPA and Probation

At the end of each semester, graduate students with a cumulative GPA below 3.0 are placed on probation. If at the end of the following semester the cumulative GPA is 3.0 or better, the probationary status is removed. A student on probation failing to raise the cumulative GPA to 3.0 may, on the recommendation of the department or area program, be allowed a second probationary semester.

A student is subject to dismissal upon failure to raise the cumulative GPA to 3.0 by the end of the second probationary semester, or at any time a semester/term or cumulative GPA falls below 2.0. Note: Summer session is not counted as a semester.

### GPA and Graduation

To graduate, a student must have an overall GPA of 3.0 in all graduate courses taken at MU and not just those courses listed on a plan of study.

For more information on grading, credit and related policies go to http://gradschool.missouri.edu/academics/progress/grading-credit.php.

## Grades & Ranks (L)

### Class Rankings

At the end of each semester, students are included in the first year, second year or third year class lists and are given a class rank based on their position in their class list. Classes are ranked by expected date of graduation.

When calculating the class rankings for the first year and second year classes, summer grades are included in the rankings for the following fall semester.

The graduating class ranking is determined as of the end of the summer semester and includes all students graduating within the academic year (preceding fall and spring semesters and current summer session).

### Rules for Determining Class Levels

In order to register for courses, students are assigned a class level. The class levels are determined as follows:

1. **First Year Students**: A student who has received 31 hours or fewer of law school grades;

2. **Second Year Students**: A student who has between 32 and 56 (inclusive) hours of law school grades;
3. Third Year Students: A student who has received more than 56 hours of law school grades;
4. Law School Grades: As used herein, "law school grades" means grades counting towards credit at the School of Law. Failing grades do not count as "law school grades;"
5. Effect of Summer School. The determination of class level is made ONLY at the conclusion of the fall and spring semesters. A student's class level will NOT therefore change at the end of summer school;
6. Exceptional Circumstances: In cases of students in unusual situations, including, for example, part-time or unusually heavy- or light-load semesters, a determination will be made on the basis of dividing the student's law school career into relatively equal periods for the first, second and third years.

Computation of Grade Point Average (GPA)

Grade point averages are based only on law school courses taken at this school and only upon "graded courses." For the purpose of computing grade point averages, a "graded course" is one which is graded on the 65-100 scale.

A grade point average is obtained as follows:

1. The "grade points" for a graded course are obtained by multiplying the numerical grade for the course by the number of credit hours for the course.
2. The "grade point average" is obtained by dividing the total grade points for all graded courses by the total number of credit hours for all graded courses.

In computing grade point averages, all graded courses are included. When a course is repeated, the grade and hours for both takings are included in computing cumulative grade point averages subject to the following exception:

A student who is required to repeat a course will have his or her cumulative grade point average computed as follows: If the grade on the repeated course is 81 or higher, neither the hours nor the grade for the previous taking of the course will thereafter be used in the computation of the student's cumulative grade point average. The earlier grade will, however, remain on the transcript.

Grade point averages are computed for each student by semester, year and cumulatively. The fall semester grade point average includes the courses taken in the fall semester and courses taken in the preceding summer session. The yearly grade point average is based upon courses taken during a student's first, second and third years.

Course Repeat Policy

The School of Law's Standards and Readmissions Committee ("the Committee") has adopted the following course repeat policy:

1. Students who petition the Committee for readmission may be required to repeat any or all courses previously completed;
2. Students who achieve a grade in a course above the graduating average are not eligible to repeat that course;
3. Students who achieve a passing grade in a course that is below the graduating average are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances;
4. Students who fail a required course are required to repeat that course unless, in exceptional circumstances, repeating the course is waived.

5. Students who fail a non-required course are eligible to petition the Committee for permission to repeat the course. The Committee may grant such petition based on exceptional circumstances.

Note: When a course is repeated only the hours for one taking may be credited toward meeting the graduation requirement of having passed 89 hours, without regard to how the course is treated for computing grade point averages.

Dean's List

Beginning with the Class of 2021 and going forward, the top 1/3 of the class will be eligible for inclusion on the Dean's List. For the Class of 2019 and the Class of 2020, a student qualifies for inclusion on the Dean's List with a semester average greater than 85.999.

Good Standing

After the first semester of the first year, a student is in "good standing" at the School of Law if the student's cumulative GPA is greater than 76.399. Thereafter, a student is in "good standing" at the School of Law when both the student's current semester and overall GPA are greater than 77.499.

Grades and Grading

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and earn course credit. The grades of U and of 65 through 69 are failing grades and do not earn course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades and Grading

The grades recorded in the School of Law are the official grades and the determination of grade point averages and satisfaction of law school requirements is based on the grades recorded in the School of Law.

Grades are recorded in the School of Law as numerical grades ranging from 65 through 100 or, where authorized, by the letters "S" (Satisfactory) and "U" (Unsatisfactory). The grades of S and of 70 through 100 are passing grades and earn course credit. The grades of U and of 65 through 69 are failing grades and do not earn course credit. A 70 is the lowest passing grade and a cumulative grade point average greater than 77.499 is the minimum required for graduation.

With the exception of Independent Research, and any of the activities that satisfy the writing requirement, if grading is to be done other than anonymously, the syllabus shall so state. Professors do not know the names of students until after grades are turned in to the Dean's Office. Professors may not obtain the names of students prior to assigning a class rank order for grades. The rank order may not be changed after the names are known.

Explanation of the Grading Scale (http://law.missouri.edu/students/pdf/gradingscale.pdf) (PDF)

Grades from myZou

Students may obtain their grades from MyZou. In addition to the student's PawPrint, when checking grades for only one course, students must know the course number.

Student Honors

J.D. Degree Cum Laude

Any student with a graduating grade point average greater than 96.999 is eligible for the designation of Juris Doctor Summa Cum Laude upon graduation.

Any student with a graduating grade point average within the top 7 percent of the graduating class is eligible for the designation of Juris Doctor Magna Cum Laude.
Any student with a graduating grade point average within the top 12 percent of the graduating class is eligible for the designation of Juris Doctor Cum Laude.

**Order of the Coif**
The Order of the Coif is a national law school honor society, founded for the purpose of encouraging legal scholarship and of advancing the ethical standards of the legal profession. It has established chapters in the leading law schools of the country. Its members are selected by the faculty from the top ten percent of the graduating class and rank highest in scholarship, and whose achievements as students make them worthy of this distinction. Selections are made after six semester grades and rankings have been determined. To be eligible for membership in the Order of the Coif students must complete 75 percent of their law studies in graded courses for purposes of calculating the 75 percent of coursework in graded courses requirement.

**Order of the Barristers**
The Order of the Barristers is a national law school honor society founded for the purpose of promoting legal advocacy and of advancing the ethical standards of the legal profession. Members are selected based upon participation and excellence in the advocacy programs of the School of Law.

**Graduate Academic Minors (G)**

**Non-designated minors**
Non-designated minors consist of course work constituting a unified plan of study that includes a minimum of nine hours of graduate course work. These minors should be listed on a student’s plan of study; however, they are not listed on a student’s transcript.

**Obtaining approval for a minor**
Both designated and non-designated minors must be approved by the student’s major advisor, the student’s academic program director of graduate studies, and the Office of Graduate Studies.

In addition, the inclusion and completion of a designated minor must be approved by the director of graduate studies (or academic program chair/program director) of the academic program or interdisciplinary group offering the minor. Designated minors are listed on a student’s transcript.

**Graduate Assistants and Fellows (G)**

**Graduate Assistantships**
Graduate assistantships give students opportunities for professional experience, academic training and financial support while pursuing advanced degrees. Specific assignments vary by type of assistantship. Graduate assistantships generally entail 10-20 hours of work per week (.25 to .50 full-time exempt). Students who hold graduate assistantships are discouraged from working more than 20 hours per week for more than one semester during the period of the assistantship.

**Fellowships**
Fellowships are a type of aid granted to graduate students to help support their education. Some fellowships include a tuition waiver or a payment to the university in lieu of tuition. Most fellowships include a small stipend to cover living expenses. Unlike a loan, a fellowship is a form of gift aid and does not have to be repaid. However, fellowships may be taxable and reportable to the Internal Revenue Service. No service or work requirement is associated with a fellowship.

**Assistantship and Fellowship Policies**
The complete set of policies regarding graduate assistantships and fellowships may be found on the Graduate School’s website (http://gradschool.missouri.edu/policies/graduate-assistantships-fellows.php).

**Graduate Certificates**
A graduate certificate is not a graduate degree. Rather, it is a document verifying the successful completion of a specified group of graduate courses. Certificates are intended to help students acquire (or enhance) discipline-related knowledge and skills. Upon completion of a designated set of courses and other requirements, the name of the graduate certificate will appear on the student’s official University of Missouri Transcript.

To accommodate a variety of learners’ needs, MU offers two types of graduate certificate programs:

- Stand-alone graduate certificates allow individuals to earn graduate credit hours without having to enroll in a specific degree program. Prospective students have an option to apply for graduate study as a Certificate-Seeking Student only. Degree seeking students may also pursue this type of certificate as complementary to (or independent of) their graduate degree program.

- Degree-dependent graduate certificates are designed for degree-seeking students only. Further, the students must be enrolled in the particular degree program offering the certificate. In other words, this type of certificate is intended for degree seeking students who wish to pursue specialized courses or related, complementary study.

**Federal Disclosure Requirements for Stand Alone Graduate Certificates**
“Final regulations published in the Federal Register on October 29, 2010, require institutions to report certain information about students who enrolled in Title IV eligible educational programs that lead to gainful employment in a recognized occupation (GE programs). Those regulations also provide that institutions must disclose to prospective students certain information about the institution’s GE programs.

Finally, the new regulations require institutions to notify the Department if they wish to add an additional GE Program to its list of Title IV eligible programs. All of these requirements are effective July 1, 2011. The Secretary published additional regulations related to the program eligibility metrics that will be calculated for gainful employment programs in the Federal Register on June 13, 2011.” Source: Federal Student Aid, see https://www.ed.gov/category/keyword/Gainful-Employment

At the University of Missouri, the Graduate School’s Stand Alone certificates are subject to federal Gainful Employment disclosure requirements. A disclosure form for each Stand Alone certificate may be found in the last section of this catalog and on our web site.

**Certificate Admission Information**
Stand-Alone Certificate Applicants. All students enrolled in a stand-alone graduate certificate program will be classified as Graduate Certificate-seeking graduate students. As such, to qualify for admission, they must have successfully completed the baccalaureate degree at an
accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. New graduate applicants wishing to pursue a stand-alone certificate only should complete the Graduate School’s online application for admission and meet the Graduate Faculty Senate’s minimum admission requirements for all programs.

**Degree-Dependent Certificate Applicants**

New applicants applying for a degree program should complete the Graduate Studies’ online application for admission for the degree program. Once enrolled at MU, the Application for Graduate Change of Division, Program, Degree Emphasis or Advisor Form (pdf) should be completed to add a graduate certificate.

**Financial Aid**

Check eligibility on both types of certificates Degree-dependent graduate certificate programs are federal financial-aid-eligible. Students only enrolled in stand-alone graduate certificates are potentially eligible for federal financial aid. Read our disclosure pages to learn more about the costs (tuition & fees); time needed to complete the certificate; and future placement (e.g., degree programs, jobs) of certificate holders. Next, check with MU Student Financial Aid Office to determine eligibility. Students enrolled only in a stand-alone graduate certificates are not eligible for scholarships, fellowships, assistantships, tuition waivers, etc. from the Office of Graduate Studies or University of Missouri.

**Stand-Alone Certificate Admission Requirements for Non-Degree Seeking Students**

A non degree-seeking student who is admitted into a stand-alone certificate program will be officially classified as “certificate-seeking” graduate student. To be admitted, the student must have successfully completed a baccalaureate degree at an accredited college/university. Specific graduate certificate programs may have admission standards that exceed those for post-baccalaureate graduate students. Transfer credit for stand-alone certificate seekers. A maximum of three graduate credit hours which correspond directly to the MU graduate certificate program course requirements may be used as transfer credit from another university to satisfy the requirements for the certificate program. An original transcript from the other university, verifying graduate credit received for the requested hours of transfer credit, must be submitted to the Graduate School when the Plan of Study form is submitted. Please refer to the certificate program’s site for certificate policy updates.

**Credit Hours Necessary for Certificate Completion**

Graduate certificates vary in completion requirements, including the minimum credit hours. Please refer to the certificate program’s site for credit hour requirements.

Up to 12 hours of graduate credit earned for graduate certificate may be applied to degree requirements for a graduate degree upon approval of the degree program.

**Grievances (L)**

The School of Law is a charter member of the Association of American Law Schools. Information on the AALS may be found at http://www.aals.org/.

The School of Law is fully accredited by the American Bar Association. Questions regarding ABA accreditation may be directed to the Office of the Consultant on Legal Education, American Bar Association, 321 N. Clark Street, 21st Floor, Chicago, IL 60654-7597, (312)988-6738.

Student complaints implicating compliance with the standards imposed by the American Bar Association Section on Legal Education and Administration to the Bar shall be filed in writing with the Associate Dean for Academic Affairs, or if the complaint involves the person serving in that capacity, with the Dean of the Law School. The complaint shall include the date on which the complaint is being filed; the name and address of the complainant; and a description of the complaint. The description of the complaint shall include a description of the accreditation standard which the law school’s action or inaction implicates. The Associate Dean for Academic Affairs (or the Dean of the Law School) will investigate the complaint and respond to the complainant in writing within 30 calendar days from receiving the complaint. The response will indicate whether the Law School has taken any corrective action, or if not, the reasons for not taking any action.

The complainant shall have the right to appeal this initial decision by filing an appeal with the Faculty Policy Committee. The appeal shall be filed in writing within 14 calendar days from the date on which the initial decision was issued. The appeal shall include the date in which the appeal is filed; the name and address of the complainant; a copy of the original complaint; a copy of the initial decision; and an explanation of the basis of the appeal. The Faculty Policy Committee will review the documents presented, and issue a decision in writing within 30 calendar days from receiving the appeal. The Faculty Policy Committee can sustain or reverse the initial decision. In cases where the initial decision is reversed, the Faculty Policy Committee will direct the Associate Dean for Academic Affairs on what corrective actions to take. The decision of the Faculty Policy Committee shall be considered final and subject to no further review.

**Holds**

There are several types of holds, which are restrictions that may block registration. Students are notified through myZou if they have a hold. They should go to the location indicated in myZou to resolve the hold.

**Policy Source: Academic Unit/Department**

In some situations, it is important that records or holds preventing certain actions be maintained in student records across the four campuses in the University of Missouri System. For instance, if a student is sanctioned with University Dismissal, University Suspension, University Expulsion or other sanctions / agreements that extend beyond a given campus, a mechanism to enforce such agreements or sanctions is applied. (Click here for the policy [http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.025_equity_resolution_process_for_resolving_complaints_of_harassment](http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.025_equity_resolution_process_for_resolving_complaints_of_harassment)).

**Honors Recognition (V)**

Each student graduating from the College of Veterinary Medicine and whose cumulative grade point average (G.P.A.) in the professional curriculum is within the range listed below will be designated, as indicated on the diploma, to graduate with honors:

- G.P.A. 3.9-4.0 summa cum laude
- G.P.A. 3.8-3.89 magna cum laude
G.P.A. 3.7-3.79 cum laude
(General Faculty meeting minutes, 10-10-74)

Late Registration

A student cannot register in classes offered by any school or college after one week following the first day of classes in a regular semester or the equivalent period of time for other sessions or classes. Class session meeting dates may be found in the class details on myZou (http://myzou.missouri.edu).

A late registration fee equal to the tuition for one undergraduate credit hour will be assessed starting the first day of classes for the regular session for the term.

Exceptions to this rule are enrollments in class sections of graduate exam, internships, problems, research and special readings.

Leave of Absence (G)

Key Terms

Leave of Absence
The student anticipates a need to discontinue enrollment for one or more semesters.

Active Duty Leave or Withdrawal
Students who are members of the US Military (e.g., Reserve or National guard) may be called into active duty by the government. As a result of the assignment, the student may need to request an active duty leave or may decide to withdraw from the University.

Contact Advisor and Director of Graduate Studies

Students considering a leave of absence that will result in a break in enrollment of one or more semesters must first contact their graduate advisor and the academic program’s director of graduate studies to inform them of their intent, the reason requesting leave and the expected duration.

Letters to the Office of Graduate Studies

After approval of the leave at the academic program level, the director of graduate studies and the student will submit letters to the associate vice chancellor for graduate studies. The DGS letter will verify that the academic program has been informed and that a leave of absence has been approved. The letter from the student will provide an explanation for the request as well as the anticipated departure and return date.

Resolving Financial Support Responsibilities

It will be the responsibility of students to resolve all issues pertaining to their support (e.g., research or teaching assistantship, scholarship) with their advisor or other relevant authority before departure. These issues include the date when support will be terminated and whether or under what conditions the student will be reinstated for support upon their return.

Notification for Re-Entry

Before the completion of the Leave of Absence, the student must notify the academic program’s director of graduate studies and the Office of Graduate Studies so that the re-entry process can be initiated.

Contact with the University During Leave

Students on a Leave of Absence may not make significant use of University resources and services or engage in significant consultation with the faculty.

Extension of Degree Time, Continuous Enrollment

Time spent on leave does not automatically extend limits for completion of the graduate degree but can be considered in a request for an extension.

Doctoral students who are required to maintain continuous enrollment may petition for an exception to this policy while they are on an approved Leave of Absence.

International Students

International students in F-1 and J-1 non-immigrant status must also obtain authorization from the International Center before the initiation of a Leave of Absence and before returning to campus to ensure compliance with current SEVIS regulations and visa restrictions.

F-1 and J-1 students approved for a leave of absence may not remain in the United States during the leave period unless authorized by the International Center. For students who must depart the United States, leave periods exceeding five months will necessitate updated student immigration documentation for re-entry.

All international students considering a leave of absence should meet with an international student advisor to determine the appropriate steps to safeguard their immigration status.

Military - Active Duty (Voluntary or Involuntary)

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service for training, shall be eligible for either of the options listed as follows: NOTE: Students must choose either option 1 or 2

Students taking distance / online classes who reside in states other than Missouri where a conflicting law may require other options than listed below will be given the accommodations required by that law when the student provides documentation of the law’s existence and proof of its applicability to him/her. Please note: Students who are enrolled at the University of Missouri and reside in a state outside of Missouri should review the information below related to unique military deployment benefits:
State of Iowa “Code Section 261.9(1)” (https://www.iowacollegeaid.gov/content/postsecondary-registration-iowa-code-chapter-261b-additional-requirements/#codes)
Option 1 - Withdrawal from all courses for semester

They may choose to withdraw from all classes. In such cases, a student may request either:

1. That the official transcript indicate the courses from which he or she has withdrawn, the date of withdrawal and the reason for withdrawal. Students choosing this option will have their tuition and fee charges and their student financial aid eligibility calculated effective with their official withdrawal date.

2. Or the student may request that all courses for that semester be expunged from the student’s academic record. Students taking this option will receive a complete refund of all educational and incidental fees paid by the student for enrollment for that semester. However, students who have received federal, state or institutionally funded financial aid must return all aid disbursed to them for the semester.

NOTE: Students must see their Academic Advising Unit to withdraw and return the form to Office of the University Registrar, 125 Jesse Hall.

Refunds will not be immediately available. Refunds are based on your last method of payment (i.e. credit card, check, etc). Refund checks will be sent to your mailing address unless a forwarding address is left with the University.

Option 2 - Receive Incompletes in all courses for the semester

The student may choose to receive an incomplete in all courses not yet completed for the semester. In that case the following rules apply:

- The student must complete all course work for the semester to the satisfaction of the instructor(s), and the time a student spends on active military duty shall not be counted against time allowed for the completion of an “Incomplete” grade.

- **I to F policy:** Students called to active military duty will be exempted from the one-year automated changes of I to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may complete work upon their return from duty or may choose to maintain the I grade. Therefore, I grades for students called to active military duty will remain listed as “I” until a change of grade is submitted by the faculty member, or indefinitely, if so desired by the student.

- **NR to F Policy:** Military duty will be exempted from the one-year automated changes of NR to F grades for the term of deployment and the year prior to deployment. In accordance with State statute, students may choose to maintain the NR grade. Therefore, NR grades for students called to active military duty will remain listed as “NR” indefinitely, if so desired by the student.

Upon completion of all course work for the semester, the student may choose either to:

1. Have the grade earned for the course and have the “Incomplete” expunged from his or her official record
   OR
2. Have the “Incomplete” grade remain as the final grade with reason for the “Incomplete” noted on his or her official record

**NOTE:** No refunds will be given for option 2.

**Residential life:** Residential life will be contacted and informed of your intent to exit the University. Room, board and social fees will be prorated and applied to your University student account based on the effective date of your official check out from the residence hall or other University accommodations.

**Financial Aid:** The Office of Student Financial Aid will be informed of your student status and your official withdrawal date and may make adjustments according to federal, State of Missouri and institutional guidelines.

**Scholarships:** Scholarships may or may not be applicable upon the student’s return to the University. For example, Section 41.948.2, RSMo, provides that if a student has been awarded a scholarship to be used to pursue academic program in any higher education institution in Missouri and he or she is not able to complete the term for which the scholarship was granted, the student shall be awarded that scholarship at any subsequent academic term provided the student returns to the academic program at the same institution at the beginning of the next academic term after the completion of active military service. If a student has any scholarships or other aid or award, he or she should contact the issuer to determine whether it will be applicable on his or her return and whether he or she will need to satisfy any other conditions.

**Contact:**
Office of the University Registrar
125 Jesse Hall
The University of Missouri - Columbia
Columbia, MO 65211
Office: (573) 882-7881
Fax: (573) 884-4530

**The Office of the University Registrar will require the following information:**

- A copy of your military orders, as soon as possible
- Forwarding Address
- Name, address and phone number of a contact or your representative
- Your name as it is on MU records
- MU ID number
- Which option student wishes to choose for classes

This information may be brought to 125 Jesse Hall or faxed to (573) 884-4530.

**Re-admission of previously enrolled students**

**Undergraduate** students who are returning to MU after an absence of at least one semester must complete a request for re-admission for undergraduate studies (http://admissions.missouri.edu/apply/re-admission) and return it to the Office of Admissions, 230 Jesse Hall, Columbia, MO 65211-1300 or fax to 573-882-7887.

Degree-seeking **graduate** students who are returning to MU after an absence of at least two semesters must complete a graduate studies re-activation form (PDF) (http://gradstudies.missouri.edu/forms-downloads) and return it directly to the academic program for approval. Post-baccalaureate (non-degree seeking) graduate students should return the completed form to the Graduate Admissions Office, 210 Jesse Hall, Columbia, MO 65211-1160 or fax it to 573-884-5454.

View Missouri Revised Statutes Chapter 41 (41.948) (http://www.moga.mo.gov/mostatutes/stathtml/04100009481.html). This policy is implemented to assure that students called to active duty prior to
the end of a term receive fair and just treatment, both financially and academically.

Contact the Office of the University Registrar-Registration for more information at 573-882-7881.

MU Course Work Required

MU requires that 30 of a student’s last 36 credits must be MU course work. Mizzou Online-Self Paced courses authored by MU faculty are acceptable as are courses offered for credit through Mizzou Online. (NOTE: This policy has replaced the requirement for courses to be taken "in residence.") Courses from a community college can account for six of the last 36 credits.

Name Changes

Policy Related to Changing Preferred Names for Students at the University of Missouri

The student may use preferred first and middle names at Mizzou. Preferred first and middle names are used on class rosters, ID cards, transcripts and diplomas and other locations where the legal name is not required. The policy outlining the use of the name may be found at: The University of Missouri Office of the University Registrar Preferred Name Policy (https://www.umsystem.edu/ums/rules/collected_rules/information/ch180/180.040_student_preferred_name_policy)

The path to update a preferred name in myZou is: Student Center>Personal Information>Names>Add a New Name.

NOTE: The Human Resource computing system overrides ID card names. If students who are employed by MU wish to have a preferred name on ID cards, they need to contact their department MU HR officer. Students who have questions may contact the University Registrar.

Policy Related to Changing Names for Students at the University of Missouri

The student must submit one of the legal documents listed below under "Proof of legal change to new name."

The document submitted must have date of birth, a photograph and a signature. If you have multiple documents that prove your legal name change, please bring copies of the documents along with the name change form (http://registrar.missouri.edu/forms/name-change.pdf) to the Office of the University Registrar (http://registrar.missouri.edu/contact).

Proof of legal change to new name:
1. current, government-issued ID card such as a driver's license, military ID, passport
2. current, valid Social Security card with new name
3. federally recognized Indian tribe’s enrollment card or a US Bureau of Indian Affairs identification card containing the new name, the signature and photograph of the individual
4. certified copy of a court order or a marriage certificate or a dissolution decree reflecting the new name in full

NOTE: Students may abbreviate their middle name(s) without documentation. Documentation is required if a student is adding or deleting a middle name or changing an initial to a name.

Non-Degree Graduate Study (G)

The Non-Degree Graduate Student Program allows post-baccalaureate students to complete graduate courses without being formally accepted into a degree-granting program. Many students use this enrollment option to explore a discipline, take courses for career advancement, prepare for application to a graduate degree program, or as personal enrichment.

Once enrolled, the non-degree graduate student may take undergraduate- or graduate-level courses but hours earned are not credit toward a graduate degree. However, if the student is later admitted to a degree-granting program, up to 12 hours of earned graduate credit may be applied toward a graduate degree program, at the discretion of faculty in the admitting academic program.

Students admitted under the non-degree seeking status have access to MU libraries, museums, laboratories, and recreational and athletic facilities.

Note: To manage course enrollment, some academic programs may limit available courses to non-degree graduate students. Contact the academic program in which you wish to take courses for more information.

Eligibility

Applicants who hold a baccalaureate degree or its equivalent from a U.S. university or a university in which instruction is in the English language may be admitted to MU as non-degree graduate students.

International Student Eligibility

International students residing in the United States who do not satisfy the above requirement and are seeking admission as post-baccalaureate graduate students must provide evidence of proficiency in English. Either a minimum score on the TOEFL or IELTS or a minimum of 24 semester credit hours in which the student maintains a 2.0 GPA (A=4.0) in a degree program in which English was the primary language is required. The minimum required TOEFL score for entrance to the Graduate School is 500 paper-based, 61 internet-based. The Graduate School also accepts a 5.5 Academic IELTS score for admission to the Graduate school. Please consult your academic program of interest to determine if it requires higher TOEFL or IELTS scores for admission.

The University of Missouri will not issue I-20s to international students so that they may enter the United States to become non-degree graduate students.

Tuition and Fees

Non-degree graduate students must pay graduate educational and student activities fees regardless of whether they take graduate or undergraduate courses.

Financial Aid

Non-degree graduate students are not eligible to receive federal financial aid or veteran’s benefits or to hold campus-sponsored assistant ships.
How to Apply for On-Campus Non-Degree Study

• Complete and submit the Graduate School Application (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantLogin.asp?id=umc-grad). The Graduate School encourages applicants to use the online application. The submission of a hard-copy application (PDF) (http://gradschool.missouri.edu/forms-downloads/repository/gradapp.pdf) will slow the application review process.

• Submit the application fee, (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/application-fee.php) which is $55 (US) for domestic applicants and $75 (US) for nonresident international applicants. You can pay the fee online through the Graduate School’s online application.

• Official transcripts or mark sheets must be sent directly from each university or college you have attended to the Graduate Admission Office, 210 Jesse Hall, Columbia, MO 65211. Transcripts/mark sheets for all baccalaureate degrees or their equivalents and any additional degrees must be sent. At this time, the Graduate School only accepts hard copies of transcripts. All transcripts/mark sheets become the property of MU.

• Standardized test scores, such as the GRE, are not required for non-degree graduate applicants. See below for the transfer and use policies for non-degree courses taken at MU.

How to Apply for Online Non-Degree Study

If you are planning to take course work online or at a distance, please contact Mizzou Online (http://online.missouri.edu) about course offerings and registration. The application process is different for online-only students.

Maintaining Good Standing

Non-degree graduate students must maintain a 3.0 GPA. If the cumulative GPA is less than 3.0, the student will be given one automatic probationary semester. If, after one semester of probation, the student’s cumulative GPA does not reach 3.0, the student may be granted a second probationary semester following a successful written petition made directly to the associate vice chancellor for graduate studies. (Summer sessions are not counted as probationary semesters.) If the student fails to achieve a cumulative GPA of 3.0 following the second probationary semester, the student will be made ineligible to enroll as a non-degree or degree-seeking graduate student. If at any time a student’s term or cumulative GPA falls below 2.0, the student will be ineligible to enroll as a non-degree or degree-seeking graduate student.

Switching Student Status from “Non-Degree” to “Degree-Seeking”

Non-degree graduate students who want to earn a graduate degree (master’s, doctoral or educational specialist) must:

• Submit official scores, if required by the degree program of interest (http://gradschool.missouri.edu/academics/programs), from an appropriate graduate admission examination (GRE, GMAT, MAT). The scores must be sent directly from the examination service to Graduate Admissions, 210 Jesse Hall, Columbia, MO 65211.

• Meet Graduate School minimum admission requirements (http://gradschool.missouri.edu/admissions/eligibility-process).

• Apply directly to the degree program of interest using a Change of Degree form (http://gradschool.missouri.edu/forms-downloads/repository/change-degree.pdf).

Posthumous Degree Awarding (G)

Honoring Deceased Graduate Students

The following policies and procedures apply in instances in which a graduate student dies before being awarded a degree.

Student Completed All Degree Requirements

If the student has completed all degree requirements, the college or school’s representative (dean, assistant/associate dean or director) will contact the Office of the Provost and the Associate Vice Chancellor for Graduate Studies to nominate the individual to receive a posthumous degree.

The diploma for the degree that the student was pursuing will be prepared in the same manner as if the student had lived. This diploma may be presented to the family of the deceased in a special ceremony, at Commencement or in whatever manner is deemed appropriate.

Student Did Not Yet Complete Degree Requirements

If the student had not completed degree requirements but was making satisfactory progress at the time of death, a dean’s certificate honoring the student can be provided by the appropriate academic unit(s). These certificates may be designed and presented in a manner that is fitting to the circumstances.

• In some instances, presentation of the degree or certificate to family members may be made at a remembrance ceremony.

Refund of Fees Policy

Exceptions to published tuition and required fees assessment policy and charges

1. The Office of the University Registrar and the vice provost for enrollment management are charged with considering and approving exceptions to published tuition and required fees assessment policy.

2. Any change in assessment can be adjusted or pro-rated only to a rate already established in the published university tuition and required fees schedule.

3. Only tuition required related to a student’s assessment for registration in credit hours are covered by these guidelines. Other required fees such as those for residence halls, the bookstore, etc. need to be directed to departments responsible for assessment of those required fees.

4. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school in which the student is enrolled for further direction.
Initial appeal by a student

1. An appeal and all pertinent written documentation must be submitted in writing within 90 calendar days of notification of assessment, adjustment or refund. In cases of incapacitation, exceptions may be made on a case-by-case basis.

Minimally, each written appeal must be dated and include the student name, address and phone number, student number, signature of the student, statement describing specifically what is being requested and for what term, statement of any extenuating circumstances, and why the request should be honored.

2. All appeals must be submitted to the Office of the University Registrar, 125 Jesse Hall. Appeals must meet one or more of the following criteria to be considered and approved:
   a. Written documentation of an illness, accident, injury or situation that could not be influenced, planned for, or prevented by the student or the institution and which subsequently caused a change in the student’s enrollment, thus changing the assessment. This provision specifically excludes conditions or chronic illnesses that remain static and are known to the student at the time of enrollment.
   b. Written documentation of substantiated circumstances involving deadlines where a student has in good faith relied on information provided by a named University official, or the official’s interpretation of the text of a University document or publication, and was consequently misled or mistaken about its terms.
   c. In individual cases and when it is in the best interest of the student and the institution, the University registrar or his/her designated assistant registrar may grant an exception that is not deemed to be served appropriately by the exception criteria stated elsewhere in this document.

3. Decisions will address only whether an adjustment of charges will be made. Grade assignments and other academic issues are not within the scope of these procedures and should be addressed to the dean of the college or school. Record changes, such as requests to withdraw, drop, add or enroll for courses in a term that has ended must be submitted on a separate form to the Revision of Records Committee, c/o the Office of the University Registrar, 130 Jesse Hall.

4. Generally, grounds for consideration of an appeal will be restricted to those circumstances personally experienced by the enrolled student with whom the University has a direct relationship.

5. Decisions will be rendered by the designated official of the Office of the University Registrar and will be based solely upon any and all pertinent written documentation.

6. Notification of the status of the tuition appeal will be made in writing within 10 calendar days of receipt of the written appeal.

Appeal of the decision rendered by the Office of the University Registrar

1. Upon written request a student may appeal the decision rendered by the Office of the University Registrar.

2. A written appeal must be submitted to the Office of the University Registrar.

3. The written appeal must request a review of the original decision and may contain additional written documentation to support the appeal.

4. The appeal will be reviewed by the same designated official. If the appeal information is sufficient to overturn the original decision, the designated Office of the University Registrar official can direct staff to issue a tuition refund or adjustment in accordance with appropriate fiscal procedures.

If denied within 10 calendar days of receipt, the information must be forwarded to the University Registrar. If the appeal is denied a second time by the University Registrar, it may be forwarded to the vice provost for enrollment management for further consideration, upon the student’s request.

The decision rendered by the vice provost for enrollment management is the final University determination on the matter.

Refund of tuition and fees in the event of a student death

1. When a student dies prior to completing the current academic semester, a full refund of or credit for tuition and required fees will be made after the deduction of the following:
   a. Any required adjustments to scholarships, grants or loans determined by federal formula applied by the Office of Student Financial Aid.
   b. Any other debts owed to the University that occurred prior to the death of the student.

2. Any refund will be made payable to the student.

3. If, after all adjustments are made, there still remains a debt to the University, generally the University would not attempt to recover the debt from the estate of the deceased student.

Students called to active military duty

Enrolled students called into active service in the armed forces of the United States prior to the completion of the semester, whether voluntarily or involuntarily, but not including active service training, and unable to complete their course work, shall be eligible for two options. The options are implemented to assure that students called to active duty prior to the end of a term receive fair and just treatment, both financially and academically. Contact the Office of the University Registrar at 573-882-7881 for more detailed information.

Students called to jury duty

Full refunds (100 percent) of required tuition and any applicable required fees for all credit hours from which a student withdraws, when following University procedures announced by the provost.

Residency (L)

The School of Law residency rules satisfy the requirements of the American Bar Association and the Association of American Law Schools. The purpose of the residency requirements is to assure that the study of
law will be spread evenly over a minimum period of six semesters or the equivalent.

The rules regarding the size of a student's course load -- the number of hours a student enrolls in for a given semester -- and residency rules are not the same.

The residency requirement means that students may not graduate in less than six semesters or the equivalent. Most students attend law school for six semesters. However, some students plan to graduate after only five semesters by attending summer school. Students who plan to attend summer school for two years and graduate a semester early should visit with the Associate Dean for Academic Affairs concerning their summer course load requirements.

For residency purposes, a minimum load of twelve hours is required for a semester. Thus, each student generally needs at least 12 hours each semester to meet residency requirements. (NOTE: An average of 12 credits per semester is not sufficient to complete the 89 credit degree requirement.) For purposes of accelerated graduation, the law school's residency rules require students to take a minimum of five hours in one summer session and combine it with another summer session of no less than seven hours. Two summer sessions of six hours each serve the same purpose. This approach gives students five semesters of at least 12 hours and two combined summers of 12 hours, which satisfies our residency requirements. If fewer hours are taken in a summer session, they may not be used toward residency for the purpose of accelerated graduation.

A student may combine any summer hours with an appropriate number of hours in a regular semester in order to fulfill a 12-hour semester residency requirement if they should fall below 12 hours during a semester for some reason. Students completing more than 12 hours in a semester may not use surplus hours over 12 toward residency in any other session; hence the three surplus hours from a 15-hour semester cannot be added to a subsequent nine-hour semester to give residency for two semesters. On the other hand, a nine-hour semester can be combined with a three-hour summer session to give residence for one semester.

A student in their final semester only can take less than 12 hours provided that the number of credits being taken is sufficient to satisfy the remainder of the 89 credit degree requirement. In cases of extreme hardship the Faculty may make a slight variance in the residency requirements, but cannot go below the standards set by the American Bar Association and the Association of American Law Schools.

**Revision of Records**

The Committee for Revision of Records reviews petitions from students asking for changes to their academic records. Students should discuss the petition process with their advisor before appealing to the committee to verify that changes are warranted and will benefit the student.

For instructions for completing petition to the committee see Revision of Records (http://registrar.missouri.edu/policies-procedures/revision-records.php).

The committee is composed of faculty appointed by the chancellor. Members are anonymous and students are not allowed to communicate directly with them. Forward questions to revisionofrecords@missouri.edu.

**Student Conduct (L)**

The academic life of students at the School of Law is governed by a Code of Honor that has been adopted by the Faculty and the Student Bar Association.

Students should note that they generally will be required to report any Honor Code violation on state bar application forms.

The Honor Code is available at http://law.missouri.edu/current/policies-rules-student-conduct/.

Incidents involving bias or harassment can be reported through the Office of Civil Rights and Title IX. Information is available at http://missouri.edu/civil-rights-title-ix/.

**Student Employment (L)**

No student shall work more than 20 hours per week in a semester where she or he is enrolled as a full-time first-year law student (hereinafter the "1L 20-hour rule").

The 1L 20-hour rule does not apply to the period between semesters, or the summer (unless the student is enrolled in summer school full-time) or to any break during the semester (e.g., spring or Thanksgiving breaks).

**Student Files (V)**

The following policy relates to compliance with the Family Educational Rights and Privacy Act Amendment to the Elementary and Secondary Education Act of 1974:

(1) Each student requesting permission to examine his/her file will be referred to the Associate Dean for Academic Affairs or his or her designate.

(2) Each student must provide proof of:

a. Current student status at the University of Missouri (or, if during an academic recess, attendance during the past academic session).

b. Identity. They must provide some identification which allows visual comparison of person’s appearance with a photograph on an item such as a driver’s license or student identification card.

(3) If the above conditions are met and permission is granted, a student will be allowed to examine his/her entire student record. This must be affected only in an office occupied by one of the assistants in the Dean’s Office.

(4) Copies of any item in the student’s folder except for transcripts or letters of recommendation and/or evaluation will be provided at cost. In such cases the sum of 25 cents per page must be collected before any copies are provided.

(5) A student must not, under any circumstances, be left alone with the folder.

(6) A record will be placed in the student’s folder stating the date and time that such examination occurred. It should be initialed and dated by the Associate Dean for Academic Affairs or his or her designate. (CVM Executive Committee, 1986)
Students Level (U)

Students are assigned to a particular class level based upon the number of credits they have completed in accordance with the following limitations:

<table>
<thead>
<tr>
<th>Class</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0 to 29 credits</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30 to 59 credits</td>
</tr>
<tr>
<td>Junior</td>
<td>60 to 89 credits</td>
</tr>
<tr>
<td>Senior</td>
<td>90 or more credits</td>
</tr>
</tbody>
</table>

For registration purposes, student level will be determined by earned credits plus those credits in progress at MU. Undergraduate students pursuing degree programs at other institutions who enroll at MU as visiting students will generally be considered as freshmen, non-degree students. They are not assigned to a school or college. This applies to students who enroll under agreements with the Mid-Missouri Associated Colleges and Universities as well as those from other colleges and universities.

Testing Out of Courses (V)

For professional courses cross-listed as undergraduate or graduate courses, students may opt out of the course during the professional curriculum if the following conditions are met. The student took the course within three years, received an A or B in a course, and received instructor permission to waive the course.

Veterinary students are charged a flat rate per academic semester and testing out of a course will not result in a prorated tuition rate.

Theses and Dissertations: Submission Deadline, Review and Public Disclosure (G)

Formatting the Thesis

A thesis, when required for a master's program, must be written on a subject approved by the candidate's advisory committee. The thesis must be the student's own work and must demonstrate a capacity for research and independent thought. Refer to the Master's Degree section for details.

Thesis formatting guidelines may be found at http://gradstudies.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program. All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

Formatting the Dissertation

A dissertation is required for the PhD and EdD degrees and must be written on a subject approved by the candidate's advisory committee. The dissertation must include the results of original and significant investigation, and it must be the candidate's own work. Refer to the Doctoral Degree section for details.

Dissertation formatting guidelines may be found at http://gradstudies.missouri.edu/policies/thesis-dissertation/guidelines/. Students must follow the style manual recommended by their academic program.

All work must be properly cited and permission to use copyrighted materials must be obtained prior to submission.

About Third-Party Copyright

If your work contains material that has been copyrighted by another party, you may need to seek permission to use the material in your thesis or dissertation. Examples of materials for which you would need to seek copyright permission include but are not limited to: third-party software, images, graphics, large portions of text and maps. If copyright permission is needed, you must submit written approval for the use of the copyrighted material along with your thesis or dissertation.

Substituting for Copyrighted Materials in Theses and Dissertations

The Office of Graduate Studies encourages students to seek permission to use copyrighted material in their theses and dissertations. Your work is published after it is submitted in approved form to the Office of Graduate Studies, and it will be available to audiences who wish to know more about the subject you investigate. The more full and complete the thesis or dissertation, the better the experience for your reader and therefore the better the response to the fruits of your hard work. However, if you are unable or unwilling to obtain copyright permission for some of the materials in your research, you may substitute for the copyrighted material as described below.

Acceptable substitutions include:

- Redrawing or tracing of maps, images, graphics, etc
- References to URLs, printed documents, or physical locations where the copyrighted material can be found

A student whose thesis or dissertation has had copyrighted material removed prior to submission must have his or her advisor sign a document reading:

[Student's name] has removed copyrighted material from the copy of the thesis or dissertation submitted to the Office of Graduate Studies for electronic publication. I certify that:

- I approve the thesis or dissertation in this form;
- The student has presented accurate information as to where the removed, copyrighted material can be found

Advisor's name (signature line) Date (date line)

Submission Deadline for a Thesis or Dissertation Following Committee Approval

Each semester the Graduate School establishes semester deadlines for the Report of the Examining Committee (master's & EdS students), Report Dissertation Defense (doctoral students), and submission of theses, dissertations and supplemental materials. Those deadlines may be found on the Office of Graduate Studies' page.

http://gradstudies.missouri.edu/about-news-events/events/index.php

After successful defense of the thesis or dissertation, students must comply with their academic program’s and/or the International Center’s enrollment requirements.

Generally, based upon input from the thesis/dissertation committee, a student will make corrections to a thesis/dissertation. The student will prepare the final document and supplemental materials in the required
format (http://gradschool.missouri.edu/policies/thesis-dissertation) and submit everything to the Graduate School by the semester deadline. In the event the student misses the current semester deadline, the student is required to submit the final dissertation or thesis by the end of the following semester after a successful defense. If an extension is needed, the student's advisor and program's DGS must submit a request for an extension letter to the associate vice chancellor for graduate studies.

**Submission Requirements and Forms**

A thesis or dissertation must be presented before the deadline to the Office of Graduate Studies on a high-quality CD. The thesis or dissertation must be contained in a Portable Document Format (PDF) file (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/technology-ch7.php), with the appropriate margins and formatting. Additional electronic files must be included (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/supplements-cd-ch4.php) on the CD as PDF documents with the appropriate file name. If all files will not fit on one CD, a DVD or multiple CDs may be used, as long as no single file is split between CDs.

**Additional Documents that Accompany the Electronic Submission**

Several other documents must be submitted electronically or on CD, including the original signed Approval of the Committee page, paper copies of the Short Academic Abstract and Title Page, fees forms, release forms, and copyright agreement forms. Some forms are required on paper. See http://gradstudies.missouri.edu/academics/thesis-dissertation/guidelines/supplemental-paper-materials/index.php for more information.

**Review of Theses and Dissertations by the Graduate School**

Before a manuscript can be accepted for publication in scholarly journals, it is examined by editorial board members, for conformance to specific format style guidelines in addition to validity of content. In much the same manner, MU Graduate Studies' staff, acting as an editorial board, reviews every submitted thesis and dissertation for conformance to University guidelines. Failure to meet the appropriate standards will result in the rejection of your work.

**Copies of Theses and Dissertations**

The MU library catalogs all thesis and dissertations in the Merlin system. To locate a thesis or dissertation go to the MOSpace repository.

**Specific Questions about MU Theses or Dissertations?**

Specific questions should be directed to the academic advising staff of the Office of Graduate Studies, 210 Jesse Hall, (573) 882-9575 or (573) 882-3885 or 1-800-877-6312.

**Thesis and Dissertation Research Must be Open to Public Disclosure**

Students are prohibited from using research (data, results, methods or other content) in their theses or dissertations that could restrict subsequent publication or public disclosure of these documents.

Examples of restricted information include classified or proprietary materials. It is important to note that these restrictions do not apply to non-thesis or non-dissertation research that is approved by the student's advisor and allowed by University of Missouri policies. Questions regarding the applicability of this policy to thesis or dissertation content should be referred to the Office of Graduate Studies.

**Transfer Admission from Other AVMA Accredited Schools (V)**

Transfer students entering in the professional curriculum from other AVMA-accredited veterinary schools: applications will be referred to the Committee on Admissions and Scholarship for recommendation to the Dean. Each case shall be handled on an individual basis. (CVM Executive Committee, 1986)

**Transfer Credit (L)**

**Credit Earned at Other Law Schools**

A student may earn credits at another law school to be applied toward the J.D. graduation requirements of the School of Law, on the following conditions:

1. No more than 31 semester credits may be so applied. Grades in courses taken at other law schools are reflected in the transcript. However, those grades do not calculate in the student's grade point average.
2. The law school at which the credits are earned must be, at the time of the student's work there, approved by the American Bar Association.
3. The Associate Dean for Academic Affairs must approve, in advance of the student's work, the particular law school and the course of study the student will pursue there.

**Credit Toward LL.M. Requirements for Non-Law Courses/Transfer Credit**

With approval of the Director of the LL.M. Program, students may apply to the LL.M. graduation requirements up to six (6) graduate credits of university or college courses from outside the School of Law. This limit includes independent study courses supervised by faculty in units other than the School of Law. Credit toward the LL.M. degree for a non-law school course will be granted only under the following conditions:

- The course must be a graduate-level course and clearly marked as such on the transfer transcript complete with credit hours and a grade. If taken at the University of Missouri, it must be numbered 5000 or above.
- The transfer coursework is from a regionally-accredited institution in the U.S. or an overseas institution that is recognized by its country’s Ministry of Education as a graduate degree-granting institution.
- The course must involve at least 14 class hours per credit (based on 50-minute class hours).
- The course must be related to the student's program of study. Students must submit a copy of the course syllabus if possible.
- The semester hours of the non-law-school course will be counted in the student's total number for the semester.
- The grade must be B or higher.
- The transfer coursework is not online, extension or correspondence credit.
Normally, the Director of the LL.M. Program must approve the course in advance of the student’s work. In unusual situations, the Director of the LL.M. Program may approve application of credits earned within four (4) years prior to initial enrollment in the LL.M. Program if the credits were for work closely related to the student’s work in the LL.M. Program and were taken for graduate credit. Credits will not be applied from the student’s J.D. degree program or equivalent. A written request must be submitted to the Director of the LL.M. Program and include the following:

(a) Institution, course name, number, and instructor; and
(b) Description of how the course relates to the student’s program of study.

Transfer Credit and Degree Applicability

- Transfer from a Regionally Accredited Missouri College (p. 797)
- Transfer from a Community College (p. 798)
- Transfer Within the UM Systems (p. 798)
- Military Transfer Credits (p. 798)
- Transfer Students and University General Education Requirements (p. 798)

Credits and Transfers

After students are admitted to the University of Missouri (MU), an admissions evaluator will evaluate whether any college credit earned elsewhere is transferable to MU. Coursework being transferred from schools outside of Missouri may need faculty review, which can delay the evaluation process.

- Advanced Placement (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/advanced-placement-program.php) credit is only awarded based on official score reports sent to MU directly from the College Board, and not based on scores reported on transcripts.
- Dual credit (http://admissions.missouri.edu/apply/ap-ib-and-college-credits/dual-credit.php) must be evaluated by Admissions prior to being awarded.
- Courses transferred from Missouri community colleges will generally count as lower-division credit, however students should check the Transfer Course Equivalency site for course specific information.
- For details on course equivalences for most school in Missouri and for select out-of-state institutions, check MU’s transfer course equivalencies which can be accessed from the myZou log-in page (http://myzou.missouri.edu) and then clicking on Transfer Course Equivalency. Students interested in seeing how transfer courses might apply toward MU degree requirements can go online to transferology (https://www.transferology.com) to enter course data, review equivalencies, and produce an unofficial degree audit.
- The MizzouMACC Program (https://admissions.missouri.edu/mizzoumacc.html) is available for students wishing to transfer from Moberly Area Community College of MU.
- Advanced standing credit in a foreign language awarded by previous institutions will not transfer to MU. It can be requested after you have successfully completed a course at MU at or above that level.
- Military veterans may be awarded some credit if the meet certain criteria (http://admissions.missouri.edu/documents/military-credit.pdf).

Generally, coursework completed at a regionally accredited institution and oriented toward a baccalaureate degree will be accepted if each grade is C or better. Generally, the following types of credit are exceptions that are excluded from transferable courses: Technical, vocation or remedial courses; Courses not intended for a baccalaureate degree and/or terminal vocational degree or certificate program; Courses from non-regionally accredited institutions, though there is an appeal process.

Questions should be directed to the MU Office of Admissions (http://admissions.missouri.edu).

Transfer from a Regionally Accredited Missouri College

Students may transfer more than 64 credit hours of lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board's policy.

Transfer from a Community College

Community college courses generally have transferable equivalents at the 1000 or 2000 level. A community college course may be the equivalent of a University of Missouri course of 3000 or greater, if that course is determined by the MU department that it is equivalent.

Courses from a community college can account for six of the last 36 credits.

Students may transfer more than 64 credit hours for lower division courses from either Missouri associate degree-granting or baccalaureate degree-granting institutions. Any additional lower division course credits above 64 credit hours will be accepted in transfer if the credits are applicable to the baccalaureate degree or are prerequisites for an upper division course in the major, in accordance with the Missouri Coordinating Board’s Handbook.

For additional information, contact the college or school from which the degree is sought or see Credits and Transfers (https://admissions.missouri.edu/apply/transfers/credits-transfers) information from the MU Office of Admissions (http://admissions.missouri.edu).

Articulation Agreements

Contact departmental advisors for information on articulation programs and agreements.

Associate of Arts Degree

An Associate of Arts degree (AA) is a two-year program that indicates the completion of a student's lower-division education. It also is a specific transfer degree for entry, at the junior level, into the general range of baccalaureate degree programs offered by the University.

Students transferring to MU from a regionally-accredited Missouri college or university with an AA degree and a certified 2.0 GPA will be accepted with junior standing. They will also have completed lower-division, general education requirements if the AA degree consisted of at least 60 credits of college-level work. These 60 credits must include completion of an institutionally-approved, general-education program of not fewer than 39 credits.

Students holding the AA degree are admissible to MU, but are not necessarily admissible to specific programs. Some of the specific programs with specialized lower-division requirements are the colleges of...
Business, Education, Human Environmental Sciences and the schools of Health Professions, Journalism, Nursing and Social Work. The transfer requirements for all academic units may be found in this catalog on the degree specific pages. Students applying with an AA degree from another state will have their courses reviewed for equivalency on an individual basis.

**Associate of Science Degree**

An Associate of Science degree (AS) is a specialized degree intended for transfer into a specific, preprofessional program. Junior standing is guaranteed to the transfer student only if curricular details have been agreed on by MU and the institution granting the AS. Students who receive a specialized AS degree do not automatically qualify for junior standing in all MU programs. To enroll in some degree programs, students may have to take additional, general-education courses.

**Students without Associate Degrees**

Students transferring without associate degrees must meet regular MU transfer admission standards.

**Transfer within the UM System**

Students may transfer among campuses within the University of Missouri System. University of Missouri Policy states that "Any course that leads to an undergraduate degree on any campus of the University of Missouri shall be accepted in transfer toward the same degree on each campus of the University offering said degree." Students transferring within the UM system are still required to satisfy the course and residency requirements of the campus from which they wish to graduate. Grades, including D and F grades, and grade points earned will also transfer and be included in the cumulative UM grade-point-average.

For more information contact the following offices:
- University of Missouri - Columbia, Office of Admissions, 800-225-6075, mu4u@missouri.edu
- University of Missouri - Kansas City, Registration & Records Office, 816-235-1125, registrar@umkc.edu
- Missouri University of Science and Technology, Registrar's Office, 573-341-4181, registrar@mst.edu
- University of Missouri - St. Louis, Office of the Registrar, 314-516-5545, registration@umsl.edu

**Military Transfer Credits**

Military veterans, with at least two years of honorable service are allowed to transfer military course credit. The transcript coursework must have been accredited by the American Council of Education (ACE). Veterans are advised to contact University Admissions regarding specific transfer credit policies. An exception to current transfer credit policies is that military veterans be allowed a maximum of 9 hours credit as general electives. This policy began with military veterans enrolled for the Fall 2010 semester.

**Transfer Students and University General Education Requirements**

All University, general-education requirements are considered completed for students who transfer to MU with an AA degree from a regionally-accredited Missouri institution. Transfer credits for other students are evaluated on a course-by-course basis. All students must complete University graduation requirements beyond the University general education requirements.

NOTE: Many departments, degrees and majors have more specific requirements for foundation course work in addition to the University, general-education requirement. However, the reverse is not true. Departments or academic units may not have fewer general education requirements than described by the University general education requirements. Careful planning will allow students to simultaneously meet University, general-education requirements and prepare for many of the more specific foundation courses required by their field of study.

**Visiting Graduate Student Program (G)**

Effective Fall 2011, the UM Visiting Graduate Student Program replaces the UM Traveling Scholars Program. The UM Visiting Graduate Student Program offers eligible graduate students a streamlined process for applying and registering for graduate courses on other UM campuses.

To participate in the UM System Visiting Graduate Student Program, a graduate student must be a degree-seeking graduate student and in good-standing on the home campus and host campus.

To apply for this program, go to the "UM System Visiting Graduate Student Application" and submit the application (http://gradschool.missouri.edu/forms-downloads/repository/um-system-visiting-graduate-student-application.pdf). Complete the form; if approved, the home campus Graduate office will transmit the approved form to the host campus Graduate office. The host campus will notify the student when they are eligible to register for courses.

All course fees are paid to the host campus. Graduate students should contact their home campus Financial Aid office for more information on financial aid.

International (non-U.S. citizen) students should consult the International student office on their home campus for more information on financial aid.

To officially transfer courses from the host campus to the home campus, students must order an official transcript from the host campus and comply with the home campus's transfer policies and processes.

**Withdraw from the University**

**From the Term**

A student who wishes to withdraw from the Term (University) must process the appropriate Term Withdrawal Form (http://registrar.missouri.edu/policies-procedures/withdrawal-university.php) (PDF). Dropping all classes is considered a withdrawal from the Term (University) and must be initiated in the students academic school or
Withdraw from the University (L)

Formal withdrawal from MU is arranged through the Graduate School using a Notice of Withdrawal form that is signed by the Director of the LL.M. Program and the Dean of the Graduate School. If the student is making a C or better at withdrawal time, a grade of W is recorded. If the student is doing failing work at withdrawal time, a grade of F is recorded. Students are responsible for notifying their instructors of their intention to withdraw and for determining if their work qualifies for a W grade. Students who leave MU without filing a statement of formal withdrawal are given a grade of F in all courses. If the reason is so urgent that an official withdrawal cannot be obtained, the student should notify the LL.M. Program as soon as possible and officially request to be withdrawn.

Withdraw from the University (V)

Students who withdraw or seek a leave of absence from the College of Veterinary Medicine prior to successful completion of the first semester of the professional curriculum (Instructional Periods 1 through 2), and who seek readmission, must submit a letter of intent within 30 days of the withdrawal date to the Office of Academic Affairs. The student’s application will be evaluated for readmissions by the Admissions and Scholarship Committee by March 1 with the pool of incoming candidates. Readmission will be based on their scoring within the pool of the next cohort and remediation plan submitted prior to March 1. Students who request a leave of absence after the first semester will develop a return and remediation plan in consultation with the Associate Dean of Academic Affairs. Exceptions to this timeline will be evaluated on a case by case basis by the Committee.

Withdrawing from a Course

If a student wishes to drop a course after the last day to drop a course without a grade, the process is referred to as “withdrawing” from a course. To withdraw from a course, students must begin in their academic advising unit. Following the approval from the academic advising unit, the student takes the form for processing to the Office of the University Registrar, 125 Jesse Hall. The process must be completed by the end of the business day of the Monday of the last week of classes or prior to completing the final in a self-paced course. See Academic Policies: Grades (p. 782) for more information on withdrawing from a course.

NOTE: Students may not withdraw from all courses or their last course via myZou after the tenth day prior to the start of the semester or term. This must be done in the academic advising unit.
## Course Numbering

<table>
<thead>
<tr>
<th>Course</th>
<th>Number</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic skills courses</td>
<td>0000-0999</td>
<td>Courses that do not count toward degree requirements—primarily used for skill development. May NOT be cross listed or cross level.</td>
</tr>
<tr>
<td>Freshmen-level courses</td>
<td>1000-1999</td>
<td>Entry-level courses that have only skill development courses for course prerequisites. (Test scores, etc. are acceptable prerequisites.) Considered lower-division. Community College courses will be considered equivalent to this level. May NOT be listed as cross level with 5000-8999.</td>
</tr>
<tr>
<td>Sophomore-level courses</td>
<td>2000-2999</td>
<td>Intended primarily for second-year or sophomore students who have the essential prerequisites or background. Considered lower-division. Community College courses will be considered equivalent to this level as well. May NOT be listed as cross level with 5000-8999.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>3000-3999</td>
<td>Upper-division courses that may NOT be listed as cross level with 5000-8999. Intended primarily for third and fourth-year (juniors and seniors) students who have the essential prerequisites or background. Often restricted to students admitted to junior-level entry degree programs.</td>
</tr>
<tr>
<td>Junior/Senior-level courses (Upper Division)</td>
<td>4000-4999</td>
<td>Upper-division courses that may be listed as cross level with 5000-7999. Intended primarily for juniors and seniors. Note special sub-ranges for capstone, research and departmental honors courses.</td>
</tr>
<tr>
<td>Undergraduate Research courses</td>
<td>4950-4959</td>
<td>Upper-division, undergraduate research courses</td>
</tr>
<tr>
<td>Capstone courses</td>
<td>4970-4990</td>
<td>Courses that are both capstone and departmental honors courses</td>
</tr>
<tr>
<td>Capstone/Honor courses</td>
<td>4991</td>
<td></td>
</tr>
<tr>
<td>Capstone/Reading courses</td>
<td>4992</td>
<td></td>
</tr>
<tr>
<td>Capstone/Internship courses</td>
<td>4993</td>
<td></td>
</tr>
<tr>
<td>Capstone/Research courses</td>
<td>4994</td>
<td></td>
</tr>
<tr>
<td>Extended Research &amp; Departmental Honors course</td>
<td>4995</td>
<td>Multiple term duration courses based on research</td>
</tr>
<tr>
<td>Departmental Honors courses</td>
<td>4996-4999</td>
<td>Used only for departmental honors courses. Include Dept. Honors in title or course description. No “H” is listed after the catalog number.</td>
</tr>
<tr>
<td>Professional-level courses</td>
<td>5000-6999</td>
<td>Professional-level courses for Law, Vet. Med, Medicine, and Occupational/Physical Therapy. Generally, not for undergraduate credit. May be listed as cross-level with 4000-4999 courses.</td>
</tr>
<tr>
<td>Beginning Graduate courses</td>
<td>7000-7999</td>
<td>Graduate-level courses for beginning and mid-level graduate students primarily. Generally not for undergraduate credit, but may be listed as cross-level with 4000-4999 courses.</td>
</tr>
</tbody>
</table>
Mid-level Graduate courses 8000-8999

Graduate-level courses intended primarily for mid- and upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.

Upper-level Graduate courses 9000-9999

Graduate-level courses intended primarily for upper-level graduate students. Not for undergraduate credit. May NOT be listed as cross-level with 4000-4999 courses.

“H” after a number indicates that it is an Honors course, approved by the Honors College for use toward Honors Certificate or University Honors. Not applicable to courses only designated for departmental honors.

“W” after a number indicates that it is a Writing Intensive course, approved by the Campus Writing Board for use toward fulfilling MU’s writing requirement.

Guidelines for Cross-Listed and Cross-Level Courses

* Approved by Faculty Council February 13, 2003

Per the faculty approved policies, only 4000 and 7000 level courses may be cross-level listed. Courses that are cross-listed should be from different departments, but cover the same content, with matching course descriptions.

Cross-Listed Courses must:

• Be at the same level
• Cover the same content
• Not meet different general education requirements

Cross-Listed Courses may:

• Not have the exact same number, but it is preferred that they do
• Have different additional fees. However, students may need to enroll in a specific course to meet a requirement and may or may not be allowed to substitute the cross-listed course to avoid the fee. There are limits on enrollment and space may not be available in the non-fee course or section.

• Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Cross-Level Courses:

• Only 4000 and 7000-level courses may be cross-level listed.
• The 7000-level course must require work appropriate for graduate credit and be approved as such by the Graduate Faculty Senate.
• Exceptions: Fine art and music “skills” classes such as painting or drawing may have different levels meeting in the same room at the same time, such as 1000, 2000, etc. with the instructor requiring the appropriate additional quality and/or quantity of work for the respective level.

Courses that are not cross-level may not meet in the same room at the same time or near each other at the same time so that they attempt to “get around” this rule.

Restrictions by Course Level

Not allowed:

• 0000-0999 – May not be cross listed or cross leveled outside of the 0000-0999 range
• 1000-3999 – May not be cross listed or cross leveled with 5000-9999
• 4000-4999 - May not be listed as cross level with 8000-9999
• Linked cross-leveling may not result in a 1000-3999 level being linked with a 4000-4999, that is subsequently linked with 5000-7999, and a 7000-7999 that is cross-level with 8000-9999

Permissible:

• 1000-3999 May be cross-listed and/or cross-leveled with 1000-4999
• 4000-4999- May be listed as cross level with 5000-7999
• 5000-6999 – May be listed as cross level with 4000-4999 or with 7000-7999
• 7000-7999 – May be listed as cross level with 4000-6999 or with 8000-8999, but not both
## Curriculum Designator Abbreviations

Accountancy (ACCTCY)

**ACCTCY 2010: Introduction to Accounting**
Introduction to accounting for non-business majors. Emphasis on introducing students to business operations, as well as preparing and using management information and financial accounting information for business decisions (does not count as either ACCTCY 2036 or ACCTCY 2037).

Credit Hours: 3
Prerequisites: sophomore standing

**ACCTCY 2026: Accounting I**
An introduction to the field of accounting, this course covers the fundamentals of financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2026 and ACCTCY 2036.

Credit Hours: 3
Prerequisites: Sophomore Standing

**ACCTCY 2027: Accounting II**
This course covers the fundamentals of managerial accounting and additional topics in financial accounting. Business students at UMC must have advisor's approval. Credit may not be earned for both ACCTCY 2027 and ACCTCY 2037. Course only offered through Mizzou Online (self paced).

Credit Hours: 3
Prerequisites: ACCTCY 2026

**ACCTCY 2036: Accounting I**
First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users. This course covers the fundamentals of financial accounting.

Credit Hours: 3
Prerequisites: Completion of 28 credit hours. May be restricted to lower-level business and lower-level accountancy students during early registration

**ACCTCY 2037: Accounting II**
Second part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users. This course covers the fundamentals of managerial accounting.

Credit Hours: 3
Prerequisites: ACCTCY 2026, ACCTCY 2036 or ACCTCY 2136H

**ACCTCY 2136H: Honors Accounting I**
First part of two-part course focusing on the nature and use of managerial and financial accounting information for decision making in various business settings. Emphasizes use of accounting information by internal and external users.

Credit Hours: 3
Prerequisites: sophomore standing in Accounting or Business, 3.3 or higher GPA. Honors eligibility required

**ACCTCY 2137H: Honors Accounting II**
Continuation of Accountancy 2136H.

Credit Hours: 3
Prerequisites: C or better ACCTCY 2136H. Honors eligibility required

**ACCTCY 2258: Computer-Based Data Systems**
Introduces the computer as a tool in the efficient operation of a business. Skills developed in the course include electronic information retrieval, information analysis using a spreadsheet, what-if analysis macro development, and information presentation. In addition, computer components, data storage, networks, and information technology are discussed.

Credit Hours: 3
Prerequisites: Sophomore standing

**ACCTCY 3326: Financial Accounting Theory and Practice I**
Institutional structure, conceptual framework, and reporting standards and practices of financial accounting, with special emphasis on accounting for assets.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

**ACCTCY 3328: Accounting Information Systems**

Credit Hours: 3
Prerequisites: Restricted to Accountancy Majors

**ACCTCY 3346: Financial Accounting Theory and Practice II**
Continuation of Accountancy 3326, with special emphasis on income recognition and accounting for liabilities and ownership equity.

Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

**ACCTCY 3347: Cost and Managerial Accounting**
Activity based and traditional job order and process cost systems for service, merchandising, and multinational manufacturing companies; Cost accounting techniques and procedures for financial reporting by multinational companies. Strategic focus to management accounting measurement and reporting. Standard costs and variances, capital budgeting.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027. Restricted to Accountancy Majors

**ACCTCY 4000: Accountancy Professional Speakers and Symposia**
(cross-leveled with ACCTCY 7000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and
sympoia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course.

Credit Hours: 0
Prerequisites: Accountancy Majors

ACCTCY 4301: Topics in Accounting
Independent investigations, reports on approved topics.

Credit Hour: 1-3
Prerequisites: instructor's consent

ACCTCY 4353: Introduction to Taxation
(cross-leveled with ACCTCY 7353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027.
Restricted to accountancy majors only

ACCTCY 4356: Financial Accounting Concepts
(cross-leveled with ACCTCY 7356). Current issues in the financial reporting of business corporations to external parties.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310. Not open to accountancy majors

ACCTCY 4365: Governmental Accounting and Budgeting
(cross-leveled with ACCTCY 7365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 4384: Auditing Theory and Practice I
(cross-leveled with ACCTCY 7384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 4940: Professional Accounting Internship
(cross-leveled with ACCTCY 7940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hour: 3-6
Prerequisites: Accountancy Majors only and 105 credit hours completed and ACCTCY 3326 and ACCTCY 3328 and ACCTCY 3346 and ACCTCY 3347 and ACCTCY 4353, and GPA of 3.0 or higher

ACCTCY 7000: Accountancy Professional Speakers and Symposia
(cross-leveled with ACCTCY 4000). This non-credit course, recommended for all accountancy majors, will provide exposure to issues in the accounting profession through professional speaker series and symposia. Components will include the Dawdy Speaker Series, Orin Ethics Symposium, and Symposia delivered by accounting firms and/or professional accounting organizations. This will be a non-credit, non-billed, no hours course. Graded on S/U basis only.

Credit Hours: 0
Prerequisites: Accountancy Majors

ACCTCY 7310: Accounting for Managers
Introduction to understanding how accounting information is used to help make informed decisions in various business settings. Includes an introduction to basic financial and management accounting concepts and procedures.

Credit Hours: 3
Prerequisites: MBA or MSPA candidate, or departmental consent

ACCTCY 7353: Introduction to Taxation
(cross-leveled with ACCTCY 4353). Introduction to the structure and conceptual foundation of the U.S. federal income tax system for individual taxpayers. Topics include income recognition, deductions, property transactions, trusts, and family wealth planning. This course also introduces students to legal tax research and preparation of individual income tax returns.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027.
Restricted to accountancy majors only

ACCTCY 7356: Financial Accounting Concepts
(cross-leveled with ACCTCY 4356). Current issues in the financial reporting of business corporations to external parties. Not open to accountancy majors.

Credit Hours: 3
Prerequisites: ACCTCY 2037 or ACCTCY 2137H or ACCTCY 2027 or ACCTCY 7310

ACCTCY 7365: Governmental Accounting and Budgeting
(cross-leveled with ACCTCY 4365). Introduction to government and not-for-profit accounting. Concepts and principles of fund accounting, budgeting, auditing, and financial reporting in government and not-for-profit entities.

Credit Hours: 3
Prerequisites: ACCTCY 3326. Restricted to Accountancy Majors

ACCTCY 7384: Auditing Theory and Practice I
(cross-leveled with ACCTCY 4384). Introduction to the auditing profession, assurance function, and generally accepted standards for conducting audits.

Credit Hours: 3
Prerequisites: ACCTCY 3328 and ACCTCY 3346. Restricted to Accountancy Majors
ACCTCY 7940: Professional Accounting Internship
(cross-leveled with ACCTCY 4940). Provides full-time professional accounting work experience of at least eight weeks duration. Graded on S/U basis only.

Credit Hours: 3-6
Prerequisites: Completion of undergraduate portion of 150 hour program (or equivalent) and consent of Internship Coordinator

ACCTCY 8363: Multi-Jurisdictional Tax
This course takes a practical approach to exploring multistate and international tax concepts by focusing on tax issues that can arise as a company expands from a single business location into a multinational corporation. Part 1 of this course focuses on the economic, political, and constitutional constraints imposed on state and local taxation, including the due process clause, the commerce clause and state uniformity and equality clauses. Part 2 of the course includes a survey of state and local tax laws, with a particular emphasis on the imposition of sales and use taxes and the allocation and apportionment of state income taxes. Part 3 of the course surveys principals of international taxation, including U.S. taxation of the foreign investments or activities of U.S. taxpayers (outbound) and U.S. taxation of the U.S. activity or investments of foreign taxpayers (inbound).

Credit Hours: 3
Prerequisites: ACCTCY 4353. Restricted to Accountancy Majors

ACCTCY 8373: Taxation of Corporations and Shareholders
Life cycle of a corporation including formations, operations, distributions, and liquidations of corporations.

Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

ACCTCY 8393: Taxation of Trust, Gifts and Estates
This course covers two main topics. Students are introduced to the construction, operation and income taxation of trusts. After this portion of the course students will learn about the gift tax consequences of completed exchanges. Finally, students will learn the basic rules regarding the estate tax. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ACCTCY 4353 or ACCTCY 7353. Restricted to Accountancy Majors

ACCTCY 8401: Topics in Accounting
Independent investigations, reports on approved topics.

Credit Hour: 1-3
Prerequisites: instructor's consent

ACCTCY 8404: Internal Auditing
This course covers the concepts, practices, and application of internal audit activities. The course will review the entire internal audit process including annual audit and engagement planning, fieldwork, reporting, and management communication. Other topics including internal controls, enterprise risk management, and key behavior skills will be discussed. The Professional Practices Framework and industry best practices will be incorporated throughout the semester. This course will prepare students for entry-level internal audit positions. Graded A-F only.

Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8414: Audit of Internal Controls
A combination of control theory, concept application, demonstration of actual practice, and student research to develop an understanding of the concepts and practices used in the design, development or assurance of information systems (IS) controls. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ACCTCY 3328, and ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8419: International Accounting
Introduction to accounting regulations and practices outside of the U.S., accounting regulations for foreign registrants on the NYSE and NASDAQ, international accounting standards and international management control issues. Review of cultural frameworks; transfer pricing methods and international accounting standards.

Credit Hours: 3
Prerequisites: ACCTCY 3346 and ACCTCY 3347. Restricted to Accountancy Majors

ACCTCY 8423: Tax Research and Planning
Applied tax research using print and electronic data bases; heuristic biases in tax judgments; responsibilities of professional tax practices.

Credit Hours: 3
Prerequisites or Corequisites: ACCTCY 8373

ACCTCY 8424: Fraud Examination
A study of the methods and techniques of fraud examination, particularly with regard to frauds perpetrated by the company against the public. The ethical and professional standards that underlie the accountant's responsibility for fraud detection and prevention are emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8428: Data Visualization and Data Mining
Enterprise-wide view of data and transaction processing. Concepts and techniques of data visualization and data mining of business-critical data. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Accountancy Majors or with Department consent

ACCTCY 8433: Mergers and Acquisitions Taxation
This course covers the basic taxation of mergers and acquisitions, both taxable and tax-free acquisitions; issues in merger and acquisition deal making, such as due diligence and understanding contract tax provisions; and an overview of securities regulations with respect to publicly traded companies. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: ACCTCY 8373
Prerequisites: ACCTCY 4353

ACCTCY 8436: Advanced Accounting
Continuation of ACCTCY 3346. Addresses a series of special financial accounting topics including income taxes, pensions, leases, business combinations, consolidated statements, and foreign currency translation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 3346. Restricted to Accountancy Majors

ACCTCY 8438: Forensic Accounting
Coverage of forensic accounting processes and tools used in the detection and prevention of fraud against the company. Topics include skimming, cash larceny, check tampering, billing schemes and others. An emphasis of the course will be upon the use of computer aids. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 3328, ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8444: Advanced Audit
The Advanced Auditing course helps students develop a better understanding of the audit environment and gives them the opportunity to gain hands-on experience planning for an audit engagement, performing test work, and completing an audit engagement. The course also addresses additional topics not covered in detail in the Audit Theory and Practice I course, including inventory observation, legal liability issues faced by auditors today, the regulatory environment, professional responsibilities of auditors, preparing appropriate documentation for audit engagements, providing required communications to clients, and performing Single Audits. The course is designed to encourage open discussions of cases and current issues and provide learning opportunities for the students. The class meetings and assignments are designed to improve the student's critical thinking skills, communication skills, and team-building skills. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4384 or ACCTCY 7384. Restricted to Accountancy Majors

ACCTCY 8448: Emerging Issues in Accounting Information Systems
Current developments in the implementation and use of accounting information systems. Topics may vary. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Accountancy Majors

ACCTCY 8450: Accounting and Strategic Business Analysis
Capstone course in the Master of Accountancy program. Emphasis on case analysis to develop critical thinking and analytical skills in the use of accounting reports for broad-based business analysis. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 3346 or equivalent. Restricted to Accountancy Majors

ACCTCY 8453: Taxes and Business Strategies
This class examines the role taxes in business decisions. The analysis involved considers 1) tax consequences of all parties to a transaction, 2) both explicit and implicit taxes, and 3) tax as well as non-tax costs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Accountancy Majors

ACCTCY 8456: Corporate Governance
Corporate governance has taken on new prominence in light of the accounting scandals of the early 2000's (e.g., Enron) and the new regulatory regime of Sarbanes-Oxley. As a result, corporations, investors, auditors, and others are paying more attention to corporate governance. This course will familiarize students with corporate governance mechanisms and how they interact with financial reporting. This course should appeal to students pursuing careers in auditing, finance, management, as well as anyone seeking a deeper understanding of relations between financial reporting and corporate governance. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 8436. Restricted to Accountancy Majors

ACCTCY 8463: Partnership Taxation
Investigates factors and mechanisms of taxation in the formation, operations, distributions, and liquidations of partnerships. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ACCTCY 4353 or 7353, MATH 1300 and MATH 1320 and STAT 3500, or instructor's consent

ACCTCY 8457: Quantitative Methods in Accounting
Application of mathematics and statistics to managerial and financial accounting problems.
Credit Hours: 3
Prerequisites: ACCTCY 3347, MATH 1300 and MATH 1320 and STAT 3500, or instructor's consent
ACCTCY 9460: Research Methods in Accounting
Application of research methods to the investigation of current accounting issues. A research paper is required.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9466: Seminar in Financial Accounting Research
Theory of financial accounting and regulated disclosure; empirical tests of financial accounting theory, with emphasis on the nature of the research question addressed, and the method used to address the research question.
Credit Hours: 3
Prerequisites: doctoral candidacy or instructor's consent

ACCTCY 9467: Seminar in Behavioral Accounting Research
Critical review of the Behavioral accounting research literature with emphasis on issues and research methods.
Credit Hours: 3
Prerequisites: doctoral candidacy and instructor's consent

Aerospace Studies (AERO)

AERO 1100: Heritage and Values of the United States Air Force
A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 1200: Heritage and Values of the United States Air Force
Continues introducing students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 2100: Team and Leadership Fundamentals
A survey course that focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Applies communicative skills. Leadership lab.
Credit Hours: 2

AERO 2200: Team and Leadership Fundamentals
Continues laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and

AERO 3100: Leading People and Effective Communication
Focuses on teaching cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Leadership lab.
Credit Hours: 3

AERO 3200: Leading People and Effective Communication
Continues teaching cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Leadership lab.
Credit Hours: 3

AERO 4100: National Security Affairs/Preparation for Active Duty
Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Leadership lab.
Credit Hours: 3

AERO 4200: National Security Affairs/Preparation for Active Duty
Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Leadership laboratory.
Credit Hours: 3

Agribusiness Management (ABM)

ABM 1010: Introduction to Agribusiness Management
Introduction to Agribusiness Management, will provide students the opportunity to learn about business, agriculture, food, and the environment. Students will develop an understanding of how agriculture contributes to the U.S. economy and international markets. Agriculture is one of the fastest growing sectors in the U.S. economy and provides many great career opportunities nationwide. Students will learn about careers in agribusiness and food industry sales, commodity and food product marketing, entrepreneurial endeavors, farm management and production, financial management and analysis, human and public relations, policy and law and supply chain management.
Credit Hours: 3
ABM 1011: Survey of Global Agribusiness
Economic, social and political forces and trends and the impact on U.S. and global agribusinesses. Global production, consumption trade, and investment patterns in agriculture-food sector. Developing management strategy in changing economic political environment.
Credit Hour: 1

ABM 1041: Applied Microeconomics
Introduction to the microeconomic principles and their application to decision-making in agribusinesses. Consumer decision analysis, producer goals and optimization and the market environment where they meet and trade. Applications to current issues. Students who complete AG_EC/ABM 1041 may not have credit for ECONOM 1014.
Credit Hours: 3

ABM 1042: Applied Macroeconomics
Introduction to macroeconomic principles and their application to agriculture-food sector and natural resource issues. Using macroeconomic principles in decision making and in evaluating national and regional economic problems and issues. Students who complete ABM 1042 may not have credit for ECONOM 1015.
Credit Hours: 3

ABM 1200: Applied Computer Applications
This course is an applied problem based learning opportunity for students to gain Excel spreadsheet related skills critical to careers in agriculture, food and natural resources. Students will learn intermediate and advanced spreadsheet skills essential for problem solving and decision making in these biologically influenced fields.
Credit Hours: 3

ABM 2050: For the Love of Food: Global Food System Debate
This course is designed to develop students' understanding of the food system from farm to plate and the consumer's role in the global food system. Gaining a knowledge base on food system dynamics will allow students to better understand the societal and policy making processes behind food production. Each week we will discuss key topics and issues facing the food system today. This class will help students develop critical thinking skills to address challenges in the global food system.
Credit Hours: 3

ABM 2070: Environmental Economics and Policy
(same as ENV_ST 2070). Examines current environmental and natural resource issues using a systems perspective and key economic concepts. Explores connections between the environment and the economy based on problems at the local, national, and international levels.
Credit Hours: 3
Prerequisites: sophomore standing
Recommended: ENGLISH 1000

ABM 2223: Agricultural Sales
Principles of salesmanship in agricultural input and output markets; buyer motivations; time and territory management; communication models and techniques; planning and executing sales calls; after-sale service.
Credit Hours: 3
Prerequisites: ABM 1041 or ABM 1042 or ECONOM 1014 or ECONOM 1015 and sophomore standing

ABM 2225: Statistical Analysis
Credit Hours: 3
Prerequisites: MATH 1100

ABM 2294: Market Watch - Understanding and Using Commodity Markets
This course is an introduction to commodity merchandising with a focus on the underlying fundamental market factors that determine commodity prices. In addition to monitoring market news, weather and supply/demand, students learn about cash, futures and options markets. Various merchandising tools are examined and how they can be applied to develop effective commodity merchandising strategies.
Credit Hours: 3
Recommended: Excel
ABM 2940: Practicum in Agribusiness Management
Off-campus integrated working and learning experience for departmental majors and minors. Application of economic concepts in business or government. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Instructor's consent

ABM 3150: International Agribusiness
This course covers the primary factors that shape the business environment for food and agricultural firms conducting business across borders. The course examines how culture, institutions and public policy affect business operations and business strategies.

Credit Hours: 3
Prerequisites: ABM 2183

ABM 3244: New Products Marketing
Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014

ABM 3244W: New Products Marketing - Writing Intensive
Learning experience to develop skills in marketing new agriculture products. To include market analysis, goals and objectives, action plan, financial evaluation and monitoring and measurement. In small groups, students will develop complete marketing plan for a new product.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014

ABM 3230: Agricultural and Rural Economic Policy
Study and analysis of past and present government policies affecting agriculture and rural economy.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014

ABM 3241: Ethical Issues in Agriculture
The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and junior standing

ABM 3241W: Ethical Issues in Agriculture - Writing Intensive
The study of how economics, philosophy, and science inform on and impact important ethical problems in agriculture, such as the environment, biotechnology, animal welfare, farm structure, the role of agribusiness, development, sustainability, and agriculture-related public policy. Course may be repeated once for credit.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and junior standing

ABM 3256: Agribusiness and Biotechnology Law
Legal concepts applicable to agribusiness and biotech firms. To include contracts, torts, product liability, warranties, corporate farming laws, UCC, corporations/partnerships/limited liability companies, labor laws, patent copyrights/trademark laws, international and ethical perspectives.

Credit Hours: 3

ABM 3260: General Farm Management
Economics and management principles applied to planning and operating farm businesses. Includes enterprise combination, resource acquisition, water management, profit maximizing techniques and annual adjustments to changing conditions.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014

ABM 3271: International Agricultural Development
Examines world food problem; analyzes its causes; economic and noneconomic policy alternatives for modernizing agriculture in less-developed countries.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015
Recommended: junior standing

ABM 3272: International Food Trade and Policy
Examines food trade; develops economic analyses of trade impacts on domestic agricultural policies; examines international trade agreements; and interface of trade and environment.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015

ABM 3282: Agribusiness Finance
Application of the concepts and methods of finance to the management of agribusiness firms, including cooperatives. Special attention is given to the working capital needs of agribusiness and to the specialized lending institutions in the agricultural economy.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and ABM 1042 or ECONOM 1015
Recommended: ACCTCY 2037 or ACCTCY 2027

ABM 3283: Fundamentals of Entrepreneurship
Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026
Recommended: ACCTCY 2037 or ACCTCY 2027

ABM 3283: Fundamentals of Entrepreneurship
Introduce students to entrepreneurial way of thinking. Entrepreneurship is a way of thinking about identifying/creating opportunities and transforming those opportunities into new businesses, new institutions, or solutions to problems. Students will participate in the process of formulating and evaluating solutions to problems and identifying and exploiting opportunities.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014 and ACCTCY 2036 or ACCTCY 2026. Restricted to Agricultural Economics and Agribusiness Management majors during early registration
ABM 3285: Problems in Agribusiness Management
Supervised study in a specialized phase of agricultural economics. Graded on S/U basis only.

Credit Hours: 1-3
Prerequisites: instructor's consent

ABM 3286: Economics of Managerial Decision Making
Introduces tools and concepts from price theory, game theory, industrial organization and organizational economics, and applies them to managerial decision making activities for businesses in the agrifood system and for natural resource and environmental management.

Credit Hours: 3
Prerequisites: ABM 2123 and ABM 2183

ABM 3294: Agricultural Marketing and Procurement
Content of course focuses on marketing issues in the agriculture supply chain. Topics covered include price discovery, basis, futures/options, contracting, logistics, and management decision making.

Credit Hours: 3
Prerequisites: ABM 2183
Recommended: ABM 2225 or STAT 2500

ABM 3295: Real Money: Speculative Trading for Beginners
Familiarize students with the learning components of commodity future trading. Students learn through involvement by investing in a commodity pool and trading futures. Students apply both fundamental and technical analysis. Students taking this course are required to invest from $200 to $600 in $200 increments. Students cannot lose more money than invested.

Credit Hours: 3
Recommended: ABM 3294

ABM 4230: Understanding the Agricultural Policy Process
The goal of this course is to prepare students for a career in agricultural policy and will build the skill set needed in the agricultural policy environment.

Credit Hours: 3
Prerequisites: ABM 3230

ABM 4240: Microeconomics Theory and Applications
(cross-leveled with AAE 7240). This course extends the learning from principles of microeconomics for students of applied economics. The topics in this course prepare students for further study in finance, business management, policy analysis, economic development, and other applications of economic theory. The course stresses development of theoretical models of consumer choice, firm behavior, perfect and imperfect markets, and externalities, balanced by investigation of the assumptions behind these models. Applications of the models to management and policy issues will be assigned throughout the semester.

Credit Hours: 3
Prerequisites: ABM 1041 or ECONOM 1014

ABM 4251: Agricultural Prices
(cross-leveled with AAE 7251). Variations in prices of agricultural products; underlying factors.
**Agricultural and Applied Economics (AAE)**

**AAE 7240: Microeconomics Theory and Applications**
(cross-leveled with ABM 4240). This course extends the learning from principles of microeconomics for students of applied economics. The topics in this course prepare students for further study in finance, business management, policy analysis, economic development, and other applications of economic theory. The course stresses development of theoretical models of consumer choice, firm behavior, perfect and imperfect markets, and externalities, balanced by investigation of the assumptions behind these models. Applications of the models to management and policy issues will be assigned throughout the semester.

**Credit Hours: 3**
**Prerequisites:** ABM 3282 or FINANC 3000 and ABM 3286 or MANGMT 3000
**Recommended:** ABM 3256

**AAE 7251: Agricultural Prices**
(cross-leveled with ABM 4251). Variations in prices of agricultural products; underlying factors.

**Credit Hours: 3**
**Prerequisites:** ABM 2123 and ABM 2225 or STAT 2500

**AAE 7295: Agricultural Risk Management**
(cross-leveled with ABM 4295). This class will examine the range of risks businesses face and explore ways of characterizing and evaluating those risks.

**Credit Hours: 3**
**Prerequisites:** ABM 2183 and ABM 2225 or STAT 2500

**AAE 7301: Topics in Agricultural and Applied Economics**
Current and new topics not currently offered in applied and/or theoretical areas in Agricultural and Applied Economics.

**Credit Hour: 1-6**

**AAE 7356: Environmental Law and Policy**
(cross-leveled with ABM 4356). Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, endangered species preservation, land use, and waste disposal.

**Credit Hours: 3**
**Prerequisites:** Instructor's consent
**Recommended:** ABM 3256, senior or graduate standing. For non-law students

**AAE 7940: Internship Experiences in Agricultural and Applied Economics**
Combines study, observation, and employment in a public agency or private firm in marketing, farm management, or credit. Staff supervision and evaluation. Reports required. Graded on S/U basis only.

**Credit Hour: 1-3**
**Prerequisites:** 2.5 GPA; 75 hours of course work and instructor's consent
AAE 7962: Planning the Farm Business
(cross-leveled with ABM 4962). Economic analysis and planning of the farm business and its organization. Applications of computerized management techniques to farm business including resource acquisition, tax management, enterprise analysis, and business analysis through farm records and budgets.
Credit Hours: 3
Prerequisites: ABM 3260

AAE 7971: Agribusiness Management Strategy
(cross-leveled with ABM 4971). Analysis of industry forces in agriculture and food sector. Assessing risks and firms capabilities. Development of firm's competitive strategy, including vertical integration, diversification, international business option, and financial planning and performance measurement.
Credit Hours: 3
Prerequisites: ABM 3282 or FINANC 3000 and ABM 3286 or MANGMT 3000

AAE 7972: Agri-Food Business and Cooperative Management
(cross-leveled with ABM 4972). Risk management in the global agrifood chain, including managing the unique uncertainties of biological production processes, global market analysis, and government intervention, of risk management tools and institutions unique to strategic decision making in agribusiness and cooperative firms.
Credit Hours: 3
Prerequisites: ABM 4971 and ABM 3286 or MANGMT 3000
Recommended: ABM 3256

AAE 7983: Strategic Entrepreneurship in Agri-Food
(cross-leveled with ABM 4983). Strategic entrepreneurship is the search for opportunities to generate income streams from innovation, development of new markets, and altering the rivalry positions in existing markets. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Graduate standing and one course at the level of intermediate microeconomics

AAE 7990: Economic Analysis of Policy and Regulation
(cross-leveled with ABM 4990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.
Credit Hours: 3
Prerequisites: ABM 4251
Recommended: ECONOM 4351

AAE 7995: Economics of Agricultural Production and Distribution
(cross-leveled with ABM 4995). Applies economic principles to agricultural production including price theory, linear programming and uncertainty.
Credit Hours: 3
Prerequisites: ECONOM 3251 and ABM 2225 or STAT 2500

AAE 8001: Advanced Topics in Agricultural and Applied Economics
Analyzes economic logic problems. Current agricultural and applied economic problems.
Credit Hours: 3

AAE 8050: Economics of Institutions and Organizations
This course expands upon the fundamental principles of neo-classical economics by relaxing traditional behavioral and informational assumptions and by introducing the importance of transaction costs and institutions for economic analysis.
Credit Hours: 3

Firm decision making and evaluation are key concepts in business economics and management. This is an introductory course that focuses on quantitative methods for modeling the decision process and evaluating the performance of Decision-Making Units (DMUs).
Credit Hours: 3
Prerequisites: STAT 4510

AAE 8085: Masters Problems in Agricultural and Applied Economics
Supervised study, research in specialized phases of agricultural and applied economics.
Credit Hour: 1-99

AAE 8090: Masters Thesis Research in Agricultural and Applied Economics
Independent investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-6

AAE 8265: Agricultural and Food Policy
The course is designed to help students understand how agricultural and food policies are developed and how they can affect farmers, consumers, taxpayers and the environment. Topics include the policy process, farm subsidy programs, crop insurance, nutrition programs, trade agreements, food security, biofuel policies, promotion of organic and local foods and food safety. The primary focus will be U.S. policies, but policies in other countries will also be discussed. Students will develop analytical skills that will prepare them for careers in government, business or academia. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECONOM 7351 or equivalent
Recommended: AAE 9220, AAE 9230

AAE 8350: Regional Development Issues and Analysis
(same as PUB_AF 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development.
Credit Hours: 3
Prerequisites: ECONOM 7351 or PUB_AF 8190 or equivalent

</thead>
<tbody>
<tr>
<td>AAE 8410</td>
<td>Natural Resource and Environmental Economics</td>
<td>Contemporary natural resource/environmental problems; natural resource capacity, alternative economic theories, property rights, externalities, market failures, efficient use of exhaustible and renewable resources, and economics of environmental pollution.</td>
<td>3</td>
<td>instructor's consent</td>
</tr>
<tr>
<td>AAE 8430</td>
<td>International Agricultural Development Policy</td>
<td>An analytical review of economic policies directed toward stimulating agricultural development in the world's low income countries.</td>
<td>3</td>
<td>ECONOM 7351 and ECONOM 7353</td>
</tr>
<tr>
<td>AAE 8450</td>
<td>Masters Non Thesis Research</td>
<td>Independent investigation of advanced nature. Report required.</td>
<td>1-6</td>
<td></td>
</tr>
<tr>
<td>AAE 8510</td>
<td>Research Methods and Design (same as AG_ED_LD 8510, RU_SOC 8510)</td>
<td>This course will give students a foundational understanding of quantitative research methods and design in the social and behavioral sciences. The main objective is to help students identify and formulate their own research questions and develop and implement a process for answering them. Students will examine the nature of the research process, explore the connection between theory and empirical research, identify viable research topics, critique published research, learn how to structure good arguments, understand the structure of research papers and proposals, plan and manage research activities, and become familiar with research ethics. Graded on A-F basis only.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>AAE 8520</td>
<td>Economics of Transaction and Contracting</td>
<td>This course focuses on the economic incentives underlying transaction relationships and develops and implements a framework for analyzing contract documents governing various kinds of transactions.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>AAE 8610</td>
<td>Economic and Sociological Approaches to Collective Action (same as RU_SOC 8610)</td>
<td>This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.</td>
<td>3</td>
<td>AAE 7972</td>
</tr>
<tr>
<td>AAE 8860</td>
<td>International Comparative Rural Policy (same as PUB_AF 8860, NAT_R 8860)</td>
<td>Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.</td>
<td>3</td>
<td>ECONOM 8451 or ECONOM 8472; STAT 4510</td>

<tr>
<td>AAE 9220</td>
<td>Price and Market Analysis</td>
<td>Applies economic theory and quantitative methods to analyze agricultural prices and markets. Examines problem formulation, estimation, and model evaluation applied to the concepts of demand, supply, and prices.</td>
<td>3</td>
<td>ECONOM 8451 or ECONOM 8472; STAT 4510</td>
</tr>
<tr>
<td>AAE 9230</td>
<td>Welfare and Consumption Economics</td>
<td>Introduces welfare economic principles; application to problems of resource allocation. Appraises economic policies, programs; consumers' choice; measurement of consumption; living standards; household decisions and markets relation.</td>
<td>3</td>
<td>ECONOM 8451 or instructor's consent</td>
</tr>
</tbody>
</table>
AAE 9265: Food, Agricultural and Rural Policy
Application of welfare economics theory to food, agricultural and rural development policy analysis. Historical perspective and economics analysis of contemporary issues in national and international policy and institutions.

Credit Hours: 3
Prerequisites: ECONOM 7351 and AAE 9230

AAE 9510: Organizational Economics I
This course builds on transaction cost-based theories and tools to study the economic underpinnings of intra-firm organization, firm boundaries, and the structure of inter-firm transactions.

Credit Hours: 3
Prerequisites: AAE 8050

Agricultural Education and Leadership (AG_ED_LD)

AG_ED_LD 1000: Orientation to Agricultural Education and Leadership
Overview of the discipline of agricultural education including: career opportunities, certification requirements, professional development, and current issues.

Credit Hour: 1

AG_ED_LD 2220: Verbal Communication in Agriculture, Food and Natural Resources
Application of verbal communication skills used in the dissemination of information related to agriculture, food, and natural resource topics. Acquisition of interpersonal communication skills and small group, impromptu and professional presentation skills.

Credit Hours: 3
Prerequisites: Restricted to College of Agriculture, Food and Natural Resources students only during Early Registration

AG_ED_LD 2250: Introduction to Leadership
Overview of basic leadership principles and theories, including, but not limited to: personal leadership development, characteristics of effective leaders, leadership styles, ethics as a leader and leadership obstacles.

Credit Hours: 3

AG_ED_LD 2260: Team and Organizational Leadership
Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

Credit Hours: 3
Prerequisites: ECONOM 7351 and AAE 9230

AG_ED_LD 2260W: Team and Organizational Leadership - Writing Intensive
Principles and practices in planning, developing, conducting, and evaluating leadership programs for agricultural groups. The course focuses on helping students better understand themselves and others, improving group communications; becoming effective leaders and members of groups; improving leadership and personal development skills; assessing leadership situations, determining and administering appropriate leadership strategies, and evaluating results.

Credit Hours: 3

AG_ED_LD 2270: Leadership Development in Youth Organizations
This course focuses on how to develop leadership in youth through participation in a youth organization. In particular, this course explores youth development, how to develop leadership through youth organizations and their activities, and organizational structures.

Credit Hours: 3

AG_ED_LD 2271: Early Field Experience
This field experience is designed for students to explore the role of being a school-based agricultural educator. In particular, students will experience the total agricultural education program with a focus on youth organizations.

Credit Hour: 1
Prerequisites: AG_ED_LD 2270 or concurrent enrollment

AG_ED_LD 3010: Leadership in Today's World
(same as RU_SOC 3010). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

Credit Hours: 3
Recommended: RU_SOC 1000, AG_ED_LD 2250, or AG_ED_LD 2260

AG_ED_LD 3010H: Leadership in Today's World - Honors
(same as RU_SOC 3010H). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: RU_SOC 1000, AG_ED_LD 2250, or AG_ED_LD 2260

AG_ED_LD 3085: Problems in Agricultural Education and Leadership
Supervised and independent study of problems and issues in Agricultural Education and Leadership at the undergraduate level.

Credit Hour: 1-99
Prerequisites: instructor’s consent
AG_ED_LD 3320: Metal Fabrication and Laboratory Management
Application of metal fabrication skills, including cutting, bending, and welding, using a variety of processes. Operations of hand tools and power equipment used in project construction. Also includes laboratory management, instructional strategies, and assessment techniques related to secondary agriculture programs. Prerequisites: Agriculture Education Majors Only
Credit Hours: 3

AG_ED_LD 3776: Litton Leadership Scholars
The Litton Leadership Scholars class focuses on developing students as leaders. Through leadership coursework, field-based mentorship and self-reflection, students will practice and develop exemplary leadership skills. Students will have an opportunity to spend time with industry leaders, expand their personal growth boundaries and develop their unique leadership style. Students will engage in an interview process to be selected for the Litton Leadership Scholars program. Graded on A-F basis only.
Credit Hour: 1-2

AG_ED_LD 4001: Topics in Agricultural Education and Leadership
Courses on specialized topics offered on a trial basis until the course has been assigned a course number.
Credit Hour: 1-3

AG_ED_LD 4087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experiential learning and leadership development activities, managing the complete program, and professional development.
Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 4240: Leading Organizational and Community Change
(cross-leveled with AG_ED_LD 7240). This course provides the diagnostic and strategic foundations for students to enact leadership in organizational and community contexts. Designed for undergraduate students and graduate-level professionals alike, this course increases a student's capacity to lead with or without authority, and with or without a formal organizational or political position. The course is based heavily on Heifetz's Adaptive Leadership theory, which challenges individuals to think beyond individual, role-based leadership skills and behaviors when enacting change in systems, such as organizations and communities.
Credit Hours: 3
Recommended: AG_ED_LD 2250 and AG_ED_LD 2260

AG_ED_LD 4310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan, supervise, and evaluate the intracurricular components within Agricultural Education programs.
Credit Hours: 3
Prerequisites: junior standing

AG_ED_LD 4320: Methods of Teaching I
(cross-leveled with AG_ED_LD 7320). Investigations into the teaching and learning process which including lesson planning, direct instruction methods, and assessment. Enrollment limited to students accepted into Phase II of the Teacher Development Program.
Credit Hours: 3
Prerequisites: junior standing or instructor's consent

AG_ED_LD 4321: Field Experience I
A field-based experience that examines the integration of Supervised Agricultural Experience and Career Development Events into the secondary agriculture curriculum. Investigates the use of advisory committees and graduate follow-up data in curriculum planning. Graded on S/U basis only.
Credit Hour: 1
Corequisites: AG_ED_LD 4320

AG_ED_LD 4330: Methods of Teaching II
(cross-leveled with AG_ED_LD 7330). Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, assessment, and curricular design. Enrollment limited to students accepted into Phase II of Teacher Development Program.
Credit Hours: 3
Prerequisites: AG_ED_LD 4320 or instructor's consent

AG_ED_LD 4331: Field Experience II
A field-based experience that provides students with comprehensive experience directed toward learning, teaching, and assessment in secondary agriculture programs. Graded on S/U basis only.
Credit Hour: 1
Corequisites: AG_ED_LD 4330

AG_ED_LD 4340: Designing and Delivering Educational/Leadership Programs
(cross-leveled with AG_ED_LD 7340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.
Credit Hours: 3
Prerequisites: junior standing or instructor's consent

AG_ED_LD 4340H: Designing and Delivering Educational/Leadership Programs - Honors
(cross-leveled with AG_ED_LD 7340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.
Credit Hours: 3
Prerequisites: Honors eligibility required; junior standing or instructor's consent
AG_ED_LD 4993: Internship in Agricultural Education and Leadership
Field-based learning experience that combines study, observation, and employment with an agricultural business, industry or government agency in the area of education, training, and development. Individual internship plans are developed by a student, faculty supervisor, and an industry cooperator.

Credit Hour: 1-4
Prerequisites: departmental consent

AG_ED_LD 4995: Student Teaching Internship in Agriculture
A field-based learning experience that combines observation and practice in a secondary/adult agriculture program. The purpose of the internship is to provide an opportunity to apply teaching and learning concepts in a practical context.

Credit Hour: 1-12
Prerequisites: departmental consent

AG_ED_LD 7087: Internship Seminar in Agricultural Education and Leadership
Seminar focused on the problems of practice and developing skills needed for a career in teaching agriculture at the secondary level. The core of the seminar is on coordinating experimental learning and leadership development activities, managing the complete program, and professional development.

Credit Hours: 3
Corequisites: AG_ED_LD 4995

AG_ED_LD 7240: Leading Organizational and Community Change
(cross-leveled with AG_ED_LD 4240). This course provides the diagnostic and strategic foundations for students to enact leadership in organizational and community contexts. Designed for undergraduate students and graduate-level professionals alike, this course increases a student's capacity to lead with or without authority, and with or without a formal organizational or political position. The course is based heavily on Heifetz’s Adaptive Leadership theory, which challenges individuals to think beyond individual, role-based leadership skills and behaviors when enacting change in systems, such as organizations and communities.

Credit Hours: 3

AG_ED_LD 7310: Intracurricular Program Management in Agricultural Education
This course explores the philosophical foundations and current structures of secondary Agricultural Education Programs. Students will learn how to plan supervise and evaluate the intracurricular components within Agricultural Education Programs.

Credit Hours: 3

AG_ED_LD 7320: Methods of Teaching I
(cross-leveled with AG_ED_LD 7320). Investigations into the teaching and learning process which includes lesson planning, direct instruction methods, and assessment.

Credit Hours: 3
Prerequisites: acceptance into the Teacher Certification option

AG_ED_LD 7330: Methods of Teaching II
(cross-leveled with AG_ED_LD 4330) Further investigations into the teaching and learning process which includes methods beyond direct instruction, classroom and behavior management, assessment, and curricular design.

Credit Hours: 3
Prerequisites: acceptance into Teacher Certification option and AG_ED_LD 4320 or AG_ED_LD 7320

AG_ED_LD 7340: Designing and Delivering Educational/Leadership Programs
(cross-leveled with AG_ED_LD 4340). Overview of theory and practice in communicating and facilitating adult and youth training/leadership programs in communities and organizations. Including: communicating program design, methods of communicating for different contexts, marketing programs, and evaluating programs.

Credit Hours: 3
Prerequisites: AG_ED_LD 2220 or equivalent

AG_ED_LD 7350: Inservice Course in Agricultural Education and Leadership
Professional development course which focuses on enhancing the technical, administrative, or management skills of agricultural educators.

Credit Hour: 1-99

AG_ED_LD 8080: Creative Component in Agricultural Education and Leadership
Independent original work that culminates in a scholarly project, document or presentation. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor's consent

AG_ED_LD 8085: Problems in Agricultural Education and Leadership
Credit Hour: 1-99
Prerequisites: instructor's consent

AG_ED_LD 8087: Seminar in Agricultural Education and Leadership
Seminar in Agricultural Education and Leadership.

Credit Hour: 1-99

AG_ED_LD 8090: Thesis Research in Agricultural Education and Leadership
Independent research activities by a master's student that culminates in a thesis. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

AG_ED_LD 8210: History and Leadership of the Land Grant University
Historical overview of the evolution and development of land-grant colleges. Students examine early public mandates and evaluate education, research, public service developments and new initiatives needed for Land Grant universities to effectively serve society.
### Credit Hours: 2

**AG_ED_LD 8250: Leadership Theory and Application**  
Survey of concepts, theories and practices of leadership, personal development and group dynamics. Exploration of leadership traits and models with a focus upon how they apply to Agricultural Education.

### Credit Hours: 3

**AG_ED_LD 8330: Advanced Methods of Teaching**  
Explores the principles and psychological aspects of teaching and learning; teaching strategies, methods, and techniques; evaluating student learning; motivating students; and personal teacher behaviors that influence learning.

### Credit Hours: 3

**AG_ED_LD 8340: Student and Teacher Development in Agricultural Education and Leadership**  
Examines planning and supervising career exploration, experiential learning, and leadership development activities of secondary agriculture students. The professional development of the secondary agriculture teacher is also examined.

**Prerequisites:** AG_ED_LD 4310 or equivalent

**AG_ED_LD 8350: College Teaching of Agriculture, Food and Natural Resources**  
A course designed to assist current or future college faculty who wish to improve their teaching skills. Topics include theories, principles and practices associated with effective teaching and learning in higher education.

### Credit Hours: 3

**AG_ED_LD 8351: Induction Year Teaching I**  
Continuing education course for the professional development of first-year teachers of agriculture. The course focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

### Credit Hours: 1-2

**AG_ED_LD 8352: Induction Year Teaching II**  
Continuing education course for the professional development of second-year teachers of agriculture. The course is a continuation of AG_ED_LD 8351 and focuses on the pedagogical knowledge, skills, and attitudes and managerial skills needed by beginning teachers of agriculture.

**Prerequisites:** AG_ED_LD 8351

**AG_ED_LD 8410: Philosophical Foundations of Agricultural Education and Leadership**  
Overview of the history and philosophical development of agricultural education and leadership as a discipline. Philosophers, policy makers, movements, trends, and legislation that has influenced agricultural education. Current issues and future trends impacting the field. Graded on A-F basis only.

**Prerequisites:** instructor's consent and AG_ED_LD 8330 or AG_ED_LD 8350

**AG_ED_LD 8430: Evaluation of Educational Programs**  
(Same as RU_SOC 8430). Examines program evaluation concepts, principles, and models; and identifies major steps in planning, conducting, and reporting results of evaluation objects.

### Credit Hours: 3

**AG_ED_LD 8510: Research Methods and Design**  
(Same as RU_SOC 8510, AAE 8510). This course will give students a foundational understanding of qualitative research methods and design in the social and behavioral sciences. The main objective is to help students identify and formulate their own research questions and develop and implement a process for answering them. Students will examine the nature of the research process, explore the connection between theory and empirical research, identify viable research topics, critique published research, learn how to structure good arguments, understand the structure of research papers and proposals, plan and manage research activities, and become familiar with research ethics. Graded on A-F basis only.

### Credit Hours: 3

**AG_ED_LD 8530: Grant Proposal Writing**  
Preparation of proposals designed to solicit grant funding to support teaching, research or outreach programs. Emphasis on proposal development, identifying funding sources, and proposal review processes.

### Credit Hours: 2

**AG_ED_LD 8540: Methods of Qualitative Research**  
(Same as RU_SOC 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.

### Credit Hours: 3

**AG_ED_LD 8995: College Teaching Practicum**  
Learning experience that combines the study, observation, and practice of teaching university-level courses in food, agriculture and/or natural resources under the supervision of teaching mentors. Graded on S/U basis only.

**Prerequisites:** instructor's consent and AG_ED_LD 8330 or AG_ED_LD 8350

**AG_ED_LD 9090: Doctoral Research in Agricultural Education and Leadership**  
Independent research activities by a doctoral student that culminates in a dissertation or other scholarly work. Graded on S/U basis only.

**Credit Hours: 1-99**

**Prerequisites:** instructor's consent

**AG_ED_LD 9410: Foundations and Practices of Teacher Education**  
Foundations and practices of teacher preparation programs including student selection and advisement, licensure requirements, accreditation, curriculum, clinical and field experiences, supervision, evaluation and research.

**AG_ED_LD 9510: Data Collection, Analysis and Interpretation**
A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.

**AG_S_M 1020: Introduction to Agricultural Systems Management**
Introductory course that acquaints students with the general technical areas of Agricultural Systems Management. A systematic problem-solving approach is applied to problems derived from each of the technical areas within Agricultural Systems Management.

**AG_S_M 1040: Physical Principles for Agricultural Applications**
Introductory survey course to help students: formulate problems; understand units/accuracy; learn basic definitions; understand simple machines, power transmission, fluid statics, electricity, heat-flow, and temperature/moisture relationships.

**AG_S_M 2007: Topics in Agricultural Systems Management - Physical**
Current and new technical developments in agricultural systems management.

**AG_S_M 2199: Seminar in Professional Development**
This course is taught once a year in the Spring semester. The course explores the concept of what it means to be a professional in the field of Agricultural Systems Management. The course includes aspects of what it means to be a professional, such as resume writing, interviewing, finding a job, and building one’s career. A second major aspect of the course is to explore the field of Agricultural Systems Management to gain a better understanding of various potential career paths available to students in Agricultural Systems Management. Graded on A-F basis only.

**AG_S_M 2220: Agricultural/Industrial Structures**
A building science course looking at construction materials, structural component selection, ventilation, moisture control and energy use. Math reasoning proficiency course.

**AG_S_M 2320: Internal Combustion Power**
Basic internal combustion engine principles, mechanisms, combustion cycles, fuels, fuel injection, electrical systems, engine testing.

**AG_S_M 2340: Pesticide Application Equipment**
Principles of pesticide application; sprayer hydraulics and spray atomization; calibration, mixing calculations and compatibility of tank mixes; personal and environmental protection; pesticide labels and regulations. Students earn their private applicators license.

**AG_S_M 2345: Chemical Application Systems**
Systems, components and operation practices used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for minimizing drift, system calibration, recommended maintenance, and off-season storage procedures.

**AG_S_M 2360: Fluid Power**
Basic power hydraulic theory. Hydraulic systems, components and circuits. Math reasoning proficiency course.

**AG_S_M 3350: Problems in Agricultural Systems Management**
Supervised independent study at the undergraduate level.

**AG_S_M 4020: Agricultural Safety and Health**
(cross-leveled with AG_S_M 7020). Analysis, organization and implementation of agriculture safety, and health programs. Physical and economic impact of accidents, standards and liabilities. Role of man in the man-machine system.
AG_S_M 4025: Principles of Injury Prevention
Basic foundations of injury causation and prevention in home, motor vehicle, public and work environments. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior or Senior standing or Instructor's consent required
Recommended: ENGLISH 1000, MATH 1100

AG_S_M 4030: Legal Aspects of Occupational Safety and Health
A review of the common legal issues facing safety practitioners in the workplace. Includes OSHA, EPA and DOT regulations; workers' compensation, as well as common liability issues. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: junior or senior standing or instructor's consent
Recommended: ENGLISH 1000, MATH 1100

AG_S_M 4035: Occupational Safety Management
Introduction to occupational safety and health administration and management. Focus on development and management of safety programs and obtaining employee involvement in occupational safety programs. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Junior or Senior standing or Instructor's consent
Recommended: ENGLISH 1000, MATH 1100

AG_S_M 4040: Fire Protection and Prevention
An overview of the current problems and technology in the fields of fire protection and fire prevention, with emphasis on industrial needs, focusing on the individual with industrial safety responsibilities. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent
Recommended: ENGLISH 1000, MATH 1100

AG_S_M 4045: Occupational Safety
Identifies safety and health risks in industrial work environments. Focus on how managers and supervisors meet their responsibilities for providing a safe workplace for their employees. Includes the identification and remediation of workplace hazards. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior or Senior standing or Instructor's consent
Recommended: ENGLISH 1000, MATH 1100

AG_S_M 4140: Electricity: Wiring and Equipment
(cross-leveled with AG_S_M 7140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3
Prerequisites: MATH 1100
Recommended: AG_S_M 1040

AG_S_M 4150: Biorenewable Systems Technology
Converting biorenewable resources into bioenergy and biobased products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation and logistics, and marketing.

Credit Hours: 3
Prerequisites: MATH 1100, CHEM 1100 and AG_EC 1041

AG_S_M 4160: Internet of Things for Precision Agriculture Technology
Introduction to basic concepts and applications of Internet of Things (IoT) technology in agriculture, and its impacts on farming and agricultural industry. Show-case of typical IoT systems used in farms, on farm equipment and in cloud. Hands on experience on essential IoT components, including hardware (wireless sensors, controllers, computers and network devices) and software.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040
Recommended: AG_S_M 4140, BIOL_EN 4380

AG_S_M 4220: Material Handling and Conditioning
(cross-leveled with AG_S_M 7220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk material.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040 and junior standing

AG_S_M 4225: Preservation of Grain Quality
Principles and management for grain quality preservation. Grain drying and grain storage. Psychrometrics. Fan and airflow. Grain handling methods and system planning. Grain quality measurement and end-use value analysis.

Credit Hours: 2
Prerequisites: MATH 1100. Recommended AG_S_M 1040 and AG_S_M 4220

AG_S_M 4320: Agricultural Equipment and Machinery
(cross-leveled with AG_S_M 7320). Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040 or PHYSICS 1210

AG_S_M 4330: Principles for Food Processing
(same as F_S 4330; cross-leveled with AG_S_M 7330, F_S 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy and material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.

Credit Hours: 3
Prerequisites: MATH 1100, AG_S_M 1040 or PHYSICS 1210

AG_S_M 4350: Problems in Agricultural Systems Management
Supervised independent study at the undergraduate level.

Credit Hour: 1-5
Prerequisites: instructor's consent
AG_S_M 4360: Precision Agriculture Science and Technology
(same as PLNT_S 4360, SOIL 4360; cross-leveled with AG_S_M 7360, PLNT_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3
Prerequisites: PLNT_S 2100 or SOIL 2100, or PLNT_S 2110

AG_S_M 4365: Machinery Management Using Precision Agriculture Technology
(cross-leveled with AG_S_M 7365). Planters, combines, fertilizer application equipment, and sprayer management along with GPS technologies are the focus of the course. One will learn how to manage these tools efficiently and accurately. Valuable precision agriculture management skills emphasized.

Credit Hours: 3
Prerequisites: MATH 1100
Recommended: AG_S_M 1040, and AG_S_M 4360 or PLNT_S 4360 or SOIL 4360

AG_S_M 4366: Data Management and Analysis Using Precision Agriculture Technology
(cross-leveled with AG_S_M 7366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1100; AG_S_M 1040 and AG_S_M 4360 or PLNT_S 4360 or SOIL 4360
Recommended: STAT 1200 or instructor consent

AG_S_M 4368: Profit Strategies Using Precision Agriculture Technology
(cross-leveled with AG_S_M 7368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1100; AG_S_M 1040; AG_S_M 4360 or PLNT_S 4360 or SOIL 4360 or instructor consent
Recommended: STAT 1200

AG_S_M 4390: Optimization and Management of Food and Agricultural Systems
(same as F_S 4390, HSP_MGMT 4390; cross-leveled with AG_S_M 7390, F_S 7390, HSP_MNGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function. Recommended AG_S_M 1040

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 4420: Surface Water Management
(cross-leveled with AG_S_M 7420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3
Prerequisites: MATH 1100; AG_S_M 1040

AG_S_M 4460: Irrigation and Drainage
(cross-leveled with AG_S_M 7460). Soil, water, plant relationships. Selection and layout of irrigation and drainage systems. Recommended: AG_S_M 1040

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 4490: Agricultural Systems Management Internship
Combines study, observation, and employment with industry or government agency in an area of Agricultural Systems Management. A special problem / learning experience is selected by internship company representative, faculty problem advisor and student. Written and oral reports evaluated by faculty.

Credit Hour: 2-5
Prerequisites: Instructor's consent
Recommended: Sophomore standing and minor or major in Agricultural Systems Management

AG_S_M 4970: Agricultural Systems Management - Capstone
Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.

Credit Hours: 3
Prerequisites: Senior Standing

AG_S_M 4970W: Agricultural Systems Management - Capstone - Writing Intensive
Capstone course required of Agricultural Systems Management majors. Team project involving extensive use of the students education, oral presentations and comprehensive written reports are required. Class experiences include but may not be limited to system selection and comparison, replacement and operating cost calculations, life cycle costing, and business feasibility analysis.
**Prerequisites:** AG_S_M 1040 and Senior Standing

**AG_S_M 7001: Topics in Agricultural Systems Management**
Initial offering of a course in a specific subject matter area related to Agricultural Systems Management. The course is offered when proposed by a faculty member in that area of expertise.

Credit Hours: 3

**AG_S_M 7020: Agricultural Safety and Health**
(cross-leveled with AG_S_M 4020). Analysis, organization and implementation of agriculture safety and health programs. Physical and economic impacts of accidents, standards and liabilities. Role of man in the man-machine system.

Credit Hours: 3

**AG_S_M 7085: Problems in Agricultural Systems Management**
 Supervised individual study at the graduate level.

Credit Hour: 1-99

**AG_S_M 7140: Electricity: Wiring and Equipment**
(cross-leveled with AG_S_M 4140). Home and agricultural electricity; emphasis on proper selection and use of electrical wiring materials and equipment. Basic electrical theory.

Credit Hours: 3

**AG_S_M 7220: Material Handling and Conditioning**
(cross-leveled with AG_S_M 4220). Principles required for processing and handling food and feed materials; selection of machines; analysis and development of systems for processing and handling grain and bulk materials.

Credit Hours: 3

**AG_S_M 7320: Agricultural Equipment and Machinery**
(cross-leveled with AG_S_M 4320). Operation of agricultural machinery. Selection and management of equipment.

Credit Hours: 3

**AG_S_M 7360: Precision Agriculture Science and Technology**
(same as PLNT_S 7360 and SOIL 7360; cross-leveled with AG_S_M 4360, PLNT_S 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3

**AG_S_M 7365: Machinery Management Using Precision Agriculture Technology**
(cross-leveled with AG_S_M 4365). This course focuses on agricultural equipment that is commonly used in conjunction with GPS technology. Planters, combines, fertilizer application equipment and sprayer application equipment are commonly equipped with GPS equipment to control and record operational parameters. These parameters focus around the equipment's geographic location and can be recorded simultaneously with the volume of product applied and weather information (wind, temperature, humidity, etc.). GPS guidance is one of the main technologies to be studied throughout this course. The management of this equipment and the GPS technologies used to control and record this information is the focus of the course.

Credit Hours: 3

**Recommended:** AG_S_M 1040, and AG_S_M 4360 or PLNT_S 4360 or SOIL 4360

**AG_S_M 7366: Data Management and Analysis Using Precision Agriculture Technology**
(cross-leveled with AG_S_M 4366). Course begins with a section on how to minimize errors while collecting spatial datasets. Datasets may include yield data, soil chemical and physical properties with real-time sensors, and soil nutrient data from grids or management zones. The course then continues with a section regarding data analytical techniques such as interpolation. The second half of the course will focus on writing prescriptions based on actual data obtained from industry leader experts. This portion of the course will integrate industry experts as well as hardware/software tools. Graded on A-F basis only.

Credit Hours: 3

**Recommended:** STAT 1200 or instructor consent

**AG_S_M 7368: Profit Strategies Using Precision Agriculture Technology**
(cross-leveled with AG_S_M 4368). Course begins with section on how Precision Agriculture Technology can be used to benefit a farm's financial sustainability. Discussion of various types of farm operations and currently available Precision Agriculture Technology that is already developed and in use will be examined. The course continues by considering cost factors that create barriers for farm operators to adopt Precision Agriculture. The second half of the course will focus on developing a plan to implement various technologies into an existing farm operation and draft a business plan for cost, equipment, and transition the farm into using the following types of technologies, GPS, GIS, VRA, RS, RTK and other types of tracking and monitoring systems. Graded on A-F basis only.

Credit Hours: 3

**Recommended:** STAT 1200

**AG_S_M 7370: In-Service Course Agriculture Systems Management-Farm Power and Machinery**
A. Farm Power and Machinery B. Farm Buildings and Conveniences C. Soil and Water Management D. Rural Electrification and Processing E. Agricultural Construction and Maintenance Basic principles relating to
agricultural systems management. Applies principles and subject matter in successful classroom presentation at the high school level.

Credit Hour: 1-8
Prerequisites: 10 credits from Agricultural Systems Management courses; a B.S. degree in Agriculture or instructor's consent

AG_S_M 7390: Optimization and Management of Food and Agriculture Systems
(same as F_S 7390, HSP_MGMT 7390; cross-leveled with AG_S_M 4390, F_S 4390, HSP_MGMT 4390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3
Prerequisites: instructor's consent

AG_S_M 7420: Surface Water Management
(cross-leveled with AG_S_M 4420). Topics include hydrology; soil erosion precautions; elementary surveying; selection and layout of ponds, terraces and water control structures.

Credit Hours: 3
Prerequisites: MATH 1100; AG_S_M 1040

AG_S_M 7440: Water Quality and Pollution Control
(cross-leveled with AG_S_M 4440). Applies scientific principles to a variety of water quality problems arising from activities associated with nonpoint pollution, agricultural chemicals, land disposal of wastes, on-site sewage disposal and individual drinking water systems.

Credit Hours: 3
Prerequisites: MATH 1100

AG_S_M 7460: Irrigation and Drainage
(cross-leveled with AG_S_M 4460). Soil, water, plant relationships. Selection and layout of irrigation and drainage systems.

Credit Hours: 3
Prerequisites: AG_S_M 4420 or instructor's consent

AG_S_M 8085: Problems in Agricultural Systems Management
Supervised individual study at the graduate level.

Credit Hours: 3

AG_S_M 8090: Thesis Research in Agricultural Systems Management
Independent investigation to be presented as a thesis. Graded on a S/U basis only.

Credit Hour: 1-99

AG_S_M 8340: Agricultural Mechanization Systems

Credit Hours: 3

AG_S_M 8360: Internet of Things for Precision Agriculture Technology
Wireless sensor network and communication technologies of precision agriculture systems (tractors, sprayers, combines, trucks, and field equipment) establishing real time cloud synchronization of data. Evaluation of big data (spatial, economics, environmental, imagery) and how statistical tools can be used to analyze this information.

Credit Hours: 3
Prerequisites: AG_S_M 4360, AG_S_M 7360

Ancient Mediterranean Studies (AMS)

AMS 1005: Undergraduate Topics in Ancient Mediterranean Studies - Humanities
Special studies in Ancient Mediterranean Studies.

Credit Hour: 1

AMS 1050: Greek and Latin in English
A survey of the influence of Greek and Latin upon English literary, scientific, technical, legal and medical vocabulary. Emphasis is upon building competency with complex English words while studying the cultural influence of the classical languages on modern vocabulary.

Credit Hours: 3

AMS 1060: Classical Mythology
Myths of Greece and Rome in literature and art.

Credit Hours: 3

AMS 1060H: Classical Mythology - Honors
Myths of Greece and Rome in literature and art.

Credit Hours: 3
Prerequisites: Honors eligibility required

AMS 1060HW: Classical Mythology - Honors/Writing Intensive
Myths of Greece and Rome in literature and art.

Credit Hours: 3
Prerequisites: Honors eligibility required

AMS 1060W: Classical Mythology - Writing Intensive
Myths of Greece and Rome in literature and art.

Credit Hours: 3

AMS 1105: Undergraduate Topics in Ancient Mediterranean Studies - Humanities
Special studies in Ancient Mediterranean Studies.

Credit Hours: 3

AMS 2005: Topics in Ancient Mediterranean Studies - Humanities
Study of special topics in Ancient Mediterranean Studies.

Credit Hour: 1-3
AMS 2005H: Topics in Classical Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: Honors eligibility required

AMS 2050: Comparative History of Greece and Rome I
This comparative survey explores the ancient Mediterranean world of Greece and Rome from the age of Homer to the eve of the crisis of the Roman Republic. Topics include the rise of the city-state in Greece and Italy, the formation of democratic and republican constitutions, Greek and Roman imperialism, the Persian and Hannibalic wars, women and the family, slavery and the economy, the formation and context of literary production, and architecture and the ancient city-scape.
Credit Hours: 3

AMS 2060: Comparative History of Greece and Rome II
This comparative survey explores the ancient Mediterranean world of Greece and Rome from the crisis of the Roman Republic (1c BCE) to the eve of the post-Roman Mediterranean (6c CE). Topics include the collapse of the Roman Republic and transition to the Augustan principate, the administrative and economic foundations of the Pax Romana (1-2c CE), the vitality of Greek culture and literature under Roman rule, the imperial army, the family and slavery, Judaism and Christianity, and the transformation of the Roman world into its medieval and Byzantine successors.
Credit Hours: 3

AMS 2100: Greek Culture
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.
Credit Hours: 3

AMS 2100H: Greek Culture - Honors
Survey of Greek life and thought. Principal developments in literature, the arts, politics, religion and philosophy, and their influence on Western civilization.
Credit Hours: 3
Prerequisites: Honors eligibility required

AMS 2200: Roman Culture
Survey of Roman life and thought. Principal developments in literature, the arts, politics, religion, philosophy, and private life, and their influence on Western Civilization.
Credit Hours: 3

AMS 2230: Introduction to the Arts of Islam
Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.
Credit Hours: 3

AMS 2230W: Introduction to the Arts of Islam - Writing Intensive
Architecture, decorative arts and painting of the Muslim world from the seventh to the 19th century. The formation of Islamic art and its relationships with religion, philosophy and symbolism.
Credit Hours: 3

AMS 2250: The Origins of Music in the Ancient World
Explores the use of music in the earliest historical societies, from the earliest evidence up to the fall of the Roman empire. Topics will include the history of musical instruments, the earliest scores, the development of music theory, the origins of melody, rhythm, and harmony, and the relationship between music, politics, and religion. Graded on A-F basis only.
Credit Hours: 3

AMS 2260: Media and Communication in Ancient Greece and Rome
An introduction to communications media in ancient Greece and Rome, from the invention of the alphabet to the fall of the Roman empire. Special attention will be paid to the material bases for communication, the social uses of information, and the relationship between communications technology and political power.
Credit Hours: 3

AMS 2275: The World of Pompeii
An exploration of various facets of ancient urban and rural life in the Roman world through the exceptionally well-preserved archaeological remains found in and around Pompeii.
Credit Hours: 3

AMS 2300: Greek Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Greek World.
Credit Hours: 3

AMS 2300H: Greek Classics in Translation
Credit Hours: 3
Prerequisites: Honors eligibility required

AMS 2400: Roman Classics in Translation
Reading in translation and critical study of the most important literary works of the ancient Roman world.
Credit Hours: 3

AMS 2410: Ancient Technology
Engineering, architecture, and military technology in the ancient world.
Credit Hours: 3

AMS 2450: The World of Pompeii
An exploration of various facets of ancient urban and rural life in the Roman world through the exceptionally well-preserved archaeological remains found in and around Pompeii.
Credit Hours: 3

AMS 2500: The Origins of Music in the Ancient World
Explores the use of music in the earliest historical societies, from the earliest evidence up to the fall of the Roman empire. Topics will include the history of musical instruments, the earliest scores, the development of music theory, the origins of melody, rhythm, and harmony, and the relationship between music, politics, and religion. Graded on A-F basis only.
Credit Hours: 3

AMS 2600: Media and Communication in Ancient Greece and Rome
An introduction to communications media in ancient Greece and Rome, from the invention of the alphabet to the fall of the Roman empire. Special attention will be paid to the material bases for communication, the social uses of information, and the relationship between communications technology and political power.
Credit Hours: 3

AMS 2650H: Achilles in Vietnam - Honors
This class compares the depiction of warfare in Homer's Iliad with experiences of the U.S. combat soldier in Vietnam. By studying essential
selections from Homer's epic alongside accounts of the Vietnam War from the soldiers who fought in it, students will gain an understanding of how the uniquely difficult circumstances of the Vietnam War were damaging to those who served in the front lines of this conflict. Students will also study the significance of race and class divisions in the conflict both at home and overseas and how the Vietnam War is portrayed in film, literature and television.

Credit Hours: 3  
Prerequisites: Honors Eligibility required  
Recommended: AMS 1060

AMS 2940: Service Learning in Classical Studies  
Students provide enrichment programming on the Ancient World at various Columbia Public School sites. Participants must be Classical Studies majors or minors. Graded on A/F basis only. Does not meet Arts and Science general education requirements.

Credit Hour: 1  
Prerequisites: instructor's consent required

AMS 3000: Foreigners and Dangerous Women in Greek and Latin Literature  
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3  
Recommended: CL_HUM 1060

AMS 3000H: Foreigners and Dangerous Women in Greek and Latin Literature - Honors  
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3  
Prerequisites: Honors eligibility required  
Recommended: CL_HUM 1060

AMS 3000W: Foreigners and Dangerous Women in Greek and Latin Literature - Writing Intensive  
(same as PEA_ST 3130). The study of how Greek and Roman writers depicted and reacted to other races and cultures, compared them with their own, and thereby revealed their own values and prejudices.

Credit Hours: 3  
Recommended: CL_HUM 1060

AMS 3005: Topics in Ancient Mediterranean Studies - Humanities  
Selected studies in various facets of Ancient Mediterranean Studies.

Credit Hour: 1-3

AMS 3005H: Topics in Classical Humanities - Honors  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99  
Prerequisites: Honors eligibility required  
Recommended: AMS 1060

AMS 3005W: Topics in Classical Humanities - Writing Intensive  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99  
Recommended: AMS 1060

AMS 3025: Ancient Western Philosophy  
(same as PHIL 3000). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.

Credit Hours: 3  
Recommended: AMS 1060

AMS 3050H: Philosophy Before Socrates - Honors  
A study of the origin of philosophical thinking in the Ancient Greek world. Topics to be explored include the nature of reality and our knowledge of it, the structure and constituents of the cosmos, human excellence and its relation to morality, political power, and happiness.

Credit Hours: 3  
Prerequisites: Honors eligibility required  
Recommended: AMS 1060

AMS 3100: The Age of Pericles  
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3  
Recommended: AMS 1060

AMS 3100H: The Age of Pericles - Honors  
A study of the literature and culture of the 5th and early 4th centuries B.C. in Athens. Authors will include Thucydides, Herodotus, Xenophon, Plato, Aristotle, the tragedians and Aristophanes.

Credit Hours: 3  
Prerequisites: Honors eligibility required  
Recommended: AMS 1060

AMS 3120: Art and Gender in Antiquity  
Comparative survey of Egypt, Greece, and Rome, focusing on gender construction and cultural perception through material resources.

Credit Hours: 3

AMS 3150: The Age of Augustus  
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3  
Recommended: AMS 1060

AMS 3150H: The Age of Augustus - Honors  
Study of the literature of the Age of Augustus; Vergil, Ovid, Horace, Livy, and Propertius.

Credit Hours: 3  
Prerequisites: Honors eligibility required
**Recommended:** AMS 1060

**AMS 3210: Near Eastern and Egyptian Art and Archaeology**  
General survey of material culture of the Near East and Egypt from the earliest times to the early Iron Age.  
**Credit Hours:** 3  
**Recommended:** VS_ARH 1110 or equivalent

**AMS 3225: Roman Comedy, Wit and Humor**  
Study of works illustrating the comedy, wit and humor of the Romans: readings in comedies of Plautus and Terence, Catullus, Ovid's Metamorphoses, Petronius' Satyricon, Martial, Juvenal and Macrobius.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3250: Greek and Roman Epic**  
A study of the major representatives of the ancient epic genre. Readings will include Homer's Iliad and Odyssey, Apollonius' Argonautica, Vergil's Aeneid.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3250H: Greek and Roman Epic - Honors**  
A study of the major representatives of the ancient epic genre. Readings will include Homer's Iliad and Odyssey, Apollonius' Argonautica, Vergil's Aeneid.  
**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required  
**Recommended:** AMS 1060

**AMS 3300: Greek Drama**  
Reading and interpretation of Greek tragedies and comedies in translation.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3310: Greek Art and Archaeology**  
General survey of material culture in Greece from earliest times to the Hellenistic period.  
**Credit Hours:** 3  
**Recommended:** VS_ARH 1110 or equivalent

**AMS 3350: Advanced Mythology**  
Interpretation of selected classical myths and their influence on later literature and art.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3350H: Advanced Mythology - Honors**  
Interpretation of selected classical myths and their influence on later literature and art.  
**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required  
**Recommended:** AMS 1060

**AMS 3400: Murder and Mayhem: Images of Justice in Classical Antiquity**  
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3400W: Murder and Mayhem: Images of Justice in Classical Antiquity - Writing Intensive**  
Ideas of justice from Homer through the early Roman Empire; personal vengeance, law courts and trials, philosophical attitudes, women and courts, techniques of persuasion.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3410: Roman Art and Archaeology**  
General survey of material culture in the Roman world from earliest times through the 3rd century.  
**Credit Hours:** 3  
**Recommended:** VS_ARH 1110 or equivalent

**AMS 3450: Greek and Roman Characters and Ideals**  
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.  
**Credit Hours:** 3  
**Recommended:** AMS 1060

**AMS 3450H: Greek and Roman Characters and Ideals - Honors**  
Study of selected types of characters admired and imitated or hated and rejected in classical antiquity; heroes, philosophers, women.  
**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required  
**Recommended:** AMS 1060

**AMS 3510: Byzantine and Islamic Art and Archaeology**  
General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.  
**Credit Hours:** 3  
**Recommended:** VS_ARH 1110 or equivalent

**AMS 3510W: Byzantine and Islamic Art and Archaeology - Writing Intensive**  
General survey of the visual world of the Middle Ages in southwest Asia and the east Mediterranean, from late antiquity through the rise of the Ottoman empire.  
**Credit Hours:** 3  
**Recommended:** VS_ARH 1110 or equivalent
AMS 3520: Early Medieval Art and Archaeology
An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

Credit Hours: 3
Recommended: VS_ARH 1110 or equivalent

AMS 3520W: Early Medieval Art and Archaeology - Writing Intensive
An investigation of the arts of western Europe during the first millennium, when the unifying traditions of Rome were transformed by the diverse cultures of her Northern neighbors.

Credit Hours: 3
Recommended: VS_ARH 1110 or equivalent

AMS 3550: War and Democracy in Late 5th c. BCE Athens (same as PEA_ST 3550).
Explores the discourse on war and peace in Athenian texts and art that survives from the last quarter of the 5th century B.C.E. This was a period of relentless warfare: the Athenians were fighting the Spartans, Sparta's allies, unaligned cities and several of their own subject states.

Credit Hours: 3
Recommended: AMS 1060

AMS 3600: The Ancient Novel
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3
Recommended: AMS 1060

AMS 3600H: The Ancient Novel - Honors
Reading and analysis of Greek and Latin prose fiction: ideal and comic romance, fantasy, romantic biography; Hellenistic background.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060

AMS 3650: Paganism and Christianity
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3
Recommended: AMS 1060

AMS 3650W: Paganism and Christianity - Writing Intensive
A study of the transition from Paganism to Christianity in the Roman Empire, as seen by observers contemporary with the events.

Credit Hours: 3
Recommended: AMS 1060

AMS 3700: Women in the Ancient World
Using classical literary texts as the central focus this course examines the role of women; the conflict inherent in their obligations and their identity in the context of these obligations.

Credit Hours: 3
Recommended: AMS 1060

AMS 3750: Classics in a Cross-Cultural Context
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3
Recommended: AMS 1060

AMS 3750H: Classics in a Cross-Cultural Context - Honors
The goal of this course is to place classical literature in a multicultural context by studying Greek and Latin literary texts alongside verbal art from non-European as well as European cultures.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060

AMS 3800: Sports and Spectacles in Greco-Roman Antiquity
Investigates athletic display in ancient Greek and Roman culture, from its earliest representations in Greek literature to the massive spectacles of the Roman empire, with an emphasis on the intersections between sport and spectacle and other areas of ancient cultural life.

Credit Hours: 3
Prerequisites: AMS 1060 or instructor's consent required

AMS 4005: Topics in Classical Humanities
Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Recommended: AMS 1060 and junior standing

AMS 4100: Greece: From the Bronze Age to the Byzantine Empire
Study abroad in Greece, in conjunction with the MU International Center. Immersion in the physical and intellectual heritage of ancient Greece; emphasis on cross-disciplinary, on-site learning and the intersections among ancient, Byzantine, and modern Greece. Application required. Graded on A/F basis only.
AMS 4000: Ancient Pastoral
(cross-leveled with AMS 7400). Reading and interpretation of pastoral poetry and prose in Greek and Latin; emphasis on Theocritus, Virgil, and Longus.

Credit Hours: 3
Recommended: GREEK 4300 and LATIN 4300

AMS 4020: Minor Arts of Antiquity
(cross-leveled with AMS 7420). Discussion of selected minor arts and crafts of the Greco-Roman world.

Credit Hours: 3
Prerequisites: instructor's consent

AMS 4440: Roman Architecture
(cross-leveled with AMS 7440). The history of Roman architecture, origin and development of forms and techniques, major monuments in Rome and its provinces through the 3rd century after Christ.

Credit Hours: 3
Prerequisites: instructor's consent

AMS 4460: Roman Sculpture
(cross-leveled with AMS 7460). The origins and development of sculpture in the Roman Republic and the Roman Empire.

Credit Hours: 3
Prerequisites: instructor's consent

AMS 4490: Late Antique Art and Archaeology
(cross-leveled with AMS 7490). Exploration of the material culture of the Mediterranean world from the 3rd century to Iconoclasm.

Credit Hours: 3
Prerequisites: instructor's consent

AMS 4500: Greek and Roman Religion
(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4500H: Greek and Roman Religion - Honors
(same as REL_ST 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060 and junior standing

AMS 4510: Byzantine Art and Archaeology
(cross-leveled with AMS 7510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.

Credit Hours: 3
Prerequisites: instructor's consent

AMS 4520: Art and Archaeology of Early Medieval Europe
(cross-leveled with AMS 7520). Exploration of the material culture of western Europe from the 5th century to c. 1000.
Credit Hours: 3
Prerequisites: instructor's consent

AMS 4550: Literature and Culture of the Hellenistic Age (cross-leveled with AMS 7550). A survey of the literature and culture of the Hellenistic Age.
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4550H: Literature and Culture of the Hellenistic Age - Honors
A survey of the literature and culture of the Hellenistic Age.
Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060 and junior standing

AMS 4600: The Classical Tradition (cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4600H: The Classical Tradition - Honors (cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.
Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060 and junior standing

AMS 4600HW: The Classical Tradition - Honors/Writing Intensive (cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4600W: The Classical Tradition - Writing Intensive (cross-leveled with AMS 7600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times.
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4650: The World of Late Antiquity (cross-leveled with AMS 7650). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.
Credit Hours: 3
Prerequisites: instructor's consent

AMS 4650H: The World of Late Antiquity - Honors
A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.
Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060 and junior standing

AMS 4700: Advanced Study in the Teaching of the Classics
Credit Hours: 3
Prerequisites: instructor's consent

AMS 4770: Oral Tradition
Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4770H: Oral Tradition - Honors
Study of verbal art from living oral traditions (e.g. Native American and African American) and important literary works with roots in oral tradition (e.g. the Bible, the Iliad and Odyssey, and Beowulf).
Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: AMS 1060 and junior standing

AMS 4800: Political Thought in Classical and Christian Antiquity (same as POL_SC 4800, CNST_DEM 4800; cross-leveled with AMS 7800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations.
Credit Hours: 3
Recommended: AMS 1060 and junior standing

AMS 4960: Special Readings in Ancient Mediterranean Studies
Independent readings and research selected in consultation with supervisory faculty.
Credit Hour: 1-3
Prerequisites: instructor's consent

AMS 4970: Capstone: Ancient Mediterranean Studies
Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.
Credit Hour: 1
Prerequisites: instructor's consent

AMS 4970H: Capstone in Ancient Mediterranean Studies
Culminating course in the study of Greek and Roman literature and Classical culture. Required for Greek, Latin, and Classical Languages majors in first term of senior year. Recommended for double-majors.

Prerequisites: 2 years of Classical Languages or equivalent
AMS 7510: Byzantine Art and Archaeology
(cross-leveled with AMS 4510). Exploration of the material culture of the east Mediterranean between the 6th and 15th centuries.
Credit Hours: 3
Prerequisites: instructor's consent

AMS 7520: Art and Archaeology of Early Medieval Europe
(cross-leveled with AMS 4520). Exploration of the material culture of western Europe from the 5th century to c. 1000.
Credit Hours: 3
Prerequisites: instructor's consent

AMS 7550: Literature and Culture of the Hellenistic Age
(cross-leveled with AMS 4550). A survey of the literature and culture of the Hellenistic Age. Graded on A-F basis only.
Credit Hours: 3

AMS 7600: The Classical Tradition
(cross-leveled with AMS 4600). Selected studies in continuity and influence of Greek and Roman culture on Middle Ages, Renaissance, and modern times. Graded on A-F basis only.
Credit Hours: 3

AMS 7650: The World of Late Antiquity
(cross-leveled with AMS 4650). A survey of the literature, culture, and history of the late Roman and early Byzantine periods. Attention to Christianity's development and the transformation of the classical heritage.
Credit Hours: 3

AMS 7700: Advanced Study in the Teaching of the Classics
Credit Hours: 3
Prerequisites: classroom teaching experience or chairman's consent

AMS 7800: Political Thought in Classical and Christian Antiquity
(cross-leveled with POL_SC 4800, AMS 4800, CNST_DEM 4800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations. Graded on A-F basis only.
Credit Hours: 3

AMS 7940: Archaeological Methods
(cross-leveled with AMS 4940). Methods of excavating various types of sites; recording, preserving their materials.
Credit Hour: 2-6
Prerequisites: instructor's consent

AMS 7960: Special Readings in Classical Studies
Readings in authors and texts not covered in other courses.
Credit Hour: 1-3

Prerequisites: instructor's consent

AMS 8080: Readings for MA Thesis in Ancient Mediterranean Studies
Reading, critical evaluation of literature of special fields of art history and/or archaeology.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 8085: Directed Readings in Ancient Mediterranean Studies
For graduate students to undertake special projects for graduate credit under the supervision of faculty.
Credit Hours: 3

AMS 8090: Master's Thesis Research and Thesis
Individual research leading to preparation of the M.A. thesis Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 8320: Seminar in Greek Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 8420: Seminar in Roman Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 8440: Ancient/Medieval Topography
Descriptive and historical analysis of a selected city or site. Subject varies.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 8490: Seminar in Late Antique Art and Archaeology
Special subjects of study assigned for individual research; discussion of reports by seminar members.
Credit Hours: 3
Prerequisites: AMS 7490 or equivalent

AMS 9080: Readings for PhD Dissertation in Ancient Mediterranean Studies
Reading, critical evaluation of literature of special fields of Ancient Mediterranean Studies.
Credit Hour: 1-99
Prerequisites: instructor's consent
AMS 9090: Doctoral Dissertation Research in Ancient Mediterranean Studies
Individual research leading to preparation of the Ph.D. dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

AMS 9187: Seminar in Classical Mythology
Intensive study of classical mythology in origin, development, meaning and influence.
Credit Hours: 3
Prerequisites: instructor's consent

AMS 9387: Seminar in Ancient Rhetoric and Oratory
Seminar in Ancient Rhetoric and Oratory
Credit Hours: 3

AMS 9487: Seminar in Ancient Literary Criticism
Principles and theories of ancient Greek and Latin literary criticism, as developed in significant works on the subject.
Credit Hours: 3

AMS 9587: Greco-Roman Didactic
Critical and comparative study of Greek and Latin didactic poetry with emphasis on major authors from Hesiod through the Augustan Age.
Credit Hour: 3-6

AMS 9887: Seminar in the Age of the Antonines
Seminar in the Age of the Antonines
Credit Hour: 3-6

Agriculture, Food and Natural Resources (AFNR)

AFNR 2115: College to Career: Strategies for Success
Systematic approach to self-assessment, career research and exploration, goal-setting and implementation of a career development plan. Students will learn specific skills, research knowledge and lifelong career management techniques.
Credit Hour: 1

AFNR 2120: Working with Data Using Excel
Provide students with a basic understanding of computer usage and spreadsheet applications.
Credit Hour: 1

AFNR 2190: International Agriculture and Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hours: 3-6
Prerequisites: instructor's consent

AFNR 2191: International Agriculture and Natural Resources - Humanities
This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: Instructor's consent

AFNR 2191W: International Agriculture and Natural Resources - Writing Intensive
This course is designed to provide students with an introduction to valuing and appreciating the culture and philosophy entrenched in the host country's civilization through the examination of its arts, culture, language and history. May be repeated for credit. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: Instructor's consent

AFNR 2192: International Agriculture/Natural Resources-Social Science
This course is designed to provide students with an examination of the social sciences of the host country; including the sociology, psychology, economics, government, and history of the country; including the dynamics of urban and rural communities. May be repeated for credit. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: instructor's consent
AFNR 2215: Introduction to the Theory and Practice of Sustainable Agriculture
This experiential course provides an overview of the theoretical and practical principles of sustainable agriculture by exploring the holistic nature of sustainable agriculture, and analyzing agriculture systems based on their impact on the environment, economy and community.
Credit Hours: 3

AFNR 3215: Community Food Systems
This course focuses on essential concepts in the research, implementation and understanding of food systems, with topics ranging from micro-level local, community and regional food systems to macro-level global trends in food production and distribution. Students examine the social, economic and health implications of conventional and alternative food systems as well as specific U.S. policies and programs relevant to our present food systems. Particular focus is on the growing proliferation of alternative marketing schemes, food sovereignty issues, and the relationships between community food systems, and contemporary health and nutritional issues.
Credit Hours: 3
Recommended: AFNR 2215

AFNR 3315: Advanced Practices in Sustainable Agriculture
Course furthers students' understanding of sustainable production systems with an emphasis on stewarding natural resources (soil, water, biodiversity and energy) while maintaining and economically profitable enterprise that provides for a good quality of life.
Credit Hours: 3
Recommended: AFNR 2215; SOIL 2100

AFNR 4001: Topics in Agriculture-General
Topics in Agriculture-General
Credit Hour: 1-99

AFNR 4972: Capstone Project in Agriculture, Food and Natural Resources
A culminating learning experience focused on student's area of concentration that requires the application of knowledge and skills taught in the undergraduate curriculum. The capstone project comprises independent, original work culminating in a scholarly project, written document, and/or presentation. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: junior or senior standing

AFNR 4993: Internship in Agriculture, Food and Natural Resources
Field-based learning experience combining the study, observation, and employment with a business, organization, or governmental agency. The internship provides opportunities to apply skills, concepts and theories about agriculture, food and natural resources in a practical context. The student intern, internship supervisor, and university coordinator will develop an individualized internship plan. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.
Credit Hour: 1-6
Prerequisites: instructor's consent
Recommended: junior or senior standing

AFNR 7190: International Agriculture/Natural Resources
This course is designed to provide students with an introduction into the agriculture/natural resources of the host country. Activities may include course work at an international institution, professional and personal development and special projects. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-9
Prerequisites: advisor and instructor's consent

# Anesthesiology (ANESTH)

ANESTH 6203: ABS Anesthesiology Research
ABS Anesthesiology Research
Credit Hour: 5-10

ANESTH 6205: ABS Anesthesiology Research and Review
ABS Anesthesiology Research and Review
Credit Hour: 5-10

ANESTH 6400: Anesthesiology
Goals/Objectives: The goals are providing students with opportunities to: 1. Understand the anesthetic state (e.g. the inability of a person to protect themselves from the environment; concomitant and common depression of other systems of the body other than the nervous system). 2. Learn how to think and react quickly and correctly in times of stress. 3. Develop knowledge and skill at maintaining artificial ventilation and circulation. 4. Develop technical skills (e.g. insertion of endotracheal tubes, intravenous catheters). 5. Understand the rationale behind the choice of an anesthetic agent or technique. 6. Learn the function of an anesthesiologist as a perioperative physician and pain consultant. 7. Learn about the specialty of anesthesiology as a possible future career. Notes: Curriculum: Direct participation in anesthetic evaluation and administration for surgical procedures is combined with close individual supervision. Attendance at weekly teaching conferences is expected. Each student will follow a patient pre, intra, and post operatively and write a case presentation. Interblock: First consideration given to students interested in anesthesia as a career choice; honors considered only with documentation of participation and completion of a research project related to anesthesia. Evaluations: Evaluations are compiled from daily encounter cards completed by anesthesia providers, a written paper that discusses one patient's anesthetic, and a 50 question written examination at the end of the rotation.
Credit Hours: 5

ANESTH 6927: Anesthesiology Two-Week
Through daily participation, students will gain insight into the specialty of anesthesiology and will develop an appreciation for the integration of basic science knowledge (especially anatomy, physiology, and pharmacology) in the clinical care of patients.
Credit Hours: 2
Prerequisites: successful completion of the first two years of medical school
Animal Science (AN_SCI)

AN_SCI 1001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 1002: Topics in Animal Science- Lab
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 1010: Orientation to Animal Sciences
This course is designed to introduce students to the field of animal sciences, opportunities within this field, and an array of campus resources. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Animal Sciences majors or consent required

AN_SCI 1011: Introduction to Animal Sciences
An introductory course for non animal sciences majors discussing the principles of animal sciences including the importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3

AN_SCI 1011H: Animal Science - Honors
Principles of animal science including importance of animal agriculture, genetics, anatomy, physiology and nutrition.

Credit Hours: 3
Prerequisites: Honors eligibility required

AN_SCI 1012: Introduction to Captive Wild Animal Management
(same as F_W 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1013: Biotechnology in Animal Agriculture
Concepts, discoveries, and applications of biotechnology ranging from the discovery of brewing and baking to animal cloning and genetic engineering are covered. Students will acquire a foundation to understand how biotechnology affects agriculture and our everyday lives. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1164: Biology of Animal Production I
This is an introductory course; a companion to Biology of Animal Production II. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. This course is for non-Animal Sciences majors. No credit may be earned if taken after AN_SCI 1165. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 1165: Biology of Animal Production I with Laboratory
This is an introductory course; a companion to Biology of Animal Production II. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Only 1 credit may be earned if taken after AN_SCI 1164. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: This course is restricted to Animal Sciences students or requires consent

AN_SCI 1174: Biology of Animal Production II
This is an introductory course; a companion to Biology of Animal Production I. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. This section is open to all majors.

Credit Hours: 3

AN_SCI 1175: Biology of Animal Production II with Lab
This is an introductory course; a companion to Biology of Animal Production I. The overall intent of the courses is to provide an introduction to modern livestock production systems with emphasis on fundamental biological principles and their application in management of production animals. Key disciplines include genetics, nutrition, reproduction, physiology, health and behavior. The laboratory section of the course will provide hands on experience with livestock. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Animal Sciences students during early registration

AN_SCI 2001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 2002: Topics in Animal Science- Lab
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.
AN_SCI 2010: Careers in Animal Sciences
This course is designed to explore the breadth and depth of careers in animal sciences. Students will develop a professional resume, practice interviewing skills, and assess the value of a job offer. Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Restricted to Animal Sciences majors or consent required

AN_SCI 2045: Equine Practicum
Focus on learning hands-on equine skills through the care of horses at the university's equine facility. Experiential learning is emphasized. Skills include: how to identify the general health and well-being of horses, recognize early onset of illness or lameness, understand basic feeding, housing, and daily care, and demonstrate the ability to handle and feed horses in a safe manner. Monthly meetings, scheduled feed shifts, monthly journals, required skill assessments, and attendance at various educational activities are required. Feed shift scheduling is determined around individual availability and no equine or animal experience is required. To enroll, students should contact the instructor for an application. Graded on A-F basis only.
Credit Hour: 1-2
Prerequisites: Instructor consent required
Recommended: AN_SCI 1001 or AN_SCI 1065 or AN_SCI 1175 or AN_SCI 2175

AN_SCI 2085: Problems in Animal Science
Library and laboratory study of assigned problems in animal breeding, nutrition, physiology or production and management. Planning, conduction and reporting to be in consultation with instructor.
Credit Hour: 1-5
Prerequisites: instructor's consent

AN_SCI 2095: Equine Behavior and Training
Students learn the psychology and ethology of equine behavior and how it relates to training. The use and proper fitting of equipment is taught and students learn to teach horses to perform the basic movements needed prior to advancing to specialized training. Cannot be taken at the same time as AN_SCI 2195. Enrollment is limited to students who have completed AN_SCI 1065, AN_SCI 1001, or AN_SCI 1175.
Credit Hours: 3
Prerequisites: Instructor's consent

AN_SCI 2110: Global Animal Agriculture
Animal Agriculture as influenced globally by political, religious cultural, economic and climatic factors.
Credit Hours: 2
Prerequisites: sophomore standing

AN_SCI 2111: Societal Issues Facing Animal Agriculture
Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000

AN_SCI 2111W: Sophomore Seminar: Societal Issues Facing Animal Agriculture - Writing Intensive
Course designed to introduce students to key issues facing animal agriculture. Assignments focus on reading current publications associated with issues affecting the animal agriculture industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000

AN_SCI 2112: Livestock and Literature
The human fascination with animals is documented throughout history. The impact of domesticated animals, and the livestock industry, on the human condition has been the focus of numerous authors across diverse literary genres. The care we provide for animals reflects the value we place on life, and often how we view society. This course will explore these themes while using varied fictional and non-fictional texts written in the 20th century.
Credit Hours: 3
Prerequisites: ENGLSH 1000

AN_SCI 2115: Livestock Judging
Comparative judging and evaluation; various classes of farm animals; particular reference to utility. Reference reading; illustrated lectures.
Credit Hours: 3
Prerequisites: Instructor's consent required

AN_SCI 2116: Animal Welfare Evaluation
Comparative evaluation of 4 animal welfare scenarios related to farm, zoo, lab, and exotic species. Welfare decisions are based on data and modern scientific literature. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor’s consent

AN_SCI 2131: Dairy Products Evaluation
(same as F_S 2131) Sensory Evaluation and judging of dairy products.
Credit Hours: 2

AN_SCI 2140: Companion Animals
(same as BIOMED 2140). Companion animals form an important part of our society. They serve us, provide companionship and many become members of our families. This class focuses primarily on dogs, cats, and horses. Topics covered include: the pet industry, breeds, wellness, management, care, training, zoonotic diseases, evolution and domestication, toxicology, nutrition, reproduction, genetics, human animal interactions, companion animal enterprise, and biomedical research. Students may enroll in one of two sections: service learning section or traditional course section.
Credit Hours: 3
Recommended: sophomore standing
AN_SCI 2146: Introduction to Animal Behavior
Explore animal behavior in domestic, zoo, and wild animals through a scientific approach. This course will begin with traditional animal behavior theories and move into the application of animal behavior in modern situations. Students will finish this course with an understanding of the foundational concepts in animal behavior and be able to apply those concepts to the animals around them. Graded on A-F basis only.

Credit Hours: 3

AN_SCI 2195: Equine Facility Management and Marketing
Focuses on learning equine facility management through student care and management of the University’s equine facility and breeding herd. Students also learn handling techniques for a wide variety of horses and gain experience in general equine facility maintenance. Students will be responsible for marketing horses sold in the annual MU online horse auction. Cannot be taken at the same time as AN_SCI 2095. Enrollment is limited to students with Sophomore standing or higher. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor's consent

AN_SCI 2214: Animal Products and Biotechnology
This course is designed to explore the variety of products that humans derive from animals for nutrition, fiber, and health and includes a laboratory session that promotes the working knowledge of methods for measuring animal product quality. Students will also assess factors related to consumer demand that influence the value of animal products. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Animal Sciences majors or instructor's consent

AN_SCI 3001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 3002: Topics in Animal Science- Lab
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. There may be prerequisites enforced depending on the topic.

Credit Hour: 1-4

AN_SCI 3010: Graduate Experience Program
This course is designed to give undergraduates insight into the graduate student experience and to provide background knowledge in the various aspects of graduate level research as well as the application process for graduate school.

Credit Hour: 1
Prerequisites: Consent required

AN_SCI 3085: Problems in Animal Science
Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

Credit Hour: 1-6
Prerequisites: instructor's consent

AN_SCI 3085W: Problems in Animal Science - Writing Intensive
Current problems in animal breeding, nutrition, livestock production and management, meats. Assigned topics. In some cases student may undertake a project by outlining objectives, planning work, keeping records and summarizing results in written report. Some sections may be graded either on S/U or A-F basis only.

Credit Hour: 1-6
Prerequisites: instructor's consent

AN_SCI 3190: Study Abroad: International Meat, Dairy and Enology (same as F_S 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparisons to the US industries. May be repeated once for credit.

Credit Hours: 3
Prerequisites: instructor's consent

AN_SCI 3213: Genetics of Agricultural Plants and Animals (same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: MATH 1100 or higher and one of the following: BIO_SC 1100 or BIO_SC 1200 or BIO_SC 1500 or FW 1100.

Credit Hours: 3

AN_SCI 3214: Principles of Meat Science (same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3
Recommended: one course in Biology

AN_SCI 3214: Principles of Meat Science (same as F_S 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.

Credit Hours: 3
Recommended: one course in Biology

AN_SCI 3213: Genetics of Agricultural Plants and Animals (same as PLNT_S 3213). Concepts of molecular, transmission, and population and quantitative genetics. Special emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: MATH 1100 or higher and one of the following: BIO_SC 1100 or BIO_SC 1200 or BIO_SC 1500 or FW 1100.

Credit Hours: 3

AN_SCI 3231: Principles of Dairy Foods Science (same as F_S 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)

Credit Hours: 3

AN_SCI 3242: Principles and Applications of Animal Nutrition
Fundamentals of animal nutrition, including digestion, absorption, metabolism, and function of nutrients; nutrient and energy requirements; feedstuffs used in livestock and companion animal nutrition; and integration of these principles with nutrition-based calculations to make nutritional management decisions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

Recommended: One course in Chemistry or Biological Sciences
AN_SCI 3253: Physiology of Domestic Animals - All Majors
Course covers basic concepts of physiology and anatomy in vertebrate animals.
Credit Hours: 4
Prerequisites: Sophomore standing or higher. 4 credit section is open to all majors
Recommended: BIO_SC 1500 or F_W 1100, CHEM 1320, and MATH 1100 are strongly recommended. Students would also benefit from prior completion of CHEM 1330, CHEM 2030 (or 2100), and/or BIO_CHEM 3630

AN_SCI 3254: Physiology of Domestic Animals
Course covers basic concepts of physiology and anatomy in vertebrate animals.
Credit Hours: 5
Prerequisites: Sophomore standing or higher. 5 credit section (with lab) is restricted to Animal Sciences Majors Only
Recommended: BIO_SC 1500 or F_W 1100, CHEM 1320, and MATH 1100 are strongly recommended. Students would also benefit from prior completion of CHEM 1330, CHEM 2030 (or 2100), and/or BIO_CHEM 3630

AN_SCI 3254H: Physiology of Domestic Animals - Honors
Course covers basic concepts of physiology and anatomy in vertebrate animals.
Credit Hours: 5
Prerequisites: BIO_SC 1100 or BIO_SC 1500 or F_W 1100; CHEM 1320; Honors eligibility required. 5 credit section (with lab) is restricted to Animal Sciences majors
Recommended: CHEM 1330; CHEM 2030 or CHEM 2100

AN_SCI 3264: Physiology of Domestic Animals II
Advanced study of selected topics and systems in domestic animal physiology. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 3254 or BIO_SCI 3700 or MPP 3202 or equivalent physiology course
Recommended: Foundational courses in biology and chemistry

AN_SCI 3275: Meat Animal Evaluation
Meat animal evaluation highlights the relationships and limitations that exist when evaluating market and breeding animals and develops an appreciation for carcass excellence as it relates to production, merchandising and consumption. Some travel time and commitments will be necessary.
Credit Hours: 2
Prerequisites: Instructor's consent

AN_SCI 4001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: instructor's consent

AN_SCI 4001W: Topics in Animal Science - Writing Intensive
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hour: 1-4
Prerequisites: instructor's consent

AN_SCI 4010: Pasture-Based Dairy Management
(cross-leveled with AN_SCI 7010). The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Materials from this class are also cross-species related where information can be used on other ruminant type operations. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: restricted to Junior and Seniors
Recommended: Background in dairy production, nutrition and reproductive physiology for Animal Science students or plant physiology and forage production for Plant Science students

AN_SCI 4010W: Pasture-Based Dairy Management - Writing Intensive
(cross-leveled with AN_SCI 7010). The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. The class is taught by experts from various departments in CAFNR and covers elements of dairy and forage production needed to be successful. Materials from this class are also cross-species related where information can be used on other ruminant type operations. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: restricted to Junior and Seniors
Recommended: Background in dairy production, nutrition and reproductive physiology for Animal Science students or plant physiology and forage production for Plant Science students

AN_SCI 4012: Elements of Experimental Surgery
(cross-leveled with AN_SCI 7012). This course implements the basics of surgery techniques as well as the laws and regulations governing the privilege of using vertebrate animals in research. Consideration for enrollment will be given first to graduate students. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Instructor's consent

AN_SCI 4312: Monogastric Nutrition
(same as NEP 4020; cross-leveled with AN_SCI 7312 and NUTRIT 7020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AN_SCI 3212
AN_SCI 4314: Physiology of Reproduction
(cross-leveled with AN_SCI 7314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN_SCI 3254 or MPP 3202 or BIO_SC 3700

AN_SCI 4314H: Physiology of Reproduction - Honors
Principles of animal reproduction with emphasis on endocrine control of reproductive processes.

**Credit Hours:** 3

**Prerequisites or Corequisites:** AN_SCI 3254 or MPP 3202 or BIO_SC 3700. Honors eligibility required

AN_SCI 4323: Applied Livestock Genetics
(cross-leveled with AN_SCI 7323). Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems. Math Reasoning Proficiency Course.

**Credit Hours:** 2

**Prerequisites or Corequisites:** AN_SCI 3213 or PLNT_S 3213 or BIO_SC 2200 or F_W 2500
**Prerequisites:** MATH 1100 or higher

AN_SCI 4324: Genomics of Plants and Animals
(cross-leveled with AN_SCI 7324). Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.

**Credit Hours:** 2

**Prerequisites or Corequisites:** AN_SCI 3213 or PLNT_S 3213 or equivalent
**Prerequisites:** BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500 or F_W 1100; MATH 1100

AN_SCI 4332: Ruminant Nutrition
(cross-leveled with AN_SCI 7332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.

**Credit Hours:** 3

**Prerequisites:** AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242

AN_SCI 4354: Physiology and Biochemistry of Muscle as Food
(same as F_S 4354; cross-leveled with AN_SCI 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

**Credit Hours:** 3

**Prerequisites:** AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 2001 or AN_SCI 2214 or AN_SCI 2114 or AN_SCI 3214 or F_S 3214 or AN_SCI 3231 or F_S 3231
**Recommended:** Any Biochemistry or Organic Chemistry course

AN_SCI 4384: Reproductive Management
(cross-leveled with AN_SCI 7384). Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies. Enrollment is restricted to students with Senior standing and have completed or currently enrolled in AN_SCI 4314.

**Credit Hours:** 3

**Prerequisites:** Instructor's Consent

AN_SCI 4386: Equine Reproduction
Focuses on reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Graded on A-F basis only. Students will not receive credit if taken after AN_SCI 4387.

**Credit Hours:** 3

**Prerequisites:** AN_SCI 4314 and instructor's consent

AN_SCI 4387: Equine Breeding Management
Focuses on practical applications of reproductive management techniques and breeding in the horse. Topics include stallion collection and evaluation, artificial insemination, interpreting ultrasound images, teasing, parturition, and foal care. Students will gain hands-on experience in each of these areas. Students will receive 2 credits if taken after AN_SCI 4386.

**Credit Hours:** 5

**Prerequisites:** AN_SCI 4314 and instructor's consent

AN_SCI 4437: Stress Physiology
This online course will provide a general understanding of internal and external stress conditions that animals face throughout life. Since stress physiology can be expanded into many far-reaching and different areas, we will focus on specific topics that have a historical background and, at the same time, are pertinent in today's world. We will examine basic concepts of how stressors are received by the body and how it responds in both healthy and pathological situations. You will be able to relate many of the situations discussed in class to life events. In the end, you will acquire a better understanding of external, environmental and internal stressors and why we need some of them for normal growth and development. Finally, you will learn to apply concepts gained in this class to actual research presented in the scientific literature, and apply this ability to real-world scenarios in the future.

**Credit Hours:** 3

**Prerequisites:** AN_SCI 3254, MPP 3202, or BIO_SC 3700

AN_SCI 4910: Senior Seminar in Captive Wild Animal Management
(same as F_W 4910). Investigates key issues in captive wild animal management, focusing on the role of animal caretakers in addressing the issues. Students are required to formulate informed opinions regarding these topics and communicate effectively about the subject matter. Graded A-F only.

**Credit Hour:** 1

**Prerequisites:** AN_SCI 1012 or F_W 1012 or instructor's consent; junior or senior standing
AN_SCI 4940: Internship in Animal Science & Technology
Off-campus training to develop technical skills and understanding of an area of animal science. Written reports required. Graded on an S/U basis only.

Credit Hour: 1-12
Prerequisites: instructor's consent

AN_SCI 4950: Undergraduate Research in Animal Science
Individually directed field or laboratory research culminating in a poster or oral presentation for upper-class students under faculty supervision.

Credit Hour: 1-3
Prerequisites: At least sophomore standing or instructor's consent

AN_SCI 4973: Molecular and Cellular Techniques in Animal Science
A directed research project that employs current molecular and cellular technologies. Students will generate experimental data, analyze the data and draft a research report in the format of a scientific paper.

Credit Hours: 4
Prerequisites: instructor's consent
Recommended: an introductory course in biology and a course in organic chemistry, at least junior standing

AN_SCI 4975: Beef Production and Management
(cross-leveled with AN_SCI 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.

Credit Hours: 3
Prerequisites: AN_SCI 1001 or AN_SCI 1065 and AN_SCI 2165; AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242; AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 3213
Recommended: AN_SCI 4314

AN_SCI 4975W: Beef Production and Management - Writing Intensive
(cross-leveled with AN_SCI 7975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle. Recommended: AN_SCI 4314

Credit Hours: 3
Prerequisites: AN_SCI 1001 or AN_SCI 1065 and AN_SCI 2165; AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242; AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 3213

AN_SCI 4976: Dairy Production
(cross-leveled with AN_SCI 7976). Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment, buildings, quality products, organization of dairy enterprise, business and economic aspects.

Credit Hours: 3
Prerequisites: AN_SCI 1065 and AN_SCI 2165, or AN_SCI 1065 and AN_SCI 1001, or AN_SCI 1065 and AN_SCI 1165, or AN_SCI 1001; AN_SCI 3212 and AN_SCI 3232, or AN_SCI 3001, or AN_SCI 3242; or instructor's consent

AN_SCI 4976W: Dairy Production - Writing Intensive
(cross-leveled with AN_SCI 7976). Applied dairy science; emphasis on nutrition and management; herd health, labor-saving equipment,
AN_SCI 7001: Topics in Animal Science
Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged.
Credit Hours: 1-4
Prerequisites: instructor's consent

AN_SCI 7011: Pasture Based Dairy Management Lab
(cross-leveled with AN_SCI 4011). This course is a hands-on experience class taught over 4 days during spring break. The objective of the class is to give a broad overview of pasture-based dairying and instill a confidence for students evaluating if this type of animal agriculture is an occupation they want to pursue after graduation. Students will have the opportunity to interact with successful pasture-based dairy producers in Missouri and apply their experience from AN_SCI 7010 on real farm situations. Graded on A-F basis only.
Credit Hours: 1
Prerequisites or Corequisites: AN_SCI 7010

AN_SCI 7012: Elements of Experimental Surgery
(cross-leveled with AN_SCI 4012). This course implements the basics of surgery techniques as well as the laws and regulations governing the privilege of using vertebrate animals in research. Consideration for enrollment will be given first to graduate students. Graded on S/U basis only.
Credit Hours: 1
Prerequisites: Instructor's consent

AN_SCI 7312: Monogastric Nutrition
(same as NUTRIT 7020, NEP 7020; cross-leveled with NEP 4020, AN_SCI 4312). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 3242

AN_SCI 7314: Physiology of Reproduction
(cross-leveled with AN_SCI 4314). Principles of animal reproduction with emphasis on endocrine control of reproductive processes.
Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 3254 or BIO_SCI 3700 or MPP 3202

AN_SCI 7323: Applied Livestock Genetics
(cross-leveled with AN_SCI 4323). Genetic principles applied to improvement of farm animals. Covers selection, prediction of genetic merit and mating systems.
Credit Hours: 2
Prerequisites or Corequisites: AN_SCI 3213 or PLNT_S 3213 or BIO_SCI 2200 or F_W 2500
Prerequisites: MATH 1100

AN_SCI 7324: Genomics of Plants and Animals
(cross-leveled with AN_SCI 4323). Analysis of organisms at the level of the complete genome sequence. Covers genome sequencing, assembly and annotation, as well as functional, evolutionary and computational genomics.
Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 3213 or PLNT_S 3213 or equivalent
Prerequisites: BIO_SC 1010 and BIO_SC 1020 or BIO_SC 1500 or F_W 1100; MATH 1100

AN_SCI 7332: Ruminant Nutrition
(cross-leveled with AN_SCI 4332). Physiology, chemistry, microbiology and pathology of ruminants. Emphasizes the digestion, absorption, metabolism and utilization of nutrients.
Credit Hours: 3
Prerequisites: AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242

AN_SCI 7344: Processing Muscle Foods
(same as F_S 7344; cross-leveled with AN_SCI 4344, F_S 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Prerequisites or Corequisites: one Chemistry course

AN_SCI 7354: Physiology and Biochemistry of Muscle as Food
(same as F_S 7354; cross-leveled with AN_SCI 4354, F_S 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.
Credit Hours: 3
Prerequisites: AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 2001 or AN_SCI 2214 or AN_SCI 2114 or AN_SCI 3214 or F_S 3214 or AN_SCI 3231 or F_S 3231
Recommended: Any Biochemistry or Organic Chemistry course

AN_SCI 7384: Reproductive Management
(cross-leveled with AN_SCI 4384). Reproductive management of cattle, swine and sheep; estrous synchronization; artificial insemination; embryo development and transfer; assisted reproductive technologies.
Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 4314
Prerequisites: Senior Standing, Instructor's consent

AN_SCI 7975: Beef Production and Management
(cross-leveled with AN_SCI 4975). Systems of beef production: breeding, feeding, management of commercial and purebred beef cattle.
Credit Hours: 3
Prerequisites: AN_SCI 1001 or AN_SCI 1065 and AN_SCI 2165; AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242; AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 3213
Recommended: AN_SCI 4314

Recommended: AN_SCI 4314 and AN_SCI 3213 |
| AN_SCI 7979 | Poultry Production (cross-leveled with AN_SCI 4979). Principles of housing systems, nutrition, management, business and production of commercial chickens and turkeys. | Credit Hour: 3  
Prerequisites: AN_SCI 1001 or AN_SCI 1175 or AN_SCI 1065 and AN_SCI 2175; AN_SCI 3001 or AN_SCI 3212 or AN_SCI 3242 |
| AN_SCI 8001 | Topics in Animal Science Various courses offered on a preliminary basis to determine need for such offering prior to submission as a numbered course. Various topics, credit arranged. | Credit Hour: 1-4  
Prerequisites: Instructor's consent |
| AN_SCI 8085 | Problems in Animal Science Advanced independent studies in fields not directly related to thesis or non-thesis degree research program. May be graded on S/U or A-F basis only. | Credit Hour: 1-6  
Prerequisites: Instructor's consent |
| AN_SCI 8087 | Seminar in Animal Science Critical consideration of research and other selected subjects in animal breeding, animal nutrition, reproductive physiology, growth and development and livestock production and management. | Credit Hour: 1 |
| AN_SCI 8090 | Thesis Research in Animal Science Investigations in animal breeding, animal nutrition, reproduction physiology, growth and development livestock production and management. Graded on a S/U basis only. | Credit Hour: 1-99 |
| AN_SCI 8413 | Reproductive Biology Seminar Presentation and discussion of selected topics from all phases of reproductive biology. Open to qualified students of graduate standing in the field of Reproductive Biology. | Credit Hour: 1 |
| AN_SCI 8414 | Meat Quality (same as F_S 8414). Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only. | Credit Hour: 3  
Prerequisites: AN_SCI 3214 or equivalent |
| AN_SCI 8415 | Survey of Epigenetics This course will introduce graduate students to the basic concepts in epigenetics, including DNA methylation, histone modifications, epigenetic modifiers/transacting factors, non-coding RNAs, genomic imprinting, and dosage compensation. The course is designed to be a combination of lectures, paper discussions, and research talks by invited faculty speakers from across campus. | Credit Hour: 3  
Prerequisites or Corequisites: AN_SCI 3214 or equivalent  
Recommended: Instructor's consent |
| AN_SCI 8420 | Endocrinology Hormones of pituitary and endocrine glands; special reference to influence on growth, reproduction, milk secretion. | Credit Hour: 3  
Prerequisites: AN_SCI 7314 or equivalent |
| AN_SCI 8424 | Meat Investigations (same as F_S 8424). Discussions of scientific literature and hands-on experimentation with research techniques customarily used in the field of meat science. Graded on A-F basis only. | Credit Hour: 3  
Prerequisites: F_S 3214 or equivalent |
| AN_SCI 8430 | Introduction to Bioinformatics Programming (same as PLNT_S 8430). This course provides the basics of programming and database development to students in the life sciences who have little prior programming experience. It covers Unix/Linux, Perl, MySQL, the relational database design process, and common data formats used in genome informatics. Students will learn how |
programming skills can enhance their ability to analyze large biological datasets, and will gain hands on experience with examples focused on genomics and bioinformatics. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** Instructor's consent  
**Recommended:** Undergraduate or graduate course in Genetics

### AN_SCI 8431: Nutritional Biochemistry of Lipids
(Same as NEP 8310 and NUTRIT 8310). Current concepts in the nutritional regulations of lipid metabolism. Emphasis on integrating information and interpreting current research data.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270 and BIOCHM 4272

### AN_SCI 8434: Special Topics in Reproductive Biology
The physiological, hormonal, cellular and molecular mechanisms regulating development and function of reproductive systems of mammals will be studied with an emphasis on domestic animals, rodents, and humans. Current theories will be evaluated and discussed using information from recent scientific publications. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** AN_SCI 4314 or AN_SCI 7314 or equivalent; AN_SCI 8420; and courses in biochemistry and/or cell biology

### AN_SCI 8441: Statistical Applications in Agriculture
Techniques of experimentation, with application to livestock production and management. Exercises in methods of planning, conducting, analyzing, evaluating and reporting research.

**Credit Hours:** 3  
**Prerequisites:** STAT 4530/STAT 7530 or equivalent or instructor's consent

### AN_SCI 8442: Digestive Physiology and Metabolism
The objective of this course is to provide graduate students in Animal Science and related areas with current knowledge in gastrointestinal physiology, including research methods used in nutrition and nutritional physiology. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** At least one (each) undergraduate or graduate-level nutrition, physiology (general), and biochemistry course; or instructor's consent

### AN_SCI 8633: Molecular and Network Evolution
(same as BIO_SC 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

**Credit Hours:** 3  
**Prerequisites:** Instructor's consent required

### AN_SCI 8725: Science Outreach: Public Understanding of Science
(same as BIO_SC 8725, PHYSICS 8350 and LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

**Credit Hour:** 1-2

### AN_SCI 9001: Topics in Animal Science
**Credit Hour:** 1-99  
**Prerequisites:** Instructor's consent

### AN_SCI 9090: Dissertation Research in Animal Science
Investigations in animal breeding, animal nutrition, livestock production and management. Dissertation required. Graded on a S/U basis only.

**Credit Hour:** 1-99

### AN_SCI 9423: Genetics of Populations
Introduction to quantitative genetics with application to animal and plant breeding.

**Credit Hours:** 4  
**Prerequisites:** STAT 4530 or STAT 7530

### AN_SCI 9432: Ruminant Nutrition
(same as NUTRIT 8320). Physiology, chemistry, microbiology, pathology of ruminants. Emphasizes digestion, absorption, metabolism, utilization of nutrients. Lecture, laboratory, assigned readings.

**Credit Hours:** 3  
**Prerequisites:** AN_SCI 4332/AN_SCI 7332 or equivalent and BIOCHM 4270

### AN_SCI 9433: Gamete and Embryo Development
A classical and molecular approach to spermatogenesis, oogenesis, fertilization and preimplantation development in the domestic species.

**Credit Hours:** 3  
**Prerequisites:** AN_SCI 4314/AN_SCI 7314 or BIOMED 9434

### AN_SCI 9434: Gonadal Function
(same as Gonadal Function 9434).

**Credit Hours:** 3  
**Prerequisites:** AN_SCI 4314, biochemistry or cell biology and AN_SCI 8420

### AN_SCI 9435: Placentaation
Provide students with current and in-depth information about the mechanisms involved in placental development and how the placenta (and placental products) influence maternal physiology - both locally at the placenta-uterine interface and systemically. All course topics will be covered in a comparative cross-species approach whenever possible. Emphasis will be placed on the most recent literature regarding the interactions taking place between the placenta and maternal system and how these interactions lead to the eventual birth of live young.

**Credit Hours:** 3

**Recommended:** It is preferred that students take AN_SCI 9433 prior to this class, but this is not an absolute requirement

### AN_SCI 9442: Vitamins and Minerals
Designed to provide students with an understanding of the chemical, metabolic, and functional role of vitamins and minerals in nutrition. While...
the primary focus will be on animals, comparative aspects to human nutrition will be discussed.

Credit Hours: 4
Prerequisites: AN_SCI 3212, BIOCHM 4270 or equivalent

Anthropology (ANTHRO)

ANTHRO 1000: Introduction to Anthropology: Human Biology, Prehistory, and Culture
General survey course in fields of anthropological concern: archaeology, cultural anthropology, biological anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3
ANTHRO 1000 - MOTR ANTH 101: General Anthropology

ANTHRO 1000H: Introduction to Anthropology: Human Biology, Prehistory, and Culture - Honors
General survey course in fields of anthropological concern: archaeology, cultural anthropology, biological anthropology, linguistics; emphasizes underlying concepts, principles. Examples from peoples of the world.

Credit Hours: 3
Prerequisites: Honors eligibility required

ANTHRO 1001: Topics in Anthropology - General
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1002: Topics in Anthropology - Biological Sciences
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 1003: Topics in Anthropology - Behavioral
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 1006: Topics in Anthropology - Mathematical Sciences
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 1007: Topics in Anthropology - Physical Sciences
Problems, topics, issues, or review of research in any areas of anthropology and/or experimental development of new content areas at a freshman level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hour: 1-3

ANTHRO 1060: Human Language
(same as LINGST 1060, C_S_D 1060 and ENGLISH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

ANTHRO 1150: Introduction to Folklore Genres
(same as ENGLISH 1700). Course focus is on genres of folklore in both historic and contemporary contexts, as well as in people's daily lives. Genres include narrative, proverbs, oral poetry and rhyme, riddles, jokes, legends, epics, material culture and intangible expressive culture. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 1200: Significant Discoveries of Archaeology
Detailed consideration of approximately 20 archaeological discoveries and conclusions, from the field and the laboratory, which have been of surpassing importance for an understanding of human origins, behavior, culture and past experiences on earth.

Credit Hours: 3

ANTHRO 1300: Multiculturalism: An Introduction
Examines contemporary multiculturalism (and its origins) globally; introduces key concepts; uses diverse, extended cross-cultural and American examples; and emphasizes complexity of cultures, practicality of issues, and change.

Credit Hours: 3

ANTHRO 1350: Deviance: A Cross-Cultural Perspective
Cross-cultural studies of problem behavior with emphasis on violence, suicide, sexual misconduct, drug use and mental disorder.

Credit Hours: 3

ANTHRO 1500: Monkeys, Apes and Humans
For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

Credit Hours: 3

ANTHRO 1500W: Monkeys, Apes and Humans - Writing Intensive
For those with little or no background in anthropology. Surveys the ecology and behavior of major nonhuman primate groups, and how these relate to the evolution of human behavior.

Credit Hours: 3

ANTHRO 2002: Topics in Anthropology-Biological Science
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate
level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2003: Topics in Anthropology - Behavioral
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2005: Topics in Anthropology - Humanities
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 1-3

ANTHRO 2006: Topics in Anthropology-Mathematical Science
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2007: Topics in Anthropology-Physical Science
Problems, topics, issues or review of research in any area of anthropology (including its relationships with other areas) and/or experimental development of new content areas at an undergraduate level. Specific content will vary and will be announced in advance. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 2020: Fundamentals of Archaeology with Laboratory
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. The lab involves hands-on experience with archaeological materials. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 4

ANTHRO 2021: Fundamentals of Archaeology
Introduces the methodological and theoretical underpinnings of archaeology. The goals of archaeological research, and the techniques used to extract data from the archaeological record are discussed. No credit for both ANTHRO 2020 and ANTHRO 2021.

Credit Hours: 3

ANTHRO 2022: Fundamentals of Archaeology Lab
Involves hands-on experience with archaeological materials. No credit given to students who have taken ANTHRO 2020.

Credit Hours: 1

Prerequisites: must have completed ANTHRO 2021

ANTHRO 2030: Cultural Anthropology
Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

Credit Hours: 3

ANTHRO 2030 - MOTR ANTH 201: Cultural Anthropology

ANTHRO 2030W: Cultural Anthropology - Writing Intensive
Analysis of human cultures with emphasis on both constant and variable factors at different levels of social complexity; contact between cultures, and cultural influences on individual behavior.

Credit Hours: 3

ANTHRO 2050: Introduction to Biological Anthropology with Laboratory
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. Three hours lecture and two hours lab. No credit for both ANTHRO 2050 and ANTHRO 2051. Math Reasoning Proficiency Course.

Credit Hours: 5

Prerequisites: MATH 1050, MATH 1100, or MATH 1160

ANTHRO 2050 - MOTR ANTH 201: Introduction to Biological Anthropology

ANTHRO 2051: Introduction to Biological Anthropology
A survey of biological anthropology. Primary emphasis on the biological evidence for human evolution. Major topics include human paleontology, primate behavior and human variation. No credit for both ANTHRO 2050 and ANTHRO 2051.

Credit Hours: 3

ANTHRO 2052: Biological Anthropology Laboratory
Laboratory exercises dealing with human genetics, non-human primates, the human fossil record, and human variation. Credit not given for students who have taken ANTHRO 2050. Math Reasoning Proficiency Course.

Credit Hours: 2

Prerequisites: ANTHRO 2051 (or equivalent) and MATH 1050, MATH 1100, or MATH 1160

ANTHRO 2100: Indigenous Religions
(same as REL_ST 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

ANTHRO 2100H: Indigenous Religions - Honors
(same as REL_ST 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3

Prerequisites: Honors eligibility required

</table>
ANTHRO 3006: Topics in Anthropology-Mathematical Sciences
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3007: Topics in Anthropology-Physical Sciences
Problems, topics, issues or review of research in any area of anthropology and/or experimental development of new content areas. May be repeated to a maximum of 9 hours.

Credit Hours: 3

ANTHRO 3150: American Folklore
(same as ENGLISH 3700). Focus on regional and ethnic folklore; emphasis on analysis of folklore in context. Requirements include book reports and two analytical papers based on student field research. May be repeated for a maximum of six hours with department's consent.

Credit Hours: 3

ANTHRO 3340H: The Evolution of Human Nature - Honors
(same as GN_HON 3241H, ANTHRO 3340). We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with the capacity?). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors Eligibility Required

ANTHRO 3340: Native American Religions
(same as REL_ST 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.

Credit Hours: 3

ANTHRO 3470: Culture as Communication
(same as COMMUN 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.

Credit Hours: 3

ANTHRO 3490: Indian Cinema
(same as AR_H_A 3790, S_A_ST 3490 and FILM_S 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

Credit Hours: 3
Recommended: Sophomore standing or higher

ANTHRO 3560: Plagues and Peoples
Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

Credit Hours: 3
Recommended: sophomore standing

ANTHRO 3560W: Plagues and Peoples - Writing Intensive
Overview of the ecology of human host-pathogen interactions and the influence of human culture on the transmission and spread of infectious diseases through time and in different environments.

Credit Hours: 3
Recommended: sophomore standing

ANTHRO 3600: North American Indian Culture
Comparative study of American Indians north of Mexico, emphasizes eastern United States.

Credit Hours: 3

ANTHRO 3780: Cultures of Southeast Asia
Survey of peoples and cultures of Southeast Asia; topics include regional geography and prehistory, European colonialism, economic and social organization, religious practices, changing status of women, urban and rural poverty, and environmental transformations.

Credit Hours: 3
ANTHRO 4001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 4002: Topics in Anthropology - Biological Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 4005: Topics in Anthropology - Humanities
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 4006: Topics in Anthropology - Mathematical Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 4007: Topics in Anthropology - Physical Science
Problems, topics, issues, or review of research; experimental development of new content areas. Specific content varies depending on needs of faculty or students and will be announced in advance. May be repeated to a maximum of 9 hours.
Credit Hours: 3

ANTHRO 4150: Special Themes in Folklore
(same as ENGLISH 4700; cross-leveled with ANTHRO 7150 and ENGLISH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours with department's consent.
Credit Hours: 3

ANTHRO 4170: Oral Tradition
(same as ENGLISH 4770; cross-leveled with ANTHRO 7170, ENGLISH 7770). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.
Credit Hours: 3

Prerequisites: ENGLISH 1000 and sophomore standing

ANTHRO 4200: Environment and Archaeology
(cross-leveled with ANTHRO 7200). Study of Quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.
Credit Hours: 3
Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4240: History of Archaeology
(cross-leveled with ANTHRO 7240). Growth of archaeology worldwide since AD 1700. Emphases include intellectual and theoretical developments, field and laboratory techniques, and major figures in the history of the discipline.
Credit Hours: 3

ANTHRO 4280: Archaeology of Religion
(same as REL_ST 4280; cross-leveled with ANTHRO 7280 and REL_ST 7280). Examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmogonical constructs, worldview and ideology in the Americas.
Credit Hours: 3
Recommended: ANTHRO 2020 or REL_ST 2100

ANTHRO 4300: Comparative Social Organization
(cross-leveled with ANTHRO 7300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross-culturally.
Credit Hours: 3

ANTHRO 4340: Cultural Evolution and Change
(cross-leveled with ANTHRO 7340). Alternative hypotheses about the relationship between culture and evolution are evaluated in light of ethnographic evidence.
Credit Hours: 3
Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4350: Psychological Anthropology
(cross-leveled with ANTHRO 4350). Examines cross-cultural approaches to the study of perception, cognition, and personality; methods for gathering and validating data; examples from non-Western societies.
Credit Hours: 3
Prerequisites: ANTHRO 2030 or instructor's consent

ANTHRO 4360: Medical Anthropology
(cross-leveled with ANTHRO 7360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail.
Credit Hours: 3
Recommended: junior or senior standing

ANTHRO 4370: Anthropology of Gender
(same as WGST 4370; cross-leveled with ANTHRO 7370 and WGST 7370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

Credit Hours: 3

ANTHRO 4380: Anthropological Theories of Religion
(same as REL_ST 4380; cross-leveled with ANTHRO 7380 and REL_ST 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

ANTHRO 4385: Anthropology of Shamanism
(cross-leveled with ANTHRO 7385). Shamans are considered to be intermediates between this world and the spiritual world because they possess the power to communicate with spiritual beings and seek such beings to ask for their help with a variety of tasks such as healing, killing enemies, and weather control. Shamans are also the earliest ritual practitioners. Ancient cave paintings depict men dressed in animal skins, holding objects resembling the rattles used by modern shamans among northern hunting peoples. The cave art also has entopic imagery that is seen in the shaman's mind during his shamanic rituals. In this course we will look at shamanism through time and in many cultures. We will also discuss the early accounts of shamanism by priests, explorers and adventurers, and how anthropology has come to understand and study this phenomenon. Particular topics to be discussed include biological explanations for shamanic trances and visions, mental health concerning shamans, gender issues, and how shamans fit in with societal development and complexity. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4412: Gender, Language, and Communication
(same as COMM 4412 and LINGST 4412; cross-leveled with COMMUN 7412 and LINGST 7412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3
Prerequisites: junior standing or departmental consent

ANTHRO 4420: Historical Linguistics
(same as LINGST 4420, ENGLISH 4660; cross-leveled with ANTHRO 7420, LINGST 7420, ENGLISH 7660). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3
Recommended: junior or senior standing

ANTHRO 4500: Human Origins
(cross-leveled with ANTHRO 7500). History and theory in the study of human paleontology.

Credit Hours: 5
Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4520: Functional Morphology of the Human Skeleton
(cross-leveled with ANTHRO 7520). This course will explore human functional morphology in a broad sense, i.e. will investigate how the form of various bodily systems influences their function and vice versa. In addition, the course is explicitly evolutionary in perspective; after the basic anatomy and function of a specific bodily region is introduced, we will cover how this functional unit has changed over the course of human evolutionary history. Lastly, we will be using the knowledge gained in lecture and from the text to critically analyze examples of research in human functional morphology. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4540: Human Biological Variation
(cross-leveled with ANTHRO 7540). Human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation.

Credit Hours: 3
Prerequisites: ANTHRO 2050 or ANTHRO 2051 or BIO_SC 1010

ANTHRO 4580: Evolutionary Medicine
(cross-leveled with ANTHRO 7580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class.

Credit Hours: 3
Recommended: lower level course in Biology or Biological Anthropology, junior or senior standing

ANTHRO 4600: Ethnographic Studies of Selected Cultures
(cross-leveled with ANTHRO 7600). Specific content varies with student interest, faculty availability. Will concentrate on peoples and cultures of one area such as East Asia, South Asia, Africa, North America, Mesoamerica, Oceania, Europe. Amplies ethnographic knowledge gained in lower-level survey courses.

Credit Hours: 3
Recommended: junior standing

ANTHRO 4620: North American Archaeology
(cross-leveled with ANTHRO 7620). Ancient peoples and development of American Indian culture.

Credit Hours: 3
Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4640: Prehistory of the Greater Southwest
(cross-leveled with ANTHRO 7640). The course will introduce students to the archaeology of aboriginal peoples of the American Southwest and northwestern Mexico. The emphasis will be on prehistoric culture
development from the Paleoinidians to the arrival of the Spanish. Ethnographic and modern peoples will be discussed as well.

Credit Hours: 3
Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4650: Prehistory of Mesoamerica
(cross-leveled with ANTHRO 7650). Archaeology and prehistory of Mesoamerica (Mexico and Northern Central America). Emphasis on archaeological evidence for development of human societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 4680: Cultures and Peoples of the Amazon
(cross-leveled with ANTHRO 7680). Ethnographic survey of indigenous Amazonian cultures.

Credit Hours: 3
Recommended: Junior standing required

ANTHRO 4700: Old World Prehistory
(cross-leveled with ANTHRO 7700). Beginnings of culture in the Old World through the early Iron Age.

Credit Hours: 3
Recommended: ANTHRO 2020 or ANTHRO 2021

ANTHRO 4790: Culture and Society in South Asia
(same as S_A_ST 4790; cross-leveled with ANTHRO 7790 and S_A_ST 7790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3
Recommended: 9 hours of Linguistics

ANTHRO 4800: Field Methods in Archaeology
(cross-leveled with ANTHRO 7800). Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.

Credit Hour: 1-8

ANTHRO 4820: Zooarchaeology
(cross-leveled with ANTHRO 7820). Survey of specialized techniques for archaeological faunal analysis, including zooarchaeological sampling, taphonomy, study of paleoecology, and recognition of domestication.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4826: Stone Artifact Analysis
(cross-leveled with ANTHRO 7826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022 or instructor's consent

ANTHRO 4828: Archaeological Analysis of Ceramics
(cross-leveled with ANTHRO 7828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.

Credit Hours: 3
Prerequisites: ANTHRO 2020 or ANTHRO 2022

ANTHRO 4830: Ethnographic Methods
(cross-leveled ANTHO 7830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3
Recommended: ANTHRO 2030

ANTHRO 4840: The Comparative Method in Anthropology
(cross-leveled with ANTHRO 7840). Comparative methods provide common ground for uniting bio-cultural anthropologists, archaeologists, and evolutionary biologists together in the investigation of human variation across time and space. It is an exciting time for comparative anthropology with the emergence of a large number of open-access databases covering many realms of biological, cultural, and linguistic variation. This class addresses many research opportunities that are opened up by these large collaborative efforts. Objectives are to develop research questions of interest to students, compile comparative databases necessary to answer those questions, and learn tools and software relevant for running analyses. Graded on A-F basis only.

Credit Hours: 3

ANTHRO 4870W: Field Methods in Linguistics - Writing Intensive
(same as LINGST 4870, ENGLSH 4670; cross-leveled with ANTHRO 7870, LINGST 7870, ENGLSH 7670). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

Credit Hours: 4
Prerequisites: Contact the Linguistics advisor to request permission
Recommended: 9 hours of Linguistics

ANTHRO 4880: Demographic Anthropology
(cross-leveled with ANTHRO 7880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites: MATH 1100
Recommended: junior or senior standing

ANTHRO 4885: Anthropological Genetics
(cross-leveled with ANTHRO 7885). Population genetics theory and methods applied to human and primate evolution and variation.

Credit Hours: 3
Prerequisites: ANTHRO 2050, or ANTHRO 2051 and ANTHRO 2052, or BIO_SC 1500, or instructor's consent

ANTHRO 4890: Human Skeletal Identification and Analysis
(cross-leveled with ANTHRO 7890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.

Credit Hours: 5
Prerequisites: ANTHRO 2050 or ANTHRO 2052 or instructor's consent

ANTHRO 4950: Undergraduate Research in Anthropology
Advanced research approved by and under the direction of a departmental faculty member. Enrollment limited to Juniors and Seniors.

Credit Hour: 2-8
Prerequisites: instructor's consent

ANTHRO 4950H: Honors Research in Anthropology
Individual study and research leading to Honors in Anthropology. In consultation with instructor, student works on Honors Thesis. May be repeated for up to 6 credit hours. Enrollment is limited to Anthropology Majors with Junior Standing or higher, honors eligibility and a 3.5 GPA in Anthropology.

Credit Hours: 3
Prerequisites: instructor's consent

ANTHRO 4950HW: Undergraduate Research in Anthropology - Honors/Writing Intensive
Advanced research approved by and under the direction of a departmental faculty member. Enrollment limited to Juniors and Seniors with Honors Eligibility.

Credit Hour: 2-8
Prerequisites: instructor's consent

ANTHRO 4960: Undergraduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.

Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 4990: Capstone Seminar in Anthropology
Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

Credit Hours: 3
Prerequisites: Anthropology major and senior standing, or instructor's consent

ANTHRO 4990W: Capstone Seminar in Anthropology - Writing Intensive
Readings, discussions, and problems in the integration of the subfields of anthropology through theory and examples.

Credit Hours: 3
Prerequisites: Anthropology major and senior standing, or instructor's consent

ANTHRO 7001: Topics in Anthropology-General
Problems, topics, issues, or review of research; experimental development of new contact areas. Specific content varies depending on needs of faculty or students and will be announced in advance.

Credit Hours: 3

ANTHRO 7150: Special Themes in Folklore
(same as ENGLISH 7700; cross-leveled with ANTHRO 4150 and ENGLISH 4700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. May be repeated for a maximum of six hours. Instructor's consent for repetition.

Credit Hours: 3

ANTHRO 7170: Oral Tradition
(same as ENGLISH 7770; cross-leveled with ENGLISH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

Credit Hours: 3
Prerequisites: Instructor's consent

ANTHRO 7200: Environment and Archaeology
(cross-leveled with ANTHRO 4200). Study of quaternary environments and cultural systems. Focuses on North American records emphasizing climate and biologic components of regional ecosystems; regional environmental reconstruction.

Credit Hours: 3

ANTHRO 7280: Archaeology of Religion
(Same as REL_ST 7280; cross-leveled with ANTHRO 4280 and REL_ST 4280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

ANTHRO 7300: Comparative Social Organization
(cross-leveled with ANTHRO 4300). Cross-cultural comparison, analysis of social structures. Role of kinship, age, sex, locality, economics, religion and other factors in determining relationships between individuals and groups cross culturally.
biological explanations for shamanic trances and visions, mental health study this phenomenon. Particular topics to be discussed include adventurers, and how anthropology has come to understand and we will look at shamanism through time and in many cultures. We will seen in the shaman's mind during his shamanic rituals. In this course northern hunting peoples. The cave art also has entopic imagery that is holding objects resembling the rattles used by modern shamans among practitioners. Ancient cave paintings depict men dressed in animal skins, enemies, and weather control. Shamans are also the earliest ritual beings to ask for their help with a variety of tasks such as healing, killing possibility; methods for gathering and validating data; examples from non-Western societies. Several non-Western health care systems are studied in detail. Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. ANTHRO 4360). Cross-cultural study of belief systems concerning health and illness, practices of diagnosis and treatment, and roles of patients and practitioners. Several non-Western health care systems are studied in detail. Emphasis on archaeological evidence for development of human prehistory of Mesoamerica (Mexico and Northern Central America). ANTHRO 4650). Covers the archaeology and northwestern Mexico. The emphasis will be on prehistoric culture development from the Paleoindians to the arrival of the Spanish. ANTHRO 4640). The course will introduce students to American Indian culture. ANTHRO 4620). Ancient peoples and development of human biological variation both among and within living populations. Evolutionary, genetic, ecological, demographic and especially cultural factors which contribute to biological variation. ANTHRO 4580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4580). Principles of modern evolutionary theory are applied to medical problems. Topics include: function of symptoms (fever, nausea, etc.); strategies of pathogens; senescence; cancer; phylogenetic constraints; mental disorders. Ideas will be actively discussed in class. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation. ANTHRO 4620). Ancient peoples and development of American cultural factors which contribute to biological variation.
societies from late Pleistocene hunting bands to complex agricultural civilizations encountered by Europeans in 1500s.

Credit Hours: 3

ANTHRO 7680: Cultures and Peoples of the Amazon
(cross-leveled with ANTHRO 4680). Ethnographic survey of indigenous Amazonian cultures
Credit Hours: 3

ANTHRO 7700: Old World Prehistory
(cross-leveled with ANTHRO 4700). Beginnings of culture in the old world through the early Iron Age.
Credit Hours: 3

ANTHRO 7790: Cultures and Society in South Asia
(same as S_A_ST 7790; cross-leveled with ANTHRO 4790 and S_A_ST 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include cast, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian Diaspora.
Credit Hours: 3

ANTHRO 7800: Field Methods in Archaeology
Techniques of archaeological excavation; field surveying, recording, care and interpretation of materials.
Credit Hour: 1-8

ANTHRO 7820: Zooarchaeology
(cross-leveled with ANTHRO 4820). Survey of specialized techniques for archaeological/faunal analysis, including zoo archaeological sampling, taphonomy study of paleoecology, and recognition of domestication.
Credit Hours: 3

ANTHRO 7826: Stone Artifact Analysis
(cross-leveled with ANTHRO 4826). Theory, methods, and techniques of studying lithic artifacts and deriving culturally meaningful interpretations. Emphasizes flaked artifacts. Includes physical examination, manufacture and experimentation with stone tools.
Credit Hours: 3

ANTHRO 7828: Archaeological Analysis of Ceramics
(cross-leveled with ANTHRO 4828). To introduce students to the basic methods and concepts used in the archaeological analysis of pottery. By the end of the semester students will understand the various ways that pottery is created and how archaeologists can use ceramics to gain insights into everything from the organization of craft production to trade to symbolism.
Credit Hours: 3

ANTHRO 7830: Ethnographic Methods
(cross-leveled with ANTHRO 4830). Relation of problems to techniques; surveys techniques of gathering data; discusses their limitations and potentials.

Credit Hours: 3

ANTHRO 7870: Field Methods in Linguistics
(same as LINGST 7870 and ENGLISH 7670; cross-leveled with LINGST 4870 and ENGLISH 4670). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.
Credit Hours: 4
Prerequisites: instructor's consent
Recommended: 9 hours of linguistics

ANTHRO 7880: Demographic Anthropology
(cross-leveled with ANTHRO 4880). The major topics considered in this course are basic demographic analysis, including life tables, models for population growth and stable population theory; fertility analysis; disease and fertility; disease in human populations; and paleodemography.
Credit Hours: 3

ANTHRO 7885: Anthropological Genetics
(cross-leveled with ANTHRO 4885). Population genetic theory and methods applied to human and primate evolution and variation.
Credit Hours: 3
Prerequisites: ANTHRO 2050 and ANTHRO 2052 or BIO_SC 1500

ANTHRO 7890: Human Skeletal Identification and Analysis
(cross-leveled with ANTHRO 4890). Students interested in archaeology, physical anthropology, and law enforcement will learn human osteological methods of analysis applied to bioarchaeological problems and modern forensic techniques for personal identification.
Credit Hours: 5

ANTHRO 7950: Introduction to Post-Graduate Anthropology
How to succeed in graduate school and profession, and who is MU Anthropology. Introduces skills for success in graduate school, describes attributes of a professional anthropologist and how to find a job. Handouts and readings supplement discussions. Graded on S/U basis only.
Credit Hour: 1

ANTHRO 7960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 7990: Non Thesis Research in Anthropology
Original research not leading to the preparation of a thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 8010: History of Anthropology I
Development of anthropological theories, methods, perspectives, major figures and contributions in cultural and linguistic subfields.
ANTHRO 8090: Masters Thesis Research in Anthropology
Advanced work leading to thesis. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: consent of major advisor

ANTHRO 8157: Seminar in Folklore
(same as ENGLSH 8700 and REL_ST 8700). Roots of folklore scholarship and methodology; their evolution in modern approaches to the study of oral, traditional, verbal genres; and their performance in natural folk groups. May repeat to twelve hours with departments consent.
Credit Hours: 3

ANTHRO 8187: Seminar in Ecological Adaptation
Relationships and interactions between humans and their environments, with emphasis on the physical and cultural adaptations to environment. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8287: Seminar in Theory and Methods in Archaeology
Application of theory and conceptual frameworks to archaeological studies drawn from both Old and New Worlds. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8357: Seminar in Psychological Anthropology
Focuses on developments in psychological anthropology, cross-cultural psychology. Special attention on cognition, perception, socialization, personality assessment, psycho-cultural change, psycho-linguistics, psychometrics, within cross-cultural contexts. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8487: Seminar in Anthropological Linguistics
(same as LINGST 8487). Topics: Ethnolinguistics, linguistic prehistory, pidgin and Creole languages, linguistic theories and cultural and cultural analysis. French structural anthropology. May be repeated for 9 hours maximum.
Credit Hours: 3
Prerequisites: instructor's consent

ANTHRO 8587: Seminar in Physical Anthropology
Readings and discussion concerning current problems in human and nonhuman primate evolution, with emphasis on taxonomy, morphology, and behavior. May be repeated to 9 hours maximum.
Credit Hours: 3

ANTHRO 8687: Seminar in Cultural Dynamics
Focuses on geographical, topical, and/or theoretical developments within cultural anthropology. May be repeated to 6 hours maximum.
Credit Hours: 3

ANTHRO 8888: Analyzing Anthropological Data I
Provides students with the conceptual and analytic tools necessary to conduct and evaluate the analysis of anthropological data. Examples gleaned from archaeology, bioanthropology, ethnography, and linguistics will provide a broad perspective of the application and utility of the various methods discussed.
Credit Hours: 3

ANTHRO 8889: Analyzing Anthropological Data II
This course introduces a variety of conceptual tools and advanced quantitative methods that anthropologists use to analyze their data. It includes an introduction of common software packages used to manipulate and analyze anthropological data.
Credit Hours: 3
Prerequisites: ANTHRO 8888 or grad-level intro stats or instructor's consent

ANTHRO 8960: Graduate Readings in Anthropology
Directed readings in ethnology, linguistics, archaeology, or physical anthropology not leading to thesis.
Credit Hour: 1-99
Prerequisites: instructor's consent

ANTHRO 8987: Seminar in Formal Anthropological Research Design
Methods of fitting statistical and formal research designs to quantitative and qualitative data discussed and illustrated, with research by participants. May be repeated to 9 hours maximum.
Credit Hours: 3
Prerequisites: introductory course in statistics

ANTHRO 8990: Non Thesis Research in Anthropology
Original research not leading to the preparation of a dissertation.
Credit Hour: 1-99
Prerequisites: consent of major advisor

ANTHRO 9090: Doctoral Dissertation Research in Anthropology
Advanced work leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: consent of major advisor

Arabic (ARABIC)

ARABIC 1100: Elementary Arabic I
For beginners with no prior knowledge of Arabic. An elementary level course designed to facilitate student's acquisition of basic proficiency in communication within culturally significant contexts. Students learn Modern Standard Arabic language skills in an environment integrating interactive video and classroom instruction.
Credit Hours: 6
### ARABIC 1200: Elementary Arabic II
This course builds upon the foundation established in ARABIC 1100. Greater emphasis is placed on oral and written expression. Cultural issues are explored in an environment integrating interactive video and classroom instruction.

**Credit Hours:** 6  
**Prerequisites:** C- or higher in ARABIC 1100, or instructor's permission

### ARABIC 2005: Undergraduate Topics in Arabic - Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.

**Credit Hour:** 1-3  
**Prerequisites:** sophomore standing or instructor's consent

### ARABIC 2130: Intermediate Arabic
Builds on students' knowledge of Elementary Arabic by investing in four language skills of listening, speaking, reading, and writing. Course is culturally oriented and considers various social, political, and religious forces to play in Arab world. Offers a unique blend of modern standards and colloquial Arabic. Enables students to develop listening comprehension, initiate and sustain conversations on daily-life topics, read texts on familiar topics, and write informal essays on topics, and write informal essays on topics connected to daily life.

**Credit Hours:** 3  
**Prerequisites:** ARABIC 1200 or equivalent

### ARABIC 2210: Understanding Visualization for Animated Films
Provides a critical overview of design and visualization techniques in animated film-making. Emphasizes the role of the built environment and spatial design features.

**Credit Hours:** 3

### ARABIC 2220: Introduction to CAD
Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

**Credit Hours:** 3  
**Recommended:** ARCHST 1200

---

### Architectural Studies (ARCHST)

### ARCHST 1005: Topics in Architectural Studies - Humanities
Organized study of selected topics in architectural studies. Particular topic and earnable credit may vary by semester. May be repeated for credit up to 6 credit hours.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

### ARCHST 1100: Visual Design
Design study as an introduction to basic design and visual composition with application to creating two- and three-dimensional abstract and/or functional design work. Studio exercises expressed through drawings and abstract models, using various media.

**Credit Hours:** 3

### ARCHST 1200: Architectural Drafting and Working Drawings
Beginning drafting including equipment and materials; lettering; floor plans, sections, elevations; orthographic and axonometric drawings; working drawings; and details.

**Credit Hours:** 3

### ARCHST 1600: Fundamentals of Environmental Design
Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000

### ARCHST 1600W: Fundamentals of Environmental Design - Writing Intensive
Survey of the architectural environment emphasizing design fundamentals such as use, aesthetics, stability of structures and human relationships with places and time.

**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000

### ARCHST 2085: Problems in Architectural Studies
Supervised independent work.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

### ARCHST 2100: Understanding Architecture and the American City
Multifaceted introduction to the architectural and social roots of urban form in the U. S.: historic precedents from around the world; growth, decline and revival of cities; rise of suburbia; tradition and transformation in campus communities; continuing housing challenges; sustainable design and the future of urbanism. Explores a diverse range of opportunities to improve communities available to professionals and general public.

**Credit Hours:** 3

### ARCHST 2210: Understanding Visualization for Animated Films
Provides a critical overview of design and visualization techniques in animated film-making. Emphasizes the role of the built environment and spatial design features.

**Credit Hours:** 3

### ARCHST 2220: Introduction to CAD
Introduction to computer-aided drafting and design with AutoCad software. Emphasis will be placed on development of skills and problem solving related to the professions of environmental and interior design.

**Credit Hours:** 3  
**Recommended:** ARCHST 1200
ARCHST 2230: Design Communication I
A course introducing techniques and conventions of digitally-mediated graphic communication as aids in the design process.
Credit Hours: 3
Prerequisites: ARCHST 2220 and ARCHST 2811

ARCHST 2310: Building Systems
Integrated building systems: structure, construction, technology, comfort; including voice-data communication, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems; and project estimating.
Credit Hours: 3

ARCHST 2315: Introduction to Building Systems Laboratory
Building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. All equipment training and safety is covered in this introductory course.
Credit Hour: 1

ARCHST 2316: Advanced Building Systems Lab
Advanced exposure to building system renovations, materials, processes, finishes, and applications testing: furniture design, fabrication, finishing, lighting, concrete and masonry, wood and steel light framing construction, and mock-up fabrication and testing. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: ARCHST 2315

ARCHST 2323: Sustainable Building Design Fundamentals
Environmental concerns addressed by green building design practices for consumers and owners of homes and businesses. Overview of how green buildings improve prospects for ecology, economy, social equity, and human health. Hands-on lab experiments reference national performance standards for decision making in sustainable building projects. Emphasis on energy and water use, sustainable sites, environmentally friendly building products, indoor air quality, and design for sustainable behaviors. Graded on A-F basis only.
Credit Hours: 3

ARCHST 2620: People, Places and Design
Understanding human behavior and interaction with environments; the influence of architectural design on built places. Practical application for design.
Credit Hours: 3

ARCHST 2811: Studio I
Application of basic design and composition to built form. Studio exercises in two and three dimensions using various media relating to usable spaces. Formation of design concept, development of form and space, and application in built environment.
Credit Hours: 4
Prerequisites: instructor's consent

ARCHST 3100: Color and Light
The theory, application, and specification of color and light for interior and architectural design. Includes assigned lab exercises for color and light portfolio.
Credit Hours: 3

ARCHST 3182: Studio II
Application of basic design principles to built forms and functional spaces. Identification and manipulation of elements of design, understanding spatial relationships between human body and spatial enclosures related to built forms. Spatial organization and familiarity with role of immediate context.
Credit Hours: 4
Prerequisites: ARCHST 2310 and ARCHST 2811

ARCHST 3230: Advanced Design Communication Using BIM
Advanced course in techniques and conventions of computer aided design (CAD) and Building Information Modeling (BIM) for contemporary design process.
Credit Hours: 2
Prerequisites: ARCHST 2230

ARCHST 3600: Environmental Analysis
Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.
Credit Hours: 3
Prerequisites: ARCHST 2811

ARCHST 3600W: Environmental Analysis - Writing Intensive
Discover through analytical methods of primary organizational factors which operate in a building and reveal the preoccupations of designer. Analytical approach investigates design principles by means of dissection.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and ARCHST 2811

ARCHST 3860: Human Factors Programming
Design Programming for Human Factors using a Case Study.
Credit Hours: 3
Recommended: ARCHST 1600

ARCHST 3860W: Human Factors Programming - Writing Intensive
Design Programming for Human Factors using a Case Study.
Credit Hours: 3
Recommended: ARCHST 1600

ARCHST 4001: Topics in Architectural Studies
Selected current topics in field of interest.
Credit Hour: 1-99

ARCHST 4085: Problems in Architectural Studies
Supervised independent work.
ARCHST 4320: Materials, Methods and Products
Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.
Credit Hours: 3
Prerequisites: ARCHST 2310

ARCHST 4323: Sustainable Technologies and Systems
An in-depth study of ecologically-sensitive and energy-efficient strategies used in building and interiors. Prerequisites: MATH 1100 or equivalent or MATH 1160 or higher level of math: MATH 1400 or MATH 1500.
Credit Hours: 3

ARCHST 4325: Energy-Efficient Building Design
Broad study of energy use and energy-efficient strategies for buildings. Course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies.
Credit Hours: 3
Prerequisites: MATH 1100

ARCHST 4333: Compliance and Specifications
Application of laws, codes, regulations, standards in specifying for life safety, barrier-free and universal design, lighting, human factors, and contract documents.
Credit Hours: 3
Prerequisites: ARCHST 2220 and ARCHST 2811

ARCHST 4355: Recent Trends in Digital Media I
Recent Trends in Digital Media I
Credit Hour: 1-99

ARCHST 4411: Study Abroad in Architectural History
Discovery of historic architecture through on-site tour of timeless cities and places. May be repeated for credit.
Credit Hour: 1-3
Prerequisites: instructor's consent

ARCHST 4430: Guiding Design with Historic Preservation
(cross-leveled with ARCHST 7430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.
Credit Hours: 3
Recommended: American History or Government, or Art History

ARCHST 4435: History of the Designed Environment to 1750
An in-depth study of the designed environment including interiors, architecture, art, and the decorative arts within the major historical periods and cultural context from prehistory to the Industrial Revolution.

ARCHST 4440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution (cross-leveled with ARCHST 7440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.
Credit Hours: 3

ARCHST 4555: Recent Trends
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.
Credit Hour: 1-99

ARCHST 4630: Shaping Human Settlements
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.
Credit Hours: 3

ARCHST 4700: Place-Making in Community Design
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.
Credit Hours: 3

ARCHST 4710: Design Business Practices
Analysis of basic professional, human, and business skills necessary for the successful design practice. Studio work in development of portfolio and self-marketing materials with refinement through critiques.
Credit Hours: 3
Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824

ARCHST 4760: Healthcare Facilities Design (cross-leveled with ARCHST 7760). Health care facilities design and planning course provides an in-depth investigation of best practice examples. Design and research methods include evidence-based design, simulation, and space syntax analysis leading to high-performance healthcare design. Graded on A-F basis only.
Credit Hours: 3
Recommended: senior standing

ARCHST 4813: Interiors Studio III
Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design processes. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specific to interiors.
Credit Hours: 4
Prerequisites: ARCHST 3182

ARCHST 4814: Interiors Studio IV
Continuation of ARCHST 4813. Manipulation of form and space responding to programmatic functions and activities, and constraints
imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces—both vertically and horizontally.

Credit Hours: 4
Prerequisites: ARCHST 4813

ARCHST 4815: Construction Documents and Building Information Modeling Studio
Studio of how materials, systems, and assemblies reinforce and extend intentions of designers. Course teaches strategies and techniques for integration and coordination of the building components and details in construction documents and building information modeling.

Credit Hours: 4
Prerequisites or Corequisites: ARCHST 3230, ARCHST 4814 or ARCHST 4824, ARCHST 4860, ARCHST 4990

ARCHST 4823: Architectural Studio III
Continuation of ARCHST 3182. Spatial morphology, organization pattern, construction methods, materials, systems, and processes and integration with total design process. Space planning and spatial manipulation in response to social, environmental, functional, and aesthetics specifics to architecture.

Credit Hours: 4
Prerequisites: ARCHST 3182

ARCHST 4824: Architectural Studio IV
Continuation of ARCHST 4823. Manipulation of form and space responding to programmatic functions and activities, and constraints imposed by structure, building materials, spatial enclosure, and related factors. Projects may involve designing single-function space to multiple-function layered spaces - both vertically and horizontally.

Credit Hours: 4
Prerequisites: ARCHST 4823

ARCHST 4860: Programming for Thesis Design Studio
Develop written comprehensive program for thesis design studio project.

Credit Hour: 1
Prerequisites or Corequisites: ARCHST 4814 or ARCHST 4824
Prerequisites: ARCHST 2620

ARCHST 4940: Internship in Environmental Design
Field experience in design under professional and educational supervision. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

ARCHST 4960: Readings in Architectural Studio
Readings in recent research materials.

Credit Hour: 1-99

ARCHST 4961: Design Research and Service Design
(cross-leveled with ARCHST 7961). Provides an overview of applied research methods for design and development of products, services and environments. Introduces human-centered approach to design research and Communication of research findings to informed design concepts.

Credit Hours: 3
Recommended: senior standing

ARCHST 4962: Information Visualization and Visual Analytics
(cross-leveled with ARCHST 7962). Foundation for information visualization and deals with external representation and interactive manipulation of information, data or artifacts using digital tools to enhance communication, analytical reasoning and decision-making.

Credit Hours: 3
Recommended: senior standing

ARCHST 4963: Human Factors Research for Design
(cross-leveled with ARCHST 7963). Investigate effect of people's physical psychological, social functions in environments of differing scales. Use research techniques of photo-interviewers, mapping, and user analysis to develop an appropriate program for redesign.

Credit Hours: 3
Recommended: ARCHST 3860

ARCHST 4964: Design Thinking and Creative Process
(cross-leveled with ARCHST 7964). Analysis of how designers think, solve design problems, and engage in the creative process. Includes design methods, design cognition computations, and design protocol studies.

Credit Hours: 3
Recommended: ARCHST 4813 or ARCHST 4823

ARCHST 4990: Thesis Design Studio
Comprehensive studio project as a synthesis of previous work in addressing a design problem defined in ARCHST 4860.

Credit Hours: 4
Prerequisites: ARCHST 3230, ARCHST 4860, ARCHST 4814 or ARCHST 4824

ARCHST 7001: Topics in Environmental Design
Selected current topics in field of interest.

Credit Hour: 1-99

ARCHST 7085: Problems in Environmental Design
Supervised independent work.

Credit Hour: 1-99
Prerequisites: 3000-level course in field of problem and instructor's consent

ARCHST 7232: Graduate Design Communication I
Studio course in techniques and conventions of graphic communication as an aid in the design process of built forms.

Credit Hours: 3
ARCHST 7310: Graduate Building Systems
Integrated building systems; structure construction, technology, comfort; including voice-communications, safety, floor, wall, ceiling, mechanical, electrical, and plumbing systems, project estimating and management.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120

ARCHST 7315: Graduate Systems Laboratory
Experimental learning setting involving building construction systems, renovation, materials and finishes testing and experimentation. Focus on hands-on opportunities investigating building technology properties in detail. Laboratory 3 hrs/week.
Credit Hour: 1-9

ARCHST 7320: Materials, Methods and Products
Inherent qualities of materials used in the design of interior environments. Manufacturing, application, and installation methods. Focus on environmentally sensitive materials.
Credit Hours: 3
Prerequisites: MATH 1100 or MATH 1120

ARCHST 7323: Sustainable Technologies and Systems
An in-depth study of ecologically-sensitive and energy-efficient strategies used in buildings and interiors.
Credit Hours: 3

ARCHST 7325: Energy-Efficient Building Design
This course is a broad study of energy use and energy-efficient strategies for buildings. The course will cover the fundamentals of climate-based design, energy-efficient heating/cooling/daylighting strategies, alternative energy systems applicable to buildings, energy auditing/modeling/verification, applicable building energy codes, and high performance building technologies. Recommended for graduate students with undergraduate degrees and experience in engineering, architecture, and/or building science.
Credit Hours: 3

ARCHST 7355: Recent Trends in Digital Media I
Recent Trends in Digital Media I
Credit Hour: 2-4

ARCHST 7430: Guiding Design with Historic Preservation
(cross-leveled with ARCHST 4430). Approaches to historic preservation; historic roots of architecture and interiors; regulations and design guidelines governing intervention; assessing significance of historic properties.
Credit Hours: 3
Prerequisites: American History or Government or Art History or instructor's consent

ARCHST 7440: Design Precedents: Architecture, Interiors and Furniture since the Industrial Revolution
(cross-leveled with ARCHST 4440). Analysis of historical exemplars of architecture, interiors and furniture design offering strategies for approaching contemporary design problems. Covers design precedents from industrial revolution to contemporary design.
Credit Hours: 3

ARCHST 7555: Recent Trends in Environmental Design
Upper-division students seeking additional knowledge in specific subject matter areas including digital media software.
Credit Hour: 1-99

ARCHST 7620: Environment and Behavior
Evaluate relationships between human behavior and environmental design. Survey of environment and behavior theoretical foundations examining how these concepts translate into a more responsive theory of design.
Credit Hours: 3

ARCHST 7630: Shaping Human Settlements
Review classic designs and designers, key concepts and enduring issues of community design within the overall framework of environmental design.
Credit Hours: 3

ARCHST 7700: Place-Making in Community Design
Ideologies, case studies and participatory methods on place-making in community design. Use processes to design a place-making scheme in actual community project.
Credit Hours: 3

ARCHST 7840: Graduate Design Studio
Advanced graduate level design experience emphasizing project complexity, design skill refinement, and optional development of thesis project strategies.
Credit Hours: 3
Prerequisites: instructor's consent

ARCHST 7940: Internship in Environmental Design
Field experience in design under professional and educational supervision. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

ARCHST 7960: Readings in Environmental Design
Readings in recent research materials.
Credit Hour: 1-99

</table>
ARCHST 8950: Qualitative Research Methods
Explores qualitative research methods as foundation for subsequent study. Focuses on qualitative research of the built environment. Course may be repeated for credit.
Credit Hours: 3

ARCHST 8960: Readings in Environmental Design
Readings in recent research materials.
Credit Hours: 1-99
Prerequisites: ARCHST 4960 or ARCHST 7960

ARCHST 8990: Thesis Project Proposal
The formal opportunity to express the intent and scope of the thesis project.
Credit Hours: 1
Prerequisites: instructor's consent

ARCHST 9085: Problems in Environmental Design
Credit Hours: 1-99
Prerequisites: 4000-level course in field of problem and instructor's consent

ARCHST 9090: Doctoral Research in Environmental Design
Independent research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hours: 1-99

ARCHST 9095: Pilot Project for Dissertation
Working with advisor, student proposes, conducts, and reports the findings from a pilot study germane to the dissertation topic in preparation for the dissertation research.
Credit Hours: 1-99
Prerequisites: instructor's consent

ARCHST 1005: Undergraduate Topics in Visual Studies - Art History - Humanities
Special studies in Visual Studies - Art History.
Credit Hours: 1

ARCHST 1010: Introduction to Museum of Art and Archaeology, UMC
This course is a brief introduction to the Museum of Art and Archaeology on Francis Quadrangle. Special attention will be given to the history of the Museum, its operation and to its collection. Guest lecturers from the Museum will provide first hand accounts of their contributions to the day-to-day operations of the Museum and to the academic mission of the University.
Credit Hours: 1

ARCHST 1020: Giotto and the Arena Chapel
This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.
Credit Hours: 1

ARCHST 1020H: Giotto and the Arena Chapel - Honors
This course is a brief introduction to one of the major monuments of western art, the Area (or Scrovegni) Chapel of Giotto di Bondone. Special attention will be given to stories about him by Renaissance authors.
Credit Hours: 1-11
Prerequisites: Honors eligibility required

ARCHST 1030: Early Works of Michelangelo
This course is a brief introduction to the life and work of Michelangelo. Special attention will be given to his early works and to stories about him, especially those by Giorgio Vasari in his Lives of the Artist, Florence, 1568.
Credit Hours: 1

ARCHST 1040: Rembrandt
This course is a brief introduction to the life and work of the seventeenth-century Dutch painter Rembrandt van Rijn. Special attention is give to the appreciation of his art by his contemporaries.
Credit Hours: 1

ARCHST 1105: Undergraduate Topics in Visual Studies - Art History - Humanities
Special studies in Visual Studies - Art History.
Credit Hours: 3

ARCHST 1110: Ancient and Medieval Art
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.
Credit Hours: 3

ARCHST 1110H: Ancient and Medieval Art - Honors
Introductory survey of the architecture, sculpture and painting of the ancient Near East, Greece, Rome, Byzantium and Medieval Europe.
Credit Hours: 3
Prerequisites: Honors eligibility required

</tbody>
</table>
ARH_VS 3785: Arts and Artists on Film  
(same as FILMS_VS 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.  
Credit Hours: 3  
Prerequisites: VS_ARH 1110, VS_ARH 1120, VS_ARH 1130 or consent of instructor

ARH_VS 3790: Indian Cinema  
(same as ANTHRO 3490, S_A_ST 3490, FILMS_VS 3490). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.  
Credit Hours: 3  
Recommended: Sophomore standing or higher

ARH_VS 3830: American Art and Culture, 1500-1820  
General survey of American visual culture - painting, sculpture, architecture-between 1500 and 1820.  
Credit Hours: 3  
Recommended: ARH_VS 1120 or equivalent

ARH_VS 3840: American Art and Culture, 1820-1913  
General survey of American visual culture - painting, sculpture, architecture, photography - between 1820-1913.  
Credit Hours: 3  
Recommended: ARH_VS 1120 or ARH_VS 2830 or equivalent

ARH_VS 3850: American Art and Culture, 1913-Present  
General survey of American visual culture - painting, sculpture, architecture, photography, advertising, film, new media - between 1913 and the present.  
Credit Hours: 3  
Recommended: ARH_VS 1120 or ARH_VS 2830 or equivalent

ARH_VS 4005: Topics in Visual Studies - Art History-Humanities  
Special studies in art history/archaeology; covers subjects not included in regularly offered courses.  
Credit Hours: 1-99  
Prerequisites: instructor's consent

ARH_VS 4120: Gender and the Arts  
(same as WGST 4120; cross-leveled with WGST 7120, VS_ARH 7120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4160: Global Encounters in Art History  
(cross-leveled with ARH_VS 7160). This course explores art created as a result of contact between geographical regions across the globe. It contributes to the project of globalizing art history, namely reorienting art history's traditionally Euro-American focus to an approach that involves cultures from diverse regions of the world.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4450: Gothic Art and Architecture  
(cross-leveled with ARH_VS 7450). This course explores art created as a result of contact between geographical regions across the globe. It contributes to the project of globalizing art history, namely reorienting art history's traditionally Euro-American focus to an approach that involves cultures from diverse regions of the world.  
Credit Hours: 3  
Recommended: Sophomore standing or higher

ARH_VS 4530: Romanesque Art and Architecture  
(cross-leveled with VS_ARH 7530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4540: Gothic Art and Architecture  
(cross-leveled with VS_ARH 7540). Exploration of topics in the art and architecture of the 12th through the 14th century.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4630: The Renaissance Artist  
(cross-leveled with VS_ARH 7630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4640: Renaissance and Baroque Architecture  
(cross-leveled with VS_ARH 7640). Problems in European architectural history from the 15th through the 18th century.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4650: Venetian Painting  
(cross-leveled with VS_ARH 7650). Survey of Venetian Painting from the 14th through the 18th century.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4660: Art and Ideas in the Northern Renaissance  
(cross-leveled with VS_ARH 7660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.  
Credit Hours: 3  
Prerequisites: instructor's consent

ARH_VS 4710: The Arts of the Rococo  
(cross-leveled with VS_ARH 7710). This course explores European Art from approximately 1710 to 1770, focusing on art associated with two different social sectors: The early modern aristocratic court culture whose artistic predilections had formed the European norm, and the increasingly powerful merchant classes whose newfound wealth enabled new artistic genres and styles to proliferate. Our inquiry begins with an exploration of the rococo as an ornamental style; we examine its origins in Italian garden architecture and subsequent transformation into a decoration for both French palatial interiors and German Churches. We then launch a succession of case studies of important artists, media, and objects in order to assess the varied ways that diverse social identities were
deflected through the periods' art and architecture. Students will pursue a research topic on rococo art for their semester project.

ARH_VS 4720: Revolution and Romanticism: Art C. 1800
(cross-leveled with VS_ARH 7720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions. May be repeated for credit.

ARH_VS 4740: Modern Architecture
(cross-leveled with VS_ARH 7740). Problems in the history of architecture from the late 18th century to the present.

ARH_VS 4750: Contemporary World Architecture
(cross-leveled with VS_ARH 7750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. As with any course treating such a large body of material, this one will be selective topical rather than comprehensive in nature. The format will include lectures, discussions based on reading, writing, and research assignments, films, and field trips. Graded on A-F basis only.

ARH_VS 4760: Modern Sculpture
(cross-leveled with VS_ARH 7760). Sculpture in Europe and the U.S. ca. 1880 to the present, with special emphasis on changing definitions of the medium.

ARH_VS 4780: Advanced Course in Contemporary Art
(cross-leveled with VS_ARH 7780). Topics in European and American painting and sculpture after 1950.

ARH_VS 4820: American Material Culture
(cross-leveled with VS_ARH 7820). An exploration of American material culture from a multidisciplinary perspective.

ARH_VS 4840: American Architecture
(cross-leveled with VS_ARH 7840). An exploration of architecture and urbanism from the colonial period to the present.

ARH_VS 4960: Special Readings in Visual Studies - Art History
Independent readings and research selected in consultation with supervisory faculty.

ARH_VS 4970: Capstone: Visual Studies - Art History
Students will write an expanded, guided research paper. The Capstone student will consult on a regular basis with the professor responsible for the course and will make an oral presentation of the paper in the course. Must be taken in conjunction with a 4000-level Art History and Archaeology course.

ARH_VS 4980: Internship
A one-semester or full summer intensive internship for departmental majors with specific projects and responsibilities to be arranged by the student in cooperation with a faculty member and an appropriate agent of the museum involved. May be taken as an elective only. May be repeated for a maximum of 6 hours credit.

ARH_VS 4996: Honors Proseminar I
Research methods, bibliography, use and criticism of source material.

ARH_VS 4999: Honors Reading and Research I
Individual research projects in preparation of senior thesis.

ARH_VS 7005: Topics in Visual Studies - Art History
Special studies in Visual Studies - Art History; covers subjects not included in regularly offered courses.

ARH_VS 7120: Gender and the Arts
(same as WGST 7120; cross-leveled with WGST 4120, VS_ARH 4120). Exploration of the relationship between the visual arts and constructions of gender and sexuality in selected eras.

ARH_VS 7130: Museum Studies
Functions and history of museums and interrelations among departments, including those of director, curator, registrar, education, conservation, and marketing. Topics include acquisitions policies; public outreach; role of architecture; and philosophical and legal issues pertaining to administration of museums.
ARH_VS 7160: Global Encounters in Art History
(cross-leveled with ARH_VS 4160). This course explores art created as a result of contact between geographical regions across the globe. It contributes to the project of globalizing art history, namely reorienting art history's traditionally Euro-American focus to an approach that involves cultures from diverse regions of the world.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7170: Historic Preservation
(same as HIST 7450; cross-leveled with HIST 4540). Survey of the historic preservation movement and techniques by faculty and guest speakers active in the field.
Credit Hour: 3-9
Prerequisites: instructor's consent

ARH_VS 7530: Romanesque Art and Architecture
(cross-leveled with VS_ARH 4530). Exploration of topics in the art and architecture of Europe from the 10th through the 12th centuries.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7540: Gothic Art and Architecture
(cross-leveled with VS_ARH 4540). Exploration of topics in the art and architecture of the 12th through the 14th century.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7630: The Renaissance Artist
(cross-leveled with VS_ARH 4630). Lectures, readings, discussions and a research paper related to the Renaissance artist. Focus will be on representations of the artist in art and literature from ca. 1300 to ca. 1650.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7640: Renaissance and Baroque Architecture
(cross-leveled with VS_ARH 4640). Problems in European architectural history from the 15th through the 18th century.
Credit Hours: 3
Prerequisites: departmental consent

ARH_VS 7650: Venetian Painting
(cross-leveled with VS_ARH 4650). Survey of Venetian painting from the 14th through the 18th century.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7660: Art and Ideas in the Northern Renaissance
(cross-leveled with VS_ARH 4660). Discussion of selected topics in painting and sculpture and their artistic and cultural relationships from the 14th through the 16th century in northern Europe.

ARH_VS 7670: Baroque Figural Arts
(cross-leveled with VS_ARH 4670). Painting and sculpture of Italy in the 17th century.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7710: The Arts of the Rococo
(cross-leveled with VS_ARH 4710). This course explores European art from 1710 to 1770, beginning with an exploration of the rococo as an ornamental language and then moving to case studies of artists, media, and objects in order to assess how social identities were expressed through design.
Credit Hours: 3
Prerequisites: VS_ARH 8110 and instructor's consent

ARH_VS 7720: Revolution and Romanticism: Art Circa 1800
(cross-leveled with VS_ARH 4720). This course examines European art from circa 1780 to 1820, focusing on art made in conjunction with the major events of the French Revolution, its aftermath, and its global repercussions.
Credit Hours: 3
Prerequisites: VS_ARH 8110 and instructor's consent

ARH_VS 7730: Realism Through Post-Impressionism
(cross-leveled with VS_ARH 4730). Styles and issues in nineteenth-century art.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7740: Modern Architecture
(cross-leveled with VS_ARH 4740). Problems in the history of architecture from the late 18th century to the present.
Credit Hours: 3
Prerequisites: instructor's consent

ARH_VS 7750: Contemporary World Architecture
(cross-leveled with VS_ARH 4750). This course will study key themes, events, and figures in architectural theory and practice from around the world since the 1960s. Art Ceramics - Visual Studies (ARTCE_VS)

ARTCE_VS 2100: Beginning Ceramics
Exploration of ceramic art as an expressive, communicative medium. Study of ceramic design, technique and historic and contemporary models within the context of the creative process. Group critiques, slides, demonstrations. Expendable materials fee.

Credit Hours: 3
Prerequisites: instructor's consent

ARTCE_VS 3100: Intermediate Ceramics
Continuation of ARTCE_VS 2100 with emphasis on wheel throwing and the vessel format. Further exploration of glazing and firing techniques. Group and individual critiques, demonstrations, slide lectures and visiting artists. Expendable materials fee.

Credit Hours: 3
Prerequisites: instructor's consent

ARTCE_VS 4100: Advanced Ceramics
Continuation of ARTCE_VS 3100. Includes advanced problems in firing, clay and glaze technology, forming and ornamentation. Payment of expendable materials fee required. May be repeated to 15 hours maximum.

Credit Hours: 3
Prerequisites: instructor's consent

ARTCE_VS 4110: Ceramics Sculpture
Sculptural forms constructed of slabs, coils and wheel thrown elements. Payment of expendable materials expense is required. May be repeated to 15 hours maximum.

Credit Hours: 3
Prerequisites: instructor's consent required

ARTCE_VS 4185: Problems in Ceramics
Problems in Ceramics.

Credit Hours: 1-3
Prerequisites: departmental consent

ARTCE_VS 7100: Graduate Ceramics
Advanced study of ceramic technology and design concepts with emphasis on directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3
Prerequisites: ARTCE_VS 4100

ARTCE_VS 7110: Graduate Ceramic Sculpture
Directed development of individual work. Payment of expendable materials expense is required. May be repeated to 18 hours maximum.

Credit Hours: 3
Prerequisites: ARTCE_VS 4100

Art Drawing - Visual Studies (ARTDR_VS)

ARTDR_VS 1050: Drawing: Materials and Methods
This course focuses on the fundamentals of visual hierarchy, composition, and pictorial space in drawing. Emphasis on linear perspective and the language of light and shadow using black and white media (graphite, charcoal and/or conte crayon). Development of skills and concepts in drawing based on historical models, lectures, demonstrations and critiques. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210

ARTDR_VS 1050 - MOTR PERF 105D: Studio Art-Drawing

ARTDR_VS 2210: Beginning Color Drawing
Theory and practice in the use of colored pencil, as well as oil and chalk pastel, working from still life, landscape, and portrait. This class is the second class in the drawing sequence. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ARTDR_VS 1050

ARTDR_VS 3200: Portrait Drawing
Development of drawing techniques with an emphasis on the portrait. May be repeated to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210
ARTDR_VS 3210: Intermediate Color Drawing
Continuation of ARTDR_VS 2210 with emphasis on design and organization. May be repeated to 9 hours maximum. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210

ARTDR_VS 3220: Anatomical Drawing
Anatomical structure of human figure as it relates to art. Drawing from live model; emphasis on gross anatomy as defined by skeletal and muscular structure. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210

ARTDR_VS 3230: Beginning Illustration
An introduction to visual problem solving from initial concept through final execution. Emphasis in drawing and painting skills and exploration of mixed media techniques including drawing from the model. Graded on A-F basis only. Expendable materials fee.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210

ARTDR_VS 3240: The Graphic Novel
This drawing course focuses on sequential narrative art and its relationship to the graphic novel. The term, "graphic novel" represents a broad range of styles, formats and genres from simple comics to highly rendered illustrations. Lectures provide an introduction to some of the most highly respected works from the early twentieth century onward. Expendable materials fee required. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210

ARTDR_VS 4200: Drawing IV
This course will provide an intensive experience in the development of a portfolio of artwork. Students will explore the connections between their work and contemporary art. May be repeated 3 times. Expendable Materials Fee Required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050, ARTDR_VS 2200 and ARTDR_VS 3200

ARTDR_VS 4210: Advanced Color Drawing
Continuation of ARTDR_VS 3210 with emphasis on the expressive properties of color in figurative compositions. Repeatable to 15 hours. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050, ARTDR_VS 2210 and ARTDR_VS 3210

ARTDR_VS 4220: Advanced Anatomical Drawing
Continuation of ARTDR_VS 3220 with emphasis on analysis of the figure in drawing based on superficial and deep anatomical structure. May be repeated to 15 hours maximum. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050, ARTDR_VS 2210 and ARTDR_VS 3220

ARTDR_VS 4230: Advanced Illustration
Further development of conceptual problem solving skills and technical proficiency through self generated assignments. Emphasis is placed on portfolio development by exploring sequential and narrative themes. Topics include contract, copyrights, and the art of freelancing. Students are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 1050 and ARTDR_VS 2210
Recommended: ARTDR_VS 3230

ARTDR_VS 4285: Problems in Drawing
Problems in Drawing.
Credit Hour: 1-3
Prerequisites: departmental consent

ARTDR_VS 7200: Graduate Drawing
Drawing with emphasis on individual creative expression. May repeat to 18 hours maximum. Expendable materials fee required.
Credit Hours: 3
Prerequisites: graduate Art major

ARTDR_VS 7285: Problems in Drawing
Credit Hour: 1-3
Prerequisites: ARTDR_VS 7200 and departmental consent

ARTDR_VS 8200: Advanced Graduate Drawing
Continuation of ARTDR_VS. Repeatable to 15 hours.
Credit Hours: 3
Prerequisites: ARTDR_VS 7200 or equivalent

ARTDR_VS 8270: Graduate Drawing - Theory and Context
Contextualizing artwork in culture, history, and theory, May be repeated to 18 hours for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Graduate Art Majors

ARTFI_VS 2300: Beginning Fibers
Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.
Credit Hours: 3
Prerequisites: ARTDR_VS 2210 and ARTDR_VS 3200 before taking this class

ARTFI_VS 3300: Intermediate Fibers
Continuation of ARTFI_VS 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface

Art Fibers - Visual Studies (ARTFI_VS)

ARTFI_VS 2300: Beginning Fibers
Exploration of various fiber and media including papermaking, weaving, surface design and sculptural techniques. Expendable materials fee required.
Credit Hours: 3

ARTFI_VS 3300: Intermediate Fibers
Continuation of ARTFI_VS 2300 with emphasis on utilizing acquired technical processes in loom and off weaving, paper making and surface
design and a means of developing visual statements. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ARTFI_VS 2300

ARTFI_VS 4300: Advanced Fibers
Exploration of aesthetic concepts, development of personal style and instruction in advanced fiber techniques within medium selected by student. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ARTFI_VS 3300 or approved equivalents

ARTFI_VS 4385: Problems in Fibers
Problems in Fibers.
Credit Hour: 1-3
Prerequisites: departmental consent

ARTFI_VS 7300: Graduate Fibers
Advanced technical and aesthetic study in medium of choice with emphasis on development of the individual student's ideas and goals. Expendable materials fee required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ARTFI_VS 4300

ARTFI_VS 7385: Problems in Fibers
Graduate level work in fibers.
Credit Hour: 1-3
Prerequisites: ARTFI_VS 7300 and departmental consent

ARTFI_VS 8300: Graduate Fibers II
Continuation of ART_FIBR 7300. Repeatable to 15 hours.
Credit Hours: 3
Prerequisites: ARTFI_VS 7300 or equivalent

Art Graphic Design - Visual Studies (ARTGD_VS)

ARTGD_VS 1400: Beginning Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1

ARTGD_VS 2400: Advanced Digital Imaging
Class will cover the basic tools used in digital imaging software. A variety of different software may be offered. Course may be repeated for up to 3 hours with the consent of instructor. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: ARTGD_VS 1400

ARTGD_VS 2410: Graphic Design I
Emphasis on developing a design language and vocabulary. Projects explore visual images in two-dimensional space, each one focusing on a specific set of relationships. Introduction to methodological and research practices for designers. Course concludes with portfolio review for admission to ARTGD_VS2420 and further Graphic Design Courses. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ARTGN_VS 1030, ARTDR_VS 1050; restricted to BA/BFA art majors
Recommended: ARTGN_VS 1040

ARTGD_VS 2420: Graphic Design II
Introduction to the discipline, function and tradition of typography. Topics include communication, text intensive documents, legibility/readability, movement, language sequence and information hierarchy. Payment of expendable materials fee is required. Enrollment is limited to students who have completed ARTGD_VS 2410 and successful completion of the graphic design portfolio review.

Credit Hours: 1-3
Prerequisites: consent of instructor

ARTGD_VS 2430: Calligraphy and Hand Lettering
Technical and historical instruction on several calligraphic alphabets. Application of hand lettering to both two and three-dimensional design projects. Emphasis placed on both technical mastery of letters, development of personal style and creative expression in projects.

Credit Hours: 3
Prerequisites: ARTGN_VS 1030, ARTDR_VS 1050 or instructor's consent

ARTGD_VS 3410: Graphic Design III
Digital media and motion graphics are explored through the development of interactive presentations and web site design. Students experiment with the computer as a medium for delivery of communication. New, practical and conceptual skills will be discussed in order to develop meaningful, interactive user experiences. Payment of expendable materials fees is required.

Credit Hours: 3
Prerequisites: ARTGD_VS 2420

ARTGD_VS 3430: Advanced Calligraphy and Hand Lettering
Continuation of ARTGD_VS 2430. Students will expand their skills including study of more complex alphabets and further their personal style. Emphasis placed on both mastery of letters and creative exploration in projects. Repeatable to 6 credits.

Credit Hours: 3
Prerequisites: ARTGD_VS 2430

ARTGD_VS 3440: Packaging Design
This course will look at the discipline of packaging design from a three-dimensional perspective. By gaining an understanding of the materials and processes that relate to packaging, students will develop a selection of packaging solutions for a variety of different clients. Payment of expendable material fee is required. Repeatable to 6 credits.

Credit Hours: 3
Prerequisites: ARTGD_VS 3410

ARTGD_VS 3441: The History of Graphic Design
Broad overview of the history of graphic design. Topics will range from the history of printing, the beginnings of the profession, major movements and developments to the practice of design. Also looks at how the history of design and printing apply to today's visual communication.

Credit Hours: 3
Prerequisites: instructor's consent

ARTGD_VS 3442: Design for Corporate Identity and Branding
Planning, strategy, and design of the visual components necessary to create a corporate identity. Course will focus on how cohesive design programs function across various mediums and engage specific audiences. Payment of expendable materials fees is required. Repeatable to 6 credits.

Credit Hours: 3
Prerequisites: ARTGD_VS 3410

ARTGD_VS 3443: Letterpress
This course is about creating conceptual design solutions using the letterpress printing process. Projects are very broad, conceptual and highly individual with the opportunity to explore letterpress printing processes using several different presses and printing techniques. Each project will require a limited edition print run. Repeatable to 9 hours.

Credit Hours: 3
Prerequisites: Instructor's consent

ARTGD_VS 4400: Graphic Design IV
Goal directed graphic design problem solving stressing the integration of theory and practical applications while sharpening conceptual, computer, and research skills. Topics include current design theory, advanced typographic study, production methods and design/client interaction. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ARTGD_VS 3410

ARTGD_VS 4410: Graphic Design V
Directed research, study and critical analysis in graphic design. Emphasis placed on research, writing, problem solving, aesthetic perception, conceptual thinking skills and technical proficiency. Students will focus on portfolio preparation and are advised to take the course a minimum of two times. May be repeated to 15 hours maximum. Payment of expendable materials fee is required.

Credit Hours: 3
Prerequisites: ARTGD_VS 3420

ARTGD_VS 4485: Problems in Graphic Design
Problems in Graphic Design.

Credit Hours: 1-3
Prerequisites: departmental consent

ARTGD_VS 7400: Graduate Graphic Design
Graduate level work in graphic design. Emphasis on self-directed research and critical analysis. Students are encouraged to focus on conceptual development of their design work. Instruction is tailored to the student's individual investigations. Repeatable to 15 hours maximum.

Credit Hours: 3
Prerequisites: instructor's consent

ARTGD_VS 7485: Problems in Graphic Design
Graduate level work in graphic design.

Credit Hour: 1-3
Prerequisites: ARTGD_VS4410 and departmental consent

ARTGD_VS 8400: Graduate Graphic Design II
Continuation of ARTGD_VS 7400. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ARTGD_VS 7400 or equivalent

Art Painting - Visual Studies (ARTPA_VS)

ARTPA_VS 2500: Beginning Painting
Introduces primary techniques of painting. Emphasis on conceptualization of visual perception (understanding how we see) and the creative processes (understanding how we create). Sections either in oil or acrylic; contact instructor. Expendable material fee required.

Credit Hours: 3

ARTPA_VS 2510: Beginning Watercolor Painting
Theory, practice of painting in water color from still life, landscape, figure. Expendable materials fee required.

Credit Hours: 3

ARTPA_VS 3500: Intermediate Painting
This course will provide an intensive experience in the development of a portfolio of artwork in painting. Students will explore the connections
between their work and contemporary art. May be repeated to 15 hours maximum. Cross-listed with other advanced art classes so students may be working in a range of media. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ARTPA_VS 3500

---

**ARTPA_VS 4510: Advanced Watercolor Painting**
(cross-leveled with ART_PNT 7510). Advanced problems in watercolor. May repeat to 15 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: ART_PNT 3510

---

**ARTPA_VS 4585: Problems in Painting**
Problems in Painting. Enrollment limited to students who have taken ART_PNT 4500.

Credit Hour: 1-3
Prerequisites: departmental consent

---

**ARTPA_VS 7500: Graduate Painting**
Advanced study. Emphasis on individual creative expression. May repeat to 18 hours maximum. Expendable materials fee required.

Credit Hours: 3
Prerequisites: graduate Art major

---

**ARTPA_VS 7585: Problems in Painting**

Credit Hour: 1-3
Prerequisites: ART_PNT 7500 and departmental consent

---

**ARTPA_VS 8500: Advanced Graduate Painting**
Continuation of ART_PNT 7500. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PNT 7500 or equivalent

---

**ARTPA_VS 8570: Graduate Painting - Theory and Context**
Contextualizing artwork in culture, history, and theory. Repeatable to 18 hours for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Graduate Art standing

---

**ARTPA_VS 8585: Problems in Painting II**
Advanced independent studio practice including critical evaluation of student's creative work. Individual study in painting is to be proposed by the student and approved by the instructor. The student will meet on a regular basis with the instructor to review student progress. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: For students with strong preparation in Art; departmental consent; ART_PNT 7585

---

**Art Photo - Visual Studies (ARTPH_VS)**

---

**ARTPH_VS 2600: Beginning Photography**
Introduction to photography within an art context; digital workflow including use of camera, software, and digital output methods; and a survey of both contemporary and historical topics related to visual and conceptual concerns. Digital camera with RAW capability and manual aperture + shutter controls required. DSLR recommended. Payment of expendable materials fee required.

Credit Hours: 3
Recommended: ARTGE_VS 1030, ARTGE_VS 1040, ARTDR_VS 1050

---

**ARTPH_VS 3600: Intermediate Photography**
Continuation of ART_PHOT 2600 with emphasis utilizing acquired technical process to facilitate use of the camera as a means of developing awareness of immediate environment and the capabilities of Photography as a communicative, documentary, and expressive medium. Payment of expendable material fee is required.

Credit Hours: 3
Prerequisites: ARTPH_VS 2600

---

**ARTPH_VS 4600: Advanced Photography**
Exploration of aesthetic concepts, development of personal vision, and instruction in advanced technical process including fine B&W printing, negative and positive color, large format, zone system, and portfolios and book design to facilitate critical observation and personal expression through the medium of Photography. Payment of expendable materials fee is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ARTPH_VS 2600 and ARTPH_VS 3600

---

**ARTPH_VS 4685: Problems in Photography**
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: departmental consent

---

**ARTPH_VS 7600: Graduate Photography**
Advanced technical study with emphasis on development of the individual student's creative ideas. Payment of expendable materials expense is required. May repeat to 15 hours maximum.

Credit Hours: 3
Prerequisites: ART_PHOT 3600 and consent required

---

**ARTPH_VS 7685: Problems in Photography**
Supervised research in creative photography.

Credit Hour: 1-3
Prerequisites: ART_PHOT 4410

---

**ARTPH_VS 8600: Graduate Photography II**
Continuation of ART_PHOT 7600. Repeatable to 15 hours.

Credit Hours: 3
Prerequisites: ART_PHOT 7600 or equivalent
Art Printmaking - Visual Studies (ARTPR_VS)

**ARTPR_VS 2700: Introduction to Etching and Relief Printmaking**
Introduction to Etching and Relief techniques to create original works of art towards portfolio and concept development. Processes include copper etching, linocut, woodcut, photo and laser etching, aquatint, drypoint, mezzotint, collagraphy, monotype, B&W and color printing. Expendable materials fee required.

*Credit Hours: 3*

**ARTPR_VS 2730: Introduction to Screen Printing**
Introduction to large format color screen printing to create original works of art toward portfolio and concept development. Processes include reduction, CMYK, photo based screen printing methods, screen building and registration. Expendable materials fee required.

*Credit Hours: 3*

**ARTPR_VS 3700: Intermediate Printmaking**
Intermediate printmaking focuses on strengthening all printmaking processes (Etching, Relief, Screen Printing, Lithography, Photo mechanics, Collagraphy and Monotype) towards an emphasis in concept, critique and portfolio building. Expendable materials fee required.

*Credit Hours: 3*

**ARTPR_VS 4700: Advanced Printmaking**
An advanced study of all printmaking processes with an emphasis in experimentation towards finalizing a fully realized fine art portfolio for a career in art. This class focuses on the refinement of all printmaking processes, critique and individual creative expression. May be repeatable to 15 hours. Expendable materials fee required.

*Credit Hours: 3*

**ARTPR_VS 4785: Problems in Printmaking**
An intense independent study designed around the student's particular academic goals.

*Credit Hour: 1-3*

**ARTPR_VS 7700: Graduate Printmaking**
Graduate level study in all processes of printmaking with a focus on exploring thesis themes within the history and concept of print based art. May repeat to 15 hours maximum. Expendable materials fee required.

*Credit Hours: 3*

**ARTPR_VS 7785: Problems in Printmaking**
An intense independent study designed around the graduate student's particular academic goals.

*Credit Hour: 1-3*

**Astronomy (ASTRON)**

**ASTRON 1010: Introduction to Astronomy**
Survey of methods of astronomy; description of the solar system, stellar astronomy, structure of the galaxy and the universe. Three hours of lecture and one hour of lab per week (scheduled by the instructor). Satisfies physical science laboratory requirement. Laboratory section: Survey of astronomical methods, instruments, observations and measurement techniques.

*Credit Hours: 4*

**ASTRON 1020: Introduction to Laboratory Astronomy**
Laboratory supplement to Astronomy 1010. Satisfies physical science laboratory requirement. Survey of astronomical methods, instruments, observations and measurement techniques.

*Credit Hours: 2*

**ASTRON 1200: History of Astronomy**
Astronomy is the oldest and yet the newest science discipline that has far-reaching impact on our civilization. This course aims to provide a brief historical account of the major milestones in Astronomy that have led to our current understanding of the universe. Graded on A-F basis only.

*Credit Hours: 3*

**ASTRON 3010: Introduction to Modern Astrophysics**
(same as PHYSCS 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.

*Credit Hours: 3*

**ASTRON 4020: Astrophysical Techniques**
(same as PHYSCS 4020; cross-leveled with PHYSCS 7020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

*Credit Hours: 3*

**ASTRON 4180: Solar System Science**
(same as PHYSCS 4180, GEOL 4180; cross-leveled with GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

*Credit Hours: 3*
Astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.

Credit Hours: 3
Prerequisites: ASTRON 3010

ASTRON 4210: Contributions to Science from Under-represented Groups
(same as PHYSCS 4210; cross-leveled with ASTRON 7210, PHYSCS 7210). STEM fields are amongst the areas of human endeavor that struggle with increasing their human diversity. Teaching of science rarely discusses the contributions or marginalizations of under-represented groups. Meanwhile, many women and indigenous cultures have contributed to progress in STEM but are often not recognized. In this course we will investigate these contributions, and the lack of recognition both historically and in the present day. The aim is to provide students with a better understanding of the advantages of and challenges in inclusive, diverse science. Initially the course will use astronomy as its frame of reference because the sky was one of the earliest laboratories and consequently it has a long history with many indigenous cultures developing their own cosmologies and ways of studying the sky. As we discuss the role of Indigenous peoples, people of color, and women, we will investigate the role of power structures as well as systemic biases in the marginalization of these groups. This class will be strongly discussion oriented, with assessment based on development throughout the semester, of a final project. As many students will be pursuing graduate school in STEM fields, the final project will be to develop a Broader Impact statement. Many federal funding agencies request or even require that research grants include a component aimed at “broadening participation”, i.e. making STEM more inclusive and diverse. Student will work on a multipart assignment that will culminate in a Broader Impact statement - that may well be directly applicable to an NSF GRFP (Graduate Research Fellowship Program) or NSF Post-Doctoral Fellowship. In addition to the Broader Impact statement - students will give presentations and learn how to be more inclusive in their presentation design, following the principles of Inclusive Design for Learning. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2760 or PHYSCS 1200 or instructors consent

ASTRON 4250: Stellar Astrophysics
(same as PHYSCS 4250). Basic astrophysics of stable and unusual stars, stellar systems. Investigates stellar dimensions, radiation, spectra, energy, evolution, populations; interstellar medium, stellar motions and aggregation.

Credit Hours: 3
Prerequisites: ASTRON 3010

ASTRON 4350: Galactic Astronomy
(same as PHYSCS 4350; cross-leveled with ASTRON 7350). Observational properties of normal galaxies and clusters of galaxies, Seyfert and emission-line structure and dynamics of galaxies; interacting galaxies, quasi-steller objects. Introduction to cosmology.

Credit Hours: 3
Prerequisites: ASTRON 3010 or PHYSCS 3010

ASTRON 4360: Extragalactic Astronomy
(same as PHYSCS 4360; cross-leveled with ASTRON 7360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most
pursuing graduate school in STEM fields, the final project will be to develop a Broader Impact statement. Many federal funding agencies request or even require that research grants include a component aimed at "broadening participation", i.e. making STEM more inclusive and diverse. Student will work on a multipart assignment that will culminate in a Broader Impact statement that may well be directly applicable to an NSF GRFP (Graduate Research Fellowship Program) or NSF Post-Doctoral Fellowship. In addition to the Broader Impact statement - students will give presentations and learn how to be more inclusive in their presentation design, following the principles of Inclusive Design for Learning. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 or PHYSCS 1200 or instructors consent

**ASTRON 7350: Galactic Astronomy**  
(cross-leveled with PHYSCS 4350, ASTRON 4350). The course aims to introduce students to the basic knowledge of our Galaxy: how it looks like, how it might be formed, and how we have gained knowledge about it through observations. The main topics include distance measurement of stars, evolution of stars, interstellar medium, star clusters, the structure of Galaxy. The course will also briefly touch on "Near-field Cosmology" (sometimes referred to as "Galactic Archeology"), i.e., what we can infer from our Galaxy the general picture of galaxy formation and evolution.

**Credit Hours:** 3

**ASTRON 7550: Cosmochemistry**  
(same as PHYSCS 7550; cross-leveled with ASTRON 4550, PHYSCS 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

**Credit Hours:** 3  
**Prerequisites:** ASTRON 3010

**ASTRON 8550: Stellar Structure and Evolution**  
(same as PHYSCS 8550). Reviews of atomic and molecular spectra. Investigates quantum radiation law, emission and absorption processes, radiation transfer theory, continuous and discrete line spectra of stars, stellar composition.

**Credit Hours:** 3  
**Prerequisites:** ASTRON 4250, PHYSCS 4800, or instructor's consent

**Athletic Training (ATHTRN)**

**ATHTRN 1100: Athletic Training Skills I**  
Introduction to athletic training skills. Clinical observation hours required. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** Restricted to Pre-Athletic Training majors only

**ATHTRN 1200: Athletic Training Skills II**  
Continuation of athletic training skills. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** Pre-Athletic Training majors; Completion of ATHTRN 1100 with minimum grade of B-

**ATHTRN 2001: Topics in Athletic Training**  
Organized study of selected topics in Athletic Training. Subjects and earnable credit may vary from semester to semester.

**Credit Hours:** 1-15  
**Prerequisites:** Instructor's consent

**ATHTRN 2100: Principles and Fundamentals of Athletic Training**  
Introduces students to the common principles and fundamentals associated with the profession of athletic training. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Pre-Athletic Training majors

**ATHTRN 2150: Athletic Training Practicum I**  
The first in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Athletic Training majors; ATHTRN 1100, ATHTRN 1200, and ATHTRN 2100

**ATHTRN 2250: Athletic Training Practicum II**  
The second in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2150 with minimum grade of B-

**ATHTRN 2500: Elementary Human Anatomy**  
Analysis of the structure and function of cells, tissue, and organ systems. Emphasis is placed on the muscular, skeletal, and nervous systems as they relate to human movement. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Pre-Athletic Training majors only

**ATHTRN 2550: Examination of Cadaveric Human Anatomy**  
Study of the human body utilizing cadaver specimens. Special emphasis will be placed upon the skeletal, muscular and nervous systems. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** Restricted to Athletic Training majors; Completion of ATHTRN 2500 with a minimum grade of C

**ATHTRN 2600: Human Physiology**  
Investigation into the structure, function, physiology, and biochemistry of the cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Athletic Training majors only; Completion of ATHTRN 2500 with a minimum grade of C

**ATHTRN 3100: Mental Health in Athletic Training**  
Study of psychosocial strategies, mental health referral policies and clinical application to athletic training. Graded on A-F basis only.
ATHTRN 3150: Athletic Training Practicum III
The third in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; PSYCH 1000

ATHTRN 3200: Therapeutic Modalities
Study of therapeutic modalities utilized in the treatment and rehabilitation of athletic injuries. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3250: Athletic Training Practicum IV
The fourth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 2250 with a minimum grade of B-

ATHTRN 3300: Injury Assessment I
A systematic approach to injury evaluation of the lower extremity and spine. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 3400: Injury Assessment II
A systematic approach to injury evaluation of the upper extremity, spine and head. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3300 with a minimum grade of B-

ATHTRN 3500: Rehabilitation of Athletic Injuries
Study of rehabilitation principles and techniques used to return active individuals to their sport/activity. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3200 with a minimum grade of B-

ATHTRN 3600: Administration of Athletic Training
Examines the organizational and administrative aspects of Athletic Training. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors

ATHTRN 3800: General Medical Conditions
Examination of illness and disease found within the athletic population. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors only; Completion of ATHTRN 3150 with a minimum grade of B-

ATHTRN 4150: Athletic Training Practicum V
The fifth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

ATHTRN 4250: Athletic Training Practicum VI
The sixth in a sequence of practical/clinical experiences under the direct supervision of a Preceptor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 4150 with a minimum grade of B-

ATHTRN 4450: Nutrition for Athletic Performance and Rehabilitation
Nutritional study examining how nutrition impacts sports performance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; PH_THR 4420

ATHTRN 4800: Medical Diagnostics and Procedures in Athletic Training
Study of advanced medical and clinical athletic training skills. Emphasis is placed on diagnostic testing and procedural skills used in medical and athletic training facilities. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic training majors; Completion of ATHTRN 4150 with a minimum grade of B-

ATHTRN 4970: Seminar in Athletic Training
Capstone senior athletic training course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

ATHTRN 4970W: Seminar in Athletic Training - Writing Intensive
Capstone senior athletic training course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Athletic Training majors; Completion of ATHTRN 3250 with a minimum grade of B-

Atmospheric Science (ATM_SC)

ATM_SC 1050: Introductory Meteorology
(same as GEOG 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.
ATM_SC 1050H: Introductory Meteorology - Honors
(same as GEOG 1050H). Physical processes of atmosphere in relation to
day-to-day changes in weather.
Credit Hours: 3
Prerequisites: Honors eligibility required

ATM_SC 2150: Natural Hazards
A survey of natural hazards, including severe thunderstorms, tornadoes,
flooding, tropical storms, ocean movements, earthquakes, tsunamis,
volcanoes, asteroids, solar weather, managing risk and human impacts.
Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 1050 or equivalent, or instructor's consent

ATM_SC 2720: Weather Briefing
Student participation in daily discussions of current weather patterns and
forecasts and their applications to weather sensitive activities including
aviation, agriculture and industry.
Credit Hours: 2
Prerequisites: ATM SC 1050

ATM_SC 2792: Weather Communication
Methods of surface and upper air weather observation. How such
data are distributed to users in the meteorological community is also
addressed.
Credit Hour: 1
Prerequisites: ATM SC 1050; sophomore standing

ATM_SC 3000: Independent Study in Atmospheric Science
Independent study of a topic dealing with meteorological theory or
application of meteorological science to the solution of relevant problem.
Credit Hour: 1-3
Prerequisites: ATM_SC 1050
Recommended: Upper level standing

ATM_SC 3600: Climates of the World
(same as GEOG 3600). A study of the world distribution of climates
based on "cause and effect" relationships. Special attention is given to the
impacts of climate on humanity.
Credit Hours: 3
Prerequisites: ATM_SC 1050 or graduate standing

ATM_SC 4001: Topics in Atmospheric Science
Development of theory and applications for selected topics in
atmospheric science.
Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent

ATM_SC 4100: Broadcast Meteorology I
An introduction to broadcast meteorology including the business of
media, use of meteorological data to produce a forecast, and television
and radio presentation skills. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM SC 1050, ATM SC 2720, or equivalents

ATM_SC 4310: Atmospheric Thermodynamics
(cross-leveled with ATM_SC 7310). Thermodynamics of dry and moist
air, atmospheric hydrostatics, convection, and development of the
fundamental equations of geophysical fluid dynamics.
Credit Hours: 4
Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one
physics course

ATM_SC 4320: Atmospheric Dynamics
(cross-leveled with ATM_SC 7320). Dynamics and kinematics of
atmospheric flow. Manipulation of fundamental equations, numerical
modeling of atmosphere.
Credit Hours: 4
Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 4350: Mesoscale Meteorology and Dynamics
(cross-leveled with ATM_SC 7350). Survey of mesoscale phenomena,
observing systems, analysis techniques, and modeling. Topics include
fronts, jet streaks, gravity waves, organized convection, tornadoes, and
severe local storm forecasting and structure.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 4400: Micrometeorology
(cross-leveled with ATM_SC 7400). Study of transport processes in
the surface boundary layer. Important applications in pollution will be
discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or PHYSICS 2760, MATH 2300

ATM_SC 4510: Remote Sensing for Meteorology and Natural
Resources
(cross-leveled with ATM_SC 7510). Principles of remote sensing with
emphasis on the properties of atmosphere and the earth's surface from
airborne and satellite sensors. The techniques for using geosynchronous
and orbiting satellite platforms for assessing weather and natural
resource features.
Credit Hours: 3
Prerequisites: ATM_SC 1050, MATH 1500, junior standing or
instructor's consent

ATM_SC 4520: Environmental Biophysics
(same as GEOG 4520; cross-leveled with ATM_SC 7520, GEOG 7520).
Students will learn techniques and principles used to describe the
microenvironment of living organisms and use quantitative expressions
to estimate missing values, and mass transfer laws to estimate flux of
energy, water and gas.
Credit Hours: 3
Prerequisites: College Physics and Calculus I
ATM_SC 4550: Physical Meteorology
(cross-leveled with ATM_SC 7550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing. Recommended: 1 year of college Physics
Credit Hours: 3
Prerequisites: MATH 1700

ATM_SC 4590: Radar Meteorology
(cross-leveled with ATM_SC 7590). Course concerns the theory and application of radar in meteorology. May be repeated for credit.
Credit Hours: 3
Prerequisites: ATM_SC 1110, MATH 1700, PHYSCS 2750

ATM_SC 4650: Long-Range Forecasting
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 4710: Synoptic Meteorology I
(cross-leveled with ATM_SC 7710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.
Credit Hours: 4
Prerequisites: ATM_SC 1050, MATH 1700 (C or better) Recommended: one physics course

ATM_SC 4720: Synoptic Meteorology II
(cross-leveled with ATM_SC 7720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.
Credit Hours: 4
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 4720W: Synoptic Meteorology II - Writing Intensive
(cross-leveled with ATM_SC 7720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.
Credit Hours: 4
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 4730: Advanced Forecasting Laboratory
Advanced principles of weather forecasting will be addressed via online electronic modules and weekly laboratory exercises. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 4720

ATM_SC 4800: Numerical Methods in Atmospheric Science and Natural Resources
(cross-leveled with ATM_SC 7800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.
Credit Hours: 3
Prerequisites: senior standing Recommended: Math through Calculus III

ATM_SC 4949: Internship in Meteorology
Practical professional work experience with professional or scientific meteorologists in off-campus work environment. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: junior standing Recommended: Math through Calculus III

ATM_SC 4950: Undergraduate Research in Atmospheric Science
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance.
Credit Hour: 1-4
Prerequisites: STAT 1400, MATH 1500 Recommended: 10 hours of Atmospheric Science courses

ATM_SC 7310: Atmospheric Thermodynamics
(cross-leveled with ATM_SC 4310). Thermodynamics of dry and moist air, atmospheric hydrostatics, convection, and development of the fundamental equations of geophysical fluid dynamics.
Credit Hours: 4
Prerequisites: ATM_SC 4310 or ATM_SC 7310

ATM_SC 7320: Atmospheric Dynamics
(cross-leveled with ATM_SC 4320). Dynamics and kinematics of atmospheric flow. Manipulation of fundamental equations, numerical modeling of atmosphere.
Credit Hours: 4
Prerequisites: ATM_SC 1050, MATH 1700 (C or better), and one physics course

ATM_SC 7350: Mesoscale Meteorology and Dynamics
(cross-leveled with ATM_SC 4350). Survey of mesoscale phenomena, observing systems, analysis techniques, and modeling. Topics include fronts, jet streaks, gravity waves, organized convection, tornadoes, and severe local storm forecasting and structure.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720 and MATH 2300

ATM_SC 7400: Micrometeorology
(cross-leveled with ATM_SC 4400). Study of transport processes in the surface boundary layer. Important applications in pollution will be discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050
ATM_SC 7510: Remote Sensing for Meteorology and Natural Resources
(cross-leveled with ATM_SC 4510). Principles of remote sensing with emphasis on the properties of atmosphere and the earth's surface from airborne and satellite sensors. The techniques for using geosynchronous and orbiting satellite platforms for assessing weather and natural resource features. Graduate student credit is dependent upon completion of additional advanced research assignments. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 1050, MATH 1500, junior standing or instructor's consent

ATM_SC 7520: Environmental Biophysics
(same as GEOG 7520; cross-leveled with ATM_SC 4520, GEOG 4520). Students will learn techniques and principles used to describe the microenvironment of living organisms and use quantitative expressions to estimate missing values, and mass transfer laws to estimate flux of energy, water, and gas.
Credit Hours: 3
Prerequisites: college physics, calculus I

ATM_SC 7550: Physical Meteorology
(cross-leveled with ATM_SC 4550). Physics of atmospheric nucleation-condensation, cloud droplet and precipitation formation, associated electrical phenomena, radiation transfer and remote sensing.
Credit Hours: 3
Prerequisites: 1 year of college Physics and MATH 1700

ATM_SC 7590: Radar Meteorology
(cross-leveled with ATM_SC 4590). Course concerns the theory and application of radar in meteorology. Graduate students will be required to conduct an independent research project using radar, in addition to the undergraduate requirements for the class. May be repeated for credit.
Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 2760

ATM_SC 7650: Long-Range Forecasting
Credit Hours: 3
Prerequisites: ATM_SC 4050 or ATM_SC 7050 or ATM_SC 3600

ATM_SC 7710: Synoptic Meteorology I
(cross-leveled with ATM_SC 4710). Meteorological Data. Basic techniques for surface and upper air analysis, using selected examples of weather patterns.
Credit Hours: 4
Prerequisites or Corequisites: one physics course
Prerequisites: ATM_SC 1050, MATH 1700 (C or better)

ATM_SC 7720: Synoptic Meteorology II
(cross-leveled with ATM_SC 4720). Graphical analysis and interpretation of physical, kinematical and dynamical properties of the atmosphere. Analysis techniques applicable to atmospheric research.
Credit Hours: 4
Prerequisites: ATM_SC 4710 or ATM_SC 7710

ATM_SC 7800: Numerical Methods in Atmospheric Science and Natural Resources
(cross-leveled with ATM_SC 4800). Examines numerical methods used in solving differential equations, filtering data sets, and Fourier decomposition of discrete data sets.
Credit Hours: 3
Prerequisites: Math through Calculus III

ATM_SC 8001: Topics in Atmospheric Science
Development of the theory with its application for selected topics in atmospheric science.
Credit Hours: 3

ATM_SC 8085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

ATM_SC 8090: Masters Research in Atmospheric Science
Original investigation in atmospheric science in support of a master's thesis. Graded on S/U basis only.
Credit Hour: 1-99

ATM_SC 8400: Atmospheric General Circulation
Comprehensive review of dynamical theories of general circulation with intensive discussion of current problems.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 8450: Tropical Meteorology
Study of the synoptic and dynamic character of the atmosphere in the tropical regions, including an examination of the general circulation and tropical storms.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720 and MATH 2300; instructor's consent. Graded on A-F basis only

ATM_SC 8500: Radiation in the Atmosphere
Physics of solar and infrared radiative transfer in the atmosphere, including energy conversion effects, atmospheric optics, and photochemical processes.
Credit Hours: 3
Prerequisites: one year College Physics and MATH 1700
ATM_SC 8550: Nowcasting
Students will learn the science of nowcasting through the study of the various methods used and apply their knowledge in the design of the elements of a nowcast system and practical nowcasting exercises.
Credit Hours: 3
Prerequisites: ATM_SC 8500, instructor's consent

ATM_SC 8600: Advanced Climate Dynamics
Study of global climate; application of large scale atmospheric dynamics; conservation of various forms of energy, climatic evaluation, large scale climatic modification.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320 and ATM_SC 8400 or ATM_SC 3600

ATM_SC 9085: Problems in Atmospheric Science
Independent study by graduate students in atmospheric science.
Credit Hour: 1-99

ATM_SC 9087: Seminar in Atmospheric Science
Seminar in Atmospheric Science.
Credit Hour: 1-99

ATM_SC 9090: Doctoral Research in Atmospheric Science
Original investigation in atmospheric science in support of a doctoral dissertation. Graded on S/U basis only.
Credit Hour: 1-99

ATM_SC 9300: Introduction to Chaos Theory
Atmospheric predictability and related topics are examined as they relate to governing equations of motion and their non-linear solutions.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320, MATH 4100

ATM_SC 9350: Advanced Dynamic Meteorology
Application of perturbation dynamics, advanced dynamics, and numerical methods to study of atmospheric circulations.
Credit Hours: 3
Prerequisites: ATM_SC 4320 or ATM_SC 7320

ATM_SC 9590: Advanced Applications of Weather Radar
This course will investigate quantitative uses of weather radar data that go beyond standard reflectivity and velocity image interpretation, particularly those that use new techniques such as dual-polarization. Students will develop methods to analyze and display meteorological radar data. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent

ATM_SC 9700: Advanced Synoptic Meteorology
Detailed examination of vertical motions, their forcing, and how each is diagnosed (quasigeostrophic theory, the Trenberth approximation, Q-vectors). Current issues in synoptic meteorology and operational forecasting are discussed.
Credit Hours: 3
Prerequisites: ATM_SC 4720 or ATM_SC 7720

ATM_SC 9712: Convection and Lightning
Cumulus convection and cloud physics topics that will facilitate a deeper understanding of cloud electrification and lightning production are studied. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ATM_SC 4710 or ATM_SC 7710, ATM_SC 4720 or ATM_SC 7720, MATH 2300; instructor's consent

ATM_SC 9800: Numerical Weather Prediction
Examination of finite difference and objective analysis techniques, basic physical concepts, and parameterization of physical processes. Experience with a range of models (1-D cloud to operational PE models) stressed.
Credit Hours: 3
Prerequisites: Instructor's consent

Biochemistry (BIOCHM)

BIOCHM 1090: Introduction to Biochemistry
Fundamental concepts in biochemistry and molecular biology: structure function relationships, reactivity, thermodynamics, gene expression. Professional skills for biomedical careers. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: CHEM 1320
Prerequisites: MATH 1100 or MATH 1160 or MATH 1500 and Freshman or Sophomore standing

BIOCHM 1094: Introductory Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes, PCR and cloning. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: BIOCHM 1090; Biochemistry majors only

BIOCHM 2110: The Living World: Molecular Scale
Survey of modern biochemistry and biotechnology. Structure and function of DNA, proteins, lipids and carbohydrates. The role of biopolymers in life processes and everyday living is emphasized.
Credit Hours: 3
Prerequisites: for non-Biochemistry majors only

BIOCHM 2112: Biotechnology in Society
Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.
Credit Hours: 3
Prerequisites: for non-biochemistry majors only
BIOCHM 2112H: Biotechnology in Society - Honors
Biotechnology in a social context covers three areas: introduction to terminology and concepts, specific biotechnological applications to modern problems, and ethical questions.

Credit Hours: 3
Prerequisites: for non-biochemistry majors only

BIOCHM 2480: Introduction to Macromolecular Structure and Function
The function of biochemical macromolecules is directly related to their structure. The three-dimensional structures of proteins, nucleic acids, polysaccharides and membranes are each explored in the context of their functions and their microenvironments within living organisms. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: C- or higher in BIOCHM 1090
Corequisites: CHEM 2100 or CHEM 2110

BIOCHM 2484: Macromolecular Techniques Laboratory
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: sophomore standing; restricted to Biochemistry majors only

BIOCHM 2484H: Macromolecular Techniques Laboratory - Honors
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing; Biochemistry majors only. Honors eligibility required

BIOCHM 2484HW: Macromolecular Techniques Laboratory - Honors/ Writing Intensive
The laboratory experiments include DNA isolation, DNA cloning, PCR, plasmid transformation, protein expression, affinity-tagged chromatography, SDS-polyacrylamide gel electrophoresis, enzyme isolation, enzyme assay, buffer preparation, and Michaelis-Menten kinetics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing; Biochemistry majors only. Honors eligibility required

BIOCHM 2950: Undergraduate Research in Biochemistry
Research for students in which independent research is less than 50% of total. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 3630: General Biochemistry
Survey of biochemistry; static/dynamic aspects of carbohydrates, lipids, proteins, nucleic acid. Discussion of metabolic pathways, energy production, and metabolic regulatory mechanism.

Credit Hours: 3
Prerequisites: CHEM 2030 or CHEM 2100

BIOCHM 4001: Topics in Biochemistry
Experimental courses; highly specialized topics taught infrequently or courses taught by visiting professors.

Credit Hour: 1-99

BIOCHM 4120: Medicinal Plant Science
Presentation of core topics, including an overview of plant groups with medicinal properties, botanical nomenclature, important biochemical pathways, exposure to journals, texts, and online databases that facilitate evidence-based research involving medicinal plants. Content of worldwide application. Has an international flavor. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies will also be emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CHEM 1100 or CHEM 1320
Recommended: BIO_SC 1200 or BIO_SC 1500 or BIOCHM 1090

BIOCHM 4270: Biochemistry
(cross-leveled with BIOCHM 7270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.

Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 4272: Biochemistry
(cross-leveled with BIOCHM 7272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.

Credit Hours: 3
Prerequisites: C- or higher in BIOCHM 4270

BIOCHM 4300: Physical Chemistry of Biological Systems
To present fundamental principles of physical chemistry in the context of the structure and function of biological macromolecules. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: BIOCHM 4270

BIOCHM 4376: Computer Assisted Sequence Analysis and Molecular Modeling
(cross-leveled with BIOCHM 7376). Employs the use of computer-based interactive molecular graphics and sequence analysis software to analyze the three dimensional structures of macromolecules.
Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 3835: Problems in Biochemistry
Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 4510: Single Molecule Biophysics
(same as PHYSCS 4510; cross-leveled with BIOCHM 7510, PHYSCS 7510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOCHM 4950: Advanced Undergraduate Research in Biochemistry
Research credit for students doing an independent research project under the guidance of a faculty member. Project must be arranged by student and faculty member prior to registration. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 4964: Industrial Internship with ABC Laboratories
This 5-credit course is a school and field-based learning experience combining the study, observation, and employment with ABC Laboratories in Columbia, MO. The internship provides opportunities to apply skills, concepts and theories about biochemistry and analytical chemistry in a practical context. The purpose of the internship experience is to provide the intern with the opportunity to develop knowledge and skills deemed desirable for a career in the biotechnology industries. During the time indicated in this agreement for the internship experience, the intern is expected to become a productive employee of ABC Laboratories. This course will provide technical instruction on commonly used laboratory skills and instrumentation at the University of Missouri followed by technical instruction on software and instrumentation at ABC Laboratories. After the training period, the interns will have the opportunity to work at ABC Laboratories full time for the summer.
Credit Hours: 5
Prerequisites or Corequisites: BIOCHEM 4272, CHEM 3200
Prerequisites: BIOCHM 1090, BIOCHM 2484, BIOCHM 4270

BIOCHM 4970: Senior Capstone in Biochemistry
Problem-based course on fundamental concepts of biochemistry. Requires written and oral presentations. One of two capstone courses required for biochemistry majors. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Departmental consent required
Recommended: Corequisite of BIOCHM 4974

BIOCHM 4974: Biochemistry Laboratory
(cross-leveled with BIOCHM 7274). Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.
Credit Hours: 3
Prerequisites: BIOCHM 4270

BIOCHM 4974W: Biochemistry Laboratory - Writing Intensive
(cross-leveled with BIOCHM 7274). Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry; purification and kinetics of enzymes. One of two capstone courses required for biochemistry majors.
Credit Hours: 5
Prerequisites or Corequisites: BIOCHM 4272
Corequisites: BIOCHM 4970

BIOCHM 4978: Cancer Biology
(same as BIO_SC 4978; cross-leveled with BIOCHM 7978, BIO_SC 7978). The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.
Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300 or BIOCHM 4270
Recommended: BIO_SC 4976 or BIOCHM 4272

BIOCHM 4996H: Honors Thesis Research in Biochemistry
Laboratory research for honors students doing an honors thesis research project in their final two semesters. Enrollment limited to Honors eligible students with senior standing who have CAFNR honors approval. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: departmental consent

BIOCHM 7085: Problems in Biochemistry
Problems in Biochemistry.
Credit Hour: 1-6
Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 7270: Biochemistry
(cross-leveled with BIOCHM 4270). First semester of comprehensive biochemistry course: metabolic pathways, amino acids/proteins, carbohydrates, lipids, nucleic acids, kinetics, energy requirements, metabolic regulation in living cells.
Credit Hours: 3
Prerequisites: CHEM 2110

BIOCHM 7272: Biochemistry
(cross-leveled with BIOCHM 4272). Second semester of a comprehensive biochemistry course, including metabolism of carbohydrates, fatty acids, steroids, amino acid synthesis and metabolism, molecular genetics, hormones, photosynthesis and integrated metabolism.
Credit Hours: 3
Prerequisites: BIOCHM 7270

BIOCHM 7274: Biochemistry Laboratory
Techniques course involving analytical experiments with carbohydrates, lipids, proteins, nucleic acids; use of instrumentation in biochemistry;
radiolabelled tracers in metabolism; isolation, purification and kinetics of enzymes.

Credit Hours: 5
Corequisites: concurrent enrollment in BIOCHM 7270

BIOCHM 7376: Computer Assisted Sequence Analysis and Molecular Modeling
(cross-leveled with BIOCHM 4376). This course uses advanced computer graphics and computational techniques to analyze protein and nucleic acid sequences and their three-dimensional structures.

Credit Hours: 2
Prerequisites: CHEM 2110

BIOCHM 7510: Single Molecule Biophysics
(same as PHYSCS 7510; cross-leveled with BIOCHM 4510, PHYSCS 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization and the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOCHM 7978: Cancer Biology
(same as BIO_SC 7978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

Credit Hours: 3
Prerequisites: BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976

BIOCHM 8060: Ethical Conduct of Research
(same as BIO_SC 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

Credit Hour: 1

BIOCHM 8090: Research in Biochemistry
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: Consent of Director of Graduate Studies required

BIOCHM 8120: Advanced Medicinal Plant Science
Presentation of core topics in pharmacognosy, including an overview of plant groups with medicinal properties, essentials of botanical nomenclature, Overview of pharmacological activities of plant-sourced products and evidence-based research, phytochemical variation and significance, important biochemical pathways, origins of secondary metabolites, some major groups of phytochemicals, observations on economic and social trends in the use of medicinal plant products in developed and developing countries, overview of modern technology, high throughput screening, bioinformatics. Considerable exposure to key articles in journals, based on internationally accepted text (Trease & Evans), exposure to online databases - all sources of information that facilitate evidence-based research involving medicinal plants. Content of world-wide application. Has considerable international flavor and directly applicable to medicinal flora world-wide. The course facilitates students to be independent learners and critical thinkers in this important knowledge area (of value to diverse academic backgrounds). The important role of collaborative inter-disciplinary studies is also emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CHEM 1100 or CHEM 1320 or BIOCHM 1090 and BIO_SC 1200 or BIO_SC 1500 or the equivalent of these courses for non-MU students
Recommended: A Freshman level course in the Life Sciences or General Botany will also be advantageous but not essential

BIOCHM 8130: Commercial Use of Biodiversity
Biological diversity/biodiversity - provides the basis for life on earth. The variability among living organisms and among the ecological complexes of which they are part - forms the basis of many commercial products and underpins our very existence by providing essential ecosystem services e.g. water purification, prevention of soil erosion and floods, and regulation of the climate. But biodiversity is declining. The rapidly growing demand for access to genetic resources, is raising the commercial value of biological diversity (especially plant diversity) for providing new genetic resources for enhancing existing crops species, developing new crops, phytopharmaceuticals, botanical medicines, horticulture - via GMO and plant breeding technologies. The course will address the commercial use of biodiversity - access to genetic resources and benefit-sharing via the following topics: Regulating access to genetic resources and benefit-sharing (legal aspects); Natural products and the pharmaceutical industry; Botanical medicine industry; Development of major crops by the seed industry; Horticulture; Crop protection; Biotechnology in fields other than healthcare and agriculture; Natural personal care and cosmetics industry; Industry and the Convention on Biodiversity (CBD). The areas of Technical Barriers to Trade (TBT) and the Regulatory Frameworks that govern the release of new crops and other plant-based products will also be addressed. Course is of world-wide appeal, facilitated by being 100% online and asynchronous (independent of time zones). This course is recommended (as an elective) for students desiring more understanding of the complexities associated with the commercial use of biodiversity (specifically the commercial use of genetic resources). Graded on A-F basis only.

Credit Hours: 3
Recommended: Experience in some undergraduate course work in the life-science area would be advantageous

BIOCHM 8240: Introduction to Graduate Biochemistry I
Introduction to biochemistry for life science graduate students. Core course for Biochemistry students. Structures and interactions of biological macromolecules including thermodynamics, binding, enzyme action and biological membranes as well as techniques of analysis and structure determination.

Credit Hours: 4
Prerequisites: Undergraduate organic chemistry plus undergraduate biochemistry or molecular biology, their equivalent or permission of instructor

BIOCHM 8260: Macromolecular Systems Integration
To introduce graduate students to biochemistry at the graduate level with particular emphasis on genomics/gene expression and replication;
proteomics/cell signaling and metabolism. Course graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** BIOCHM 8240

**BIOCHM 8362: Introduction to Plant Metabolism**  
(same as PLNT_S 8362 and BIO_SC 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.

**Credit Hours:** 2

**BIOCHM 8365: Introduction to Molecular Cell Biology**  
(same as BIO_SC 8365 and PLNT_S 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.

**Credit Hours:** 2

**BIOCHM 8432: Enzymology and Metabolic Regulation**  
A basic introduction to the study of enzymes and their role in intermediary metabolism. Topics include enzyme kinetics, mechanisms of enzymatic catalysis and control of metabolic pathways.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 7272

**BIOCHM 8434: Signaling in Molecular Cell Biology**  
The objective of this course is to provide important foundations in cellular signaling in the context of biochemistry and cell biology for first and second year graduate students. The course focuses on cell-to-cell communication and intracellular signaling via different classes of cell surface receptors using specific receptor paradigms from human, other animals, plants, yeast and E.coli. Primary literature will be used for in-class discussions and homework assignments to highlight key experiments and introduce students to relevant experimental techniques. Graded on A-F basis only.

**Credit Hours:** 3  
**Recommended:** BIO_SC 2300, BIOCHM 4270

**BIOCHM 8450: Rotation Research**  
Introductory laboratory research. Graded on A-F basis only. Normally 1 hour per advisor per semester, two-1 hour sections can be taken per semester.

**Credit Hour:** 1-2

**BIOCHM 9001: Topics in Biochemistry**  
Experimental courses, highly specialized topics taught infrequently or courses taught by visiting professors.

**Credit Hour:** 1-9

**BIOCHM 9087: Seminar in Biochemistry**  
Review of current literature; individual presentation of research or classical science topics.

**Credit Hour:** 1

**BIOCHM 9090: Research in Biochemistry**  
Research in biochemistry for qualified students, with counsel of faculty. Includes preparation of dissertation. Graded on a S/U basis only.

**Credit Hours:** 1-99

**BIOCHM 9432: Molecular Biology II**  
(same as MICROB and BIO_SC 9432) Detailed experimental analysis of eukaryotic cellular and molecular biology relevant to cellular and viral gene expression, post-transcriptional and post-translational modifications and genome replication. Models for developmental genetic analysis and genetic determinants controlling developmental processes utilizing the current literature will be examined.

**Credit Hours:** 3

**Prerequisites:** BIOCHM 7272

**BIOCHM 9462: Hormone Action**  
A lecture course with weekly assigned readings. Topics will include: a description of selected polypeptide, steroid and other hormones and their biological effects; receptors; second messengers; protein phosphorylation in hormone mediation; growth factors; cellular oncogenes.

**Credit Hours:** 2  
**Prerequisites:** BIOCHM 7272

**BIOCHM 9468: Molecular Biology of Plant Growth and Development**  
(same as BIO_SC 9468). Molecular biology of plant hormones, signal transduction, environmental signals.

**Credit Hours:** 3

**Biological Engineering (BIOL_EN)**

**BIOL_EN 1000: Introduction to Biological Engineering**  
For first semester engineering students. Develop appreciation for professional engineering. Students will participate with senior design students to conceptualize a case-study problem.

**Credit Hour:** 1-2

**BIOL_EN 2000: Professional Development in Engineering**  
(same as BME 2000). A review of professional opportunities, registration, ethics, and societies. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** sophomore standing

**BIOL_EN 2080: Introduction to Programming for Engineers**  
(same as BME 2080). This course teaches how to write scientific programs for analysis of data and simulation of physical phenomena using Matlab. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MATH 1500
BIOL_EN 2180: Engineering Analysis of Bioprocesses  
(same as BME 2180). Material and Energy Balances. Integrating principles of physics, chemistry and mathematics to analyze steady state and transient biological/biomedical processes. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: MATH 1700, CHEM 1320, PHYSCS 2750. Restricted to Biological Engineering students only  
Recommended: BIOL_EN 2080

BIOL_EN 3070: Biological Fluid Mechanics  
(same as BME 3070). Basic principles of fluid mechanics applied to transport processes in biological systems. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: PHYSCS 2750 and MATH 1700

BIOL_EN 3075: Introduction to Materials Engineering  
(same as BME 3075). Course covers concepts and techniques in materials engineering from an engineering design perspective, materials requirements for design, and fundamentals; intended for undergraduate engineering students. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: MATH 2300, ENGINR 1200  
Corequisites: One of the following BIOL_EN 3180, CH_ENG 3261, MAE 4231, MAE 4300, or instructor consent

BIOL_EN 3170: Biomaterials  
(same as BME 3170). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.  
Credit Hours: 3  
Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor's consent

BIOL_EN 3170W: Biomaterials - Writing Intensive  
(same as BME 3170W). Engineering sciences and design will be leverage for the study and design of biomaterials. Understanding the structure-property relationship between biomaterials and tissue will be addressed for implant design.  
Credit Hours: 3  
Prerequisites: BIOL_EN 3075 or BME 3075  
Corequisites: BIOL_EN 2180, ENGINR 2200 or instructor's consent

BIOL_EN 3180: Heat and Mass Transfer in Biological Systems  
(same as BME 3180). Principles of heat and mass transfer and their applications in biomedical, bioenvironmental, and bioprocessing engineering.  
Credit Hours: 3  
Prerequisites or Corequisites: ENGINR 2300 or CH_ENG 3261  
Prerequisites: BIOL_EN 2180 or CH_ENG 2225

BIOL_EN 4001: Topics in Biological Engineering  
Current and new technical developments in biological engineering.  
Credit Hour: 3-9  
Prerequisites: instructor's consent

BIOL_EN 4070: Bioelectricity  
(cross-leveled with BIOL_EN 7070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers.  
Credit Hours: 3  
Prerequisites: PHYSCS 2760 and BIOL_EN 3180

BIOL_EN 4085: Problems in Biological Engineering  
Supervised independent study at the undergraduate level.  
Credit Hour: 1-5  
Prerequisites: instructor's consent

BIOL_EN 4150: Soil and Water Conservation Engineering  
(same as CV_ENG 4710; cross-leveled with BIOL_EN 7150, CV_ENG 7710). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.  
Credit Hours: 3  
Recommended: BIOL_EN 2180 or CV_ENG 3200

BIOL_EN 4160: Food Process Engineering  
(cross-leveled with BIOL_EN 7160). Food engineering is an interdisciplinary field that connects agricultural and biological engineering, chemical engineering, food science, biochemistry, human nutrition, and other fields involving food systems to improve the health of people and planet. The course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, food packaging, emerging technologies, and sustainability.  
Credit Hours: 3  
Prerequisites: BIOL_EN 3180

BIOL_EN 4170: Biomaterials Interfaces of Implantable Devices  
(same as BME 4170; cross-leveled with BIOL_EN 7170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.  
Credit Hours: 3  
Prerequisites: BIOL_EN 3170

BIOL_EN 4231: Transport Phenomena in Materials Processing  
(same as MAE 4231; cross-leveled with BIOL_EN 7231, MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites or Corequisites: MAE 4300  
Prerequisites: C- or better in Math 4100

BIOL_EN 4250: Irrigation and Drainage Engineering  
(cross-leveled with BIOL_EN 7250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.
BIOL_EN 4270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as CH_ENG 4270; cross-leveled with BIOL_EN 7270, CH_ENG 7270). A practical statistical tool box for experimenters including comparison of process means, effects of variables, design and interpretation of factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

BIOL_EN 4310: Biomolecular Engineering and Nanobiotechnology - Honors
(same as BME 4470; cross-leveled with BIOL_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 and BIOL_EN 3180 (for biological engineering students) -or- CH_ENG 2225 and CH_ENG 3234 (for chemical engineering students) -or- Consent of instructor

Recommended: ENGINR 1200 and BIOL_EN 3170

BIOL_EN 4360: Biomanufacturing Technologies
(same as BME 4360). This course is an introduction to biomanufacturing technologies and processes for manufacturing biological products (e.g., vaccine, antibodies, and therapeutic proteins). It mainly covers process development, unit operations, product evaluation, facilities, and regulatory compliance. It is an interdisciplinary course of biochemistry, microbiology, and engineering. The purpose of this course is to help the students acquire the knowledge of modern biomanufacturing and prepare them for rapidly growing fields in biomanufacturing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 and BIOL_EN 3180 (for biological engineering students) -or- CH_ENG 2225 and CH_ENG 3234 (for chemical engineering students) -or- Consent of instructor

Recommended: ENGINR 1200 and BIOL_EN 3170

BIOL_EN 4370: Orthopaedic Biomechanics
(same as BME 4370; cross-leveled with BIOL_EN 7370). Engineering sciences will be leveraged to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOL_EN 3075
Recommended: ENGINR 1200 and BIOL_EN 3170

BIOL_EN 4380: Biomanufacturing Technologies
(same as BME 4380; cross-leveled with BIOL_EN 7380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: PHYSCS 2750

Recommended: PHYSCS 2760

BIOL_EN 4420: Introduction to Biomedical Imaging
(same as BME 4420, PHYSCS 4420; cross-leveled with BIOL_EN 7420, PHYSCS 7420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 4470: Biomolecular Engineering and Nanobiotechnology
(same as BME 4470; cross-leveled with BIOL_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 2760, CHEM 2100
Recommended: Senior/graduate standing or instructor's consent

Recommended: Senior/graduate standing or instructor's consent

BIOL_EN 4470H: Biomolecular Engineering and Nanobiotechnology - Honors
(cross-leveled with BIOL_EN 7470). Generation of biotechnological products, devices through integration of engineering approaches with...
BIOL_EN 4480: Physics and Chemistry of Materials
(same as PHYSCS 4190, CHEM 4490, NU_ENG 4319 BME 4480; cross-leveled with BIOL_EN 7480, PHYSIC 7190, CHEM 7490, NU_ENG 7319). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1700, PHYSICS 2760, CHEM 2100. Honors eligibility required
Recommended: Senior/graduate standing or instructor's consent

BIOL_EN 4570: Fluorescent Imaging
(same as BME 4570; cross-leveled with BIOL_EN 7570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging.

Credit Hours: 3
Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 4590: Computational Neuroscience
(same as BIO_SC 4590, ECE 4590, BME 4590; cross-leveled with BIOL_EN 7590, BIO_SC 7590, ECE 7590). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral sciences. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 4770: Biomedical Optics
(same as BME 4770, cross-leveled with BIOL_EN 7770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3
Prerequisites: PHYSICS 2760
Recommended: BIOL_EN 3180

BIOL_EN 4940: Engineering Internship
(same as BME 4940). Problem course following prior approved work experience. Problem selected by internship company representative, faculty problem adviser and student. Supervised by faculty problem advisor and presented in engineering report form. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: advisor's consent

BIOL_EN 4980: Bioengineering Design I
(same as BME 4980). Capstone design course for Biological Engineering or Biomedical Engineering major. Design of devices or processes for biological or biomedical applications.

Credit Hours: 3
Prerequisites: Senior standing or instructor's consent

BIOL_EN 4980W: Bioengineering Design I - Writing Intensive
(same as BME 4980W), Capstone design course for Biological Engineering or Biomedical Engineering major. Design of devices or processes for biological or biomedical applications.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and senior standing or instructor's consent

BIOL_EN 4985: Bioengineering Design II
(same as BME 4985). Second term of capstone, senior design course for the Biomedical Engineering major. Design of biological system devices or processes. Includes prototyping and testing of design. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: BIOL_EN 4980 or BME 4980

BIOL_EN 4990: Undergraduate Research in Biological Engineering
Supervised independent study at the undergraduate level.

Credit Hour: 1-5
Prerequisites: instructor's consent

BIOL_EN 4995: Undergraduate Honors Research in Biological Engineering
Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis.

Credit Hour: 1-5
Prerequisites: advisor's consent

BIOL_EN 4995H: Undergraduate Honors Research in Biological Engineering
Open only to honor students in Biological Engineering. Independent investigation in biological engineering to be presented as a thesis. Honors eligibility required

Credit Hour: 1-5
Prerequisites: advisor's consent

BIOL_EN 7001: Topics in Biological Engineering
Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 7070: Bioelectricity
(cross-leveled with BIOL_EN 4070). Application of engineering approaches to understand bioelectricity at the cellular level including the equivalent circuit of cell membranes and the electronic design of patch-clamp amplifiers. Prerequisites: PHYSICS 2760 and BIOL_EN 3180 or instructor's consent

Credit Hours: 3
BIOL_EN 7150: Soil and Water Conservation Engineering
(same as CV_ENG 7710; cross-leveled with BIOL_EN 4150, CV_ENG 4150). Urban and rural run-off and erosion analysis. Design and layout of erosion control structures.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200, or instructor's consent

BIOL_EN 7160: Food Process Engineering
(cross-leveled with BIOL_EN 4160). Food engineering is an interdisciplinary field that connects agricultural and biological engineering, chemical engineering, food science, biochemistry, human nutrition, and other fields involving food systems to improve the health of people and planet. The course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, food packaging, emerging technologies, and sustainability.
Credit Hours: 3
Prerequisites: BIOL_EN 3180 or instructor's consent

BIOL_EN 7170: Biomaterials Interfaces of Implantable Devices
(cross-leveled with BIOL_EN 4170, BME 4170). Surface structures and properties to improve biocompatibility will be studied. Engineering sciences and design will be leverage in the design of an improved biocompatible surface.
Credit Hours: 3
Prerequisites: BIOL_EN 3170 or instructor's consent

BIOL_EN 7250: Irrigation and Drainage Engineering
(cross-leveled with BIOL_EN 4250). Soil, water, plant relationships. Water supplies and design of surface, sprinkler and drip irrigation systems. Surface and tile drainage.
Credit Hours: 3
Prerequisites: CV_ENG 3700 or MAE 3400 or BIOL_EN 2180

BIOL_EN 7310: Feedback Control Systems
(same as ECE 7310, MAE 7750; cross-leveled with ECE 4310, BIOL_EN 4310, MAE 4750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded A-F only. May be repeated for credit.
Credit Hours: 3
Prerequisites: MATH 4100

BIOL_EN 7315: Introduction to Bioprocess Engineering
(same as CH_ENG 7315; cross-leveled with BIOL_EN 4315, CH_ENG 4315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3

BIOL_EN 7316: Biomass Refinery Operation
(same as CH_ENG 7316; cross-leveled with BIOL_EN 4316, CH_ENG 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

BIOL_EN 7350: Watershed Modeling Using GIS
(same as CV_ENG 7720; cross-leveled with BIOL_EN 4350, CV_ENG 4720). Watershed evaluation using AVSWAT for hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP, Procedures for model calibration/sensitivity data analysis.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

BIOL_EN 7370: Orthopaedic Biomechanics
(same as V_M_S 7370; cross-leveled with BIOL_EN 4370) . Engineering sciences will be leverage to create a comprehensive study of orthopaedic biomechanics. The tissue mechanics of bone and soft tissue will be studied along with applying structural analysis of the musculoskeletal system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGINR 1200 and BIOL_EN 3170, instructor's consent required

BIOL_EN 7380: Applied Electronic Instrumentation
(cross-leveled with BIOL_EN 4380; BME 4380). Fundamental concepts and theories, basic electronics, analog and digital circuits, signal conditioning, computer interfacing, measurement principles and techniques used in developing computer-based instrumentation systems. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: PHYSCS 2750

BIOL_EN 7420: Introduction to Biomedical Imaging
(same as PHYSCS 7420; cross-leveled with BIOL_EN 4420, BME 4420, PHYSCS 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI and Optical Imaging, as well as recent developments in biomedical imaging, as well as recent developments in biomedical imaging.
Credit Hours: 3
Prerequisites: PHYSCS 2760

BIOL_EN 7470: Biomolecular Engineering and Nanobiotechnology
(cross-leveled with BIOL_EN 4470; BME 4470). Generation of biotechnological products, devices through integration of engineering
approaches with contemporary biology, chemistry and nanotechnology starting at the molecular level. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 1700, PHYSCS 2760, CHEM 2100
Recommended: Senior/graduate standing or instructor's consent

BIOL_EN 7480: Physics and Chemistry of Materials
(same as PHYSCS 7190, NU_ENG 7319, CHEM 7490; cross-leveled with BIOL_EN 4480, PHYSCS 4190, NU_ENG 4319, CHEM 4490, BME 4480). Physics and Chemistry of Materials is a 3 credit hour course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 2750, CHEM 1320 or equivalent, or instructors consent

BIOL_EN 7570: Fluorescent Imaging
(cross-leveled with BIOL_EN 4570, BME 4570). Principles and applications of fluorescent imaging. The course covers: Image formation in microscope; Fundamentals of fluorescence and fluorescent microscopy; molecular and cellular fluorescent imaging. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1500 and BIOL_EN 2180 or instructor's consent

BIOL_EN 7590: Computational Neuroscience
(same as BIO_SC 7590, ECE 7590; cross-leveled with BIOL_EN 4590, BIO_SC 4590, ECE 4590; BME 4590). An interdisciplinary course with a strong foundation in quantitative science for students in biological-behavioral science. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 1010, BIO_SC 1500; MATH 1500

BIOL_EN 7770: Biomedical Optics
(cross-leveled with BIOL_EN 4770 and BME 4770). Essential concepts and methods for applying optical techniques to biomedical diagnosis and therapy will be covered with major application examples being discussed.

Credit Hours: 3
Prerequisites: PHYSCS 2760 and BIOL_EN 3180; or instructor's consent

BIOL_EN 8000: Scientific Discovery Leading to Life Science Innovations
(same as MPP 8000). The goal of this course is to provide participants with a conceptual and practical understanding of how life science research is conducted in a modern research institution in the US and the pathways involved in translating fundamental discoveries into products and services that affect healthcare. We will cover the transitions from initial discovery concepts to first-in-human studies, clinical trials, healthcare guidelines and policy to product development. We will provide an introduction to essential disciplines and interactions that enable scientific discoveries to move forward into novel device and drug therapies. Participants will come away with a very complete picture of how medical research happens, including: how it is funded; what is required to make discoveries and record and protect intellectual property that is created; how to advance innovations to clinical practice, how to navigate the regulatory and bioethical environment, and how discoveries reach practitioners and benefit patients. The Course is the first in a three course sequence leading to a Graduate Certificate in Life Science Innovation and Entrepreneurship. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Must be Graduate Standing or receive certificate program director's approval

BIOL_EN 8001: Advanced Topics in Biological Engineering
Study of advanced developments in biological engineering.

Credit Hour: 1-3

BIOL_EN 8085: Problems in Biological Engineering
Supervised individual study at the graduate level.

Credit Hour: 1-99
Prerequisites: departmental consent

BIOL_EN 8087: Seminar in Biological Engineering
Recent investigations in biological engineering and related fields. Discussion of current literature; preparation and presentation of papers.

Credit Hour: 1

BIOL_EN 8100: Design and Development of Biomedical Innovations
(same as ENGINR 8100, MPP 8100). The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical needs, articulate a need statement without integrating solution, design and develop a solution. Participants will learn to assess the commercial potential of clinical needs by performing market analysis and valuing customer needs. A conceptual understanding about development of a prototype for a device and also drug development by different brainstorming process will be provided. Details of regulatory, reimbursement, patenting process required for product development will be explained with examples. An overview about how to evaluate preliminary designs, define product specifications, comply with manufacturing principles and methods, costs, cGMP requirements will be explained. Quality control and Quality assurance necessities for drug/device will be elucidated with case studies. Participants will gain knowledge about different business models for drug and devices, estimate market penetration and how to make profitable, patient-driven products. Graded on A-F basis only.

Credit Hours: 3

BIOL_EN 8170: Sensors and Biosensors
The course covers basic principles of chemical and biological sensors, such as immobilization techniques, transducers (optical, electrical, etc.) and performance factors.

Credit Hours: 3

<tbody>
<tr>
<td>BIOL_EN 8180: Numerical Methods in Engineering Research</td>
<td>Numerical techniques and case studies in Biological Engineering. Topics include basic numerical methods, mathematical representation of data, matrix algebra, ordinary and partial differential equations.</td>
<td></td>
<td>3</td>
<td>MATH 4100</td>
</tr>
<tr>
<td>BIOL_EN 8230: Advanced Ceramic Materials</td>
<td>(same as CH_ENG 8230, MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.</td>
<td></td>
<td>3</td>
<td>MATH 4100 or instructor's consent</td>
</tr>
<tr>
<td>BIOL_EN 8250: Water Management Theory</td>
<td>Advanced studies in erosion control, irrigation, and drainage. Water resources engineering.</td>
<td></td>
<td>3</td>
<td>MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course</td>
</tr>
<tr>
<td>BIOL_EN 8280: Advanced Biological Transport Processes</td>
<td>Principles of fluid flow, heat transfer, and mass transfer applied to (a) understanding of how the human body functions (from the cellular up to the system level) and (b) designing biomedical devices. An independent project/case-study of a relevant research topic also required.</td>
<td></td>
<td>3</td>
<td>MATH 1500, Computer Engineering and Computer Science course, SOIL 4307 or SOIL 7307 and Soil Conservation course</td>
</tr>
<tr>
<td>BIOL_EN 8370: Materials Characterization Techniques</td>
<td>Concepts and techniques in characterizing materials, including bulk and surface analyses. Techniques are presented in terms of use, sample requirements, and the engineering principles. Topics include: contact angle measurement, XPS, SEM, TEM, STM, AFM, XRD, and thermal analyses.</td>
<td></td>
<td>3</td>
<td>at least one undergraduate course in material science, engineer, or design</td>
</tr>
<tr>
<td>BIOL_EN 8402: Research Methods</td>
<td>(same as F_S 8402). Review of literature; planning research projects; publication procedures.</td>
<td></td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>BIOL_EN 8470: Ultrasensitive Biodetection</td>
<td>Multiplexing single-molecule, single-cell, nanobiotec analytical techniques to improve disease diagnosis, treatment, and understanding of biophenomena (membrane transport, gene expression, enzyme activities, cell communications). Graded A-F only.</td>
<td></td>
<td>3</td>
<td>Instructor's consent required</td>
</tr>
<tr>
<td>BIOL_EN 8570: Microscopic Imaging</td>
<td>Advanced topics in microscopic imaging with focus on applications of molecular and cellular imaging using fluorescent microscopy.</td>
<td></td>
<td>3</td>
<td>BIOL_EN 7570 or instructor's consent</td>
</tr>
<tr>
<td>BIOL_EN 8670: Orthopaedic Failure Modes and Effect Analysis</td>
<td>Engineering sciences will be leveraged provide a comprehensive study of failure modes and related effects for orthopaedic devices, orthopaedic tissue repair, and surgical interventions. Clinical case studies will be analyzed to introduce real world problems of orthopaedic failures. Graded on A-F basis only.</td>
<td></td>
<td>3</td>
<td>BIOL_EN 3170 or ENGINR 1200, BIOL_EN 4370 or BIOL_EN 7370 or instructor consent</td>
</tr>
<tr>
<td>BIOL_EN 8870: Molecular and Cell Mechanics</td>
<td>Application of mechanics and engineering principles to biological systems at the cellular and molecular levels. Graded on A-F basis only.</td>
<td></td>
<td>3</td>
<td>ENGINR 2200</td>
</tr>
<tr>
<td>BIOL_EN 8990: Masters Thesis Research in Biological Engineering</td>
<td>Independent investigation to be presented as a thesis. Graded on S/U basis only.</td>

**BIO_SC 1007: Topics in Biological Sciences - Physical Sciences**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**BIO_SC 1010: General Principles and Concepts of Biology**
Emphasizes connections and applications to society and the human condition, science literacy, and critical thinking skills. A discussion of general principles and fundamental concepts of living things. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

**Credit Hours:** 3

**Recommended:** MATH 1100

**BIO_SC 1010 - MOTR BIOL 100: Essentials in Biology**

**BIO_SC 1020: General Biology Laboratory**
Laboratory exercises dealing with representative organisms and methods of modern biological sciences. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

**Credit Hours:** 2

**Prerequisites:** BIO_SC 1010 or BIO_SC 1400 or BIO_SC 1010 concurrently

**BIO_SC 1020 - MOTR BIOL 100L: Essentials in Biology with Lab**

**BIO_SC 1030: General Principles and Concepts of Biology with Laboratory**
Survey of general principles and basic concepts of life science, emphasizing applications to society and the human condition. Lectures address science literacy and critical thinking and laboratory exercises use representative organisms to complement lecture topics. This course is intended for non-science majors. No more than 5 credits for BIO_SC 1010, BIO_SC 1020, and BIO_SC 1030.

**Credit Hours:** 5

**Recommended:** MATH 1100 or concurrent enrollment

**BIO_SC 1030 - MOTR BIOL 100L: Essentials in Biology with Lab**

**BIO_SC 1060: Basic Environmental Studies**
Considers the ecosystem, energy and biogeochemical cycles and population dynamics; relation of the environment to agriculture and technology, pollution, power and food production; politico-economic considerations; moral and ethical issues. For non-science majors.

**Credit Hours:** 3

**BIO_SC 1200: General Botany with Laboratory**
Introduction to study of plants. Emphasis on structure, growth, physiology, genetics and reproduction of plants.

**Credit Hours:** 5

**BIO_SC 1200 - MOTR BIOL 100L: Essentials in Biology with Lab**

**BIO_SC 1400: Evolution for Everyone**
This course will explore the application of evolutionary theory to modern human affairs. We will study the processes involved in evolution and investigate evolutionary interpretations of human social behavior (e.g., psychology, mate choice, economics, religion, and morality). No credit if student has received credit for BIO_SC 2060 or BIO_SC 4600.

**Credit Hours:** 3

**BIO_SC 1500: Introduction to Biological Systems with Laboratory**
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

**Credit Hours:** 5

**Recommended:** MATH 1100 or sufficient ALEKS score

**BIO_SC 1500 - MOTR BIOL 150L: Biology with Lab**

**BIO_SC 1500H: Introduction to Biological Systems with Laboratory Honors**
Basic concepts and principles of the structure and function of living systems, from cells to populations. Foundation course for science students intending to complete a 3-semester sequence that also includes genetics and cell biology.

**Credit Hour:** 3-5

**Prerequisites:** MATH 1100 and high school chemistry. Honors eligibility required

**BIO_SC 2001: Topics in Biological Sciences - General**
Selected topics not covered in current offerings. May not be used in partial fulfillment of requirements for a biological science in general education. May be graded on A-F or S/U basis.

**Credit Hour:** 1-3

**Recommended:** One course in Biology

**BIO_SC 2002: Topics in Biological Sciences- Biological Sciences**
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** a course in general biology

**BIO_SC 2002H: Topics in Biological Sciences- Biological Science - Honors**
Selected topics not covered in regularly offered courses. Recommended: a course in biology

**Credit Hour:** 1-3

**Prerequisites:** Honors eligibility required

**BIO_SC 2006: Topics in Biological Sciences- Mathematical Sciences**
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3

**Recommended:** a course in general biology

**BIO_SC 2006H: Topics in Biological Sciences- Mathematical Science - Honors**
Selected topics not covered in regularly offered courses. Recommended: a course in biology

**Credit Hour:** 1-3
**Prerequisites:** Honors eligibility required

**BIO_SC 2007: Topics in Biological Sciences - Physical Sciences**  
Selected topics not covered in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.  
**Credit Hours:** 1-3  
**Recommended:** a course in general biology

**BIO_SC 2007H: Topics in Biological Sciences - Physical Science - Honors**  
Selected topics not covered in regularly offered courses. Recommended: a course in biology  
**Credit Hours:** 1-3  
**Prerequisites:** Honors eligibility required

**BIO_SC 2010: Undergraduate Seminar in Biological Sciences**  
Discussion and critical evaluation of current topics in biological sciences for intermediate-level students. Some sections may be graded on either A-F or S/U basis only.  
**Credit Hours:** 1-3  
**Prerequisites:** sophomore standing

**BIO_SC 2015: Biological Career Explorations**  
Students will learn about career options and choices, construct career portfolios, and interact with current biological professionals. Graded on S/U basis only.  
**Credit Hours:** 1  
**Prerequisites:** Departmental consent  
**Recommended:** Sophomore standing

**BIO_SC 2020: How the Brain Works**  
Basic structure and function of the brain; left and right brain studies; gender differences; learning and memory; brain disorders.  
**Credit Hours:** 1  
**Prerequisites:** C- or above in BIO_SC 1010 or BIO_SC 1500

**BIO_SC 2030: Life of the Cell**  
This course will help students understand basic concepts of biomolecular structure, cell organization, cell membranes, energy and metabolism, cellular communication, and cell division. This course is intended for non-science majors and may not be used to satisfy requirements for either a major or a minor in biological sciences.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1010

**BIO_SC 2060: Community Biology**  
Principles of population biology, ecology, and evolution, including consideration of human impacts on biological communities and ecosystems.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1010 or equivalent. Not open to biology majors

**BIO_SC 2100: Infectious Diseases**  
An introduction to the basic science of bacterial, viral, protozoan, fungal and helminth infections, including discussions of how illness has influenced or been affected by public policy and culture.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1010, BIO_SC 1200 or BIO_SC 1500. Not open to Biology Majors

**BIO_SC 2150: Genetic Diseases**  
This course will discuss the biological basis for genetic diseases, including inherited diseases and non-inherited diseases such as cancer. The units will include an introduction providing necessary background information, as section studying the technology used to study genetic diseases and several units discussing specific diseases and their impact on history and society. This course is intended for non-science majors. Cannot be used to satisfy degree requirements for biology major or biology minor.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1010

**BIO_SC 2200: General Genetics**  
Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.  
**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1500 and CHEM 1320 (or concurrent enrollment)

**BIO_SC 2200H: General Genetics - Honors**  
Principles of inheritance in plants and animals; structure and use of genetic material, transmission of genetic information, linkage, modification of genetic information, regulation of genetic activity, population genetics.  
**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1500 and CHEM 1320 (or concurrent enrollment); Honors eligibility required

**BIO_SC 2300: Introduction to Cell Biology**  
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.  
**Credit Hours:** 4  
**Prerequisites:** BIO_SC 2200

**BIO_SC 2300H: Introduction to Cell Biology - Honors**  
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.  
**Credit Hours:** 4  
**Prerequisites:** BIO_SC 2200. Honors eligibility required
**BIO_SC 2300HW: Introduction to Cell Biology - Honors/Writing Intensive**
Analysis of cellular organization and function at the molecular level. The mechanisms underlying cellular trafficking, cell motility, and signaling within cells and between cells and their environment will be emphasized.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 2200. Honors eligibility required

---

**BIO_SC 2940: Internship in Biological Science**
Work experience in a non-profit, for profit, or governmental organization relevant to the biological sciences. Intended for students doing internships in which independent research is less than 50% of the experience. Graded on S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** Instructor's consent  
**Recommended:** Junior standing, 12 hours of biological science and 2.70 GPA

---

**BIO_SC 2950: Directed Independent Research**
Participation in faculty research activities. May not be used to satisfy degree requirements for BA or BS in biological sciences or the minor in biological sciences.

**Credit Hour:** 1-3  
**Prerequisites:** Departmental consent

---

**BIO_SC 2960: Readings in Biological Science**
Supervised reading in biological literature. May be repeated up to six hours total credit. Selected sections of this course may be graded either on A-F or S/U basis only. May not be used in partial fulfillment of Arts and Science foundation requirement.

**Credit Hour:** 1-3  
**Prerequisites:** Instructor's consent

---

**BIO_SC 2965H: Honors Readings in Biological Literature**
Selected readings in biological literature for Honors, in consultation with instructor. May not be used in partial fulfillment of Arts and Science foundation requirement.

**Credit Hour:** 1-3  
**Prerequisites:** Overall 3.3 GPA; instructor's consent. Honors eligibility required

---

**BIO_SC 3002: Topics in Biological Sciences - Biological Sciences**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Recommended:** Junior Standing

---

**BIO_SC 3002W: Topics in Biological Sciences- Biological Sciences - Writing Intensive**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Recommended:** Junior Standing

---

**BIO_SC 3006: Topics in Biological Sciences - Mathematical Sciences**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Recommended:** Junior Standing

---

**BIO_SC 3006H: Topics in Biological Sciences- Mathematical Sciences - Honors**
Selected topics not offered in regular curriculum.

**Credit Hour:** 1-3  
**Prerequisites:** Honors eligibility required

---

**BIO_SC 3006W: Topics in Biological Sciences- Mathematical Sciences - Writing Intensive**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Recommended:** Junior Standing

---

**BIO_SC 3007H: Topics in Biological Sciences- Physical Sciences - Honors**
Selected topics not offered in regular curriculum.

**Credit Hour:** 1-3  
**Prerequisites:** Honors eligibility required

---

**BIO_SC 3007W: Topics in Biological Sciences- Physical Sciences - Writing Intensive**
Selected topics not in regularly offered courses. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Recommended:** Junior Standing

---

**BIO_SC 3010: Professional Skills**
This course will focus on application and interview skills for students interested in medical school. Graded on S/U basis only.

**Credit Hour:** 1  
**Prerequisites:** Instructor's consent  
**Recommended:** Junior standing; 3.4 GPA, and biological sciences majors

---

**BIO_SC 3050: Genetics and Society**
Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.

**Credit Hours:** 3
BIO_SC 3050W: Genetics and Society - Writing Intensive
Introduction to genetics, emphasizing the impact of genetics on human society. Human evolution, molecular genetics, genetic engineering in medicine and agriculture. An intensive writing course.
Credit Hours: 3

BIO_SC 3075: The Human Microbiome
This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and "poop transplants" to the role of microbes in asthma and obesity.
Credit Hours: 3
Prerequisites: BIO_SC 2200

BIO_SC 3075W: The Human Microbiome - Writing Intensive
This course examines the astonishing diversity and medical significance of the microbes that inhabit our bodies. Interactive discussions explore scientific and ethical dimensions of topics ranging from probiotics and "poop transplants" to the role of microbes in asthma and obesity.
Credit Hours: 3
Prerequisites: BIO_SC 2200

BIO_SC 3210: Plant Systematics
Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.
Credit Hours: 4
Recommended: 8 hours of Biological Sciences

BIO_SC 3210W: Plant Systematics - Writing Intensive
Principles of classification of plants; survey of diversity in flowering plant families; identification of local flora; use of keys. Includes lab.
Credit Hours: 4
Recommended: 8 hours of Biological Sciences

BIO_SC 3260: Invertebrate Zoology
Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.
Credit Hours: 4
Prerequisites: BIO_SC 1100 or BIO_SC 1500
Recommended: Junior Standing

BIO_SC 3260W: Invertebrate Zoology - Writing Intensive
Structure, ecology and phylogeny of the invertebrate phyla. Includes lab.
Credit Hours: 4
Prerequisites: BIO_SC 1100 or BIO_SC 1500
Recommended: Junior Standing

BIO_SC 3360: Herpetology
The biology, ecology, taxonomy, and distribution of amphibians and reptiles. Some Saturday field trips.
Credit Hours: 4
Recommended: 8 hours Biological Sciences or equivalent

BIO_SC 3400: Evolution and Ecology
Introduction to principles of evolution and ecology. Topics include natural selection, adaptation, phylogenetic analysis, human evolution, population growth and regulation, population interactions, ecosystem ecology, and human impacts on ecological processes. No credit for this course if either BIO_SC 3650 or BIO_SC 4600 already completed; may not co-enroll in this course and BIO_SC 4600.
Credit Hours: 3
Prerequisites: BIO_SC 2200

BIO_SC 3510: Biology of Fungi
(same as PLNT_S 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers. Includes lab.
Credit Hours: 3
Prerequisites: BIO_SC 1200 or BIO_SC 1500 or equivalent

BIO_SC 3650: General Ecology
Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit.
Credit Hours: 5
Prerequisites: junior standing
Recommended: 10 hours in Biology

BIO_SC 3650W: General Ecology - Writing Intensive
Principles of populations, coevolution, density factors, competition; physical environment; concept of community, trophic structure, biotic succession; characterization of biomes, man in ecosystem. Biology majors having completed BIO_SC 3100: 2 hours credit.
Credit Hours: 5
Prerequisites: junior standing
Recommended: 10 hours in Biology

BIO_SC 3655: Tropical Ecology: Methods and Applications
Field study of tropical community; additional fee for transportation and accommodations required.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or BIO_SC 4600 or BIO_SC 4660

BIO_SC 3700: Animal Physiology
Introduces concepts of vertebrate organ function and homeostatic control emphasizing mammalian physiology. Some comparisons to function in other vertebrates and strategies for coping with environmental stresses introduced. Includes lab.
Credit Hours: 5
Prerequisites: BIO_SC 2300

BIO_SC 3710: Introductory Entomology
(same as PLNT_S 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management. Prerequisites: Completion of 60 credit hours and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200, or BIO_SC 1500.
BIO_SC 3715: Insect Diversity
(same as PLNT_S 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2
Prerequisites: PLNT_S 3710 (or BIO_SC 3710) or concurrent registration

BIO_SC 3750: General Microbiology
Explores the diversity and adaptive capabilities of microbial life. Topics include bacterial cell structure, metabolism, genetics, and ecology.

Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300
Recommended: grades in C range for prerequisites

BIO_SC 3760: Microbiology Laboratory
This is a hands-on microbiology lab course which provides students with training in microbiology techniques, data collection and analysis, writing a research proposal and completing an independent project.

Credit Hours: 2
Prerequisites: BIO_SC 3750 or MICROB 3200

BIO_SC 3780: Genetics Laboratory
Experimental genetic studies of Drosophila, corn and microorganisms.

Credit Hours: 2
Prerequisites: C range grade or better in BIO_SC 2200 or instructor's consent

BIO_SC 4002: Topics in Biological Science - Biological Science
Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

Credit Hour: 1-3
Prerequisites: senior standing

BIO_SC 4006: Topics in Biological Science - Mathematical Science
Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

Credit Hour: 1-3
Prerequisites: senior standing

BIO_SC 4007: Topics in Biological Science - Physical Science
Selected topics not in regularly offered courses. May be repeated up to 2 times for credit.

Credit Hour: 1-3
Prerequisites: senior standing

BIO_SC 4085: Problems in Biological Sciences
Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor's consent

Recommended: Junior Standing

BIO_SC 4085W: Problems in Biological Sciences - Writing Intensive
Individual supervised work to supplement regularly organized courses in biology; introduction to research. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: Junior Standing

BIO_SC 4320: Molecular Plant Physiology
(same as PLNT_S 4320; cross-leveled with BIO_SC 7320, PLNT_S 7320). Modern physiology of higher plants using common cultivated plants as examples.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or BIO_SC 1500 and CHEM 1320

BIO_SC 4328: Introductory Radiation Biology
(same as NU_ENG 4328, RADIOL 4328; cross-leveled with BIO_SC 7328, NU_ENG 7328, RADIOL 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

BIO_SC 4400: Plant Anatomy
(same as PLNT_S 4400; cross-leveled with BIO_SC 7400, PLNT_S 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues, tissue systems; comparative anatomy of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab.

Credit Hours: 4
Prerequisites: BIO_SC 1200 or BIO_SC 1500

BIO_SC 4500: Neurobiology
(cross-leveled with BIO_SC 7500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neurophysiology, neuroanatomy, neuroethology and developmental neurobiology.

Credit Hours: 3
Prerequisites: BIO_SC 2300 or instructor's consent
Recommended: BIO_SC 3700

BIO_SC 4590: Computational Neuroscience
(same as ECE 4590, BIOL_EN 4590, BME 4590; cross-leveled with ECE 7590, BIOL_EN 7590, BIO_SC 7590). An interdisciplinary course with
a strong foundation in quantitative sciences for students in biological and behavioral science and an introduction to experimental methods for students from quantitative sciences.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1010 or BIO_SC 1500; MATH 1500

---

**BIO_SC 4600: Evolution**  
Surveys various processes in organic evolution and underlying genetic mechanisms.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200

---

**BIO_SC 4640: Behavioral Biology**  
Comparative study of animal ethology. Principles of animal ethology illustrated in different animal phyla. May be taken with Laboratory for 4 credits.

**Credit Hours:** 3-4  
**Prerequisites:** BIO_SC 1500  
**Recommended:** one additional upper-level course in Biological Sciences or Psychology

---

**BIO_SC 4642: Animal Communication**  
Physical properties of sensory stimuli, receptor mechanisms, functional significance of communication behavior, and multidisciplinary and experimental approaches to current research in animal communication.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3400 or BIO_SC 4600

---

**BIO_SC 4670: Avian Ecology**  
Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2600 or BIO_SC 3650

---

**BIO_SC 4950: Undergraduate Research in Biology**  
Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3  
**Prerequisites:** BIO_SC 1010 or BIO_SC 1500; MATH 1500

---

**BIO_SC 4952: Undergraduate Research in Biology**  
Individually directed field or laboratory research for upperclass students under faculty supervision. Project must be arranged by student and faculty member prior to registration. May be repeated to a maximum of 6 hours.

**Credit Hour:** 1-3  
**Prerequisites:** BIO_SC 1010 or BIO_SC 1500; MATH 1500

---

**BIO_SC 4952H: Honors Research in Biology**  
Continuation of research program. Successful completion requires public presentation and leads to degree with Honors in biological sciences. May be repeated for credit for maximum of 6 hours. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** BIO_SC 4950H; overall GPA 3.3; instructor's consent. Honors eligibility required

---

**BIO_SC 4960: Special Readings in Biological Sciences**  
Independent readings and discussions of topics in biology selected in consultation with supervising faculty member. Selected sections of this course may be graded either on A-F or S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** senior standing in Biological Sciences and instructor's consent

---

**BIO_SC 4972: Developmental Biology**  
Analysis of the molecular, genetic, cellular, and morphological processes responsible for phenotypic changes in developing organisms. A variety of experimental systems are discussed to identify common mechanisms used by developing organisms.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200, BIO_SC 2300, CHEM 2100

---

**BIO_SC 4976: Molecular Biology**  
Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3  
**Prerequisites:** general knowledge of biology and/or chemistry

---

**BIO_SC 4978: Cancer Biology**  
The cellular and molecular basis of cancer, with emphasis on the application of genomics, proteomics, and genetic manipulations in model organisms to the study of cancer biology.

**Credit Hours:** 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300
Recommended: BIO_SC 4976 or BIOCHM 4270 and BIOCHM 4272

**BIO_SC 4982: Human Inherited Diseases**
(cross-leveled with BIO_SC 7982). Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.

Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300

**BIO_SC 4982W: Human Inherited Diseases - Writing Intensive**
(cross-leveled with BIO_SC 7982). Analysis of the molecular and cellular mechanisms underlying inherited diseases in humans. Topics include genetics of sex determination, metabolic disorders, cancer, blood groups, transplantation, AIDS.

Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 2300

**BIO_SC 4983: Molecular Ecology**
Application of molecular genetic techniques to topics in ecology and population biology such as sex ratios, dispersal, mating systems, biogeography and conservation genetics.

Credit Hours: 4
Prerequisites: BIO_SC 3400 or BIO_SC 2200 and BIO_SC 3650

**BIO_SC 4984: Mammalian Reproductive Biology**
Adult reproductive anatomy, physiology and behavior; gametogenesis and fertilization; placentation; sexual differentiation; parturition; maternal behavior and lactation; puberty; reproductive aging; reproductive ecology.

Credit Hours: 3
Prerequisites: junior standing
Recommended: 15 hours of Biological Sciences

**BIO_SC 4986: Neurology of Motor Systems**
(cross-leveled with BIO_SC 7986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements.

Credit Hours: 3
Prerequisites: BIO_SC 3700 or instructor's consent

**BIO_SC 4988: Nerve Cells and Behavior**
The cellular basis of behavior. Molecular and cellular properties of nerve cells, as related to behavior, will be represented and discussed.

Credit Hours: 3
Prerequisites: BIO_SC 3700 or instructor's consent

**BIO_SC 4990: Vertebrate Histology and Microscopic Anatomy**
Microscopic anatomy of vertebrate tissues and organs. Includes lab.

Credit Hours: 5
Prerequisites: junior standing
Recommended: BIO_SC 3700, or equivalent

**BIO_SC 4994: Senior Seminar**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hours: 3
Prerequisites: Biological Sciences major, senior standing

**BIO_SC 4994H: Senior Seminar - Honors**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hours: 3
Prerequisites: Biological Sciences major, senior standing; Honors eligibility required

**BIO_SC 4994HW: Senior Seminar - Honors/Writing Intensive**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hours: 3
Prerequisites: Biological Sciences major, senior standing; Honors eligibility required

**BIO_SC 4994W: Senior Seminar - Writing Intensive**
Readings and critical evaluation of selected problems and theories in biology. Offered in one or more sections, with specialized subdisciplinary emphasis.

Credit Hours: 3
Prerequisites: Biological Sciences major, senior standing

**BIO_SC 7002: Topics in Biological Sciences**
Advanced topics not in regularly offered courses. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-6

**BIO_SC 7320: Molecular Plant Physiology**
(same as PLNT_S 7320; cross-leveled with BIO_SC 4320, PLNT_S 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3
Prerequisites: chemical and/or biology

**BIO_SC 7328: Introductory Radiation Biology**
(same as NU_ENG 7328, RADIOL 7328, V_M_S 7328; cross-leveled with BIO_SC 4328, NU_ENG 4328, RADIOL 4328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

**BIO_SC 7400: Plant Anatomy**
(same as PLNT_S 7400; cross-leveled with BIO_SC 4400, PLNT_S 4400). Comparative structure, growth of meristems; development,
structure of important cell types, tissues systems; comparative anatomy of stem root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1200 or equivalent

---

**BIO_SC 7500: Neurobiology**  
(cross-leveled with BIO_SC 4500). Vertebrate and invertebrate neurobiology, including cell and molecular biology of the neuron, neuropathology, neuranatomy, neurophysiology and developmental biology. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2300 or BIO_SC 3700

---

**BIO_SC 7560: Sensory Physiology and Behavior**  
(cross-leveled with BIO_SC 4560). Basic principles of coding and integration of sensory stimuli; neural correlates of animal behavior; environmental influences on postnatal sensory development.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 4500 or equivalent

---

**BIO_SC 7590: Computational Neuroscience**  
(same as BIOL_EN 7590, ECE 7590; cross-leveled with BIO_SC 4590, BIOL_EN 4590, ECE 4590, BME 4590). An interdisciplinary course with a strong foundation in quantitative sciences for students in biological and behavioral sciences and an introduction to experimental methods for students from quantitative sciences.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 1010 or BIO_SC 1500, MATH 1500

---

**BIO_SC 7640: Behavioral Biology**  

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 1500 and one additional upper-level course in Biological Sciences or Psychology

---

**BIO_SC 7670: Avian Ecology**  
(cross-leveled with BIO_SC 4670). Advanced examination of ecological patterns in birds. Explores the environmental factors affecting the evolution of avian behavior, morphology, community structure and distribution.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2060 or BIO_SC 3650; BIO_SC 2600

---

**BIO_SC 7976: Molecular Biology**  
(cross-leveled with BIO_SC 4976). Molecular mechanisms of DNA replication, mutation, recombination and gene expression in prokaryotes, eukaryotes, and their viruses; gene fine structure; genetic engineering.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and BIO_SC 2300

---

**BIO_SC 7978: Cancer Biology**  
(same as BIOCHM 7978; cross-leveled with BIO_SC 4978, BIOCHM 4978). The course will cover major molecular and cellular aspects of cancer. Students will read original research articles, present overviews and lead class discussions.

**Credit Hours:** 3  
**Prerequisites:** BIOCHM 4270, BIO_SC 2300 and BIO_SC 4976 or equivalent

---

**BIO_SC 7982: Human Inherited Diseases**  
Advanced analysis of the molecular basis for genetic disorders in humans. Topics will include both Mendelian and complex traits with readings from the primary literature. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 2200 and instructor's consent

---

**BIO_SC 7986: Neurology of Motor Systems**  
(cross-leveled with BIO_SC 4986). Examination of the function of neural networks at all levels, from properties of single neurons to large collections of neural elements. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3700

---

**BIO_SC 7990: Non-thesis Research**  
Independent research not leading to a thesis. Some sections may be offered on either A-F or S/U grading basis.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

**BIO_SC 8002: Topics in Biological Sciences- Biological/Physical/ Mathematics**  
Advanced topics not in regularly offered courses.

**Credit Hour:** 1-6

---

**BIO_SC 8050: Professional Survival Skills**  
Introduction to resources, facilities, and communication skills for professional careers in biological sciences. Topics include computer resources, accessing scientific literature, making slides and figures, grantsmanship, resume preparation, manuscript review, and research presentation.

**Credit Hour:** 1-2

---

**BIO_SC 8060: Ethical Conduct of Research**  
(same as BIOCHM 8060). Discussion of ethical issues in biological research, including the rules and conventions for appropriate research conduct. Graded on S/U basis only.

**Credit Hour:** 1

---

**BIO_SC 8070: Professional Communication Development**  
The purpose of this course is to develop professional communication skills in students that are planning to attend (or are in their first year of) graduate training. Some sections may be offered with A-F or S/U grading option.

**Credit Hour:** 1-2
BIO_SC 8085: Problems in Biological Sciences
Research not expected to terminate in thesis, or individual advanced study in special subjects.

Credit Hour: 1-99
Prerequisites: instructor's consent

BIO_SC 8087: Seminar
Current topics in the biological sciences. Open to all graduate students. Graded S/U basis only.

Credit Hour: 1

BIO_SC 8090: Research in Biological Sciences
Research leading to thesis. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

BIO_SC 8187: Seminar in Areas of Specialization
Offered each semester in one or more specialized sections followed by the topic title of the seminar. Graded on S/U basis only.

Credit Hour: 1

BIO_SC 8300: Advanced Plant Genetics
Genetic approaches to molecular and biochemical studies in maize, wheat, and Arabidopsis.

Credit Hours: 3
Prerequisites: General Genetics and course in Cell Biology or Plant Physiology

BIO_SC 8310: Fungal Genetics and Biology
Introduction to fungal research, with an emphasis on genetics, biochemistry, cell and molecular biology, and pathogenicity of fungi. Graded A-F only.

Credit Hours: 3

BIO_SC 8320: Developmental Genetics
An overview of various developing systems amenable to classical and molecular genetic analysis. Specific developmental phenomena will be introduced in particular model systems, with an emphasis on experimental approaches used to address the underlying mechanisms.

Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIOCHM 7270, BIOCHM 7272, or equivalent

BIO_SC 8440: Integrative Neuroscience I
(same as NEUROSCI 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8442: Integrative Neuroscience II
(same as NEUROSCI 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.

Credit Hours: 3

BIO_SC 8460: Advanced Cancer Biology
A study of the molecular basis of cancer, including topics in tumor cell biology, interactions between cancer cells and normal cells, mechanisms of metastasis, and novel approaches to development of new chemotherapies.

Credit Hours: 3

BIO_SC 8505: Introduction to Plant Stress Biology
(same as PLNT_S 8505). This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only

Credit Hours: 2

BIO_SC 8600: Design of Ecological Experiments
Principles of experimental design in the context of ecological, behavioral, and evolutionary research.

Credit Hours: 2
Prerequisites: STAT 1400

BIO_SC 8610: Current Concepts in Conservation Biology
Survey of current concepts in conservation biology literature. Discussions will provide students with an appreciation of the historical development of concepts, the interdisciplinary nature of conservation problems, and the research required for effective solutions.

Credit Hours: 2

BIO_SC 8633: Molecular and Network Evolution
(same as AN_SCI 8633). Evolution of biological macromolecules and networks, including sequence analysis algorithms and theory, phylogenetics, gene duplication, genome evolution, principles of biological networks. Development of computational skills emphasized.

Credit Hours: 3
Prerequisites: Instructor's consent required

BIO_SC 8700: Ecological Genetics
Population genetics and evolutionary theory, with emphasis on studies of natural populations.

Credit Hours: 3
Prerequisites: BIO_SC 2200, BIO_SC 3100 or BIO_SC 3650, and STAT 1400 or equivalent

BIO_SC 8720: Speciation
Advanced discussion of species concepts and the processes of formation of species.

Credit Hours: 3
Prerequisites: BIO_SC 2200 and BIO_SC 4600
**BIO_SC 8724: College Science Teaching**  
(same as LTC 8724, PHYSCS 8310, ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.  
**Credit Hours:** 3

**BIO_SC 8725: Science Outreach: Public Understanding of Science**  
(same as AN_SC 8725, PHYSCS 8350, LTC 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.  
**Credit Hours:** 1-2

**BIO_SC 8726: Integrating Science with Outreach**  
(same as LTC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.  
**Credit Hours:** 1-6

**BIO_SC 8740: Plant/Animal Interactions**  
Discussion and lectures on herbivory, pollination biology, and dynamics of fruit and seed dispersal from ecological and evolutionary perspectives.  
**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3650 or BIO_SC 4660 or equivalent

**BIO_SC 9090: Research in Biological Sciences**  
Research leading to dissertation. Graded on A-F basis only.  
**Credit Hours:** 1-99  
**Prerequisites:** instructor's consent

**BIOMED 2110: Biomedical Terminology**  
Life science etymology (Greek for "true meaning"). Offered by classroom presentation and discussion. The course organization is based primarily on common themes of Greek and Latin terms along with historical reasons for current usage. The application of these terms is for all biomedical sciences and life sciences. Graded on A-F basis only.  
**Credit Hours:** 1

**BIOMED 2111: Veterinary Medical Terminology**  
Veterinary Medical Terminology is an extension of Biomedical Sciences 2110, Biomedical Terminology. The course organization is lecture, based primarily on domestic species and common themes of Greek and Latin terms. In addition, major veterinary medical eponyms, acronyms, and medical and surgical instruments are included. Graded on A-F basis only.  
**Credit Hours:** 1  
**Prerequisites:** BIOMED 2110 or instructor's consent

**BIOMED 2120: Essentials of Animal Handling and Physical Restraint**  
Fundamentals of handling and physical restraint of domestic large and small animals, laboratory animals, and common non-domestic pets. Graded on A-F basis only.  
**Credit Hours:** 2

**BIOMED 2130: Introduction to Veterinary Anatomy and Physiology**  
This introductory anatomy and physiology course describes the body and its functions from a systemic approach. Suitable for a student with no previous coursework in anatomy and physiology. Graded on A-F only.  
**Credit Hours:** 3

**BIOMED 2140: Companion Animals**  
(same as AN_SC 2140). Companion animals form an important part of our society. They serve us, provide companionship, and become members of our families. This class focuses primarily on dogs, cats, and horses. Topics covered include: the pet industry, breeds, wellness, management, care, training, zoonotic diseases, evolution and domestication, toxicology, nutrition, reproduction, genetics, human animal interactions, companion animal enterprise, and biomedical research. Students may enroll in one of two sections: service learning section or traditional course section.  
**Credit Hours:** 3  
**Recommended:** sophomore standing

**BIOMED 2230: Animal Sanitation and Disease Prevention**  
Preventative measures for diseases and parasites of farm animals.  
**Credit Hours:** 3

**BIOMED 2940: Internship in Biomedical Sciences**  
Supervised work experience to develop technical skills and enhance student knowledge in an area of biomedical science. Not intended for more than 50% independent research. Graded on S/U basis only.  
**Credit Hour:** 1-6
Prerequisites: sophomore standing and instructor's consent

BIOMED 3000: Specialty Careers for Veterinary Technicians
Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Course graded on A-F basis only.

Credit Hours: 1
Prerequisites: AAS degree in veterinary technology or instructors consent required

BIOMED 3001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 3100: Biomedical Pathophysiology
Pathophysiology is the study of changes in the body resulting from disease. This course requires knowledge of normal anatomy and physiology. A comparative approach is used involving both domestic animal and human examples. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3200: Comparative Hematology
Hematology is the study of blood cells in health and disease. Emphasis in this course is placed on the changes associated with disease. Transfusion medicine and coagulation disorders will also be included. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or BIO_SC 3700 or equivalent, AAS or equivalent degree from AVMA-accredited program or instructor's consent

BIOMED 3219: Elements of Comparative Anatomy
This course is designed to give students an introduction to and appreciation for comparative anatomy of various species encountered in animal science, veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: five hours of biological science or zoology or equivalent or instructor's consent or an AAS degree in veterinary technology

BIOMED 3250: Parasitology
Parasitology is considered as a fundamental type of interspecies interaction. Identifying characteristics, life cycle, and resulting disease caused by the common parasites of domestic animals, common laboratory animals, selected wildlife, and humans are described. Special emphasis is given to parasites that can be transmitted from animals to man.

Credit Hours: 3
Prerequisites: 8 hours of biology or instructor's consent

BIOMED 3300: Animal Welfare and Ethics
An introductory examination of ethical issues related to animal welfare, including animal use for food, research, and companionship, plus contemporary issues affecting companion animals, farm animals, and horses. Topics related to animal pain and legal status will also be discussed. Graded on A-F basis only.

Credit Hours: 3
Recommended: junior standing

BIOMED 3326: Comparative Pharmacology
An introduction to terminology used in pharmacology. Mechanisms of drug administration, absorption, distribution, metabolism, and excretion are described. Treatment modalities in animals and humans are compared. Basics of drug actions and the medicolegal aspects of pharmacology are discussed.

Credit Hours: 3
Prerequisites: an AAS degree in veterinary technology or AN_SCI 3254 or BIO_SC 3700, or equivalent, or instructor's consent

BIOMED 4001: Topics in Biomedical Sciences
Topics in Biomedical Sciences.

Credit Hour: 1-99

BIOMED 4100: Veterinary Clinical Chemistry
(cross-leveled with V_PBIO 7100). This course is designed to hone the skills of the practicing veterinary technician, veterinary student, or veterinarian and assumes some basic knowledge of normal serum chemistry and urinalysis results. The review of normal will be minimal and emphasis will be placed on clinical serum chemistry and urinalysis findings associated with diseases. The graduate level course will include discussion of ancillary tests and more extensive case interpretations.

Credit Hours: 3
Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association accredited programs; Undergraduate physiology on mammals (AN_SCI 3254, BIO_SC 3700, or equivalent
Recommended: BIOMED 2110 and BIOMED 3200 or instructor's consent

BIOMED 4110: Veterinary Cytology
(cross-leveled with V_PBIO 7110). This course is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Prerequisites: An AAS or equivalent degree in veterinary technology from an American Veterinary Medical Association-accredited program, or instructor's consent

Credit Hours: 2
Recommended: BIOMED 3200 and BIOMED 2110

**BIOMED 4120: Principles of Toxicology**
This course will provide an introduction to the general principles of toxicology, including the history and scope of the field; risk assessment and management; mechanisms of toxicity; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

**BIOMED 4210: Animal Issues in Disasters**
This course describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

**BIOMED 4300: Clinical Veterinary Neurology**
Clinical veterinary neurology will review the neurologic examination, common neurologic diseases and techniques to properly care for the neurologic patient. The course organization is based primarily on neuroanatomic localization of disease. Graded on A-F basis only.

**BIOMED 4320: Fundamentals of Small Animal Emergency and Critical Care**
This course will provide students with the knowledge and skills to assist in small animal medical emergency and critical care facilities.

**BIOMED 4333: Veterinary Cell Biology**
Course material stresses cell biology as related to animal health and medical issues. A comprehensive course overviewing molecular and biochemical issues of cell function especially as related to medicine and the underlying molecular causes of disease.

**BIOMED 4400: Veterinary Surgical Nursing**
Veterinary Surgical Nursing will enable the student to properly identify, care for, and maintain surgical equipment. The course will also prepare the student to learn surgical anatomy as well as the potential complications of common clinical setting surgeries. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Admission to the MS in Biomedical Sciences program

BIOMED 8311: Clinical Veterinary Physiology Review Series A: Cells, Circulation, Musculoskeletal, Renal, Immune
This course will provide graduate level instruction to review cellular, circulation, musculoskeletal, renal, and immune physiology, and apply concepts to the veterinary patient. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Acceptance into program

BIOMED 8312: Clinical Veterinary Physiology Review Series B: Respiration, Neurological, Gastrointestinal, Metabol
This course will provide graduate level instruction to review respiratory, neurological, gastrointestinal, metabolic, and endocrine physiology, and apply concepts to the veterinary patient. Graded on A-F only.
Credit Hours: 3
Prerequisites: admission into program

BIOMED 8700: Principles of Veterinary Pain Management
Pain pathophysiology, assessment, and management in veterinary patients. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Admission to the MS in Biomedical Sciences program

BIOMED 8710: Essentials of Radiation Biology
Essentials of Radiation Biology begins with an overview of pertinent medical physics and cell biology, then continues with the biologic, cellular and systemic responses to ionizing radiation. This course also includes a presentation of the early and late somatic and genetic effects of ionizing radiation. Required radiation protection guidelines and regulations will be taught as well as methods and techniques to reduce whole body and organ occupational radiation exposure. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Successful completion of undergraduate Biology; admission into the program

BIOMED 8900: Small Animal Wound Management and Reconstructive Surgery
This course addresses wound physiology, management and reconstructive surgery in small animal patients. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Admission to program

Black Studies (BL_STU)

BL_STU 1000: Introduction to Black Studies
An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by Black Studies. The role of historical, political, social, and economic forces in shaping cultural expression will be stressed. This course prepares students at all levels with a good foundation for advancement in Black Studies but also with a useful set of guidelines for further achievement in the humanities, behavioral and the social sciences.
Credit Hours: 3

BL_STU 1335: Introduction to Soul and Country
(same as MUSIC_NM 1335). Examination of musical cultures signified by "soul" and "country". Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.
Credit Hours: 3

BL_STU 1410: African American History
(same as HIST 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.
Credit Hours: 3

BL_STU 1700: Black Studies in Gender, Race, Sexuality, and Class: Introduction
This course introduces students to basic terminology, historical and contemporary dimensions of social inequality centered in race, gender, class and sexuality. Using multidisciplinary lenses to examine social, cultural, political and economic experiences of diverse Black populations, communities and individuals to learn core concepts: race, class, gender, and sexuality toward understanding the implications of socially-constructed identities for distinct groups of Black societies navigating various gendered modes of being. Graded on A-F basis only.
Credit Hours: 3
Recommended: BL_STU 1000

BL_STU 1705: Introduction to Black Studies in Culture
Introduction to the concepts, terms, themes, and practices in the study of the African diaspora cultures, through readings in literature, music, and the arts that demonstrate concepts, terms, themes, and practices. Recommended for prospective Black Studies Majors. Program consent for repetition.
Credit Hours: 3

BL_STU 1720: African-American Theatre History
(same as THEATR 1720). A historical and critical analysis of the evolution of African American cultural performance in the American theatre and entertainment industry.
Credit Hours: 3

BL_STU 1790: History of Early Africa
(same as HIST 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.
Credit Hours: 3

BL_STU 1800: History of Modern Africa
(same as HIST 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the
main challenges Africans faced since colonial times based on primary and secondary sources.

Credit Hours: 3

**BL_STU 2001: Undergraduate Topics in Black Studies-General**
Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

---

**BL_STU 2001H: Undergraduate Topics in Black Studies-General - Honors**
Organized study of selected topics. Subjects and credits may vary from semester to semester. Program consent for repetition.

Credit Hour: 1-3

Prerequisites: Honors eligibility required

---

**BL_STU 2003: Undergraduate Topics in Black Studies-Behavioral Science**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

---

**BL_STU 2003W: Undergraduate Topics in Black Studies-Behavioral Science - Writing Intensive**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3

---

**BL_STU 2004: Topics in Black Studies-Social Science**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

Credit Hours: 3

---

**BL_STU 2004W: Topics in Black Studies-Social Science - Writing Intensive**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.

Credit Hours: 3

---

**BL_STU 2005: Topics in Black Studies - Humanities**
Organized study of selected topics focusing on Black history and culture. Specific content may vary from semester to semester and will be announced in advance.

Credit Hours: 3

---

**BL_STU 2200: Social Inequalities**
(same as SOCIOL 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequality are structured.

---

**BL_STU 2210: The Black Americans**
(same as SOCIOL 2210.) Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, style of life, patterns of work and intergroup relations.

Credit Hours: 3

Prerequisites: SOCIOL 1000 or equivalent or instructor's consent

---

**BL_STU 2303: Studies in Black Relationships**
This course examines constructions of Black American coupling and therefore, gender, race, sexuality, and class in the 20th and 21st centuries. Blackness has been and continues to be reconstructed via marriage, dating, and other forms of coupling. Emphasis will be placed on the role of socialization, institutions, mass media, myth, and individual and group practices. Students will have the opportunity to explore their own socialization and personal construction through assigned readings, self-reflection, experiential activities, and small group presentations.

Credit Hours: 3

---

**BL_STU 2400: Introduction to African Diaspora Literature**
(same as ENGLSH 2400). Introduces students to African Diaspora literature with an emphasis on literature written originally in English. No more than six hours may be taken in the Introduction to African Diaspora Literature series.

Credit Hours: 3

Recommended: ENGLISH 1000

---

**BL_STU 2409: Introduction to African Diaspora Literature, 1890-Present**
(same as ENGLSH 2409). See BL_STU 2400 for course description.

Credit Hours: 3

---

**BL_STU 2410: African American Women in History**
(same as HIST 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into English-speaking North America to the present.

Credit Hours: 3

---

**BL_STU 2425: Race and the American Story**
(same as POL_SC 2425, CNST_DEM 2425). This course represents a collaboration between the University of Missouri's Department of Black Studies and the Kinder Institute on Constitutional Democracy. Building upon the existing Citizenship@Mizzou program, the course aims to carry forward the goals of the Citizenship program and to further solidify and magnify its impact on campus. In so doing, the course will also serve as a model for improving diversity education on campuses across the country and contribute to a more informed and unified national culture. The core syllabus will consist in readings that tell the story of the confrontation between American political principles and the practice of racial injustice throughout our history. Students will read and discuss the Declaration of Independence, the slavery clauses in the Constitution, the poetry of Phillis Wheatley, and the speeches of Frederick Douglass, Abraham Lincoln, and Martin Luther King, Jr., among others. They will achieve a
greater understanding of how diversity relates to humanity, and will learn to dialogue productively and civilly with others who may not share their background or opinions.

Credit Hour: 1

**BL_STU 2601: Languages of Africa**
(same as ENGLISH 2601 and LINGST 2601). Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.

Credit Hours: 3

**BL_STU 2604: Caribbean History and Culture**
This course surveys the historical and cultural development of the Caribbean region from colonial times to the present. It emphasizes the colonial decimation of Amerindians and the evolution from plantation societies to slave societies, along with tracing the history of racial and gender relations, imperial rivalries, economic dependency, and ultimately nationalism and political independence.

Credit Hours: 3

**BL_STU 2700: Black Studies in Gender, Race, Sexuality, and Class: Intermediate**
This course explores the historical and contemporary dimensions of social inequality centered in gender, race, class and sexuality. Using an interdisciplinary lens and feminist analysis this course will analyze social, cultural, political and economic experiences of various individuals and communities. Readings, lectures, films and discussions will focus on diverse structures of power and inequality and their relationship to constructions of patriarchy, capitalism, heterosexism, racism, nationality, and ability. Emphasis will be placed on the socially constructed definitions of various groups and how these definitions affect individual and group experiences. Graded on A-F basis only.

Credit Hours: 3
Recommended: BL_STU 1000

**BL_STU 2704: African Political Thought**
This course investigates African political philosophy and debate throughout the period leading to decolonization and the reflective years of thought following independence. Course will focus on individual political thinkers and cultural phenomena beginning with indigenous African theoretical approaches. Topics will include African Nationalism, populism and Marxism, Pan-Africanism, and concludes with contemporary perspectives on democracy, development, and the African State.

Credit Hours: 3

**BL_STU 2715H: Studies in Black Culture - Honors**
This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as will as other related disciplines. Program consent for repetition.

Credit Hours: 3
Prerequisites: Honors eligibility required

**BL_STU 2715: Studies in Black Culture**
This course will survey selected forms of black cultural expression, from a range of U.S., Africa, and the African Diaspora cultures in various media including literature, music, film studies, as will as other related disciplines. Program consent for repetition.

Credit Hours: 3

**BL_STU 2704: Black Studies in Slavery and Freedom**
(same as HIST 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

Credit Hours: 3

**BL_STU 2904: Black Studies in Slavery and Freedom**
(same as HIST 2904). This course provides study of historical background, economic, political and social implications of slavery and freedom in the African Diaspora (Americas, Africa, Europe, Asia) as well as the legal and extralegal struggles for and meaning of (global, local, and national) freedom.

Credit Hours: 3

**BL_STU 2940: African Religions**
(same as REL_ST 2940). This course will serve as an introduction to various forms of religiosity in sub-Saharan Africa. Greater emphasis will be devoted to the indigenous religious traditions of the continent, but we will also examine Christianity and Islam as they are practiced on the continent. The aim of this class is to help students to better understand various aspects of African cultures by dismantling stereotypes and assumptions that have long characterized the study of religions in Africa. The readings and lectures will be drawn from historical, anthropological, sociological, and literary sources. Graded on A-F basis only.

Credit Hours: 3

**BL_STU 2975: Traditions and Concepts in Black Studies**
This course provides a broad understanding of the diverse theoretical traditions within the field of Black Studies, through a comparative examination of concepts, developments, and debates in humanities, social and behavioral sciences, including literature, languages, and music, sociology, psychology, political science, women's and gender studies, and history. Course graded on A-F basis only.

Credit Hours: 3

**BL_STU 3001: Undergraduate Topics in Black Studies - General**
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hours: 3
BL_STU 3003: Undergraduate Topics in Black Studies - Behavioral Sciences
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3004: Undergraduate Topics in Black Studies - Social Science
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3004W: Undergraduate Topics in Black Studies - Social Science - Writing Intensive
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3005: Undergraduate Topics in Black Studies - Humanities
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to six credit hours with program consent.

Credit Hour: 1-3

BL_STU 3100: African American Psychology
(same as ESC_PS 3100 and PSYCH 3880). The research, theories, and paradigms developed to understand the attitudes, behaviors, and psychosocial realities of African-Americans are discussed.

Credit Hours: 3
Recommended: PSYCH 1000

(same as HIST 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.

Credit Hours: 3

BL_STU 3230: Studies in Black Sexual Politics
Course explores Black transnational politics of sex/sexuality and examines the theoretical, historical, and socio-cultural context that race, gender, and sexuality are used as analytical concepts. Students learn a transdisciplinary approach and apply this newly acquired information to analyze shifts in the field of Black sexuality studies. May be repeated for credit.

Credit Hours: 3

Recommended: sophomore standing required

BL_STU 3303: Undergraduate Topics in Black Studies - Behavioral Sciences
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3304: Undergraduate Topics in Black Studies - Social Science
Organized study of selected topics focusing on Black history, culture, or other relevant disciplines. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with program consent.

Credit Hour: 1-3

BL_STU 3400: Survey of African American Literature, Beginnings to 1900
(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3400W: Survey of African American Literature, Beginnings to 1900 - Writing Intensive
(same as ENGLISH 3400). A survey of major authors and movements in African American literature from its beginnings to 1900.

Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3410: Survey of African American Literature, 1900-Present
(same as ENGLISH 3410). A survey of major authors and movements in African American literature from 1900 to the present.

Credit Hours: 3
Prerequisites: ENGLISH 1000

BL_STU 3605: The History of Blacks in Germany
(same as GERMAN 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe, travelling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

Credit Hours: 3

BL_STU 3624: Comparative Approaches to Black Studies in History
(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Recommended for students with an interest in Black Studies or majors in the Humanities field. Program consent for repetition.

Credit Hours: 3

BL_STU 3624W: Comparative Approaches to Black Studies in History - Writing Intensive
(same as HIST 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black
BL_STU 3700: Black Studies in Gender, Race, Sexuality, and Class:
Advanced
This course provides in-depth study, reading, analysis, and application of key of race, class, gender, and sexuality, and related systemic racism, sexism, classism, and homophobia that impact social institutions, histories, and cultural practices for diverse groups of Black people across the gender, color, age, and ability spectrums, with attention to intersecting modes of being that frame our understanding of Black culture, history, and societies and their implications for inequality and equity. Importantly the course examine the importance of social identities, oppression and privilege, social spaces, and how differences and similarities historically, psychologically, and culturally construct symbolic and political Blackness that matters, to whom, for whom, and to what end, by exposing students to culturally-specific forms of internal and external oppression and suppression of voices and the responses of underrepresented, oppressed, and/or exploited groups to recover narratives of empowerment and effect change within their diverse communities and societies. Students will engage in diverse disciplinary methods for studying historical, cultural, and sociological phenomina in Black studies as such as double-consciousness and internalized racism, and critique existing models and develop new ways of thinking about, engaging, and critically challenging socially constructed and reconstructed notions of Black gendered monolithic otherness. Graded on A-F basis only.
Credit Hours: 3
Recommended: BL_STU 1000

BL_STU 3703: Themes in Black Society
Examines various themes, issues, and perspectives in political science, psychology, sociology, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies or Behavioral Science Majors. Program consent for repetition.
Credit Hours: 3

BL_STU 3705: Themes in Black Culture
Examines various themes, issues, and perspectives in literature, music, the arts, and other related disciplines related to social and historical institutions in the U.S., Africa, and the African Diaspora. Recommended for Black Studies Majors. Program consent required for repetition.
Credit Hours: 3

BL_STU 3804: Resistance in the Black Atlantic
Enslaved black people resisted slavery in the Americas in a variety of ways. From everyday forms of resistance to the planning of revolts, enslaved people displayed an unwillingness to yield to slavery, assertions of their freedom built on political, philosophical, and economic concepts about society and the rights of human beings. Resistance in what is known as the black Atlantic can be divided into nonviolent and violent forms, but within each of these categories were scores of activities validating the claim that the enslaved never accepted slavery or lost their sense of freedom as human beings. By focusing on nonviolent, violent, everyday and periodic forms of resistance, this course examines how the agency of the enslaved served as a foundation for the culture of freedom in the Americas. Resistance is used to explore the influence of blacks on the historical evolution of the Americas, and the overall aim of this course is to give students an understanding of black resistance as one of the most important sources of the progress of the Atlantic world.
Credit Hours: 3

BL_STU 3805: Hip-Hop: Global Music and Culture
Hip-Hop has captured the minds of youth worldwide, spawning themes, trends, attitudes, and behaviors that are similar to but distinct from the manifestation of hip-hop in the US. This course is designed as an intellectual excursion to explore the US and global creation and consumption of hip-hop through the lens of cultural studies. The class will study processes of imitation, appropriation, translation, and customization and their impact on themes of gender, hegemony, commercialism, sexuality, race, and identity.
Credit Hours: 3

BL_STU 3977: Black Studies Methodologies
Advanced research, writing, and application of knowledge and critical paradigms in Black Studies, through study of such topics as slavery, colonialism, urbanization and migration, environment, gender, race, identity, intellectual movements, cultural studies and popular culture. Graded on A-F basis only.
Credit Hours: 3
Recommended: BL_STU 2975

BL_STU 4001: Undergraduate Topics in Black Studies-General
Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.
Credit Hour: 1-3
Prerequisites: junior standing

BL_STU 4001W: Undergraduate Topics in Black Studies-General - Writing Intensive
Organized study of selected topics. Subjects and credit may vary from semester to semester. Program consent for repetition.
Credit Hour: 1-3
Prerequisites: junior standing

BL_STU 4003: Topics in Black Studies-Behavioral Science
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.
Credit Hours: 3

BL_STU 4004: Topics in Black Studies-Social Science
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.
Credit Hours: 3
BL_STU 4005: Topics in Black Studies-Humanities
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Repeatable up to 6 hours with departmental consent.
Credit Hours: 3

BL_STU 4020: Studies in Black Feminist Thought
(same as WGST 4020; cross-leveled with BL_STU 7020, WGST 7020). Examines recent problems and critical debates within black feminist theory.
Credit Hours: 3
Prerequisites: WGST 2020

BL_STU 4040: Slavery and the Crisis of the Union: The American Civil War Era
(same as HIST 4040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a ‘second American revolution’? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world?
Credit Hours: 3

BL_STU 4130: African-American Politics
(same as POL_SC 4130; CNST_DEM 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.
Credit Hours: 3

BL_STU 4210: African-American Religion
(same as REL_ST 4210). Examines the organization of major African American Christian denominations, Islam and religious movements. Twentieth century issues will be discussed, including sexism, classism and homophobia in church communities.
Credit Hours: 3
Prerequisites: junior standing

BL_STU 4230: Women, Development, and Globalization
(same as SOCIOL 4230, WGST 4230, PEA_ST 4230; cross-leveled with BL_STU 7230, SOCIOL 7230, WGST 7230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.
Credit Hours: 3

BL_STU 4300: The Black Family: Past, Present & Future
(same as H_D_FS 4300; cross-leveled with BL_STU 7300, H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.
Credit Hours: 3
Prerequisites: junior standing

BL_STU 4335: The Wire: Race, Urban Inequality, and the "Crisis" of the American City
(same as HIST 4235; cross-leveled with BL_STU 7335, HIST 7235). The HBO series "The Wire", a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, "The Wire" complicates understandings of the "urban crisis" through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.
Credit Hours: 3

BL_STU 4352: Historical Studies in African Music
(same as MUS_H_LI 4352). Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.
Credit Hours: 3

BL_STU 4400: Studies in African Diaspora Literature
(same as ENGLSH 4400; cross-leveled with BL_STU 7400, ENGLISH 7400). Topics (e.g., African American Poetry, African Diaspora Drama) announced at time of registration. No more than six hours may be taken in the Studies in African Diaspora Literature series.
Credit Hours: 3
Recommended: junior standing

BL_STU 4415: African Americans and American Justice
(same as HIST 4415; cross-leveled with BL_STU 7415, HIST 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3
Prerequisites: senior standing required

BL_STU 4415W: African Americans and American Justice - Writing Intensive
(same as HIST 4415; cross-leveled with BL_STU 7415, HIST 7415). This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3
Prerequisites: senior standing required

BL_STU 4420: Africana Womanism
(same as ENGLSH 4420; cross-leveled with BL_STU 7420, ENGLSH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3
Recommended: junior standing

BL_STU 4488: Major African Diaspora Women Writers, 1789 to 1890
(same as WGST 4488, ENGLSH 4488; cross-leveled with BL_STU 7488, WGST 7488, ENGLSH 7488). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4489: Major African Diaspora Women Writers, 1890 to Present
(same as WGST 4489, ENGLSH 4489; cross-leveled with BL_STU 7489, WGST 7489, ENGLSH 7489). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4489W: Major African Diaspora Women Writers, 1890 to Present - Writing Intensive
(same as WGST 4489W, ENGLSH 4489W; cross-leveled with BL_STU 7489, WGST 7489, ENGLSH 7489). See BL_STU 4480 for course description.

Credit Hours: 3

BL_STU 4500: Special Problems in Black Studies
Independent project or paper, not leading to dissertation.

Credit Hour: 1-99
Prerequisites: instructor's consent

BL_STU 4640: African Politics
(same as POL_SC 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3

BL_STU 4704: Religion and Black Freedom
(same as REL_ST 4704). In this course, we will explore the role of religion in the shaping of the African diaspora in the Americas through discussions of the readings. We will focus on the use of religion to pursue emancipation from enslavement and the concept of full freedom. Research and theories from mainly history, religious studies, and literature will be used to examine some of the ways in which black people have improved their condition through religion. The main objective of this course is to study the connections between religion and the fashioning of black resistance to slavery and systems of domination after slavery.

Credit Hours: 3

BL_STU 4710: Themes in African Diaspora Folklore
(same as ANTHRO 4160 and ENGLSH 4710.) Intensive study in a selected area of African Diaspora Folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature, or the folklore of a particular group. 4710 may be repeated for a maximum of six hours with instructor’s consent.

Credit Hours: 3
Recommended: junior standing

BL_STU 4804: Historical Studies of Black Women
This course offers a comprehensive examination of the origins, developments, and productions of the specified time period with emphases on black women as creative artists, activists, performers, musicians, and writers.

Credit Hours: 3

BL_STU 4877: Black Studies: Study Abroad-Social Science
This interdisciplinary study abroad course provides students with global experience within the African Diaspora, the opportunity to study in a foreign culture and augment their “global competencies” and support their study and/or career development. Graded A-F basis only.

Credit Hours: 3

BL_STU 4904: Historical and Contemporary Slavery
(same as HIST 4904). An exploration of slavery in both its historical and contemporary context, focusing on the origins, characteristics, and struggles to abolish the practice. Historical slavery examined using African enslavement in the Americas, and contemporary slavery using human trafficking and forced labor in the developed and developing world.

Credit Hours: 3

BL_STU 4977: Black Studies Capstone
This course is designed to permit students to integrate general and specialized knowledge within the three Black Studies tracks (History, Society, Culture) using an interdisciplinary approach. Topics vary according to instructor and core discipline. Graded on A-F basis only.

Credit Hours: 3

BL_STU 4977: Black Studies Capstone
Prerequisites: Junior standing

**BL_STU 7020: Studies in Black Feminist Thought**
(same as WGST 7020; cross-leveled with BL_STU 4020 and WGST 4020). Examines recent problems and critical debates within black feminist theory.

Credit Hours: 3

**BL_STU 7300: The Black Family: Past, Present & Future**
(same as H_D_FS 7300). Emphasis is on the unique social, economic, religious, educational and political environments that have affected the structure and function of the black family.

Credit Hours: 3

**BL_STU 7335: The Wire: Race, Urban Inequality, and the "Crisis" of the American City**
(same as HIST 7235; cross-leveled with HIST 4235, BL_STU 4335). The HBO series "The Wire", a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, "The Wire" complicates understandings of the "urban crisis" through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.

Credit Hours: 3

**BL_STU 7420: Africana Womanism**
(same as ENGLISH 7420). An intensive study of Africana Womanism, focusing on selected Africana women writers. May be repeated to six hours with departmental consent.

Credit Hours: 3

**BL_STU 8000: Independent Readings in Black Studies**
Readings on selected topics in Black Studies, with emphasis on the implications of the interdisciplinary and intersecting areas of History, Society, and Culture. May be repeated to a maximum of six hours.

Credit Hours: 3

Prerequisites: Department Consent Required

**BL_STU 8510: Ecology, Conservation, and Environmental Justice**
(same as F_W 8510). The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only. Prerequisites: One undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.

Credit Hours: 2

**BL_STU 8901: Graduate Topics in Black Studies**
Graduate seminar arranged by topics or themes related to Black Studies. Graded on A-F basis only.

Credit Hours: 3

**Business Administration (BUS_AD)**

**BUS_AD 1500: Foundations of Business and Professional Development Principles**
Introduction to Professional Development in Business. Will provide students the opportunity to learn about professional interpersonal dynamics - understanding and working with others. Students will learn skills imperative to forming and nurturing professional relationships and will have the opportunity to practice these skills via field experience. Throughout the course, students will continue to develop the professional competencies necessary for career success. This course is offered as a component of the college’s unique Professional Development Program. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: Restricted to freshman and sophomore students during early registration

**BUS_AD 2500: Intermediate Professional Development Principles**
This course will provide students the opportunity to learn how to be successful in the Trulaske College of Business (TCoB) as they prepare for a career in business. Students will be led through an exploration of opportunities in our college as well as their personal strengths and how those strengths match with various business academic and career paths. Further, students will learn competencies that are necessary for both academic and professional success. This course is offered as a component of the college’s unique Professional Development Program. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: 27 credit hours

Corequisites: BUS_AD 1500 or MNGMT 1050

**BUS_AD 3500: Advanced Professional Development Principles**
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

Credit Hours: 2

Prerequisites: Must be a BSBA or ACCT_BSACC major

**BUS_AD 4500: Professional Development Program - Internship**
This course is designed to help students practice professional core competencies in the workplace. Students will secure a professional-level work experience and apply classroom knowledge and interpersonal skills. This course is a graduation requirement for students seeking the BSBA degree. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: BUS_AD 3500; Restricted to Upper Level Business Majors who have had their internship approved by the Professional Development Program
BUS_AD 7050: MBA Communications Practice
Special laboratory instruction in oral and written communication skills with an emphasis on business communications.

Credit Hour: 1-3

BUS_AD 7330: Business Law/Regulation
Legal aspects of employment, administrative regulation, corporate and noncorporate ownership structures, and legal issues involving business transactions.

Credit Hour: 2-3

BUS_AD 7340: Business Ethics and Leadership
Case studies, discussion, and readings used to integrate critical thinking about ethical issues into business decision. Development and application of ethical decision making frameworks.

Credit Hour: 1-3

BUS_AD 8001: Topics in Business Administration
Selected topics in administration offered on experimental basis.

Credit Hour: 1-99
Prerequisites: instructor's consent

BUS_AD 8010: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated. Some sections may be graded on A-F or S/U basis.

Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8020: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. May be repeated. Some sections may be graded on A-F or S/U basis.

Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8030: MBA Seminar
Integration of business executives and real world problem solving, career preparation, and professional growth activities. Assignments emphasize teamwork and group productivity. Some sections may be graded A-F or S/U only. May be repeated.

Credit Hour: 1-3
Prerequisites: MBA students only

BUS_AD 8500: Business Problem Analysis: Field Project
Application of functional areas of business to real-world cases in business planning. Students will prepare and present business plan for an organization as a team project in a supervised experience.

Credit Hour: 1-3

BUS_AD 8600: Business Consulting
Students work in a team consulting capacity, with medium to large organizations, identifying and defining relatively complex and often ambiguous business problems such as needs assessment, quality management, systems management, policy/strategy formulation and similar areas.

Credit Hours: 3

BUS_AD 8730: International Study Abroad
Study abroad opportunities in one or more countries. Focuses on selected international business issues, cultural differences, and visiting businesses on-site. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-6
Prerequisites: consent required

Chemical Engineering (CH_ENG)

CH_ENG 1000: Introduction to Chemical Engineering
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2
Prerequisites or Corequisites: MATH 1500, CHEM 1320

CH_ENG 1000H: Introduction to Chemical Engineering - Honors
Orientation course for freshmen-level students. Introduction to careers and opportunities in chemical engineering, basic engineering principles, simple calculations.

Credit Hours: 2
Prerequisites or Corequisites: MATH 1500, CHEM 1320. Honors eligibility required

CH_ENG 2225: Mass and Energy Balance
Industrial stoichiometry, material and energy balances, thermophysics, thermochemistry; related topics.

Credit Hours: 3
Prerequisites or Corequisites: PHYSCS 2750, CHEM 2100

CH_ENG 2226: Engineering Process Computations
Introduction to the effective use of computer software with emphasis on chemical engineering applications, which include solutions for systems of algebraic equations using matrix methods; solutions of ordinary differential equations and partial differential equations and visualization of those solutions; linear, multilinear, and nonlinear regression for data analysis; 2D and 3D plotting, symbolic calculations, process control simulations, and text processing.

Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 2225, MATH 2300
Prerequisites: MATH 1700
CH_ENG 3234: Momentum, Heat, and Mass Transfer
Fluid flow, heat and mass transfer. A comprehensive treatment of the transport processes related to chemical engineering operations, with focus on both theory and applications.

Credit Hours: 4
Prerequisites or Corequisites: MATH 4100
Prerequisites: grade of C- or better in CH_ENG 2225; PHYSCS 2750, MATH 2300

CH_ENG 3235: Separation Processes
Separation processes in chemical engineering, including: Evaporation, absorption, distillation, extraction, leaching, membrane separation, and drying.

Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 3262
Prerequisites: CH_ENG 2225, CH_ENG 2226

CH_ENG 3243: Chemical Engineering Thermodynamics I
Introduction to classical thermodynamics with chemical engineering applications. Heat, work, and energy; Application of the Laws of Thermodynamics to closed systems, open systems, and power and refrigeration cycles; Thermochemical calculations; Equations of state; Phase equilibrium properties of pure fluids.

Credit Hours: 3
Prerequisites or Corequisites: MATH 2300
Prerequisites: PHYSCS 2750; grade of C or better in CH_ENG 2225

CH_ENG 3261: Chemical Engineering Thermodynamics II
Chemical thermodynamics, with emphasis on mixtures. Multicomponent systems and phase diagrams; residual and excess properties; chemical potential, fugacity, and activity; models of non-ideal mixtures; phase and surface equilibria; chemical reaction equilibria.

Credit Hours: 3
Prerequisites: CH_ENG 3261, MATH 2300
Recommended: CHEM 2110 or concurrent enrollment

CH_ENG 3262: Chemical Engineering Thermodynamics II
(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 3307: Chemical Process Safety and Professional Ethics
A course focused on important technical fundamentals of chemical process safety and their application including professional ethics considerations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CH_ENG 2225

CH_ENG 4001: Topics in Chemical Engineering
Current and new technical developments in chemical engineering.

Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 4085: Problems in Chemical Engineering
Directed study of chemical engineering problems.

Credit Hour: 2-4
Prerequisites: instructor's consent

CH_ENG 4220: Hazardous Waste Management
(same as CV_ENG 4220; cross-leveled with CH_ENG 7220, CV_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous waste, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3
Prerequisites: junior standing
Recommended: CHEM 1320

CH_ENG 4270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as BIOL_EN 4270; cross-leveled with CH_ENG 7270, BIOL_EN 7270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.

Credit Hours: 3
Recommended: experience with Excel or instructor's consent

CH_ENG 4285: Pollution Prevention
Identify, analyze, and solve energy, water, and raw materials inefficiencies common to industrial processes and facilities. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Thermodynamics (ENGINR 2300, MAE 2300, or CH_ENG 3261); Sophomore standing
Recommended: CHEM 1320

CH_ENG 4306: Advanced Engineering Math
(same as NU_ENG 4306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.

Credit Hours: 3
Prerequisites: MATH 4100

CH_ENG 4311: Chemodynamics
(cross-leveled with CH_ENG 7311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the
CH_ENG 4312: Air Pollution Control
(cross-leveled with CH_ENG 7312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 4315: Principles of Biochemical Engineering
(same as BIOL_EN 4315; cross-leveled with CH_ENG 7315, BIOL_EN 7315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or Instructor's consent
Recommended: BIOL_EN 3180 (for Biological Engineering students) or CH_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

CH_ENG 4316: Biomass Refinery Operations
(same as BIOL_EN 4316; cross-leveled with CH_ENG 7316, BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for Biological Engineering students) or CH_ENG 2225 (for Chemical Engineering students) or instructor's consent

CH_ENG 4317: Chemical Processing in Semiconductor Device
(cross-leveled with CH_ENG 7317). This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.
Credit Hours: 3
Prerequisites: PHYSCS 2760, CHEM 1320, and MATH 4100 or MATH 7100

CH_ENG 4318: Energy Technology and Sustainability
An introductory course on energy technology, resources, practices, and common calculations used for energy analysis. May be repeated for credit. Recommended: at least one thermodynamics or physical chemistry course (examples: CHEM 3310, CH_ENG 3261, ENGINR 2300, MAE 2300, PHYSCS 4120) or instructor's consent.
Credit Hours: 3

CH_ENG 4319: Introduction to Polymers
(cross-leveled with CH_ENG 7319). An introduction to the structure and properties of polymers. Solution properties, molecular weight determination and rheological behavior are studied. Manufacturing and processing techniques are considered.
Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 4363
Prerequisites: CHEM 2110, CH_ENG 3234, CH_ENG 3262

CH_ENG 4335: Intermediate Transport Phenomena
(cross-leveled with CH_ENG 7335). Integrated study of momentum, heat and mass transport.
Credit Hours: 3
Prerequisites: CH_ENG 3234, and MATH 4100 or MATH 7100

CH_ENG 4363: Chemical Reaction Engineering and Technology
Reactor design and optimization; rate equations; thermal effects in reactor.
Credit Hours: 3
Prerequisites: CHEM 1330, CH_ENG 2226, CH_ENG 3234
Recommended: CH_ENG 3262

CH_ENG 4370: Process Control
State-space modeling, simulation, and experimental validation; stability analysis; feedback design and experimental studies; methods for disturbance rejection.
Credit Hours: 3
Prerequisites: CH_ENG 2225, CH_ENG 2226, MATH 4100
Recommended: CH_ENG 3261, MATH 4140

CH_ENG 4385: Chemical Engineering Design I
The course presents optimum design methods, cost estimation, material selection and other relevant areas for the design of chemical plants. In addition, chemical safety and risk assessment will be covered. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 4363
Prerequisites: CH_ENG 2226, CH_ENG 3234, CH_ENG 3235, CH_ENG 3262, CHEM 2110
Recommended: CH_ENG 4370 or concurrent enrollment

CH_ENG 4401: Finite Element Methods in Chemical Engineering
(cross-leveled with CH_ENG 7401). The numerical solution of engineering problems in heat and mass transport, computational fluid dynamics, and chemical reactions including electromagnetic effects are treated in full detail using finite element methods and computational software to solve problems in one, two, and three dimensional spaces. Both time dependent and steady state solutions are considered. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: MATH 4100
Prerequisites: CHEM 1330, CH_ENG 2226
Recommended: CH_ENG 3234 and CH_ENG 4363, or concurrent enrollment

CH_ENG 4980: Process Synthesis and Design
(cross-leveled with CH_ENG 7980). Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.
Credit Hours: 3
Prerequisites: CH_ENG 3262, CH_ENG 4363, CH_ENG 4385
Recommended: CH_ENG 4370 or concurrent enrollment

CH_ENG 4980W: Process Synthesis and Design - Writing Intensive
(cross-leveled with CH_ENG 7980). Continuation of CH_ENG 4385: application of chemical analysis and modeling to a capstone design project.
Credit Hours: 3
Prerequisites: CH_ENG 3262, CH_ENG 4363, CH_ENG 4385
Recommended: CH_ENG 4370 or concurrent enrollment

CH_ENG 4990: Undergraduate Research in Chemical Engineering
Directed study of chemical engineering problems.
Credit Hour: 2-4
Prerequisites: instructor's consent

CH_ENG 4995: Undergraduate Research in Chemical Engineering - Honors
Individual research for a senior thesis; research is supervised by the chemical engineering faculty. The thesis is to be defended before the departmental Honors committee.
Credit Hour: 3-6
Prerequisites: senior standing

CH_ENG 7001: Topics in Chemical Engineering
Current and new technical developments in chemical engineering.
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 7220: Hazardous Waste Management
(same as CV_ENG 7220; cross-leveled with CH_ENG 4220, CV_ENG 4220). Engineering principles involved in handling, collection transportation, processing and disposal of hazardous waste minimization, legislation on hazardous wastes and groundwater contamination.
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 7270: Design of Experiments and Statistical Quality Control for Process Engineers
(same as BIOL_EN 7270; cross-leveled with CH_ENG 4270, BIOL_EN 4270). A practical statistical tool box for experimenters: process means, effects of variables, factorial experiments, and statistical quality control.
Credit Hours: 3
Prerequisites: experience with Excel or instructor's consent

CH_ENG 7311: Chemodynamics
(cross-leveled with CH_ENG 4311). Environmental movement of chemicals in air, water, and soil; designed to introduce students to the basic principles and techniques useful for the prediction of the movement and fate chemicals in ecosystems.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7312: Air Pollution Control
(cross-leveled with CH_ENG 4312). Modeling of urban air pollution and control techniques. Topics treated are plume dispersion theories, photochemistry, methods of monitoring, methods of industrial abatement and legal aspects.
Credit Hours: 3
Prerequisites: CH_ENG 3234 or instructor's consent

CH_ENG 7315: Principles of Biochemical Engineering
(same as BIOL_EN 7315; cross-leveled with CH_ENG 4315, BIOL_EN 4315). This course serves as an introduction to the application of biological, biochemical, and engineering fundamentals for biochemical processing. Topics include biological basics, enzyme kinetics, metabolic pathways, cell growth kinetics, analysis of intracellular flux, thermodynamics of biological reactions, and bioreactor design and modeling. Analyses proceed through the use of mass balances, energy balances, and empirical or theoretical models.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 (for biological engineering students) or CH_ENG 2225 (for chemical engineering students) or Instructor's consent
Recommended: BIOL_EN 3180 (for Biological Engineering students) or CH_ENG 3234 (for Chemical Engineering students) as a prerequisite or a co-requisite

CH_ENG 7316: Biomass Refinery Operation
(same as BIOL_EN 7316; cross-leveled with CH_ENG 4316, BIOL_EN 4316). Design and operation of processes for conversion and/or fractionation of biomass and associated upstream and downstream unit operations. Emphasis on separations and product recovery.
Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CH_ENG 2225 or instructor's consent

CH_ENG 7317: Chemical Processing in Semiconductor Device
(cross-leveled with CH_ENG 4317). This course covers the current plasma processing methods used to produce semiconductor devices with emphasis on memory devices. The physics and chemistry of how plasmas are formed, sustained and interact with the semiconductor wafers being processed. Plasma chemistry and the chemical reactions used in plasma etching are discussed.
Credit Hours: 3
Prerequisites: PHYSCS 2760, CHEM 1320, and MATH 4100 or MATH 7100

CH_ENG 7319: Introduction to Polymers
(cross-leveled with CH_ENG 7319). An introduction to the structure and properties of polymers. Solution properties, molecular weight
determination and rheological behavior are studied. Manufacturing and processing techniques are considered.

Credit Hours: 3
Prerequisites or Corequisites: CH_ENG 4363
Prerequisites: CHEM 2210, CH_ENG 3234, CH_ENG 3262

CH_ENG 7335: Intermediate Transport Phenomena
(cross-leveled with CH_ENG 4335). Integrated study of momentum, heat and mass transport.
Credit Hours: 3
Prerequisites: CH_ENG 3234, and MATH 4100 or MATH 7100

CH_ENG 7401: Finite Element Methods in Chemical Engineering
(cross-leveled with CH_ENG 4401). The numerical solution of engineering problems in heat and mass transport, computational fluid dynamics, and chemical reactions including electromagnetic effects are treated in full detail using finite element methods and computational software to solve problems in one, two, and three dimensional spaces. Both time dependent and steady state solutions are considered. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: MATH 4100
Prerequisites: CHEM 1330, CH_ENG 2226
Recommended: CH_ENG 3234 and CH_ENG 4363, or concurrent enrollment

CH_ENG 8001: Advanced Topics in Chemical Engineering
Credit Hours: 3
Prerequisites: instructor's consent

CH_ENG 8029: Advanced Plasma Processing
Concepts and techniques in novel plasma processing: plasma characteristics, plasma sputtering, plasma enhanced chemical vapor deposition (PECVD), plasma etching, plasma treatment, plasma fabrication of nano-structured materials and diamondlike films, biomedical applications.
Credit Hours: 3

CH_ENG 8085: Problems in Chemical Engineering
Supervised investigation in chemical engineering to be presented in the form of a report.
Credit Hour: 1-5
Prerequisites: instructor's consent

CH_ENG 8087: Seminar in Chemical Engineering
Reviews investigations and projects of importance in chemical engineering.
Credit Hour: 1

CH_ENG 8230: Advanced Ceramic Materials
(same as BIOL_EN 8230 and MAE 8230). To provide an advanced level understanding between processing, properties, and microstructure of ceramic materials. Topics include crystallography, defect chemistry, transport properties, microstructure, and forming methods. Graded on A-F basis only.

CH_ENG 8336: Advanced Heat and Momentum Transfer
Advanced study of these transport phenomena.
Credit Hours: 3
Prerequisites: CH_ENG 3235 or instructor's consent

CH_ENG 8337: Advanced Mass Transfer
Advanced study of mass transfer.
Credit Hours: 3
Prerequisites: CH_ENG 4336 or instructor's consent

CH_ENG 8338: Analysis of Equilibrium Stage Processes
Advanced study of stage processes.
Credit Hours: 3
Prerequisites: CH_ENG 2226, CH_ENG 3235 and CH_ENG 3262

CH_ENG 8451: Advanced Chemical Engineering Thermodynamics I
Advanced thermodynamics; particular reference to its application to chemical engineering.
Credit Hours: 3
Prerequisites: CH_ENG 8451 or instructor's consent

CH_ENG 8452: Advanced Chemical Engineering Thermodynamics II
Introduction to the methods of statistical thermodynamics and statistical mechanics. The method of ensembles, Maxwell-Boltzmann statistics, the kinetic theory of gases, and theories of liquids. Applications of statistical mechanics to the prediction of physical and chemical properties such as rate coefficients, diffusion coefficients, and conductivities. Graded A-F only.
Credit Hours: 3
Prerequisites: CH_ENG 8451 or instructor's consent

CH_ENG 8463: Chemical Reaction Engineering Science
Phenomenological behavior of catalysts. Theoretical interpretations for heterogeneous and homogeneous catalysts.
Credit Hours: 3
Prerequisites: CH_ENG 4363

CH_ENG 8990: Research-Masters Thesis in Chemical Engineering
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: Masters candidate

CH_ENG 9990: Research-Doctoral Dissertation in Chemical Engineering
Independent investigation in chemical engineering, to be presented as a thesis. Graded on a S/U basis only. candidate
Credit Hour: 1-99
Prerequisites: Ph.D
Chemistry (CHEM)

CHEM 1000: Introductory Chemistry
Introductory course for students with no high school background in chemistry. Covers fundamental principles of scientific measurement, stoichiometry, solutions, basic atomic structure, gases. No credit if taken after CHEM 1100 or CHEM 1320.

Credit Hours: 2
Prerequisites or Corequisites: MATH 1100 or MATH 1120
CHEM 1000 - MOTR CHEM 100: Essentials in Chemistry

CHEM 1100: Atoms and Molecules with Lab
One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1000, CHEM 1310 or CHEM 1320.

Credit Hours: 3
CHEM 1100 - MOTR CHEM 100L: Essentials in Chemistry with Lab

CHEM 1100H: Atoms and Molecules with Laboratory - Honors
One-semester introduction for non-science majors to the basic concepts and important applications of chemistry. Satisfies A&S requirement for a laboratory science. No credit if taken after CHEM 1310.

Credit Hours: 3
Prerequisites: Honors eligibility required

CHEM 1320: College Chemistry I
First of two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4
Prerequisites: MATH 1100 or MATH 1120 or equivalent
CHEM 1320 - MOTR CHEM 150L: Chemistry I with Lab

CHEM 1320H: College Chemistry I - Honors
First of a two-course sequence emphasizing principles and applications of modern chemical sciences. Covers chemical nomenclature, stoichiometry, kinetic molecular theory, atomic structure, periodic properties, and molecular structure and bonding. Satisfies laboratory science requirement. Math Reasoning Proficiency Course.

Credit Hours: 4
Prerequisites: MATH 1100 or MATH 1120 or equivalent. Honors eligibility required

CHEM 1330: College Chemistry II
Continuation of CHEM 1320. Covers intermolecular forces, solutions, kinetics, acid-base chemistry, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4
Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H

CHEM 1330H: College Chemistry II- Honors
Continuation of CHEM 1320H. Covers equilibria, kinetics, electrochemistry, nuclear chemistry, thermodynamics. Satisfies requirement for a laboratory science. May be taken concurrently with CHEM 2030 or CHEM 2100.

Credit Hours: 4
Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H.
Honors eligibility required

CHEM 2030: Survey of Organic Chemistry
One-semester introduction to structure and bonding, functional group chemistry, principles of reactivity, reaction mechanisms, the molecules of life.

Credit Hours: 3
Prerequisites: Grade of C- or better in CHEM 1320 or CHEM 1320H or equivalent. Recommended CHEM 1330, or CHEM 1330 concurrently

CHEM 2100: Organic Chemistry I
First course of a two-semester sequence. Structure and bonding; chemistry of hydrocarbons, alkyl halides, alcohols and ethers; reaction mechanisms; principles of reactivity and synthesis; IR and NMR spectroscopy. Only 1 hour credit if taken after CHEM 2030 or equivalent.

Credit Hours: 3
Prerequisites: grade of C- or better in CHEM 1320 or CHEM 1320H or equivalent. Honors eligibility required

CHEM 2110: Organic Chemistry II
Continuation of CHEM 2100. Aromatic hydrocarbons, carbonyls, amines; chemistry of carbanions; reactions of polar double bonds; nucleic acids, proteins, carbohydrates and fats.

Credit Hours: 3
Prerequisites: grade of C- or better in CHEM 2100 or equivalent, or departmental consent

CHEM 2130: Organic Laboratory I
Basic lab techniques, functional group manipulations, and short syntheses. Pre-lab and post-lab writing assignments. 1 hour recitation, 3 hours lab per week.

Credit Hours: 2
Recommended: Concurrent enrollment in CHEM 2110 or CHEM 2030.
No credit for students who have previous organic laboratory credit

CHEM 2140: Organic Laboratory II
Continuation of CHEM 2130. Preparation and identification of organic compounds; application of instrumental techniques. 2 lab sessions, 1 recitation session per week.

Credit Hours: 2
Recommended: Concurrent enrollment in CHEM 2110 or CHEM 2130.

CHEM 2170H: Honors Organic Chemistry II with Lab - Honors
Continuation of CHEM 2160H; includes laboratory. Content and structure similar to CHEM 2110, but with increased depth and breadth.

Credit Hours: 5
Prerequisites: honors eligibility, grade of B or better in CHEM 2160H or instructor's permission

CHEM 2400: Fundamentals of Inorganic Chemistry with Lab
A systematic introduction with laboratory to inorganic and organometallic compounds, reactions, and periodic properties.
Credit Hours: 3
Prerequisites: grade of C- or better in CHEM 2130

CHEM 2950: Undergraduate Research in Chemistry
A laboratory research project and/or preparation of compounds with a written final report. Cannot be substituted for other chemistry courses required for a B.S. or B.A. degree. No more than 6 hrs. total credit.
Credit Hour: 1-3
Prerequisites: sophomore standing, 2.75 GPA and/or instructor's consent

CHEM 3200: Quantitative Methods of Analysis with Lab
Principles and practice of quantitative analysis, including the basic principles of modern instrumental methods.
Credit Hours: 4
Prerequisites: CHEM 1330 or CHEM 1500H

CHEM 3300: Fundamentals of Physical Chemistry
Survey of physical chemistry. Satisfies physical chemistry prerequisite for BIOCHM 8430.
Credit Hours: 3
Prerequisites: MATH 1700, a course in organic chemistry; PHYSCS 1210 and PHYSCS 1220 or PHYSCS 2750, or PHYSCS 2780

CHEM 3330: Physical Chemistry II
Lecture only. Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.
Credit Hours: 3
Prerequisites: MATH 2300 or instructor approval. May be taken independently of CHEM 3310

CHEM 3330H: Physical Chemistry II - Honors
Covers wave mechanics, bonding, molecular spectroscopy and statistical mechanics.
Credit Hours: 3
Prerequisites: MATH 2300 or instructor approval. May be taken independently of CHEM 3310. Honors eligibility required

CHEM 3340: Physical Chemistry Laboratory
Credit Hours: 3
Prerequisites: Grade of C or better in CHEM 3200; CHEM 3330 or CHEM 3330 concurrently

CHEM 3700: Undergraduate Seminar in Chemistry
Methods for locating and presenting chemical information, data analysis techniques, professional issues.
Credit Hours: 3
Prerequisites: CHEM 1330 and CHEM 2100

CHEM 3700W: Undergraduate Seminar in Chemistry - Writing Intensive
Methods for locating and presenting chemical information, data analysis techniques, professional issues.
Credit Hours: 3
Prerequisites: CHEM 1330 and CHEM 2100

CHEM 3800: Internship in Chemistry
Cannot be substituted for other chemistry courses required for B.S. or B.A. degree.
Credit Hour: 1-6
Prerequisites: departmental consent

CHEM 4001: Topics in Chemistry - General
Organized study designed to broaden the knowledge base of students. Subjects on analytical, inorganic, organic and physical chemistry covered.
Credit Hour: 1-99
Prerequisites: departmental consent

CHEM 4010: Advanced Chemistry Laboratory
Advanced methods for the synthesis and characterization of organic, inorganic, and organometallic compounds.
Credit Hours: 3
Prerequisites: CHEM 2400, CHEM 2140, or CHEM 2190H, CHEM 3200, CHEM 3330 or CHEM 3330 corequisite

CHEM 4050: Problems in Chemistry
Individual study under the direction of a faculty member that supplements regular course work.
Credit Hour: 1-99
Prerequisites: instructor's consent

CHEM 4160: Intermediate Organic Chemistry
Stresses synthetic organic chemistry at an intermediate level.
Credit Hours: 3
Prerequisites: CHEM 2110, CHEM 3310 or instructor's consent

CHEM 4170: Medicinal Chemistry
Chemical mechanisms of drug action. Topics include drug metabolism and action, chemical toxicology and medicines, enzyme activity, and specific drug case studies.
Credit Hours: 3
Prerequisites: CHEM 2110, CHEM 3310 or instructor's consent

CHEM 4200: Instrumental Methods of Analysis with Lab (cross-leveled with CHEM 7200). Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.
Credit Hours: 3
Prerequisites: CHEM 2110, CHEM 3310 or instructor's consent
CHEM 4280: Environmental Chemistry
Surveys the chemistry of air and water environments; discusses the chemistry of waste treatment.
Credit Hours: 3
Prerequisites: 8 hours chemistry including organic and analytical

CHEM 4310: Physical Chemistry I
Lecture only. Topics include the kinetic theory of gases, chemical kinetics, thermodynamics and chemical equilibrium.
Credit Hours: 3
Prerequisites: CHEM 2100, MATH 1700, and PHYSCS 1220 or 2760

CHEM 4400: Inorganic Chemistry
(cross-leveled with CHEM 7400). Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.
Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 4490: Inorganic Chemistry
(cross-leveled with CHEM 7400). Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.
Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 490H: Senior Honors Research I
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

CHEM 4990H: Senior Honors Research II
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 7087: Seminar in Chemistry for Beginning Graduate Students
Seminar in Chemistry for Beginning Graduate Students
Credit Hour: 1

CHEM 7200: Instrumental Methods of Analysis with Lab
(cross-leveled with CHEM 4200). Chemical instrumentation methods including electrochemistry, spectroscopy, and advanced separations techniques.
Credit Hours: 3
Prerequisites: CHEM 3200, a semester of physical chemistry

CHEM 7300: Intermediate Physical Chemistry
Treatment of atomic and molecular, structure and spectroscopy based on quantum concepts. Designed to provide a broad base of knowledge in these fundamental areas to beginning graduate students in chemistry.
Credit Hours: 3
Prerequisites: departmental consent

CHEM 7400: Inorganic Chemistry
(cross-leveled with CHEM 4400). Atomic and molecular structure, bonding, kinetics and mechanism, ligand field theory, coordination compounds, acids and bases.
Credit Hours: 3
Prerequisites: one semester Physical Chemistry, second semester concurrently

CHEM 7490: Physics and Chemistry of Materials
(same as NU_ENG 7319, PHYSCS 7190, BIOL_EN 7480; cross-leveled with CHEM 4490, NU_ENG 4319, PHYSCS 4190, BIOL_EN 4480, BME 4480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2750, CHEM 1320 or equivalent, or instructors consent

CHEM 7490H: Senior Honors Research I
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

CHEM 7491H: Senior Honors Research II
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required

CHEM 7708: Seminar in Chemistry for Beginning Graduate Students
Seminar in Chemistry for Beginning Graduate Students
Credit Hour: 1

CHEM 7709: Seminar in Chemistry for Beginning Graduate Students
Seminar in Chemistry for Beginning Graduate Students
Credit Hour: 1

CHEM 7800: Chemistry Teaching Practicum
Provides practical experience teaching introductory chemistry in discussion and laboratory settings. For students pursuing dual degrees in chemistry and secondary education. For students pursuing simultaneous dual degrees in chemistry and secondary education. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: senior standing; departmental consent required

CHEM 7950: Senior Research
A laboratory research project with approved written goals and a final written report. It may be taken twice.
Credit Hours: 3
Prerequisites: a 2.75 GPA, departmental consent

CHEM 7990H: Senior Honors Research I
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, and approval of project outline. Honors eligibility required

CHEM 7991H: Senior Honors Research II
A laboratory research experience with a student-instructor prepared outline approved by the Honors Director, a final written report and a final oral presentation and examination.
Credit Hours: 3
Prerequisites: a 3.33 GPA, departmental consent, approval of project outline. Honors eligibility required
CHEM 8003: Topics in Chemistry - Natural Science  
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.  
**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

CHEM 8050: Non-Thesis Research in Chemistry  
Does not lead to dissertation.  
**Credit Hour:** 1-99

---

CHEM 8085: Topics in Chemistry  
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department.  
**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

CHEM 8087: Seminar in Chemistry  
**Credit Hour:** 1

---

CHEM 8090: Thesis/Dissertation (pre-candidacy) Research in Chemistry  
Research leading to thesis. Graded on a S/U basis only.  
**Credit Hour:** 1-99

---

CHEM 8150: Organic Reaction Mechanisms  
Organic reaction mechanisms are discussed within a framework of structure-reactivity relationships. Particular attention directed to the chemistry of reactive intermediates and the application of stereochemical and molecular orbital concepts.  
**Credit Hours:** 3  
**Prerequisites:** 1 year of Organic Chemistry and Physical Chemistry

---

CHEM 8160: Organic Spectroscopy  
Structural analysis of organic compounds involving problem solving using modern NMR, IR, UV-VIS, MS CD/ORD and other spectroscopic techniques.  
**Credit Hours:** 3  
**Prerequisites:** CHEM 3330 or equivalent or instructor's consent

---

CHEM 8170: Applications of the Reactions of Organic Chemistry  
**Credit Hours:** 3  
**Prerequisites:** CHEM 8150

---

CHEM 8200: Analytical Measurement  
Fundamental and applied aspects of scientific measurements. Topics include: Statistics, signal-to-noise, frequency analysis, sources of noise, digital and analog filtering, time vs. frequency domain measurements, Fourier transformation, sampling, convolution/deconvolution, autocorrelation and cross-correlation. Directed toward entering graduate students.  
**Credit Hours:** 3

---

CHEM 8230: Separations and Chromatography  
Classical and instrumental methods of separation: gas, paper, thin film, and column chromatography; ion exchange.  
**Credit Hours:** 3

---

CHEM 8240: Mass Spectrometry  
This course will cover various aspects of modern mass spectrometry. Topics will include instrumentation, theory, uses and interfaces to mass spectrometry. Graded on A-F basis only.  
**Credit Hours:** 3

---

CHEM 8250: Analytical Spectroscopy  
Selected topics dealing with recent advances in analytical chemistry.  
**Credit Hours:** 3

---

CHEM 8260: Surface Analysis and Characterization  
Covers various aspects of modern methods of surface analysis and characterization. Topics include instrumentation, theory, and data reduction methods. Major sections include electron spectroscopy, microscopy, and vibrational spectroscopy as applied to surfaces. Graded on A-F basis only.  
**Credit Hours:** 3

---

CHEM 8265: Fluorescence Spectroscopy  
Advanced analytical chemistry course that explores the fundamental principles and uses of modern fluorescence spectroscopy in biology, materials science, chemistry, physics and engineering. Special emphasis is placed on the methodologies used to obtain specific information about a particular chemical system. Graded on A-F basis only.  
**Credit Hours:** 3

---

CHEM 8270: Advanced Analytical Chemistry  
Continuation of CHEM 8250.  
**Credit Hours:** 3

---

CHEM 8280: Bioanalytical Chemistry  
This course is aimed at introducing students to the instrumental and theoretical principles by which biological molecules are measured in vivo and in vitro. The course explores how protein, DNA and metabolite structures and quantities are determined in the laboratory with an emphasis on understanding historical methods up through cutting edge approaches in each field. The theory of measurement techniques, separation techniques and related instrumentation are explored in the context of understanding the chemical equilibria that govern each instance. Students will leave this course with a broad understanding of how many biological molecules are measured and what the limitations of various techniques may be. Graded on A-F basis only.  
**Credit Hours:** 3

---

CHEM 8285: Nanochemistry  
Covers various aspects of nanochemistry. Topics include synthesis and characterization of nonmaterial, nanotoxicity, and catalysis. Graded on A-F basis only.  
**Credit Hours:** 3
CHEM 8310: Quantum Chemistry
Introduction to formal quantum mechanical theory, quantum measurement, simple model problems having exact solutions, angular momenta, approximation methods (perturbation theory, variation principle, WKB), and the structure of many-electron atoms.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8320: Chemical Kinetics
Factors affecting rates, orders and mechanisms of chemical reactions, with emphasis on current theories and experimental techniques.

Credit Hours: 3
Prerequisites: CHEM 3330 or equivalent or instructor's consent

CHEM 8330: Computational Chemistry
Theory and application of modern computational techniques (molecular mechanics, ab initio and semiempirical molecular orbital methods) for predicting the structures, energies, and properties of molecules and molecular systems.

Credit Hours: 3
Prerequisites: CHEM 3300 or equivalent or instructor's consent

CHEM 8340: Statistical Mechanics
Principles of statistical mechanics and their application to chemical systems; ensemble theory; condensed phases.

Credit Hours: 3
Prerequisites: CHEM 3300 or equivalent or instructor's consent

CHEM 8400: Organometallics
Condensations effected by organometallics; dissolving metal reductions; sandwich compounds and related organotransition metal derivatives.

Credit Hours: 3

CHEM 8370: Actinide Chemistry
The course covers the inorganic and organometallic chemistry of the actinides. Graded on A-F basis only.

Credit Hours: 3

CHEM 8480: Chemistry of Nanomaterials
This course will cover several aspects of nanomaterials including synthesis and processing of small particles, as well as their characterization by crystallography, scanning tunneling microscopy magnetism, and other optical properties. Also studied will be the application of quantum confinement to the electronic and optical properties of nanomaterials and the development of photonic materials. The nanostructure of organic polymers, micelles, and the process of biominalization to make organic-inorganic hybrid materials will also be discussed.

Credit Hours: 3

CHEM 8600: Radiochemistry and Detection with Lab
An introductory course in the applications of radionuclides in chemistry. Topics include radioactive decay, interactions of radiation with matter, radioactive tracers, and nuclear methods of analysis. Directed towards entering graduate students.

Credit Hours: 3

CHEM 8610: Advanced Radiochemistry
Reviews current advances in radiochemistry, hot atom chemistry, radiation chemistry, nuclear spectrometry.

Credit Hours: 3
Prerequisites: CHEM 8600 or equivalent

CHEM 8630: Radiopharmaceutical Chemistry
The radiotracer concept, history of nuclear medicine, radionuclide production, organic and inorganic chemistry of radiopharmaceutical chemistry, and applications will be discussed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: undergraduate organic and inorganic chemistry; graduate standing in chemistry or instructor's consent

CHEM 8640: Biological Radiochemistry
Covers the interaction of radiation on biological material The effects of radiation overdose is discussed along with the use of radiation in therapy. Graded on A-F basis only.

Credit Hours: 3

CHEM 9090: Post-candidacy Dissertation Research in Chemistry
Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Child Health (CH_HTH)
CH_HTH 6000: Child Health Clerkship
Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Credit Hours: 8

CH_HTH 6010: Rural Child Health Clerkship
Rural Child Health Clerkship

Credit Hours: 8

CH_HTH 6020: Springfield Child Health Clerkship
Students have the opportunity to learn about common illnesses and abnormalities in children. Emphasis also is placed on the importance of preventive and developmental aspects of child care. Lectures and case presentations correlate with the clinical experiences.

Credit Hours: 8

CH_HTH 6037: SCC Pediatric Intensive Care
Students will learn the initial approach and daily management of children requiring care in the Pediatric Intensive Care Unit. Students will learn the evaluation of and the management of critically ill or injured children focusing on airway and pulmonary physiology, cardiac physiology, neurological diseases, traumatic injuries, acute overdoses, endocrine emergencies, basic fluid management, and the medically complex child. Pharmacologic and nutritional management of the critically ill or injured child will also be reviewed.

Credit Hours: 5

Prerequisites: Successful completion of 5 of the 7 core clerkships. One of the 5 must be the Child Health clerkship. CH_HTH 6000, 6010, 6020, or 6100

CH_HTH 6043: SCC Pediatric Allergy and Immunology
This subspecialty elective emphasizes experience in the evaluation and management of common clinical problems in allergy and immunology. The learner will assist in the diagnosis and management of asthma, rhinitis/conjunctivitis/rhinosinusitis, atopic dermatitis, contact dermatitis, urticaria, angioedema, anaphylaxis and adverse reactions to foods, drugs and stinging insects. Additional experience in immunodeficiency disorders, as well as experience in allergy skin testing, administration of allergen immunotherapy, performance and interpretation of pulmonary function tests, and performance of food challenges and/or drug challenges/desensitizations may also be provided. Outpatients will be evaluated by the student under supervision of the faculty physician. In addition, it is expected that the learner will complete recommended readings, participate in selected on-line learning activities and complete both pre-test and post-test assessments.

Credit Hours: 5

Recommended: Successful completion of the Child Health clerkship

CH_HTH 6045: SCC Neonatal Intensive Care Unit Selective
Students will gain experience in the evaluation, diagnosis, and management of sick newborns, and in the performance of specialized procedures necessary for ICU care.

Credit Hours: 5

CH_HTH 6100: Remediation Child Health Clerkship
Enrolled students are those who received an unsatisfactory grade in a Child Health Clerkship at any Mizzou Med location or site. This course gives them the opportunity to rectify a deficiency.

Credit Hours: 8

Prerequisites: CH_HTH 6000 Child Health Clerkship, received unsatisfactory grade

CH_HTH 6221: Advanced Biomedical Science Medicine Problem Premature Infant
Advanced Biomedical Science Medicine Problem Premature Infant

Credit Hours: 5

CH_HTH 6223: ABS Child Health Research
ABS Child Health Research

Credit Hour: 5-10

CH_HTH 6225: ABS Child Health Research and Review
ABS Child Health Research and Review

Credit Hour: 5-10

CH_HTH 6425: Child Health Genetics
Goals/Objectives: To develop an understanding of medical genetics, including genetic diagnosis, cytogenetics, metabolic genetic diseases, teratology, and the genetics literature, and computer databases.

CURRICULUM: During the block, each student will see patients in consultation and in the genetics clinics (general genetics, metabolic, PKU, autism, Down Syndrome, outreach) where they will work up the patients and prepare a report and discussion of the diagnosis or diagnostic differential. Each student will also prepare a literature review around a specific patient or problem. For interested students, cytogenetics or metabolic problems are available. Prerequisites: Child Health clerkship

Credit Hours: 5

CH_HTH 6426: Child Health Infectious Disease
Child Health Infectious Disease

Credit Hours: 5

CH_HTH 6427: Pediatric Hematology/Oncology
Pediatric Hematology/Oncology

Credit Hours: 5

CH_HTH 6428: Pediatric Diabetes and Endocrinology
Goals/Objectives: 1) To understand the pathophysiology of endocrine and metabolic diseases in childhood. 2) To understand the fundamentals of growth processes in infancy, childhood, and adolescence.

CURRICULUM: The Department of Child Health has a large patient care and research program for children with diabetes mellitus. In addition, the Department has a busy general endocrinology program.
students on the elective can participate in the care of patients with a wide spectrum of endocrine and metabolic diseases. Students can carry out specific clinical or laboratory projects relating to specific aspects of either diabetes or endocrine disease, deepen their understanding of pathophysiology of disease and gain a better understanding of the impact of a chronic disorder on the child and his/her family.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6429: Developmental Pediatrics
Developmental Pediatrics

Credit Hours: 5

CH_HTH 6430: Pediatric Cardiology
Goals/Objectives: Clinical and laboratory material is available to achieve the following objectives: 1) Develop skills in auscultation, resuscitation, treatment of congestive heart failure, and recognition of congenital heart disease in infants. 2) Adequate exposure to pediatric electrocardiography, echocardiography, cineangiography, and interpretation of cardiac catheterization data. 3) Proficiency in the management of postoperative cardio-vascular patients.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6431: Pediatric Pulmonology
Goals/Objectives: To gain experience in the treatment of asthma, bronchopulmonary dysplasia, cystic fibrosis, sleep disorders, and other respiratory diseases and to learn about pulmonary function testing in children.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6432: Pediatric Gastroenterology
Goals/Objectives: 1) Gain experience in GI diseases of children noting the difference and similarities with adult diseases. 2) To introduce the student to some of the most commonly encountered diagnoses in pediatrics and to its management. 3) To learn to focus on physical diagnosis skills. CURRICULUM: Preceptorship with a pediatric subspecialist for four weeks will include inpatient and outpatient service activities.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6434: Child Adolescent Medicine
Goals/Objectives: To teach 4th year students the intricacies of care of the adolescent patient. Specifically, the rotation will address the adolescent interview, important considerations in the adolescent "check-up", and managing the varied problems in adolescents, from attention deficit disorder to eating disorders and gynecological issues. The student will leave the rotation with a better understanding of the care of adolescents. CURRICULUM: These objectives will be met in the following manner: 1) Student will actively participate in adolescent medicine clinic with both clinical attendings. He/she will be responsible for the initial evaluation of the patients in the clinic, will actively participate in clinical decision-making, and will be responsible for helping with patient write-ups and referral letters (at the discretion of the attending). The student will be expected to function on an extern level, following up on laboratory evaluations and checking in with patients seen, when needed. 2) The student will participate in the adolescent interview practice sessions with the interact teen theatre with the residents on the rotation. This process will help to improve interviewing skills with adolescents. 3) The student will be responsible for helping with any inpatient care, including consultations and/or admissions. 4) The student will be asked to identify particular areas of interest to be used as topics for interactive discussion with one of the attendings or for a short paper.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6435: Ped Renal and Rheumatology
4th year elective for renal/rheumatology rotation, four weeks.

Credit Hours: 5
Prerequisites: 3rd year Pediatrics/Child Health or Internal Medicine rotation

CH_HTH 6726: Child Health Rural Elective
Students will enhance their knowledge about patient-centered care of children through active participation in a primarily outpatient clinical experience. Limited inpatient experience may be offered as well.

Credit Hours: 5
Prerequisites: CH_HTH 6000; restricted to medical students only

CH_HTH 6825: General Child Health - Inpatient
Goals/Objectives: To provide additional experience in general pediatrics in inpatient care. CURRICULUM: The student will function as a member of the house staff team assuming many of the roles of the first year resident in patient care. This includes working up of patient's management plans, rounding, staffing, conferences, etc. Night coverage with supervision is included.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6826: General Child Health - Outpatient
Goals/Objectives: To provide additional experience in general pediatrics in outpatient care. CURRICULUM: The student will function as a member of the healthcare team. This includes taking histories, performing physical exams, and working up patient management plans. This may require working evening clinic and Saturday clinic in addition to regular daytime clinics.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6827: Neonatology/Neonatal Intensive Care Unit
Goals/Objectives: To gain experience: 1) in the evaluation, diagnosis, and management of sick newborns, and 2) in the performance of specialized procedures necessary for ICU care. CURRICULUM: The student will function as a first-year house officer, with his/her own neonatal ICU patients for initial work-up and management, under the supervision of the PL-2 or PL-3 and attending staff. (rotation at Columbia Regional Hospital)

Credit Hours: 5
Prerequisites: Child Health Clerkship
CH_HTH 6828: Pediatric Intensive Care Unit
Goals/Objectives: 1) To provide the student with the initial approach and management of children requiring care in the Pediatric Intensive Care Unit. 2) To provide the student with the basics of airway management in children. 3) To provide the student with an understanding of the preoperative assessment with preparation of pediatric patients. 4) To provide the student with an introduction to the perioperative management of common pediatric surgical problems. CURRICULUM: Students in this elective will spend time in both the Pediatric ICU and the operating rooms. They will be required to participate in daily rounds in the PICU and follow the medical/surgical patients admitted to the PICU.

Credit Hours: 5
Prerequisites: Child Health Clerkship

CH_HTH 6829: Pediatric Neurology
Pediatric Neurology
Credit Hours: 5

CH_HTH 6912: Introduction to Adolescent Medicine
The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. In addition to learning and practicing primary care of adolescent patients the elective will present an in-depth experience of adolescent medicine as a subspecialty, including, but not limited to, conditions such as eating disorders, disorders of puberty and menstruation, obesity, ADHD, and substance abuse. Additional teaching methods used include a pre-post test, lectures, and readings relevant to adolescent medicine. Completion of the Child Health Clerkship: CH_HTH 6000 and CH_HTH 6010.

Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

CH_HTH 6913: Introduction to Pediatric Endocrinology
The rotation is primarily an outpatient experience, though the student may be asked to do inpatient consultations with the attending physician on service. The elective will present an in-depth experience of diabetes/endocrinology as a subspecialty, including, but not limited to, exposure to disorders in growth and puberty, obesity, abnormalities in thyroid function and managing blood glucose levels in patients with type 1 diabetes. Additional teaching methods used may include lectures and readings relevant to this subspecialty.

Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

Recommended: Completion of the Child Health Clerkship (CH_HTH 6000 or CH_HTH 6010) is suggested but not required

CH_HTH 6951: SCC Pediatric Allergy and Immunology 2 week
This subspecialty elective emphasizes an introductory experience in the evaluation and management of common clinical problems in allergy and immunology. The learner will assist in the diagnosis and management of asthma, rhinitis/conjunctivitis/chronic sinusitis, atopic dermatitis, contact dermatitis, urticaria, angioedema, anaphylaxis and adverse reactions to foods, drugs and stinging insects. Additional experience in immunodeficiency disorders, as well as experience in allergy skin testing, administration of allergen immunotherapy, performance and interpretation of pulmonary function tests, and performance of food challenges and/or drug challenges/desensitizations may also be provided. Outpatients will be evaluated by the student under supervision of the faculty physician. In addition, it is expected that the learner will complete recommended readings, participate in selected on-line learning activities and complete both pre-test and post-test assessments.

Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

CH_HTH 6953: SCC Neonatal Intensive Care Unit 2-Week
The course goals are for the student to gain the knowledge and experience in the evaluation, diagnosis, and management of sick newborns, and in the performance of specialized procedures necessary for ICU care. The student will demonstrate an introductory level working understanding of these areas.

Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school and a core rotation in family medicine or pediatrics

---

**Chinese (CHINSE)**

**CHINSE 1100: Elementary Chinese I**
For beginners with no prior knowledge of Chinese. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

**CHINSE 1200: Elementary Chinese II**
This course is a continuation of Elementary Chinese I, consisting of 5 hours of classroom instruction and 1 hour of lab work weekly.

Credit Hours: 6

Prerequisites: C- or better in CHINSE 1100 or equivalent

**CHINSE 2100: Everyday Spoken Chinese Level I**
Reinforces and extends ability to use Chinese language for spoken communication. Studies situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on MU campus. Students must be enrolled in MU China Study Abroad.

Credit Hours: 3

Prerequisites: C- or better in CHINSE 1200

**CHINSE 2160: Intermediate Chinese I Conversation and Composition**
This course builds on Chinese language learned in the elementary Chinese Language Sequences I & II through conversation and writing.

Credit Hours: 3

Prerequisites: C- or better in CHINSE 1200 or equivalent

**CHINSE 2310: Chinese Civilization I**
Survey of Chinese culture and arts. No knowledge of Chinese is required. No foreign language credit.

Credit Hours: 3
CHINSE 2330: Chinese Language and Culture
Presents information about the development of Chinese language over time, the variety of dialects spoken in China, and around the world. Explores relationship between Chinese language and culture. Considers different genres of Chinese literature. Visits to sites significant to development of Chinese language and literature. Introduction to calligraphy and basic daily Chinese.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3001: Topics in Chinese - General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Sophomore standing and instructor consent

CHINSE 3005: Topics in Chinese - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: sophomore standing and instructor's consent

CHINSE 3005H: Topics in Chinese - Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Some sections may be graded on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: sophomore standing and instructor's consent, Honors eligibility required

CHINSE 305: Problems in Chinese
Supervised study in Chinese language and/or culture.

Credit Hour: 1-3
Prerequisites: instructor's consent

CHINSE 3160: Intermediate Chinese II Conversation and Composition
Continuation of CHINSE 2160. Introduces more complex grammatical constructions and extends ability to use those constructions for written and oral communication. Successful completion of course will enable students to communicate in Mandarin Chinese regarding everyday topics, with a vocabulary of just over 1900 words, and about 380 sentence patterns.

Credit Hours: 3
Prerequisites: C- or higher in CHINSE 2160

CHINSE 3170: Everyday Spoken Chinese Level II
For students who have completed 18 credits college-level Chinese. Reinforces and extends ability to use Chinese language for Spoken communication. Class-time spent studying situation-specific Chinese in real-life situations. Intended to supplement, not replace, Chinese language courses taught on UMC campus. Students must be enrolled in MU China Study Abroad.

Credit Hours: 3
Prerequisites: C- or better in CHINSE 3160 or consent of instructor

CHINSE 3180: Advanced Chinese I
Improves vocabulary, listening, spoken and written Chinese Skills. Discusses basic cultural ideas. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in CHINSE 3160, or equivalent

CHINSE 3300: Chinese Traditions and Global Integration
Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required

CHINSE 3300H: Chinese Traditions and Global Integration - Honors
Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

CHINSE 3310: Chinese Poetry
This is an introductory course to Chinese poetry, both classical and contemporary, in English. It will explore issues in the intercultural and interlingual interpretation of foreign literature through the study of Western translations of and scholarship on selected Chinese poets.

Credit Hours: 3
Prerequisites: Sophomore standing

CHINSE 3320: Modern and Contemporary Chinese Fiction (in translation)
Studies Chinese fiction from 1920s to 1990s. Preceded by a brief historical survey of Chinese literature. Analyzes works by authors like Lu Xun, Ba Jin, Lao She, Wang Meng and many others of the younger generation. Readings and lectures in English.

Credit Hours: 3
Prerequisites: Sophomore standing

CHINSE 3330: Chinese Traditions and Global Integration - Honors
Focuses on developments in China's International relations that have led to prominence on world stage, and the impact of modernization and integration into world community on China's sense of national identity, shape of Chinese culture, and lives of the people. Visits to cultural and business sites, guest lectures, and conversations with Chinese people.

Credit Hours: 3
Prerequisites: Must be enrolled in MU China Study Abroad; sophomore standing required. Honors eligibility required

CHINSE 3340: Negotiating Chinese Culture
As political, business, religious, and personal encounters between Chinese and Americans increase, so also does the need for competence in negotiating these cross-cultural interactions. Whether hosting Chinese guests, visiting China for business or as a scholar, or simply trying to understand current events, a clear understanding of cultural differences and similarities can be quite valuable. Students will be introduced to
multiple perspectives on American and Chinese cultural differences along with narratives of cross-cultural experiences. Course address issues related to American and Chinese cross-cultural communication in five spheres of interaction: political, religious, business, interpersonal, education. Through related readings, discussions, and structured conversations with Chinese, students will explore how this information and a deeper understanding of Chinese and American culture can be applied to more fruitful and positive cross-cultural interactions in multiple contexts.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

**CHINSE 3880: Contemporary Chinese Film**  
(same as FILM_S 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.  

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

---

**Civil Engineering (CV_ENG)**

**CV_ENG 1001: Experimental Course**  
For freshman-level students. Content and number of credit hours to be listed in Schedule of Courses.  

**Credit Hour:** 1-99

**CV_ENG 2080: Introduction to Dynamics**  
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.  

**Credit Hours:** 3  
**Prerequisites:** ENGINR 1200

**CV_ENG 3010: Decision Methods for Civil Engineering Design**  
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.  

**Credit Hours:** 3  
**Prerequisites or Corequisites:** ENGINR 1200  
**Prerequisites:** grade of C- or better in ENGLSH 1000

**CV_ENG 3010W: Decision Methods for Civil Engineering Design - Writing Intensive**  
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.  

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in ENGLSH 1000  
**Corequisites:** ENGINR 1200

**CV_ENG 3050: Introduction to Geographic Information Systems GIS**  
(same as GEOG 3040) Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.  

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

---

**CV_ENG 3010: Decision Methods for Civil Engineering Design - Writing Intensive**  
Essential features of civil engineering including the design process, design teams, experimental and computational tools, engineering economy, communication skills, and ethical considerations.  

**Credit Hours:** 3  
**Prerequisites:** grade of C- or better in ENGLSH 1000  
**Corequisites:** ENGINR 1200

**CV_ENG 3100: Fundamentals of Transportation Engineering**  
Covers fundamentals of transportation engineering including geometric design, traffic engineering, pavements, and planning.  

**Credit Hours:** 4  
**Prerequisites or Corequisites:** CV_ENG 3010  
**Prerequisites:** grade of C- or better in ENGINR 1100

**CV_ENG 3200: Fundamentals of Environmental Engineering**  
Fundamentals of water quality engineering and water resources, water and wastewater treatment, solid and hazardous and radioactive waste management, air pollution, environmental regulation, and environmental ethics.  

**Credit Hours:** 4  
**Prerequisites or Corequisites:** CV_ENG 3010  
**Prerequisites:** grade of C- or better in CHEM 1320 or equivalent

**CV_ENG 3250: Pollutant Fate and Transport**  
(same as ENV_SC 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as will as analytical techniques and tools necessary to quantify conditions and movement.  

**Credit Hours:** 3  
**Prerequisites:** ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and  
CHEM 1320; or instructor's permission

**CV_ENG 3300: Structural Analysis I**  
Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of statically indeterminate structures; moment distribution; energy methods. Introduction to matrix analysis.  

**Credit Hours:** 4  
**Prerequisites:** grade of C- or better in ENGINR 1200 and ENGINR 2200

**CV_ENG 3300H: Structural Analysis I - Honors**  
Analysis of statically determinate beams, frames; shear and moment diagrams; influence line diagrams; beam deflections. Analysis of
statically indeterminate structures; moment distribution; energy methods.  
Introduction to matrix analysis.

Prerequisites:
- CV_ENG 3312: Reinforced Concrete Design: grade of C- or better in ENGINR 1200 and ENGINR 2200.
- CV_ENG 3313: Structural Steel Design: grade of C- or better in ENGINR 1200 and ENGINR 2200.
- CV_ENG 3400: Fundamentals of Geotechnical Engineering: grade of C- or better in ENGINR 2200.
- CV_ENG 3600: Civil Engineering Materials: grade of C- or better in ENGINR 2200.
- CV_ENG 3700: Fluid Mechanics: grade of C- or better in ENGINR 2200.
- CV_ENG 3702: Hydrology: grade of C- or better in ENGINR 2200.
- CV_ENG 4000: Topics in Civil Engineering: instructor's consent.
- CV_ENG 4006: Computational Methods in Civil Engineering: MATH 2300.
- CV_ENG 4008: Risk and Reliability for Civil Engineers: MATH 4100.
- CV_ENG 4085: Problems in Civil and Environmental Engineering: MATH 2300.
- CV_ENG 4104: Pavement Materials and Design: MATH 2300.
- CV_ENG 4110: Transportation Simulation: MATH 2300.
- CV_ENG 4120: Airport Engineering: MATH 2300.

Honors Eligibility required for CV_ENG 3312, CV_ENG 3313, CV_ENG 3400, CV_ENG 3600.
CV_ENG 4125: Transportation Legal Issues
(cross-leveled with CV_ENG 7125). This course discusses some of the legal issues that transportation engineers encounter throughout the course of their careers.

Credit Hours: 3
Prerequisites: CV_ENG 3100

CV_ENG 4130: Transportation Safety
(cross-leveled with CV_ENG 7130). This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3
Prerequisites: CV_ENG 3100

CV_ENG 4145: Civil and Environmental Engineering Legal Issues
(cross-leveled with CV_ENG 7145). Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3
Prerequisites: CV_ENG 3100

CV_ENG 4155: Transportation Geography
(same as GEOG 4850; cross-leveled with CV_ENG 7155; GEOG 7850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 4175: The Geospatial Science in National Security
(Same as GEOG 4130; cross-leveled with CV_ENG 4175, GEOG 7130). This course explores the critical contribution of the geospatial sciences in the collection processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor's consent
Recommended: junior standing

CV_ENG 4185: Location Analysis/Site Selection
(same as GEOG 4740; cross-leveled with CV_ENG 7185; GEOG 7740). An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

Credit Hours: 3

CV_ENG 4190: Infrastructure Project Development
(cross-leveled with CV_ENG 7190). Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only. Prerequisites: junior standing

Credit Hours: 3

CV_ENG 4220: Hazardous Waste Management
(same as CH_ENG 4220; cross-leveled with CV_ENG 7220, CH_ENG 7220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 4230: Introduction to Water Quality
(cross-leveled with CV_ENG 7230). Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3
Prerequisites: junior standing

CV_ENG 4232: Water and Wastewater Treatment Facilities
(cross-leveled with CV_ENG 7232). Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 4240: Water Quality Analysis
(cross-leveled with CV_ENG 7240). Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 4230 or instructor's consent

CV_ENG 4245: Environmental Chemistry for Engineers
(cross-leveled with CV_ENG 7245). This course will cover the fundamentals of environmental chemistry. Physical, equilibrium, organic and colloid chemistry topics will be presented from an environmental perspective with a focus on their relevant engineering applications.

Credit Hours: 3
Prerequisites: CHEM 1320 or CV_ENG 3200

CV_ENG 4250: Environmental Regulatory Compliance
(cross-leveled with CV_ENG 4250). Systems of water law; provisions of major federal environmental laws and regulations; development of regulations at the federal, state, and local levels; regulatory frameworks; permits; and enforcement.

Credit Hours: 3

CV_ENG 4270: Environmental Engineering Microbiology
(cross-leveled with CV_ENG 7270). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3
Prerequisites: senior standing or instructor's consent

</table>
CV_ENG 7004: Engineering Administration
Cash flow analysis, financial analysis, managerial accounting and cost control, budgeting, organizational structure and behavior.

Credit Hours: 3
Prerequisites: MATH 1300 or MATH 1500, or instructor's consent

CV_ENG 7006: Computational Methods in Civil Engineering
(cross-leveled with CV_ENG 4006). Use of numerical methods for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, optimization, differentiation, and differential equations. The numerical methods are demonstrated through computer implementation and application to engineering design problems.

Credit Hours: 3
Prerequisites: MATH 2300
Corequisites: MATH 4100

CV_ENG 7007: Quality Management in Civil Engineering
Quantitative and qualitative quality planning and analysis concepts, including statistical tools and total quality management techniques, control, measurement and assessment. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7008: Risk and Reliability for Civil Engineers
(cross-leveled with CV_ENG 4008). This course focuses on how to use probability and statistics to quantify uncertainties and consider risks when making civil engineering decisions and designing civil engineering systems.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3010 or other introductory probability/statistics course

CV_ENG 7080: Advanced Surveying
(cross-leveled with CV_ENG 4080). Celestial observations for determination of position; state coordinate systems, precise surveys, introduction to geodetic surveys, principles of photogrammetry. Theory of optical surveying instruments.

Credit Hours: 3
Prerequisites: CV_ENG 2090 and MATH 1500

CV_ENG 7082: Property Boundary Location
Principles of real property ownership, deeds, property boundary surveying, legal principles of original and retracement surveys Missouri statutes and regulations affecting surveying, GLO corner restoration and re-establishment.

Credit Hours: 3
Prerequisites: ENGINR 1500 and CV_ENG 2090

CV_ENG 7104: Pavement Materials and Design

Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 2200

CV_ENG 7109: Urban Development and Planning
Introduction to planning processes; procedures and forces that shape urbanization.

Credit Hours: 3

CV_ENG 7110: Transportation Simulation
(cross-leveled with CV_ENG 7110). Theory and application of simulation in transportation engineering.

Credit Hours: 3
Prerequisites: C- or better in CV_ENG 3100

CV_ENG 7120: Airport Engineering
(cross-leveled with CV_ENG 4120). Airport systems planning, design, and management.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3100

CV_ENG 7130: Transportation Safety
(cross-leveled with CV_ENG 4130). This course is an introduction to transportation safety. The focus will be on surface transportation. The student is expected to analyze safety data and to devise engineering solutions to safety problems.

Credit Hours: 3
Prerequisites: CV_ENG 3100

CV_ENG 7145: Civil and Environmental Engineering Legal Issues
(cross-leveled with CV_ENG 4125). Discussion of legal issues facing civil engineers including right of way, risk and liability, environment, financing public works, contracting and ethics.

Credit Hours: 3
Prerequisites: CV_ENG 3100

CV_ENG 7155: Transportation Geography
(same as GEOG 7850; cross-leveled with CV_ENG 4155, GEOG 4850). Introduction to fundamental concepts and modes of analysis in transportation geography. Focus on descriptive, explanatory, as well as normative approaches. Topics reviewed include spatial organization, transportation economics, spatial interaction, network analysis, location/ allocation, and urban transportation planning.

Credit Hours: 3

CV_ENG 7165: Geographic Information Systems I
Introduces concepts of computer analysis of geographic data and emphasizes the techniques for handling geographic data. Application of computer-based GIS systems in coursework.

Credit Hours: 3
Prerequisites: instructor's consent; GEOG 2840

CV_ENG 7175: The Geospatial Sciences in National Security
(Same as GEOG 7130; cross-leveled with CV_ENG 4175, GEOG 4130). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.
CV_ENG 7185: Location Analysis/Site Selection
(same as GEOG 7740; cross-leveled with CV_ENG 4185, GEOG 4740).
An overview of location analysis in regional planning and spatial decision support, this course focuses on the use of Geographic Information Science (GIS) and location analysis methods in addressing regional service needs. May be repeated for credit.

Credit Hours: 3
Prerequisites: instructor's consent

CV_ENG 7190: Infrastructure Project Development
(cross-leveled with CV_ENG 4190). Students will learn how the key elements of major civil engineering infrastructure projects fit together. The course will focus on the horizontal integration of: financing - planning - environment - right of way - design - construction - operations - maintenance. Engineering is important but so are a lot of other things. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7200: Remote Sensing of the Environment
(cross-leveled with CV_ENG 4200). Principles, characteristics and applications of remote sensing in engineering, geosciences, agriculture and environmental projects. Topics: basic concepts, photograhic, thermal multispectral and microwave systems, satellite remote sensing and digital image processing.

Credit Hours: 3

CV_ENG 7220: Hazardous Waste Management
(same as CH_ENG 7220; cross-leveled with CV_ENG 4220, CH_ENG 4220). Engineering principles involved in handling, collection, transportation, processing and disposal of hazardous wastes, waste minimization, legislation on hazardous wastes and groundwater contamination.

Credit Hours: 3

CV_ENG 7230: Introduction to Water Quality
(cross-leveled with CV_ENG 4230). Methods for determining and characterizing water quality, effects of pollution on streams and lakes, and an introduction to engineered systems for the distribution, collection and treatment of water and wastewater.

Credit Hours: 3

CV_ENG 7232: Water and Wastewater Treatment Facilities
(cross-leveled with CV_ENG 4232). Physical, chemical, and biochemical processes for treating drinking water supplies and wastewaters (domestic and industrial), with emphasis on planning and design of such facilities.

Credit Hours: 3
Prerequisites: CV_ENG 4230 or CV_ENG 7230 or instructor's consent

CV_ENG 7240: Water Quality Analysis
Chemical, physical and biological methods for analysis of streams, lakes, wastewaters and water supplies and their use in water quality management.

Credit Hours: 3

CV_ENG 7245: Environmental Chemistry for Engineers
(cross-leveled with CV_ENG 4245). This course will cover the fundamentals of environmental chemistry. Physical, equilibrium, organic and colloid chemistry topics will be presented from an environmental perspective with a focus on their relevant engineering applications. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7250: Environmental Public Policy
(cross-leveled with CV_ENG 4250). Engineering and economic aspects of environmental policy. Basic understanding of environmental statutes and case law. Graded on A-F basis.

Credit Hours: 3

CV_ENG 7260: Environmental Sustainability
(cross-leveled with CV_ENG 4286). This course will present an introduction to sustainability in engineering, tools for assessing sustainability and principles of sustainable design practices. Topics include climate change, energy and renewable resources, limits to growth, risk assessment, life cycle assessments, water and energy footprints, green buildings, and the water-food-energy-nexus. Graded on A-F basis only.

Prerequisites: CV_ENG 3200

Credit Hours: 3

CV_ENG 7270: Environmental Engineering Microbiology
(cross-leveled with CV_ENG 4270). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

CV_ENG 7285: Environmental Engineering Microbiology
(cross-leveled with CV_ENG 4270). Theory and application of fundamental principles of microbiology, ecology, and aquatic biology of the microorganisms of importance to sanitary engineers.

Credit Hours: 3

CV_ENG 7290: Wastewater Treatment and Process Design
(cross-leveled with CV_ENG 4290). Selection and use of wastewater and sludge treatment processes, disposal methods, leading to rational design of overall wastewater treatment systems. Sustainable wastewater treatment including advanced processes in nutrient removal, anaerobic treatment for wastewater reuse. Graded on A-F basis only.

Credit Hours: 3

CV_ENG 7300: Advanced Structural Steel Design
(cross-leveled with CV_ENG 4300). Design of steel structures and bridges. Topics include composite beams, plate girder design, and moment resistant connections.

Credit Hours: 3
**Prerequisites:** grade of C- or better in CV_ENG 3313

**CV_ENG 7302: Prestressed/Advanced Reinforced Concrete**

**Credit Hours:** 3

**Corequisites:** CV_ENG 3312

**CV_ENG 7310: Structural Design and Analysis**

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV_ENG 3312 and CV_ENG 3313

**CV_ENG 7320: Energy Methods in Mechanics**
(cross-leveled with CV_ENG 4320). Variational mechanics including practical examples. Topics include calculus of variation of boundary value problems, energy methods such as Ritz and Galerkin methods, approximate solutions methods such as the finite element and finite difference, and eigenvalue problems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV_ENG 4300

**CV_ENG 7330: Structural System Design**
(cross-leveled with CV_ENG 4330). Design of buildings in steel and reinforced concrete, including estimation of loads and design of gravity and lateral force resisting systems.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV_ENG 3312 and CV_ENG 3313

**CV_ENG 7350: Matrix Methods of Structural Analysis**
(cross-leveled with CV_ENG 4350). An introduction to the fundamentals of stiffness and flexibility methods for analysis of truss and frame structures. Application of the STRUDL and NASTRAN programs to three dimensional structures.

**Credit Hours:** 3

**Prerequisites:** grade of C- or better in CV_ENG 3300

**CV_ENG 7360: Bridge Engineering**

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV_ENG 3312 and CV_ENG 3313

**CV_ENG 7404: Geotechnical Earthquake Engineering**
(cross-leveled with CV_ENG 4404). This course will provide an introduction to topics relating to geotechnical aspects of earthquake engineering. Topics to be covered include: basic seismology, seismic hazard analysis, dynamic soil properties, site response analysis and soil properties, site response analysis and soil liquefaction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV_ENG 3400 or instructor's consent

**CV_ENG 7410: Foundation Engineering**
(cross-leveled with CV_ENG 4410). Subsurface exploration. Design of basic foundation structures: shallow foundations, retaining walls, deep foundations.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in CV_ENG 3400

**CV_ENG 7412: Applied Geotechnical Engineering**
(cross-leveled with CV_ENG 4412). Study of concepts, theories, and design procedures for modern earthwork engineering including: compaction and densification of soils and soil improvement, seepage and drainage, slope stability and performance, and earth retaining structures.

**Credit Hours:** 3

**Prerequisites:** grade or C- or better in CV_ENG 3400

**CV_ENG 7510: Construction Methods and Equipment**
Selection and use of construction equipment, planning construction operations, equipment economics and operations analyses.

**Credit Hours:** 3

**Prerequisites:** MATH 1300 or MATH 1500, or instructor's consent

**CV_ENG 7600: Advanced Mechanics of Materials**
(same as MAE 7600; cross-leveled with CV_ENG 4600 and MAE 4600). Analysis of more complicated problems in stresses, strains.

**Credit Hours:** 3

**Prerequisites:** C- or better in ENGR 2200, MAE 2600

**CV_ENG 7610: Sensors and Experimental Stress Analysis**
(cross-leveled with CV_ENG 4610). Sensors and instrumentation for stress analysis, mechanical measurement and health monitoring of civil structures. Application and design of data acquisition systems, digital signals and basic digital signal processing. Electronics and instrumentation circuits.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in ENGINR 2200 and PHYSCS 2760

**CV_ENG 7660: Vibration Analysis**
(same as MAE 7660; cross-leveled with CV_ENG 4660, MAE 4660). Vibration theory with application to mechanical systems.

**Credit Hours:** 3

**Prerequisites:** C- or better in MATH 4100 and MAE 2600

**CV_ENG 7692: Introduction to Structural Dynamics**
(cross-leveled with CV_ENG 4692). Theory of structural response to dynamics loads. Computation of dynamic response of structures to
dynamic loads like blast and earthquake. Modal analysis and single
degree of freedom methods will be covered. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Grade of C- or better in CV_ENG 3300

CV_ENG 7700: Hydraulics of Open Channels
(cross-leveled with CV_ENG 4700). Gradually varied flow and theory of
the hydraulic jump. Slowly varied flow involving storage; rating curves.

Credit Hours: 3
Prerequisites: graduate standing and Grade of C- or better in CV_ENG 3700

CV_ENG 7702: Pipeline Engineering
Theoretical and practical aspects of pipeline engineering including
pipeline transport of natural gas and various solids such as coal, sand
and solid wastes.

Credit Hours: 3
Prerequisites: CV_ENG 3700 and MAE 3400

CV_ENG 7703: Applied Hydrology
(cross-leveled with CV_ENG 4703). Modern methods of applied
hydrologic analysis and synthesis of hydrologic records.

Credit Hours: 3
Prerequisites: grade of C- or better in CV_ENG 3700 and CV_ENG 3702, or instructor's consent

CV_ENG 7710: Soil and Water Conservation Engineering
(same as BIOL_EN 7150; cross-leveled with CV_ENG 4710, BIOL_EN
4150). Urban and rural run-off and erosion analysis. Design and layout of
erosion control structures.

Credit Hours: 3
Prerequisites: BIOL_EN 3200 or CV_ENG 3200 or instructor's consent

CV_ENG 7720: Watershed Modeling Using GIS
(same as BIOL_EN 7350). Watershed evaluation using AVSWAT for
hydrology, sediment yield, water quality; includes USLE, MUSLE, WEPP.
Procedures for model calibration/sensitivity data analysis.

Credit Hours: 3
Prerequisites: BIOL_EN 2180 or CV_ENG 3200 or instructor's consent

CV_ENG 7730: Hydraulic Design
(cross-leveled with CV_ENG 4730). Design of hydraulic infrastructure
utilizing principles of both pressure conduits and open channels. Hand
calculations and use of commercial design software for water distribution
(quantity and quality), stormwater collection and sanitary sewer systems,
and detention basins. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CV_ENG 3700 or equivalent

CV_ENG 7792: Analysis of Water-Resource Systems
(cross-leveled with CV_ENG 4792). Applies hydrology, hydraulic and
sanitary engineering, and economics to water-resource design problems
considering man and his environment. Uses methods of systems
analysis.

Credit Hours: 3
Prerequisites: instructor's consent

CV_ENG 8001: Advanced Topics in Civil Engineering
New and current technical developments in civil engineering.

Credit Hour: 1-3
Prerequisites: CV_ENG 4006 or equivalent

CV_ENG 8002: Directed Reading In Civil Engineering
Faculty supervised readings course.

Credit Hour: 1-3

CV_ENG 8085: Problems in Civil Engineering
Supervised investigation in civil engineering to be presented in the form
of a report.

Credit Hour: 1-6

CV_ENG 8100: Transportation Planning and Models
Regional and metropolitan transportation studies; land use, traffic
generation, distribution and assignment models.

Credit Hours: 3
Prerequisites: CV_ENG 4002 or CV_ENG 4003

CV_ENG 8106: Advanced Intelligent Transportation Systems
This course is intended to be an introductory course in Intelligent
Transportation Systems (ITS). This course includes the background of
ITS, current implementations, sample deployments, and practical issues
and implications.

Credit Hours: 3
Prerequisites: CV_ENG 4002 or instructor's consent

CV_ENG 8110: Theory of Traffic Flow
Scientific approach to study of traffic phenomena with emphasis
on applications. Deterministic and stochastic models of traffic flow;
opimization of intersection controls; computer simulation of traffic
problems.

Credit Hours: 3
Prerequisites: CV_ENG 4002 or instructor's consent

CV_ENG 8140: Highway Transportation
Economics of transportation on highways. Comparison of vehicle
operation costs. Project studies of highway problems in general.

Credit Hours: 3
Prerequisites: CV_ENG 4103 or equivalent

CV_ENG 8150: Transportation Networks
This course presents techniques used in equilibrium analysis of
transportation networks. The details of traffic assignment algorithms will
be discussed along with theory and practical algorithms.

Credit Hours: 3
**CV_ENG 8160: Advanced Research Methods in Transportation Engineering**
This course will cover advanced research methods used in transportation. A special focus will be on the state-of-art approaches in traffic engineering. Mathematical and analytical models will be reviewed in detail. This is a reading intensive course where students are expected to review research articles on various topics. The methods used in the articles and a critical review of the article findings will be discussed in an interactive manner in the class. Graded on A-F basis only.

**Credit Hours:** 3

**CV_ENG 8187: Seminar in Transportation Engineering**
Review of research in progress in the area of transportation engineering.

**Credit Hour:** 1

**CV_ENG 8200: Water Quality Modeling**
Derivation and application of models for describing oxygen budget, nutrient exchange, and biological productivity in streams, lakes and estuaries.

**Credit Hours:** 3
**Prerequisites:** CV_ENG 7230

**CV_ENG 8215: Environmental Transport Phenomena**
Fundamental processes that control the transport of constituents substances in fluids, and the implications of these processes for a variety of important applications in natural and engineered systems.

**Credit Hours:** 3

**CV_ENG 8220: Advanced Hazardous Waste Treatment Processes**
Course includes some introductory materials about hazardous waste regulations followed by advanced treatment methods such as air stripping, soil-vapor extraction, chemical oxidation, membrane processes, in-situ and ex-situ biotreatment methods, solidification and thermal processes.

**Credit Hours:** 3
**Prerequisites:** CV_ENG 4220

**CV_ENG 8225: Aquatic Chemistry**
Principles of chemical thermodynamics and equilibrium applied to processes in natural water and water and wastewater treatment systems. Emphasis on quantitative analyses of acid/base, complexation/dissociation, precipitation/dissolution, and reduction/oxidation reactions. Graded on A-F basis only.

**Credit Hours:** 3

**CV_ENG 8230: Unit Process Laboratory**
Studies chemical and physical relationships as applied to unit processes of water and wastewater.

**Credit Hours:** 3

**CV_ENG 8240: Physiochemical Treatment Processes**
Fundamental principles, analysis and modeling of physical and chemical processes for water and wastewater treatment.

**Credit Hours:** 3

**CV_ENG 8245: Particles in the Environment**
This course is an introduction to interfacial and colloid science, with an emphasis on aqueous systems of natural colloids and engineered nanomaterials. Graded on A-F basis only.

**Credit Hours:** 3

**CV_ENG 8250: Biochemical Treatment Processes**
Biochemical principles, kinetic models and energy considerations in the design of biological wastewater treatment processes.

**Credit Hours:** 3

**CV_ENG 8260: Environmental Biotechnology**
Major biochemical reactions relevant to environmental engineering. Theory and application of fundamental principles of attached and suspended microbial growth and process engineering for sanitary engineering and biodegradation.

**Credit Hours:** 3
**Prerequisites:** CV_ENG 8250 or instructor's consent

**CV_ENG 8270: Design of Water and Wastewater Treatment Facilities**
Development of design criteria and their application to the design of water and wastewater treatment facilities.

**Credit Hours:** 3

**CV_ENG 8287: Seminar in Environmental Engineering**
Review of research in progress in the area of environmental engineering.

**Credit Hour:** 1

**CV_ENG 8295: Environmental Regulatory Policy**
Discussion of the various policy aspects of environmental regulation: economic and non-economic impacts of degradation; risk assessment and management; distribution of environmental risks; regulatory tools; federal vs. state; disclosure; enforcement. Relation to environmental laws. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** CV_ENG 4250 or CV_ENG 7250 or equivalent

**CV_ENG 8303: Behavior of Reinforced Concrete Members**

**Credit Hours:** 3
**Prerequisites:** CV_ENG 3312

**CV_ENG 8311: Nondestructive Evaluation Engineering**
This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** PHYSCS 2760, ENGINR 1200, MATH 4100

**CV_ENG 8303: Behavior of Reinforced Concrete Members**

**Credit Hours:** 3
**Prerequisites:** CV_ENG 3312

**CV_ENG 8311: Nondestructive Evaluation Engineering**
This course will present the interaction of nondestructive evaluation (NDE) technologies and engineering decision-making. Theory and application NDE technologies will be presented in the context of the engineering analysis required to effectively utilize the technologies. Graded on A-F basis only.

**Credit Hours:** 3
**Prerequisites:** PHYSCS 2760, ENGINR 1200, MATH 4100
CV_ENG 8312: Advanced Structural Analysis
Credit Hours: 3

CV_ENG 8313: Random Vibration
Analysis of random vibrations including topics in stationary, ergodic and nonstationary random processes, with application to single-degree of freedom, discrete and continuous mechanical systems.
Credit Hours: 3
Prerequisites: CV_ENG 4606

CV_ENG 8316: Numerical Methods
Introduction to numerical analysis. Error analysis, numerical algorithms and computer programming.
Credit Hours: 3

CV_ENG 8320: Continuum Mechanics
(same as MAE 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.
Credit Hours: 3
Prerequisites: CV_ENG 3700, MATH 7100, ENGINR 2200

CV_ENG 8330: Theory of Elasticity
Credit Hours: 3

CV_ENG 8340: Theory of Plates and Shells
Credit Hours: 3

CV_ENG 8342: Space Mechanics
Rigid body dynamics analysis of satellites, space vehicles. Trajectories, time of flight optimization.
Credit Hours: 3
Prerequisites: MAE 3600 or equivalent, and MATH 4100

CV_ENG 8349: Finite Elements
Introduction to the finite element method. Applications to solid mechanics, heat transfer, and fluid flow.
Credit Hours: 3
Prerequisites: CV_ENG 8312 or instructor's consent

CV_ENG 8350: Theory of Elastic Stability
Credit Hours: 3

CV_ENG 8360: Theory of Plasticity
Credit Hours: 3
Prerequisites: CV_ENG 8330 or instructor's consent

CV_ENG 8372: Reinforced Concrete Theory and Design
Advanced design of reinforced concrete structures; review of standard codes and specifications and their influence.
Credit Hours: 3
Prerequisites: CV_ENG 4350 or equivalent

CV_ENG 8380: Nonlinear Mechanical Analysis
Analysis of behavior of nonlinear mechanical systems. Nonlinear phenomena of importance in mechanical design.
Credit Hours: 3
Prerequisites: MAE 3600 or equivalent and MATH 4100

CV_ENG 8387: Seminar in Structural Engineering
Review of research in progress in the area of structural engineering.
Credit Hour: 1

CV_ENG 8390: Advanced Topics Structural Analysis
Credit Hours: 3
Prerequisites: CV_ENG 8392: Dynamics of Structures
Credit Hours: 3
Prerequisites: MAE 2600 and MATH 4100 or MATH 7100

CV_ENG 8402: Advanced Shear Strength of Soils
Theoretical soil mechanics as applied to solution of specific engineering problems.
Credit Hours: 3

CV_ENG 8403: Consolidation and Settlement
Settlement of soil, Theory of Consolidation, consolidation testing, settlements of earth fills and embankments, stress distribution in soils, elastic settlement, bearing capacity of shallow foundations, shallow foundations design.
Credit Hours: 3
Prerequisites: CV_ENG 3400

CV_ENG 8404: Seepage in Soils
General principles that govern flow of water through soils and specific procedures for analysis and design of filtration and drainage media in geotechnical and geoenvironmental applications.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent
CV_ENG 8407: Soil Behavior
Detailed study of composition, fabric, and geotechnical and hydrologic properties of soils that consist partly or wholly of clay. Emphasizes physico-chemical factors governing volume change and shear strength. Expansive clay behavior is examined in detail.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8408: Soil Dynamics
Cover topics relating to the response of soils to dynamic loading. Topics to be covered include: lab and field methods, cyclic soil models, foundation vibrations, and wave propagation through soil. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CV_ENG 3400 and instructor's consent

CV_ENG 8410: Advanced Foundation Engineering
Foundation design beyond simple spread footings, special footings and beams on an elastic foundations, mat foundations, pile foundations - static capacity, lateral loads, bucklin, dynamic analysis load tests, pile groups, drilled piers.
Credit Hours: 3
Prerequisites: CV_ENG 4410

CV_ENG 8412: Stability and Performance of Earth Slopes
Principles, mechanics and procedures for analyzing the stability of earth slopes and landfills under short-term, long-term, rapid drawdown, and earthquake conditions.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8413: Design and Analysis of Earth Retaining Structures
General principals and specific procedures for analysis and design of earth retention systems including consideration of soil-structure interaction.
Credit Hours: 3
Prerequisites: CV_ENG 3400 or instructor's consent

CV_ENG 8487: Seminar in Geotechnical Engineering
Review of research in progress in the area of geotechnical engineering.
Credit Hour: 1

CV_ENG 8610: Materials and Measurement
About 25% of the course is devoted to the physical measurement of strain, force, displacement and motion. Remainder of course is devoted to advanced study of the behavior of steel and concrete with emphasis on brittle fracture in steel.
Credit Hours: 3
Prerequisites: CV_ENG 3600 or equivalent

CV_ENG 8620: Advanced Dynamics
(same as MAE 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.
Credit Hours: 3
Prerequisites: CV_ENG 2080 and MATH 4100

CV_ENG 8620: Vibration of Distributed Parameter Systems
(same as MAE 8630). Vibration analysis of strings, cables, bars, rods, shafts, beams, membranes, plates, circular rings, frames; free and forced oscillation; miscellaneous loading; various boundary conditions; effect of damping; energy methods; method of difference equations.
Credit Hours: 3
Prerequisites: CV_ENG 4660

CV_ENG 8720: Hydrotechnical Practicum
Application of advanced analysis and design techniques to practical problems in hydrotechnical engineering. Collaborative group investigations that may include experimental and computer aided studies. No more than 6 practicum hours may be applied toward the MS degree. Graded on A-F basis only.
Credit Hour: 2-4
Prerequisites: graduate standing in Civil Engineering

CV_ENG 8990: Research-Masters Thesis in Civil & Environmental Engineering
Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.
Credit Hour: 1-99

CV_ENG 9990: Research-Doctoral Dissertation Civil & Environmental Engineering
Independent investigation in the field of civil engineering to be presented in the form of a thesis. Graded on a S/U basis only.
Credit Hour: 1-99

Cardiopulmonary & Diagnostic Sciences (CDS)

CDS 2190: Medical Terminology
Medical terminology based on a word building system. This course is intended for students majoring in health professions, nursing and other helping professions, pre-med and biology.
Credit Hours: 3
Prerequisites: sophomore standing

CDS 3200: Essentials of Pathology
Provides basic foundation for understanding etiology of disease with emphasis on systemic pathology for non-medical students.
Credit Hours: 2
Recommended: general biology and one course in either physiology or anatomy

CDS 3460: Cardiovascular and Pulmonary Diagnostic Applications I
(same as RA_SCI 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases.
Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

CDS 3460W: Cardiovascular and Pulmonary Diagnostic Applications I - Writing Intensive
(same as RA_SCJ 3460). Interdisciplinary small group, case-based study of common cardiovascular, pulmonary and other diseases. Pathophysiology, diagnosis and treatment from the perspective of allied health professionals. Emphasis on critical thinking, teamwork skills.

Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

CDS 4085: Problems in Clinical and Diagnostic Sciences
Supervised investigation in an aspect of Clinical and Diagnostic Sciences usually culminating in a written report.

Credit Hour: 1-5
Prerequisites: instructor's consent

CDS 4328: Radiation Safety and Biology
Regulations and procedures for safe uses of radiation to heighten student understanding of radiation physics, radiation biology, and radiation safety. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Junior standing
Recommended: One course in Biological Sciences and Physics/Chemistry

CDS 4440: Organization and Administration
(same as RA_SCJ 4440 and RS_THR 4440). Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.

Credit Hours: 3

CDS 4460: Cardiovascular and Pulmonary Diagnostic Applications II
Interdisciplinary study of cardiac dysrhythmias, MI, stroke. Application of current American Heart Association Advanced Cardiac Life Support (AHA ACLS) algorithms. Successful completion of this course fulfills AHA ACLS Provider requirements.

Credit Hours: 3

CDS 4480W: Clinical Ethics - Writing Intensive
(same as HLTH_SCI 4480W). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.

Credit Hours: 3

CDS 4500: Emergency and Disaster Management in Healthcare
This course will provide the student with an orientation the principles of disaster management in the community (both state and federal levels) and the acute care facility. Topics include biological agents, allocation of resources and ethical considerations. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to students in the Undergraduate Academic Program of Health Professions

CDS 4840: Asthma Education
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor's consent

CDS 4955: Introduction to Research
(same as RS_THR 4955). An interdisciplinary course designed to promote undergraduate allied health research. Includes identifying and designing research problems through formulating relevant questions, learning to systematically search for answers, and methods for searching the literature.

Credit Hours: 3

CDS 4985: Healthcare Organization and Leadership
In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Senior standing

CDS 4985W: Healthcare Organization and Leadership - Writing Intensive
In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.
CDS 7025: CDS Electronic Communication and Informatics
The course presents an overview of healthcare informatics pertaining to all clinical and diagnostic sciences (CDS) constituent programs and of medical informatics. The course introduces all possible electronic communication avenues and methods used in clinical and diagnostic sciences. It provides a comprehensive introduction to the applications of information systems in a range of healthcare environments including clinical and diagnostic sciences education, clinical research, and diverse clinical settings where students will be employed upon graduation. It includes extensive readings and critical discussions of relevant professional research literature. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Senior standing

CDS 7027: Techniques for Teaching CDS Courses Traditionally or Online
Clinical and Diagnostic Sciences (CDS) is a new model that integrates multiple dissimilar programs in the allied health and medical fields. This course is designed to prepare CDS professionals to design, organize, conduct and evaluate professional educational offerings, including preprofessional didactic and clinical coursework, in-service trainings, and continuing professional education sessions conducted through traditional and/or online formats. The course will guide the student in developing critical thinking and problem solving strategies necessary in the clinical, therapeutic and diagnostic imaging modalities, as well as the relationship between theoretical and practical aspects of teaching techniques specific to CDS. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent

CDS 7113: Practical Multidiscipline Laboratory Organization in CDS
The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and effectively apply practical organizational skills when dealing with multidisciplinary clinical laboratory settings. The course will guide the students to explore all available practical methods in order to construct an efficient, dynamic, and flowchart accessible laboratory within the CDS department and the fields. The outcome of this course will augment the student's abilities to develop critical thinking and problem solving strategies necessary to function in diverse laboratory environments within the CDS integrated fields. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent

CDS 714: Organizational Design and Dynamics in CDS
The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and conceptualize the most appropriate model of structure design of an organization as part of the CDS constituent fields and holistically integrated CDS organization as a whole. Students will learn and be instructed to understand the dynamics that occur within the CDS organizational design. The course will guide the students as they explore various examples available for designs of a CDS organization. The outcome of this course will enhance the student's abilities to develop critical thinking and problem solving strategies necessary to function in diverse clinical and diagnostic environments within the CDS integrated fields. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent

CDS 715: CDS Electronic Communication and Informatics
The course presents an overview of healthcare informatics pertaining to all clinical and diagnostic sciences (CDS) constituent programs and of medical informatics. The course introduces all possible electronic communication avenues and methods used in clinical and diagnostic sciences. It provides a comprehensive introduction to the applications of information systems in a range of healthcare environments including clinical and diagnostic sciences education, clinical research, and diverse clinical settings where students will be employed upon graduation. It includes extensive readings and critical discussions of relevant professional research literature. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Senior standing

CDS 716: Administration of Educational Programs in CDS
Clinical and Diagnostic Sciences (CDS) is a new model that integrates multiple dissimilar programs in the allied health and medical fields. This course is designed to prepare CDS professionals to effectively administer and articulate with educational programs. The course will guide the student in developing critical thinking and problem solving strategies necessary to implement strategic plans, institute clinical affiliation agreements, establish thoughtful and consistent policies and procedures, evaluate student selection criteria and pursue accreditation for education programs in CDS. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent

CDS 718: Telecommunication and Reporting in CDS
The course is designed to prepare clinical and diagnostic sciences (CDS) professionals from various integrated programs of CDS fields to understand and apply effective leadership styles and methods in order to be efficient, dynamic, and successful leader. The course will guide the students in developing critical thinking and problem solving strategies necessary to expand their strategic leadership knowledge and skills to function in diverse environments of the CDS fields as integrated units or separately. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent
and reporting methods among all the CDS fields. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Program and instructor's consent

CDS 7840: Asthma Education
This course will provide the student with a multi-faceted approach to caring for the patient with asthma. Topics include pathophysiology, pharmacology, patient/family education, patient assessment and management. Assists students to take the Asthma Educator Credentialing Exam. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor's consent required

CDS 8001: Topics in Clinical and Diagnostic Sciences
This course is designed to explore, through selected themes assigned by the instructor, advanced clinical and diagnostic sciences (CDS) topics in psychosocial, professional, educational, and technical areas. The organized study of a specific CDS topic will be conducted in a holistic manner. Graded on A-F basis only.

Credit Hour: 1-3

CDS 8050: Research in Clinical and Diagnostic Sciences
This course is designed for the clinical and diagnostic sciences (CDS) programs' graduates and health science degree holders who wish to explore advanced opportunities in CDS through a research component and scientific investigations. It will allow the students to formulate appropriate reasons for pursuing a specific area of interest. The course will provide knowledge about research methodology in CDS, the operation of, and how to conduct a research in a CDS department and in a clinical setting. It will guide the student to develop appropriate research qualities associated with the CDS constituent programs. The course guides the students in developing independent study and scientific investigation skills. The course does not lead to a thesis or dissertation. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Program and instructor's consent

CDS 8085: Problems in Clinical and Diagnostic Sciences
Clinical and Diagnostic Sciences (CDS) field is still an emerging profession in the medical field. This course is designed to provide a broad overview of multiple “problems” faced by CDS in the health care context. Through a variety of themes exploring theoretical and clinical aspects of the constituent professions, the course will guide the student in developing critical thinking and problem solving strategies necessary in the analysis of the controversial aspects of a chosen subject. Issues will include, but not limited to the role and function of CDS in health care in general and clinical and diagnostic imaging in special, the relationship between theoretical and practical aspects of the imaging modality and clinical aspects (fast pace of advancing technology versus slow pace of clinical application, education, literature of specialty, etc.), ethical and legal issues in the CDS constituent professions, problems faced by a clinical and diagnostic educational program, CDS graduates' role in diagnosis, education, management, and CDS clinical applications. Graded on A-F basis only.

Credit Hour: 1-3

Prerequisites: Program and instructor's consent

CDS 8090: Research in Clinical and Diagnostic Sciences
This course is designed for the clinical and diagnostic sciences (CDS) constituents programs and health science graduates who wish to explore through the methods of scientific research any area of interest in CDS fields. It leads to a thesis or dissertation. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Program and instructor's consent

CDS 8920: Applied Research Methodologies in Clinical and Diagnostic Sciences
Practical research application of clinical and diagnostic sciences (CDS) in a real time clinical environment: exploring the various methods of applied clinical research and how they relate to decision making, patient handling, technical applications, instrumentation and image processing. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BHS degree in CDS and or allied health professions, and Program and instructor's consent

Clinical Laboratory Sciences (CL_L_S)

CL_L_S 1000: Orientation to Clinical Laboratory Science
The class is designed to give prospective Clinical Laboratory Science students clinical experience in the field of Clinical Laboratory Science. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: HLTH_SCI 1000

CL_L_S 4407: Clinical Laboratory Operations
This course provides a basic introduction to the theory, practical application, technical performance and evaluation of laboratory skills specific to the practice of clinical laboratory science. Laboratory safety; microscopy; pipetting; general laboratory equipment; quality control; mathematics; phlebotomy; pre-analytic, analytic and post-analytic processes, including specimen collection, processing and transport to maintain test result integrity, will be addressed. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4408: Introduction to Clinical Hematology
This course introduces the theory, practical application, technical performance and evaluation of hematological and hemostasis procedures. Correlation of laboratory data with the diagnosis of erythrocyte, leukocyte and bleeding/clotting disorders will be introduced. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4409: Introduction to Clinical Microbiology
This course introduces the theory, practical application, technical performance and evaluation of procedures for isolation, identification
and susceptibility testing of infectious disease organisms in humans. The course primarily focuses on bacteriology, but will include introductory coverage of parasitology, mycology and virology. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL_L_S 4410: Introduction to Clinical Chemistry and Urinalysis**  
This course introduces the theory, practical application, technical performance and evaluation of basic laboratory skills and methods in clinical chemistry and urinalysis. The course focuses on the correlation of laboratory data with the diagnosis of renal conditions, but will include introductory coverage of carbohydrate, liver and protein conditions, as well as enzymes. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL_L_S 4411: Introduction to Clinical Immunohematology**  
This course introduces the theory, practical application, technical performance and evaluation of immunohematology procedures required to provide compatible blood components for transfusion. Methods for collection, processing, storage and transfusion of blood and blood components will be presented. Immunohematology procedures that assist in the diagnosis and management of hemolytic conditions will be introduced. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL_L_S 4412: Clinical Laboratory Science Theory, Application and Correlation**  
Application, evaluation and correlation of laboratory procedures used in the diagnosis and treatment of common disease states. Opportunities for building critical thinking, problem solving, and leadership skills are provided in small group clinical case discussions. Course may be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 5  
**Prerequisites:** departmental consent, accepted into the Medical Technology Program

---

**CL_L_S 4413: Clinical Endocrinology and Toxicology**  
This course introduces the theory, practical application, and evaluation of clinical chemistry laboratory procedures. Correlation of clinical laboratory data with the diagnosis and treatment of endocrine disorders, toxicology disturbances and therapeutic drug monitoring is emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Restricted to Clinical Laboratory Students only

---

**CL_L_S 4414: Clinical Chemistry and Urinalysis I**  
This course expands on the theory, practical application, and evaluation of basic laboratory procedures introduced in CL_L_S 4407 Clinical Laboratory Operations and CL_L_S 4410 Introduction to Clinical Chemistry and Urinalysis, with an emphasis on common automated methodologies used in clinical chemistry and urinalysis laboratories. This course will focus on the interpretation, evaluation and correlation of clinical laboratory data with the diagnosis and treatment monitoring of carbohydrate, renal, hepatic, protein, cardiac, lipid/lipoprotein, major and minor electrolyte, enzyme, pancreatic-gastrointestinal and acid-base disorders. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL_L_S 4415: Clinical Chemistry and Urinalysis II**  
This course expands on the theory, practical application, and evaluation of laboratory procedures introduced in CL_L_S 4414 Clinical Chemistry and Urinalysis I and CL_L_S 4444 Clinical Core Laboratory Practicum I. Correlation of clinical laboratory data with the diagnosis and treatment monitoring of carbohydrate, renal, hepatic, cardiac, lipid/lipoprotein, protein, major and minor electrolyte, trace element, enzyme, pancreatic-gastrointestinal and acid-base disorders; tumor markers; and inborn errors of metabolism is emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL_L_S 4416: Clinical Hematology I**  
Introduction to the theory, practical application, technical performance and evaluation of hematological and coagulation procedures. Emphasis on correlations of clinical laboratory data with the diagnosis and treatment of anemia, leukemia, and bleeding/clotting disorders. May be repeated for credit. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL_L_S 4417: Clinical Hematology II**  
This course expands on the theory, practical application, and evaluation of hematological and hemostasis procedures introduced in CL_L_S 4416 Clinical Hematology I and CL_L_S 4444 Clinical Core Laboratory Practicum I, and includes the analysis of cerebrospinal, synovial and serous fluids. Correlation of clinical laboratory data with the diagnosis and treatment of erythrocyte, leukocyte and bleeding/clotting disorders will be emphasized. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only

---

**CL_L_S 4418: Clinical Microbiology I**  
This course includes the theory, practical application, and evaluation of immunological components and infection disease serology. The principles and methodologies used in the assessment of immunologically related disorders, including hypersensitivity reactions, autoimmune, Immunoproliferative, immunodeficient disorders and infectious disease are included. The course emphasizes the correlation of clinical laboratory data with the patient's diagnosis and treatment. The theory and application of molecular diagnostic tools, such as polymerase chain reaction (PCR), nucleic acid probes, and microarrays are also addressed. Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** Clinical Lab Sci (Medical Technology) Program students only
CL_L_S 4419: Clinical Microbiology II
This course builds on the theory, practical application and evaluation of
the procedures for isolation, identification and susceptibility testing
of infectious disease organisms in humans introduced in CL_L_S 4418
Clinical Microbiology I and CL_L_S 4448 Clinical Microbiology Laboratory
Practicum I. This course includes bacteriology, mycology, parasitology,
and virology content, and will emphasize the correlation of clinical
laboratory data with the patient's diagnosis and treatment. Graded on A-
F basis only.
Credit Hour: 1-4
Prerequisites: Clinical Lab Sci (Medical Technology) Program students

CL_L_S 4420: Clinical Immunology and Molecular Diagnostics
This course includes the theory, practical application, and evaluation
of immunological components and infection disease serology. The
principles and methodologies used in the assessment of immunologically
related disorders, including hypersensitivity reactions, autoimmune,
Immunoproliferative, immunodeficient disorders and infectious disease
are included. The course emphasizes the correlation of clinical laboratory
data with the patient's diagnosis and treatment. The theory and
application of molecular diagnostic tools, such as polymerase chain
reaction (PCR), nucleic acid probes, and microarrays are also addressed.
Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Clinical Lab Sci (Medical Technology) Program students

CL_L_S 4422: Immunohematology I
Introduction to the theory, practical application, technical performance
and evaluation of blood bank procedures required for transfusion of blood
and blood components and for handling and storage of blood and blood
components. May be repeated for credit. Graded on A/F basis only.
Credit Hour: 1-4
Prerequisites: departmental approval, accepted into the Medical
Terminology Program

CL_L_S 4423: Clinical Immunohematology II
This course expands on the theory, practical application, and evaluation
of immunohematology procedures presented in CL_L_S 4422 Clinical
Immunohematology I and CL_L_S 4442 Clinical Immunohematology
Laboratory Practicum I. There is an emphasis on the application of
immunohematology procedures used for the resolution of complex
immunohematology problems. Proper selection of immunohematology
procedures that assist in the diagnosis and management of hemolytic
conditions will be discussed. Concepts in patient blood management and
the adverse effects of transfusion will be presented. Quality management
as it applies to transfusion medicine will be addressed. Graded on A-F
basis only.
Credit Hours: 2
Prerequisites: Clinical Lab Sci (Medical Technology) Program students

CL_L_S 4424: Phlebotomy
Theory, practical application, technical performance and evaluation of
procedures used in collecting, handling and processing blood specimens.
May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: departmental approval, accepted into the Medical
Technology Program

CL_L_S 4426: Body Fluid Analysis
Theory, practical application, technical performance and evaluation of
procedures used in the analysis of urine and other body fluids, including
cerebrospinal, synovial, serous, seminal, amniotic and feces. May be
repeated for credit. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Clinical Lab Sci (Medical Technology) Program

CL_L_S 4442: Clinical Immunohematology Laboratory Practicum I
This course provides practical application in a clinical laboratory
setting for the technical performance and evaluation of clinical
immunohematology procedures and preparation of blood components.
Course content will include new skills and procedures, in addition
to the skills and procedures presented in CL_L_S 4407 Clinical
Laboratory Operations and CL_L_S 4411 Introduction to Clinical
Immunohematology. Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4443: Clinical Immunohematology Laboratory Practicum II
This course provides practical application in a clinical laboratory
setting for the technical performance and evaluation of clinical
immunohematology procedures and preparation of blood components.
Course content will include new skills procedures, in addition to the
skills and procedures presented in CL_L_S 4442 Clinical Immunohematology
Laboratory Practicum I. Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4444: Clinical Core Laboratory Practicum
This course provides practical application in a clinical laboratory setting
for the technical performance and evaluation of clinical hematology/
hemostasis, chemistry and urinalysis procedures. Course content will
include new skills and procedures and the application of automation and
automatic verification techniques, building on the skills and procedures
presented in CL_L_S 4407 Clinical Laboratory Operations, CL_L_S 4408
Introduction to Clinical Hematology and CL_L_S 4410 Introduction to
Clinical Chemistry and Urinalysis. Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4445: Clinical Core Laboratory Practicum II
This course provides practical application in a clinical laboratory setting
for the technical performance and evaluation of clinical hematology/
hemostasis, chemistry and urinalysis procedures. Course content will
include new skills and procedures, in addition to the skills and procedures
presented in CL_L_S 4444 Clinical Core Laboratory Practicum. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4448: Clinical Microbiology Laboratory Practicum I
This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4407 Clinical Laboratory Operations and CL_L_S 4409 Introduction to Clinical Microbiology. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4449: Clinical Microbiology Laboratory Practicum II
This course provides practical application in a clinical laboratory setting for the technical performance and evaluation of clinical microbiology procedures. Course content will include new skills and procedures, in addition to the skills and procedures presented in CL_L_S 4448 Clinical Microbiology Laboratory Practicum I. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: Restricted to Clinical Laboratory Students only

CL_L_S 4970: Clinical Laboratory Management I
This course introduces the theory, practical application and evaluation of laboratory management principles in healthcare, including safety, research, educational methodology, quality control, ethics, laboratory operations, point-of-care testing, scope of practice, and the job application process. Opportunities for building critical thinking, problem-solving, research, communication, professionalism, management and leadership skills are provided. Graded on A-F basis only. May be repeated for credit.

Credit Hours: 2
Prerequisites: Clinical Lab Sci (Medical Technology) Program students only

CL_L_S 4980: Clinical Lab Management II
Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CL_L_S 4970 or departmental consent

CL_L_S 4980W: Clinical Lab Management II - Writing Intensive
Continuation of Clinical Lab Management I. Theory, practical application, and evaluation of laboratory management principles and associated models in compliance and regulatory issues, human resource management, method evaluation, professionalism and laboratory quality. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CL_L_S 4970 or departmental consent

**Communication (COMMUN)**

**COMMUN 1200: Public Speaking**
Principles, process of speech communication in small group and public speaking situations.

Credit Hours: 3
Prerequisites: Restricted to Communication majors

**COMMUN 1200H: Public Speaking - Honors**
Principles, process of speech communication in small group and public speaking situations. Honors eligibility required

Credit Hours: 3

**COMMUN 1880: Introduction to Digital Media Production**
Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

Credit Hours: 3

**COMMUN 2100: Media Communication in Society**
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society.

Credit Hours: 3

**COMMUN 2100H: Media Communication in Society - Honors**
An introduction to the development and impact of media communications and its technologies on American society. Emphasis on contemporary industry developments, their historical antecedents, as well as contemporary issues related to the influence and impact of media communication on society. Honors eligibility required

Credit Hours: 3

**COMMUN 2200: Video Workshop: Sports Broadcast Production**
A hands-on workshop; students will learn live sports video production theory and techniques from Mizzou Athletics broadcast professionals. Students will participate in all phases of video production (camera operations, directing, graphics, video replay, and live audio production and digital editing) in a variety of live sports projects. The class will help produce games for SEC Network Plus. There is no requirement of previous production experience or course work. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Communication majors
COMMUN 2315: Basic Audio Production and Performance
Radio speaking in varied types of programs; console operations, tape editing, microphone techniques.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2530: Screenwriting I
(same as FILMS_VS 2530). Analyze various script formats and apply different writing techniques and styles to create screenplays and teleplays. Work inside a creative critique environment to craft vivid storytelling and character elements while developing viable loglines and pitches for their stories. Screenwriting concepts include the three-act structure and the timing and placement of plot points. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor Permission

COMMUN 2701: Topics in Communication - General
Topics in Communication - General.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703: Topics in Communication - Behavioral Science
Topics in Communication - Behavioral Science.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2703W: Topics in Communication - Behavioral Science - Writing Intensive
Topics in Communication - Behavioral Science.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2705: Topics in Communication - Humanities/Fine Arts
Topics in Communication - Humanities/Fine Arts.

Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 2810: Story Development
(same as DST_VS 2810). In this course students will learn about storytelling across time and media, beginning with definitions and fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production.

Thus, the course functions as preparation for audio-visual production courses in Communication, Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor

COMMUN 2880: Digital Storytelling Production I
(same as ENGLISH 2880, DST_VS 2880). Digital Storytelling Production I teaches agility with digital video technology through applied experiences. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: COMMUN 1880 and consent of instructor

COMMUN 3050: Survey of Communication Studies
A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

Credit Hours: 3
Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3050W: Survey of Communication Studies - Writing Intensive
A survey of four main areas of the field communication, interpersonal, organizational, political, and mass communication.

Credit Hours: 3
Prerequisites: May be restricted to Communications majors through early registration

COMMUN 3310: Message Design and Writing for the Media
This course introduces students to writing for the media in various contexts including television, film and new media (e.g., websites and social media).

Credit Hours: 3
Prerequisites: COMMUN 2100. May be restricted to Communication majors only during early registration

COMMUN 3390: Digital Production I
Focus on building familiarity with video cameras, microphones, lighting, editing as well as the fundamentals of visual composition, (framing, camera angles, story boards, and ways to visualize information) and processes and procedures for producing and directing.

Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3395: Digital Production II
Focus on advanced production work; more elaborate projects including digital shorts, music videos, and short documentaries; advanced editing, storyboards, and emphasis on developing narrative structure.

Credit Hours: 3
Prerequisites: COMMUN 3390 or instructor’s consent. May be restricted to Communication majors only during early registration

COMMUN 3422: Communication Research Methods
Focuses on writing and administering surveys, conducting field research, and designing experimental studies.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3441: Nonverbal Communication
Analysis of form and content of nonverbal communication. Emphasis on role of nonverbal cues in interpersonal communication.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3460: Organizational Advocacy
Theory and analysis of communication to promote organizational culture and image.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3470: Culture as Communication
(same as ANTHRO 3470, LINGST 3470). Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3490: Media Effects
Survey of the topics, research, and theories in the study of media effects.
Credit Hours: 3
Prerequisites: COMMUN 2100 or senior standing. May be restricted to Communication majors only during early registration

COMMUN 3525: Conflict and Communication
Theory and analysis of communication in conflict situations across a variety of contexts.
Credit Hours: 3
Prerequisites: sophomore standing required. May be restricted to Communication majors only during early registration

COMMUN 3561: Relational Communication
Analysis of communication influences on relational identities and development.
Credit Hours: 3
Prerequisites: sophomore standing and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3570: Performance of Literature
(same as ENGLISH 3570 and THEATR 3200). Analysis and oral interpretation of literary works. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

COMMUN 3571: Group Decision Making Processes
(same as PEA_ST 3521). Procedures and techniques for interpersonal communication and decision making in small groups.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3572: Argument and Advocacy
Critical analysis and production of argument emphasizing evidence, reasoning, and refutation.
Credit Hours: 3
Prerequisites: COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3575: Business and Professional Communication
Principles and practice of speech communication in business and professional settings. Emphasis on interviews, group conferences and personal presentations.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3570: Crisis Communication
The theory and practice of corporate and political communication responses to crisis situations.
Credit Hours: 3
Prerequisites: sophomore standing. May be restricted to Communication majors only during early registration

COMMUN 3701: Topics in Communication-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.
Credit Hours: 3
Prerequisites: COMMUN 2100 and COMMUN 1200. May be restricted to Communication majors only during early registration

COMMUN 3701W: Topics in Communication - General - Writing Intensive
Topics in Communication - General.
Credit Hours: 3
Prerequisites: may be restricted to Communication majors only during early registration

COMMUN 3703: Topics in Communication-Behavioral Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

COMMUN 4701: Topics in Communication-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent required for repetition.

Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4705: Topics in Communication-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent. May be restricted to Communication majors only during early registration

COMMUN 4880: Digital Storytelling Production II
(same as ENGLISH 4880, DST_VS 4880). Digital Storytelling Production II introduces students to advanced techniques in digital storytelling production, while further developing skills in script writing, storyboarding, Adobe Premiere Pro, and video production with DSLR cameras. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor
Recommended: COMMUN 1880 and COMMUN 2880

COMMUN 4940: Internship
Directed professional experience within and outside the University in communication-related fields or organizations. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: Admission to department, junior standing, instructor's consent, 2.5 GPA

COMMUN 4950: Research Project
Student contributes to a research project with approved goals and a final written report. As part of the project, student will read articles in the communication research literature. Project can be independent or in conjunction with a faculty research project. Course may be repeated once for credit. Graded on A-F basis only

Credit Hour: 1-3
Prerequisites: COMMUN 3050; junior standing and instructor's consent. Approval by a faculty member who will serve as project supervisor

COMMUN 4960: Directed Reading
Independent reading, reports.

Credit Hour: 1-99
Prerequisites: junior standing or instructor's consent

COMMUN 4970: Communication Practicum
Special applied instruction in an advanced area of communication or media. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: COMMUN 1200, COMMUN 3050, Communication major with junior standing and GPA of 2.5

COMMUN 4974: Senior Project
Integration and adaptation of communication theories to an applied communication problem. Required for all majors.

Credit Hours: 3
Prerequisites: admission to department, senior standing, and departmental consent

COMMUN 7412: Gender, Language, and Communication
(same as LINGST 7412, ANTHRO 7412; cross-leveled with COMMUN 4412, LINGST 4412, ANTHRO 4412). Relationship among gender, language, nonverbal communication, and culture.

Credit Hours: 3

COMMUN 7473: Political Communication
(cross-leveled with COMMUN 4473). Study of role and impact of communication in political campaigns; historical and contemporary study of influence by communication; case studies and practicum.

Credit Hours: 3
Prerequisites: graduate standing or departmental consent

COMMUN 7530: Health Communication
A general overview of the impact of communication on health, including doctor/patient communication and health campaigns. Graded on A-F basis only.

Credit Hours: 3

COMMUN 7638: New Technologies and Communication
Explores the social implications of new technologies designed for communication. Assumes basic computer knowledge.

Credit Hours: 3

COMMUN 8000: Pro-Seminar in Communication
Obtaining a graduate degree requires that students become excellent researchers, teachers, and colleagues. To support learning toward these proficiencies, the Pro-Seminar course supplements classroom learning and faculty mentoring through formal departmental offerings. Graded on S/U basis only.

Credit Hour: 1

COMMUN 8001: Topics in Communication-General
Study of selected topics in communication. Topic and credit may vary from semester to semester. Repeatable upon consent of department.

Credit Hours: 3
Prerequisites: instructor's consent

COMMUN 8085: Problems
Individual study not leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor's consent
COMMUN 8090: Master's Thesis Research in Communication
Research leading to thesis. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

COMMUN 8110: Introduction to Graduate Study in Communication
Orientation to the field. Introduction to research methods. Production of research proposal. Emphasizes scholarly style of writing.
Credit Hours: 3

COMMUN 8120: Introduction to Communication Research Methods
Introduction to communication research, including research design and academic writing.
Credit Hours: 3

COMMUN 8130: Topics in Qualitative Research Methods
Examination of assumptions and techniques of qualitative methods adopting an interpretive framework for analyzing communication phenomena. May be repeated for credit.
Credit Hours: 3

COMMUN 8140: Content Analysis
Introduction to content analysis as a method. Students will learn about issues of sampling, codebook construction, intercoder reliability, validity, and analysis of content analytic data, including computer assisted content analysis.
Credit Hours: 3

COMMUN 8160: Rhetorical Criticism
Principles, practice criticism (description, analysis, evaluation) of rhetorical artifacts.
Credit Hours: 3

COMMUN 8170: Seminar in Quantitative Methods in Communication II
The focus of this course will be the study and practice of various multivariate statistical methods commonly used in communication research. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: COMMUN 8120; instructor's consent required

COMMUN 8180: Advanced Topics in Quantitative Methods
Seminar in advanced topics in quantitative methods and statistics. Topics will vary. Course may be repeated up to two times for a total of six credit hours. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: COMMUN 8120

COMMUN 8310: Seminar in Interpersonal Communication
Examines theory and research concerning face-to-face dyadic interactions. Emphasis on context of interpersonal communication events and processes of interactional management.
Credit Hours: 3

COMMUN 8410: Seminar in Organizational Communication Theory
Exploration of the theoretical foundations of interpersonal communication in the organization, groups and team development, leadership, organizational decision making, motivation and power, bureaucracy, new information technologies, organizational effectiveness and the change process.
Credit Hours: 3

COMMUN 8510: Seminar in Mediated Communication Theory
This course will offer graduate students a broad overview of extant theories employed in the study of mediated communication. The class will be a survey of theory from foundation to modern conceptions of the study of mediated communication, from mass communication to interactive media contexts.
Credit Hours: 3

COMMUN 8610: Survey of Political Communication
Survey of theory and research on political communication; emphasis on messages and audience responses to messages.
Credit Hours: 3

COMMUN 9050: Research
Completes comprehensive exams and writes a literature review.
Credit Hour: 1-9

COMMUN 9090: Doctoral Dissertation Research in Communication
Research leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

COMMUN 9170: Research Practicum
Student conducts research under close supervision of faculty mentor. Goal: produce research report suitable for submission as convention paper, article, or book chapter. May be repeated once for credit.
Credit Hours: 3
Prerequisites: consent of mentor required; for advanced graduate students

COMMUN 9280: Seminar in Communication Theory
Examines the nature of theory, the assumptions underlying theoretical approaches to communication, and surveys themes in contemporary communication theories.
Credit Hours: 3

COMMUN 9310: Seminar in Family Communication
Examines research and theory of family communication; focus on family communication patterns and processes, emphasis on key conceptual, methodological and theoretical aspects of family communication scholarship and research on family forms, processes and outcomes. Graded on A-F basis only.
Credit Hours: 3
COMMUN 9330: Topics in Interpersonal and Family Communication
The course will review theory and research on topics related to the study of family communication and/or interpersonal communication. Subjects will rotate and include areas such as relational conflict, gender communication, narrative theory, family diversity, or intercultural communication.

Credit Hours: 3
Prerequisites: instructor's consent

COMMUN 9430: Topics in Organizational Communication
Examination of theory and research in selected areas of organizational communication. Topics vary by semester. Topics may include socialization, power, gender, emotions, and others. May be repeated for credit.

Credit Hours: 3

COMMUN 9460: Topics in Political Communication
Examination of theory and research in selected areas of political communication. Topics vary by semester. Topics may include political polarization, political socialization, politics and the media, political advertising, politics and new media.

Credit Hours: 3

COMMUN 9520: Seminar in Media Processes and Effects
Explores current research in the processes and effects of mediated communication. Readings pertain to the current social and psychological effects of media on users.

Credit Hours: 3

COMMUN 9530: Topics in Mediated Communication
Examination of theory and research in selected areas of mediated communication. Topics may vary by semester. Topics include mass media and social relationships, digital media, social identity and media, health and media, and media diversity. May be repeated two times for credit.

Credit Hours: 3

COMMUN 9610: Seminar in Disaster, Crisis, and Risk
This course examines several lines of research from multiple disciplines that influence communication during disasters, crises, and emergencies. Topics may include federal government paradigms for disaster communication, crisis communication perspectives, risk perception, resilience, social media and emerging technologies in disasters, and media coverage of disasters.

Credit Hours: 3

COMMUN 9630: Political Advertising
Theory and research on political advertising applied to analyses of candidate advertisements. Focus on primary and general presidential television spots and web pages.

Credit Hours: 3

Communication Science And Disorders (C_S_D)

C_S_D 1060: Human Language
(same as ANTHRO 1060, LINGST 1060 and ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

C_S_D 1100: American Sign Language I
Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

Credit Hours: 3

C_S_D 1200: American Sign Language II
This course is designed to increase students' understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: C_S_D 1100 or equivalent

C_S_D 2120: Survey of Communication Disorders
Systematic survey of the disorders of speech, language and hearing.

Credit Hours: 3

C_S_D 2150: American Sign Language III
This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1200 with minimum grade of C or instructor’s consent

C_S_D 2150: American Sign Language III
This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: C_S_D 1200 with minimum grade of C or instructor’s consent

C_S_D 3010: American Phonetics
(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3
Prerequisites: Restricted to Communication Science and Disorders majors only
C_S_D 3020: Normal Language Development
Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.
Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

C_S_D 3020W: Normal Language Development - Writing Intensive
Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.
Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

C_S_D 3050: Signed English and Communication Development
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management also will be targeted. No prior experience with any sign language and/or sign system is required. Development of a basic vocabulary in Signed English will be included in this course.
Credit Hours: 3

C_S_D 3210: Anatomy and Physiology of the Speech Mechanism
(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.
Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

C_S_D 3220: Speech Acoustics
(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.
Credit Hours: 2
Prerequisites: Communication Science and Disorders majors only or instructor's consent

C_S_D 3230: Hearing Science
Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.
Credit Hours: 3
Prerequisites: Restricted to Communication Science and Disorders majors only

C_S_D 4001: Topics in Communication Science and Disorders
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.
Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent

C_S_D 4020: Language Disorders in Children
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.
Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

C_S_D 4020W: Language Disorders in Children - Writing Intensive
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.
Credit Hours: 3
Prerequisites: Communication Science and Disorder majors only

C_S_D 4030: Language Disorders of Adults
Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.
Credit Hours: 2
Prerequisites: Communication Science and Disorders majors only

C_S_D 4210: Fluency Disorders
Credit Hours: 2
Prerequisites: Communication Science and Disorders majors only

C_S_D 4220: Voice Disorders
Introduction to voice disorders in children and adults. Includes overview of perceptual and instrumental assessment procedures and selected treatment approaches.
Credit Hours: 1
Prerequisites: Communication Science and Disorders majors only

C_S_D 4320: Disorders of Phonology and Articulation
Overview of disorders of use and production of speech sounds with an emphasis on developmental disorders. Introduction to assessment and treatment.
Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

C_S_D 4330: Introduction to Audiology
Principles and techniques of audiological testing; etiologies of hearing impairment; current technologies in rehabilitation.
Credit Hours: 3
Prerequisites: C_S_D 3230; Communication Science and Disorders majors only or instructor's consent

C_S_D 4340: Aural Rehabilitation
(cross-leveled with C_S_D 7340). Identification, evaluation, and management of problems associated with hearing impairment in
both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

**Credit Hours:** 3  
**Prerequisites:** Communication Science and Disorders majors only

---

**C_S_D 4340W: Aural Rehabilitation-Writing Intensive**  
(cross-leveled with C_S_D 7340). Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.  

**Credit Hours:** 3  
**Prerequisites:** Communication Science and Disorders majors only

---

**C_S_D 4430: Neurophysiology for Speech, Language, and Hearing**  
(cross-leveled with C_S_D 7430). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.  

**Credit Hours:** 3  
**Prerequisites:** Communication Science and Disorders majors only

---

**C_S_D 4830: Individual Differences in Language Processing**  
(cross-leveled with C_S_D 7830). Examination of the normal variations exhibited across individuals in the acquisition, use, and representation of language. Also considered are individual differences seen in second language learning, the aging process, and language disorders.  

**Credit Hours:** 2  
**Prerequisites:** instructor's consent

---

**C_S_D 4850: The Cognitive Consequences of Bilingualism**  
(cross-leveled with C_S_D 7850). This course is intended to establish an understanding of bilingual language processing and of the consequences of bilingualism on cognition. The course begins by reviewing the individual differences that modulate language processing in monolinguals and the factors that predict good second language learning outcomes in adults. This sets up the stage of an in-depth discussion of the ways in which second language proficiency changes the dynamics of language production and comprehension, as well as the cognitive performance across the lifespan. Students will be introduced to theories and models of bilingual language processing and will learn to evaluate evidence for and against the bilingual advantage and the benefits of bilingualism in healthy aging and recovery from acquired language deficits, such as aphasia. Students will also learn to identify patterns of language performance that distinguish bilinguals from monolinguals and from individuals with language disorders. Graded on A-F basis only.  

**Credit Hours:** 3  
**Recommended:** Junior or Senior standing

---

**C_S_D 4900: Clinical Observation in Communication Disorders**  
Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.  

**Credit Hours:** 2  
**Prerequisites:** Communication Science and Disorders majors only

---

**C_S_D 4945: Clinical Apprenticeship in Communication Disorders**  
Supervised observation and clinical experience in speech-language pathology or audiology for undergraduates.  

**Credit Hour:** 1-3  
**Prerequisites:** senior standing and departmental consent.  
Communication Science and Disorders majors only

---

**C_S_D 4950: Research Apprenticeship**  
Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated for 9 hrs. maximum.  

**Credit Hour:** 1-9  
**Prerequisites:** instructor's consent

---

**C_S_D 4960: Directed Reading in Communication Science and Disorders**  
Independent reading; reports.  

**Credit Hour:** 1-3  
**Prerequisites:** instructor's consent

---

**C_S_D 4990: Honors Thesis**  
Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.  

**Credit Hours:** 3  
**Prerequisites:** Senior standing; 3.3 GPA; 3.5 GPA in Communication Science and Disorders courses; instructor's consent. Restricted to Communication Science and Disorders students only

---

**C_S_D 7001: Topics in Communication Science and Disorders**  
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.  

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

**C_S_D 7085: Problems in Communication Science and Disorders**  
Individual study not leading to thesis or dissertation.  

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

**C_S_D 7340: Aural Rehabilitation**  
(cross-leveled with C_S_D 4340). Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.  

**Credit Hours:** 3  
**Prerequisites:** Communication Science and Disorders majors only

---

**C_S_D 7430: Neurophysiology for Speech, Language, and Hearing**  
(cross-leveled with C_S_D 4430). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

</table>
C_S_D 8260: Diagnosis in Speech-Language Pathology
General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.
Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

C_S_D 8320: Speech Sound Disorders
Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Communication Science and Disorders students only

C_S_D 8420: Reading and Language Disabilities in School-Age Children
Theories, research, and practice in reading development and disorders. Assessment and remediation of reading disabilities related to language disorders of various etiologies including developmental language disorders and head injury.
Credit Hours: 2
Prerequisites: C_S_D 4020 or C_S_D 8020

C_S_D 8430: Augmentative and Alternative Communication
Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Communication Science and Disorders students only

C_S_D 8500: Issues in Professional Practice
Organizational, inter-professional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graded on A/F basis only.
Credit Hours: 2
Prerequisites: Communication Science and Disorders students only

C_S_D 8600: Clinical Language Analysis
This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

C_S_D 8935: Clinical Practice in Audiology
Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1

C_S_D 8945: Clinical Practice in Speech-Language Pathology
Supervised clinical practice in speech pathology for graduate students. May be repeated for credit.

Computer Science (CMP_SC)

CMP_SC 1000: Introduction to Computer Science
This course introduces the Computer Science field, including the history of computers, career opportunities, and ethical/social issues. There will be lectures given by MU Computer Science faculty to discuss exciting fields as well as career advisement given by Computer Science industry representatives. Prerequisites: Restricted to freshman/sophomore students who are BS Computer Science, BS Information Technology and Undeclared Engineering or Pre-Engineering may enroll in the class without permission
Credit Hour: 1

CMP_SC 1001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

CMP_SC 1050: Algorithm Design and Programming I
This course provides experience in developing algorithms, designing, implementing programs. Topics include syntax/semantics, flow control, loops, recursion, I/O, arrays, strings and pointers.
Credit Hours: 4
Prerequisites: C- or higher in MATH 1100 or MATH 1160 or MATH 1500. May be restricted to Engineering majors only

CMP_SC 2001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

Prerequisites: departmental consent
CMP_SC 2010: Intellectual Property for Engineers
The objective of the course is to enable students to understand and develop informed opinions about issues relating to IP and its increasing influence on the control and use of information in society. A secondary objective is to provide a practical understanding of how to establish copyright, trademark, and/or patent protection for IP. Particular emphasis will be given to the complexities associated with IP in the fields of information technology and computer science.

Credit Hours: 3
Recommended: Any 1000 level Engineering course or instructor permission

CMP_SC 2050: Algorithm Design and Programming II
A study of fundamental techniques and algorithms for representing and manipulating data structures. Topics include data abstraction, recursion, stacks, queues, linked lists, trees, efficient methods of sorting and searching, and Big-O analysis.

Credit Hours: 4
Prerequisites: C- or higher in CMP_SC 1050. May be restricted to Engineering majors only

CMP_SC 2111: Production Languages
The study of the syntax, semantics, and applications of one programming language suitable for large scale scientific or commercial projects, such as FORTRAN, COBOL, PL/1, C, or ADA. May be taken more than once for credit.

Credit Hour: 1-3
Prerequisites: C- or higher in CMP_SC 2050 or INFOTC 2040

CMP_SC 2270: Introduction to Logic Systems
(same as ECE 2210). Basic tools, methods and procedures to design combinational and sequential digital circuits and systems, including number systems, boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design.

Credit Hours: 3
Prerequisites: C or higher in CMP_SC 2270 or ECE 2210 or ECE 1210

CMP_SC 2830: Web Application Development I
(same as INFOTC 2830). This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

Credit Hours: 1-3
Prerequisites: C- or higher in CMP_SC 2050 or INFOTC 1040

CMP_SC 3050: Advanced Algorithm Design
This class surveys fundamental algorithms and data structures that have wide practical applicability, including search trees and graph algorithms. Emphasis is placed on techniques for efficient implementation and good software development methodologies.

Credit Hours: 3
Prerequisites: CMP_SC 2050 with a C or higher

CMP_SC 3280: Computer Organization and Assembly Language
(same as ECE 3280). Introduces computer architectures, programming concepts including parameter passing, I/O, interrupt handling, DMA, memory systems, cache, and virtual memory. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or higher in CMP_SC 2270 or ECE 2210 or ECE 1210

CMP_SC 3330: Object Oriented Programming
This course focuses on object-oriented programming concepts: abstraction, polymorphism, encapsulation, inheritance, interfaces, abstract classes, files, streams, and object serialization. Topics such as GUI and event-driven programming are also tackled.

Credit Hours: 3
Prerequisites: CMP_SC 2050 or INFOTC 2040 with a C or higher grade

CMP_SC 3380: Database Applications and Information Systems
Covers fundamental topics of database management systems (DBMS) and database-enabled applications. Topics include a brief history of secondary storage and databases, data modeling, introductory SQL, an overview of current database trends, and current popular database systems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in CMP_SC 2050 or INFOTC 2040

CMP_SC 3530: UNIX Operating System
Introduction to the UNIX operating system and its interfaces including the file system, shell, editors, pipes and filters, input/output system, shell programming, program development including C, and document preparation.

Credit Hours: 3
Prerequisites: C or higher in CMP_SC 2050 or INFOTC 2040

CMP_SC 3940: Internship in Computer Science
Computer-related experience in business or industry jointly supervised by faculty and computer professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on a S/U basis only.

Credit Hour: 1-3
Prerequisites: CMP_SC 2050

CMP_SC 4001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.

Credit Hour: 1-99

CMP_SC 4050: Design and Analysis of Algorithms I
(cross-leveled with CMP_SC 7050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied.

Credit Hours: 3
Prerequisites: C or higher in CMP_SC 3050 and MATH 2320
**CMP_SC 4060: String Algorithms**  
(cross-leveled with CMP_SC 7060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 4050

**CMP_SC 4070: Numerical Methods for Science and Engineering**  
(same as ECE 4070; cross-leveled with CMP_SC 7070, ECE 7070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 2050 and junior standing or instructor's consent  
Recommended: Students are expected to have basic knowledge in discrete math and algorithms

**CMP_SC 4080: Parallel Programming for High Performance Computing**  
(cross-leveled with CMP_SC 7080) This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3280 or ECE 3210 and C- or higher in CMP_SC 3380

**CMP_SC 4280: Network Systems Architecture**  
(same as ECE 4280; cross-leveled with CMP_SC 7280, ECE 7280). The course covers network systems (interconnects and switch fabrics, network considerations) and relevant networking applications at the network, transport and application layer.  
Credit Hours: 4  
Prerequisites: C- or higher in CMP_SC 2050 or ECE 3220 and C- or higher in CMP_SC 3280 or ECE 3210

**CMP_SC 4200: Software Engineering I**  
(cross-leveled with CMP_SC 7320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3380

**CMP_SC 4330: Object Oriented Design I**  
(cross-leveled with CMP_SC 7330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3330

**CMP_SC 4350: Big Data Analytics**  
(cross-leveled with CMP_SC 7350). Big Data Analytics represents a new era of computing, where data in any format maybe processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course will cover advanced analytics technologies and techniques that enable industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3330 and CMP_SC 3380
CMP_SC 4380: Database Management Systems I
(cross-leveled with CMP_SC 7380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3380

CMP_SC 4410: Theory of Computation I
(cross-leveled with CMP_SC 7410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3  
Prerequisites: C- or higher in MATH 2320

CMP_SC 4430: Compilers I
(cross-leveled with CMP_SC 7430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for block structured languages, and run-time storage organization. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3  
Prerequisites: C- or higher in MATH 2320, CMP_SC 3280 and CMP_SC 4450

CMP_SC 4440: Malware Analysis and Defense
(cross-leveled with CMP_SC 7440). Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and teaches ethical issues surrounding computer security violations.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3280 or ECE 3210

CMP_SC 4450: Principles of Programming Languages
(cross-leveled with CMP_SC 7450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward Computer Science MS/PHD.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 2050

CMP_SC 4460: Introduction to Cryptography
(cross-leveled with CMP_SC 7460). Cryptography is an important technique used to achieve security goals in an untrusted and possibly adversarial environment. The goals of this course are: (1) to provide students with a solid background with basic cryptographic techniques and their applications, (2) to impart knowledge of standard cryptographic algorithms and (3) to foster understanding of the correct use of cryptographic techniques.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3050 and MATH 2320

CMP_SC 4520: Operating Systems I
(cross-leveled with CMP_SC 7520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3050, CMP_SC 3280 and MATH 1700

CMP_SC 4530: Cloud Computing
(cross-leveled with CMP_SC 7530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments. Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3330 or instructor's consent

CMP_SC 4610: Computer Graphics I
(cross-leveled with CMP_SC 7610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3050 and MATH 1500 or C- or higher in CMP_SC 3050 and MATH 1300 and MATH 1400

CMP_SC 4620: Physically Based Modeling and Animation
(cross-leveled with CMP_SC 7620). This course introduces students to physically based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 4610  
Recommended: Good knowledge of C or C++ programming, no physics background necessary
**CMP_SC 4650: Digital Image Processing**
(same as ECE 4655; cross-leveled with CMP_SC 7650, ECE 7655).
Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 2050 and STAT 4710 or instructor's consent

---

**CMP_SC 4670: Digital Image Compression**
(same as ECE 4675; cross-leveled with ECE 7675, CMP_SC 7670).
Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 2050

---

**CMP_SC 4720: Introduction to Machine Learning and Pattern Recognition**
(same as ECE 4720; cross-leveled with ECE 7720, CMP_SC 7720)
This course provides foundations and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 2050 and STAT 4710 or instructor's consent

---

**CMP_SC 4730: Building Intelligent Robots**
(same as ECE 4340; cross-leveled with CMP_SC 7340, ECE 7340).
Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

**Credit Hours:** 4  
**Prerequisites:** junior standing  
**Recommended:** programming experience in one of the following programming languages - Basic, C, C++, or Java

---

**CMP_SC 4740: Interdisciplinary Introduction to NLP**
(same as LINGST 4740; cross-leveled with CMP_SC 7740; LINGST 7740).
The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

**Credit Hours:** 3  
**Prerequisites:** senior standing

---

**CMP_SC 4750: Artificial Intelligence I**
(cross-leveled with CMP_SC 7750).
Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 3050 and junior standing

---

**CMP_SC 4770: Introduction to Computational Intelligence**
(same as ECE 4870; cross-leveled with CMP_SC 7770, ECE 7870).
Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.

**Credit Hours:** 3

---

**CMP_SC 4830: Web Application Development II**
(same as INFOTC 4830; cross-leveled with CMP_SC 7830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 2830

---

**CMP_SC 4850: Computer Networks I**
(cross-leveled with CMP_SC 7850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 2270 or ECE 1210 and C- or higher in MATH 2320

---

**CMP_SC 4970: Senior Capstone Design I**
Communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 4320 and senior standing

---

**CMP_SC 4970W: Senior Capstone Design I - Writing Intensive**
Communication skills, and prototyping. Covers professional ethics, intellectual property/patenting, knowledge of engineering literature, safety, economic and environmental impact of technology. Essays, oral and written reports.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 4320 and senior standing

---

**CMP_SC 4980: Senior Capstone Design II**
Course entails completion of CMP_SC 4970 design project. Design prototyping, testing, evaluation, presentation, and preparation of documentation.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in CMP_SC 4970

---

**CMP_SC 4990: Undergraduate Research in Computer Science**
Independent investigation or project in Computer Science. May be repeated to 6 hours.

**Credit Hour:** 0-6  
**Prerequisites:** senior standing in Computer Science
CMP_SC 4995: Undergraduate Research in Computer Science - Honors
Independent investigation to be presented as an undergraduate honors thesis.
Credit Hour: 1-6
Prerequisites: honors student in Computer Science

CMP_SC 7001: Topics in Computer Science
Topic and credit may vary from semester to semester. May be repeated upon consent of department.
Credit Hour: 1-99

CMP_SC 7010: Computational Methods in Bioinformatics
(same as INFOINST 7010) Introduces the fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis will be placed on the computational aspect of bioinformatics, including formulation of a biological problem in a computable problem, design of scoring functions and algorithms, confidence assessment of prediction results and software development.
Credit Hours: 3
Prerequisites: CMP_SC 4050 and STAT 4710

CMP_SC 7050: Design and Analysis of Algorithms I
(cross-leveled with CMP_SC 4050). This course reviews and extends earlier work with linked structures, sorting and searching algorithms, and recursion. Graph algorithms, string matching, combinatorial search, geometrical algorithms and related topics are also studied. Cannot be counted toward CS MS/PHD.
Credit Hours: 3
Prerequisites: CMP_SC 3050 and MATH 2320

CMP_SC 7060: String Algorithms
(cross-leveled with CMP_SC 4060). This course provides an introduction to algorithms that efficiently compute patterns in strings. Topics covered include basic properties of strings, data structures for processing strings, string decomposition, exact and approximate string matching algorithms.
Credit Hours: 3
Prerequisites: CMP_SC 4050

CMP_SC 7070: Numerical Methods for Science and Engineering
(cross-leveled with CMP_SC 4070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C- or higher in CMP_SC 2050 or instructor's consent
Recommended: Students are expected to have basic knowledge in discrete math and algorithms

CMP_SC 7080: Parallel Programming for High Performance Computing
(cross-leveled with CMP_SC 4080). This course will provide in-depth treatment of the evolution high performance computing architectures and parallel programming techniques for those architectures. We will cover topics such as: multi-process and multi-threaded programming; multi-node system architectures (clusters, grids, and clouds) and distributed programming; and general purpose GPU programming. To reinforce lecture topics, programming projects will be completed using multi-process and multi-threaded techniques for modern multicore, multiprocessor workstations; parallel and distributed programming techniques for modern multi-node systems; and general purpose GPU programming. Parallel algorithms will be investigated, selected, and then developed for various scientific data processing problems. Programming projects will be completed using C and C++ APIs and language extensions, e.g. threads (pthreads, Boost/C++), TBB, CILK, OpenMP, OpenMPI, CUDA and OpenCL.
Credit Hours: 3
Prerequisites: CMP_SC 3280 or ECE 3210 and CMP_SC 3050 or ECE 3220

CMP_SC 7270: Computer Organization
(same as ECE 727; cross-leveled with CMP_SC 4270; ECE 4270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.
Credit Hours: 4
Prerequisites: C or higher in CMP_SC 2050 and CMP_SC 3280 or ECE 3280

CMP_SC 7320: Software Engineering I
(cross-leveled with CMP_SC 4320). Overview of software life cycle, including topics in systems analysis and requirements specification, design, implementation testing and maintenance. Uses modeling techniques, project management, peer review, quality assurance, and system acquisition. May not be counted toward CS MS/PHD.
Credit Hours: 3
Prerequisites: CMP_SC 3380

CMP_SC 7330: Object Oriented Design I
(cross-leveled with CMP_SC 4330). Building on a prior knowledge of program design and data structures, this course covers object-oriented design, including classes, objects, inheritance, polymorphism, and information hiding. Students will apply techniques using a modern object-oriented implementation language.
Credit Hours: 3
Prerequisites: CMP_SC 3330

CMP_SC 7350: Big Data Analytics
(cross-leveled with CMP_SC 4350). Big Data Analytics represents a new era of computing, where data in any format may be processed and exploited to extract insights for industries and organizations to make informed decisions, whether that data is in-place, in-motion or at-rest, in large volume, structured or unstructured. More and more companies are embracing open source Big Data technologies, such as Hadoop and extending it into an enterprise ready Big Data Platform. This course will cover advanced analytics technologies and techniques that enable
industries to extract insights from data with sophistication, speed and accuracy. You will learn practical industry best practices to bridge the gap between classroom learning and real world; and have access to cloud services for labs/projects.

Credit Hours: 3  
Prerequisites: CMP_SC 3330 and CMP_SC 3380

**CMP_SC 7380: Database Management Systems I**  
(cross-leveled with CMP_SC 4380). Fundamental concepts of current database systems with emphasis on the relational model. Topics include entity-relationship model, relational algebra, query by example, indexing, query optimization, normal forms, crash recovery, web-based database access, and case studies. Project work involves a modern DBMS, such as Oracle, using SQL.

Credit Hours: 3  
Prerequisites: CMP_SC 2050

**CMP_SC 7410: Theory of Computation I**  
(cross-leveled with CMP_SC 4410). An introductory study of computation and formal languages by means of automata and related grammars. The theory and applications of finite automata, regular expressions, context free grammars, pushdown automata and Turing machines are examined. May not be counted toward CS MS/PHD.

Credit Hours: 3  
Prerequisites: MATH 2320

**CMP_SC 7430: Compilers I**  
(cross-leveled with CMP_SC 4430). Introduction to the translation of programming languages by means of interpreters and compilers. Lexical analysis, syntax specification, parsing, error-recovery, syntax-directed translation, semantic analysis, symbol tables for blockstructured languages, and run-time storage organization. May not be counted toward CS MS/PHD.

Credit Hours: 3  
Prerequisites: MATH 2320 and CMP_SC 3280 and CMP_SC 4450

**CMP_SC 7440: Malware Analysis and Defense**  
(cross-leveled with CMP_SC 4440). Malicious software or "malware" is a security threat. This course teaches students to understand the nature and types of viruses and how they are threats; teaches techniques used to prevent, detect, repair and defend against viruses and worms; teaches program binary examination tools to detect malicious code; and ethical issues surround computer security violations.

Credit Hours: 3  
Prerequisites: CMP_SC 3280, ECE 3210 or equivalent

**CMP_SC 7450: Principles of Programming Languages**  
(cross-leveled with CMP_SC 4450). An introduction to the structure, design and implementation of programming languages. Topics include syntax, semantics, data types, control structures, parameter passing, run-time structures, and functional and logic programming. May not be counted toward CS MS/PHD.

Credit Hours: 3  
Prerequisites: CMP_SC 2050

**CMP_SC 7460: Introduction to Cryptography**  
(cross-leveled with CMP_SC 4460). Cryptography is an important technique used to achieve security goals in an untrusted and (possibly) adversarial environment. The goals of this course are: (1) to provide students with a solid background with basic cryptographic techniques and their applications, (2) impart knowledge of standard cryptographic algorithms and (3) foster understanding of the correct use of cryptographic techniques.

Credit Hours: 3  
Prerequisites: CMP_SC 3050 and MATH 2320

**CMP_SC 7520: Operating Systems I**  
(cross-leveled with CMP_SC 4520). Basic concepts, theories and implementation of modern operating systems including process and memory management, synchronization, CPU and disk scheduling, file systems, I/O systems, security and protection, and distributed operating systems. Cannot be counted toward CS MS/PHD.

Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 3050, CMP_SC 3280 and MATH 1700

**CMP_SC 7530: Cloud Computing**  
(cross-leveled with CMP_SC 4530). This course covers principles that integrate computing theories and information technologies with the design, programming and application of distributed systems. The course topics will familiarize students with distributed system models and enabling technologies; virtual machines and virtualization of clusters, networks and data centers; cloud platform architecture with security over virtualized data centers; service-oriented architectures for distributed computing; and cloud programming and software environments. Additionally, students will learn how to conduct some parallel and distributed programming and performance evaluation experiments on applications within available cloud platforms. Finally we will survey research literature and latest technology trends that are shaping the future of high performance, distributed and cloud computing.

Credit Hours: 3  
Prerequisites: CMP_SC 3330 or instructor's consent

**CMP_SC 7610: Computer Graphics I**  
(cross-leveled with CMP_SC 4610). Basic concepts and techniques of interactive computer graphics including hardware, software, data structures, mathematical manipulation of graphical objects, the user interface, and fundamental implementation algorithms.

Credit Hours: 3  
Prerequisites: CMP_SC 3050 and either MATH 1500 or MATH 1300 and MATH 1400

**CMP_SC 7620: Physically Based Modeling and Animation**  
(cross-leveled with CMP_SC 4620). Introduces fundamental algorithms and techniques including interpolation, quaternions, rigid body dynamics, kinematics, particle systems, free form and dynamic deformations, spring and damper systems and computational natural phenomena simulation.

Credit Hours: 3  
Prerequisites: CMP_SC 4610 or CMP_SC 7610  
Recommended: Good knowledge of C or C++ programming, no physics background necessary
CMP_SC 7650: Digital Image Processing
(same as ECE 7655; cross-leveled with CMP_SC 4650, ECE 4655). Fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.
Credit Hours: 3
Prerequisites: CMP_SC 2050, STAT 7710 or instructor's consent

CMP_SC 7670: Digital Image Compression
(same as ECE 7675; cross-leveled with CMP_SC 4670, ECE 4675). Covers digital image formation, information theory concepts, and fundamental lossless and lossy image compression techniques including bit plane encoding, predictive coding, transform coding, block truncation coding, vector quantization, subband coding and hierarchical coding.
Credit Hours: 3
Prerequisites: CMP_SC 2050

CMP_SC 7720: Introduction to Machine Learning and Pattern Recognition
(same as ECE 7720; cross-level CMP 4720, ECE 4720). This course provides foundation knowledge and methods in machine learning and pattern recognition that address the problem of programming computers to optimize performance by learning from example data or expert knowledge. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 2050 and STAT 4710 or instructor's consent

CMP_SC 7730: Building Intelligent Robots
(same as ECE 7340; cross-leveled with CMP_SC 4730, ECE 4730). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures. Prerequisites: programing experience in one of the following programming languages: Basic, C, C++, or Java.
Credit Hours: 4

CMP_SC 7740: Interdisciplinary Introduction to Natural Language Processing
(same as LINGST 7740; cross-leveled with CMP_SC 4740; LINGST 4740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of text.
Credit Hours: 3

CMP_SC 7750: Artificial Intelligence I
(cross-leveled with CMP_SC 4750). Introduction to the concepts and theories of intelligent systems. Various approaches to creating intelligent systems, including symbolic and computational approaches, insight into the philosophical debates important to understanding AI.
Credit Hours: 3
Prerequisites: CMP_SC 3050

CMP_SC 7770: Introduction to Computational Intelligence
(same as ECE 7870; cross-leveled with CMP_SC 4770, ECE 4870). Introduction to the concepts, models and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization.
Credit Hours: 3

CMP_SC 7830: Web Application Development II
(cross-leveled with CMP_SC 4830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.
Credit Hours: 3
Prerequisites: CMP_SC 3330 and CMP_SC 2830

CMP_SC 7850: Computer Networks I
(cross-leveled with CMP_SC 4850). Introduction to concepts and terminology of data communications and computer networking. Basic protocols and standards, applications of networking, routing algorithms, congestion avoidance, long-haul and local networks.
Credit Hours: 3
Prerequisites: CMP_SC 2270 or ECE 1210 and MATH 2320

CMP_SC 8001: Advanced Topics in Computer Science
Topic may vary from semester to semester. May be repeated upon consent of department.
Credit Hours: 3
Prerequisites: varies by topic

CMP_SC 8050: Design and Analysis of Algorithms II
Techniques for the design and analysis of correct, efficient algorithms. Topics include graph, geometric, and algebraic/ numeric algorithms, NP-completeness, and parallel algorithms.
Credit Hours: 3
Prerequisites: CMP_SC 4050

CMP_SC 8060: Survey of Advanced Algorithm Techniques
This class provides a survey of important algorithmic techniques, some of which are emerging right now, and show that they are much easier to understand than they first appear. The class will create a renewed appreciation for what makes Computer Science such a fun/interesting discipline.
Credit Hours: 3
Prerequisites: CMP_SC 4050

CMP_SC 8085: Problems in Computer Science
Independent study project work with a professor in computer science.
Credit Hour: 1-4
Prerequisites: instructor consent

CMP_SC 8130: Computational Genomics
(same as INFOINST 8310). This course introduces computational concepts and methods of genomics to students. The course covers
genomic structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

---

**CMP_SC 8150: Integrative Methods in Bioinformatics**  
(same as INFOINST 8150). Introduces the most popular experimental methods from the point of view of the information sources that can be used. Students will use data obtained directly from biological experiments and learn how to suggest new experiments to improve results. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

---

**CMP_SC 8160: Content Management in Biomedical Informatics**  
(same as INFOINST 8860). This course introduces theory and techniques for content extraction, indexing, and retrieval of biomedical media databases. Topics include biomedical media databases, feature extraction methods, advanced database indexing structures, query methods, and result visualization. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7380, INFOINST 7010

---

**CMP_SC 8170: Computational Modeling of Molecular Structures**  
This course uses a problem solving paradigm to investigate common principles, data structures, algorithms, challenges, and solutions in computationally modeling (constructing) 3D structures of proteins, RNAs, chromosomes, and genomes.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7010

---

**CMP_SC 8180: Machine Learning Methods for Biomedical Informatics**  
(same as INFOINST 8880). Teaches statistical machine learning methods and applications in biomedical informatics. Covers theories of advanced statistical machine learning methods and how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or CMP_SC 7005

---

**CMP_SC 8190: Computational Systems Biology**  
(same as INFOINST 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010; INFOINST 8010

---

**CMP_SC 8370: Data Mining and Knowledge Discovery**  
Course topics include an introduction to fundamental concepts, data mining techniques from machine learning and pattern recognition areas, association rules, web mining, spatial mining, temporal mining, multimedia/multimodal database mining, and database mining, and geospatial information mining.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7380

---

**CMP_SC 8440: Information Security: A Language-Based Approach**  
This course focuses on language-based techniques for information flow security. Students will gain a solid background in information security, be encouraged to do further research and be exposed to important/promising trends in state-of-the-art computer security. Prerequisites: CMP_SC 4450 or CMP_SC 7450

**Credit Hours:** 3

---

Designing scalable exhaustive methods to ensure reliability of computer systems is an important challenge in computer science as even simple errors can have serious socio-economic-political consequences. This challenge is the focus of the field of automated verification techniques which draws techniques from complexity theory, automata theory, programming languages and logic, and provides tools to ensure that the computer systems are reliable. Computer-assisted techniques for verifying hardware implementations are regularly employed in the industry, and are also being increasingly adopted in the software industry as the costs of software bugs and security flaws escalate. The goals of this course are: (1) to provide students with a solid back-ground in the fundamental techniques used in this field, (2) to encourage further research in software and security verification, and (3) to introduce students to important upcoming trends in verifying security protocols. The students will get theoretical background as well as learn to use some standard tools in this field. Students will also explore topics of particular interest to them through the performance of a significant semester project.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4450 or CMP_SC 7450 or CMP_SC 4430 or CMP_SC 7430 or instructor's consent. A reasonable level of mathematical maturity and significant programming experience is expected

---

**CMP_SC 8530: Cloud Computing II**  
This course covers advanced principles of distributed system models and enabling technologies relating to cloud computing; latest advances in management and security of virtual machines and virtualization of clusters, networks, and data centers will be studied; additionally, students will survey research literature and perform cloud programming as well as performance evaluation experiments on applications within available cloud platforms. Students will learn project-based: problem solving, collaborative programming, technical writing and presentation skills. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4530 or CMP_SC 7530 or instructor's consent

---

**CMP_SC 8610: Computer Graphics II**  
Further study of computer graphics, focused on 3-D graphics, transformations, geometric and surface modeling, color models, visible surface determination, lighting and shading, standard graphics
software (Phigs/OpenGL). Selected current topics in graphics such as visualization, animation and realism.

Credit Hours: 3
Prerequisites: CMP_SC 7610

**CMP_SC 8620: Physically Based Modeling and Animation II**
This course introduces students to physical based modeling and animation methodology for computer graphics and related fields such as computer vision, visualization, biomeomedical imaging and virtual reality. We will explore current research issues and will cover associated computational methods for simulating various visually interesting physical phenomena. This course should be appropriate for graduate students in all areas as well as advanced undergraduate students.

Credit Hours: 3
Prerequisites: CMP_SC 4610 or CMP_SC 7610

**CMP_SC 8630: Data Visualization**
Data visualization broadly covers transforming multidimensional and timevarying datasets to dynamic visual representations and encodings that facilitate exploratory data mining, knowledge discovery, improved understanding, summarization, structural modeling, collaboration and decision making using interactive methods.

Credit Hours: 3
Prerequisites: CMP_SC 4610 or CMP_SC 7610 or instructor's consent

**CMP_SC 8650: Advanced Image Processing**
(same as ECE 8855). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.

Credit Hours: 3
Prerequisites: CMP_SC 4650 or CMP_SC 7650 or instructor's consent

**CMP_SC 8660: Multimedia Security**
This course offers a comprehensive coverage of the theoretical foundation of multimedia security technologies, including encryption, authentication, digital watermarking, key management, copy control, fingerprinting/tracing, digital media forensics, and biometrics, provides an in-depth study of the state-of-the-art digital rights management systems and the underlying security technologies. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4670 or CMP_SC 4650; instructor's consent

**CMP_SC 8670: Biomedical Image Processing**
(same as ECE 8675). This course introduces students to the fundamentals of biomedical image processing and analysis with an emphasis on cellular and tissue microscopy along with anatomical imaging. The course will cover image and video processing techniques and pipelines for image enhancement, restoration, registration, detection, segmentation, classification, and motion analysis that are tailored for biomedical image informatics. This course will provide a rich exposure to a broad range of imaging datasets from the molecular to the anatomical; and train students to implement algorithms for moderately complex tasks in biomedical image analysis. This course is suitable for graduate students in all fields of engineering and science who are interested in understanding and implementing biomedical and biological image analytics and are seeking pointers to the broad literature in the field.

Credit Hours: 3
Prerequisites: CMP_SC 4650 or CMP_SC 7650, ECE 4655 or ECE 7655 or instructor's consent

**CMP_SC 8680: 3-D Computer Vision**
This course introduces students to a central problem in computer vision - how to recover 3-D structure and motion from a collection of 2-D images, using techniques drawn mainly from linear algebra and matrix theory. The main focus is on developing a unified framework for studying the geometry of multiple images of a 3-D scene and reconstructing geometric models from those images. The course also covers relevant aspects of image formation, basic image processing, and feature extraction.

Credit Hours: 3
Prerequisites: CMP_SC 4650 or CMP_SC 7650
Recommended: Good knowledge of C or C++ programming, linear algebra and data structures

**CMP_SC 8690: Computer Vision**
(same as ECE 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4655 or ECE 7655 or CMP_SC 4650 or CMP_SC 7650 or instructor's consent

**CMP_SC 8725: Supervised Learning**
(same as ECE 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

**CMP_SC 8735: Unsupervised Learning**
(same as ECE 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

**CMP_SC 8740: Advanced Natural Language Processing**
What do Google, the New York Times, Facebook, Cerner, and other big companies know that you don’t? Natural language processing. This course considers open and compelling problems in contemporary research in the processing and analysis of text, focusing on both the underlying theory and its practical application. The goal is to help students understand the nature of these problems, the current
approaches to them, the strengths and weaknesses of those approaches, and other possible ways forward.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4740 or CMP_SC 7740  
**Recommended:** CMP_SC 2050; students should be facile in programming at least one high-level language. Good knowledge of univariate, parametric statistics

---

**CMP_SC 8750: Artificial Intelligence II**  
Further discussion of theories and techniques of artificial intelligence. Investigating state-of-the-art systems with capabilities to perceive, reason, learn and react intelligently to their environment.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4750 or CMP_SC 7750 or instructor's consent

---

**CMP_SC 8780: Advanced Topics in Computational Intelligence** (same as ECE 8875). This course is a continuation of ECE 7870/ CMP_SC 7770 Introduction to Computational Intelligence in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.

**Credit Hours:** 3  
**Prerequisites:** ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770

---

**CMP_SC 8790: Filtering, Tracking and Data Fusion**  
This course will cover theory and applications of rigorous and efficient techniques for determining the state of an observed system from a series of imperfect observations or measurements. Specific topics to be covered include semidefinite matrix theory, the Kalman filter, the Unscented Transform, Covariance Intersection and related techniques. Applications of these techniques include head and hand tracking in virtual reality systems, robotics, and distributed information fusion.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050, MATH 2300 or Linear Algebra or Matrix Theory

---

**CMP_SC 8850: Computer Networks II**  
In-depth analysis and evaluation of computer networking architectures, protocols and algorithms, network security, distributed database and computational networks, routing and congestion control, domains and internetworking.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7850

---

**CMP_SC 8860: Parallel and Distributed Processing**  
This course covers basic issues of parallel and distributed processing, including parallel and distributed architectures and models, parallel programming, and parallel algorithms and applications.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 4050

---

**CMP_SC 8870: Modeling and Management of Uncertainty** (same as ECE 8870). Theoretical and practical issues in the modeling and management of uncertainty. Topics include probabilistic uncertainty, belief theory and fuzzy set theory. Applications to computer vision, pattern recognition and expert systems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ECE 4870 or ECE 7870 or CMP_SC 4770 or CMP_SC 7770 or instructor's consent

---

**CMP_SC 8980: Research Masters Project in Computer Science**  
Investigation and research of a topic, not leading to a thesis. Graded on S/U basis only.

**Credit Hours:** 1-99  
**Prerequisites:** departmental consent

---

**CMP_SC 8990: Research-Masters Thesis Computer Science**  
Graded on S/U basis only.

**Credit Hours:** 1-99  
**Prerequisites:** advisor's consent

---

**CMP_SC 9990: Research-Doctoral Dissertation Computer Science**  
Graded on S/U basis only.

**Credit Hours:** 1-99  
**Prerequisites:** advisor's consent

---

**Constitutional Democracy (CNST_DEM)**

**Credit Hours:** 3

---

**CNST_DEM 2004: Topics in Constitutional Democracy - Social Science**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hours:** 1-6

---

**CNST_DEM 2100: The Revolutionary Transformation of Early America** (same as HIST 2100). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing "the causes which impelled" the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.

**Credit Hours:** 3

<tbody>
<tr>
<td>CNST_DEM 2100H: The Revolutionary Transformation of Early America - Honors</td>
<td>(same as HIST 2100H). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing &quot;the causes which impelled&quot; the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.</td>
<td>3</td>
<td>Honors eligibility required</td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2120H: The Young Republic - Honors</td>
<td>(same as HIST 2120H). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.</td>
<td>3</td>
<td>Honors eligibility required</td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2150: The American Civil War: A Global History</td>
<td>(same as HIST 2150). In this class students will study the American Civil War from the perspective of global history. The familiar actors and events will be covered - the debate over slavery, the secession of the South, the rise of Abraham Lincoln, the great battles and generals, etc. But these familiar episodes will take on different meanings when viewed in relation to global structures of politics, economics, social relations, and ideology. The 1860s was at once a formative moment in the history of globalization and the key decade for the formation and consolidation of modern nations.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2425: Race and the American Story</td>
<td>(same as BL_STU 2425, POL_SC 2425). This course represents a collaboration between the University of Missouri's Department of Black Studies and the Kinder Institute on Constitutional Democracy. Building upon the existing Citizenship@Mizzou program, the course aims to carry forward the goals of the Citizenship program and to further solidify and magnify its impact on campus. In so doing, the course will also serve as a model for improving diversity education on campuses across the country and contribute to a more informed and unified national culture. The core syllabus will consist in readings that tell the story of the confrontation between American political principles and the practice of racial injustice throughout our history. Students will read and discuss the Declaration of Independence, the slavery clauses in the Constitution, the poetry of Phillis Wheatley, and the speeches of Frederick Douglass, Abraham Lincoln, and Martin Luther King, Jr., among others. They will achieve a greater understanding of how diversity relates to humanity, and will learn to dialogue productively and civilly with others who may not share their background or opinions.</td>
<td>1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2430: History of American Religion</td>
<td>(same as HIST 2430). This course focuses on the overall development of American religion from the 17th century to the present. Students will be invited to think about the larger questions concerning American religion, including why religion in America has developed in the way that it has, and how and why it continues to thrive in American popular culture.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2445: American Constitutional Democracy</td>
<td>(same as POL_SC 2445, HIST 2445). This course offers an introduction to American constitutional democracy. On the one hand, this course will strive to set the development of America's constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2450H: The Intellectual World of the American Founders - Honors</td>
<td>(same as POL_SC 2450H). This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.</td>
<td>3</td>
<td>Honors eligibility required</td>
<td></td>
</tr>
<tr>
<td>CNST_DEM 2455H: Constitutional Debates - Honors</td>
<td>(same as POL_SC 2455H). While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in &quot;high theory&quot;. Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. While we will discuss why the Federalists ultimately &quot;won the day,&quot; we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left unanswered and some of the problems that it left un-solved.</td>

</tbody>
</table>
Credit Hours: 3  
**Prerequisites:** Honors eligibility required; POL_SC 1100

**CNST_DEM 2800: Liberty, Justice and the Common Good**  
(same as POL_SC 2800). Selected great political theorists and their contemporary relevance. How to think critically about political ideas and ideologies.  
Credit Hours: 3

**CNST_DEM 3220: U.S. Women's Political History, 1880-Present**  
(same as HIST 3220, WGST 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division.  
Credit Hours: 3  
**Prerequisites:** sophomore standing

**CNST_DEM 4000: Age of Jefferson**  
(same as HIST 4000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.  
Credit Hours: 3

**CNST_DEM 4080: American Foreign Policy from Colonial Times to 1898**  
(same as HIST 4080, PEA_ST 4080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.  
Credit Hours: 3

**CNST_DEM 4100: American Cultural and Intellectual History to 1865**  
(same as HIST 4100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.  
Credit Hours: 3

**CNST_DEM 4130: African-American Politics**  
(same as POL_SC 4130, BL_STU 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.  
Credit Hours: 3

**CNST_DEM 4140: Congress and Legislative Policy**  
(same as POL_SC 4140). Study of national and state legislative systems and legislative policy making, with emphasis on Congress.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4150: The American Presidency**  
(same as POL_SC 4150). Evolution of the presidency; particular emphasis on constitutional and political roles played by chief executive in shaping public policy.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4170: Politics of the American South**  
(same as POL_SC 4170). This course focuses on the politics of the American South in the latter part of the 20th century and the early years of the current millennium. For undergraduate credit only.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4200: The American Constitution**  
(same as POL_SC 4200). Leading American constitutional principles as they have evolved through important decisions of the United States Supreme Court.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4210: Constitutional Rights**  
(same as POL_SC 4210). Survey of Supreme Court cases involving the Constitution's protections for life, liberty, and property and guarantee of equal protection of the law.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4230: Constitution and Civil Liberties**  
(same as POL_SC 4230). Civil liberties in the American constitutional context emphasizing freedom of expression (religion, speech, press, assembly), rights of accused and right to privacy.  
Credit Hours: 3  
**Prerequisites:** POL_SC 1100

**CNST_DEM 4400: History of American Law**  
(same as HIST 4400). American law from English origins to present. Reviews common law, codification, legal reform movements, slavery law, administrative state, formalism, legal realism, jurisprudential questions concerning rule of law.  
Credit Hours: 3  
**Recommended:** HIST 1100, HIST 1200, or HIST 1400

**CNST_DEM 4800: Political Thought in Classical and Christian Antiquity**  
(same as POL_SC 4800, AMS 4800). Reading and discussion of Greek, Roman, and Early Christian treatises on politics and political life. Survey of the political institutions and procedures of the Greek city states and Roman Republic and Empire. Examination of contemporary Christian responses and adaptations.  
Credit Hours: 3  
**Recommended:** AMS 1060 and junior standing
CNST_DEM 4810: Modern Political Theory
(same as POL_SC 4810). Great political theorists from Machiavelli through Marx on the nation state, capitalism, liberalism, conservatism, and Marxism.
Credit Hours: 3

CNST_DEM 4830: Democracy in America (and Elsewhere)
(same as POL_SC 4830). This course focuses on the dynamics of democracy. We will explore various topics in the history, development, and practice of democracy through an examination of the writings of Alexis de Tocqueville, one of the most insightful and prescient observers of American political culture.
Credit Hours: 1-3

CNST_DEM 4840: Developing Dynamics of Democracy
(same as POL_SC 4840). This course examines developments in the theory and practice of democracy from the ancient Greeks to the present. Beginning with the origins of democracy in the Hellenic city states, we consider the transformation of democratic concepts in the classical liberal period, review the development of democratic institutions in the United States and Europe, examine the emergence of supra-national democratic institutions such as the European Union, and assess the future of democratization in the 21st century.
Credit Hours: 3
Prerequisites: POL_SC 1100

CNST_DEM 4850: Scots and the Making of America
(same as POL_SC 4850). This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.
Credit Hours: 3
Prerequisites: POL_SC 1100

CNST_DEM 4900: Beltway History and Politics: American Constitutional Democracy in Theory and Practice
(same as HIST 4900, POL_SC 4900). This course is an experiential overview of American political history for students participating in the Kinder Forum's Washington internship program, showing how American constitutional democracy was developed and implemented right here on the Potomac, as much as possible in the actual places where the events occurred. Emphasis will be placed on the interplay between constitutional theory and actual political experience over time, and the tensions and institutional changes that emerged as Americans and their government coped with cataclysmic social changes, unparalleled economic development, and fearsome international challenges.
Credit Hours: 3

CNST_DEM 4975: Journal on Constitutional Democracy
(same as HIST 4975, POL_SC 4975). The Journal is sponsored by the Kinder Institute on Constitutional Democracy and staffed by current and former participants in the Institute's undergraduate Society of Fellows program. Each volume of the Journal is organized around a student-selected idea or era central to the historical development and philosophical foundations of constitutional democracy in the United States. Student-authored essays address this theme via arguments and historical overviews crafted from the close reading and analysis of primary source documents, with the exception being that participating in the Journal will relate back to and advance students' study of American political thought and history.
Credit Hours: 1-6

Data Science (DATA_SCI)

DATA_SCI 4001: Topic in Data Science and Analytics
This course will act as a placeholder for departmental topics course in Data Science and Analytics. The topics and credits may vary, but will pertain to core instructional or emphasis area topics. Graded on A-F basis only.
Credit Hours: 1-6
Prerequisites: Instructor consent

DATA_SCI 4085: Problems in Data Science and Analytics
Directed study on a topic in data science and analytics.
Credit Hour: 1-6
Prerequisites: Instructor's consent

DATA_SCI 4087: Seminar in Data Science and Analytics
Directed study on a topic in data science and analytics.
Credit Hour: 1-6
Prerequisites: Instructor's consent

DATA_SCI 7001: Topics in Data Science and Analytics
Directed study on a topic in data science and analytics. Topics and credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.
Credit Hour: 1-6
Prerequisites: Instructor consent

DATA_SCI 7263: Digital Strategy II
This course provides hands on experience using several digital platforms such as Facebook Insights, Google AdWords, Google Analytics, Adobe Analytics, Clarabridge and Topsy. In this course you'll learn digital advertising terminology and jargon, the importance of digital analytics, the role of analysts, qualities of effective analysts, the digital optimization process, web metrics and key performance indicators, as well as the essentials of collaboration and generating support and buy-in while gaining your executive's attention. Graded on A-F basis only.
Credit Hour: 1-6
DATA_SCI 7600: Introduction to Data Science and Analytics
An introductory course in data science and analytics. The objective of the course is to give students a broad overview of the various aspects of data analytics such as accessing, cleansing, modeling, visualizing, and interpreting data. Students will perform hands-on learning of data analytic topics, using technologies such as Python, R, and open source analytic tools. Two Big Data cyberinfrastructure platforms will be introduced through case studies, allowing students to perform data analytical learning modules on modern cloud infrastructure and other relevant technologies. Graded on A-F basis only.
Credit Hours: 3
Recommended: Basic programming experience and Basic database experience

DATA_SCI 7601: Introduction to Data Science
This course is an introduction to the NGA Program of Study in Data Science (PSDS), the concentration areas, and the role of each concentration area in data science. Participants will learn how to receive, if desired, an accredited Graduate Certificate and/or a Master of Science degree in Data Science and Analytics from the University of Missouri. Participants will receive an introduction to software, tools, and resources to be utilized throughout the program. Participants will learn of systematic methodologies for data science projects and the data science pipeline through review of case studies. Graded on S/U basis only.
Credit Hours: 2
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 7610: Introduction to Data Science and Analytics
This course teaches students how to program in Python, including use of auxiliary libraries various Python ecosystems. Students are introduced to the iPython notebooks from the SciPy ecosystem, as well Python's use across the spectrum of Data Science courses and topics. Many activities are focus on data ingestion, cleaning, manipulation, and restructuring (e.g., ETL). Graded on A-F basis only.
Credit Hour: 1
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 7620: Database Basics and SQL Boot Camp
This course covers a core concepts to heterogeneous data management, including relational databases, NoSQL databases, and other data storage systems. The focus is on making students quickly productive in the use of multiple types of database management systems available on the market for data science work. This includes traditional relational databases, NOSQL databases and graph databases. This course is a 1 credit hour / 5 day course. This course is delivered in an asynchronous online mode. The instructor virtually kicks off the course on day-one, then four additional days over a two week period are used for self-paced, online activities using the JupyterHub learning environment. Graded on A-F basis only.
Credit Hour: 1
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 7630: Introductory Probability and Statistics for Data Analytics
This course explores the use of inferential and predictive statistics for data modeling and analytics. Single-- variate and multivariate statistical concepts are discussed, as well as intermediate exposure to statistical modeling. Students learn to evaluate model effectiveness and conduct results driven model selection. Statistical and modeling techniques focus on high dimensional data analytics. Topics related to dimensionality reduction are also covered, such as principal component analysis and factor analysis. Graded on A-F basis only.
Credit Hours: 2
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 7637: Streaming Social Media Data Management and Analysis
An intermediate data wrangling and analysis class designed to provide students with an in-depth overview of collecting and analyzing Twitter data. Computational topics include composing, sending, and receiving Hypertext Transfer Protocol (HTTP) messages. Data wrangling topics include parsing json files, navigating recursively nested structures, and processing textual data. Analysis methods include machine learning, network analysis, topic modeling, time series, etc. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor consent

DATA_SCI 7640: R Statistical Programming Boot Camp
This course teaches students how to program in R, including use of auxiliary libraries in R focused on various statistical and visualization oriented techniques. Students are introduced to R's use across the spectrum of Data Science courses and topics. Many activities focus on the development of statistical tests, and the use of R for statistical exploration. This course teaches students how to program in R, including use of auxiliary libraries in R focused on various statistical and visualization oriented techniques. Students are introduced to R's use across the spectrum of Data Science courses and topics. Many activities focus on the development of statistical tests, and the use of R for statistical exploration. Graded on A-F basis only.
Credit Hour: 1
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8001: Advanced Topics in Data Science and Analytics
Topics and credit may vary from semester to semester. Can be repeated with departmental approval. Graded on A-F basis only.
Credit Hour: 1-6

DATA_SCI 8085: Problems in Data Science and Analytics
Directed study on a topic in data science and analytics. Graded on A-F basis only.
Credit Hour: 1-6
Prerequisites: instructor's consent
DATA_SCI 8610: Statistical and Mathematical Foundations for Data Analytics
An intermediate statistics class designed to build the mathematical foundation for students dealing with Big Data phenomena. Topics include discussions of probability, data sampling, data summarization, sampling distributions, statistical inference, statistical pattern analysis, hypothesis testing, regression, and nonparametric inference over multidimensional data collections. Students will engage in Big Data projects using various publicly available data sets and leveraging modern Data Science tools, techniques, and cyberinfrastructure. Graded on A-F basis only.
Credit Hours: 3
Recommended: Basic understanding of mathematical principles of vectors and matrices, and Basic course in probability and statistics

DATA_SCI 8612: Spatial and Geostatistical Analysis
This course will provide a practical overview of key issues encountered when working with and analyzing spatial data as well as an overview of major spatial analysis approaches. Discussions and laboratory work will focus on implementation, analysis, and interpretive issues given constraining factors that commonly arise in practice. Graded on A-F basis only.
Credit Hours: 3
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8614: Data Analytics from Applied Machine Learning
This course leverages the foundations in statistics and modeling to teach applied concepts in machine learning. Participants will learn various classes of machine learning and modeling techniques, and gain an in-depth understanding how to select appropriate techniques for various data science tasks. Topics cover a spectrum from simple Bayesian modeling to more advanced algorithms such as support vector machines, decision trees/forests, and neural networks. Students learn to incorporate machine learning workflows into data-intensive analytical processes. Graded on A-F basis only.
Credit Hours: 3
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8620: Database and Analytics
Covers the fundamental concepts of current database systems and query methods with emphasis on relational model and non-relational techniques in Big Data environments. Topics include entity-relationship model, relational algebra, indexing, query optimization, normal forms, tuning, security, NoSQL, and data analytics skills in both relational and non-relational environments. Project work involves modern relational DBMS systems and NoSQL environments. Graded on A-F basis only.
Credit Hours: 3
Recommended: Basic understanding of mathematical principles of vectors and matrices, and Basic course in probability and statistics

DATA_SCI 8630: Data Mining and Information Retrieval
The course introduces the main concepts and techniques of data mining and information retrieval. It covers a variety of data mining topics and methods to extract hidden and predictive patterns from large data collections. Furthermore, theory and techniques for the modeling, indexing, and retrieval of relational, nonrelational, textbased and multimedia databases is covered. Topics include introduction to data mining process, mining frequent patterns, and pattern analysis, as well as different information retrieval models and evaluation, query languages and operations, and indexing/searching methods. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: DATA_SCI 7600 and DATA_SCI 8620
Recommended: Basic understanding of mathematical principles of vectors and matrices; Basic course in probability and statistics; Basic course in databases and data analytics

DATA_SCI 8635: Cloud Computing for Data Analytics
This course provides an overview of state-of-the-art topics in Big Data Security, looking at data collection (smartphones, sensors, the Web), data storage and processing (scalable relational databases, Hadoop, Spark, etc.), extracting structured data from unstructured data, systems issues (exploiting multicore, security). Securing sensitive data, personal data and behavioral data while ensuring a respect for privacy will be a focus point in the course Graded on A-F only.
Credit Hours: 3
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8640: Big Data Security
This course provides an overview of state-of-the-art topics in Big Data Security, looking at data collection (smartphones, sensors, the Web), data storage and processing (scalable relational databases, Hadoop, Spark, etc.), extracting structured data from unstructured data, systems issues (exploiting multicore, security). Securing sensitive data, personal data and behavioral data while ensuring a respect for privacy will be a focus point in the course Graded on A-F only.
Credit Hours: 3
Prerequisites: DATA_SCI 7600 and DATA_SCI 8620

DATA_SCI 8650: Big Data Visualization
Covers the fundamental concepts of current visualization concepts and technologies. Unlike many data visualization courses, this one focuses on principles of visualization design and the grammar of graphics. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: DATA_SCI 7600 and DATA_SCI 8620
Recommended: Basic understanding of mathematical principles of vectors and matrices; Basic course in probability and statistics; Basic course in databases and data analytics

DATA_SCI 8654: Advanced Visualization and Communication I
Covers the fundamental concepts of current visualization concepts and technologies, adding in Infographic and Interactive Visualization Design. Unlike many data visualization courses, this one focuses on principles of visualization design and the grammar of graphics as they can be applied to combining art and technology to tell data stories. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

Credit Hours: 3  
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8656: Advanced Visualization and Communication II  
Covers the Fundamental concepts of current visualization concepts and technologies, adding in Infographic and Interactive Visualization Design. Unlike many data visualization courses, this one focuses on principles of visualization design and the grammar of graphics as they can be applied to combining art & technology to tell data stories. These principles are then implemented in popular contemporary visualization technologies. Students will develop an advanced knowledge of the appropriate selection, modeling, and evaluation of data visualizations. Graded on A-F basis only.

Credit Hours: 3  
Recommended: Enrollment in NGA Training Program or instructor consent

DATA_SCI 8660: Data and Information Ethics  
Introduces the ethics related to Big Data in industry, business, academia, and research settings. Students will learn the social, ethical, legal and policy issues that underpin the big data phenomenon. Discussions and case studies will help guard against the repetition of known mistakes and inadequate preparation. The course content will follow the guidelines to be developed by the Council for Big Data, Ethics, and Society. Graded on A-F basis only.

Credit Hours: 1  
Prerequisites: DATA_SCI 7600 and DATA_SCI 8650

DATA_SCI 8680: Big Data Analysis Case Study  
Using a case-study approach, students will engage in discussions on a variety of big data topics relevant to their emphasis area and the realm of Big Data. This course will help students generate ideas and prepare them for the Big Data Capstone. Course work will be performed in small teams, mentored by faculty and/or industry advisors. Teams will research, cultivate, curate, and leverage large data sets. Students will gain hands-on experience applying relevant data science and analytical technology and techniques to gain insight and information from these real-world data sets. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: DATA_SCI 8630, DATA_SCI 8640, DATA_SCI 8650

DATA_SCI 8690: Big Data Analysis Capstone  
This course provides an opportunity for participants to tackle a real-world data science project, delivered as a problem-based exercise. Participants will perform the full data science lifecycle methodology on a relevant challenge problem as final learning activity that draws upon all the foundational data science concepts and technologies, as well as specialized technologies and concepts relative to a particular concentration area. Graded on A-F basis only.

Credit Hours: 3

DATA_SCI 8750: Parallel Computing for Data Science  
This course will provide in-depth treatment of the evolution of high performance, parallel computing architectures and how these architectures and computational ecosystems support data science. We will cover topics such as: parallel algorithms for numerical processing, parallel data search, and other parallel computing algorithms which facilitate advanced analytics. To reinforce lecture topics, learning activities will be completed using parallel computing techniques for modern multicore and multi-node systems. Parallel algorithms will be investigated, selected, and then developed for various scientific data analytics problems. Programming projects will be completed using Python and R, leveraging various parallel and distributed computing infrastructure such as AWS Elastic Map Reduce and Google Big Query. Students will research emerging parallel and scalable architectures for data analytics. Graded on A-F basis only.

Credit Hours: 5  
Prerequisites: DATA_SCI 8610, DATA_SCI 8620

Dermatology (DERM)

DERM 6047: SCC Dermatology Elective  
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology. Dermatology Clinic is an integral part of the student’s experience on this rotation. Students participate in the evaluation of patients with skin disease at a community based clinic. Students may participate in the evaluation and management of patients with complex, often serious, dermatologic conditions under the supervision of the attending physician. Students may also participate in Dermatologic inpatient consultations. Students may also assist in Dermatologic procedures.

Credit Hours: 5  
Prerequisites: Successful completion of the first two years of medical school. Successful completion of the Medicine Clerkship

DERM 6233: ABS Dermatology Research  
ABS Dermatology Research  
Credit Hours: 5

DERM 6450: Dermatology I  
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology; Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist; Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health; Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases; Learn appropriate use of both systemic and topical dermatologic medications; Learn basic punch, shave, and excisional biopsy techniques; Become proficient in skin surveillance, especially early detection of skin cancer. Students are evaluated using a standard evaluation. The student’s knowledge of subject matter is evaluated in the following settings: informal discussion during clinics, ward rounds, inpatient consultation rounds and scheduled conferences.

Credit Hours: 5  
Prerequisites: Internal Medicine Clerkship
DEDM 6750: Dermatology I - Rural
The Dermatology rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist. During the rotation the student should: Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excision biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer.

Credit Hours: 5

DEDM 6856: Dermatology II
This elective rotation is an expansion of the objective goals outlined for Dermatology I. The student is expected to expand the depth and breadth of his/her dermatology experiences and knowledge. Enhance the visual diagnostic skills and related reasoning used in dermatology. Become familiar with a select list of dermatologic conditions commonly seen and best treated by the non-dermatologist. Gain familiarity with certain dermatologic conditions which require a high index of suspicion by all physicians because of their danger to life or risks to public health. Become familiar with dermatologic treatment regimens for the non-dermatologist and guidelines for appropriate referral of cases. Learn appropriate use of both systemic and topical dermatologic medications. Learn basic punch, shave, and excisional biopsy techniques. Become proficient in skin surveillance, especially early detection of skin cancer. As Dermatology II is an extension of the Dermatology I curriculum, Dermatology II students are expected to master the above objectives. In addition, they are expected to expand their clinical skills related to the diagnosis and treatment of dermatologic diseases and they will have increased responsibilities for patient education. It is expected that they will further their surgical skills including biopsies, simple excisions, and basic cryotherapy. They will also become proficient in basic laboratory procedures including KOH and scabies prep.

Credit Hours: 5

DEDM 6901: SCC Dermatology 2-week
The two-week elective in Dermatology will allow students to participate in a wide breadth of general, pediatric, and surgical dermatology. Students will also complete the American Academy of Dermatology online student modules and the self-evaluation that is provided.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

DEDM 6910: Clinical Dermatology Elective
The 2 week elective in Dermatology will allow students to participate in a wide breadth of general, pediatric, and surgical dermatology. Students will participate in clinics and in weekly didactic sessions. Students will also complete the American Academy of Dermatology online student modules and the self-evaluation that is provided.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school. Must have completed at least 1 core clinical rotation

Diagnostic Medical Ultrasound (DMU)

DMU 1000: Introduction to Diagnostic Medical Ultrasound
Introduction to the profession of diagnostic medical ultrasound. Imaging characteristics, educational requirements, professional trends. Observation opportunities. Graded on S/U basis only.

Credit Hour: 1

Prerequisites: Departmental consent required

DMU 3313: Ultrasound Physics
Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.

Credit Hours: 3

Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 4001: Topics in Diagnostic Medical Ultrasound
Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: Restricted to Diagnostic Medical Ultrasound undergraduate students

DMU 4001W: Topics in Diagnostic Medical Ultrasound - Writing Intensive
Organized study of selected topics in medical ultrasound. Topics may vary. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: Restricted to Diagnostic Medical Ultrasound undergraduate students

DMU 4085: Problems in Diagnostic Medical Ultrasound
Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: Restricted to Diagnostic Medical Ultrasound undergraduate students only

DMU 4085W: Problems in Diagnostic Medical Ultrasound - Writing Intensive
Independent study leading to a special project or paper. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: Restricted to Diagnostic Medical Ultrasound undergraduate students only

DMU 4200: Principles of Diagnostic Medical Ultrasound
Principles and history of ultrasound, ultrasound equipment, sonographic techniques, aspects of patient care.

Credit Hours: 3

</tbody>
</table>
DMU 4941: Ultrasound Clinical I
Credit Hours: 7
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 4943: Ultrasound Clinical III
(cross-leveled with DMU 7943). Final clinical application of general medical ultrasound practicum in supervised clinical settings. Further enhancement of practice, decision making, patient handling, image processing and case studies.
Credit Hours: 6
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 4944: Vascular Ultrasound Clinical IV
(cross-leveled with DMU 7944). Application of diagnostic vascular ultrasound in supervised clinical settings: practice, decision making, patient handling and image processing.
Credit Hours: 7
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 4945: Cardiac Ultrasound Clinical V
(cross-leveled with DMU 7945). Application of ultrasonography in real clinical settings for learning, practicing and decision making regarding, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.
Credit Hours: 6
Prerequisites: DMU 4313, DMU 4315, and DMU 4944. Instructor and Departmental permission required

DMU 4946: Cardiac Ultrasound Clinical VI
(cross-leveled with DMU 7946). Further application of ultrasonography for continuation of learning, practicing and decision making, patient handling and imaging process with students supervised in a clinical setting. Graded on A-F basis only.
Credit Hours: 6
Prerequisites: DMU 4313, DMU 4315, DMU 4338 and DMU 4945. Instructor and Departmental permission required

DMU 4993: Ultrasound Clinical II
(cross-leveled with DMU 7993). Application of medical ultrasound in supervised clinical settings with practice and decision making related to ultrasound diagnosis, patient handling and imaging processing.
Credit Hours: 8
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7200: Diagnostic Medical Ultrasound Principles and Patient Care
Introduction diagnostic medical ultrasound principles including history, development, ultrasound physics - equipment fundamentals. Provides introduction to concepts of sonographic techniques, positioning, image critique, aspects of patient care and professional organizations. Graded on A-F basis only.

DMU 7234: Clinical Pathophysiology
(cross-leveled with DMU 4234). Abnormal function of organ systems in the presence of disease; clinical manifestations and medical management.
Credit Hours: 3

DMU 7309: Normal Ultrasound Clinical
(cross-leveled with DMU 4309). Integration of ultrasound instrumentation and clinical practice in a laboratory setting. Interaction between the sonographer, equipment and patient.
Credit Hours: 5
Prerequisites: admitted to the DMU program

DMU 7311: Pathological Images Ultrasound
(cross-leveled with DMU 4311). Disease presentation in ultrasound imaging. Practical aspects of ultrasound scanning techniques in pathology.
Credit Hours: 3
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7312: Sectional Anatomy
(same as RA_SCI 7110; cross-leveled with DMU 4312, RA_SCI 4110). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Graduate Diagnostic Medical Ultrasound students

DMU 7313: Ultrasound Physics
(cross-leveled with DMU 4313). Principles of diagnostic ultrasound physics. Sound wave characteristics, tissue interaction, power intensity, and Doppler physics.
Credit Hours: 3
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7314: Abdominal Ultrasound
(cross-leveled with DMU 4314). Differentiation between normal and pathological ultrasound studies of the abdomen. Differential diagnosis of pathological states.
Credit Hours: 5
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7315: Ultrasound Instrumentation
(cross-leveled with DMU 4315). Integration of ultrasound physics and instrumentation components in a laboratory setting. Practice in modes of operation and safety.
Credit Hours: 3
Prerequisites: Restricted to Diagnostic Medical Ultrasound students
DMU 7318: Gynecology Ultrasound  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7320: Obstetrics Ultrasound  
(cross-leveled with DMU 4320). Study of normal and abnormal obstetrical ultrasound anatomy. Distinction between normal and pathological OB ultrasound studies with emphasis on differential diagnosis.  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7322: Superficial Organs Ultrasound  
(cross-leveled with DMU 4322). Ultrasound evaluation and diagnosis of normal and abnormal superficial organs: thyroid gland, testes, breasts, soft tissues and musculoskeletal.  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7325: Ultrasound Clinical Pharmacology and Contrast Agents  
(cross-leveled with DMU 4325). Study of the biophysical, biochemical and complete action of ultrasound contrast agents and other drugs used in DMU and their pharmacodynamics.  
Credit Hours: 3  
Prerequisites: Restricted to Graduate Diagnostic Medical Ultrasound majors

DMU 7326: Vascular Ultrasound Physics, Instrumentation and Hemodynamics  
(cross-leveled with DMU 4326). Study of vascular principles and fundamentals including physics and instrumentation. Emphasis on ultrasound wave characteristics, Doppler principles, tissue interaction and hemodynamics.  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7330: Vascular Ultrasound Lab  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7332: Vascular Ultrasound  
(cross-leveled with DMU 4332). Vascular ultrasound for normal and pathological processes: study of disease, correlation of patients' clinical data and ultrasound findings used in differential diagnosis.  
Credit Hours: 4  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7338: Cardiac Ultrasound, Principles and Hemodynamics  
(cross-leveled with DMU 4338). Study of cardiac ultrasound fundamentals including: wave characteristics, principles of 2-D/3-D/4-D imaging, M-mode, and Doppler, cardiac anatomy and physiology, embryology, evaluation methods and hemodynamics. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7342: Adult Cardiac Ultrasound  
(cross-leveled with DMU 4342). Study of adult cardiac ultrasound for normal and pathological processes. Differential diagnosis of cardiac disease through correlation of patients' clinical data and ultrasound findings.  
Credit Hours: 5  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7345: Cardiac Ultrasound Clinical V  
(cross-leveled with DMU 4945). Application of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.  
Credit Hours: 6  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students

DMU 7346: Cardiac Ultrasound Clinical VI  
(cross-leveled with DMU 4946). Further enhancement of diagnostic cardiac ultrasound in supervised clinical settings: practice and decision making regarding echocardiography, patient handling and image processing.  
Credit Hours: 6  
Prerequisites: Restricted to Diagnostic Medical Ultrasound students
Digital Storytelling-Visual Studies (DST_VS)

DST_VS 1800: Introduction to Film Studies
(same as FILM_S 1800, ENGLSH 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound, narrative, genre, and other elements. No credit for students who have completed FILM_S 2810. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Freshmen and sophomores only or instructor's consent

DST_VS 1880: Introduction to Digital Media Production
(same as ENGLSH 1880, FILM_S 1880, ARTGE_VS 1920, COMMUN 1880). Introduction to concepts and skills for Digital Storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Enrollment limited to declared DST majors during early registration

DST_VS 2005: Topics in Digital Storytelling
Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.

Credit Hours: 3

DST_VS 2005H: Topics in Digital Storytelling - Honors
Organized study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only. Prerequisites: Honors eligibility required

Credit Hours: 3

DST_VS 2810: Story Development
(same as COMMUN 2810). In this course students will learn about storytelling across time and media, beginning with definitions and fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production. Thus, the course functions as preparation for audio-visual production courses in Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

Credit Hours: 3

DST_VS 2820: Immersive Storytelling
(same as THEATR 2220). This class introduces the student to the basic principles of immersive theatre and immersive storytelling. Students learn about the history, practice, theory, and critical issues related to immersive theatre and immersive storytelling, including performance art, environmental theatre, happenings, interactive theatre, site specific performance, installation art, video art, projection art, multimedia, intermedia, mediatization, 3D video, 360 video, augmented reality,
virtual reality, and mixed reality. Projects provide opportunities for experiences in immersive theatre and immersive storytelling.

<table>
<thead>
<tr>
<th>Credit Hours: 3</th>
<th>Recommended: DST 1880</th>
</tr>
</thead>
</table>

**DST_VS 2830: Video Art I**
Video as a fine art form intersecting with sculpture, experimental filmmaking, and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. Graded on A-F basis only.

<table>
<thead>
<tr>
<th>Credit Hours: 3</th>
<th>Prerequisites: DST 1880, FILM_S 1880, ENGLISH 1880 or ART_GNRL 1920</th>

**DST_VS 2860: Film Themes and Genres**
(same as ENGLISH 2860, FILM_S 2860). Topics (e.g. film noir, African-American filmmakers, food and film, the western) announced at time of registration.

<table>
<thead>
<tr>
<th>Credit Hours: 3</th>
<th>Prerequisites: ENGLISH 1800 or FILM_S 1800</th>
</tr>
</thead>
</table>

**DST_VS 2880: Digital Storytelling Production I**
(same as ENGLISH 2880, COMMUN 2880). Digital Storytelling Production I teaches agility with digital video technology through applied experiences. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

<table>
<thead>
<tr>
<th>Credit Hours: 3</th>
<th>Prerequisites: DST_VS 1880 or ENGLISH 1880 or FILMS_VS 1880 or ARTGE_VS 1920 or consent of instructor. Enrollment limited to declared DST majors during early registration</th>
</tr>
</thead>
</table>

**DST_VS 2885: Digital Storytelling Animation Production I**
(same as ENGLISH 2885). Introduction to all aspects of digital animation and elements of the 3D computer animation production pipeline, including story drafting and production planning, polygonal modeling and texturing, rigging, key framing, lighting, compositing rendered images, and editing into a short finished film. Graded on A-F basis only.

<table>

seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.  

Credit Hours: 3

**DST_VS 3855: Documentary Film**  
(same as ENGLISH 3855, FILM_S 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: ENGLISH 1000

**DST_VS 3860: Special Themes in Digital Storytelling**  
Themes (e.g., Indigenous digital studies, folklore and the internet) announced at time of registration. No more than six hours may be taken in the Special Themes in Digital Storytelling. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: ENGLISH 1000

**DST_VS 3880: Writing and Theory for Digital Media**  
(same as ENGLISH 3880). Writing and Theory for Digital Media teaches the skills, methods and theoretical frameworks needed to write for new media. Students will study and practice writing for web-based and digital media platforms, including short-form modes such as Twitter and various social media sites; longer-form modes such as blogs, vlogs and podcasts; and the emerging possibilities of locative and interactive media. Assignments emphasize the professional and creative possibilities of new media production. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by producers and radio historians and theorists. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: DST 1880/ENGLISH 1880/FILM_S 1880/ART_GNRL 1920 or instructor consent

**DST_VS 3885W: Audio Storytelling - Writing Intensive**  
Students in this course explore the skills, methods and theoretical frameworks needed to produce audio for new media and to understand the relationship between audio and digital culture. Students will study and practice writing and producing for web-based and digital media platforms. Assignments emphasize the professional and creative possibilities of new media production with an emphasis on audio. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by producers and radio historians and theorists. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: DST 1880/ENGLISH 1880/FILM_S 1880/ART_GNRL 1920 or instructor consent

**DST_VS 4805: Case Studies in an Inter/Multicultural World**  
(same as GERMAN 4810, PEA_ST 4810, T_A_M 4810). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the

Prerequisites: DST 1880 or ENGLISH 1880 or FILM_S 1880 or ART_GNRL 1920 or instructor consent. Enrollment limited to declared DST majors during early enrollment  
Recommended: Sophomore standing or above; ENGLISH 1000

**DST_VS 3885: Audio Storytelling**  
Students in this course explore the skills, methods and theoretical frameworks needed to produce audio for new media and to understand the relationship between audio and digital culture. Students will study and practice writing and producing for web-based and digital media platforms. Assignments emphasize the professional and creative possibilities of new media production with an emphasis on audio. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by producers and radio historians and theorists. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: DST 1880/ENGLISH 1880/FILM_S 1880/ART_GNRL 1920 or consent of instructor

**DST_VS 4005: Topics in Digital Storytelling**  
Advanced study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.  

Credit Hours: 3

**DST_VS 4005W: Topics in Digital Storytelling - Humanities - Writing Intensive**  
Advanced study of selected topics in Digital Storytelling. Subject may vary from semester to semester. May be repeated with consent of instructor. Graded on A-F basis only.  

Credit Hours: 3  
Recommended: Sophomore standing

**DST_VS 4810: Writing and Theory for Digital Media**  
(same as ENGLISH 3880). Writing and Theory for Digital Media teaches the skills, methods and theoretical frameworks needed to write for new media. Students will study and practice writing for web-based and digital media platforms, including short-form modes such as Twitter and various social media sites; longer-form modes such as blogs, vlogs and podcasts; and the emerging possibilities of locative and interactive media. Assignments emphasize the professional and creative possibilities of new media production. In addition to the hands-on creation of audio for radio, podcast, as well as screen-based, networked, and hybrid forms of digital media, students will also read, discuss, and write about work by new media theorists. Graded on A-F basis only.  

Credit Hours: 3  
Prerequisites: DST 1880/ENGLISH 1880/FILM_S 1880/ART_GNRL 1920 or instructor consent
seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing

DST_VS 4810: Film Theory
(same as ENGLISH 4810, FILM_S 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, post colonialism, among others.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800; junior standing

DST_VS 4830: Video Art II
Video as a fine art form intersecting with sculpture, experimental filmmaking, and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create more advanced video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. Projections and video installation works will be emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: DST 1880, FILM_S 1880, ENGLISH 1880 or ART_GNRL 1920 and DST 2830 or ART_GNRL 4030

DST_VS 4840: Culture and Media
(same as ENGLISH 4840, FILM_S 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800; junior standing or instructor's consent required

DST_VS 4880: Digital Storytelling Production II
(same as ENGLISH 4880, COMMUN 4880). Digital Storytelling Production II introduces students to advanced techniques in digital storytelling production, while further developing skills in script writing, storyboard, Adobe Premiere Pro, and video production with DSLR cameras. Assignments in digital video production emphasize how video narratives are created and how images and audio enhance the structure, mood, and theme of the narrative. Instruction will focus on planning a video production and developing the tools and practices in lighting, sound recording, image capturing, and editing. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and DST VS 1880 or ENGLISH 1880 or FILMS VS 1880 or ART_GE 1920 and DST VS 2880 or ENGLISH 2880 and sophomore standing, or consent of instructor. Enrollment is limited to declared DST majors during early registration

DST_VS 4885: Digital Storytelling Animation Production II
Advanced instruction in various aspects of digital animation and elements of the 3D computer animation production pipeline, including story drafting and production planning, polygonal modeling and texturing, rigging, key framing, lighting, compositing rendered images, and editing into a short finished film. Graded on A-F basis only.

Credit Hours: 3

DST_VS 4930: Digital Storytelling Practicum
This course provides an opportunity for experiential learning in digital storytelling practice. Students will receive hands-on training through an intensive master class. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: Instructor's consent

DST_VS 4940: Digital Storytelling Internship
Students work in an agency or institution using their digital storytelling skills for one to three credit hours. Graded on an S/U basis only.

Credit Hour: 1-3
Prerequisites: Program consent

DST_VS 4955: Independent Research in Digital Storytelling
Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Instructor consent required

DST_VS 4970: Digital Storytelling Capstone
For students in their senior year who have completed the core requirements for the Digital Storytelling program, this course focuses on advanced studies in the field and a major project involving the processes of selection, research, and production or writing leading to its completion. May include a professional component. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: DST 1880, and DST 2880 or DST 2885, and DST 4880 or DST 4885

Economics (ECONOM)

ECONOM 1000: General Economics
One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Includes applications for Journalism students. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and, ECONOM 1015 or AG_EC 1041 and AG_EC 1042. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: Open only to majors in Education, Health Professions, Human Environmental Science and Journalism (including Journalism pre-majors)

ECONOM 1014: Principles of Microeconomics
A broad survey of microeconomics, from the basic market model and its many applications to market failures and policy responses. Topics include potential trade offs between efficiency and equity in competition and
trade policy; determinants of wage differentials, poverty and inequality; and evaluation of the benefits and costs of government interventions in markets. Not open to students who have completed ECONOM 1000, ECONOM 1024 or ECONOM 1051.

Credit Hours: 3
ECONOM 1014 - MOTR ECON 102: Introduction to Microeconomics

ECONOM 1014H: Principles of Microeconomics-Honors
A broad introduction to microeconomics that is similar in coverage to ECONOM 1014, but with a more rigorous and quantitative approach. Not open to students who have completed ECONOM 1000, ECONOM 1024, or ECONOM 1051. Math Reasoning Proficiency Course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required and a grade of "C" or higher in MATH 1050, MATH 1100, or equivalent

ECONOM 1015: Principles of Macroeconomics
An introduction to the study of how macroeconomic forces and public policy affect the welfare of a nation. Topics include understanding the business cycle, economic growth, inflation, interest rates, and unemployment, as well as the effects of fiscal and monetary policy. Not open to students who have completed ECONOM 1000 or ECONOM 1051. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024
ECONOM 1015 - MOTR ECON 101: Introduction to Macroeconomics

ECONOM 1015H: Principles of Macroeconomics - Honors
A broad introduction to macroeconomics that is similar in coverage to ECONOM 1015, but with a more rigorous approach. Not open to students who have completed ECONOM 1000 or ECONOM 1051. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or equivalent; Honors eligibility required

ECONOM 1024: Fundamentals of Microeconomics
This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in microeconomics. It uses college algebra and simple geometric concepts to describe the behavior of economic units, such as consumers, firms and resource owners, and to depict their interaction through production and exchange in perfect and imperfect markets. Not open to students who have completed ECONOM 1000, ECONOM 1014, or ECONOM 1051. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites: A grade of "C" or higher in MATH 1050, MATH 1100 or the equivalent

ECONOM 1025: Fundamentals of Macroeconomics
This course uses mathematical reasoning to provide an elementary quantitative introduction to fundamental concepts in macroeconomics. It uses college algebra and simple geometric concepts to analyze the source of economic growth and fluctuations. Not open to students who have completed ECONOM 1000, ECONOM 1015, or ECONOM 1051. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024; and a grade of "C" or better in MATH 1050, MATH 1100 or equivalent

ECONOM 1051H: General Economics - Honors
One semester course covering similar material as covered in ECONOM 1014 and ECONOM 1015. Topics include opportunity costs, gains from trade, efficiency and markets, non-competitive markets, game theory, government spending and taxation, economic growth, monetary and fiscal policy, unemployment and inflation, exchange rates. Not open to students who have completed ECONOM 1014 or ECONOM 1024 and ECONOM 1015. Math Reasoning Proficiency Course.

Credit Hours: 5
Prerequisites: Honors eligibility required and C- or higher in MATH 1050 or MATH 1100

ECONOM 2004: Undergraduate Topics in Economics - Social Science
Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3
Prerequisites: instructor's consent

ECONOM 2004H: Undergraduate Topics in Economics - Social Science - Honors
Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3
Prerequisites: instructor's consent; honors eligibility required

ECONOM 2004W: Undergraduate Topics in Economics - Social Science - Writing Intensive
Organized study of selected topics in Economics; applied or theoretical economics; covers subjects not included in regularly offered courses.

Credit Hour: 1-3
Prerequisites: instructor's consent

ECONOM 3224: Introduction to International Economics
A topical course which emphasizes the application of basic economic analysis to real and current international economic issues. Topics include free trade, protectionism, free trade areas, multilateral trade negotiations, trade and development, exchange rates, the International Monetary System, and economic integration.

Credit Hours: 3
Prerequisites: ECONOM 1000, ECONOM 1014, ECONOM 1024 or ECONOM 1051

ECONOM 3229: Money, Banking and Financial Markets
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1000, or ABM 1041 with a minimum grade of C-

ECONOM 3229H: Money, Banking and Financial Markets - Honors
Operation of the U.S. financial and economic system. Covers interest rates, banking regulation, the money supply process and the conduct of the Federal Reserve, inflation and the macroeconomy, exchange rates and the international financial system, rational expectations, and efficient markets.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1000, or ABM 1041 with a minimum grade of C-

ECONOM 3251: Theory of the Firm
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Topics include the economics of the firm in the context of partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition as well as game theory. No credit for students who have completed ECONOM 4351.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1000) and MATH 1400, or equivalent. Not open to economics majors

ECONOM 3232: Capitalism, Democracy and Society
This is a one-credit seminar course for students interested in careers involving social science research and analysis; topics covered will be a selection of classic and contemporary debates in the social sciences.
Credit Hour: 1
Prerequisites: ECONOM 1014 and ECONOM 1015, or ECONOM 1051

ECONOM 3940: Internship
Internship experience for students interested in economics. Supervised internship work with approval of Director of Undergraduate Studies and academic adviser. Graded on S/U basis only.
Credit Hours: 1-3
Prerequisites: ECONOM 1014 or ECONOM 1015

ECONOM 4004: Topics in Economics- Social Science
Study in applied or theoretical economics; covers subjects not included in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 4004W: Topics in Economics- Social Science - Writing Intensive
Study in applied or theoretical economics; covers subjects not included in regularly offered courses.
Credit Hour: 1-3
Prerequisites: instructor’s consent

ECONOM 4311: Labor Economics
(cross-leveled with ECONOM 7311). Surveys theoretical explanations of wage and employment determination in contemporary labor markets.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4311W: Labor Economics - Writing Intensive
Surveys theoretical explanations of wage and employment determination in contemporary labor markets.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4315: Public Economics
(cross-leveled with ECONOM 4315). Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4315W: Public Economics - Writing Intensive
Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4317: Urban Economics
(cross-leveled with ECONOM 7317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4317W: Urban Economics - Writing Intensive
(cross-leveled with ECONOM 7317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4320: History of Economic Thought
(cross-leveled with ECONOM 7320). Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1051

ECONOM 4320W: History of Economic Thought
Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024) and ECONOM 1015, or ECONOM 1051

ECONOM 4326: Economics of International Trade
(cross-leveled with ECONOM 7326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4326W: Economics of International Trade - Writing Intensive
(cross-leveled with ECONOM 7326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with less developed countries and the trade effects of economic growth.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4329: The Banking System and the Money Market
(cross-leveled with ECONOM 7329). Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1000

ECONOM 4329W: The Banking System and the Money Market - Writing Intensive
Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.

Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1001

ECONOM 4351: Intermediate Microeconomics
(cross-leveled with ECONOM 7351). Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1000) and MATH 1400 or equivalent

ECONOM 4351H: Intermediate Microeconomics - Honors
Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed ECONOM 3251.

Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 or ECONOM 1001, and MATH 1400, or equivalent. Honors eligibility required

ECONOM 4353: Intermediate Macroeconomics
(cross-leveled with ECONOM 7353). The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.

Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1000, and MATH 1400 or equivalent

ECONOM 4355: Industrial Organization and Competitive Strategy
(cross-leveled with ECONOM 7355). Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.

Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 4355W: Industrial Organization and Competitive Strategy - Writing Intensive
Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition,
collusion, price discrimination, product differentiation, advertising, entry and exit.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351

---

**ECONOM 4357: Health Economics**  
(cross-leveled with ECONOM 4357, PUB_AF 4357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351 and STAT 2500, or equivalent

---

**ECONOM 4357W: Health Economics - Writing Intensive**  
Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine and health care reform.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351 and STAT 2500, or equivalent

---

**ECONOM 4367: Law and Economics**  
(cross-leveled with ECONOM 7367, PUB_AF 7367). This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

---

**ECONOM 4367W: Law and Economics - Writing Intensive**  
This course is a survey of economic analyses of American legal institutions. Students will apply basic microeconomics, game theoretic and statistical concepts to the study of property, contracts, torts, the legal process, crime, and the judiciary.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

---

**ECONOM 4370: Quantitative Economics**  
(cross-leveled with ECONOM 7370). The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.

**Credit Hours:** 3  
**Prerequisites:** MATH 1300 and MATH 1400 or MATH 1500 or equivalent

---

**ECONOM 4371: Introductory Econometrics**  
(cross-leveled with ECONOM 7371). Study methods for quantitative analysis of economic data. Estimation techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 3251 or ECONOM 4351, and STAT 2500, or equivalent

---

**ECONOM 4385: Problems in Economics**  
Development of a carefully considered research project under close supervision of a faculty member. Credit arranged by instructor.

**Credit Hour:** 1-3  
**Prerequisites:** ECONOM 4351, ECONOM 4371, and instructor’s consent. Not open to non-majors

---

**ECONOM 4775: Dynamic Optimization and its Applications to the Natural Sciences and Economics**  

**Credit Hour:** 1-3  
**Prerequisites:** ECONOM 4370 or instructor’s consent

---

**ECONOM 4940: Internship in Economics**  
Internship experience for Economics majors. 40 hours of supervised internship work with approval of Director of Undergraduate Studies and academic advisor. Graded on S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** C or higher in ECONOM 4351 and ECONOM 4371; Declared economics majors who have a minimum overall CUM GPA of 2.75 and have junior or senior standing  
**Recommended:** Students must have completed at least 15 credit hours at MU

---

**ECONOM 4965: Independent Study in Economics**  
Individual work, with conferences adjusted to needs of student.

**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

---

**ECONOM 4970: Senior Seminar in Economics**  
Seminar for graduating seniors who are majoring in economics. Multiple writing assignments will emphasize synthesis of theoretical, empirical, and institutional economics. Not open to non-majors.

**Credit Hours:** 3

---

**ECONOM 4995: Honors Thesis**  
Not open to non-majors. Capstone course required for Economics honors students.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 4351
ECONOM 7001: Topics in Economics - General
Study in applied or theoretical economics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: instructor's consent

ECONOM 7311: Labor Economics
(cross-leveled with ECONOM 4311). Surveys theoretical explanations of wage and employment determination in contemporary labor markets.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351

ECONOM 7315: Public Economics
(cross-leveled with ECONOM 4315). Analyzes economic effects of government expenditures, taxes and debt. Expenditure and taxation principles, tax reform, cost-benefit analysis, fiscal policy.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351

ECONOM 7317: Urban Economics
(cross-leveled with ECONOM 4317). This is a class in urban economics. Topics covered include: formation of cities, land markets, housing markets, economics of transportation and commuting, cities as engines of growth and issues affecting cities such as crime, poverty and migration. Graded on A-F basis only.
Credit Hours: 3

ECONOM 7320: History of Economic Thought
(cross-leveled with ECONOM 4320). Origins of modern economic thought in the context of social and intellectual environment of the time in which they originated, their contribution to their period and to modern thought.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024 and ECONOM 1015 or ECONOM 1051H

ECONOM 7326: Economics of International Trade
(cross-leveled with ECONOM 4326). The microeconomic theory of international trade. Topics include comparative advantage, the theory of commercial policy, economic integration, trade with LDC's and the trade effects of economic growth.
Credit Hours: 3
Prerequisites: ECONOM 7351 or instructor's consent

ECONOM 7329: The Banking System and the Money Market
(cross-leveled with ECONOM 4329) Organization of the money market; credit control procedures and aims, effect of bank expansion and contraction on money market and national income deregulation.
Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1051

ECONOM 7340: Introduction to Game Theory
(cross-leveled with ECONOM 4340). An introduction to the theory of games, viewed as a set of tools used widely in economics to study situations in which decision-makers (consumers, firms, governments, etc.) interact. The course introduces the basic theory, emphasizing the concepts and their economic applications.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351 or instructor's consent

ECONOM 7345: Economics of Education
(cross-leveled with ECONOM 4345). Economic theory is used to analyze the market for educational services and education policy. Topics include: human capital theory, cost and performance measures for public and private schools, market based approaches to school reform, school finance, higher education cost and access.
Credit Hours: 3
Prerequisites: ECONOM 1014 or ECONOM 1024, or ECONOM 1051H and ECONOM 4371 or equivalent

ECONOM 7351: Intermediate Microeconomics
(cross-leveled with ECONOM 4351). Theory of rational behavior in consumption, production, and pricing decisions of households and firms. Partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition. A brief introduction to general equilibrium and welfare economics is provided. Calculus is employed. No credit for students who have completed 3251.
Credit Hours: 3
Prerequisites: (ECONOM 1014 or ECONOM 1024 or ECONOM 1051) and MATH 1400 or equivalent

ECONOM 7353: Intermediate Macroeconomics
(cross-leveled with ECONOM 4353). The study of the structure and performance of national economics. Topics include: long-term economic growth, aggregate economic fluctuations, unemployment, and inflation; consequences for national economies of being part of the global economic system; government policies and macroeconomic performance.
Credit Hours: 3
Prerequisites: ECONOM 1015 or ECONOM 1051 and MATH 1400 or equivalent

ECONOM 7355: Industrial Organization and Competitive Strategy
(cross-leveled with ECONOM 4355). Analyzes the structure of industry, its impact on the operations of the firm and significance for public policy. The focus is on strategic interaction among firms with market power. Topics include oligopoly, competition, collusion, price discrimination, product differentiation, advertising, entry and exit.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 7351 or ECONOM 1015 or ECONOM 1051

ECONOM 7357: Health Economics
(same as PUB_AF 7357; cross-leveled with ECONOM 4357). Analyzes the economics of health care in the United States with particular attention paid to the role of government. It examines the demand for health care and the structure and consequences of public and private health insurance; the supply of health care, including professional training, licensure, specialization and compensation, hospital competition and finance, and the determinants and consequences of technical change in medicine; and examination of recent proposals and initiatives for health care reform.
Credit Hours: 3
Prerequisites: STAT 2500 and ECONOM 4351

ECONOM 7361: Comparative Economic Systems
(cross-leveled with ECONOM 4361). Study of capitalism, market socialism, and central planning.
Credit Hours: 3
Prerequisites: ECONOM 3229 and ECONOM 3251 or ECONOM 4351

ECONOM 7370: Quantitative Economics
(cross-leveled with ECONOM 4370). The aim of this course is to provide an introduction to the mathematical language of economic theory. Topics include linear models, matrix algebra, rules of differentiation and comparative static analysis, optimization.
Credit Hours: 3
Prerequisites: MATH 1300 and MATH 1400 or MATH 1500 or equivalent

ECONOM 7371: Introductory Econometrics
(cross-leveled with ECONOM 4371). Study methods for quantitative analysis of economic data. Estimating techniques, tests of significance, prediction and forecasting reviewed with respect to problems presented by economic data and information demands of economic decision models.
Credit Hours: 3
Prerequisites: ECONOM 3251 or ECONOM 4351 and STAT 2500 and MATH 1320 or instructor's consent

ECONOM 7775: Dynamic Optimization and its Applications to the Natural Sciences and Economics
Credit Hour: 1-3
Prerequisites: ECONOM 7370 or instructor's consent

ECONOM 8001: Topics in Economics- General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hours: 3
Prerequisites: instructor's consent

ECONOM 8085: Problems in Economics
Graduate students may select topics for study and investigation subject to approval by supervising faculty.
Credit Hour: 1-99

ECONOM 8340: Game Theory
Game theory is the study of strategic behavior by agents who perceive themselves as "large" relative to the market and who therefore consider the effect of their behavior on others. This course examines the rigorous theory of strategic interaction of rational agents. May be repeated for credit.
Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8370: Mathematics for Economics
The aim of this course is to cover essential mathematics used in economics. Topics include introductory linear algebra, multivariate calculus, comparative statics analysis, unconstrained optimization, and equality constrained optimization. May be repeated for credit.
Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent; MATH 1320 or equivalent. Graded on A-F basis only

ECONOM 8413: Research Workshop I
Required course for economics MA students. Combines instruction, student presentations, and seminar participation to introduce research methods and practice. A major research paper are required.
Credit Hours: 3
Prerequisites: ECONOM 8451, ECONOM 8453, and ECONOM 8473 or instructor's consent

ECONOM 8451: Microeconomic Theory
MA-level course in microeconomic theory. The course relies extensively on calculus to survey theories of: rational behavior in consumption, production, and pricing decisions of households and firms; partial equilibria in product and factor markets under competition, monopoly, oligopoly and monopolistic competition; and general equilibrium and welfare.
Credit Hours: 3

ECONOM 8453: Macroeconomic Theory
Basic models in macroeconomics will be covered with emphasis on assumptions and on how hypotheses can be tested. Course is an introductory survey for students intending to develop ability for research in macroeconomics.
Credit Hours: 3
Prerequisites: ECONOM 4353 or equivalent; at least concurrent enrollment in ECONOM 8451. Instructor's consent required for non graduate level students

ECONOM 8472: Econometric Methods I
Familiarizes students with fundamental techniques found and used in applied economic research. Topics include: ordinary least squares, generalized least square, instrumental variables, maximum likelihood estimation, and generalized methods of moments.
Credit Hours: 3
Prerequisites: STAT 7710 or instructor's consent

ECONOM 8473: Applied Econometrics
Topics include: nonlinear least squares, numerical optimization, maximum likelihood and basic panel data and time series methods. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECONOM 7371 and MATH 7140 or equivalent, or instructor's consent

ECONOM 9001: Topics in Economics
Selected current topics in economics.

</thead>
<tbody>
<tr>
<td>ECON 9085</td>
<td>Problems in Economics</td>
<td>Graduate students may select topics for study and investigation subject to approval by supervising faculty.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>ECON 9090</td>
<td>Research in Economics</td>
<td>Thesis research for Ph.D. degree. Graded on a S/U basis only.</td>
<td>1-99</td>
<td></td>
</tr>
<tr>
<td>ECON 9413</td>
<td>Research Workshop II</td>
<td>Introduces doctoral students to practices of preparing scholarly economic research by moving through the process of selecting a topic, identifying relevant literature, and communicating results. Graded on A-F basis only.</td>
<td>1-3</td>
<td>Prerequisites: ECONOM 9452, ECONOM 9454 and ECONOM 9474; PhD standing</td>
</tr>
<tr>
<td>ECON 9430</td>
<td>Advanced Money and Banking</td>
<td>The working and structure of institutional arrangements, welfare aspects of structural policies, operation of money and credit markets, and behavior of returns on assets.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9452 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9431</td>
<td>Central Banking Policies</td>
<td>Examines central banking procedures, policies and the role they play in maintaining economic stability. Special attention to connection of Federal Reserve System with money and capital markets.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9452 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9446</td>
<td>Advanced Empirical Methods</td>
<td>Empirical and modeling techniques for evaluation of microeconomic policy questions.</td>
<td>3</td>
<td>Prerequisites: ECONOM 8451, ECONOM 8473</td>
</tr>
<tr>
<td>ECON 9447</td>
<td>Topics in Microeconomic Policy Analysis</td>
<td>(same as PUB_AF 9447). Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics.</td>
<td>3</td>
<td>Prerequisites: ECONOM 8451, ECONOM 8473</td>
</tr>
<tr>
<td>ECON 9451</td>
<td>Advanced Microeconomic Theory I</td>
<td>The theory of rational behavior and partial equilibrium in markets. Topics include consumer behavior, theory of the firm, decisions making under uncertainty, perfect competition, monopoly and monopsony, and imperfect competition. Graded on A/F basis only.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9451 or instructor's consent; PhD standing</td>
</tr>
<tr>
<td>ECON 9452</td>
<td>Advanced Microeconomic Theory II</td>
<td>Survey of equilibrium theory and market failures in economics. Topics include the structure and modeling of games, and cooperative and non-cooperative equilibrium concepts.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9451 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9453</td>
<td>Advanced Macroeconomic Theory I</td>
<td>Aggregate models of life-cycle microfoundations, of macroeconomics fluctuations and growth. Graded on A-F basis only.</td>
<td>3</td>
<td>Prerequisites: departmental consent; PhD standing</td>
</tr>
<tr>
<td>ECON 9454</td>
<td>Advanced Macroeconomic Theory II</td>
<td>Analyzes topics in income analysis, including capital theory and economic dynamics.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9453 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9455</td>
<td>Monopoly and Competition</td>
<td>A survey of the theoretical and empirical literature on the organization of industries. Includes study of monopolized markets, competitive markets, and strategic interaction among firms in imperfectly competitive markets. Both the rationale and practice of anti-trust policy are studied.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9452 and ECONOM 9471 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9457</td>
<td>Computational Economics</td>
<td>Covers numerical and computational methods to solve economic models at the research frontier. Emphasis is on practical applications to prepare students for independent research. Graded on A-F basis only.</td>
<td>3</td>
<td>Prerequisites: ECONOM 8451 and ECONOM 8453 and ECONOM 8472</td>
</tr>
<tr>
<td>ECON 9471</td>
<td>Advanced Game Theory</td>
<td>Presents core concepts in game theory and illustrates their uses with a range of applications.</td>
<td>3</td>
<td>Prerequisites: ECONOM 9452 or instructor's consent</td>
</tr>
<tr>
<td>ECON 9472</td>
<td>Econometric Theory I</td>
<td>Analysis of linear regression models from an advanced statistical perspective.</td>
<td>3</td>
<td>Prerequisites: Department consent required</td>
</tr>
</tbody>
</table>
ECONOM 9473: Econometric Theory II
Analysis of nonlinear regression models and other essential econometric tools not covered in ECONOM 9472 from an advanced statistical perspective.
Credit Hours: 3
Prerequisites: ECONOM 9472 or instructor's consent

ECONOM 9474: Advanced Topics in Econometrics I
Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically time series analysis. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECONOM 9473 or instructor's consent

ECONOM 9476: Advanced Topics in Econometrics II
Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically microeconometrics.
Credit Hours: 3
Prerequisites: ECONOM 9473 or instructor's consent

ECONOM 9477: Advanced Topics in Econometrics III
Equips students with some essential tools for conducting publishable econometric research. Topics at the discretion of the instructor - typically the second semester of a two-semester time series sequence beginning with ECONOM 9474 or a two-semester microeconometrics sequence beginning with ECONOM 9476.
Credit Hours: 3
Prerequisites: ECONOM 9473 or instructor's consent

Education Honors (EDUC_H)

EDUC_H 4996H: Undergraduate Reading Honors
This course is designed to introduce students to a variety of readings from a broad array of research, historical, contemporary and philosophical documents and writings. Selection of topics and additional readings are determined by the faculty instructor for the course. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent; Honors eligibility required

EDUC_H 4997H: Honors Undergraduate Seminar I
This class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The cumulating assignment for the class is a proposal for a research poster or presentation to be presented at the undergraduate research fair held each year in May. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: instructor's consent; Honors eligibility required

EDUC_H 4998H: Honors Undergraduate Seminar II
The class will consist of a 1 credit hour seminar. The class is designed to allow undergraduates to develop the skills necessary to engage in practical research for application within the field of teaching and education. The cumulating assignment for the class is the production of a research poster or presentation at the undergraduate research fair held each year in May. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: instructor's consent; GPA of 3.5 or higher. Honors eligibility required

EDUC_H 4999H: Honors Undergraduate Research Seminar
This will be offered over 2 academic semesters and will consist of a 1-2 credit hour lab each semester with a College of Education faculty member working on an undergraduate research project. This course is designed as part of the Honors sequence. Graded on A-F only.
Corequisites: EDUC_H 4997H and EDUC_H 4998H
Credit Hour: 1-2
Prerequisites: instructor's consent; Honors eligibility required

Educational Leadership and Policy Analysis (ED_LPA)

ED_LPA 3100: Foundations of Education
Focus on developing a theoretical and conceptual knowledge of leadership. In addition, skill building-exercises will take place through group case studies and role playing exercises allowing each student to identify and achieve methods for personal development.
Credit Hour: 1-3

ED_LPA 4060: Inquiring into Schools, Community and Society II
(same as ED_LPA 7060). Required 3 hour course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts.
Credit Hours: 3
Prerequisites: LTC 2040

ED_LPA 4100: ELPA Undergraduate Seminar
Seminar in ELPA on a special topic. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 4115: Introduction to Learning Spaces
(cross-leveled with ED_LPA 7115). Learning takes place in a variety of settings beyond the classroom. This course highlights the teaching and learning at play within professional, community, educational, and organizational spaces. Students will explore the interaction between individuals and their learning environments to determine how the learning environments vary based upon how the organization transmits knowledge and the opportunities that individuals have within the environment for understanding. Graded on A-F basis only.
Credit Hours: 3
ED_LPA 4428: Curriculum Leadership  
(cross-leveled with ED_LPA 7428). This course is a study of research, theory, and skills necessary for curriculum leadership in educational organizations. This course includes generic curriculum management processes, design trends, controversial curriculum, issues, multimedia, innovative instructional techniques, and program evaluation. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 4481: Undergraduate Administrative Internships  
(cross-leveled with ED_LPA 7481). These administrative internships are designed for students in the Bachelor's of Educational Studies (BES) degree program and those students who are a part of the Dean of Students Internship Program. It may also serve as an elective for any undergraduate student at the University of Missouri. The intent of this course is to integrate practice, theory, and ethical standards within a supervised education setting called an internship. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.  
Credit Hours: 3  
Prerequisites: departmental consent required

ED_LPA 4975: Educational Studies Senior Capstone  
The senior capstone course is designed to allow a rigorous and in depth study area of inquiry within the field of education. The area of inquiry is cumulative and includes critical analysis and theoretical and/or pragmatic integration of scholarly materials. The course of study is individualized under the guidance of a faculty member. Graded on A-F basis only.  
Credit Hours: 3  
Recommended: Senior Standing, 90+ credit hours, Bachelor of Educational Studies major

ED_LPA 7060: Inquiring into Schools, Community and Society II  
(same as ED_LPA 4060). Required 3 hours course for students pursuing teacher certification. Designed to transition students into the teaching internship through study of teacher roles, school organizations and cultures, and community contexts. Prerequisites: LTC 2040 and LTC 7040  
Credit Hours: 3

ED_LPA 7115: Introduction to Learning Spaces  
(cross-leveled with ED_LPA 4115). Learning takes place in a variety of settings beyond the classroom. This course highlights the teaching and learning at play within professional, community, educational, and organizational spaces. Students will explore the interaction between individuals and their learning environments to determine how the learning environments vary based upon how the organization transmits knowledge and the opportunities that individuals have within the environment for understanding. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7428: Curriculum Leadership  
(cross-leveled with ED_LPA 4428). A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7439: Applying Higher Education Research to Practice  
This course introduces quantitative, qualitative, and mixed within a student affairs context. Students will become familiar with, and able to critique research. Course graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7452: Overview of Higher Education  
This course provides an overview of American Higher education. Emphasis is placed on how these institutions currently operate and what issues dominate current discussions of academe. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7458: Sociology of Education  
(same as SOCIOL 7410; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.  
Credit Hours: 3  
Prerequisites: SOCIOL 1000 or equivalent

ED_LPA 7481: Graduate Administrative Internships  
(cross-leveled with ED_LPA 4481). For students pursuing the MEd with a concentration in Student Affairs Leadership, the Council for the Advancement of Standards in Higher Education requires students to complete 300 hours of practical experience. To meet this requirement, students must take a 150-hour internship course and either work in a higher education position or have an assistantship. If students are not working in higher education during their academic program, they must complete a second 150-hour internship course. The base time commitment is one credit for 50 clock hours of internship experience. This course may also serve as an elective for graduate students from around the university, and particularly those in the Higher Education Administration graduate certificate and the MEd with a concentration in Higher Education Leadership. The intent of this course is to integrate professional practice, theory, and ethical standards within a supervised student affairs leadership setting called an internship. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.  
Credit Hours: 3  
Prerequisites: departmental consent

ED_LPA 7497: Educational Studies Senior Capstone  
The senior capstone course is designed to allow a rigorous and in depth study area of inquiry within the field of education. The area of inquiry is cumulative and includes critical analysis and theoretical and/or pragmatic integration of scholarly materials. The course of study is individualized under the guidance of a faculty member. Graded on A-F basis only.  
Credit Hours: 3  
Recommended: Senior Standing, 90+ credit hours, Bachelor of Educational Studies major

ED_LPA 7498: Administrative Internships  
(cross-leveled with ED_LPA 4481). For students pursuing the MEd with a concentration in Student Affairs Leadership, the Council for the Advancement of Standards in Higher Education requires students to complete 300 hours of practical experience. To meet this requirement, students must take a 150-hour internship course and either work in a higher education position or have an assistantship. If students are not working in higher education during their academic program, they must complete a second 150-hour internship course. The base time commitment is one credit for 50 clock hours of internship experience. This course may also serve as an elective for graduate students from around the university, and particularly those in the Higher Education Administration graduate certificate and the MEd with a concentration in Higher Education Leadership. The intent of this course is to integrate professional practice, theory, and ethical standards within a supervised student affairs leadership setting called an internship. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.  
Credit Hours: 3  
Prerequisites: departmental consent

ED_LPA 7499: Sociology of Education  
(same as SOCIOL 7410; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity and gender; social change, educational policy, and organizational dynamics; higher education and the economy.  
Credit Hours: 3  
Prerequisites: SOCIOL 1000 or equivalent

ED_LPA 7500: Introduction to Learning Spaces  
(cross-leveled with ED_LPA 4115). Learning takes place in a variety of settings beyond the classroom. This course highlights the teaching and learning at play within professional, community, educational, and organizational spaces. Students will explore the interaction between individuals and their learning environments to determine how the learning environments vary based upon how the organization transmits knowledge and the opportunities that individuals have within the environment for understanding. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7501: Curriculum Leadership  
(cross-leveled with ED_LPA 4428). A study of research, theory, and skills necessary for curriculum leadership in educational organizations. Course includes generic curriculum management processes, design trends, controversial issues multi-media, innovative instructional techniques, and program evaluation. Graded on A-F basis only.  
Credit Hours: 3

ED_LPA 7502: Developing Learning Spaces  
(cross-leveled with ED_LPA 4116). Students will explore how to create learning spaces. Specific activities during the internship may vary greatly from one field placement to another in that different students may have different learning needs and desires, and different settings will offer different learning opportunities. In some circumstances and situations, an off-campus/off-site setting for an internship is also possible. The course may be repeated depending on student interests, internship site availability, and additional experiences needed by the student. Graded on S/U basis only.  
Credit Hours: 3  
Prerequisites: departmental consent
ED_LPA 8409: Learning, Curriculum and Assessment for School Leaders
Addresses assessment, learning and curriculum and the integration of the instructional and assessment processes. Topics include authentic assessment, curriculum alignment, cognition and learning, instructional approaches, and application of student learning theory to the curriculum.
Credit Hours: 3

ED_LPA 8410: Learning Cultures
Integrates the themes of building a common purpose to enhance school culture, empowering teachers and students, and diversity. Topics include importance of shared mission and vision, the use of group processes and collaboration, the intricacies of school culture, and ethical and moral leadership.
Credit Hours: 3

ED_LPA 8411: Professional Development for Learning
Focuses on the professional development and reflection on practice. Topics include organizational actions and personal responsibility, life-long learning, and public education in a democratic society.
Credit Hours: 3

ED_LPA 8412: School Improvement
This course addresses the topics of organizational management and personal inquiry. It covers issues such as organizational effectiveness, organizing for an effective school environment, legal and fiscal decision-making and responsibilities of school leaders, creating an environment where stakeholders acquire and utilized data to inform decisions and practice, and where action research methods are utilized to evaluate and inform practice.
Credit Hours: 3

ED_LPA 8416: Foundations of School Leadership
School leader knowledge of student learning theory and related instructional practices is the focus of this course. The problem-based learning format will include topics on school culture, leadership communication, technology, and conflict resolution. Issues concerning professional relationships are also addressed.
Credit Hours: 3

ED_LPA 8417: Site-Level Organization and Leadership
Student will study state and national regulations that affect Missouri school policies. The student will develop a database on various legal issues. A study of middle level education will conclude with on-site evaluation of a local middle school.
Credit Hours: 3

ED_LPA 8418: Supervision for Learning Environments
Students are prepared to articulate, recognize, and support classroom practices that reflect the most current principles of learning. Effective instructional strategies that link this knowledge to practice will be entered into a computer database.
Credit Hours: 3

ED_LPA 8419: Structures and Processes for Effective Schools
Emphasis is placed on the Missouri Comprehensive Guidance Program and positive strategies for working with challenging students. A continuation of the study of state and national legal and policy issues will focus on special programs and services.
Credit Hours: 3

ED_LPA 8423: Advanced Leadership for Learning Environments
Students will demonstrate their understanding of instructional improvement for all teachers and students by designing and defending a comprehensive strategy for instructional changes in a simulated school. The ongoing study of learning principles and effective instructional practices will be concluded.
Credit Hours: 3

ED_LPA 8424: Education Politics and Policymaking
This course examines the politics and policymaking process of education in the United States, paying particular attention to the influence of various institutions and actors at local, state, and federal levels. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8430: School Law and Finance for Principal Leadership
Designed to engage learners in examination of the legal (judicial and legislative)system, school law, and finance policies that govern public schools and their fiscal resources in the United States and the State of Missouri. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8431: Leadership for Data-Driven Change
This course instructs school leaders on how to use data for school improvement. Students will: identify reliable sources of data; develop, implement, and monitor strategic School Improvement Plans using data; analyze data using technology; and describe evidence-based strategies that respond to data analysis. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 8653: Education Toward Bi/Multilingualism: Theory, Policy, and Practice
(same as LTC 8653). Overview of the theory, policy, and practice of using at least two languages in education to develop children’s bi/multilingualism. Key topics include: (1) models of bilingual/multilingual education; (2) policy and politics of language education in the U.S. and international contexts; (3) psycholinguistic and sociocultural perspectives on bi/multilingual language development, as related to schooling; and (4) evaluation and assessment issues in bi/multilingual education.
Credit Hours: 3

ED_LPA 8955: Discourse Analysis in Education
(same as LTC 8955). This course introduces the theories and methods of discourse analysis, including conversation, critical discourse, and multimodal. Students will analyze the role of context and ethics, as they transcribe and analyze discourse, especially from analytical settings. Graded on A-F basis only.
Credit Hours: 3
**Prerequisites:** ESC_PS 8957 and ESC_PS 9620

**ED_LPA 8957: Qualitative Methods in Educational Research I**
(same as LTC 8957 and ESC_PS 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

**Credit Hours:** 3

**ED_LPA 9000: ELPA EdD Outgoing Visiting Student**
This class is a placeholder for students in the Statewide Cooperative EdD Program who take classes at their regional site during the fall and spring. There is 0 billing hours and it is not term finalized.

**Credit Hours:** 4

**ED_LPA 9090: Research in Educational Leadership and Policy Analysis**
Graded on a S/U basis only.

**Credit Hour:** 1-99

**Prerequisites:** departmental consent

**ED_LPA 9095: Problems in Educational Leadership and Policy Analysis**

**Credit Hour:** 1-99

**Prerequisites:** instructor's consent

**ED_LPA 9400: Social Theory in Education**
Students will examine the relationship of society and education through a variety of theoretical perspectives and empirical studies. These theories deal with the relation of education to society as a whole, and the relation between education and the state. Graded on A-F basis only.

**Credit Hours:** 3

**ED_LPA 9401: Educational Leadership**
Critical examination of key leadership theories and their application to various educational contexts. Includes consideration of research methods and designs appropriate for the study of leadership and the spectrum of lenses through which educational leadership is studied.

**Credit Hours:** 3

**ED_LPA 9402: Educational Policy Analysis**
Course centers on developing multiple understandings of the education policy making process. Theoretical constructs used to advance those understandings are eclectic in nature, drawing from the fields of political science, history, sociology and economics.

**Credit Hours:** 3

**ED_LPA 9403: Organizational Analysis**
Analysis of organizational characteristics and principles in educational organizations. Topics include: Organizational theories and models, organizational culture, communication, innovation, planning, leadership, power and influence, and external environment influences.

**Credit Hours:** 3

**ED_LPA 9404: Inquiry into Educational Leadership and Policy Analysis**
A critical overview of theory development, research paradigms, and research ethics in the department of Educational Leadership and Policy Analysis. Required for all ELPA Ph.D. students.

**Credit Hours:** 3

**Recommended:** for students who have completed at least 2 semesters of coursework

**ED_LPA 9405: Seminar in Educational Leadership and Policy Analysis**
Seminar in Educational Leadership and Policy Analysis

**Credit Hour:** 1-99

**ED_LPA 9406: Seminar in Educational Administration**
Seminar in Educational Administration

**Credit Hour:** 1-99

**ED_LPA 9407: Seminar in Educational Policy**
Seminar in Educational Policy

**Credit Hour:** 1-99

**ED_LPA 9408: Seminar in Higher Education**
Seminar in Higher Education

**Credit Hour:** 1-99

**ED_LPA 9409: Introduction to Research Design**
This course provides an introduction to quantitative, qualitative, and mixed methods research, with an emphasis on the epistemological and ontological issues that inform our choice of research methods. This course is intended for first year doctoral students. Graded on A-F basis only.

**Credit Hours:** 3

**Recommended:** This course is required and appropriate for all ELPA PhD students

**ED_LPA 9410: Proseminar in Educational Leadership and Policy Analysis**
The purpose of the proseminar course is twofold. First, students will gain an understanding of the systems, processes, and procedures associated with graduate studies, particularly the ELPA department's PhD program. Students will gain experience with critical writing and analysis, using library and electronic resources, and engaging faculty and peers in scholarly dialogues. Second, the course will allow students to engage in preliminary discussions around educational research, including literature, theories, and methodologies related to educational leadership and policy. Students will have the opportunity to begin working on their own research and sharpen their analytic skills through academic writing. We will also discuss educational topics, problems, and policies of current importance. Graded on A-F basis only.

**Credit Hours:** 3
ED_LPA 9420: Superintendent: Fiscal Leadership and Management
This course focuses on a critical task for superintendents and school leaders: managing district revenues, expenditures, and facilities. This course covers the history of school finance, state funding formula, school district budgeting, development of facility plans, and the impact of financial decisions. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9424: Superintendent: Instructional Leadership
Effective superintendents understand educational core knowledge of curriculum, instructional and assessment. They establish an exception for the use of best instructional practices for all students among both the educational and public communities. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9429: Superintendent: Communication, Team Leadership
Effective superintendents negotiate political and cultural challenges to lead diverse, socially-just school systems. Reflective practices that enhance competence in public board member, and district personnel relationships are essential skills. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9430: Superintendent: Fiscal, Legal Leadership
Effective superintendents efficiently manage finances and ensure that rules, regulations, and policies adhere to statutory/case law. Fiscal and legal practices ensure equity of educational experiences for all students. Open to all graduate students. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9435: Superintendent: Legal Leadership and Management
This course focuses on the necessary legal knowledge superintendents must have to guide their school districts in adherence to statutory and case law. This course examines the legal system, lawful and wise use and allocation of district resources, management and evaluation of personnel, and equity issues. Graded on A-F basis only.
Credit Hours: 3

ED_LPA 9440: Race, Gender, and Ethnicity in Higher Education
(same as WGST 9440). Historical and current issues of race, gender, and ethnicity in colleges and universities in the U.S. Issues include: students, faculty, and staff experiences of diversity, access and equity, and salience of diversity in a higher education setting.
Credit Hours: 3

ED_LPA 9442: Curriculum Philosophy and Development in Higher Education
A study of the philosophical foundations of postsecondary curricula, current trends and issues, and approaches to curriculum reforms and revisions.
Credit Hours: 3

ED_LPA 9444: Program Planning in Higher Education
Analysis of program planning and evaluation in higher education. Topics include: conceptualizations of program planning, situational analysis, needs assessment, priority setting, marketing and promotion, and program evaluation.
Credit Hours: 3

ED_LPA 9445: College Student Development
Emphasis on college student development theory and its application in student affairs work.
Credit Hours: 3

ED_LPA 9446: Student Affairs Administration
History, philosophy, theory, and issues pertinent to student affairs work.
Credit Hours: 3

ED_LPA 9447: College Student Culture and Environment
This course examines the characteristics and outcomes of American undergraduates, and the aspects of the college environment that differentially influence students. Topics include: theoretical models of students change, campus climate and cultures, learning communities, institutional differences, and conditions for success.
Credit Hours: 3

ED_LPA 9448: College Teaching
Designed to introduce students to theories and practices central to teaching in a higher education setting. Teaching related to institutional contexts and disciplines will be considered. Teaching and learning theories will be introduced.
Credit Hours: 3

ED_LPA 9449: History of Higher Education in the United States
A study of the transformation of the English college tradition to what higher education is currently in the United States. The emphasis is on how institutions of higher learning changed to meet the needs of the nation or failed to do so.
Credit Hours: 3

ED_LPA 9450: Administration and Governance of Higher Education
Principles of administration, academic culture and environment, and structures of governance of higher education will be explored.
Credit Hours: 3

ED_LPA 9451: Higher Education Finance
How students pay for college and how institutions finance their operations is explored through the lens of economics. Topics include: Theories of student access, tuition and financial aid policy, institutional costs and revenue patterns, and resource allocation models.
Credit Hours: 3

ED_LPA 9454: Introduction to Post-Secondary Law
Examination of the legal structure within which higher education operates. Includes consideration of legal analysis of case law, institutional responsibilities under the law, and analysis of legal issues within postsecondary education.
Credit Hours: 3
ED_LPA 9455: The Community College
An overview of the community college. Topics include historical roots and development of the community college, organization and governance, finance, students, faculty, administrators, curriculum, social role, and recurring and emerging issues.

Credit Hours: 3

ED_LPA 9456: The Professoriate
Overview of faculty roles and work in U.S. colleges and universities. Explores institutional and disciplinary differences and seeks to prepare future faculty for academic life.

Credit Hours: 3

ED_LPA 9457: Higher Education Policy
An overview of current higher education policy issues facing governmental bodies and institutions. An emphasis is placed on investigating both the policy-making and policy-evaluation processes through multiple theoretical lenses. Specific topics explored include access, equity, and accountability within the higher education setting.

Credit Hours: 3

ED_LPA 9459: Comparative and International Education
Theories, methods and issues in the field of comparative and international education. Topics cover PK-16 education and include globalization, centralization and decentralization, equity and equality, teaching and student learning, and social context of education.

Credit Hours: 3

ED_LPA 9461: Ethics in Education
Explores the ethical dimensions of work within and related to educational settings focusing on dilemmas that occur in professional practice, theories that inform thinking about ethical issues, and frameworks that guide ethical decision making.

Credit Hours: 3

ED_LPA 9462: History of U.S. Education Policy
Provides overview of major US education issues (primary K-12), explores analytic tools for studying history of education and introduces multiple ways of constructing the history of a particular movement reform or era in education.

Credit Hours: 3

ED_LPA 9463: Politics of Education
Focuses on politics of education in the United States, attending to the influence of various institutions and actors at local, state, and federal levels. Students will examine current reforms in PK-12 education and their impact on the future of education.

Credit Hours: 3

ED_LPA 9465: Policy Analysis Using Large Data Bases
Intends to develop students' capacity to process national level large databases and to conduct policy-related research.

Credit Hours: 3

Prerequisites: an understanding of inferential statistics and experience with SPSS and SAS program

ED_LPA 9466: College Access
This course examines theories and research on issues related to college going behaviors and inequalities in college access. The course will address college access through different levels of analyses: individual levels (e.g. race, ethnicity, gender, status, ability, social class, and transnational), organizational levels (e.g., geography, K-12 schools, postsecondary institutions), and field levels (e.g., policy, media, admissions). Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9467: International Higher Education
The purpose of this class is to learn the major trends and issues facing postsecondary education around the world and critically engage in comparative analysis with emphasis on lessons for the U.S. higher education system. In particular, this course will cover global trends around governance, accountability, funding, and internationalization. Graded on A-F basis only.

Credit Hours: 3

ED_LPA 9468: Educational Policy Implementation
This course provides the theories and tools to understand and study the implementation of educational policies in K-12 schools and higher education. Drawing from various disciplinary perspectives, students will analyze and apply multiple approaches, including but not limited to technical-rational, street-level bureaucracy, sense-making, and policy enactment. Graded on A-F basis only.

Credit Hours: 3

Recommended: ED_LPA 9402 or the equivalent (including prior courses or relevant experiences) is recommended as a prerequisite

ED_LPA 9469: Education Leadership Inquiry IV
Developing and writing research proposals and conducting pilot studies. Knowledge and skills in writing the research report and sharing research with others.

Credit Hour: 1

Prerequisites: ED_LPA 9471, ED_LPA 9472 and ED_LPA 9473. Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9470: Organizational Analysis for Educational Leadership
Schools of organizational theory, six frames to analyze organizations and their underlying concepts, organizational change and leadership for change, and rationale for reframing organizations.

Credit Hours: 4

Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9471: Educational Leadership Inquiry I
Introductory seminar on evaluating research using, APA Publication guidelines, writing scholarly publications, and using computer technology for literature searches.

Credit Hours: 2
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9472: Educational Leadership Inquiry II
MU Graduate School policies related to doctoral research, use of multiple search sources, human subjects review process, and research ethics.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. program in Educational Leadership

ED_LPA 9473: Educational Leadership Inquiry III
Knowledge and skills in applying planning procedures for development and implementation of future dissertation research.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9474: Professional Seminar I
Focuses on diversity and ethics in educational leadership and educational organizations. Students learn about professional development, professional practice, and professional service. May be repeated for credit.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9475: Professional Seminar II
Problem-based learning via the Internet to make decisions involving professional practice and problem solving. The UCEA Internet program, Information Environment for School Leader Preparation, is used. May be repeated for credit.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9476: Leadership Theory and Practice
An advanced study of leadership theories, concepts, and inquiry as applied to educational organizations. Explores power and authority in organizations, leader effectiveness, and organizational reform.
Credit Hours: 3
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9477: Leadership Theory and Practice Application
Focuses on building understanding of the conduct of leadership in organizations through application and extension of leadership theories in practice.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9478: Policy Analysis for Educational Leadership
Analysis and investigation of educational policy utilizing various knowledge bases; organizational politics and culture’s impact on policy processes; interpretation and application of policy-making activities.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9479: Content and Context of Learning
Students develop the knowledge and skills for examining designing, and implementing organizational, classroom, and training conditions that support quality learning experiences for learners.
Credit Hours: 3
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9480: Team Building and Group Dynamics
Stages of group development, team building and maintenance, team/ group structures, team performance, problem-based learning as team process, and empowerment through development of self-managed teams.
Credit Hour: 1
Prerequisites: Open only to students in Ed.D. Program in Educational Leadership

ED_LPA 9481: Internship in Educational Leadership and Policy Analysis
Some sections may be graded on A-F or S/U basis only.
Credit Hour: 1-99
Prerequisites: departmental consent

General introduction to quantitative methods of data analysis. Develop concepts of measurement, design, and analysis. The focus is on data driven decision marking and using various quantitative methods to investigate problems of educational leadership practice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Only students in the Statewide Cooperative Ed.D. program in Educational Leadership can enroll

ED_LPA 9483: Qualitative Tools for Applied Research in Educational Leadership
Students will learn about a number of qualitative research designs that leaders can use to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to students in the Statewide Cooperative Ed.D. Program in Educational Leadership

ED_LPA 9484: Program Evaluation and Planning for Educational Leaders
Participants develop thorough knowledge of theoretical underpinnings of selected approaches to program planning and evaluation and their necessary integration. Affords participants the opportunity to plan, conduct and deliver the results of a program evaluation to actual client. Graded on A-F basis only.
ED_LPA 9620: Qualitative Methods in Educational Research II
(same as ESC_PS 9620 and LTC 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Only students in the Statewide Cooperative Ed.D. Program in Educational Leadership can enroll

ESC_PS 2000: Experiencing Cultural Diversity in the United States
The purpose of this course is to examine cultural diversity in U.S. Society, to increase self-awareness related to worldviews and beliefs about diversity issues, and to increase understanding of the intersections of multiple group identities. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 2010: Inquiry Into Learning I
This course is designed to focus students on the central themes of learning and teaching. Emphasis will be placed on the interaction of theory, philosophy and practice as related to the field of education. Required for Phase II of the certification program.

Credit Hours: 3

ESC_PS 2014: Inquiry into Learning I - Field Experience
This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

Credit Hour: 1
Recommended: departmental consent

ESC_PS 2014H: Inquiry into Learning I - Field Experience - Honors
This field experience course supports the Inquiry into Learning I, component of Phase I. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Honors eligibility required
Recommended: Departmental consent

ESC_PS 2100: Career Explorations
Contribution of career development theory to choice of career and/or major. Exploration of personal and social determinants of career choice. Class consists of lecture, laboratory experiences, and use of facilities at the Career Planning and Placement Center. Some sections may be graded on either A-F basis or S/U basis only.

Credit Hour: 1-3

ESC_PS 2400: Learning and Instruction
The nature of human learning processes with implications for instruction. Emphasis on bases of and readiness for learning, types of learning, memory forgetting and transfer, and related topics.

Credit Hours: 2

ESC_PS 2500: Child Development
The psychological, intellectual, social, and physical development of children.

Credit Hours: 3

ESC_PS 2700: Psychological Perspectives in Sport
Survey of sport psychology literature with focus upon such topics as personality, positive and negative affect, cognitive and behavioral intervention, motivation, aggression, audience effects, team cohesion, team building, leadership, exercise, and multicultural issues.

Credit Hours: 3

ESC_PS 3085: Problems in Educational, School, and Counseling Psychology

Credit Hour: 1-3
Recommended: instructor's consent

ESC_PS 3100: African-American Psychology
(same as BL_STU 3100 and PSYCH 3880). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed.

Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 3200: Black Feminism
This course outlines the basic principles and practices of Black feminism in the United States. Examination of the multiple systems of oppression on Black women's lives and Black women's collective actions against social structures will occur.

Credit Hours: 3
Recommended: PSYCH 1000 or instructor's consent

ESC_PS 4087: Seminar in Educational, School, and Counseling Psychology

Credit Hour: 1-3
Recommended: instructor's consent

ESC_PS 4115: Human Learning
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning.

Credit Hours: 3

ESC_PS 4170: Introduction to Applied Statistics
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Math Reasoning Proficiency Course.
ESC_PS 4185: Health Behavior: Drug and Sexuality Education
Psychological, social, and physical factors related to drug taking and sexuality behaviors.
Credit Hours: 3
Recommended: instructor's consent

ESC_PS 4200: Positive Psychology
Using self-actualization and self-determination theory, the course builds on identifying personal strengths in people. An emphasis is placed on developing interventions that promote positive thinking. Some sections graded on either A-F or S/U basis only.
Credit Hours: 3

ESC_PS 4460: Exploring Mental Health Issues in Schools
This course is an introduction to the mental health challenges found in schools. It provides education professionals with the knowledge and basic skills to promote positive mental health practices in the schools.
Credit Hours: 3

ESC_PS 4575: MU Youth Development Academy: Positive Youth Development in Practice
(cross-leveled with ESC_PS 7575). This course prepares students to apply principles of positive youth development to practice, including leading youth programs, developing organizational and community systems that support youth, and engaging others to create positive environments in which youth ages 5-19 grow, thrive, and make successful transitions to adulthood. Course topics include ages and stages of development, experiential learning, program planning, diversity and inclusion, youth/adult partnerships, volunteer systems, risk management, community partnerships, and creating environments for healthy relationships. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to upper level (junior/senior standing) students

ESC_PS 7000: Foundation of Teacher Prep I
Designed for graduate students seeking teacher certification, this course addresses content and application in comprehensive classroom management, development, behavior management, and diversity. Field work is required and integrated with course content.
Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 7087: Seminar in Educational, School, and Counseling Psychology
Credit Hour: 1-3
Prerequisites: instructor's consent

ESC_PS 7115: Human Learning
An introduction to the basic principles of learning. Focus is on principles of learning which have the greatest utility for professional educators. This course provides a foundation for more advanced courses in human learning. Graded on A-F basis only.

ESC_PS 7120: Theories and Techniques of Counseling
Survey of contemporary theories underlying individual, feminist, family systems, and multicultural approaches to counseling. Introduction to professional and ethical issues in Counseling Psychology.
Credit Hours: 3
Prerequisites: departmental consent

ESC_PS 7130: Parent Counseling and Consultation
For personnel working with parents in professional settings. Examines current family needs and child-rearing practices. Basic skills in diagnosis, counseling, consultation, parent education are developed.
Credit Hours: 3
Prerequisites: ESC_PS 4120 or ESC_PS 7120

ESC_PS 7160: Developmental Aspects of Human Learning
Investigates aspects of human development that affect classroom learning. Topics include parenting style, divorce, friendship, mental health, attachment, play aggression, culture, and media. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 7170: Introduction to Applied Statistics
Introduces statistical techniques including descriptive statistics, correlation, simple regression and hypothesis testing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: College Algebra or equivalent

ESC_PS 7185: Health Behaviors: Drug and Sexuality Education
Psychological, social and physical factors related to drug taking and sexuality behaviors.
Credit Hours: 3
Prerequisites: ESC_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

ESC_PS 7195: Sport and Applied Coaching Psychology
Sport and Applied Coaching Psychology is a fusion of positive psychology and sport psychology. Positive psychology teaches coaches a healthy approach based in positive motivation and behavior modeling. Sport psychology helps coaches identify with the mental training of athletes and its role in delivering maximum performance. Course focus is on helping coaches maximize the potential of their athletes and teams, while also building upon their emotional and psychological wellbeing.
Credit Hours: 3
Prerequisites: Restricted Positive Coaching degree seeking students (distance students) or permission of department

ESC_PS 7200: Positive Psychology
Positive psychology explores what is positive, creative, and fulfilling in human behavior. It is the scientific study of well-being and flourishing: what people do right. This course will examine cornerstones and key concepts such as emotions, engagement, relationships, strengths,
**ESC_PS 7260: Development of Character and Talent Strengths**
This course will explore the development and application of psychological strengths through the lens of positive psychology theory, research, and intervention. Lessons feature strengths topics including identification, leadership, flow and engagement, regulation, goal-setting and motivation. At the end of the course, students will be proficient in the languages of the StrengthsFinder and VIA Character Strengths assessments, exploration and development oriented activities, and basic facilitator techniques. Graded on A-F basis only.

**Credit Hours: 3**

**ESC_PS 7270: Motivation and Positive Psychology**
This course is designed to give you a better understanding of your own motivation and the motivations of others. We will explore the whether, the what, the why, and the how of motivation through the study of Self-Determination, Self-Concordance and Goal Systems, as well as Attribution and Achievement goal theories. In addition to conceptual knowledge, it is our hope that you broaden your personal knowledge, such as gain new insights on how to set and select self-appropriate goals. Additionally, we will explore techniques and recommendations for motivating others towards better performance, learning, and development. Graded on A-F basis only.

**Credit Hour: 1**

**ESC_PS 7280: Mindfulness, Meditation and Wellbeing**
This class explores both the historical roots and contemporary research related to mindfulness, meditation, and their impacts on wellbeing. Through readings, video presentations and applied practices students will expand their knowledge of meditation and Eastern influences on psychology. Students will also be encouraged to increase their personal awareness of the relationships between stress reduction, present moment and mind/ body awareness, and mindfulness practices. Students will be challenged to integrate a regular meditation practice into their daily routine and, through diverse readings, be introduced to cross-cultural perspectives on human health, psychology, and wellbeing. Graded on A-F basis only.

**Credit Hour: 1**

**ESC_PS 7460: Foundations of School Mental Health**
Explores the history, foundations, and implementation of an expanded framework of school mental health focusing on collaborative and interdisciplinary approaches to supporting the wellness and school success of youth. Introduces professional working in or with schools to the school mental health framework emphasizing a behavioral health continuum of care, links between mental health and academic performance, a comprehensive system of learning supports, and data-based decision-making.

**Credit Hours: 3**

</table>
ESC_PS 8095: Research in Educational, School, and Counseling Psychology
Supervised research that is independent of master's thesis or doctoral dissertation. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: advisor's consent

ESC_PS 8100: Psychological Assessment of Children and Adolescents: Cognitive Assessment
Basic principles in intelligence theory and intermediate measurement concepts. Practice in administering, scoring, and interpretation of data from individually administered intelligence tests with school aged children and adolescents. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8110: Methods in Group Counseling
Study of group counseling methods and techniques. Participation in a group is required.
Credit Hours: 3
Prerequisites: ESC_PS 8040, demonstrated knowledge of ethical principles and departmental consent

ESC_PS 8120: Psychological Assessment of Children and Adolescents: Psychoeducational Assessment
Practice in administering, scoring, and interpretation of data from academic achievement, nonverbal intelligence, memory, adaptive behavior, and perceptual/motor assessments with school-age youth and adolescents.
Credit Hours: 3
Prerequisites: ESC_PS 8040 and instructor's consent

ESC_PS 8125: Professional Iss. in Sch. Psych. I:Hist., Trends & Ethical Pract.
For first-year doctoral students in school psychology. History, current issues, trends, professional organizations, legal-ethical standards of doctoral level school psychology are discussed. The scientist-practitioner model and scientific reasoning process as they apply to both science and practice are reviewed.
Credit Hours: 3
Prerequisites: Must be admitted to school psychology program

ESC_PS 8130: Psychological Assessment of Adults
Students develop and practice skills in writing psychological reports with special emphasis on assessing psychological social-vocational functioning.
Credit Hours: 3
Prerequisites: ESC_PS 8100

ESC_PS 8135: Foundations of Career Psychology
Theoretical orientations to counseling for career development; nature and structure of work, education, and leisure; work and family issues; career concerns of special populations; use of career information in counseling.
Credit Hours: 3
Prerequisites: PSYCH 1000

ESC_PS 8140: Psychological Assessment in Children and Adolescents: Behavior and Social Emotional Assessment
This course introduces behavior theory, behavioral and social-emotional assessment techniques (including observations, interviewing, rating scales, and projective techniques) and their link to relevant interventions, with a primary focus on school-age youth and adolescents.
Credit Hours: 3

ESC_PS 8145: Psychological Interventions with Children and Adolescents: Behavioral Intervention
This course will emphasize behavioral theory, assessment, and intervention, including functional behavior assessment, positive behavior supports, and the conceptualization from an individual, systems, and public health perspective. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8155: Crisis Prevention, Intervention, and Response in Schools
The course provides students with basic knowledge, theoretical frameworks, and skills/strategies for crisis prevention, intervention, response, and recovery in school and community settings, with a primary focus on addressing the mental health needs.
Credit Hours: 3
Prerequisites: Instructor consent

ESC_PS 8160: Psychological Interventions with Children and Adolescents: Educational Instruction
This course investigates models of school instruction in both general and special education, and how instruction can be adapted for learners who exhibit a range of academic and psychological problems and disabling conditions.
Credit Hours: 3
Prerequisites: ESC_PS 8100, ESC_PS 8120 and instructor's consent

ESC_PS 8165: Psychological Interventions with Children and Adolescents: Evidence- Based Therapies
An introduction to evidence-based child and adolescent psychotherapies, including individual and group interventions. Various aspects will be considered including assessment, diagnosis, and treatment planning. Graded on A-F basis only.
Credit Hours: 3

This course is designed to provide students with an understanding of operant conditioning principles and concepts, single-case design methodology, and behavior analytic assessments and evaluation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent

ESC_PS 8185: Health Promotion
An overview of the important concepts of health promotion. Emphasis on specific health-related problems and issues, health behavior change,
and the design, development implementation, and evaluation of comprehensive health promotion programs.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8195: Applied Positive Coaching**
Explores concepts of sport, coaching and positive psychology, particularly the interventions and applications designed to further develop a coach’s philosophy, communication skills, understanding of motivation, leadership skills, and the coach's and athlete's well-being.

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8200: Applied Positive Psychology**
This course will require students to implement positive psychology concepts from the introductory course into their personal, professional, and/or social lives. We will also study specific ways in which these concepts and theories are being applied throughout various realms of well-being. Among the topics in this course are therapeutic lifestyles, goal-setting and attainment, self-care, meaning making, transformational leadership, influence and sustainable happiness theory.

**Prerequisites:**  
ESC_PS 7200

**Credit Hours:** 3  
**Prerequisites:** ESC_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8232: Foundations of Sport Performance**
Focuses on principles and methods to become an effective sport performance coach. Examines the development of athletes and education of basic sports nutrition, strength, and conditioning.

**Credit Hours:** 3  
**Prerequisites:**  
ESC_PS 7195; Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8240: Sport in America**
Sociological perspectives of sport in America. Attention given to the influence of society on sport as in institution, and the role of sport as an agent of social change.

**Credit Hours:** 3  
**Prerequisites:**  
SOCIOL 1000 or PSYCH 1000

---

**ESC_PS 8250: School Psychology Practicum: Introduction**
This course is an intro practicum that exposes students to the organization and functions of schools. Students work with psychologists and other school personnel on academic and behavioral interventions to learn how schools serve children and their families. Graded on S/U basis only. May be repeated for credit.

**Credit Hours:** 1-6  
**Prerequisites:**  
instructor's consent

---

**ESC_PS 8255: Legal Aspects of Sport and Coaching**
Emphasis is to provide insight about how the law is applied in sport settings, the types of litigation involved, and the standard of care required. Fundamental terminology and concepts, and contemporary issues in sport law will be addressed.

**Credit Hours:** 3  
**Prerequisites:**  
instructor's consent

---

**ESC_PS 8260: School Psychology Practicum: Intermediate**
Intermediate School Psychology Practicum provides students with experience in school-based psychological service delivery. Students gain experience with psychoeducational assessment and diagnosis, intervention planning and delivery, consultation, and serving on multidisciplinary teams. Graded S/U basis only. May be repeated for credit.

**Credit Hours:** 1-6  
**Prerequisites:**  
instructor's consent

---

**ESC_PS 8265: Administration of Athletic Programs**
Examines methods, principles, and roles of athletic administrators. Also, examines the job responsibilities and competencies required of sport leaders in athletic administration.

**Credit Hours:** 3  
**Prerequisites:**  
Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8270: Student-Athlete Wellbeing**
As a positive coach and career educator, your knowledge of student wellbeing is critical to support your students' physical, mental, and social health alongside their academic success and development beyond sport. Although our semester will focus largely on the most critical components of student welfare, we will also frame our study of student wellbeing using the tenets of Positive Psychology, a discipline that champions a strengths-based approach to guide positive behaviors associated with health and wellbeing. Health promotion theory will also guide our course of study as we examine: (a) individual student-athlete wellbeing with a focus on physical, mental, and social health; (b) wellbeing in the context of student services provided by the school or organization; and (c) program evaluation methodology to identify strengths and opportunities for program improvement to enhance wellbeing and welfare for all student-athletes.

**Credit Hours:** 3  
**Prerequisites:**  
Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8280: Gender Issues in Sport**
Through a study of theory and applied practice, students will explore personal biases, understand intersecting identities and explore privilege and oppression at the individual, interpersonal, structural, and cultural level when considering gender awareness in sport.

**Credit Hours:** 3  
**Prerequisites:**  
Restricted Positive Coaching degree seeking students (distance students) or permission of department

---

**ESC_PS 8290: Multicultural Issues in Sport**
The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationships of athletic coaches working with diverse student populations. Activities and assignments are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to
improve intercultural interactions with others in professional settings as well as other settings.

Credit Hours: 3
Prerequisites: Restricted Positive Coaching degree seeking students (distance students) or permission of department

ESC_PS 8300: Positive Leadership in Sport
A Positive Leadership philosophy requires Positive Leadership delivery. Course is designed to prepare leaders to bridge content knowledge to practical application. Students will use core competencies learned throughout their program to develop their leadership approach.

Credit Hours: 3

ESC_PS 8320: Advanced Human Learning
A study of behavioral and cognitive theories of learning with an emphasis on those greatest utility for educators. Experimental evidence forming the theoretical base for educational practice is examined.

Credit Hours: 3
Recommended: ESC_PS 2400 or ESC_PS 7100

ESC_PS 8330: Motivating At-Risk and Diverse Students
This course examines motivational concepts that apply to students of all ages. The course is designed to help teachers design classrooms and assignments that would improve the motivation of students, especially at-risk students. The course pays special attention to issues of diversity relevant to motivation. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8340: Cultural Backgrounds and Learning
The course explores the influence of culture on the process of learning. Topics and discussions will center on learning within the K-12 classroom. Readings and assignments are tailored to engage students in practical classroom applications of the information and discussions within the course. At the conclusion of the course students will have a deep understanding of how culture shapes thinking, learning, behavior, and the classroom environment. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8350: Cognition, Learning and Instruction
Examines the topics of memory and cognition as they apply to the process of learning and instruction.

Credit Hours: 3
Prerequisites: ESC_PS 8320 or instructor's consent

ESC_PS 8355: Cognition and Emotion
This course looks at human cognition and emotions and their influence on learning, self-control, motivation, executive processes, and behavior change. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8360: Advanced Counseling Theories and Interventions
Contemporary theories and interventions of counseling. Advanced study of efficacious techniques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8040 or ESC_PS 8342

ESC_PS 8370: Social Emotional Learning
The development and support of social emotional learning will be examined for K-12 age students. The course is both theoretical and application based and is appropriate for all levels of graduate students. Research strongly supports the importance of social emotional regulation in increasing and supporting academic achievement and well-being. Specific topics covered in the class include: the integration of SEL with related prevention approaches, SEL and student-teacher relationships, SEL in connection with PBIS, and accountability in SEL programs. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8380: Data-Driven Instructional Decisions
This course explores the uses of assessments and evaluation techniques for practical applications within the classroom. Focus is on use of data gathering techniques to increase student academic performance and inform classroom instruction. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8400: Analysis of Research in Career Psychology
Examination of career development theories, the research supporting the theories, and the practical application of these ideas in career counseling and career programs.

Credit Hours: 3
Prerequisites: ESC_PS 8135

ESC_PS 8410: School Guidance Programs
Provides knowledge and skills in the development and management of school guidance programs including program planning, structuring, implementing, and evaluating.

Credit Hours: 3
Prerequisites: ESC_PS 7120

ESC_PS 8415: Program Evaluation for School Counselors
Program Evaluation is a graduate seminar intended to provide students with the skills needed to evaluate comprehensive guidance and counseling programs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 7120

ESC_PS 8425: Effects of Maltreatment on Child and Adolescent Development
Course topics to be covered include 1) definitions of child maltreatment, 2) incidence and prevalence rates, 3) possible causes and consequences associated with child maltreatment, 4) treatment of survivors and perpetrators, and 5) prevention efforts. Important legal and ethical issues will be discussed, such as children's competence and eyewitness abilities, false allegations of abuse, mandated reporting, and investigative interviewing of children. Graded on A-F basis only.

Credit Hours: 3
ESC_PS 8430: Mental, Emotional, and Behavioral Disorders in Youth
The course will include an overview of normal development and an investigation into specific deviations in intensity, frequency, and/or duration of normal development which impact the individual in his or her home, school, and community.
Credit Hours: 3

ESC_PS 8435: Wellness Management for School Personnel
The current climate in schools places considerable demands on teachers and other school personnel. Often, those working in schools find themselves under enormous stress and pressure. In this course, school personnel will examine a variety of topics related to both identifying and effectively dealing with these pressures. Topics include communication skills, dealing with challenging individuals in the school system, recognizing and effectively managing stress, and recognizing burnout and re-energizing. The course will provide an overview of the research on these topics, as well as numerous effective strategies to deal with these pressures. Students in the course will have opportunities to apply learned strategies to real-life situations in the schools. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8440: School Mental Health: Policy, Law and Ethics
This course is designed to familiarize school-based professionals with policies, laws and ethics associated with children and youth and schools.
Credit Hours: 3

ESC_PS 8445: Building Resiliency and Optimism in Youth
Examines risk and resiliency processes during childhood and adolescence. Focuses on defining resilience; sources of risks and protective factors within families, schools, and communities; prevention programs targeting early, middle childhood and adolescence. Promotion of one’s own resilience and well-being discussed. Special topics include strengths-based models of resiliency, resilience and family difficulties, violence and maltreatment, poverty, dropout, and school/community-based prevention and intervention.
Credit Hours: 3

ESC_PS 8450: Diversity Issues in School Mental Health
The purpose of this course is to increase the level of multicultural awareness, knowledge, skills, and relationship of school personnel working with diverse student populations.
Credit Hours: 3

ESC_PS 8455: Bully and Youth Violence: Prevention and Reduction
This course is a survey of current issues in bullying and youth violence with an emphasis on applications in the school environment. The course will present effective strategies for bullying and violence prevention within the school and in collaboration with the community at large. Students are encouraged to apply the course concepts to their work environment and develop tools for future practice in schools and other youth-serving settings. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8460: Communication and Collaboration with Children and Families
This course will provide education professionals with the knowledge and basic skills to address common mental health issues through positive and solution focused communication and collaboration.
Credit Hours: 3

ESC_PS 8465: Vital Issues in School Mental Health
The course is highly individualized in that students, as a group, will choose the specific topics to be covered. Readings and assignments have three foci: 1) improve understanding of each issue within a broader context of public mental health policy, prevention, intervention, and maintenance; 2) deepen student knowledge of the topic from practice and research-based sources; and 3) enable students to deal more effectively with those issues within relevant settings. Topics may include, but are not limited to: school dropout, substance use, self-injury/cutting, relational aggression, management of extreme behaviors, homelessness, divorce/death, eating disorders, pregnancy, ADHD, and many others. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8470: Preventions and Interventions in School Mental Health
This course explores the role that educators and school mental health professionals play in promoting, prevention and early intervention practices for mental, emotional, and behavioral disorders in youth and considers the basic steps for designing, implementing and evaluating evidence based interventions.
Credit Hours: 3

ESC_PS 8475: Proactive Behavior Management
This course provides a framework to a prevention-focused model of classroom support and behavior management. Prevention is less time-consuming in the long run and leads to more opportunities for learning and social engagement because discipline problems are not interfering with teaching. This course will include evidence based strategies to structure proactive learning environments that promote students’ academic skills and competencies as well as their social and emotional development. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 8480: Mental Health in Schools Capstone Paper
Course focuses on writing a capstone integration paper that is intended to be a culminating experience. Allows students to reflect on the content of their course work, evaluate the knowledge and skills acquired, and apply what they have learned into their professional practice. Prerequisites: instructor’s consent
Credit Hour: 1

ESC_PS 8515: Sport Psychology
Current topics of research in sport psychology are examined. Topics include: sport personality, attention, activation and anxiety intervention, motivation, sport aggression, audience effects, team cohesion, leadership, and health psychology.
Credit Hours: 3
Prerequisites: PSYCH 1000
ESC_PS 8530: Developmental Psychopathology and Exceptionality
An investigation into the presentation, diagnosis, and treatment of psychopathologies in individuals, emphasizing causal pathways, risks/resiliency, prevalence, incidence, and continuity/discontinuity of the disorders from research in the field of developmental psychopathology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8550: Diversity and Multiculturalism II - Practical Application
This course is part two in the Multicultural Education Certificate series of online courses designed for students working in a broad range of professions, such as health care, social work, education, school counseling, administration, etc. Students will examine various topics on diversity and multiculturalism to enhance their personal and professional development. To this end, the milieu of this course will be a safe online environment that is conducive to open dialogue, self-reflection, critical thinking, and questioning, and one in which students can actively engage in the learning process through affective and cognitive approaches. Postings, along with relevant readings and assignments, will be used as the primary tools and resources for this collective learning experience. Graded on A-F basis only.

Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8555: African American Education - Historic and Current Issues
Critical examination of the deculturalization of American educational system. Concepts of race, culture, and "post racial society" are juxtaposed with social and systemic trends impacting African American students both in and out of the classroom. Pedagogical strategies are discussed. Graded on A-F basis only.

Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8560: Immigrant Issues in Education
The purpose of this course is to increase the level of cross-cultural awareness, knowledge, and skills of school personnel working with students who are immigrants. It is designed to be practically and experientially oriented. Activities and assignments in the class are designed to assist, encourage, and challenge each student to more fully develop awareness and knowledge of self, and to use this information to improve intercultural interactions with others in professional settings as well as other settings. The anticipated outcome includes improved skills in conceptualizing the unique needs of and responding with appropriate approaches to effectively assist students who are immigrants. Graded on A-F basis only.

Credit Hours: 3
Recommended: ESC_PS 8450

ESC_PS 8565: Gay, Lesbian and Bisexual Issues in the Schools
This online course seeks to expand your perspective, worldview, and knowledge of GLB individuals and in your work environments as well as an invitation to promote social justice to make positive changes for the benefit of GLB individuals. Individuals who identify as GLB face many unique experiences, challenges, and opportunities during their developmental life span including issues related to coming out, psychological well-being and mental health development, heterosexism and homophobia, stereotypes and myths, and sexual identity. These issues and more are discussed in the course. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8590: Multicultural Counseling Competencies: Theory and Research
This course will introduce students to the current status of multicultural counseling theories and research issues and help students to increase their knowledge of cultural differences in counseling and psychology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8640: Interviewing, Diagnosis, and Assessment
Introduction to clinical, psychometric assessment, and diagnosis. Data-gathering methods include interviews and tests/inventories of intellectual functioning, abilities, personality, and interests. Students utilize psychological reports to inform assessment, diagnosis and treatment.

Credit Hours: 3
Prerequisites or Corequisites: ESC_PS 8082

ESC_PS 8655: Item Response Theory
Introduces modern scaling with Item Response Theory, and includes how it can be used to statistically specify information about latent variables and the stimuli (e.g., tests) used to represent them.

Credit Hours: 3
Prerequisites: ESC_PS 9640 and ESC_PS 9650

ESC_PS 8660: Educational Planning and Evaluation
This course addresses major issues and models used in educational program planning and evaluation, including the appropriate use of various evaluation models and different types of data.

Credit Hours: 3
Prerequisites: departmental inquiry course, ESC_PS 8830 and/or ESC_PS 8957

ESC_PS 8670: Life/Career Coaching and Development
Designed to teach life and career coaching strategies with roots in career psychology and positive psychology. It provides the tools and knowledge on how to coach people to achieve their personal and professional goals.

Credit Hours: 3
Prerequisites: ESC_PS 7200

ESC_PS 8671: Meaning In Work
Covers a broad look at meaning and vocation using theoretical and empirical frameworks. Also explores the influence of culture, environment, relationships and personal values on meaning development while providing a framework for working from a coaching/counseling standpoint to help others identify or develop meaningful vocations. Graded on A-F basis only.

Credit Hours: 3
**Prerequisites: ESC_PS 7200**

ESC_PS 8720: Community and Stewardship
Examines the concepts of community and stewardship, explores the literal roots of the word (common-unity) and our ability to respond (responsibility) to and build our communities. Also explores the connections between altruism, personal well-being, and social stewardship.

Credit Hours: 3
Prerequisites: ESC_PS 7200

ESC_PS 8730: Positive Organizational Psychology
Surveys the impact of positive organizational psychology research throughout professional organizations. Students will learn empirically defined elements of positive work environments and learn the building blocks associated with this field including: Appreciative Inquiry, the Abundance Approach, Strengths-Based Organizations, Positive Work Environments, and Employee Engagement and Satisfaction.

Credit Hours: 3
Prerequisites: ESC_PS 7200

ESC_PS 8850: Quantitative Foundations in Educational Research
This course is designed to provide students the fundamental and necessary quantitative methods skills in educational research. Topics include one-way and factorial analysis of variance (ANOVA), analysis of covariance (ANCOVA), repeated measures ANOVA, random-effects ANOVA, simple linear regression, multiple regression, regression diagnostics, introduction to logistic regression, and statistical power analysis. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 7170

ESC_PS 8860: Statistical Data Management and Analysis in Educational Research
Good data management is a prerequisite for successful research, needed for reproducibility of results, and essential when collaborating with others. The focus of this course is the application of various techniques with different educational databases using R. By the end of the class, students should feel comfortable importing data using different formats, recoding/renaming variables, merging data from different sources, reshaping data, handling missing values, and creating graphs/tables/plots. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8900: Multicultural Issues in Counseling
This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities.

Credit Hours: 3

ESC_PS 8902: Counseling Psychology Practicum
Supervised practice of counseling in an approved counseling setting. May be repeated. Graded on S/U basis only.

Credit Hours: 3-9
Prerequisites: ESC_PS 8040, ESC_PS 8135, and ESC_PS 8640 and consent of counseling area faculty

ESC_PS 8943: Practicum in Multicultural Counseling Interventions
Supervised practice of applied multicultural counseling interventions in a wide variety of approved community and university settings. Graded on S/U basis only.

Credit Hours: 3

Credit Hour: 1-6
Prerequisites: ESC_PS 8040 and either ESC_PS 8570 or ESC_PS 8590

ESC_PS 8948: Field Placement in Counseling/Supervision
Students will conduct counseling and/or supervision in approved community agencies under the supervision of licensed practitioners. Graded on S/U basis only.

Credit Hours: 1-12
Prerequisites: completion of 9 credit hours of ESC_PS 8040, and consent of the Counseling Area Faculty

ESC_PS 8957: Qualitative Methods in Educational Research I
(same as LTC 8957 and ED_LPA 8957). This course provides a practical introduction to qualitative research and its applications in education and social sciences. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 8960: Interdisciplinary Child and Family Practicum
This class includes a focus on child/family services with a systems/interdisciplinary approach. Students provide services via a mentorship model (strong supervision initially moving toward autonomy). Services include evaluations, therapy, consultation, psychiatric cross-training, and others. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: ESC_PS 8040 and instructor's consent

ESC_PS 8990: Career Development Theory for Women
Consideration of the relevance of theories of career development for women, and their application to the counseling of women. Supervised clinical experience in the application of theories to counseling high school age women.

Credit Hours: 3

ESC_PS 9000: Multicultural Issues in Counseling
This course covers the research and theories of counseling racial/ethnic minorities and gays, lesbians, and bisexuals in the U.S. Examination of personal values and education about the interrelationship between race, class, gender, and sexuality are accomplished via structured activities.

Credit Hours: 3

Recommended: ESC_PS 8340

ESC_PS 9020: Psychology of Crossing Cultural Borders
The primary purpose of the course is to promote the development of cross-cultural knowledge, awareness, and skills for applied psychologists. Students acquire knowledge of psychological processes associated with crossing cultural borders, and translate that knowledge into practical applications. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9030: Social Bases of Behavior
This course provides an advanced level, broad overview of the field of social psychology in relation to applied psychology. Graded on A-F basis only.
ESC_PS 9060: Advanced History and Systems of Psychology
This course explores the origins of psychology in philosophy and the sciences, the development of the science of psychology in the 19th and 20th centuries, and current theoretical perspectives and research in relation to the enduring issues in psychology. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9080: Biological Basis of Behavior
This course is an advanced level doctoral seminar that provides a broad overview of biological bases for human behavior. It will examine the neurophysiological bases of "normal" and "abnormal" behavior using a developmental perspective. Graded on A-F basis only.

Credit Hours: 3

ESC_PS 9090: Doctoral Dissertation Educational School & Counseling Psychology
Independent research leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-12
Prerequisites: departmental consent

ESC_PS 9091: Internship in Counseling Psychology
Supervised experience in counseling psychology on half- or full-time basis in approved internship station. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9092: Internship in School Psychology
Supervised practice in school psychology in an educational setting. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9093: Doctoral Internship in School Psychology
Supervised practice in doctoral-level school psychology in an institutional or applied setting. May be repeated. Graded on S/U basis only.

Credit Hour: 1-6
Prerequisites: departmental consent

ESC_PS 9100: Advanced Psychological Measurement and Assessment
Introduction to the scientific and psychometric foundations of clinical assessment, including measurement theory, reliability, validity, and scale/test construction. Primary focus on the development and validation of evidence-based, psychometrically-sound assessment tools. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor consent

ESC_PS 9125: Professional Iss. in Sch. Psych. II: Rsrch. Design & Application
For first-year doctoral students in school psychology. Includes study of research design and methodological issues in the field of school psychology.

Credit Hours: 3
Prerequisites: Must be admitted to school psychology doctoral program

ESC_PS 9126: Prevention Science Research Design and Analysis
Prevention Science Research is a graduate seminar intended to provide students with the theoretical and empirical foundations of prevention science. In particular, students will learn how to conceptualize problems from a prevention science perspective and design and evaluate preventive interventions using advanced methodologies. Opportunities for community based participatory research including research design and analysis, papers and briefs, grantwriting, and community collaborations regarding prevention programming particularly pertaining to children's mental health.

Credit Hour: 1-3
Prerequisites: instructor's consent

ESC_PS 9250: School Psychology Practicum: Advanced
This course is an advanced practicum for students providing school psychology services. Students develop higher-level skills in the areas of case coordination, diagnostic decision-making, intervention, and systems change. Graded S/U basis only. May be repeated for credit.

Credit Hour: 1-6
Prerequisites: Instructor's consent

ESC_PS 9260: Policy Practicum in Professional Psychology
Policy Practicum is an advanced practicum focused on macro level skills for shaping policy and systems-level intervention. Students work within agencies that establish policy for special education, mental health, and other education/psychology-related issues. May be repeated for credit.

Credit Hour: 1-3
Prerequisites: instructor's consent

ESC_PS 9400: Theories and Practices in Supervision
Instruction and practice in the supervision of psychological services conducted in appropriate laboratories and agencies. Sections titled Counseling Psychology are graded on S/U basis only. Sections titled School Psychology are on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8940 or ESC_PS 8944 and instructor's consent

ESC_PS 9450: Motivation
Investigates human motivation applied to performance in schools, athletics, and personal life. Topics include goals, attributions, self-efficacy, interest, cultural differences, and rewards. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ESC_PS 8320 or equivalent
ESC_PS 9530: Scientific Fdns of Counseling Psych I: Prof Iss &
For first-year doctoral students in counseling psychology. This course
focuses on the history of counseling psychology, in and scientific
reasoning processes as they apply to both science and practice.
Credit Hours: 3

ESC_PS 9540: Scientific Foundations of Counseling Psych II: Rsrch,
Dsgn & Appl
For first-year doctoral students in applied psychology. Includes study
of research design and methodological issues in the field of counseling
psychology.
Credit Hours: 3
Prerequisites: ESC_PS 9530

ESC_PS 9550: Scientific Writing in Counseling Psychology
This course focuses on the technical skills needed for developing a
scientific research proposal in counseling psychology.
Credit Hours: 3
Prerequisites: ESC_PS 9530 and ESC_PS 9540 and instructor's
consent

ESC_PS 9560: Psychological Consultation: Schools
The individual psychological consultation process between the mental
health professional and school personnel. Techniques, models, research
roles, and responsibilities are discussed. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 9570: Psychological Consultation: Organizations
This course provides an introduction to the theory and practical skills
required to effectively consult at the organizational level in a variety of
settings and contexts. Graded on A-F basis only.
Credit Hours: 3

ESC_PS 9610: Applied Sport Psychology
Building upon the knowledge base of sport psychology, this course
integrates and synthesizes student's understandings of the wide array
of concepts and theories of the field into meaningful applications and
strategies aimed at enhancing the sport experience of others. A case
study approach will be employed.
Credit Hours: 3
Prerequisites: ESC_PS 8515

ESC_PS 9620: Qualitative Methods in Educational Research II
(same as ED_LPA 9620 and LTC 9620). This course constructs a
conceptual and methodological bridge between the understandings
of qualitative research developed in Qualitative Methods I and more
advanced study of theories, designs, and methods. The focus is on
theory, approaches to data analysis, and interpretation. Graded on A-F
basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8957

ESC_PS 9640: Introduction to Theory of Educational Measurement
Classical and modern test theory, including IRT, generalizability theory
and test bias. Also covered are advanced strategies for investigating
reliability and validity.
Credit Hours: 3
Prerequisites: ESC_PS 7170 and ESC_PS 8082

ESC_PS 9650: Application of Multivariate Analysis in Educational
Research
The focus of this course will be on applications of multivariate analysis in
educational research.
Credit Hours: 3
Prerequisites: ESC_PS 8830 and ESC_PS 8840 or equivalent and
instructor's consent

ESC_PS 9660: Generalized Linear Modeling
This course is designed to introduce students to the theory and
application of generalized linear models (GLMs). GLMs provide a flexible
generalization of the ordinary linear regression model. While the latter
is restricted to continuous dependent variables (with normal error term),
the GLM framework has been developed to analyze dependent variables
that are, e.g., binary, polytomous nominal, ordinal, counted, censored, or
bounded continuous. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ESC_PS 8850
Recommended: Familiarity with the basics of the R statistical
programming environment (see www.r-project.org) is assumed

ESC_PS 9710: Structural Equation Modeling
Simultaneous analysis of relationships among variables. Topics included
are path analysis, confirmatory factor analysis, hybrid models, and
special types of structural models involving longitudinal data, multiple
groups and analysis of means. May be repeated for credit.
Credit Hours: 3
Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS
9650

ESC_PS 9720: Hierarchical Linear Modeling
Hierarchical Linear Modeling (HLM), including multilevel and longitudinal
approaches, in applied research settings for the social, educational
psychological, and health-related sciences. May be repeated for credit.
Credit Hours: 3
Prerequisites: ESC_PS 7170, ESC_PS 8830, ESC_PS 8840, ESC_PS
9650; consent required

Electrical And Computer Engineering (ECE)

ECE 1000: Introduction to Electrical and Computer Engineering
Introduction to the basic principles of electrical and computer engineering
through hands-on activity. Course includes fundamentals of programming
using Matlab, applied to electrical and computer engineering problems.
Credit Hours: 2
ECE 2100: Circuit Theory I
DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: A grade of C- or better in MATH 1700

ECE 2210: Introduction to Logic Systems (same as CMP_SC 2270).
Introduces basic tools, methods and procedures to design combinational and sequential digital circuits and systems. Topics include number systems, Boolean algebra, logic minimization, circuit design, memory elements, and finite state machine design. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or higher in CMP_SC 1050 or INFOTC 1040

ECE 3110: Electrical and Computer Engineering Projects
Open-ended design projects which encourage innovative solutions to design and measurement problems. Students teams complete several projects from different areas. Both oral and written presentations emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: A grade of C or better in ECE 3210 or ECE 3280 or CMP_SC 3280 and ECE 3410 and a grade of C- or better in STAT 4710. Restricted to Electrical and Computer Engineering students only or instructor's consent.

ECE 3210: Microprocessor Engineering for Electrical Engineers
Introduction to microprocessor architectures and programming; memory, memory management and cache organizations, bus configurations and timing implications; parallel I/O and serial communication interfaces.

Credit Hours: 4
Prerequisites: A grade of C or better in CMP_SC 1050 or CMP_SC 2270

ECE 3220: Software Design in C and C++
Software/Hardware development for embedded systems, including memory, I/O and interrupts; an overview of C and C++, class structures in object oriented programming; software development with UML and testing and debugging strategies. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 3280 or CMP_SC 3280 or ECE 3210 with a grade of C or better

ECE 3220: Computer Organization and Assembly Language (same as CMP_SC 3280).
Introduces computer architectures, programming concepts including parameter passing, I/O interrupt handling, DMA, memory systems, cache, and virtual memory. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 2210 or CMP_SC 2270 with a grade of C or better

ECE 3410: Electronic Circuits and Signals I
Electron Devices, modeling and applications to basic electronic circuits, including RC amplifiers and power supplies.

Credit Hours: 4

Corequisites: ECE 3810

ECE 3510: Electromagnetic Fields
Elements of vector analysis, transmission line theory, electrostatics, magnetostatics, time varying fields and plane waves. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: A grade of C- or better in PHYSCS 2760 and a grade of C or better in ECE 2100
Corequisites: MATH 4100

ECE 3610: Semiconductors and Devices
Crystal structure; quantum aspects of energy, radiation and matter; quantum mechanics and energy bands in solids; electronic and optical properties of semiconductors; p-n junctions and diodes; bipolar and field-effect transistors.

Credit Hours: 3
Prerequisites: A grade of C or better in ECE 3510

ECE 3810: Circuit Theory II
Impulse and step responses, RLC circuits, classical differential equations solutions, complex plane stability, frequency and Bode Analysis, Resonance, Laplace transforms, two-port networks, mutual inductance and transformers. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: A grade of C or better in ECE 2100
Corequisites: MATH 4100

ECE 3830: Signals and Linear Systems
Transform Analysis of Signals and Linear Systems. Laplace transforms, z-transforms, Fourier series and transforms.

Credit Hours: 3
Prerequisites: A grade of C or better in ECE 3810

ECE 3840: Measurement and Instrumentation
Covers 1) theory and applications of measurement and instrumentation systems; 2) signal conditioning circuits; 3) software-controlled automatic test equipment (ATE); and 4) software-controlled data acquisition systems. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: ECE 3210 or ECE 3280, ECE 3410, ECE 3830, STAT 4710

ECE 4001: Topics in Electrical and Computer Engineering
Current and new technical developments in electrical engineering.

Credit Hour: 1-4
Prerequisites: senior standing

ECE 4020: Energy Systems and Resources (same as NU_ENG 4315; cross-leveled with ECE 7020, NU_ENG 7315).
Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.

Credit Hours: 3
Prerequisites: ENGINR 2300

ECE 4030: Introduction to Nuclear Reactor Engineering
(same as NU_ENG 4346; cross-leveled with ECE 7030, NU_ENG 7346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.

Credit Hours: 3
Prerequisites: ENGINR 1200, ENGINR 2300

---

ECE 4040: Introduction to Nuclear Physics
(cross-leveled with ECE 7040). Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: senior standing or graduate standing in engineering or equivalent mathematical preparation

---

ECE 4070: Numerical Methods for Science and Engineering
(same as CMP_SC 4070; cross-leveled with ECE 7070, CMP_SC 7070). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP.SC 2050, junior standing, or Instructor's consent
Recommended: Students are expected to have basic knowledge in discrete math and algorithms

---

ECE 4085: Problems in Electrical and Computer Engineering
Analytical or experimental problems pertaining to electric circuits, machines, fields or electronics.

Credit Hour: 1-3
Recommended: 12 hours Electrical and Computer Engineering credit or instructor's consent

---

ECE 4220: Real Time Embedded Computing
(cross-leveled with ECE 7220). Embedded systems development with real time constraints including RTOS, task management and synchronization, real time scheduling algorithms, deadlocks, performance analysis and optimization, interfacing to external devices, and device drivers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 3220

---

ECE 4250: VHDl and Programmable Logic Devices
(cross-leveled with ECE 7250). Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.

Credit Hours: 4

---

Prerequisites: ECE 3210 or ECE 3280 or CMP_SC 3280 with a grade of C or better

ECE 4270: Computer Organization
(same as CMP_SC 4270; cross-leveled with ECE 7270, CMP_SC 7270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

Credit Hours: 4
Prerequisites: CMP.SC 2050 and ECE 3280 or CMP.SC 3280 or ECE 3210 with a grade of C or better

---

ECE 4280: Network Systems Architecture
(same as CMP.SC 4280; cross-leveled with ECE 7280, CMP.SC 7280). The course covers network systems interconnects and switch fabrics, network considerations: and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: C- or higher in CMP.SC 2050 or ECE 3220 or C- or higher in CMP.SC 3280 or ECE 3210

---

ECE 4310: Feedback Control Systems
(same as BIOL_EN 4310, MAE 4750; cross-leveled with BIOL_EN 7310, ECE 7310, MAE 7750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MATH 4100

---

ECE 4320: Architectural Robotics
(cross-leveled with ECE 7320). Architectural robotics has been defined as "intelligent and adaptable built environments (featuring embedded robotic components) that sense, plan, and act". This course will cover the basic concepts required for understanding, developing, and testing embedded robotic systems for the built environment. Students will work together in teams in a studio-style format which emphasizes hands-on projects to develop working prototypes. The goal is to offer students an opportunity for creativity in an interdisciplinary setting. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: junior or senior standing

---

ECE 4330: Introduction to Mechatronics and Robotic Vision
(cross-leveled with ECE 7330). Covers 1) mechatronic systems; 2) the mathematical tools used to model industrial and mobile robots; and 3) vision sensors, their underlying models and algorithms that allow us to control and interact with robots.

Credit Hours: 4
Prerequisites: ECE 3220 or ECE 4220
Recommended: a C/C++ languages

---

ECE 4340: Building Intelligent Robots
(same as CMP_SC 4730; cross-leveled with ECE 7340, CMP_SC 7740). Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive
behaviors and control architectures. Recommended: programming experience in one of the following programming languages: Basic, C, C++, or Java.

**Credit Hours:** 4  
**Prerequisites:** junior standing

---

**ECE 4350: Programmable Logic Controllers**  
(cross-leveled with ECE 7350). Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

**Credit Hours:** 4  
**Prerequisites:** ECE 3510

---

**ECE 4410: Power Electronics I**  
(cross-leveled with ECE 7410). Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

**Credit Hours:** 4  
**Prerequisites:** ECE 3410

---

**ECE 4430: Electronic Circuits and Signals II**  
(cross-leveled with ECE 7430). Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.

**Credit Hours:** 4  
**Prerequisites:** ECE 3830 and ECE 3410

---

**ECE 4440: Power Systems Analysis**  
(cross-leveled with ECE 7440). Selected topics related to modern power system analysis. Single and three-phase balanced power; Transformers and the per unit concept; Properties and analysis of transmission lines; power flow analysis; symmetrical and asymmetrical faults; system stability; power distribution; use of Powerworld software. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ECE 3810 and MATH 4100 or instructor's consent

---

**ECE 4460: Energy and Machines**  

**Credit Hours:** 3  
**Prerequisites:** ECE 3510

---

**ECE 4470: Sustainable Electrical Energy Resources**  
(cross-leveled with ECE 7470). Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.

**Credit Hours:** 3  
**Prerequisites:** ECE 2100 or ENGINR 2100

---

**ECE 4510: Pulsed Power Engineering**  
(cross-leveled with ECE 7510). Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.

**Credit Hours:** 3  
**Prerequisites:** ECE 3510

---

**ECE 4550: Introduction to Plasmas**  
(same as NU_ENG 4375; cross-leveled with ECE 7550, NU_ENG 7375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

**Credit Hours:** 4  
**Prerequisites:** ECE 3510

---

**ECE 4590: Computational Neuroscience**  
(same as BIOL_ENG 4590, BIO_SC 4590, BME 4590; cross-leveled with ECE 7590, BIO_SC 7590, BME 7590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuron-networks. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MATH 1500 or equivalent

---

**ECE 4620: Introduction to BioMEMS**  
(cross-leveled with ECE 7620). Study of BioMEMS devices and applications. Topics cover BioMEMS including overview of microfabrication techniques, common bioMEMS material, microfluidic principles, microfluidic devices, drug delivery, biomedical microdevices for neural implants, patch-clamping and single cell based analysis systems, microelectroporation, DNA microarrays, Polymerase Chain Reaction and biopolymers, chemical and gas sensors and biosensors. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ECE 3610

---

**ECE 4630: Introduction to Optical Electronics**  

**Credit Hours:** 3  
**Prerequisites:** ECE 3610

---

**ECE 4640: MEMS Laboratory**  
(cross-leveled with ECE 7640). The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical Systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.

**Credit Hours:** 4
ECE 4650: Semiconductor Device Theory  
(cross-leveled with ECE 7650). Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.  
Credit Hours: 3  
Prerequisites: ECE 3610

ECE 4655: Digital Image Processing  
(same as CMP_SC 4650; cross-leveled with ECE 7655, CMP_SC 7650). This course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 2050 and STAT 4710 or instructor's consent

ECE 4670: Microelectronic Fabrication  
(cross-leveled with ECE 7670). Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.  
Credit Hours: 4  
Prerequisites: ECE 3610

ECE 4675: Digital Image Compression  
(same as CMP_SC 4675; cross-leveled with ECE 7675, CMP_SC 7675). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.)  
Credit Hours: 3  
Prerequisites: C- or higher in CMP_SC 2050

ECE 4710: Communications Systems  
(cross-leveled with ECE 7710). Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, linear equalization, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.  
Credit Hours: 3  
Prerequisites: ECE 3830

ECE 4720: Introduction to Machine Learning and Pattern Recognition  
(Same as CMP_SC 4720; cross-leveled with ECE 7720, CMP_SC 7720) This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problems of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications.  
Credit Hours: 3

ECE 4730: Introduction to Wireless Communication System  
(cross-leveled with ECE 7730). Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.  
Credit Hours: 3

ECE 4780: Micro/Nano Systems  
(cross-leveled with ECE 7880). Micro/nano systems covers various micro/nanotechnologies, micro sensors and actuators including digital light processors, accelerometers, gyroscopes, micro optical switches and components, micro speakers, RF switches, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Major mechanisms/principles for micro/Nano devices and systems are also covered. The Micro/Nano Systems focuses on the miniaturization technologies that have important roles in materials, mechanical, and biomedical engineering practice. Graded on A-F basis only.  
Credit Hours: 3  
Recommended: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

ECE 4830: Introduction to Digital Signal Processing  
(cross-leveled with ECE 7830). Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.  
Credit Hours: 4  
Prerequisites: ECE 1210, ECE 3830

ECE 4870: Introduction to Computational Intelligence  
(same as CMP_SC 4770; cross-leveled with ECE 7870, CMP_SC 7770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.  
Credit Hours: 3  
Recommended: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects

ECE 4880: Micro/Nano Systems  
(cross-leveled with ECE 7880). Micro/nano systems covers various micro/nanotechnologies, micro sensors and actuators including digital light processors, accelerometers, gyroscopes, micro optical switches and components, micro speakers, RF switches, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Major mechanisms/principles for micro/Nano devices and systems are also covered. The Micro/Nano Systems focuses on the miniaturization technologies that have important roles in materials, mechanical, and biomedical engineering practice. Graded on A-F basis only.  
Credit Hours: 3  
Prerequisites: ECE 3610 or instructor's consent

ECE 4930: Intermediate Electromagnetics  
(cross-leveled with ECE 7930). Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems.  
Credit Hours: 4  
Prerequisites: ECE 3510

ECE 4940: Antenna Theory, Design and Laboratory  
(cross-leveled with ECE 7940). Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, various antennas.  
Credit Hours: 4
Prerequisites: ECE 3510

ECE 4960W: Senior Capstone Design I - Writing Intensive
Lectures on safety, ethics, professionalism, intellectual property, product liability, contemporary issues, and project management. Provides the senior Capstone project proposal experience, incorporating multidisciplinary project design and project management skills. Oral presentations and written reports. Not for graduate credit. Graded A-F only. Recommended: Post-requisite: ECE 4980.
Credit Hours: 3
Prerequisites: Restricted to EECS Department students only, or instructor's consent

ECE 4970: Senior Capstone Design
Credit Hours: 3
Prerequisites: A grade of C or better in ECE 3110 or ECE 3840 and senior standing. Restricted to Electrical and Computer Engineering students only or instructor's consent

ECE 4970W: Senior Capstone Design - WI
Credit Hours: 3
Prerequisites: A grade of C or better in ECE 3110 or ECE 3840 and senior standing. Restricted to Electrical and Computer Engineering students only or instructor's consent

ECE 4980: Senior Capstone Design II
Provides the senior Capstone design experience where multidisciplinary teams reduce to practice a proposed product. Oral and written reports. Not for graduate credit. Graded A-F only.
Credit Hours: 3
Prerequisites: ECE 3840, ECE 4970, Senior standing, Restricted to EECS Department students only, or instructor's consent

ECE 4990: Undergraduate Research in Electrical Computer Engineering
Supervised independent study or project in electrical or computer engineering, culminating in a written report.
Credit Hour: 1-3
Prerequisites: Undergraduate Program Director's consent

ECE 4995: Undergraduate Honors Research in Electrical Computer Engineering
Independent investigation or project in electrical or computer engineering to be presented as an undergraduate honors thesis. Enrollment is limited to students participation in the Electrical and Computer Engineering Honors Program.
Credit Hour: 1-3

ECE 7001: Advanced Topics in Electrical and Computer Engineering
Current and new technical developments in electrical engineering.
Credit Hour: 1-4

ECE 7010: Digital Computer Applications in Engineering
Use of digital computer for solution of engineering problems involving roots of equations, simultaneous equations, curve fitting, integration, differentiation and differential equations.
Credit Hours: 3
Prerequisites: MATH 2300

ECE 7020: Energy Systems and Resources
(same as NU_ENG 7315; cross-leveled with ECE 4020, NU_ENG 4315). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300

ECE 7030: Introduction to Nuclear Reactor Engineering
(same as NU_ENG 7346; cross-leveled with ECE 4030, NU_ENG 4346). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: graduate ENGINR 1200, ENGINR 2300

ECE 7040: Introduction to Nuclear Physics
(cross-leveled with ECE 4040). Introduction of Quantum mechanics for non-physics majors. Course topics include nuclear properties; alpha, beta and gamma radioactive decay; and nuclear reactions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: senior standing or graduate standing in engineering or equivalent mathematical preparation

ECE 7050: Numerical Methods for Science and Engineering
(same as CMP_SC 7050; cross-leveled with ECE 4050, CMP_SC 4050). This course introduces the basic numerical methods that are widely used by computer scientists and engineers. Students will learn how to use the MATLAB platform to find the computational solution of various problems arising in many real world applications. By completing this course, students will be able to master algorithms, compare their performances and critically assess which ones are viable options for the particular problem at hand. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 2050, junior standing, or Instructor's consent
Recommended: Students are expected to have basic knowledge in discrete math and algorithms

ECE 7060: Real Time Embedded Computing
(cross-level with ECE 4220). Embedded systems development with real time constraints including RTOS, task management and synchronization, realtime scheduling algorithms, deadlocks, performance analysis and
optimization, interfacing to external devices, and device drivers. Graded A-F basis only.

Credit Hours: 3  
Prerequisites: ECE 3220

**ECE 7250: VDHL and Programmable Logic Devices**
(cross-leveled with ECE 4250). Design techniques including module definition, functional partitioning, hardware design language descriptions and microprogramming; design examples include arithmetic units, programmable controllers, and microprocessors.

Credit Hours: 4  
Prerequisites: ECE 3210 or ECE 3280 or CMP_SC 3280 with a grade of C or better

**ECE 7270: Computer Organization**
(same as CMP_SC 7270; cross-leveled with ECE 4270, CMP_SC 4270). Advanced computer architectures and programming; memory, memory management and cache organizations, parallel processing, graphical processor units for general programming.

Credit Hours: 4  
Prerequisites: CMP_SC 2050 and ECE 3280 or CMP_SC 3280 or ECE 3210 with a grade of C or better

**ECE 7280: Network Systems Architecture**
(same as CMP_SC 7280; cross-leveled with ECE 4280, CMP_SC 4280). The course covers network systems interconnects and switch fabrics, network considerations and relevant networking applications at the network, transport and application layer. Graded on A-F basis only.

Credit Hours: 4  
Prerequisites: CMP_SC 2050 or ECE 3200 and CMP_SC 3280 or ECE 3210

**ECE 7310: Feedback Control Systems**
(same as BIOL_EN 7310, MAE 7750; cross-leveled with ECE 4310, BIOL_EN 4310, MAE 4750). System modeling and time and frequency response, closed loop control, stability, continuous system design, introduction to discrete time control, software and hardware experiments on compensator design and PID control.

Credit Hours: 3  
Prerequisites: MATH 4100

**ECE 7320: Architectural Robotics**
(cross-leveled with ECE 4320). Architectural robotics has been defined as "intelligent and adaptable built environments (featuring embedded robotic components) that sense, plan, and act". This course will cover the basic concepts required for understanding, developing, and testing embedded robotic systems for the built environment. Students will work together in teams in a studio-style format which emphasizes hands-on projects to develop working prototypes. The goal is to offer students an opportunity for creativity in an interdisciplinary setting. Graded on A-F basis only.

Credit Hours: 4  
Prerequisites: ECE 4970 or equivalent

**ECE 7330: Introduction to Mechatronics and Robotic Vision**
(cross-leveled with ECE 4330). Introduces robotics; robot system characteristics; robot motive power systems; geometric structure of robots; sensors and feedback; control applications and algorithms; data acquisition and output actuaction function; robots and AI; microprocessor applications. Lecture and Laboratory. Recommended: a C/C++ Language course.

Credit Hours: 4  
Prerequisites: ECE 3220 or ECE 4220

**ECE 7335: Nuclear Safeguards Science and Technology**
(same as NU_ENG 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.

Credit Hours: 3  
Prerequisites: NU_ENG 4303 or NU_ENG 7303

**ECE 7340: Building Intelligent Robots**
(same as CMP_SC 7730; cross-leveled with ECE 4340, CMP_SC 4730) Covers the design and development of intelligent machines, emphasizing topics related to sensor-based control of mobile robots. Includes mechanics and motor control, sensor characterization, reactive behaviors and control architectures.

Credit Hours: 4  
Recommended: some programming experience

**ECE 7350: Programmable Logic Controllers**
(cross-leveled with ECE 4550). Hardware and software aspects of PLC's; computer/PLC Communications; developing ladder logic programs; interfacing I/O devices, including sensors, to the PLC; labeling and documentation; utilizing analog capabilities; applications; developing Supervisory Control and Data Acquisitions (SCADA) applications.

Credit Hours: 4

**ECE 7370: Automatic Control System Design**
(cross-leveled with ECE 4370). Techniques for feedback system design and analysis; compensation using root locus and frequency-domain methods; state-variable design methods; techniques for nonlinear systems analysis and design; sample-data control systems.

Credit Hours: 3

**ECE 7410: Power Electronics I**
(cross-leveled with ECE 4410). Power electronic device characteristics, important circuit and component concepts, loss mechanisms and thermal analysis, phase controlled rectifiers, dc-dc converters, and dc-ac inverters. Includes laboratory projects.

Credit Hours: 4  
Prerequisites: ECE 4310

**ECE 7430: Electronic Circuits and Signals II**
(cross-leveled with ECE 4430). Advanced study of electronic devices including frequency response of amplifiers, nonlinear effects in transistor amplifiers, oscillators, and feedback amplifiers.
ECE 7460: Energy and Machines
Credit Hours: 3
Prerequisites: ECE 3830 and ECE 3410

ECE 7470: Sustainable Electrical Energy Resources
(cross-leveled with ECE 4470). Analysis of renewable electrical energy resources from both the utility and distributed resource perspective. Covers safety, metering and power quality issues associated with coupling distributed resources to the utility grid.
Credit Hours: 3
Prerequisites: ECE 2100 or ENGINR 2100

ECE 7510: Pulsed Power Engineering
(cross-leveled with ECE 4510). Concepts of energy generation and storage systems used in pulse power engineering, high power opening and closing switches, high voltage engineering, grounding and shielding, high voltage safety.
Credit Hours: 3
Prerequisites: ECE 3510

ECE 7550: Introduction to Plasmas
(same as NU_ENG 7375; cross-leveled with ECE 4550, NU_ENG 4375). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.
Credit Hours: 3
Prerequisites: ECE 4930

ECE 7590: Computational Neuroscience
(same as BIOL_ENG 7590; cross-leveled with ECE 4590, BIOL_ENG 4590, ECE 4590, BME 4590). Interdisciplinary course in biology and quantitative sciences with laboratory and modeling components. Explores basic computational and neurobiological concepts at the cellular and network level. Introduction to neuronal processing and experimental methods in neurobiology; modeling of neurons and neuronal networks. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: MATH 1500 or equivalent

ECE 7620: Introduction to BioMEMS
Credit Hours: 3

ECE 7630: Introduction to Optical Electronics
Credit Hours: 3
Prerequisites: ECE 3830

ECE 7640: MEMS Laboratory
(cross-leveled ECE 4640). The main objective of this course is to provide hands-on skills for the interdisciplinary Microelectromechanical systems (MEMS). It puts emphasis on the practical aspects of design, fabrication, test, and characterization of micro/nano devices and systems. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: PHYSCS 2760, CHEM 1320 or ECE 2100; instructor’s consent

ECE 7650: Semiconductor Device Theory
(cross-leveled with ECE 7650). Band theory, equilibrium and non-equilibrium semiconductor electronics, junction theory, p-n junction devices, bipolar and field effect transistors including SPICE simulation.
Credit Hours: 3
Prerequisites: ECE 3610

ECE 7655: Digital Image Processing
(same as CMP_SC 7650; cross-leveled with ECE 4655, CMP_SC 4650). The course provides fundamentals of digital image processing hardware and software including digital image acquisition, image display, image enhancement, image transforms and segmentation.
Credit Hours: 3
Prerequisites: STAT 4710 and CMP_SC 2050 or instructor’s consent

ECE 7670: Microelectronic Fabrication
(cross-leveled with ECE 4670). Basic silicon integrated circuit fabrication processes, basic techniques of wafer processing, economics of fabrication and resulting devices properties, interdependence of process flow and device design. Accompanying laboratory.
Credit Hours: 4
Prerequisites: ECE 3610

ECE 7675: Digital Image Compression
(same as CMP_SC 7670; cross-leveled with ECE 4675, CMP_SC 4670). This course provides basic concepts and theorems in information theory, discrete cosine transform, discrete wavelet transform, quantizer design, bit allocation, and rate-distortion analysis and practical coding and communication system design, (such as Huffman coding, arithmetic coding, variable length coding, motion estimation, JPEG.)
Credit Hours: 3
Prerequisites: CMP_SC 2050
ECE 7690: Design and Simulation of VLSI Circuits
(cross-leveled with ECE 4690). Design of CMOS integrated circuits with emphasis on analog applications. Device models are developed for circuit simulation. Lecture and laboratory.

Credit Hours: 4
Prerequisites: ECE 4670

ECE 7710: Communications Systems
(cross-leveled with ECE 4710). Concepts of communication systems, signal analysis and power spectrum density, signal transmission and filtering, linear modulation, exponential modulation, sampling, baseband digital communication, modulated digital communication, spread spectrum communication.

Credit Hours: 3
Prerequisites: ECE 3830

ECE 7720: Introduction to Machine Learning and Pattern Recognition
(same as CMP_SC 7720; cross-leveled with ECE 4720, CMP_SC 4720). This course provides foundation knowledge to the basic methods in machine learning and pattern recognition (MLPR). MLPR addresses the problem of programming computers to optimize certain performance criteria by using example data or expert knowledge and it has wide applications.

Credit Hours: 3
Prerequisites: CMP_SC 2050 and STAT 4710 or instructor's consent

ECE 7730: Introduction to Wireless Communication System
(cross-leveled with ECE 4730). Principles of wireless communication analysis and design. Digital communication basics, cellular radio, wireless PCS communications, multiple access techniques, channel coding and equalization, and standards of digital cellular/PCS systems.

Credit Hours: 3

ECE 7810: Multimedia Engineering and Technology
(same as CMP_SC 7810). Survey of multimedia applications. Capture, coding, storage, transmission, and software tools for developing productions involving text, graphics, images, animation, sound and video. Term projects. Lecture and laboratory.

Credit Hours: 4
Prerequisites: ECE 3210 and ECE 3830

ECE 7830: Introduction to Digital Signal Processing
(cross-leveled with ECE 4830). Concepts, analytical tools, design techniques used in computer processing of signals; signal representation, sampling, discrete-time systems analysis, recursive and non-recursive filters, design/implementation, discrete Fourier transform.

Credit Hours: 4
Prerequisites: ECE 1210, ECE 3830

ECE 7870: Introduction to Computational Intelligence
(same as CMP_SC 7770; cross-leveled with ECE 4870, CMP_SC 4770). Introduction to the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation and swarm optimization. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: some exposure to rigorous axiomatic mathematical development of a topic (as can be found in most senior/graduate level math or statistics courses) is needed to appreciate some of the development of the theory. Also, the ability to program (well) in some high level language is essential to perform the computer projects.

ECE 7880: Micro/Nano Systems
(cross-leveled with ECE 4880). Micro/Nano systems covers various micro/nanotechnologies, micro sensors and actuators including digital light processors, accelerometers, gyroscopes, micro optical switches and components, micro speakers, RF switches, inertial/mechanical and acoustic M/NEMS and M/Nanofluidic systems. Major mechanisms/principles for micro/Nano devices and systems are also covered. The Micro/Nano Systems focuses on the miniaturization technologies that have important roles in materials, mechanical, and biomedical engineering practice. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 3610 or instructor's approval

ECE 7930: Intermediate Electromagnetics
(cross-leveled with ECE 4930). Course covers transmission lines, waveguides, microstrip electromagnetic circuits, and radiating systems

Credit Hours: 4
Prerequisites: ECE 3510

ECE 7940: Antenna Theory, Design and Laboratory
(cross-leveled with ECE 4940). Introduction to antenna theory, design and laboratory. Emphasis on engineering aspects of antenna systems, transmitting and receiving antenna parameters, and various wire antennas.

Credit Hours: 4
Prerequisites: ECE 3510

ECE 7950: Microwave Principles
(cross-leveled with ECE 4950). Maxwell's Equations, transmission lines, plane wave propagation and reflection, waveguides, resonant cavities, microwave devices and components, radiation, radio wave propagation. Lecture and laboratory.

Credit Hours: 4
Prerequisites: ECE 3510 and ECE 3410

ECE 8001: Advanced Topics in Electrical and Computer Engineering
Advanced Topics in Electrical and Computer Engineering. Graded on A-F basis only.

Credit Hour: 1-4
Prerequisites: may vary from semester to semester depending on topic

ECE 8010: Supervised Study in Electrical Engineering
Supervised individual study at the graduate level to be completed within the course of one semester in the form of a brief report. Graded on S/U basis only

Credit Hour: 1-3
ECE 8011: Software and Cyber Automation in Neuroscience
This course will emphasize software and cyber automation tools in neuroscience to address the emerging needs of big data in neuroscience. Students will work in pairs to address such needs of various neuroscience Labs both within MU and with collaborators outside MU. The students pairs will be provided a list of automation projects to work on (one or maximum two) during the semester, under close supervision of the instructors. They will also be provided access to local cyberinfrastructure at MU, national cyberinfrastructure resources such as CyVerse (www.cyverse.org) and Neuroscience Gateway (https://www.nsgportal.org), as well as public clouds such as XSEDE and Amazon Web Services. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Basic software programming, basic cell biology, or consent of instructor

ECE 8085: Problems in Electrical and Computer Engineering
Supervised investigation of an electrical engineering problem for an MS project. Study culminates in a project report. Graded on a S/U basis only.

Credit Hour: 2-5

ECE 8110: Preparing Advanced Professionals - I
Discussions on a variety of topics: Pedagogy - latest from cognitive science and learning theory, effective teaching, how a university functions, engineering teaching and research: how leading industries perform research and the importance of soft skills, etc. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: restricted to graduate Engineering majors only

ECE 8120: Preparing Advanced Professionals - II
Continues format of ECE 8110 with group discussions and seminars by experts on how to write an effective proposal, including a review of model proposals, model proposal reviews, and a 'hands-on' proposal writing followed by globalization and its effects on professionals. Graded on A-F only.

Credit Hour: 1
Prerequisites: graduate engineering majors only

ECE 8270: Parallel Computer Architecture
The course covers parallel computer architecture (general purpose multi-core and many-core processors, shared and distributed memory systems, clusters). Emphasis will be given to both architectural and programmability aspects. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4270 or ECE 7270, ECE 4220 or ECE 7220 or CMP_SC 4250 or CMP_SC 7250

ECE 8320: Nonlinear Systems
Nonlinear systems including topics such as limit cycles, phase plane analysis, bifurcation, Lyapunov stability, input-output stability, passivity. Topics from control such as feedback linearization, sliding control, and Lyapunov redesign. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: ECE 4310

ECE 8510: Advanced Electromagnetics
Advanced theoretical electromagnetic theory. Investigation of summation problems with general boundary conditions, time varying fields, and time harmonic currents. Basic applications and relationships in classical and relativistic physics.

Credit Hours: 3
Prerequisites: ECE 3510

ECE 8520: Direct Energy Conversion Technologies
Study of direct energy conversion technology and research trends in this area. Topics include energy storage techniques (mechanical, chemical, thermal, inductive, capacitive), thermoelectric generators, photovoltaic generators, thermionic generators, magnetohydrodynamic generators, piezoelectric generators, wind generators, fuel cells. Current research trends in this area will also be examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE Majors or instructors consent

ECE 8530: Advanced Photonics
Concentrated study of optical system design, including integrated optics, semiconductor lasers, quantum wells, optical materials, and electro-optical effects used in modern optical systems.

Credit Hours: 3
Prerequisites: ECE 4530

ECE 8540: Advanced Network Theory and Applications
Advanced study of network theorems including compensation, reciprocity, duality, and maximum power. Theory and application of N-port parameters. Linear and non-linear network synthesis techniques. Analysis of ordinary and partial differential equations to develop electrical analogs for mechanical, pneumatic, thermal, hydraulic systems. Study of non-linear circuit analysis and modeling techniques. Current research trends in this area will also be examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE Majors or instructors consent

ECE 8570: Theoretical Neuroscience I
Properties of nerve cells including membrane potential, action potential, ion channel dynamics, GHK equation, dynamical properties of excitable membranes. Equilibria, stability, eigenvalues and phase portraits. Conductance based models, bifurcations, excitability. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ECE 4310

ECE 8580: Theoretical Neuroscience II
Neural encoding and decoding including firing rate and spike statistics, reverse correlation and visual receptive fields. Cellular and synaptic biophysics. Adaptation and learning including plasticity, classical conditioning, reinforcement learning and representational learning. Graded on A-F basis.

Credit Hours: 3
Prerequisites: ECE 8570
ECE 8610: Power Semiconductor Devices
A study of the semiconductor devices used in switch-mode power converter circuits. Course surveys the field and discusses selected devices in depth.
Credit Hours: 3
Prerequisites: ECE 3610, ECE 4630 and ECE 4650

ECE 8620: Advanced Microelectromechanical Systems
MEMS development cycle, overview of microfabrication, microsystem modeling, mechanical analysis, thermal analysis, transduction mechanism, case studies; Micromirror, accelerometers, pressure sensors, force sensors, RF MEMS switches, Infrared sensors, and Microsystem packaging.
Credit Hours: 3

ECE 8675: Biomedical Image Processing
(same as CMP_SC 8675). This course introduces students to the fundamentals of biomedical image processing and analysis with an emphasis on cellular and tissue microscopy along with anatomical imaging. The course will cover image and video processing techniques and pipelines for image enhancement, restoration, registration, detection, segmentation, classification, and motion analysis that are tailored for biomedical image informatics. This course will provide a rich exposure to a broad range of imaging datasets from the molecular to the anatomical; and train students to implement algorithms for moderately complex tasks in biomedical image analysis. This course is suitable for graduate students in all fields of engineering and science who are interested in understanding and implementing biomedical and biological image analytics and are seeking pointers to the broad literature in the field. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 4655/ECE 7655 or CMP_SC 4650/CMP_SC 7650 or instructor's consent

ECE 8690: Computer Vision
(same as CMP_SC 8690). This course introduces students to the fundamental problems of computer vision, the main concepts and the techniques used to solve such problems. It will enable graduate and advanced undergraduate students to solve complex problems and make sense of the literature in the area. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 4655 or ECE 7655 or CMP_SC 4650 or CMP_SC 7650 or instructor's consent

ECE 8695: Cognitive Computer Vision
One of the more recent trends in computer vision research in the pursuit of human-like capability is the coupling of cognition and vision into cognitive computer vision. This course will emphasize the advanced topics in applying machine learning techniques in computer vision.
Credit Hours: 3
Prerequisites: ECE 4850 or ECE 7850 or CMP_SC 4650 or CMP_SC 7650 or consent of instructor

ECE 8725: Supervised Learning
(same as CMP_SC 8725). This course introduces the theories and applications of advanced supervised machine learning methods. It covers hidden Markov model and expectation maximization (EM) algorithms, probabilistic graphical models, non-linear support vector machine and kernel methods. The course emphasizes both the theoretical underpinnings of the advanced supervised learning methods and their applications in the real world. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

ECE 8730: Fundamentals of Radar Signal Processing
Study of radar signal processing fundamentals. Topics include radar systems, signal models, sampling and quantization of radar signals, radar waveforms, Doppler processing, detection fundamentals, radar imaging.
Credit Hours: 3

ECE 8735: Unsupervised Learning
(same as CMP_SC 8735). Theoretical and practical aspects of unsupervised learning including topics of expectation maximization (EM), mixture decomposition, clustering algorithms, cluster visualization, and cluster validity. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CMP_SC 4720 or CMP_SC 7720 or ECE 4720 or ECE 7720 or instructor's consent

ECE 8790: Digital Processing of SAR Data
Study of digital processing of synthetic aperture radar (SAR) data. Topics cover SAR data fundamentals including concepts, signal processing, pulse compression, signal properties, processing algorithms, and image processing.
Credit Hours: 3

ECE 8800: Sensor Array and Statistical Signal Processing
Introduce the basics on sensor array processing, signal detection and parameter estimation, with their applications in communications and signal processing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ECE 7830 and ECE 8860 or with instructor consent

ECE 8810: Advanced Digital Signal Processing
Topics in digital signal analysis and filtering. Including hardware implementation, speech synthesis and recognition, multi-dimensional transforms, random-signal concepts, design methods and computer aids to analysis and design.
Credit Hours: 3
Prerequisites: ECE 4830

ECE 8830: Visual Signal Processing and Communications
Threats visual digital signal processing and network communications covering both theory and application of coding, compression and communications via the web. Covers such standards as JPEG, MPEG-2 and MPEG-4 as well as motion detection. Graded on A-F basis only.
Credit Hours: 3
ECE 8855: Advanced Image Processing
(same as CMP_SC 8650). This course covers advanced topics in image understanding including multispectral multimodal imaging, motion estimation, texture analysis, geometric level set methods.
Credit Hours: 3
Prerequisites: CMP_SC 4650 or CMP_SC 7650 or instructor's consent

ECE 8860: Probability and Stochastic Processes for Engineers
Introduction to probability, multidimensional complex (phasor) random variables and stochastic processes in electrical engineering.
Credit Hours: 3
Prerequisites: ECE 4830, ECE 4710, or ECE 8620

ECE 8875: Advanced Topics in Computational Intelligence
(same as CMP_SC 8780). This course is a continuation of ECE 7870 in the concepts, models, and algorithms for the development of intelligent systems from the standpoint of the computational paradigms of neural networks, fuzzy set theory and fuzzy logic, evolutionary computation, and swarm intelligence. Advanced topics in these areas will be discussed with a focus on applications of these technologies.
Credit Hours: 3
Prerequisites: ECE 4870 or ECE 7870

ECE 8990: Research-Master Thesis in Electrical and Computer Engineering
Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

ECE 9001: Advanced Topics in Electrical and Computer Engineering
Advanced Topics in Electrical and Computer Engineering
Credit Hours: 3

ECE 9990: Research-Doctoral Dissertation Electrical & Computer Engineering
Independent investigation in a field of electrical engineering to be presented as thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

Emergency Medicine (EMR_ME)

EMR_ME 6034: SCC Emergency Medicine Selective
This elective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care. The student will work 15-16 (~140 hours) rotating shifts in the Emergency Department. During that time, the student will have free access to all patient care activities. The student will assist with patient evaluations and procedures under the close supervision of the Emergency attending physicians, residents, or physician assistants. Specific time will be devoted to learning basic skills needed in emergency medicine. An orientation skills lab will be provided early in the rotation to cover suturing, splinting, etc. Teaching will be primarily a one-on-one exchange with the residents and PA's/Attendings. There are night shifts in this rotation.
Credit Hours: 5
Prerequisites: Successful completion of the first two years of medical school. Successful completion of 5 of the 7 core clerkships. Three of the 5 must be the Surgery Clerkship, Internal Medicine Clerkship, and either the Pediatrics or Family Medicine Clerkship

EMR_ME 6245: ABS Emergency Medicine Research and Review
ABS Emergency Medicine Research and Review
Credit Hour: 5-10

EMR_ME 6760: Emergency Medicine - Rural
Emergency Medicine - Rural
Credit Hours: 5

EMR_ME 6860: EMERGENCY MEDICINE
Emergency Medicine
Credit Hours: 5

EMR_ME 6919: Introduction to Emergency Medicine
This elective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

EMR_ME 6920: Introduction to Pediatric Emergency Medicine
This elective is designed to offer an introductory experience in Pediatric Emergency Medicine (PEM) including all levels of acuity and pre-hospital emergency care.
Credit Hours: 2
Prerequisites: successful completion of the first two years of medical school

EMR_ME 6943: SCC Emergency Medicine 2-week
This elective is designed to offer an introductory experience in Emergency Medicine, including all levels of acuity and pre-hospital emergency care. The student will work rotating shifts of 10 hours each in the Emergency Department at Cox South or Mercy Hospital. During that time, the student will have access to all patient care activities. The student will assist with patient evaluations and select procedures under the close supervision of the Emergency Medicine attending physician. Specific time will be devoted to learning basic skills needed in Emergency Medicine. Teaching will be primarily a one-on-one exchange with the attending physicians.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

Engineering (ENGINR)
ENGINR 1000: Introduction to Engineering
This course will help students identify a field of engineering that they will pursue during their studies at MU. This objective will be achieved by exposing students to design in the different engineering disciplines, overviews of the individual departments, and guest lecturers from industry. Other lectures will be given to help acclimate students to university life. Graded on A-F basis only.
Credit Hour: 1

ENGINR 1100: Engineering Graphics Fundamentals
Introduction to computer-aided design and drafting. Topics include visualization methods and standards techniques for communication and presenting engineering design graphics information.
Credit Hours: 2
Prerequisites or Corequisites: MATH 1500
Prerequisites: Restricted to Engineering Students only, or by departmental consent

ENGINR 1110: Solid Modeling for Engineering Design
Introduction to 3D (three dimensional) modeling techniques using computer aided design software. Topics include model creation techniques and advanced graphical presentation practices. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: ENGINR 1100 or instructor's consent. Restricted to Engineering Students Only or by departmental consent

ENGINR 1200: Statics and Elementary Strength of Materials
Fundamentals of statics; static equilibrium and introduction to elements of mechanics of elastic materials.
Credit Hours: 3
Prerequisites or Corequisites: PHYSCS 2750 C- or higher. Restricted to Engineering Students only or with departmental consent
Prerequisites: MATH 1500 C- or higher

ENGINR 2001: Experimental Course
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

ENGINR 2001W: Experimental Course - Writing Intensive
For sophomore-level students. Content and number of credit hours to be listed in Schedule of Courses.
Credit Hour: 1-99

ENGINR 2100: Circuit Theory for Engineers
DC circuit analysis, inductors and capacitors, first-order response, AC circuit analysis, single-phase AC power and three-phase transformers.
Credit Hours: 3
Prerequisites: MATH 1700. For Non-Electrical and Computer Engineering Majors. Restricted to Engineering Students only or with departmental consent

ENGINR 2100H: Circuit Theory for Engineers - Honors
DC circuit analysis, inductors and capacitors, first order response, AC circuit analysis, single-phase AC power.
Credit Hours: 3
Prerequisites: MATH 1700. Honors eligibility required

ENGINR 2200: Intermediate Strength of Materials
Elements of mechanics of elastic materials.
Credit Hours: 3
Prerequisites: ENGINR 1200 C- or higher. Restricted to Engineering Students only or with departmental consent

ENGINR 2300: Engineering Thermodynamics
(same as MAE 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.
Credit Hours: 3
Prerequisites: PHYSCS 2750. Restricted to Engineering Students Only or departmental consent

ENGINR 2300H: Engineering Thermodynamics - Honors
Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes. May be repeated for credit. Graded on A-F basis only. Prerequisites: Honors eligibility required

ENGINR 2500: A History of Modern Engineering
This course will introduce the student to significant engineering events that have shaped the late modern-area from the French Revolution to the end of World War II (1789-1945). Radical inventions and their dates will be used as historical landmarks throughout the course. Graded on A-F basis only.
Credit Hours: 3

ENGINR 2500H: History of Modern Engineering - Honors
This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only. Prerequisites: Honors eligibility required

ENGINR 2600H: History of Human Spaceflight - Honors
This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only. Prerequisites: Honors eligibility required

ENGINR 2600H: History of Human Spaceflight - Honors/ Writing Intensive
This course will provide an overview of the history of human spaceflight, including early efforts up through the present for the three countries that have flown humans in space (U.S., Russian, and China). Special topics will include a discussion of the major space accidents. Finally, the future of human space exploration will be discussed. May be repeated for credit. Graded on A-F basis only. Prerequisites: Honors eligibility required

ENGINR 3000: Short Term Education Abroad
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.
Credit Hours: 3
Prerequisites: Instructor's consent required. Students must be in Academic Good Standing
ENGINR 3000H: Short Term Education Abroad - Honors
Introduction to history and culture of country and/or cities in specified country. Students will make engineering profession and corporate site visits. Lecture activities will focus on industry and society, with country and/or cities compared and contrasted to U.S. engineering. Graded A-F only.

Credit Hours: 3
Prerequisites: Instructor's consent required. Students must be in Academic Good Standing

ENGINR 4000: Study Abroad Technical Elective
This course is designed to provide students with an international experience while also potentially fulfilling a required engineering technical elective course. Engineering technical electives are courses that are relevant or related to engineering from a broad range of fields including math and science as well as the various engineering departments. This course will be used as the umbrella course for all Engineering Technical Elective Study Abroad Opportunities and each course will provide a separate section number.

Credit Hours: 3

ENGINR 4050: Cooperative Education Program
For Engineering Cooperative Education Program Students. No billing hours, No term finalization.

Credit Hours: 0

ENGINR 4890: Multi-disciplinary Senior Engineering Capstone Design
Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Graded A-F only.

Credit Hours: 3
Prerequisites: Instructor's consent. Student's department consent also required
Recommended: Senior standing

ENGINR 4890W: Multi-disciplinary Senior Engineering Capstone Design - Writing Intensive
Engineering design and prototyping including reliability, testing, evaluation, preparation of documentation, safety, ethics, manufacturing, intellectual property, economic and environmental constraints. Oral and written reports. Graded A-F only.

Credit Hours: 3
Prerequisites: Instructor's consent. Student's department consent also required
Recommended: Senior standing

ENGINR 8100: Design and Development of Biomedical Innovations
(same as BIOL_EN 8100, MPP 8100). The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical needs, articulate a need statement without integrating solution, design and develop a solution. Participants will learn to assess the commercial potential of clinical needs by performing market analysis and valuing customer needs. A conceptual understanding about development of a prototype for a device and also drug development by different brainstorming process will be provided. Details of regulatory, reimbursement, patenting process required for product development will be explained with examples. An overview about how to evaluate preliminary designs, define product specifications, comply with manufacturing principles and methods, costs, cGMP requirements will be explained. Quality control and Quality assurance necessities for drug/device will be elucidated with case studies. Participants will gain knowledge about different business models for drug and devices, estimate market penetration and how to make profitable, patient-driven products. Graded on A-F basis only.

Credit Hours: 3

English (ENGLISH)

ENGLSH 1000: Exposition and Argumentation
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

Credit Hours: 3
ENGLSH 1000 - MOTR ENGL 200: Composition II

ENGLSH 1000H: Honors Exposition English
Stresses writing as a process, with due attention given to critical reading and thinking skills applicable to all college classes, as well as to invention, drafting, revising, and rewriting. English 1000 is a prerequisite for any Writing Intensive course.

Credit Hours: 3
Prerequisites: Honors eligibility required

ENGLSH 1010W: Missouri Transfer Equivalent to Comp 1
Equivalent to COMP 1 taken at a Missouri Institutions. For transfer purposes only in accordance with the Missouri Department of Higher Education standards for the 42 general education block. Guaranteed transfer course as part of Missouri transfer policies. Fulfills MU lower division Writing Intensive.

Credit Hour: 1-10
ENGLSH 1010W - MOTR ENGL 100: Composition I

ENGLSH 1060: Human Language
(same as ANTHRO 1060, C_S_D 1060 and LINGST 1060). General introduction of various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

ENGLSH 1100: Reading Literature
Introduces the student to the values, rigors, and pleasures of reading literature. Intended for first-year, non-English majors. No more than six hours may be taken in the Reading Literature Series.

Credit Hours: 3

Credit Hours: 3

ENGLSH 2110: Theory and Practice of Tutoring Writing Seminar - Honors
Provides intensive guided practice in expository and persuasive writing.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2115H: Theory and Practice of Tutoring Writing Seminar - Honors/Writing Intensive
Provides intensive guided practice in expository and persuasive writing.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor's consent. Honors eligibility required

ENGLSH 2120: Writing About Literature
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.
Credit Hours: 3
Prerequisites: ENGLSH 1000

ENGLSH 2120H: Writing About Literature - Honors
Introduces the student to reading in three or four genres (fiction, poetry, drama, and non-fiction) and to literary concepts and terms and their application in literary analysis.

ENGLSH 2125: Introduction to World Literatures
Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2125 - MOTR LITR 200: World Literature

ENGLSH 2126: Introduction to World Literatures, 1890 to Present
Presents and puts into context works by writers from different nations or ethnic backgrounds, includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2126 - MOTR LITR 200: World Literature

ENGLSH 2130: Professional Writing
Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2130 - MOTR ENGL 110: Technical Writing

ENGLSH 2135: Introduction to World Literatures
Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2135 - MOTR LITR 200: World Literature

ENGLSH 2136: Introduction to World Literatures, 1890 to Present
Presents and puts into context works by writers from different nations or ethnic backgrounds, includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2136 - MOTR LITR 200: World Literature

ENGLSH 2140: Twentieth-Century Literature
A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time.
Credit Hours: 3
Recommended: ENGLSH 1000

ENGLSH 2140W: Twentieth-Century Literature - Writing Intensive
A multi-genre survey emphasizing American and British works within the intellectual and cultural context of our time.
Credit Hours: 3
Recommended: ENGLSH 1000

ENGLSH 2150: Popular Literature
Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes.
Credit Hours: 3
Recommended: ENGLSH 1000

ENGLSH 2150W: Popular Literature - Writing Intensive
Study of literary genres, such as science fiction and the detective novel, that may be overlooked in traditional literature classes.
Credit Hours: 3
Recommended: ENGLSH 1000

ENGLSH 2155: Introduction to World Literatures
Presents and puts into context works by writers from different nations or ethnic backgrounds; includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2155 - MOTR LITR 200: World Literature

ENGLSH 2159: Introduction to World Literatures, 1890 to Present
Presents and puts into context works by writers from different nations or ethnic backgrounds, includes works in two or more literary genres. No more than six hours may be taken in the Introduction to World Literature series.
Credit Hours: 3
Prerequisites: ENGLSH 1000
ENGLSH 2159 - MOTR LITR 200: World Literature

ENGLSH 2167: Major Authors, 1603 TO 1789
See ENGLSH 2160 for course description.
Credit Hours: 3

ENGLSH 2168: Major Authors, 1789 to 1890
See ENGLSH 2160 for course description.
Credit Hours: 3

ENGLSH 2169: Major Authors, 1890 to Present
See ENGLSH 2160 for course description.
Credit Hours: 3

ENGLSH 2170: Theory and Practice of Tutoring Writing Seminar - Honors
Provides intensive guided practice in expository and persuasive writing.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor's consent. Honors eligibility required

ENGLSH 2175H: Theory and Practice of Tutoring Writing Seminar - Honors/Writing Intensive
Provides intensive guided practice in expository and persuasive writing.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor's consent. Honors eligibility required

ENGLSH 2180: Professional Writing
Introduction to the communication required in any professional field, including basic letters and resumes, reviews, reports, and electronic networking, culminating in an extensive report and a related oral presentation.
Credit Hours: 3
Prerequisites: ENGLSH 1000

theatre, including theory and practice. Special playwriting problems and techniques.

Credit Hours: 3
Prerequisites: ENGLSH 3560

ENGLISH 4560W: Advanced Playwriting: Problems - Writing Intensive
(same as THEAT 4920; cross-leveled with ENGLSH 7560 and THEATR 7920). Advanced study of the writing process as applied to theatre, including theory and practice. Special playwriting problems and techniques.

Credit Hours: 3
Prerequisites: ENGLSH 3560

ENGLISH 4570: Adaptation of Literature for the Stage
(same as THEAT 4930; cross-leveled with ENGLSH 7570 and THEATR 7930). Explores adaptation principles and practices with literature not originally written for the stage. Graded on A-F basis only.

Credit Hours: 3

ENGLISH 4600: Structure of American English
(same as LINGST 4600; cross-leveled with LINGST 7600, ENGLSH 7600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.

Credit Hours: 3
Recommended: ENGLSH 4600 and ENGLSH 4610 or equivalent

ENGLISH 4610: History of the English Language
(same as LINGST 4610; cross-leveled with LINGST 7610, LINGST 7620). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

Credit Hours: 3
Recommended: junior standing

ENGLISH 4620: Regional and Social Dialects of American English
(same as LINGST 4620; cross-leveled with ENGLSH 7620, LINGST 7620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English.

Credit Hours: 3
Recommended: ENGLISH 4600 and ENGLISH 4610 or equivalent

ENGLISH 4630: Phonology
(same as LINGST 4630; cross-leveled with ENGLSH 7630, LINGST 7630). Survey of the sound patterns of English and other languages.

Credit Hours: 3
Recommended: ENGLISH 1060 or ENGLISH 4600 or equivalent

ENGLISH 4640: Syntax
(same as LINGST 4640; cross-leveled with ENGLSH 7640, LINGST 7640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages.

Credit Hours: 3
Recommended: ENGLISH 1060 or ENGLISH 4600 or equivalent

ENGLISH 4660: Historical Linguistics
(same as LINGST 4420, ANTHRO 4420; cross-leveled with ENGLSH 7660, ANTHRO 7420, LINGST 7420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3
Recommended: junior/senior standing

ENGLISH 4670: Field Methods in Linguistics
(same as LINGST 4870, ANTHRO 4870; cross-leveled with ENGLSH 7670, LINGST 7870, ANTHRO 7870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Contact the Linguistics advisor to request permission
Recommended: 9 hours of linguistics

ENGLISH 4670W: Field Methods in Linguistics - Writing Intensive
(same as LINGST 4870 and ANTHRO 4870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Contact Linguistics advisor to request permission
Recommended: 9 hours of linguistics

ENGLISH 4700: Special Themes in Folklore
(same as ANTHRO 4150; cross-leveled with ENGLSH 7700). Intensive study in a selected area of folklore: folk narrative, folk song, myth, proverb, etc., folklore of a particular group. ENGLSH 4700 and ENGLISH 4710 may be repeated for a maximum of six hours with department's consent.

Credit Hours: 3

ENGLISH 4710: Themes in African Diaspora Folklore
(same as ANTHRO 4160 and BL_STU 4710; cross-leveled with ENGLSH 7710, ANTHRO 7160, BL_STU 7710). Intensive study in a selected area of African Diaspora folklore: folk narrative, folk song, myth, proverb, etc., folklore and literature; or the folklore of a particular group. ENGLSH 4700 and ENGLISH 4710 may be repeated for a maximum of six hours with instructor's consent.

Credit Hours: 3

ENGLISH 4770: Oral Tradition
(same as ANTHRO 4170; cross-leveled with ENGLSH 7770, ANTHRO 7170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and sophomore standing

ENGLSH 4770H: Oral Tradition - Honors
(same as ANTHRO 4170; cross-leveled with ENGLSH 7770, ANTHRO 7170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, foktales, jokes, legends, myths, proverbs, prose, or verses. Prerequisites: ENGLSH 1000 and sophomore standing; Honors eligibility required
Credit Hours: 3

ENGLSH 4780: Women's Folklore and Feminist Theory
(same as WGST 4780; cross-leveled with ENGLSH 7780, WGST 7780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).
Credit Hours: 3
Recommended: junior standing

ENGLSH 4810: Film Theory
(same as FILM_S 4810, DST 4810; cross-leveled with ENGLSH 7810, FILM_S 7810, DST 7810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.
Credit Hours: 3
Prerequisites: ENGLSH 1000
Recommended: Junior standing

ENGLSH 4820: Studies in Film Genre
(same as FILM_S 4820; cross-leveled with ENGLSH 7820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken for credit toward the major.
Credit Hours: 3
Prerequisites: ENGLSH 1000
Recommended: junior standing

ENGLSH 4840: Culture and Media
(same as FILM_S 4840, DST 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.
Credit Hours: 3
Prerequisites: ENGLSH 1000
Recommended: Junior standing

ENGLSH 4938: Advanced Screenwriting: Styles
(same as THEATR 4938; cross-leveled with ENGLSH 7938, THEATR 7938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/fantasy, musicals, political docudrama, and science fiction.
Credit Hours: 3
Prerequisites: THEATR 2920 or ENGLSH 2560
Recommended: THEATR 3930

ENGLSH 4938W: Advanced Screenwriting: Styles - Writing Intensive
(same as THEATR 4938; cross-leveled with ENGLSH 7938, THEATR 7938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/ fantasy, musicals, political docudrama, and science fiction.
Credit Hours: 3
Prerequisites: THEATR 2920 or ENGLSH 2560
Recommended: THEATR 3930

ENGLSH 4940: Internship in English
Students work in an agency or institution using their English-related skills for one to three credit hours. Graded on an S/U basis only.
Credit Hour: 1-3
Prerequisites: Department consent

ENGLSH 4950: Internship in Publishing
Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program.
Credit Hours: 3
Prerequisites: instructor's consent

ENGLSH 4955: Independent Research in English
Development of a carefully considered research project under close supervision of a faculty member. Open to undergraduate students only.
Credit Hour: 1-3
Prerequisites: junior standing and departmental consent

ENGLSH 4960: Special Readings in English
Individual work with conferences adjusted to needs of student.
Credit Hour: 1-99
Prerequisites: Consent of instructor

ENGLSH 4970: Capstone Experience
For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter).
Credit Hours: 3

ENGLSH 4970W: Capstone Experience - Writing Intensive
For students in their last semester, this course focuses on a major project and the processes of selection, research, and writing leading to its completion. Includes a professional component (resume, cover letter).

**Prerequisites:**

- ENGLSH 3560
ENGLSH 7600: Structure of American English
(same as LINGST 7600; cross-leveled with ENGLSH 4600, LINGST 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.
Credit Hours: 3

ENGLSH 7610: History of the English Language
(same as LINGST 7610; cross-leveled with ENGLSH 4610, LINGST 4610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.
Credit Hours: 3

ENGLSH 7611: The Story of English: Medieval to Modern
History of the English language, explored through literature, with an emphasis on its development from the early Middle Ages through the Early Modern period (ca. 500-ca. 1700).
Credit Hours: 3

ENGLSH 7620: Regional and Social Dialects of American English
(same as LINGST 7620; cross-leveled with ENGLSH 4620, LINGST 4620). The study of regional and social variation in pronunciation, vocabulary, and grammar of American English.
Credit Hours: 3
Prerequisites: ENGLSH 4600 and ENGLSH 4610 or equivalent

ENGLSH 7630: Phonology
(same as LINGST 7630; cross-leveled with LINGST 4630, ENGLSH 4630). Survey of the sound patterns of English and other languages.
Credit Hours: 3

ENGLSH 7640: Syntax
(same as LINGST 7640; cross-leveled with LINGST 4640, ENGLSH 4640). Study of the properties of phrase-and sentence-level grammar, emphasizing English, with some comparison to other languages.
Credit Hours: 3
Recommended: at least one course in linguistics

ENGLSH 7660: Historical Linguistics
(same as LINGST 7420, ANTHRO 7420; cross-leveled with ENGLSH 4660, ANTHRO 4420, LINGST 4420). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.
Credit Hours: 3

ENGLSH 7670: Field Methods in Linguistics
(same as LINGST 7870, ANTHRO 7870; cross-leveled with LINGST 4870, ENGLSH 4670, ANTHRO 4870). Intensive training in collection and analysis of data elicited from a native speaker of a non-Indo-European language. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: instructor's consent

Recommended: 9 hours in linguistics

ENGLSH 7700: Special Themes in Folklore
(same as ANTHRO 7150; cross-leveled with ENGLSH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses. Prerequisites: Instructor's consent
Credit Hours: 3

ENGLSH 7770: Oral Tradition
(same as ANTHRO 7170; cross-leveled with ENGLSH 4770, ANTHRO 4170). Study of oral tradition from living cultures as well as literary works and mass media with roots in verbal art. Oral tradition is a form of human communication through which ideas, knowledge, art, and cultural material is received, preserved, and transmitted orally from one generation to another or from one person to another. May include such folklore genres as ballads, chants, folktales, jokes, legends, myths, proverbs, prose, or verses.
Credit Hours: 3

ENGLSH 7780: Women's Folklore and Feminist Theory
(same as WGST 7780; cross-leveled with ENGLSH 4780, WGST 4780). Examines folklore and artistic expression of women in relation to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).
Credit Hours: 3

ENGLSH 7820: Studies in Film Genre
(cross-leveled with ENGLSH 4820, FILM_S 4820). Topics (e.g. The Western, Film Noir) announced at time of registration. No more than six hours may be taken.
Credit Hours: 3

ENGLSH 7938: Advanced Screenwriting: Styles
(same as THEATR 7938; cross-leveled with ENGLSH 4938, THEATR 4938). Students develop advanced skills of screenwriting through a focus on non-realistic, non-linear dramatic writing styles in development of a full-length screenplay. Areas of study will include techniques of magic realism, symbolism, expressionism, absurdism, surrealism/dada, mythic/fantasy, musicals, political docudrama, and science fiction.
Credit Hours: 3

ENGLSH 7950: Internship in Publishing
Offers practical experience working with a literary or scholarly publication edited or sponsored by faculty members. Graduate students in English must take the course two semesters in order to count three hours toward the completion of their program.
Credit Hours: 3

Advanced fiction writing designed for graduate students, with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.
Credit Hours: 3

ENGLSH 8520: Advanced Writing of Nonfiction Prose
Advanced workshop in nonfiction prose for graduate students intending to produce professional quality work. May repeat to twelve hours with consent of instructor.
Credit Hours: 3

ENGLSH 8530: Advanced Writing of Poetry
Advanced poetry writing designed for graduate students with the intention of producing work of professional quality. May repeat to twelve hours with consent of instructor.
Credit Hours: 3

ENGLSH 8560: Graduate Seminar in Playwriting
(same as THEATR 8987). Seminar in theory, practice, and pedagogy of playwriting, students a mid-term in playwriting theory, a full-length play, a research paper, and a syllabus and lesson plans for an undergraduate playwriting course.
Credit Hours: 3

ENGLSH 8600: Seminar in the English Language
(same as LINGST 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic Analysis) announced at time of registration. May repeat to twelve hours with department's approval.
Credit Hours: 3

ENGLSH 8700: Seminar in Folklore
(same as ANTHRO 8157 and REL_ST 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups. May repeat to twelve hours with department's consent.
Credit Hours: 3

ENGLSH 9090: Doctoral Dissertation Research
Leads to preparation of dissertation. Graded on S/U basis only.
Credit Hour: 1-12

English Language Support Program (ELSP)

ELSP _0100: Grammar and Composition I
Students learn grammatical patterns and sentence construction used in academic writing and focus on improving sentence-level grammatical accuracy in the writing of coherent, well-developed paragraphs. Graded S/U only.
Credit Hours: 3

ELSP _0200: Reading and Vocabulary
Students develop vocabulary and reading strategies required to comprehend academic textbooks and literature in various fields of study. Graded on S/U basis only.
Credit Hours: 3

ELSP _0300: Grammar and Composition II
Students learn how to write clear and well-developed multi-paragraph academic essays using various methods of organization through the process of planning, drafting, revising, editing, and peer reviewing. Students also learn to work with sources. Grammatical structures relevant to the methods of organization are reviewed and practiced. Graded S/U Only.
Credit Hours: 3

ELSP _0400: Oral Communication
This course emphasizes the development of fluency and intelligibility in spoken English. Through individual and group activities, students work on improving pronunciation, practicing conversation strategies, and delivering oral presentations. Enrollment in ELSP _0400 is restricted to graduate students and scholars who have attained a satisfactory score on the Test of English as a Foreign Language (TOEFL). Graded S/U Only.
Credit Hours: 3

Environmental Science (ENV_SC)

ENV_SC 1100: Introduction to Environmental Science
This class provides an opportunity to develop an understanding of environment, physical and social causes of environmental problems, their impacts, and strategies to manage these issues.
Credit Hours: 3
Prerequisites: Enrollment restricted to College of Agriculture, Food and Natural Resources undergraduates and students minoring in Environmental Science
ENV_SC 2001: Topics in Environmental Science - General
Organized study of selected topics. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99

ENV_SC 2600: Sustainability Foundations: An Introduction to Sustainability
This course introduces fundamental concepts of sustainability from sustainable development to sustainability science. It focuses on human-environment systems, the characteristics of these systems, and patterns of change. Course materials interrogate taken-for-granted assumptions that shape human relationships with the natural world. You will learn to identify common dynamics leading to social and environmental problems with the aim of identifying alternative actions (solutions) for transitioning towards sustainability. Sustainability integrates the social and biophysical sciences; and implementing solutions requires the integration of the social justice, the arts, and humanities. Through a variety of interdisciplinary perspectives and frameworks, you will learn about current sustainability research and be able to develop an understanding of what sustainability means to you and your field of study. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

ENV_SC 3085: Problems in Environmental Science
Special individualized projects or readings in environmental science.
Credit Hour: 1-99

ENV_SC 3250: Pollutant Fate and Transport
(same as CV_ENG 3250). Introduction to concepts governing pollutant fate and transport in the environment, including pollutant interactions within and migration through environmental systems, as well as analytical techniques and tools necessary to quantify conditions and movement.
Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or CV_ENG 3200; and CHEM 1320

ENV_SC 3290: Soils and the Environment
(same as SOIL 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.
Credit Hours: 3
Prerequisites: SOIL 2100, ENGLISH 1000. Recommended 3 hours of CHEM courses

ENV_SC 3290W: Soils and the Environment - Writing Intensive
(same as SOIL 3290W). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.
Credit Hours: 3

ENV_SC 3330: Environmental Land Use Management
An introduction to environmentally sustainable use and management of land.
Credit Hours: 3

ENV_SC 3400: Water Quality and Natural Resources Management
(same as NAT_R 3400). Introduction to broad aspects of water quality science, management, and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology. Graded on A-F basis only.
Credit Hours: 3
Recommended: CHEM 1320 and ENV SC 1100 or NAT_R 1070

ENV_SC 3500: Pollutant Fate and Transport
This course introduces students to concepts governing pollutant fate and transport in the environment, and it provides students with the quantitative tools necessary to estimate the fate and transport of pollutants in the environment.
Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100, and CHEM 1320

ENV_SC 4024: Foundations of Environmental Education
(same as NAT_R 4024; cross-leveled with NAT_R 7024). This course provides a theoretical foundation to environmental education (EE). The purpose of this course is to develop the knowledge and skills for developing quality, age-appropriate EE for students in both formal and non-formal education setting. The emphasis is on EE curriculum materials, resources, and programs that can be used with students in settings at classrooms, nature centers, museums, and parks. This course involves training in the Missouri Department of Conservation Discover Nature School educational materials, and in observing and teaching EE lessons in a local nature center. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 1010 or ENV_SC 1100 or NAT_R 1060 or NAT_R 1070 or NAT_R 2160 or Instructor's consent

ENV_SC 4085: Problems in Environmental Science
Special individualized problems or readings in environmental science.
Credit Hour: 1-99

ENV_SC 4100: Lake Ecology
(same as NAT_R 4100; cross-leveled with ENV_SC 7100, NAT_R 7100). Ecology of inland waters with emphasis on productivity. Graded on A-F basis only.
Credit Hours: 3
Recommended: senior standing or BIO_SC 3650
ENV_SC 4300: Methods in Aquatic Ecology
(same as NAT_R 4300; cross-leveled with ENV_SC 7300, NAT_R 7300).
Methods used for quantitative assessment of water quality and quantity in
inland waters. Graded on A-F basis only.
Credit Hours: 3
Recommended: senior standing or BIO_SC 3650 and ENV_SC 4100/
NAT_R 4100 or ENV_SC 3400/NAT_R 3400 or FOREST 4390

ENV_SC 4305: Environmental Soil Physics
(same as SOIL 4305). Study of soil physical properties and processes
important in solving environmental problems. Topics include soil solids,
water content and energy, and transport of water, solutes, gas and heat.
Credit Hours: 3
Prerequisites: SOIL 2100
Recommended: PHYSCS 1210 or equivalent

ENV_SC 4306: Environmental Soil Physics Laboratory
(same as SOIL 4306). Introduction to the methodology and equipment for
measurement of soil physical properties and processes.
Credit Hours: 2
Prerequisites or Corequisites: ENV_SC 4305

ENV_SC 4312: Environmental Soil Microbiology
(same as SOIL 4312). Microbiology/ecology of life in the soil ecosystem.
Emphasis is placed on the role of microbes in nutrient cycling, microbial
pesticide/xenobiotic transformation bioremediation, etc.
Credit Hours: 3
Prerequisites: SOIL 2100
Recommended: general microbiology

ENV_SC 4318: Environmental Soil Chemistry
(same as SOIL 4318 and GEOL 4318). Study of chemical constituents
and processes occurring in soils. Topics include soil minerals and
weathering processes, organic matter, solution chemistry, oxidation-
reduction reactions and adsorption processes.
Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330;
junior standing or instructor's consent

ENV_SC 4320: Hydrologic and Water Quality Modeling
(same as NAT_R 4320). Introduction to models for simulating hydrologic
and water quality processes. Emphasis is placed on watersheds to
provide experience with the use of simulation models for natural resource
decision making.
Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100

ENV_SC 4396: Agroforestry for Watershed Restoration
Agroforestry for watershed restoration will focus on integrated
approaches for improved water quality, soil health, and economic
benefits. Students will learn principles and practices, critical analysis and
application of agroforest practices to improve overall environmental
quality. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385

ENV_SC 4940: Environmental Science Internship
Supervised professional experience with an approved public or private
organization. Graded on S/U basis only.
Credit Hour: 1-99

ENV_SC 7100: Lake Ecology
(same as NAT_R 7100; cross-leveled with ENV_SC 4100, NAT_R 4100).
Ecology of inland waters with emphasis on productivity. Graded on A-F
basis only.
Credit Hours: 3
Recommended: BIO_SC 3650

ENV_SC 7300: Methods in Aquatic Ecology
(same as NAT_R 7300; cross-leveled with ENV_SC 4300, NAT_R 4300).
Methods used for quantitative assessment of water quality and quantity in
inland waters. Graded on A-F basis only.
Credit Hours: 3
Recommended: senior standing or BIO_SC 3650. ENV_SC 4100 or
NAT_R 4100 or NAT_R 3400 or FOREST 4390

ENV_SC 7305: Environmental Soil Physics
(same as SOIL 7305). Study of soil physical properties and processes
important in solving environmental problems. Topics include soil solids,
water content and energy, and transport of water, solutes, gas and heat.
Credit Hours: 3
Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent

ENV_SC 7306: Environmental Soil Physics Laboratory
(same as SOIL 7306). Introduction to the methodology and equipment for
measurement of soil physical properties and properties and processes.
Prerequisites or Corequisites: SOIL 4305.
Credit Hours: 2

ENV_SC 7312: Environmental Soil Microbiology
(same as SOIL 7312). Microbiology/ecology of life in the soil ecosystem.
Emphasis is placed on the role of microbes in nutrient cycling, microbial
pesticide/xenobiotic degradation and bioremediation, soil quality and
pathogen regulation in the environment. Nitrogen fixation, mycorrhizal
processes are discussed.
Credit Hours: 3
Prerequisites: SOIL 2100, PHYSCS 1210 or equivalent

ENV_SC 7318: Environmental Soil Chemistry
(same as SOIL 7318 and GEOL 7318). Study of chemical constituents
and processes occurring in soils. Topics include soil minerals, and
weathering processes, organic matter, solution chemistry, oxidation-
reduction reactions and adsorption processes.
Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330

ENV_SC 7320: Hydrologic and Water Quality Modeling
(same as NAT_R 7320). Introduction to models for simulating hydrologic
and water quality processes. Emphasis is placed on watersheds to
provide experience with the use of simulation models for natural resource decision making.

Credit Hours: 3
Prerequisites: ENV_SC 1100 or SOIL 2100 or equivalent

ENV_SC 7396: Agroforestry for Watershed Restoration
Agroforestry for watershed restoration will focus on integrated approaches for improved water quality, soil health, and economic benefits. Students will learn principles and practices, critical analysis and application of agroforestry practices to improve overall environmental quality. May be repeated for credit. Graded on A–F basis only.

Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385 or permission of instructor

ENV_SC 8090: Masters Research in Environmental Science
Original investigations in environmental science for presentation in a thesis. Graded on S/U basis only.

Credit Hours: 1-10

ENV_SC 8400: Solute Transport in the Vadose Zone
(same as SOIL 8400). Transport of water and solutes in geomedia with emphasis on development of the equations of flow. Evaluation of analytical and numeral solutions to equations describing transport phenomena.

Credit Hours: 3
Prerequisites: ENV_SC 7305 or SOIL 7305

Environmental Studies (ENV_ST)

ENV_ST 2150: Directed Independent Study
Working with Environmental Studies you will find and develop a research project or an internship with the university, a government agency, a business or a non-profit agency. The project will be directed towards solving an environmental problem.

Credit Hours: 1-3
Prerequisites: instructor's consent

Family And Community Medicine (F_C_MD)

F_C_MD 6001: Family Medicine Clerkship
Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, nursing home settings and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

Credit Hours: 8

F_C_MD 6011: Rural Family Medicine Clerkship
Rural Family Medicine Clerkship

Credit Hours: 8

F_C_MD 6021: Springfield Family Medicine Clerkship
Core learning experiences take place in ambulatory clinic settings. Students work with experienced clinicians and senior residents, spending time in University teaching practices and in community-based practices. Students also may spend time seeing patients in emergency room, hospital, nursing home settings and taking call with residents and practicing physicians. A high volume of patients of all ages with a wide range of problems is encountered. Many patients will have undifferentiated problems.

Credit Hours: 8
Prerequisites: successful completion of the first two years of medical school

F_C_MD 6036: SCC Palliative Care Elective
Students will learn a multidisciplinary approach to the care of the palliative care patient while working in a variety of clinical settings. This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. Each week students will work with palliative care physicians at either Cox or Mercy Palliative Care Service and/or a Hospice agency. Students will have the opportunity to see patients undergoing palliative care assessment and observe nursing staff and professional therapy staff in their work with patients and families. Students will participate in various palliative care- related conferences. Students will participate in inpatient palliative care services as well as outpatient palliative care clinics. The student will work with faculty in the Departments of Family and Community Medicine as well as Internal Medicine.

Credit Hours: 5
Prerequisites: Successful completion of 5 of 7 core clerkships, one of which must be either Family Medicine or Internal Medicine. IN_MED 6002, 6012, 6022, or 6102. F_C_MD 6001, 6011, 6021, or 6101

F_C_MD 6048: SCC Rural Family Medicine Selective
The selective is designed for self-motivated students interested in rural primary care, who are willing to explore a variety of outpatient clinical and community experiences. During this block, students will primarily be working with a faculty member in an outpatient Mercy or Cox Family Medicine Clinic in Southwest Missouri. Up to a 50 mile commute from Springfield may be required. There may be opportunities to participate in the care of patients in a variety of settings including nursing home visits, home visits, and urgent care. There will be the opportunity to participate in the care of patients in all life stages (pregnancy, pediatrics, geriatrics) as well as participate in office based procedures. To gain a better understanding of community resources and needs, students will visit local agencies such as the County Health Department, WIC, Parents as Teachers, the public school system, the Chamber of Commerce, or other community resources as identified by the student and faculty. Students will also spend time with the front office, nursing, and laboratory staff to learn about practice management. During this month, students will work on a scholarly project to improve patient care and present this educational topic to the faculty and staff at the clinic.

Credit Hours: 5
Prerequisites: Successful completion of the first two years of medical school. Successful completion of five of the seven core clerkships. One of the five must be the Family Medicine Clerkship.

F_C_MD 6049: SCC Palliative Care Selective
This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. The student will be expected to function at a sub-intern level and will be expected to document advance care planning and lead discussions with patients and their families. Each week students will work with palliative care physicians at either Cox or Mercy Palliative Care Service and/or a Hospice agency. Students will have the opportunity to see patients undergoing palliative care assessment and observe nursing staff and professional therapy staff in their work with patients and families. Students will participate in various palliative care-related conferences. Students will participate in inpatient palliative care services as well as outpatient palliative care clinics. The student will work with faculty in the Departments of Family and Community Medicine as well as Internal Medicine.

Credit Hours: 5
Prerequisites: Successful completion of the first two years of medical school as well as five of the seven core clerkships. Two of the five must be the Medicine Clerkship and Family Medicine Clerkship.

F_C_MD 6051: SCC Primary Care Dermatology 4WK Elective
Students participate in the evaluation of patients with skin disease Primary Care Outpatient clinic. Students will also complete the American Academy of Dermatology online student modules designed for a 4 week curriculum and the self-evaluation that is provided. Students will gain knowledge and demonstrate comprehension of a breadth of basic general dermatologic diseases. They will care for adults and pediatric patients as well as review supplied photographs for supplementation to develop their clinical diagnostic skills. The rotation is designed to provide the medical student with a broad general base in clinical dermatology for the non-dermatologist.

Credit Hours: 5
Prerequisites: Successful completion of the Family Medicine clerkship. Faculty approval is required of all Springfield electives.

F_C_MD 6101: Remediation Family Medicine Clerkship
Enrolled students are those who received an unsatisfactory grade in a Family Medicine Clerkship at any Mizzou Med location or site. This course allows them the opportunity to rectify a deficiency.

Credit Hours: 8
Prerequisites: F_C_MD 6001 Family Medicine Clerkship, received unsatisfactory grade.

F_C_MD 6253: ABS Family and Community Medicine Research
ABS Family and Community Medicine Research

Credit Hour: 5-10

F_C_MD 6475: Family Medicine Elective (FP Orientation)
This elective is for Integrated Residents in the Department of Family and Community Medicine only. Two core clinical rotations are required, including Family Medicine Clerkship. During this one year longitudinal experience, Integrated Residents will work closely with senior residents and faculty members to enhance the knowledge and skills needed to care for patients in a comprehensive family medicine continuity clinic. Integrated Residents are required to attend orientation activities during 15A. Regular attendance to Wednesday departmental Grand Rounds and Tuesday afternoon Resident Seminars is also expected.

Credit Hours: 5
Prerequisites: restricted to 4th year medical students

F_C_MD 6477: Family Medicine Elective Preceptorship
May be available as a rural offsite elective: contact the MU-AHEC Coordinator. Goals/Objectives: During this elective the student works closely with a family physician in private practice. Students both observe the preceptor’s patient encounters and take primary responsibility for several patients each day, discussing diagnosis and formulating management plans with supervision by the preceptor. The Preceptorship also provides opportunities not available elsewhere in the medical school curriculum, including seeing the patient’s illness in its context, assessing a community’s health care system, and learning about practice management. Evaluations: Evaluation of the student is based on the preceptor’s evaluation and comments. Notes: Site must be pre-approved by the Course Director.

Credit Hours: 5
Prerequisites: Students should have completed at least two clinical blocks, plus the Family Practice Clerkship.

F_C_MD 6483: Preventive/Community Medicine
Preventive/Community Medicine

Credit Hours: 5

F_C_MD 6485: Geriatrics-Family and Community Medicine Elective
Goals/Objectives: This is an outpatient experience in a variety of settings. Each week students will: 1. Work with Dr. David Cravens and other health care providers at Lenoir Village, Lenoir Manor, Lenoir Health Care and Maplewood Apartments. These all represent different levels and types of care available to elders. a. Students will develop an understanding of the available care and residential options that elders utilize. 2. Work with several geriatricians in the SAGE Clinic and/or Geriatrics Clinic at Green Meadows. a. Students will improve their understanding of care of elders in the outpatient setting. b. Students will also see patients undergoing geriatric assessment and thus develop a better understanding of the multidisciplinary approach to geriatric assessment. 3. Additional experiences may be arranged depending on the student’s interests. 4. Participate in the various conferences related to geriatrics. Evaluations: Final evaluation will be determined by the attending physicians supervising the student during the block.

Credit Hours: 5
Prerequisites: Must have completed all core clerkships.

F_C_MD 6486: Evidence Based Medical Writing in Family Medicine
Student will co-author a draft of an evidence-based article under the supervision of FCM faculty with evidence-based writing experience. Before writing begins, students complete an evidence-based medicine curriculum using online modules. FCM integrated residents will also participate in a departmental editorial review session.

Credit Hours: 5
Prerequisites: restricted to 4th year medical students.
F_C_MD 6487: Family and Community Medicine Palliative Care Elective
This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with terminal condition.
Credit Hours: 5
Prerequisites: F_C_MD 6001; restricted to 4th year medical students

F_C_MD 6488: Family Medicine Outpatient Elective
Students will have the opportunity to work with two to four Family Medicine physicians at one of our UMHC Family Medicine clinics (South Providence Medical Building, Keene Family Medicine clinic, Smiley Family Medicine clinic, Ashland Family Medicine clinic, Callaway physicians, Fulton Family Health, or Fayette Medical clinic). Students will be paired with two to four faculty members or senior FM residents and will be responsible for seeing patients in the outpatient setting. Duties include obtaining appropriate history and performing a physical exam, medical decision making, patient education, documenting a clinic encounter, patient follow up after the visit, and reading about common acute and chronic illnesses seen in Family Medicine. If the preceptor participates in patient care in the hospital or nursing home, the student will have the opportunity to participate in hospital rounds or nursing home/hospice care.
Credit Hours: 5
Prerequisites: Successful completion of three of the seven core clerkships including Family Medicine

F_C_MD 6775: Family Medicine Preceptorship - Rural
Family Medicine Preceptorship - Rural
Credit Hours: 5

F_C_MD 6777: Rural Health Policy and Legislative Advocacy
Elective content will focus on the intersection of rural medicine, health policy, and legislative advocacy. Course Goals: 1) To inform and educate students about rural health policy issues at the local, state, and national levels. 2) To train medical students to be informed advocates of rural health policy issues at the local, state, and national levels. To apply, medical students must complete the Rural Track Elective Application posted on the MU AHEC website http://medicine.missouri.edu/ahec/rural-track-elective.html. In the notes section of the application, the student must document a rationale for applying for this course. (Maximum length - 1 paragraph).
Credit Hours: 5
Prerequisites: M4 status. Applicants must complete either the Rural Track Summer Community Program or the Rural Track Clerkship Program prior to enrollment. Students will share first-hand experiences from rural track placement(s) with legislators to advocate for the MU Rural Track Pipeline Program and to influence rural health policy in Missouri.

F_C_MD 6785: Family Medicine Onsite Externship
Goals/ Objectives: The student who is on the onsite track of the externship will be a member of the Family Practice Inpatient Team that is responsible for providing care to Family Practice patients in the hospital. The team consists of an attending, physician, two third-year residents, and two or three first-year residents. The student will be expected to function as a member of the team, attending rounds on a daily basis and assuming responsibility, under supervision, for the care of some of the patients. Each student will have 4-5 nights of call including weekend days. Students will be responsible for providing care, with supervision, to those patients admitted while they are on call. Students will also be expected to follow their patients after discharge, making home visits or nursing home visits and seeing them in follow-up at the clinic as indicated. Students will also have exposure to ambulatory family medicine. Each student will work closely in the clinic with one of the third-year residents assigned to the inpatient team. The student will attend each of the resident's clinics whether they are at Green Meadows, Fulton, or Fayette.
Credit Hours: 5
Prerequisites: F_C_MD 6001; restricted to 4th year medical students

F_C_MD 6876: Family Medicine Offsite Externship
Several different types of experiences are available for the offsite track of the externship. Students have the opportunity to work at selected Indian Health Service sites that provide the appropriate mix of inpatient and outpatient experiences. A list of these IHS sites and the students' evaluations are available in the course office. These offer high volume and high levels of responsibility. Planning needs to begin early in the third year. Offsite externship experiences are also available in certain community-based family practices and in certain family practice residency programs. A list of pre-approved sites is available in the course office.
All of the sites available for the offsite experience have been carefully selected by the faculty based on previous experiences of fourth-year students. These sites offer an appropriate level of patient care responsibility with supervision. Offsite practices need to be approved in advance by the course director and often require planning 6 to 12 months in advance. Students considering offsite rotations will be expected to have a clear idea of how these experiences will offer unique advantages to their personal and professional development, and how they will meet the course criteria. Many offsite locations used in the past for the Family Medicine Clerkship will not satisfy the externship requirement. They still offer excellent experiences and could be taken as electives. Students on the offsite track will be evaluated with respect to their ability to collect, process, and analyze information, engage in clinical reasoning, and formulate appropriate diagnoses and treatment plans. Sites must be pre-approved by the Course director.
Credit Hours: 5

F_C_MD 6877: Rural Health Policy Elective
Credit Hours: 5

F_C_MD 6878: Family Medicine Maternity Care-Advanced Selective
Family Medicine Maternity Care-Advanced Selective
Credit Hours: 5

F_C_MD 6879: Palliative Care Selective
This is an inpatient and outpatient experience in a variety of settings that represent different levels and types of care available to people with a terminal condition. Each day the student will work directly with palliative care physicians, as well as the rest of the multidisciplinary team, as part of the University Hospital Supportive and Palliative Care Service. They will also have the opportunity to work with a medical director of a local
Hospice agency, who is a faculty member of the University of Missouri. Students will be expected to function as a member of the Palliative Care Team. Students will have the opportunity to actively participate in the assessment and care of patients under the direction of the Palliative Care Interdisciplinary team. Students will work alongside palliative care attending physicians, nursing staff, social workers, and pastoral care team members in their work with patients and families. Students will participate in various palliative care-related conferences including Interdisciplinary Team Meetings, didactics, patient remembrance and memorial services, self-care rounds, monthly team business meetings and the monthly Palliative Care hospital committee meeting. Additional experiences will include outpatient palliative care clinics at Ellis Fischel, bi-weekly community Hospice Interdisciplinary team meetings, patient home assessments and nursing visits with hospice staff, and completion of an oral presentation to the Palliative Care Team as part of their assessment and evidence of mastery of course objectives.

Credit Hours: 5
Prerequisites: Fourth year medical student. Must have completed 6 of the 7 core clerkships

F_C_MD 6905: SCC Primary Care Dermatology 2-week Elective
This curriculum is designed to introduce the student to common dermatologic issues that are encountered in a primary care practice location. Students will also complete the American Academy of Dermatology online student modules designed for a 2 week curriculum and the self-evaluation that is provided. Students will gain knowledge and demonstrate comprehension of a breadth of basic general dermatologic diseases. They will care for adults and pediatric patients as well as review supplied photographs for supplementation to develop their clinical diagnostic skills.

Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

F_C_MD 6928: Primary Care Sports Medicine Elective
Students will work with a multi-disciplinary sports medicine team, providing hands on clinical services in an outpatient setting. Participants will gain experience working with primary care sports medicine physicians, orthopedic surgeons, physical therapists and cast technicians.

Credit Hours: 2
Prerequisites: successful completion of the first two years of medical school

F_C_MD 7310: The Health Care System
Overview of health care system and relationship between its components. Focuses on changing nature of the system and issues confronting the future health care system.

Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 7350: Special Readings in Community Health
Extensive reading and critical analysis of classical and current studies in selected areas of community health.

Credit Hour: 1-3
Prerequisites: instructor’s consent

F_C_MD 7400: Problems in Community Health
Intensive study of an area of community health.

Credit Hour: 1-3
Prerequisites: instructor’s consent

F_C_MD 8410: Principles and Practices in Medical Education
An examination of the past and present influences on the education of physicians, the application of adult education principles and the future approaches to medical education.

Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8411: Learning Strategies in Preclinical & Clinical Educ. of Physicians
Examination of curricular strategies in preclinical and clinical education of medical students and graduate medical education. Emphasis will be placed on different types of instructional strategies.

Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8420: Principles of Epidemiology
Examines methods of study of disease frequency and distribution in populations. Utilizes small group discussions for understanding of current medical literature.

Credit Hours: 3
Prerequisites: instructor’s consent

F_C_MD 8422: Clinical Research Methods I
Principles of designing, implementing and reviewing research in the health sciences.

Credit Hours: 3

F_C_MD 8423: Clinical Research Methods II
This is a continuation of the Clinical Research Methods I (CRM_I) introductory course on the multi-method approach to clinical research. Similar to the previous course, it covers both quantitative and qualitative research methods, but includes advanced applications.

Credit Hours: 3

F_C_MD 8424: Comparative Effectiveness Research
Advanced research class that presents a framework for analyzing observational studies and randomized trials for comparative effectiveness. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Two recent semester-length courses in statistics such as NURSE 8020 or STAT 2500 or above; Working knowledge of managing and analyzing data in SPSS or SAS; Research methods; or consent of instructor
Recommended: One semester of epidemiology is strongly recommended
F_C_MD 8425: Participatory Approaches for Health and Health Systems
(same as NURSE 8425). Focuses on the use of participatory approaches for the design of health and health-system interventions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: NURSE 8100 or F_C_MD 8420 or instructor consent

F_C_MD 8430: Applications of Evidence-Based Medicine I
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.
Credit Hours: 3
Prerequisites: instructor's consent

F_C_MD 8431: Applications of Evidence-Based Medicine II
Students will participate in editing, presentation and publication of evidence-based reviews of current medical literature.
Credit Hours: 3
Prerequisites: instructor's consent

F_C_MD 8450: Research in Community Health
Original research in community health not leading to a thesis but requiring a formal research report.
Credit Hour: 1-99

F_C_MD 8491: Field Experience in Family and Community Medicine
Supervised teaching experience in the preclinical, clinical, and residency programs.
Credit Hour: 1-6
Prerequisites: instructor's consent

---

Film Studies - Visual Studies (FILMS_VS)

FILMS_VS 1000: Introduction to Film for Non-Majors
Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILM_S 1800. No credit for film majors or minors. Graded on A-F basis only.
Credit Hours: 3

FILMS_VS 1800: Introduction to Film Studies
(same as ENGLISH 1800, DST 1800). Introduction to terms and concepts for film analysis, including mise-en-scene, cinematography, editing, sound narrative, genre, and other elements. No credit for students who have completed FILM_S 2810. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Freshmen and Sophomores only or instructor's consent

FILMS_VS 1880: Introduction to Digital Media Production
(same as DST 1880, ENGLISH 1880, ART_GNRL 1920, COMMUN 1880). Introduction to concepts and skills for film making, video art, and digital storytelling, including media literacy and forms of narrative manifested historically and currently across a range of media. This course focuses on theories and concepts that support the critical analysis and creation of contemporary narrative in digital form with particular attention to audio, visual and written communication. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Enrollment limited to declared Film_S majors during early registration

---

FILMS_VS 2001: Topics in Film Studies-General
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.
Credit Hour: 1-3

FILMS_VS 2005: Topics in Film Studies-Humanities
Organized study of selected topics. Subject may vary from semester to semester. May be repeated with consent of instructor.
Credit Hour: 1-3

FILMS_VS 2010: The Philosophy of Film
(same as PHIL 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.
Credit Hours: 3

FILMS_VS 2020: World Cinema for Non-Majors
World Cinema introduces students to the history of international cinema. The course focuses on particular cinematic movements and national cinemas as case studies for trends and trajectories that also characterize the national and non-Hollywood cinemas not covered in the course. Examines the relationship of form and genre to individual national, or localized, cultural contexts. No credit for students who have completed FILM_S 2820. No credit for film majors or minors. Graded on A-F basis only.
Credit Hours: 3

FILMS_VS 2160: Film Adaptation of Shakespeare - Non Majors
This course serves as an introduction to the problems and complexities that arise when adapting William Shakespeare's plays to contemporary film. One basic task of the course is to develop students' ideas about adaptation, especially with reference to contemporary adaptation theory. This course hopes both to explain and discredit the value of "fidelity discourse," students should be liberated from the notion of "faithfulness" to the texts. No credit for film majors or minors. Graded on A-F basis only.
Credit Hours: 3

FILMS_VS 2530: Screenwriting I
(same as COMMUN 2530). Analyze various script formats and apply different writing techniques and styles to create screenplays and teleplays. Work inside a creative critique environment to craft vivid storytelling and character elements while developing viable loglines and pitches for their stories. Screenwriting concepts include the three-act structure and the timing and placement of plot points. Graded on A-F basis only.
Credit Hours: 3
FILMS_VS 2540: Introduction to Film Management
Film Production Management is a hands-on exploration of the roles of feature film executive producers, producers and unit production managers. Creating balanced budgets, hiring personnel, creating meaningful business relationships, and managing post-production responsibilities are investigated. The feature film budget will be examined in each phase of the production; creating a sales pitch for a film, and developing a detailed approach to distribution is explored. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLSH 1800; sophomore standing or higher

FILMS_VS 2820: Trends in World Cinema
(same as GERMAN 2820 and RM_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.

Credit Hours: 3
Prerequisites: Sophomore standing, ENGLSH 1800 or FILM_S 1800

FILMS_VS 2830: American Film History I, 1895-1950
(same as ENGLSH 2830). Examines the development of American cinema in relation to other national cinemas, from 1895-1950. No credit for students who have completed ENGLSH or FILM_S 1810.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

FILMS_VS 2840: American Film History II, 1950-Present
(same as ENGLSH 2840). Examines American film history in an international context, from 1950-present. No credit for students who have completed ENGLSH or FILM_S 1820.

Credit Hours: 3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800

FILMS_VS 2850: Italian Cinema
(same as ITAL 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required.

Credit Hours: 3
Prerequisites: Sophomore standing

FILMS_VS 2860: Film Themes and Genres
(same as ENGLSH 2860, DST 2860) Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 2860.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILMS_VS 3490: Indian Cinema
(same as S_A_ST 3490, ANTHRO 3490, VS_ARH 3790). Indian Cinema provides an overview of the key genres and themes of Indian film, including Bollywood, art cinema/parallel cinema, Indian regional cinemas, and diasporan cinema. The course combines film studies, anthropological, historical, and visual culture analyses to provide a holistic view of Indian culture and society through cinema.

Credit Hours: 3
Prerequisites: Sophomore standing or higher

FILMS_VS 3520: Post Production
Editing above all else is about feeling and rhythm. This course immerses students in the complete filmmaking editorial process from ingesting the footage to final delivery. Using non-linear editing software students will sharpen their sensibilities through hands on learning and practice. While editing scenes from both fiction and non-fiction cinema - students can expect to learn the ins and outs of media management and organization, the language of the edit, basic toolset navigation and color correction. Graded A-F basis only.
FILMS_VS 3530: Screenwriting II
Builds upon principles of story arc and screenwriting techniques, while providing an in-depth study of character psyche and unique voice. Students will master the skills necessary to create vibrant, memorable characters through the exploration and development of unique character traits, physical imagery development and distinctive voice. Students will analyze dialog traits of scripts and films of industry professionals, and will craft their own characters using industry standard technology, adhering to the principles of industry standard formatting. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLISH 1800; sophomore standing or higher

FILMS_VS 3540: Cinematography I
An exploration of the principles and techniques of cinematography that includes shot composition lighting styles, and storytelling, using the moving image. Students will examine historical and contemporary approaches to cinematography used in Hollywood, foreign and independent films. Analyzing cinematographic approaches of a wide range of work will help the students discriminate the quality of their own creative work. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLISH 1800, and FILM_S 1880, DST 1880, ENGLISH 1880 or ART_GNRL 1920, or JOURN 2150 or JOURN 1400. Sophomore standing or higher. May be restricted to Film Studies majors and minors during early registration

FILMS_VS 3550: Field Production I
Collaborating in crews of five, students are exposed to a broad range of production techniques through practical production experience and in class discussion. During the semester students will produce 3 short projects, and in class workshops. As a group member, each student may serve in rotation as Director, Producer, Camera, Sound recordist and AC/Gaffer. Students will also be developing their own short scripts and are expected to pitch the projects (for production in Field Production II) in front of faculty and industry professionals in the final weeks of the semester. Graded A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLISH 1800, FILM_S 1880 or DST 1880 or ART_GNRL 1920, and FILM_S 3540

FILMS_VS 3555: Directing for the Screen
Directing for the Screen combines previous knowledge of the cinematic frame with the power of communication. This course focuses on developing the student's ability to effectively communicate to actors, cinematographers, and art departments, while also commanding a film crew and managing relationships with producers. Students develop concise personal vision and aesthetics with respect to scripts, and will work directly with actors to achieve performances that suit the project.

Credit Hours: 3

FILMS_VS 3560: Audio Engineering for the Screen
This course is an intensive study of the techniques and science behind the use of audio in today's cinema. The course will focus on four major areas of study: sound in cinema, sound creation, sound manipulation, and environmental sound layering.

Credit Hours: 3
Prerequisites: FILM_S 1800 or ENGLISH 1800, Sophomore standing. May be restricted to Film Studies majors and minors during early registration

FILMS_VS 3575: The Ancient World on Film
(same as VS_ARH 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

Credit Hours: 3
Prerequisites: Prior 2000 level coursework in CL_HUM, AR_H_A, or FILM_S. Instructors consent required

FILMS_VS 3780: Architecture in Film
(same as VS_ARH 3780) Filmmakers use architecture to convey meaning on symbolic, psychological, and ideological levels. Using architectural history and theory, in conjunction with weekly film screenings from a variety of genres, this course explores how architecture operates within film.

Credit Hours: 3

FILMS_VS 3785: Art and Artists on Film
(same as VS_ARH 3785) This course explores representations of art and artists in film, including documentary films, fictionalized films, and films made by artists.

Credit Hours: 3

FILMS_VS 3820: Major Directors
(same as ENGLISH 3820 and RM_LAN 3820). Topics (e.g. Hitchcock, Kubrick, Fellini, Allen, Kurosawa, Wilder) announced at time of registration. Only 6 hours may be taken for credit toward major. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILMS_VS 3830: History of German Film
(same as GERMAN 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.

Credit Hours: 3

FILMS_VS 3845: Modern Israeli Film
(same as HEBREW 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied approaches to the cinema of Israel.
communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing or consent of instructor required

---

**FILMS_VS 3850: Studies in Film History**  
(same as ENGLISH 3850). Topics (e.g. Classical Period of Hollywood cinema, silent era, Post-WWII American film, German Weimar cinema, French New Wave) announced at time of registration. Only 6 hours count as credit toward major.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

---

**FILMS_VS 3855: Documentary Film**  
(same as ENGLISH 3855; DST 3855). Surveys the history of documentary film including the development of subgenres, sound and voice over in documentary, re-enactment, ethical issues in documentary film production, and more. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000

---

**FILMS_VS 3861: Film Themes and Genres**  
Topics (e.g. Film noir, African-American filmmakers, Food and Film, The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 3861.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 or ENGLISH 1800 or FILM_S 1800

---

**FILMS_VS 3865: The Holocaust on Screen**  
(same as GERMAN 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing

---

**FILMS_VS 3875: Brazilian Cinema**  
(same as PORT 3875). An introduction to Brazilian cinema, culture, and society through the study of contemporary cinematic productions. Topics include: Hollywood perceptions of Brazil; redefinition of national identity and history, representations of race and gender.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000

---

**FILMS_VS 3880: Contemporary Chinese Film**  
(same as CHINESE 3880). Introduces development of 20th century Chinese film and popular genres, including review of earlier times. Explores how present day Chinese understand their own history, and issues they face in drive toward modernization in a global context. Films and readings in English or with English subtitles. No previous knowledge of the culture or language required.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing or instructor's consent

---

**FILMS_VS 3885: Twenty-First Century South American Cinema**  
(same as SPAN 3885, PORT 3885). Broad overview of the major national cinemas of the 21st century in South America. Approximately 14 feature films screened from Argentina, Brazil, Chile and other nations of the region. Instructor provides a thematic framework for films within the context of film theory, Latin American cinematic history and cultural studies. Course taught in English. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000 or ENGLISH 1000H

---

**FILMS_VS 3890: Russian and Soviet Film**  
(same as RUSS 3890). Introduces three significant genres of Russian cinema: comedy, literary adaptations, and films that explore issues of identity and autobiography. Includes examples from different epochs. Considers Soviet and post-Soviet films. Russia and Russian culture. Course conducted in English; films have English subtitles.

**Credit Hours:** 3  
**Prerequisites:** Sophomore standing or instructor's consent

---

**FILMS_VS 4001: Topics in Film-General**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3  
**Prerequisites:** Sophomore standing

---

**FILMS_VS 4005: Topics in Film Studies - Humanities**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3  
**Prerequisites:** Sophomore standing

---

**FILMS_VS 4005W: Topics in Film Studies - Humanities - Writing Intensive**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

**Credit Hour:** 1-3  
**Prerequisites:** Sophomore standing

---

**FILMS_VS 4030: Video Art and the Moving Image**  
(same as ART_GNRL 4030; cross-leveled with ART_GNRL 7030). Video as a fine art form intersecting with sculpture, experimental filmmaking, DIY and Internet culture. Theoretical and historical knowledge is integrated with studio practice. Students create video works in Adobe Premiere Pro, demonstrating technical ability and aesthetic vision. May be repeated up to 9 hours maximum.

**Credit Hours:** 3
FILMS_VS 4370: Film Studies: The Intersection of Documentary Film and Journalism
(same as JOURN 4370; cross-leveled with FILM_S 7370, JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public's growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

Credit Hours: 3

FILMS_VS 4370W: Film Studies: The Intersection of Documentary Film and Journalism-Writing Intensive
(same as JOURN 4370; cross-leveled with FILM_S 7370, JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public's growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

Credit Hours: 3

FILMS_VS 4580: Field Production II
This workshop is a senior level course that serves as the capstone of our production emphasis curriculum. Students entering the class must be prepared to submit a short script (no longer than 15 minutes) at the first class of the term, and complete the entire filmmaking process by close of the semester. Participants are required to assist fellow students in the production of their films. Expect to spend a significant amount of time outside of class to ensure a successful semester. Works will be screened in our senior showcase. Graded A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 1800, FILM_S 1880, FILM_S 3540, and FILM_S 3550

FILMS_VS 4580: Production Practicum
Provides an intensive, comprehensive experience in film production. Students will receive hands-on experience in lightning and set design, camera operation, grip/electrical and sound capture. The course pits students against a rigorous industry standard shooting schedule - long hours are to be expected each day. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FILM_S 3540

FILMS_VS 4810: Film Theory
(same as ENGLSH 4810, DST 4810). This course explores contemporary trends in film theory. Topics may include: psychoanalysis, feminism, Marxism, cultural studies, queer theory, audience and star studies, postcolonialism, among others.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH or FILM_S 1800. Junior standing or above required

FILMS_VS 4840: Culture and Media
(Same as ENGLSH 4840, DST 4840). Topics (e.g. Cinema and Imperialism, Indigenous Media, Ethnographic Documentary) announced at time of registration. No more than six hours may be taken for credit toward the major.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800. Junior standing or instructor's consent required

FILMS_VS 4860: Film Themes and Genres
Topics (e.g. Film noir, African-American filmmakers, Food and Film., The Western) announced at time of registration. No more than six hours may be taken in Film Themes and Genres 4860.

Credit Hours: 3
Prerequisites: ENGLISH 1000 and ENGLISH 1800 or FILM_S 1800

FILMS_VS 4880: Capstone Experience
This course is for Film Studies students who have completed their concentration requirements. The main objective is to help students independently create and complete a capstone project. The project should allow you to conceptualize and enter professional life after commencement.

Credit Hours: 3
Prerequisites: Film Studies majors only. Consent of instructor required
FILMS_VS 4935: Adaptation of Literature for Film
(same as ENGLSH 4935 and THEATR 4935; cross-leveled with FILM_S 7935, ENGLSH 7580 and THEATR 7935). This upper-division course will explore adaptation principles and practices with a variety of forms of literature that were not originally written for film.

Credit Hours: 3

FILMS_VS 4940: Internship
This course is for Film Studies students who have the opportunity to work in an internship position in a related industry or at a government agency where they can gain valuable on the job experience and knowledge. The student must register for the Internship course in the semester in which the work takes place. Graded S/U basis only.

Credit Hours: 1-3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800. Must have at least 15 hours of Films Studies credit. Online courses do not count for the 15 hours of Film Credit

FILMS_VS 4960: Special Readings in Film Studies
Arranged. Individual work with conferences adjusted to needs of student.

Credit Hour: 1-3
Prerequisites: ENGLSH 1000 and ENGLSH 1800 or FILM_S 1800. Consent of instructor required. Restricted to Film Studies majors in their final year

FILMS_VS 4963: Latin American Cinema (in Spanish)
(same as SPAN 4960). Subject varies according to instructor.

Credit Hour: 2-3
Prerequisites: SPAN 3420 and SPAN 3430

FILMS_VS 4995: Senior Honors Thesis
Independent honors research under direction of faculty. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Senior standing required, consent of instructor required, Honors eligibility required

FILMS_VS 7001: Topics in Film Studies-General
Topics in Film Studies-General

Credit Hour: 1-3

FILMS_VS 7370: The Intersections of Documentary Film and Journalism
(same as JOURN 7370). (cross-leveled with JOURN 4370 and FILM_S 4370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms--documentary film and journalism--and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

Credit Hours: 3

Finance (FINANC)

FINANC 1000: Principles of Finance
Financing business, consumer, and government activity; stocks, bonds, real estate, and financial markets; risk; insurance; inflation; cash and income management; capital accumulation and appreciation.

Credit Hours: 3
Prerequisites: Students admitted to COB upper level degree program cannot enroll

FINANC 2000: Survey of Business Finance
An overview of the global financial system, financial markets, financial institutions, and principles of financial management.

Credit Hours: 3
Prerequisites: Students admitted to COB upper level degree program cannot enroll

FINANC 3000: Corporate Finance
Financial decision-making in a corporate environment. Time value of money, capital budgeting, cost of capital, working capital management and financial instruments issued by the firm.

Credit Hours: 3
Prerequisites: Completed 45 semester hours; STAT 2500 (or STAT 2200 and STAT 1200 or STAT 1300 or STAT 1400); ECONOM 1014 or ECONOM 1024; ECONOM 1015 or ECONOM 1051 or ECONOM 1051H
Corequisites: ACCTCY 2027 or ACCTCY 2037 or ACCTCY 2137H

FINANC 3300: Personal Risk Management and Insurance
Teaches the importance of risk in personal endeavors and the intelligent handling of such risk. Life, health, auto, homeowner and liability risks are treated.

Credit Hours: 3
Prerequisites: sophomore standing

FINANC 4010: Financial Management
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.

Credit Hours: 3
Prerequisites: FINANC 3000

FINANC 4020: Investments
Security valuation and analysis, formulation of personal and professional investment programs.
Credit Hours: 3  
Prerequisites: FINANC 3000

FINANC 4030: Financial Intermediaries and Markets  
Functions of intermediaries in the aggregation and allocation of funds, creation and transfer of assets, and distribution of risks. Regulation of financial institutions; financial institutions as instruments of public policy.

Credit Hours: 3  
Prerequisites: FINANC 3000 and ECONOM 3229

FINANC 4110: Financial Management Policy  
Application of the concepts and tools of finance to cases in working capital management, capital budgeting analysis and capital structure decisions.

Credit Hours: 3  
Prerequisites: FINANC 4010

FINANC 4120: Security Analysis  
Classifies and analyzes securities, markets, industries. Formulation of investment policy for institutions, aggressive personal investors.

Credit Hours: 3  
Prerequisites: FINANC 4020

FINANC 4130: Management of Financial Institutions  
Operating principles of major financial intermediaries, including commercial banking, savings, insuring, lending and investing institutions. Analysis of cases; study of current problems. Some sections of the course may be graded on A-F or S/U graded basis only.

Credit Hours: 3  
Prerequisites: FINANC 4030

FINANC 4185: Problems in Finance  
Independent study, reports on selected topics. Some sections of this course may be offered A-F only or S/U only.

Credit Hour: 1-99

FINANC 4201: Topics in Finance  
Selected topics in finance, insurance or real estate. Offered on an experimental basis. Some sections of this course may be offered A-F only or S/U only.

Credit Hours: 3

FINANC 4220: Portfolio Management  
Development and application of the principles of modern portfolio theory to financial assets. Analysis of the concepts of diversification, portfolio construction, portfolio revision, and use of types of financial assets in effective portfolio management.

Credit Hours: 3  
Prerequisites: FINANC 4020

FINANC 4310: Financial Modeling and Databases  
Financial modeling and using online databases to retrieve data, data analysis, spreadsheet design, excel VBA programming, interpreting results. Graded on A-F basis only.

Credit Hours: 3

FINANC 4320: Financial Futures and Options  
A basic overview of financial futures and options markets. Topics include: theoretical pricing of financial futures contracts and stock options, institutional aspects of these markets, hedging, and speculative strategies.

Credit Hours: 3  
Prerequisites: FINANC 4020

FINANC 4450: Financial Ethics and Professional Standards  
The course comprises an intensive study of the CFA Institute Code of Ethics and Standards of Professional Conduct and Global Investment Performance Standards. It also includes a review of corporate governance issues.

Credit Hours: 3  
Recommended: FINANC 4010 or departmental consent

FINANC 4500: Principles of Real Estate  
Principle factors influencing land use, practices in real estate business.

Credit Hours: 3  
Prerequisites: FINANC 3000

FINANC 4510: Real Estate Appraisal  
Procedures for valuing industrial, commercial, residential realty by market, income, replacement cost approaches. Case method, field investigations.

Credit Hours: 3  
Prerequisites: FINANC 4500

FINANC 4520: Real Estate Finance and Investment  
Financing of residential, commercial, and industrial real estate and real estate development. Instruments, institutions, and markets; role of government agencies; investment qualities of real estate.

Credit Hours: 3  
Prerequisites: FINANC 4500

FINANC 4530: Real Estate Portfolio Analysis and REITs  
Management of real estate portfolios and analysis of real estate investment trusts including financial statement analysis, cash flows, and valuation techniques.

Credit Hours: 3  
Prerequisites: FINANC 3000

FINANC 4620: Investment Strategy of Warren Buffett  
Survey and application of the investment philosophy and valuation methods of Warren Buffett. Prerequisites: FINANC 3000;

Credit Hours: 3  
Corequisites: FINANC 4020

FINANC 4630: Introduction to Risk Management and Insurance  
Basic principles of risk management and insurance focusing on operational risks faced by organizations. Covers terminology, sources,
dimensions, characteristics, measurement, and assessment of risk along with design and implementation of techniques to mitigate and control risk.

Credit Hours: 3
Prerequisites or Corequisites: FINANC 2000 or FINANC 3000

FINANC 4632: Principles of Commercial Property and Liability Insurance
The objective of this course is to examine the principles and key elements of commercial property and liability insurance. The primary emphasis will be on the property and liability loss exposures faced by organizations and the corresponding types of insurance for covering those loss exposures. This course qualifies students who make a "B" or better to receive credit for CPCU 552 Commercial Liability Risk Management and Insurance.

Credit Hours: 3
Prerequisites: FINANC 2000 or FINANC 3000 or FINANC 4630, or permission of the instructor

FINANC 4640: Enterprise Risk Management
This course addresses the principles, concepts, key elements and applications of Enterprise Risk Management (ERM) to businesses and other organizations. The principal objective of this course is to prepare students to understand the principles of ERM and to be able to integrate sound risk management principles into their work.

Credit Hours: 3
Prerequisites: FINANC 4630, or permission of instructor

FINANC 4710: Topics in International Finance
Available during study abroad session. Emphasis is on international corporate governance, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: FINANC 4630, or permission of instructor

FINANC 4720: International Finance
Application of domestic corporate finance to the international arena. Emphasis on international capital budgeting, working capital management, foreign exchange risk management, international capital markets, balance of payments, international monetary system, and exchange rate determination. Some sections maybe graded on A-F or S/U basis only.

Credit Hours: 3
Prerequisites: FINANC 4620, instructor's consent required each enrollment

FINANC 4820: Investment Fund Management
Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated once for credit for a total of six credits.

Credit Hours: 3
Prerequisites: FINANC 3000, FINANC 4120 or FINANC 4620, instructor's consent required each enrollment

FINANC 4830: Chartered Financial Analyst Exam Review Course
(cross-leveled with FINANC 7830). A review of the content and format of the chartered financial analyst (CFA) examination. Students need to be registered for the CFA exam to enroll in the class.

Credit Hours: 3
Prerequisites: Instructor's consent

FINANC 4840: Angel Capital Education Program
(cross-leveled with FINANC 7840). In depth understanding of investing in start up enterprises, including structuring investment deals, doing due diligence, and monitoring of prior investments. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Instructor's consent

FINANC 7010: Financial Management
Theory and techniques of financial management, study of firm valuation, dividend policy, capital budgeting and capital asset pricing.

Credit Hours: 3
Prerequisites: FINANC 3000

FINANC 7201: Special Topics in Finance
Selected topics in Finance, insurance, or real estate. Offered on an experimental basis.

Credit Hour: 1-3
Prerequisites: Instructor's consent

FINANC 7210: Microeconomics for Business
Examination of how the behavior or consumers and the business decisions of firms affect supply, demand, and the resulting prices of goods and services in the market.

Credit Hour: 1-3
Prerequisites: FINANC 7210 or equivalent

FINANC 7410: Managerial Finance I
Introduction to financial management including the time value of money, capital budgeting techniques, risk measurement, and the valuation of financial securities.

Credit Hour: 1-3
Prerequisites: ACCTCY 7310

FINANC 7420: Managerial Finance II
Continuation of the study of financial management with focus on the risk-return tradeoff, capital structure, corporate layout polices, long-term financing, elementary options pricing, and mergers and acquisitions.

Credit Hour: 1-3
Prerequisites: FINANC 7410
FINANC 7440: Managerial Finance
Analyzes financial information relative to acquisition, management of assets; costs of alternative financial contracts; effect of mix of outstanding securities on entity's cost of capital; interaction between funding/investment decisions.
Credit Hours: 3
Prerequisites: ACCTCY 7310 or departmental consent

FINANC 7620: Investment Strategy of Warren Buffett
Survey and application of the investment philosophy and valuation methods of Warren Buffett.
Credit Hour: 1-3
Prerequisites: FINANC 3000 or FINANC 7440

FINANC 7620: Investment Fund Management
(cross-leveled with FINANC 4820). Analysis and management of securities and markets by participation in the management of a student-run portfolio of publicly traded stocks and bonds. May be repeated 1 time for credit.
Credit Hour: 1-3
Prerequisites: FINANC 3000 or FINANC 7440; instructor's consent

FINANC 7930: Chartered Financial Analyst Exam Review Course
(cross-leveled with FINANC 4830). A review of the content and format of the chartered financial analyst (CFA) examination. Students need to be registered for the CFA exam to enroll in the class.
Credit Hour: 1-3
Prerequisites: Instructor's consent

FINANC 8001: Topics in Finance
Selected topics in finance, insurance or real estate. Offered on experimental basis.
Credit Hour: 1-3
Prerequisites: Instructor's consent

FINANC 8010: Multicultural and Global Finance Study Abroad
International topical issues in finance including cultural difference, corporate governance, differential approaches to regulation across countries, and cross-risk. Includes a study abroad component with on-site visits to businesses and other organizations. May be repeated as venues change.
Credit Hour: 1-3
Prerequisites: Consent required

FINANC 8012: International Financial Markets
International capital, foreign exchange, money markets, and financial institutions including exchange rates, instruments and securities, and multinational risk exposure. May include a study-abroad component with on-site visits to businesses and other organizations. May be repeated as venues change. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: Consent required

FINANC 8085: Problems in Finance
For independent investigation and analysis, graduate students select topics suggested by the foregoing undergraduate courses.
Credit Hour: 1-3

FINANC 8090: Master's Thesis Research
Advanced research leading to thesis. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: Consent required

FINANC 8310: Financial Databases and Analysis
Financial modeling and using online databases to retrieve data, data analysis, spreadsheet design, excel VBA programming, interpreting results. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: Consent required

FINANC 8312: Financial Modeling
Financial modeling using Excel spreadsheet design and VBA programming. Includes alternative computational methods, simulation and the use of information retrieved from financial databases. Graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: FINANC 8310

FINANC 8320: Financial Markets
Operation and structure of money markets and capital markets, including markets for stocks, bonds and derivatives securities. Study of the securities that trade in those markets including characteristics, valuation and diversification.
Credit Hour: 1-3
Prerequisites: BUS_AD 7440

FINANC 8330: Investment Policy and Portfolio Management
Study of investment policies and the effects of risk and diversification on investment management including measurement of risk, identification of investment policy, and construction and maintenance of investment portfolios. Prerequisites: FINANC 8320
Credit Hour: 1-3

FINANC 8340: Derivative Financial Securities
Comprehensive overview of derivative securities including financial futures and options, swaps, and financial engineering. Major topics: institutional aspects of these markets, advanced pricing models, pricing relationships among derivative securities, and risk shifting.
Credit Hour: 1-3
Prerequisites: FINANC 8070
FINANC 8350: Financial Statement Analysis I
An introduction to financial statement analysis with emphasis on interpretation and understanding of the balance sheet, income statement, and statement of cash flows.

Credit Hour: 1-3
Prerequisites: ACCTCY 7310

FINANC 8352: Financial Statement Analysis II
Analysis of company financial statements and related accounting information with emphasis on investors’ decisions to invest in the company.

Credit Hour: 1.5-3
Prerequisites: FINANC 8350

FINANC 8360: Equity Securities Analysis
Theory and application of models and methods for valuing common stocks.

Credit Hour: 1-3
Prerequisites: FINANC 7420

FINANC 8370: Fixed-Income Securities Analysis
Markets for fixed-income securities and theory and application of models for valuing bonds and other fixed-income securities. Prerequisites: FINANC 7420

Credit Hour: 1-3

FINANC 8380: Investment Banking
Topics in investment banking including types of offerings and securities, analysis of comparable companies and transactions, valuation methods, and hedge funds and private equity. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: FINANCE 7420 or equivalent

FINANC 8410: Advanced Financial Management
Examination of the modern theory of finance. Capital budgeting capital structure, dividend theory and valuation.

Credit Hour: 1-3
Prerequisites: FINANC 7440

FINANC 8430: Capital Budgeting
An investigation of long-term financial decisions. Topics include capital budgeting, leasing, long-term financing. Extensive use of cases.

Credit Hour: 1-3
Prerequisites: FINANC 8410

FINANC 8440: Financing Multinational Business
Study of foreign exchange markets, currency derivatives, global capital budgeting, and international financial decision strategy. Some sections of this course may be offered on an A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: FINANC 7420

FINANC 8450: Ethics and Standards of Financial Practice
Study of financial ethics with particular focus on standards of practice for investment performance standards. Recommended for students planning to take the CFA exam. Prerequisites: FINANC 7420

Credit Hour: 1-3

FINANC 8460: Mergers and Acquisitions
Analysis of merger and acquisition transactions. Includes methods of financing, valuation and deal structure, hostile takeovers and restructuring.

Credit Hour: 1-3
Prerequisites: FINANC 7420 or equivalent

FINANC 8510: Management of Financial Institutions
Study and analysis of policies, goals, practices and organizational changes in the management of financial institutions and intermediaries.

Credit Hour: 1-3
Prerequisites: FINANC 7440

FINANC 8530: Real Estate Portfolio Analysis
Portfolio analysis applied to real estate investment including diversification, portfolio theory, and management of real estate portfolios including real estate investment trusts (REITs).

Credit Hour: 1.5-3
Prerequisites: FINANC 7420

FINANC 8540: Real Estate Finance
Instruments and methods of financing real estate including fixed and variable rate mortgages, the mortgage loan underwriting process, financing investment property, and alternative financing methods. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: FINANC 7420 or equivalent

FINANC 8550: Real Estate Valuation I
Valuation and appraisal methods for real estate. Includes cost, comparable sales, and income capitalization approaches. Credit may not be earned for both FINANC 7510 and FINANC 8550. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: FINANC 7420 or equivalent

FINANC 8552: Real Estate Valuation II
A continuation of FINANC 8550. Focus is on advanced methods and the use of case analyses. Credit may not be earned for both FINANC 7510 and FINANC 8552. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: FINANC 8550

FINANC 8560: Real Estate Securities Analysis
Analysis of real estate securities including in-depth financial statement analysis and valuation of real estate investment trusts (REITs) and real estate operating companies (REOCs).

Credit Hour: 1.5-3
Prerequisites: FINANC 8530 or instructor's consent

FINANC 8570: Real Estate Development
Developing real estate properties. Topics include organizational forms, land development, construction, and environmental issues. Includes issues specific to residential, office, industrial, and retail properties. Graded on A-F basis only.
Credit Hours: 1-3
Prerequisites: FINANC 7420 or equivalent

FINANC 8620: Investment Strategy of Warren Buffett
This course is designed to familiarize students with the investment philosophy of Warren Buffett. Buffett's criteria for evaluating potential acquisitions and investments will be analyzed in detail.
Credit Hours: 1-3
Prerequisites: FINANC 7420

FINANC 8630: Corporate Risk Management
Principles of identifying, analyzing, assessing, and managing operational risks faced by large organizations. Sources, dimensions, and qualities of risk as well as development and implementation of methods to avoid, control, or transfer risk.
Credit Hours: 1-3
Prerequisites or Corequisites: FINANC 7420
Recommended: Undergraduate Business degree with major/emphasis/minor in Finance, Accounting or Economics

FINANC 8632: Corporate Insurance and Alternative Finacing Mechanisms
Basis and techniques for insuring hazard and operational risks encountered by large organizations. Analysis of insurance policies, determination of optimal limits and retentions, and assessment of alternative risk financing methods.
Credit Hours: 1-3
Prerequisites: FINANC 8630

FINANC 9001: Advanced Topics in Finance
Selected topics in finance.
Credit Hours: 3
Prerequisites: instructor's consent

FINANC 9090: Research in Finance
Thesis research for Ph.D. degree. Graded on S/U basis only.
Credit Hour: 1-99

FINANC 9100: Seminar in Corporate Finance
Advanced theory, investigation of current research in financial management.
Credit Hours: 3
Prerequisites: FINANC 9100
Recommended: 5 hours Biological Sciences

FINANC 9101: Topics Seminar in Finance
Reading and critical evaluation of selected current finance literature and research. Departmental consent. May be repeated. Graded on S/U basis only. students only
Credit Hours: 1-3
Prerequisites: Ph.D

FINANC 9200: Research in Corporate Finance
Advanced topics in corporate finance.
Credit Hours: 3
Prerequisites: Finance [FINANC] 9100

FINANC 9300: Financial Economics
Utility analysis, efficient frontier mathematics, asset pricing and related topics.
Credit Hours: 3
Prerequisites: instructor's consent

FINANC 9400: Seminar in Investment Analysis
Develops integrated theory and analytic techniques for evaluating investment potential of financial instruments. Emphasizes corporate securities. Selected cases and readings.
Credit Hours: 3

Fisheries And Wildlife (F_W)

F_W 1012: Introduction to Captive Wild Animal Management
(same as AN_SCI 1012). General introduction to housing, husbandry, behavior, genetics, nutrition, reproduction, animal health, and disease control of native and exotic species in zoological parks and other animal conservation facilities; emphasizes the role of captive animals in wildlife conservation. Graded on A-F basis only.
Credit Hours: 3

F_W 1100: Introductory Zoology with Laboratory
(same as BIO_SC 1100). Introduces important principles and concepts of zoology. Emphasizes cell biology; evolution; genetics; ecology; structure, function, development of the organism.
Credit Hours: 5

F_W 2500: Introduction to Genetics and Evolution for Conservation
Basic principles and processes of genetics and evolution and their importance for management and conservation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MATH 1100, F_W 1100 or BIO_SC 1500
Recommended: NAT_R 1070, CHEM 1320

F_W 2600: Ornithology
(same as BIO_SC 2600). Structure, identification, habits, importance of regional birds. Field work, lectures, lab.
Credit Hours: 5
Prerequisites: F_W 1100
Recommended: 5 hours Biological Sciences
F_W 2700: Ichthyology
(same as BIO_SC 2700). A broad introduction to the biology and ecology of fishes. Emphasis will be placed on understanding the adaptations fishes exhibit to aspects of their environment.
Credit Hours: 4
Prerequisites: F_W 1100
Recommended: 8 hours Biological Sciences

F_W 2900: Principles of Wildlife Management
Expose students to the principles of wildlife management with emphasis on current issues faced by wildlife researchers and managers in the field. Graded on A-F basis only.
Credit Hours: 4
Recommended: NAT_R 1070 and one other course in biological or environmental science; sophomore standing or higher

F_W 3085: Problems in Fisheries and Wildlife
Individual problems studies to supplement regularly organized undergraduate courses in Fisheries and Wildlife. Proposal for problems study must be arranged by student and supervising faculty member prior to registration.
Credit Hour: 1-99
Prerequisites: consent of supervising faculty member

F_W 3600: Introduction to Conservation Biology
Introduction to principles of conservation biology. Application of ecological concepts and conservation biology principles to management of endangered species, biodiversity and threatened ecosystems.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or BIO_SC 3400

F_W 3660: Mammalogy
(same as BIO_SC 3660). Taxonomy, distribution, structure, habits, importance of mammals; emphasizes those of central United States.
Credit Hours: 4
Recommended: F_W 1100 and Junior standing

F_W 3700: Animal Behavior
Behavior allows animals to react promptly to environmental changes, and is how they interact with others and their surroundings. Because behaving is central to an animal's life, knowing about behavior is fundamental to understanding animal ecology and to conservation efforts. Graded on A-F basis only.
Credit Hours: 3
Recommended: F_W 1100

F_W 3900: Ecology of Fishes
This course considers fishes' interactions with their environments in relation to survival, growth and population processes. The course is for mid- to upper-level undergraduates interested in fisheries science, management and fish conservation. May be repeated once for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 1500 or F_W 1100; sophomore standing
Recommended: STAT 2500

F_W 4002: Topics in Fisheries and Wildlife - Biological
Organized study of selected topics intended primarily for senior-level students in Fisheries and Wildlife Sciences.
Credit Hour: 1-99

F_W 4200: Urban Wildlife Conservation
(cross-leveled with F_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 4200W: Urban Wildlife Conservation - Writing Intensive
(cross-leveled with F_W 7200). Reviewing the theory and practice of applying ecological concepts to the management of wildlife species in urban areas.
Credit Hours: 3
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 4220: Human Dimensions of Fish and Wildlife Conservation
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.
Credit Hours: 3
Recommended: One 3000-level or above professional Fisheries and Wildlife management or techniques course

F_W 4300: Fisheries Management
(cross-leveled with F_W 7300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.
Credit Hours: 3
Recommended: BIO_SC 3650 and STAT 2500

F_W 4400: Techniques for Fisheries Management and Conservation
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.
Credit Hours: 4
Recommended: BIO_SC 3650; STAT 2500 or NAT_R 3110; F_W 2700 or F_W 4300

F_W 4400W: Techniques for Fisheries Management and Conservation - Writing Intensive
Introduction to techniques (field and analytical/quantitative) used by fisheries and conservation biologists. Fosters understanding of techniques uses, advantages, limitations biases, and data interpretation. Extended weekly field outings require chest waders and life jackets. Graded on A-F basis only.
Credit Hours: 4
Recommended: BIO_SC 3650; STAT 2500 or NAT_R 3110; F_W 2700 or F_W 4300
F_W 4500: Animal Population Dynamics and Management
(cross-leveled with F_W7500) Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species.
Credit Hours: 3
Prerequisites: MATH 1400; STAT 2500 or NAT_R 3110; BIO_SC 3650 or FOREST 4320

F_W 4600: Ecosystem Management
(cross-leveled with F_W 7600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650 or FOREST 4320

F_W 4600W: Ecosystem Management - Writing Intensive
Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, socio-economic, and institutional factors that influence natural management agencies. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650

F_W 4650: Natural Resource Planning and Management
Students will be exposed to various natural resource planning tools. Student teams will develop natural resource management plans with strategic and operational components for current conservation issues in Missouri. Plans will be critiqued by peers and outside professionals. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: FOREST 4320 or BIO_SC 3650 and senior standing

F_W 4700: Wildlife Ecology Methods
(cross-leveled with F_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650 and STAT 2500
Recommended: F_W 2900, NATR 3110

F_W 4700W: WILDLIFE METHODS - Writing Intensive
(cross-leveled with F_W 7700). Techniques for conducting wildlife research. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: BIO_SC 3650 and STAT 2500
Recommended: F_W 2900, NATR 3110

F_W 4800: Environmental Toxicology
Credit Hours: 3
Prerequisites: CHEM 1320
Recommended: Junior standing

F_W 4810: Wildlife Disease Ecology
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.
Credit Hours: 3
Prerequisites: BIO_SC 3650

F_W 4880: Waterfowl Ecology and Management
Ecology and management of North American waterfowl and their habitats. Laboratory exercises focus on identification, life histories, sex and age determination, and survey methods. Lectures cover taxonomy, ecology, behavior, population dynamics, harvest management, and habitat management and conservation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIO_SC 3650 and STAT 2500
Recommended: F_W 2900, NATR 3110

F_W 4890: Environmental Toxicology
Introduction to classes of chemicals, tools, methods, and approaches used in environmental toxicology. Emphasizes fundamentals of toxicology, dose-response relationships, evaluation of contaminant issues, strategies, and exposure analysis/toxicity assessment strategies in a risk assessment.
Credit Hours: 3
Prerequisites: CHEM 1320
Recommended: Junior standing

F_W 7002: Graduate Topics in Fisheries and Wildlife
Organized study of selected topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Graded on A-F basis only.
Credit Hours: 1-99
Prerequisites: consent of supervising faculty member

F_W 7200: Urban Wildlife Conservation
Organized study of topics intended primarily for graduate students in Fisheries and Wildlife Sciences. Graded on A-F basis only.
Credit Hours: 1-99
**F_W 7220: Human Dimensions of Fish and Wildlife Conservation**
Overview of human dimensions approaches and methods as they are applied to issues in fish and wildlife conservation.

**Credit Hours:** 3  
**Prerequisites:** BIO_SC 3650 or FOREST 4320

**F_W 7300: Fisheries Management**
(cross-leveled with F_W 4300). Introduction to the scientific principles and techniques of fishery management. Integrates ecological principles with social, economic and legal considerations.

**Credit Hours:** 3  
**Prerequisites:** One 3000-level or above professional management or techniques course or instructor consent

**F_W 7500: Animal Population Dynamics and Management**
(cross-leveled with F_W 7500). Quantitative modeling approach to examining principles and analysis techniques of fish and wildlife population dynamics. Emphasis on approaches useful in the management of exploited species. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MATH 1400; STAT 2500 or NAT_R 3110; BIO_SC 3650 or FOREST 4320

**F_W 7600: Ecosystem Management**
(cross-leveled with F_W 4600). Explores the development and implementation of large-scale approaches to restoring and maintaining ecosystems for sustainability. Incorporates ecological, social-economic, and institutional factors that influence natural resource management agencies. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** BIO_SC 3650 or FOREST 4320

**F_W 7700: Wildlife Ecology Methods**
(cross-leveled with F_W 4700). Techniques for conducting wildlife research. Graded on an A-F basis only.

**Credit Hours:** 4  
**Recommended:** Ecology and basic statistics course

**F_W 7800: Environmental Toxicology**

**Credit Hours:** 3  
**Prerequisites:** CHEM 1320

**F_W 7810: Wildlife Disease Ecology**
An introduction to the ecology of wildlife diseases. Topics include the definition of a disease, how to measure diseases, impacts on individuals and populations, and the role of disease in wildlife management and conservation.

**Credit Hours:** 3  
**Prerequisites:** F_W 4100, BIO_SC 3650 and instructor's consent

**F_W 7880: Waterfowl Ecology and Management**

**Credit Hours:** 3  
**Prerequisites:** F_W 2600; BIO_SC 3650; instructor's consent

**F_W 8050: Non-Thesis Research in Fisheries and Wildlife**
Independent research not leading to a thesis.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**F_W 8085: Graduate Problems in Fisheries and Wildlife**
Individualized problems studies to supplement regularly organized graduate courses in Fisheries and Wildlife.

**Credit Hour:** 1-5  
**Prerequisites:** consent of supervising faculty member

**F_W 8087: Masters Seminar in Fisheries and Wildlife**
Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.

**Credit Hour:** 1

**F_W 8090: Masters Thesis Research in Fisheries and Wildlife**
Research leading to a thesis or dissertation. Graded on a S/U basis only.

**Credit Hour:** 1-99

**F_W 8300: Professional Development and Communications**
Intended to foster professional growth and development of graduate students. The course will present a rigorous introduction to professionalism, ethics, career development, and professional communications skills and techniques. Graded on A-F basis only.

**Credit Hour:** 1-3

**F_W 8460: Wetland Ecology**
A survey of the wetlands of North America; emphasis on nutrient dynamics, habitat structure, management, legislation and regulations, and man's impacts.

**Credit Hours:** 3  
**Prerequisites:** F_W 4100, BIO_SC 3650 and instructor's consent
**F_W 8510: Ecology, Conservation, and Environmental Justice**
The goal of this course is to introduce graduate students in natural resource management and conservation biology to the ecological and management concepts that underlie environmental justice issues, and to explain how broader environmental justice concepts are relevant to natural resource and conservation fields. Graded on A-F basis only.
**Prerequisites:** one undergraduate course from the following list of disciplines: ecology, natural resource management, conservation biology, sociology or equivalent.
**Credit Hours:** 2

**F_W 8520: Stream Ecology**
Ecological principles applied to flowing waters. Emphasis on ecological processes within algal, invertebrate and fish communities. The influence of geomorphic processes, hydrologic principles and physical-chemical factors on the biota.
**Credit Hours:** 3

**F_W 9001: Selected Topics in Fisheries and Wildlife Sciences for Doctoral Students**
Organized study of selected topics for PhD students in Fisheries and Wildlife Sciences. Subjects and credits may vary from semester to semester. Graded on A-F basis only.
**Credit Hour:** 1-4
**Prerequisites:** PhD standing and instructor consent

**F_W 9087: PhD Seminar in Fisheries and Wildlife**
Discussions of current developments in forestry, fisheries and wildlife, and critical study of research programs.
**Credit Hour:** 1

**F_W 9090: Ph. D. Dissertation Research in Fisheries and Wildlife**
Research leading to a thesis or dissertation. Graded on a S/U basis only.
**Credit Hour:** 1-99

---

**Food Science (F_S)**

**F_S 1010: Introduction to Viticulture and Enology**
This course will give a general overview of growing grapes (viticulture) and winemaking (enology) with an emphasis on Missouri wines and wineries. This course is the first course in a sequence of courses in the viticulture and enology track of the food science degree program.
**Credit Hour:** 1

**F_S 1020: World Food and You**
(same as PLNT_S 1020). Basic scientific principles involved in production agriculture, food processing, marketing and consumption. Evaluation and understanding or current agriculture issues that affect human foods and required nutrients.
**Credit Hours:** 3

**F_S 1030: Food Science and Nutrition**
Basic principles of science and technology as applied to the problem of providing safe, nutritious, and desirable food for man.

**F_S 2131: Dairy Products Evaluation**
(same as AN_SCI 2131). Sensory Evaluation and judging of dairy products.
**Credit Hours:** 2

**F_S 2172: Elements of Food Microbiology**
Introductory microbiology course stressing basic principles as related to foods.
**Credit Hours:** 3
**Prerequisites:** Sophomore standing. Restricted to Food Science Students during Early Registration

**F_S 2195: Grapes and Wines of the World**
(same as PLNT_S 2195). Explores the world of wine through study of viticultural principles and practices, wine styles, classifying wine, the winemaking process and New World and Old World wine regions. Learn wine tasting skills and experience wines from around the world. World wine consumption, social and physical health benefits of moderate wine consumption.
**Credit Hours:** 3

**F_S 2199: Seminar in Professional Development**
Readings and discussion related to professional development for the industry.
**Credit Hour:** 1

**F_S 3190: Study Abroad: International Meat, Dairy and Enology**
(same as AN_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Prerequisites: instructor's consent
**Credit Hours:** 3

**F_S 3190H: Study Abroad: International Meat, Dairy and Enology - Honors**
(same as AN_SCI 3190). This study abroad course introduces students to the meat, dairy and wine industries in Germany or in New Zealand (destinations are on a rotational basis). Students will visit small, medium and large-scale producers and learn about differences in comparison to the US industries. May be repeated once for credit. Enrollment is limited to Honors eligible students.
**Credit Hours:** 3
**Prerequisites:** instructor's consent

**F_S 3210: Kitchen Chemistry**
This course is targeted at current Food Science, Hospitality Management, Nutrition or Biochemistry students who wish to study the application of scientific principles to the practice of cooking. This on-line summer class assumes students have access to a working kitchen. Video cooking projects are submitted weekly. Graded on A-F basis only.
F_S 3214: Principles of Meat Science
(same as AN_SCI 3214). Study of the principles involved in the conversion of living animals to meat and by-products; efficient utilization of meat as a food.
Credit Hours: 3
Prerequisites: CHEM 1100 or higher

F_S 3231: Principles of Dairy Foods Science
(same as AN_SCI 3231). Technology, chemistry and microbiology related to milk and its transformation into fluid milk products, fermented dairy foods and spreads. (2 hours of lecture and two hours of laboratory per week.)
Credit Hours: 3
Recommended: One course in Biological Sciences

F_S 3240: Principles of Viticulture I
(same as PLNT_S 3240). Grapevine growth, development, selection, propagation, training systems, pruning, and harvesting; vineyard site selection, design, and development. Graded on A-F basis only.
Prerequisites: F_S 1010 and one of the following: F_S 2195 or PLNT_S 2195 or PLNT_S 2100 or SOIL 2100 or PLNT_S 2110 or PLNT_S 2125.
Credit Hours: 4

F_S 3385: Problems in Food Science
Supervised study in a specialized phase of food science and nutrition.
Credit Hour: 1-99

F_S 4160: Food Process Engineering
(same as BIOL_EN 4160; cross-leveled with BIOL_EN 7160). This course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, emerging technologies, food packaging, and sustainability. Graded on A-F basis only.
Prerequisites: MATH 1100 and AG_S_M 1040 or PHYSCS 1210
Credit Hours: 3

F_S 4199: Food Industry Senior Seminar
The course explores the structure and the various branches of the food industry. Emphasis is placed on industry trends and the manufacture of specific selected food products and their ingredients. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: F_S 1030 or equivalent, F_S 2199 or equivalent; junior or senior standing

F_S 4301: Topics in Food Science
Instruction in specific subject matter areas in the field of food science and nutrition.
Credit Hour: 1-99

F_S 4310: Food Chemistry and Analysis
(cross-leveled with F_S 7310). Structure, composition and chemical properties of food.
Credit Hours: 4
Recommended: 5 hours Chemistry or Biochemistry

F_S 4311: Investigation of Food Properties
(cross-leveled with F_S 7311). Study of the chemical and physical properties of foods and the interaction of food components.
Credit Hours: 3
Recommended: F_S 4310 or equivalent, or instructor's consent

F_S 4315: Food Chemistry and Analysis Laboratory
(cross-leveled with F_S 7315) The quantitative determination of the constituents of food.
Credit Hours: 3

F_S 4315W: Food Chemistry and Analysis Laboratory - Writing Intensive
(cross-leveled with F_S 7315). The quantitative determination of the constituents of food.
Credit Hours: 3

F_S 4330: Principles of Food Processing
(same as AG_S_M 4330; cross-leveled with F_S 7330, AG_S_M 7330). Introduction to basic engineering concepts used to process raw materials. Principle topics include energy, material balance, fluid flow, heat transfer, refrigeration and freezing, and preservation.
Credit Hours: 3
Prerequisites: MATH 1100 and AG_S_M 1040 or PHYSCS 1210

F_S 4331: Technology of Dairy Products and Ingredients
(cross-leveled with F_S 7331). Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients.
Credit Hours: 3
Prerequisites: F_S 3231 or equivalent

F_S 4340: Principles of Viticulture II
(same as PLNT_S 4340). Environmental and biological factors influencing vine physiology and wine grape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: F_S 3240 or PLNT_S 3240

F_S 4344: Processing Muscle Foods
(same as AN_SCI 4344; cross-leveled with F_S 7344, AN_SCI 7344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Recommended: One Chemistry course
F_S 4345: Principles of Viticulture and Winemaking
(same as PLNT_S 4345; cross-leveled with PLNT_S 7345, F_S 7345). This course will cover the basics needed by viticulturists and winemakers to understand grape vine growth and vineyard considerations along with winemaking principles. Viticultural topics will include grapevine growth and development, vineyard design and development, cultivar selection, grapevine propagation, training systems, and harvest and pruning. Winemaking topics will include sensory analysis of grapes, chemical, microbiological and technological aspects of winemaking, and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1010 or BIO_SC 1020 or BIO_SC 1030

F_S 4354: Physiology and Biochemistry of Muscle as Food
(same as AN_SCI 4354; F_S 7354, AN_SCI 7354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.

Credit Hours: 3
Prerequisites: AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 2001 or AN_SCI 2214 or AN_SCI 3214 or F_S 3214 or AN_SCI 3231 or F_S 3231
Recommended: Any Biochemistry or Organic Chemistry course

F_S 4370: Food Microbiology
(cross-leveled with F_S 7370). Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups.

Credit Hours: 3
Prerequisites: F_S 2172
Recommended: one Biochemistry course

F_S 4375: Food Microbiology Laboratory
(cross-leveled with F_S 7375). Examination of foods for microorganisms and characterization of major species.

Credit Hours: 2
Prerequisites or Corequisites: F_S 4370

F_S 4380: Sensory Analysis of Food and Beverages
(cross-leveled with F_S 7380). Methodological principles of the sensory analysis of food and beverages.

Credit Hours: 3
Prerequisites: F_S 1030; junior or senior standing
Recommended: one statistics course

F_S 4385: Problems in Food Science
Advanced problems in a selected field of food science and nutrition.

Credit Hour: 1-99

F_S 4390: Optimization and Management of Food and Agricultural Systems
(same as AG_S_M 4390, HSP_MGMT 4390; cross-leveled with F_S 7390; AG_S_M 7390, HSP_MGMT 7390). This course is designed to introduce the student to the concept of layers and interacting systems within an operation and the analytical methods of modeling and simulation to make effective management decisions for optimal system design and function.

Credit Hours: 3
Prerequisites: MATH 1100

F_S 4440: Principles of Winemaking and Wine Chemical Analysis
(cross-leveled with F_S 7440). The theoretical and practical basics needed by enologists/winemakers including sensory analysis of grapes; chemical, microbiological and technological aspects of winemaking; and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

Credit Hours: 4
Recommended: 5 credit hours inorganic chemistry and organic chemistry or concurrent, or instructors consent

F_S 4441: Cellar Operations and Special Vinifications
(cross-leveled with F_S 7441). The theoretical and practical basics needed by winemakers to supervise the operations of the winemaking, wine stabilization and packaging equipment. The theoretical and practical basics needed by winemakers to make special wines including rose, dessert, carbonic maceration, and sparkling wines. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: F_S 4440
Recommended: 5 credit hours inorganic chemistry and organic chemistry or instructor's consent

F_S 4941: Internship in Food Science
Combines study, observation and employment in an area of food science and nutrition. Written reports, faculty evaluation.

Credit Hour: 1-6
Prerequisites: instructor's consent
Recommended: one Food Science course

F_S 4970: Food Product Development
(cross-leveled with F_S 7970). Capstone course integrating the various disciplines of food science to create new food products.

Credit Hours: 3
Prerequisites: Junior or Senior standing, or instructor's consent. ENGLISH 1000 required if course is taught Writing Intensive
Recommended: 9 credit hours of Food Science

F_S 4970W: Food Product Development - Writing Intensive
Capstone course integrating the various disciplines of food science to create new food products.

Credit Hours: 3
Prerequisites: Junior or Senior standing, or instructor's consent. ENGLISH 1000 required if course is taught Writing Intensive
Recommended: 9 credit hours of Food Science
F_S 4980: Food Quality Assurance
(cross-leveled with F_S 7360). Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods.
Credit Hours: 3
Prerequisites: Junior or Senior standing or instructor's consent
Recommended: 9 credit hours of food science

F_S 7160: Food Process Engineering
(same as with BIOL_EN 7160; cross-leveled with F_S 4160, BIOL_EN 4160). This course introduces underlying engineering principles in food processing, and unit operations in food industries. Topics include fluid flow, heat transfer in food processing, preservation process, dehydration, refrigeration, food freezing, psychrometrics, emerging technologies, food packaging, and sustainability. Graded on A-F basis only.
Credit Hours: 3

F_S 7310: Food Chemistry and Analysis
(cross-leveled with F_S 4310). Structure, composition and chemical properties of food.
Credit Hours: 4
Prerequisites: 5 hours Chemistry or Biochemistry

F_S 7311: Investigation of Food Properties
(cross-leveled with F_S 4311). Study of the chemical and physical properties of foods and the interaction of food components. Lecture.
Credit Hours: 3
Prerequisites: F_S 4310 or F_S 7310 or equivalent, or instructor's consent

F_S 7315: Food Chemistry and Analysis Laboratory
(cross-leveled with F_S 4315). The quantitative determination of the constituents of food.
Credit Hours: 3
Prerequisites: F_S 4310 or concurrent enrollment

F_S 7330: Principles of Food Processing
(same as AG_S_M 7330; cross-leveled with F_S 4330, AG_S_M 4330). Basic principles of food processing, with emphasis on blanching, pasteurization, commercial sterilization, refrigeration, freezing, concentration, dehydration and packing. Impacts of processing on product quality are evaluated.
Credit Hours: 3

F_S 7331: Technology of Dairy Products and Ingredients
(cross-leveled with F_S 4331). Technology, chemistry, and nutrition of dairy foods as well as functional properties of dairy ingredients.
Credit Hours: 3
Prerequisites: one Chemistry course and F_S 3231 or equivalent

F_S 7344: Processing Muscle Foods
(same as AN_SCI 7344; cross-leveled with F_S 4344, AN_SCI 4344). Materials and technologies for the manufacture of muscle food products from red meats, poultry and seafood. Experience problem-solving through further processing of complex ingredients and develop skills by practicing operations in a pilot plant facility.
Credit Hours: 3
Prerequisites: one Chemistry course

F_S 7350: Microbiology of Fermented Foods
Physiology, biochemistry, and genetics of microorganisms important in food fermentations. How microorganisms are used in fermentations and how raw materials are converted into finished fermented foods and beverages. Graded on A-F basis only.
Credit Hours: 2

F_S 7351: Food Laws and Regulations
Policy, law and regulation development related to food. Introduction to major US regulatory agencies impacting food law and discussion on major food safety and food labeling laws and regulations. Graded on A-F basis only.
Credit Hours: 2

F_S 7354: Physiology and Biochemistry of Muscle as Food
(same as AN_SCI 7354; cross-leveled with F_S 4354, AN_SCI 4354). Basic concepts in muscle growth and development of livestock evaluating the effects of environment, welfare, nutrition and genetics regarding muscle metabolism, physiology, and the ultimate condition of muscle as food.
Credit Hours: 3
Prerequisites: AN_SCI 3254 or MPP 3202 or BIO_SC 3700; AN_SCI 2001 or AN_SCI 2214 or AN_SCI 2114 or AN_SCI 3214 or F_S 3214 or AN_SCI 3231 or F_S 3231
Recommended: Any Biochemistry or Organic Chemistry course

F_S 7360: Food Quality Assurance
(cross-leveled with F_S 4980). Capstone course integrating various food science disciplines to comply with regulations concerned with protection of the nation's food supply. Applies practices to insure consumers of healthful foods.
Credit Hours: 3

F_S 7370: Food Microbiology
(cross-leveled with F_S 4370). Study of bacteria, yeast and molds. Includes dominant flora, public health significance, characterization of organisms, examination of foods representative of major food groups, spoilage, preservation, food fermentations and physiological groups.
Credit Hours: 3
Prerequisites: F_S 2172 and one Biochemistry course or concurrent enrollment

F_S 7375: Food Microbiology Laboratory
(cross-leveled with F_S 4375). Examination of foods for microorganisms and characterization of major species.
Credit Hours: 2
F_S 8090: Research in Food Science
Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required. Graded on S/U basis only.

Credit Hours: 1-99
Prerequisites: Restricted to Food Science MS Students Only

F_S 8100: Strategic Human Resource Management in Hospitality
This course is designed to familiarize students with a wide range of theories, concepts, business practices and applications associated with managing human resources in business. Topics include micro-human resource issues such as recruitment, hiring, performance measurements, employee relations, and retention, macro human resource topics such as organizational performance measurement, and interrelationship between micro and macro human resources such as individual differences and job performance and organizational performance. Students will learn the key theories and applications through reading, discussion, research, and writings. Graded on A-F only.

Credit Hours: 3
Prerequisites: HSP_MGMT 7110

F_S 8110: Advanced Hospitality Marketing
This course provides students with an advanced-level view of marketing strategies with the focus in hospitality and tourism. Students will be exposed to a general overview of theoretical frameworks and seminal work in this field. They will gain appreciation of the contemporary social-scientific research on marketing and persuasion. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 7110 or instructor's consent

F_S 8180: Strategic Management and Competitive Strategy in the Hospitality Industries
This course introduces to students and enables them to develop a comprehensive understanding of the concepts and principles of strategic management and competitive strategy as applied to the hospitality industries. Students will be acquainted with the key concepts of strategic management through discussions, research, critiquing and writings. This course will cover a wide variety of topics related to environmental scanning, strategic direction, organizational structure and culture, administration and evaluation of existing and challenging business practices, concepts and theories in the management distinctive to that of hospitality, tourism and service. Emphasis will place on the identification of relevant interdisciplinary paradigms and theory and research techniques for analysis, using advanced concepts and quantitative methods in the scientific investigation problems related to hospitality. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 7110 or instructor's consent

F_S 8263: Service Operations Management: Revenue Management
This course offers an opportunity for students to learn the theory, concepts, and knowledge applied in service operations management. Students will find them useful in trying to cope with the dilemmas faced by operating managers in the hospitality industry. Especially, the course focuses on revenue management.
F_S 8301: Ethnic Foods: Food Safety, Food Protection and Defense Challenges
An overview of the safety concerns and risks associated with ethnic and imported ethnic foods. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 3153 or instructor's consent

F_S 8302: Food Protection and Defense-Essential Concepts
This course presents foundational concepts relevant to protecting the food supply from intentional contamination. Graded on A-F basis only.
Credit Hours: 2

F_S 8303: A Multidisciplinary Overview of Food Safety and Security
This course provides students with an understanding of a host of multidisciplinary aspects of food safety, particularly in the context of public health. Graded on A-F basis only.
Credit Hours: 2

F_S 8304: HACCP
This course focuses on procedures and processes which can affect the overall microbiological safety of food and the Hazard Analysis Critical Control Point (HACCP) system. Graded on A-F basis only.
Credit Hours: 2

F_S 8305: Topics in Food Science
Specialized topics in the area of food science and nutrition.
Credit Hour: 1-99
Prerequisites: instructor's consent

F_S 8306: Meat Quality
Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: F_S 3214 or equivalent

F_S 8401: Topics in Food Science
Specialized topics in the area of food science and nutrition.
Credit Hour: 1-99
Prerequisites: instructor's consent

F_S 8402: Research Methods in Food Science
Introduction to research. Defining research problems, developing hypotheses, searching scientific literature, designing experiments, presenting data, writing scientific papers and theses, making oral presentations.
Credit Hours: 2

F_S 8404: Advanced Food Microbiology and Biotechnology
Covers basic principles in biotechnology and applied food microbiology, including current topics of interest in food biotechnology. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 2

F_S 8405: Advanced Microbiology of Foods
Principles of microbial physiology, taxonomy, analytical methods applied to study of microorganisms added to foods and those causing food spoilage or food-borne illness. Roles of microorganisms in manufacture/distribution of foods.
Credit Hours: 3
Prerequisites: F_S 4370 or equivalent

F_S 8406: Foodborne Toxicants
This course covers human risks from foodborne toxicants, remediation and detoxification strategies for key foodborne toxicants and major modes of toxicity of key foodborne toxicants. Principles of food toxicology will be applied to optimize hazard analysis within HACCP for the prevention of foodborne toxicities. Graded on A-F basis only.
Credit Hours: 2

F_S 8408: Risk Assessment for Food, Agriculture and Veterinary Medicine
Credit Hours: 2

F_S 8410: Food Chemistry II
Study of chemical content of food, emphasizing aspects that exist uniquely in food.
Credit Hours: 4
Prerequisites: F_S 4310 or equivalent

F_S 8414: Meat Quality
Discussion of factors affecting meat quality in beef, pork, lamb and poultry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: F_S 3214 or equivalent

F_S 8424: Meat Investigations
Discussion of literature, special reports, assigned readings, techniques, interpretation of results.
Credit Hours: 3
Prerequisites: F_S 4344 and F_S 4310 or equivalent

F_S 8440: Functional Foods and Nutraceuticals
Principles and challenges involved in developing foods with health benefits beyond basic nutrition; efficacy, safety, regulatory and marketing aspects of functional foods and nutraceutical; current controversies and evidence of therapeutic properties of functional foods and Dietary supplements. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOCHM 3630 or equivalent and F_S 4310 or equivalent, or instructor's consent

F_S 8460: Food Biopolymers
Study of physical, chemical, and functional properties of food biopolymers and their applications in food and other industries. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: BIOCHM 3630 or equivalent and F_S 4310 or equivalent, or instructor's consent
F_S 8470: Advanced Food Technology
To understand the physical and chemical changes that occur during the processing and storage of food; study the quality and safety issues of foods and learn traditional and recent advances in food science and technology.
Credit Hours: 3
Prerequisites: F_S 4310, or equivalent or instructor's consent

F_S 9085: Problems in Food Science
Individual studies includes minor research problems.
Credit Hour: 1-99
Prerequisites: Food Science PhD students

F_S 9087: Seminar in Food Science
Provides students with opportunities for development in depth of advanced aspects of food science through reviews of research in progress and of current scientific publications. Prerequisites: PhD standing
Credit Hour: 1

F_S 9090: Research in Foods Science
Original investigation of advanced nature, leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: Food Science PhD students

F_S 9402: Advanced Research Methods in Food and Hospitality Systems
This course provides doctoral students with introduction and review of research methods available for use in the study of food science, hospitality management and agricultural system management. Hence, the emphasis of this course is on empirical studies in the field, and will examine research conducted by scholars in the academic area. This course assists as baseline preparation for graduate students' continuing work in the graduate program. Specifically, the course provides students with knowledge and research experience in regard to 1) research fundamentals and backgrounds, 2) types of research, and 3) data analysis.
Credit Hours: 3
Prerequisites: Introductory research method course or statistics course; instructor's consent required

Forestry (FOREST)

FOREST 2151: Dendrology
An introduction to the biology of trees, emphasizing identification in the field, taxonomy, ecology, geographic distribution and economic significance of forest species.
Credit Hours: 4
Prerequisites: BIO_SC 1200 or PLNT_S 2120 and PLNT_S 3130

FOREST 2542: Forest Measurement and Inventory
Field measurement of standing trees including diameter, height and age. Estimation of forest timber resources using a variety of sampling schemes and techniques. Introduction to Arcview and growth models.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2543 and FOREST 2544

FOREST 2543: Forest Ecology Field Studies
Field studies of vegetation, soils, habitats and ecological units. Application of ecological principles of natural resource management and understanding of natural and managed forested communities with an emphasis on southeastern Missouri.
Credit Hour: 1
Prerequisites: SOIL 2100 and FOREST 2151
Corequisites: FOREST 2542 and FOREST 2544

FOREST 2544: Introduction to Silviculture and Management
Management objectives and stand prescriptions, regeneration and intermediate silvicultural treatments, management on private and federal forest lands, tree evaluation and timber marking.
Credit Hour: 1
Prerequisites: SOIL 2100 and FOREST 2151
Corequisites: FOREST 2542 and FOREST 2543

FOREST 2545: Forest Management Planning
Preparation and presentation of a written forest management plan using material and data developed in prerequisite courses.
Credit Hour: 1
Prerequisites: SOIL 2100, FOREST 2151
Corequisites: FOREST 2540, FOREST 2541, FOREST 2542, FOREST 2543 and FOREST 2544 concurrently

FOREST 3207: Forest Fire Control and Use
Fundamentals of all phases of fire protection. Objectives and techniques in use of fire.
Credit Hours: 2

FOREST 3212: Forest Health and Protection
Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies.
Credit Hours: 4
Recommended: FOREST 2151

FOREST 3212W: Forest Health and Protection - Writing Intensive
Fundamental concepts of forest pathology and forest entomology including emphasis on ecological principles and management strategies.
Credit Hours: 4
Recommended: FOREST 2151
FOREST 3290: Urban Forestry
The culture and management of trees in urban areas, including ownership patterns, species composition, growth environment, amenities provided and evaluation. One-day field trip required.
Credit Hours: 2
Prerequisites: FOREST 2151 or PLNT_S 2210

FOREST 3300: Problems in Forestry
Problems in Forestry
Credit Hour: 1-99

FOREST 3350: Special Readings in Forestry
Critical review of current literature and research in forestry, fisheries and wildlife, and methods of presenting research results.
Credit Hour: 1-99

FOREST 3320: Forest Ecology
Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.
Credit Hours: 5
Prerequisites: At least Junior standing. Recommended FOREST 2151

FOREST 4320W: Forest Ecology - Writing Intensive
Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.
Credit Hours: 5
Prerequisites: At least Junior standing
Recommended: FOREST 2151

FOREST 4330: Practice of Silviculture
(cross-leveled with FOREST 7330). Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.
Credit Hours: 4
Prerequisites: FOREST 4320
Recommended: FOREST 4375

FOREST 4330: Forest Economics
Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time.
Credit Hours: 3
Prerequisites: ABM 1042 or ABM 1041 or ABM 2070

FOREST 4360: Photogrammetry, Inventory and Models
Applied course in the area of aerial photogrammetry, forest inventory, and forest growth models for developing, maintaining, and utilizing these tools in a forest management.
Credit Hours: 3
Recommended: NAT_R 3110

FOREST 4375: Forest Stand Dynamics
Examines the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest growth models, and long term data sets are used to understand stand dynamics.
Credit Hours: 3
Recommended: FOREST 4330

FOREST 4380: Forest Resource Management
Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner’s objectives.
Credit Hours: 3
Prerequisites: FOREST 4330 and FOREST 4350; Senior Standing only

FOREST 4385: Agroforestry I: Theory, Practice and Adoption
Understand biophysical, ecological, social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices.
Credit Hours: 3
Prerequisites: Senior standing

FOREST 4390: Watershed Management and Water Quality
(cross-leveled with FOREST 7390). Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality.
Credit Hours: 3
Prerequisites: MATH 1400; Senior standing only

FOREST 4940: Forestry Internship
Supervised professional experience with an approved public or private organization. May be repeated for credit. Graded on S/U basis only.
Credit Hour: 1-12
Prerequisites: Instructor's consent required

FOREST 4950: Forestry Undergraduate Research
Research apprenticeship with a faculty mentor. Students are expected to develop initial concept for the research, design experiments, collect data, and analyze data with faculty input, oversight, and guidance. Graded on A-F basis only.
Credit Hour: 1-4
Prerequisites: Senior standing, STAT 2530

FOREST 4994: Senior Honors Research in Forestry
Credit Hour: 1-3
Prerequisites: Instructor Consent Required

FOREST 7301: Topics in Forestry
Organized study of selected topics. Intended for upper-division and graduate students. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99
FOREST 7320: Forest Ecology
Principles of community, ecosystem, and population ecology and examination of the influence of environmental factors and human activity on forest dynamics, composition, structure and function.
Credit Hours: 5
Prerequisites: FOREST 2151 or BIO_SC 3210 or instructor's consent

FOREST 7330: Practice of Silviculture
(cross-leveled with FOREST 4330). Applied ecological principles, cultural practices, tree improvement techniques and treatments to forest stands and other lands for systematic production of goods and services.
Credit Hours: 4
Prerequisites: FOREST 4320

FOREST 7350: Forest Economics
Economic principles applied to production/marketing of goods and services from forest land: emphasizes capital and land factors and investment alternatives related to time.
Credit Hours: 3
Prerequisites: Mathematics requirement completed; AG_EC 1041, or AG_EC 3080

FOREST 7360: Photogrammetry, Inventory and Models
Applied course in the area of aerial photogrammetry, forest inventory, and forest growth models for developing, maintaining, and utilizing these tools in a forest management.
Credit Hours: 3

FOREST 7375: Forest Stand Dynamics
Examines the development of forest structure, the role of disturbance on forest change and the use of this knowledge in applying silvicultural systems. Both forest stand dynamics theories, structure diagrams, forest growth models, and long term data sets are used to understand stand dynamics.
Credit Hours: 3
Prerequisites: FOREST 4330 or instructor's consent

FOREST 7380: Forest Resource Management
Teaches resource managers how to develop a plan for the management of forest resources using managerial, economic, silvical and wildlife techniques for its enhancement and to meet the landowner's objectives.
Credit Hours: 3
Prerequisites: FOREST 4330 and FOREST 4350

FOREST 7385: Agroforestry I: Theory, Practice and Adoption
Understand biophysical, ecological social and economic features of temperate and tropical agroforestry. Covers the basics of design, planning and implementation of agroforestry practices.
Credit Hours: 3

FOREST 7390: Watershed Management and Water Quality
(cross-leveled with FOREST 4390). Hydrologic processes on wildland watersheds. Effects of forest land management on streamflow, erosion and water quality.

FOREST 8050: Research in Forestry
Original research not leading to preparation of dissertation.
Credit Hour: 1-99

FOREST 8090: Masters Thesis Research in Forestry
Original investigation for presentation in a M.S. thesis. Graded on a S/U basis only.
Credit Hour: 1-10

FOREST 8385: Ecological Principles of Agroforestry
The course prepares students to develop an understanding of the complexity of agroforestry. Students will critically analyze classical and contemporary ecological theories and apply them in designing agroforestry practices to solve complex production and environmental issues. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385 or permission of instructor

FOREST 8390: Physical Hydrology
Students will obtain an understanding of hydrologic processes in terms of the occurrence, distribution and movement of water spanning the atmosphere and lithosphere. Students will have an opportunity to develop an understanding of physical processes governing mass and energy flux in wildland and anthropogenic systems. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: College Physics and Calculus I

FOREST 8395: Agroforestry Economics and Policy
This course discusses basic economic and financial principles, and their applications in agroforestry. Specifically, the discussion includes market demand and supply, market failure, non-market valuations, cost and benefit analysis, short term and long term economic analyses, economic valuation of ecosystem services, and the applications in agroforestry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FOREST 4385 or FOREST 7385, AG_EC 1041 or permission of instructor

FOREST 8401: Topics in Forestry
Organized study of selected topics. Subjects and credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: instructor's consent

FOREST 8430: Applied Silviculture
Ecological and economic factors affecting application of silviculture in each of eighteen forest regions in United States.
Credit Hours: 3
Prerequisites: FOREST 4330
### Forest Soils (FOREST 8450)
Physical, chemical and biological properties of forest soils in relation to tree growth.
- **Credit Hours:** 3
- **Prerequisites:** FOREST 4330 or instructor's consent

### Advanced Forest Ecology (FOREST 8460)
Lecture/discussion based course emphasizing contemporary and classic ecological studies and concepts in the context of current forest ecology issues and research. Prerequisites: undergraduate ecology course
- **Credit Hours:** 3

### Advanced Forest Management (FOREST 8490)
Modern quantitative methods to facilitate decision-making in harvest scheduling and regulation, land use allocation, and production planning in natural resource management.
- **Credit Hours:** 3
- **Prerequisites:** FOREST 4380

### Advanced Forest Biometrics (FOREST 8515)
An introduction to the topics and philosophy of ecological modeling. The course will guide students through the process of developing a conceptual model, formalizing the model, formulating, parameterizing, and running the model as well as analyzing the results.
- **Credit Hours:** 3
- **Prerequisites:** STAT 7070 or instructor's consent

### Ecosystem Management: The Human Dimension (FOREST 8530)
Overview of cultural, social, political and economic dimensions of natural resource problems and issues from an ecologically grounded management perspective.
- **Credit Hours:** 3
- **Prerequisites:** NAT_R 4353 or equivalent

### Plant-Water Relations (FOREST 8620)
- **Credit Hours:** 3

### Seminar in Forestry (FOREST 9087)
Discussions of current developments in Forestry, and critical study of research programs. Graded on S/U basis only.
- **Credit Hour:** 1

### Dissertation Research in Forestry (FOREST 9090)
Original investigation for presentation in a doctoral dissertation. Graded on a S/U basis only.
- **Credit Hour:** 1-10

---

### French (FRENCH)

#### Elementary French I (FRENCH 1100)
French 1100 is a beginning French course, but many students will have had 1 or 2 years of high school French. Students will learn using all four skills—listening, speaking, reading, and writing with an emphasis on communication. The class meets four days a week and will be taught in French. The pace of the course is much faster than a high school class and should be accompanied by 2 hours of study for each hour spent in class. Class time is used to integrate new structures and vocabulary.
- **Credit Hours:** 4
- **Prerequisites:** FRENCH 1100 - MOTR LANG 101: French I

#### Elementary French II (FRENCH 1200)
The second course of the beginning language sequence is the continuation of FRENCH 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of French are encouraged to take this course.
- **Credit Hours:** 4
- **Recommended:** Grade in the C range or better in FRENCH 1100 or equivalent
- **Prerequisites:** Grade in the C range or better in FRENCH 1200, or equivalent course

#### Intermediate French Composition and Conversation (FRENCH 2160)
A course designed to develop the ability to speak, read, and write in French via the reading of French short stories and/or a short novel. Grammar review.
- **Credit Hours:** 3
- **Prerequisites:** FRENCH 2100
FRENCH 2310: French Civilization
Open to any student interested. No knowledge of French required. May not be included in area of concentration in French.
Credit Hours: 3
Prerequisites: sophomore standing

FRENCH 2310W: French Civilization - Writing Intensive
Open to any student interested. No knowledge of French required. May not be included in area of concentration in French.
Credit Hours: 3
Prerequisites: sophomore standing

FRENCH 2320: French Literature and Thought in English Translation I
This course examines how the masterworks of French literature, from the Middle Ages to the eighteenth century, have influenced Western literary, cultural and philosophical traditions.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

FRENCH 2330: French Literature in Translation II
This course examines how the masterworks of French literature of the nineteenth and twentieth centuries have influenced Western literary, cultural and philosophical traditions.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

FRENCH 2350: New World Francophone Literature in Translation
Credit Hours: 3
Prerequisites: ENGLSH 1000

FRENCH 3004: Topics in French-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3
Prerequisites: sophomore standing, departmental consent for repetition

FRENCH 3005: Topics in French-Humanities/Fine Arts
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. Prerequisites: sophomore standing
Credit Hour: 1-3

FRENCH 3160: Advanced French Composition and Conversation I
Development of more sophisticated skills of written and oral expression.
Credit Hours: 3
Prerequisites: FRENCH 2160 or equivalent

FRENCH 3180: Les Fondations de la Civilisation Francaise
Overview of French civilization from its origins to French Revolution. Studies will examine key cultural objects from art, literature, and popular culture as well as political and historical movements that have shaped development of French civilization. Ideal for students interested in engaging with issues, debates, and problems that helped to define the nascent French state.
Credit Hours: 3
Prerequisites: FRENCH 2160

FRENCH 3280: Commercial French
Composition and Conversation course based on materials related to the French business world. Acquisition of business-related vocabulary. Introduction to French business operations and correspondence.
Credit Hours: 3
Prerequisites: FRENCH 2160 or equivalent

FRENCH 3410: Introduction to Literary Analysis
Will acquaint students with vocabulary required for analysis of literary texts. Along with the traditional French method of poetry explication, students will learn to analyze the major literary genres (poetry, theatre, prose).
Credit Hours: 3
Prerequisites: FRENCH 3160

FRENCH 3420: Introduction to French Literature I
Study of selected masterpieces of French literature from the Middle Ages through the 18th century.
Credit Hours: 3
Prerequisites: FRENCH 3160 and FRENCH 3410

FRENCH 3430W: Introduction to French Literature I - Writing Intensive
Study of selected masterpieces of French literature from the Middle Ages through the 18th century.
Credit Hours: 3
Prerequisites: FRENCH 3160 and FRENCH 3410

FRENCH 3430: Introduction to French Literature II
Study of selected masterpieces of French literature of the 19th and 20th centuries. Recommended:
Credit Hours: 3
Prerequisites: FRENCH 3160
Recommended: FRENCH 3410

FRENCH 3440: Francophone Literature of North America
A survey course of Francophone literature of New France, Louisiana territory and the French West Indies from its beginnings in the
seventeenth century to the late twentieth century. Selected novels, poems and plays will be studied in their historical and social context.

Credit Hours: 3  
Prerequisites: FRENCH 2160

FRENCH 3710: Survey of Minority and Creole Languages of the U.S. and the Caribbean  
(same as SPAN 3710 and LINGST 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, cultural and national identity (taught in English).

Credit Hours: 3  
Prerequisites: sophomore standing

FRENCH 4070: Intensive Beginning French  
Rapid acquisition of a reading knowledge of French. Cannot be taken to fulfill undergraduate language requirement.

Credit Hours: 3  
Prerequisites: instructor's consent

FRENCH 4120: Foreign Language Teaching Methodology  
(same as SPAN 4120, LATIN 4121; cross-leveled with FRENCH 7120, SPAN 7120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used toward Arts and Science major.

Credit Hours: 3  
Prerequisites: departmental consent

FRENCH 4130: Stylistics  
A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

Credit Hours: 3  
Prerequisites: FRENCH 3160 or FRENCH 3280  
Recommended: FRENCH 3420, FRENCH 3430 or FRENCH 3410

FRENCH 4130W: Stylistics - Writing Intensive  
A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

Credit Hours: 3  
Prerequisites: FRENCH 3160 or FRENCH 3280  
Recommended: FRENCH 3420, FRENCH 3430 or FRENCH 3410

FRENCH 4410: French Medieval Literature  
Survey of representative works from the principal literary genres of the Middle Ages: epic (La Chanson de Roland), courtly romance (Chretien de Troyes), chantefable (Aucassin et Nicolette), short story (lai, fabliau), theatre, and lyric poetry.

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4420: French Renaissance  
Survey of prose and poetry of the sixteenth century with significant emphasis on Montaigne, Rabelais, and the poetry of the Pleiade.

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4440: Eighteenth-Century French Literature  
(cross-leveled with FRENCH 7440). Through systematic and representative readings, this course familiarizes students with the literary trends and intellectual currents of 18th century France. The course includes works by Montesquieu, Voltaire, Rousseau, Laclos, Diderot, Marivaux, Prevost, and Beaumarchais.

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4460: Twentieth-Century French Novel  
(cross-leveled with FRENCH 7460). The course is a historical survey that deals with three topics: the modernist writings of the early twentieth century. (Proust, Gide, and Colette), existentialism of the mid-century (Sartre, Camus), and contemporary forms of writing (Beckett, Robbe-Grillet, Sarrute, among others).

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4470: Introduction to the Contemporary French Theatre  
Survey of twentieth-century French drama. Students read plays by Claudel, Giraudoux, Sartre, Anouilh, Beckett, Ionesco, Genet, and others. Strong emphasis is played on class discussions. Written analyses of two plays are assigned, and there is an hourly exam and a final.

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4710: History of the French Language  
(same as LINGST 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external social, political, and historical factors that have affected the development of French, followed by a diachronic study of the internal structural features of the language.

Credit Hours: 3  
Prerequisites: FRENCH 3420 and FRENCH 3430

FRENCH 4720: Structure of Modern French  
(same as LINGST 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

Credit Hours: 3  
Prerequisites: FRENCH 3160 or equivalent or instructor's consent

FRENCH 4820: Blogging the World: The Web in Cultural Context  
(same as GERMAN 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring
various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contexts?

Credit Hours: 3
Prerequisites: sophomore standing required

FRENCH 493H: The Capstone Experience in French - Honors
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.

Credit Hours: 3
Prerequisites: Honors eligibility required

FRENCH 7004: Topics in French-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.

Credit Hour: 1-99

FRENCH 7120: Foreign Language Teaching Methodology
(same as SPAN 7120, cross-leveled with SPAN 4120, FRENCH 4120, LATIN 4121). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used toward Arts and Science major.

Credit Hours: 3

FRENCH 7130: Stylistics
A technical study of French as a means of communication and of self-expression, involving levels of meaning, rhetorical structure, and textual analysis.

Credit Hours: 3
Prerequisites: FRENCH 3160 or FRENCH 3280 and FRENCH 3420 or FRENCH 3430

FRENCH 7710: History of the French Language
(same as LINGST 7710). Required of M.A. candidates.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430
FRENCH 7720: Structure of Modern French
(same as LINGST 7720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.
Credit Hours: 3
Prerequisites: FRENCH 3160 or equivalent or instructor's consent

FRENCH 7960: Special Readings in French
Independent study through readings, conferences, reports.
Credit Hour: 1-3
Prerequisites: departmental consent

FRENCH 7980: Special Themes in French
Subject varies according to instructor.
Credit Hours: 3

FRENCH 7993: The Capstone Experience in French
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in French, and the ability to think critically and analytically.
Credit Hours: 3

FRENCH 8080: Readings in French
Independent readings in preparation for MA or MALT comprehensive examination in French. Graded on A-F basis only.
Credit Hour: 1-3

FRENCH 8085: Problems in French
Problems in French.
Credit Hour: 1-99

FRENCH 8087: Seminar in French
Subject varies according to instructor.
Credit Hour: 2-3

FRENCH 8120: Bilingualism and Language Contact
(same as SPAN 8120 and LINGST 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in English).
Credit Hours: 3

FRENCH 8411: Old French
Old French.
Credit Hours: 3
Recommended: FRENCH 4710 or FRENCH 7710 and some knowledge of Latin

FRENCH 8416: Studies in the French Renaissance
Studies in the French Renaissance.
Credit Hours: 3
Recommended: FRENCH 4420 or FRENCH 7420

FRENCH 8417: Studies in Seventeenth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4430 or FRENCH 7430

FRENCH 8418: Studies in Eighteenth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4440 or FRENCH 7440

FRENCH 8420: Studies in Twentieth-Century French Literature
Credit Hours: 3
Recommended: FRENCH 4460 or FRENCH 7460, FRENCH 4470 or FRENCH 7470 or FRENCH 4480 or FRENCH 7480

FRENCH 9080: Readings in French
Independent readings in preparation for the PhD comprehensive examination in French.
Credit Hour: 3-6

FRENCH 9090: Research in French
Leads to preparation of PhD dissertation in French. Graded on S/U basis only.
Credit Hour: 1-99

General Human Environmental Sciences (GN_HES)

GN_HES 1100: Introduction to Human Environmental Sciences
Introduction to Human Environmental Sciences
Credit Hour: 1

General Studies (G_STDY)

G_STDY 4940: Internship in General Studies
Internship limited to students pursuing the Bachelor of General Studies degree. Graded on S/U basis only.
Credit Hour: 1-6

G_STDY 4960: Readings in General Studies
Independent readings with supervisory faculty member. May be repeated to a maximum of six hours.
Credit Hour: 1-6
Prerequisites: Open only to General Studies majors

Geography (GEOG)
GEOG 1050: Introductory Meteorology
(same as ATM_SC 1050). Physical processes of atmosphere in relation to day-to-day changes in weather.
Credit Hours: 3
Prerequisites: Enrollment restricted to students enrolled in the College of Arts and Science

GEOG 1050H: Introductory Meteorology - Honors
(same as ATM_SC 1050H). Physical processes of atmosphere in relation to day-to-day changes in weather.
Credit Hours: 3
Prerequisites: Enrollment restricted to students enrolled in the College of Arts and Science; Honors eligibility required

GEOG 1100: Regions and Nations of the World I
Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.
Credit Hours: 3
GEOG 1100 - MOTR GEOG 101: World Regional Geography

GEOG 1100H: Regions and Nations of the World I - Honors
Introductory analysis for general education. Regional character, spatial relationships, major problems of Europe, North America (United States and Canada) and Latin America. Organized around basic concepts in field of geography.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 1200: Regions and Nations of the World II
Introductory analysis for general education. Regional character, spatial relationships, problems of environment and development of the former Soviet Union, Pacific World, South and East Asia, Africa and Middle East. Organized around basic concepts in the field of geography. May be taken independently of GEOG 1100.
Credit Hours: 3

GEOG 1205H: Regions and Nations General Honors
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 1550: Introduction to the Humanized Earth
Examines human culture as a geographical element; the power of culture and human institutions in human-environmental interaction and the creation of agriculture, folk culture, popular culture, cities, and a broad range of cultural landscapes.
Credit Hours: 3

GEOG 1600: Climate Change: Science and Public Policy
This course will explore the role of physical science, environmental politics and public policy in shaping contemporary debate concerning climate change, mitigation, and adaptation strategies. We will examine the scientific rationale and statistical basis underwriting the concept of climate change, why aspects of the science remain controversial, the prospects of institutional action and the difficulties inherent in developing public policies targeting mitigation and adaptation. Course includes a role-laying simulation where students will play roles based on 2009 climate negotiations in Copenhagen, Denmark. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: freshman and sophomores only
GEOG 1600 - MOTR PHYS 110: Essentials in Physical Sciences

GEOG 1800: Digital Earth: Introduction to the Geospatial Technologies
Introduction to technologies used to map a changing world, with an emphasis on digital mapping explorations of human and environmental interactions on Earth. Course includes lab and fieldwork to introduce geographic information data collection and analysis techniques. Graded on A/F basis only. May be repeated for credit.
Credit Hours: 3
Prerequisites: Freshman and sophomore standing or instructor's consent

GEOG 1840: Global Environmental Change
Course uses a geographic framework to study patterns and processes related to global environmental change. Topics include environmental reconstruction, water resources, human-environment interactions, glaciers, fire, and climate.
Credit Hours: 3

GEOG 1900: Our Dynamic Planet in Film
This course focuses on using documentary films (e.g., Planet Earth) as a medium for studying how global environmental change is impacting all spheres of our dynamic planet. To ensure a more complete understanding of course material, films are supplemented with active lectures and discussions of assigned readings from both periodicals and peer-reviewed literature that emphasize key points illustrated in the films. In doing so, this course synthesizes material from numerous fields of study that fall under the burgeoning umbrella field of global change ecology. This synthetic approach is used to highlight the formidable linkages on Earth between the non-living and living, thus permitting students to gain an appreciation and holistic understanding of how global environmental change is impacting Earth processes responsible for creating both our current landscapes and the remarkable diversity of life that inhabit them.
Credit Hours: 3

GEOG 2010: Exploring Geography
We are all explorers. As children, we grew up testing the boundaries of our known worlds and trying to understand what was beyond. Geography gives us the means to formalize this impulse to explore the world around us, both local and distant. It allows us to make sense of the ways in which space and relationships between objects drives much of human, social, and environmental interaction. In this course, we will illustrate some of the principle ways in which Geographers investigate, explain, and map meaning, pushing the boundaries of what we know as individuals and society. Using a combination of discussion and field exercises, students will be asked to engage with a number of critical societal issues that have geographical elements at their core. Examples include the Geography of crime, imagining place, the city of the future, environmental change, terrorism, human trafficking, drones, and sustainability.
huge social consequences, with rapid growth, population movements, globalization as an economic and geographical process, generating people have been making over the past fifty years. Part I examines the various responses - psychological, social and political -- that forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of "global citizenship." Graded on A-F basis only.

Credit Hours: 3

GEOG 2293: Globalization, Identity and Citizenship
(same as PEA_ST 2293, POL_SC 2293). This course examines the forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of "global citizenship." Graded on A-F basis only.

Credit Hours: 3

GEOG 2293W: Globalization, Identity and Citizenship - Writing Intensive
(same as PEA_ST 2293W, POL_SC 2293W). This course examines the forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of "global citizenship." Graded on A-F basis only.

Credit Hours: 3

GEOG 2280: Race, Democracy, and Violence in Cuba and Haiti
(same as PEA_ST 2280, SOCIOL 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

GEOG 2280W: Race, Democracy, and Violence in Cuba and Haiti - Writing Intensive
(same as PEA_ST 2280W, SOCIOL 2280W). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

GEOG 2289: Towns in Missouri and the Midwest: Voices and Inequalities
(same as PEA_ST 2289, RU_SOC 2289). Focusing on towns and communities and their regional history and cultural traditions, we will examine the issues and concerns of small town America in the context of recent hardships and adverse economic trends. Examples of topics to be covered include case studies of communities such as Marceline, Missouri (Walt Disney's boyhood home), race and the immigration of non-whites in to rural areas; gender roles in small communities, the role of religion in small-town identity formation, and other current issues faced by "middle America." The responsiveness of government, large corporations, and institutions to the problems of diverse communities will be critically examined, with a multidisciplinary approach that will draw on key theories and works in the disciplines of sociology, rural sociology, community development, and geography. Graded on A-F basis only.

Credit Hours: 3

GEOG 2293: Globalization, Identity and Citizenship
(same as PEA_ST 2293, POL_SC 2293). This course examines the forces of globalization that are transforming our world, and explores the various responses - psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements,
Theoretical readings in new media, tracing both the historical impact of sovereignty and representation, and moves quickly to critical and studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and studies in a digital world. The course begins with study of Indigenous

**GEOG 2720: The City**  
Study of cities: origin, development, distribution; social, economic, and demographic significance. Consideration of theories of structure, urban hierarchies, and land use planning.  
**Credit Hours: 3**

**GEOG 2904: Topics in Geography-Social Science**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.  
**Credit Hour: 1-3**

**GEOG 2904W: Topics in Geography-Social Science - Writing Intensive**  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.  
**Credit Hour: 1-3**

**GEOG 3040: Introduction to Geographic Information Systems GIS**  
(same as CV_ENG 3050). Introduces theory, concepts and techniques related to the creation, manipulation, processing, and basic analysis of spatial data using GIS. Data management, current data models, GIS applications and course topics are reinforced through hands-on computer laboratory exercises.  
**Credit Hours: 3**

**GEOG 3140: Mexico, Central America, and the Caribbean**  
Physical environment and culture in the regional development of Mexico, Central America, and the Caribbean.  
**Credit Hours: 3**

**GEOG 3270: Geography of the Middle East**  
Cultural, physical and historical geography of Middle East, with emphasis on cultural adaptations to environments and conflicts over the resources.  
**Credit Hours: 3**

**GEOG 3385: Special Problems in Geography**  
Independent investigation leading to a paper or project. May be repeated to a maximum of 6 hours.  
**Credit Hour: 1-3**

**GEOG 3496: Digital Indigenous Studies**  
(same as PEA_ST 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.  
**Credit Hours: 3**

**GEOG 3496W: Digital Indigenous Studies - Writing Intensive**  
(same as PEA_ST 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program.  
**Credit Hours: 3**

**GEOG 3510: Historical Geography of North America**  
Analysis of selected geographical patterns and themes in the continent's past. Focus is explicitly geographical, stressing extensive use of maps and recent scholarly work by historical geographers.  
**Credit Hours: 3**

**GEOG 3550: Native American Geographies**  
A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and GIS representations, and natural resources.  
**Credit Hours: 3**
GEOG 3560W: Native American Geographies - Writing Intensive
A survey of the Native American geographies in the United States. Historical and contemporary topics are covered employing cross-cultural perspectives including some philosophical views of the Earth and society, sense of place, memory, sacred land, colonialism and GIS representations, and natural resources.
Credit Hours: 3

GEOG 3580: Placewriting
This class explores creative nonfiction work that attends to the geographical dimensions of human experience and the character of place - "placewriting". Students will investigate how creative nonfiction evokes the human relationship with place and the geographical dimensions of personal and group identity. The class consists of two parts: discussion and critique of six creative nonfiction works on place, and a writer's workshop designed to enable students produce their own work in the genre focused on a local community or place.
Credit Hours: 3
Recommended: GEOG 1550

GEOG 3600: Climates of the World
(same as ATM_SC 3600). A study of the world distribution of climates based on "cause and effect" relationships. Special attention is given to the impacts of climate on humanity.
Credit Hours: 3
Prerequisites: GEOG 1050 or equivalent or graduate standing
Corequisites: By permission, only

GEOG 3610: Physical Geography of the United States
Study of natural regions of the United States by integrating topics from landforms, geology, climate, soils, vegetation, resources, and land use.
Credit Hours: 3
Prerequisites: GEOG 2610

GEOG 3630: Earth Surface Systems
Systematic study of landforms geomorphic processes governing them. Provides a foundation for the theoretical, technical, and practical understanding of environmental systems.
Credit Hours: 3

GEOG 3740: Geography and Planning
Emphasis on geographic techniques for gathering and generating environmental information for planners. Principles of land use planning will be applied to selected regions.
Credit Hour: 1-3

GEOG 3760: Geography of the World's Religions
(same as REL_ST 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.
Credit Hours: 3

GEOG 3760W: Geography of the World's Religions - Writing Intensive
(same as REL_ST 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.
Credit Hours: 3

GEOG 3780: World Political Geography: Patterns and Processes
(same as PEA_ST 3780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world.
Credit Hours: 3

GEOG 3800: Geography of Travel and Tourism
This course examines the fundamentals of the geography of tourism and travel in both foreign and domestic contexts. During the past few decades, tourism has been a fast growing industry around the world, although tourism can easily be negatively influenced by terrorism, natural disasters, and economic downturns. During the semester we'll look at several common types of tourism and focus on the positive and negative impacts of tourism upon local cultures, the environment, and economic development. Graded on A-F basis only.
Credit Hours: 3
Recommended: GEOG 1100 or GEOG 1200 or sophomore standing

GEOG 3830: Remote Sensing
Introduction to the principles of remote sensing of the environment. Digital imagery from spacecraft, conventional and high-altitude aerial photography, thermal imaging, and microwave remote sensing.
Credit Hours: 3
Recommended: GEOG 2840

GEOG 3840: Cartography
Principles of computer-assisted cartography. Automated cartographic display. "Hands on" experience with computer-mapping software and hardware systems. Role of computers in map design. Digital encoding of geographic data.
Credit Hours: 3
Prerequisites: GEOG 2840

GEOG 4130: The Geospatial Sciences in National Security
(Same as CV_ENG 4175). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.
Credit Hours: 3
Prerequisites: junior standing or above required

GEOG 4200: Geopolitics
(cross-leveled with GEOG 7200). Geopolitics examines politics, especially international relations, as influenced by geographical factors. To reveal and forecast global trends, we examine the interactions of geographical contexts and perspectives with international and domestic political processes. Our geopolitical analysis is both thematic and

</tbody>
</table>
Credit Hours: 3

GEOG 4860: Advanced Remote Sensing
Advanced remote sensing to provide digital image processing techniques for satellite and airborne imagery; emphasis on spatial/spectral analysis, image classification and land use/land cover change detection. Class project heavily involved.
Credit Hours: 3
Prerequisites: GEOG 3830

GEOG 4904: Topics in Geography-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Must get departmental Consent for repetition.
Credit Hour: 1-12
Prerequisites: junior standing

GEOG 4904W: Topics in Geography-Social Science - Writing Intensive
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Must get departmental Consent for repetition.
Credit Hour: 1-12
Prerequisites: junior standing

GEOG 4940: Advanced Geographic Information Systems (GIS II) (cross-leveled with GEOG 7940). Advanced study of geographic and spatial analysis and modeling utilizing Geographic Information Systems technology. Focus on project management, research applications, and geostatistical analysis through independent research projects.
Credit Hours: 3
Prerequisites: GEOG 3040 or instructor's permission

GEOG 4950: Internship in Applied Geography and Cartography
Regularized individual work experience with local, regional, state or national agencies, with guidance and readings supplied by faculty coordinator. May repeat to maximum of 6 hours.
Credit Hour: 1-3
Prerequisites: Departmental consent required

GEOG 4990: Senior Seminar in Geography
A seminar in selected themes in Geography. Class will focus on research, writing, presenting, and discussing themes in contemporary geography. Required of all majors prior to graduation.
Credit Hours: 3
Prerequisites: 5 courses in geography or instructor's consent

GEOG 4996HW: Honors in Geography - Honors/Writing Intensive
Special work for Honors candidates in geography. Prerequisites: Honors eligibility required
Credit Hours: 3

GEOG 4997H: Honors in Geography
Special work for Honors candidates in geography.
Credit Hours: 3
Prerequisites: Honors eligibility required

GEOG 7130: The Geospatial Sciences in National Security (Same as CV_ENG 7175). This course explores the critical contribution of the geospatial sciences in the collection, processing, visualization and analysis of geospatial information related to national security. May be repeated for credit.
Credit Hours: 1-12
Prerequisites: junior standing or above required; instructor's consent

GEOG 7200: Geopolitics
(cross-leveled with GEOG 4200). Geopolitics examines politics, especially international relations, as influenced by geographical factors. To reveal and forecast global trends, we examine the interactions of geographical contexts and perspectives with international and domestic political processes. Our geopolitical analysis is both thematic and regional. Geographical themes are multi-disciplinary and include location and place, physical geography and natural resources, population and immigration, culture and ethnicity, religion, economics and trade, foreign policy, conflict, globalization, and development. These are examined in the context of eight world regions and the polar realms. Graded on A-F basis only.
Credit Hours: 3

GEOG 7400: Geographies of Terrorism and Drugs (cross-leveled with GEOG 4400). The course examines the parallel and independent geographies of terrorism and drugs. Their common features include dangerous cultural landscapes that cannot sustain other forms of land use. They are typically marginal, remote, and beyond the reach of authorities. Crackdowns on terrorists and drug producers in one locale usually fail to eradicate the problems as they emerge elsewhere. The wars on terrorism and drugs often stimulate greater enrollments and production. <td>Migration and Immigration</td>
<td>As fertility and mortality decline to record low levels, immigration and migration have become the primary components of population change. Changes brought on by immigration to a country and the internal redistribution of population via migration pose challenges to governments, economic development, social and cultural relations, and environmental sustainability. This course explores issues surrounding immigration and migration. Beginning with the demographic overview of immigration, it focuses on the challenges faced by immigrant, sending, and receiving nations in the global migration system. The second part of the course focuses on the array of issues surrounding immigration to the United States, including the socio-economic adaptation of immigrants, the economic and cultural impacts of immigration, and illegal immigration. The third part of the course focuses on internal migration within migration within the US, discussing topics such as migration to the Sunbelt, Great Plains depopulation, poverty migration, migration to the suburbs, and migration's impact on community. Linkages between domestic migration and immigration will also be explored.</td>

Prerequisites: instructor's consent and independent study contract

GEOG 8090: Research in Geography
Research leading to a thesis. May be repeated to a maximum of 8 hours. Graded on S/U basis only.
Credit Hours: 1-8
Prerequisites: instructor's consent and independent study contract

GEOG 8270: Seminar in the Geography of the Middle East
Advanced readings and analysis of topics in the geography of the Middle East.
Credit Hours: 3
Prerequisites: instructor's consent

GEOG 8710: Seminar
May be repeated to a maximum of 6 hours.
Credit Hours: 1-3
Prerequisites: departmental consent

GEOG 8750: Research Design
Credit Hours: 3
Prerequisites: restricted to graduate geography majors graduate or instructor's consent

GEOG 8760: Geographic Thought
Discussion of the historic roots of the discipline, especially the ideas, theories and underlying philosophies that have defined Geography in the past century and a half. Students will also explore the philosophical and theoretical ideas that shape the way geographers approach the study of the world.
Credit Hours: 3
Prerequisites: instructor's consent

GEOG 8820: Field Geography
Techniques of geographical investigation in the field.
Credit Hours: 3
Prerequisites: restricted to graduate Geography majors or instructor's consent

GEOG 8902: Topics in Geography-Biological/Physical/Mathematical
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hours: 1-3
Prerequisites: instructor's consent

Geology (GEOL)

GEOL 1050: Planet Earth
An introduction to Earth Science. Topics include: evidence for continental drift and plate tectonics, causes and prediction of natural hazards, the scale of geological time.
Credit Hours: 3
GEOL 1050 - MOTR GEOL 100: Geology

GEOL 1100: Principles of Geology with Laboratory
Three lectures, 2-hours lab. Earth processes and products and their impact on human needs and the environment. One field trip. For the Mizzou Online sections, there will not be required lectures, lab, and field trip.
Credit Hours: 4
GEOL 1100 - MOTR GEOL 100L: Geology with Lab

GEOL 1120: Scientific Investigations of the Earth
This hybrid-lab course introduces basic methods of earth science investigation and inquiry with an emphasis on earth sciences. Key concepts include basic scientific methodology, earth materials and processes, and the societal relevance of geoscience research and application. Upon completion of the course, the successful student will have learned to apply course material to improve thinking, problem solving and decision-making. Graded on A-F basis only.
Credit Hours: 2
Recommended: GEOL 1050 as a corequisite (although the course will be a stand-alone introduction to the geosciences)

GEOL 1200: Environmental Geology with Laboratory
The interaction between geologic processes and human society. Topics include mineral, water, and energy resources, volcanic hazards, earthquakes, landslides, floods, coastal erosion, pollution problems and environmental management.
Credit Hours: 4
GEOL 1200 - MOTR GEOL 100L: Geology with Lab

GEOL 1250: The World's Oceans
An interdisciplinary introduction to oceanography. Topics include: geologic evolution of ocean basins, properties of seawater, ocean circulation (waves, tides, and currents), marine ecosystems, instability of beaches and coastlines, coastal development and engineering.
Credit Hours: 3

GEOL 1400: Themes in Geology
5-week course organized around a central theme or topic, up to 3 different sections can be taken for credit.
Credit Hour: 1

GEOL 2100: Independent Study in Geology
Directed Library research in geological topics, under the supervision of faculty sponsor. May be repeated for a maximum of 3 hours credit.
Credit Hour: 1-3
Prerequisites: instructor's consent
GEOL 2110: Introduction to Soil Science with Laboratory
(same as SOIL 2110). Introduction to Soil Science with emphasis placed on physical, biological, and chemical properties and applications to land use, plant growth, and environmental problems with laboratory application of these concepts.
Credit Hours: 5
Prerequisites: CHEM 1320

GEOL 2120H: Faults and Earthquakes: Past, Present, and Future
Seminar in science and societal ramifications of earthquakes. Geologic background includes causes, behavior, and distribution of faults. Student-led discussions cover historical disasters, economic, political, psychological, and cultural perspectives.
Credit Hours: 3
Prerequisites: ENGLISH 1000
Recommended: Honors eligibility

GEOL 2130: Physical Geology for Scientists and Engineers
Introduction to physical geology and Earth processes with a focus on applications and societal relevance. In addition to basic geologic processes, physical principles will illustrate the interactions between geology and engineering, using a calculus-based approach.
Credit Hours: 4
Prerequisites: MATH 1500
GEOL 2130 - MOTR GEOL 100: Geology

GEOL 2150: The Age of the Dinosaurs
Study of the evolution of dinosaurs during the Mesozoic Era. New information on dinosaur life habits, food resources, dispersal by plate tectonics, and theories of extinction will be covered.
Credit Hours: 3
Prerequisites: 1000-level science course

GEOL 2160H: Volcanoes and the Human Environment - Honors
(same as GN_HON 2450H). This course gives students an understanding of how volcanoes work, how they are studied, and how they have impacted human cultures. Students will gain appreciation of volcanology as a broad scientific discipline within geology and the role that science plays in public policy. Graded on A/F basis only.
Credit Hours: 3
Recommended: Honors eligibility required

GEOL 2160H: Volcanoes and the Human Environment - Honors
(same as GN_HON 2450H). This course gives students an understanding of how volcanoes work, how they are studied, and how they have impacted human cultures. Students will gain appreciation of volcanology as a broad scientific discipline within geology and the role that science plays in public policy. Graded on A/F basis only.
Credit Hours: 3
Recommended: Honors eligibility required

GEOL 2200: Seminar: Headline Topics in the Geological Science
Seminar organized around a central theme that is the focus of intense ongoing research and public debate.
Credit Hours: 3

GEOL 2220: Seminar: Headline Topics in the Geological Sciences
(same as GEOL 2220H). Seminar organized around a central theme that is the focus of intense ongoing research and public debate.
Credit Hours: 3
Prerequisites: ENGLISH 1000
Recommended: Honors eligibility

GEOL 2220H: Honors Seminar: Headline Topics in the Geological Science
Seminar organized around a central theme that is the focus of intense ongoing research and public debate.
Credit Hours: 3
Prerequisites: ENGLISH 1000
Recommended: Honors eligibility

GEOL 2300: Earth Systems and Global Change
Study of the earth as a whole, taking into account the many interwoven components of the geosphere, hydrosphere, atmosphere and biosphere.
Credit Hours: 3
Recommended: 1000-level Science course

GEOL 2350: Historical Geology
Summary of principles and techniques used in reconstructing Earth's history. Survey of major events that have affected Earth and its inhabitants. Review of geologic history of North America.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200

GEOL 2360: Historical Geology Laboratory
A laboratory course designed to improve understanding of Earth History by examination of maps and mineral, rock, sediment and fossil samples.
Credit Hour: 1
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200
Corequisites: GEOL 2350

GEOL 2400: Surficial Earth Processes and Products with Laboratory
Semiquantitative analysis of geologic processes that shape the earth's surface. Includes topics in sedimentation and geomorphology.
Credit Hours: 4
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200, and MATH 1100

GEOL 2450: Global Water Cycle
Study of environmental geochemical factors controlling the composition of natural waters, and sources of water's constituents (natural or human-produced). Math Reasoning Proficiency Course.
Credit Hours: 3
Prerequisites: MATH 1100
Recommended: 1000-level science course

GEOL 2500: Regional Geology Field Trip
Field based study of a particular geologic region, including classroom preparation prior to the field trip. The trip will last 7-10 days, either during Spring Break or immediately after finals week. May be repeated for credit.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200

GEOL 2600: Mineral and Energy Resources of the Earth
This course examines the geology of Earth's major mineral and energy resources--their origin, distribution, and characteristics--and societal implications of their use and abundance. Major topics: fossil fuels, nuclear energy, base & precious metals, non-metallic minerals, water.
Credit Hours: 3

GEOL 3085: Problems in Geological Sciences
Problems in Geological Sciences.
Credit Hour: 1-5
Prerequisites: instructor's consent

</tbody>
</table>
GEOL 4300: Introduction to Low-Temperature Geochemistry
Introduction to the chemical alteration of rock-forming minerals in weathering environments and to factors controlling the chemical composition of subsurface water.
Credit Hours: 3
Prerequisites: GEOL 3300 or instructor's consent

GEOL 4318: Environmental Soil Chemistry
(same as SOIL 4318 and ENV_SC 4318). Study of chemical constituents and processes occurring in soils. Topics include soil minerals and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.
Credit Hours: 3
Prerequisites: SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330. Junior standing or instructor's consent

GEOL 4350: Patterns and Processes in the Fossil Record
(cross-leveled with GEOL 7350). The purposes of this course are to 1) analyze patterns in the history of life and 2) to recognize the biased processes that led to its preservation. We will accomplish these goals by examining two disparate fossil preservation pathways: 1) Konservat lagerstätten: fossil deposits that are notorious for the exceptional and rare preservation of soft tissues and 2) Konzentrat lagerstätten: fossil deposits that are exceptional for the enormous amount of fossilized skeletal material they contain. Through careful examination of both the rare and the hyper-abundant, we can address the fundamental question of paleobiology: how literally can the fossil record be read as the history of life? Graded on A-F basis only.
Credit Hours: 3
Prerequisites: GEOL 2350, GEOL 2360

GEOL 4500: Organic Geochemistry
Topics include chemistry of petroleum-forming reactions and their kinetic parameters; use of organic-chemical criteria in source-rock evaluation; carbon isotope fractionation in organic precursors of biological molecules; early history of earth's atmosphere.
Credit Hours: 3
Prerequisites: instructor's consent

GEOL 4560: Plate Tectonics
Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.
Credit Hours: 3
Prerequisites: GEOL 3250 or GEOL 3650 or instructor's consent

GEOL 4650W: Plate Tectonics - Writing Intensive
Formation, evolution, and structure of the earth. Rules, causes, and implications of plate tectonics with emphasis on present-day features.
Credit Hours: 3
Prerequisites: GEOL 3250 or GEOL 3650 or instructor's consent

GEOL 4660: Neotectonics and Earthquake Geology
(cross-leveled with GEOL 7680). Introduction to techniques and concepts of active crustal deformation from the geological and geodetic perspectives. Topics include tectonic geomorphology, paleoseismology, Quaternary dating, tectonic geodesy, numerical models of faults, and earthquake hazard assessment.
Credit Hours: 3
Prerequisites: GEOL 3650 or GEOL 4650

GEOL 4750: Microanalysis for Geological Sciences
(cross-leveled with GEOL 7750). This course is intended to provide a working knowledge of electron and X-ray microbeam analytical instruments - both in principle and in practice. Lectures will focus on the physics of how these instruments collect data, and how these data can be interpreted. In addition, students will gain hands-on experience with operating these instruments, specifically on their own samples, as well as preparing their samples for microanalysis and interpreting/manipulating the resulting data. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's Consent (instrument time is limited so enrollment must also be limited)

GEOL 4800: Introduction to Geophysics
(cross-leveled with GEOL 7800). Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.
Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200 and MATH 1700 or instructor's consent

GEOL 4900: Igneous and Metamorphic Petrology with Laboratory
Introduction to igneous and metamorphic rock associations and rock-forming processes. Emphasis on understanding the evolution of the Earth in view of igneous and metamorphic rock petrogenesis.
Credit Hours: 4
Prerequisites: GEOL 3250
Recommended: GEOL 3300

GEOL 4950: Senior Thesis
Research conducted in an area of the Geological Sciences under the auspices of a member of the faculty. Under normal circumstances, this research should be completed over two semesters. May be repeated for a maximum of 3 hours credit.
Credit Hour: 1-3

GEOL 4992: Geology Field Camp
Credit Hours: 6
Recommended: GEOL 2350, GEOL 3650, and GEOL 3800

GEOL 7002: Topics in Geological Sciences-Biological/Physical/Mathematics
Organized study of selected topics. Subjects and earnable credit may vary. May be repeated with departmental consent.

preparing their samples for microanalysis and interpreting/manipulating the resulting data. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor's consent (Instrument time is limited; graduate students who will use the instruments in their research will have priority)

GEOL 7800: Introduction to Geophysics
(cross-levelled with GEOL 4800). Introduction to the fundamentals of geophysical methods and their applications in geology, environmental studies, and exploration. Topics include seismic, gravity, magnetic, and electric methods.

Credit Hours: 3
Prerequisites: GEOL 1100 or GEOL 1150 or GEOL 1200 and MATH 1700 or instructor's consent

GEOL 7990: Research in Geological Sciences-Masters
Does not lead to dissertation.

Credit Hour: 1-8

GEOL 8002: Topics in Geological Sciences
Organized study of selected topics. May be repeated with departmental consent.

Credit Hour: 1-99
Prerequisites: PhD standing, instructor's consent

GEOL 8050: Research in Geological Sciences-Masters Non-Thesis
Research leading to a non-thesis Masters project. Graded on S/U basis only.

Credit Hour: 1-3

GEOL 8085: Problems in Geological Sciences
Credit Hour: 1-8
Prerequisites: instructor's consent

GEOL 8090: Research in Geological Sciences-Masters Thesis
Preparation of dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

GEOL 8100: Continental Tectonics
The structural, metamorphic, and igneous evolution of mountain belts and continental rifts with emphasis on convergent margin settings and terrane accretion processes and products. Case studies are considered from the Precambrian to the recent.

Credit Hours: 3
Prerequisites: GEOL 3650 and GEOL 4900

GEOL 8140: Metamorphic Petrology
Petrography and petrology of metamorphic rocks. Emphasis on textures, mineral assemblages, and mineral chemistry in order to determine the physico-chemical condition of metamorphism.

Credit Hours: 3
Prerequisites: GEOL 3250 and GEOL 4900

GEOL 8150: Earthquake Seismology

Credit Hours: 3
Prerequisites: GEOL 8320

GEOL 8160: Igneous Petrology
Studies of the origin and evolution of magmas with use of phase equilibria, physical properties, and kinetics.

Credit Hours: 3
Prerequisites: GEOL 3250 and GEOL 4900

GEOL 8170: Radiogenic Isotope Geochemistry
Studies of the application of trace element and radiogenic isotope systematics to petrogenesis of rocks.

Credit Hours: 3
Prerequisites: GEOL 4900

GEOL 8190: Advanced Paleontology
Principles of taxonomy, biostratigraphy, functional morphology and paleoecology are illustrated by individual projects that combine field collecting, laboratory examination and literature research.

Credit Hours: 3
Prerequisites: GEOL 4550

GEOL 8200: Advanced Structural Geology

Credit Hours: 3
Prerequisites: GEOL 3650

GEOL 8240: Hydrolgeologic Processes
Quantitative analysis of role of groundwater in major geologic processes. Theory review of fluid flow, heat transport, reactive solute transport in porous media. Applications to sedimentary diagenesis, hydrothermal ore deposits, petroleum migration, earthquakes, magmatism, metamorphism.

Credit Hours: 3
Prerequisites: GEOL 4100 or GEOL 7100 or equivalent

GEOL 8300: Precambrian History
Coupled evolution of the biosphere, lithosphere, hydrosphere, and atmosphere over the span of Precambrian history. Topics will be discussed largely in the context of biological evolutionary events and the fossil record, as well as with a focus on geochemical records.

Credit Hours: 3

GEOL 8320: Introduction to Seismology
Credit Hours: 3  
Prerequisites: PHYSCS 2760, MATH 4500 and CMP_SC 1050

**GEOL 8450: Tectonics and Sedimentation**  
Global survey of modern and ancient convergent plate boundaries with an emphasis on sedimentary facies and structural styles.  
Credit Hours: 3  
Prerequisites: GEOL 3650, GEOL 3800 and instructor's consent

**GEOL 8510: Geodynamics**  
This course is designed to cover the fundamentals of the quantitative aspects of Plate Tectonics. The study of these subjects is generally referred to as Geodynamics or Geodynamic Theory. This theory revolutionized the earth sciences and the way people think of earth processes. By definition Geodynamics is an interdisciplinary paradigm therefore it is necessary to cover a wide range of topics from heat transfer to gravity. This course will overlap with subjects covered in both Plate Tectonics and Geophysics but we will emphasize the quantitative aspects of this theory in this course.  
Credit Hours: 3  
Prerequisites: MATH 1700, PHYSCS 2760

**GEOL 8550: Stable Isotope Geochemistry**  
Mechanisms and fundamental concepts of fractionation of light stable isotopes in nature. Emphasizes application of hydrogen, carbon, oxygen and sulfur isotopes to igneous, metamorphic and sedimentary rocks, metallic ore deposits, and to natural waters.  
Credit Hours: 3  
Prerequisites: instructor's consent

**GEOL 8650: Thermal Processes in the Solid Earth**  
Principles of heat transfer in solid earth by conduction, advection and convection. Basic analytic and numerical solutions. Application in Earth's dynamic system, environmental sciences, and geological problems.  
Credit Hours: 3  
Prerequisites: MATH 1700, PHYSCS 1220 or PHYSCS 2750

**GEOL 8750: Silicate Glasses, Liquids and Magmas**  
Theory of silicate liquid viscosity, heat capacity and configurational entropy, emphasizing the role of volatile components. Applications to magma rheology and eruptive behavior. Lab instruction in viscometry techniques.  
Credit Hours: 3  
Prerequisites: GEOL 4900 and GEOL 4700, or instructor's consent

**GEOL 8800: Applied Numerical Analysis**  
A study of applied mathematical analysis of spatial and temporal data as applied in the geosciences.  
Credit Hours: 3  
Prerequisites: MATH 1700 or MATH 2300, PHYSCS 1220 or PHYSCS 2760

**GEOL 8990: Research**  
Does not lead to dissertation.

Credit Hour: 1-8

**GEOL 9090: Research in Geological Sciences-Doctoral Dissertation**  
Preparation of dissertation. Graded on a S/U basis only.  
Credit Hour: 1-99

**German (GERMAN)**

**GERMAN 1100: Elementary German I**  
For beginners with no prior knowledge of German. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication--oral and listening skills, reading and writing.  
Credit Hours: 5

**GERMAN 1100H: Elementary German I - Honors**  
This course is designed for Honors students with little or no German language background and will provide students with a foundation in vocabulary and grammar in order to develop communication proficiency in German. Students will be trained using the five skills: listening, speaking, writing, reading and cultural knowledge. The course will be taught as a total immersion class and thus differs from the standard elementary German sequence. Furthermore, students will be required to complete lengthier reading and writing tasks as well as present a final oral multimedia project at the end of the semester.  
Credit Hours: 5  
Prerequisites: Honors eligibility required

**GERMAN 1150: Freshman Introduction to German Studies**  
Introduction to German Studies as academic field. Small seminar setting with senior faculty, their favorite texts, and questions pursued in the research and teaching. Recommended for all students interested in integrating German studies into their academic career, conducted in English.  
Credit Hour: 1  
Prerequisites: Restricted to Freshman students only

**GERMAN 1200: Elementary German II**  
A continuation of GERMAN 1100. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.  
Credit Hours: 5  
Recommended: C- or better in GERMAN 1100, or equivalent

**GERMAN 1200H: Elementary German II - Honors**  
This course is designed for Honors students who either took the GERMAN 1100H section or are placing into GERMAN 1200 as honors eligible students. The main focus of this course is on further development of basic communication skills in speaking, listening, reading, and writing in German adding more nuanced cultural and sociolinguistic competencies in a total immersion environment.
Credit Hours: 5
Prerequisites: Honors eligibility required

GERMAN 2001: Undergraduate Topics in German-General
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent.
Credit Hour: 1-3

GERMAN 2005: Undergraduate Topics in German-Humanities
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.
Credit Hour: 1-3

GERMAN 2005W: Undergraduate Topics in German-Humanities - Writing Intensive
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated with departmental consent. No language credit.
Credit Hour: 1-3

GERMAN 2100: Intermediate German I
A continuation of GERMAN 1200. This course helps learners develop the skills they need to use German as a means of communication in their personal and professional life. It covers a wide variety of vocabulary pertaining to everyday life; emphasis is on all types of communication - oral and listening skills, reading and writing.
Credit Hours: 3
Recommended: C- or better in GERMAN 1200, or equivalent

GERMAN 2260: Intermediate German II: Language and Culture
This course continues to help learners develop the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.
Credit Hours: 3
Recommended: C- in GERMAN 2100 or equivalent

GERMAN 2310: German Civilization: Beginning to 1850
Major historical, social, artistic, literary themes from beginnings to end of Revolution of 1848. Films and recordings. May be taken independently of GERMAN 2320. No foreign language credit. Some sections may enforce prerequisite of ENGLSH 1000.
Credit Hours: 3

GERMAN 2320: German Civilization: 1850 to Present
Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.
Credit Hours: 3
Prerequisites: some sections may enforce prerequisite of ENGLSH 1000

GERMAN 2320W: German Civilization: 1850 to Present - Writing Intensive
Second Empire, Weimar Republic, Nazi era, two Germanies after 1949. Historical, social, artistic, literary themes. Films and recordings. May be taken independently of GERMAN 2310. No foreign language credit.
Credit Hours: 3
Prerequisites: some sections may enforce prerequisite of ENGLSH 1000

GERMAN 2820: Trends in World Cinema
(same as FILM_S 2820 and RM_LAN 2820). This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.
Credit Hours: 3
Prerequisites: sophomore standing, ENGLSH 1800 or FILM_S 1800 or instructor's consent

GERMAN 3001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: sophomore standing

GERMAN 3005: Topics in German-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.
Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: sophomore standing

GERMAN 3160: German Conversation and Composition
This course expands communicative competence in German and provides a review of advanced grammar concepts. Primary emphasis is on the further development of oral and written skills, reading comprehension, vocabulary expansion, and a broad exposure to relevant topics of contemporary German culture and society. Conducted in German.
Credit Hours: 3
Prerequisites: GERMAN 2260 or equivalent

GERMAN 3180: Business German
Examines language within the economic and professional context of German-speaking countries. Introduces different economic concepts of Germany's turbulent 20th century, modern-day business systems and everyday commercial activities such as job applications, professional
GERMAN 3190: Contemporary German Culture
This content-driven course provides insights into essential subjects of 20th century German history and contemporary society, using a variety of literature, journalistic sources and film. The course will improve German conversation and literacy skills, and will strengthen critical reading and writing, as well as interpretative abilities. Significant grammatical concepts will be thoroughly reviewed throughout the semester. Conducted in German.

Credit Hours: 3
Prerequisites: GERMAN 2260 or equivalent

GERMAN 3190W: Think Global: Fundamentals of Globalization and Digital Technologies - Writing Intensive
(same as JOURN 3510HW, T_A_M 3010HW, PEA_ST 3510HW, DST 3510HW). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

GERMAN 3230: Introduction to German Literature
This course introduces students to German-language literary texts, images, and films in their cultural and historical context through exposure to major genres (poetry, drama, short stories, and the novel). It further builds their vocabulary and teaches them critical interpretive skills as preparation for the analysis of literary texts in upper-division courses - and in life.

Credit Hours: 3
Prerequisites: C- or better in either GERMAN 3160 or GERMAN 3190

GERMAN 3320: Readings in German Literature
Readings in English of selected works of German literature from Goethe to the present, with a particular emphasis on writers and texts that have had a strong influence on European thought and culture.

Credit Hours: 3
Prerequisites: sophomore standing, ENGLISH 1000

GERMAN 3320H: Readings in German Literature - Honors
(same as PEA_ST 3320H, JOURN 3320H, T_A_M 3320). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

GERMAN 3320W: Readings in German Literature - Writing Intensive
(same as T_A_M 3320W, PEA_ST 3320W, JOURN 3320W, DST 3320W). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

GERMAN 3510: Think Global: Fundamentals of Globalization and Digital Technologies
(same as PEA_ST 3510, JOURN 3510, DST 3510, T_A_M 3010). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

(same as JOURN 3510H, PEA_ST 3510H, T_A_M 3010H, DST 3510H). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing; 2.75 GPA or instructor's consent. Honors eligibility required

GERMAN 3520: Folk and Fairytales in a Global Context
Analyzes the most famous European collection of fairytales, namely the Kinder- und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

Credit Hours: 3
Prerequisites: sophomore standing required
and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

Credit Hours: 3
Prerequisites: sophomore standing required. Honors eligibility required

GERMAN 3520HW: Folk and Fairytales in a Global Context - Honors/ Writing Intensive
Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

Credit Hours: 3
Prerequisites: sophomore standing required. Honors eligibility required

GERMAN 3520W: Folk and Fairytales in a Global Context - Writing Intensive
Analyzes the most famous European collection of fairytales, namely the Kinder-und Hausmarchen (Children's and Household Tales) by the Brothers Grimm and juxtaposes them to folktales from other cultures. Looks at the genre of fairytales, studies the historical context of the genesis of the collection of tales, and modern versions of the tales. Compares and contrasts Grimm's fairytales with folktales of different cultural traditions, analyzes and identifies the formal structure of fairytales and motifs, discusses various interpretive models/perspectives and juxtaposes several historical and contemporary literary fairytales and fairytale adaptations. Cultural unit examples will be on Mongolian culture and history and the Maori culture of New Zealand. Students are expected to create their own cultural unit based on the course's units. Course is taught in English.

Credit Hours: 3
Prerequisites: sophomore standing required

GERMAN 3550: Resistance is Futile: The Advance of the Cyborg
Contemporary culture is haunted by the image of artificial killing machine as metaphor for technology run rampant. Fears may be prompted by feelings of alienation in automated society and underlying suspicion that humans may be nothing more than sophisticated machines. Course maps history of l'homme machine, focusing on fictional representation of creatures that consist of both human and technological "parts." Goal is to discern source of fascination and sociopolitical mechanism behind evocation of "human machine."

Credit Hours: 3
Prerequisites: Sophomore standing or consent of instructor

GERMAN 3605: The History of Blacks in Germany
(same as BL_STU 3605). This course investigates the history of Africans and African Americans in Germany and Central Europe, from Antiquity to today. Special focus on Medieval Africans in Europe, traveling African American intellectuals around 1900, and African American GIs in occupied Germany. This course will challenge your understanding of race and racism.

Credit Hours: 3

GERMAN 3630: History of the German Film
(same as FILM_S 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.

Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

GERMAN 3830: History of the German Film
(same as FILM_S 3830). Introduction to the development of the German film. Old and recent films are viewed and discussed in terms of techniques, artistry, psychology and social impact. English dubbing or subtitles. No foreign language credit.

Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

GERMAN 3865: The Holocaust on Screen
(same as FILM_S 3865). This course explores how the Holocaust has been depicted on film in a variety of national and historical contexts. Drawing on films from 1945 to the present, from the U.S., Germany, Poland, France, and Italy, we will consider to what end images of the Holocaust have been used. Graded on A-F basis only.

Credit Hours: 3

GERMAN 3895: Service Learning in German Studies
Service learning offers students a chance to put into practice what they have learned in theory. Students work as teacher-aids or tutors in foreign language/culture classes at area schools. Does not meet Arts and Science foundation requirements. Graded on S/U basis only.

Credit Hours: 2
Prerequisites: GERMAN 2260, or instructor's consent

GERMAN 4001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: junior standing

GERMAN 4005: Topics in German-Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: junior standing

GERMAN 4005H: Topics in German-Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

Credit Hour: 1-3
Prerequisites: junior standing and instructor's consent. Honors eligibility required
GERMAN 4005W: Topics in German-Humanities - Writing Intensive  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.  
**Credit Hours:** 1-3  
**Prerequisites:** instructor's consent  
**Recommended:** junior standing

GERMAN 4070: Intensive Beginning German  
Designed to lead to a reading knowledge of German.  
**Credit Hours:** 3  
**Prerequisites:** instructor's consent

GERMAN 4160: Advanced Language Proficiency  
(cross-leveled with GERMAN 7160). A course for intermediate to advanced students of German. This course helps learners develop further the necessary communicative skills in German. The particular emphasis is on oral and writing skills, and texts that provide insight into contemporary German culture and social life.  
**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230 or equivalent

GERMAN 4220: Eerie Tales: Classic German Narratives  
In this class, we will read classic uncanny tales in German by major authors, and will explore the traits of this category across a variety of literary movements.  
**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230 or equivalent language capacity

GERMAN 4230: Enlightenment and Revolution  
Reading and discussion of selected works by major German writers from 1740 to 1870.  
**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230 or equivalent

GERMAN 4240: Modernism and Modernity  
Reading and discussion of selected works by major German writers from 1870 to the present.  
**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230 or equivalent

GERMAN 4260: Recent German Literature  
This course examines 'post-unification' works (i.e. by formerly East and West German authors) of literature and film written since 1989 that addresses social and political changes leading to or resulting from unification and the experience of WWII. Students will analyze the diverse cultural, political and economic factors that influence writers and filmmakers whose aesthetic production in turn helps shape contemporary German society.  
**Credit Hours:** 3  
**Prerequisites:** GERMAN 3230

GERMAN 4260W: Recent German Literature - Writing Intensive  
This cross-level course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?  
**Credit Hours:** 3  
**Prerequisites:** sophomore standing required

GERMAN 4273: German Internship and Methods  
(cross-leveled with GERMAN 7730). Supervised introduction to the methodology of the teaching of elementary German; conducted in a classroom environment.  
**Credit Hours:** 3  
**Prerequisites:** junior standing, GERMAN 4230, or instructor's consent

GERMAN 4810: Case Studies in an Inter/Multicultural World  
(same as T_A_M 4810, PEA_ST 4810, DST 4805). This interdepartmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent

GERMAN 4820: Blogging the World: The Web in Cultural Context  
(same as FRENCH 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?  
**Credit Hours:** 3  
**Prerequisites:** sophmore standing required

GERMAN 4820W: Blogging the World: The Web in Cultural Context - Writing Intensive  
(same as FRENCH 4820 and RUSS 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on non-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold; students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?
produced under the rule of these regimes. In the process, we will learn
culture by examining the paintings, music, sculptures, buildings, and films
produced under the rule of these regimes. In the process, we will learn
how Nazi and Soviet culture producers made carefully calibrated appeals
to their respective mass audiences, drawing upon the German and
Russian cultural traditions - and on scientific rhetorics of cultural history
and racial destiny - in crafting their utopian visions of worlds transformed,
wrongs righted, and societies perfected.

Credit Hours: 3
Prerequisites: sophomore standing required

GERMAN 4840: Totalitarianism and Culture
(same as RUSS 4840; cross-leveled with GERMAN 7840, RUSS 7840).
In this course, we will explore the politics and poetics of totalitarian
culture by examining the paintings, music, sculptures, buildings, and films
produced under the rule of these regimes. In the process, we will learn
how Nazi and Soviet culture producers made carefully calibrated appeals
to their respective mass audiences, drawing upon the German and
Russian cultural traditions - and on scientific rhetorics of cultural history
and racial destiny - in crafting their utopian visions of worlds transformed,
wrongs righted, and societies perfected.

Credit Hours: 3
Recommended: Junior standing or above; students taking this course for
WI should have taken a 2000- or 3000-level WI course before beginning this class

GERMAN 4840H: Totalitarianism and Culture - Honors
(same as RUSS 4840H; cross-leveled with GERMAN 7840, RUSS 7840).
In this course, we will explore the politics and poetics of totalitarian
culture by examining the paintings, music, sculptures, buildings, and films
produced under the rule of these regimes. In the process, we will learn
how Nazi and Soviet culture producers made carefully calibrated appeals
to their respective mass audiences, drawing upon the German and
Russian cultural traditions - and on scientific rhetorics of cultural history
and racial destiny - in crafting their utopian visions of worlds transformed,
wrongs righted, and societies perfected.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: Junior standing or above; students taking this course for
WI should have taken a 2000- or 3000-level WI course before beginning this class

GERMAN 4840HW: Totalitarianism and Culture - Honors/Writing Intensive
(same as RUSS 4840HW; cross-leveled with GERMAN 7840, RUSS 7840).
In this course, we will explore the politics and poetics of totalitarian
culture by examining the paintings, music, sculptures, buildings, and films
produced under the rule of these regimes. In the process, we will learn
how Nazi and Soviet culture producers made carefully calibrated appeals
to their respective mass audiences, drawing upon the German and
Russian cultural traditions - and on scientific rhetorics of cultural history
and racial destiny - in crafting their utopian visions of worlds transformed,
wrongs righted, and societies perfected.

GERMAN 4840W: Totalitarianism and Culture - Writing Intensive
(same as RUSS 4840; cross-leveled with GERMAN 7840, RUSS 7840).
In this course, we will explore the politics and poetics of totalitarian
culture by examining the paintings, music, sculptures, buildings, and films
produced under the rule of these regimes. In the process, we will learn

Credit Hours: 3

GERMAN 4960: Special Readings in German
Independent study through readings, conferences, and reports.

Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: junior standing

GERMAN 4980: German Capstone Seminar
(cross-leveled with GERMAN 7980). Required of all senior German
majors; usually taken in the senior year. Focuses on contemporary
Germany and brings together aspects of German literature and culture
studies during the degree program.

Credit Hours: 3
Prerequisites: senior standing or departmental consent

GERMAN 7001: Topics in German-General
Organized study of selected topics. Subjects and earnable credit may
vary from semester to semester. May be repeated to a maximum of 6
hours with departmental consent.

Credit Hour: 1-3

GERMAN 7005: Topics in German - Humanities
Organized study of selected topics. Subjects and earnable credit may
vary from semester to semester. May be repeated to a maximum of 6
hours with departmental consent.

Credit Hour: 1-99

GERMAN 7070: Intensive Beginning German
This course is primarily designed for graduate students seeking reading
knowledge of German. It is conducted in English and consequently
students do not learn how to speak or write German as they typically
do in language acquisition classes. The focus instead lies on grammar,
vocabulary building, and translation. No previous familiarity with German
is expected, but by the end of the course students will ideally be able to
understand the basic gist of scholarly texts in their respective disciplines.
Graded on A-F basis only.

Credit Hours: 3

GERMAN 7085: Problems in German
Independent study through readings, conferences, and reports.

Credit Hour: 1-3
Prerequisites: chairman's consent

GERMAN 7160: German Conversation and Composition III
(cross-leveled with GERMAN 4160). A course for intermediate to
advanced students of German. This course helps learners develop
further the necessary communicative skills in German. The particular
emphasis is on oral and writing skills, and texts that provide insight into
contemporary German culture and social life.

Credit Hours: 3
Prerequisites: GERMAN 3230 or equivalent

focus on the job search and career development processes. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: GRAD 9010

GRAD 9050: Preparing Future Professionals for Post-Graduate Studies Careers
Specialized leadership and transferable skills course that helps students recognize their potential and versatility for careers within and beyond the academy. Beyond leadership theory, the course is framed by 4 competency areas: 1) Analytic competencies; 2) Personal competencies; 3) Communication competencies and 4) Organizational competencies. Learning is enhanced with short text readings and videos in the course management system. Guest speakers. To pass the course, students must attend class; complete a self-assessment; complete an informational interview or job shadow with a leader of choice; and submit 3 short assignments including an Individual Development Plan with goals. Graded on S/U basis only.

Credit Hour: 1

GRAD 9072: Science Policy and Public Engagement
It is important the STEM professionals to understand the intersections between science, politics, and society to understand how the decisions that affect them are made. Junior scholars who understand the goals and implications of publicly funded science will likely have an advantage when seeking jobs and funding. This program also will explore numerous careers in the science policy realm.

Credit Hours: 3

GRAD 9082: Science Policy and Public Engagement
It is important the STEM professionals to understand the intersections between science, politics, and society to understand how the decisions that affect them are made. Junior scholars who understand the goals and implications of publicly funded science will likely have an advantage when seeking jobs and funding. This program also will explore numerous careers in the science policy realm.

Credit Hour: 1

GRAD 9304: Instructional and Communication Strategies for Effective College Teaching
This class will focus on teaching and presentation strategies such as lesson design, using case studies and problem based learning, interactive learning, and classroom and course management. The linguistic emphasis will be on reduction, linking and speech patterns as well as pragmatic issues of organizing, clarifying and emphasizing ideas. Requires an MU Oral Language Proficiency Assessment score of 3 and course consent. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: ITAP language level 3P or GRAD 7303 and level 2; consent required

Greek (GREEK)

GREEK 1100: Elementary Ancient Greek I
Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

Credit Hours: 5

GREEK 1100H: Elementary Ancient Greek I - Honors
Study of forms, grammar, syntax. Early attention to reading in simple Attic prose.

Credit Hours: 5
Prerequisites: Honors eligibility required

GREEK 1200: Elementary Ancient Greek II
Continuation of GREEK 1100. Readings in Attic prose.

Credit Hours: 5
Prerequisites: GREEK 1100

GREEK 1200H: Elementary Ancient Greek II - Honors
Continuation of GREEK 1100H. Readings in Attic prose.

Credit Hours: 5
Prerequisites: GREEK 1100, Honors eligibility required

GREEK 2000: Greek Reading
Selected works of Greek literature.

Credit Hours: 3
Prerequisites: GREEK 1200

GREEK 2000H: Greek Reading - Honors
Selected works of Greek literature.

Credit Hours: 3
Prerequisites: GREEK 1200, Honors eligibility required

GREEK 4300: Intermediate Readings
Selected advanced readings in prose and poetry. Introduction to Homer.

Credit Hours: 3
Prerequisites: GREEK 2000

GREEK 4500: Greek Stylistics
Study and practice of Greek prose, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.

Credit Hours: 3
Recommended: GREEK 4300

GREEK 4510: Greek Tragedy
Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.

Credit Hours: 3
Recommended: GREEK 4300

GREEK 4520: Greek Comedy
Selected plays of Aristophanes and Menander, with special attention to cultural contexts.
GREEK 4530: Greek Lyric Poetry
Selected readings from lyric poets, with attention to verse forms, and dialects.
Credit Hours: 3
Recommended: GREEK 4300

GREEK 4540: Greek Oratory
Selections from Greek orators, with emphasis on Lysias and Demosthenes.
Credit Hours: 3
Recommended: GREEK 4300

GREEK 4560: Greek Historians
Reading and analysis of selected texts of major Greek historians.
Credit Hours: 3
Recommended: GREEK 4300

GREEK 4700: Survey of Greek Literature
Greek literature from origins to end of Roman period; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Recommended: GREEK 4300

GREEK 4960: Special Readings in Greek
Readings in authors and texts not covered in other courses.
Credit Hours: 3
Recommended: GREEK 4300

GREEK 7300: Intermediate Readings in Greek
Selected advanced readings in prose and poetry. Introduction to Homer.
Credit Hours: 3

GREEK 7400: Greek Stylistics
Study and practice of general Greek prose tendencies, with special consideration to basic problems: abstract expression, word order, sentence structure and use of common rhetorical devices.
Credit Hours: 3

GREEK 7500: Greek Tragedy
Selected works of Aeschylus, Sophocles, Euripides, with special attention to language, style, ideas, and dramatic techniques.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7520: Greek Comedy
Selected plays of Aristophanes and Menander, with special attention to cultural contexts.

GREEK 7530: Greek Lyric Poetry
Selected readings from lyric poets, with attention to verse forms, and dialects.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7540: Greek Oratory
Selections from Greek orators, with emphasis on Lysias and Demosthenes.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7560: Greek Historians
Reading and analysis of selected texts of major Greek historians.
Credit Hours: 3
Prerequisites: two years Classical Greek or equivalent

GREEK 7960: Special Readings in Greek
Readings in authors and texts not covered in other courses.
Credit Hours: 1-3
Prerequisites: departmental consent and two years Classical Greek or equivalent

GREEK 8000: Proseminar in Greek Texts
This is a seminar-level introduction to Greek literary and historical texts. The emphasis in this course will be on wide and intensive reading, with the objective of helping the new graduate student quickly develop a sound literary and linguistic competence.
Credit Hours: 3

GREEK 8010: Greek Rough Guide
Intensive exploration of Greek Literature from its earliest appearance through the Roman period. Emphasis upon texts as both literary and cultural artifacts whose interpretation requires familiarity with the historical and archaeological legacy of antiquity as well as modern exegetical strategies. Graded on A-F basis only.
Credit Hours: 3

GREEK 9287: Seminar in Greek Drama
May be repeated to a maximum of 6 hours.
Credit Hours: 3

GREEK 9487: Seminar in the Greek Philosophers
Seminar in the Greek Philosophers.
Credit Hours: 3

GREEK 9887: Seminar in Special Fields
Seminar in Special Fields.
Credit Hours: 3
Health and Rehabilitation Science (HR_SCI)

HR_SCI 8001: Topics in Health and Rehabilitation Science
Organized study of selected topics in health and/or healthcare. Topic and credit may vary from semester to semester.

Credit Hour: 1-3
Prerequisites: instructor's consent

HR_SCI 8085: Problems in Health and Rehabilitation Science
Individual study not leading to thesis or dissertation.

Credit Hour: 1-3
Prerequisites: instructor's consent

Health Management and Informatics (HMI)

HMI 4420: Fundamentals of Bioinformatics
(cross-leveled with HMI 4420). The purpose of this course is to provide perspective on the fundamentals of exploration of biological knowledge using computers. As technologies such as microarray, sequencing, and biomarkers become more pervasive, they are impacting not only the development of science, but also domains such as health care, nutrition, and ethics. This course provides a description of fundamental bioinformatics concepts such as sequencing, proteomics, metabolomics, and biological pathways, and illustrates them with short informatics experiments. Mainly online resources will be used, so no programming is necessary. Also, the course includes a short primer of molecular biology, so background in molecular biology is not required.

Credit Hours: 3
Prerequisites: Departmental consent required

HMI 4440: Health Information Technology
(cross-leveled with HMI 7440). In this course, the student will learn 1) the visual basic programming language and how to design a visual basic application 2) the SQL database language and how to design and operate a database, and 3) HTML, HTML5, javascript and vbscript languages and how to design a client-server database application using Visual Basic and a web database application. Applications will be healthcare focused.

Credit Hours: 3
Prerequisites: Departmental consent required

HMI 7410: Introduction to the US Health Care System
This is a survey course about the American health system, meant to provide a conceptual foundation for students to think critically about the US health system and to build upon in their future related courses. It includes concepts and language in health care, public health, and personal health and provides an understanding of how these domains of health interrelate. Particular focus is given to health care delivery, including how health care services are organized, delivered, paid for, and measured. Selected key, forward-looking issues are covered. The roles of management, leadership, and physicians are highlighted. A resource bank and regular flow of good information sources is developed. Business writing skills are emphasized.

Credit Hours: 3

HMI 7420: Fundamentals of Bioinformatics
(cross-leveled with HMI 4420). The purpose of this course is to provide perspective on the fundamentals of exploration of biological knowledge using computers. As technologies such as microarray, sequencing, and biomarkers become more pervasive, they are impacting not only the development of science, but also domains such as health care, nutrition, and ethics. This course provides a description of fundamental bioinformatics concepts such as sequencing, proteomics, metabolomics, and biological pathways, and illustrates them with short informatics experiments. Mainly online resources will be used, so no programming is necessary. Also, the course includes a short primer of molecular biology, so background in molecular biology is not required.

Credit Hours: 3
Prerequisites: Open to undergraduates with dual enrollment

HMI 7430: Introduction to Health Informatics
Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications.

Credit Hours: 3
Prerequisites: departmental consent

HMI 7431: Foundation of Public Health Informatics
This course will cover foundational knowledge relevant to Public Health Informatics (PHI). The purpose of this course is to expose students to emerging research and application areas in the field of PHI. It will enhance abilities to know when and how to use theories, concepts, and tools of informatics applied to public health. The emphasis of the course is on the use of informatics tools and practices in public health and the existing and evolving relationship between clinical and public health systems. The focus is on PHI including topics such as data exchange and standards, interoperability, use of informatics tools, applying informatics to public health communication and dissemination, surveillance systems, public health policy and project management.

Credit Hours: 3

HMI 7432: Health Database Management and Public Health Data Systems
This course will cover foundational knowledge relevant to database management and public health data systems for Public Health Informatics (PHI). The purpose of this course is to provide students with concepts relevant to the effective use of data, information, and knowledge tools to build, manage, merge, retrieve, and analyze public health data from appropriate health data systems. The emphasis of the course is to use, develop and adapt public health information systems as needed to support public health efforts through use of public health informatics tools and practices to support existing and evolving relationships between clinical and public health systems. The focus is to plan, develop, implement, manage and evaluate database management systems and health data systems that meet the needs of public health practice through PHI.
is committing fraud? Is it ethical for hospitals to drug-test employees and investigate their private lives? What is the ethical way to hire and fire healthcare staff? What should you do if your supervisor is evil?

**Credit Hours:** 3  
**Prerequisites:** HMI 7564 or equivalent course, or permission of instructor

**HMI 8090: Thesis Research in Health Management and Informatics**  
Research leading to a thesis. May be repeated for credit with departmental consent.  
**Credit Hours:** 1-6  
**Prerequisites:** Advisor's consent

**HMI 8401: Topics in Health Management and Informatics**  
Organized study of selected topics. Subjects will vary from semester to semester. May be repeated for credit with departmental consent.  
**Credit Hours:** 3

**HMI 8435: Information Security, Evaluation and Policy**  
The purpose of this course is to provide an extensive overview, practical applications and analyses of functionality and usability evaluations of health care information technology, and to discuss the impact of security on the present and future health care settings.  
**Credit Hours:** 3

**HMI 8437: Data Warehousing and Data/Text Mining for Health Care**  
An introduction to the basic concepts of data warehouse and data/text mining, creating an understanding of why we need those technologies and how they can be applied to healthcare problems.  
**Credit Hours:** 3

**HMI 8441: Biomedical and Health Vocabularies and Ontologies**  
Basic and advanced concepts of controlled terminologies and their use in the representation of biomedical information and knowledge, with emphasis on terminology management in the health care enterprise. Syntactic and semantic structure of controlled terminologies are examined and a number of representative terminologies are analyzed.  
**Credit Hours:** 3

**HMI 8443: Enterprise Information and Solutions Architecture for Strategic Healthcare Operations**  
Organization and development of infrastructure necessary to support an enterprise information system for patient care. Components of architecture are introduced in a problem-based approach, case examples are presented as the basis for addressing specific attributes of the components, as well as problems facing the design of an enterprise information system for health care.  
**Credit Hours:** 3

**HMI 8450: Methods of Health Services Research**  
Writing intensive course provides students with basic understanding of literature search, experimental designs, evaluation methods, ethics, reporting and application of health services research. Practical
research problems are discussed and students prepare a professional, managerially relevant research proposal.

**Credit Hours: 3**
**Prerequisites:** HMI 7410; Satisfactory completion of a college-level course in statistics

---

**HMI 8451: Individual Executive Management Studies**

Students will investigate and address important issues in their organizations. Students will use scientific evidence and techniques to solve applied problems. They will develop data collection protocols, collect and analyze data, draw conclusions, and develop recommendations using basic research methods tools. They will provide actionable and feasible recommendations based on their analysis. Graded on S/U basis only.

**Credit Hours: 3**
**Prerequisites:** HMI 7410, HMI 8450 or permission of instructor

---

**HMI 8453: Executive Management Studies**

Students will use scientific evidence and techniques to solve applied problems in health care organizations. Students will serve as professional consultants, working within small teams to develop project specifications and plans in collaboration with their clients. They will develop data collection protocols, collect and analyze data, draw conclusions and develop recommendations using basic research methods tools. They will provide actionable, feasible recommendations to their clients based on their analysis. Graded on A/F basis only.

**Credit Hours: 3**
**Prerequisites:** HMI 7410; Graduate standing or permission of the instructor

---

**HMI 8460: Administration of Health Care Organizations**

Analyzes health care organizations, emphasizing organizational structure, and strategy, and managerial leadership. Topics include governance, adaptation, design, interorganizational networks, and organizational performance.

**Credit Hours: 3**

---

**HMI 8461: Managing Human Resources in Health Care Organizations**

Provides a framework for understanding and thinking strategically about employee relations and management of people in organizations, drawing on insights from social sciences to explore how psychological, economic, social, and cultural forces influence human resources management in health care.

**Credit Hours: 3**

---

**HMI 8470: Strategic Planning and Marketing for Health Care Organizations**

Analysis of strategic planning and services management and marketing concepts, techniques, and tools in the health care industry. Includes analyzing the environment, assessing the organization's strengths and weaknesses, formulating strategy to achieve competitive advantage, and implementing strategy through service management and marketing.

**Credit Hours: 3**
**Prerequisites:** HMI 7410, and HMI 8524

---

**HMI 8472: Financial Management for Health Care Organizations**

Application of concepts, tools and techniques of financial management and their interrelationships as they apply to current and future operation of health care organizations. Prerequisites: For Residental students: HMI 7410, HMI 7471, HMI 8460, HMI 8524. For Executive students: HMI 7410, HMI 8460, HMI 8524, and satisfactory completion of college-level courses in managerial accounting and financial management or satisfactory completion of HMI's online accounting and finance module.

**Credit Hours: 3**

---

**HMI 8478: Knowledge Management in Health Care**

Representing clinical terms, concepts and knowledge in a form for manipulation by intelligent systems. Theoretical formalisms and conceptual representations of medical information. Examination of knowledge engineering tools and decision support systems.

**Credit Hours: 3**

---

**HMI 8485: Problems in Health Management and Informatics**

Intensive study of an area of health services management.

**Credit Hour:** 1-6
**Prerequisites:** instructor's consent

---

**HMI 8515: Problems in Medical Ethics and Clinical Ethics Consultation Practicum**

The Problems in Medical Ethics Course is a practicum based course with a hands-on clinical ethics consultation component. The course will provide the student with a tailored learning experience that will encourage and develop skills and a working knowledge about health care ethics, and the ability to respond effectively when confronted with the difficult ethical dilemmas that may be encountered at multiple levels in the complex arena of health care. Specifically students will cultivate skills which will optimize their ability to work as an ethics consultant in a multidimensional and diverse society as well as an inclusive health care environment. The course is designed with flexibility in mind, however there are mandatory on site components which will require the student to attend structured meetings, consultations and presentations.

**Credit Hours:** 3
**Prerequisites:** HMI 7410; HMI 7471, HMI 8460, HMI 8524. For Executive students: HMI 7410, HMI 8460, HMI 8524, and satisfactory completion of college-level courses in managerial accounting and financial management or satisfactory completion of HMI's online accounting and finance module.

---

**HMI 8524: Health Economics**

Building upon previous knowledge of basic economic theories, concepts, and tools, the structure, organization, activities, functions, and problems of health and medical care are considered from an economics perspective.

**Credit Hours:** 3
**Prerequisites:** microeconomics

---

**HMI 8544: Managerial Epidemiology (Population Health Management)**

Examination of basic epidemiological concepts and methods as they apply to health services management. Lectures and discussions focus on the most useful measures of occurrence of health events, methods of data collection, research study design, the interpretation of epidemiological data, and the limitations of epidemiological methods,
HMI 8545: Methods in Public Health Informatics/Biostatistics
This course will cover foundational statistical knowledge and methods relevant to Public Health Informatics (PHI). The purpose of this course is to teach students to identify and perform appropriate statistical methods for the data analysis of data from many commonly used experimental designs in the field of PHI. The emphasis of the course is on the understanding of theoretical assumptions underlying these statistical methods. The focus of this course is to perform selected statistical analyses using SPSS and/or R and to interpret statistical results, in a manner relevant to public health informatics in the context of public health. This course builds upon previous knowledge of basic statistics, concepts, and tools by applying them specifically to the public health field.

Credit Hours: 3
Prerequisites: college algebra

HMI 8546: Public Health Information and Visualization (GIS) in Public Health
This course will cover foundational knowledge of Geographic Information Systems (GIS) relevant to Public Health Informatics (PHI). The purpose of this course is to learn basic descriptive and analytical functions of GIS for research and application areas in the field of PHI. The course emphasis is for students to gain hands-on experience in the use of GIS, mapping, and spatial data analysis software such as ArcGIS, R, and Instant Atlas. The focus is on the use of geographic information systems (GISs) in the analysis of public health data. No previous knowledge of mapping or GIS is required, but one is expected to have a working knowledge of MS Office, Windows operating systems, and Biostatistics (prerequisites Methods in Public Health Informatics/Biostatistics). This course builds upon previous knowledge of basic statistics, concepts, and tools by applying them in a GIS context specific to Public Health Informatics.

Credit Hours: 3
Prerequisites: HMI 8545

HMI 8550: Health Data Analytics
The purpose of this course is to provide you with an applied approach to analyze healthcare data. It will enhance abilities to know when and how to use theories, concepts, and tools of data analysis and statistics to evaluate and analyze health care data systematically. The emphasis of the course is on the use of data analysis in the health care field. The focus is on applying data analysis to health care data, problems and issues in the health care system, and on the data application necessary to make decisions based on the analysis. This course builds upon previous knowledge of basic statistics and analytics, concepts, and tools by applying them specifically to the health care system.

Credit Hours: 3
Prerequisites: college algebra and statistics or permission of instructor

HMI 8555: Health Care Ethics
Explores ethics issues and controversies facing clinicians and healthcare administrators. Topics may include end-of-life care, imperiled newborns, maternal-fetal conflict, procreative liberty, genetic screening and enhancement, organ procurement and allocation, rationing, public health, workplace relationships, and conflicts of interest.

Credit Hours: 3

HMI 8571: Decision Support in Health Care Systems
Applies principles and techniques of computer-assisted decision making to solve health care problems. Clinical and managerial applications of artificial intelligence, including expert systems reviewed. Advantages of integrating decision support programs with databases are discussed.

Credit Hours: 3

HMI 8573: Decision Making for Health Care Organizations
Applies and integrates data and decision making techniques with process analytic and improvement tools and techniques. Also includes applications of spreadsheet and relational databases in healthcare settings.

Credit Hours: 3
Prerequisites: Restricted to HMI students

HMI 8574: Health Care Law
Survey of the function and methods of law as applied to health care administration and health care.

Credit Hours: 3
Prerequisites: HMI 7410, HMI 7471, HMI 8460, HMI 8524. Non HMI students with a Graduate or professional school career may be able to take the course with instructor consent

HMI 8575: Health Policy and Politics
Overview and critical analysis of health policy issues in the United States, including how the dynamics of the policy making process have shaped outcomes, successful and unsuccessful, of a number of important policy initiatives.

Credit Hours: 3

HMI 8580: Project Management
This course is designed to provide an in-depth understanding of the fundamentals of project management and its application to the provision of health care. A problem-based approach is used to frame both the theoretical underpinnings of project management and hands-on practical application. Students will develop an understanding of the foundations of project management designed to enable them to successfully complete the certification exam to become a certified project manager. Course content includes project scope development, project work breakdown, financial control, and human resources management for projects.

Credit Hours: 3

HMI 8610: Consumer Health Informatics
Consumer health informatics explores the branch of medical informatics that analyzes consumers’ needs for information; studies and implements methods of making information accessible to consumers; and models and integrates consumers’ preferences into medical information systems.
HMI 8689: Field Experience in Health Management and Informatics
Supervised field experience in approved health agencies and institutions. Opportunity for observation and service participation in various fields of health. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: HMI 7430 or instructor's consent

HMI 8810: Research Methods in Informatics
Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Second semester or later in PhD program or instructor's consent

HMI 8870: Knowledge Representation in Biology and Medicine
The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HMI 7430 and HMI 7440

Health Professions (HTH_PR)

HTH_PR 1001: Topics in Health Professions
Organized study of selected topics in Health Professions. Particular topics and credit may vary each semester.

Credit Hour: 1-3
Prerequisites: instructor's consent

HTH_PR 1100: Introductory Topics in Pharmacy
The course includes presentations and discussions on the profession of pharmacy including: the roles and responsibilities of the pharmacist, educational requirements to obtain the degree, career opportunities, student life, legal and ethical issues, and study skills development. Enrollment limited to Freshman enrolled in Early Assurance Program. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Instructor's consent

HTH_PR 2000: Leadership in Health Care
This course will cover a broad range of concepts in leadership and professional development. Focus will be placed on knowledge and skills necessary for effective leadership in the Health Professions. The first of two semesters series. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: instructors consent
Recommended: to students in specified leadership programs

HTH_PR 2001: Topics in Health Professions
Organized study of selected topics in health professions. Particular topics and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: sophomore standing and instructor's consent

HTH_PR 2960: Special Readings in Health Professions
Directed study of literature and research reports in the health-related professions.

Credit Hour: 1-3
Prerequisites: instructor's consent

HTH_PR 4085: Problems in Health Professions

Credit Hour: 1-99
Prerequisites: instructor's consent

HTH_PR 4100: Introduction to Interprofessional Practice
This course serves as a foundation and introduction to interprofessional education and collaboration. Students who enroll in this course will be assigned to mini-teams of students from a range of disciplines. Through this course, students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on A-F basis only. Recommended: Students must be enrolled in one of the following programs in order to take this course: Communication Sciences, Athletic Training, Respiratory therapy, Radiography, Clinical Laboratory Sciences, Diagnostic Ultrasound. Undeclared/non-professional program students may not enroll.

Credit Hour: 1

HTH_PR 4250: Human Kinesiology
(same as PH_THR 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Application through analysis of daily functional performance, exercise and sport.

Credit Hours: 3
Prerequisites: PTH_AS 2201 or PH_THR 2500

HTH_PR 4950: Research Apprenticeship in Health Professions
This course provides undergraduate students in the health professions and related disciplines experience with research in the health professions and related disciplines experience with research in the health professions. Students will assist in the development and execution of research projects under the supervision of an SHP faculty member.

Credit Hours: 1-3
Prerequisites: instructor's consent

HTH_PR 7100: Introduction to Interprofessional Practice
(cross-leveled with HTH_PR 4100). This course serves as a foundation and introduction to interprofessional education and collaboration. Students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on A-F basis only.
Health Psychology (HLTHPSYC)

HLTHPSYC 8200: Advanced Applied Behavior Analysis
This course provides students with a basic understanding of the fundamentals of behavior analysis and behavioral interventions designed to establish, shape, strengthen and maintain desirable behavior and reduce aberrant behavior. The course focuses on the application of behavioral principles using procedures such as differential reinforcement, extinction, antecedent interventions, and punishment. Graded on A-F basis only.
Credit Hours: 3

Prerequisites: instructor's consent

HLTHPSYC 8250: Methods in Applied Behavior Analysis
This course provides students with a basic understanding of systematic data collection and analysis methods used in applied behavior analysis to make informed (data-driven) clinical decisions. Graded on A-F basis only.
Credit Hours: 3

Prerequisites: One of the following - HLTHPSYC 8200, ESC_PS 8087 or SPC_ED 8440

HLTHPSYC 8950: Thesis in Applied Behavior Analysis
The thesis will consist of an original research question, which will serve as a demonstration of the student’s knowledge of applied behavior analysis. Graded on S/U basis only.
Credit Hours: 1-9

Prerequisites: Graduate student in the M.S. in Applied Behavior Analysis program

Health Sciences (HLTH_SCI)

HLTH_SCI 1000: Introduction to the Health Professions
Overview of clinical/non-clinical health careers; aptitudes/abilities needed for each; the history, current and future state of health care in the U.S; introduction to diverse populations and patient/family issues; Assists with career planning/selection of appropriate majors. Graded on A-F basis only.
Credit Hours: 3

Prerequisites: Honors Eligibility required

HLTH_SCI 1000H: Introduction to the Health Professions - Honors
Overview of clinical/non-clinical health careers; aptitudes/abilities needed for each; the history, current and future state of health care in the U.S; introduction to diverse populations and patient/family issues; Assists with career planning/selection of appropriate majors. Graded on A-F basis only.
Credit Hours: 3

Prerequisites: Honors Eligibility required

HLTH_SCI 2100: Health Sciences Seminar
Professional Development course for Health Science Majors. Topics include resume development/ revision, interviewing skills, applying to graduate/professional programs and/or jobs, professional communication, etc. Graded on S/U basis only.
Credit Hour: 1
specific challenges and successes in Missouri as they relate to health
facing their future patients and clientele. Students will be exposed to
in Missouri after graduation, to better understand the unique issues
of Missouri's population is rural (MO Health Assessment). This course
in Missouri after graduation, to better understand the unique issues
of Missouri's population is rural (MO Health Assessment). This course

It is known for its mixture of large urban areas with rural regions and
an extensive farming culture. Missouri has a population of six million
people. The state's capital is in Jefferson City and the most populated
cities are: Kansas City-459,787; St. Louis-319,294; Springfield-159,498;
Independence-116,830 and Columbia-108,500. Thirty-seven percent
of Missouri's population is rural (MO Health Assessment). This course
will assist the 69% of Department of Health Science majors, who stay

Prerequisites: sophomores only; restricted to Health Science majors only only

HLTH_SCI 2200: Nuclear Weapons: Environmental, Health and
Social Effects
(same as SOCIOL 2281 and PEA_ST 2200). Environmental
consequences of the nuclear arms race, "regional" nuclear war, and
weapons testing for human health, agriculture, and society. Examining "a
world without nuclear weapons"; political dialogue on proliferation; Iran,
North Korea, and nuclear weapons conventions. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Health Sciences Majors only; Honors eligibility required

HLTH_SCI 2200W: Nuclear Weapons: Environmental, Health and
Social Effects - Writing Intensive
(same as SOCIOL 2281 and PEA_ST 2200). Environmental
consequences of the nuclear arms race, "regional" nuclear war, and
weapons testing for human health, agriculture, and society. Examining "a
world without nuclear weapons"; political dialogue on proliferation; Iran,
North Korea, and nuclear weapons conventions. Graded on A-F basis only.
Credit Hours: 3

HLTH_SCI 2300: Health Care In Missouri
This course focuses primarily on application of general health concepts
and tools specifically from the perspective of the State of Missouri.
It is known for its mixture of large urban areas with rural regions and
an extensive farming culture. Missouri has a population of six million
people. The state's capital is in Jefferson City and the most populated
cities are: Kansas City-459,787; St. Louis-319,294; Springfield-159,498;
Independence-116,830 and Columbia-108,500. Thirty-seven percent
of Missouri's population is rural (MO Health Assessment). This course
will assist the 69% of Department of Health Science majors, who stay
in Missouri after graduation, to better understand the unique issues
facing their future patients and clientele. Students will be exposed to
specific challenges and successes in Missouri as they relate to health
and public health from a variety of perspectives. This course will
examine the health of all Missourians; however, the course will highlight
the challenges facing vulnerable populations within the state (minorities,
women, LGBT and rural/urban community members) in order to increase
cultural competence. Graded on A-F basis only.
Credit Hours: 3

HLTH_SCI 2300: Health Care In Missouri - Honors
This course focuses primarily on application of general health concepts
and tools specifically from the perspective of the State of Missouri.
It is known for its mixture of large urban areas with rural regions and
an extensive farming culture. Missouri has a population of six million
people. The state's capital is in Jefferson City and the most populated
cities are: Kansas City-459,787; St. Louis-319,294; Springfield-159,498;
Independence-116,830 and Columbia-108,500. Thirty-seven percent
of Missouri's population is rural (MO Health Assessment). This course
will assist the 69% of Department of Health Science majors, who stay
in Missouri after graduation, to better understand the unique issues
facing their future patients and clientele. Students will be exposed to
specific challenges and successes in Missouri as they relate to health
and public health from a variety of perspectives. This course will
examine the health of all Missourians; however, the course will highlight
the challenges facing vulnerable populations within the state (minorities,
women, LGBT and rural/urban community members) in order to increase

cultural competence. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Health Sciences Majors only; Honors eligibility required

HLTH_SCI 2850: Social Justice in Health
This course introduces the social justice framework and the building of
inclusive classrooms and clinics. It includes weekly topics on inclusion,
social identities, implicit bias, socioeconomic status, allying and
intrusion. Tools examined include: good personal communication,
understanding an inclusive culture, how to be an ally, strategies to
recognize and mitigate bias in health situations. Experiential activities and
dialogue are the main avenues of learning in this course. Graded on S/U
basis only.
Credit Hour: 1
Prerequisites: Restricted to Health Sciences Majors during
preregistration

HLTH_SCI 2850: Introduction to The Impact of Bias, Prejudice and
Discrimination on Health Care
The course is an introduction to concepts of bias, prejudice and
discrimination that occurs within health care settings in the United States.
We will examine the problem from multiple disciplines, including evidence
from sociology, psychology, anthropology, history, and health sciences.
Examining these materials will help students better understand the impact
of bias, prejudice, and discrimination on access to health care, and
on the overall health of people and populations who are impacted by
prejudice and discrimination. With the completion of this course, students
will be better equipped to provide quality person-centered care and be
able to think critically about how to begin the process of ending harmful
discriminatory practices. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors

HLTH_SCI 2850H: Introduction to The Impact of Bias, Prejudice and
Discrimination on Health Care - Honors
The course is an introduction to concepts of bias, prejudice and
discrimination that occurs within health care settings in the United States.
We will examine the problem from multiple disciplines, including evidence
from sociology, psychology, anthropology, history, and health sciences.
Examining these materials will help students better understand the impact
of bias, prejudice, and discrimination on access to health care, and
on the overall health of people and populations who are impacted by
prejudice and discrimination. With the completion of this course, students
will be better equipped to provide quality person-centered care and be
able to think critically about how to begin the process of ending harmful
discriminatory practices. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors. Honors eligibility
required

HLTH_SCI 3300: Public Health Principles, Practice, and Education
Public Health is the science and practice of protecting and improving
the health of communities through education, promotion of healthy
understanding of theory and develop practical skills to apply theories to health actions and decisions. This course will take both a theoretical focus on the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during pre-registration

HLTH_SCI 3300H: Public Health Principles, Practice, & Education - Honors
Public Health is the science and practice of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. This course focuses on the basic structures of the Public Health system in the U.S. and provides an introduction to the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

HLTH_SCI 3300W: Public Health Principles, Practice, and Education - Writing Intensive
Public Health is the science and practice of protecting and improving the health of communities through education, promotion of healthy lifestyles, and research for disease and injury prevention. This course focuses on the basic structures of the Public Health system in the U.S. and provides an introduction to the factors that influence and shape that system. Among others, factors include socioeconomic, financing, politics and global issues. Students in this course will be challenged to consider the complex web of factors affecting the health of communities. The course will explore: health needs assessments, examining relationships among behavioral, environmental and genetic factors that enhance or compromise health, examining factors that influence the learning process, and examining factors that enhance or compromise the process of health education. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during pre-registration

HLTH_SCI 3310: Social and Behavioral Health Theory and Practice
Social and Behavioral Health (SBH) is the core discipline of public health that focuses on the factors that influence individuals’ and communities health actions and decisions. This course will take both a theoretical and a practical approach to understanding SBH. Students will gain an understanding of theory and develop practical skills to apply theories to real world health issues. Readings, assignments, and discussions will focus largely on ways to understand and change health behaviors and various individual, relational, community, and social-level influences on health. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 3400: Global Public Health and Health Care Systems
(same as PEA_ST 3401). An introduction to public health in a global context, with an emphasis on understanding how disparities in socioeconomic status, differences in political and national health care systems and the work of international organizations impact health in communities around the world. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 3450: Introduction to Epidemiology
(same as P_HLTH 3450). Epidemiology is the basic science of Public Health, focusing on the study of distribution and determinants of health-related states and events. The purpose of this course is to gain a basic understanding of Epidemiology principles and methods and how to use these as a framework in assessing and addressing population health issues. Employing a mix of lecture, discussion, and assignments, students will explore the epidemiological investigation process, the etiology of disease, disability, and death, how to identify population subgroups with increased risk of disease, disability, and death and how to contribute to the development and evaluation of public health programs and services that improve the health of subgroups at risk and the general population. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Acceptance into the Public Health Undergraduate Program or by Department Consent

HLTH_SCI 3500: Mental Health
This course provides a look at mental health problems with regard to influences, etiology, diagnosis, and treatment. Students learn theories of mental health, diagnostic criteria, treatment modalities, and community issues concerning the mental health system. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HLTH_SCI 2100

HLTH_SCI 3600: Health Promotion Programs I: Assessment and Planning
Health promotion planning is the development and implementation of a well-researched and tailored intervention to increase the health status of an individual and population. This course will provide a comprehensive introduction to health promotion planning and assessment by integrating a solid theoretical foundation of the discipline with hands-on experience in assessing needs, assets and capacity for health education, health education and project planning, funding, intervention development, implementation of health education projects, and evaluation. Special attention placed on implementing health education and promotion programs that are tailored to the particular population in need as well as specialized for the appropriate setting be it school, work, health care clinic, or the community. Graded on A-F basis only.
HLTH_SCI 3610: Health Promotion Programs II: Implementation, Evaluation, and Communication
This course builds on topics covered in Health Promotion Programs I: Assessment and Planning. It will provide a comprehensive introduction to the implementation, evaluation and communication required for successful health promotion programs by integrating a solid theoretical foundation of the discipline with hands-on experience in the implementation of health promotion program, developing an evaluation and communication strategies for successful health education and health promotion programs in a variety of community-based settings. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Science majors during pre-registration

HLTH_SCI 3600: Public Health, prior to enrolling in this course.

Prerequisites:
Credit Hour

HLTH_SCI 3800: Holistic Health Systems for the Health Professions
This course will explore the various aspects of the holistic health movement and how they interact with American health care. Topics will include complementary and alternative medicine, or CAM, acupuncture, chiropractic, herbal remedies, naturopathy, traditional Chinese medicine, Ayurveda, midwifery, New Age healing, and others. Students will learn about the underlying philosophical principles of these practices, cultures of origin, treatments offered, and what consumers of health care as well as members of the health care workforce need to know about them. Graded on A-F basis only. Recommended: The most successful students will have taken other Health Sciences courses, particularly HLTH_SCI 3300: Public Health, prior to enrolling in this course.

Credit Hours: 3
Prerequisites: Restricted to students in junior or senior status. Restricted to Health Sciences Majors during pre-registration

HLTH_SCI 3900: Introduction to The Research Process and Evidence Base
This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors only
Corequisites: HLTH_SCI 3600

HLTH_SCI 3900W: Introduction to The Research Process and Evidence Base - Writing Intensive
This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors with junior or senior standing. Honors eligibility required

HLTH_SCI 3900HW: Introduction to The Research Process and Evidence Base - Honors/Writing Intensive
This course provides an introduction to the basic quantitative and qualitative research techniques used in public health, health education and promotion, and the health professions. Conducting research, making medical decisions based on research findings, and using and interpreting research and evidence in practice settings all represent potential outcomes for students selecting a career in public health or the health professions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors with junior or senior standing. Honors eligibility required

HLTH_SCI 3965: Strategies for Effective Peer Education in Health Sciences
(same as WGST 3960, P_HLTH 3965). Course designed to promote effective presentation skills on a variety of health topics, specifically sexual health. Students will engage in experiential practice and skill building surrounding cultural competency, difficult discourses, discussion facilitation and behavior management. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Instructor's consent

HLTH_SCI 4001: Topics in Health Science
Organized study of selected topics. Subjects will vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 4300: Health Care in the United States
Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing; Restricted to Health Sciences Majors during pre-registration
HLTH_SCI 4300H: Health Care in the United States - Honors
Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

HLTH_SCI 4400: Culture and Health Literacy for the Health Professions
This course will explore differences and attitudes towards the health care industry across various social, cultural and ability groups. This exploration will result in more culturally competent health professionals by promoting self-awareness and challenging the existing assumptions and biases of the health care system. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent. Restricted to Health Sciences Majors during preregistration

HLTH_SCI 4410: Humanism and Health Literacy
This class will teach how the humanities can help students become better health professionals. Topics include: spirituality and health; non-medical factors that impact health; representation of disability in art history; and literature and health. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 4420: Health Literacy and Behavioral Compliance
Students will learn about the behavioral, psychological, and cognitive factors that impact health literacy and the ability to follow healthcare recommendations.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 4440: Clinical Ethics
(same as CDS 4480). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.
Credit Hours: 3
Prerequisites: junior or senior standing; Restricted to Health Science majors only

HLTH_SCI 4480W: Clinical Ethics - Writing Intensive
(same as CDS 4480W). Exploration of bioethics issues in health care with emphasis on issues related to patient choice and provider responsibility. Topics include philosophical theories, principles and models for ethical and lawful decision making in healthcare.
Credit Hours: 3
Prerequisites: junior or senior standing; Restricted to Health Science majors only

HLTH_SCI 4500: Health Care Management
Examines various management concepts as they relate to the unique environment of health care. Concepts include planning, decision making, budgeting, staffing, organizing, and motivating for working with individuals or teams. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Science majors only with junior or senior status

HLTH_SCI 4510: Essential Tools for the Health Care Leader: A Problem-Based Approach
This course is designed to increase students' ability to evaluate, synthesize, and perform tasks in the areas of business intelligence, business analysis, performance and process improvement, data management and mining, information security and privacy, and project management. Graded A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Science majors only in junior or senior status
Recommended: Access to and experience using Microsoft Excel 2010

HLTH_SCI 4520: Health Care Project Management
Examines various project management concepts, both universal and as they relate to the unique environment of health care. Concepts include project, program and portfolio management, initiating projects, planning projects, executing projects, monitoring and controlling projects, closing projects, and using industry best practices and tools. This course will enable you to work with other project management professionals across various industries and in the changing health care setting. You will learn how good project, program, and portfolio management can help you achieve organizational and individual success. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Health Sciences Majors during preregistration

HLTH_SCI 4900: Seminar in Health Education
(pursuing careers in health education/promotion and public health with the opportunity to synthesize relevant coursework and prepare for the Certified Health Education Specialist (CHES) examination. This course is intended for BHS/Health Sciences and BHS/Public Health undergraduate majors with senior standing. Graded S/U basis only.
Credit Hour: 1
Prerequisites: Instructor consent required
Recommended: Intended as preparation for the Certified Health Education Specialist (CHES) Exam

HLTH_SCI 4975: Internship in Health Sciences
Focuses on knowledge, skills and attitudes that enhance personal effectiveness and professional success. Opportunities to research selected career paths and related topics in health sciences and participate in directed service learning projects or internships in selected emphasis area. Graded on A-F basis only.
Credit Hours: 1-6
Prerequisites: HLTH_SCI 2100
HLTH_SCI 4985: Healthcare Organization and Leadership (same as CDS 4985). In this course, students will explore leadership principles as they relate to the student's focus area, combining previous expertise in the field with an interdisciplinary perspective within the healthcare community. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HLTH_SCI 2100; senior standing required

Hebrew (HEBREW)

HEBREW 1100: Elementary Hebrew I
For beginners with no prior knowledge of Hebrew. Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6

HEBREW 1200: Elementary Hebrew II
Five hours of classroom instruction, with one hour lab work weekly.

Credit Hours: 6
Prerequisites: C- or better in HEBREW 1100, or equivalent

HEBREW 3085: Problems in Hebrew
Supervised study of Hebrew language and/or culture.

Credit Hour: 1-3
Prerequisites: instructor's consent

HEBREW 3845: Modern Israeli Film
(same as FILM_S 3845). Examines the modern film of developing Israel. Discusses complex social relationships. Introduces concepts of Hebrew language and its use in the arts world-wide. Discusses varied communities in Israel, and universal themes such as democracy and social justice. Provides introduction to Israeli culture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent required

History (HIST)

HIST 1004: Undergraduate Topics in History-Social Science
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3

HIST 1100: Survey of American History to 1865
Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 1100H: Survey of American History to 1865 - Honors
Introduction to U.S. history through the Civil War, surveying political, economic, social and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

Credit Hours: 3

HIST 1200: Survey of American History Since 1865
Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

Credit Hours: 3

HIST 1200H: Survey of American History Since 1865 - Honors
Introduction to U.S. history since 1865, surveying political, economic, social, and cultural development of the American people. No credit will be given to students who have received credit in HIST 1400 (AP credit for US History).

Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 1400: American History
Broad survey of political, economic, social, intellectual, diplomatic and constitutional development of American people from first English settlements to present day; emphasizes evolution of American culture and institutions. Students may not receive additional credit for HIST 1100 and/or HIST 1200.

Credit Hours: 5

HIST 1410: African American History
(same as BL_STU 1410). Survey of social, political and economic development to the African American people in American life from 1619 to the present.

Credit Hours: 3

HIST 1500: Foundations of Western Civilization
Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century.

Credit Hours: 3

HIST 1500H: Foundations of Western Civilization - Honors
Development of characteristic ideas and institutions of Western cultural tradition, from origin of civilization in ancient Near East to beginning of rapid social, political, intellectual transformation of Europe in 18th century.

Credit Hours: 3
Prerequisites: Honors eligibility required
HIST 1510: History of Modern Europe
Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.
Credit Hours: 3
HIST 1510 - MOTR WCIV 102: Western Civilization II

HIST 1510H: History of Modern Europe - Honors
Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.
Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 1510HW: History of Modern Europe - Honors/Writing Intensive
Selected major themes in European history from French Revolution to recent times. Breakdown of traditional institutions, ideas; political, social revolution; industrialization, nationalism, imperialism, world wars; democratic, totalitarian ideologies, movements; quest for international order, European unity.
Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 1520: The Ancient World
Survey of institutional and cultural development of ancient Near East, Greece, Rome, and Asia.
Credit Hours: 3

HIST 1540: England Before the Glorious Revolution
(same as CNST_DEM 1540). Survey of English institutions, culture and politics from the Roman invasion to the Revolution of 1688.
Credit Hours: 3

HIST 1550: Britain 1688 to the Present
Surveys British history from 1688 to present. Emphasizes social and economic change.
Credit Hours: 3

HIST 1570: Survey of Early Modern Europe, 1350-1650
Survey of Western and Central Europe (including Britain) from the Black Death to the end of the Thirty Years' War. This period comprises late medieval crises, the Renaissance, Reformation, Counter-Reformation, Exploration and the New World, the Confessional Age, early modern state-building, and the Thirty Years' War.
Credit Hours: 3

HIST 1590: Women and the Family in the Pre-Modern West
Examines the changing roles of women and familial structures from the Ancient Mediterranean World to the Protestant Reformation and the effects of religious, political and economic change on the family.
Credit Hours: 3

HIST 1600: Foundations of Russian History
A survey of the Kievan and Muscovite period to the end of the 17th century.
Credit Hours: 3

HIST 1790: History of Early Africa
(same as BL_STU 1790). This course introduces students to the early history of Africa. It focuses on political, social, economic and cultural developments based on primary and secondary sources available in print and online.
Credit Hours: 3

HIST 1800: History of Modern Africa
(same as BL_STU 1800). This course introduces students to the recent history of Africa. It provides them with an opportunity to understand the main challenges Africans faced since colonial times based on primary and secondary sources.
Credit Hours: 3

HIST 1830: Survey of East Asian History
(same as KOREAN 1830). Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era.
Credit Hours: 3

HIST 1840: Colonial Latin America
Survey of Latin America, 1492-1825; Exploration and conquest; European settlement; colonial government and institutions; economy and society; cultural and intellectual life, independence movements.
Credit Hours: 3

HIST 1850: Latin America Since Independence
Political, social and economic developments; nationalism; revolutionary movements; U.S. influence.
Credit Hours: 3

HIST 1861: History of Modern India
(same as [S_A_ST 1861). This course surveys the history of the South Asian subcontinent from the early seventeenth through the twentieth century. Emphasis will be placed on cultural and social history, religion, arts and literature, imperialism and colonialism, and the sources used for the study of modern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.
Credit Hours: 3

HIST 1871: History of China in Modern Times
This is a lecture course designed to introduce to beginning level students the epic journey of China's historical transformation since c. 1600. This survey provides a basis for understanding the painstaking transition from "tradition" to "modernity" in China.
Credit Hours: 3
HIST 1872: Mao's China and Beyond: China Since 1949
Through a series of readings, images, and film we will look at the dramatic cultural, economic, social and intellectual changes the People's Republic of China has experienced since 1949, and look at the interrelated, yet often contradictory, challenges facing Beijing in regards to the task of furthering economic prosperity while promoting policies of integrating with the international society.
Credit Hours: 3

HIST 2004: Topics in History-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-99

HIST 2100: The Revolutionary Transformation of America
(same as CNST_DEM 2100). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing "the causes which impelled" the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.
Credit Hours: 3

HIST 2100H: The Revolutionary Transformation of America - Honors
(same as CNST_DEM 2100H). In the broadest of terms, this is a course on origins. On one hand, we will devote significant class time to discussing "the causes which impelled" the colonies to throw off the yoke of British rule. We will examine this on both a practical and a more abstract level, focusing first on writings that delineate why colonists grew to perceive the economic, social, and political conditions of British rule as insufferable, and then on how they translated these practical concerns into a more ideological justification of violent revolution.
Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 2120H: The Young Republic - Honors
(same as CNST_DEM 2120H). This course examines the early years of the United States under the (then) new Constitution, an important historical period with which present-day Americans are increasingly unfamiliar. Our focus will be on abandoning our preconceptions about the nation's early history and thoroughly understanding the choices that were posed and made in the years after 1789 and that would determine what type of nation the U.S. would become.
Credit Hours: 3
Prerequisites: Honors eligibility required

HIST 2150: The American Civil War: A Global History
(same as CNST_DEM 2150). In this class students will study the American Civil War from the perspective of global history. The familiar actors and events will be covered - the debate over slavery, the secession of the South, the rise of Abraham Lincoln, the great battles and generals, etc. But these familiar episodes will take on different meanings when viewed in relation to global structures of politics, economics, social relations, and ideology. The 1860s was at once a formative moment in the history of globalization and the key decade for the formation and consolidation of modern nations.
Credit Hours: 3

HIST 2210: Twentieth Century America
Survey of American development from 1900 to present. For students who have not taken advanced courses in American history, especially HIST 4210, HIST 4220, or HIST 4230.
Credit Hours: 3

HIST 2220: America in the 1960's
(same as PEA_ST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period.
Credit Hours: 3

HIST 2230: Walt Disney and American Culture
Examines Walt Disney's influence on shaping of modern American culture.
Credit Hours: 3

HIST 2240: Flight in America: From the Wright Brothers to the Space Age
This course focuses on the history of flying in the U.S. from its beginnings to the Apollo moon missions. In a little over a century, aviation and space flight have transformed our world in deep and enduring ways. We will focus on key innovations and the people behind them. This is an exciting story, full of fascinating men and women.
Credit Hours: 3

HIST 2250: Social History of U.S. Women
(same as WGST 2400). This course, the social History of US Women, offers a general overview of US Women, beginning with the colonial period up to the present day.
Credit Hours: 3

HIST 2410: African American Women in History
(same as BL_STU 2410 and WGST 2410). African American Women in history is a topics course covering major issues affecting black women since their introduction into english-speaking North America to the present.
Credit Hours: 3

HIST 2430: History of American Religion
(same as CNST_DEM 2430). This course focuses on the overall development of American religion from the 17th century to the present. Students will be invited to think about the larger questions concerning American religion, including why religion in America has developed in the way that it has, and how and why it continues to thrive in American popular culture.

</table>
HIST 3010: Colonial America
This course will examine major colonial American events from a cultural history standpoint. We will explore the ways in which the famous and not so famous shaped and were shaped by events of the seventeenth and eighteenth centuries and how these people understood the changing meaning of American liberty.
Credit Hours: 3

(same as BL_STU 3200). Examines the dismantling of American apartheid and its transformation into a new racial control system. It also explores how and why the Civil Rights Movement was converted into a struggle for Black Power.
Credit Hours: 3

HIST 3210: History of Religion in Post-Civil War America
(same as REL_ST 3210). Surveys major American religious traditions from 1865 to the present. Focuses on the evaluation of religious practices and institutions and their interaction with and influence upon American social, intellectual and political developments.
Credit Hours: 3

HIST 3220: U.S. Women's Political History, 1880-Present
(same as WGST 3220, CNST_DEM 3220). This course explores American women's engagement with American politics (broadly defined) over the course of the twentieth century. It addresses issues of political identity, organization, ideology, and division.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 3230: Individualism and Success in Modern America, 1830-Present
This course explores changing notions of individualism and success in American culture during the 19th and 20th centuries. Standards defining achievement, gain, and happiness for the individual citizen have evolved over time, and we will examine a wide variety of sources - advice literature, essays, novels, historical texts, plays and movies, political and religious texts, social criticism - to analyze this broad evolution. The resulting insights into a variety of historical issues and values, problems and possibilities, promise to forge a deeper understanding of what it has meant to be a successful individual in the United States over the last two hundred years.
Credit Hours: 3

HIST 3240: The United States and the Middle East
This course will explore the history of American relations with the Middle East. How have U.S. Policy-makers defined American interests in this region? How have they sought to protect and advance those interests? We will consider the cultural stereotypes and assumptions Americans have brought to their relations with the Middle East, and the images of the Middle East that have been projected in American popular culture. Finally, we will explore the ways in which the current political situations in the Middle East reflects the results of past U.S.
Credit Hours: 3

HIST 3510: The Ancient Greek World
Political and social institutions, intellectual life of Greek city-states to time of Alexander.
Credit Hours: 3

HIST 3520: The Roman World
Rise and development of Roman institutions, Rome's imperialism and culture through reign of Marcus Aurelius.
Credit Hours: 3

HIST 3530: The Hellenistic World: From Alexander to Rome
The achievements of Alexander the Great; political, social, economic development of Hellenistic kingdoms from his death to 31 B.C.
Credit Hours: 3

HIST 3540: 20th Century Europe
Political, social, and economic development of Europe from 1900 to the present, with emphasis on the period between the two world wars.
Credit Hours: 3

HIST 3540W: 20th Century Europe - Writing Intensive
Political, social, and economic development of Europe from 1900 to the present, with emphasis on the period between the two world wars.
Credit Hours: 3

HIST 3550: The Origins of Scientific Thought
This course will trace the evolution of Western science from its Egyptian-Babylonian roots to the "Copernican Revolution" of the mid-sixteenth century.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 3555: Galileo and His World
(same as GN_HON 3230H). The purpose of this course is to evaluate Galileo's contribution to modern science on the basis, primarily, of his actual writings. In the process, we will examine the "Galileo Myth", focusing on the problem of scientific truth and freedom of thought.
Credit Hours: 3

HIST 3560: The Scientific Revolution: 1550-1800
This course covers the history of science, or natural philosophy, from late Renaissance to the beginnings of the "Darwinian Revolution."
Credit Hours: 3

HIST 3570: European Women in the 19th Century
(same as WGST 3570). Examines the history of European women from 1750 to 1900. The course focuses on how industrialization, the French Revolution and nation-formation changed women's roles in the family, workplace and the state. Grading: exams, papers and discussions.
Credit Hours: 3
Prerequisites: sophomore standing
HIST 3580: Modern Italy, 1815 to the Present
Political, cultural and social history of Italy since 1815. Looks at how Unification, World War, Fascism, the Cold War, Student protests, the women's movement and the end of the USSR shaped contemporary Italy.
Credit Hours: 3

HIST 3590: The Early Middle Ages
This course will focus on the social, political, economic, and cultural development of Europe from roughly 300 to 1050.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 3600: The Later Middle Ages
This course will focus on the social, political, economic, and cultural development of Europe from roughly 1050 to 1500. Prerequisites: sophomore standing
Credit Hours: 3

HIST 3610: Ireland, 1100s to 1850
(same as PEA_ST 3610). Ireland, from Conquest to Famine: Ireland's history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 3611: Ireland, 1850-1923
(same as PEA_ST 3611). Ireland, from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile andTrouble states.
Credit Hours: 3

HIST 3612: Ireland, 1920-Present
(same as PEA_ST 3612). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of post partition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s.
Credit Hours: 3
Prerequisites: May be restricted to History majors only during preregistration
Recommended: HIST 3610 and/or HIST 3611

HIST 3624: Comparative Approaches to Black Studies in History
(same as BL_STU 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Program consent for repetition.
Credit Hours: 3

HIST 3624W: Comparative Approaches to Black Studies in History - Writing Intensive
(same as BL_STU 3624). Comparative approach to the study of Black Diaspora history that focuses on the theory, method, structure, and application of modes of cultural production within the history of Black Diaspora cultures. Program consent for repetition.
Credit Hours: 3

HIST 3640: History of Mexico
Survey of Mexican history from Cortes to present day.
Credit Hours: 3

HIST 3850: Islam and the West
(same as PEA_ST 3850). This course provides a historical intellectual context for the raging debate on Islam and the West. It will discuss how Muslims conceived and reacted variously to the political and cultural challenge the West posed in the nineteenth and twentieth century. It will focus on the discourse on the reception of modernization in Islam. It will highlight the political and cultural energies invested by various Muslim elite communities to distinguish between modernization and Westernization. Islamic fundamentalism, the dominant Islamic expression of our time, will be usefully discussed in the context of this debate and praxis about modernization, authenticity, and Westernization.
Credit Hours: 3
Prerequisites: junior/senior standing

HIST 3860: History of Mexico
Survey of Mexican history from Cortes to present day.
Credit Hours: 3

HIST 3870: Social Revolution in Latin America
(same as PEA_ST 3870 and SOCIOL 3870). Twentieth century social revolutions in selected Latin American countries.
Credit Hours: 3

HIST 4000: Age of Jefferson
(same as CNST_DEM 4000; cross-leveled with HIST 7000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.
Credit Hours: 3

HIST 4004: Topics in History-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-99

HIST 4004H: Topics in History-Social Science - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
HIST 4004W: Topics in History-Social Science - Writing Intensive
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-99
Prerequisites: Honors eligibility required

HIST 4010: The Age of Jackson
This course will examine American Politics, society and culture in the 1820's, 1830's, and 1840's. Considerable attention will be devoted to Andrew Jackson himself, as a figure who both shaped and represented his era, for better or worse.

Credit Hours: 3

HIST 4030: History of the Old South
Study of the South to 1860.

Credit Hours: 3

HIST 4040: Slavery and the Crisis of the Union: The American Civil War Era
(same as BL_STU 4040, CNST_DEM 4040; cross-leveled with HIST 7040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime 'nationalisms' that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, 'total' warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a 'second American revolution'? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world?

Credit Hours: 3

HIST 4060: The Period of the American Revolution, 1760-1789
Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.

Credit Hours: 3

HIST 4070: Indians and Europeans in Early America
(cross-leveled with HIST 7070). A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.

Credit Hours: 3

HIST 4080: American Foreign Policy from Colonial Times to 1898
(same as PEA_ST 4080, CNST_DEM 4080; cross-leveled with PEA_ST 7080, HIST 7080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.

Credit Hours: 3

HIST 4085: Special Problems in History
Independent investigation leading to a paper or project.

Credit Hour: 1-6
Prerequisites: Department consent required

HIST 4085H: Special Problems in History
Independent investigation leading to a paper or project.

Credit Hour: 1-99
Prerequisites: Honors eligibility required

HIST 4085W: Special Problems in History - Writing Intensive
Independent investigation leading to a paper or project.

Credit Hour: 1-6
Prerequisites: Department consent required

HIST 4100: American Cultural and Intellectual History to 1865
(same as CNST_DEM 4100; cross-level with HIST 7100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.

Credit Hours: 3

HIST 4200: American Cultural and Intellectual History Since 1865
Tensions and transformations in American culture to the present. Topics include: spiritual crisis in Christianity; rise of welfare state liberalism; socialist and feminist alternatives; literature and the arts.

Credit Hours: 3

HIST 4220: U.S. Society Between the Wars 1918-1945
Detailed examination of American history from end of World War I to end of World War II.

Credit Hours: 3

HIST 4230: Our Times: United States Since 1945
Detailed examination of American history from end of World War II to the present.

Credit Hours: 3

HIST 4235: The Wire: Race, Urban Inequality, and the "Crisis" of the American City
(cross-leveled with HIST 7235). The HBO series "The Wire", a crime drama based on the border city of Baltimore, exposed the interlocking, structural realities giving shape to the landscapes, neighborhoods, and lived experiences of urban America during the early twenty-first century. Through vivid storytelling, "The Wire" complicates understandings of the
"urban crisis" through a focus on the inner workings of major institutions such as the media, public schools, politics, underground economies, public housing, and the criminal justice system and on the ways in which poor and working-class black residents negotiate power and survival. Using the cable series as a lens, this class offers students the opportunity to critically examine the historical, economic, social, and political dimensions of urban inequality.

Credit Hours: 3

HIST 4240: History of the New South
Study of the South since 1860.
Credit Hours: 3

HIST 4250: U.S. Foreign Relations, 1898-1945
A history of American Foreign Policy from the Spanish American War to the end of World War II.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 4260: The Age of Ascendancy: U.S. Foreign Relations, 1945 - Present
(same as PEA_ST 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.
Credit Hours: 3
Prerequisites: sophomore standing

HIST 4270: African-Americans in the Twentieth Century
(same as BL_STU 4270). Surveys the African-American experience from 1900 to the present. Attention is given to economic, political, social, and cultural trends.
Credit Hours: 3

HIST 4280: America in the Reagan Years
Examines the major political, economic, social, and cultural currents and developments of the "Long Eighties," from Jimmy Carter's "malaise speech" of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.
Credit Hours: 3

HIST 4290: Innovation in 20th and 21st Century America
(cross-leveled with HIST 7290). This course focuses on innovations that have shaped our world and the people behind them, from Edison and the introduction of electric light to airplanes, transistors, semiconductors, fracking, subprime mortgages, televangelism, Uber, and Airbnb. The idea is not to determine which innovations are most important, but to examine how innovations are created and why some are successful and others are not.
Credit Hours: 3

HIST 4300: History of American Law
(same as CNST_DEM 4400). American law from English origins to the present. Reviews common law, codification, legal reform movements, slavery law, administrative state, formalism, legal realism, jurisprudential questions concerning rule of law.
Credit Hours: 3

HIST 4415: African Americans and American Justice
(same as BL_STU 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.
Credit Hours: 3

HIST 4415W: African Americans and American Justice - Writing Intensive
(same as BL_STU 4415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.
Credit Hours: 3

HIST 4425: The Superhero in American Culture From Washington to Wolverine
This course aims to help students become better informed and more critical consumers of popular culture by situating a selection of important American works and genres within the historical context of their creation, and in the history of American culture. Students will be challenged to look for historical patterns in popular culture and to consider the particular habits of thought and action that American popular culture seems to reinforce.
Credit Hours: 3
Prerequisites: HIST 1100 or HIST 1200 or HIST 1400 or HIST 2210

HIST 4440: History of the American Environment
A reading and discussion course exploring diverse responses to the changing American environment from early man to the present, including ecological, institutional, and philosophical aspects.
Credit Hours: 3

HIST 4445: American Political Economy from the Commerce Clause to the Great Recession
This course examines the history of the American political economy from the founding of the United States to the recent Great Recession. Scholars of political economy explore the ways in which politics and public policy intersect with economics, such as the operation of the institutions like the tax system, the first and second Banks of the United States in the late 18th and early 19th centuries, and the Federal Reserve after 1913. We will focus on efforts by the U.S. federal government to regulate the American economy and bring economic affairs under the control of the American people and their representatives through a wide variety of
political, legal, and institutional mechanisms. A specialized knowledge of economics is not required for this course.

**Credit Hours:** 3

**HIST 445W: American Political Economy from the Commerce Clause to the Great Recession - Writing Intensive**
This course examines the history of the American political economy from the founding of the United States to the recent Great Recession. Scholars of political economy explore the ways in which politics and public policy intersect with economics, such as the operation of the institutions like the tax system, the first and second Banks of the United States in the late 18th and early 19th centuries, and the Federal Reserve after 1913. We will focus on efforts by the U.S. federal government to regulate the American economy and bring economic affairs under the control of the American people and their representatives through a wide variety of political, legal, and institutional mechanisms. A specialized knowledge of economics is not required for this course.

**Credit Hours:** 3

**HIST 4500: Philip II and Alexander the Great of Macadonia**
Concentrates on the history and politics of Greece during reigns of these two kings along with Alexander's military conquests and various controversies from the period.

**Credit Hours:** 3

**HIST 4510: Crime and Punishment: Law in Classical Athens**
Examines the main principles of Athenian law and judicial procedures including history of law code and study of actual speeches from a variety of law suits and procedures.

**Credit Hours:** 3

**HIST 4515: Power and Oratory in Ancient Greece**
Concentrates on the rise of oratory in Greece and how oratory was exploited for political ends. Special attention will be paid to the Athenian Democracy in the fifth and fourth centuries BC.

**Credit Hours:** 3

**HIST 4520: The Rise and Fall of the Roman Republic**
(cross-leveled with HIST 7520). Analysis of the downfall of Republican institutions and the origins of autocracy, from the Gracchi to the death of Augustus in A.D. 14.

**Credit Hours:** 3

**HIST 4530: The Roman Empire**
Roman imperialism; management of, and rebellion in, the Empire; cultural exchange between Rome and its provinces.

**Credit Hours:** 3

**HIST 4535: Monastic Worlds**
(same as REL_ST 4535, MDVL_REN 4535; cross-leveled with REL_ST 7535, MDVL_REN 7535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. Following two weeks of online course modules, students will travel to the Benedictine communities of Conception Abbey in Conception, Missouri and Mount Saint Scholastica's in Atchison, Kansas, for additional face-to-face classes and research projects. On-site, students will participate in communal living and attend face-to-face classes on the historical and cultural worlds of medieval and early modern Europe. They will practice ethnography through observation of and participation in communal life of prayer, study, book production, and labor. Students will also have the opportunity to work with the manuscripts and rare books owned by these communities and visit the largest reliquary collection in North America, housed at the nearby Benedictine community of the Sisters of Perpetual Adoration in Clyde, MO. This course has an associated fee. Contact teaching faculty for this year's fee details. Graded on A/F basis only.

**Credit Hours:** 3

**HIST 4540: The Later Roman Empire**
Political, religious and cultural life in Late Antiquity, from the “soldier emperors,” to the barbarian kingdoms and early Byzantium.

**Credit Hours:** 3

**HIST 4550: Age of the Vikings**
Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.

**Credit Hours:** 3

**Prerequisites:** junior standing required

**Recommended:** HIST 1500, HIST 1540, HIST 1600 or HIST 2560

**HIST 4550W: Age of the Vikings - Writing Intensive**
Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.

**Credit Hours:** 3

**Prerequisites:** junior standing required

**Recommended:** HIST 1500, HIST 1540, HIST 1600 or HIST 2560

**HIST 4555W: Medieval France - Writing Intensive**
(cross-leveled with HIST 7555). This course covers the area that became the kingdom of France from the end of the Roman era until the end of the Hundred Years War; emphasis on political and cultural developments.

**Credit Hours:** 3

**Prerequisites:** junior standing

**Recommended:** Previous coursework in medieval history

**HIST 4560: The Crusades**
Survey of the European crusading movement from its inception in the late eleventh century to its decline during the later Middle Ages.

**Credit Hours:** 3

**Prerequisites:** junior standing
HIST 4580: The "Making" of Modern Europe: Identity, Culture, Empire
(cross-leveled with HIST 7580). This course will explore some of the ideas, institutions and events that shaped modern Western civilization and thought, focusing on Western Europe, but also giving attention to the relationship between the West and the rest of the world. The course will introduce topics such as the rise of, nationalism, the cult of science, scientific racism and sexism, consumer mass culture, fascist ideology, existentialism, psychoanalysis, the modern city, gender and sexuality.
Credit Hours: 3
Prerequisites: junior standing

HIST 4585: Rome from Fascism to Liberation, 1922-1944
In this course we will explore the history of Fascism and German occupation in Italy through the city of Rome. We will study how fascism remade Rome, the arrival of the Germans, the history of the Jewish community and the deportations and the resistance.
Credit Hours: 3

HIST 4605: Early Modern Spain, 1450-1750
(cross-leveled with HIST 7605). In this course, we begin with Fernando and Isabel, whose marriage brought together the two principle territories of Castile and Aragon, leading to the beginnings of a "united" Spain. As we trace the political and social history of Spain through the early modern era, we'll also be examining the many myths surrounding Spanish history including topics such as the Columbus’ voyages, the Spanish Inquisition and the Black Legend.
Credit Hours: 3

HIST 4620: Modern England
Surveys British history in the 18th and 19th centuries. Emphasizes social and economic change.
Credit Hours: 3

HIST 4625: Nature vs. Nurture: The History of a Debate
(cross-leveled with HIST 7625). The purpose of this course is to explore the debate on nature vs. nurture in human society from the late eighteenth century to the present. The goal of this course is to give biology, history, and social science (including journalism) majors a better understanding of how this debate between nature and culture has played out over the past 250 years, and what impact it has left on biology, the social sciences, and public discourse today.
Credit Hours: 3

HIST 4630: The Age of the Renaissance
Major changes in European economic, social, political, religious, and intellectual life between 1250-1500. Humanism and Renaissance. The "Renaissance problem".
Credit Hours: 3

HIST 4640: The Age of the Reformation
State of Europe about 1500. Political, diplomatic, social, and intellectual changes to 1648. Humanistic reform movements. Protestant-Catholic Reformation. Development of the modern state and international relations.

HIST 4645: Witchcraft and Witch Hunting in Pre-Modern Europe
(cross-leveled with HIST 7645). The surviving evidence indicates that between 1400 and 1700, at least 50,000 women, men, and children were executed for practicing witchcraft. Is there an explanation for this? Does it make any sense in terms of the intellectual, religious, social, political, and economic contexts of this period in European history? Fundamental to this course are the assumptions that there are many, not one, reasonable explanations for witchcraft beliefs and persecutions, and that when studied in terms of the various historical contexts this phenomenon must be understood as an integral part of European society during these centuries.
Credit Hours: 3

HIST 4650: Revolutionary France, 1789-1815
Revolutionary upheavals of the revolutionary-Napoleonic era, which destroyed traditional French society and laid the basis for modern France.
Credit Hours: 3
Prerequisites: junior standing

HIST 4660: From the Holy Roman Empire to the First World War: German History, 1750-1918
(cross-leveled with HIST 7670). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.
Credit Hours: 3

HIST 4670: From the Holy Roman Empire to the First World War: German History, 1750-1918 - Writing Intensive
(cross-leveled with HIST 7670). Cultural, social and political history of Central Europe from 1800 to 1914. A case study in incomplete modernization, focused on industrialization, unification, cultural crisis and imperialism.
Credit Hours: 3

HIST 4680: From the Rise of the Nazis to the Fall of the Wall: German History, 1918-1990
(cross-leveled with HIST 7680). Cultural, social and political history from 1914 to present day. Focus on world wars, national socialism, the holocaust, the cold war and the emergence of East and West Germany.
Credit Hours: 3

HIST 4690: World History, 1500-2000
(cross-leveled with HIST 7690). From the rise of the first modern nation states in Europe to the present day. The course will trace the rise of nationalism, imperialism, and the formation of the modern world system. Emphasis on global questions and the interaction between local and global forces.
Credit Hours: 3

HIST 4700: Imperial Russia, 1682-1825
Russia in the 18th and early 19th centuries, with special emphasis on the reigns of Peter I, Catherine II, and Alexander I.
Credit Hours: 3

HIST 4710: The Russian Revolution
Analyzes the transformation of Russian society that produced the collapse of autocracy, efforts to create a parliamentary government, the Bolshevik seizure of power in 1917, and the civil war that followed.
Credit Hours: 3
HIST 4800: Modern China and Japan: War, Imperialism and Memory (cross-leveled with HIST 7800). This course examines the interaction between Japan and China since the late nineteenth century in an effort to understand deeper historical reasons behind the rising tension in East Asia at the present time.

Credit Hours: 3
Prerequisites: junior standing

HIST 4815: African History Through the Digital Medium (cross-leveled with HIST 7815). This course invites students to explore the history of Africa through the digital medium. It offers a hands-on approach to understand how knowledge about African history, culture, and society is produced and disseminated over the World Wide Web.

Credit Hours: 3

HIST 4815W: African History Through the Digital Medium - Writing Intensive (cross-leveled with HIST 7815). This course invites students to explore the history of Africa through the digital medium. It offers a hands-on approach to understand how knowledge about African history, culture, and society is produced and disseminated over the World Wide Web.

Credit Hours: 3

HIST 4840: History of the Mongols
In the 13th century, the Mongols went from warring tribes to the largest Eurasian empire in history. This course examines the Mongol tribes, Chinggis Khan's unification of the tribes, the Mongols rapid military victories across Eurasian and their equally rapid decline.

Credit Hours: 3

HIST 4850: Traversing the Muslim World (same as S_A_ST 4850). The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive seminar-style course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo.

Credit Hours: 3
Prerequisites: junior standing

HIST 4850W: Traversing the Muslim World - Writing Intensive (same as S_A_ST 4850). The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive seminar-style course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo.

Credit Hours: 3
Prerequisites: junior standing

HIST 4860: Colonial Masculinity/Colonial Frontier (same as S_A_ST 4860). This writing intensive seminar-style course examines how the Indian Army acted as a colonial army in the British Empire, including Africa, the Boxer Rebellion, and the World Wars. Focus is on the role of the Indian Army, impact of the Sepoy Mutiny, and martial race ideology.

Credit Hours: 3
HIST 4904: Historical and Contemporary Slavery
(same as BL_STU 4904). An exploration of slavery in both its historical and contemporary context, focusing on the origins, characteristics, and struggles to abolish the practice. Historical slavery examined using African enslavement in the Americas, and contemporary slavery using human trafficking and forced labor in the developed and developing world.

Credit Hours: 3

HIST 4910: History in the Public: An Introduction to the Theory and Practice of Public History
(cross-leveled with HIST 7910). The purpose of this course is to introduce students to the world of public history, the central questions and debates in the field, and to offer students the opportunity to practice public history.

Credit Hours: 3

HIST 4910W: History in the Public An Introduction to the Theory & Practice of Public History - Writing Intensive
(cross-leveled with HIST 7910). The purpose of this course is to introduce students to the world of public history, the central questions and debates in the field, and to offer students the opportunity to practice public history.

Credit Hours: 3

HIST 4940: Internship in History
Professional training in history and archive-related fields. Graded on S/U basis only.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4970: Undergraduate Seminar in Third World History
Readings in selected problems in the history of Africa, Asia or Latin America with reports and discussion.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4970W: Undergraduate Seminar in Third World History - Writing Intensive
Readings in selected problems in the history of Africa, Asia or Latin America with reports and discussion.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4971: Undergraduate Seminar in European History
Readings in problems in European history with reports and discussion.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4971W: Undergraduate Seminar in European History - Writing Intensive
Readings in problems in European history with reports and discussion.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4972: Undergraduate Seminar in American History
Readings in selected problems in American history with reports and discussion on selected topics.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4972W: Undergraduate Seminar in American History - Writing Intensive
Readings in selected problems in American history with reports and discussion on selected topics.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4975: Journal on Constitutional Democracy
(same as POL_SC 4975, CNST_DEM 4975). The Journal is sponsored by the Kinder Institute on Constitutional Democracy and staffed by current and former participants in the Institute's undergraduate Society of Fellows program. Each volume of the Journal is organized around a student-selected idea or era central to the historical development and philosophical foundations of constitutional democracy in the United States. Student-authored essays address this theme via arguments and historical overviews crafted from the close reading and analysis of primary source documents, with the exception being that participating in the Journal will relate back to and advance students' study of American political thought and history.

Credit Hour: 1-3

HIST 4980: Undergraduate Thesis in History
Individually directed research leading to a senior thesis.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4981: Undergraduate Thesis in History
Continuation of HIST 4980.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4981W: Undergraduate Thesis in History - Writing Intensive
Continuation of HIST 4980.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4995: Honors Thesis in History
Research and completion of the thesis required for graduation with Honors in History.

Credit Hours: 3

Prerequisites: departmental consent

HIST 4995W: Honors Thesis in History - Writing Intensive
Research and completion of the thesis required for graduation with Honors in History.

Credit Hours: 3

Prerequisites: departmental consent
HIST 4996: Honors Thesis in History
Continuation of HIST 4995.
Credit Hours: 3
Prerequisites: departmental consent

HIST 4996W: Honors Thesis in History - Writing Intensive
Continuation of HIST 4995.
Credit Hours: 3
Prerequisites: departmental consent

HIST 7000: Age of Jefferson
(cross-leveled with HIST 4000, CNST_DEM 4000). Political, constitutional, cultural, and economic developments in United States during formative period of Republic, 1787-1828. Special attention to Constitutional Convention, formation of national political institutions.
Credit Hours: 3

HIST 7004: Topics in History - Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Graduate students will be expected to complete additional reading and writing assignments commiserate with graduate level course requirements. May be repeated to maximum of 6 hours.
Credit Hours: 3
Prerequisites: departmental consent

HIST 7010: The Age of Jackson
This course will examine American politics, society and culture in the 1820's, 1830's, and 1840's. Considerable attention will be devoted to Andrew Jackson himself, as a figure who both shaped and represented his era, for better or worse.
Credit Hours: 3

HIST 7030: History of the Old South
Study of the South to 1860.
Credit Hours: 3

HIST 7040: Slavery and the Crisis of the Union: The American Civil War Era
(cross-leveled with HIST 4040). This class explores the history of the Civil War era, a transformative moment in both U.S. and world history. Our goal is to explore and answer a number of questions of great historical significance: How and why did slavery persist in an age of liberal democracy? Why did the pre-war Union prove unable to tolerate the plural visions and diverse institutions of its people? Was the descent into war more a measure of institutional weakness than of the intensity of moral conflict? What were the constituent elements of the competing wartime ‘nationalisms’ that evolved in both north and south? How and why did a war that began to restore the Union become one for emancipation? How was it the forerunner of modern, ‘total’ warfare? Did the governmental, socio-economic and racial changes wrought by war constitute a ‘second American revolution’? Were the limits or the achievements of post-war Reconstruction more notable? And, last but certainly not least, how did the triumph of the Union condition the political and economic development of a rapidly globalizing world? Graded on A-F basis only.
Credit Hours: 3

HIST 7060: The Period of the American Revolution, 1760-1789
Analysis of the Revolution, its causes and consequences, through establishment of the new government in 1789.
Credit Hours: 3

HIST 7070: Indians and Europeans in Early America
(cross-leveled with HIST 4070). A study of the cultural, political and often military struggle that took place for control of North America from contact through mid 19th century emphasizing native efforts to resist European domination and expansion in areas that became the U.S. and Canada.
Credit Hours: 3

HIST 7080: American Foreign Policy from Colonial Times to 1898
(same as PEA_ST 7080; cross-leveled PEA_ST 4080, HIST 4080, CNST_DEM 4080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.
Credit Hours: 3

HIST 7100: American Cultural and Intellectual History to 1865
(cross-leveled with HIST 4100, CNST_DEM 4100). Origins and growth of American values and ideas considered in their social context. Topics include: the work ethic, republican politics, revivalism, reform movements, sexual attitudes, literature in the marketplace, Afro-American and slave-holding subcultures.
Credit Hours: 3

HIST 7220: U.S. Society Between the Wars 1918-1945
Detailed examination of American history from end of World War I to end of World War II.
Credit Hours: 3

HIST 7230: Our Times: United States Since 1945
Detailed examination of American history from end of World War II to the present.
Credit Hours: 3

HIST 7240: History of the New South
Study of the South since 1860.
Credit Hours: 3

HIST 7260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present
(same as PEA_ST 7260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.
Credit Hours: 3
HIST 7280: America in the Reagan Years
Examines the major political, economic, social, and cultural currents and developments of the "Long Eighties," from Jimmy Carter's "malaise speech" of July 1979 to Bill Clinton's mid-1990s embrace of welfare reform and pronouncement that the era of big government was over.

Credit Hours: 3

HIST 7290: Innovation in 20th and 21st Century America
(cross-leveled with HIST 4290). This course focuses on innovations that have shaped our world and the people behind them, from Edison and the introduction of electric light to airplanes, transistors, semiconductors, fracking, subprime mortgages, televangelism, Uber, and Airbnb. The idea is not to determine which innovations are most important, but to examine how innovations are created and why some are successful and others are not.

Credit Hours: 3

HIST 7310: Adoption Child Welfare and the Family, 1850-present
(same as WGST 7310; cross-leveled with HIST 4310, WGST 4310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meanings of adoption since 1850; historical connections between adoption and poverty, family, gender, race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.

Credit Hours: 3

HIST 7415: African Americans and American Justice
(same as Bl_STU 7415) This course provides opportunities to review and discuss selected court cases and legislation in which black men, women, or children were plaintiffs and defendants or affected by the laws.

Credit Hours: 3

HIST 7500: Philip II and Alexander the Great of Macedonia
Concentrates on the history and politics of Greece during reigns of these two kings along with Alexander's military conquests and various controversies from the period.

Credit Hours: 3

HIST 7510: Crime and Punishment: Law in Classical Athens
Examines the main principles of Athenian law and judicial procedures including history of law code and study of actual speeches from a variety of law suits and procedures.

Credit Hours: 3

HIST 7520: The Rise and Fall of the Roman Republic
(cross-leveled with HIST 7520). Analysis of the downfall of Republican institutions and the origins of autocracy, from the Gracchi to the death of Augustus in A.D. 14.

Credit Hours: 3

HIST 7530: The Roman Empire
Roman imperialism; management of, and rebellion in, the Empire; cultural exchange between Rome and its provinces.

Credit Hours: 3

HIST 7540: The Later Roman Empire
Political, religious and cultural life in Late Antiquity, from the "soldier emperors," to the barbarian kingdoms and early Byzantium.

Credit Hours: 3

HIST 7550: Age of the Vikings
Scandinavia and Scandinavian expansion in the Central Middle Ages. Covers political, economic, religious, and cultural effects of the Viking movement.

Credit Hours: 3

Prerequisites: consent required

Recommended: HIST 1500, HIST 1540, HIST 1600 or HIST 2560

HIST 7555: Medieval France
(cross-leveled with HIST 4555). This course covers the area that became the kingdom of France from the end of the Roman era until the end of the Hundred Years War; emphasize on political and cultural developments.

Credit Hours: 3

Prerequisites: instructor's consent

HIST 7560: The Crusades
Survey of the European crusading movement from its inception in the late eleventh century to its decline during the later Middle Ages.

Credit Hours: 3

HIST 7580: The "Making" of Modern Europe: Identity, Culture, Empire
(cross-leveled with HIST 4580). This course will explore some of the ideas, institutions and events that shaped modern Western civilization and thought, focusing on Western Europe, but also giving attention to the relationship between the West and the rest of the world. The course will introduce topics such as the rise of, nationalism, the cult of science, scientific racism and sexism, consumer mass culture, fascist ideology, existentialism, psychoanalysis, the modern city, gender and sexuality. Graded on A-F basis only.

Credit Hours: 3

HIST 7605: Early Modern Spain, 1450-1750
(cross-leveled with HIST 4605). In this course, we begin with Fernando and Isabel, whose marriage brought together the two principle territories of Castile and Aragon, leading to the beginnings of a "united" Spain. As we trace the political and social history of Spain through the early modern era, we'll also be examining the many myths surrounding Spanish history including topics such as the Columbus' voyages, the Spanish Inquisition and the Black Legend. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Department consent required

HIST 7620: Modern England
Surveys British history in the 18th and 19th centuries. Emphasizes social and economic change.

Credit Hours: 3
HIST 7625: Nature vs. Nurture: The History of a Debate
(cross-leveled with HIST 4625). The purpose of this course is to explore the debate on nature vs. nurture in human society from the late eighteenth century to the present. The goal of the course is to give biology, history, and social science (including journalism) majors a better understanding of how this debate between nature and culture has played out over the past 250 years, and what impact it has left on biology, the social sciences, and public discourse today. Graded on A-F basis only.
Credit Hours: 3

HIST 7630: The Age of the Renaissance
Major changes in European economic, social, political, religious, and intellectual life between 1250-1500. Humanism and Renaissance. The "Renaissance problem."
Credit Hours: 3

HIST 7640: The Age of the Reformation
State of Europe about 1500. Political, diplomatic, social, and intellectual changes to 1648. Humanistic reform movements. Protestant-Catholic Reformation. Development of the modern state and international relations.
Credit Hours: 3

HIST 7645: Witchcraft and Witch Hunting in Pre-Modern Europe
(cross-leveled with HIST 4645). The surviving evidence indicates that between 1400 and 1700, at least 50,000 women, men, and children were executed for practicing witchcraft. Is there an explanation for this? Does it make any sense in terms of the intellectual, religious, social, political, and economic contexts of this period in European history? Fundamental to this course are the assumptions that there are many, not one, reasonable explanations for witchcraft beliefs and persecutions, and that when studied in terms of the various historical contexts this phenomenon must be understood as an integral part of European society during these centuries. Graded on A-F basis only.
Credit Hours: 3

HIST 7650: Revolutionary France, 1789-1851
Revolutionary upheavals of the revolutionary-Napoleonic era, which destroyed traditional French society and laid the basis for modern France.
Credit Hours: 3

HIST 7657: North Korea: History, Political Economy, Culture
(cross-leveled with HIST 4867). The aim of this course is to survey North Korea's history, especially in terms of political economy and culture. Through several themes, we will examine the historical situations of North Korea from its beginnings in the postliberation period to the present, as North Korea undergoes monumental changes. Graded on A-F basis only.
Credit Hours: 3

HIST 7665: Buying Desire: History of Consumption
(cross-leveled with HIST 4865). This course explores the history of consumption practice in various cultural contexts. The course is divided into four parts: "Masses As Consumers", "Selling/Consuming Cultures", "Consumption as (Postcolonial) Modernity", and "Consumption and the Nation". Under each section are thematically related texts on particular cultural contexts. The reading of ethnographic texts on consumption is to be accompanied by critical discussions that locate consumption within the practices of the nation-state-making and global product-marketing. Graded on A-F basis only.
Credit Hours: 3

HIST 7700: Imperial Russia, 1682-1825
Russia in the 18th and early 19th centuries, with special emphasis on the reigns of Peter I, Catherine II, and Alexander I.
Credit Hours: 3

HIST 7710: The Russian Revolution
Analyzes the transformation of Russian society that produced the collapse of autocracy, efforts to create a parliamentary government, the Bolshevik seizure of power in 1917, and the civil war that followed.
Credit Hours: 3

HIST 7850: Traversing the Muslim World
The traveler's tale formed an important part of the medieval world's system of knowledge. This writing intensive discussion-based course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Battuta, Benjamin of Tudela and Marco Polo.
Credit Hours: 3

HIST 7865: Buying Desire: History of Consumption
(cross-leveled with HIST 4865). This course explores the history of consumption practice in various cultural contexts. The course is divided into four parts: "Masses As Consumers", "Selling/Consuming Cultures", "Consumption as (Postcolonial) Modernity", and "Consumption and the Nation". Under each section are thematically related texts on particular cultural contexts. The reading of ethnographic texts on consumption is to be accompanied by critical discussions that locate consumption within the practices of the nation-state-making and global product-marketing. Graded on A-F basis only.
Credit Hours: 3

HIST 7867: North Korea: History, Political Economy, Culture
(cross-leveled with HIST 4867). The aim of this course is to survey North Korea's history, especially in terms of political economy and culture. Through several themes, we will examine the historical situations of North Korea from its beginnings in the postliberation period to the present, as North Korea undergoes monumental changes. Graded on A-F basis only.
Credit Hours: 3

HIST 7880: Chinese Migration: From Yellow Peril to Model Minority
(cross-leveled with HIST 4880). This course surveys Chinese emigration in the global context over the span of five centuries. We will pay special attention to the changing relationships between China and Chinese migrants. Our emphasis will be on history as a process of negotiation and contestation of heterogeneous groups or individuals through creative and selective activities.
Credit Hours: 3

HIST 7910: History in the Public: An Introduction to the Theory and Practice of Public History
(cross-leveled with HIST 4910). The purpose of this course is to introduce students to the world of public history, the central questions and debates in the field, and to offer students the opportunity to practice public history. Graded on A-F basis only.
HIST 7990: Economic Analysis of Policy & Regulation
(cross-leveled with AG_EC 4990). Apply economic concepts and tools to analyze the policy-making process and the implications of policy for individuals, firms, markets and society. Policy topics include, among other things, agricultural support programs, environmental policy, international trade, international development, and agribusiness regulation.

Credit Hours: 3
Recommended: Graduate students should have previous coursework in basic econometrics and at least intermediate-level micro economic theory.

HIST 8001: Seminar in the History of Colonial America
Directed research in the colonial and revolutionary period of American history. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8004: Topics in History-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours.

Credit Hour: 1-99
Prerequisites: department consent

HIST 8010: Studies in American Religious History, 1750-1850
This class will examine important ideas and trends in the field, with an emphasis on popular religious movements. This is a reading-based seminar, revolving around discussion of influential recent books. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8020: Seminar in the Early American Republic
Directed research in the period 1787-1861. May be repeated to a maximum of 6 hours.

Credit Hours: 3

HIST 8021: Studies in the Early American Republic
This is an intense reading and discussion course designed to give students a crash course in the historiography of this period (emphasizing political culture) as well as practical experience in assimilating themselves quickly to a field. Students must attend and be prepared to participate knowledgeably in each class section. Graded on A-F basis only.

Credit Hours: 3

HIST 8030: Studies in Sectional Controversy, Civil War and Reconstruction
Directed readings and discussions of major issues in the period of national unification of the United States, from 1850 through 1877. May be repeated to a maximum of 6 hours.

Credit Hours: 3

</table>
Credit Hours: 3
HIST 8800: Studies in Latin American History
Readings in standard and recent historical literature, with critical
discussion of reports on special topics. May be repeated to a maximum of
6 hours.
Credit Hour: 1-6

HIST 9090: PhD Research in History
Graded on a S/U basis only.
Credit Hour: 1-99

Honors-General (GN_HON)

GN_HON 1010H: Career Explorations
Colloquia in which experts from both the University and the Columbia
communities discuss their specialties and answer students' questions
on the nature and current status of their disciplines. Open primarily to
freshmen. Graded on an S/U basis only.
Credit Hour: 1
Prerequisites: Honors eligibility required

GN_HON 1030H: Honors Discussion Groups
Informal discussion between students and faculty on various academic
topics. Graded S/U only.
Credit Hour: 1-2
Prerequisites: Honors eligibility required

GN_HON 1050H: Honors Seminar
Freshman-sophomore seminar offering a small group opportunity to write
about and discuss basic works chosen by instructor.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 1070H: Honors Elective Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 1080H: Honors Internship
Independent study under the supervision of a regular faculty member.
Credit Hour: 1-3
Prerequisites: written proposal with professor's approval submitted in
advance to Director of the Honors College. Honors eligibility required

GN_HON 2010H: Honors Tutorial
Small group of students (2-5) engage in collaborative work under faculty
guidance. The focus is determined in advance by a faculty member and
shaped through discussion with the enrolled students. Course may be
repeated for credit. Honors eligibility required
Credit Hour: 1-3
Prerequisites: instructor's consent

GN_HON 2011H: Unbound: Reading Without Limits
Joining forces with the Unbound Book Festival, held late April each year
here in Columbia, the Unbound tutorial seeks to engage students in
the life-long learning approach to reading for pleasure, for the pursuit of
engagement, and as a social construct (rather than simply an isolated act).
Students will read no fewer than four works of fiction, non-fiction,
poetry, and essays, and discuss them as a reading circle but also have
the opportunity to meet the authors during the Unbound Book Festival
and discuss with them their ideas and skills. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Honors eligibility required

GN_HON 2012H: BBQ: Culture, Cuts, and Consumption - Honors
This course will focus on providing you with a sound understanding of
the culture, context, culinary, and commercial aspects of Barbecue. We
will explore how the meat industry plays a role in BBQ, the environmental
implications (of both meat and wood usage), the culture (from your
backyard to the national competitions, and even BBQ abroad), and look
into how and why BBQ has become such a phenomenon. We will spend
some time with a local (KC) author who has written a novel on BBQ
that is currently being turned into a TV series. And then we will spend
time visiting local BBQ "joints", speaking with owners and pitmasters,
customers and devotees, about their business models, their culinary
decisions, and their traditions - yes, we will taste, but we will also learn,
and use what we have learned, to understand the world of BBQ and its
intersections in our daily and national lives. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Honors eligibility required

GN_HON 2015H: Theory and Practice of Tutoring Writing Seminar
(same as ENGLSH 2015H). Addresses both the theory and practice of
tutoring and the foundations of good writing. This course also qualifies
students for a part-time job working as Writing Lab/Online Writery tutors
in future semesters.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor's consent

GN_HON 2015HW: Theory and Practice of Tutoring Writing Seminar
- Honors/Writing Intensive
(same as ENGLSH 2015H). Addresses both the theory and practice of
tutoring and the foundations of good writing. This course also qualifies
students for a part-time job working as Writing Lab/Online Writery tutors
in future semesters.
Credit Hours: 3
Prerequisites: ENGLSH 1000; instructor's consent

GN_HON 2085H: Honors Problems
Independent study under the supervision of a regular faculty member.
Credit Hour: 1-3
Prerequisites: written proposal with professor's approval submitted in
advance to Director of the Honors College. Honors eligibility required

GN_HON 2111H: The Ancient World
The reading list is comprised of the great writers of classical Greece and
Rome such as Homer, Sophocles, Plato, Aristotle, Virgil and Apuleius,
and of the biblical period, the authors of the Book of Job and the Gospel of Mark.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2111HW: The Ancient World - Honors/Writing Intensive**  
The reading list is comprised of the great writers of classical Greece and Rome such as Homer, Sophocles, Plato, Aristotle, Virgil and Apuleius, and of the biblical period, the authors of the Book of Job and the Gospel of Mark.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2112H: The Middle Ages and the Renaissance**  
The literature, art and philosophy which reflect the interaction of biblical thought with the classical past, and ultimately an emerging humanism, form the contents of the second semester. Readings include selections from such central figures as Aquinas, Chaucer, Dante, and Shakespeare. Special lectures are presented on the art, architecture and music of these eras.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2112HW: The Middle Ages and the Renaissance - Honors/Writing Intensive**  
The literature, art and philosophy which reflect the interaction of biblical thought with the classical past, and ultimately an emerging humanism, form the contents of the second semester. Readings include selections from such central figures as Aquinas, Chaucer, Dante, and Shakespeare. Special lectures are presented on the art, architecture and music of these eras.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2113H: The Early Modern World: The 17th-19th Centuries Enlightenment**  
The third segment of the Sequence treats the cultural developments in the West from the Baroque to the Enlightenment through Romanticism. The works of Cervantes, Descartes, Milton, Voltaire, Kant, Austen, Goethe, and Dickinson are among those studied. The music and visual arts of these periods are also included.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2114H: The Modern Era**  
The final semester of the Humanities Sequence deals with the intellectual and cultural developments from the mid-nineteenth to the late twentieth century. Lectures and discussions will be held on the philosophy of Marx, Nietzsche, Sartre and Hannah Arendt; on the literary works of Dickens, Dostoievsky, James Joyce, Virginia Woolf, T.S. Eliot, and Toni Morrison. Special lectures are presented on the music of the period.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2114HW: The Modern Era - Honors/Writing Intensive**  
The final semester of the Humanities Sequence deals with the intellectual and cultural developments from the mid-nineteenth to the late twentieth century. Lectures and discussions will be held on the philosophy of Marx, Nietzsche, Sartre and Hannah Arendt; on the literary works of Dickens, Dostoievsky, James Joyce, Virginia Woolf, T.S. Eliot, and Toni Morrison. Special lectures are presented on the music of the period.

**Credit Hour:** 2-3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2231H: Genocide in the Modern World: An Introduction**  
This course examines the multitude of genocide’s facets - its causes, course of events, consequences, and the pursuit of prevention and punishment - since the advent of the Twentieth Century (with some examination of historical antecedents). Specific historical and conceptual aspects of various case studies will be examined and a framework for the study of genocide will be developed and applied, starting with the legal definition of genocide and ending with very nuanced theories, behaviors, and components of specific events. The class will use foundational case studies to understand the place of genocide throughout history and end with an investigation into current and on-going genocides, as well as the international pursuit of justice in the wake of these events. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2243H: Human Sciences Sequence I: Personal Identity**  
This interdisciplinary course approached the perennial but fascinating question of how we define, develop, and present ourselves. It considers this question from a range of disciplinary, regional, and thematic perspectives.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

---

**GN_HON 2244H: Social Relations**  
This interdisciplinary course explores the construction of human identity as it related to social groups (these groups might include anything from the family to fan clubs, sports teams to college students).

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required
GN_HON 2245H: Social Organization
This course examines various forms of social organization from an interdisciplinary perspective. The course will examine small organizations (such as families and kin networks) that are grounded in face-to-face relationships and then consider the impact of large-scale organizations (such as markets and states). The class will also explore how these larger organizations can hold together in the absence of direct personal connections between members.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2246H: Global Citizenship
This course continues our introduction to the fundamental problems and concepts of social science by concentrating on today's emerging global society and the ways in which it shapes social identity. The course also aims at encouraging students to think of themselves as global citizens - people who possess a sense of their own role as citizens of the world.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2246HW: Global Citizenship - Honors/Writing Intensive
This course continues our introduction to the fundamental problems and concepts of social science by concentrating on today's emerging global society and the ways in which it shapes social identity. The course also aims at encouraging students to think of themselves as global citizens - people who possess a sense of their own role as citizens of the world.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2310H: Honors Behavioral Science Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 2450H: Honors Biological, Physical, Math (Computer Science) Science Colloquium
Open to all honors-eligible students. These courses may be cross-listed with Biological, Physical or Mathematical Science Departments. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2452H: Honors Biological Science Colloquium
Open to all honors-eligible students. These courses may be cross-listed with Biological Science Departments. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2456H: Honors Math (Computer Science) Science Colloquium
Open to all honors-eligible students. These courses may be cross-listed with Mathematical Science Departments. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2457H: Honors Physical Science Colloquium
Open to all honors-eligible students. These courses may be cross-listed with Physical Science Departments. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

GN_HON 2461H: Environment: From Molecules to the Cosmos
Inquiry-based exploration of how the world was made, environments formed, life evolved, and how it works together to sustain life on Earth. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2462H: Energy: From Particles to Civilizations
Inquiry based exploration of energy, what it is, how it is used, and how it sustains our life on Earth. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 2950H: Honors Preceptorship
Active participation in a professor's research for up to six hours a week.
Credit Hour: 1-3
Prerequisites: written description of the work with professor's approval submitted in advance to Director of the Honors College. Honors eligibility required

GN_HON 3070H: Honors Electives Colloquium
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 3070HW: Honors Electives Colloquium - Honors/Writing Intensive
Honors Electives Colloquium - Honors/Writing Intensive.
Credit Hour: 2-3
Prerequisites: Honors eligibility required

GN_HON 3112H: Interdisciplinary Topics in the Humanities: Aesthetics and Performance
Aesthetics and Performance is the 2nd course offered in a four-semester, upper-level Humanities Series. It takes an Interdisciplinary approach to a variety of topics relevant to such disciplines as Art History, Art, Theater, English, and Film Studies. Students will be introduced to key figures, ideas, and texts in aesthetics and performance. The course format will be a combination of guest lectures, small-group discussion, and when possible, team-teaching. May be repeated for credit.
Credit Hours: 3
Prerequisites: junior or senior standing. Honors eligibility required

GN_HON 3113H: Interdisciplinary Topics in the Humanities: Big Ideas, Big Questions
Big Ideas, Big Questions is the third course offered in a four-semester, upper-level Humanities Series. It takes an interdisciplinary approach to
concepts, theories, debates, and questions central to our understanding of the humanities.

Credit Hours: 3
Prerequisites: upper-level standing or permission of instructor; Honors eligibility required

GN_HON 3120H: Honors Humanities Colloquium
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3120HW: Honors Humanities Colloquium - Honors/Writing Intensive
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3210H: Honors Behavioral Colloquium
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3210HW: Honors Behavioral Colloquium - Honors/Writing Intensive
Credit Hour: 2-3
Prerequisites: junior standing. Honors eligibility required

GN_HON 3230H: Honors Social Science Colloquium
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 3230HW: Honors Social Science Colloquium - Honors/Writing Intensive
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 3241H: Evolution of Human Nature (same as ANTHRO 3340H).
We will investigate the topic of human nature, asking such questions as: What are we like? Why do we behave the way we do? Are we inherently selfish or social? Do we have a unitary "self" or are we made up of many (and sometimes contradictory) selves? Is there a single "human" nature or are there distinct "male" and "female" natures? Does human nature vary across cultures? Insights come from fields ranging from genetics to literature. The concept of "human nature" is fiercely contested and debated both within and between academic disciplines. We will be focusing on the scientific study of human nature, seeking naturalistic explanations by formulating and testing hypotheses. In particular, we will use evolutionary theory to unify explanations from disparate disciplines like biology, psychology, and anthropology. In each class, we will discuss one specific topic like sex or violence and seek to make sense of it from both the proximate level (what triggers the behavior and how does it develop?) and the ultimate level (why and how did our evolutionary history imbue us with this capacity?). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

Prerequisites: Honors eligibility required

GN_HON 3242H: he Future Is Indigenous! - Honors
Today, Indigenous peoples around the world are reasserting an ancient idea that our human responsibilities to the planet come through place, and that our planetary responsibilities are fulfilled by investing in and learning from place. Place-based Indigenous thought and activism give us new ways of thinking about global citizenship within a more-than-human democracy of beings - a "pluriverse" - and changes our understanding of what it means to be human in the twenty-first century. After looking at the limitations of the system of global ethics in cosmopolitan philosophy, we will get acquainted with the "place thought" of three Indigenous peoples: the Western Apache of the USA, the Maori of Aotearoa/New Zealand, and the Huaorani of the Ecuadorian Amazon. This course satisfies three credit hours of general education requirements in the behavioral and social sciences and is part of the Honors College's Interdisciplinary Topics in the Human Sciences series. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Honors eligibility required

GN_HON 3242HW: The Future Is Indigenous! - Honors/Writing Intensive
Today, Indigenous peoples around the world are reasserting an ancient idea that our human responsibilities to the planet come through place, and that our planetary responsibilities are fulfilled by investing in and learning from place. Place-based Indigenous thought and activism give us new ways of thinking about global citizenship within a more-than-human democracy of beings - a "pluriverse" - and changes our understanding of what it means to be human in the twenty-first century. After looking at the limitations of the system of global ethics in cosmopolitan philosophy, we will get acquainted with the "place thought" of three Indigenous peoples: the Western Apache of the USA, the Maori of Aotearoa/New Zealand, and the Huaorani of the Ecuadorian Amazon. Graded on A-F basis only.

Credit Hours: 3
Hospitality Management
(HSP_MGMT)

HSP_MGMT 1100: Introduction to Hospitality Management
An overview of the size, scope, form, analysis and development of various sectors in the hospitality industry. These include hotel, tourism, food and beverage, convention and events, club, cruise, gaming, managed services, and sport venue management. Emphasis will be on the global nature of the industry and its impact on economy and employment. Students will be exposed to career opportunities, cultural diversity, ethical consideration and current trends facing industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to freshman and sophomore students only

HSP_MGMT 2100: Hospitality Law
Provides an integrated analysis of the legal system as it applies to the hospitality industry. Topics include: theories of recover/liability; employment laws, property rights and contracts, lawsuits and their prevention; familiarization with legal arguments, litigation, ethical issues and the tort of negligence in professional context. Relevant federal and state cases, statutes, and regulations will be examined. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

HSP_MGMT 2115: Club Management and Operations
Examines aspects of club operations from a managerial perspective. Topics include: history, types of club and membership systems, club management structure, charter, by-laws; athletic activities, master and club calendars; unique features of club operations including food and beverage operations, human resources management, finances, building and facilities management, external and governmental factors, trends and the future of clubs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

HSP_MGMT 2190: Seminar in Professional Development
A systematic approach to expose students to a journey of self assessment and to develop life-long skills for their careers in the hospitality industry. Using professionalism as a framework, students are made aware of the foundation of effective workplace relationship and how to appropriately manage these relationships toward career success. Topics include self management, workplace relationship, and career planning tools. Graded on A-F basis only.
Credit Hours: 1
Prerequisites: HSP_MGMT 1100; restricted to Hospitality Management majors only

HSP_MGMT 2200: Fundamentals of Conference and Events Industry
Overview of the Meeting, Incentive, Convention and Exhibition (MICE) management industry in hospitality and tourism from a macro perspective. The knowledge and information available to conference and meeting business are described and evaluated, including the trend and issues facing the industry, the characteristics of the size and scope of the market, key players, and different sectors in the meeting industry. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

HSP_MGMT 2300: Fundamentals of the Food and Beverage Industry
An introduction to the macro aspects and a comprehensive overview of the Food and Beverage industry. The course begins with a history of meals away from home and an overview of commercial versus noncommercial food and beverage operations. Detailed considerations are given to components of the food service businesses: size and scope of the industry, major classifications, ownership types, key players, consumer purchasing behavior, quality assurance, trends, challenges, cultural diversity, ethical consideration, and impact of globalization. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

GN_HON 3450H: Honors Physical Science Colloquium
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 3452H: Honors Biological Science Colloquium
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 3456H: Honors Math (Computer Sci.) Science Colloquium
Credit Hour: 2-3
Prerequisites: junior standing required. Honors eligibility required

GN_HON 4070H: Advanced Honors Elective Colloquium
These courses may be cross-listed with courses in graduate or professional programs or one-of-a-kind courses which may have no other more appropriate academic home. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Restricted to juniors and seniors. Honors eligibility required

GN_HON 4070HW: Advanced Honors Elective Colloquium - Writing Intensive
These courses may be cross-listed with courses in graduate or professional programs or one-of-a-kind courses which may have no other more appropriate academic home. Interdisciplinary or experimental courses are encouraged.
Credit Hour: 1-3
Prerequisites: Restricted to juniors and seniors. Honors eligibility required

GN_HON 4950H: Honors Preceptorship
Active participation in a professor's research for up to six hours a week.
Credit Hour: 2-3
Prerequisites: written description of the work with professor's approval submitted in advance to Director of the Honors College. Junior standing required. Honors eligibility required
HSP_MGMT 2400: Fundamentals of Lodging Industry
Explores the foundations of the global lodging industry. The history of the industry, relationship of tourism, size and scope, classification and types, major global players will be examined. Issues related to the impact of globalization, international hotel investment, development and operations, global competitions, political aspects, human resources and cultural diversity will be discussed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

HSP_MGMT 2500: Fundamentals of Sport Venue Industry
An overview of the Sport Venue Industry from a macro perspective. Students will be exposed to the major aspects regarding management of athletic and recreational facilities. Topics will include: history, trends and globalization of sport and venue development, types of sport facilities and major key players, construction and finance, facility systems and operations, sales and marketing, liability and risk management, ticket and box office operation, and event management. Cultural diversity, ethical issues and career opportunities in Sport Venue Management will also be explored. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100

HSP_MGMT 3100: Service Management
Addresses the essence of delivering memorable guest experience through service management. Topics include concepts of service, guest behavior, perceptions and satisfaction, service compliance standards, assessment methods and service recovery strategies. Students will then learn how to leverage their understanding of these concepts to establish service culture and strategies to meet organizational goals within the context of hospitality businesses. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100; restricted to Hospitality Management junior and senior students only

HSP_MGMT 3104: Topics in Hospitality Management
An examination of specific subject matter areas in the field of hospitality management will be addressed. Current issues, trends and challenges will also be discussed. Graded on A-F basis only
Credit Hour: 1-3
Prerequisites: HSP_MGMT 1100; Restricted to Hospitality Management junior and senior students

HSP_MGMT 3105: Problems in Hospitality Management
Students develop problem solving, analytical skills by engaging in a supervised study of a selected field in the hospitality industry. Challenges and issues will be identified and probable solutions will be weighed and evaluated. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent required

HSP_MGMT 3115: Management of Gaming Operations
An overview, analysis of gaming management and financial elements unique to operating gaming businesses. Topics include: History and development of gaming, economic relationships, social impact, legal and changing competitive environments, consumer behavior and psychological forces, corporate culture and technology, revenue control, and promotion and marketing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100; Restricted to Hospitality Management junior and senior students only

HSP_MGMT 3200: Conference and Meeting Management
Addresses the different operational aspects regarding convention and meeting planning management. Students will be exposed to skill-based knowledge pertaining to meeting and event planning, implementation and management. Topics discussed to include group business market, the role of the event planner, the various techniques and services used to meet their needs. Food and beverage, technology used, legal issues, social responsibility, and international aspects in the convention and meeting industry will be addressed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 2200; Restricted to Hospitality Management junior and senior students only

HSP_MGMT 3300: Food Production Management
Explore the production and service aspects of the food and beverage businesses. It will examine principles of concept development, menu planning, pricing and costing, forecasting, standardize recipe and testing, purchasing, food sanitation and safety, quantity food production, delivery of service, inventory control, quality assurance, professionalism and team work. Students will rotate through the different functions of the "front" and "back of the house" of a food facility. This supervised student-operated facility enables students to apply theories to the actual food service operation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 2300; Restricted to Hospitality Management juniors and seniors only

HSP_MGMT 3310: Food Service Budgeting and Controls
Examines management systems and techniques in the food and beverage industry. Topics include: effective use and control of food, beverage, and labor costs to manage a company's operations, with emphasis on computer applications, problems solving and analytical skills, making sound financial decisions, and excellence in customer service. This is a Math Reasoning Proficiency course. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HSP_MGMT 1100; MATH 1100. Restricted to HM students during early registration. Other students meeting pre-reqs may register after early registration

HSP_MGMT 3315: Banquet and Catering Management
Engage in the management of service and production systems in catering operations and banquet facilities. An emphasis will be placed on the fundamentals of communication and planning with event coordinators, menu planning, sales and marketing, food and beverage cost control, guest service standards, quantity food productions, food safety, needs
and challenges of catering both on and off premises. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2300; Restricted to Hospitality Management junior and senior students only

HSP_MGMT 3320: Beverage Management
Explore and analyze operational and managerial elements of the bar and beverage industry. Topics include: alcoholic versus non-alcoholic beverage, beverage menu development, pricing strategy and costing, sensory evaluation, food and beverage pairing, marketing and promotion, inventory control, training of personnel, legal aspects of responsible service of alcohol. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2300; Restricted to Hospitality Management junior and senior students only

HSP_MGMT 3420: Technology Applications in the Lodging Industry
Survey of the technology applications, issues, and trends in the lodging industry. The role of technology in operations and as a strategic tool to achieve competitive advantage will be examined. Students will need to have a good grasp of how to best implement information technology that will impact the future of their organizations. Current technology issues of interest and importance to the industry will also be explored. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2400. Open to Hospitality Management junior and senior students only

HSP_MGMT 3400: Lodging Operations and Management
Exposes students to the principles of managing lodging businesses regarding the fundamental principles, hows and whys of management. Topics include: Analysis of the functions of each department, organization structure, inter-relationship among various departments of a lodging facility, property management system, safety and security, guest service and satisfaction, and total quality issues. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2400

HSP_MGMT 3420: Technology Applications in the Lodging Industry
Survey of the technology applications, issues, and trends in the lodging industry. The role of technology in operations and as a strategic tool to achieve competitive advantage will be examined. Students will need to have a good grasp of how to best implement information technology that will impact the future of their organizations. Current technology issues of interest and importance to the industry will also be explored. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2400. Open to Hospitality Management junior and senior students only

HSP_MGMT 3500: Sport Venue Operation Management
Examines the various operational dynamics and management of sport venues and facilities. Topics such as public versus private ownership and governance structures, facility planning and feasibility study, design and construction, event planning, programming and execution, sales and marketing, box office operations, and financial management will be addressed. Ethical issues, legal responsibilities, risk and security management will also be discussed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 2500; Restricted to Hospitality Management junior and senior students only

HSP_MGMT 3993: Field Training in Hospitality Management
Applies theories into actual industry setting. Aspects such as career paths, team work, inter-relationship in the workplace and professionalism are explored. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: Instructor's consent

HSP_MGMT 4100W: Hospitality Human Resources Management - Writing Intensive
(cross-leveled with HSP_MGMT 7100). Examines effective management of human resources issues in hospitality businesses. It addresses issues related to managing subordinates through hiring the right person for the position, training properly, evaluating employees' performance accurately and promptly, rewarding good behaviors, and motivating and coaching them. Manpower planning, equal employment practices and employee relations, quality of work life, compensation and reward structure, and how to make sound human resource management decisions will also be discussed. This is a writing intensive course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1100. Open to Hospitality Management junior and senior students only

HSP_MGMT 4110: Hospitality Sales and Marketing Management
(cross-leveled with HSP_MGMT 7110). Application of a customer-oriented approach to sales and marketing management in hospitality and tourism industry. The marketing techniques available to hospitality businesses are described and evaluated, including service marketing mix, packaging, travel trade, advertising, sales promotion, merchandising, and personal selling. Marketing of hospitality services regarding human factors, consumer demand, planning, professional considerations are also discussed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: HSP_MGMT 1100. Open to Hospitality Management junior and senior students only

HSP_MGMT 4180: Strategic Management in the Hospitality Industry
Focuses on developing conceptual skills and application of the principles of strategic management in the context of the hospitality industry. It involves handling and analyzing ambiguous facts as well as relevant industry problems and issues facing management personnel in the global hospitality markets. Topics include: Business environments, mission statement, corporate and business strategies, evaluation and control. It requires that students to apply functions of management, finance, human resources, and marketing, learn how to engage in planning by examining situations from the perspectives of customer, employee, and management. The ultimate goal is to encourage students to think "out-of-the-box" in order to find innovative solutions that will reshape the
hospitality industry and define how the hospitality company of tomorrow will create value. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 3100 and MANGMT 3000. Open to Hospitality Management junior and senior students only

HSP_MGMT 4190: Trends in Hospitality Management  
To keep abreast of the development that affects current managerial practices, this course is a survey of key trends and critical issues that impact the hospitality industry. Best practices, opportunities and challenges facing the industry will also be discussed. Graded on A-F basis only.

Credit Hour: 1  
Prerequisites: HSP_MGMT 1100 and open to Hospitality Management students only

HSP_MGMT 4200: Destination Management  
(cross-leveled with HSP_MGMT 7200). An overview of hospitality and tourism destination management using a system approach that integrates a variety of hospitality and tourism organizations and businesses. Destination management will be examined from the perspectives of travelers and destination communities in the context of economic, socio-cultural, and environmental impacts. Optimal planning, development, marketing of destination image and position in the context of the overall management plan will be addressed. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 2200. Open to Hospitality Management junior and senior students only

HSP_MGMT 4280W: Special Events Management - Writing Intensive  
Synthesis of theories and a comprehensive guide in understanding, planning, promoting and producing and managing special events. Topics include: Event design, feasibility studies, legal compliance, promotion, safety and security, logistics, staffing, financial control and technology. It is based on a systematic, step-by-step approach to event planning, implementation, and management. This course requires a considerable amount of teamwork. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 3200. Open Hospitality Management senior students only

HSP_MGMT 4380W: Managing Food Service Businesses - Writing Intensive  
Students explore the market positioning and the management of the student-run food service operation from concept development to execution. Students will apply knowledge gained from marketing, human resources and operational budgeting to develop their themes and execute their meals. Students will hone their problem solving, leadership and interpersonal skills while engaging in team building. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 3300. Open to Hospitality Management senior students only

HSP_MGMT 4400: Hospitality Finance Management  
(cross-leveled with HSP_MGMT 7400). Application of financial principles to the hospitality industry. The focus is to provide students a foundation on how to use numbers and fundamental financial analysis to operate a successful hospitality business. Topics include forecasting, profit and loss statement, balance sheet, capital budgeting, and revenue management related to the hospitality industry. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 1100, FINANC 2000. Open to Hospitality Management junior and senior students only

HSP_MGMT 4480W: Advanced Lodging Management - Writing Intensive  
Apply, integrate, and synthesize previously learned knowledge, skills, and experience to solve real problems that the lodging industry faces. Specifically, managerial responsibilities, organizational structures and current trends will be examined. Throughout the class students will develop their professional identity, leadership skills and confidence to participate in the workforce. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 3400. Open to Hospitality Management senior students only

HSP_MGMT 4500: Management and Promotion of Live Entertainment  
Examines the various media used to promote venues, events and live entertainment. Topics include: Artist management, budgets and financial management, insurance, liabilities, contracts and riders, event production and tour scheduling, sport communication, and community relations. In particular, emphasis will be on the use of social media platforms in promotions, public relations, and other revenue generating activities of the industry. The principles of organizational advocacy, press conferences, and crisis communication plans will also be discussed. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 2500, open to Hospitality Management

HSP_MGMT 4515: The Business of Sport Venue Management  
Focuses on the business aspects of managing athletic and recreational venues. The course examines the management and financial tools that managers use to run their sport venues and businesses. Traditional and innovative methods of revenue acquisition, financial management, sponsorship and forecasting processes as it pertains to the effective management of venues and sports organizations are discussed. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: HSP_MGMT 2500. Open to Hospitality Management junior and senior students only

HSP_MGMT 4580W: Sport Venue and Facility Management - Writing Intensive  
Applies previously learned principles and concepts of sport venue management and develop critical planning and organizational skills required of sport venue managers. The course will address three main modules: Security and risk management, the sport venue, and the sport event. The security and risk management module will examine efficient
best practices and how they can significantly reduce the occurrence of injury and loss at sports venues and events. The sport venue and event modules will integrate concepts of venue planning, construction and operations; and event conception, planning, execution and reconciliation through case study analysis. Ethical considerations will also be stressed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** HSP_MGMT 3500. Open to Hospitality Management seniors only

---

**HSP_MGMT 4993: Internship in Hospitality Management**  
Students apply concepts and theories from their coursework to practical work experiences in the hospitality industry, under the direction of industry professionals and faculty evaluation. It is the student's responsibility to secure an internship position and all internship experience must have prior approval from his/her advisor. In addition to the field experience, students will develop their problem solving and analytical skills through projects that are operational in nature. Graded on A-F basis only. Enrollment is limited to students who have completed a minimum of 75 credits and completed HSP_MGMT 1100, HSP_MGMT 2190 and one of the courses from students designated emphasis area: HSP_MGMT 3200, HSP_MGMT 3300, HSP_MGMT 3400 or HSP_MGMT 3500.

**Credit Hours:** 3  
**Prerequisites:** Instructor's consent required

---

**HSP_MGMT 7100: Hospitality Human Resources Management**  
(cross-leveled with HSP_MGMT 4100). Examines effective management of human resources issues in hospitality businesses. It addresses issues related to managing subordinates through hiring the right person for the position, training properly, evaluating employees' performance accurately and promptly, rewarding good behaviors, and motivating and coaching them. Manpower planning, equal employment practices and employee relations, quality of work life, compensation and reward structure, and how to make sound human resource management decisions will also be discussed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**HSP_MGMT 7110: Hospitality Sales and Marketing**  
(cross-leveled with HSP_MGMT 4110). Application of a customer-oriented approach to sales and marketing management. The marketing techniques available to hospitality businesses are described and evaluated, including service marketing mix, packaging, travel trade, advertising, sales promotion, merchandising, and personal selling. Marketing of hospitality services regarding human factors, consumer demand, planning, professional considerations are also discussed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**HSP_MGMT 7180: Strategic Management in the Hospitality Industry**  
(cross-leveled with HSP_MGMT 4180). Focuses on developing conceptual skills and application of the principles of strategic management in the context of the hospitality industry. It involves handling and analyzing ambiguous facts as well as relevant industry problems and issues facing management personnel in the global hospitality markets. Topics include: Business environments, mission statement, corporate and business strategies, evaluation and control. It requires that students to apply functions of management, finance, human resources, and marketing, learn how to engage in planning by examining situations from the perspectives of customer, employee, and management. The ultimate goal is to encourage students to think “out-of-the-box” in order to find innovative solutions that will reshape the hospitality industry and define how the hospitality company of tomorrow will create value. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Instructor's consent

---

**HSP_MGMT 7200: Destination Management**  
(cross-leveled with HSP_MGMT 4200). An overview of hospitality and tourism destination management using a system approach that integrates a variety of hospitality and tourism organizations and businesses. Destination management will be examined from the perspectives of travelers and destination communities in the context of economic, socio-cultural, and environmental impacts. Optimal planning, development, marketing of destination image and position in the context of the overall management plan will be addressed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**HSP_MGMT 7400: Hospitality Finance Management**  
(cross-leveled with HSP_MGMT 4400). Application of financial principles to the hospitality industry. The focus is to provide students a foundation on how to use numbers and fundamental financial analysis to operate a successful hospitality business. Topics include forecasting, profit and loss statement, balance sheet, capital budgeting, and revenue management related to the hospitality industry. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**Human Development And Family Studies (H_D_FS)**

**H_D_FS 1600: Foundations of Family Science**  
Introduction to family science discipline and profession. Introduces historical changes in families, diversity by race, ethnicity, class, life stage and sexual orientation, and interaction of families with neighborhoods, schools, the workplace, and larger systems.

**Credit Hours:** 3

---

**H_D_FS 1610: Intimate Relationships and Marriage**  
Examination of historical and contemporary issues pertaining to intimate and marital relationships such as relationship formation and dissolution processes, love, sex, behavioral scripts, and conflict. Diversity related to race, ethnicity, gender, age, and sexual orientation is explored.

**Credit Hours:** 3
**H_D_FS 2200: Research Methods in Human Development and Family Science**
Introduction to research methods in the social sciences. Emphasis on both qualitative and quantitative methods, as well as applied research and program evaluation.

**Credit Hours:** 3  
**Prerequisites:** STAT 1200 or STAT 1300 or STAT 1400 or ESC_PS 4170; sophomore standing

---

**H_D_FS 2300: Multicultural Study of Children and Families**
Study of cultural variation in family life around the world and within America (e.g.: African-American, Hispanic American). Attention is paid to the external conditions that affect the internal workings of these families.

**Credit Hours:** 3

---

**H_D_FS 2400: Principles of Human Development**
Concepts and principles basic to an understanding of human development and learning throughout the life span.

**Credit Hours:** 3

---

**H_D_FS 2400H: Principles of Human Development - Honors**
Concepts and principles basic to an understanding of human development and learning throughout the life span. Honors eligibility required

**Credit Hours:** 4  
**Prerequisites:** ENGLISH 1000

---

**H_D_FS 2400HW: Principles of Human Development - Honors/ Writing Intensive**
Concepts and principles basic to an understanding of human development and learning throughout the life span. Graded on S/U basis only. May be repeated for credit.

**Credit Hours:** 1-30  
**Prerequisites:** H_D_FS 2200; instructor's consent

---

**H_D_FS 2450: Human Sexuality Across the Life Span**
An introductory survey of human sexuality including gender, love and intimacy, sexual expression and variation, sexual orientation, contraception, pregnancy and birth, sexually transmitted infections, sexual coercion, and sex in society. Sexuality within the context of intimate relationships across the life course will be emphasized.

**Credit Hours:** 3

---

**H_D_FS 2510: Observation, Assessment, and Curriculum Planning**
Fundamental course for students in the Child Development and Education emphasis area, and for other students planning to engage in work that requires observation and assessment of young children’s development, as well as planning, implementation and evaluation of developmentally appropriate curriculum.

---

**H_D_FS 3050: Child Development: Birth to 3 (Infant/Toddler)**
Child development from birth to age 3. Topics include growth patterns; influences of disabilities and risk factors; environmental factors and attachment; language acquisition; brain development; cognitive and social-emotional development; and perceptual and sensory motor skills. Some course content overlaps with H_D_FS 3500.

**Credit Hours:** 3  
**Prerequisites:** Some sections may be restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE). Some sections may be restricted to HDFS, Pre-HDFS, and Education majors during Early Registration

---

**H_D_FS 3085: Problems in Human Development and Family Science**
Independent work on special problems in human development and family science. Graded on S/U basis only.

**Credit Hour:** 1-30  
**Prerequisites:** Instructor's consent

---

**H_D_FS 3090: Research Experience in Human Development and Family Science**
Student training and engagement in research with a H_D_FS faculty member. Students learn about the research process and methods, and develop research skills (e.g., data collection, entry, coding, analysis) through hands-on work. Graded on S/U basis only. May be repeated for credit.

**Credit Hour:** 1-30  
**Prerequisites:** H_D_FS 2200; instructor's consent

---

**H_D_FS 3150: Child Development 4-8 (Early Childhood)**
Physical, cognitive, social/emotional and personality growth and development during early childhood. Topics include major theories of development and current research and ideas in conjunction with historical approaches to examining growth and development in ages 4-8.

**Credit Hours:** 3  
**Prerequisites:** Some sections may be restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE). Some sections may be restricted to HDFS, Pre-HDFS, and Education majors during Early Registration

---

**H_D_FS 3150W: Child Development 4-8 (Early Childhood) - Writing Intensive**
Physical, cognitive, social/emotional and personality growth and development during early childhood. Topics include major theories of development and current research and ideas in conjunction with historical approaches to examining growth and development in ages 4-8.

**Credit Hours:** 3  
**Prerequisites:** Some sections may be restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE). Some sections may be restricted to HDFS, Pre-HDFS, and Education majors during Early Registration
H_D_FS 3250: Introduction to Early Childhood Education in a Mobile Society
Role of a professional as a teacher, administrator, or advocate in early childhood programming. Topics include professionalism and ethics; identifying child abuse; the role of an early childhood educator; program models and working with children and professional colleagues.

Credit Hours: 3
Prerequisites: enrollment restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 3350: Child Guidance and Classroom Environments
Examines developmentally appropriate practice in child guidance. Current guidance methods and programs will be covered. Students will develop their own approach to guidance based upon course content.

Credit Hours: 3
Prerequisites: enrollment restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 3420: Early and Middle Childhood
Emotional, cognitive, and physical development of the child before puberty. Observation is integral part of course. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 3420, or ESC_PS 2500.

Credit Hours: 3
Prerequisites: Restricted to Education, HDFS and Pre-HDFS majors during preregistration period

H_D_FS 3420W: Early and Middle Childhood - Writing Intensive
Emotional, cognitive, and physical development of the child before puberty. Observation is integral part of course. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 3420, or ESC_PS 2500.

Credit Hours: 3
Prerequisites: Restricted to Education, HDFS and Pre-HDFS majors during preregistration period

H_D_FS 3430: Adolescence and Young Adulthood
Physical, intellectual, and psychosocial maturation of adolescents and young adults within the context of life long developmental sequelae.

Credit Hours: 3
Prerequisites: Restricted to HDFS and Pre-HDFS majors during preregistration period

H_D_FS 3440: Adulthood and Aging
Examination of biological, cognitive, psychological and social changes experienced across adulthood.

Credit Hours: 3

H_D_FS 3450: Health, Safety and Nutrition
Topics include planning, promoting, and maintaining health and safe learning/care environments; understanding childhood illnesses and establishing healthy lifestyles; performing first aid; and maintaining care providers' health and safe relationships with others; identifying and reporting child abuse; nutrients for life; and safe food preparations.

Credit Hours: 3
Prerequisites or Corequisites: H_D_FS 3150/H_D_FS 3150W, or H_D_FS 3420/H_D_FS 3420W, or instructor's consent

H_D_FS 3500: Infant-Toddler Practicum
Practical experience working with infants and toddlers, applying developmentally appropriate practice and theoretical perspectives. Emphasizes cognitive, social/emotional, creative and motor development; and staff and family relationships in child care settings. Graded on A-F basis only.

Credit Hours: 6
Prerequisites or Corequisites: H_D_FS 3050 or H_D_FS 3420/ H_D_FS 3420W or instructor's consent

H_D_FS 3530: Foundations of Community-Based Programs for Children and Youth
Examines non-academic community-based programming for children and youth. Experience working with these age groups. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: H_D_FS 3420 or equivalent or instructor's consent

H_D_FS 3550: Technology and Young Children
Students will learn how electronic technology impacts the development of young children in educational, home and community environments, and how technology can be used to enhance teaching and learning.

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 3600: Partnering with Parents and Families
Examination of stages of parenthood, caregiving styles, and the impact of relationships and culture on caregiving and its challenges. Development of applied skills working with parents and families in a service learning experience. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 3650: Diversity in the Lives of Young Children and Families
In this course, students will explore cultural diversity in daily life and beliefs in families with young children. The focus is on U.S. families, with attention to the multiple cultures from which they come.

Credit Hours: 3
Prerequisites: Restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE), or by instructor consent

H_D_FS 3700: Preschool Practicum
Practical experience working with children ages 2.5-5 years of age, applying developmentally appropriate practice and theoretical perspectives. Emphasizes cognitive, social and emotional, creative, and motor development, and family and staff relationships in a child care setting. Graded on A-F basis only.

Credit Hours: 6
Prerequisites or Corequisites: H_D_FS 3150/H_D_FS 3150W, or H_D_FS 3420/H_D_FS 3420W, or instructor's consent
H_D_FS 3720: Student Teaching Prekindergarten
Experience working with children (2-5 years), using general guidance principles and methods for fostering creativity.

Credit Hours: 6
Prerequisites: H_D_FS 3420 or equivalent and instructor's consent

H_D_FS 3730: Field Training Practicum
Field training experiences under supervision. May be repeated for credit. Graded on S/U basis only.

Credit Hours: 3
Prerequisites: advisor's consent

H_D_FS 3750: Working with Families
This course focuses on application of an ecological model to the understanding of variation in parental roles, perspectives, approaches, and challenges. The course also provides an overview of effective communication strategies and parent education programs. Course content overlaps with H_D_FS 3600 thus students may not enroll in both courses. Students will NOT receive credit for both H_D_FS 3600 and H_D_FS 3750.

Credit Hours: 3
Prerequisites: Restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE) or by instructor consent

H_D_FS 3800: Children's Play
This course is an examination of the complex phenomenon of play in children's lives. Emphasis is placed on the value of play in developmental, social, and cultural contexts. Topics include the exploration of play theories and supporting empirical evidence, play materials, various environments, violence and conflict resolution, and therapeutic uses of play. Observation and assessment of children at play and analysis of play environments is required.

Credit Hours: 3
Prerequisites: H_D_FS 2400/H_D_FS 2400W, H_D_FS 3050, H_D_FS 3150/H_D_FS 3150W, or instructor's consent, junior standing. Enrollment is restricted to H_D_FS and Pre-H_D_FS majors during preregistration period

H_D_FS 3950: Practicum I: Child Observations in Classroom Environment
Opportunity for Early Childhood Education teacher candidates to have a guided learning experience in a professional agency that provides services to children and families. Some course content overlaps with LTC 4110.

Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE); H_D_FS 3050, H_D_FS 3150, H_D_FS 3250, H_D_FS 3350 and H_D_FS 3450

H_D_FS 3960: Readings in Human Development and Family Science
Readings in recent research; critical discussions.

Credit Hour: 1-30

H_D_FS 4001: Topics in Human Development and Family Science
Selected current topics in field of interest.

Credit Hour: 1-6

H_D_FS 4085: Problems in Human Development and Family Science
Independent work on special problems in human development and family science. Graded on S/U basis only.

Credit Hour: 1-30
Prerequisites: instructor's consent

H_D_FS 4090: Advanced Research in Human Development and Family Science
Advanced training and engagement in research with a H_D_FS faculty member. Student develops research skills (e.g., data collection, entry, coding, analysis) and works semi-independently on own research project. Graded on S/U basis only. May be repeated for credit.

Credit Hour: 1-30
Prerequisites: H_D_FS 2200 and H_D_FS 3090; instructor's consent

H_D_FS 4100: Children in Healthcare Settings
(cross-leveled with H_D_FS 7100). Overview of the medical conditions and treatments commonly encountered by children and adolescents in healthcare settings and their typical reactions to healthcare experiences. Introduction to the philosophy and the role of the child life specialist in the healthcare setting.

Credit Hours: 3
Prerequisites: H_D_FS 2200, H_D_FS 2400, H_D_FS 2400W, H_D_FS 3050, H_D_FS 3150/H_D_FS 3150W, or instructor's consent. Restricted to H_D_FS and Pre-H_D_FS majors

H_D_FS 4110: Child Life Theory and Practice
(cross-leveled with H_D_FS 7110). Focuses on theoretical foundations and principal intervention strategies used in Child Life professional practice.

Credit Hours: 3
Prerequisites: H_D_FS 2200, H_D_FS 3050, H_D_FS 3150/H_D_FS 3150W, and H_D_FS 3500 or H_D_FS 3700, or instructor's consent

H_D_FS 4130: Child Life Practicum
Observation of Child Life staff at Children's Hospital and experience helping children and adolescents cope with hospitalization.

Credit Hours: 3
Prerequisites: H_D_FS 3500 and H_D_FS 3700, consent required

H_D_FS 4150: Development of Curriculum for Children Ages Birth to 3
Students will learn and use assessment and documentation to inform curriculum; plan and evaluate developmentally appropriate activities; and learn about effective ways to share curriculum information with families. Focus is on children ages birth to 3.

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 4200: Latino/a Youth and Families
Current issues in theory, methods, and research in U.S. Latino/a youth and families are examined from a social and developmental psychological
perspective. The course is an advanced level study, with a particular focus on history, theories, methods, research, and applied social issues. Topics will include, parenting, siblings, youth development and adjustment, stress, risky behaviors, gender issues, assessment, study design, cultural values, intervention programs, and immigration issues.

Credit Hours: 3
Prerequisites: Pre-H_D_FS and H_D_FS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300, H_D_FS 2400/H_D_FS 2400W

H_D_FS 4250: Development of Curriculum for Children 4-8

Students will learn and use assessment and documentation to inform curriculum, plan and evaluate developmentally appropriate activities; and learn about effective ways to share curriculum information with families. Focus is on children ages 4-8.

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 4300: Black Families

(same as Bl_STU 4300). Emphasis is on the unique social, economic, religious, educational, and political environments that have affected the structure and function of the Black family.

Credit Hours: 3
Prerequisites: H_D_FS 2200 or equivalent, and junior standing

H_D_FS 4350: Assessing Young Children and their Environments

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 4400: Childhood Death and Bereavement

(cross-leveled with H_D_FS 7400). An exploration of issues that arise for children and families when facing life-threatening illness and death. The course also includes an examination of coping and helping strategies for dying and grieving children.

Credit Hours: 3
Prerequisites: H_D_FS 2200, H_D_FS 2400/H_D_FS 2400W, H_D_FS 3150 AND H_D_FS 3150/H_D_FS 3150W (or H_D_FS 3420/H_D_FS 3420W) or instructor's consent. Restricted to HDFS and Pre-HDFS majors during pre-registration period

H_D_FS 4420: Environmental Influences on Lifespan Cognition

This course covers the change and growth of cognition through the lifespan with particular attention to how the environment influences cognition (including perception, language memory, attention executive functions, and problem solving).

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS Majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300, H_D_FS 2400/H_D_FS 2400W, H_D_FS 3050, H_D_FS 3150/H_D_FS 3150W (or H_D_FS 3420/W instead of H_D_FS 3050 and H_D_FS 3150/H_D_FS 3150W)

H_D_FS 4450: Understanding and Adapting for Developmental Differences

This course focuses on knowledge of disability conditions, assessment and identification, interventions in inclusive environments, and collaborations among service providers.

Credit Hours: 3
Prerequisites: enrollment is restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 4450: Practicum II: Curriculum Development and Implementation

Practicum in ECE is an opportunity for teacher candidates to have a guided learning experience in a professional agency that provides services to children and families, and allows teacher candidates to have the opportunity to use and implement theories and practices. Course content overlaps with LTC 4110. Not recommended for students to enroll in both courses.

Credit Hours: 3
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI_ECE)

H_D_FS 4570: Administration of Programs for Children and Families

(cross-leveled with H_D_FS 7570). The development of leadership and management skills for administering community-based early childhood programs for children and their families. Includes an overview of early childhood standards; budgeting, funding and financial matters; developing, equipping, and staffing a center; recruiting children and families; curriculum; health, safety, and nutrition; volunteer and staff development, and program evaluation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: H_D_FS 1600, H_D_FS 2200 or equivalent, H_D_FS 2300, H_D_FS 2400/2400W, H_D_FS 2510, H_D_FS 3500 or H_D_FS 3700, or instructor's consent

H_D_FS 4610: Stress and Resilience in Families

(cross-leveled with H_D_FS 7610). Introduction to the study of stressor events in families, such as poverty, violence within families, substance abuse, and health problems. Emphasis is on both prevention and coping.

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W

H_D_FS 4620: Family Interaction

Analysis of intrafamilial interaction from a systems perspective; includes comparative study of family paradigms, family subsystems, goals, and resources, boundaries, and patterns of feedback.

Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W
H_D_FS 4630: The Process of Divorce
(cross-leveled with H_D_FS 7630). Examination of theory and research related to marital dissolution. The impact of divorce on children and adults, and divorce intervention strategies are considered.
Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W

H_D_FS 4640: Interpersonal Relationships
In-depth examination of interpersonal relationships, including theoretical perspectives, research methods, relationship forms, relationship processes, and how context affects relationships. Students are introduced to the field of close relationships.
Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W

H_D_FS 4650: Administration/Supervision in Early Childhood Settings
Exploration of issues surrounding the administration of ECE programs including identification of community needs, analysis of business opportunities, evaluation and appropriate use of quality programming, consideration of policy and equal responsibilities, and professionalism. Course content overlaps with H_D_FS 4570. Students may NOT enroll in both courses. Students will not receive credit for both H_D_FS 4650 and H_D_FS 4570.
Credit Hours: 3
Prerequisites: Restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE)

H_D_FS 4680: Family Communication
(same as COMMUN 4520). Analysis of the functions and processes of communication within families.
Credit Hours: 3
Prerequisites: junior standing or departmental consent. May be restricted to Communication majors only during early registration

H_D_FS 4700: Children and Families in Poverty
Study of the extent, distribution, and implications of poverty on children and families. Examination of myths and realities, social conditions, policies, and programs that contribute to or reduce poverty and its consequences.
Credit Hours: 3
Prerequisites: Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W

H_D_FS 4720: Child and Family Advocacy
Study of the processes of social policies, legislation, and regulations affecting children and families at the local, state and federal levels. The course emphasizes current issues and need for citizen involvement.
Credit Hours: 3
Prerequisites: Restricted to HDFS and Pre-HDFS majors during pre-registration period; Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W

H_D_FS 4740: Parent-Child Relations Over the Life Course
Examines the development, continuities, transitions, and discontinuities of parent-child relationships over the life course. Considers the influence of parents on children and children on parents.
Credit Hours: 3
Recommended: H_D_FS 1600 and H_D_FS 2200

H_D_FS 4750: Practicum III: Capstone Experience
This experience allows the student to demonstrate practical application of developmentally appropriate early childhood teaching techniques and skills, teaching experience and developmental feedback. Includes observation and evaluation of classroom experience. Course content overlaps with H_D_FS 3700 and LTC 4170. Not recommended for students to enroll in both courses. Students will not receive credit for both H_D_FS 4750 and H_D_FS 3700 or H_D_FS 4750 and LTC 4170.
Credit Hours: 6
Prerequisites: restricted to students admitted to the Great Plains IDEA Early Childhood Education Program (GPI-ECE), H_D_FS 3950, H_D_FS 4150, H_D_FS 4250, H_D_FS 4350, H_D_FS 4450 and H_D_FS 4550

H_D_FS 4820: Assessment in Family and Consumer Sciences Education
What should a teacher do about planning for student learning in FACS? Includes objectives, lesson designs, resources, learner diversity, thinking skills, reasoning processes, articulation, legislation.
Credit Hours: 3
Prerequisites: ESC_PS 2010 and SPC_ED 2020 or equivalent. Admission to Phase II, and instructor's consent

H_D_FS 4830: Methods of Teaching FACS in Middle and Secondary Schools
What should a teacher do to help students achieve learner objectives? Includes classroom management strategies, choosing and using instructional methods to stimulate thinking skills and reasoning processes, communication skills, professionalism, and public relations.
Credit Hours: 3
Prerequisites: admission into Phase II, H_D_FS 4800, and instructor's consent

H_D_FS 4840: Field Experience in Family and Consumer Sciences
Students will observe and assist in FACS classroom.
Credit Hour: 1
Prerequisites: to be taken concurrently with H_D_FS 4800, and instructor's consent
H_D_FS 4941: Field Experience in Family and Consumer Sciences
Students will be involved in real-world experiences in a FACS classroom.
Credit Hour: 1
Prerequisites: to be taken concurrently with H_D_FS 4830; requires instructor's consent

H_D_FS 4942: Student Teaching FACS in Middle and Secondary Schools
What guided practicum experiences will directly contribute to success as a classroom teacher? Students will teach for sixteen weeks within the state of Missouri under the supervision of an experienced FACS teacher.
Credit Hour: 1-15
Prerequisites: H_D_FS 4800, H_D_FS 4820, H_D_FS 4830, ENGLSH 1000, admittance to Phase III, and instructor's consent

H_D_FS 4942W: Student Teaching FACS in Middle and Secondary Schools - Writing Intensive
What guided practicum experiences will directly contribute to success as a classroom teacher? Students will teach for sixteen weeks within the state of Missouri under the supervision of an experienced FACS teacher.
Credit Hour: 1-15
Prerequisites: H_D_FS 4800, H_D_FS 4820, H_D_FS 4830, ENGLSH 1000, admittance to Phase III, and instructor's consent

H_D_FS 4970: Families and Lifespan Development Capstone
Focus on integrating, extending, critiquing, and applying knowledge gained in the Families and Lifespan Development option within a family and lifespan development educational framework. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: senior standing and instructor's consent

H_D_FS 4970W: Families and Lifespan Development Capstone - Writing Intensive
Focus on integrating, extending, critiquing, and applying knowledge gained in the Families and Lifespan Development option within a family and lifespan development educational framework. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: senior standing and instructor's consent

H_D_FS 4971: Child Development and Education Capstone
Practical experience working with young children (up to 10) in out-of-home care facilities. Program planning for children and working with parents. Lab hours required.
Credit Hours: 9
Prerequisites: H_D_FS 2200, H_D_FS 3500 and H_D_FS 3700, or equivalent and instructor's consent

H_D_FS 4993: Internship in Human Development and Family Science
Internships or field training experiences under supervision. Graded on S/U basis only.
Credit Hour: 1-30
Prerequisites: H_D_FS 2200 or equivalent and instructor's consent

H_D_FS 7001: Topics in Human Development and Family Science
Selected current topics in field of interest.
Credit Hour: 1-99

H_D_FS 7085: Problems
Independent work on special problems in human development and family studies. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

H_D_FS 7100: Children in Healthcare Settings
Credit Hours: 3

H_D_FS 7110: Child Life Theory and Practice
Focuses on theoretical foundations and principal intervention strategies used in Child Life professional practice.
Credit Hours: 3
Prerequisites: H_D_FS 2200, H_D_FS 3050, H_D_FS 3150/H_D_FS 3150W, or H_D_FS 3500 or H_D_FS 3700, or instructor's consent

H_D_FS 7130: Child Life Practicum
Observation of Child Life staff at Children's Hospital and experience helping children and adolescents cope with hospitalization.
Credit Hours: 3
Prerequisites: H_D_FS 3500 and H_D_FS 3700, consent required

H_D_FS 7200: Latino Families and Youth
This course will cover the critical integration of theoretical, methodological, and empirical issues in Latino psychology using a cross-cultural, cross-ethnic perspective, including the increased sensitivity to issues and challenges facing Latino families and youth from a social science perspective. There will be a particular focus on selected topics in social and developmental psychology, as well as, understanding the relevance to other areas of study, to policy contexts, and to applied settings. Students will provide a written, integrative literature review and research proposal related to the course topic. The course will consist primarily of seminar discussions based on the textbook and additional readings. Students will lead class discussions based on the readings and their QRCs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent

H_D_FS 7231: Foundations of Youth Development
This course provides an introduction to the field of youth development and the professions that include youth work. This course is designed to provide a foundation of knowledge that students will need to begin any course in the Great Plains IDEA Youth Development programs. Priority
given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hour: 1

H_D_FS 7233: Basic Grant Development and Management
This course introduces students to grant development and management. This short-course is not intended to cover all aspects of grant development and management, but it will help students gain confidence in their grant development abilities and inspire them to learn more. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7252: Adult Development
This course presents a life-span, multidisciplinary developmental framework that considers sociohistorical influences, individual differences, and concern for promoting optimal functioning. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7255: Aging Policy
Policy development in the context of the economic status of the elderly populations. Retirement planning and the retirement decision; Social Security and public transfer programs for the elderly; intrafamily transfers to/from the elderly; private pensions; financing medical care for the elderly; prospects and issues for the for the future. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7256: Environments and Aging
Examination of attributes of physical environments that support special needs of older people and application of this knowledge to the design and management of housing, institutional settings, neighborhoods and communities. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7257: Aging and the Family
Theories and research related to personal and family adjustments in later life affecting older persons and their inter-generational relationships. Related issues including demographics are also examined through the use of current literature. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7259: Mental Health and Aging
Student is introduced to the range of issues utilizing several theoretical perspectives and the systems framework. Major mental, emotional, and psychiatric problems encountered in old age are examined, along with normal processes of aging individual's personality, mental and brain functions. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7260: Women and Aging
Women and aging is the study of theory, research and application of issues related to women and the aging experience. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7261: Biological Principles of Aging
This course will give an overview of the normal aging process of the human body systems, environmental factors influencing normal aging, diseases and disorders associated with aging. A special topics unit will include but is not limited to interviews and observations dealing with the aging process in humans. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7262: Long-Term Care Administration
Provides information for persons interested in leadership role in long-term care, or for those considering careers intersecting with senior living organizations. Also considers long-term care options. Priority given to students in the Great Plains Idea Group master's and certificate programs.

Credit Hours: 3

H_D_FS 7300: Black Families
(same as BL_STU 7300). Emphasis is on the unique social, economic, religious, educational, and political environments that have affected the structure and function of the black families.

Credit Hours: 3

Prerequisites: H_D_FS 2200 or equivalent

H_D_FS 7400: Childhood Death and Bereavement
(cross-leveled with H_D_FS 4400). An exploration of issues that arise for children and families when facing terminal illness or death. The course also includes an examination of coping and helping strategies for dying and grieving children.

Credit Hours: 3

Prerequisites: H_D_FS 2200, H_D_FS 2400/H_D_FS 2400W, H_D_FS 3150 AND H_D_FS 3150/H_D_FS 3150W (or H_D_FS 3420/H_D_FS 3420W) and instructor's consent. Restricted to HDFS and Pre-HDFS majors during pre-registration period

H_D_FS 7500: Developing Plans of Care for Community-Dwelling Older Adults
This applied course focuses on conducting geriatric assessments across multiple domains in order to develop holistic plans of care for older adults. Designed for students with some familiarity with the large age-graded income and health programs (e.g., Social Security, Medicare), the course examines the broad range of community resource programs designed to support more specific medical, psychosocial, and functional needs. Although service delivery varies by community, students will be trained to seek out those that are locally provided, up to and including resources providing a transitional bridge to respite and long-term care services. Graded on A-F basis only.
**Credit Hours:** 3  
**Prerequisites:** Bachelor or Master's degree in Human Services, Social Work, Mental Health, Nursing, Physical Rehabilitation, or Psychology. Must be enrolled in Graduate Certificate in Geriatric Care Management Program.

**H_D_FS 7570: Administration of Programs for Children and Families**
(cross-leveled with H_D_FS 4570). The development of leadership and management skills for administering community-based early childhood programs for children and their families. Includes an overview of early childhood standards; budgeting, funding and financial matters; developing, equipping, and staffing a center; recruiting children and families; curriculum; health, safety, and nutrition; volunteer and staff development, and program evaluation. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 7500, H_D_FS 8012 and H_D_FS 7510; Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology required; must be enrolled in Graduate Certificate in Geriatric Care Management program.

**H_D_FS 7570: Ethical, Legal, and Business Considerations in Geriatric Care Management**
This applied eight-week course addresses multiple issues that geriatric care managers must consider in their work with the vulnerable older population. Topics include the ethics of care management, developing cultural and spiritual competencies, legal requirements in both the fee-for-service and nonprofit settings, as well as business aspects for those considering independent practice in this growing field, including national certification. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 7500, H_D_FS 8012 and H_D_FS 7510; Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology required; must be enrolled in Graduate Certificate in Geriatric Care Management program.

**H_D_FS 7583: Personal Financial Issues of Older Adults**
(same as FINPLN 7583). Principles and practice of personal finance relevant to assessing and improving the financial security of older individuals. Topics covered include sources of income, management of cash flow, credit use and abuse, risk exposure, investment management, housing, and financial planning. Financial vulnerabilities of seniors will be explored. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology; must be enrolled in Graduate Certificate in Geriatric Care Management program. May be repeated for credit.

**H_D_FS 7600: Resilience in Families**
Exploration of the evolution of a resilience approach to the study of families and human development. Using a lifespan approach, students will explore resilience across time as well as within special populations such as families experiencing crisis and trauma, culturally diverse families, and military families. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology. Must be enrolled in Graduate Certificate in Geriatric Care Management Program. May be repeated for credit. Graded on A-F basis only.

**H_D_FS 7610: Stress and Resilience in Families**
(cross-leveled with H_D_FS 4610). Introduction to the study of stressor events in families, such as poverty, violence within families, substance abuse, and health problems. Emphasis is on both prevention and coping.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 7600, H_D_FS 8012 and H_D_FS 7510; Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology required; must be enrolled in Graduate Certificate in Geriatric Care Management program.

**H_D_FS 7630: The Process of Divorce**
(cross-leveled with H_D_FS 4630). Examination of theory and research related to marital dissolution. The impact of divorce on children and adults, and divorce intervention strategies will be considered.

**Credit Hours:** 3  
**Prerequisites:** Pre-HDFS and HDFS majors must complete H_D_FS 1600, H_D_FS 2200, H_D_FS 2300 and H_D_FS 2400/H_D_FS 2400W.

**H_D_FS 7640: Interpersonal Relationships**
In-depth examination of interpersonal relationships, including theoretical perspectives, research methods, relationship forms, relationship processes, and how context affects relationships. Students will also be introduced to the field of close relationships.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 8012.

**H_D_FS 7650: Family Crisis Intervention**
Individuals and families in crises are examined. Focus is on grief and loss, substance abuse, family violence, and suicidal ideation. Examination of evidence-based preventions and treatments and community resources for those affected by stress, trauma, and crises. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** H_D_FS 7500 or equivalent, H_D_FS 2300, H_D_FS 2400/2400W, H_D_FS 2510, H_D_FS 3500 or H_D_FS 3700, or instructors consent.

**H_D_FS 7690: Family Resource Management**
Survey course of personal finance and family resource management literature to provide an overview of how individual and family members develop and exercise their capacity to obtain and manage resources to meet life needs. Resources include the self, other people, time, money, energy, material assets, space, and environment. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Bachelor or Master's degree in human services, social work, mental health, nursing, physical rehabilitation or psychology. Must be enrolled in Graduate Certificate in Geriatric Care Management Program. May be repeated for credit. Graded on A-F basis only.

**H_D_FS 8001: Topics in Human Development and Family Science**
Selected current topics in field of interest.

**Credit Hour:** 1-99

**H_D_FS 8012: Family Dynamics and Intervention**
(same as NURSE 8010). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.

**Credit Hours:** 3  
**Prerequisites:** NURSE 7100

**H_D_FS 8085: Problems in Human Development and Family Science**
Independent work on special problems in human development and family science. Graded on S/U basis only.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent
**H_D_FS 8087: Seminar in Human Development and Family Science**
Seminar in selected topics in human development and family science.

**Credit Hours:** 1-99

**H_D_FS 8090: Research in Human Development and Family Science**
Independent research not leading to a thesis. Report required. Graded on S/U basis only.

**Credit Hours:** 1-99

**H_D_FS 8100: Foundations and Principles of Family and Community Services**
This course provides an introduction to the field of family studies and related professions that involve working with individuals and families in communities. This course is designed to provide a foundation of knowledge that students will need in the Great Plains IDEA family and Community Services program. This course is organized around theory, research, and practice of Family Studies. Graded on A-F basis only.

**Credit Hours:** 3

**H_D_FS 8110: Developmental Perspectives on Health and Illness**
Seminar on child and adolescent development as applied to illness and hospitalization, with a focus on applying psychosocial research and theory in work with pediatric populations. Graded on A-F only. May be repeated for credit.

**Credit Hours:** 3

**Prerequisites:** instructor consent; coursework in human development and experience with pediatric populations

**H_D_FS 8200: Research Methods in Human Development and Family Science**
Examination of the rationale for conducting scientific research; various research methods pertinent to the study of individuals over the life span, close relationships, marriages, and families; hypothesis formulation; selection of appropriate designs, instrumentation, and analysis.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**H_D_FS 8210: Theories of Human Development**
Major theories of life span human development. Attention given to structure, content, and major research critiqued for theoretical strengths.

**Credit Hours:** 3

**Prerequisites:** 6 hours of 300-level Behavioral Sciences courses or instructor's consent

**H_D_FS 8220: Family Theories**
Reviews existing family theories, their assumptions, values, propositions, and applications. Examines processes of theory testing and construction and linkages between theory and research.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**H_D_FS 8221: Gerontechnology**
Population aging is combining with technological advancement to create and change the world of modern older people, their families, and their communities. This course takes an interdisciplinary approach to the understanding of the biological, environmental, and social spheres where technology and gerontology meet. Graded on A-F basis only.

**Credit Hours:** 3

**H_D_FS 8222: Creativity and Aging**
What happens to creativity as a person ages? This unique class will help students to understand developmental and pathological changes in the brain that can lead to changes in creative output over time. Through hands-on experiences and direct association with older adults, students will grow an appreciation for creativity produced and inspired by older people. This course is intended to provide experiences that will help the student to be able to create art programs for older adults. Graded on A-F basis only.

**Credit Hours:** 3

**H_D_FS 8232: Youth Professionals as Consumers of Research**
This course will help youth development professionals understand and evaluate the quality of research reports. Students will learn the basics of quantitative and qualitative research approaches that will enable them to understand, evaluate, and critique research articles reported in newspaper, journals or other sources. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours:** 3

**H_D_FS 8234: Adolescents and their Families**
This course explores adolescent development in the context of the family. The bi-directional influences between adolescents and their families will be examined. Implications for professionals working with youth and families will be explored and highlighted. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours:** 3

**H_D_FS 8235: Administration and Program Management**
This course introduces students to the development, administration and management of youth-serving organizations. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours:** 3

**H_D_FS 8236: Federal and State Policies that Impact Youth Development**
This course examines various federal and state policies that effect developmental opportunities for youth. Course participants will also examine not only how policies are developed, but also why. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours:** 3

**H_D_FS 8237: Youth Cultures and the Cultures of Youth**
This course examines the cultural contexts that affect youth from within and outside the family. Students will study social, ethnic, and educational processes that affect youth, and they will examine how history has
shaped the current cultural climate of the U.S. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours: 3**

**H_D_FS 8238: Program Design, Implementation and Evaluation**
The course will discuss program design, implementation, and outcome evaluation. This course will focus on planning, designing logic models, and evaluating program. Students will evaluate a community-based project.

**Credit Hours: 3**

**Prerequisites:** graduate standing required. Priority given to students in the Great Plains Idea Group master's and certificate programs

**H_D_FS 8239: Community Youth Development**
This course focuses on community youth development from a strength-based or developmental asset approach. This approach encompasses both individual development and interrelationships with social environments. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours: 3**

**H_D_FS 8240: Youth Development**
This course introduces the developmental period of adolescence. Emphasis will be on developmental tasks of this life stage and influences of family and home, school, peers and other contextual forces. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours: 3**

**H_D_FS 8251: Perspectives in Gerontology**
An overview of current aging issues including the prevailing focus of gerontology theory and research; critical social and political issues in aging, the interdisciplinary focus of gerontology, career opportunities, and aging in the future. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours: 3**

**H_D_FS 8253: Physical Health in Aging**
This course identifies the basic physiologic changes during aging and their effects on health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed. Priority given to students in the Great Plains Idea Group master's and certificate program.

**Credit Hours: 3**

**H_D_FS 8254: Gerontology Research Methods and Program Evaluation**
Overview of program evaluation, research methods and grant writing in gerontology. Includes application of quantitative and qualitative methods in professional settings. Priority given to students in the Great Plains Idea Group master's and certificate programs.

**Credit Hours: 3**

**H_D_FS 8258: Professional Seminar in Gerontology**
An integrative experience for gerontology students designed to be taken near the end of the degree program. By applying knowledge gained in earlier course work, students strengthen skills in ethical decision-making behavior, apply these skills in gerontology-related areas such as advocacy, professionalism, family and workplace issues.

**Credit Hours: 3**

**Prerequisites:** Completion of all other gerontology program coursework. Priority given to students in the Great Plains Idea Group master's and certificate programs

**H_D_FS 8300: Advanced Seminar on Multicultural Families**
Advanced study of multicultural (racial, ethnic, social) families within American society. Attention is focused on each group's unique cultural heritage and social environment.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**H_D_FS 8420: Cognitive Development**
(same as PSYCH 8420). Study of the development of reasoning, perception and language.

**Credit Hours: 3**

**H_D_FS 8440: Social and Emotional Development**
(same as PSYCH 8440). Seminar on emotional and social development in children, with focus on research and theory on the impact of various family, school, and societal factors.

**Credit Hours: 3**

**H_D_FS 8450: Adolescence and Emerging Adulthood**
Seminar on development during adolescence and emerging adulthood from biological, cognitive, psychosocial, and cultural perspectives, and with a focus on health-related attitudes and behaviors.

**Credit Hours: 3**

**H_D_FS 8460: Life Course Perspective**
Seminar on the life course perspective, an interdisciplinary approach to the study of lives over time and the interplay between human lives and social institutions. Deals with how individual lives are shaped by social change and social structure.

**Credit Hours: 3**

**H_D_FS 8500: Prosocial and Moral Development**
The course objective is to increase the understanding of the study of morality from psychological and developmental perspectives and the critical integration of theoretical, methodological, and empirical issues in moral psychology. It will also cover understanding the relevance of moral concepts and findings to other areas of study, policy contexts, and applied settings. Students will provide a written, integrative literature review and research proposal related to the course topic. Graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites:** Instructor's consent
H_D_FS 8510: Parenting Education
Study of theories, models, research and skills regarding parenting
effectiveness and parent-child relations in the context of Western and
Eastern cultures. Included are comparisons of the relative strengths and
weaknesses of various parenting approaches, historical perspective on
parenthood and children, parenting roles, strategies for contemporary
parenting, developmental interaction from infancy through adulthood and
selected special concerns of parents. A Bio-Ecological Systems approach
will be utilized in this course. Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8520: Lifespan Development
This course covers the human development including the cognitive,
social-emotional, motor, language, and moral domains from both a
lifespan and a bio-ecological perspective. Course content focuses on the
major theories of development as well as current research on the micro-
macro interrelationship. Students who complete this course will have a
better understanding of individual human developmental processes and
their relationship with context and within family and community matters.
Graded on A-F basis only.

Credit Hours: 3

H_D_FS 8610: Remarriage & Stepfamilies: Development, Dynamics,
& Intervention
The processes of remarriage and reconstituted family dynamics; special
developmental needs and intervention models will be studied. The impact
on children is considered.

Credit Hours: 3
Prerequisites: instructor's consent

H_D_FS 8630: Gendered Relations in Families
(same as WGST 8630). From a feminist perspective, the roles of gender
in shaping family life experience and of family life experience in shaping
gender will be explored. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

H_D_FS 8640: Family Interaction
Examination of intrafamilial interaction. Includes an overview of theories
used to study family interaction, critical review of the assessment of
family interaction; and examination of contemporary research on family
interaction focusing on intra and inter-generational relationships.

Credit Hours: 3
Prerequisites: H_D_FS 1600 and H_D_FS 2200 or equivalent; or
instructor's consent

H_D_FS 8710: Children, Families and Public Policy
Seminar on societal issues relating to children and families, with focus on the
development of public policies.

Credit Hours: 3
Prerequisites: instructor's consent

H_D_FS 8770: Poverty
Implications of poverty for child, adult, and family functioning. Poverty-
related policies and programs.

Credit Hours: 3

H_D_FS 8960: Readings in Human Development and Family Science
Readings in recent research; critical evaluation.

Credit Hours: 1-99
Prerequisites: instructor's consent

H_D_FS 8972: Internship in Human Development and Family Science
Internships and/or field training experiences under supervision. Graded on S/U basis only.

Credit Hours: 1-99
Prerequisites: instructor's consent

H_D_FS 8970: Research in Human Development and Family Science
Independent research leading to thesis or dissertation. Graded on S/U basis only.

Credit Hours: 1-99
Prerequisites: instructor's consent

H_D_FS 8972: Internship in Human Development and Family Science
Internships and/or field training experiences under supervision. Graded on S/U basis only.

Credit Hours: 1-99
Prerequisites: instructor's consent

H_D_FS 9090: Teaching Practicum
Supervised experience in teaching various audiences, including college
students, professionals, and community residents. Graded on S/U basis only.

Credit Hours: 2-6
Prerequisites: instructor's consent

H_D_FS 9200: Advanced Research Methods in Human Development
and Family Science
(same as NURSE 9410). Examination of issues related to the study of
individuals and their families: measurement, designs, and interpretation of
statistical analyses. Statistics are placed in perspective through readings
and discussions of the relationships between theory, research design,
and data analyses.

Credit Hours: 3
Prerequisites: H_D_FS 8200 or instructor's consent

H_D_FS 9210: Research Practicum in Human Development and
Family Science
Independent research activities in conjunction with faculty. Graded on S/ U basis only.

Credit Hours: 2-6
Prerequisites: instructor's consent

H_D_FS 9420: Qualitative Methods
(same as NURSE 9420). Examines the following selected qualitative
research approaches appropriate for the study of nursing phenomena
and the extension or modification of scientific knowledge so as to be
relevant to nursing: case study research methods, verbal qualitative
approaches, and nonverbal qualitative approaches. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7150 and doctoral status (or permission of
faculty)
Information Science And Learning Technologies (IS_LT)

**IS_LT 1111: Information Use and Student Success**
In this course, students will learn to frame meaningful questions, gain knowledge and skills to succeed academically, understand the structure and content of information resources, evaluate information, and use information resources as genuine learning tools.

**Credit Hour: 1**

**Prerequisites: Consent required (students must be admitted to College of Education's Teacher Education program)**

**IS_LT 2222: Information Management and the Successful Scholar**
This course will help students determine what information is needed for a project; access and critically evaluate information in the library and the internet; understand intellectual property, develop skills for lifelong learning, and learn to use a variety of technological tools that can help them succeed in college. Graded on A-F basis only.

**Credit Hours: 3**

**IS_LT 2467: Inquiry into Empowering Learners with Technology**
This course examines models and strategies for integrating technology into the teaching and learning process, with a focus on transformative, meaningful learning instead of passive technology use. Topics include digital citizenship, professional online presence, and designing and facilitating learning with technology. Graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites: Consent required (students must be admitted to College of Education's Teacher Education program)**

**IS_LT 4099: Making and Education (3D printing)**
(cross-leveled with IS_LT 7099). This course - via hands-on activities and projects - will immerse you into the making and 3D printing culture. You will learn how to design and redesign 3D objects, learn 3D modeling software 3D printing. You will learn how to teach STEM concepts through 3D modeling and 3D printing.

**Credit Hour: 1-3**

**IS_LT 4310: Seminar in Information Science and Learning Technologies**
Discussion and critical study of current developments in the field of information science and learning technologies.

**Credit Hour: 1-3**

**IS_LT 4360: Introduction to Web Development**
(cross-leveled with IS_LT 7360). Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A-F basis only.

**Credit Hours: 3**

**IS_LT 4361: Introduction to Digital Media**
(cross-leveled with IS_LT 7361). Hands-on approach to multimedia production techniques. Develops understanding of technical and conceptual tools for the basics of digital media, video editing, still image and audio file manipulation. Students create web portfolio to present their digital products. Graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites: IS_LT 4360 or instructor's consent**

**IS_LT 4363: Introduction to Web Development**
(cross-leveled with IS_LT 7363). Development of design and web authoring skills. Topics include CSS, HTML, web interactivity through the use of JavaScript, Dreamweaver and usability practices. Upon completion, students will be ready to create high-impact and highly functional web pages.

**Credit Hours: 3**

**Prerequisites: Consent required (students must be admitted to College of Education's Teacher Education program)**

**IS_LT 4364: Introduction to Web Design with JavaScript**
(cross-leveled with IS_LT 7356). Attain skills in designing/developing interactive web sites/applications using JavaScript, JavaScript libraries, AJAX, plugins, widgets, user interface themes. Add effects, animations to photo galleries, slide shows, carousels to support instruction. Integrate Google Maps and application API's in learning activities. Dynamically modify web pages based on user actions.

**Credit Hours: 3**

**Prerequisites: IS_LT 4370**

**IS_LT 4370: Introduction to Web Development**
(cross-leveled with IS_LT 7360). Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A-F basis only.

**Credit Hours: 3**

**IS_LT 4371: Introduction to Digital Media**
(cross-leveled with IS_LT 7361). Hands-on approach to multimedia production techniques. Develops understanding of technical and conceptual tools for the basics of digital media, video editing, still image and audio file manipulation. Students create web portfolio to present their digital products. Graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites: Consent required (students must be admitted to College of Education's Teacher Education program)**

**IS_LT 4372: Exploring CourseSites**
(cross-leveled with IS_LT 7372). This course will prepare you to work within the CourseSites Learning Management System (LMS) to set up and manage an online course. As a student in this course, you will investigate and manipulate components of CourseSites from an instructor's perspective. Graded on A-F basis only.

**Credit Hour: 1**

**IS_LT 4373: Exploring Moodle**
(cross-leveled with IS_LT 7373). This course will prepare students to work within the Moodle Learning Management System (LMS) to set up and manage an online course. Students in the course will investigate and manipulate components of Moodle from an instructor's perspective. Graded on A-F basis only.

**Credit Hour: 1**

**IS_LT 4374: Exploring Canvas**
(cross-leveled with IS_LT 7374). This course will prepare students to work within the Canvas Learning Management System (LMS) to set up and manage an online course. Students will investigate and manipulate components of Canvas from an instructor's perspective. Graded on A-F basis only.

**Credit Hour: 1**

**IS_LT 4383: Rapid Development Tools for Online Learning**
(cross-leveled with IS_LT 7383). Students will apply principles of rapid development and use rapid development tools to create a prototype of an e-learning module that uses technology features that can enhance learning (e.g. learner interactions). Specific competencies include: Storyboard and “rapidly” develop an e-learning module using software...
designed to support this process; Use software tools that develop specific elements of e-learning (e.g. video, animation, gaming), and incorporate those elements into an e-learning module; Evaluate rapidly developed e-learning products; Compare and contrast features of rapid development software packages. Graded on A-F basis only.

Credit Hours: 3

IS_LT 4473: Introduction to Project Management
Knowledge and tools for major phases of project management life cycle: project initiation, planning, execution, and closure. Integrated online discussions focus on application and resources. Includes discussions of Lean Project Management techniques and the role of Project Managers. Graded on A-F basis only.

Credit Hours: 3

IS_LT 7099: Making and Education (3D printing)
(cross-leveled with IS_LT 4099). This course—via hands-on activities and projects—will immerse you into the making and 3D printing culture. You will learn how to design and redesign 3D objects, learn 3D modeling software 3D printing. You will learn how to teach STEM concepts through 3D modeling and 3D printing.

Credit Hours: 3

IS_LT 7301: Introduction to Information Technology
The nature of information and information transfer in the institutional setting; covers the culture of information in society, standards for information processing and transfer, and networking in communications perspectives of information providing agencies.

Credit Hours: 3

IS_LT 7302: Organization of Information
In order to retrieve and use information, that information must first be organized. This course investigates systems and structures for organizing information in a variety of contexts.

Credit Hours: 3

IS_LT 7305: Foundations of Library and Information Science
An introduction to the background, contexts, organizations, issues, ethics, values, and terms of information science, the information professions, and the library as an idea, space, institution, and repository of the cultural record.

Credit Hours: 3

IS_LT 7310: Seminar in Information Science and Learning Technology
Discussion and critical study of current developments in the field of information science and learning technologies.

Credit Hour: 1-3

IS_LT 7312: Principles of Cataloging and Classification

Credit Hours: 3

Prerequisites: IS_LT 7305

IS_LT 7313: Collection and Access Management
Selection of materials for libraries and information agencies, policies for collection management, freedom and diversity of information, access to information and evaluation of collections and access.

Credit Hours: 3

IS_LT 7314: Reference Sources and Services
General reference sources with emphasis on print sources. principles, developments and trends in reference services and reference service organization.

Credit Hours: 3

IS_LT 7315: Management of Information Agencies
Concepts of management applied to libraries and information systems; management tools, programming, models and simulation in an environment of an information producing or disseminating agency.

Credit Hours: 3

IS_LT 7320: Emerging Technologies in Libraries
Critically examines web technologies, devices, and methods used to access collections and services, promote social interaction, and facilitate communication. Focuses on new and emerging software, resources, and communication methods including their discovery and implementation. Graded on A-F basis only.

Credit Hour: 3

IS_LT 7334: Library Information Systems
Focuses on the automated library systems marketplace. Covers integrated online library systems from the systems, functional and user perspective. Includes management approaches for procurement and operation of such systems.

Credit Hours: 3

IS_LT 7356: Interactive Web Design with JavaScript
(cross-leveled with IS_LT 4356). Attain skills in designing/developing interactive web sites/applications using JavaScript, JavaScript libraries, AJAX, plugins, widgets, user interface themes. Add effects, animations to photo galleries, slide shows, carousels to support instruction. Integrate Google Maps and application API's in learning activities. Dynamically modify web pages based on user actions.

Credit Hours: 3

Prerequisites: IS_LT 4370 or IS_LT 7370

IS_LT 7360: Introduction to Web Development
(cross-leveled with IS_LT 4360). Basic web design and HTML. Covers file transfer and UNIX/LINUX servers management. Develops understanding of web graphic formats. Emphasizes user interface, navigation, and instructional design in building web sites. Online. Graded on A-F basis only.

Credit Hours: 3
IS_LT 7361: Introduction to Digital Media
(cross-leveled with IS_LT 4361). Hands-on approach to multimedia production techniques. Develops understanding of technical and conceptual tools for the basics of digital media, video editing, still image and audio file manipulation. Students create web portfolio to present their digital products. Graded on A-F basis only.
Credit Hours: 3

IS_LT 7366: Technology Leadership
Develop skills, knowledge, and values needed to provide leadership in schools. Analyzes characteristics of effective leaders, focusing on staff development. Explores technology and school reform, technology integration, and current issues. Online. Graded on A-F basis only.
Credit Hours: 3

IS_LT 7370: Intermediate Web Development
(cross-leveled with IS_LT 4370). Development of design and web authoring skills. Topics include CSS, HTML, web interactivity through the use of JavaScript, Dreamweaver and usability practices. Upon completion, students will be ready to create high-impact and highly functional web pages.
Credit Hours: 3
Prerequisites: IS_LT 7360 or instructor's consent

IS_LT 7372: Exploring CourseSites
(cross-leveled with IS_LT 4372). This course will prepare you to work within the CourseSites Learning Management System (LMS) to set up and manage an online course. As a student in this course, you will investigate and manipulate components of CourseSites from an instructor's perspective. Graded on A-F basis only.
Credit Hour: 1

IS_LT 7373: Exploring Moodle
(cross-leveled with IS_LT 4373). This course will prepare you to work within the Moodle Learning Management System (LMS) to set up and manage an online course. As a student in this course, you will investigate and manipulate components of Moodle from an instructor's perspective. Graded on A-F basis only.
Credit Hour: 1

IS_LT 7374: Exploring Canvas
(cross-leveled with IS_LT 4374). This course will prepare students to work within the Canvas Learning Management System (LMS) to set up and manage an online course. Students will investigate and manipulate components of Canvas from an instructor's perspective. Graded on A-F basis only.
Credit Hour: 1

IS_LT 7375: Mobile Web App Development
(cross-leveled with IS_LT 4375). The purpose of this course is to provide students with knowledge necessary to create a mobile app with basic functions using HTML 5, JavaScript, and CSS3. Through this course, students will obtain knowledge of mobile web app development including both design and development phases. Upon the completion of this course, students will produce a mobile web app that can be operated via a mobile device. Graded on A-F basis only. Recommended: Students must be able to hand code: html, Styling and positioning web pages using CSS & JavaScript, and JavaScript basic functions.
Credit Hours: 3
Prerequisites: IS_LT 4370 or IS_LT 7370 or permission of instructor

IS_LT 7378: Electronic Portfolio Development
This course provides an overview of electronic portfolio development. Students will select, categorize and document their accomplishments in the Technology in Schools emphasis area for review and assessment. Students will demonstrate mastery of the ISTE Standards and commitment to ongoing learning. Web development skills are required. Graded on A-F basis only.
Credit Hours: 1
Prerequisites: IS_LT 7372: Exploring CourseSites

IS_LT 7380: School Library Practicum
Directed, project-based experience in school libraries. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: admission to MA, initial certification or 24 completed LIS credit hours taken at MU; instructor's consent

IS_LT 7381: Practicum in Information Agencies
Provides a supervised work experience for master's degree students in a public, academic, or special library. Graded on S/U basis only.
Credit Hour: 2-3
Prerequisites: IS_LT 7301, IS_LT 7302 or IS_LT 7312, IS_LT 7314, IS_LT 7315

IS_LT 7383: Rapid Development Tools for Online Learning
(cross-leveled with IS_LT4383). Students will apply principles of rapid development and use rapid development tools to create a prototype of an e-learning module that uses technology features that can enhance learning (e.g. learner interactions). Specific competencies include: Storyboard and "rapidly" develop an e-learning module using software designed to support this process; Use software tools that develop specific elements of e-learning (e.g. video, animation, gaming), and incorporate those elements into an e-learning module; Evaluate rapidly developed e-learning products; Compare and contrast features of rapid development software packages. Graded on A-F basis only.
Credit Hours: 3

IS_LT 7384: Designing Games for Learning
(cross-leveled with IS_LT 4384). Learn why games can be useful in learning and how to design them. Play some exemplary games that will help you understand the mechanics of game design and work incrementally towards designing and developing your own educational game prototype via game modifications ("mods"), engaging in gaming communities, evaluating existing games, building learning plans using games and learning the basics of a simple gaming shell language. Graded on A-F basis only.
Credit Hours: 3
IS_LT 9012: Public Library Community Partnerships
This is a service learning course. Students will have the opportunity to work with local community leaders on a project. Students will learn about partnerships and advocacy for the library, developing leadership skills through action and reflection.

Credit Hours: 3
Prerequisites: IS_LT 7305 and IS_LT 9444

IS_LT 9013: Public Library Administration
This class covers three main components: planning, human resources, and budgeting, focusing on public libraries.

Credit Hours: 3
Prerequisites: IS_LT 7305
Recommended: IS_LT 9444

IS_LT 9085: Problems in Information Science and Learning Technology
Independent, directed study on a topic in the areas of information science and learning technologies.

Credit Hour: 1-99
Prerequisites: departmental consent

IS_LT 9090: Research in Information Science and Learning Technologies
Dissertation research. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: Doctoral Committee Chair’s consent

IS_LT 9403: Gender Construction in Children’s/Adolescent Literature and Media
This course will cover some of the theoretical concepts about the construction of gender in our culture and how that construction is enabled by literature and media for children and adolescents. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9404: School Library Administration
Emphasizes school library administration: program development, implementation, evaluation; planning cycle; budget process; services for diverse school constituencies. Effects of national, state, district guidelines, standards and policies on library media programs.

Credit Hours: 3

IS_LT 9405: Sociocultural Aspects of Literacy
This course will cover sociocultural and social constructionist theory as they relate to literacy. Sociocultural theory, in terms of literacy, looks at how both social elements and cultural elements interact to impact literacy behaviors and outcomes. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9406: Curriculum and the School Library
Focuses on the library media specialist as teacher and instructional partner. Emphasizes negotiating instructional partnerships, integrating information problem-solving models into the curriculum, curriculum mapping, and resource-based learning models.

Credit Hours: 3

IS_LT 9407: Intellectual Freedom and Its Discontents
The course examines principles and contradictions of intellectual freedom and their relation to librarianship. The nature of free speech, the First Amendment, sources of censorship, and professional disputes about intellectual freedom practice in libraries will be important topics.

Credit Hours: 3

IS_LT 9408: Information Policy
Examination of the roles of private and public sectors in information policy formation. Includes consideration of social, economic, political and technological issues.

Credit Hours: 3

IS_LT 9409: Seminar in Digital Libraries
This course is a project-based learning environment that combines Instructor-prepared content, group-based student projects, and threaded asynchronous discussions on selected topics relating to the design, development, and implementation of practical digital libraries. Research directives within the broad domain of digital library development are also covered.

Credit Hours: 3

IS_LT 9410: Seminar in Information Science and Learning Technology
Discussion and critical study of current developments in information science and learning technologies.

Credit Hour: 1-3

IS_LT 9411: Doctoral Seminar in Information Science and Learning Technologies
Discussion and critical study of current developments in information science and learning technologies. Graded on A-F basis only.

Credit Hours: 1-3

IS_LT 9413: Electronic Resource Management
This course explores electronic resources (primarily subscription journals and databases) in terms of products, pricing, in-house management of resources, both technical and organizational, licensing, configuring databases and organizing websites for the end user, statistical reporting, and future trends.

Credit Hours: 3

IS_LT 9417: Action Research
Study of concepts associated with action research; and the processes and procedures for conducting action research. Culminating project is the development of an action research project.

Credit Hours: 3
Prerequisites: 12 credit hours completed prior to enrolling
IS_LT 9419: American Library History
Students in this course will learn about the history of libraries in America, reading about and analyzing the political, cultural, and social roles of particular libraries and the library as an institution. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9420: Scholarly Communication
Exploration of the production and communication of information and knowledge in the disciplines.

Credit Hours: 3

IS_LT 9421: Usability of Information Systems and Services
Introduction to concepts and methods of usability testing and research and user-centered design strategy. Course takes a process approach to define target audiences and usability problems, create and administer investigative procedures, analyze results, and report findings effectively. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9423: Ethics, Data, and Information
Critical inquiry into perennial and emerging issues in the ethics of data and information.

Credit Hour: 1-3

IS_LT 9426: Diversity in the Information Professions
Leadership to promote employment, organizational, collection and program diversity within libraries and information agencies in the U.S. This course includes management and diversity theories, discussions of workplace climate, and discussions of discrimination and hostility issues. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9427: The Information Society
This class critically examines the control, dissemination, and effects of information on the modern world. We will study the complex relationship between information and society, looking at how each is a reflection and shaper of the other. The relationship of libraries and other information agencies to the state, and the role of information professionals in the political and cultural spheres are central themes in the course. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9428: History of Books and Media
Examines the history and philosophy of books and media from the beginnings of writing to the Internet, emphasizing the effects of changes in communication and information technologies. The focus is on the social, cultural, intellectual, scientific, and religious impacts of shifts in the media for preserving and transmitting information. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9429: Metadata
The contacts in your phone, the embedded GPS information in the photo you took on vacation, and the information that allows you to track down an article in a database are all metadata. Today more than ever, metadata is at the heart of what information professionals do as we organize, teach about, search for, and analyze information. This class explores a variety of kinds of metadata, and the tools and systems for working with it, from the point of view of the information professional. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: IS_LT 7302 or IS_LT 7312

IS_LT 9431: Children’s Library Materials
Evaluation and selection of materials for children birth-age 13 (Grade 6). Early literacy, emergent readers, reader response theory; social, cultural contexts of readers and reading, trends in publishing.

Credit Hours: 3

IS_LT 9433: Youth Services in Libraries
Examines physical, mental, and emotional development of youth birth through high school. Emphasis on community analysis, outreach services, program design and techniques. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9434: Teen Library Materials
Evaluation, selection of print, alternate formats for teens, 13-18 (Grades 7-12). Personal, social, popular culture contexts of teen readers and texts; emphasizes reader response; challenges common assumptions about teens and reading.

Credit Hours: 3

IS_LT 9435: Adult Services in Libraries
Library services to adults, including special populations. Emphasis on information needs of adults, organization and management of adult services.

Credit Hours: 3

IS_LT 9437: Reader Advisory Services
Examination of value and role of leisure reading and leisure reading materials. Coverage of reader advisory techniques, support processes, and resources for providing reader advisory services to various audiences. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9438: Marketing and Libraries
This course provides an introduction to marketing - concepts, planning, strategies and evaluation - as related to libraries and information agencies. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9439: Digital Humanities and Information
This course on history, philosophy, and methods in the emerging field of ‘digital humanities’ focuses on topics at the nexus of information, the humanities disciplines, technology, and culture, as well as the contexts...
of the academy, libraries/archives, museums, and media. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9440: Learning with Web-based Technologies
Explores the potential of the Internet to support inquiry-based learning through collaborative activities, research, and authoring/publishing. Investigates goals and methods of online learning. Examines learning theories and models of teaching/learning in relation to selected Internet activities for K-12, undergraduate students and learners in other fields outside education (e.g., work placed learning, non-formal learning).

Credit Hours: 3

IS_LT 9443: The Academic Library
Development, objectives, organization and structure, nature of the collections and responsibility for their development, philosophy of library services, measurement and standards of library effectiveness.

Credit Hours: 3

IS_LT 9444: The Public Library
An overview of public library history, missions, and societal roles. Includes public library funding, organization, and management.

Credit Hours: 3

IS_LT 9445: Special Libraries and Information Centers
Goals of special librarianship including information provision, management styles. Library functions as performed in special libraries. Contributions of special libraries, such as information analysis centers, information brokering, and accountability for and evaluation of services.

Credit Hours: 3

IS_LT 9446: International and Comparative Librarianship
International libraries, intercultural information concerns, how information agencies differ between nations and global information issues. Course presents various countries, their information infrastructures and the influence of information and communication technologies.

Credit Hours: 3

IS_LT 9447: Human Centered Design
Provides an overview of iterative design and project management methodologies that develop solutions to interactive systems and tools. Students will learn how to implement rapid prototyping and evaluation techniques by focusing on the user and task needs, along with human factors. The methods and techniques in this course will enhance understanding of task performance, user satisfaction, and design research. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9448: International Libraries in Context
Study Abroad course. Visit and study international libraries and related institutions. Covers the political, cultural, social, and economic context in which they operate.

Credit Hours: 3

IS_LT 9449: Services for Business Communities and Entrepreneurs
The course covers the introduction to and application of basic concepts of business information in academic, public and special library environments, and the information searching techniques used for specific business information needs (finding company information, industry information, investment information, statistical information, marketing information, etc.) Course includes service to entrepreneurs. Content covers company, investment, industry, statistical and marketing information and includes use of GIS systems.

Credit Hours: 3

IS_LT 9450: Research Methods in Information Science and Learning Technologies
Research methods and ethics of research in the social sciences, focusing on the information professions and learning technologies.

Credit Hours: 3

IS_LT 9452: Information Literacy and Instruction
This course is designed to prepare Library Science students/Information professionals for the variety of teaching situations they will encounter in library and information agency settings. Students will consider learning theory applicable to library instruction, learning styles, teaching methods, and appropriate evaluation of library instruction. Students will also learn strategies for incorporating library instruction into the institutional curriculum. Graded on A-F basis only.

Credit Hours: 3

IS_LT 9453: Planning and Evaluation of Information Services
The course focuses on the complexity of the planning process in libraries and other information agencies, including the influence of external environments (upper administrations, user communities, information producers) on planning. Internal elements of the organization (staffing, services, finances) are discussed, as are external elements (requirements of a parent organization, legal constraints, etc.). The role of evaluation of personnel, budgets, facilities, access to information, and services is integrated into the process of providing service.

Credit Hours: 3

IS_LT 9454: Copyright in Libraries
An introductory and practical course covering the foundations of copyright, fair use, e-reserves, related laws including DMCA and TEACH and managing copyright in the public and school environments.

Credit Hours: 3

IS_LT 9455: Formative and Summative Evaluation
Study of the process of gathering data and making judgments about the effectiveness of instructional programs that uses technology. Covers techniques of a formative evaluation process to revise instruction. Culminating project is planning and conducting a portion of a summative evaluation of instructional program.

Credit Hours: 3

IS_LT 9456: Designing Computer Support for Collaborative Learning
Students will examine the theoretical bases for using collaboration and social interaction as methods for learning, and learn key methods and
approaches for designing computer supported collaborative learning.
Graded A-F only.
Credit Hours: 3

**IS_LT 9457: Designing Computer Support for Cooperative Work**
Study of the tools and methods of groupware and communities of practice, including their psychological, social and organizational effects. Students focus on designing and developing improved tools and methods. Graded on A-F basis only.
Credit Hours: 3

**IS_LT 9458: Technology and Assessment**
Learn how to assess specific types of knowledge, using technology to enhance the process. Topics include use of tools/strategies for data collection to guide instructional decision-making and investigating technologies to improve assessment of student learning. Emphasis on aligning learning objectives, activities, and assessments and developing performance assessments to measure higher-order thinking. Graded on A-F basis only.
Credit Hours: 3

**IS_LT 9460: Human Computer Interaction Research and Analysis**
Human Computer Interaction (HCI) is a discipline concerned with the design, evaluation, and implementation of interactive computing systems for human use and with the study of major phenomena surrounding these systems. This course provides an overview of the interdisciplinary HCI field while focusing on the theories and research. Students will apply principles and research methods to a range of interface design problems that impact learning, information retrieval, and performance tools. Graded on A-F basis only.
Credit Hours: 3

**IS_LT 9461: Interaction Design**
Students will learn the basic concepts of interaction design, then focus on usability engineering and prototyping principles to support the design process for learning and performance based technologies.
Credit Hours: 3

**IS_LT 9466: Learning Analytics**
Learning Analytics (LAK) addresses the questions of how people learn together and how computers can participate with and augment that learning. LAK researchers address the socio-technical aspects of how technology mediates learning practices. Graded on A-F basis only.
Credit Hours: 3

**IS_LT 9471: Instructional Systems Design**
Develop knowledge and skills related to the systematic design of instruction. Learn to analyze, design, develop, implement, and evaluate learning systems and instruction. Identify appropriate technologies to support learning and explore alternative models of instructional design.
Credit Hours: 3

**IS_LT 9473: Project Management**
This course introduces the learner to the necessary and practical project management concepts and skills that lead to reductions in project cycle time while maintaining control over budget, resources, risk, and delivered value. This course proposes to integrate practical project management skills within the project management lifecycle (i.e., initiating, planning, executing, controlling, and closing).
Credit Hours: 3

**IS_LT 9474: Front End Analysis of Systems**
Develop skills for systematically analyzing learning, or other types of systems, that need to be improved. Develop data collection instruments (e.g. surveys, observation protocols, interviews); analyze secondary data; analyze tasks or activities in the system, and interpret data to make recommendations for system improvement. Skills will be learned by doing and applying to real systems that need improvement.
Credit Hours: 3

**IS_LT 9475: Diffusion of Educational Innovations**
In-depth analysis of innovation development and adoption processes in educational organizations, including schools, universities, and training centers.
Credit Hours: 3

**IS_LT 9480: Internship in Information Science and Learning Technologies**
Provides internship experience under supervision in advanced levels of practical experience in Information Science and Learning Technology Research and Teaching. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: School director's consent
IS_LT 9483: Capstone: Online Education Emphasis Area
Culminating course for Online Education emphasis area in Information Science and Learning Technologies graduate degree. Design/develop/evaluate an online course or rework existing course. Analyze evaluation data from two external reviewers (novice/expert). Write paper describing results and modifications. To be taken during last semester of student’s program. Graded on S/U basis only.
Credit Hour: 1

IS_LT 9484: Teaching Online Courses
Learn to be an effective online instructor! Examine issues in teaching and learning online; instructor and student roles; instructional strategies for supporting diverse learners; methods of student assessment; online communication; classroom management; characteristics of online learning management systems. Projects put you in the role of instructor to practice what you learn.
Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors

IS_LT 9485: Designing Online Learning
Online learning is everywhere! This online course will teach you how to leverage existing software tools to design and develop online learning activities in multiple domains that are grounded in sound learning principles. Course will focus on developing online learning for meaningful learning outcomes such as problem solving, building communities, and developing collaboration skills.
Credit Hours: 3
Prerequisites: Instructor consent

IS_LT 9490: Archival Practice
Students address evidence, memory, and power dynamics while defining the archival profession, principles, and core archival knowledge guiding professional practice. Explore the archival profession through original research centered on the social responsibilities of archivists. Graded on A-F basis only.
Credit Hours: 3

IS_LT 9491: Appraisal and Archival Systems
Students discuss appraisal theory, documentation strategies, and microappraisal applications. Learn strategies for collection preservation and access using ArchivesSpace, and relate the records continuum and lifecycle theories to the archival mission. Graded on A-F basis only.
Credit Hours: 3

IS_LT 9492: Data and Records Management
Examine societal recordkeeping and professional work to identify, manage, preserve, and provide multimedia records access for evidential, legal, leisure, and informational purposes. Study trust and transparency in records, and apply archival ethics through project-based learning. Graded on A-F basis only.
Credit Hours: 3

Information Technology (INFOTC)

INFOTC 1000: Introduction to Information Technology
This course introduces the field of Information Technology including foundation experiences and knowledge, the history of digital technologies, emphasis areas in the program, career opportunities, and ethical/social issues. Students participate in activities that introduce students to digital media, digital systems, and software engineering. Students learn to use distributed version control systems and how to work on collaborative teams.
Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors

INFOTC 1001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department.
Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors during early registration

INFOTC 1040: Introduction to Problem Solving and Programming
An introduction to problem solving methods and programming concepts, providing experience in designing, developing, implementing, and testing programs. Cannot be taken for credit after CMP_SC 1050.
Credit Hours: 3

INFOTC 1610: Introduction to Digital Media Design
This project-based course is an introduction to the concepts and practices of audio design, graphic design, motion media design and basic video editing. Current technologies are employed to examine design fundamentals and applications of media design that apply to audio and video production and new media production.
Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors during early registration

INFOTC 2001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors during early registration

INFOTC 2040: Programming Languages and Paradigms
This course presents programming principles and their syntactical representation and implementation across languages including those that are compiled and interpreted. The course shows how to implement algorithms and data structures to solve problems while utilizing paradigms offered by the programming languages such as procedural, object-oriented, protocol-oriented, functional, and declarative. Language support for strong and weak typing and type safety are covered along with support for optional values. Provides experience in developing algorithms and determining their efficiency, designing application architecture, and developing applications. Building and using libraries/application programming interfaces is covered. Git and GitHub are used for code versioning and collaboration. Integrated development environments (IDEs) are used for managing, building, debugging, and testing applications.
INFOTC 2600: Digital Systems
This course provides a foundation of knowledge of digital systems including terminology, concepts, architecture, processes, tools, hardware and software.

Credit Hours: 3
Prerequisites: INFOTC 1040 or CMP_SC 1050, or prior experience with programming and consent of instructor

INFOTC 2610: Media Technology and Design I
This project-based course examines the fundamentals of media technology, from capture devices to the software and hardware that processes data. Through hands-on experience with capturing technology, audio recording devices, and the software and hardware components needed to manipulate the recordings, students will process big-data files to create meaningful manipulations in assembly, engineering, and colorization. Students will utilize a spectrum of camera equipment, recording devices and facilities to achieve an understanding of audio/video capture, project planning and implementation, hardware assessment, optimization practices through hardware acceleration, and video processing. This course also focuses on basic editing theory and industry trends. This is done through in-class demonstrations, online modules, and supplementary material hosted online.

Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors only during early registration

INFOTC 2620: Computer Modeling and Animation I
Introduction to the field of computer modeling and animation with an emphasis on tools. Learn programming methods for developing customized modeling and animation algorithms. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors during early registration

INFOTC 2630: Web Application Development I
(same as CMP_SC 2830). This course will attempt to provide a comprehensive understanding of the evolution, the technologies, and the tools of the Internet. In particular, issues pertaining to the World Wide Web and Multimedia (HTML, CGI, Web based applications) will be discussed in detail.

Credit Hours: 3
Prerequisites: CMP_SC 2050 with a C- or higher

INFOTC 2910: Cyber Security
This course covers numerous platform-independent security topics including threats, problem ports and services, theory and practice of defense in security, intrusion detection, data security, securing remote access, user education and support, designing a secure network and security management. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 1050, INFOTC 2810. May be restricted to Information Technology majors

INFOTC 3001: Topics in Information Technology
Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: May be restricted to Information Technology majors during early registration

INFOTC 3600: User Experience Design I
This course is a first in a series that focuses on User Experience (UX) Design for software applications. This course introduces the beginner to processes, techniques and methods of evaluation to design, model and evaluate application designs and user interfaces.

Credit Hours: 3

INFOTC 3610: Media Technology and Design II
This project-based course builds upon the fundamentals of production and media processing learned in INFOTC_2610 and introduces industry standard advanced video and audio capture technology, software, and data management systems. The course is designed to provide further hands-on experience with digital video capturing technology, non-linear editing software, Digital Audio Workstations, and broadcast technology through three large-scale collaborative media projects. These projects build upon the principles of data management and software, while introducing project management, team management, and direct-to-market media strategies. Students will utilize a spectrum of industry standard camera equipment, recording devices and facilities to achieve a fuller understanding of audio/video capture and post production.

Credit Hours: 3

INFOTC 3620: Computer Modeling and Animation II
This course covers advanced methods for modeling and animation with an emphasis on computer science theory and virtual reality. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in INFOTC 2610. May be restricted to Information Technology majors during early registration

INFOTC 3630: Introduction to Virtual Reality
The course will provide students with a good understanding of the fundamentals of virtual reality and practical hands on VR experience development skills. It will introduce students to the software, hardware, and concepts involved with the current state of the art in virtual reality.
This course will focus on using the recent consumer-grade equipment to design and construct virtual environments and experiences.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 1050 with C- or higher. May be restricted to Information Technology majors during early registration

**INFO TC 3640: Motion Graphics and Visual Effects Design I**

This advanced media creation course is an introduction to the fundamentals of motion graphic design, 2-D animation, and visual effects creation. It is a project based course that requires understanding of NLEs, experience in media creation and design, understanding of basic audio/video compression, and understanding of basic media design and concepts. Computer programs designed for graphic design, motion graphics, 2-D animation, and visual effects are integrated throughout the course. Starting media will be provided for each project.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in INFOTC 1610. May be restricted to Information Technology majors during early registration

**INFO TC 3650: Project and Team Management**

This course focuses on the developmental tools, communication skills, and management techniques required to successfully lead personnel, meet deadlines, and create digital media projects in today’s video production industry. From budgeting to crew management, leaders in the industry are required to be knowledgeable in all areas of a project’s details. Explores the wide range of topics in the digital media industry. Additional areas of study include time management, legal complications, project conceptualization, fund raising techniques, sales tactics, marketing, and contingencies. Students will participate in pod-based learning to successfully manage simulated projects and meet deadlines that mirror the industry’s rigor.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in INFOTC 1610. May be restricted to Information Technology majors during early registration

**INFO TC 3650W: Project and Team Management - Writing Intensive**

This course focuses on the developmental tools, communication skills, and management techniques required to successfully lead personnel, meet deadlines, and create digital media projects in today’s video production industry. From budgeting to crew management, leaders in the industry are required to be knowledgeable in all areas of a project’s details. Explores the wide range of topics in the digital media industry. Additional areas of study include time management, legal complications, project conceptualization, fund raising techniques, sales tactics, marketing, and contingencies. Students will participate in pod-based learning to successfully manage simulated projects and meet deadlines that mirror the industry’s rigor.

**Credit Hours:** 3  
**Prerequisites:** C- or higher in INFOTC 1610. May be restricted to Information Technology majors during early registration

**INFO TC 3660: Audio Engineering and Design**

This course is an intensive study of the techniques and art behind the use of audio in today’s media design environments. From the theater to television, from tablet and mobile device to computer, this course will focus on the four major sound design areas: sound in cinema, sound creation, sound manipulation, and environmental sound layering. Each area focuses both on theory and practice, utilizing provided technology and studio resources, giving the student both an academic and vocational approach to sound engineering for media design. Students will become proficient in some of today’s most standardized audio engineering platforms and software, and will study how sound manipulation can impact the viewer.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050, junior standing. May be restricted to Information Technology majors during early registration

**INFO TC 3850: Computer System Administration**

This course will cover network management tools, network maintenance, data management, remote access management, management tasks, responsibilities and ethics, required plans and policies, design of a well-managed network. Some work will be done in both Windows and Linux environments. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 2050, junior standing. May be restricted to Information Technology majors during early registration

**INFO TC 3940: Internship in Information Technology**

Information Technology-related experience in business or industry jointly supervised by faculty and IT professionals. Students should apply one semester in advance for consent of the supervising professor. Graded on an S/U basis only.

**Credit Hour:** 1-6  
**Prerequisites:** Instructor Consent

**INFO TC 4001: Topics in Information Technology**

Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** May be restricted to Information Technology majors during early registration

**INFO TC 4001W: Topics in Information Technology - Writing Intensive**

Topics may vary from semester to semester. May be repeated upon consent of department. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** May be restricted to Information Technology majors during early registration

**INFO TC 4085: Independent Projects**

A student interested in doing an independent study project should first choose an area and instructor to work with. The student and instructor decide on a suitable Information Technology topic. The student writes up a detailed description of the project, including references, deadlines and deliverables. The instructor and student decide on details for completing the project during the semester for a grade.

**Credit Hour:** 1-6  
**Prerequisites:** Consent of instructor
INFOTC 4320: Software Engineering
Software Engineering covers the principles, processes, and professional practices used to design, develop, test, deploy, and manage software systems in a team-based, collaborative environment. A range of software engineering methodologies are covered with an emphasis on agile software development using incremental methods of managing the development activities.

Credit Hours: 3
Prerequisites: INFOTC 2040 or CMP_SC 2050 or permission of the instructor

INFOTC 4400: C#/ .NET Development
Learn how to develop and debug multi-threaded Windows desktop applications based on the object-oriented (OO), Model-View-Controller (MVC), and Model View ViewModel (MVVM) paradigms using C#, .NET, Windows Presentation Foundations (WPF), and Visual Studio. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 2050. May be restricted to Information Technology majors during early registration

INFOTC 4405: iOS App Development I
This course focuses on developing iOS applications using Xcode and the Swift programming language on the macOS platform. The following topics are covered: Xcode integrated development (IDE), Interface Builder to design and create user interfaces, autolayout constraints for implementation of interface designs, how to program using Swift, programming using object-oriented, functional, and protocol-oriented paradigms, use of Apple iOS APIs, debug iOS applications in Xcode, test iOS apps in simulator and hardware devices, and use git for managing projects and code versioning. Must own/have access to a computer running macOS to take this course and install Xcode on the computer.

Credit Hours: 3
Prerequisites: INFOTC 1040 or CMP_SC 1050, or prior experience with programming and consent of instructor
Recommended: Prior experience programming in any programming language. The student should understand basic language concepts such as variables, data structures, control structures, and functions

INFOTC 4410: Android App Development I
This is the first in a series of courses on developing Android applications using Android Studio and the Java and Kotlin programming languages.

Credit Hours: 3
Prerequisites: INFOTC 1040 or CMP_SC 1050, or prior experience with programming and consent of instructor

INFOTC 4420: Android App Development II
This is the second course in a series on developing Android applications using Android Studio and the Java and Kotlin programming languages. This course covers intermediate-level topics in application design, more complex UI implementations, and data persistence.

Credit Hours: 3
Prerequisites: INFOTC 4410 or permission of the instructor

INFOTC 4425: iOS App Development II
This is the second in a series of courses on developing iOS applications using Xcode and Swift programming language on the macOS platform. This course covers intermediate-level topics in application design, more complex UI implementations, and data persistence.

Credit Hours: 3
Prerequisites: INFOTC 4405 or INFOTC 4500 or permission of the instructor

INFOTC 4440: Android App Development III
This course covers advanced topics in application architecture, using Android Studio and the Java and Kotlin programming languages. This course covers advanced topics in application architecture, application design, data persistence, and client-server architecture.

Credit Hours: 3
Prerequisites: INFOTC 4420 or permission of the instructor

INFOTC 4445: iOS App Development III
This is the third in a series of courses on developing iOS applications using Xcode and Swift programming language on the macOS platform. This course covers advanced topics in application architecture, application design, data persistence, and client-server architecture.

Credit Hours: 3
Prerequisites: INFOTC 4425 or permission of the instructor

INFOTC 4450: Team-Based Mobile Device Application Development
This is a multi-disciplinary, team-based course on developing applications for mobile devices. Teams will be comprised of students who are software developers and students who are designers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: for Journalism majors (Designers), instructor's consent; for Computer Science or Information Technology majors (Developers), CMP_SC 2050 or permission of instructor. May be restricted to Information Technology majors during early registration

INFOTC 4500: User Experience Design II
This course is the second in a series that focuses on User Experience (UX) Design for software applications. This course further develops the processes, techniques and methods of evaluation to design, model, and evaluate application designs and user interfaces.

Credit Hours: 3
Prerequisites: INFOTC 3600

INFOTC 4610: Advanced Multimedia Design and Technology
Students in this course are immersed in upper level study of media technology, software, and trends in the industry, with focus on advanced media design, motion media capture techniques, portfolio development, and industry standard technology and software. Students will work both independently and in small focus groups to produce industry results in narrative, non-fiction, and commercial media design projects. Students will further develop proxy-based editing, cinema raw video processing, optic, and lighting techniques. Students will also complete micro research papers during the course, focusing on technology, image processing, software and other developments of the multimedia industry. This course may be taught over the summer or winter intersessions as a study abroad
INFOTC 4610W: Advanced Multimedia Design and Technology - Writing Intensive
Students in this course are immersed in upper level study of media technology, software, and trends in the industry, with focus on advanced media design, motion media capture techniques, portfolio development, and industry standard technology and software. Students will work both independently and in small focus groups to produce industry results in narrative, non-fiction, and commercial media design projects. Students will further develop proxy-based editing, cinema raw video processing, optic, and lighting techniques. Students will also complete micro research papers during the course, focusing on technology, image processing, software and other developments of the multimedia industry. This course may be taught over the summer or winter intersessions as a study abroad program. The location and course schedule are announced prior to registration, and the research fields are announced prior to departure.

Credit Hours: 3
Prerequisites: C- or higher in INFOTC 2610. May be restricted to Information Technology majors during early registration.

INFOTC 4630: Game Development
This class will focus on the theory, design, and implementation of games using the industry standard game development tools. Students will learn about the workflow for designing, creating and implementing vital components for modern games, with respect to data structures, algorithms, content, development tools and practice of game development. The final project is a fully functional, your own custom game.

Credit Hours: 3
Prerequisites: INFOTC 3630 or CMP_SC 2050 with C- or higher. May be restricted to Information Technology majors during early registration.

INFOTC 4640: Motion Graphics and Visual Effects Design II
This course builds on fundamentals of digital motion picture effects technology learned in Digital Effects I. Computer programs designed for digital visual special effects in film and broadcast are integrated throughout the course.

Credit Hours: 3
Prerequisites: C- or higher in INFOTC 3640. May be restricted to Information Technology majors during early registration.

INFOTC 4650: Shader Programming
The focus of this course is modern computer graphics algorithms and programming, with an emphasis on games, shader languages, (GLSL and Cg) and Graphical Processor Units (GPUs).

Credit Hours: 3
Prerequisites: CMP_SC 2050, INFOTC 2620. May be restricted to Information Technology majors during early registration.

INFOTC 4830: Web Application Development II
(same as CMP_SC 4830; cross-leveled with CMP_SC 7830). This course will study the science and engineering of the World Wide Web. We will study the languages, protocols, services and tools that enable the web. Emphasis will be placed on basics and technologies.

Credit Hours: 3
Prerequisites: CMP_SC 2830 with a C- or higher.

INFOTC 4970W: Senior Capstone Design - Writing Intensive
This course is an opportunity for you to demonstrate that you have achieved the goals established by the Information Technology (IT) program. You will do this through a series of writing exercises, class activities, and a team-based project. You will demonstrate your ability to synthesize various methods and skills, apply them to new, novel, complex, and integrated project requirements in real-world IT problems. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in CMP_SC 4320 and senior standing. Restricted to INFOTC majors.

INFOTC 4990: Undergraduate Research in Information Technology
A student interested in doing undergraduate research should first choose an area and professor. The student will work with the professor on a specific area of research. The professor and student decide on details for completing research during the semester for a grade.

Credit Hour: 1-6
Prerequisites: Instructor's consent.

INFOTC 4995: Undergraduate Research in Information Technology - Honors
A student interested in doing undergraduate research should first choose an area and professor. The student will work with the professor on an independent investigation to be presented as an undergraduate honors thesis.

Credit Hour: 1-6
Prerequisites: Instructor's consent.

Integrative Neuroscience (NEUROSCI)

NEUROSCI 7990: Non-Thesis Research in Neuroscience
The course is intended primarily for post-baccalaureate students who have not entered a formal graduate program but who are performing neuroscience research. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor's consent required.

NEUROSCI 8020: Advances in Neuroscience and Neuropathology
In depth review of recent advances in basic neuroscience research as well as pathological conditions affecting nervous systems at the cellular and systems level, and the methods and techniques used to study the nervous system. Graded on A-F basis only.

Credit Hour: 1-3
NEUROSCI 8187: Neuroscience Journal Club
In depth readings and presentations/discussions of neuroscience journal articles including recent advances in basic neuroscience research, pathological conditions affecting nervous systems, and neuroscience techniques. Graded on S/U basis only. May be repeated for credit.

Credit Hour: 1

NEUROSCI 8440: Integrative Neuroscience 1
(same as BIO_SC 8440). Organization, development and function of the nervous system focusing on cellular and molecular processes. Graded on A-F basis only.

Credit Hours: 3

NEUROSCI 8442: Integrative Neuroscience II
(same as BIO_SC 8442). Organization and function of the nervous system at the systems level to examine processes of behavior and cognition. Graded on A-F basis only.

Credit Hours: 3

NEUROSCI 9090: Thesis Research in Neuroscience
The course is intended primarily for graduate students who are working with mentors in departments that do not offer courses (e.g. Radiology). Graded on A-F basis only.

Credit Hour: 1-6

Prerequisites: Instructor's consent required

Grammar (Intensive English Program) (IEPG)

IEPG _0001: Grammar with Writing I
Students will learn to recognize and use basic grammatical structures. Students will use these structures to produce basic sentences and short paragraphs on topics from daily life. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPG _0002: Grammar II
Students will learn low-intermediate grammatical structures including modals, simple and progressive verb tenses, and expressions of quantity. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPG _0030: Grammar for Academic Purposes III
Students will learn intermediate grammatical structures including present perfect tense, simple gerunds and infinitives, comparatives and superlatives, and restrictive adjective clauses. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPG _0040: Grammar for Academic Purposes IV
Students will learn high-intermediate grammatical structures including past perfect tense, passive voice, noun clauses, adjective clauses, and adverb clauses. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPG _0050: Grammar for Academic Purposes V
Students will learn advanced grammatical structures including passive and perfect modals, passive gerunds and infinitives, conditionals, and reported speech. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

Listening and Speaking (Intensive English Program) (IEPL)

IEPL _0001: Listening and Speaking I
Students will develop the listening and speaking skills required to comprehend and talk about basic information and everyday situations. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPL _0002: Listening and Speaking II
Students will develop the listening and speaking skills required to comprehend and talk about simple familiar topics. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPL _0030: Listening and Speaking for Academic Purposes III
Students will develop the listening and speaking skills required to comprehend and discuss adapted academic topics. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPL _0040: Listening and Speaking for Academic Purposes IV
Students will develop the listening and speaking skills required to comprehend and discuss academic topics and adapted university lectures. Not open to native speakers of English. No college credit.

Credit Hours: 3

Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPL 0050: Listening and Speaking for Academic Purposes V
Students will develop the listening and speaking skills required to comprehend and discuss university lectures and academic interactions. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

Reading (Intensive English Program) (IEPR)

IEPR 0001: Reading I
Students will develop the reading skills and vocabulary required to comprehend short, simple texts on general interest topics. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPR 0002: Reading II
Students will develop the reading skills and vocabulary required to comprehend short, predictable texts on general interest topics. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPR 0030: Reading for Academic Purposes III
Students will develop the reading skills and vocabulary required to comprehend pre-academic and adapted academic texts. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPR 0040: Reading for Academic Purposes IV
Students will develop the reading skills and vocabulary required to comprehend adapted university-level texts. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

IEPR 0050: Reading for Academic Purposes V
Students will develop the reading skills and vocabulary required to comprehend and analyze university-level texts. Not open to native speakers of English. No college credit. Prerequisites:
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required; concurrent enrollment in IEPW 0050 Writing for Academic Purposes required

Special Topics (Intensive English Program) (IEPS)

IEPS 0001: Level I Guided Reading and Vocabulary
Students will increase reading fluency and vocabulary in beginning-level texts while developing independence and an appreciation of reading. Not open to native speakers of English. No college credit.
Credit Hours: 3
Prerequisites: must be admitted to the IEP program and placed into the course by the IEP; consent of department required

Interdisciplinary Studies (INTDSC)

INTDSC 1001: Proseminar in Interdisciplinary Studies
Lecture/discussion survey of time-management, note taking techniques, in the context of the three courses that are part of a Freshman Interest Group. Regular use of library, electronic mail and computing facilities is stressed. Elective credit only; students cannot receive credit for INTDSC 1001 and INTDSC 1003 or INTDSC 1150. Graded on S/U basis only.
Credit Hour: 1

INTDSC 1020: University Freshmen Seminar
(same as SSC 1020). To maximize student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by collegiate life. Attainment of an appropriate balance between personal freedom and social responsibility underlies all seminar activities. No credit for students who have earned credit for AFNR 1115, INTDSC 1001,IS_LT 1110, ED_LPA 3100 or an equivalent first year orientation course at another institution. Credit restrictions that apply to orientation classes apply to this course. Students are not allowed to be enrolled in SSC 1020 and SSC 1150 in the same semester.
Credit Hour: 1
Prerequisites: Restricted to freshman only

INTDSC 1940: Internship
Limited to freshmen/sophomores who are "undecided" or otherwise not accepted into a major. Graded on S/U basis only.
Credit Hour: 0-1

INTDSC 2001: Proseminar in Interdisciplinary Studies
Lecture/discussion survey of a range of issues of special importance for transfer students new to the University. Elective credit only; no credit for INTDSC 1001 and/or SSC 1150. Graded on A-F basis only.
Credit Hour: 1

INTDSC 2942: Internship and Career Exploration in Arts and Science
This course is designed to develop skills required to successfully apply for, and be successful in, internships and employment.
Credit Hour: 1
INTDSC 4940: Internship in Interdisciplinary Studies
Internship limited to students pursuing the BA in Interdisciplinary Studies degree. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: departmental Consent Required

INTDSC 4942: Arts and Science Internship
Internship limited to students in the College of Arts and Science.
Credit Hour: 1-6
Prerequisites: Consent of instructor required

INTDSC 4946: Readings in Interdisciplinary Studies
Independent readings with supervisory faculty member. Open only to Interdisciplinary Studies majors. May be repeated up to a maximum of 6 hours.
Credit Hour: 1-6

INTDSC 4970: Service Learning Project.
Independent readings with supervisory faculty member; Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service. Graded on A-F basis only.
Credit Hour: 3-6
Prerequisites: restricted to Interdisciplinary, General Studies and International Studies students

INTDSC 4970W: Service Learning Project - Writing Intensive
Independent readings with supervisory faculty member; Students will engage in service activities, directly relevant to their areas of academic emphasis, in community not-for-profit agencies. At the same time as participants work in the community, they will research their agency and organization, undergo mock employment interviews, create a cover letter and resume based on the professional skills they have gained through their service, and reflect on careers and leadership in public service. Graded on A-F basis only.
Credit Hour: 3-6
Prerequisites: restricted to Interdisciplinary, General Studies and International Studies students

INTDSC 4971: Capstone Internship in Interdisciplinary Studies
Internship experience which serves as the student's capstone experience. Program advisor must approve internships. Section 2 of this course will be designated for Service Learning Capstone experience. Graded on S/U basis only.
Credit Hour: 1-6

IN_MED 6002: Medicine Clerkship
Students spend eight weeks on the medicine inpatient service at University Hospital and Harry S. Truman Veterans Hospital where they learn to care for adult patients with acute and chronic illnesses. Teaching emphasizes the principles of differential diagnosis and problem solving as well as the integration of basic science information into the art of patient care. Students also gain clinical experience in medical interviewing and physical examination.
Credit Hours: 8

IN_MED 6012: Rural Medicine Clerkship
Rural Medicine Clerkship
Credit Hours: 8

IN_MED 6022: Springfield Medicine Clerkship
Students learn to care for adult patients with acute and chronic illnesses. Teaching emphasizes the principles of differential diagnosis and problem solving as well as the integration of basic science information into the art of patient care. Students also gain clinical experience in medical interviewing and physical examination.
Credit Hours: 8
Prerequisites: successful completion of the first two years of medical school

IN_MED 6052: Springfield Medical Consultation
The student will work with the Medical Consultation attending faculty. The student will be expected to participate in an interdisciplinary manner with the Rehabilitation physicians as well as the therapy services and other ancillary services caring for the patients. Internists and medical subspecialists frequently encounter patients with critical conditions that require unique skills. During this rotation medicine students will: 1. Provide assessment, management and follow-up of the medical illnesses of patients in a Rehabilitation facility under the supervision of the medical consult attending. 2. Be intimately involved in this multidisciplinary approach to patient care. 3. Work collaborative with rehabilitation attending physicians, nurses, pharmacists, therapists and other ancillary support staff.
Credit Hours: 5
Prerequisites: Successful completion of the Medicine Clerkship and M-4 Status. M3 students can be considered on an individual basis. Springfield faculty approval needed before registration

IN_MED 6102: Remediation Medicine Clerkship
Enrolled students are those who received an unsatisfactory grade in a Medicine Clerkship at any Mizzou Med location or site. This course allows them the opportunity to rectify a deficiency.
Credit Hours: 8
Prerequisites: IN_MED 6002 Medicine Clerkship, received unsatisfactory grade

IN_MED 6263: ABS Internal Medicine Research
ABS Internal Medicine Research
Credit Hour: 5-10
IN_MED 6265: ABS IN MED RSCH/REVIEW
ABS in Medicine Research Review
Credit Hours: 5

IN_MED 6500: Cardiology Consultation Service
On the inpatient cardiology consultation block, the senior student gains experience in cardiology consultation at either the University Hospital or the Harry S Truman VA Hospital. Through active participation in the consult service the student is provided the opportunity to acquire knowledge of cardiovascular anatomy, physiology, cardiovascular pharmacology, prevention of cardiovascular disease, risk factors for cardiac disease, lipid disorders, chronic coronary artery disease management and its complications, cardiac arrhythmias and conduction abnormalities, hypertension, valvular heart disease, cardiomyopathy, pericardial disease, pulmonary heart disease, peripheral vascular disease, cerebral vascular disease, adult congenital heart disease, and pre- and post-operative assessment of patients with or without cardiac problems. Students will be evaluated using the standard department student elective evaluation form submitted to the Internal Medicine Education Office. Each faculty working with the student will have the opportunity to contribute to the final grade. The final evaluation will be based on student performance on the cardiology consultation service and active participation in the cardiology conferences. Students’ skills in performing a history and physical exam, the quality of their presentation, the quality of their knowledge base, the quality of their interactions will constitute the basis of grade assignment.

Credit Hours: 5

IN_MED 6507: Endocrinology/Metabolism
The Endocrinology rotation is designed to enable the student to deal with clinical problems in Diabetes endocrinology and metabolism with particular emphasis on the more common problems in an ambulatory setting. During the rotation the student will have the opportunity to see patients with a wide range of endocrine disorders. These patients will be used as the focus for teaching with the emphasis placed on differential diagnosis, pathophysiology, management, and how the disorder affects the patient as a whole. By the end of the rotation the student should be able to evaluate and manage (with supervision) patients with: 1. Diabetes Mellitus 2. Hypoglycemia 3. Thyroid disorders including goiters, thyroid nodules, hyperthyroidism and hypothyroidism 4. Adrenal disorders including adrenal incidentalomas, Cushing and Hyperaldosteronism 5. Pituitary problems including hypopituitarism, conditions due to pituitary hormone excess that including Cushing’s disease, acromegaly and prolactinoma. 6. Calcium abnormalities including hyperparathyroidism, hypoparathyroidism, hypercalcemia, hypocalcaemia and osteoporosis. 7. Polycystic ovarian syndrome. Evaluations: The course grade will be based on students’ skill in performing a history and physical exam, the quality of the presentation, the quality of their knowledge base and the quality of their interactions.

Credit Hours: 5

IN_MED 6508: General Internal Medicine Outpatient
General Internal Medicine Outpatient
Credit Hours: 5

IN_MED 6513: Infectious Diseases
The goals of the Infectious Diseases elective will be to: 1. Teach the student how to be an effective consultant. 2. Assist the student in his/her knowledge of disease processes. 3. Help the student improve his/her history taking and physical examination skills. 4. Enhance the student's knowledge regarding the use of antimicrobial agents. 5. Improve the student's understanding of the diagnosis and management of commonly-encountered infectious diseases with attention to the use of the history and readily available laboratory tests.

Credit Hours: 5

IN_MED 6515: Problems in Medical Ethics
Problems in Medical Ethics
Credit Hours: 5

IN_MED 6800: Coronary Care Unit
During the Coronary Intensive Care Unit rotation, the medical student is provided the opportunity to acquire knowledge in the evaluation and management of acute and chronic coronary artery disease, life threatening cardiac arrhythmia’s, acute severe congestive heart failure, acute valvular disease, acute infective endocarditis, hypertensive emergencies, cardiac tamponade, aortic dissection, aortic pulmonary embolism, life threatening complications of cardiac therapy, hypotension, and shock. The Coronary Intensive Care rotation allows the student to evaluate and treat these patients in close conjunction with medical residents, cardiology fellows and cardiology faculty. Students will be evaluated using the standard Department student elective evaluation form submitted to the Internal Medicine Education Office. Each faculty working with the student will have the opportunity to contribute to the final grade. The final evaluation will be based on student performance on the cardiology consultation service and active participation in the cardiology conferences. Students’ skills in performing a history and physical exam, the quality of their presentation, the quality of their interactions will constitute the basis of grade assignment.

Credit Hours: 5

IN_MED 6801: Diabetes Mellitus Externship
Diabetes Mellitus Externship
Credit Hours: 5

IN_MED 6802: Gastroenterology
Medical students will be assigned to the inpatient GI consultation service, where they will see and evaluate patients, read about their problems, and present them to the GI fellow and/or teaching attending. They should attend all endoscopic procedures on the patients they follow on the inpatient service. They should also attend a sampling of outpatient procedures each week in the Endoscopy Center. As time permits, they may be assigned to one or more GI clinics during the rotation as well. Medical students will be expected to attend all GI conferences during the rotation. Students are also encouraged to attend Internal Medicine Grand Rounds and Internal Medicine Morning Report. They may also be assigned to give one formal presentation during their rotation. It is recommended that they read the entire GI-Liver section of the Internal Medicine textbook that they used on their third-year Internal Medicine Clerkship. Ongoing feedback is provided to the student during the rotation. At the end of the rotation, a formal written evaluation will be prepared by the inpatient attending, in conjunction with the GI fellow with
whom the resident/medical student worked with. Conference participation is factored in.

Credit Hours: 5

IN_MED 6803: Subinternship in Internal Medicine
The internal medicine subinternship builds on the skills begun during the internal medicine clerkship and prepares the student for the internship year. 1. Students will refine and further develop skills in: a. Physical exam, history taking, chart review, and written notes; b. Problem list development and management plan; data interpretation and synthesis; c. Oral presentation; d. Interpersonal relations with patients, families, staff and peers ; e. Time management 1. Self-directed learning ii. Evidence-based medicine 2. Expand knowledge base in general internal medicine 3. Assume primary responsibility for inpatient care 4. Further develop in the role of primary care giver Patient management skills, medical record keeping, presentation skills, knowledge base, and ability to handle responsibility will be carefully observed by both the senior ward resident and the attending physician. Students will receive constructive feedback/suggestions for improvement throughout the rotation from both the attending and the senior ward resident. The attending, with input from the senior ward resident and the third year students, will report the final scores using the Department of Internal Medicine standard electives evaluation form. Students will meet with the attending physician at the end of the block to discuss their performance. Students will not receive elective credit for three weeks rotations.

Credit Hours: 5

IN_MED 6805: Hematology and Medical Oncology Chronic Care
The specific objective of the course is to assist the student in developing a greater understanding for the care of chronically ill patients with hematologic and neoplastic diseases. The student's evaluation is based predominantly on his/her performance in presentation and in written chart notes of patients under the student's care. This evaluation will be by the attending physician with whom the student has worked. The standard department student elective evaluation form will be used to document student performance.

Credit Hours: 5

IN_MED 6806: Immunology/Rheumatology
The overall curricular objectives of this elective include: 1. Basic Information. The student should be able to: a. Perform a medical history and screening physical examination with attention to symptoms and signs of rheumatic disease. Understand the basic pathophysiology and clinical diagnosis of common arthritic and musculoskeletal diseases in adults. b. Understand the natural history of rheumatic diseases, particularly rheumatoid arthritis, soft tissue rheumatism, degenerative joint disease, systemic lupus erythematosus and spondyloarthopathies. c. Understand the short and long term management of rheumatic conditions and apply these principles together with overall clinical judgment in the management of individual patients. These therapeutic measures include: 1. drug therapy, 2. physical rehabilitative measures, and 3. surgical intervention. d. Learn the uses and pitfalls of laboratory tests in practice. e. Formulate ways to approach the emotional problems of patients with chronic disease. f. Understand the value of the comprehensive approach in arthritis treatment including patient education, the role of the allied health professional and community resources.

Credit Hours: 5
IN_MED 6902: SCC Cardiac Electrophysiology Two Week
The student will work as part of a team providing hands-on clinical services in both the inpatient and outpatient settings in a consultative manner. Students will learn using a variety of evidence-based resources, didactic teaching, demonstration, and observation. This is intended as an introductory experience in the specialty of Cardiac Electrophysiology.
Credit Hours: 2
Prerequisites: Completion of the first two years of medical school

IN_MED 6904: SCC Hematology/Oncology Two Week
This is intended as an introductory experience in the specialty of Hematology/Oncology. Students will learn how to integrate previously acquired knowledge and concepts as well as develop a greater understanding for the care of patients with hematologic and neoplastic disease. The student will work as part of a team providing hands-on clinical services in an inpatient, clinic, and consultative setting. Students will learn using a variety of evidence-based resources, didactic teaching, demonstration and observation.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

IN_MED 6911: Cardiology Procedure Service
The Cardiology Procedure Service is designed to allow students to participate in the cardiology procedures involved in the diagnosis and care of hospitalized patients with an acute cardiac problem as well as continuity follow up of existing known disease processes. Sterile technique will be taught by the attending and students will demonstrate competence with sterile technique.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

IN_MED 6914: Pulmonary Medicine Procedure Service
The Pulmonary Medicine Procedure Service is designed to allow students to participate in the pulmonary procedures involved in the diagnosis and care of hospitalized patients with an acute pulmonary problem as well as continuity follow up of existing known disease processes. Sterile technique will be taught by the attending and students will demonstrate competence with sterile technique.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

International Studies (INTL_S)

INTL_S 4290: Pre-Departure Seminar for the TaLK Program
Prior to beginning the TaLK Program in Korea, students will explore Korean language, culture and educational system through seminars and workshops provided by the Asian Affairs Staff and guest speakers. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

INTL_S 4940: Internship in International Studies
Internship limited to students pursuing the AB in International Studies degree. May be repeated to a maximum of six hours. Graded on S/U basis only.
Credit Hour: 1-6

INTL_S 4960: Readings in International Studies
Independent readings with supervisory faculty member. Open only to International Studies majors. May be repeated up to a maximum of 6 hours.
Credit Hour: 1-6

Italian (ITAL)

ITAL 1100: Elementary Italian I
Intensive approach to beginning language. Designed to give students an overview of the grammar and syntax of Italian. Emphasis is on oral, with some reading and writing. The 5-hour option is open ONLY to Bachelor of Music students and only with override from the Department. The 5-hour option cannot be applied to meet Arts and Science or Journalism foreign language requirements.
Credit Hour: 5-6

ITAL 1200: Elementary Italian II
Continues basic grammar and syntax of Italian. Emphasis is on oral, with some reading and writing. The 5-hour option is open ONLY to Bachelor of Music students and only with override from the Department. The 5-hour option cannot be applied to meet Arts and Science or Journalism foreign language requirements.
Credit Hour: 5-6
Prerequisites: Grade in the C range or better in ITAL 1100 or its equivalent

ITAL 2001: Undergraduate Topics in Italian-General
Organized study of selected topics. Subjects and credits may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-3

ITAL 2005: Undergraduate Topics in Italian-Humanities/Fine Arts
Organized study of selected topics. Subjects and credits may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-3

ITAL 2160: Intermediate Italian
Continues development of language skills acquired in Elementary Italian. While learning new structures and new vocabulary, students also review basic grammar components. By the end of the course, students are able to understand (through reading and listening) and communicate (in writing and orally) in a variety of both formal and informal situations.
Credit Hours: 3
Prerequisites: ITAL 1200

ITAL 2310: Italian Civilization
Open to any student interested. No knowledge of Italian required.
Credit Hours: 3

ITAL 2850: Italian Cinema
(same as FILM_S 2850). A course which concentrates on the development of Italian Cinema, primarily since the Post-WWII era, and the ways in which it reflects major economic, social and political events occurring in Italy. No knowledge of Italian required.

Credit Hours: 3
Prerequisites: sophomore standing

ITAL 3005: Topics in Italian-Humanities/Fine Arts
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition. No knowledge of Italian required.

Credit Hour: 1-3

ITAL 3150: Post-Intermediate Italian
Gives emphasis on acquiring communicative multi-skills competence necessary to understand and discuss a variety of written and aural texts, from newspaper articles to brief literature excerpts. It offers students opportunity to review grammar components as well as learning more complex structures, to expand their vocabulary, and to use language in a variety of cultural contexts.

Credit Hours: 3
Prerequisites: ITAL 2160

ITAL 3160: Italian Composition
Continues the development of the language skills acquired in Intermediate and Post-Intermediate Italian. It offers students the opportunity to expand their vocabulary, to use the language in a variety of contexts prompted by cultural activities, and to acquire more complex grammatical structures. Emphasis is given on refining writing skills in connection with different text types.

Credit Hours: 3
Prerequisites: ITAL 2160

ITAL 3160: Italian Composition
Continues the development of the language skills acquired in Intermediate and Post-Intermediate Italian. It offers students the opportunity to expand their vocabulary, to use the language in a variety of contexts prompted by cultural activities, and to acquire more complex grammatical structures. Emphasis is given on refining writing skills in connection with different text types.

Credit Hours: 3
Prerequisites: ITAL 2160

ITAL 3310: 20th Century Italian Fiction in Translation
This course focuses on the culture and creative production (i.e., literature, film, music, art, etc.) as well as the sociopolitical context of contemporary Italy. Content may vary from semester to semester. No knowledge of Italian required.

Credit Hours: 3
Prerequisites: sophomore standing or ENGLISH 1000

ITAL 3430: Survey of Italian Literature
Designed to expose students to the rich variety of Italian letters. Emphasis will be placed on textual analysis as well as on authors, themes and stylistic features. No knowledge of Italian required.

Credit Hours: 3

ITAL 4070: Intensive Beginning Italian
Designed for rapid acquisition of a reading knowledge of Italian. Cannot be taken to fulfill undergraduate language requirement.

Credit Hours: 3

Prerequisites: instructor's consent

Japanese (JAPNSE)

JAPNSE 1100: Elementary Japanese I
For beginners with no prior knowledge of Japanese. Three hours of lecture instruction and three hours of practice/drill per week in small groups.

Credit Hours: 6

JAPNSE 1200: Elementary Japanese II
Three hours of lecture instruction and three hours of practice/drill per week in small groups.

Credit Hours: 6
Prerequisites: C- or better in JAPNSE 1100, or equivalent

JAPNSE 2160: Japanese Conversation and Composition
Credit Hours: 3
Prerequisites: C- or better in JAPNSE 1200, or equivalent

JAPNSE 2310: Japanese Civilization I
Survey of Japanese culture and arts before 1868. May be taken independently of JAPNSE 2320. No knowledge of Japanese required. No foreign language credit.

Credit Hours: 3

JAPNSE 3085: Problems in Japanese
Supervised study in Japanese language and/or culture.

Credit Hour: 1-3
Prerequisites: instructor's consent

JAPNSE 3160: Intermediate Japanese Composition and Conversation
Further develops oral command of Japanese as well as listening comprehension and further essay writing skills.

Credit Hours: 3
Prerequisites: C- or better in JAPNSE 2160

JAPNSE 3360: Modern Japanese Literature (in Translation)
Surveys Japanese literature from 1868 to present. Analyzes works by such authors as Soseki, Tanizaki, Kawabata, Mishima, Oe, Murakami, and others. Readings and lectures in English.

Credit Hours: 3

JAPNSE 3370: Intermediate Readings in Japanese
Develops reading and speaking skills and acquisition of more Kanji, vocabulary, and complex structures.

Credit Hours: 3
Prerequisites: C- or better in JAPNSE 3160, or equivalent, or instructor's consent
JAPNSE 3380: Intermediate Japanese II
Continues development of intermediate reading, listening, speaking, and writing skills achieved in JAPNSE 3370, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature and exercises using authentic multi-media materials also help students gain greater familiarity with Japanese culture. Encourages development of student autonomy in language learning with the introduction and use of appropriate reference materials.
Credit Hours: 3
Prerequisites: JAPNSE 3370

JAPNSE 3850: Traditional Japanese Theatre
Study of the history, scripts, and performance techniques of Japanese theatre from 14th century through late 19th century. Examines major plays (in English translations) and the culture that created them. Looks at staging and performance techniques of traditional puppet theatre. Course included stage performances and performances on campus and/or in the community.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

JAPNSE 3880: Japan and its Cinema
Survey and analysis of selected Japanese films from the 1940s to present. Films will be viewed and discussed in terms of history, techniques, artistry, and social impact. English subtitles. No foreign language credit.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent

JAPNSE 4005: Topics in Japanese - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Suitable for students who have taken JAPNSE 3370 or equivalent.
Credit Hour: 1-3
Prerequisites: instructor's consent, sophomore standing

JAPNSE 4005H: Topics in Japanese - Humanities - Honors
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Suitable for students who have taken JAPNSE 3370 or equivalent.
Credit Hour: 1-3
Prerequisites: instructor's consent, sophomore standing; Honors eligibility required

JAPNSE 4160: Advanced Japanese I
Continues development of reading, listening, speaking, writing skills, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature, exercises using authentic multi-media materials. Encourages development of student autonomy in language learning with introduction and use of appropriate reference materials.
Credit Hours: 3
Prerequisites: JAPNSE 3380 or equivalent, or instructor's consent

JAPNSE 4180: Advanced Japanese II
This course continues the development of reading, listening, speaking, and writing skills, with attention to vocabulary acquisition, expansion of knowledge of kanji, and understanding of complex grammatical structures. Authentic readings in Japanese literature and exercises using authentic multimedia materials also help students gain greater familiarity with Japanese culture. The course encourages the development of student autonomy in language learning with the introduction and use of appropriate reference materials.
Credit Hours: 3
Prerequisites: JAPNSE 4160

Journalism (JOURN)

JOURN 0501: Study Abroad: Exchange Graduate
Attributes: Study Abroad Program, Requires Consent, Journalism Course Fee, Course Has Non Standard Meeting Dates, Course Not Transcribed on Students Record Instruction Mode: Traditional Location: Study Abroad Exchange Units: 0 - 12 units
Credit Hour: 0-12

JOURN 0900: News Practicum
Instruction in fundamentals of newswriting for students entering the graduate program without an undergraduate degree in journalism.
Credit Hours: 3

JOURN 1000: The News Media: Journalism and Advertising in a Democratic Society
How do you know the media are telling the full truth and nothing but the truth? In this course, you will learn how to decide what information sources to trust. You'll survey the roles played by you, the consumer, as well as by journalists, strategic communicators and advertisers in their relationships with different audiences. Students will weigh the merits of various storytelling methods, uses of social media and revenue models while developing a deeper understanding of the ethical issues facing consumers and journalists in today’s fast-paced media environment. Pre-Journalism and Journalism majors cannot count this course towards the Bachelor of Journalism.
Credit Hours: 3

JOURN 1010: Career Explorations in Journalism
Colloquium in which experts discuss their specialties and answer students' questions on the nature and current status of their disciplines. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Undeclared Journalism, Pre-Journalism, or Science and Agricultural Journalism majors only

JOURN 1010H: Career Explorations in Journalism - Honors
Colloquium in which experts discuss their specialties and answer students' questions on the nature and current status of their disciplines. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Freshman Journalism and Science and Agricultural Journalism Majors only. Honors Eligibility Required
Finally, this course will help students better identify an academic major and overlap, yet remain distinct in today's complex media landscape. Students will learn how communication differs depending on their role—focus on journalism/news and two focus on strategic communication. This course allows students to build on the basic principles and skills learned in Writing Fundamentals and Visual Fundamentals, including (but not limited to): Reporting; Interviewing; Proper framing; Proper use of lighting, stability and sound; Using sequencing and matched action; Creativity; Pacing; Use of multiple platforms; AP style; News writing; Reporting; Interviewing; Story structure; Story boarding/scripting; Generating creative ideas; Research; Strategic thinking; Persuasive writing; Use of multiple platforms; Judgment; Attribution; Meeting deadlines. Graded on A-F basis only.

**Credit Hours:** 3  
**Recommended:** For first-time college students a high school core GPA of 3.0 or higher and 15 college credits (dual, AP, IB or other). For current MU students a GPA of 2.75 and 15 college credits

---

**JOURN 1100: Principles of Journalism in Democracy**  
Course designed to acquaint students with concepts and functions of journalism in American society. Stresses the basic issues and problems facing journalists and the mass media.

**Credit Hours:** 3  
**Recommended:**

---

**JOURN 1200: Fundamentals of Visual Journalism and Strategic Communication**  
Visual Fundamentals is designed to be one of three courses to introduce students to the basics of journalism and strategic communication practice. In this course, students will learn and practice the basics of visual and audio storytelling and design across the disciplines of journalism and strategic communication. Effective storytelling in audio, video, still photography and design requires an understanding of both the theory and philosophy as well as the software fundamentals necessary to manipulate these elements. Graded on A-F basis only.

**Credit Hours:** 2

---

**JOURN 1300: Fundamentals of Written Journalism and Strategic Communication**  
Fundamentals of Written Journalism and Strategic Communication is designed to be one of three courses to introduce students to the basics of journalism and strategic communication practice. In this course, students will learn and practice the basics of information gathering and writing across the disciplines of journalism and strategic communication. Good media writing requires more than an ability to craft clear sentences. It requires accuracy, curiosity, creativity and attention to detail. The class encompasses a variety of activities that will teach the following skills: AP style; News writing; Reporting; Interviewing; Story structure; Story boarding/scripting; Generating creative ideas; Research; Strategic thinking; Persuasive writing; Use of multiple platforms; Judgment; Attribution; Meeting deadlines. Graded on A-F basis only.

**Credit Hours:** 2

---

**JOURN 1301: Topics in Journalism and Strategic Communication**  
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Graded on A-F basis only.

**Credit Hour:** 1-3

---

**JOURN 1400: Applied Projects for Journalism and Strategic Communication**  
This course is designed to introduce students to the basics of journalism and strategic communication practice. This course allows students to build on the basic principles and skills learned in the fundamentals courses through hands-on projects. Students will work individually and in teams to complete four projects throughout the semester. Two projects focus on journalism/news and two focus on strategic communication. Students will learn how communication differs depending on their role and their audience. Additionally, students will be challenged to think critically about how journalism and strategic communication intersect and overlap, yet remain distinct in today's complex media landscape. Finally, this course will help students better identify an academic major in the journalism school, as well as informing students' individual career interests and plans. The class puts into practice all of the skills learned in Writing Fundamentals and Visual Fundamentals, including (but not limited to): Reporting; Interviewing; Proper framing; Proper use of lighting, stability and sound; Using sequencing and matched action; Creativity; Pacing; Use of multiple platforms; AP style; News writing; Reporting; Interviewing; Story structure; Story boarding/scripting; Generating creative ideas; Research; Strategic thinking; Persuasive writing; Use of multiple platforms; Judgment; Attribution; Meeting deadlines. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** JOURN 1200 and JOURN 1300

---

**JOURN 1400H: News - Honors/Writing Intensive**  
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. May not be taken concurrently with JOURN 2150.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing required; C- or higher in JOURN 1100 and UM GPA of 2.8. Restricted to Undeclared Journalism, Pre-Journalism, Journalism and Science and Agricultural Journalism Students Only

---

**JOURN 1940: Pre-Sequence Internship**  
Internship for Journalism students who have not yet entered their emphasis areas. Used to satisfy employer requirements. Graded on S/U basis only.

**Credit Hour:** 0-1  
**Prerequisites:** Consent from internship coordinator required

---

**JOURN 2000: Cross-Cultural Journalism**  
Cross-Cultural Journalism provides journalistic tools for the coverage of diverse ethnic, gender, ability and ideological groups inside and outside the United States. The critical role of diverse voices in a democracy will be discussed.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing required; C- or higher in JOURN 1100 and UM GPA of 2.8. Restricted to Undeclared Journalism, Pre-Journalism, Journalism and Science and Agricultural Journalism Students Only

---

**JOURN 2100: News**  
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. May not be taken concurrently with JOURN 2150.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing, C- or better in JOURN 1100; grade of "B-" or higher in ENGLISH 1000 and 2.8 UM GPA. Restricted to Undeclared Journalism, Pre-Journalism, Journalism and Science and Agricultural Journalism students

---

**JOURN 2100H: News**  
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. May not be taken concurrently with JOURN 2150.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing, C- or higher in JOURN 1100; grade of "B-" or higher in ENGLISH 1000 and 2.8 UM GPA. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students. Honors eligibility required

---

**JOURN 2100HW: News - Honors/Writing Intensive**  
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic
news stories. Stories cover several "live" assignments. May not be taken concurrently with JOURN 2150.

Credit Hours: 3
Prerequisites: sophomore standing, C- or higher in JOURN 1100; grade of "B-" or higher in ENGLISH 1000 and 2.8 UM GPA. Restricted to Pre-Journalism, Journalism and Science and Agricultural Journalism students. Honors eligibility required

JOURN 2100W: News - Writing Intensive
Introduction to fundamentals of news writing. Lectures, discussions and laboratory work provide training under deadline pressure in writing basic news stories. Stories cover several "live" assignments. May not be taken concurrently with JOURN 2150.

Credit Hours: 3
Prerequisites: sophomore standing, C- or better in JOURN 1100; grade of "B-" or higher in ENGLISH 1000 and 2.8 UM GPA. Restricted to Undeclared Journalism, Pre-Journalism, Journalism and Science and Agricultural Journalism students

JOURN 2150: Fundamentals of Multimedia Journalism
This course deals with the challenges faced by journalists and other communicators working with still photos, audio, video and print. Students learn the basics and ethics of cross-platform, multimedia storytelling. May not be taken concurrently with JOURN 2100. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or higher in JOURN 1100; sophomore standing and a UM GPA of 2.8. Restricted to Undeclared Journalism, Pre-Journalism, Journalism and Science and Agricultural Journalism students only

JOURN 2301: Topics in Journalism and Strategic Communication
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-3

JOURN 3000: History of American Journalism
American mass media from colonial days to present in the context of social, economic and political change.

Credit Hours: 3
Prerequisites: Junior Standing; Journalism or Science and Agricultural Journalism majors

JOURN 3301: Topics in Journalism and Strategic Communication
Organized study of selected topics. Subjects, specific content, and credits may vary from semester to semester. Graded on A-F basis only.

Credit Hour: 1-3

JOURN 3510: Think Global: Fundamentals of Globalization and Digital Technologies
(same as GERMAN 3510, PEA_ST 3510, DST 3510, T_A_M 3010). JOURN 4058: New York Program: Journalism Theory and Practice
Interdisciplinary course offering on-site study at national media venues in New York. Journalism alumni working in Manhattan provide weekly discussions on contemporary practices, job networks and work experiences.

Credit Hour: 2-3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only. Junior standing required

JOURN 4122: Fundamentals of Data Reporting
(cross-leveled with JOURN 7122). Explores the importance to journalists of mining public records and data; reviews basic newsroom mathematics; teaches basic techniques for using Microsoft Excel to create and manipulate spreadsheets and to produce graphics. This course is not to be taken by students who have already completed JOURN 4430 or JOURN 7430. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Consent of instructor required

JOURN 4126: Digital Audio and Visual Basics for Journalists
(cross-leveled with JOURN 7126). Introduces journalism students to audio and video tools used in converged environments. Students will create news stories, ads or promos to meet journalistic or strategic communication goals. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism and Agricultural Journalism majors only

JOURN 4130: Account Services
(cross-leveled with JOURN 7130). Designed for advanced strategic communication students preparing for careers in account services. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4138: Public Relations Techniques
(cross-leveled with JOURN 7138). Designed for advanced strategic communication students preparing for careers in public relations. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4140: Interactive Techniques
(cross-leveled with JOURN 7140). Designed for advanced strategic communications students preparing for careers in interactive media. Section topics may vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4146: Strategic Communication Techniques
(cross-leveled with JOURN 7146). Designed for advanced strategic communication students. Section topics vary. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4148: Interviewing Essentials
(cross-leveled with JOURN 7148). This class focuses on the journalistic interviewing process, from identifying and gaining access to the best sources, setting ethical boundaries, asking the most effective questions and ensuring accuracy. It applies to the full range of story types, from breaking news to in-depth work in all coverage areas.

Credit Hour: 1
Prerequisites: Consent of instructor required

JOURN 4150: Using Infographics
An introduction to the various types of information graphics and how each can be used effectively to help explain the news. Additional emphasis on generating graphic ideas and on the specific challenges of gathering information for graphics.

Credit Hour: 1
Prerequisites: instructor's consent required. Restricted to Journalism and Science and Agricultural Journalism majors only
JOURN 4152: Concepts in Participatory Journalism
Journalists need to know how to be in conversation with their communities rather than lecture to them. In this course, we will look at how a collaborative culture is changing journalism, and how journalists can take advantage of the new landscape. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: JOURN 2100, JOURN 2150. Journalism and Science and Agricultural Journalism majors and Junior Standing

JOURN 4198: Area Seminar
Special lectures, readings, discussions relating to the urban journalism, state government reporting or local public affairs reporting programs.
Credit Hours: 3
Prerequisites: Consent of Instructor required

JOURN 4200: Principles of Strategic Communication
(cross-leveled with JOURN 7200). Foundation course familiarizing students with an array of strategic communication tools and how they are used in the field.
Credit Hours: 3
Prerequisites: Restricted to Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4204: Introduction to Strategic Writing and Design
This course will teach you about strategic writing and design, and then show you how to apply these skills to key communication platforms such as digital media, TV, radio, social media and others. Along the way, you will learn to think, write and design creatively and strategically. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Strategic Communication and Science and Agricultural Journalism Majors. Junior Standing Required

JOURN 4206: Strategic Writing I
(cross-leveled with JOURN 7206). Students learn strategic writing for a variety of media such as print, radio, television, outdoor, new media, news releases, pitch letters and other persuasive messages.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4226, JOURN 4952

JOURN 4208: Strategic Writing II
(cross-leveled with JOURN 7208). Advanced course in the creation of advertising and public relations materials with an emphasis on strategic planning, developing creative concepts, producing and polishing copy and visuals, execution of finished product and refining. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4212: Sports and Entertainment Promotion
(cross-leveled with JOURN 7212) Course focuses on the role that research, sponsorship, advertising, public relations, social media, positioning, target marketing, psychographics, and other strategic communication processes play in the promotion of the sports and entertainment industry. The course will critically analyze and examine how chief executive officers of sport and entertainment organizations choose, maintain, or redirect their promotion strategies and activities to help achieve organization missions, encourage tickets sales, and attract large audiences.
Credit Hours: 3
Prerequisites: Consent of instructor

JOURN 4213: Strategic Communication Mobile Sports Production
(cross-leveled with JOURN 7213). This class is designed to prepare Strategic Communication students for vital new positions in the world of sports marketing with the emphasis on video productions, strategic planning, and strategic dissemination of video content via multiple media, channels and platforms. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952. Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 4216: Media Sales
(cross-leveled with JOURN 7216). Focus of this course is to familiarize students with how to sell a variety of media, including newspaper, radio, television, outdoor, new media, and others.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4218: MoJo Ad Staff
(cross-leveled with JOURN 7218). Application of strategic communication skills in a professional services agency specializing in the youth and young adult segment. Positions include management, planning, creative media and research. Other electives required based on position. Application required. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Consent of Instructor

(cross-leveled with JOURN 7220). Students will produce a free-standing collection of outstanding, polished creative work to demonstrate his/her ability to perform at a high level of creativity.
Credit Hours: 3
Prerequisites: JOURN 4208 or JOURN 4228. Restricted to Strategic Communication and Science and Agricultural Journalism students only

JOURN 4224: Effective Job Search Strategies
Are you getting ready to apply for a job or internship? A resume is a brief written account of personal, educational, and professional qualifications and experience that you prepare as part of your application materials for a prospective job. To ensure that your resume is read by the recipient, you will need a cover letter that markets your unique qualifications for the specified job description. In the current global economy, it is essential for job seekers to optimize their chances of being considered and hired for positions that are well-suited to their qualifications and interests. This course will help you effectively develop employment application materials for today’s job market by honing your resume writing skills, providing you with tools to create an impressive resume (or to improve the one you already have), and giving suggestions on developing an effective cover letter. You will study different types of resume and cover letter formats.
that can be applied to various prospective employment situations and your own personal career goals. You will undertake a critical assessment of the professional skills you already possess, brainstorm and apply the best ways to market these skills in your resume and cover letter, and enhance your application materials by using specific tips and techniques to make you more competitive for the job you seek. Special focus is placed on developing effective application correspondence, follow-up correspondence and interviewing techniques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, and JOURN 4952

JOURN 4226: Strategic Design and Visuals I
Course gives students a foundation in visual communication in areas such as typography, balance, eye flow and layouts.

Credit Hours: 3
Prerequisites: junior standing. Restricted to Strategic Communications students only

JOURN 4226H: Strategic Design and Visuals I - Honors
Course gives students a foundation in visual communication in areas such as typography, balance, eye flow and layouts.

Credit Hours: 3
Prerequisites: Restricted to Strategic Communication students only with junior standing or higher. Honors eligibility required

JOURN 4228: Strategic Design and Visuals II
(cross-leveled with JOURN 7228). Advanced course in strategic design and visuals. Persuasive visual principles applied to variety of integrated media including print, broadcast and on-line. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4236: Psychology in Advertising
(cross-leveled with JOURN 7236). Application of psychological principles, learning, perception, motivation, attitudes to advertising. Emphasis on the increasing use of psychographics (the “lifestyle” factor) to understand consumer wants and buying behavior.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952

JOURN 4242: Strategic Communication Leadership
(cross-leveled with JOURN 7242). Strategic Communication Leadership is aimed at students who are eager to develop their skills and abilities in management and leadership with the likely outcome that they will be leaders in media organizations or as entrepreneurs. Rooted in principles of ethical persuasion and strategic communication, it will help develop individual skills and abilities and the mindset of helping others achieve their goals. Based on the experience and writings of CEO and world-renowned leader David Novak (Strategic Communication alumnus 1974), this is the one of three courses comprising the Leadership Interest Area in Strategic Communication. This course will call on students to commit to the process of their own growth and self-discovery and to help foster the growth and development of fellow learners. It will be an intensive experience and, with commitment to the program, will be immediately applicable to the students’ current and future personal and professional lives. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952

JOURN 4242W: Strategic Communication Leadership - Writing Intensive
(cross-leveled with JOURN 7242). Strategic Communication Leadership is aimed at students who are eager to develop their skills and abilities in management and leadership with the likely outcome that they will be leaders in media organizations or as entrepreneurs. Rooted in principles of ethical persuasion and strategic communication, it will help develop individual skills and abilities and the mindset of helping others achieve their goals. Based on the experience and writings of CEO and world-renowned leader David Novak (Strategic Communication alumnus 1974), this is the one of three courses comprising the Leadership Interest Area in Strategic Communication. This course will call on students to commit to the process of their own growth and self-discovery and to help foster the growth and development of fellow learners. It will be an intensive experience and, with commitment to the program, will be immediately applicable to the students’ current and future personal and professional lives. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952

JOURN 4244: Creating Cultures Through Effective Strategic Communication and Leadership
(cross-leveled with JOURN 7244). The course focuses on the role culture and communication play in organizational success, management, and leadership. Rooted in principles of ethical persuasion and strategic communication, it helps students develop individual skills and abilities and the mindset of helping others achieve their goals. The course is distinctly different from traditional organizational studies because of its focus on communication and marketing principles. It offers hands-on learning through the case method. Based on experience and writings of CEO and world-renowned leader David Novak (Strategic Communication alumnus 1974), this is one of three courses comprising the Leadership interest area in Strategic Communication. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Journalism majors only

JOURN 4248: Media Strategy and Planning
(cross-leveled with JOURN 7248). Course deals with strategic planning and the selection and evaluation of appropriate media outlets. Students gain a clear understanding of the problems and issues involved in crafting effective media strategies, creative problem solving and selection of appropriate media.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952

JOURN 4250: Management of Strategic Communication
(cross-leveled with JOURN 7250). How to lead and contribute to strategically sound, highly creative and seamlessly integrated strategic communication on the agency or client side of the business. Directly relevant to agency account management and account planning, as well as client career paths.

Credit Hours: 3
Prerequisites: Consent of Instructor required
JOURN 4252: Branded Strategic Storytelling
(cross-leveled with JOURN 7252). This course for Strategic Communication students integrates digital and content marketing planning and operational methodologies designed to deepen students' knowledge of content creation, distribution strategies and audience engagement. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4254: Tools, Techniques and Technology of Visual Storytelling
(cross-leveled with JOURN 7254). In this course, students will learn how to professionally shoot and strategically edit video, visuals and textual content, strategize how to publish that content on owned media and social media platforms, utilize tools like GoPro and Drone technology, and even VR/AR and 360 attachments to make content that is more immersive, influential, impactful and persuasive. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, JOURN 4952

JOURN 4256: Public Relations
Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for profit organizations.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4256H: Public Relations
Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for profit organizations. Honors eligibility required

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4262: Digital Strategy I
(cross-leveled with JOURN 7262). Course covers every step from integrating Internet efforts into the overall strategic communication plan to building a website that works. Designed for those with an interest in interactive advertising. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204, and JOURN 4952

JOURN 4263: Digital Strategy II
(cross-leveled with JOURN 7263). Course goes in-depth on top issues in the interactive process from video advertising to social networking sites and how to increase campaign performance with web analytics. Designed for those who want a career in interactive advertising. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4268: Strategic Communication Practicum
(cross-leveled with JOURN 7268). Practical experience in public relations, corporate communications and strategic planning with the Missouri School of Journalism serving as client. Students from all journalism disciplines will apply knowledge and skills on a variety of platforms.

Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 4270: Public Relations Writing
(cross-leveled with JOURN 7270). Develop skills and capabilities in strategic communication applications, including news releases, media advisories, pitch letters, video news releases, media relations techniques, writing for electronic and broadcast media, feature writing, brochures and speeches. Graded on A-F basis.

Credit Hours: 3
Prerequisites: Consent of instructor

JOURN 4300: Broadcast News I
(cross-leveled with JOURN 7300) Beginning reporting and news writing for radio, television and their on-line services. Introduction to use of audio and video recorders and editing systems in production of news stories. Consideration of ethical issues, economic factors, relationships with news sources and gender and ethnic diversity in the newsroom and in news stories.

Credit Hours: 3
Prerequisites: Radio-Television Journalism Major Required

JOURN 4301: Topics in Journalism
Selected current topics in journalism. Specific topics to be announced at time of registration.

Credit Hour: 1-3
Prerequisites: Consent of instructor required

JOURN 4301W: Topics in Journalism - Writing Intensive
Selected current topics in journalism. Specific topics to be announced at time of registration.

Credit Hour: 1-3
Prerequisites: Consent of instructor required

JOURN 4306: Broadcast News II
Introduction to general assignment reporting skills for the newsroom environment. Instruction in time management, writing, storytelling and performance. Team skills and ethnic diversity in the newsroom are discussed. Students begin work for broadcast newsrooms.

Credit Hours: 3
Prerequisites: JOURN 4300

JOURN 4308: Broadcast News III
(cross-leveled with JOURN 7308) Intermediate reporting and news writing skills for radio and television. Advanced techniques in the use of video and sound in production of news stories.

Credit Hours: 3
Prerequisites: JOURN 4306
JOURN 4308W: Broadcast News III - Writing Intensive
Intermediate reporting and news writing skills for radio and television. Advanced techniques in the use of video and sound in production of news stories.
Credit Hours: 3
Prerequisites: JOURN 4306

JOURN 4310: News Producing
Credit Hour: 1-3
Prerequisites: JOURN 4308

JOURN 4320: Advanced Broadcast Reporting
(cross-leveled with JOURN 7320). In-depth reporting and editing for radio or television; advanced production techniques; emphasis on writing, interviewing, effective use of audio or videotape at KOMU-TV or KBIA.
Credit Hours: 3
Prerequisites: JOURN 4308

JOURN 4328: Advanced News Communication
(cross-leveled with JOURN 7328). This course will examine and practice the components of effective interviewing and on-set and live reporting for television news. Students will anchor KOMU-TV's morning newscasts.
Credit Hour: 1
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism Majors only with Junior Standing or higher

JOURN 4330: From Murrow to Moore: What Good Journalists Read
Introduces undergraduates to seminal works in broadcast and print Journalism that influences contemporary professional practices. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: junior standing or instructor's consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4340: Viewing Journalism Films: Images of the Reporter
(cross-leveled with JOURN 7340). The course will examine images of journalists in American films ranging from "Citizen Kane" to the present. Students will analyze award-winning movies that pose key questions about the professional responsibilities of journalists in all fields. Topics will include issues related to the practice of journalism as well as those triggered by the work of specific journalists, such as Woodward and Bernstein.
Credit Hours: 2
Prerequisites: Instructor's consent required

JOURN 4350: Problems in Journalism
Independent research arranged with individual faculty member. Contract must be approved by instructor and dean. Not accepted as a substitute for any regularly scheduled course. Some sections of the course may be offered on either A-F graded or S/U graded basis only.
Credit Hour: 1-3
Prerequisites: Consent of instructor required

JOURN 4370W: Film Studies: The Intersections of Documentary Film and Journalism
(same as FILM_S 4370; cross-leveled with FILM_S 7370, JOURN 7370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military--issues that in the past might have been covered exclusively by investigative journalism. What explains the public's growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms - documentary film and journalism - and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.
Credit Hours: 3
modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/False Film Festival, and will be hosted by a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.

Credit Hours: 3

**JOURN 4371: Documentary Theory**
(cross-leveled with JOURN 7371). Documentary and other long-form story telling methods involve a complex series of decisions made in the creation of the work that determines its style, length, direction, point of view and more. These and a thousand other editing decisions are the difference between a successful project that touches its audience and one that falls short. The focus of this course is on the craft of editing, as seen in a variety of documentary and other works and explained through the decisions made in and out of the editing room that lead to the final product. The course will introduce important concepts of editing, the work of significant editors in both documentary and narrative fiction films, and seek to apply those techniques to the conceptualization of documentary work students will do as part of their degree. Students will understand the history of documentary editing as it evolved on its own and as influenced by narrative fiction films, the language of editing, the work of important editors and directors and how it influences today's aesthetic and how to apply what they have learned to their own documentary projects at an advanced level. Graded on A-F basis only.

Credit Hours: 3

**Prerequisites:** Consent of instructor required

**JOURN 4372: Documentary Reporting**
(cross-leveled with JOURN 7372). Students will learn elementary documentary reporting techniques by producing video and audio content in small group and individual projects. The course focuses on collection of content in the field, interviewing, research, story construction, editing and presentation. Graded on A-F basis only.

Credit Hours: 3

**Prerequisites:** Instructor consent

**JOURN 4373: Documentary Development**
(cross-leveled with JOURN 7373). This course will concern itself primarily with the formation of projects: from theories behind different kinds of documentaries, through real world investigations and research into possible projects, into the pitching and writing stage and lastly to the final idea that will be the basis of students' senior films. The ability to properly think of, clearly articulate, pitch and hone a project idea often makes the difference between a successful and unsuccessful final film. Still these ideas don't materialize out of thin air; inspiration for great documentaries can come from many places. Understanding how to seize viable project ideas is a crucial skill for a documentary filmmaker. Graded on A-F basis only.

Credit Hours: 3

**Prerequisites:** JOURN 4371

**JOURN 4375: Documentary Business and the Public Sphere**
(cross-leveled with JOURN 7375). Whether it be through contract employment, freelancing, or independent production, creating documentaries requires a knowledge of professional and business practices that differ from many other parts of journalism. The course will introduce important concepts related to the development and production of documentary work, as well as the public distribution of that work. Students will research the industry and develop skills to manage business and professional relationships with the documentary world. Students will build and maintain personal branding materials. Graded on A-F basis only.

Credit Hours: 3

**Prerequisites:** Consent of instructor required

**JOURN 4377: Documentary Senior Project**
Students in this course will begin work on a yearlong documentary project to be the capstone of their work in the documentary journalism program. This course will concentrate on the research, reporting and field acquisition work for the senior documentary project. Students will show and discuss their work in group settings to share progress and report results. Each will also meet individually with the instructor to fine tune the direction and content of the project. Graded on A-F basis only.

Credit Hours: 2

**Prerequisites:** JOURN 4375

**JOURN 4379W: Documentary Senior Capstone - Writing Intensive**
Focus on the completion of a long-form documentary work and its place in current documentary programming. Students will apply knowledge from previous documentary courses in this capstone experience through writing, in-class presentations and their finished work.

Credit Hours: 3

**Prerequisites:** JOURN 4377

**JOURN 4400: Introduction to News Editing**
(cross-leveled with JOURN 7400). Introduces the fundamentals of editing stories and writing headlines for publication online and in print, including an emphasis on style and grammar. Emphasized editing for an online audience.

Credit Hour: 1-2

**Prerequisites:** Consent of instructor required

**Recommended:** JOURN 4450 or JOURN 4804

**JOURN 4406: Digital News Editing**
(cross-leveled with JOURN 7406). Real-world experience in digital editing and news decision-making coupled with newspaper production; emphasis on editing and headline writing across platforms, design for home page and mobile, social media, ethics and fundamentals of grammar. Lab work is hands-on experience at columbiamissourian.com and the Missourian newspaper.

Credit Hours: 3

**Prerequisites:** restricted to Journalism and Science and Agricultural Journalism Majors only

**JOURN 4408: Magazine Editing**
(cross-leveled with JOURN 7408). Lectures provide an introduction to the magazine industry, including types of publications, roles of an editor and skills needed for today's magazine editor. Labs focus heavily on sentence structure, grammar, syntax, usage, punctuation and style.

Credit Hours: 3

**Prerequisites:** Consent of instructor required
JOURN 4410: Intermediate Writing
(cross-leveled with JOURN 7410). In-depth reporting, research, and writing techniques with a magazine focus. Students produce articles for Vox, the Missourian and other magazines, publications or digital outlets.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4410W: Intermediate Writing - Writing Intensive
(cross-leveled with JOURN 7410). In-depth reporting, research, and writing techniques with a magazine focus. Students produce articles for Vox, the Missourian and other magazines, publications or digital outlets.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4414: Field Reporting on the Food System and Environment
(same as SCI_AG_J 4414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4415: Current Issues in Science Journalism
(same as SCI_AG_J 4415). Focuses on covering the interplay of one or more current issues of concern to journalists, scientists and society. The focus for any given semester may be biotechnology, climate change, energy, food safety, global population growth, wildlife or another issue. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4416: Science, Health and Environmental Writing
(cross-leveled with JOURN 7416). In this course students learn how to cover science, health and environmental topics by reporting and writing several stories for publication. Students can develop a marketable specialty or cover these angles in any beat. This course can serve as a substitute for JOURN 4410 Intermediate Writing.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804

JOURN 4416W: Science, Health and Environmental Writing - Writing Intensive
(cross-leveled with JOURN 7416). In this course students learn how to cover science, health and environmental topics by reporting and writing several stories for publication. Students can develop a marketable specialty or cover these angles in any beat. This course can serve as a substitute for JOURN 4410 Intermediate Writing.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804

JOURN 4418: Critical Reviewing
(cross-leveled with JOURN 7418). This course seeks to enrich students' understanding of the arts; support their attendance of concerts, plays, films, and exhibitions; sharpen their skills in critical thinking; and encourage the publication of their reviews in Vox as well as other outlets. Students will analyze the works of critics, gain a general appreciation of the ways to approach each art, and write reviews.

Credit Hours: 3
Prerequisites: JOURN_.0900 or JOURN 2100. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4418W: Critical Reviewing - Writing Intensive
(cross-leveled with JOURN 7418). This course seeks to enrich students' understanding of the arts; support their attendance of concerts, plays, films, and exhibitions; sharpen their skills in critical thinking; and encourage the publication of their reviews in Vox as well as other outlets. Students will analyze the works of critics, gain a general appreciation of the ways to approach each art, and write reviews.

Credit Hours: 3
Prerequisites: JOURN_.0900 or JOURN 2100. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4420: Editorial Writing

Credit Hours: 3
Prerequisites: JOURN 4450. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4422: Sports Journalism
(cross-leveled with JOURN7422). A review of everything from "how to watch Sports" to the history of sports writing. Contact instructor for consent on this course. Priority will be given to Sports Journalism students. All other consent will be given on a first-come, first-serve basis as space allows. Course graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required

Recommended: JOURN 4450/JOURN 7450 or JOURN 4804/JOURN 7404/JOURN 7504/JOURN 7560. Priority will be given to Sports Journalism students. All other consent will be given on a first-come, first-serve basis as space allows

JOURN 4424: Covering Traumatic Events
(cross-leveled with JOURN 7424). This course will prepare reporters and future newsroom managers across platforms for the ethical, practical and emotional challenges of reporting accurately and sensitively on traumatic events. It will give students a deeper understanding of the psychological impact of such events, including natural and man-made disasters, violent crime, accidents, terrorism and war. The course will explore how news coverage affects individuals and communities, and the psychological challenges and ethical hazards for the journalists who cover these events, with a focus on best newsroom practices for managing fast-breaking news stories and mitigating the effects on communities and staffs. The course will also explore the challenges of technology in the context of traumatic events and how social media have affected coverage of and response to crime, war and disasters. Graded on A-F basis only.
**JOURN 4426: Religion Reporting and Writing**
(same as REL_ST 4418). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life and culture.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4450 or JOURN 4804 or JOURN 7804; or JOURN 4560 or JOURN 7560

**JOURN 4428: Health Reporting Skills**
This course focuses on research and analysis techniques journalists use to understand and report on health policy, health-care quality, medical research and the business of health care. Graded on A-F basis only.

**Credit Hours:** 2-3  
**Prerequisites:** Consent of instructor required. Recommended JOURN 4450 or JOURN 4804

**JOURN 4430: Computer-Assisted Reporting**
(cross-leveled with JOURN 7430). How to negotiate for, transfer and process electronic information; the unique opportunities computers provide for analyzing information.

**Credit Hours:** 3  
**Prerequisites:** Students must have completed JOURN 4306 or 4450 or 4804

**JOURN 4432: Advanced Data Journalism**
(cross-leveled with JOURN 7432). Teaches students how to creatively solve problems in journalism using computer programming. Students will learn how to code using the Python language, and how to apply those coding skills to perform real-world tasks. Students will learn the concepts, theory and practical programming skills needed to clean data, scrape web sites and turn databases into interactive online experiences. By the end of the semester, students will have learned the skills to create interactive database presentations, and will have created a functional web app that will serve as a portfolio piece. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4430

**Recommended:** JOURN 4502

**JOURN 4434: The Art and Mechanics of the Business Story**
The purpose of this course is to give students a deep understanding of business journalism and for them to apply those skills in a real newsroom, Missouri Business Alert. The class will cover everything from audience to financials, and students will leave the class with several work samples to show potential employers.

**Credit Hours:** 3  
**Prerequisites:** Journalism and Science and Agricultural Journalism majors only; JOURN 4450 or JOURN 7450, or JOURN 4306 or JOURN 7306, or JOURN 4804 or JOURN 7804, or JOURN 4556 or JOURN 7556

**JOURN 4436: Investigative Reporting**
Advanced course designed to acquaint reporters with public issues. Students write two in-depth projects and other shorter assignments. Students meet weekly with instructor for editorial suggestions.

**Credit Hours:** 3  
**Prerequisites:** Consent of instructor required

**JOURN 4438: Business, Financial and Economic Journalism**
(cross-leveled with JOURN 7438). Understanding the news from the business sector and nation's economy for journalists and public relations students. Including financial filings, equity markets, local business, economic indicators, job creation, business data, sports business and what makes business/economic news different from other journalism. Includes tour of business journalism outlets and markets in New York. Open to all journalism school emphasis areas.

**Credit Hours:** 3  
**Prerequisites:** Restricted to Journalism and Agricultural Journalism majors

**JOURN 4439: Advanced Business Journalism**
(cross-leveled with JOURN 7439). This class requires students to write business stories every week and to attain a high level of financial literacy in the process. The class will cover topics behind the headlines, showing students how to spot economic trends, the stories behind the economy's main actors, and the keys to spotting a troubled business. By the end of the class, all students will be certified users of the Bloomberg Terminal. To take this course, students must enroll in one of the two attached accounting classes (grad or undergrad). Both are offered online. Prerequisites: Students must have taken or take concurrently with this course: ACCTCY 2010 or ACCTCY 7310 Accounting for Managers.

**Credit Hour:** 1-3

**JOURN 4444: Team-Based Mobile Device Application Development**
(same as INFOTC 4500). This is a multi-disciplinary, team-based course on developing applications for mobile devices. Teams will be comprised of students who are software developers and students who are designers. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4804 or JOURN 4204 or JOURN 4306 or JOURN 4450

**JOURN 4450: News Reporting**
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

**Credit Hours:** 3  
**Prerequisites:** JOURN 2100

**JOURN 4450W: News Reporting - Writing Intensive**
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

**Credit Hours:** 3  
**Prerequisites:** JOURN 2100
JOURN 4460: Advanced News Reporting
(cross-leveled with JOURN 7460). Assignments to more difficult beat areas, team reporting and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems.

Credit Hours: 3
Prerequisites: JOURN 4450

JOURN 4460W: Advanced News Reporting - Writing Intensive
(cross-leveled with JOURN 7460). Assignments to more difficult beat areas, team reporting and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems.

Credit Hours: 3
Prerequisites: JOURN 4450

JOURN 4462: Emerging Technologies in Journalism
This course quickly responds to technology developments in journalism through a combination of theory, practice and research. Students learn to use the developing technology and also strategies to manage its impact on media organizations while expanding academic discourse. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: junior standing; restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4464: Magazines Across Platforms
(cross-leveled with JOURN 7464). As digital editors for Vox Magazine, students manage and create content for Vox’s digital platforms, including its WordPress website, blog, social media accounts and award-winning iPad app. Students also work with analytics, engagement and multimedia. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4450 or JOURN 4804

JOURN 44682: Field Reporting: Wine Country Writing
(same as SCI_AG_J 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only. Prerequisites: JOURN 2100

Credit Hours: 3

JOURN 4502: Multimedia Planning and Design
Class covers the basics of web design - Storyboarding, navigation, information architecture, reader behavior, usability studies - as they relate to journalistic stories and persuasive messages.

Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4804 or JOURN 4500 or JOURN 4508 or JOURN 4406 or JOURN 4506 or JOURN 4204 or JOURN 4360

JOURN 4506: Magazine Design
Introduction to typography of magazines from manuscript markup through layout to page proof. Extensions and limitations of typography are considered in light of current practice and economic possibilities.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4508: Information Graphics
Work as a news artist for a daily city newspaper graphically covering community news, sports and lifestyle issues. Emphasis on visual thinking and effective presentation. Experience with state-of-the-art software.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804
JOURN 4510: Visual Communication
How to communicate through pictures. Topics: visual perception, vocabulary, the role of words, picture editing, design and layout, printers, taste and judgment, camera mechanics. For journalism students who are not photographers.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only with Junior standing

JOURN 4550: Basic Photography and Photo Editing
A basic survey for non-photojournalism majors and others with no prior experience who desire a working knowledge of photojournalistic theory and practice.

Credit Hours: 3
Prerequisites: instructor's consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4554: Visual Editing for Multimedia
This class develops understanding of multimedia storytelling by focusing on editing, production, and business model practices for online visual journalism. It builds on a foundation of digital editing, photojournalism, photo editing, videography, and multimedia production. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4804 or JOURN 4550 or JOURN 4306 or JOURN 4406 or JOURN 4506 and instructor's consent; restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4556: Fundamentals of Photojournalism
A rigorous skills course for advanced students preparing for a career in photojournalism consisting of weekly exercises in black and white and color photographic story telling and lectures that explore the philosophical, historical and ethical roots of the profession.

Credit Hours: 3
Prerequisites: instructor's consent

JOURN 4560: Staff Photojournalism
(cross-leveled with JOURN 7560). A laboratory course exploring the photojournalist's role in the news-gathering process. As staffers for the Columbia Missourian, students cover news, sports, features, food assignments and originate single pictures and stories.

Credit Hours: 3
Prerequisites: Consent of Instructor Required
Recommended: JOURN 4558

JOURN 4562: Photojournalism Business Practices
Discusses legal, financial, organizational and entrepreneurial issues for photojournalists. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: JOURN 4558 or JOURN 7558 and JOURN 4566 or JOURN 7566 or consent of instructor; junior standing; restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4564: Micro-Documentary Photojournalism and Videography
This course extends student's understanding and abilities to produce short-form video journalism. They will produce, from concepts to web publication, two five-minute non-fiction videos that serves the public through engaging visual sound techniques and compelling narrative. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 4306 or JOURN 4804

JOURN 4566: Electronic Photojournalism
Concepts and skills to incorporate photographs, audio and video for interactive presentation, with an emphasis on project design and coding for web and mobile devices. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4556 and instructor's consent

JOURN 4568: History of Photojournalism
Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.

Credit Hours: 3
Prerequisites: Journalism and Science and Agricultural Journalism majors only with Junior standing

JOURN 4568W: History of Photojournalism - Writing Intensive
Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.

Credit Hours: 3
Prerequisites: Journalism and Science and Agricultural Journalism majors only with Junior standing
JOURN 4650: International Issues and the Media
(cross-leveled with JOURN 7650). Attached to an internship-based journalism study abroad program, this course is an overview of the media in a geographic region. The course aims to enhance students' research, writing, reporting and analytical skills so that they can produce articles, multimedia products and communications campaigns.

Credit Hours: 3
Prerequisites: JOURN 4556 or JOURN 4450 or JOURN 4804 or JOURN 4300 or JOURN 4200

JOURN 4656: International News Media Systems
A comparative survey of current news media systems and how they affect the international flow of information. Newspapers, news agencies, broadcasting and satellite networks of the world are analyzed.

Credit Hours: 3
Prerequisites: junior standing in Journalism or Science and Agricultural Journalism

JOURN 4658: International Journalism
An examination of the gathering, editing and dissemination of international news. The impact of social, economic, cultural and political structures on news media performance is evaluated.

Credit Hours: 3
Prerequisites: junior standing. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4660: Media Forces Shaping the European Union
Seminar analyzes the role of media in shaping policies and actions of the European Union member nations and their people. Open to graduate students regardless of major and to undergraduates with instructor's consent. Course qualifies for EU Certificate Program.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4662: Global News Across Platforms
(cross-leveled with JOURN 7662). Online, radio, and print production for a converged media enterprise, Global Journalist. Students report, write, plan, edit, design, and produce a video and radio program and website on international news while working under weekly deadlines.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804 or JOURN 4300 or JOURN 4372 or JOURN 4564

JOURN 4670: The Community Newspaper
The role of the newspaper in the community. Handling of news categories especially applicable to smaller newspaper. Field trips giving students experience in publishing newspapers in the state.

Credit Hours: 3
Prerequisites: JOURN 2100. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4710: Newspaper Management
Department-by-department organization, business practices, personnel, rate structures, equipment, production, laws and regulations of concern to newspaper management. Cases examine critical newspaper management issues.

Credit Hours: 3
Prerequisites: Journalism and Science and Agricultural Journalism majors with Junior standing

JOURN 4716: Women and the Media
(same as WGST 4716; cross-leveled with JOURN 7716, WGST 7716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills. Enrollment limited to Journalism and Science and Agricultural Journalism majors only with junior standing required.

Credit Hours: 3
Prerequisites: instructor's consent

JOURN 4718: Law and the Justice System
(cross-leveled with JOURN 7718). Lectures, readings, discussions, writing assignments relating to justice system reporting from the view of attorneys, prosecutors, judges, correction and probation officers with the cooperation of the Missouri Bar.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4734: Journalism and Chaos: How to Understand and Cover 21st Century Business Models
The purpose of this class is to explore alternative business/journalism models that can be grown from the rib of the traditional newsroom. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior Standing. Restricted to Journalism and Science and Agricultural Journalism students only

JOURN 4736: Changing Media Business Models
Analysis of the economic changes in news media industry. Explore concepts and theories of monetizing media. Hands-on experience in creating innovations in media business models.

Credit Hours: 3
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4738: Language, Thought and Journalism
This online course helps you, as S.I. Hayakawa wrote, "to think more clearly, to speak and to write more effectively, and to listen and to read
with greater understanding.” It explores the biases and limitations of language, culture, technology and other factors as applied to the practice of journalism and mass communications.

Credit Hours: 3  
Prerequisites: Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4804: Convergence Reporting  
(cross-leveled with JOURN 7804). Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Restricted to Convergence, Print and Digital, Photojournalism, and Magazine students, and Science and Agricultural Journalism students

JOURN 4804W: Convergence Reporting - Writing Intensive  
(cross-leveled with JOURN 7804). Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Restricted to Convergence, Print and Digital, Photojournalism, and Magazine students, and Science and Agricultural Journalism students

JOURN 4806: Convergence Editing and Producing  
(cross-leveled with JOURN 7806). Practice and theory of editing and producing material for publication or broadcast in a converged environment. Students produce media for multiple outlets. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 4306 or JOURN 4804 or JOURN 4450

JOURN 4810: National News Writing and Production  
(cross-leveled with JOURN 7810). Learn updated storytelling and video-production techniques on-site at Newsy, a next generation news network. You will work weekly shifts throughout the semester, culminating in the production of your own portfolio and mock interviews with hiring managers. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: instructor consent required

JOURN 4812: Online Audience Development  
(cross-leveled with JOURN 7812). You’re already using social media every day - but are you using it in the most effective way possible? In Online Audience Development students will explore, envision and evaluate the possibilities of social media integration in news production workflows. We’ll experiment with emerging social platforms to see how they might fit in a newsroom’s social media and branding playbook. You will also exercise, develop and improve on all the journalism skills practiced in previous classes: researching, reporting, editing, producing, proofreading, photo editing and design. The big difference? This time you’ll be reporting on our newsrooms in order to help create deeper connections with the audience. Graded on A/F basis only.

Credit Hours: 3  
Prerequisites: JOURN 4560 or JOURN 4804 or JOURN 4306 or JOURN 4450 or instructor consent. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4814: Multimedia Sports Journalism  
(cross-leveled with JOURN 7814). Assignments on a daily regional website and radio station covering sports with converged media. Experience in reporting game and feature stories under deadline conditions. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Instructor’s consent required

JOURN 4940: Internship in Journalism  
Credit for approved employment in journalism. Specifications for this course appear in the Undergraduate Catalog. Graded on S/U basis only.

Credit Hour: 1-6  
Prerequisites: Consent from internship coordinator required

JOURN 4950: Understanding Audiences  
Focuses on the recipients of journalistic efforts by teaching students to identify, analyze and address media audiences. Students will learn a variety of research methods and gain hands-on experience with audience analysis through team-based practical projects.

Credit Hours: 3  
Prerequisites: JOURN 2000 and junior standing. Strategic Communication students may not enroll in this entry level research course

JOURN 4952: Strategic Communication Research I  
(cross-leveled with JOURN 7952). Introduction to techniques and practice of strategic communication research. Emphasis on research techniques and use of research results, including consumer analysis, attitude measurement and evaluation of externally supplied research.

Credit Hours: 3  
Prerequisites: JOURN 2000 and junior standing. Strategic Communication students may not enroll in this entry level research course

JOURN 4970: Strategic Campaigns  
(cross-leveled with JOURN 7970). This capstone course, gives students a hands-on opportunity to use their skills and apply strategic communication learning to a real client situation. To be taken final semester. Application required for Mojo Ad section and will include additional leadership responsibilities.

Credit Hours: 3  
Prerequisites: Consent of Instructor required

JOURN 4970W: Strategic Campaigns - Writing Intensive  
(cross-leveled with JOURN 7970). This capstone course, gives students a hands-on opportunity to use their skills and apply strategic communication learning to a real client situation. To be taken final semester. Application required for Mojo Ad section and will include additional leadership responsibilities.

Credit Hours: 3  
Prerequisites: Consent of Instructor required
JOURN 4972: Photo and Visual Editing
An advanced visual editing course. Primary work is as a photo-multimedia editor on the Columbia Missourian photo desk. You collaborate on daily and semester projects and are assigned specific leadership roles.
Credit Hours: 3
Prerequisites: JOURN 4408 or JOURN 4204 or JOURN 4500 or JOURN 4560

JOURN 4974: Advanced Internet Applications for Radio/TV News
Integration of advanced Internet research and publishing skills with production and management of the KOMU-TV/KBIA Radio World Wide Web news service.
Credit Hours: 3
Prerequisites: JOURN 4306

JOURN 4976: Seminar in Radio/TV News
Seminar in network and local news process, in coverage of major issues and social problems, in relationships of radio-TV news and government institutions.
Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4978: Media Management and Leadership
Dramatic changes in technology and the media's role in converging technologies require new management and leadership techniques and paradigms. Students will write case examining these changes.
Credit Hours: 3
Prerequisites: JOURN 4306 or JOURN 4804. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 4980: The Picture Story and Photographic Essay
Production of photo stories/essays for newspapers, magazines and news media presentations. Research, photography, design and layout. Final portfolio will show journalistic strength and versatility in black and white, and color.
Credit Hours: 3
Prerequisites: JOURN 4560

JOURN 4984: Magazine Staff
(cross-leveled with JOURN 7984). This course provides hands-on experience serving as an editor on a magazine staff. Students are department editors for Vox Magazine and learn how to take a story from an idea through story creation and production and to the printed page, as well as best practices for executing that idea across multiple platforms. Students learn about pitching, working with writers, designers and photographers, editing for content and style, successful story packaging and team collaboration.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4408 and JOURN 4410 or JOURN 4412 or JOURN 4416 or JOURN 4440

JOURN 4986: Advanced Writing
(cross-leveled with JOURN 7986). This course builds on the in-depth, reporting, research, and writing techniques of Intermediate Writing and other writing and reporting classes. It is designed for those who wish to pursue writing as a career. Students complete writing assignments and analyze the work of well-known magazine and book authors.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4410 or JOURN 4412 or JOURN 4416 or JOURN 4480

JOURN 4986W: Advanced Writing - Writing Intensive
(cross-leveled with JOURN 7986). This course builds on the in-depth, reporting, research, and writing techniques of Intermediate Writing and other writing and reporting classes. It is designed for those who wish to pursue writing as a career. Students complete writing assignments and analyze the work of well-known magazine and book authors.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4410 or JOURN 4412 or JOURN 4416 or JOURN 4480

JOURN 4988: Advanced Publication Design
(cross-leveled with JOURN 7988). Project-based capstone in which skills learned in previous courses are applied to professional-level design challenges, such as feature, cover or iPad designs; multimedia prototypes; special editions; or other applications for Vox Magazine, Columbia Missourian, or other outlets.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4500

JOURN 4988W: Advanced Publication Design
(cross-leveled with JOURN 7988). Project-based capstone in which skills learned in previous courses are applied to professional-level design challenges, such as feature, cover or iPad designs; multimedia prototypes; special editions; or other applications for Vox Magazine, Columbia Missourian, or other outlets.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4500

JOURN 4990: Journalism and Democracy
This course seeks to cultivate critical-thinking skills by helping students synthesize and apply knowledge gained from a journalism education to the evaluation of news media performance in a democratic society.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4450

JOURN 4990W: Journalism and Democracy - Writing Intensive
This course seeks to cultivate critical-thinking skills by helping students synthesize and apply knowledge gained from a journalism education to the evaluation of news media performance in a democratic society.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4450

JOURN 4994: Critical Thinking and Reporting
This course seeks to cultivate critical-thinking skills by helping students synthesize and apply knowledge gained from a journalism education to the evaluation of news media performance in a democratic society.
Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4450
JOURN 4992: Innovation and Audience Outreach in Converged Media
(cross-leveled with JOURN 7992). Capstone course brings together the reporting, editing, audience focus, management and marketing skills gained in previous journalism courses. Students evaluate audiences and sustainability for journalistic content, applications, products and experiences and plan, produce and promote internal and external projects. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4992W: Innovation and Audience Outreach in Converged Media - Writing Intensive
(cross-leveled with JOURN 7992). Capstone course brings together the reporting, editing, audience focus, management and marketing skills gained in previous journalism courses. Students evaluate audiences and sustainability for journalistic content, applications, products and experiences and plan, produce and promote internal and external projects. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 4994: Magazine Publishing
(cross-leveled with JOURN 7994). This capstone experience explores key components and recent trends in the magazine industry. The primary focus is creating a magazine prototype that includes conceptualizing ideas and editorial for new titles, as well as business plans for advertising, circulation, finance and production. The course follows a nuts and bolts, learn-by-doing approach to how these components work together and influence one another. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4408 and either JOURN 4410 or equivalent, or JOURN 4360 or 4500. Restricted to Journalism and Science and Agricultural Journalism majors only

JOURN 7000: Communications Law
Legal concepts, including prior restraint, libel, privacy, obscenity, contempt and access as they relate to print, broadcast, advertising and other areas.

Credit Hours: 3

JOURN 7050: Communications Practice
Special instruction in the school's media as an extension of existing advanced media courses, or, in advertising, an extension of advertising creative courses. Contract must be approved by instructor and dean. Some sections of the course may be offered on either A-F or S/U graded basis only.

Credit Hour: 1-3
Prerequisites: Study Abroad sections require consent by International Program. Obtain consent in 76 Gannett

JOURN 7122: Fundamentals of Data Reporting
(cross-leveled with JOURN 4122). Explores the importance to journalists of mining public records and data; reviews basic newsroom mathematics; teaches basic techniques for using Microsoft Excel to create and manipulate spreadsheets and to produce graphics. Graded on A-F basis only. This course is not to be taken by students who have already completed JOURN 4430 or JOURN 7430. Restricted to Graduate Journalism students.

Credit Hour: 1

JOURN 7126: Digital Audio and Visual Basics for Journalists
(cross-leveled with JOURN 4126). Introduces journalism students to audio and video tools used in converged environments. Students will create news stories, ads or promos to meet journalistic or strategic communication goals. Graded on S/U basis only.

Credit Hour: 1

JOURN 7130: Account Services
(cross-leveled with JOURN 4130). Designed for advanced strategic communication students preparing for careers in account services. Section topics vary.

Credit Hour: 1

JOURN 7138: Public Relations Techniques
(cross-leveled with JOURN 4138). Designed for advanced strategic communication students preparing for careers in public relations. Section topics vary.

Credit Hour: 1

JOURN 7140: Interactive Techniques
(cross-leveled with JOURN 4140). Designed for advanced strategic communications students preparing for careers in interactive media. Section topics may vary.

Credit Hour: 1

JOURN 7146: Strategic Communication Techniques
(cross-leveled with JOURN 4146). Designed for advanced strategic communication students. Section topics vary. Graded on A-F basis only.

Credit Hour: 1

JOURN 7148: Interviewing Essentials
(cross-leveled with JOURN 4148). This class focuses on the journalistic interviewing process, from identifying and gaining access to the best sources, setting ethical boundaries, asking the most effective questions and ensuring accuracy. It applies to the full range of story types, from breaking news to in-depth work in all coverage areas.

Credit Hour: 1
Prerequisites: Consent of instructor required

JOURN 7150: Using Infographics
An introduction to the various types of information graphics and how each can be used effectively to help explain the news. Additional emphasis on generating graphic ideas and on the specific challenges of gathering information for graphics.

Credit Hour: 1
Prerequisites: instructor's consent required
JOURN 7152: Concepts in Participatory Journalism
Journalists need to know how to be in conversation with their communities rather than lecture to them. In this course, we will look at how a collaborative culture is changing journalism, and how journalists can take advantage of the new landscape. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Consent of instructor

JOURN 7168: Area Seminar
Special lectures, readings, discussions relating to the urban journalism, state government reporting or local public affairs reporting programs.
Credit Hours: 3

JOURN 7200: Principles of Strategic Communication
(cross-leveled with JOURN 4200). Foundation course familiarizing students with an array of strategic communication tools and how they are used in the field.
Credit Hours: 3

JOURN 7204: Introduction to Strategic Writing and Design
This course will teach you about strategic writing and design, and then show how to apply these skills to key communication platforms such as digital media, TV, radio, social media and others. Along the way, you will learn to think, write and design creatively and strategically. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agriculture Journalism Majors

JOURN 7206: Strategic Writing I
(cross-leveled with JOURN 7206). Students learn strategic writing for a variety of media such as print, radio, television, outdoor, new media, news releases, pitch letters and other persuasive messages.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4226, JOURN 4952

JOURN 7208: Strategic Writing II
(cross-leveled with JOURN 4208). Advanced course in the creation of advertising and public relations materials with an emphasis on strategic planning, developing creative concepts, producing and polishing copy and visuals, execution of finished product and refining. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 7212: Sports and Entertainment Promotion
(cross-leveled with JOURN 4212). Course focuses on the role that research, sponsorship, advertising, public relations, social media, positioning, target marketing, psychographics, and other strategic communication processes play in the promotion of the sports and entertainment industry. The course will critically analyze and examine how chief executive officers of sport and entertainment organizations choose, maintain, or redirect their promotion strategies and activities to help achieve organization missions, encourage tickets sales, and attract large audiences.

JOURN 7213: Strategic Communication Mobile Sports Production
(cross-leveled with JOURN 4213). This class is designed to prepare Strategic Communication students for vital new positions in the world of sports marketing with the emphasis on video productions, strategic planning, and strategic dissemination of video content via multiple media, channels and platforms. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Journalism Graduate Students

JOURN 7216: Media Sales
(cross-leveled with JOURN 4216). Focus of this course is to familiarize students with how to sell a variety of media including newspaper, radio, television, outdoor, new media, and others.
Credit Hours: 3
Prerequisites: Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 7218: Mojo Ad Staff
(cross-leveled with JOURN 4218). Application of strategic communication skills in a professional services agency specializing in the youth and young adult segment. Positions include management, planning, creative media and research. Other electives required based on position. Application required. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Consent of Instructor

JOURN 7220: Creative Portfolio
(cross-leveled with JOURN 4220). Students will produce a free-standing collection of outstanding, polished creative work to demonstrate his/her ability to perform at a high level of creativity.
Credit Hours: 3
Prerequisites: core courses and JOURN 4208 or JOURN 7208

JOURN 7228: Strategic Design and Visuals II
(cross-leveled with JOURN 4228). Advanced course in strategic design and visuals. Persuasive visual principles applied to variety of integrated media including print, broadcast and on-line. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4200, JOURN 4204 and JOURN 4952

JOURN 7236: Psychology in Advertising
(cross-leveled with JOURN 4236). Application of psychological principles, learning, perception, motivation, attitudes to advertising. Emphasis on the increasing use of psychographics (the "lifestyle" factor) to understand consumer wants and buying behavior.
Credit Hours: 3
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4952 or JOURN 7952, JOURN 4204 or JOURN 7204

JOURN 7242: Strategic Communication Leadership
(cross-leveled with JOURN 4242). Strategic Communication Leadership is aimed at students who are eager to develop their skills and abilities
in management and leadership with the likely outcome that they will be leaders in media organizations or as entrepreneurs. Rooted in principles of ethical persuasion and strategic communication, it helps develop individual skills and abilities and the mindset of helping others achieve their goals. Based on the experience and writings of CEO and world-renowned leader David Novak (Strategic Communication alumnus 1974), this is the one of three courses comprising the Leadership Interest Area in Strategic Communication. This course will call on students to commit to the process of their own growth and self-discovery and to help foster the growth and development of fellow learners. It will be an intensive experience and, with commitment to the program, will be immediately applicable to the students' current and future personal and professional lives. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Journalism Graduate students only

JOURN 7244: Creating Cultures Through Effective Strategic Communication and Leadership  
(cross-leveled with JOURN 4244). The course focuses on the role culture and communication play in organizational success, management, and leadership. Rooted in principles of ethical persuasion and strategic communication, it helps students develop individual skills and abilities and the mindset of helping others achieve their goals. The course is distinctly different from traditional organizational studies because of its focus on communication and marketing principles. It offers hands on learning through the case method. Based on the experience and writings of CEO and world-renowned leader David Novak (Strategic Communication alumnus 1974), this is one of three courses comprising the Leadership interest area in Strategic Communication. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Graduate Journalism Majors only

JOURN 7248: Media Strategy and Planning  
(cross-leveled with JOURN 4248). Course deals with strategic planning and the selection and evaluation of appropriate media outlets. Students gain a clear understanding of the problems and issues involved in crafting effective media strategies, creative problem solving and selection of appropriate media.

Credit Hours: 3  
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4952 or JOURN 7592, JOURN 4204 or JOURN 7204. Restricted to Journalism graduate students

JOURN 7250: Management of Strategic Communication  
(cross-leveled with JOURN 4250). How to lead and contribute to strategically sound, highly creative and seamlessly integrated strategic communication on the agency or client side of the business. Directly relevant to agency account management and account planning, as well as client career paths.

Credit Hours: 3  
Prerequisites: Consent of Instructor required

JOURN 7252: Branded Strategic Storytelling  
(cross-leveled with JOURN 4252). This course for Strategic Communication students integrates digital and content marketing planning and operational methodologies designed to deepen students' knowledge of content creation, distribution strategies and audience engagement. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 4200/JOURN 7200, JOURN 4204/JOURN 7204 and JOURN 4952/JOURN 7952. Restricted to Journalism Strategic Communication and Science and Agricultural Journalism Majors

JOURN 7254: Tools, Techniques and Technology of Visual Storytelling  
(cross-leveled with JOURN 4254). In this course, students will learn how to professionally shoot and strategically edit video, visuals and textual content, strategize how to publish that content on owned media and social media platforms, utilize tools like GoPro and Drone technology, and even VR/AR and 360 attachments to make content that is more immersive, influential, impactful and persuasive. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Graduate Journalism Majors only  
Recommended: JOURN 7200, JOURN 7204

JOURN 7256: Public Relations  
Current methods of communicating with constituents as practiced by agencies, corporations and government/not-for-profit organizations. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 4200

JOURN 7262: Digital Strategy I  
(cross-leveled with JOURN 4262). Course covers every step from integrating Internet efforts into the overall strategic communication plan to building a website that works. Designed for those with an interest in interactive advertising. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 7200, JOURN 7204 and JOURN 7952

JOURN 7263: Digital Strategy II  
(cross-leveled with JOURN 4263). Course goes in-depth on top issues in the interactive process from video advertising to social networking sites and how to increase campaign performance with web analytics. Designed for those who want a career in interactive advertising. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 7262. Restricted to Journalism Graduate students

JOURN 7268: Strategic Communication Practicum  
(cross-leveled with JOURN 4268) Practicum experience in public relations, corporate communications and strategic planning with the Missouri School of Journalism serving as client. Students from all journalism disciplines will apply knowledge and skills on a variety of platforms. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: JOURN 4200 or JOURN 7200, JOURN 4204 or JOURN 7204 and JOURN 4952 or JOURN 7952

<tr>
<td>JOURN 7370</td>
<td>The Intersections of Documentary Film and Journalism</td>
<td>(same as FILM_S 7370; cross-leveled with JOURN 4370). The popularity of documentary film in the past ten years has skyrocketed, and recent award-winning documentaries such as Inside Job (2010), Blackfish (2013), and The Invisible War (2012) are simultaneously entertaining audiences and investigating serious issues like the financial collapse, killer whale captivity, and sex crimes in the military-issues that in the past might have been covered exclusively by investigative journalism. What explains the public’s growing fascination with documentary? How is documentary film reacting to recent transformations in the media landscape? Is it filling a critical need that journalism is no longer willing or able to meet? This course will explore the intersection of these two nonfiction storytelling forms—documentary film and journalism—and examine the role played by advocacy in both modes, as well as the cultural and ethical implications of the convergence between journalism and documentary film. In that it is centered on contemporary documentary film culture, the course also takes advantage of the True/ False Film Festival, and will be host to a conference during Week 6, featuring a number of major visiting filmmakers and film critics. Attendance at some sessions is required. Graded on A-F basis only.</td>
<td>2100 or 2150</td>

</table>
JOURN 7371: Documentary Theory
(cross-leveled with JOURN 4371). Documentary and other long-form story telling methods involve a complex series of decisions made in the creation of the work that determines its style, length, direction, point of view and more. These and a thousand other editing decisions are the difference between a successful project that touches its audience and one that falls short. The focus of this course is on the craft of editing, as seen in a variety of documentary and other works and explained through the decisions made in and out of the editing room that lead to the final product. The course will introduce important concepts related to the development and production of documentary work, as well as the public distribution of that work. Students will understand the history of documentary editing as it evolved on its own and as influenced by narrative fiction films, the language of editing, the work of important editors and directors and how it influences today's aesthetic and how to apply what they have learned to their own documentary projects at an advanced level. Graded on A-F basis only.

Credit Hours: 3
Corequisites: JOURN 7564
Recommended: JOURN 7370

JOURN 7372: Documentary Reporting
(cross-leveled with JOURN 4372). Students will learn elementary documentary reporting techniques by producing video and audio content in small group and individual projects. The course focuses on collection of content in the field, interviewing, research, story construction, editing and presentation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor consent

JOURN 7373: Documentary Development
(cross-leveled with JOURN 4373). This course will concern itself primarily with the formation of projects: from theories behind different kinds of documentaries, through real world investigations and research into possible projects, into the pitching and writing stage and lastly to the final idea that will be the basis of students’ senior films. The ability to properly think of, clearly articulate, pitch and hone in on a project idea often makes the difference between a successful and unsuccessful final film. Still these ideas don’t materialize out of thin air; inspiration for great documentaries can come from many places. Understanding how to seize viable project ideas is a crucial skill for a documentary filmmaker. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor consent

JOURN 7375: Documentary Business and the Public Sphere
(cross-leveled with JOURN 4375). Whether it be through contract employment, freelancing, or independent production, creating documentaries requires a knowledge of professional and business practices that differ from many other parts of journalism. The course will introduce important concepts related to the development and production of documentary work, as well as the public distribution of that work. Students will research the industry and develop skills to manage business and professional relationships with the documentary world. Students will build and maintain personal branding materials. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: JOURN 7564

JOURN 7400: Introduction to News Editing
(cross-leveled with JOURN 4400). Introduces the fundamentals of editing of stories and writing headlines for publication online and in print, including an emphasis on style and grammar. Emphasized editing for an online audience.

Credit Hours: 3
Prerequisites: Consent of instructor required

JOURN 7406: Digital News Editing
(cross-leveled with JOURN 4406). Real-world experience in digital editing and news decision-making coupled with newspaper production; emphasis on editing and headline writing across platforms, design for home page and mobile, social media, ethics and fundamentals of grammar. Lab work is hands-on experience at columbiamissourian.com and the Missourian newspaper.

Credit Hours: 3

JOURN 7410: Intermediate Writing
(cross-leveled with JOURN 4410). Lectures provide an introduction to the magazine industry, including types of publications, roles of an editor and skills needed for today's magazine editor. Labs focus heavily on sentence structure, grammar, syntax, usage, punctuation and style.

Credit Hours: 3
Prerequisites: Consent of instructor required
Recommended: JOURN 4450 or JOURN 4804

JOURN 7414: Field Reporting on the Food System and Environment
(same as SCI_AG_J 7414) Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day filed trip. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor consent required

JOURN 7416: Science, Health and Environmental Writing
(cross-leveled with JOURN 4416). In this course students learn how to cover science, health and environmental topics by reporting and writing several stories for publication. Students can develop a marketable specialty or cover these angles in any beat. This course can serve as a substitute for JOURN 7410 Intermediate Writing.

Credit Hours: 3
JOURN 7418: Critical Reviewing
(cross-leveled with JOURN 4418). This course seeks to enrich students' understanding of the arts; support their attendance of concerts, plays, films, and exhibitions; sharpen their skills in critical thinking; and encourage the publication of their reviews in Vox as well as other outlets. Students will analyze the works of critics, gain a general appreciation of the ways to approach each art, and write reviews.

Credit Hours: 3
Prerequisites: JOURN _0900 or JOURN 2100

JOURN 7420: Editorial Writing

Credit Hours: 3
Prerequisites: JOURN 4450

JOURN 7422: Sports Journalism
(cross-leveled with JOURN 4422). A review of everything from "How to Watch Sports" to the history of sports writing.

Credit Hours: 3
Recommended: JOURN 4450; JOURN 7450 or JOURN 4804; JOURN 7804 or JOURN 4306; JOURN 7306 or JOURN 4560; JOURN 7560.

Priority will be given to Sports Journalism students. All other consent will be given on a first-come first-served basis as space allows.

JOURN 7424: Covering Traumatic Events
(cross-leveled with JOURN 4424). This course will prepare reporters and future newsroom managers across platforms for the ethical, practical and emotional challenges of reporting accurately and sensitively on traumatic events. It will give students a deeper understanding of the psychological impact of such events, including natural and man-made disasters, violent crime, accidents, terrorism and war. The course will explore how news coverage affects individuals and communities, and the psychological challenges and ethical hazards for the journalists who cover these events, with a focus on best newsroom practices for managing fast-breaking news stories and mitigating the effects on communities and staffs. The course will also explore the challenges of technology in the context of traumatic events and how social media have affected coverage of and response to crime, war and disasters. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450; JOURN 4804 or JOURN 7804; or JOURN 4560 or JOURN 7560

JOURN 7426: Religion Reporting and Writing
(same as REL_ST 7418). Advanced seminar in religion reporting and writing. Examines the role of religion journalism in faith, public life and culture.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450 or its equivalent in professional writing experience and instructor's consent

JOURN 7428: Health Reporting Skills
This course focuses on reporting, sourcing and analysis techniques journalists use to understand and report on health policy, health-care quality, medical research and the business of health care. Graded on A-F basis only.

Credit Hour: 2-3
Prerequisites: JOURN 4450 or JOURN 7450, JOURN 4306 or JOURN 7306, or JOURN 4804 or JOURN 7804 and instructor's consent

JOURN 7430: Computer-Assisted Reporting
(cross-leveled with JOURN 4430). How to negotiate for, transfer and process electronic information; the unique opportunities computers provide for analyzing information.

Credit Hours: 3
Prerequisites: Graduate standing is required and students must have completed JOURN 7306 or 7450 or 7804

JOURN 7432: Advanced Data Journalism
(cross-leveled with JOURN 4432). Teaches students how to creatively solve problems in journalism using computer programming. Students will learn how to code using the Python language, and how to apply those coding skills to perform real-world tasks. Students will learn the concepts, theory and practical programming skills needed to clean data, scrape web sites and turn databases into interactive online experiences. By the end of the semester, students will have learned the skills to create interactive database presentations, and will have created a functional web app that will serve as a portfolio piece.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4502

JOURN 7434: The Art and Mechanics of the Business Story
The purpose of this course is to give students a deep understanding of business journalism and for them to apply those skills in a real newsroom, Missouri Business Alert. The class will cover everything from audience to financials, and students will leave the class with several work samples to show potential employers. Those classes include: JOURN 4450 or JOURN 7450; JOURN 4306 or JOURN 7306; JOURN 4804 or JOURN 7306; JOURN 4560 or JOURN 7560.

Credit Hours: 3
Prerequisites: Journalism Graduate students who have passes a newsroom reporting class (or its equivalent)

JOURN 7436: Investigative Reporting
Advanced course designed to acquaint reporters with public issues. Students write two in-depth projects and other shorter assignments. Students meet weekly with instructor for editorial suggestions.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450 and instructor's consent

JOURN 7438: Business, Financial and Economic Journalism
(cross-leveled with JOURN 4438). Understanding the news from the business sector and nation's economy for journalists and public relations students. Including financial filings, equity markets, local business, economic indicators, job creation, business data, sports business and what makes business/economic news different from other journalism.
Includes tour of business journalism outlets and markets in New York. Open to all sequences and platforms.

Credit Hours: 3

JOURN 7439: Advanced Business Journalism
(cross-leveled with JOURN 4439). This class requires students to write business stories every week and to attain a high level of financial literacy in the process. The class will cover topics behind the headlines, showing students how to spot economic trends, the stories behind the economy's main actors, and the keys to spotting a troubled business. By the end of the class, all students will be certified users of the Bloomberg Terminal. To take this course, students must enroll in one of the two attached accounting classes (grad or undergrad). Both are offered online. Graded on A-F basis only. Prerequisites: Students must have taken or take concurrently with this course: ACCTCY 2010 I or ACCTCY 7310.

Credit Hour: 1-3

JOURN 7440: Mapping for Stories and Graphics
Learn mapping software to discover information for news stories and lay the foundations for compelling news information graphics. Students will learn how to create maps for print, broadcast and online. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: JOURN 2100 and instructor's consent

JOURN 7450: News Reporting
Assignments on a daily city newspaper covering community news, city, county and state affairs, sports and lifestyle issues. Experience in gathering and writing news, writing under deadline conditions.

Credit Hours: 3
Prerequisites: JOURN 0900 or JOURN 2100

JOURN 7460: Advanced News Reporting
(cross-leveled with JOURN 7460). Assignments to more difficult beat areas, team reporting, and some investigative reporting for community newspaper. Individual conferences and weekly class sessions on contemporary reporting problems.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450

JOURN 7462: Emerging Technologies in Journalism
This course quickly responds to technology developments in journalism through a combination of theory, practice and research. Students learn to use the developing technology and also strategies to manage its impact on media organizations while expanding academic discourse. May be repeated for credit. Graded A-F basis only.

Credit Hour: 1-3

JOURN 7464: Magazines Across Platforms
(cross-leveled with JOURN 4464). As digital editors for Vox Magazine, students manage and create content for Vox's digital platforms, including its WordPress website, blog, social media accounts and award-winning iPad app. Students also work with analytics, engagement and multimedia. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Consent of instructor required
Recommended: JOURN 4450 or JOURN 7450 or JOURN 4804 or JOURN 7804

JOURN 7480: Will Write for Food (and Wine)
(cross-leveled with SCI_AG_J 4480). Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior standing, instructor's consent and JOURN 4450. Restricted to Journalism and Science Agriculture Journalism students only

JOURN 7500: Publication Design
Intermediate design techniques and theories of editorial design. Students apply classroom teachings by designing pages for the Columbia Missourian and Vox Magazine. Students work under deadline and learn attention-to-detail through use of execution of design style guides.

Credit Hours: 3
Prerequisites: JOURN 4360 and instructor's consent. Restricted to Journalism Graduate students only

JOURN 7502: Multimedia Planning and Design
Class covers the basics of web design - Storyboarding, navigation, information architecture, reader behavior, usability studies - as they relate to journalistic stories and persuasive messages. Prerequisites: Completion of one of the following: JOURN 4804, JOURN 4508, JOURN 4406, JOURN 4506, JOURN 4204, JOURN 4306, JOURN 4450 or JOURN 4560; or by instructor's consent.

Credit Hours: 3

JOURN 7506: Magazine Design
Introduction to typography of magazines from manuscript markup through layout to page proof. Extensions and limitations of typography are considered in light of current practice and economic possibilities.

Credit Hours: 3

JOURN 7508: Information Graphics
Work as a news artist for a daily city newspaper graphically covering community news, sports and lifestyle issues. Emphasis on visual thinking and effective presentation. Experience with state-of-the-art software.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450 or the professional equivalent, or instructor's consent

JOURN 7510: Visual Communications
How to communicate through pictures. Topics: visual perception, vocabulary, the role of words, picture editing, design and layout, printers, taste and judgment, camera mechanics. For journalism students who are not photographers.

Credit Hour: 2-3
JOURN 7554: Visual Editing for Multimedia
This class develops understanding of multimedia storytelling by focusing on editing, production, and business model practices for online visual journalism. It builds on a foundation of digital editing, photojournalism, photo editing, videography, and multimedia production. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4804 or JOURN 4550 or JOURN 4306 or JOURN 4406 or JOURN 4506 and instructor's consent; restricted to Journalism and Science and Agriculture Journalism students only

JOURN 7556: Fundamentals of Photojournalism
A rigorous skills course for advanced students preparing for a career in photojournalism consisting of weekly exercises in black and white and color photographic storytelling and lectures that explore the philosophical, historical and ethical roots of the profession.
Credit Hours: 3
Prerequisites: instructor's consent required

JOURN 7558: Advanced Techniques in Photojournalism
Credit Hours: 3
Prerequisites: JOURN 4556 or JOURN 7556

JOURN 7560: Staff Photojournalism
(cross-leveled with JOURN 4560). A laboratory course exploring the photojournalist's role in the news-gathering process. As staffers for the Columbia Missourian, students cover news, sports, features, food assignments and originate single pictures and stories.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558

JOURN 7562: Photojournalism Business Practices
(cross-leveled with JOURN 4562). Discusses legal, financial, organizational and entrepreneurial issues for photojournalists. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558 and JOURN 4566 or JOURN 7566, or instructor's consent required. Restricted to graduate Journalism majors only

JOURN 7564: Micro-Documentary Photojournalism and Videography
This course extends students' understanding and abilities to produce short-form video journalism. They will produce, from concept to web publication, two five-minute non-fiction videos that serves the public through engaging visual sound techniques and compelling narrative. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: JOURN 4558 or JOURN 7558 or JOURN 4306 or JOURN 7306 or JOURN 4804 or JOURN 7804 or consent of instructor. Restricted to Journalism or Science and Agricultural Journalism students only

JOURN 7566: Electronic Photojournalism
Concepts and skills to incorporate photographs, audio and video for interactive presentation, with an emphasis on project design and coding for web and mobile devices. Graded on A-F basis.
Credit Hours: 3
Prerequisites: JOURN 4556 or JOURN 7556 and instructor's consent required

JOURN 7568: History of Photojournalism
Examination of the aesthetic and technological development of photography from its invention in 1839 to the present. Primary emphasis on the evolution and impact of the picture press and the documentary tradition in America, although international developments are studied as well.
Credit Hours: 3

JOURN 7560: International Issues Reporting
An advanced professional seminar on how to recognize, report and write about the domestic influence of international political, economic and cultural problems and trends.
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450

JOURN 7565: International News Media Systems
A comparative survey of current news media systems and how they affect the international flow of information. Newspapers, news agencies, broadcasting and satellite networks of the world are analyzed.
Credit Hours: 3

JOURN 7568: International Journalism
An examination of the gathering, editing and dissemination of international news. The impact of social, economic, cultural and political structures on news media performance is evaluated.
Credit Hours: 3

JOURN 7560: International Issues Reporting
An advanced professional seminar on how to recognize, report and write about the domestic influence of international political, economic and cultural problems and trends.
Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 7450

JOURN 7660: Media Forces Shaping the European Union
Seminar analyzes the role of media in shaping policies and actions of the European Union member nations and their people. Open to graduate students regardless of major and to undergraduates with instructor's consent. Course qualifies for EU Certificate Program.
Credit Hours: 3

JOURN 7662: Global News Across Platforms
(cross-leveled with JOURN 4662). Online, radio, and print production for a converged media enterprise, Global Journalist. Students report, write, plan, edit, design, and produce a video and radio program and website on international news while working under weekly deadlines.
Credit Hours: 3

JOURN 7700: Participatory Journalism
(cross-leveled with JOURN 4700). An examination of how information is shared outside professional journalism, and how journalists can interact with communities. Topics will include community collaboration, social media, audience outreach and understanding, and an expanding...
definition of "news." Students will work with the community on behalf of the Missourian. All interest areas welcome.

**Credit Hour:** 1-3  
**Prerequisites:** instructor’s consent

**JOURN 7706: The Community Newspaper**  
The role of the newspaper in the community. Handling of news categories especially applicable to smaller newspaper. Field trips giving students experience in publishing newspapers in the state.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 0900 and JOURN 2100

**JOURN 7716: Women and the Media**  
(same as WGST 7716; cross-leveled with JOURN 4716, WGST 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.  
**Credit Hours:** 3  
**Prerequisites:** instructor’s consent required

**JOURN 7718: Law and the Justice System**  
(cross-leveled with JOURN 4718). Lectures, readings, discussions, writing assignments relating to justice system reporting from the view of attorneys, prosecutors, judges, correction and probation officers, with the cooperation of the Missouri Bar.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 0900 or JOURN 2100

**JOURN 7734: Journalism and Chaos: How to Understand and Cover 21st Century Business Models**  
The purpose of this class is to explore alternative business/journalism models that can be grown from the rib of the traditional newsroom.  
**Credit Hours:** 3  
**Prerequisites:** Restricted to Journalism and Agricultural Journalism students only

**JOURN 7736: Changing Media Business Models**  
Analysis of the economic changes in news media. Explore concepts and theories of monetizing media. Hands-on experience in creating innovations in media business models.  
**Credit Hours:** 3

**JOURN 7738: Thought, Language and Journalism**  
This seminar uses the methods of science to explore and better understand the biases and limitations of language, culture, technology and other factors shaping the semantic environment as applied to the practice of journalism and mass communications studies.  
**Credit Hour:** 1-3

**JOURN 7802: Fundamentals of TV, Radio and Photojournalism**  
Skills, theory and ethics of broadcast news and photojournalism for non-broadcast majors. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 2100

**JOURN 7804: Convergence Reporting**  
(cross-leveled with JOURN 4804). Practice and theory of reporting for converged media. Students produce multimedia reports for traditional and converged media operations. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 7802 or instructor’s consent

**JOURN 7806: Convergence Editing and Producing**  
(cross-leveled with JOURN 4806). Practice and theory of editing and producing material for publication or broadcast in a converged environment. Students produce media for multiple outlets. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 4306 or JOURN 7306 or JOURN 4804 or JOURN 7804

**JOURN 7810: National News Writing and Production**  
(cross-leveled with JOURN 4810). Learn updated storytelling and video-production techniques on-site at Newsy, a next generation news network. You will work weekly shifts throughout the semester, culminating in the production of your own portfolio and mock interviews with hiring managers. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** instructor’s consent required

**JOURN 7812: Online Audience Development**  
(cross-leveled with JOURN 4812). You’re already using social media every day - but are you using it in the most effective way possible? In Online Audience Development students will explore, envision and evaluate the possibilities of social media integration in news production workflows. We’ll experiment with emerging social platforms to see how they might fit in a newsroom’s social media and branding playbook. You will also exercise, develop and improve on all the journalism skills practiced in previous classes: researching, reporting, editing, producing, proofreading, photo editing and design. The big difference? This time you’ll be reporting on our newsrooms in order to help create deeper connections with the audience. Graded A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** Instructor’s consent required

**JOURN 7814: Multimedia Sports Journalism**  
Assignments on a daily regional website and radio station covering sports with converged media. Experience in reporting game and feature stories under deadline conditions. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** JOURN 4306 or JOURN 7306, or JOURN 4450 or JOURN 7450, or JOURN 4804 or JOURN 7804, or JOURN 4556 or JOURN 7556 or JOURN 4560 or JOURN 7804. Restricted to Journalism and Science and Agricultural Journalism students only. Instructor’s consent required

**JOURN 7940: Internship in Journalism**  
Credit for approved employment in journalism. Specifications for this course appear in the Undergraduate Catalog. Graded on S/U basis only.
Students learn about pitching, working with writers, designers and photographers, editing for content and style, successful story packaging and team collaboration.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4410 or JOURN 7410, JOURN 4408 or JOURN 7408

**JOURN 7986: Advanced Writing**  
(cross-leveled with JOURN 4986). This course builds on the in-depth, reporting, research, and writing techniques of Intermediate Writing and other writing and reporting classes. It is designed for those who wish to pursue writing as a career. Students complete writing assignments and analyze the work of well-known magazine and book authors.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4410 or JOURN 7410 or equivalent. Restricted to Journalism students only

**JOURN 7988: Advanced Publication Design**  
(cross-leveled with JOURN 4988). Project-based capstone in which skills learned in previous courses are applied to professional-level design challenges, such as feature, cover or iPad designs; multimedia prototypes; special editions; or other applications for Vox Magazine, Columbia Missourian or other outlets.

**Credit Hours:** 3  
**Prerequisites:** Consent of instructor required  
**Recommended:** JOURN 4500 or JOURN 7500

**JOURN 7994: Magazine Publishing**  
(cross-leveled with JOURN 4994). This capstone experience explores key components and recent trends in the magazine industry. The primary focus is creating a magazine prototype that includes conceptualizing ideas and editorial for new titles, as well as business plans for advertising, circulation, finance and production. The course follows a nuts and bolts, learn-by-doing approach to how these components work together and influence one another.

**Credit Hours:** 3  
**Prerequisites:** JOURN 4408 or JOURN 7408 and either JOURN 4410 or JOURN 7410, JOURN 4408 or JOURN 7408

**JOURN 7998: Mass Media Seminar**  
Concepts, functions and major problems of print and electronic media in the United States. Two hours lecture and one hour of discussion lab each week.

**Credit Hours:** 3

**JOURN 8001: Seminar on Topics in Journalism**  
Problems, issues and approaches to research in selected topic areas. Specific content varies by needs of faculty and students and will be announced in advance.

**Credit Hours:** 3

**JOURN 8006: Quantitative Research Methods in Journalism**  
Research methods of utility in journalism and philosophy of science. Emphasis on understanding common quantitative methods and tools.
JOURN 8008: Qualitative Research Methods in Journalism
Course is designed to introduce graduate students to common qualitative approaches applicable to the study of journalism and mass communication. Students will learn a variety of approaches, practical methodologies and tools that will help them conduct research.

Credit Hours: 3
Prerequisites: six hours of journalism or instructor's consent

JOURN 8010: Advanced Qualitative Methods in Journalism
Designed to familiarize doctoral students with qualitative approaches applicable to the study of journalism and mass communication. Students will be introduced to a variety of philosophical and conceptual approaches as well as to practical tools-oriented methodologies in four major areas of qualitative research.

Credit Hours: 3

JOURN 8016: Advanced Quantitative Research Methods
Experimental design, factor analysis, semantic differential and Q methodology as tools for the researcher in journalism, communication.

Credit Hours: 3

JOURN 8020: Principles and Tools in Strategic Communication Planning
Introduces the latest principles of strategic communication and the importance of strategic planning in many contemporary communication fields. A significant operational component in the course introduces skills such as budgeting, scheduling objective-setting, organizing personal time, and managing people.

Credit Hours: 3

JOURN 8026: Philosophy of Journalism
Seminar deals with wide assortment of philosophical questions in journalism but concentrates on epistemology, political press theory and ethics. Such questions as “objectivity” in journalism, press responsibility, professionalism.

Credit Hours: 3

JOURN 8028: The Literature of Journalism
Reading of ten basic books about journalism. Several books are assigned to everyone; several are assigned on an individual basis, and several are electives. Oral reports, short papers, and class discussion.

Credit Hours: 3

JOURN 8030: History of Mass Media
American mass media from colonial days to present in the context of social, economic and political change. History research.

Credit Hours: 3

JOURN 8036: Historical Methods
Graduate seminar in research methods and theoretical approaches used by media historians, including oral history, biography, quantitative and archival research.

Credit Hours: 3

JOURN 8038: Seminar in Communications Law
A graduate-level survey of issues in media law, as well as an introduction to First Amendment theory and scholarship. The course familiarizes students with fundamental concepts of mass media law through exposure to primary materials and provides students with the opportunity to analyze the issues discussed in class through individual research projects.

Credit Hours: 3

JOURN 8042: Health News and Promotion
This is an advanced seminar that examines and critiques the literature on health communication in news about health and its impact and health promotion campaigns.

Credit Hours: 3

JOURN 8044: Strategic Conflict Management
Strategic conflict management is a cross-disciplinary study that integrated organizational behavior, crisis management, conflict resolution and image repair. This course melds theory with practice, and is for those venturing into media management, law, and strategic communication.

Credit Hours: 3
Prerequisites: graduate journalism standing required

JOURN 8046: Controls of Information
A detail of actions by government, largely the federal government, calculated to limit or alter the content of information in the United States.

Credit Hours: 3

JOURN 8052: Case Studies in the Digital Globe
This course seeks to broaden students perspective about how digital technology affects the world around us. Final course in the CDiG certificate. Inter-departmental course.

Credit Hours: 3

JOURN 8054: Entrepreneurship and Media of the Future
This course will give students an intense hands-on experience in working with real entrepreneurs on complex business problems in the journalism field. Example companies are the Associated Press, Kachinge, the Chicago Sun-Times, Spot-Us and the Media Policy Center. The goal is to offer a solution or solutions to the stated problem, and to present these ideas in a competitive, symposium environment.

Credit Hours: 3
Prerequisites: Graduate standing in Journalism or MBA program

JOURN 8056: Theory of Mass Communication
Major communication theories and theorists. Interpersonal theories are included as they relate to mass communication.

Credit Hours: 3

JOURN 8058: Communication in Media Organizations
Covers key concepts in management and communication in media organizations, including print, broadcast, advertising and public relations. Topics include leadership, human resource management, managerial/
employee communication, career success, financial decision-making, teambuilding and goal setting in media organizations.

**Prerequisites:** Open to students in the online master's program only

---

**JOURN 8068: The Mass Media and the Presidency**
This seminar examines that historical triad of the free expression clauses of the First Amendment, the presidency and the American mass media through readings, class assignments and a project.

**Credit Hours:** 3

---

**JOURN 8070: Proseminar in Communications**
Seminar on professional and academic issues in journalism and communication. Specific discussion topics selected by faculty and students on a per class basis.

**Credit Hour:** 1-3

---

**JOURN 8080: Media Ethics**
An introduction to and application of ethical theory to their contemporary mass media.

**Credit Hours:** 3

---

**JOURN 8085: Problems in Journalism**
Individual work on chosen and specified problems not associated with the master's thesis or project. Topic must be arranged with supervising teacher prior to registration.

**Credit Hour:** 1-4  
**Prerequisites:** Master's students only

---

**JOURN 8090: Research in Journalism**
Guidance for graduate students engaged in research toward production of the thesis. Graded on a S/U basis only.

**Credit Hour:** 1-9

---

**JOURN 8092: Photography in Society**
Social and political dimensions of still photography with emphasis on critical thinking and analysis in visual communication.

**Credit Hours:** 3

---

**JOURN 8096: MA Project Seminar**
Choosing and designing an appropriate profession project; preparation to carry out work successfully; discussion of trends and future directions in various areas of journalism. Must be completed before starting the professional project. Graded on S/U basis only.

**Credit Hour:** 1

---

**JOURN 8100: MA Thesis Seminar**
Choosing and developing an appropriate research topic for a thesis; designing a research strategy and learning appropriate investigative techniques. Must be completed before starting thesis. Graded on S/U basis only.

**Credit Hour:** 1

---

**JOURN 8106: The Magazine: Then and Now**
Examines magazines' history, role, economics and ethical practices, and the companies and people who produce them, particularly in the United States. It also reviews research perspectives that have illuminated this medium.

**Credit Hours:** 3  
**Prerequisites:** JOURN 8000

---

**JOURN 8110: Editing and News Design for the High School Advisor**
Fundamentals of editing and headline writing for publication. Principles of design with emphasis on newspaper usage.

**Credit Hours:** 3

---

**JOURN 8120: Media Law and Ethics for the High School Advisor**
Legal concepts, including prior restraint, libel, privacy, obscenity, contempt and access as they related to print, broadcast, scholastic journalism, advertising and other areas. Includes examination of media ethics and practice.

**Credit Hours:** 3  
**Prerequisites:** Restricted to students in the online College of Education Master's program for high school journalism instructors

---

**JOURN 8185: Area Seminar in Journalism**
Seminar designed to accompany JOURN 8190, Area Problem. Through readings and discussions the master's student examines the special area related to the project.

**Credit Hours:** 3

---

**JOURN 8190: Area Problem in Journalism**
Work project enabling a master's student to demonstrate professional competence; may be one offered in a graduate reporting program or a creative project designed to meet a particular interest of student. Graded on S/U basis only.

**Credit Hours:** 1-9

---

**JOURN 9000: Doctoral Theory and Research I**
First semester of a one-year course that covers theory and method in important topic areas. Each topic would be examined from several theoretical and methodological points of view. Required of doctoral students.

**Credit Hours:** 3

---

**JOURN 9006: Doctoral Theory and Research II**
Continuation of JOURN 9000. Required of doctoral students.

**Credit Hours:** 3

---

**JOURN 9008: Readings in Journalism**
Directed readings for doctoral candidates. Designed to supplement work in other courses and to broaden student's knowledge of trends, interpretations and developments in the media.

**Credit Hours:** 1-5
**JOURN 9010: Doctoral Research Design**
This course is designed to meet the University requirement for a first-year qualifying examination process for doctoral students, involve students in research early in their programs and encourage students to recruit members of their doctoral committees.

**Credit Hours:** 3

---

**JOURN 9085: Problems in Journalism**
Individual work on chosen and specified problems not associated with the doctoral dissertation or project. Topic must be arranged with supervising teacher prior to registration.

**Credit Hour:** 1-4
**Prerequisites:** Doctoral students only

---

**JOURN 9087: Professional Development**
Weekly discussion session for doctoral students. Required of all doctoral students. Graded on S/U basis only.

**Credit Hour:** 1

---

**JOURN 9090: Research in Journalism**
Guidance for doctoral candidates engaged in investigations looking toward production of the dissertation. Graded on a S/U basis only.

**Credit Hours:** 1-9

---

**KOREAN (KOREAN)**

**KOREAN 1001: Topics in Korean - General**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3
**Prerequisites:** instructor's consent

**KOREAN 1005: Topics in Korean - Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3
**Prerequisites:** instructor's consent

**KOREAN 1100: Elementary Korean I**
Introductory course on Korean language. Five hours classroom instruction with one hour lab weekly.

**Credit Hours:** 6

**KOREAN 1200: Elementary Korean II**
Five hours classroom instruction with one hour lab work weekly.

**Credit Hours:** 6
**Prerequisites:** C- or better in KOREAN 1100

**KOREAN 1830: Survey of East Asian History**
(same as HIST 1830)Introductory survey of the history of East Asian countries (China, Korea, Vietnam, and Japan) in the past two thousand years, focusing on their cultural, economic, and political traditions as well as their transformations in the modern era. Graded on A-F basis only.

**Credit Hours:** 3

**KOREAN 2001: Topics in Korean - General**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3
**Prerequisites:** sophomore standing or instructor's consent

**KOREAN 2005: Topics in Korean - Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Graded on A-F basis only.

**Credit Hour:** 1-3
**Prerequisites:** sophomore standing or instructor's consent

**KOREAN 2160: Intermediate Korean Language I**
Intermediate Korean I continues to build on the skills students acquired in the first-year series with increasing work in authentic materials and situations in conversation and reading that encourage students to understand the use of language in its social and cultural context.

**Credit Hours:** 3

**KOREAN 2310: Korean Civilization I**
Focuses on understanding traditional Korean people and culture through examining social, political, economic, and belief systems. Considers literature, art, folklore, and history up to the late 19th century. May be taken independently of KOREAN 2320.

**Credit Hours:** 3

**KOREAN 2320: Korean Civilization II**
Considers the situation and culture of Korea at the end of the Chosun Kingdom, and the period of modernization beginning about 1876. Investigates how modernization has changed Korea by looking at attitudes, behaviors, values, philosophies, and trends of Korea in the 20th and 21st centuries. May be taken independently of KOREAN 2310.

**Credit Hours:** 3

**KOREAN 2810: History of Korea: Premodern to Hypermodern**
(same as HIST 2810). This course examines Korea historically. The area known as Korea and the people identified as Korean are considered temporally from the ancient times to the contemporary period. This course begins with the questions of what is Korea and when it became a distinct place in world history. More time is devoted to the contemporary period than other periods, and North Korea is equally considered with South Korea. This course is not only about what happened in Korea but also about how Korea's historical events are causally connected to world events, with the greater aim of universalizing Korea's historical questions.

**Credit Hours:** 3
KOREAN 3001: Topics in Korean-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: sophomore standing and instructor's consent.
Credit Hour: 1-3

KOREAN 3005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hours: 3
Prerequisites: sophomore standing and instructor's consent

KOREAN 3160: Intermediate Korean Language II
Continues to build on the skills students acquire in the third semester of Korean language with increasing work in authentic materials and situations in conversation and reading. Encourages students to understand the use of language in its social and cultural context.
Credit Hours: 3
Prerequisites: KOREAN 2160, or instructor's consent

KOREAN 3180: Advanced Korean I
The course is designed to advance students to greater strength in oral communication competence, reading skills, and socio-cultural knowledge of Korea. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C- or higher in KOREAN 3160, or equivalent

KOREAN 3650: The Korean Peninsula in World Affairs: Political, Economic, and Cultural Forces
Designed as interdisciplinary introduction to Korean politics, public policy, economics, and society, paying special attention to the government and politics of South Korea. The Korean peninsula (South and North Korea) has important implications for U.S. foreign policy toward Asia. Surrounded by Russia, China, and Japan, the Korean peninsula long been regarded among social scientists as one of major regional cases that informs the broader theoretical debate on political and economic issues including democratization, civil society, economic development, and security. Course aims to provide students with the information necessary to understand and analyze modern South and North Korea, and discuss the future of the two Koreas as well as of U.S. foreign policy toward Korea.
Credit Hours: 3
Prerequisites: sophomore standing

KOREAN 3800: Korean Economic Development and US-Korean Free Trade Agreement
Covers introductory theories of economic development and overviews Korean historical economic development plans. Aids with understanding how South Korean achieved high levels of economic development and what policies the South Korean Government implemented to spur growth. US -Korea Free Trade Agreement is a good example of how trade promotes the achievement of development goals.
Credit Hours: 3

KOREAN 3890: Korean Society Through Cinema
(same as FILM_S 3895). Examines the way in which Korean film reveals the cultural, political, and ideological orientation of the society in which it is created and circulated. Compares films from North and South Korea, considering modernity, gender, nation-hood, and class. Graded on A/F basis only.
Credit Hours: 3
Prerequisites: sophomore standing

KOREAN 4001: Topics in Korean-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-3
Prerequisites: sophomore standing and instructor's consent

KOREAN 4005: Topics in Korean - Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-3
Prerequisites: sophomore standing and instructor's consent

KOREAN 4220: Korean Unification
Explores many different topics related to Korean Unification. Studies North Korean ideology, political system, economic system, military, and negotiating behavior. Examines Unification policies of Koreas as well as past efforts toward Unification. Considers various scenarios of unification. Studies unification attitudes and values of Korean people including anti-American values, and the roles of neighboring countries.
Credit Hours: 3
Prerequisites: junior standing required

KOREAN 4260: The Korean Diaspora in the U.S., Japan and China
Interdisciplinary course related to the phenomenon of migration and settlement from Korea. Course seeks to deepen understanding of the ways in which Korean immigrants have shaped and continue to shape social thought as well as institutions in the United States, Japan and China. Draws upon literature, history and cultural studies to examine experiences of Koreans living in the U.S., Japan and China. Through reading critical literatures, students address issues such as immigration history, race/ethnicity, racism and resistance, gender and sexuality, culture and identity, labor, migration and globalization, class, education, religion.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent required

KOREAN 4867: North Korea: History, Political Economy, Culture
(same as HIST 4867). The aim of this course is to survey North Korea's history, especially in terms of political economy and culture. Through several themes, we will examine the historical situations of North Korea from its beginnings in the postliberation period to the present, as North Korea undergoes monumental changes. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: sophomore standing, or instructor's consent

Laboratory Animal Medicine (LAB_AN)

LAB_AN 8090: Research in Laboratory Animal Medicine
Research expected to terminate in a thesis. Graded on a S/U basis only.
Credit Hour: 1-99

LAB_AN 9087: Seminar in Laboratory Animal Medicine
Theme-oriented seminars and discussions in the field of laboratory animal medicine, comparative medicine or related areas. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: departmental consent

LAB_AN 9437: Pathology of Laboratory Animals
Pathogenesis, pathology and diagnosis of naturally occurring diseases in animals used in research.
Credit Hours: 4
Prerequisites: departmental consent

LAB_AN 9468: Laboratory Animal Biology
Anatomy, taxonomy, reproduction, genetics, nutrition, and behavior of common laboratory animals. Emphasis is placed on mice and rats, including genetically-engineered models with comparative discussions on other laboratory animals. Prerequisites: departmental consent
Credit Hours: 4

LAB_AN 9469: Laboratory Animal Resource Management
Policies, standards and regulations in the care and use of laboratory animals, including colony management, animal procurement, cost accounting, facility design, and supervisory skills.
Credit Hours: 4
Prerequisites: departmental consent

LAB_AN 9476: Grant and Manuscript Writing for Biomedical Researchers
Topics include experimental design applied biostatics and writing effective grant proposals and scientific manuscripts. Methods include lecture, discussion and assignments including an individual grant proposal which will be reviewed by a mock study section.
Credit Hours: 3
Prerequisites: LAB_AN 9475; instructor's consent

LAB_AN 9477: Laboratory and Project Management
This course will provide graduates with professional development skills and career guidance including instruction in laboratory and project management. Topics will include job searching, start-up considerations, equipping a lab, personnel management and budget management. Graded on S/U basis only.
Credit Hour: 1

Prerequisites: enrollment in Comparative Medicine Area Program or approval of course coordinator

Latin (LATIN)

LATIN 1100: Elementary Latin I
Forms, grammar, syntax.
Credit Hours: 5

LATIN 1100H: Honors Elementary Latin
Beginning Latin for Honors Eligible students.
Credit Hours: 5
Prerequisites: Honors eligibility required

LATIN 1200: Elementary Latin II
Continuation of LATIN 1100.
Credit Hours: 5
Prerequisites: LATIN 1100

LATIN 1200H: Honors Elementary Latin II
Continuation of LATIN 1100H.
Credit Hours: 5
Prerequisites: LATIN 1100. Honors eligibility required

LATIN 2000: Latin Reading
Readings in Latin prose and poetry.
Credit Hours: 3
Prerequisites: LATIN 1200

LATIN 2000H: Latin Reading - Honors
Readings in Latin prose and poetry.
Credit Hours: 3
Prerequisites: LATIN 1200. Honors eligibility required

LATIN 4121: Methods of Teaching Foreign Languages
(same as SPAN 4120, FRENCH 4120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: departmental consent

LATIN 4300: Latin Poetry
Readings in selections from the Latin poets.
Credit Hours: 3
Prerequisites: LATIN 2000

LATIN 4350: Latin Prose
Selections from various Latin prose writers; some composition at instructor's discretion.
Credit Hours: 3
Prerequisites: LATIN 2000
LATIN 4500: Latin Stylistics
Study and writing of connected prose compositions.
Credit Hour: 1-3
Recommended: LATIN 4300

LATIN 4510: Age of the Scipios
Critical readings in and integrated analyses of the culture of the second century B.C.
Credit Hour: 3-6
Recommended: LATIN 4300

LATIN 4520: Age of Cicero
Critical readings in and integrated analyses of the culture of the last decades of the Roman Republic.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4530: Vergil
Readings, discussion, and literary analysis of Vergil's Aeneid.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4540: Augustan Literature
Critical readings in and integrated analyses of the culture of Augustan Rome.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4580: The Theodosian Age
A survey of major literary works of the late fourth and early fifth centuries. Readings from Augustine, Ambrose, Prudentius, Paulinus of Nola, Ammianus Marcellinus, Claudian.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4590: Medieval Latin
Selected texts of Middle Ages and Renaissance. For students with primary interest in history, literature, philosophy, religion, Romance philology, or the classical tradition, experience with Latin sources in their field.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4600: Survey of Latin Literature
Latin literature from origins to end of Roman Empire; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Recommended: LATIN 4300

LATIN 4960: Special Readings in Latin
Readings in authors and texts not covered in other courses.

LATIN 7300: Latin Poetry
Readings in selections from the Latin poets. Available to students for graduate credit in departments other than Classical Studies.
Credit Hours: 3
Prerequisites: LATIN 2000 or equivalent

LATIN 7350: Latin Prose
Selections from various Latin prose writers; some composition at instructor's discretion. Available to students for graduate credit in departments other than Classical Studies.
Credit Hours: 3
Prerequisites: LATIN 2000

LATIN 7500: Latin Stylistics
Study and writing of connected prose compositions.
Credit Hours: 3
Prerequisites: two years classical Latin or equivalent

LATIN 7510: Age of the Scipios
Critical readings in and integrated analyses of the culture of the second century B.C.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7520: Age of Cicero
Critical readings in and integrated analyses of the culture of the last decades of the Roman Republic.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7530: Vergil
Readings, discussion, and literary analysis of Vergil's Aeneid.
Credit Hours: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 7580: The Theodosian Age
A survey of major literary works of the late fourth and early fifth centuries. Readings from Augustine, Ambrose, Prudentius, Paulinus of Nola, Ammianus Marcellinus, Claudian.
Credit Hours: 3
Prerequisites: two years of Classical Latin or equivalent

LATIN 7590: Medieval Latin
Selected texts of Middle Ages and Renaissance. For students with primary interest in history, literature, philosophy, religion, Romance philology, or the classical tradition, experience with Latin sources in their field.
Credit Hours: 3
Prerequisites: instructor's consent
LATIN 7600: Survey of Latin Literature
Latin literature from origins to end of Roman Empire; emphasis on authors not covered in other courses, to provide general view of styles and genres.
Credit Hours: 3
Prerequisites: two years Classical Latin or equivalent

LATIN 7960: Special Readings in Latin
Readings in authors and texts not covered in other courses.
Credit Hour: 2-3
Prerequisites: two years Classical Latin or equivalent

LATIN 8000: Proseminar in Latin Texts
Credit Hours: 3
Prerequisites: instructor's consent

LATIN 8010: Latin Rough Guide
Intensive exploration of Latin literature from the Roman Republic through the Late Empire. Emphasis upon texts as both literary and cultural artifacts whose interpretation requires familiarity with the historical and archaeological legacy of antiquity as well as modern exegetical strategies.
Credit Hours: 3

LATIN 9587: Seminar in Latin Epic Poetry
Seminar in Latin Epic Poetry.
Credit Hour: 1-99

LATIN 9687: Seminar in the Augustan Age
Integrated studies in the culture of the age of Augustus--its literature, art and architecture, religion, political and social institutions.
Credit Hour: 3-6

LATIN 9787: Seminar in Late Antiquity
Integrated studies in the culture of late antiquity with interdisciplinary focus.
Credit Hours: 3
Prerequisites: consent required for non graduate students

Law (LAW)

LAW 5010: Civil Procedure I
Fundamental and recurrent problems in civil actions in federal and state courts; remedies; pleading; discovery; trials; jurisdiction; appeals; joinder; preclusion.
Credit Hour: 1-3

LAW 5015: Civil Procedure II
Continuation of LAW 5010.
Credit Hour: 1-3

LAW 5020: Contracts I
Contract formation, insufficient and defective agreement, bases of promissory liability (including consideration and promissory estoppel), restitution, and abuse of bargaining process, Statutes of frauds, parol evidence rule and principles of interpretation, contract performance and risk allocation, remedies for breach.
Credit Hour: 1-3

LAW 5025: Contracts II
A continuation of Law 5020
Credit Hour: 1-3

LAW 5035: Criminal Law
The purposes of criminal law; nature of criminal responsibility; characteristics of particular crimes.
Credit Hour: 1-4

LAW 5040: Property I
Classification of property; personal property; possession, bailment, lien, gift, bona fide purchase; land conveyancing at common law under statute of uses; freehold estate in land; concurrent estate in land; and introduction to future interests.
Credit Hours: 3

LAW 5045: Property II
Landlord and tenant; easements, profits, and licenses; support; introduction to water rights, nuisance, covenants running with the land, equitable servitudes, zoning, and modern conveyances.
Credit Hours: 3

LAW 5050: Property
Classification of real and personal property; rights to found goods; bailments; possession and adverse possession; estates in land and future interests; concurrent ownership; Landlord and tenant; easements, profits and licenses; covenants running with land and equitable servitudes; contracts for the sale of land; conveyancing.
Credit Hour: 1-5

LAW 5070: Torts
Principles and practices governing recovery of damages for injuries to person or property. Topics typically covered are intentional torts, negligence, strict liability, products liability, immunities and a survey of various "no fault" proposals.
Credit Hour: 1-5

LAW 5080: Legal Research and Writing
An introduction to the basics of legal research, legal citation and legal writing. Each student writes two objective office memoranda, and a client letter.
Credit Hour: 1-3

LAW 5085: Advocacy and Research
An introduction to Computer Assisted Legal Research, written advocacy, oral advocacy, and the Missouri rules of appellate procedure. Each
student writes a trial court motion and brief and then argues that motion. Each student also writes an appellate brief and presents an oral argument in the First Year Moot Court Competition directed by the Board of Advocates (BOA).

**Credit Hour: 1-3**

**LAW 5090: Legal Reasoning**
A limited enrollment course designed to assist first-year students to better understand the legal system, prepare for examinations and improve their legal analysis and reasoning skills. Graded on S/U basis only.

**Credit Hour: 1-2**

**LAW 5095: Lawyering: Problem Solving and Dispute Resolution**
The course is designed to provide students an introduction to critical lawyering skills; to give students an overview of the alternative processes that a lawyer can employ to resolve a client's problem; and to offer students an understanding of the lawyer's role as a problem solver. It includes an introduction to Interviewing, Counseling, Negotiation, Mediation, Arbitration, mixed dispute resolution processes and ways to choose or build dispute resolution process.

**Credit Hour: 1-2**

**LAW 5220: Constitutional Law**
Study of theories of judicial review and justiciability; sources of federal legislative power, commerce, taxing, spending, treaty, presidential, military powers; power of states to regulate and tax interstate commerce; preemption; state actions doctrine; due process, equal protection, First Amendment rights.

**Credit Hour: 1-4**

**LAW 5240: Criminal Procedure**
Constitutional and other limitations placed upon law enforcement officers and prosecutors.

**Credit Hour: 1-3**

**LAW 5260: Evidence**
The basic law of evidence; use in trials, relevancy, circumstantial proof and real proof; use of witnesses; methods of examination; presumptions and burden of proof; and, functions of judge and jury.

**Credit Hour: 1-4**

**LAW 5280: Professional Responsibility**
Responsibilities of lawyer to client, courts and the public. Topics include: organization of the legal profession, fees, conflicts of interest, the confidential relationship, advertising and solicitation, unauthorized practice and courtroom behavior.

**Credit Hour: 1-3**

**LAW 5310: Administrative Law**
(same as PUB_AF 8864). Administrative Law is concerned with the process government agencies use to make decisions. As such it develops the requirements for establishing rules and policies. It also covers the means by which agencies enforce regulations and statutory provisions, and the means for securing judicial review of rules and enforcement actions.

**Credit Hour: 1-3**

**LAW 5320: Advanced Legal Research**
Skills training in advanced research techniques and resources used in law practice. Designed to help students become critical legal information consumers with an emphasis on developing effective, cost-efficient research strategies. Topics include advanced litigation research, legislative and regulatory history, audience research, research in transactional practice areas, and research in other practice areas including legal ethics, public interest law, and international law. In-depth practice with Lexis, Westlaw and free Internet sources, including appropriate and effective use of social networking tools to extend research is also taught.

**Credit Hour: 1-2**

**LAW 5321: Advanced Legal Writing**
This course is designed to help students think purposefully about the process of writing and to practice writing and editing in a disciplined way. Students will do exercises involving: rhetorical techniques; grammar; punctuation; and, word usage. Students also will either rewrite or critique portions of appellate briefs or judicial opinions to emphasize a particular technique.

**Credit Hour: 1-3**

**LAW 5323: Advanced Torts: Dignitary and Economic Torts**
The course will examine dignitary and economic torts covering but not limited to such topics as: defamation, invasion of privacy, tortious interference, misrepresentation and injurious falsehood. Unlike tortious conduct that results in an individual suffering physical harm or contact, the claims that arise from these torts represent one of two kinds of non-physical injury - independent dignitary harms that are similar to or include emotional harms or independent economic or commercial harms. The purpose of the course is to provide students with an opportunity to explore tortious conduct and remedies available that are omitted typically from the First Year Torts course.

**Credit Hour: 1-3**

**LAW 5325: Advanced Trial Practice**
This course will expand student knowledge of opening statements, direct/cross examination of witnesses, jury instructions, and closing arguments. The course also will focus significantly on the examination/cross examination of expert witnesses. Grading is based on student participation in the examination of witnesses and a semester-ending written trial brief. NOTE: Inter session Trial Practice will not satisfy the prerequisite.

**Credit Hour: 1-3**

**Prerequisites:** LAW 5260 Evidence and LAW 5925 Trial Practice

**LAW 5330: Advocacy, Family Violence and Public Policy**
Interdisciplinary presentations examine both the state of family violence in America and the cross disciplinary issues in effective intervention, including legal procedures. The seminar is open to 2nd or 3rd year law students and other professional graduate students with permission of the faculty.
LAW 5375: Basic Federal Income Taxation
The course is designed to introduce students to the income tax considerations that arise in a variety of legal contexts and is also beneficial for students not planning to pursue a career in tax. Topics covered are federal income tax problems of individual taxpayers; nature of income; when and to whom income is taxable; exclusion from tax base; deduction; tax effects of exchange or other disposition of capital assets.
Credit Hour: 1-4

LAW 5392: Business, Entrepreneurship, and Tax Law Review
The Business, Entrepreneurship, and Tax Law Review (BETR) is affiliated with the Center for Intellectual Property and Entrepreneurship (CIPE). The BET Review journal will give students an opportunity to hone their legal research and writing skills, as well as their leadership skills as editors of the journal, on contemporary issues in growing areas of legal practice. It will also provide an outlet for the publication of articles stemming from symposia and a colloquium series that will be held on topics in the fields of intellectual property, entrepreneurship, and tax.
Credit Hour: 1-2

LAW 5387: American Legal History to 1876
This is a review of Legal History. The course covers such topics as the impact of the English common law heritage; the development of law in the American colonies; and, slavery, race and gender in 19th century America. The course ends with the conclusion of the Civil War. The course will explore the impacts of historical events on the development of law, but the course does not presume prior study of American history.
Credit Hour: 1-3

LAW 5388: American Legal History from 1876
Historical study of the development of American law since the Civil War. The course will cover such topics as the Civil War amendments to the Constitution; Reconstruction and its aftermath; legal change during the rise of industrialism; race and gender in late 19th century and 20th century America; law in the Progressive Era; the growth of civil liberties and civil rights in the Supreme Court; the law during war and the Depression; jurisprudential trends; and the Civil Rights Movement of the 1960s. The course will explore the effects of historical events on the development of law, but the course does not presume prior study of American history.
Credit Hour: 1-3

LAW 5340: Antitrust Law
Introduces antitrust and economic analysis and the role of competition, with an emphasis on price fixing, horizontal and vertical restraints of trade, monopoly, and merger problems.
Credit Hour: 1-3

LAW 5345: Appellate Advocacy
The course enhances skills training for the preservation and presentation of matters on appeal. In addition, the courses provides an introductory examination of extraordinary remedies (as a complement to appeal) and other unique actions filed in the Supreme Court of Missouri.
Credit Hour: 1-3

LAW 5350: Arbitration
Law, policy and practices relating to the arbitration process as it is utilized in commercial and international sectors. Topics include modern arbitration statutes (e.g., the Federal Arbitration Act), enforceability of agreements to arbitrate, public policy defenses against enforcement of arbitration agreements, arbitrators and administering institutions, components of the arbitral process, arbitral remedies and awards, and the arbitration award in the courts.
Credit Hour: 1-3

LAW 5365: Bankruptcy
The course focuses on the rights of both secured and unsecured creditors under state and federal law. State law covers collective actions and individual actions such as execution, attachment, garnishment, and the law of fraudulent conveyances. Federal law concentrates on liquidation proceedings under Chapter 7 of the Bankruptcy Code and reorganizations for wage earners under Chapter 13 of the Code. The course will include, as time permits, an introduction to the business reorganization provisions of Chapter 11.

LAW 5358: American Legal History from 1876
Historical study of the development of American law since the Civil War. The course will cover such topics as the Civil War amendments to the Constitution; Reconstruction and its aftermath; legal change during the rise of industrialism; race and gender in late 19th century and 20th century America; law in the Progressive Era; the growth of civil liberties and civil rights in the Supreme Court; the law during war and the Depression; jurisprudential trends; and the Civil Rights Movement of the 1960s. The course will explore the effects of historical events on the development of law, but the course does not presume prior study of American history.
Credit Hour: 1-3

LAW 5410: Children and the Law
The course covers the status, rights and obligations of children in contemporary American law; civil proceedings and criminal prosecutions alleging child abuse or neglect; foster care; termination of parental rights; juvenile protective legislation; and delinquency. Emphasis is placed on juvenile justice doctrine, policy and practice issues and the historical and contemporary operation of juvenile and family courts.
Credit Hour: 1-3

LAW 5415: Constitutional and Civil Rights Litigation
The course provides advanced analysis of the protection of civil liberties that derive from the United States Constitution and federal statutes. The statutes which will be covered most extensively include the Reconstruction Era laws now codified at 42 U.S.C. Sections 1981, 1983 and 1985; the Rehabilitation Act of 1973; Title IX of the Educational Amendments of 1972; and, Titles II and VI of the Civil Rights Acts of 1964.
Credit Hour: 1-3

LAW 5420: Client Interviewing and Counseling
The course covers the nature and conduct of the counseling process including basic interviewing techniques, psychological factors affecting the interview process, facilitating and structuring the interview, clarification of statements and ascertaining legal issues, and dealing with client resistance and hostility. Graded on S/U basis only.

LAW 5470: Criminal Clinic
The Criminal Clinic is available during both the Fall and Winter semesters. It can only be taken once. Enrollment is limited to 8 students per semester. Students must also enroll in Clinical Skills and Criminal Clinic Writing Project and have completed, or be enrolled in, LAW 5280 Professional Responsibility and LAW 5260 Evidence. (Not available to students on probation).

Credit Hour: 1-5
Prerequisites: LAW 5280 Professional Responsibility, LAW 5260 Evidence. Students must have prior permission of professor.

LAW 5475: Criminal Clinic Writing Project
This is the Writing Section accompanying course LAW 5470.

Credit Hour: 1-2

LAW 5477: Criminal Justice Administration
The course examines the justice system's processing of formal criminal cases from the point at which a defendant is formally charged and going forward. The course reviews the processing and adjudication of criminal cases. Topics include the defendant's rights under the Sixth Amendment (e.g. jury trial, speedy trial, confrontation clause, and compulsory process rights); Eighth Amendment issues (e.g. bail and cruel and unusual punishment); criminal discovery (e.g. the prosecutor's Brady obligation to provide exculpatory evidence to defendants); expert witnesses; pretrial and trial publicity; plea bargaining; sentencing (e.g. use of discretionary guidelines and minimum mandatory systems); and appeals. This will be both an advanced criminal procedure course (similar to "bail to jail" courses at other law schools) and an advanced criminal law course.

Credit Hour: 1-3
Recommended: successful completion both LAW 5035 Criminal Law and LAW 5240 Criminal Procedure before taking this course.

LAW 5485: Cross-Cultural Dispute Resolution
The course will focus on the impact culture can have on the private ordering of disputes. Culture affects communication, perceptions regarding conflict and methods for resolution. As the world becomes more interrelated and Missouri and the U.S. more diverse, lawyers need to be prepared to resolve problems across cultural lines. 20-25% of the grade will come from timely attendance and class participation.

Credit Hour: 1-3

Prerequisites or Corequisites: Must have taken or be currently enrolled in LAW 5375 Basic Federal Income Taxation
Prerequisites: LAW 5375 Basic Federal Income Taxation

LAW 5497: Death Penalty Law
The course will focus primarily on the U.S. Supreme Court's capital punishment jurisprudence over the past 35 years or more, with particular attention to how it has shaped state statutory schemes and legal argumentation in capital sentencing trials.

Credit Hour: 1-3

LAW 5516: Dispute Resolution in the Digital Age
The course will explore the need for expanded and equalized access to remedies in consumer cases, and how the internet opens doors to online dispute resolution ("ODR") systems that utilize cost-effective negotiation, mediation, and arbitration processes for resolving complaints. ODR has its drawbacks, but it can be especially effective and satisfying for low dollar claims such as those in most consumer contexts because of its efficiencies. ODR also has potential to ease power imbalances that have hindered market regulation. Accordingly, this course will look at the various systems currently used by major companies such as eBay, as well as the rules and treaty developments in global markets. We also will do ODR simulation exercises, led by Colin Rule, who has been a leader in creating ODR systems. The class also will include deep consideration of both the potential and drawbacks of ODR systems. All ODR processes are not beneficial, and thus we will also discuss development of best practices and question policy directions.

Credit Hour: 1-4

LAW 5520: Drafting of Legal Instruments
The course examines problems frequently encountered in general office practice (land transfers, mortgages, leases, contracts, wills, business organizations, etc.), with drafting of the related instruments. Use and adaptation of legal forms. Graded on S/U basis only.

Credit Hour: 1-2

LAW 5525: Education Law
This course examines the application of discrete doctrines from criminal law, constitutional law, juvenile law, employment law, and disability law to the legal problems facing American schools. Students will explore the ways in which the objectives of these discrete legal doctrines either promote or interfere with our educational policies. Substantive areas of concentration include state regulation of education; freedom of speech, association and religion; equal educational opportunity; employment of teachers; and discipline of students.

Credit Hour: 1-3

LAW 5530: Elder Law
This course address legal issues impacting older individuals, including discussion of government benefits (Social Security, Medicaid, Medicare, Supplemental Security Income), long-term care (types, contract issues, civil rights, and financial planning), guardianship and conservatorship, planning for incapacity, and health care decisions at the end of life. The
course emphasizes planning techniques for the average client. Grade will be based on a short paper and take-home exam. The course may be taken for writing credit.

Credit Hour: 1-3

LAW 5532: Election Law

Election Law has become more important in recent years. This course will introduce students to the many theoretical and practical constitutional, statutory, common law, and policy issues that accompany the franchise, including: legislative districting, voting rights, campaign finance, political parties, interest groups, direct democracy, and alternative democratic structures. The course will emphasize federal law, but will also address Missouri state law as appropriate.

Credit Hour: 1-3

LAW 5534: Electronic Discovery

This course provides an in-depth treatment of the legal, technical, and cost management issues involved in electronic discovery in civil litigation. Covers the 2006 FRCP ESI amendments (Rules 26 meet and confer, 34, production, and 37 sanctions), FRE 502 (privilege review and production), state e-discovery rules, the rapidly developing ESI case law, and emerging best practices from the Sedona Conference Cooperation Proclamation, the Electronic Discovery Reference Model, and other E-discovery authorities. Practice drafting litigation holds, preservation orders, and related e-discovery documents regularly used in civil litigation. Grading is based on student projects and a final examination.

Credit Hour: 1-3

LAW 5537: Emotional Intelligence in Law

Success in law requires more than substantive legal knowledge. It also requires self-awareness, or “emotional intelligence,” by the lawyer in order to be able to operate effectively in a complex and nuanced legal environment. This course is designed to help students develop their emotional intelligence by cultivating such personal and social competencies as personal and social awareness, understanding of motivation, empathy and social skills.

Credit Hour: 1-3

LAW 5540: Employment Discrimination

This course examines the laws which prohibit discriminatory practices in employment. Title VII is the primary focus, but coverage is also given to the Equal Pay Act, the Americans with Disabilities Act, and the Age Discrimination in Employment Act. Additionally, the course addresses the administrative process available for dealing with employment discrimination complaints, the prima facie case requirement and burden shifting analysis used in civil rights cases, and affirmative action requirements.

Credit Hour: 1-3

LAW 5543: Employment Law

Employment Law focuses on the legal relationship between employers and employees in the non-unionized workplace. The course will survey a variety of issues regarding the establishment, maintenance and termination of the employment relationship. For example, the course will cover the common law aspects of that relationship, particularly contracts and torts. It will examine statutory modifications of the common law in areas such as wage and hours, pensions, whistle-blower protection, unemployment insurance, workers compensation, and health and safety.

Credit Hour: 1-3

LAW 5544: Entrepreneurship Legal Clinic

The Entrepreneurship Legal Clinic (the “ELC”) combines business law issues, intellectual property, and transactional experiential learning. The ELC explores the lawyer’s role as counsel to entrepreneurs engaged in early-stage ventures. Students will survey the legal and business issues encountered by entrepreneurs and develop the practical skills necessary to effectively represent them, including client interviewing and counseling, entity formation and planning, governance issues, employee issues, intellectual property analysis (except patents [presently]), and contract drafting. Students will work on actual client matters approved by the ELC’s Supervising Attorney. Students must have the Supervising Attorney’s permission to enroll, and they must satisfy the Requisites listed below. The Clinic is graded and enrollment is limited.

Credit Hour: 1-4
Corequisites: LAW 5280 - Professional Responsibility
Recommended: LAW 5395 - Business Organizations

LAW 5545: Environmental Law

Federal and state regulation of the environment, including the economic and philosophical foundations of environmental regulation, the common law roots of environmental regulation, and substantive coverage of a number of environmental statutes, such as the Clean Air Act, Clean Water Act, Resource Conservation and Recovery Act, Comprehensive Environmental Response, Compensation and Liability Act, National Environmental Policy Act, and Endangered Species Act.

Credit Hour: 1-3

LAW 5555: Estate Planning

Applies substantive law learned in Estates and Trusts and Basic Income Tax to the drafting of estate planning documents and related documents typical of those used in law practice. Grade based entirely on student projects.

Credit Hour: 1-4
Prerequisites: LAW 5560 and LAW 5375

LAW 5560: Estates and Trusts

Wills: probate process and will contests, intestate succession; restrictions on testation; execution, revival of wills; integration, incorporation by reference, events of independent significance; will substitutes; will construction; family protection. Trusts: elements and creations; modification and termination; beneficial interests; charitable trusts; trust construction; powers of appointment; trust administration and fiduciary duties.

Credit Hour: 1-4

LAW 5570: Externship

The Externship offers students an opportunity to develop the skills necessary to bridge the gap between law school and law practice. Through the Externship, students prepare for “effective and responsible participation in the legal profession” (ABA Std. 301) by applying the core concepts learned in law school courses to the challenges presented in
LAW 5575: Family Law
After surveying the variety of family arrangements in contemporary America and central issues concerning the practice of domestic relations law, this course covers marriage; dissolution; distribution of marital property; alimony; child custody, visitation and support; post-dissolution disputes over custody and child-rearing; non-marital families and non-marital children; private agreements in family law; and alternative dispute resolution in collaboration with other professions in client representations, and ethical and policy issues.

Credit Hour: 1-3

LAW 5580: Family Violence Clinic: Individual and Social Justice
Rule 13 certified law students represent needy abused women and children in 13 rural Missouri counties. Students obtain orders of protection in adult abuse courts, and appear in protective custody cases in juvenile courts. Weekly debriefings may include interprofessional graduate students. Law students must complete LAW 5330 Advocacy, Family Violence and Public Policy before or during their clinical experience. (Not available to students on probation).

Credit Hour: 1-4
Prerequisites: LAW 5280 Professional Responsibility
Corequisites: LAW 5330 Advocacy, Family Violence and Public Policy
Recommended: LAW 5260 Evidence

LAW 5584: Fiduciary Administration
This course will cover key issues that arise in the administration of decedent’s estates and trusts, including the necessity for probate, rights of creditors, the fiduciary obligations of trustees and personal representatives, investments, and accounting and distribution. Depending on class size, grading will be based either on an exam, a practice-oriented project, or both.

Credit Hour: 1-3
Prerequisites: LAW 5560 Estates and Trusts

LAW 5585: Federal Courts
The course will examine the role of federal courts and their relationship to state courts. Topics covered: justiciability; federal question and diversity jurisdiction; sovereign immunity; abstention; and habeas corpus.

Credit Hour: 1-3
Prerequisites: LAW 5220 Constitutional Law

LAW 5590: Freedom of Speech and Association
A study of the rights of speech and association under the First Amendment of the United States Constitution. Major Supreme Court decisions regarding freedom of speech, including content-based and content-neutral restrictions of speech, regulation of commercial speech, regulation of obscenity and pornography, regulation of speech in public and private fora, libel and privacy law, forced association with persons or ideas, and subsidization of speech.

Credit Hour: 1-3

LAW 5591: Food Law and Policy
This course examines the laws that govern food safety and food labeling, and considers how well this network works to protect American consumers. It also considers current issues affecting the global food system. Representative topics include recent food safety problems such as tainted meat and salmonella contamination of eggs; food labeling issues such as the use of the term “grass fed” in meat labeling and the use of GMO seed; organic standards; government efforts to address the obesity problem; urban food deserts; animal welfare concerns; the regulation of pet food, and the like. Specific topics addressed each semester will depend on current events and recent legal developments. Students will be graded on the basis of research paper and class participation. The course will often include a writing section designed to meet the upper-level writing requirement. The course may be offered from time to time as a paper-only course, designed to meet the upper-level writing requirement.

Credit Hour: 1-3

LAW 5592: Firearms Law
This class will examine the historical development and modern context of the regulation of firearms. Although emphasizing domestic law, some international and comparative perspectives will be examined. The class may be taken for writing credit.

Credit Hour: 1-3
Prerequisites: LAW 5220 Constitutional Law

LAW 5595: Gender, Race, Sexuality and the Law
A study of the treatment of gender by the legal system. Topics will include a survey of writings by influential feminist legal scholars, historians and social scientists; a comparison of different theoretical frameworks; and an overview of substantive law and the latest legal developments involving gender. The primary aim of the course is to study various feminist theories to discern how gender is viewed by today’s lawmakers and courts.

Credit Hour: 1-3

LAW 5615: Health Law: The Regulation of Providers
An examination of the law governing the interactions between patients and their health care providers. The course will focus on rules governing the duty to treat, confidentiality, informed consent, medical malpractice liability, institutional vicarious liability, managed care liability, conditions of participation in federal programs like Medicare and Medicaid, fraud and abuse, and ERISA preemption. The course will cover antitrust and self-policing aspects of professional associations. The class also covers selected elements of public health law.

Credit Hour: 1-3

LAW 5620: Immigration Law
A study of the development of U.S. immigration and refugee law and policy, with emphasis on current immigration problems and issues. Recent changes in the immigration laws, and future trends in dealing with increasing immigrant pressure.
LAW 5632: Innocence Project Clinic
This is a joint clinic among the MU and UMKC law schools, and The Midwest Innocence Project, a non-profit organization. Law students will work under the supervision of the Clinic Director, a practicing lawyer, on cases of possible actual innocence from six states. Graded on S/U basis only.

Credit Hour: 1-4
Prerequisites: LAW 5946 Wrongful Convictions

LAW 5635: Insurance Law
A basic course in the fundamentals of insurance law. Topics covered include defining insurance; risk and the nature of the insurance relationship; insurable interest; indemnity; forfeiture; subrogation; coordination of benefits; interpretation; rights at variance with policy provisions; contract formation; warranties, misrepresentation and concealment; condition; agents and brokers; introduction to regulation; introduction to insurance coverage.

Credit Hour: 1-3

LAW 5637: Insurance Claims Processing and Dispute Resolution
This course provides an in-depth examination of claims processing and dispute resolution in the insurance business in both first-party (property, life, etc.) and third-party (liability) insurance. Topics covered include notice of loss, proof of loss, duty to cooperate; negotiation of insurance claims; appraisal; mediation and arbitration of insurance claims; remedies for noncompliance with claims processing obligations; and, bad faith. The topics will be covered from a national perspective, but special emphasis will also be given to Missouri law. This course is approved to count as an elective toward the Dispute Resolution Certificate.

Credit Hour: 1-4

LAW 5640: Intellectual Property
This course is an introduction to the four broad areas of intellectual property. Students will learn about intellectual property, contract, and tort knowledge gained from the first year curriculum. The course will cover trademarks, trade secrets, patent law, and copyright law. Thus, the course will cover how one obtains the special property rights called the copyright, patent, trademark contract. Further, the course will cover how these intellectual property rights are protected from the tortious act of infringement, as well as any defense to infringement it is important to note that this introductory class cannot be used to satisfy any of the requirements for the Intellectual Property certificate; nor is this introductory course substitute for the more in-depth coverage offered by Patent Law and Policy, Copyright Law or Trademark Law. Rather, it is designed to allow students to explore basic intellectual property issues and to meet any prerequisites for Cyberspace Law, Software Law and International Intellectual Property. Students may find that taking this introductory course complements the rest of the intellectual property curriculum. Class participation and preparations is required, as is class attendance. An exam and several small written projects will be required.

Credit Hour: 1-3

LAW 5652: International Commercial Arbitration
This course offers a study of arbitration as a dispute resolution process for international trade and business disputes. The course reviews ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreement to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, the enforcement of international arbitral awards. Special attention will be given to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. The course focuses on commercial arbitration as an international practice and not on arbitration under any particular national system. Students will participate in a hypothetical arbitration matter, beginning from the development of the claim to preliminary proceedings, the arbitration hearing, and ending with the arbitrators’ award.

Credit Hour: 2-3

LAW 5660: International Human Rights
The purpose of this course is to enable students to develop a basic understanding of the concept of international human rights law and the roles played by international and regional organizations, states and private actors in defining and enforcing human rights. Beginning with the historical origins of human rights, the course will examine the international regional human rights instruments and institutions that form the sources of human rights law (the UN system, including the Charter and treaties, European, African and Inter-American human rights regimes). It will also examine the role of non-governmental organization, the International Criminal Court and International humanitarian law (the law of war), and the interaction between US civil rights law and international human rights. Throughout the course, students will be introduced to important critical themes of human rights, including: the distinctions between public and private acts, evolving theories of statehood, sovereignty immunity, cultural relativism, and the western tradition of individual rights, and the relationship between rights and duties. Issues examined will include: political participation and democratization, religious freedom, the use of torture, corporate liability, woman's rights, the right and status of refugees, genocide and war crimes.

Credit Hour: 1-3

LAW 5665: International Law
Introduction to the international legal system, with emphasis on relations between nation-states or international entities. Topics include statehood and recognition, legislative and judicial jurisdiction, human rights and the status of the individual, treaties and international organizations.

Credit Hour: 1-3

LAW 5675: International Taxation
This course examines the federal income tax treatment of international transactions. It will focus on the principles and policies underlying the United States tax system as it relates to income earned by U.S. citizens and residents doing business and investing outside the country, as well as income derived from foreign persons doing business and investing in the United States. Topics include jurisdiction issues, source of income rules, effectively connected income, FDAP income, the foreign tax credit, the role of tax treaties in international tax, and an introduction to subpart F and other anti-deferral mechanisms.
LAW 5677: Internet Law and Practice
This course will focus on preparing to advise business clients dealing with electronic commerce and internet law issues. There is no technological background requirement or prerequisite to take the class. We will explore a variety of themes including the control over the internet by both government and private actors; how online activities differ from their off-line counterparts; and how the laws should react to new forms of interaction and social structures found online. Specific doctrinal topics include problems of digital authorship and publication including rights of anonymity, copyrights, trademarks, defamation and other torts; sales and licensing of products; marketing, advertising and data-mining, including privacy issues; jurisdiction over online actors; and cyber-squatting. Grades will be based on the final exam and an optional short paper.

Credit Hour: 1-3

Recommended: LAW 5375 Basic Federal Income Taxation

LAW 5678: Journal of Dispute Resolution
Credit for work as prescribed by the faculty for members of the Journal of Dispute Resolution. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5691: Jury Instructions
Theoretical and practical aspects of jury instructions (including general and special verdicts) at trial are presented from the perspectives of the judge, counsel, the jury, and the court of appeals. The course will involve the students in researching and drafting instructions, using pattern instructions, observing or participating in a simulated jury instruction conference, and writing an appellate court opinion that describes what the student has learned during the course.

Credit Hour: 1-3

LAW 5695: Labor Law
The regulation of relations between employers and labor unions at common law and under federal and state legislation; primary emphasis on the National Labor Relations Act, as amended.

Credit Hour: 1-3

LAW 5697: Landlord Tenant Law and Practice
This course focuses primarily on litigation under the Missouri Landlord Tenant statute and under federal administrative regulations governing public entities which provide housing and housing subsidies to low-income people including the processes for litigating against such entities. The course will address proper pleading, relevant evidentiary issues, and requisite settlement skills/strategies. This course is available to all 2L’s and 3L’s and requires Rule 13 certification. The course is required for all students enrolled in the Landlord/Tenant Practicum.

Credit Hour: 1-3

LAW 5680: Journal of Dispute Resolution
Credit for work as prescribed by the faculty for members of the Journal of Dispute Resolution. Graded on S/U basis only.

Credit Hour: 1-3

LAW 5697: Landlord/Tenant Practicum
Serves indigent individuals in Mid-Missouri. A Mid-Missouri Legal Services Corporation staff attorney supervises Rule 13 certified law students representing tenants including but not limited to those who are being evicted and/or who wish to sue their landlords for habitability or security deposit non-return. Students may also represent tenants who reside in public or subsidized housing in administrative actions brought by or against a Housing Authority. The practicum is graded and enrollment is limited. Credits earned in the Landlord/Tenant Practicum count toward the 6-hour Externship limit.

Credit Hour: 1-3

Prerequisites or Corequisites: LAW 5697 Landlord/Tenant Law and Practice

Corequisites: LAW 5280 Professional Responsibility

LAW 5700: Land Use Controls
This course focuses on laws governing the use and development of land. The course examines legal rules and policy considerations related to zoning, subdivision controls, building codes, historic preservation, aesthetic regulation, growth management, eminent domain, nuisance law, regional land use conflicts, development exactions, and environmental land use restrictions.

Credit Hour: 1-3

LAW 5715: Law and Economics
Study of the use of microeconomic analysis and methods in influencing the law. Topics: economic analysis of tort, contract and property law, the use and misuse of economics in the common law judging tradition, limitations on the use of economic analysis in law and links between economic analysis and constitutional law/public choice theory.

Credit Hour: 1-3

LAW 5717: The Law of Habeas Corpus and Post-Conviction Relief
Course will cover principles and practices of post-conviction remedies available to collaterally attack a criminal conviction in state and federal courts. Students will prepare post-conviction motions and petitions for a writ of habeas corpus under state and federal rules.

Credit Hour: 1-3

LAW 5721: Law Practice Management and Technology
Managing a successful law practice requires time and project management skills, as well as knowledge about the business of practicing law. This course explores the practical and ethical challenges that confront the solo or small firm lawyer. Students will be introduced to a range of resources for the solo and small firm lawyer, and gain practical experience in preparing a business plan, client welcome package, and policies and procedure manual. Material presented is relevant to both the litigation and the transactional lawyer.

Credit Hour: 1-3

LAW 5723: The Law and Practice of Criminal Sentencing
This simulation-based course examines the substantive law and practical operation of state and federal criminal sentencing systems and seeks to provide students with entry-level competence as advocates in the sentencing phase of criminal cases. Students will participate in a series of simulated sentencing proceedings in state and federal court, acting as counsel for the government or the defendant, or as the sentencing judge. Criminal Procedure and Criminal Justice Administration are recommended, but not required.

Credit Hour: 1-4
LAW 5724: Law and Public Policy
This course provides students with a framework for making decisions about the policies that governments should adopt to respond to important public problems. It takes an interdisciplinary perspective and argues that decision-makers manage four kinds of risk: litigation risk, political risk, policy risk and implementation risk. Students are introduced to techniques for identifying and minimizing such risks, and apply these techniques to real-world policy problems. Guest speakers also provide a perspective on the challenges of policy choice.
Credit Hour: 1-3
Prerequisites: LAW 5765 Mediation (or concurrent enrollment), or completion of an approved training. Limited to J.D. or LL.M. students in designated semesters

LAW 5800: Moot Court I
Required only for those students participating in the New York City Bar National Moot Court and the National Black Law Student Association Moot Court Competitions. Graded on S/U basis only.
Credit Hour: 1-3

LAW 5805: Moot Court II
Required only for those students participating in the New York City Bar National Moot Court and the National Black Law Student Association Moot Court Competitions. Graded on S/U basis only.
Credit Hour: 1-2

LAW 5808: Natural Resources Law
This course is a foundational survey course in the law and policy related to management of natural resources. Resources covered may include public lands, waters, submerged lands and wetlands, forests, minerals and energy, wildlife and biodiversity and ecosystems. Topics also may include organic statutes establishing certain resource management standards and procedures, generally applicable statutes governing agency behavior, judicial review of agency decisions, integrated management of multiple resources, the use of ecosystem management and conservation methods, and takings.
Credit Hour: 1-3

LAW 5810: Negotiation
Negotiation is an essential skill for most lawyers, regardless of practice area. Lawyers must negotiate with their counterparts, clients, partners, staff, courts, and many others in the course of representing a client. This course provides an in-depth understanding of the different models of negotiation, and practical skill development for meeting the many challenges that negotiation presents.
Credit Hour: 1-3

LAW 5815: Partnership Taxation
This course will study the federal income tax treatment of partnerships and other entities treated as partnerships, including limited liability companies. The course will examine partnership formations, contributions to and distributions from partnerships, partnership operations, including special allocations of income and losses among partners, transfers of partnership interests, and partnership dissolution. This course will be taught using the problem method of instruction.
Credit Hour: 1-3
Prerequisites: LAW 5375 Basic Federal Income Taxation

LAW 5820: Patent Law and Policy
This course will provide comprehensive coverage of the U.S. Patent Laws for those interested in obtaining general information about patents, as well as for those interested in practicing before the Patent and Trademark Office. The course will trace an invention through the application, examination, reconsideration, re-examination and litigation processes.
If time permits, there may also be coverage of international treaties that affect U.S. Patent Laws as well as some comparison of U.S. Patent Laws and the Patent Laws of select countries. There are no course prerequisites and a technical background is not required because the course primarily focuses on the Patent Act, its requirements and its jurisprudence. Thus, students need only be familiar with applying statutes and cases to a fact pattern. In lieu of an examination or a paper, up to six written projects, between 3-10 pages each (approx. 40 pages overall), will be due at the end of the semester, giving students an intensive writing experience. The professor will review drafts of some of these projects during the semester and all of the projects will be discussed in class. These projects will allow students to help solve a clients hypothetical patent problem as we work through the Patent Act and its jurisprudence. Students may also have the opportunity to engage in client interviewing and counseling in order to complete the projects. There are no prerequisites and a technical background is not required.

**Credit Hour**: 1-3

**LAW 5830: Pretrial Litigation**
Focus on the study of the legal principles, techniques, strategies and skills which pertain to civil pretrial practice, including: Professional and Ethical Considerations, Case Selection Case Investigation, Development of a case theory, Pleading, Discovery, Pretrial Conference, Motion Practice, Settlement Processes and Alternative Dispute Resolution.

**Credit Hour**: 1-3

**LAW 5835: Products Liability**
A study of civil liability for personal injury, property damage, and economic loss caused by defective products. The study includes actions for negligence, strict liability, misrepresentation and the effect of state and federal legislation on those actions.

**Credit Hour**: 1-3

**LAW 5837: Property, Life, Disability and Health Insurance Law**
This course will explore the legal issues that arise in connection with the purchase and ownership of "first-party" insurance policies, which includes the categories of personal and commercial property insurance, life insurance, accidental death insurance, disability insurance, and health insurance. The course will examine the law from a national perspective and its jurisprudence. Thus, students need only be familiar with applying statutes and cases to a fact pattern. The emphasis will be on the legal issues that typically arise when the consumer comes into contact with the insurance industry with respect to these products. The coverage of health insurance will focus on the provision and regulation of private insurance, as distinct from government programs providing access to the health care system through insurance or insurance-like benefits.

**Credit Hour**: 1-3

**LAW 5845: Publicly Held Corporation**
This course focuses on legal issues most relevant to large public corporations. Recommended for students interested in pursuing a career in corporate law or for students desiring study in corporate law beyond the Business Organizations course.

**Credit Hours**: 3

**LAW 5856: Real Estate Finance**
This course examines legal and transactional issues relating to the financing of real estate. The course covers mortgage documentation; the use of mortgagee prior to foreclosure; transfers of mortgaged property; transfers of mortgages and securitization; payment and discharge of mortgages; default and impact of bankruptcy on real estate transactions. The grade will be based upon a final examination.

**Credit Hour**: 1-3

**LAW 5858: Real Estate Transactions**
This course examines issues relating to the transfer of real estate and the practice of transactional real estate law. The course covers conveyance documentation, the recording system, title and survey review, title insurance, purchase and sale transactions, basis entity structure and tax considerations, environmental review, commercial leasing, valuation of real estate, and project cash flow. The grade will be based on a final examination.

**Credit Hour**: 1-3

**LAW 5859: Real Estate Transaction Skills Project**
Students will participate in a weekly seminar class focused on contract drafting, negotiation, due diligence, and client management in the context of a transactional real estate law practice. The grade for the course will be based upon student performance on drafting and practice skills assignments. Projects may include the negotiation and drafting of a purchase contract; the negotiation and modification of a commitment for title insurance; survey review; review and evaluation of lease; and, lease drafting and negotiation. Student projects will include both individual and group work.

**Credit Hour**: 1-3

**Corequisites**: Concurrent registration in LAW 5858 Real Estate Transaction is required

**LAW 5861: Regulation of Drugs and Medical Devices**
This course examines the U.S. Food and Drug Administration (FDA) interpretation and implementation of the federal Food, Drug, and Cosmetic Act (FDCA) and the Public Health Service Act (PHSA). FDA regulates food, drugs, animal drugs and feed, cosmetics, medical devices, tobacco products, and biological products (broadly speaking "food and drugs"). The course considers not only the substantive regulations and policies applicable to food and drugs, but also issues of administrative law (agency practice and procedure, as well as judicial review), enforcement authority (powers and priorities), the agency's place within our federal system, and the place of food and drug law in the larger legal environment. The scope of the class will vary from semester to semester, usually covering at least drugs and devices.

**Credit Hour**: 1-3

**LAW 5862: The Regulation of Medical Marijuana Businesses**
More than half of the states now authorize designated businesses to produce and sell marijuana commercially. However, these businesses remain subject to extensive state regulation. In 2018, Missouri adopted a constitutional amendment, Art. XIV, § 1, with a purpose to authorize medical marijuana. State regulations raise a host of legal questions: How do states award commercial licenses to grow and sell marijuana? Are any state licensing regulations preempted by federal law? Do state advertising restrictions violate the First Amendment? How are marijuana
licensees disciplined for regulatory violations? Marijuana businesses also face numerous regulatory hurdles erected by the federal government, adding to the questions surrounding the marijuana industry: Do marijuana businesses have any viable legal defense against federal criminal prosecution? Can marijuana businesses register their trademarks? Can they deduct their expenses when they pay their federal taxes? Will courts enforce contracts with the marijuana industry? Can the industry obtain banking or legal services? The resolution of these issues is in a state of flux throughout the nation and, in particular, in Missouri, in light of Missouri’s 2018 constitutional amendment. This class will address these and related questions surrounding the nascent marijuana industry.

Credit Hour: 1-3

LAW 5870: Remedies
Survey of damages, history of equity; coverage of various equitable remedies and their adequacy, practicability, defenses, procedural problems, enforcement of decrees, merger of law and equity, contempt.

Credit Hour: 1-3

LAW 5875: Research in Law
Independent Research with a faculty member is available during the Summer, Fall and Spring Semesters. Any student enrolling for Research credit must designate at the time of enrollment the professor who will supervise the research project. Credit is earned at the rate of 20 pages per credit hour. No more than three hours of Research may be taken or counted toward the law degree. Enrollment in LAW 5875 may, but need not, be structured so as to satisfy the upper-level writing requirement. Enrollment in LAW 5875 Research satisfies the Law School’s writing requirement only if the project culminates in an individually authored paper of at least 20 pages, based on independent research, through a process that involves an initial draft, critique by the supervising faculty members, and rewrite.

Credit Hour: 1-3

LAW 5885: Secured Transactions
The course focuses on the rights of secured creditors and debtors under Article 9 of the Uniform Commercial Code, and includes coverage of creditors with special rights (such as taxing authorities and artisans), documentary exchanges under Article 7, and bulk sales under Article 6.

Credit Hour: 1-3

LAW 5890: Securities Regulation
Financing of business through the sale of securities. Emphasis on federal securities acts, with some consideration of state statutes. Consideration of the registration process; exemptions from registration; the special antifraud rules; liabilities and criminal penalties; reporting; insider trading; and, proxy solicitation problems.

Credit Hour: 1-3

Prerequisites: LAW 5395 Business Organizations

LAW 5897: Sex, Reproduction and the Law
This course surveys the legal and social history of state and federal regulation of sexual and reproductive behavior. It will explore constitutional rights vis a vis a number of specific legal and social issues including the demographics of conception, parenting, and domestic violence; forced sterilization; access to contraception and abortion; adoption; assisted reproductive technologies; left over pre-implantation frozen embryos; gestational surrogacy; rape; same sex marriage and family building; and stem cell research.

Credit Hour: 1-3

LAW 5905: Sports Law
Substantive areas of concentration include sports litigation, labor law, NCAA regulations, legal relationships in professional sports, anti-trust aspects of sports activities, and collective bargaining.

Credit Hour: 1-3

LAW 5910: State Constitutional Law
Since the departure of Chief Justice Warren, the U.S. Supreme Court and other federal courts have taken a less expansive view of the rights granted by the U.S. Constitution. Congress has also taken steps to turn over both funds and authority to states. Both developments have increased the importance of state constitutional law. The course would be taught in three parts: (1) History of state constitutions; their relationship to the U.S. Constitution and the major differences among them; (2) Individual rights; instances in which state constitutional provisions that are facially similar or identical to the Bill of Rights in the U.S. Constitution, have been interpreted by state courts to extend beyond the federal rights, and instances where state constitutions guarantee individual rights that are different from or in addition to those in the U.S. Constitution; and (3) Governmental obligations and authority; Constitutional provisions allocating governmental authority, such as limitations on legislative authority, the authority of the people to act through referendum or initiative and the relative authority of independent constitutional and officers.

Credit Hour: 1-2

LAW 5914: Tax Planning
This course will examine the application of corporate and partnership tax planning principles to accomplish common business objectives. Students will interview hypothetical clients, prepare written planning documents, present their tax plans to the class, and analyze associated substantive tax and business issues in a seminar format. The grade in this course will be based on written planning documents, a class presentation, and class participation. There will be no final exam.

Credit Hour: 1-3

Prerequisites: LAW 5375 Basic Federal Income Taxation
Recommended: Students are strongly encouraged to have taken or be concurrently enrolled in LAW 5465 Corporate Taxation or LAW 5815 Partnership Taxation

LAW 5915: Tax Research
This course provides students with an in-depth exploration of methods and sources for researching tax issues. The course provides students an opportunity to gain experience in using tax research tools. While primarily applicable to tax research, the knowledge gained by students will be helpful in future practice, regardless of practice area. Grades will be based on written assignments to be completed throughout the semester and one final project.

Credit Hour: 1-2
LAW 5916: Taxation of Property Transactions
This course will examine tax laws and policies fundamental to real estate investment. Topics include depreciation and recapture, cash and accrual methods of accounting, installment sales, non-recognition transactions, including like-kind exchanges and bad involuntary conversions, and discharge of indebtedness issues arising out of real estate transactions. This course is designed to provide a detailed analysis of complex tax provisions necessary for advanced tax planning and will be taught using the problem method of instruction.

Credit Hour: 1-4
Prerequisites: LAW 5375 Basic Federal Income Taxation

LAW 5917: Topics in Law
Various topics in law are explored in depth. Topics change each semester.

Credit Hour: 1-5

LAW 5920: Trademark Law
Nature of trademark law; common law and statutory trademarks and trade-names; Lanham Act of 1946; distinctiveness; types of marks; qualification of marks for registration (use in commerce, intent-to-use certification, secondary meaning, abandonment); registration procedures; exclusive rights of trademark owner; scope of protection; concurrent use; infringement (including “gray market” use); international protection; remedies; state trademark acts; related common law doctrines; trademark usage on the Internet; and, domain name issues.

Credit Hour: 1-3

LAW 5923: Transnational Litigation
This course addresses common areas of concern in private transnational litigation and provides students with an understanding of litigation tactics in this growing area of law. Topics include jurisdictional issues, forum selection, international service of process, international discovery, international choice of law, proving foreign law in U.S. courts, multiple proceedings (including parallel proceedings and interim/interlocutory assistance) and enforcement of foreign judgments. Although international in nature, the course covers many of the same sorts of concerns that arise in other sorts of complex civil litigation and emphasizes practical strategy points and transactional considerations.

Credit Hour: 1-3

LAW 5925: Trial Practice
Skills based course that focuses on the techniques of pleading, discovery, jury selection, opening statements, direct/cross examination of witnesses, preparing jury instructions, and closing arguments. Each student participates in classroom problems selected from various phases of litigation, and in one complete trial. Some sections of this course may be offered as a graded section or graded on S/U basis only.

Credit Hour: 1-4
Prerequisites: LAW 5260 Evidence

LAW 5927: Veterans Clinic
In this clinical program, students will help veterans in need and/or their dependents secure disability related benefits after an initial denial from the Regional VA office. This work will be done at the Board of Veterans’ Appeals (BVA) level or before the Court of Appeals for Veterans’ Claims (CAVC), both located in Washington D.C. The BVA and CAVC are federal tribunals, specially created to handle veterans’ claims. Students will have the opportunity to work with the client, in a law firm type atmosphere, and prepare and argue appeals relating to the denial of benefits.

Credit Hour: 1-4
Prerequisites or Corequisites: LAW 5280 Professional Responsibility

LAW 5940: White Collar Crime
Study of what are generally considered to be business or organizational crimes. General topics to be explored may include: mail and wire fraud, conspiracy, securities fraud, tax fraud, government contracting fraud (with particular emphasis on the False Claims Act), the Hobbs Act and the Racketeer Influenced and Corrupt Organizations Acts.

Credit Hour: 1-3

LAW 5945: Will and Trust Drafting
Building on Estates and Trusts, applies substantive law of wills and trusts to actual drafting of documents typical of those used in law practice. Grade based entirely on student projects.

Credit Hour: 1-3
Prerequisites: LAW 5560 Estates and Trust

LAW 5946: Wrongful Convictions
This course offers students an insider’s look into the operation of the criminal justice system. It should be of particular interest to any student interested in working in a prosecutor’s office, public defender’s office or for a firm doing defense work. It is a prerequisite for any student wishing to enroll in the Innocence Project clinic. The course is designed to help students gain insight into features of the criminal justice system that have a tendency to produce wrongful convictions. In addition to examining the causes of wrongful convictions, the course will consider systemic reforms that might minimize convicting the innocent. We will also work with the Midwest Innocence Project on cases of possible actual innocence. Finally, the class will also focus on recurring ethical issues that confront prosecutors and criminal defense lawyers.

Credit Hour: 1-4

LAW 5947: Workers’ Compensation Law and Practice
This course will cover the law and practice of Workers’ Compensation Law both in general and in Missouri. About two-thirds of the class time will be spent studying and discussing the doctrinal basis of workers’ compensation. In the balance of the time students will work on a simulation in which they will have the opportunity to work through different steps of a workers’ compensation claim.

Credit Hour: 1-3

LAW 5948: Comparative Dispute Resolution
South Africa Program

Credit Hour: 1-2
LAW 6720: Comparative Constitutional Law  
South Africa Program  
Credit Hour: 1-2

LAW 6730: Comparative Criminal Justice  
South Africa Program  
Credit Hour: 1-2

LAW 6905: LLM Arbitration Seminar  
(same as LAW 6805). This course covers law, policy, and practices relating to the arbitration in the U.S. under modern arbitration statutes as well as arbitration of international commercial disputes under international conventions and arbitral rules.  
Credit Hours: 3  
Prerequisites: instructor's consent

LAW 6920: LL.M. Externship  
Student will be placed (or secure placement) with attorney, professional mediator or arbitrator, or dispute resolution agency (government-based or private) for an externship ranging from three to nine weeks. Students will observe and, to the extent possible, participate in dispute resolution activities of mentor. Journal entries form basis for credit. Externship placements will be local, national or international. Graded on a S/U basis only.  
Credit Hour: 1-99  
Prerequisites: LL.M. students only

LAW 6925: LL.M. Independent Study  
Substantial research project on selected topic of choice.  
Credit Hour: 1-3  
Prerequisites: LL.M. students only

LAW 6930: LL.M. Major Research Project  
(same as LAW 6830). Development and presentation of substantial research paper on current topic in dispute resolution. Supervision of this work by appropriate faculty will be determined according to the topic selected.  
Credit Hours: 3  
Prerequisites: instructor's consent

LAW 6935: Dispute System Design  
(same as LAW 6835). Analysis of system design principles and the management of multi-party complex disputes. Course will include overview of statutes, regulations, court rules and general policy considerations for the development of systematic approaches to the resolution of disputes as well as the consultation process inherent in system design work. An underlying theme for this course will be issues of program quality. Students will review scholarly work evaluating the ADR field and study basic research/evaluation methodologies.  
Credit Hours: 3  
Prerequisites: instructor's consent

LAW 6945: Non-Binding Methods of Dispute Resolution  
(same as LAW 6845). Negotiation and mediation of disputes, focusing on the theory, strategy, and skills, and public policy issues involved in using non-binding methods of dispute resolution. The course addresses the role of attorneys in unassisted and mediated negotiation as well as the role of mediators. The course considers the professional responsibility of advocates negotiating for clients and of mediators.  
Credit Hour: 3-4  
Prerequisites: instructor's consent

LAW 6950: Practicum on Dispute Resolution Training and Education  
Structured training experience through participation in the first-year curriculum project; service as judges in J.D. student competitions, such as negotiation and client counseling; and assignments to appropriate upper division courses to assist with development of dispute resolution modules. Credit is earned for work over the entire academic year. Graded on a S/U basis only.  
Credit Hour: 1-2  
Prerequisites: LL.M. students only

LAW 6955: Topics  
Special and emerging topics in dispute resolution. Subject, content and credit varies, depending on available faculty and student interest.  
Credit Hour: 1-99  
Prerequisites: instructor's consent

LAW 6970: Mediation Clinic  
(same as LAW 5770). Students develop and refine mediation skills by observing and participating in simulated and real mediation cases. Limited to J.D. or LL.M. students in designated semesters. Graded on S/U basis only.  
Credit Hour: 1-2  
Prerequisites or Corequisites: LAW 5765 (or concurrent enrollment), or completion of an approved training

LAW 6980: Overview of the US Legal System  
This course will introduce fundamentals of the U.S. legal system. Topics include the basic structure and function of U.S. legal institutions, the adversarial system and judicial process, the interaction of state and federal law in the American system of federalism, sources of law including statutory, common and administrative law, selected topics in constitutional law and civil and criminal procedure, and brief overviews in selected areas of substantive law such as contracts, property, family, tax, or torts. Graded on A-F basis only.  
Credit Hour: 1-4

Learning, Teaching, & Curriculum (LTC)  

LTC 1100: Orientation  
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options. Graded on S/U basis only.  
Credit Hour: 1
LTC 1110: Orientation: Art Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Art Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1120: Orientation: Math Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Math Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1130: Orientation: Middle School Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Middle School Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1155: Orientation: Science Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Science Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1160: Orientation: Special Education
This course familiarizes and orients students with MU resources, College of Education programs and expectations and career options, emphasizing Special Education. Graded on S/U basis only.
Credit Hour: 1

LTC 1170: Orientation: English/Language Arts
This course familiarizes and orients students with MU resources, College of Education programs, expectations and career options, emphasizing English/Language Arts education. Graded on S/U only.
Credit Hour: 1

LTC 1320: Scuba Theory
The curriculum of the class includes bio-physics, hydrostatic pressures, physiology, fundamentals of compressed gases, environmental conditions, mechanics, first aid as it relates to diving, and planning specialty dives such as decompression, night, cave, ice, salvage and wreck diving.
Credit Hours: 3

LTC 2040: Inquiring into Schools, Community and Society I
This course focuses on schooling in American society, the school community, the school culture and students' lives and identities. Studied are the political, cultural, and economic conditions of the schools.
Credit Hours: 3

LTC 2044: Inquiry into Schools, Community and Society: Field
This field experience course supports the Inquiring into Schools, Community and Society (ISCS), component of Phase I. Graded on S/U basis only.
Credit Hour: 1

LTC 2200: School Health and Student Wellbeing
This course will explore and analyze the critical role schools and teachers play to address students' physical, social, and emotional wellbeing. Research indicates that a healthy school environment can improve both academic and social outcomes. Focus areas include school safety, nutrition policy and health education.
Credit Hours: 3

LTC 4085: Problems in Curriculum and Instruction
Studies professional programs and issues in health or physical education.
Credit Hour: 1-3
Recommended: instructor's consent

LTC 4091: Assessment and Family Collaboration in Early Childhood Education
(cross-leveled with LTC 7091). Strategies for effectively observing and assessing young children and strategies for building positive family and community relationships, which support children's development and learning.
Credit Hours: 3
Prerequisites: Consent required (enrollment limited to students admitted to Phase II)

LTC 4110: Working with Infants and Toddlers
Experience working with children aged 6 weeks to 2 1/2 years and their families. Opportunity to apply theories of cognitive, language, and social development.
Credit Hour: 2-3
Recommended: Admittance to Phase II

LTC 4120: Early Childhood Education Literacy Methods & Assessment I
Credit Hours: 3
Prerequisites: Consent of department required
LTC 4120W: Early Childhood Education Literacy Methods & Assessment I - Writing Intensive
Credit Hours: 3
Prerequisites: Consent of department required

LTC 4124: Emergent and Developing Literacy Early Childhood Field Experience
This field experience supports the LTC 4120 component of Phase II. Field experience expectations are delineated in the LTC 4120 course syllabi. Graded on a S/U basis only.
Credit Hours: 3
Corequisites: LTC 4120 and LTC 4210
Recommended: Admittance to Phase II

LTC 4130: Teaching and Learning Math, Science and Social Studies w/ Young Children
Credit Hours: 9
Corequisites: LTC 4134
Recommended: Admittance to Phase II

LTC 4134: Teaching & Learning Math, Sci & Soc Studies w/Young Children Field Experience
This field experience supports the LTC 4130 component of Phase II. Field experience expectations are delineated in the LTC 4130 course syllabi. Graded on a S/U basis only.
Credit Hours: 3
Corequisites: LTC 4130
Recommended: Admittance to Phase II

LTC 4140: Curriculum, Theory and Classroom Management in Early Childhood Education
(cross-leveled with LTC 7140). Reflection on the relationship of theory and practice in ECE. Consideration of various topics including historical influences on early childhood curriculum, models of early childhood curriculum, classroom management, and individualizing curriculum.
Credit Hours: 3
Prerequisites: Consent required (enrollment limited to students who have completed the first two semesters of Phase II)

LTC 4140W: Curriculum, Theory and Classroom Management in Early Childhood Education - Writing Intensive
(cross-leveled with LTC 7140). Reflection on the relationship of theory and practice in ECE. Consideration of various topics including historical influences on early childhood curriculum, models of early childhood curriculum, classroom management, and individualizing curriculum.
Credit Hours: 3
Prerequisites: Consent required (enrollment limited to students who have completed the first two semesters of Phase II)

LTC 4150: Early Childhood Education Literacy Teaching Methods and Assessment II
(cross-leveled with LTC 7150). Advanced strategies for assessing and supporting young children's literacy development.
Credit Hours: 3
Prerequisites: Consent of department required
Recommended: LTC 4120 or LTC 7120, LTC 4124 K-3 Field experience and admittance to the ECE certification program in Phase II of the College of Education required

LTC 4150W: Early Childhood Education Literacy Teaching Methods and Assessment II - Writing Intensive
(cross-leveled with LTC 7150). Advanced strategies for assessing and supporting young children's literacy development.
Credit Hours: 3
Prerequisites: Consent of department required
Recommended: LTC 4120 or LTC 7120, LTC 4124 K-3 Field experience and admittance to the ECE certification program in Phase II of the College of Education required

LTC 4160: Motor Development in Young Children
For Early Childhood majors. Study of young children's motor development.
Credit Hours: 2
Recommended: Admission to Phase II

LTC 4160W: Early Childhood Education Literacy Teaching Methods Assessment II
(cross-leveled with LTC 7150). Advanced strategies for assessing and supporting young children's literacy development.
Credit Hours: 3
Prerequisites: Consent of department required
Recommended: LTC 4120 or LTC 7120, LTC 4124 K-3 Field experience and admittance to the ECE certification program in Phase II of the College of Education required

LTC 4170: Program Management & Environmental Organization in PreKindergarten
Strategies for working with children aged 2-6 and their families. Emphasis on planning and implementing developmentally appropriate practice, designing effective learning environments, and managing programs.
Credit Hours: 3
Prerequisites: Consent required (enrollment limited to students admitted to Phase II, and completion of first 2 semesters of Phase II)
Recommended: Co-enrollment in LTC 4971 (Early Childhood section)

LTC 4170W: Program Management & Environmental Organization in PreKindergarten - Writing Intensive
Strategies for working with children aged 2-6 and their families. Emphasis on planning and implementing developmentally appropriate practice, designing effective learning environments, and managing programs.
Credit Hours: 3
Prerequisites: Consent of department required
Recommended: LTC 4120 or LTC 7120, LTC 4124 K-3 Field experience and admittance to the ECE certification program in Phase II of the College of Education required

LTC 4194: Elementary Education Field Experience I
Seminars and diverse 1-5 grade classroom experience focus is on the learner and learning in the elementary school. Graded on a S/U basis only.
Credit Hour: 1-3
Recommended: Admittance to Phase II

LTC 4200: Young Children's Emergent Language
For Early Childhood and Elementary Education majors. Study of young children's language development and implications for teachers.
Credit Hours: 2
Corequisites: LTC 4120, LTC 4124, and LTC 4210
Recommended: Admittance to Phase II

LTC 4210: Children's Language and Literature
(cross-leveled with LTC 7210). For Early Childhood Education majors. Examines children's oral language development and surveys the field of
children's literature for children ages birth to eight. Graded on A-F basis only.

**Credit Hours: 3**
**Corequisites:** LTC 4120 and LTC 4124
**Recommended:** Admittance to Phase II

---

**LTC 4211: Literacy Assessment and Development**
Focus is on the development, assessment, and instruction of reading and writing motivations, skills, and strategies of diverse learners with emphasis on data interpretation and instruction. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4221: Contexts and Methods for Elementary Reading Instruction**
Students will closely explore the different contexts, methods, and materials for reading instruction in diverse settings. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4231: Contexts and Methods for Writing Instruction**
This course explores contexts and methods for writing instruction, with a focus on writing development, writing across the content, and multimodal and multilingual composition. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4231W: Contexts and Methods for Writing Instruction - Writing Intensive**
This course explores contexts and methods for writing instruction, with a focus on writing development, writing across the content, and multimodal and multilingual composition. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4240: Art for Children**
This course focuses on appropriate teaching methods and strategies for teaching art (studio, art history, aesthetic, and criticism), artistic development of children, and curriculum, instructional, and organization strategies for the art classroom.

**Credit Hours: 2**
**Recommended:** Admittance to Phase II

---

**LTC 4241: Diverse Literature for Children and Youth**
Reading and discussion of diverse literature within a wide variety of genres will allow students to explore issues of diversity as related to elementary instruction. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4241W: Diverse Literature for Children and Youth - Writing Intensive**
Reading and discussion of diverse literature within a wide variety of genres will allow students to explore issues of diversity as related to elementary instruction. Graded on A-F basis only.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4250: Music for Children**
Preparation of early childhood and elementary education students with the skills, knowledge, and philosophical foundations necessary to integrate music into the early childhood and elementary curricula.

**Credit Hours: 2**
**Recommended:** MUSIC_NM 1608, MUSIC_NM 1612, MUSIC_NM 1618 or competency test; Admittance to Phase II

---

**LTC 4260: Elementary Social Studies**
To develop knowledge of social studies and the skills to teach social studies in the elementary school. The course is designed to provide the student with the skills to plan, implement, and evaluate both the teaching and learning processes for the elementary social studies classroom.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4280: Teaching Science in Elementary Schools**
Concepts, materials, methods in the elementary school program.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4294: Elementary Education Field Experience II**
Seminars and diverse 1-5 grade classroom experiences focus is on the teacher and instruction in the elementary school. Graded on S/U basis only.

**Credit Hour: 1-3**
**Recommended:** Admittance to Phase II

---

**LTC 4300: Learning and Teaching Number and Operation in the Elementary School**
The purpose of this course is to (a) develop a deeper understanding of number and operation, (b) connect the mathematical knowledge of number as described in (a) to the learning and teaching of number in elementary school.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II

---

**LTC 4310: Learning and Teaching Geometry in the Elementary School**
The purpose of this course is to (a) develop a deeper understanding of geometry and measurement, (b) critically examine content and issues of the complexities in teaching and learning fundamental concepts of geometry and measurement in elementary schools.

**Credit Hours: 3**
**Recommended:** Admittance to Phase II
LTC 4320: Middle School Social Studies I
Curriculum decision making, instructional planning, techniques and strategies, materials selection, approaches to assessment in middle level social studies, all based upon early adolescent growth and development principles.

Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4324: Middle School Social Studies Field I
This field experience supports the Learning, Teaching and Curriculum 4320 component of Phase II for MS students. Field experience expectations are delineated in the LTC 4320 course syllabi. Graded on S/U basis only.

Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4334: Middle School Social Studies Field Experience II
This field experience supports the LTC 4550 component of Phase II for MS students. Field experience expectations are delineated in the LTC 4550 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4340: Middle School Science I
(cross-leveled with LTC 7340). Concepts, materials, methods in middle school program.

Credit Hours: 4
Prerequisites: Consent required
Recommended: Admittance to Phase II

LTC 4340W: Middle School Science I - Writing Intensive
(cross-leveled with LTC 7340). Concepts, materials, methods in middle school program.

Credit Hours: 4
Prerequisites: Consent required
Recommended: Admittance to Phase II

LTC 4344: Middle School Science Field I
This field experience supports the Learning, Teaching and Curriculum 4340 component of Phase II. Field experience expectations are delineated in the LTC 4340 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4350: Middle School Science II
Concepts, materials, methods in the middle school program.

Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4354: Middle School Science Field Experience
This field experience supports the LTC 4350 component of Phase II. Field experience expectations are delineated in the LTC 4350 course syllabi. Graded on a S/U basis only.

Credit Hour: 1
