Recommended: Admittance to Phase II

LTC 4474: Teaching Secondary English/Language Arts I Field Experience
This field experience supports the LTC 4470 component of Phase II. Field experience expectations are delineated in the LTC 4470 course syllabi. Graded on a S/U basis only.
LTC 4480: Teaching Middle and Secondary English/Language Arts II
Prepares prospective educators with the knowledge and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4480W: Teaching Middle and Secondary English/Language Arts II - Writing Intensive
Prepares prospective educators with the knowledge and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on the teaching of writing and critical thinking.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4484: Teaching Secondary English/Language Arts II Field Experience
This field experience supports the LTC 4480 component of Phase II. Field experience expectations are delineated in the LTC 4480 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4490: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.
Credit Hours: 3
Prerequisites: LTC 4470 or LTC 7470 and LTC 4480 or LTC 7480
Recommended: Admittance to Phase II

LTC 4494: Teaching Secondary English/Language Arts III Field Experience
This field experience supports the LTC 4490 component of Phase II. Field experience expectations are delineated in the LTC 4490 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4500: Emergent Language in Early Childhood
Study of language learning in young children; how meaning of the environment is gained through language; implications for teachers working with children from varying language-learning environments.
Credit Hours: 3

LTC 4510: Assessment in Early Childhood Education
A study of formal and informal assessment instruments and procedures used to measure progress and determine developmentally appropriate curriculum for children in early childhood settings.
Credit Hours: 3

LTC 4530: Introduction to Social Studies
Will introduce prospective teachers to the profession of social studies teaching; to the bases for making curriculum choices in social studies and the process of choosing content; and the process of planning curriculum and instruction in social studies classrooms.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4534: Secondary Social Studies I Field Experience
This field experience supports the Learning, Teaching and Curriculum 4530 component of Phase II. Field experience expectations are delineated in the LTC 4530 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4541: Reading and Writing in the Social Studies
(cross-leveled with LTC 7541). Focuses on the teaching of reading and writing strategies for social studies teachers. Students review literacy interventions related to reading and writing historical texts. Graded on A-F basis only.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4544: Reading and Writing in the Social Studies Field Experience
This field experience supports the Learning, Teaching and Curriculum 4541 component of Phase II. Field experience expectations are delineated in the LTC 4541 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4550: Assessment in Social Studies
Will address the purposes and development of social studies assessment for all levels from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, make revisions and set goals.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4550W: Assessment in Social Studies - Writing Intensive
Will address the purposes and development of social studies assessment for all levels from classroom to national assessment. Assessment will be used to reflect upon curriculum/instruction, make revisions and set goals.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4554: Secondary Social Studies III Field Experience
This field experience supports the LTC 4550 component of Phase II. Field experience expectations are delineated in the LTC 4550 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II
LTC 4560: Reading and Writing in the Content Areas
(cross-leveled with LTC 7560). For secondary school teachers. Specific ways teachers can help students improve reading and writing skills in content areas and ways they can be taught.
Credit Hours: 3
Recommended: Phase II admittance

LTC 4565: Reading and Writing in the Content Areas II
(cross-leveled with LTC 7565). Reading and Writing in the Content Areas II explores specific reading and writing content area strategies, with a focus on struggling students and new investigations in disciplinary literacy.
Credit Hours: 3
Prerequisites: LTC 4560 or LTC 7560 or LTC 4380

LTC 4571: Introduction to Teaching Mathematics in Middle and Secondary Schools
Introduction to teaching mathematics including: professional mathematics teacher associations and journals, learning theories related to teaching mathematics, tools, and materials for teaching mathematics, curriculum and instructional strategies (middle and lower high school level), and techniques for assessing mathematical understanding. Recommended: Admittance to Phase II
Credit Hours: 3

LTC 4574: Intro. Teaching Math in Middle and Secondary School Field Experience
Field experience supporting the LTC 4571 component of Phase II. Field experience expectations are delineated in the LTC 4571 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4581: Teaching Mathematics in Middle and Secondary Schools: Focus on Algebra and Technology
(cross-leveled with LTC 7581). Key issues in the teaching of pre-algebra through advanced algebra, appropriate use of technology, lesson planning, integration of appropriate models, mathematical connections. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: LTC 4571 or LTC 7571 or LTC 4360 or LTC 7360
Recommended: Admittance to Phase II

LTC 4584: Teaching Math in Middle and Secondary Schools: Field Experience
This field experience supports the LTC 4581 component of Phase II. Field experience expectations are delineated in the LTC 4581/LTC 7581 course syllabi. Graded on S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4590: Teach.Math in Sec.Schools: Focus on Geometry, Probability and Statistics
Provides experience which advanced students' knowledge, understanding, and facility in engaging students in learning mathematics.
Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics.
Credit Hours: 3
Prerequisites: LTC 4571 or LTC 7571 and LTC 4581 or LTC 7581
Recommended: Admittance to Phase II

LTC 4590W: Teach.Math in Sec.Schools: Focus on Geometry, Probability and Statistics - Writing Intensive
Provides experience which advanced students' knowledge, understanding, and facility in engaging students in learning mathematics. Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics.
Credit Hours: 3
Prerequisites: LTC 4571 or LTC 7571 and LTC 4581 or LTC 7581
Recommended: Admittance to Phase II

LTC 4594: Teach Math in Sec Sch: Focus on Geometry/Probability
This field experience supports the LTC 4590 component of Phase II. Field experience expectations are delineated in the LTC 4590 course syllabi. Graded on a S/U basis only.
Credit Hours: 1
Recommended: Admittance to Phase II

LTC 4600: Diagnosis and Remediation of Learning Problems in Math - Middle
The study of diagnostic and remedial instructional techniques for the teaching of mathematics. Emphasis is placed on alternative teaching methods and strategies.
Credit Hours: 3

(cross-leveled with LTC 7631). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 4
Prerequisites: Consent required
Recommended: Admittance to Phase II

(cross-leveled with LTC 7631). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 4
Prerequisites: Consent required
Recommended: Admittance to Phase II

(cross-leveled with LTC 7631). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 4
Prerequisites: Consent required
Recommended: Admittance to Phase II
LTC 4634: Teaching Middle and Secondary Science I Field
This field experience supports the Learning, Teaching and Curriculum 4631 component of Phase II. Field experience expectations are delineated in the LTC 4631 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4641: Teaching Middle and Secondary Science II
An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 3
Prerequisites: LTC 4631
Recommended: Admittance to Phase II

LTC 4644: Teaching Middle and Secondary Science II Field
This field experience supports the LTC 4641 component of Phase II. Field experience expectations are delineated in the LTC 4641 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 3
Prerequisites: LTC 4631 and LTC 4641
Recommended: Admittance to Phase II

LTC 4654: Teach Sci MS/Sec Sch: Phil, Hist, Sci Inq, Curr, Assm & Tech Ill Fld
This field experience supports the LTC 4651 component of Phase II. Field experience expectations are delineated in the LTC 4651 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4730: Overview of Art Education
This is the first of a three course sequence and serves as the foundation for inquiries of methodological and philosophical approaches to the teaching of the visual arts at the elementary and secondary level.
Credit Hours: 3
Recommended: Admittance to Phase II

LTC 4734: Overview of Art Education Field Experience
This field experience supports the Learning, Teaching and Curriculum 4730 component of Phase II. Field experience expectations are delineated in the LTC 4730 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4740: Inquiry into Art Education: Pre-School Through Middle School
The second of three course sequence. It will cover art education issues as they apply to the Pre-School through Middle School setting.
Credit Hours: 3
Prerequisites: LTC 4730 or LTC 7730
Recommended: Admittance to Phase II

LTC 4740W: Inquiry into Art Education: Pre-School Through Middle School - Writing Intensive
The second of three course sequence. It will cover art education issues as they apply to the Pre-School through Middle School setting.
Credit Hours: 3
Prerequisites: LTC 4730 or LTC 7730
Recommended: Admittance to Phase II

LTC 4744: Inquiry into Art Education: Pre-School Through Middle School Field Experience
This field experience supports the LTC 4740 component of Phase II. Field experience expectations are delineated in the LTC 4740 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4750: Inquiry into Art Education: Secondary
The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism.
Credit Hours: 3
Prerequisites: LTC 4740 or LTC 7740
Recommended: Admittance to Phase II

LTC 4754: Inquiry into Art Education: Secondary Field Experience
This field experience supports the LTC 4750 component of Phase II. Field experience expectations are delineated in the LTC 4750 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4750: Inquiry into Art Education: Secondary
The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism.
Credit Hours: 3
Prerequisites: LTC 4740 or LTC 7740
Recommended: Admittance to Phase II

LTC 4754: Inquiry into Art Education: Secondary Field Experience
This field experience supports the LTC 4750 component of Phase II. Field experience expectations are delineated in the LTC 4750 course syllabi. Graded on a S/U basis only.
Credit Hour: 1
Recommended: Admittance to Phase II

LTC 4800: Educational and Cultural Experience Abroad
(cross-leveled with LTC 7800). Students work in a collaborative setting with K-12 educations in the host country. Components of this experience include research, discussion, electronic communication, in-country observations, and co-teaching experiences with a focus on the host-country education and culture.
Credit Hour: 0-6

LTC 4960: Special Readings in Curriculum and Instruction
Directed study of literature and research reports in education.
Credit Hour: 1-3
**LTC 4970: Standardized Assessments**
This non-credit course will provide resources to assist with standardized assessments required to become a Missouri certified teacher. Graded on S/U basis only.

**Credit Hours:** 0  
**Recommended:** Admittance to Phase III

---

**LTC 4971: Internship and Capstone Seminar**
Internship is a full-semester experience in the public schools, including a capstone seminar addressing problems of practice (integrating subjects, reading and writing across the curriculum, meeting all students' needs), and evaluation of the interns preparation for entering the profession. It is offered each Fall and Spring for 10-16 credit hours. Admittance to College of Education required.

**Credit Hour:** 1-16  
**Prerequisites:** ED_LPA 4060 or ED_LPA 7060  
**Recommended:** Admittance to Phase III

---

**LTC 4981: Internship I**
This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preserve intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

**Credit Hour:** 1-4  
**Prerequisites:** ED_LPA 4060 or ED_LPA 7060  
**Recommended:** Admittance to Phase III

---

**LTC 7040: Inquiring into Schools, Community and Society I**
This course focuses on schooling in American society, the school community, the school culture and students' lives and identities. Studied are the political, cultural, and economic conditions of the schools.

**Credit Hour:** 2-3  
**Prerequisites:** TDP 2020 and completion of Phase I or enrollment in a graduate level program in the College of Education

---

**LTC 7085: Problems in Curriculum and Instruction**
Studies professional programs and issues in health or physical education.

**Credit Hour:** 1-3  
**Prerequisites:** instructor's consent

---

**LTC 7091: Assessment and Family Collaboration in Early Childhood Education**
(cross-leveled with LTC 4091). Strategies for effectively observing and assessing young children and strategies for building positive family and community relationships, which support children's development and learning.

**Credit Hours:** 3  
**Prerequisites:** Consent required (enrollment limited to students admitted to Phase II)

---

**LTC 7100: Working with Infants and Toddlers**
Experience working with children aged 6 weeks to 2 1/2 years and their families. Opportunity to apply theories of cognitive, language, and social development.

**Credit Hours:** 3  
**Prerequisites:** course in child development and admission to Phase II; admittance to College of Education required

---

**LTC 7120: Early Childhood Education Literacy Methods & Assessment I**
(cross-leveled with LTC 4120). Strategies for assessing and supporting young children's literacy development. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Consent of department required  
**Recommended:** Admittance to College of Education required and co enrollment in LTC 4200 and LTC 4210 and K-3 field experience

---

**LTC 7130: Teaching & Learning Math, Sci. & Social Studies w/Young Children**

**Credit Hours:** 9  
**Prerequisites:** Consent required (enrollment is limited to students admitted to the College of Education and have completed of ECE Language/Literacy block)

---

**LTC 7140: Curriculum, Theory and Classroom Management in Early Childhood Education**
Reflection on the relationship of theory and practice in ECE. Consideration of various topics including historical influences on early childhood curriculum, models of early childhood curriculum, classroom management, and individualizing curriculum.

**Credit Hours:** 3  
**Prerequisites:** Consent required (enrollment limited to students who have completed the first two semesters of Phase II)

---

**LTC 7150: Early Childhood Education Literacy Teaching Methods and Assessment II**
(cross-leveled with LTC 4150). Advanced strategies for assessing and supporting young children's literacy development.

**Credit Hours:** 3  
**Prerequisites:** Consent of department required  
**Recommended:** LTC 4120 or LTC 7120, LTC 4124 K-3 Field Experience and admittance to the ECE certification program in Phase II of the College of Education

---

**LTC 7200: Young Children's Emergent Language**
For Early Childhood and Elementary Education majors. Study of young children's language development and implications for teachers.

**Credit Hours:** 2  
**Prerequisites:** admittance to Phase II; admittance to College of Education required  
**Corequisites:** LTC 4120, LTC 4210, and K-3 field experience
LTC 7240: Art for Children
This course focuses on appropriate teaching methods and strategies for teaching art (studio, art history, aesthetic, and criticism), artistic development of children, and curriculum, instructional, and organization strategies for the art classroom.

Credit Hours: 2
Prerequisites: admittance to College of Education

LTC 7400: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3
Prerequisites: LTC 4380 or LTC 7380 and LTC 4390 or LTC 7390; admittance to Phase II of College of Education

LTC 7410: Teaching, Engaging and Assessing Middle-Level Students
In this course students will learn about the specific and individual needs of middle-level students and develop the skills and understandings to meet these needs.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7420: Adolescent Literacy
(cross-leveled with LTC 4420). Explores literacy implications of content areas. Topics include determining the difficulty of text, examining literature that supports content, creating alternative assessments, and evaluating reading/writing strategies as tools for learning. (Required of all students obtaining certification in middle school or concurrent certification in middle and secondary school area(s) except language arts.

Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7470: Teaching Secondary English/Language Arts I
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/Language Arts, primarily focusing on Young Adult Literature and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education

LTC 7480: Teaching Middle and Secondary English/Language Arts II
Prepares prospective educators with the knowledge, skills, and strategies necessary for integrating and teaching the English/language Arts, primarily focusing on the teaching of writing and critical thinking.

Credit Hours: 3
Prerequisites: admittance to Phase II of College of Education

LTC 7490: Teaching Middle and Secondary English/Language Arts III
Prepares prospective educators by focusing on the teaching of American culture and critical thinking, through literacy, mediacy, oracy, and cultural artifacts.

Credit Hours: 3
Prerequisites: LTC 4470 or LTC 7470 and LTC 4480 or LTC 7480; admittance to Phase II of College of Education

LTC 7500: Emergent Language in Early Childhood
Study of language learning in young children; how meaning of the environment is gained through language; implications for teachers working with children from varying language-learning environments.

Credit Hours: 3

LTC 7560: Reading and Writing in Content Areas
(cross-leveled with LTC 4560). For secondary school teachers. Specific ways teachers can help students improve reading and writing skills in content areas and ways they can be taught.

Credit Hours: 3
Prerequisites: Consent required (enrollment is limited to College of Education admitted to Phase II with 60+ credit hours)

LTC 7565: Reading and Writing in the Content Areas II
(cross-leveled with LTC 4565). Reading and Writing in the Content Areas II explores specific reading and writing content area strategies, with a focus on struggling students and new investigations in disciplinary literacy.

Credit Hours: 3
Prerequisites: LTC 4560 or LTC 7560 or LTC 4380

LTC 7581: Teaching Mathematics in Middle and Secondary Schools: Focus on Algebra and Technology
(cross-leveled with LTC 4581). Key issues in the teaching of pre-algebra through advanced algebra, appropriate uses of technology, lesson planning, integration of appropriate models, mathematical connections. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: LTC 4570 or LTC 7570; admittance to College of Education required

LTC 7587: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction.

Credit Hour: 1-3

Provides experience which advanced students' knowledge, understanding, and facility in engaging students in learning mathematics. Major issues/topics highlighted in the course are: exploration of curriculum, teaching strategies, and assessment for geometry, probability and statistics.

Credit Hours: 3
Prerequisites: LTC 4570 or LTC 7570; admittance to College of Education required

LTC 7600: Diagnosis and Remediation of Learning Problems in Math-Middle
The study of diagnostic and remedial instructional techniques for the teaching of mathematics. Emphasis is placed on alternative teaching methods and strategies.
(cross-leveled with LTC 4631). An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 3
Prerequisites: Consent required (professional standing; admittance to College of Education required)

LTC 7641: Teaching Middle and Secondary Science II
An integration of the philosophy and history of science, technology, society; teaching science as inquiry; classroom management, strategies and curricula for teaching/learning science; and using technology in science learning.
Credit Hours: 3
Prerequisites: professional standing and Teaching Science in the Secondary School, Part I; admittance to College of Education required

LTC 7730: Overview of Art Education
This is the first of a three course sequence and serves as the foundation for inquiries of methodological and philosophical approaches to the teaching of the visual arts at the elementary and secondary level.
Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7740: Inquiry into Art Education: Pre-School Through Middle School
The second of three course sequence. It will cover art education issues as they apply to the Pre-School through Middle School setting.
Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7750: Inquiry into Art Education: Secondary
The third of a three course sequence. Student will learn about secondary art education and make application to practice with emphasis on adolescent development, curriculum design, student assessment, instruction, diversity/equity, and professionalism.
Credit Hours: 3
Prerequisites: admittance to College of Education required

LTC 7800: Educational and Cultural Experience Abroad
(cross-leveled with LTC 4800). Students work in a collaborative setting with K-12 educators in the host country. Components of this experience include research, discussion, electronic communication, in-country observations, and co-teaching experiences with a focus on the host-country education and culture.
Credit Hour: 0-6

LTC 8085: Problems in Curriculum and Instruction
Problems in Curriculum and Instruction.
Credit Hour: 1-99
LTC 8618: Writing, Reading and Teaching Nonfiction
Students will get more than their feet wet as they read and write a variety of nonfiction texts, explore nonfiction's value and relationship to other genres, and investigate its potential for learning.

Credit Hours: 3

LTC 8619: Media Literacy
Teachers will learn how to incorporate visual images in the classroom while helping students "read" the images of our media-rich culture. Teachers will pair media with literature; analyzed and evaluate different media; and design several assignments.

Credit Hours: 3

LTC 8620: Talk in the Curriculum
This survey of oracy examines talk's essential role in learning and the connections among language, power and cultural identity.

Credit Hours: 3

LTC 8625: Language Acquisition and Development
You will explore theories of language acquisition and development, and examine how language acquisition impacts reading and writing. Ideas for creating a language rich curriculum, second language learning, and cultural aspects of language will be addressed.

Credit Hours: 3

LTC 8635: Literature for Children and Youth
Systematic study of selected areas of particular importance to students of literature, teachers, librarians, supervisors, and school administrators.

Credit Hours: 3

Prerequisites: Instructor's consent

LTC 8637: Teaching Communication
This course explores the theory, research, and practice in the teaching and learning of communication. This course is intended for master's and doctoral students - experienced teachers enrolled in MU's English Education graduate program. This course addresses selected Common Core Standards, and focuses on the teaching of speaking, listening, and language, as they occur within the best practices of English/Language Arts classrooms. The course involves variety of texts such as short stories, poems, literary nonfiction, and plays. The teaching of critical thinking, research skills, and technology are integrated into these experiences. This course encourages the use of various teaching and learning practices. The course is divided into the following major themes: 1) Introductions of Class Members; 2) Overview of Communication: Theory, Research, Practice; and 3) Teaching Communication in Context: Speaking, Listening, Reading, Writing. Graded on A-F basis only.

Credit Hours: 3

Recommended: We recommended, but do not require, that you take this course early in your program

LTC 8640: Studies in English Education
Exploration of the theory, research, and application of topics in the teaching of English, such as Writing/Thinking, Media, Literature, Language, and Creative Nonfiction. Topics announced at time of registration. May repeat to twelve hours with department's approval.

Credit Hours: 3

LTC 8641: Foundations of English Education
This course focuses on foundational readings in the teaching and learning of English/Language Arts. The course requires intensive reading, writing, and discussion focusing on four subcategories of English Education: writing, literature, language, and critical thinking. In addition, the course situates these topics within a historical perspective of the field. An additional focus of this course is on professional networking and development. It is expected that as students develop a greater understanding of the foundations of English Studies in Language Arts, they will see where their areas of expertise and knowledge join them to the profession as a leader. Graded on A-F basis only.

Credit Hours: 3

LTC 8642: Teaching Writing and Reading in Content Areas
Theory and practice of teaching reading and writing. Specific ways teachers can help students use writing to communicate about the course content, as well as to learn course concepts. Class also focuses on how to teach reading in reading classes, how to help students improve reading skills in content areas, and how reading and writing skills can reinforce each other.

Credit Hours: 3

LTC 8643: Teaching ESL/EFL to Adult Learners
This course explores the characteristics of adult learners, theories of adult learning, and the contexts in which adults learn English as a second or foreign language. Students apply this knowledge in the design of language learning curricula and activities for adult learners. Graded on A-F basis only.

Credit Hours: 3

LTC 8644: Teaching English Grammar and Pronunciation
This course develops teachers' knowledge of the structure of the English language (its grammar and its sound system) and provides them with pedagogical skills in teaching grammar and pronunciation to second/foreign language learners. Graded on A-F basis only. Prerequisites: LTC 8645 and LTC 8648

Credit Hours: 3

LTC 8645: Second Language Acquisition
This course examines theories of how humans develop first and second languages in childhood and adulthood and how this knowledge can be used to educate language learners. Graded on A-F basis only.

Credit Hours: 3

LTC 8646: Materials for and Assessment of English Language Learners
This course will examine the appropriate classroom materials, methods, reasons, and tools for the formal and informal assessment of English Language Learners. Graded on A-F basis only.

Credit Hours: 3
LTC 8647: Language and Culture for Educators  
This course will examine how to prepare educators to effectively educate students from a range of linguistic and cultural backgrounds by developing a broad understanding of the definition and nature of culture and appropriate teaching strategies and materials for diverse students. Graded on A-F basis only.  
Credit Hours: 3

LTC 8648: Linguistics for Educators  
This course focuses on the form, meaning, and use of language in context and applying knowledge of linguistics to the teaching of English language learners. Graded on A-F basis only.  
Credit Hours: 3

LTC 8649: Methods of Teaching English Language Learners  
This course will examine how to prepare teachers to develop the investigative, decision-making, and reflective teaching skills needed to work with English Language Learners. Graded on A-F basis only.  
Credit Hours: 3

LTC 8650: English to Speakers of Other Languages Practicum  
This culminating course will allow students to apply the theory and practice of teaching English to non-native speakers in an educational setting. Graded on A-F basis only.  
Credit Hours: 3

LTC 8653: Education Toward Bi/Multilingualism: Theory, Policy, and Practice  
(same as ED_LPA 8653). Overview of the theory, policy, and practice of using at least two languages in education to develop children’s bi/multilingualism. Key topics include: (1) models of bilingual/multilingual education; (2) policy and politics of language education in the U.S. and international contexts; (3) psycholinguistic and sociocultural perspectives on bi/multilingual language development, as related to schooling; and (4) evaluation and assessment issues in bi/multilingual education.  
Credit Hours: 3

LTC 8654: ESOL Curriculum Development  
This course prepares teachers to design a language learning curriculum for students who are learning English as a second or foreign language.  
Credit Hours: 3

LTC 8660: Reading Miscue Analysis  
The process in which readers construct meaning by relating their sociopsycholinguistic backgrounds to discourse. 15 studied miscues (text deviations) are analyzed at several linguistic levels. A comprehension centered reading program is developed.  
Credit Hours: 3  
Prerequisites: LTC 7540 and LTC 7560, or equivalent

LTC 8664: Practicum in Child Study I  
Practicum experiences in diagnosing educational problems of school children.  
Credit Hours: 3-5  
Prerequisites: LTC 7540 or LTC 7560 or LTC 8670

LTC 8665: Practicum in Child Study II  
Practicum experiences in applying remedial procedures to children with educational problems.  
Credit Hours: 3-5  
Prerequisites: LTC 8664

LTC 8670: Analysis & Correction of Reading Disabilities  
Diagnostic and corrective procedures in reading instruction that may be used for clinical study.  
Credit Hours: 3  
Prerequisites: LTC 7540 or instructor's consent

LTC 8675: Foundations of Reading Instruction  
This online course examines principles and practices of teaching reading to PK-12 students; the nature of reading and literacy learning, the foundations of reading acquisition and development; and reading instructional across grade levels. Graded on A-F basis only.  
Credit Hours: 3

LTC 8681: Making a Difference for the Struggling Reader  
Will help explore ways to help readers who have been unable to achieve success in reading--will learn how to access and evaluate strategies students are currently using.  
Credit Hours: 3

LTC 8682: Focus on Writing in the Classroom  
The course focuses on theory, research and practices in teaching writing in the elementary classroom (K-6) while developing a critical understanding of process methods to teach writing.  
Credit Hours: 3

LTC 8683: Celebrating Reading Through Good Books  
Many people can read but do not. This course will explore ways to make reading a joyful, exciting experience. Assignments will include reading journal articles that will help students meet self determined goals. Sharing books will be an important part of this course.  
Credit Hours: 3

LTC 8684: Integrating Literacy and Technology  
This will be a seminar course in which the students explore definitions of literacy, theoretical frameworks of educational technology, and literature that investigates the effectiveness of integrating literacy and technology. The students will also examine and evaluate a range of software used to integrate literacy and technology.  
Credit Hours: 3

LTC 8685: Literature Opportunities: Using Children's and Young Adult's Literature in the Classroom  
This class examines genres in children's and young adult literature (grades 1-9). In-depth look at the work of children's authors and illustrators; explore issues of censorship, gender, and culture.
Credit Hours: 3

LTC 8686: Theory of Instructional Strategies
The course investigates instructional strategies in K-12 and higher education classrooms and the theories behind those strategies. Content includes large and small group strategies, inquiry-based learning, student-centered and direct instruction, and differentiated instruction.

Credit Hours: 3

LTC 8687: Literacy and the Internet (Grades K-12)
The internet offers a myriad of opportunities to engage K-12 students in meaningful, purpose-driven reading and writing. Students examine their own literacy programs, examine ways they can incorporate the internet, and create a classroom web site.

Credit Hours: 3

LTC 8688: Nature of Literacy in a Digital World
New literacies are required to successfully engage in professional, civic, and personal lives that are imbued with technology. Students examine the literacy skills required to proficiently read and write with text messages, blogs, wikis, social networks, and virtual worlds.

Credit Hours: 3

LTC 8689: Curricular Decisions for Literacy in a Digital World (Grades K-12)
This course will focus on making a match between educational technologies that can be used to support literacy and your beliefs about literacy instruction. We will examine types of educational technologies, stances towards the integration of literacy and technology, various theoretical perspectives of literacy acquisition and development, aspects of literacy, and instructional approaches for literacy. You will examine various technologies and identify what best matches your literacy instruction. Graded on A-F basis only.

Credit Hours: 3

LTC 8717: Teaching, Learning, & Research in Middle & Secondary School Sci.I
Course I is for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: LTC 8942

LTC 8718: Teaching, Learning & Research Middle & Secondary School Sci.: II
For Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: LTC 8942

LTC 8719: Teaching, Learning, & Research Middle & Secondary
For Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: LTC 8942

LTC 8724: College Science Teaching (same as BIO_SC 8724, PHYSCS 8310 and ASTRON 8310). Study of learner characteristics, teaching strategies, and research findings related to teaching science at the post-secondary level.

Credit Hours: 3

LTC 8725: Science Outreach: Public Understanding of Science (same as BIO_SC 8725 and AN_SCI 8725). Development of presentations to adult audiences on the science underlying issues of current interest. May be repeated for credit.

Credit Hour: 1-2

LTC 8726: Integrating Science with Outreach (same as BIO_SC 8726). This course provides an opportunity for students to earn credit for outreach activities in the community. Students will capitalize on their area of study and scientific expertise in developing, implementing, and evaluating related outreach activities. May be repeated for credit.

Credit Hour: 1-6

LTC 8730: Survey of Art Education
Provides survey of the development of art education and problems in the field by means of a critical inquiry.

Credit Hours: 3

LTC 8735: Visual Literacy and Visual Culture
This course will investigate the intersection between art and language, exploring the connections between visual media and the written word-how these two areas inform and enrich each other.

Credit Hours: 3

LTC 8740: Curriculum in Art Education
Advanced study of art education curricula, with option for elementary or secondary emphasis. Study of exemplary art programs, standards
of quality, curriculum models, curriculum design and construction, concomitant instructional methods and evaluation.

Credit Hours: 3

LTC 8745: Visual Thinking Strategies I
This course will introduce regular classroom and art educators to Visual Thinking Strategies theory and methodology, building practical VTS facilitation skills through structured guidance and feedback as each participant implements VTS lessons within his/her own teaching context.

Credit Hours: 3

LTC 8746: Visual Thinking Strategies II
Visual Thinking Strategies II students will build upon the basic facilitation skills acquired during VTS I as they design an image-based studio curriculum tailored to their own students and classrooms. Action research and peer coaching are key features of the course. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: LTC 8745

LTC 8750: Review of Research in Art Education
Studies appropriate research methodologies and reviews research and selected readings in art education.

Credit Hours: 3

LTC 8765: Artistic Thinking: Multimedia Applications for Teaching Art
This course is designed to keep pace with contemporary trends in technology and digital media literacies. Students will deeply explore current applications and develop curriculum implementation strategies for K-12 instruction in visual arts classrooms.

Credit Hours: 3

LTC 8766: Illuminating Process and Product: Making Learning Visible
This course focuses on the evaluative processes that surround and are embedded in art education. Due to the subtle, nuanced, and product based nature of visual arts, evaluative practices should be studied, understood, and implemented in an effective and encouraging manner. Graded on A-F basis only.

Credit Hours: 3

LTC 8770: The Art of Teacher Reflection
This course investigates reflective practices making deep inquiries into theoretical teaching practices. Students will examine their educational heritage, cultural beliefs and the implications these beliefs have on their current and future classrooms. Graded on A-F basis only.

Credit Hours: 3

LTC 8780: Managing Classrooms for Learning
Theoretical assumptions, goals, and research that inform various approaches to classroom management advocated for practitioners. Includes strategies for conducting action research on classroom management.

Credit Hours: 3

Credit Hour: 1-3

Prerequisites: An educational psychology course or instructor's consent

LTC 8790: Patterns for Instruction in Social Studies
Presents and evaluates strategies for planning, teaching, and evaluating social studies in elementary and secondary schools.

Credit Hours: 3

LTC 8800: Secondary Social Studies Curriculum
Examines current theory, trends and practices in secondary social studies curriculum with a practicum in curriculum development.

Credit Hours: 3

LTC 8805: Inquiry into K-12 History and Social Science
This course is designed as a directed study on a topic in social studies content for the K-12 classroom. The focus of the course is on what is taught in social studies. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: LTC 8745

LTC 8806: Issues in the Social Studies Classroom
This course is designed to provide an intensive study of current trends and significant issues in social studies that affect the social studies classroom.

Credit Hours: 3

LTC 8807: Exploration of Research in Social Studies
The course serves as the capstone experience for graduate students pursuing in the LTC Masters program with an emphasis in social studies education. This course prepares students to engage in classroom research specific to a social studies classroom and/or setting. Students will consider their role as classroom researchers. Students will be asked to synthesize course readings and discuss the underlining theories, dilemmas, and tension found in the research. Students will also conduct a capstone project. Graded on A-F basis only.

Credit Hours: 3

LTC 8860: Mathematics Curriculum
Evolution of the mathematics curriculum during the 20th century will be studied. Emphasis will be given to examining major factors influencing the changing mathematics curriculum and their impact.

Credit Hours: 3

Prerequisites: teaching experience or the instructor's consent

LTC 8861: Teaching, Learning & Research in Middle & Secondary School Math I
Course I for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.

Credit Hours: 3

LTC 8862: Teaching, Learning & Research Middle & Secondary School Math: II
Course II for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only.

Credit Hours: 3
**LTC 8863: Teaching, Learning, and Research Middle and Secondary Math III**
Course III for Post-Baccalaureate Majors seeking Middle and/or Secondary teacher certification. Graded on A-F basis only. Prerequisites: LTC 8861, and LTC 8862; Co-Requisites: LTC 8942.

**Credit Hours:** 3

**LTC 8865: Assessment in Mathematics Education**
Examination of assessment practices and the accountability movement. Emphasis is placed on significant research findings in assessment and implications for planning, implementing, and evaluating mathematics instruction.

**Credit Hours:** 3
**Prerequisites:** ESC_PS 7100 and teaching experience

**LTC 8866: Contemporary Curriculum Issues in Mathematics Education**
Mathematics curriculum is a concern to students, parents, school districts, business leaders, and government officials. This course examines current trends in mathematics curriculum from the perspective of mathematics educators, policymakers, and the public. Factors influencing changes in mathematics curriculum are examined. Graded on an A-F basis only.

**Credit Hours:** 2

**LTC 8870: Mathematics Teaching and Teacher Education**
Recent developments and research findings in mathematics teaching and mathematics teacher education will be studied.

**Credit Hours:** 3
**Prerequisites:** Open to masters and doctoral students

**LTC 8871: Teaching and Learning Number/Operations Advanced**
Course will develop understanding of learning and teaching pre-number concepts, counting and cardinality, numbers and operations in base ten. Emphasis will be given to how children think about and learn these concepts and how they fit into the elementary school curriculum. Graded on A-F basis only.

**Credit Hours:** 3
**Corequisites:** LTC 8881

**LTC 8872: Teaching and Learning Rational Number Advanced**
The course is designed to develop an understanding of the learning and teaching of rational numbers and the ratio and proportional relationships. Emphasis will be given to how children think about and learn these concepts and how they fit into the elementary school curriculum. Graded on A-F basis only. Corequisites: LTC 8882

**Credit Hours:** 3

**LTC 8873: Teaching and Learning Geometry and Measurement Advanced**
This course is designed to develop and understanding of the teaching and learning of geometry and measurement. Emphasis will be given to how children think about and learn these concepts and how they fit into an elementary mathematics curriculum. Graded on an A-F basis only.

**Credit Hours:** 3
**Corequisites:** LTC 8883

**LTC 8874: Teaching and Learning Algebraic Reasoning Advanced**
Course focuses on the content and complexities of teaching and assessing algebraic reasoning in grades 1-6. Includes examinations of representation, analysis of mathematical structures, patterns, functions, and the transition from arithmetic to algebra. Graded on A-F basis only. Corequisites: LTC 8884

**Credit Hours:** 3

**LTC 8875: Technology and Mathematics Education**
This course will focus on effective uses of technology in mathematics teaching and learning. Participants will experience different electronic technologies including computers, graphing calculators, and calculator based laboratories.

**Credit Hours:** 3
**Prerequisites:** Open to masters and doctoral students

**LTC 8876: Teaching Data Analysis and Mathematical Modeling**
The course will develop understanding of data analysis and mathematical modeling. Emphasis will be given to how children think and learn about these concepts and how they fit into the elementary school curriculum. Graded on an A-F basis only.

**Credit Hours:** 3

**LTC 8877: Foundations of Mathematics Leadership in Elem Schools**
This course provides opportunities for participants to develop knowledge and understanding of leadership principles and the process of continuous improvement as it related to the roles and responsibilities of elementary mathematics specialists. Graded on A-F basis only.

**Credit Hours:** 2

**LTC 8878: Mathematical Leadership for Elementary Schools Advanced**
This advanced leadership course focuses on research and practice related to teamwork, interaction, communication, conflict resolution, and leadership in K-5 schools. Candidates will examine effective strategies for influencing and facilitating school/district improvement. Course graded on A-F basis only.

**Credit Hours:** 3

**LTC 8880: Advanced Survey of Theories of Learning Mathematics**
This course is designed for students to explore historical and current cognitive theories that frame research in teaching and learning of mathematics.

**Credit Hours:** 3
**Prerequisites:** ESC_PS 7350 or instructor's consent
LTC 8881: Internship - Number and Operations in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (parents and teachers) on number and operations concepts. Graded on A-F basis only. Corequisites: LTC 8871
Credit Hours: 1

LTC 8882: Internship - Rational Numbers in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (teachers and parents) on rational number and proportional thinking concepts. Graded A-F basis only. Corequisites: LTC 8872
Credit Hours: 1

LTC 8883: Internship - Geometry/Measurement in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with students and adult learners (teachers and parents) on geometry and measurement concepts appropriate for K-5 students. Graded on A-F basis only.
Credit Hours: 1
Corequisites: LTC 8873

LTC 8884: Internship - Algebraic Reasoning in Elementary Schools
A supervised mathematics teaching practicum with online seminars in which the candidate acquires experience working with a range of students and adult learners (teachers and parents) on concepts related to algebraic reasoning appropriate for K-5 students. Course graded on A-F basis only. Corequisites: LTC 8874
Credit Hours: 1

LTC 8885: Contemporary Equity Issues in Mathematics Education
Certain student populations (e.g., socioeconomically disadvantaged, racial minorities, English Language Learners, students with disabilities) have been traditionally underserved by the U.S. mathematics education system. This course explores the fundamental issues underlying this situation and explores mathematics teaching techniques that can be used to make students' learning opportunities more equitable. Graded on an A-F basis only.
Credit Hours: 3

LTC 8890: Mathematics Education Research
Examination of major research efforts and significant findings on learning and teaching mathematics. Emphasis will be placed on becoming knowledgeable of research and on developing wise consumers of research in mathematics education.
Credit Hours: 3
Prerequisites: teaching experience or instructor's consent

LTC 8893: Integrating Instruction in Science and Mathematics, Grades 5-12
This course is designed to help middle and secondary mathematics and science teachers enhance student understanding of mathematics and science through integration of the disciplines.
Credit Hours: 2

LTC 8896: Secondary Mathematics from an Advanced Perspective
This course deepens understanding of the mathematics underlying the secondary school curriculum. It addresses high school content from the viewpoint of advanced mathematics. Connections are explored within high school content and between high school and college content. Content strands include analysis, algebra, and Euclidean and non-Euclidean geometry. Graded on an A-F basis only.
Credit Hours: 3

LTC 8900: Seminar in Curriculum and Instruction
Seminar in Curriculum and Instruction. Some sections may be graded on A-F or S/U graded basis only.
Credit Hours: 1-3

LTC 8910: Individual Research
Independent research not leading to thesis.
Credit Hours: 1-3
Prerequisites: consent required

LTC 8913: Curriculum Development
Curriculum Development explores the intersections of learning, teaching, and curriculum. Students investigate not just various definitions of, types of, and purposes for educational curriculum, but more specifically focus on curriculum-in-practice. Student explore how teachers enact curriculum and the factors that inform curriculum use, such as state and national standards, standardized assessments, school contexts and curricular materials. Students study and apply models of curriculum development and curriculum decision-making for everyday classroom use, which may include backwards design, culturally-relevant designs, principles of learning and/or other curricular and instructional approaches. Graded on an A-F basis only.
Credit Hours: 3

LTC 8914: Culturally Responsive Pedagogy
This course equips practicing teachers, curriculum developers, and community leaders with tools to address the varied cultural and social landscape of today's classrooms. Students examine political, cultural, and economic conditions of schools and develop strengths-based, culturally responsive approaches to teaching. Graded on A-F basis only.
Credit Hours: 3

LTC 8915: Classroom Research-Learning, Teaching and Curriculum
Study of original classroom research and theories of instruction leading to plans for personal research and theory development.
Credit Hours: 1-3
Prerequisites: advanced graduate standing
LTC 8940: In-Service Course in Curriculum and Instruction
Course work adapted to current vocational needs.

Credit Hour: 1-99
Prerequisites: instructor's consent

LTC 8941: Internship in Curriculum and Instruction
Provides internship experience under supervision in advanced levels of curriculum and instruction.

Credit Hour: 1-99
Prerequisites: departmental chairman's consent

LTC 8942: Advanced Internship in Curriculum and Instruction
This internship is for students enrolled in MU COE Post-Baccalaureate Certification Programs. Graded on A-F basis only.

Credit Hour: 1-10
Prerequisites: instructor's consent

LTC 8950: Case Study Research Methods
This course introduces graduate students to the advanced qualitative techniques related to case study research, within and across case coding strategies, and theoretical/philosophical underpinnings of case study research methodology.

Credit Hours: 3
Prerequisites: Previous introductory course in qualitative research methods is required

LTC 8951: Grounded Theory and Situated Inquiry
For qualitative researchers attempting to understand social processes, Grounded Theory (GT) offers a way of developing theory empirically, "from the bottom up." In fact, this is what most distinguishes GT from other methods. It is explicitly emergent. It does not test a hypothesis. It provides useful tools to learn about participants' understandings and experiences of a social issue, process, or phenomena and to discover and construct theory to account for the social processes being studied. In this course, we will consider the theoretical underpinnings and practices of classic and contemporary GT methodologies. Importantly, we will conduct research and a GT analysis of data.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8952: Narrative Inquiry Theory and Research Methods
Narrative inquiry has gained popularity amongst researchers specifically in education and other social science fields with various theoretical and analytical approaches. In this advanced qualitative course, students will learn about these approaches and develop critical perspectives toward narrative inquiry. The purpose of this course is to expose students, in various disciplines, to poststructural theory and provide space to "have a try" at thinking with theory for data analysis. This course provides space for students to read poststructural scholars' original writings. Readings for the course also allow students to read secondary sources and research studies that apply poststructural ideas. Students are encouraged to think of ways that poststructural theory can become a methodology and/or method for research in their discipline.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8953: Poststructural Theory and Research Methods
Poststructural perspectives call into question the universals and/or structures of society. The purpose of this course is to expose students, in various disciplines, to poststructural theory and provide space to "have a try" at thinking with theory for data analysis. This course provides space for students to read poststructural scholars' original writings. Readings for the course also allow students to read secondary sources and research studies that apply poststructural ideas. Students are encouraged to think of ways that poststructural theory can become a methodology and/or method for research in their discipline.

Credit Hours: 3
Prerequisites: ESC_PS 8957 and ESC_PS 9620

LTC 8955: Research in Curriculum and Instruction
Graded on a S/U basis only.
LTC 9620: Qualitative Methods in Educational Research II (same as ED_LPA 9620 and ESC_PS 9620). This course constructs a conceptual and methodological bridge between the understandings of qualitative research developed in Qualitative Methods I and more advanced study of theories, designs, and methods. The focus is on theory, approaches to data analysis, and interpretation. Graded on A-F basis only.

Credit Hours: 3

LTC 9675: Language, Literacy, and Culture
This course explores how culture mediates language and literacy learning from a variety of theoretical perspectives. It examines language and literacy practices in and out of school and the ways educational policies and institutions shape what practices are valued and sustained over time. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Doctoral students only

LTC 9750: Doctoral Research Seminar in Art Education
This course focuses on art education research and is designed to offer doctoral students an opportunity to investigate, through readings, reflective thinking, writing, and discussion, the issues that impact art education research. Graded on A-F basis only.

Credit Hour: 1

LTC 9860: Research in Mathematics Education
This course focuses on research connoisseurship and expertise, and provides concrete opportunities for students to present, critique, and discuss research. It is intentionally designed as a practical research-learning environment. Graded on S/U basis only.

Credit Hour: 1

Prerequisites or Corequisites: Doctoral candidate status in Learning, Teaching, & Curriculum

LTC_V 1110: Principles of Retailing
Examines problems, opportunities and trends in retailing. Problems and cases deal with store organization, budgeting, control, personnel and operation.

Credit Hours: 3

LTC_V 4085: Problems in Curriculum and Instruction - CTE
Study of professional programs and issues or technical problems related to the field of career and technical education.

Credit Hour: 1-99

LTC_V 4210: Foundations of Adult Workforce Education
Study of workforce education and human resource development; emphasis on the foundational concepts of adult learning theory and its application to the development and use of instructional methods, curriculum design, and procedures for adult workforce and professional education. Graded on A-F basis only.

Credit Hours: 3

LTC_V 4570: Career Guidance
Problems, methods, and procedures involved in assisting individuals in choosing, preparing for, entering upon, and progressing in their career. For workforce development and human resource professionals, employment counselors, and teachers, counselors, and school administrators.

Credit Hour: 2-3

LTC_V 4710: Business Software Applications
Advanced concepts, features, and applications central to the major types of business software--spreadsheets, database management, word processing, graphics, and communications.

Credit Hours: 3

LTC_V 4750: Occupational Analysis
Techniques, procedures of analyzing occupations into their basic elements. Required of trade teachers, coordinators.

Credit Hours: 2

LTC_V 4910: Application of Adult Learning Concepts (cross-leveled with LTC_V 7910). Course introduces students to the foundational concepts of adult learning theory, with a focus on the application of these theories to the development and use of instructional methods, curriculum design, and program development principles for instructors of adult learners in a variety of instructional settings. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: LTC_V 4920: Workforce Education and the Community College (cross-leveled with LTC_V 7920). This course provides an overview of the philosophy, history, and development of the community college in America, and reviews the social, economic, and political forces affecting these institutions. It also explores the rationale and techniques for keeping instructional and organizational functions responsive to the
changing educational and workforce needs of the community, with an emphasis on collaboration with public-sector economic development and workforce training programs and customized training services for private sector organizations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Junior standing or instructor approval

LTC_V 7083: Teaching Personal Finance Literacy
(same as FINPLN 7083) Principles and practices of teaching personal finance with particular emphasis on income, money management, spending and credit, and savings and investing. Course graded on A-F basis only.

Credit Hours: 3

LTC_V 7085: Problems in Curriculum and Instruction-CTE
Study of professional programs and issues or technical problems related to the field of career and technical education.

Credit Hour: 1-99

LTC_V 7570: Career Guidance
(cross-leveled with LTC_V 4570). Problems, methods, procedures involved in assisting individuals in choosing, preparing for, entering upon, progressing in their vocation. For teachers, counselors, school administrators. Graded on A-F basis only.

Credit Hour: 2-3

LTC_V 7750: Occupational Analysis
Techniques, procedures of analyzing occupations into their basic elements. Required of trade teachers, coordinators.

Credit Hours: 2

LTC_V 7910: Application of Adult Learning Concepts
(cross-leveled with LTC_V 4910). Course introduces students to the foundational concepts of adult learning theories, with a focus on the application of these theories to the development and use of instructional methods, curriculum design, and program development principles for instructors of adult learners in a variety of instructional settings. Graded on A-F basis only.

Credit Hours: 3

LTC_V 8085: Problems in Workforce and Professional Education
Independent, directed study on a topic in the areas of workforce, professional, or technology education.

Credit Hour: 1-99

LTC_V 8190: Research Applications for Career and Technical Education
Interpretation, evaluation, and application of research methodologies and findings in career and technical education.

Credit Hours: 3

LTC_V 8210: Program Development in Adult Workforce Education
The adult workforce and professional education movement; characteristics of and learning principles applied to adult students; instructional materials, methods and procedures in organizing and operating adult vocational education programs. Graded on A-F basis only.

Credit Hours: 3

LTC_V 8310: Foundations of Career and Technical Education
Philosophy, background, nature, purpose, and role of career and technical education programs in secondary and post-secondary education and workforce development. For teachers and administrators working with career and technical education programs. Graded on A-F basis only.

Credit Hours: 3

LTC_V 8350: Curriculum Development for Workforce and Professional Education
In-depth investigation of curriculum development theory, research, issues, and procedures for workforce and professional education in the public and private sectors.

Credit Hours: 3

LTC_V 8501: Topics in Workforce and Professional Education
Topics in the field of workforce, professional, or technology education in the CTE program areas.

Credit Hour: 1-99

LTC_V 8510: Evaluation in Workforce and Professional Education
Development of evaluation procedures and the construction of evaluation devices for workforce and professional education. Emphasizes performance evaluation, improvement of instruction, and program review.

Credit Hours: 3

LTC_V 8520: Implementation of Career and Technical Education Programs
Types of organization, approved administrative and supervisory practices, and state and federal guidelines for programs of career and technical education. Graded on A-F basis only.

Credit Hours: 3

Linguistics (LINGST)

LINGST 1060: Human Language
(same as ANTHRO 1060, C_S_D 1060, ENGLSH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data, with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

LINGST 2001: Topics in Linguistics-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99

Prerequisites: consent of chair
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINGST 2601</td>
<td>Languages of Africa</td>
<td>Introduction to the diversity of the 2000+ African languages, including first-hand experience exploring a few in detail with native speakers. Features of African languages are compared with others of the world. Political and social aspects of language in Africa are discussed.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>LINGST 2700</td>
<td>Elementary Logic</td>
<td>Introduces a symbolic language for representing the structure of arguments. Presents precise rules for demonstrating the validity of arguments. Covers natural deduction for sentence and predicate logic. Develops skill in constructing derivations.</td>
<td>3</td>
<td>grade of C or higher in MATH 1100 or MATH 1120</td>
</tr>
<tr>
<td>LINGST 2820</td>
<td>Minds, Brains, and Machines</td>
<td>Cognitive science is a many-splendored thing. It draws on a variety of disciplines, including psychology, neuroscience, computer science, linguistics, anthropology, and philosophy. The purpose of this course is to introduce the central questions of cognitive science, the conceptual and empirical tools used to investigate those questions, and some of the answers that have emerged so far. After an initial overview of the foundations of the cognitive-scientific enterprise as a whole, we will see what particular sectors of it have to say about mental capacities such as language, categorization, reasoning, social cognition, and consciousness.</td>
<td>3</td>
<td>sophomore standing required</td>
</tr>
<tr>
<td>LINGST 3001</td>
<td>Topics in Linguistics-General</td>
<td>Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.</td>
<td>1-99</td>
<td>of chair</td>
</tr>
<tr>
<td>LINGST 3010</td>
<td>American Phonetics</td>
<td>Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.</td>
<td>3</td>
<td>consent of chair</td>
</tr>
<tr>
<td>LINGST 3210</td>
<td>Anatomy and Physiology of the Speech Mechanism</td>
<td>Introduction to anatomical and functional aspects of the speech mechanism.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>LINGST 3220</td>
<td>Speech Acoustics</td>
<td>An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.</td>
<td>2</td>
<td></td>
</tr>
<tr>
<td>LINGST 3470</td>
<td>Culture as Communication</td>
<td>Study of the influence of culture on communication processes. Examines topics such as the impact of values, languages, and nonverbal behavior on intercultural interaction.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>LINGST 3620</td>
<td>Languages of the World</td>
<td>Introduction to the diversity of the world's languages emphasizing historical relations and structural similarities and differences.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>LINGST 3710</td>
<td>Survey of Minority and Creole Languages of the U.S. and the Caribbean</td>
<td>Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in context of ethnic, cultural, and national identity (taught in English).</td>
<td>3</td>
<td>sophomore standing required</td>
</tr>
<tr>
<td>LINGST 3721</td>
<td>Spanish Phonetics</td>
<td>Introductory course to the study of Spanish phonological, phonetic and spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish.</td>
<td>3</td>
<td>of chair</td>
</tr>
<tr>
<td>LINGST 4001</td>
<td>Topics in Linguistics-General</td>
<td>Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.</td>
<td>1-99</td>
<td>consent of chair</td>
</tr>
<tr>
<td>LINGST 4001H</td>
<td>Topics in Linguistics-General - Honors</td>
<td>Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Prerequisites: consent of chair; honors eligibility required,</td>
<td>1-99</td>
<td></td>
</tr>
<tr>

Prerequisites: sophomore standing and PHIL 2700 or instructor's consent

**LINGST 4110: Advanced Logic**
(same as PHIL 4110; cross-leveled with LINGST 7110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems.

Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700 or instructor's consent

**LINGST 4200: Introduction to Old English**
(same as ENGLSH 4200; cross-leveled with ENGLSH 7200, LINGST 7200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.

Credit Hours: 3

**LINGST 4412: Gender, Language and Communication**
(same as COMMUN 4412 and ANTHRO 4412). Relationships among gender, language, nonverbal communication, and culture.

Credit Hours: 3
Prerequisites: junior standing or departmental consent

**LINGST 4420: Historical Linguistics**
(same as ANTHRO 4420, ENGLSH 4660; cross-leveled with ANTHRO 7420, LINGST 7420, ENGLSH 7660). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

Credit Hours: 3
Recommended: junior/senior standing

**LINGST 4600: Structure of American English**
(same as ENGLISH 4600; cross-leveled with ENGLSH 7600, LINGST 7600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.

Credit Hours: 3
Recommended: junior standing

**LINGST 4610: History of the English Language**
(same as ENGLISH 4610; cross-leveled with ENGLSH 7610, LINGST 7610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

Credit Hours: 3
Recommended: junior standing

**LINGST 4620: Regional and Social Dialects of American English**
(same as ENGLISH 4620). The study of regional and social variation in pronunciation, vocabulary, and syntax of American English.

Credit Hours: 3
Recommended: LINGST 4600 and LINGST 4610 or equivalent

**LINGST 4630: Phonology**
(same as ENGLISH 4630; cross-leveled with ENGLSH 7630, LINGST 7630). Survey of the sound patterns of English and other languages.

Credit Hours: 3
Recommended: LINGST 1060 or LINGST 4600 or equivalent

**LINGST 4640: Syntax**
(same as ENGLISH 4640; cross-leveled with ENGLSH 7640, LINGST 7640). Study of the properties of phrase and sentence-level grammar, emphasizing English, with some comparison to other languages.

Credit Hours: 3

**LINGST 4710: History of the French Language**
(same as FRENCH 4710). Study of the French language from its Latin origin to the present. The course includes a survey of the external, social, political, and historical factors that have affected the development of French, followed by diachronic study of the internal structural features of the language.

Credit Hours: 3
Prerequisites: FRENCH 3420 and FRENCH 3430

**LINGST 4711: History of the Spanish Language**
(same as SPAN 4711). Diachronic analysis of phonological morphological, and syntactical systems of Spanish, from Vulgar Latin to contemporary dialects.

Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

**LINGST 4720: Structure of Modern French**
(same as FRENCH 4720). An introductory presentation of the phonological and syntactic systems of contemporary standard French.

Credit Hours: 3
Prerequisites: FRENCH 3160

**LINGST 4721: Structure of Modern Spanish**
(same as SPAN 4721). Synchronic analysis of phonology morphology and syntax of spoken Spanish dialects.

Credit Hours: 3
Recommended: four 3000-level courses in Spanish

**LINGST 4722: Spanish Across the Continents**
(same as SPAN 4722). This course focuses on the effects of migratory movements on language change, considering the Spanish spoken in Latin America, Puerto Rico, Spain and the USA. The class sharpens awareness and recognition of the linguistic diversity of the Spanish-speaking regions of the world. Graded on A-F basis only.

Credit Hours: 3
Recommended: four 3000-level courses in Spanish

**LINGST 4723: Language and Society: Spanish in the U.S.**
(same as SPAN 4723). This class surveys linguistic and social issues pertaining to Spanish in the U.S. (past, present and future). Topics
include bilingualism, code switching (a.k.a. Spanglish), first language attrition, linguistic identity, and the role of Spanish in Education, services and media. Graded on A-F basis only.

**Credit Hours**: 3
**Recommended**: four 3000-level courses in Spanish

**LINGST 4730: Linguistic Theory and Language Acquisition**
The goal of this class is to study the implications of current linguistic theory for contemporary research on second language acquisition. In particular, the hypothesis that second language acquisition follows some of the same principles as first language acquisition is explored. Course is taught in English.

**Credit Hours**: 3
**Prerequisites**: LINGST 4720, LINGST 4721, or LINGST 4600

**LINGST 4740: Interdisciplinary Introduction to NLP**
(same as CMP_SC 4740; cross-leveled with LINGST 7740). The goal of this course is to enable students to develop substantive NLP applications. Focus on current structural and statistical techniques for the parsing and interpretation of texts.

**Credit Hours**: 3
**Prerequisites**: senior standing

**LINGST 4810: Psycholinguistics**
(same as C_S_D 4810). Examination of the knowledge and processes that underlie the human ability to produce and understand language.

**Credit Hours**: 3
**Prerequisites**: instructor's consent

**LINGST 4870: Field Methods in Linguistics**
(same as ANTHRO 4870 and ENGLSH 4670; cross-leveled with LINGST 7870, ANTHRO 7870, ENGLSH 7870). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

**Credit Hours**: 4
**Prerequisites**: Contact the Linguistics advisor to request permission
**Recommended**: 9 hours of linguistics

**LINGST 4870W: Field Methods in Linguistics - Writing Intensive**
(same as ANTHRO 4870 and ENGLSH 4670; cross-leveled with LINGST 7870, ANTHRO 7870, ENGLSH 7870). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.

**Credit Hours**: 4
**Prerequisites**: Contact the Linguistics advisor to request permission
**Recommended**: 9 hours of linguistics

**LINGST 4960: Special Readings in Linguistics**
Independent study through readings, conferences, reports.

**Credit Hour**: 1-3
**Prerequisites**: instructor's consent

**LINGST 4991: Honors Thesis in Linguistics**
Based on an original research project in theoretical or applied linguistics. Topic, director, and second reader approved by Linguistics Committee, College of Arts and Science.

**Credit Hours**: 3
**Prerequisites**: qualification for Honors degree

**LINGST 7110: Advanced Logic**
(same as PHIL 7110; cross-leveled with LINGST 4110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness for formal systems. Emphasizes the theory of formal systems.

**Credit Hours**: 3

**LINGST 7200: Introduction to Old English**
(same as ENGLSH 7200; cross-leveled with LINGST 4200 and ENGLISH 4200). A beginning study of the Old English or Anglo-Saxon language in its cultural context, with emphasis on gaining a reading knowledge.

**Credit Hours**: 3

**LINGST 7420: Historical Linguistics**
(same as ANTHRO 7420, ENGLSH 7460; cross-leveled with ANTHRO 4420, LINGST 4420, ENGLSH 4460). Methods of tracing the history of languages by glottochronology, and by comparative and internal reconstructions; cultural and linguistic implications of such reconstructions and of areal linguistics.

**Credit Hours**: 3

**LINGST 7600: Structure of American English**
(same as ENGLSH 7600; cross-leveled with ENGLSH 4600, LINGST 4600). Introduction to English linguistics. Study of the grammar and pronunciation of contemporary English, with the major focus on syntax.

**Credit Hours**: 3

**LINGST 7610: History of the English Language**
(same as ENGLSH 7610; cross-leveled with ENGLSH 4610, LINGST 7610). Historical changes in the grammar and pronunciation of the English language from Old English to the present. Introduction to Indo-European origins of English.

**Credit Hours**: 3

**LINGST 7620: Regional and Social Dialects of American English**
(same as ENGLSH 7620). The study of regional and social variation in pronunciation, vocabulary, and syntax of American English.

**Credit Hours**: 3
**Prerequisites**: LINGST 4600 or LINGST 7600 and LINGST 7610 or equivalent

**LINGST 7630: Phonology**
(same as ENGLSH 7630; cross-leveled with ENGLSH 4630, LINGST 4630). Survey of the sound patterns of English and other languages.

**Credit Hours**: 3
**Recommended**: at least one course in linguistics
LINGST 7640: Syntax
(same as ENGLSH 7640; cross-leveled with ENGLSH 4640, LINGST 4640). Study of the properties of phrase-and-sentence-level grammar, emphasizing English, with some comparison to other languages.
Credit Hours: 3
Recommended: at least one course in linguistics

LINGST 7870: Field Methods in Linguistics
(same as ANTHRO 7870, ENGLSH 7670; cross-leveled with ANTHRO 4870, ENGLSH 4670, LINGST 4870). Intensive training in collection and analysis of data taken from a native speaker of a non-Indo-European language. May be repeated for credit.
Credit Hours: 4
Prerequisites: instructor's consent

LINGST 8000: Problems
Independent study through readings, analysis of special linguistic problems, reports.
Credit Hours: 3
Prerequisites: one Advanced Linguistics course and instructor's consent

LINGST 8600: Seminar in the English Language
(same as ENGLSH 8600). Descriptive and historical studies of the English language. Topics (e.g., The Germanic Origins, Modern Syntactic Analysis) announced at time of registration. May be repeated up to twelve hours with departmental approval.
Credit Hours: 3

Management (MANGMT)

MANGMT 1030: Vasey Academy on Leadership Issues
Business seminar course restricted to Vasey Academy scholars. Focus on leadership issues and on career opportunity exploration in key areas of business. Graded on A-F basis only.
Credit Hour: 1

MANGMT 1050: Contemporary Leadership Issues in Business
Course focuses on contemporary business leadership practices and includes an overview of the accountancy, finance, management and marketing majors and careers in each of these fields.
Credit Hours: 3
Prerequisites: instructor's consent

MANGMT 3000: Principles of Management
Introduction to the basic concepts of management and organization; their application to operations and personnel management.
Credit Hours: 3
Prerequisites: Completion of 45 semester hours

MANGMT 3000H: Principles of Management - Honors
Introduction to the basic concepts of management and organization; their application to operations and personnel management.
Credit Hours: 3
Prerequisites: Completion of 45 semester hours. Honors eligibility required

MANGMT 3200: Business and Society
This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.
Credit Hours: 3
Prerequisites: Admission to upper level business program

MANGMT 3200H: Business and Society - Honors
This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.
Credit Hours: 3
Prerequisites: Admission to upper level business program. Honors eligibility required. Other students may be allowed to register after early registration provided space is available. Consent may be required

MANGMT 3200HW: Business and Society - Honors/Writing Intensive
This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.
Credit Hours: 3
Prerequisites: Admission to upper level business program. Honors eligibility required. Other students may be allowed to register after early registration provided space is available

MANGMT 3200W: Business and Society - Writing Intensive
This course emphasizes the ethical implications of managerial decisions and the relationships between businesses and stakeholder groups. Major topics include corporate governance, social responsibility, rights and obligations, and international business.
Credit Hours: 3
Prerequisites: Admission to upper level business program

MANGMT 3300: Introduction to Business Processes and Technologies
Introduces students to cross-functional business processes including both transactional and decision making forms. Current and emerging technologies used to facilitate efficient and effective action in these processes are explored. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: 24 credit hours. Restricted to students in the College of Business during early registration. Other students may register after early registration

MANGMT 3540: Introduction to Business Law
The legal aspects of business related to society--introduction to the legal system; constitutional, criminal, tort law; contracts and sales law cases and problems; administrative regulation of business and consumer issues.
MANGMT 3900: International Management
Analyze the essential management functions within a global economy and provide a basic literacy in international management strategy and decision-making. Global markets are examined using legal, technological, ethical, and cultural considerations. Management principles in planning, organizing, leading, and controlling international trade and commerce are examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 3910: Managing Across Cultures
Applying cultural dimensions to developing cross-cultural behavioral competencies utilizing code-switching training methods. For all persons interested in improving international person-to-person interactions.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 3920: Managing People in the Global Enterprise
Focuses on management of people in global organizations—especially for-profit enterprises. Topics include differences across countries in recruitment and selection, training and development, leadership and motivation, compensation, cross-cultural negotiation, and employment relations. The use of expatriates and host country nationals as managers is contrasted. Challenges involved in repatriating expatriates and their families after lengthy terms of service in foreign countries are explored.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 3975: Current Issues in International Management
Study of current issues and practices in international management taken as part of an organized short term study abroad program. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Instructor's consent

MANGMT 3900: International Management
Analyze the essential management functions within a global economy and provide a basic literacy in international management strategy and decision-making. Global markets are examined using legal, technological, ethical, and cultural considerations. Management principles in planning, organizing, leading, and controlling international trade and commerce are examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 3910: Special Topics in Management
Study of a selected topic in management taken as part of an organized short-term study abroad program. Some sections of this course may be graded on either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: May require consent

MANGMT 3920: Managing People in the Global Enterprise
Focuses on management of people in global organizations—especially for-profit enterprises. Topics include differences across countries in recruitment and selection, training and development, leadership and motivation, compensation, cross-cultural negotiation, and employment relations. The use of expatriates and host country nationals as managers is contrasted. Challenges involved in repatriating expatriates and their families after lengthy terms of service in foreign countries are explored.

Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 3975: Current Issues in International Management
Study of current issues and practices in international management taken as part of an organized short term study abroad program. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: Instructor's consent

MANGMT 4010: Operations Management
(cross-leveled with MANGMT 7010). Managerial analysis of operating problems, with emphasis on planning and control systems. Math Reasoning Proficiency Course. May require consent.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4020: Human Resource Management
(cross-leveled with MANGMT 7020) Introduction to strategies and best practices in attracting, retaining, developing, and compensating employees. May require consent.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4030: Organizational Behavior
(cross-leveled with MANGMT 7030). Examines theoretical constructs and research findings on human behavior in work organizations such as businesses, especially individual differences, dyadic relations and small group behavior. May require consent.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4050: Management of Service Operations
Managing services, especially the operation's activity in service firms. Includes determining the service package, forecasting service demand, managing demand, capacity analysis and management, scheduling, cost control, service quality, and human resource management. Standardization, franchising, and service automation addressed.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4060: Project Management Fundamentals
Application of predictive and agile project management methods and techniques for project breakdown, scheduling, resource allocation, and evaluation of project performance.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4070: Supply Chain Management
(cross-leveled with MANGMT 7070). An examination of the concepts, processes and institutions that are fundamental to an understanding of supply chain management in a global environment. Graded on A-F basis only.
Credit Hours: 3

MANGMT 4080: Managing Global Trade
(cross-leveled with MANGMT 7080). International trade is the exchange of goods and services between countries giving rise to a world economy that is affected by global events. This course will focus on global trade management issues, procedures, requirements, and strategies. The implementation of international market strategy, global supply chains, and trade finance will also be explored. These topics will be examined by exploring trade factors that influence organizations and trade relations such as different cultural norms, government regulations, technology, resources, and logistics. Graded on A-F basis only.
Credit Hours: 3

MANGMT 4110: Total Quality Management
Introductory, comprehensive approach to quality planning, analysis, and control. Applications orientation. Integrates customer needs, product and service design and delivery, and continuous improvement into all organizational activities. Examines full range of behavioral, technical, and organizational aspects relating to quality.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4120: Human Resource Management Law
Analysis and evaluation of legal and administrative regulations of terms of employment; Fair Labor Standards, discriminatory practices, safety and health regulations, other regulations.
Credit Hours: 3
Prerequisites: Restricted to COB students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4130: Advanced Organizational Behavior
Based upon behavioral science concepts and research findings directed toward understanding and explaining human behavior within organizations. Case studies, individual or team projects.
Credit Hours: 3
Prerequisites: MANGMT 4030. Restricted to COB students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4140: Business Communication
The course provides the fundamentals of business communication skills, including written, oral communication, listening, multicultural communication, and teamwork skills, with an emphasis on written communication skills as a method to communicate with important stakeholders.
Credit Hours: 3
Prerequisites: Restricted to Trulaske College of Business students admitted to professional degree program during early registration

MANGMT 4185: Problems in Management
Undergraduate students may select topics for study and investigation. Selected sections of this course may be graded either on A-F or S/U basis only.
Credit Hour: 1-9
Prerequisites: instructor's consent

MANGMT 4201: Topics in Management
(cross-leveled with MANGMT 7201). Selected current topics in management. Offered on an experimental, one-semester basis only.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to College of Business students ONLY during early registration. Other students may register after early registration, provided there is space available

MANGMT 4201W: Topics in Management - Writing Intensive
(cross-leveled with MANGMT 7201). Selected current topics in management. Offered on an experimental, one-semester basis only.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to COB students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4210: Management Science
Further development of models and quantitative analysis as applied to production management problems. Management research design and experimentation; computer applications; quantitative case analyses; individual industrial field studies. Math Reasoning Proficiency Course.
Credit Hours: 3
MANGMT 4310: Modern Manufacturing
Contemporary qualitative and quantitative analysis of automation systems for production and inventory; robotics, digital data matrix and Q/R coding, PLC overview; uncertainty, risk, and policy considerations; analysis of networks; management problems in application.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 4010

MANGMT 4320: Selected Problems in Human Resource Management
Advanced studies in selected administrative and technical policies, practices in employee relations, with individual and group project work, research. Focuses on policy issues, research findings, advanced techniques.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 4020. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4340: Crisis Management
Management strategies for media relations, image and identify building, internal communication, government relations, and crisis communication are explored through case studies, film, literature, and current popular culture.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4350: Leadership Development
Provides a comprehensive understanding of leadership development within the corporate environment. Examines causes and outcomes of different styles of leadership that are designed to fit the needs of individuals and/or specific situations.
Credit Hours: 3
Corequisites: MANGMT 3000

MANGMT 4420: Collective Bargaining
Content, negotiation, administration of collective labor agreements and settlement of disputes.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills

MANGMT 4450: Management of Electronic Commerce
An introduction to electronic commerce. Topics covered include definition and scope of e-commerce, tools and technologies used, strategies, and understanding of this dynamic field.
Credit Hours: 3

MANGMT 4520: Change Management in Business
Provides a comprehensive understanding of the processes of change in the corporate environment. Examines antecedents of change such as acquisitions, mergers, technology and new leadership as well as approaches to managing change using tools from organization development (OD).
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4540: Legal Aspects of Business Organization and Operation
Includes agency and employment relationships, sole proprietorships, partnerships, and corporations, also operational aspects of business associations such as administrative regulation, taxation, bankruptcy, and trade regulation.
Credit Hours: 3
Prerequisites: MANGMT 3540

MANGMT 4610: Database Management
This is an introductory course on database (DB) technology. It introduces such technology and provides hands-on experience in designing and developing DBs to meet organizational goals. Topics include database concepts such as entity-relationship modeling, data modeling, relational database development, SQL, application of popular database systems software, data warehousing, and selected advanced topics in business use of DBs. Students work in groups to develop a database system project for an organization of their choice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000

MANGMT 4620: Web Development Fundamentals
An introduction to the fundamentals of design, technology and project management aspects of developing websites. Some web based programming languages including HTML, CSS, JavaScript and ASP/VBScript and an introduction to Adobe Photoshop and Macromedia Dreamweaver.
Credit Hours: 3
Prerequisites: ACCTCY 2258
Corequisites: MANGMT 3000

MANGMT 4700: Principles of Entrepreneurship
An introductory course designed to provide a solid foundation of the role of entrepreneurship. The focus is on the creation of new ventures, the decisions leading to their development, and the factors that lead to their success.
Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills
MANGMT 4710: The Entrepreneurial Process
This course deals with critical thinking, logic, emotional intelligence, ethics and a problem solving/decision making frame in the context of the entrepreneurial business phases: opportunity identification; launch after gathering resources; managing growth and harvesting rewards.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills.

MANGMT 4720: Experiential Entrepreneurship
The course will engage students in experiences that develop entrepreneurial characteristics such as a passion for business, tenacity despite failure, self-determination, management of risk, self-confidence, creating opportunities, creativity, initiative, and detail orientation.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills.

MANGMT 4730: New Business Planning and Management
Analysis of the major functional areas of the start-up firm including accounting, finance, human resources, information systems, logistics, management, marketing, production/operations, purchasing and sales. Focus is also placed on generating ideas, scanning for environmental trends, and critically evaluating opportunities.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to Business students ONLY during early registration. Other students may register after early registration, provided there is space available. NO PERMISSIONS/OVERRIDES will be given for this class once it fills.

MANGMT 4940: Professional Management Internship
Provides experience with management activities in business organizations (or, occasionally, in a governmental or not-for-profit setting). Students are required to prepare and execute a plan of study approved by the instructor and to complete written assignments detailed in the plan. Course only satisfies a professional elective requirement of the program. Graded on S/U basis only.

Credit Hours: 3
Prerequisites: COB student with a management concentration, and Internship Coordinator’s consent.

MANGMT 4970W: Strategic Management
Enterprise-level case studies, simulations, similar exercises to integrate business functional decisions; assessment of environmental influences on business. Development, implementation of company strategies.

Credit Hours: 3
Prerequisites: MANGMT 3000, MRKTNG 3000, FINANC 3000 and 93 credit hours earned. Open only to seniors admitted to a professional program in the CoB.

MANGMT 7010: Operations Management
(cross-leveled with MANGMT 4010). Managerial analysis of operating problems, with emphasis on planning and control systems. Math Reasoning Proficiency Course. May require consent.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000.

MANGMT 7020: Human Resource Management
(cross-leveled with MANGMT 4020). Introduction to strategies and best practices in attracting, retaining, developing, and compensating employees. May require consent. Prerequisites or

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000.

MANGMT 7030: Organizational Behavior
(cross-leveled with MANGMT 4030). Examines theoretical constructs and research findings on human behavior in work organizations such as businesses, especially individual differences, dyadic relations and small group behavior. May require consent.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000.

MANGMT 7070: Supply Chain Management
(cross-leveled with MANGMT 4070). An examination of the concepts, processes and institutions that are fundamental to an understanding of supply chain management in a global environment. Graded on A-F basis only.

Credit Hours: 3

MANGMT 7080: Managing Global Trade
(cross-leveled with MANGMT 4080). International trade results from the buying and selling of goods and services across country borders. Events that occur globally, advancements in technology, and country policies all affect trade. This course focuses on global trade management issues, procedures, requirements, and strategies. It explores international market selection and entry strategies, risk factors, global supply chains, and trade finance. The course examines trade factors that influence organizations and trade relations including current events, different cultural considerations, governmental regulation, innovation and technology, financial resources, and logistics. Graded on A-F basis only.

Credit Hours: 3

MANGMT 7201: Topics in Management
(cross-leveled with MANGMT 4201). Selected current topics in management. Offered on an experimental, one-semester basis only.

Credit Hours: 3
Prerequisites or Corequisites: MANGMT 3000. Restricted to College of Business students ONLY during early registration. Other students may register after early registration, provided there is space available.

MANGMT 7380: Organizational Behavior and Management: The Individual
An examination of factors influencing behavior in organizations. An analysis of research, theory, and current practices dealing with managing people in work organizations. Focus on the individual within the organizational context.
Credit Hour: 1.5

MANGMT 7390: Organizational Behavior and Management: Dyadic, Group and Organizational Processes
An examination of factors influencing behavior in organizations. An Analysis of research, theory, and current practices dealing with managing people in work organizations. Focus on dyadic, group and system-wide processes. Prerequisites: MANGMT 7380
Credit Hour: 1.5

MANGMT 7410: Management Information Systems
A managerially-oriented, case-based introduction to information systems. Emphasizes how information systems technology can aid managers in improving organizational performance, group work, and personal productivity, thus providing competitive advantage.
Credit Hour: 1.5

MANGMT 7420: Managerial Statistics
Overview of statistics as an aid in decision making. Emphasis on summarizing data, statistical inference, sampling techniques, and regression based forecasting as applied to problems in business.
Credit Hour: 1.5

MANGMT 7430: Operations Strategy
Introduction to Operations Management function within an organization-the function which controls key resources necessary to produce and deliver a firm's goods or services to customers. Surveys strategic problems common to operations within complex organization. Emphasizes planning, control, and decision making to gain competitive advantage through operations-related activities. Stresses concepts, models, and behaviors across technologies, sectors, and industries, rather than emphasizing a few specific conversion technologies.
Credit Hour: 1-3

MANGMT 7450: Business Analytics
This course focuses on two areas of knowledge. One focus is on developing relevant statistical thinking skills, including an awareness and management of risk, and recognizing the type of statistical analysis that is appropriate for a given managerial problem. The other is on developing an understanding of the role of business analytics in the organization, at the managerial, tactical and strategic level. Graded on A-F basis only.
Credit Hours: 3

MANGMT 7470: Data Analysis for Managers
Statistical thinking approaches to address common business data and problems. Analysis of real-world cases and unstructured data using statistical features of spreadsheet software and communication of results in managerial format. Graded A-F only.
Credit Hour: 1.5
Prerequisites: Open to Crosby MBA students ONLY
Corequisites: MANGMT 7420

MANGMT 7480: Managerial Analytics
Spreadsheet modeling procedures to address common business problems. Analysis of real-world cases and unstructured problems using basic and advanced features software and communication of results in managerial format. Graded A-F only.
Credit Hour: 1.5
Prerequisites: MANGMT 7420 and MANGMT 7470. Open to Crosby MBA students ONLY

MANGMT 7540: Legal Aspects of Business Organization and Operation
Includes agency and employment relationships, sole proprietorships, partnerships, and corporations, also operational aspects of business associations such as administrative regulation, taxation, bankruptcy, and trade regulation.
Credit Hours: 3
Prerequisites: MANGMT 3540. Restricted to COB students

MANGMT 7970: Introduction to Strategic Management
Examines through case analysis and simulation how business-level managers overseeing a profit center in a specific industry set direction for a firm's activities in that industry and develop policies to implement that direction. Emphasis is on aligning business strategy with overarching corporate strategy (in diversified firms) and integrating functional perspectives (marketing, operations, finance, R&D, purchasing, human resources, etc.) by effectively resolving conflicts in these perspectives when formulating effective strategy. Focus is also placed on balancing short-term efficiency in a business unit with long-term effectiveness through cultivating continuous innovation processes that redefine the business unit over time.
Credit Hour: 1.5
Prerequisites: Open to Crosby MBA students only

MANGMT 8001: Topics in Management
Selected current topics in management. Some sections may be graded on an A-F or S/U basis only. Some sections may require consent.
Credit Hour: 1-6

MANGMT 8054: Entrepreneurship and Media of the Future
(same as JOURN 8054). This course will give students an intense hands-on experience in working with real entrepreneurs on complex business problems in the journalism field. Example companies are the Associated Press, Kachingle, the Chicago Sun-Times, Spot-Us and the Media Policy Center. The goal is to offer a solution or solutions to the stated problem, and to present these ideas in a competitive, symposium environment. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: graduate standing in Journalism or MBA program

MANGMT 8085: Problems in Management
Graduate students may select topics for study and investigation. Selected sections of the course may be offered either on A-F or S/U basis only.
Credit Hour: 1-99

MANGMT 8100: Exploring the Digital Globe
Impacts of technological change and globalization are explored from the perspective of business, law and journalism. The first course required for the "CDiG certificate". Issues involving electronic commerce, digitization and globalization will be analyzed through online and in-class projects, class discussion and guest lectures.
Credit Hours: 3
Prerequisites: enrollment in CDiG Graduate Certificate Program or instructor's consent

MANGMT 8200: Commercialization of Life Science Innovations
This course will provide educational content and experiences that equip course participants to navigate the main pathways for commercialization of biomedical innovations. Students will also learn how to access sources of capital for R&D and develop an understanding of the role of FDA approval and the processes for approval of different types of biomedical products. Students will become familiar with quality assurance programs required in the biomedical industry. Students will also become familiar with the most common business models for biomedical companies and the importance of product development and commercialization alliances.
Credit Hours: 3

MANGMT 8330: Current Issues in Human Resource Management
Exploration of current trends, issues, and controversies involving the managing of human resources in organizations, with an emphasis on how human resources can provide competitive advantage. Considers multiple perspectives, including that of employers, employees, and other stakeholders.
Credit Hours: 3
Prerequisites: MANGMT 8310 or MANGMT 7380 and MNGMT 7390

MANGMT 8360: Negotiations
A structured overview of negotiations; includes the development of improved negotiation skills. Topics include power, distributive negotiations, integrative negotiations, maneuvers, tactics, strategies, conflict, complex negotiations, mediation, and negotiation ethics.
Credit Hours: 3

MANGMT 8380: Personal and Professional Development
Readings, activities, and discussions designed to build individual self-awareness of leadership strengths and change management skills for both personal and career development. Graded on A-F basis only.
Credit Hour: 1-3

MANGMT 8400: Management Science Modeling
Application of management science modeling procedures to organizational decision making. Topics include mathematical programming, queuing, and network models. Stressess managerial point of view with analysis of problems and interpretation of computer solutions.
Credit Hour: 1.5
Prerequisites: MANGMT 7420

MANGMT 8410: Decision Making and Risk
Managerial approaches to decision making under risk and uncertainty with emphasis on decision analysis, spreadsheet simulation, and computer solutions via other management science models. Discussion of rational and behavioral decision making and procedures for assessing risk and uncertainty.
Credit Hour: 1.5
Prerequisites: MANGMT 7400 or equivalent

MANGMT 8420: Decision Support Systems
The theory, methodology and implementation of Decision Support Systems (DSS). Topics include the DSS concept, applications, organizational issues, hardware and software technology, developmental methodology, data-model-user relationships, user interfaces, implementation strategies, and evaluation procedures. Includes hands-on building of a DSS.
Credit Hours: 3

MANGMT 8510: Project Management
An advanced introduction to methods and techniques for managing projects, with selective attention to human resource issues as required. Includes project breakdown analysis, task network scheduling, resource allocation, and assessment/evaluation of project performance.
Credit Hour: 1-3
Prerequisites: departmental consent

MANGMT 8540: Entrepreneurial Ventures
Analysis of management challenges facing entrepreneurial startups and alternative strategic responses to those challenges. Views issues from multiple functional perspectives to design cross-functional solutions to entrepreneurial problems.
Credit Hours: 3

MANGMT 8550: Launching a High-Growth Venture
An experiential learning course using a business plan competition to simulate planning and securing capital for high-growth ventures. Participants with management, marketing or finance interests learn skills for preparing and presenting business plans to investors.
Credit Hours: 3

MANGMT 8560: Legal Strategies for Entrepreneurs
The study of how legal decisions affect a business organization of various transitional states of development, from start up to going public. Designed for both MBA and Law students, who work together planning legal transitions of a business.
Credit Hours: 3
MANGMT 8800: Turnaround Management and Strategy
No turnaround is the same, and there is no secret formula that will work every time. However, there are basic principles that can take a leader to a point where they can position a company in a more stable environment quickly, which will ultimately help the company to survive. Most students who pursue a business career will find themselves in a Turnaround or restructuring environment sometime in their career. This class will give the student the upper hand in understanding why these situations occur, who and what is the cause, and a framework to be part of the solution.

Credit Hours: 3

MANGMT 8900: Corporate Governance and Professional Accountability
Corporate governance (CG) is the set of processes, customs, policies, laws, and institutions affecting how a company is directed, administered or controlled. CG includes the relationships among the many stakeholders involved and the goals by which the corporation is governed. In contemporary business corporations, the main external stakeholder groups are shareholders, debt holders, trade creditors, suppliers, customers and communities affected by the corporation’s activities. Internal stakeholders are the board of directors, executives, and other employees. This course will illustrate some of these key relationships, including how they can go wrong and the trade-offs managers have to make to manage all of these relationships. This course can be seen as a course on the professional responsibilities of business leaders. It is based on the assumption that business, like law and medicine, is a profession whose practitioners carry out essential functions in society. When individuals enter the profession, they undertake to fulfill a distinctive set of responsibilities that go with their chosen role. Graded on A-F basis only.

Credit Hours: 3

MANGMT 8970: Strategy and Global Competitiveness
Investigates alternative goals of business enterprises relative to internal resources and external environment; development and implementation of policies and strategies to achieve objectives. Cases, computer simulations, and/or field research may supplement published materials.

Credit Hour: 1-3
Prerequisites: MANGMT 7970 for the 1.5 credit hour version of the course. Open to MBA Students only

MANGMT 9010: Research Methods in the Organization Sciences
Identifying research questions, critiquing research ideas, planning, conducting, and communicating research using experimental, cross-sectional, survey and qualitative methods.

Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9030: Seminar in Macro Organizational Behavior
This course is designated to introduce students to content areas within the organizational behavior literature. Topics in “macro” organizational behavior will be covered, including groups and teams, organizational culture, and national culture. We will also cover a number of topics outside of traditional organizational behavior topics, including negotiation and social conflict, creativity, empowerment, and other topics as the instructor sees fit. Readings will consist of a combination of recent and classic journal articles on the topics.

Credit Hours: 3
Prerequisites: PhD Students and instructor’s consent

MANGMT 9040: Seminar in Human Resource Management
Intensive study of current research, issues and methodology of the applied science of human resource management. Topics include recruitment and selection, training, job performance and performance feedback, and career success.

Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9060: Seminar in Corporate Strategy
The doctoral seminar in strategy focuses on the topics of strategy content research (what strategies are used by firms, and what is their effect on performance, corporate and competitive strategy, etc.) but also considering important related research streams of strategy process and implementation.

Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9080: Seminar in Entrepreneurship
The doctoral seminar in Entrepreneurship is intended to provide students with a broad coverage of the literature. It focuses on the foundations and “cutting edge” research in entrepreneurship content research. Topics covered in the course include: a theoretical overview of entrepreneurship, identification of opportunities, the decision to exploit opportunities, resource assembly and new markets, founders and entrepreneurial teams, venture capital and venture capitalists, entrepreneurship and efficient governance, initial public offerings (IPOs), new ventures (strategy, growth, performance), entrepreneurial networks and alliances, and international entrepreneurship.

Credit Hours: 3
Prerequisites: PhD student or instructor’s consent

MANGMT 9087: Seminar in Management
Intensive studies of current research and issues. Readings, independent investigations, reports.

Credit Hour: 1-99
Prerequisites: open to Ph.D. students, or instructor's consent

MANGMT 9090: Seminar in Human Resource Management
Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99

MANGMT 9101: Topics Seminar in Management
Reading and critical evaluation of selected current management literature and research. May be repeated.

Credit Hour: 1-3
Prerequisites: Ph.D. students only

Marketing (MRKTNG)
MRKTNG 3000: Principles of Marketing
Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects.

Credit Hours: 3
Prerequisites or Corequisites: ECONOM 1014, ECONOM 1024, ECONOM 1000, or ECONOM 1051 or AG_EC 1041
Prerequisites: 45 semester hours

MRKTNG 3000H: Principles of Marketing - Honors
Institutions, processes, and problems involved in producing and transferring goods and services from producer to consumers; emphasis on economics and social aspects.

Credit Hours: 3
Prerequisites or Corequisites: ECONOM 1014, ECONOM 1024, ECONOM 1000 or ECONOM 1051, or AG_EC 1041
Prerequisites: 45 semester hours; Honors eligibility required

MRKTNG 3410: Personal Selling
Modern selling methods that focus on solving customer problems rather than using manipulative techniques. Principles underlying the sale process. Practical methods for building long-term customer relationships in business-to-business contexts are emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing

MRKTNG 3510: Procurement Processes and Analytics
Overview of the procurement process used by retailers; execution of pricing strategies, negotiations, retail planning at the category and item level; use of software to analyze data and make procurement decisions. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MRKTNG 3000. During Early Registration some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing

MRKTNG 3901: Special Topics in Marketing
Study of a selected topic in Marketing in a course taken for credit as part of an organized study abroad program. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-3

MRKTNG 3975: Current Issues in International Marketing
Study of current issues and practices in international marketing in a course taken for credit as part of an organized study abroad program. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-3

MRKTNG 3901: Special Topics in Marketing
Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics.

Credit Hours: 3
Prerequisites: MRKTNG 3000, and ACCTCY 2010 or ACCTCY 2026, or ACCTCY 2036 or ACCTCY 2136H. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4000: Marketing Management
Further examination of marketing issues: market analysis, market research, positioning, products, pricing, promotion, distribution, relationship management, other topics.

Credit Hours: 3
Prerequisites: MRKTNG 3000; ACCTCY 2010 or ACCTCY 2026 or ACCTCY 2036 or ACCTCY 2136H; Honors eligibility required

MRKTNG 4050: Marketing Research
Procedures for defining marketing research problems; specifying information requirements; collecting, analyzing, interpreting, and presenting data for use in marketing decision making. Utilizes student projects and research-related computer assignments.

Credit Hours: 3
Prerequisites: MRKTNG 3000, STAT 3500. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4185: Problems in Marketing
In-depth independent study of marketing topic(s). Student must have course plan (assignments, evaluation criteria, etc.) approved by faculty sponsor. Contact Marketing Department office for details and enrollment permission. Selected sections of this course may be graded either on A-F or S/U basis only.

Credit Hour: 1-3
Prerequisites: Departmental consent, MRKTNG 3000

MRKTNG 4201: Topics in Marketing
Selected marketing-related topics. Subjects may vary across semesters. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

Credit Hours: 3
Prerequisites: MRKTNG 3000

MRKTNG 4220: Consumer Behavior
Dimensions of the consumer market and decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing
MRKTNG 4220H: Consumer Behavior - Honors
Dimensions of the consumer market and decision-making process of consumers; analyzing economic, psychological and socio-psychological influences on consumer market and buying behavior.

Credit Hours: 3
Prerequisites: MRKTNG 3000 and Honors eligibility required

MRKTNG 4250: Retail Marketing
Strategies, policies, tactics, and procedures of marketing in a retailing environment.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4250H: Retail Marketing - Honors
Strategies, policies, tactics, and procedures of marketing in a retailing environment.

Credit Hours: 3
Prerequisites: MRKTNG 3000 and Honors eligibility required

MRKTNG 4420: Sales Management
Methods and tools employed by salespeople and field sales managers; emphasis on underlying behavioral and quantitative theory.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing

MRKTNG 4430: Advanced Professional Selling
Emphasis on the analytics approach to sales. This reflects the overall trends in business practice, and specifically in the world of sales with increasing reliance on Sales Force Automation (SFA) and Customer Relationship Management (CRM) tools. Students will need to come to class with laptops or tablets. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MKTNG 3410

MRKTNG 4440: Services Marketing
Challenges, problems, and strategies specific to marketing in service industries. Topics include the unique characteristics of services and managing service-oriented businesses; service design and service recovery; service quality and customer satisfaction service pricing issues and demand management; and management of service customers and employees. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing

MRKTNG 4450H: Retail Marketing - Honors
Strategies, policies, tactics, and procedures of marketing in a retailing environment.

Credit Hours: 3
Prerequisites: MRKTNG 3000 and Honors eligibility required

MRKTNG 4500: Artificial Intelligence and Machine Learning Applications in Sales and Marketing
This course is intended to introduce students to cutting-edge Artificial Intelligence and Machine Learning (AI&ML) applications in the domain of sales and marketing. Students will use a proprietary, cloud-based software tool to learn about underlying models, but prior knowledge of programming languages is not required. The course will take an analytics approach and will require students to work with data sets. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with an emphasis in Marketing

MRKTNG 4550H: Integrated Marketing Communications - Honors
Design, coordination, and management of marketing communications. Focus on the role of integrated marketing communications in the overall marketing process, with emphasis on advertising and sales promotion strategies and tactics.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4550H: Integrated Marketing Communications
Design, coordination, and management of marketing communications. Focus on the role of integrated marketing communications in the overall marketing process, with emphasis on advertising and sales promotion strategies and tactics. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing.

Credit Hours: 3
Prerequisites: MRKTNG 3000 and Honors eligibility required

MRKTNG 4650: e-Marketing
Strategic and managerial challenges and issues related to use of the Internet and other electronic channels as marketing tools.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4720: Global Marketing
Strategic and managerial issues associated with international trade and international marketing.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis in Marketing

MRKTNG 4880: Contemporary Issues in Marketing
Selected topical issues, their impact on marketing and marketers, and implications for firms and industries. Emphasis on scanning the external environment, projection of trends, and analysis; strategy development based on environmental analysis.

Credit Hours: 3
Prerequisites: MRKTNG 3000. During early registration, some sections may be restricted to College of Business students with emphasis in Marketing, or International Business with emphasis on marketing
**MRKTNG 7460: Managerial Marketing**
Introduces concepts and theories for marketing decision making. Provides an overview of principles and tools to analyze and understand marketing situations in order to develop and execute appropriate marketing initiatives.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required

---

**MRKTNG 7470: Advanced Marketing Management**
Develops knowledge and skills to manage marketing activities at the strategic and tactical levels. Course utilizes case studies, interactive class exercises, and advanced marketing readings. Students will learn to apply relevant concepts for effective marketing strategy development, marketing planning, and implementation of marketing mix decisions.

**Credit Hour:** 1-3  
**Prerequisites:** MBA program consent required; MRKTNG 7460

---

**MRKTNG 8001: MBA Topics in Marketing**
Advanced study of selected marketing-related topics. Subjects vary across semesters.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8060: Competitive Marketing Strategy**
Builds on the foundations of Marketing 7460 and 7470. Focuses on quantitative market intelligence-based design, execution, and adaptation of a market-drive business strategy to improve a firm's financial performance over time in a competitive environment. Uses a competitive, multi-period, marketing simulation game in which students are assigned to manage one of several firms competing in an industry. Prerequisites: MBA Program consent required: MRKTNG 7460 and MRKTNG 7470. Cannot receive credit for both MRKTNG 8050 and MRKTNG 8060.

**Credit Hour:** 1-3

---

**MRKTNG 8070: Marketing Business Models**
Builds on the foundations of Marketing 4760 and 7470. Focuses on the formulation and analysis of marketing strategy and contemporary business models for creating and capturing value in different industries such as consumer goods, services, retailing, media, sports, entertainment, and online businesses. Business revenue and profit models will be evaluated in conjunction with marketing performance.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required, MRKTNG 7460 and MRKTNG 7470. Cannot receive credit for both MRKTNG 8050 and MRKTNG 8070

---

**MRKTNG 8085: MBA Independent Study in Marketing**
Advanced independent study of marketing topics(s). Student must have a course plan (assignments, evaluation criteria, etc.) approved by a marketing faculty member. Graded on S/U basis only.

**Credit Hour:** 1-3  
**Prerequisites:** departmental and MBA Program consent required; MRKTNG 7460, MRKTNG 7470

---

**MRKTNG 8180: Applied Statistics for Marketing Analytics**
This course is designed to increase students' understanding of essential statistical methods, focusing primarily on interpretation and application in marketing contexts. During the course, students will apply statistical concepts and analyses in diverse marketing settings with a variety of data sets. By the end of the course, students will know when and how to apply fundamental statistical techniques in marketing situations, how to interpret the results of statistical analysis, and how to present results in a managerially useful manner. Graded on A-F basis only.

**Credit Hour:** 1-3  
**Prerequisites:** MBA program consent, prior statistical coursework

---

**MRKTNG 8280: Research for Marketing Decisions**
Methods for generating and using information related to marketing decisions. The course is aimed at the manager who designs, conducts, and/or uses the research. Emphasizes the design of research studies to inform managers' decisions and techniques for gathering and analyzing primary and secondary data.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent, MRKTNG 7460, MRKTNG 7470, MRKTNG 8180

---

**MRKTNG 8350: Business-to-Business Marketing**
Advanced study of the marketing of goods and services to business customers; customer relationship management, and functionally integrated approaches to solving business problems.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8420: Sales Force Management**
Basic tasks of sales management as well as the application of theories and concepts to effectively manage that function. Topics covered include salesperson effectiveness, deployment, motivation, organizational design, compensation and evaluation.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8520: Services Marketing**
Focuses on service marketing problems and strategies of goods and service organizations. Subjects covered include the nature of services, organizing for service delivery, managing demand, tailoring the customer mix and managing supply.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8520: Business-to-Business Marketing**
Advanced study of the marketing of goods and services to business customers; customer relationship management, and functionally integrated approaches to solving business problems.

**Credit Hour:** 1-3  
**Prerequisites:** MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

---

**MRKTNG 8650: Digital Marketing**
The use of the Internet and other electronic channels as marketing tools. Emphasis on integration of digital interactions and communication into the overall marketing strategy.

**Credit Hour:** 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8680: Database Marketing
A quantitatively-oriented, hands-on course regarding the use of customer data for making decisions about marketing campaigns and targeting of individual customers. Concepts and applications in this course emphasize statistical analysis of large datasets involving customer records. The analytical and statistical programming skills learned in the course should be useful in any data-oriented business environment. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460, MRKTNG 7470, MRKTNG 8180, MRKTNG 8280

MRKTNG 8720: International Marketing
Strategic and managerial issues associated with international trade and international marketing. The course focuses on managerial decision making in the differing and complex environments across foreign markets, alternative methods by which firms enter foreign markets and the development and implementation of international marketing strategies.

Credit Hour: 1-3
Prerequisites: MBA Program consent required and completion of MRKTNG 7460 and MRKTNG 7470

MRKTNG 8750: Brand Management
Focuses on the creation and execution of profitable brand strategies. Examines the practice of branding, the key components of brand equity, and how firms can build and sustain successful brands in competitive markets.

Credit Hour: 1-3
Prerequisites: MBA Program consent required, MRKTNG 7460 and MRKTNG 7470

MRKTNG 8760: Marketing Analytics for Business Decisions
A systematic, analytical approach to marketing decision-making. Students will be able to build their analytical skills through a combination of lectures, Excel-based software tools, and business case studies. Emphasis is on hands-on approaches for solving real-world marketing problems in domains such as segmentation, targeting, positioning, and resource allocation. The course will help students understand the financial impact of marketing expenditures including ROI assessment. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites or Corequisites: MRKTNG 8180
Prerequisites: GPO consent required

MRKTNG 8770: Marketing Databases and SQL
A user/analyst perspective to relational databases used in marketing applications. Fundamentals of relational databases, including database concepts, table design, views, normalization, and security. Hands-on training in SQL (Structured Query Language) on database tables and views to retrieve, change, join, filter, sort, group, and summarize data. Data analysis with SQL and Excel combined. Presentation of SQL results sets. Course graded on A-F basis only.

Credit Hour: 1-3
Prerequisites or Corequisites: MRKTNG 8180
Prerequisites: MBA program consent required, MRKTNG 7460, MRKTNG 7470, MRKTNG 8180

MRKTNG 8780: Advanced Marketing Analytics
Analytical methods for solving marketing problems. Emphasis on use of multivariate statistical techniques (e.g., regression models, time series models, principal components analysis, cluster analysis, discriminant analysis, ANOVA, survival/duration models, etc.) to aid marketing tasks and decisions in areas such as customer classification, segmentation, profiling, and targeting; prospecting with archival data; customer response to marketing interventions; customer acquisition/retention tactics; customer relationship management (CRM); sales forecasting; media allocation decisions; market basket analysis; etc. Graded on an A-F basis only.

Credit Hour: 1-3
Prerequisites or Corequisites: MRKTNG 8280
Prerequisites: MBA program consent required, MRKTNG 7460, MRKTNG 7470, MRKTNG 8180

MRKTNG 9010: Introduction to Research Methods in Marketing
Introduces students to the research process. Examines philosophy of science, constructs and measurement issues regarding validity, and hypothesis-testing. Provides an overview of experimental and survey research methods, with introduction to qualitative research, model-building, and research using secondary data.

Credit Hour: 1-3
Prerequisites: Ph.D. students only; instructor's consent

MRKTNG 9020: Seminar in Advanced Research Methods in Marketing
Familiarizes students with advanced research methods in marketing, emphasizing problem developmental and conceptualization, operationalization of research questions, measurement, and survey research.

Credit Hour: 1-3
Prerequisites: MRKTNG 9010 or equivalent; Ph.D. students only; instructor's consent

MRKTNG 9030: Seminar in Applied Multivariate Analysis in Marketing
Familiarizes students with multivariate analysis of data used for research in marketing. Emphasizes application of multivariate methods, presentation of set, performing preliminary assessment of data quality and distribution, assessing measurement quality, and conducting a variety of multivariate and structural equation models, regression, logistic regression, discriminate analysis, cluster analysis, multi-way frequency analysis, and ANOVA.

Credit Hour: 1-3
Prerequisites: basic course in multivariate statistical methods; Ph.D. students only; instructor's consent

MRKTNG 9090: Research in Marketing
Thesis research for Ph.D. degree. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: Ph.D. students only

MRKTNG 9101: Current Topics Seminar in Marketing
Reading and critical evaluation of selected current marketing literature and research. Graded on S/U basis only. May be repeated.
Credit Hour: 1-3
Prerequisites: Ph.D. students only

MRKTNG 9185: Doctoral Independent Study in Marketing
Independent study of a marketing topic or research project. Arranged in consultation with a graduate faculty member. Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: Ph.D. students only; instructor's consent

MRKTNG 9210: Seminar in Marketing Strategy
Focuses on research topics that pertain to strategic marketing programs and decisions, such as marketing productivity, services marketing, product innovation management, and pricing, among others. Coverage is also given to defining the domain of research in marketing and to the development and use of related theories.
Credit Hour: 1-3
Prerequisites: Ph.D. students only; instructor's consent

MRKTNG 9220: Seminar Marketing Models
Familiarizes students with quantitative modeling approaches to address a variety of marketing problems. The focus is on the nature, relevance, and properties of mathematical models and analytical methods that are employed to address various types of marketing decisions. Students will gain an understanding of the process of model-building, testing and implementation.
Credit Hour: 1-3
Prerequisites: Ph.D students only; instructor's consent

MRKTNG 9230: Seminar in Consumer Behavior
Exposes doctoral students to perspectives on consumer behavior that draw from a variety of disciplines, including marketing, psychology, decision theory, sociology, and cultural anthropology. Students also learn about the different methods researchers employ to study consumers. Covers both classic and contemporary literature. Students are encouraged to evaluate and synthesize existing literature in the pursuit of new research ideas.
Credit Hour: 1-3
Prerequisites: Ph.D. students only; instructor's consent

MRKTNG 9600: Seminar in Marketing
Readings, independent investigations and reports. May be repeated.
Credit Hour: 1-3
Prerequisites: Ph.D. students only

Mathematics (MATH)

MATH _0110: Intermediate Algebra
MATH _0110 is a preparatory course for college algebra that carries no credit towards any baccalaureate degree. However, the grade received in MATH _0110 does count towards a student's overall GPA. The course covers operations with real numbers, graphs of functions, domain and range of functions, linear equations and inequalities, quadratic equations; operations with polynomials, rational expressions, exponents and radicals; equations of lines. Emphasis is also put on problem-solving.
Credit Hours: 3

MATH 1050: Quantitative Reasoning
Promotes mathematical literacy among students. This course will cover important mathematical ideas and problem solving skills in the context of science, technology, and/or society. Topics may include: logic and critical thinking, Venn Diagrams, problem solving, sets, units of measure, percentages and ratios, counting and probability, exponential growth and decay, linear and exponential models. Quantitative Reasoning is designed to stimulate interest in and appreciation of mathematics and quantitative reasoning as valuable tools for comprehending the world in which we live. This course does not satisfy the prerequisite of any other MATH course.
Credit Hours: 3
Prerequisites: C- or higher in MATH _0110 or a sufficient score on the myMath test
MATH 1050 - MOTR MATH 120: Mathematical Reasoning Modeling

MATH 1100: College Algebra
A review of exponents, order of operations, factoring, and simplifying polynomial, rational, and radical expressions. Topics include: linear, quadratic, polynomial, rational, inverse, exponential, and logarithmic functions and their applications. Students will solve equations involving these functions, and systems of linear equations in two variables, as well as inequalities. See the Math website for specific requirements. A student may receive at most 5.0 credit hours among MATH 1100, MATH 1120, MATH 1140, MATH 1160.
Credit Hours: 3
Prerequisites: C- or higher in MATH _0110 or a sufficient score on the ALEKS exam or MyMathTest Intermediate Algebra score of 70% or higher
MATH 1100 - MOTR MATH 130: Pre-Calculus Algebra

MATH 1140: Trigonometry
A student may receive only 5 credits from among MATH 1100, MATH 1140, and MATH 1160. A Student may receive at most 5.0 credit hours from MATH 1100, MATH 1120, MATH 1140, and MATH 1160.
Credit Hours: 2
Prerequisites: C- or higher in MATH 1100 or sufficient ALEKS score or MyMathTest College Algebra score of 70% or higher

MATH 1160: Precalculus Mathematics
Review of elementary algebra. Background material for MATH 1500, including algebraic, trigonometric, logarithmic, exponential functions. A student may receive at most 5 credits from among MATH 1100, MATH 1140, and MATH 1160.
Credit Hours: 5
Prerequisites: B+ or higher in MATH _0110 (at MU), or C- or higher in MATH 1100, or sufficient ALEKS score or MyMathTest College Algebra score of 60% or higher
MATH 1160 - MOTR MATH 150: Pre-Calculus
MATH 1300: Finite Mathematics
A selection of topics in finite mathematics such as basic financial mathematics, counting methods and basic probability and statistics, systems of linear equations and matrices. Warning: without a College Algebra exemption, a sufficient ALEKS score will not suffice unless it is a proctored exam (for MATH 1100 credit).

Credit Hours: 3
Prerequisites: Grade of C- or higher in MATH 1100, or MATH 1160, or both a College Algebra exemption and sufficient ALEKS score

MATH 1360: Geometric Concepts
This course is primarily for education majors. This course covers topics of Euclidean geometry such as the study of points, lines, angles, polygons, circles, congruence, similarity, transformations, symmetry, area, surface area, arc length, and volume. Polyhedra, spheres, cones, and other solids are discussed. The course includes constructions and proofs, and uses inductive and deductive reasoning throughout. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites: C- or higher in MATH 1100 or sufficient ALEKS exam score or MATH 1160 or equivalent

MATH 1400: Calculus for Social and Life Sciences I
The real number system, functions, analytic geometry, derivatives, integrals, maximum-minimum problems. No credit for students who have completed a calculus course. A student may receive credit for MATH 1320 or MATH 1400 but not both. A student may receive at most 5 units of credit among the MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites: grade of C- or higher in MATH 1100, or MATH 1160, or sufficient ALEKS score

MATH 1500: Analytic Geometry and Calculus I
Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. A student may receive at most 5 units of credit among the Mathematics courses MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency Course.

Credit Hours: 5
Prerequisites: grade of C- or higher in MATH 1100 or C - or higher in both MATH 1100 and MATH 1140 or sufficient ALEKS score or MyMathTest PreCalculus score of 70% or higher

MATH 1500H: Analytic Geometry and Calculus I - Honors
Elementary analytic geometry, functions, limits, continuity, derivatives, antiderivatives, definite integrals. Honors eligibility required. A student may receive at most 5 units of credit among MATH 1320 or MATH 1400 and MATH 1500. Math Reasoning Proficiency course.

Credit Hours: 5
Prerequisites: C- or higher in MATH 1160 or C - or higher in both MATH 1100 and MATH 1140 and sufficient ALEKS score. Honors Eligibility required

MATH 1601: Selected Topics in Mathematics-General
The special topics covered may vary from term to term. This course may be repeated.

Credit Hours: 1-3
Prerequisites: instructor's consent

MATH 1602: Selected Topics in Mathematics-Biological/Physical/ Math
The special topics covered may vary from term to term. This course may be repeated.

Credit Hours: 1-3
Prerequisites: instructor's consent

MATH 1700: Calculus II
Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Math Proficiency Reasoning course.

Credit Hours: 5
Prerequisites: a grade of C- or better in MATH 1500

MATH 1700H: Calculus II - Honors
Definite integrals, applications and techniques of integration, elementary transcendental functions, infinite series. Math Reasoning Proficiency course.

Credit Hours: 5
Prerequisites: a grade of C- or better in MATH 1500. Honors eligibility required

MATH 2100: Calculus for Social and Life Sciences II
Riemann integral, transcendental functions, techniques of integration, improper integrals and functions of several variables. No credit for students who have completed two calculus courses. Math Reasoning Proficiency course.

Credit Hours: 3
Prerequisites: C- or higher in MATH 1320 or MATH 1400 or MATH 1500

MATH 2300: Calculus III
Vectors, solid analytic geometry, calculus of several variables. Math Reasoning Proficiency course.

Credit Hours: 3
Prerequisites: grade of C- or better in MATH 1700

MATH 2300H: Calculus III - Honors
Vectors, solid analytic geometry, calculus of several variables. Math Reasoning Proficiency course.

Credit Hours: 3
Prerequisites: grade of C or better in MATH 1700. Honors eligibility required

MATH 2320: Discrete Mathematical Structures
Sets, functions, logic, relations, induction, recursion, counting techniques, graphs, trees, algorithms. Math Reasoning Proficiency course.

Credit Hours: 3
Prerequisites: Grade of C- or higher in MATH 1700
MATH 3000: Introduction to Advanced Mathematics
Gateway to theoretical math courses. Focus on reading and writing math proofs/rigorously developing background needed in Adv Calc/Abstract Alg. Topics include logic, set theory, properties of functions and integers, the real number system, completeness of the real numbers, sequences of real numbers.
Credit Hours: 3
Prerequisites: Consent of Department required. Recommended MATH 1700

MATH 3000W: Introduction to Advanced Mathematics - Writing Intensive
Gateway to theoretical math courses. Focus on reading and writing math proofs/rigorously developing background needed in Adv Calc/Abstract Alg. Topics include logic, set theory, properties of functions and integers, the real number system, completeness of the real numbers, sequences of real numbers.
Credit Hours: 3
Prerequisites: Consent of Department required. Recommended MATH 1700

MATH 4002: Topics in Mathematics-Biological Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat for credit with Departmental consent.
Credit Hour: 1-6
Prerequisites: MATH 2300 and instructor's consent

MATH 4006: Topics in Mathematics-Mathematical Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat for credit with Departmental consent.
Credit Hour: 1-6
Prerequisites: MATH 2300 and instructor's consent

MATH 4007: Topics in Mathematics-Physical Sciences
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May repeat for credit with Departmental consent.
Credit Hour: 1-6
Prerequisites: MATH 2300 and instructor's consent

MATH 4100: Differential Equations
Course topics include: sequences, series, functions, limits, continuity, differentiation, optimization, curve sketching, antiderivatives, areas of plane regions, lengths of plane curves, areas of surfaces of revolution, and volumes of solids.
Credit Hours: 3
Prerequisites: MATH 1160, enrollment is restricted to Math Education majors

MATH 4060: Connecting Geometry to Middle and Secondary Schools
Especially recommended for those who wish to teach at the middle or secondary school level. Basic properties of Euclidean geometry, congruence, similarity, trigonometry, and coordinate geometry. Emphasis on understanding and writing proofs. More advanced topics may be included if time permits.
Credit Hours: 3
Prerequisites: Consent of Department required
Recommended: MATH 1360 or MATH 1500

MATH 4070: Connecting Algebra to Middle and Secondary Schools
A detailed study of integer and rational arithmetic and algebra. Topics include: Bionomial Theorem, induction, division algorithm, Euclid's Algorithm, Fundamental Theorem of Arithmetic, Pythogorian triples, modular arithmetic and generalizations to polynomials, matrices and other axiomatic structures.
Credit Hours: 3
Prerequisites: MATH 1320, enrollment is restricted to Math Education majors

MATH 4140: Matrix Theory
Basic properties of matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors, and Jordan normal forms. Introduction to writing proofs.
Credit Hours: 3
Prerequisites: Grade of C- or better in MATH 2300 or MATH 2320. Writing intensive sections require ENGLSH 1000

MATH 4140W: Matrix Theory - Writing Intensive
Basic properties of matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors, and Jordan normal forms. Introduction to writing proofs.
Credit Hours: 3
Prerequisites: Grade of C- or better in MATH 2300 or MATH 2320. Writing intensive sections require ENGLSH 1000

MATH 4150: History of Mathematics
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored.
Prerequisites or Corequisite: MATH 2300 or MATH 2340. Writing intensive sections require ENGLSH 1000

MATH 4150W: History of Mathematics - Writing Intensive
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored.
Credit Hours: 3

MATH 4150W: History of Mathematics - Writing Intensive
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored.
Credit Hours: 3
Prerequisites or Corequisite: MATH 2300 or MATH 2340. Writing intensive sections require ENGLISH 1000.

Credit Hours: 3

MATH 4300: Numerical Analysis
Machine arithmetic, approximation and interpolation, numerical differentiation and integration, nonlinear equations, linear systems, differential equations, error analysis. Selected algorithms will be programmed for solution on computers.

Credit Hours: 3
Prerequisites: Grade of C- or better in MATH 2300 and MATH 4100

MATH 4310: Numerical Linear Algebra
Solution of linear systems of equations by direct and iterative methods. Calculation of eigenvalues and eigenvectors of matrices. Selected algorithms programmed for solution on computers.

Credit Hours: 3
Prerequisites: MATH 2300 and familiarity with software such as Mathematica, MatLab, Maple, etc

MATH 4315: Introduction to Mathematical Statistics
(same as STAT 4710). Introduction to theory of probability and statistics using concepts and methods of calculus.

Credit Hours: 3
Prerequisites: MATH 2300 or instructor's consent

MATH 4320: Introduction to Probability Theory
(same as STAT 4750). Probability spaces; random variables and their distributions; repeated trials; probability limit theorems.

Credit Hours: 3
Prerequisites: MATH 2300 or instructor's consent

MATH 4330: Theory of Numbers
Divisibility, factorization, arithmetic functions, means value theorems, distribution of prime numbers, congruences, primitive roots, character theory, Riemann zeta function, and Dirichlet L-functions.

Credit Hours: 3
Prerequisites: Grade of C- or higher in MATH 2300. Recommended MATH 2320

MATH 4340: Introduction to Non-Euclidean Geometry

Credit Hours: 3
Prerequisites: MATH 2300

MATH 4350: Mathematics of Financial Derivatives I
(cross-leveled with MATH 7350). Long and short positions, forward contracts, exchange traded index futures, European and American call and put options, put-call parity, trading and hedging strategies, synthetic transactions, arbitrage, currency options, fixed income portfolio management, duration, convexity, interest rate and currency swaps, embedded options.

Credit Hours: 3

MATH 4370: Interest Theory
(cross-leveled with MATH 7370). This course covers the concepts underlying the theory of interest and their applications to valuation of various cash flows, annuities certain, bonds, and loan repayment. This course is designed to help students prepare for Society of Actuaries exam FM (Financial Mathematics). It is oriented towards problem solving techniques applied to real-life situations and illustrated with previous exam problems.

Credit Hours: 3
Prerequisites: grade of C- or better in MATH 2300

MATH 4371: Models for Life Contingencies I
(cross-leveled with MATH 7371). The sequence MATH 4371 - MATH 4372 is designed to help students prepare for the Society of Actuaries exam LTAM (Long-Term Actuarial Mathematics). This course teaches the basic theory of life contingent actuarial models and the applications of those models to insurance and other financial risks. Covered topics include: survival models, life tables and selection, insurance benefits, life annuities, premium calculation and reserves.

Credit Hours: 3
Prerequisites: MATH 4320 or STAT 4750, and MATH 4370

MATH 4372: Models for Life Contingencies II
(cross-leveled with MATH 7372). The sequence MATH 4371 - MATH 4372 is designed to help students prepare for the Society of Actuaries exam LTAM (Long-Term Actuarial Mathematics). This course extends the life-death contingency models of Math 4371 to more general multiple-state and multiple-life models applied to problems involving a wide range of insurance and pension benefits. Covered topics include: Markov chains, multiple decrement models, joint life and last survivor benefits, pension mathematics, profit testing.

Credit Hours: 3
Prerequisites: A grade of C- or better in MATH 4371

MATH 4400: Introduction to Topology
Topics from topology of Euclidean spaces, generalizations to metric spaces and topological spaces. Fundamentals of point set topology.

Credit Hours: 3

MATH 4410: Higher Algebra
Introduction to rings, integral domains, fields, groups.

Credit Hours: 3
MATH 4520: Statistical Inference I  
(same as STAT 4760). Sampling; point estimation; sampling distribution; tests of hypotheses; regression and linear hypotheses.  
Credit Hours: 3  
Prerequisites: MATH 4320

MATH 4540: Mathematical Modeling I  
Solution of problems from industry, physical, social and life sciences, economics, and engineering using mathematical models.  
Credit Hours: 3  
Prerequisites: Grade of C- or higher in MATH 2300 and MATH 4100  
Recommended: Familiarity with software such as MATHEMATICA, MATLAB, or MAPLE

MATH 4560: Nonlinear Dynamics, Fractals and Chaos  
Conceptual introduction to nonlinear dynamics, bifurcation and stability of steady states, chaos in nonlinear differential equations and maps, fractal dimension, strange attractors, and applications to physical science.  
Credit Hours: 3  
Prerequisites: MATH 4100 or MATH 7100, MATH 4140 or MATH 7140, and familiarity with software such as MATHEMATICA, MATLAB, or MAPLE

MATH 4590: Mathematics of Financial Derivatives II  
Credit Hours: 3  
Prerequisites: MATH 2300 and either STAT 2500 or STAT 4710 or MATH 4315  
Recommended: MATH 4355

MATH 4700: Advanced Calculus of One Real Variable I  
(cross-leveled with MATH 7700). Basic topology of the real line, numerical sequences and series, continuity, differentiability, Riemann integration, uniform convergence, power series.  
Credit Hours: 3  
Prerequisites: Grade of C- or higher in MATH 3000

MATH 4720: Introduction to Abstract Algebra I  
Basic properties of integers, fundamental theorem of arithmetic, introduction to groups, rings and fields.  
Credit Hours: 3  
Prerequisites: Grade of C- or higher in MATH 3000

MATH 4900: Advanced Multivariable Calculus  
(cross-leveled with MATH 7900). This is a course in calculus in several variables. The following is core material: Basic topology of n-dimensional Euclidian space; limits and continuity of functions; the derivative as a linear transformation; Taylor's formula with remainder; the Inverse and Implicit Function Theorems, change of coordinates; integration (including transformation of integrals under changes of coordinates); Green's Theorem. Additional material from the calculus of several variables may be included, such as Lagrange multipliers, differential forms, etc.  
Credit Hours: 3  
Prerequisites: MATH 4700

MATH 4920: Introduction to Abstract Linear Algebra  
(cross-leveled with MATH 7920). Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.  
Credit Hours: 3  
Prerequisites: Grade of C- or higher in MATH 4720

MATH 4940: Introduction to Complex Variables  
Complex functions, contour integration, power series, residues and poles, conformal mapping.  
Credit Hours: 3  
Prerequisites: MATH 4110 or MATH 4700

MATH 4960: Special Readings in Mathematics  
Credit Hour: 1-3  
Prerequisites: Consent of Department required

MATH 4996: Honors in Mathematics  
Special work for senior B.A. Honors and B.S. Honors candidates.  
Credit Hours: 2  
Prerequisites: Consent of Department required

MATH 7100: Differential Equations  
(cross-leveled with MATH 4100). Traditional introductory course in ordinary differential equations. Includes 1st and 2nd order linear differential equations with numerous applications; Laplace transforms; power series solutions; numerical methods, linear systems.  
Credit Hours: 3  
Prerequisites: graduate standing and MATH 2300

MATH 7140: Matrix Theory  
(cross-leveled with MATH 4140). Basic properties of matrices, determinants, vector spaces, linear transformations, eigenvalues, eigenvectors, and Jordan normal forms. Introduction to writing proofs.  
Credit Hours: 3  
Prerequisites: graduate standing and one of MATH 2300, MATH 2320, MATH 2120 or MATH 2340

MATH 7150: History of Mathematics  
This is a history course with mathematics as its subject. Includes topics in the history of mathematics from early civilizations onwards. The growth of mathematics, both as an abstract discipline and as a subject which interacts with others and with practical concerns, is explored. Pre- or Co-requisite: MATH 2300 or MATH 2340 and graduate standing.  
Credit Hours: 3
MATH 7300: Numerical Analysis
Machine arithmetic, approximation and interpolation, numerical
differentiation and integration, nonlinear equations, linear systems,
differential equations, error analysis. Selected algorithms will be
programmed for solution on computers.
Credit Hours: 3
Prerequisites: graduate standing and MATH 2300 and MATH 4100 or equivalent

MATH 7310: Numerical Linear Algebra
Solution of linear systems of equations by direct and iterative methods.
Calculation of eigenvalues and eigenvectors of matrices. Selected
algorithms programmed for solution on computers.
Credit Hours: 3
Prerequisites: MATH 2300 and prior experience writing programs in
Mathematica and /or in a computer language such as Fortran, Pascal, or C
Recommended: MATH 4140

MATH 7330: Theory of Numbers
Divisibility, factorization, arithmetic functions, means value theorems,
distribution of prime numbers, congruences, primitive roots, character
theory, Riemann zeta function, and Dirichlet L-functions.
Credit Hours: 3
Prerequisites: MATH 2300; recommended MATH 2320 or MATH 2340,
and MATH 4940 or MATH 7940

MATH 7355: Mathematics of Financial Derivatives I
(cross-leveled with MATH 4355). Long and short positions, forward
contracts, exchange traded index futures, European and American
call and put options, put-call parity, trading and hedging strategies,
synthetic transactions, arbitrage, currency options, fixed income portfolio
management, duration, convexity, interest rate and currency swaps,
embedded options.
Credit Hours: 3
Prerequisites: MATH 2300 and STAT 2500 or STAT 4710/ MATH 4315,
or instructor's consent

MATH 7370: Interest Theory
(cross-leveled with MATH 4370). This course covers the main probability
tools applied to financial risk modeling, and the financial mathematics
concepts used in calculating present and accumulated values for various
cash flows. It is a helpful tool in preparing for the Society of Actuaries
exams P (Probability) and FM (Financial Mathematics), and it is oriented
towards problem solving techniques illustrated with previous exam
problems. Students are encouraged to take MATH 4355 prior to this
course.
Credit Hours: 3
Prerequisites: MATH 2300, MATH 4320/ STAT 4750

MATH 7371: Models for Life Contingencies I
(cross-leveled with MATH 4371). The sequence MATH 4371 - MATH
4372 is designed to help students prepare for the Society of Actuaries
exam LTAM (Long-Term Actuarial Mathematics). This course teaches
the basic theory of life contingent actuarial models and the applications
of those models to insurance and other financial risks. Covered topics
include: survival models, life tables and selection, insurance benefits, life
annuities, premium calculation and reserves.
Credit Hours: 3

MATH 7372: Models for Life Contingencies II
(cross-leveled with MATH 4372). The sequence MATH 4371 - MATH
4372 is designed to help students prepare for the Society of Actuaries
exams LTAM (Long-Term Actuarial Mathematics). This course extends the
life-death contingency models of MATH 4371 to more general multiple-
state and multiple-life models applied to problems involving a wide range
of insurance and pension benefits. Covered topics include: Markov
chains, multiple decrement models, joint life and last survivor benefits,
pension mathematics, profit testing.
Credit Hours: 3
Prerequisites: A grade of C- or better in MATH 4371 or MATH 7371

MATH 7400: Introduction to Topology
Topics from topology of Euclidean spaces, generalizations to metric
Credit Hours: 3
Prerequisites: MATH 2300

MATH 7500: Applied Analysis
Solution of the standard partial differential equations (wave, heat,
Laplace's eq.) by separation of variables and transform methods;
including eigenfunction expansions, Fourier and Laplace transform.
Boundary value problems, Sturm-Liouville theory, orthogonality, Fourier,
Bessel, and Legendre series, spherical harmonics.
Credit Hours: 3
Prerequisites: MATH 4100/ MATH 7100

MATH 7510: Higher Algebra
Introduction to rings, integral domains, fields, groups.
Credit Hours: 3
Prerequisites: MATH 2300 OR MATH 2320

MATH 7540: Mathematical Modeling I
Solution of problems from industry, physical, social and life sciences,
economics, and engineering using mathematical models.
Credit Hours: 3
Prerequisites: graduate standing and 3 semesters of calculus and some
exposure to ordinary differential equations or instructor's consent

MATH 7560: Nonlinear Dynamics, Chaos and Fractals
Conceptual introduction to nonlinear dynamics, bifurcation and stability of
steady states, chaos in nonlinear differential equations and maps, fractal
dimension, strange attractors, and applications to physical science.
Credit Hours: 3
Prerequisites: graduate standing and MATH 4100/ MATH 7100, MATH
4140/ MATH 7140, and familiarity with software such as MATHEMATICA,
MATLAB, or MAPLE
MATH 7590: Mathematics of Financial Derivatives II
(cross-leveled with MATH 4590). Binomial and Black-Scholes pricing models. Option Greeks, delta and gamma hedging, market maker profit theory. Asian, barrier, compound, gap and exchange options. Lognormal and Monte Carlo price simulation. Geometric Brownian Motion and Ito's Lemma. Interest rate models and volatility. Prerequisites: MATH 2300 and either STAT 2500 or STAT 4710 or MATH 4315.

Credit Hours: 3
Prerequisites: MATH 2300 and either STAT 2500 or STAT 4710 or MATH 4315
Recommended: MATH 4355

MATH 7700: Advanced Calculus of One Real Variable I
(cross-leveled with MATH 4700). Series of real numbers, limits of functions, continuity and uniform continuity, differentiability, and Riemann integration.

Credit Hours: 3
Prerequisites: MATH 2300
Recommended: MATH 4140 and one other mathematics course number above MATH 2300

MATH 7720: Introduction to Abstract Algebra I
Basic properties of integers, fundamental theorem of arithmetic, introduction to groups, rings and fields.

Credit Hours: 3
Prerequisites: MATH 2300
Recommended: MATH 4140 and one other Mathematics course numbered above 2300

MATH 7900: Advanced Multivariable Calculus
(cross-leveled with MATH 4900). This is a course in calculus in several variables. The following is core material: Basic topology of n-dimensional Euclidian space; limits and continuity of functions; the derivative as a linear transformation; Taylor's formula with remainder; the Inverse and Implicit Function Theorems, change of coordinates; integration (including transformation of integrals under changes of coordinates); Green's Theorem. Additional material from the calculus of several variables may be included, such as Lagrange multipliers, differential forms, etc.

Credit Hours: 3
Prerequisites: MATH 4700/ MATH 7700

MATH 7920: Introduction to Abstract Linear Algebra
(cross-leveled with MATH 4920). Study of vector spaces over arbitrary fields: topics include linear maps on finite dimensional vector spaces, bilinear and multi-linear forms, invariant subspaces and canonical forms.

Credit Hours: 3
Prerequisites: MATH 2300

MATH 7940: Introduction to Complex Variables
Complex functions, contour integration, power series, residues and poles, conformal mapping.

Credit Hours: 3
Prerequisites: MATH 4110/ MATH 7110 OR MATH 4700/ MATH 7700

MATH 7960: Special Readings in Mathematics

Credit Hour: 1-3
Prerequisites: MATH 2300 and instructor's consent

MATH 7980: Mathematics Problem Solving
Creative advanced problem solving bringing together methods such as integration, probability and Euclidean geometry.

Credit Hours: 3
Prerequisites: MATH 4140 and another 4000 level Mathematics course, or instructor's consent

MATH 8085: Problems in Mathematics
Problems in Mathematics

Credit Hours: 3

MATH 8102: Topics in Algebra
Advanced topics in algebra.

Credit Hours: 3
Prerequisites: MATH 8410

MATH 8190: Masters Project in Mathematics
Masters Project in Mathematics

Credit Hours: 3

MATH 8202: Topics in Functional Analysis
Topics in Functional Analysis

Credit Hours: 3

MATH 8210: Basic Algebra
Accelerated problem solving course in linear and abstract algebra. Will prepare students for the algebra qualifying exam.

Credit Hours: 3
Prerequisites: MATH 4720, MATH 4920, or instructor's consent, or equivalent
Corequisites: MATH 8220 and MATH 8250

MATH 8220: Basic Analysis
Accelerated problem-solving course in advanced calculus and complex analysis. Will prepare students for the analysis qualifying exam.

Credit Hours: 6
Prerequisites: MATH 4700, MATH 4900, MATH 4940, instructor's consent or equivalent

MATH 8250: Basic Topology and Geometry

Credit Hours: 3
Prerequisites: MATH 4700, MATH 4900, MATH 4140, or instructor's consent, or equivalent
Corequisites: MATH 8210 and MATH 8220

MATH 8302: Topics in Harmonic Analysis
Topics in Harmonic Analysis
Credit Hours: 3

MATH 8402: Topics in Mathematical Physics
Topics in Mathematical Physics
Credit Hours: 3

MATH 8410: Algebra I
Theory of algebraic structures—groups, rings, fields, algebraic and transcendental extensions of fields.
Credit Hours: 3
Prerequisites: MATH 4720 and MATH 4920, or equivalent

MATH 8411: Algebra II
Theory of modules, Galois theory and additional topics to be selected by the instructor.
Credit Hours: 3
Prerequisites: MATH 4720 and MATH 4920, or equivalent

MATH 8420: Theory of Functions of Real Variables I
Properties of functions of one real variable. Lebesgue measure and integration on the line.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or MATH 4900 or MATH 7900, or equivalent

MATH 8421: Theory of Functions of Real Variables II
Continuation of MATH 8420. General measure and integration theory. Elements of the theory of Hilbert and Banach spaces, linear functions and linear operators.
Credit Hours: 3
Prerequisites: MATH 8420

MATH 8425: Complex Analysis I
Rigorous introduction to the theory of functions of a complex variable.
Credit Hours: 3
Prerequisites: MATH 4940 or MATH 7940 or equivalent

MATH 8426: Complex Analysis II
Analytic continuation, Riemann surfaces, entire and meromorphic functions, selected topics.
Credit Hours: 3
Prerequisites: MATH 8425

MATH 8440: Advanced Ordinary Differential Equations I
Topics from existence and uniqueness theorems, plane autonomous systems, periodicity and boundedness of solutions of second order nonlinear equations, perturbation theory, Sturm-Liouville systems, behavior of solutions at singularities.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or equivalent

MATH 8445: Partial Differential Equations I
Fourier and integral transforms, first and second order partial differential equations, methods of characteristics, Laplace's equation, Dirichlet and Neumann problems, Green's functions and maximum principles.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or instructor's consent required

MATH 8446: Partial Differential Equations II
The Cauchy-Kovalevski theorem, the Lewy example, the heat operator, the wave operator, Sobolev spaces, local regularity of elliptic boundary value problems.
Credit Hours: 3
Prerequisites: MATH 8445
Recommended: MATH 8420

MATH 8460: Mathematical Finance I
Credit Hours: 3
Prerequisites: graduate standing in Mathematics. Knowledge of elementary probability or instructor's consent

MATH 8461: Mathematical Finance II
Credit Hours: 3
Prerequisites: knowledge of advance probability/stochastic processes or instructor's consent
Recommended: MATH 8460

MATH 8480: Advanced Probability
(same as STAT 9810). Measure theoretic probability theory. Characteristic functions; conditional probability and expectation; sums of independent random variables including strong law of large numbers and central limit problem.
Credit Hours: 3
Prerequisites: MATH 4320 or MATH 8220; or instructor's consent

MATH 8440: Advanced Ordinary Differential Equations I
Topics from existence and uniqueness theorems, plane autonomous systems, periodicity and boundedness of solutions of second order nonlinear equations, perturbation theory, Sturm-Liouville systems, behavior of solutions at singularities.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or equivalent

MATH 8445: Partial Differential Equations I
Fourier and integral transforms, first and second order partial differential equations, methods of characteristics, Laplace's equation, Dirichlet and Neumann problems, Green's functions and maximum principles.
Credit Hours: 3
Prerequisites: MATH 4700 or MATH 7700 or instructor's consent required

MATH 8446: Partial Differential Equations II
The Cauchy-Kovalevski theorem, the Lewy example, the heat operator, the wave operator, Sobolev spaces, local regularity of elliptic boundary value problems.
Credit Hours: 3
Prerequisites: MATH 8445
Recommended: MATH 8420

MATH 8460: Mathematical Finance I
Credit Hours: 3
Prerequisites: graduate standing in Mathematics. Knowledge of elementary probability or instructor's consent

MATH 8461: Mathematical Finance II
Credit Hours: 3
Prerequisites: knowledge of advance probability/stochastic processes or instructor's consent
Recommended: MATH 8460

MATH 8480: Advanced Probability
(same as STAT 9810). Measure theoretic probability theory. Characteristic functions; conditional probability and expectation; sums of independent random variables including strong law of large numbers and central limit problem.
Credit Hours: 3
Prerequisites: MATH 4320 or MATH 8220; or instructor's consent
MATH 8502: Topics of Geometry
Topics of Geometry.
Credit Hours: 3
Prerequisites: instructor's consent

MATH 8587: Topology Seminar
Topology Seminar
Credit Hours: 3

MATH 8615: Algebraic Geometry I
Affine and projective varieties and schemes; nullstellensatz; Zariski topology, morphisms and rational maps; divisors and linear systems; topics from curves, surfaces, Grassmann varieties; commutative algebra and homological algebra as needed.
Credit Hours: 3
Prerequisites: MATH 8410

MATH 8616: Algebraic Geometry II
Continuation of MATH 8615.
Credit Hours: 3
Prerequisites: MATH 8615

MATH 8618: Introduction to Algebraic Topology
Development of singular homology theory; reference to other homology and cohomology theories. Introduction to homological algebra.
Credit Hours: 3
Prerequisites: MATH 8250

MATH 8628: Functional Analysis I
Linear topological spaces, Banach spaces, Hilbert spaces. Operator theory, including the Hahn-Banach, uniform boundedness and closed graph theorems.
Credit Hours: 3
Prerequisites: MATH 4900 and instructor's consent or MATH 8420

MATH 8630: Harmonic Analysis I
An introduction to Fourier Analysis in one and higher Dimensions. Topics include Fourier Series, conjugate functions, Fourier transforms, distributions, interpolation, and maximal functions.
Credit Hours: 3
Prerequisites: MATH 4900 and instructor's consent or MATH 8420

MATH 8631: Harmonic Analysis II
Singular integrals, Littlewood-Paley theory, Hardy spaces, bounded mean oscillation, weighted norm inequalities, boundary value problems, and analysis on groups.
Credit Hours: 3
Prerequisites: MATH 8630

MATH 8650: Differentiable Manifolds and Riemannian Geometry
Tensor product spaces and tensor fields on manifolds. Differentiation and integration of differential forms. Riemannian geometry and applications.
Credit Hours: 3

MATH 8655: General Topology I
Credit Hours: 3
Prerequisites: MATH 4900, MATH 4400 or instructor's consent

MATH 8702: Topics in Applied Mathematics
Selected topics in applied mathematics drawn from variety of areas: partial differential equations, tensor analysis, calculus of variations, asymptotic methods, integral equations, advanced theory of transforms and distributions, numerical analysis.
Credit Hours: 3

MATH 9090: Doctoral Dissertation Research in Mathematics
Doctoral Dissertation Research in Mathematics. Graded on a S/U basis only.
Credit Hour: 1-9

MATH 9387: Harmonic Analysis Seminar
Harmonic Analysis Seminar
Credit Hours: 3

MATH 9487: Mathematical Physics Seminar
Mathematical Physics Seminar
Credit Hours: 3

MATH 9502: Topics in Topology
Advanced topics in topology or topological algebra.
Credit Hours: 3

MATH 9787: Applied Mathematics Seminar
Applied Mathematics Seminar
Credit Hours: 3

MATH 9887: Analysis Seminar
Analysis Seminar
Credit Hours: 3

Mechanical And Aerospace Engineering (MAE)

MAE 1000: Introduction to Mechanical Engineering
Introduction to the mechanical engineering profession, the Mechanical and Aerospace Engineering Department and curriculum, and the core disciplines of mechanical engineering. Introduction to engineering problem solving, ethics, and design.
Credit Hour: 1
Prerequisites: Restricted to engineering students only

MAE 1100: Introduction to Computer Aided Design
Introduction to 2D and 3D mechanical modeling techniques using computer-aided design (CAD) software. Topics include 3D part and assembly modeling, 2D part and assembly drawings, standards of engineering drawings, and basic animation and simulation. Graded on A-F basis only. Prerequisites:

Credit Hours: 3
Prerequisites: Restricted to Engineering Students only, or by departmental consent
Corequisites: MATH 1500

MAE 2100: Programming and Software Tools
Introduction to the use of computers, programming, and software. Topics include MATLAB syntax and programming techniques, algorithm design, and programming with Excel spreadsheets.

Credit Hours: 3
Prerequisites: grade of C- or better in MATH 1700. Restricted to Mechanical Aerospace Engineering students only

MAE 2300: Thermodynamics
(same as ENGINR 2300). Fluid properties, work and heat, first law, second law, entropy, applications to vapor and ideal gas processes.

Credit Hours: 3
Prerequisites: grade of C- or better in PHYSCS 2750; restricted to MAE students only

MAE 2600: Dynamics
Basic fundamentals of particle and rigid body dynamics; energy and momentum methods.

Credit Hours: 3
Prerequisites: grade of C- or better in ENGINR 1200. Restricted to Mechanical and Aerospace Engineering students only

MAE 3100: Computational Methods for Engineering Design
Introduction to numerical methods for linear system analysis, curve-fitting, integration and differentiation, and optimization. The numerical methods are demonstrated through computer implementation and application to engineering design problems.

Credit Hours: 4
Prerequisites or Corequisites: MATH 4100 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2100; Restricted to Mechanical and Aerospace Engineering students only

MAE 3200: Engineering Materials
The nature of the structure of engineering materials. The relationship of material structure to physical properties. Mechanical behavior of engineering materials.

Credit Hours: 3
Prerequisites: Grade of C- or better in ENGINR 2200 and CHEM 1320. Restricted to Mechanical and Aerospace Engineering students only

MAE 3200W: Engineering Materials - Writing Intensive
The nature of the structure of engineering materials. The relationship of material structure to physical properties. Mechanical behavior of engineering materials.

Credit Hours: 3
Prerequisites: Grade of C- or better in ENGINR 2200 and CHEM 1320. Restricted to Mechanical and Aerospace Engineering students only

MAE 3300: Fluid Mechanics
A basic course in fluid mechanics. Topics include: fluid properties, hydrostatics, conservation laws, infinitesimal and finite control volume analysis, Navier-Stokes equations, dimensional analysis, internal and external flows.

Credit Hours: 3
Prerequisites or Corequisites: MAE 2300 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2600; Restricted to Mechanical and Aerospace Engineering students only

MAE 3400: Fluid Mechanics
A basic course in fluid mechanics. Topics include: fluid properties, hydrostatics, conservation laws, infinitesimal and finite control volume analysis, Navier-Stokes equations, dimensional analysis, internal and external flows.

Credit Hours: 3
Prerequisites or Corequisites: ENGINR 2100 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2600 and MAE 3100 and MATH 4100. Restricted to Mechanical and Aerospace Engineering students only

MAE 3500: Dynamic Systems and Control
Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis.

Credit Hours: 3
Prerequisites or Corequisites: ENGINR 2100 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2600 and MAE 3100 and MATH 4100. Restricted to Mechanical and Aerospace Engineering students only

MAE 3600: Dynamic Systems and Control - Honors
Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis.

Credit Hours: 3
Prerequisites or Corequisites: ENGINR 2100 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2600 and MAE 3100 and MATH 4100. Restricted to Mechanical and Aerospace Engineering students only. Honors eligibility required

MAE 3600H: Dynamic Systems and Control - Honors
Modeling and analysis of dynamic systems and introduction to feedback control. Topics include dynamic modeling and response of mechanical, electrical, fluid, and thermal systems; and feedback control systems analysis.

Credit Hours: 3
Prerequisites or Corequisites: ENGINR 2100 grade of C- or better
Prerequisites: Grade of C- or better in MAE 2600 and MAE 3100 and MATH 4100. Restricted to Mechanical and Aerospace Engineering students only

MAE 3800: Instrumentation and Measurements Laboratory
Design and reporting of experimental investigations. Topics include instrument design equations, sources of error, and calibration. Survey of instruments to measure: voltage, resistance, current, time, frequency, displacement, velocity, acceleration, strain, force, and torque.

Credit Hours: 3
Prerequisites or Corequisites: MAE 3600 grade of C- or better
Prerequisites: Grade of C- or better in ENGINR 2100 and ENGINR 2200 and Physics 2780; Restricted to Mechanical and Aerospace Engineering students only

MAE 3900: Mechanism Design
Analysis of kinematics and dynamics of machinery. Topics include design and selection of various mechanisms. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Grade of C- or better in MAE 2600 and MAE 3100. Restricted to Mechanical and Aerospace Engineering students only

MAE 4001: Topics in Mechanical and Aerospace Engineering
Current and new technical developments in mechanical and aerospace engineering. Enrollment limited to Mechanical and Aerospace Engineering students only.
Credit Hours: 3
Prerequisites: Instructor's consent

MAE 4085: Problems in Mechanical and Aerospace Engineering
Special design, experimental and analytical problems in mechanical and aerospace engineering.
Credit Hours: 1-99
Prerequisites: Instructor's consent

MAE 4210: Aerospace Structures
(cross-leveled with MAE 7210). Fundamentals of the mechanics and design issues of aerospace structures. Analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C- or better in ENGINR 2200

MAE 4220: Materials Selection
(cross-leveled with MAE 7220). Study of the physical and mechanical metallurgy of alloy systems of interest in engineering applications.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200; Restricted to Mechanical and Aerospace Engineering students only

MAE 4230: Nanomaterials
(cross-leveled with MAE 7230). The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200 or equivalent

MAE 4230W: Nanomaterials - Writing Intensive
(cross-leveled with MAE 7230). The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200 or equivalent

MAE 4231: Transport Phenomena in Materials Processing
(same as BIOL_EN 4231; cross-leveled with BIOL_EN 7231, MAE 7231). Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Grade of C- or better in MAE 2300 and MAE 3400.
Restricted to Mechanical and Aerospace Engineering students only

Prerequisites or Corequisites: MAE 4300
Prerequisites: C- or better in Math 4100

MAE 4232: Ceramic Materials and Processing
(cross-leveled with MAE 7232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200

MAE 4250: Composite Materials
(cross-leveled with MAE 7250). A survey of composite materials used in engineering emphasizing fiber-reinforced composites but including laminate and particulate composites.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200

MAE 4270: Nondestructive Evaluation of Materials
(cross-leveled with MAE 7270). The role of nondestructive evaluation (NDE) in engineering is explored. Ultrasonic NDE is studied in detail. Labs are used to support the study of ultrasonic NDE. Other NDE techniques are surveyed.
Credit Hours: 3
Prerequisites: C- or better in MAE 3200, Mechanical and Aerospace Engineering students only

MAE 4280: Introduction to Finite Element Methods
(cross-leveled with MAE 7280). The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element method to beams, frames and trusses.
Credit Hours: 3
Prerequisites: C- or better in ENGINR 2200, MAE 3100, MAE students only

MAE 4290: Welding Engineering
(cross-leveled with MAE 7290). Welding is the most common method of joining similar as well as dissimilar materials. This course thus introduces the basic science and engineering aspects of commonly used fusion and non-fusion welding processes. Stress analysis and failure to welded joints is also introduced to develop safe and durable welded structures.
Credit Hours: 3
Prerequisites: senior standing in Mechanical and Aerospace Engineering

MAE 4300: Heat Transfer
Credit Hours: 3
Prerequisites: Grade of C- or better in MAE 2300 and MAE 3400.
Restricted to Mechanical and Aerospace Engineering students only
MAE 4310: Intermediate Heat Transfer
(cross-leveled with MAE 7310). Advanced topics in conduction, convection, and radiation. Heat exchanges and their applications will also be analyzed.
Credit Hours: 3
Prerequisites: C- or better in MAE 4300 and Mechanical Engineering students only

MAE 4320: Design of Thermal Systems
(cross-leveled with MAE 7320). Thermal systems are simulated by mathematical models (often on a digital computer), followed by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization.
Credit Hours: 3
Prerequisites: C- or better in MAE 4300

MAE 4320W: Design of Thermal Systems - Writing Intensive
Thermal systems are simulated by mathematical models (often on a digital computer), followed by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization.
Credit Hours: 3
Recommended: MAE 4300

MAE 4325: Nanoscale Energy Transport
(cross-leveled with MAE 7325). This course examines non-equilibrium energy processes from the vantage point of fundamental energy carriers. Topics include foundational solid state physics, statistical energy carrier distributions, density of states, and dispersion relationships. Energy transport will be discussed in terms of kinetic theory, the Landauer Formalism, and the Boltzmann Transport Equation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Senior standing in MAE

MAE 4340: Heating and Air Conditioning
(cross-leveled with MAE 7340). General principles of thermal science applied to the design of environmental control systems. Topics covered include heating and cooling load calculations, annual operating and life cycle cost estimating, duct and pipe sizing, and equipment selection.
Credit Hours: 3
Prerequisites: C- or better in MAE 4300 and MAE students only

MAE 4350: Industrial Energy Analysis
Credit Hours: 3
Prerequisites or Corequisites: MAE 4300

MAE 4380: Intermediate Thermodynamics
(cross-leveled with MAE 7380). Topics from classical and statistical thermodynamics.

MAE 4390: Aerospace Propulsion
(cross-leveled with MAE 7390). Analysis of aircraft engines and spacecraft propulsion systems.
Credit Hours: 3
Prerequisites: C- or better in MAE 3400 and Junior standing in Mechanical and Aerospace Engineering

MAE 4420: Intermediate Fluid Mechanics
(cross-leveled with MAE 7420). Topics in potential and viscous flow theory, and computational fluid dynamics.
Credit Hours: 3
Prerequisites: C- or better in MAE 3400

MAE 4440: Aerodynamics
(cross-leveled with MAE 7440). Presents fundamentals of wing and airfoil theory for incompressible flow, including fluid kinematics and dynamics, potential flow, flow about a body, thin-airfoil theory, and finite wing.
Credit Hours: 3
Prerequisites: C- or better in MAE 3400

MAE 4450: Gas Dynamics
(cross-leveled with MAE 7450). One dimensional compressible flow with and without friction and heat transfer. Isentropic flow and shock phenomenon in nozzles and diffusers.
Credit Hours: 3
Prerequisites: C- or better in MAE 3400

MAE 4460: Microfluidics
(cross-leveled with MAE 7460). This course focuses on liquid transport in micro/nano fluidic devices and related electrohydrodynamics. Graded on A-F basis only.
Credit Hours: 3
Recommended: MAE 3400

MAE 4500: Manufacturing Methods
Introduction to manufacturing processes with emphasis on those aspects most relevant to methods, problems in force analysis, and practicum and experimentation in machine tool applications.
Credit Hours: 3
Prerequisites: Grade of C- or better in ENGINR 1110 and MAE 3200. Restricted to Mechanical and Aerospace Engineering students only
MAE 4600: Advanced Mechanics of Materials
(same as CV_ENG 4600; cross-leveled with MAE 7600 and CV_ENG 7600). Analysis of more complicated problems in stresses, strains.

Credit Hours: 3
Prerequisites: C- or better in ENGR 2200, MAE 3200 and Junior standing in MAE

MAE 4620: Aircraft Flight Performance
(cross-leveled with MAE 7620). Analysis of aircraft flight and aircraft performance metrics. Topics include airplane aerodynamics and propulsion, steady flight, range, endurance, take-off and landing, and aircraft maneuvers. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or better in MAE 2600, MAE 3100, MAE 3400, and Junior standing in Mechanical and Aerospace Engineering

MAE 4630: Space Flight Mechanics
(cross-leveled with MAE 7630). Analysis of spacecraft orbits and trajectories. Topics include orbital mechanics, orbital maneuvers, interplanetary missions, and entry flight mechanics.

Credit Hours: 3
Prerequisites: C- or better in MAE 2600, MAE 3100, and Junior standing in Mechanical and Aerospace Engineering

MAE 4660: Vibration Analysis
(same as CV_ENG 4660; cross-leveled with MAE 7660, CV_ENG 7660). Vibration theory and its application to mechanical systems. Topics include free and forced vibration analysis of single- and multi-degree of freedom systems.

Credit Hours: 3
Prerequisites: C- or better in MATH 4100 and MAE 2600

MAE 4680: Introduction to MEMS
(cross-leveled with MAE 7680). The course will start with a survey of the widespread applications of MEMS sensors and actuators. Micro fabrication methods used in conventional semiconductor industry will be introduced. MEMS-specific process will be emphasized. Fundamental principles in electric circuits and mechanics will be reviewed. Special attention is on mechanical issues encountered in MEMS design and fabrication.

Credit Hours: 3
Prerequisites: C- or better in MAE 3600 and Junior standing in Mechanical and Aerospace Engineering

MAE 4690: Aircraft Flight Dynamics

Credit Hours: 3
Prerequisites: C- or better in MAE 2600, MAE 3100, and MAE 3400 and Junior Standing in Mechanical and Aerospace Engineering

MAE 4700: Hydraulics
(cross-leveled with MAE 7700). Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or better in MAE 3400, MAE 3600, and Junior standing in Mechanical and Aerospace Engineering

MAE 4710: Hydraulic Control System
(cross-leveled with MAE 7710). Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or better in MAE 3400, MAE 3600, and Junior standing in Mechanical and Aerospace Engineering

MAE 4720: Modern Control
(cross-leveled with MAE 7720). Analysis and design of control systems using state-space methods. Topics include controllability and observability, feedback control using pole-placement, state observers, optimal linear-quadratic feedback control, and optimal estimation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C- or better in MAE 3400 and MAE 3600, and Junior standing in Mechanical and Aerospace Engineering

MAE 4730: Mechatronics
(cross-leveled with MAE 7730). Design of systems which require the integration of mechanical and electronic components. Topics include microcontrollers, sensors, actuators, mechanical systems, real-time control system programming, and modeling of electronic and mechanical systems.

Credit Hours: 3
Prerequisites: C- or better in MAE 3600 and Junior standing in Mechanical and Aerospace Engineering

MAE 4740: Digital Control
(cross-leveled with MAE 7740). Design and analysis of control systems using discrete-time methods. Topics include z-transforms, sampling and reconstruction, stability analysis, and digital controller design.

Credit Hours: 3
Prerequisites: C- or better in MAE 3600 and Junior standing in Mechanical and Aerospace Engineering

MAE 4750: Classical Control
(same as BIOL_EN 4310, ECE 4310; cross-leveled with MAE 7750, BIOL_EN 7310, ECE 7310). Study of feedback control design based on classical continuous-time methods. Topics include performance specifications, stability analysis, root locus compensator design, and frequency domain analysis and compensator design.

Credit Hours: 3
Prerequisites: C- or better in MAE 3600 and Junior standing in Mechanical and Aerospace Engineering

MAE 4760: Applied Thermal/Fluids Laboratory
Applied thermal and fluid systems, such as HVAC and psychometrics, will be introduced. Experiments conducted on thermal/fluid hardware components will be used to reinforce concepts.

Credit Hours: 4
Prerequisites: Grade of C- or better in MAE 4300. Restricted to Mechanical and Aerospace Engineering students only
MAE 4800W: Applied Thermal/Fluids Laboratory - Writing Intensive  
Applied thermal and fluid systems, such as HVAC and psychometrics, will be introduced. Experiments conducted on thermal/fluid hardware components will be used to reinforce concepts.  
**Credit Hours:** 4  
**Prerequisites:** Grade of C- or better in MAE 4300. Restricted to Mechanical and Aerospace Engineering students only  

MAE 4825: Materials and Manufacturing Laboratory  
Experiments in materials characterization, material properties, and manufacturing processes.  
**Credit Hours:** 1-3  
**Prerequisites or Corequisites:** MAE 4500  
**Prerequisites:** C- or better in MAE 3800, Restricted to Mechanical and Aerospace Engineering students only  

MAE 4900: Machine Element Design  
Application of stress and fatigue analyses to the design of machine elements such as fasteners, springs, shafts, and gears. Topics include selection of appropriate materials and machine elements.  
**Credit Hours:** 3  
**Prerequisites:** Grade of C- or better in MAE 3200. Restricted to Mechanical and Aerospace Engineering students only  

MAE 4930: Applied Mechanical Optimization  
(cross-leveled with MAE 7930). Introduction to mathematical programming techniques and applications to the design of mechanical systems and components.  
**Credit Hours:** 3  
**Prerequisites:** C- or better in MAE 3100, Mechanical and Aerospace Engineering students only  

MAE 4940: Aircraft Design  
(cross-leveled with MAE 7940). Conceptual design of aircraft, from initial sizing and design layout to design analysis, optimization and trade studies. Fundamental theories for aircraft design including sizing, aerodynamic forces, airfoil selection, wing loading, configuration layout payloads, propulsion systems, landing gear, aerospace structures, and cost analysis. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** C- or better in ENGR 2200, MAE 3400, MAE 3600, and Junior standing in MAE  

MAE 4980W: Senior Capstone Design - Writing Intensive  
Senior design experience. Topics include reliability, safety, manufacturability, economic, and environmental constraints; design case studies; and industrial design projects.  
**Credit Hours:** 3  
**Prerequisites:** Grade of C- or greater in MAE 3600, MAE 4500, MAE 4900 and STAT 4710 or IMSE 2110; Restricted to Mechanical and Aerospace Engineering students only  

MAE 4980: Senior Capstone Design  
Senior design experience. Topics include reliability, safety, manufacturability, economic, and environmental constraints; design case studies; and industrial design projects.  
**Credit Hours:** 3  
**Prerequisites:** Grade of C- or greater in MAE 3600, MAE 4500, MAE 4900 and STAT 4710 or IMSE 2110; Restricted to Mechanical and Aerospace Engineering students only  

MAE 4990: Undergraduate Research in Mechanical and Aerospace Engineering  
Independent investigation or project in Mechanical Engineering. Enrollment limited to senior Mechanical and Aerospace Engineering students only.  
**Credit Hour:** 0-6  
**Prerequisites:** instructor's consent  

MAE 4995: Undergraduate Honors Research Mechanical & Aerospace Engineering  
Independent investigation to be presented as an undergraduate honors thesis. Enrollment limited to Honors Mechanical and Aerospace Engineering students only. **Prerequisites:** Consent required  
**Credit Hour:** 1-99  

MAE 4995W: Undergraduate Honors Research Mechanical & Aerospace Engineering - Writing Intensive  
Independent investigation to be presented as an undergraduate honors thesis. Enrollment limited to Honors Mechanical and Aerospace Engineering students only. **Prerequisites:** Consent required  
**Credit Hour:** 1-99  

MAE 7001: Topics in Mechanical and Aerospace Engineering  
Current and new technical developments in mechanical and aerospace engineering.  
**Credit Hours:** 3  
**Prerequisites:** instructor's consent  

MAE 7210: Aerospace Structures  
Fundamentals of the mechanics and design issues of aerospace structures. Analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** grade of C or better in ENGR 2200  

MAE 7230: Nanomaterials  
The primary goal of this course is to introduce students into the new field of nanostructured materials. The emphasis of the course is to introduce the students into synthesis and characterization of nanomaterials, the behavior of such materials with nanoscale structures, and their technological applications.  
**Credit Hours:** 3  
**Prerequisites:** MAE 3200 or equivalent
MAE 7231: Transport Phenomena in Materials Processing
(same as BIOL_EN 7231) Applications of fluid flow, heat transfer, and mass transfer in steady-state and unsteady-state materials processing with applications to metals, polymers, and ceramics. Graded A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200, MAE 3400, MAE 4300 (or equivalent courses) and MATH 4100

MAE 7232: Ceramic Materials and Processing
(cross-leveled with MAE 4232). Treatment of ceramics materials, structure, and ceramic processing with hands-on demonstration/labs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200 or equivalent course

MAE 7250: Composite Materials
A survey of composite materials used in engineering emphasizing fiber-reinforced composites but including laminate and particulate composites.
Credit Hours: 3
Prerequisites: MAE 3200

MAE 7270: Nondestructive Evaluation of Materials
The role of nondestructive evaluation (NDE) in engineering is explored. Ultrasonic NDE is studied in detail. Labs are used to support the study of ultrasonic NDE. Other NDE techniques are surveyed.
Credit Hours: 3
Prerequisites: MAE 3200

MAE 7280: Introduction to Finite Element Methods
(cross-leveled with MAE 4280). The application of matrix operations, energy concepts and structural mechanics to the development of the finite element method. Application of finite element method to beams, frames and trusses. Prerequisites: ENGINR 2200, MAE 3100, MAE students only.
Credit Hours: 3
Prerequisites: Restricted to Mechanical and Aerospace Engineering students only

MAE 7290: Welding Engineering
Welding is the most common method of joining similar as well as dissimilar materials. This course thus introduces the basic science and engineering aspects of commonly used fusion and non-fusion welding processes. Stress analysis and failure to welded joints is also introduced to develop safe and durable welded structures.
Credit Hours: 3
Prerequisites: senior standing or graduate level

MAE 7310: Intermediate Heat Transfer
Advanced topics in conduction, convection, and radiation. Heat exchanges and their applications will also be analyzed.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7320: Design of Thermal Systems
Thermal systems are simulated by mathematical models (often on a digital computer), followed by optimization. Supporting topics include: economics, heat transfer, thermodynamics, and optimization.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7340: Heating and Air Conditioning
General principles of thermal science applied to the design of environmental control systems. Topics covered include heating and cooling load calculations, annual operating and life cycle cost estimating, duct and pipe sizing, and equipment selection.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 7355: Industrial Energy Analysis
Credit Hours: 3
Corequisites: MAE 4300 or instructor's consent

MAE 7380: Intermediate Thermodynamics
Topics from classical and statistical thermodynamics.
Credit Hours: 3
Prerequisites: ENGINR 2300

MAE 7390: Aerospace Propulsion
Analysis of aircraft engines and spacecraft propulsion systems.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7420: Intermediate Fluid Mechanics
Topics in potential and viscous flow theory, and computational fluid dynamics.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7430: Introduction to Computational Fluid Dynamics and Heat Transfer
Introduction to the principles and development of the finite difference approximations to the governing differential equations of viscous and inviscid fluid flow, as well as heat transfer. Introduction to discretization methods and the calculation of flow fields, convection, diffusion and conduction.
Credit Hours: 3
Prerequisites: MAE 3400, MAE 4300 and MAE 4420

MAE 7440: Aerodynamics
Presents fundamentals of wing and airfoil theory for incompressible flow, including fluid kinematics and dynamics, potential flow, flow about a body, thin-airfoil theory, and finite wing.
Credit Hours: 3
Prerequisites: MAE 3100 and MAE 3400
MAE 7450: Gas Dynamics
One-dimensional compressible flow with and without friction and heat transfer. Isentropic flow and shock phenomenon in nozzles and diffusers.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7460: Microfluidics
(cross-leveled with MAE 4460). This course focuses on liquid transport in micro/nano fluidic devices and related electrohydrodynamics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3400

MAE 7600: Advanced Mechanics of Materials
(same as CV_ENG 7600; cross-leveled with MAE 4600 and CV_ENG 4600). Analysis of more complicated problems in stresses, strains.
Credit Hours: 3
Prerequisites: C- or better in ENGR 2200, MAE 3200 and Junior standing in MAE

MAE 7620: Aircraft Flight Performance
(cross-leveled with MAE 4620). Analysis of aircraft flight dynamics and aircraft performance. Topics include airplane aerodynamics and propulsion, steady flight, flight performance, aircraft maneuvers, aircraft stability, and an introduction to flight controls. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7630: Space Flight Mechanics
(cross-leveled with MAE 4630). Analysis of spacecraft motion. Topics include orbital dynamics, spacecraft attitude dynamics, satellite trajectory design, and spacecraft control system design.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7660: Vibration Analysis
(same as CV_ENG 7660). Vibration theory and its application to Mechanical systems. Topics include free and forced vibration analysis of single and multi-degree of freedom systems.
Credit Hours: 3
Prerequisites: C- or better in MATH 4100 and MAE 2600

MAE 7680: Introduction to MEMS
The course will start with a survey of the widespread applications of MEMS sensors and actuators. Micro fabrication methods used in conventional semiconductor industry will be introduced. MEMS-specific processes will be emphasized. Fundamental principles in electric circuits and mechanics will be reviewed. Special attention is on mechanical issues encountered in MEMS design and fabrication. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3400, MAE 3600, MAE 3600

MAE 7690: Aircraft Flight Dynamics
Credit Hours: 3

MAE 7710: Hydraulic Control Systems
Analysis of hydraulic control components and systems. Topics include pumps, valves, actuators, and industrial and mobile control systems.
Credit Hour: 1-3
Prerequisites: MAE 3400

MAE 7720: Modern Control
Analysis and design of control systems using state-space methods. Topics include controllability and observability, feedback control using pole-placement, state observers, optimal linear-quadratic feedback control, and optimal estimation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7730: Mechatronics
Design of systems which require the integration of mechanical and electronic components. Topics include microcontrollers, sensors, actuators, mechanical systems, real time control system programming, and modeling of electronic and mechanical systems.
Credit Hours: 3
Prerequisites: MAE 3600

MAE 7750: Classical Control
(same as ECE 7310, BIOL_EN 7310; cross-leveled with MAE 4750, ECE 4310, BIOL_EN 4310). Study of feedback control design based on classical continuous-time methods. Topics include performance specifications, stability analysis, root locus compensator design, and frequency domain analysis and compensator design.
Credit Hours: 3

MAE 7930: Applied Mechanical Optimization
Introduction to mathematical programming techniques and applications to the design of mechanical systems and components.
Credit Hours: 3
Prerequisites: MAE 3100

MAE 7940: Aircraft Design
(cross-leveled with MAE 4940). Conceptual design of aircraft, from initial sizing and design layout to design analysis, optimization, and trade studies. Fundamental theories for aircraft design, including sizing, aerodynamic forces, airfoil selection, wing loading, configuration layout, payloads, propulsion systems, landing gear, aerospace structures, and cost analysis. Graded A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3400, MAE 3600, MAE 3600
MAE 8001: Advanced Topics in Mechanical and Aerospace Engineering
Advanced Topics in Mechanical and Aerospace Engineering.
Credit Hours: 3

MAE 8085: Problems in Mechanical and Aerospace Engineering
Supervised investigation in mechanical and aerospace engineering to be presented in the form of a report.
Credit Hour: 1-99

MAE 8087: Graduate Seminar in Mechanical and Aerospace Engineering
Reviews recent investigations, projects of major importance in mechanical and aerospace engineering. Graded on S/U basis only.
Credit Hour: 1

MAE 8240: Mechanical Behavior of Materials
This course will cover the mechanical behavior of metallic, ceramic, polymeric, and composite materials and their relationships to the underlying microstructures. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 3200 and graduate standing in engineering, or instructor's consent

MAE 8280: Finite Element Methods
(same as CV_ENG 8208). The concepts and fundamentals of the finite element method with applications to problems in solid and fluid mechanics.
Credit Hours: 3
Prerequisites: MAE 4280

MAE 8300: Microscale Heat Transfer
Review of existing models. Concept of thermal lagging and the second-law admissibility. Applications to low temperatures, thermal processing of thin-film devices; amorphous materials; advanced composites.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8315: Multiphase Heat Transfer
Fundamentals and application of heat and mass transfer and fluid flow with phase change; melting and solidification, sublimation and vapor deposition, condensation, evaporation, nucleate and film boiling, two-phase flow. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 4300

MAE 8320: Continuum Mechanics
(same as CV_ENG 8320). Introductory course in the mechanics of continuous media. Basic concepts of stress, strain, constitutive relationships; conservation laws are treated using Cartesian tensor notation. Examples from both solid and fluid mechanics investigated.
Credit Hours: 3
Prerequisites: MAE 3400, MATH 4100, ENGINR 2200

MAE 8330: Theory of Elasticity
Credit Hours: 3
Prerequisites: MAE 4300, or instructor's consent
Recommended: MAE 8330

MAE 8332: Thermal Stresses
General equations of thermoelasticity, Constitutive equations of thermoelastoplasticity; Analytical and numerical analyses of thermal stresses in bars, beams, 3D media, 2D plane stress and strain media, cylinders, and spheres. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: MAE 4300, or instructor's consent

MAE 8360: Theory of Plasticity
Credit Hours: 3
Prerequisites: MAE 8330 or instructor's consent

MAE 8380: Advanced Thermodynamics
Advanced topics from classical thermodynamics.
Credit Hours: 3
Prerequisites: MAE 4380

MAE 8420: Computational Heat Transfer and Fluid Dynamics
Introduction to numeric analysis techniques applied to heat transfer and fluid dynamics problems. Coverage will include, the development of discretization equations for the control volume approach and solution strategies of those equations. Results from numeric simulations will be compared with close form analytic solutions and commercial numeric code output.
Credit Hours: 3
MAE 8430: Introduction to Two Phase Flow
An introduction to the analysis of the mechanics and transport processes in two phase flows.

Credit Hours: 3
Prerequisites: MAE 3400

MAE 8450: Introduction to Turbulence
An introduction to the physical phenomena of turbulence, supported by mathematical and statistical descriptions. Especially appropriate for engineers involved in research of momentum, heat, and mass transport.

Credit Hours: 3
Prerequisites: MAE 4420

MAE 8510: Manufacturing Design
Design for manufacture methods, their capabilities and applications. Design of intelligent manufacturing systems using sensory systems and artificial intelligence techniques.

Credit Hours: 3
Prerequisites: MAE 3100 and MAE 4500

MAE 8620: Advanced Dynamics
(same as CV_ENG 8620). Fundamental principles of advanced rigid body dynamics with applications. Special mathematical techniques including Lagrangian and Hamiltonian methods.

Credit Hours: 3
Prerequisites: MAE 2600

MAE 8740: Robust Control
Definition of the robust performance problem with the goal of achieving specified signal levels in the face of plant uncertainty; uncertainty and robustness, stabilization, design constraints, loopshaping, model matching and design for robust performance.

Credit Hours: 3
Prerequisites: MAE 4750, and MAE 8780 or instructor's consent

MAE 8750: Nonlinear Control
Nonlinear systems analysis techniques including phase plane analysis, Lyapunov theory. Control design including feedback linearization, sliding control, and adaptive control.

Credit Hours: 3
Prerequisites: MAE 4750 and MAE 8780

MAE 8760: Optimal Control
The course will study optimization under dynamic constraints and optimal control theory. Topics include calculus of variation, Pontryagin's minimum principle, dynamic programming, and linear quadratic optimal control. Graded on A-F basis only.

Credit Hours: 3

MAE 8910: Modular Machine Tool Design
This course introduces necessary concepts and tools for modular machine tool design. Students will learn how to apply mechanical design knowledge and commercially available subassemblies and parts to design modular machine tools for mass production application.

MPP 1111: How to Inquire and Investigate
In this course we will be interviewing faculty members from different departments to learn about their area of research and they will also be interviewing me about my area of research. How does one learn about a new subject with all its technical language (jargon)? What are common themes and approaches in different disciplines? What are conceptual and viewpoint differences in different disciplines?

Credit Hour: 1

MPP 2010: The Science of Sex, Drugs and Rock’n’Roll
This course will examine the data and theories for how drugs affect the body, for the physiology of reproduction and, for how sound affects the body. These topics will be used to motivate an understanding, and provide training in applying, the key scientific principles. Graded on A-F basis only.

Credit Hour: 1

In this course, the students will explore toxins. We will discuss how toxins are formed, the "value" of the toxin to the organism that makes it, how the toxin is delivered, the effect of the toxin on the target animal and on humans. In addition, we will discuss how toxins have led to new therapies and drugs. We will also analyze some famous cases of apparent toxin poisoning. In all cases, the students will be urged to critically evaluate the data and the theories and encouraged to think of novel uses of toxins and of experiments that would provide important new information about the toxins and their effects.
In this course, the students will explore toxins. We will discuss how toxins are formed, the "value" of the toxin to the organism that makes it, how the toxin is delivered, the effect of the toxin on the target animal and on humans. In addition, we will discuss how toxins have led to new therapies and drugs. We will also analyze some famous cases of apparent toxin poisoning. In all cases, the students will be urged to critically evaluate the data and the theories and encouraged to think of novel uses of toxins and of experiments that would provide important new information about the toxins and their effects.

**Credit Hours: 3**

**MPP 2020: Bodily Fluids and Functions**
In this course, the students will study body fluids. We will learn about how the fluids are formed and the functions of the fluids. We will also critically evaluate some theories about the formation and function of the fluids.

**Credit Hours: 3**

**MPP 2020W: Bodily Fluids and Functions - Writing Intensive**
In this course, the students will study body fluids. We will learn about how the fluids are formed and the functions of the fluids. We will also critically evaluate some theories about the formation and function of the fluids.

**Credit Hours: 3**

**MPP 2222: Let's Do Experiments for Research**
This course is designed to provide students a hands on opportunity to do experiments in the first part of the semester, students will be working primarily on two projects that they chose from a list developed by the previous class; the second half of the semester will be not only working on those projects, but developing the choice of projects for students to start for the next time the course is offered. The projects can be basic science, translational science, or developing education activities/ experiments or a combination of these. Some of the choices will involve safe materials and will require no additional training. Other choices may involve human subjects, animal tissues, or hazardous chemicals in which the students will need to obtain the appropriate training and that can be done to fulfill part of this course's requirements.

**Credit Hours: 3**

**MPP 3202: Elements of Physiology**
Beginning course for sophomore and above designed to cover the basic functional aspects of major organ systems of the body.

**Credit Hours: 5**

**Prerequisites:** sophomore standing

**MPP 3290: Undergraduate Research**
Laboratory experience and opportunity to explore research in medical pharmacology and physiology.

**Credit Hour: 1-3**

**MPP 3333: Fundamentals of Human Physiology**
This course presents the basic concepts of physiology using a problem based approach. The major organs systems are discussed with the relevance to everyday physiology as well as clinical and animal applications discussed.

**Credit Hours: 3**

**MPP 3333H: Fundamentals of Human Physiology - Honors**
This course presents the basic concepts of physiology using a problem based approach. The major organs systems are discussed with the relevance to everyday physiology as well as clinical and animal applications discussed.

**Credit Hours: 3**

**MPP 3337: Human Physiology Laboratory**
This lab course will involve experiments to illustrate basic physiology concepts.

**Credit Hours: 2**

**MPP 3500: Introduction to Human Physiology**
This is an online course that will introduce students to basic concepts in human physiology, with a focus on the integrated function of organ system in homeostasis/human health. The final section of the course will expose students to important issues in exercise physiology, specifically the impact of exercise on cardiovascular and metabolic functions.

**Credit Hours: 3**

**Recommended:** Cell Biology, Biochemistry

**MPP 4085: Undergraduate Problems in Medical Pharmacology and Physiology**
This course is designed to provide well-qualified undergraduate students the opportunity to engage in advanced study in topics in pharmacology or physiology with individual faculty members. Topics will be drawn from recent primary literature. Graded on A-F basis only.

**Credit Hour: 1-3**

**Prerequisites:** instructor's consent

**MPP 4085W: Undergraduate Problems in Medical Pharmacology and Physiology - Writing Intensive**
This course is designed to provide well-qualified undergraduate students the opportunity to engage in advanced study in topics in pharmacology or physiology with individual faculty members. Topics will be drawn from recent primary literature. Graded on A-F basis only.

**Credit Hour: 1-3**

**Prerequisites:** instructor's consent

**MPP 4202: Medical Physiology**
Medical Physiology is intended for health scientists. Fat, bone, digestion, nutrition, appetite and brain health will be emphasized for health reform and updates for nervous, muscle, heart, vasculature, liver, renal, lung and endocrine systems with analysis for preventative medicine. May be repeated for credit. Graded on A-F basis only.

**Credit Hours: 4**

**Prerequisites:** Nutrition or Biochemistry
MPP 4204: Medical Pharmacology
(cross-leveled with MPP 7424). Medical pharmacology teaches the science of drug actions in medicine today, and principles of pharmacokinetics/dynamics. Future health professionals will learn prescription judgment and quality/cost improvements for patient safety. An online laboratory will teach drug database information technology.

Credit Hours: 5
Prerequisites or Corequisites: BIO_SC 3700 or MPP 3202 or MPP 4202 or equivalent physiology course from other colleges
Recommended: nutrition or biochemistry courses are recommended but not required

MPP 4204H: Medical Pharmacology-Honors
Medical pharmacology teaches the science of drug actions in medicine today, and principles of pharmacokinetics/dynamics. Future health professionals will learn prescription judgment and quality/cost improvements for patient safety. An online laboratory will teach drug database information technology. Prerequisites or

Credit Hours: 5
Corequisites: BIO_SC 3700 or MPP 3202 or MPP 4202 or equivalent physiology course from other colleges; Honors eligibility required
Recommended: nutrition or biochemistry courses are recommended but not required

MPP 4417: Diagrams, Figures and Graphs
(cross-leveled with MPP 7717). In this course, we will examine what features optimize the drawing of diagrams, figures and graphs for communication to different audiences. Graded on A-F basis only.

Credit Hour: 1

MPP 7302: Drug Discovery and Action
This course is designed to provide the student with an in depth knowledge of specific aspects of cardiovascular physiology with major emphasis on cardiac structure and function. Topics are covered in 1, 3-4 hour session per week and are based on reading assignments from the literature. The following topics have been addressed in previous offerings but the specific topics may vary from year to year: Heart muscle structure related to function; Contractile proteins structures and function; Regulation of protein synthesis; Regulation of myocardial hypertrophy; Regulation of myocardial metabolism; Myocardial mechanics systolic and diastolic function; Mechanisms of length dependent contraction; Control of electrical-mechanical coupling processes; Mechanisms for adrenergic regulation of myocardial function.

Credit Hour: 1

MPP 7422: Medical Physiology
Medical Physiology is intended for health scientist. Fat, bone, digestion, nutrition, appetite and brain health will be emphasized for health reform and updates for nervous, muscle, heart, vasculature, liver, renal, lung and endocrine systems with analysis for preventive medicine. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Nutrition or Biochemistry

MPP 7424: Pharmacology and Translational Medicine
(cross-leveled with MPP 4204). Pharmacology teaches the science of drug actions in medicine today and principles of pharmacokinetics/dynamics. Future medical researchers will learn molecular probes for medical research and translational science to improve health care. An online laboratory will teach drug database information technology. Graded on A-F basis only.

Credit Hours: 5
Prerequisites or Corequisites: BIO_SC 3700 or MPP 3202 or MPP 4202 or equivalent physiology course from other colleges
Recommended: nutrition or biochemistry courses are recommended but not required

MPP 7717: Diagrams, Figures, and Graphs
(cross-leveled with MPP 4417). In this course, we will examine what features optimize the drawing of diagrams, figures and graphs for communication to different audiences. Graded on A-F basis only.

Credit Hour: 1

MPP 8000: Scientific Discovery Leading to Life Science Innovations
(same as BIOL_EN 8000). This course explains the scientific discovery process from idea to product release, examining problem identification, need validation, and commercialization. Clinical, business and engineering perspectives are examined to understand translating innovation into clinical practice. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: must be enrolled in a graduate degree program

MPP 8050: Non-Thesis Research in Medical Pharmacology and Physiology
Opportunities for graduate research in physiology or pharmacology not leading to dissertation. Graded on A-F basis only.

Credit Hour: 1-5
Prerequisites: instructor's consent

MPP 8085: Graduate Problems in Medical Pharmacology and Physiology
Guided study to strengthen knowledge in physiology and pharmacology. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: instructor's consent

MPP 8090: Thesis Research in Medical Pharmacology and Physiology
Research for Master's Students in physiology or pharmacology, leading to dissertation. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

MPP 8100: Design and Development of Biomedical Innovations
(same as BIOL_EN 8100, ENGINR 8100). The overarching goal of this course is to help participants understand the design and development (drug or device) process in biomedical innovation. This course will help participants to understand the process of choosing unmet clinical
MPP 8411: Mammalian Pharmacology and Physiology
An integrated course covering the basic concepts in physiology and pharmacology of the cardiovascular, gastrointestinal, endocrine, renal, and respiratory systems with an emphasis of applying the key concepts to clinically relevant examples. Graded on A-F basis only.
Credit Hours: 5
Prerequisites: instructor's consent

MPP 8412: Seminar in Medical Pharmacology and Physiology
Instruction in critical evaluation, review, and summary of scientific data and practice in oral presentation of scientific research seminar. Taught in conjunction with weekly department seminar series.
Credit Hour: 1

MPP 8415: Responsible Conduct of Research thru Engagement, Enactment and Empowerment NIH and other Federal Age
The emphasis is on the scientific research ethics problems in interdisciplinary work. Student involvement can include designing mock misconduct trials or writing advocacy letters to change current policy.
Credit Hours: 2
Prerequisites: instructor's consent

MPP 8417: Scientific Communication
A course to foster and improve students ability to communicate orally and in writing. Student enrolled in the course will be expected to write a report and present a seminar on a topic related to one of the lab rotation projects to the mentor of the rotation and other interested faculty members and students. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: instructor's consent

MPP 8420: Skills in Biomedical Research
This course focuses on introducing graduate students to the basics of biomedical research. Course objectives are to provide new graduate students with a basic understanding of laboratory safety issues and fundamental skills that are integral to research including principles of experimental design, theory and practical application of modern research techniques, written and oral communication of research information, and scientific record keeping standards. Graded on S/U basis only.

MPP 8421: Mammalian Pharmacology and Physiology
An integrated course covering the basic concepts in physiology and pharmacology of the cardiovascular, gastrointestinal, endocrine, renal, and respiratory systems with an emphasis of applying the key concepts to clinically relevant examples. Graded on A-F basis only.
Credit Hours: 3

MPP 8500: Translational Biosciences I
This course covers foundational principles in molecular and cellular biology that are required for understanding a wide range of biomedical science disciplines, including cancer biology, microbiology, virology and physiology. This is a lecture-based course that also feature a discussion session each week in which students will read/discuss current primary scientific literature to emphasize the translational implications of these pathways. Graded on A-F basis only.
Credit Hours: 5

MPP 8550: Skills in Translational Biosciences I
Skills in Translational Biosciences I will provide students an overview of current techniques in biomedical sciences, including bioethics. Students will also be exposed to state of the art techniques ranging from subcellular to whole animal studies, as well as medical bioinformatics, health outcomes and epidemiology. The course will have a significant emphasis on reading primary literature in a journal club format.
Credit Hours: 4
Recommended: This course is to be taken concurrent with MPP 8500

MPP 8500: Translational Biosciences I
This course covers foundational principles in molecular and cellular biology that are required for understanding a wide range of biomedical science disciplines, including cancer biology, microbiology, virology and physiology. This course is for advanced level graduate students. The course is designed to develop state of the art knowledge and understanding of current research issues in the cell signaling. The major emphasis is on receptor and non-receptor mediated transmembrane signaling events underlying physiological and pharmacological responses of the cells. Students are also involved in class presentations, and the development and critical review of new research proposals, all focused on cellular signaling.
Credit Hours: 4
Prerequisites: basic courses in biochemistry and or cell and molecular biology or equivalent

MPP 9090: Thesis Research in Medical Pharmacology and Physiology
Research for PhD students in physiology or pharmacology, leading to dissertation. Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

MPP 9422: Medical Pharmacology and Physiology Journal Club
On a weekly basis, individual students are assigned current high profile journal articles to present to their fellow students and faculty in a journal club setting. Each student in the course is required to read the paper in advance and participate in discussions of the figures and general topics that is being presented. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: enrolled in MPP PhD graduate program

MPP 9426: Transmembrane Signaling
This course is for advanced level graduate students. The course is designed to develop state of the art knowledge and understanding of current research issues in the cell signaling. The major emphasis is on receptor and non-receptor mediated transmembrane signaling events underlying physiological and pharmacological responses of the cells. Students are also involved in class presentations, and the development and critical review of new research proposals, all focused on cellular signaling.
Credit Hours: 4
Prerequisites: basic courses in biochemistry and or cell and molecular biology or equivalent

MPP 9429: Principles and Frontiers of Molecular Pharmacology
An in-depth examination of pharmacodynamics, structure-activity relationships, pharmacokinetics/drug metabolism, and toxicology, followed by a consideration of emerging concepts regarding membrane receptors and channels and their role in biology and medicine.
Credit Hours: 5
Prerequisites: Students must have completed a physiology, biochemistry or cell biology course

MPP 9430: Cardiovascular Physiology
This course is designed to provide the student with an in depth knowledge of specific aspects of cardiovascular physiology with major emphasis on cardiac structure and function. Topics are covered in 1, 3-4 hour session per week and are based on reading assignments from the literature. The following topics have been addressed in previous offerings but the specific topics may vary from year to year: Heart muscle structure related to function; Contractile proteins structures and function; Regulation of protein synthesis; Regulation of myocardial metabolism; Myocardial mechanics systolic and diastolic function; Mechanisms of length dependent contraction; Control of electrical-mechanical coupling processes; Mechanisms for adrenergic regulation of myocardial function.

Credit Hours: 3
Prerequisites: MPP 4310 and MPP 8411 or the equivalent (e.g., UM first year medical school curriculum, V_BSCI 8421, or BIO_SC 3700 with supporting courses)

MPP 9431: Control of Energy Metabolism
(same as V_BSCI 9431). This advanced elective is in a lecture/discussion format using primary literature to explore how cells organize and regulate metabolism to meet energy demands.

Credit Hours: 3
Prerequisites: instructor's consent

MPP 9432: Mammalian Membrane Physiology
This course is designed to stimulate active learning of the concepts of modern membrane physiology. Throughout the course, a balance will be maintained between examining classic papers in the field and current literature, including not only theories that have held up over time, but areas in which there is current dispute as the best model that describes the observations.

Credit Hour: 1-3

MPP 9434: Microvascular Circulatory Function
(same as V_BSCI 9425). An in-depth study of microcirculatory structure and function in various tissues with emphasis on recent developments in the understanding of the mechanisms involved in nutrient supply, edema formation, lymphatic function and fluid balance.

Credit Hours: 4
Prerequisites: V_BSCI 8420 and V_BSCI 8421 or equivalent and instructor's consent

MPP 9435: Molecular Exercise Biology
(same as V_BSCI 9435). Skeletal muscle mechanics, contractions theories, transgenic models, development, gene expression regulation, adaptation to exercise, aging, metabolic functions, and inactivity induced chronic diseases.

Credit Hour: 1-3
Prerequisites: course director's consent required for enrollment

MPP 9437: Neural Cardiorespiratory Control
(same as V_BSCI 9467). Course objectives include developing a general understanding of CNS mechanisms in the regulation of the cardiovascular and respiratory system, including autonomic, neurohumoral and body fluid homeostatic mechanisms, gaining knowledge of the major advances and topics in the field and becoming familiar with some of the methods used to study CNS cardiorespiratory regulation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

Medicine-Interdisciplinary (MED_ID)

MED_ID 5041: Structure and Function of the Human Body I
Biochemical principles, cell biology, human development, histology and gross anatomy with clinical correlates utilizing patient examples and non-invasive techniques.

Credit Hours: 6

MED_ID 5042: Interviewing
Development of skills needed to obtain a history of the patient's present illness, past medical history and other pertinent background information. Vitally important to medical practice, these skills are role modeled, practiced and evaluated with detailed feedback. Additional emphasis is placed on the doctor-patient relationship, ethics and the role of the physician as a therapeutic agent.

Credit Hours: 3

MED_ID 5043: Structure and Function of the Human Body II
Study of the structure and function of the body's metabolic, nervous and muscular systems.

Credit Hours: 6

MED_ID 5044: Physical Examination
Introduction to the doctor-patient relationship and systematic physical examination of the patient. Certification in basic life support is also included.

Credit Hours: 3

MED_ID 5045: Structure and Function of the Human Body III
Study of the structure and function of the body's cardiovascular, gastrointestinal, and urinary systems.

Credit Hours: 6

MED_ID 5046: Psychosocial Aspects of Medicine
A brief study of the history of medicine and the impact of key events on current medical practice. Study of the biophyschosocial model, biomedical ethics and specific psychosocial problems encountered by physicians such as compliance, problems based on human sexuality, substance abuse and death and dying.

</table>
MED_ID 5554: Psychopathology and Behavioral Medicine
Presentation and discussion of the U.S. health care system and health care reform, financing and resource allocation, and the impact of change on individuals, communities, employers and the government. Included are analyses of the ethical and legal implications of health care and health care reform.
Credit Hours: 3

MED_ID 5555: Pathophysiology III
Pathophysiologic mechanisms of the digestive, endocrine and urogenital systems.
Credit Hours: 6

MED_ID 5556: Clinical Practicum
A continuation of Block 6 objectives and a clinical practicum and review comprise this block.
Credit Hours: 3

MED_ID 5557: Pathophysiology IV
Pathophysiology of infectious diseases, reproductive disorders, musculoskeletal and soft tissue diseases, diseases affecting the nervous system and skin diseases.
Credit Hours: 6

MED_ID 5558: Physician as a Person
Exploration of the physician as a person, the balance between professional and personal demands, family life, membership in a community, the stresses and rewards of the medical profession, professional ethics and the doctor-patient relationship. A four week clinical review completes this block.
Credit Hours: 3

MED_ID 5561: Advanced Physical Diagnosis I
Advanced Physical Diagnosis I
Credit Hour: 1

MED_ID 5570: Advanced Clinical Skill Practicum
This course is designed for MD/PhD students and other medical students away on research or post-sophomore fellowship leave. Approval to enroll must be obtained from the Director of the MD/PhD program or the Faculty Director of Clinical curriculum. Graded on S/U basis only.
Credit Hours: 0
Prerequisites: Advanced Physical Diagnosis; must have satisfactorily completed the second year of medical school

MED_ID 5850: Contemplating Medicine, Patients, Self and Society
The purpose of the longitudinal COMPASS course is to foster the development of patient-centered physicians in relation to patients, self and society. This is accomplished through an innovative longitudinal small group experience using a variety of learning methods including group discussion, reflective writing, storytelling, reading and case problem solving. The small group membership includes students from each of the 4 medical school classes and 2 faculty Guides. Curricular themes and small group session titles for the 4 year course recur on a two year cycle. The content and focus of each session is unique. Students in the first, second and third years of medical school will receive a final course grade (satisfactory or unsatisfactory) at the end of their M4 year. The final course grade will reflect the student's performance in the small group sessions and performance on the capstone assignment.
Credit Hour: 1-5

MED_ID 5950: Remediation of MED_ID 5850
Medical Students who receive an unsatisfactory grade in MED_ID 5850 Contemplating Medicine, Patients, Self and Society will enroll for this course in order to remediate their grade.
Credit Hour: 1-5

MED_ID 6030: SCC Advanced Biomedical Sciences Elective
Students will work under the supervision of an MU faculty member at MU's Springfield Clinical Campus in a pre-approved learning experience. Activities that fulfill this requirement may include, but are not limited to: Anatomy dissection at Missouri State University (MSU), research project at a Springfield based clinical location or lab (Cox, Mercy, MSU), PBL case writing, and cross cultural medicine (global health study abroad). ABS elective content and requirements will be similar to those offered at MU's Columbia Clinical Campus.
Credit Hours: 5
MED_ID 6032: SCC General Elective
Students will work under the supervision of a faculty preceptor at the Springfield Clinical Campus. Students will see patients in the outpatient clinic and/or inpatient hospital setting, perform a history and exam, and develop a patient-centered assessment and plan. They will then discuss their findings, assessment and plan with the faculty preceptor and go see the patient together. The student will complete oral patient presentations and document patient encounters in the medical record as directed by the faculty preceptor. Students will enhance their knowledge, skills, and attitudes about patient-centered care through active participation in direct patient care activities while under the supervision of a faculty preceptor. Students will integrate previously acquired knowledge and concepts and apply them to the care and management of patients.

Credit Hours: 5

MED_ID 6040: SCC Advanced Clinical Surgical Selective
Students will enhance their knowledge, skills, and attitudes about patient-centered care through active participation in direct patient care activities while under the supervision of a faculty preceptor. Students will integrate previously acquired knowledge and concepts and apply them to the care and management of patients.

Credit Hours: 5

Recommended: Successful completion of 5 of 7 core clerkships, including the Surgery clerkship. Additional department specific pre-requisites may apply

MED_ID 6244: ABS Quality Improvement and Patient Safety Elective
The 4th year student will work with leaders in the Office of Clinical Effectiveness to identify an improvement project to be conducted during the elective. Students will have self-paced readings/didactic expectations, and be expected to review and report on medical literature relevant to the care process(ies) targeted for improvement. To complete their project, the student will present the improvement work to patient safety and quality improvement leaders, as well as stakeholders in the care process(ies) identified for improvement efforts.

Credit Hours: 5

MED_ID 6390: ABS Individualized Study in Medicine-M1
Goals/Objectives: Participate in PBL as a tutor under the guidance of an experienced faculty tutor. Review the literature appropriate to each case. Update one PBL case that is used in the course of the block OR update a problem solving exam OR write a new problem solving exam. Students must submit the case or exam electronically to the course coordinator. Evaluation: Student's performance as tutor will be evaluated by the supervising faculty member and the tutor group members. Notes: During a four-week block, the fourth year student will tutor the M-1 PBL group (Monday, Wednesday, & Friday mornings) under the supervision of a senior faculty member. Contact course coordinator for case update details. Submission date for update is set two weeks after the tutoring session ends. The student will attend all tutor preparation meetings and prepare for PBL through reading, self-directed study and discussions with faculty. Complete student mid-block and end-of-block evaluation as directed.

Credit Hours: 5

Prerequisites: M4s registering for PBL tutoring must be in good standing and not on probation. M4s must not have come before the CSP for an automatic vote for dismissal

Elective Individual Study in Medicine - M2
Credit Hours: 5

Prerequisites: M4s registering for PBL tutoring must be in good standing and not on probation. M4s must not have come before the CSP for an automatic vote for dismissal

MED_ID 6692: Case/Exam Writing Elective
The fourth year medical student will work as part of a team in order to develop learning materials for the first and second year students. Students will work closely with faculty advisors and clinical mentors to
develop educationally sound learning materials. Under the guidance of faculty preceptors, medical students will author one original PBL case including a comprehensive tutor guide and multiple choice examination questions covering the case objectives. AND one original Clinical Reasoning Exam including an annotated key.

**MED_ID 6693: Simulation Preparation for Internship**
This course is meant to increase the medical students' knowledge and skillsbase in preparation for the first year of internship. In order to accomplish this, the students will be exposed to a variety situations common to first year residents through activities created with simulation. Throughout the course, students will demonstrate how to provide effective and efficient patient-centered care, while improving their communication skills and professionalism with patients and other healthcare providers. Students will understand the role of simulation in medical education and develop skills in debriefing of scenarios throughout the course. At the end of the course, students will be expected to complete a simulation capstone project. Prerequisites: Class level: 4th year medical student. Approval by Simulation Director and Completion of all Core Clerkship Requirements.

**Credit Hours:** 5

**MED_ID 6694: Nutrition Elective**
The Nutrition 4-week elective is largely a customizable elective that can be designed to match a student's interest(s) with a wide range of mentored nutrition experiences. The experience will include some fixed elements such as participation in a weekly seminar series and/or weekly journal clubs in which the student will be expected to present research papers. Focused experiences can be designed in areas including, but not limited, to Medical Nutrition Therapy, General Dietetics, Inpatient TPN/ICU and enteral feeds, Research Nutrition Studies, and Bariatric Surgery Nutrition. A wide variety of clinical environments will be available (pediatric obesity/endocrinology, failure to thrive, gastroenterology, cancer, etc.). Students will learn using a variety of experiences, evidence-based materials, patient simulations, and case studies. Students will produce a final written product of a revised or new PBL case or a paper on a specific nutrition prescription for a given diagnosis.

**Credit Hours:** 5

**MED_ID 6925: Springfield Clinical Campus Elective**
Students will work under the supervision of a faculty preceptor at the Springfield Clinical Campus. Students will see patients in the outpatient clinic and/or inpatient hospital setting, perform a history and exam, and develop a patient-centered assessment and plan. They will then discuss their findings, assessment and plan with the faculty preceptor and go see the patient together. The student will complete oral patient presentations and document patient encounters in the medical record as directed by the faculty preceptor.

**Credit Hours:** 2

**Medieval Renaissance Studies (MDVL_REN)**

**MDVL_REN 2004: Topics in Medieval and Renaissance Studies-Social Science**
Organized study of selected medieval and Renaissance topics. Subjects and earnable credit may vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

**MDVL_REN 2005: Topics in Medieval and Renaissance Studies-Humanities**
Organized study of selected medieval and Renaissance topics. Subjects and earnable credit may vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

**MDVL_REN 3004: Topics in Medieval and Renaissance Studies-Social Science**
Organized study of selected medieval and Renaissance topics. Subjects and earnable credit may vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

**MDVL_REN 3005: Topics in Medieval and Renaissance Studies-Humanities**
Organized study of selected medieval and Renaissance topics. Subjects and earnable credit may vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hour:** 1-3

**MDVL_REN 4014: Studies in Medieval and Renaissance Cultures-Social Science**
(cross-leveled with MDVL_REN 7104). In-depth study of selected topics in medieval and Renaissance cultures. Subjects vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hours:** 3

**MDVL_REN 4015: Studies in Medieval and Renaissance Cultures-Humanities**
(cross-leveled with MDVL_REN 7105). In-depth study of selected topics in medieval and Renaissance cultures. Subjects vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.

**Credit Hours:** 3
MDVL_REN 4411: Studies in Medieval and Renaissance Languages
(cross-leveled with MDVL_REN 7411). Study of a medieval or early modern language.
Credit Hours: 3
Prerequisites: Instructors consent

MDVL_REN 4535: Monastic Worlds
(same as REL_ST 4535; cross-leveled with MDVL_REN 7535, REL_ST 7535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. Following two weeks of online course modules, students will travel to the Benedictine communities of Conception Abbey in Conception, Missouri and Mount Saint Scholastica's in Atchison, Kansas, for additional face-to-face classes and research projects. On-site, students will participate in communal living and attend face-to-face classes on the historical and cultural worlds of medieval and early modern Europe. They will practice ethnography through observation and participation in communal life of prayer, study, book production, and labor. Students will also have the opportunity to work with the manuscripts and rare books owned by these communities and visit the largest reliquary collection in North America, housed at the nearby Benedictine community of the Sisters of Perpetual Adoration in Clyde, MO. This course has an associated fee. Contact teaching faculty for this year's fee details. Graded on A/F basis only.
Credit Hours: 3

MDVL_REN 7104: Studies in Medieval and Renaissance Cultures-Social Science
(cross-leveled with MDVL_REN 4104). In-depth study of selected topics in medieval and Renaissance cultures. Subjects vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.
Credit Hours: 3

MDVL_REN 7105: Studies in Medieval and Renaissance Cultures-Humanities
(cross-leveled with MDVL_REN 4105). In-depth study of selected topics in medieval and Renaissance cultures. Subjects vary from semester to semester. Topics announced at time of enrollment. May be repeated for credit with departmental consent.
Credit Hours: 3

MDVL_REN 7411: Studies in Medieval and Renaissance Languages
(cross-leveled with MDVL_REN 4411). Study of a medieval or early modern language.
Credit Hours: 3
Prerequisites: Instructor's consent

MDVL_REN 7535: Monastic Worlds
(same as REL_ST 7535; cross-leveled with MDVL_REN 4535, REL_ST 4535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. This course has an associated fee. Contact teaching faculty for this year's fee details. Graded on A/F basis only.
Credit Hours: 3

MDVL_REN 8411: Studies in Medieval and Renaissance Languages
Study of a medieval or early modern language.
Credit Hours: 3
Prerequisites: Instructor's consent

Microbiology (MICROB)

MICROB 2800: Microbiology for Nursing and Health Professions
This course will provide basic principles for understanding microbial growth, function, and control. This includes a survey of microbial cellular structure/functions, immunology concepts, epidemiology, specimen handling, and causes of microbial disease (bacterial, viral, and parasitic). Material is presented in lecture and corresponding laboratory exercises that will allow students to explore the microbial world around them.
Credit Hours: 4
Prerequisites: The overall content is "restricted to Freshman and sophomore Nursing and Health Related Professional students only". Other inquiries contact department

MICROB 3200: Medical Microbiology and Immunology
Focus on medically important viruses, bacteria, fungi and parasites with emphasis on their disease causing potential and mechanisms. Introduction to cells and molecules of the immune system with emphasis on their role in fighting infectious diseases. Discussion of treatment and prevention strategies. Lecture material will be reinforced with laboratory demonstrations and hands-on exercises. The course is intended for preprofessional students.
Credit Hours: 4
MICROB 3800: Case-Based Microbiology: Assembling Systemic Health Connections
Detailed infectious diseases across organ systems. The biological characteristics and pathologic mechanisms of infectious diseases caused by bacteria, viruses, fungi and parasites are explored in a case-based learning. Student-driven learning objectives for each case (to include microbiology, anatomy, physiology, pharmacology, technology and clinical LO's each case) help groups connect scientific information across disciplines.
Credit Hours: 3
Prerequisites: Instructor's consent
Recommended: MICROB 2800 or MICROB 3200, MPP 3202, and PTH AS 2201

MICROB 4300: Bacterial Pathogenesis
(cross-leveled with MICROB 7404). This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic diseases. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 2
Prerequisites: MICROB 3200 or equivalent. Consent from Course Director is required to insure academic readiness

MICROB 4303: Fundamental Virology
Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.
Credit Hours: 2
Prerequisites: undergraduates require instructor's consent. This course will include evaluation of current literature and require paper presentations

MICROB 4304: Immunology
(cross-leveled with MICROB 4304). Covers innate immunity, antibodies, antigens, MHC, antigen presentation, lymphocyte development, antigen specific receptors, lymphocyte activation and differentiation, immune effector mechanisms, hypersensitivities, tolerance, autoimmunity, immunodeficiencies. Graded on A-F basis only.
Credit Hours: 3
Recommended: MICROB 3200 or BIOCHM 4270 or BIOCHM 4272 or instructor's consent

MICROB 7303: Fundamental Virology
Classification of viruses, life cycles, genome organization and expression, host-virus interactions, oncogenes and cellular transformation, viral pathogenesis, viral gene therapy approaches, strategies for anti viral therapy.
Credit Hours: 2
Prerequisites: Undergraduates require instructor's consent. This course will include evaluation of current literature and require paper presentations

MICROB 7304: Immunology
This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic disease. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 3

MICROB 7304: Foundations in Bacteriology and Pathogenesis
This team taught course covers the biology and virulence mechanisms of bacterial pathogens, with emphasis on those causing human and zoonotic disease. Topics covered include bacterial structure, genetics, physiology, and metabolism; antibiotic resistance; host-pathogen interactions; microbiomes and emerging pathogens.
Credit Hours: 3

MICROB 8050: Graduate Student Survival Skills
This course is an introduction to inform new graduate students about the Microbiology program and provide them with the knowledge to access resources and information needed for a successful transition into their course work and research. The course will also focus on guidelines in selecting mentors and their relationships, time management, good notebook practices, presentation and posters, comprehensive exams, and computer skills needed. Graded on A-F basis only.
Credit Hour: 1

MICROB 9001: Topics in Microbiology
Current topics, highly specialized topics taught infrequently, or courses taught by visiting professors.
Credit Hour: 1-99
Prerequisites: instructor's consent

MICROB 9085: Problems in Microbiology
Students assigned individual problems in microbiology for library or lab investigation. Graded on A-F basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

MICROB 9087: Seminar in Microbiology
Presentation and critical discussion of student and faculty research, current literature, and guest lectures on subjects in various areas of microbiology. Graded on A-F basis only.
Credit Hour: 1
Military Science (MIL_SC)

MIL_SC 1100: Foundations of Officiership
Introduces students to issues and competencies that are central to a commissioned officer's responsibilities. Establishes framework for understanding officiership, leadership, and Army values followed and "life skills" such as physical fitness and time management.
Credit Hour: 1

MIL_SC 1110: Introductory Military Science Laboratory I
Field application of skills taught in MIL_SC 1100, to include leadership, land navigation, tactical skills and basic soldier skills.
Credit Hour: 1
Recommended: MIL_SC 1100

MIL_SC 1120: Basic Leadership
Establishes foundation of basic leadership fundamentals such as problem solving, communication, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling.
Credit Hour: 1

MIL_SC 1130: Introductory Military Science Laboratory II
Field application of skills taught in MIL_SC 1120, to include leadership, land navigation, tactical skills and basic soldier skills.
Credit Hour: 1
Recommended: MIL_SC 1120

MIL_SC 1140: Introduction to Outdoor Adventure Skills
This course is an entry-level outdoor education program designed to introduce students to general skills in outdoor adventure-type activities, team-building, leadership and physical fitness. This program emphasizes the importance of the individual's role within a team, problem-solving through critical thinking, improving oral and written communication skills, physical and mental resilience and demonstrating a commitment to lifelong learning. This course introduces students to several general concepts within outdoor education. Students will gain an understanding and appreciation of life-development skills through a series of real-world training labs. Subject materials will range from individual empowerment abilities to life-saving techniques. Through the usage of the experiential learning model, students will be introduced to new topics each week and then will apply this knowledge in a practical application format. Graded on A-F basis only.
Credit Hours: 2

MIL_SC 2200: Individual Leadership Studies
Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings.
Credit Hours: 2
MIL_SC 2210: Intermediate Military Science Laboratory I
Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as squad-level offensive and defensive operations. Practical application of night land navigation.
Credit Hour: 2
Recommended: MIL_SC 2220

MIL_SC 2220: Leadership and Teamwork
Study examines how to build successful teams, various methods for influencing action, effective communication in selling and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback.
Credit Hours: 2

MIL_SC 2230: Intermediate Military Science Laboratory II
Progressively more challenging leadership scenarios presented in a field and classroom environment. Students practice basic military skills such as platoon-level offensive and defensive operations. Practical application of night land navigation.
Credit Hour: 1
Recommended: MIL_SC 2220

MIL_SC 3160: Death by a Thousand Cuts: Counterinsurgency/Insurgency the American Experience
This course explores the problem of insurgency and counterinsurgency in terms of what we can learn from these conflicts. It examines counterinsurgency theory and practice, the Philippine Insurrection, Banana Wars, Vietnam War, Afghanistan, and Iraq.
Credit Hours: 3

MIL_SC 3161: The American Experience in Vietnam
This course was developed to provide students the opportunity to examine the American experience in the Vietnam War, to search for meanings in this experience, and to arrive at their own conclusions concerning the impact of the war upon the nation. Moreover, it challenges the students to think critically about war and the use of military power to settle differences between nations. May be repeated for credit.
Credit Hours: 3

MIL_SC 3162: Counterinsurgency in Asia
This course explores the problem of insurgency and counterinsurgency in Asia in terms of what we can learn from these conflicts. The course examines the insurgency in the Philippine Insurrection 1899-1902, the Vietnam War, the Soviet-Afghan War, in Thailand, Sri Lanka and Malayan Emergency. May be repeated for credit.
Credit Hours: 3

MIL_SC 3163: U.S. Military History in the Western Tradition
Analysis of United States military history from the Colonial period to the present, (1609-2012). It is a comprehensive look into the evolution of warfare in America, military traditions and heritage, and technology. This course analyzes the following: American Revolution, War of 1812, Mexican American War, Civil War, Indian Wars, Spanish American War, World War I, Inter War Period, World War II, Korean War, Vietnam War, Gulf War, Afghanistan and Iraq. All cadets are required to take this course for commissioning. May be repeated for credit.
Credit Hours: 3

MIL_SC 3164: Nation Building through a Barrel of a Gun
(same as POL_SC 3164). This course was developed to provide students the opportunity to examine the dilemmas of military intervention, nation-building/peacekeeping operations and exit strategies. This course is designed to challenge students to think critically and arrive at their own conclusions about the use of military power to settle differences between nations, and use of military forces to conduct nation building.
Credit Hours: 3

MIL_SC 3165: “Chasing Ghost”, The History of Irregular Warfare
(same as POL_SC 3165). This course explores the history of Irregular Warfare from the guerrilla perspective. The course examines the works of Mao Tse-Tung, Che Guevara, T.E. Lawrence and several other Guerrilla Leaders. You will analyze the evolution of Irregular Warfare through history and understand the complexities associated with the difficulties of countering and defeating Irregular Warfare. Graded on A-F basis only.
Credit Hours: 3

MIL_SC 3230: Leadership and Problem Solving
Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. Student must be a contracted cadet to enroll in this course.
Credit Hours: 3
Recommended: MIL_SC 1100 and MIL_SC 2200

MIL_SC 3240: Leadership and Ethics
Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, considerations of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication ability.
Credit Hours: 3
Recommended: MIL_SC 3230

MIL_SC 3250W: Leadership and Management
Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques.
Credit Hours: 3
Recommended: MIL_SC 3240

MIL_SC 3260: Officership
Study includes case study analysis of military law and practical exercises on establishing an ethical command climate, service as an officer; capstone exercise. Leadership lab Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills.
Credit Hours: 3
Recommended: MIL_SC 3250W
MIL_SC 3270: Advanced Transition to Lieutenant I
Independent research, analysis and monthly discussion on related military topics. Personal, academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3
Prerequisites: MIL_SC 3250W, MIL_SC 3260
Recommended: department head permission

MIL_SC 3280: Advanced Transition to Lieutenant II
Independent research, analysis and monthly discussion on related military topics. Personal academic and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Credit Hours: 3
Prerequisites: MIL_SC 3250W, MIL_SC 3260
Recommended: department head permission

MU Informatics Institute (INFOINST)

INFOINST 7001: Topics in Informatics
This course provides the overview to the informatics foundations as well as introduces topics regarding the current informatics-driven areas of science. Graded on A-F basis only.

Credit Hours: 3

INFOINST 7002: Introduction to Informatics
This course provides an overview to informatics foundations in addition to introducing topics regarding the current informatics-driven areas of science. Topics to include: recent trends in informatics; database management and Big Data analytics; data visualization, bioinformatics, health informatics, geoinformatics, nursing informatics, social informatics, and legal informatics. Graded on A-F only.

Credit Hours: 3
Prerequisites: Instructor's consent

INFOINST 7010: Computational Methods in Bioinformatics
(same as CMP_SC 7010). Fundamental concepts and basic computational techniques for mainstream bioinformatics problems. Emphasis placed on computational aspect of bioinformatics including formulation of a biological problem, design of algorithms, confidence assessment of software development. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: CMP_SC 4050 and STAT 4710

INFOINST 7430: Introduction to Health Informatics
Introduction to the use of clinical information systems in healthcare. Topics include clinical data, standards, electronic medical records, computerized provider order entry, decision support, telemedicine, and consumer applications. Graded on A-F basis only

Credit Hours: 3
Prerequisites: departmental consent required

INFOINST 8001: Topics in Informatics
Organized study of selected topics. Subjects and earned credit may vary from semester to semester. Repeatable upon consent of department. Graded A-F basis only.

Credit Hours: 3

INFOINST 8005: Applications of Bioinformatics Tools in Biological Research
This service course is designed for bioinformatics non-major students from life sciences, biological sciences, plant sciences, animal sciences, biochemistry, medicine fields and others. This course will provide an introduction to the current state of the art topics in bioinformatics and the computational tools available to the research community for application to biological research questions. Students will learn how to effectively utilize the tools and software packages to analyze data and visualize the results. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor's consent
Recommended: Graduate students are expected to have basic knowledge in algorithms, databases, and molecular biology

INFOINST 8085: Problems in Informatics
Independent, directed study on a topic in the area of informatics. Some sections may be graded A-F or S/U.

Credit Hour: 1-6
Prerequisites: Instructor's consent required

INFOINST 8087: Seminar in Informatics
Students attend and/or present at informatics seminars approved by the institute. Graded on S/U basis only.

Credit Hour: 0.5-1
Prerequisites: instructor's consent required

INFOINST 8088: Lab Rotations in Informatics
This course is designed to train students in both computational/informatics and life science/hospital laboratories to foster critical research collaborations in biomedical informatics. Students are expected to write reports with their advisors and the mentor of the rotation. Graded on S/U basis only.

Credit Hour: 1-3

INFOINST 8090: Dissertation (pre-candidacy) Research in Informatics
Research leading to dissertation before comprehensive examination. Graded on S/U basis only.

Credit Hour: 1-99

INFOINST 8150: Integrative Methods in Bioinformatics
(same as CMP_SC 8150). With biology entering the Big Data era, scientists are overwhelmed with the amount and the diversity of the experimental, statistical, and omics data about the biological objects they study. As a result, the frontier bioinformatics and computational genomics methods have started to utilize a so-called integrative approach, where the computational and informatics methods are used to combine the
high-throughput and low-throughput data. The main objective of this course is to teach students how to utilize bioinformatics and programming techniques for such multi-omics data integration. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 8005 or instructor's permission

**INFOINST 8190: Computational Systems Biology**  
(same as CMP_SC 8390). This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010; INFOINST 8010

**INFOINST 8310: Computational Genomics**  
(same as CMP_SC 8130). This course introduces computational concepts and methods of genomics to students. The course covers genome structure, database, sequencing, assembly, annotation, gene and RNA finding, motif and repeats identification, single nucleotide polymorphism, and epigenomics. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

**INFOINST 8350: Integrative Methods in Bioinformatics**  
Course objective is to introduce the most popular experimental methods from the point of view of the information sources that can be used in. Students will learn to use data obtained directly from biological experiments and how to suggest new experiments to improve results. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

**INFOINST 8390: Computational Systems Biology**  
This course covers current theories and methods in the modeling and analysis of high-throughput experiments such as microarrays, proteomics, and metabolomics. Topics include the inference of causal relations from experimental data and reverse engineering of cellular systems. Graded A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 7010 or CMP_SC 7010

**INFOINST 8450: Precision Medicine Informatics**  
(same as PTH_AS 7450). This course will introduce students with the theoretical and practical aspects of precision medicine informatics. Topics include: complex diseases, computational genomics/proteomics, informatics of molecular interactions and biological pathways, somatic mutations, signal transduction and cancer, biomarker discovery, machine learning and data mining for PMI, networks methods for PMI, knowledge representation and reasoning for PMI. The course will consist of a set of didactic lectures, computational assignments, in-class demonstrations of PMI methods and discussions of recent publications.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 8005 with C or better or INFOINST 7010 with C or better or instructor's consent

**INFOINST 8810: Research Methods in Informatics**  
Research Methods in Health and Bioinformatics is a writing intensive course that provides students with an understanding of research proposal development, literature searching, research synthesis, research designs, evaluation methods, and ethics. Graded A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Second semester or later in PhD program or instructor's consent

**INFOINST 8870: Knowledge Representation in Biology and Medicine**  
The main topics presented in the course are: logic systems, knowledge representation methods, production systems and representation of statistical and uncertain knowledge. Graded A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** HMI 7430 and HMI 7440

**INFOINST 8880: Machine Learning Methods for Biomedical Informatics**  
(same as CMP_SC 8180) This course teaches statistical machine learning methods and their applications in biomedical informatics. The course covers theories of advanced statistical machine learning methods and teaches how to develop machine learning methods to solve biomedical problems. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** CMP_SC 7050 and INFOINST 7010 or CMP_SC 7010 or INFOINST 7005

**INFOINST 9090: Dissertation (post-candidacy) Research in Informatics**  
Research leading to Ph.D. dissertation after comprehensive examination. Graded on S/U basis only.

**Credit Hour:** 1-99

**Music-Applied Music (MUS_APMS)**

**MUS_APMS 1435: Studio Instruction for Majors**  
Acceptable as a secondary applied subject on B.S. in music education and B.M. degrees. Materials varies according to educational purpose. May be repeated for credit.

**Credit Hour:** 1  
**Prerequisites:** instructor's consent

**MUS_APMS 2455: Studio Instruction**  
Credit accepted toward all undergraduate music and music education degrees. May be repeated for credit.

**Credit Hour:** 1-5  
**Prerequisites:** instructor's consent
MUS_APMS 3455: Studio Instruction
Accepted as upperclass credit only in Music Education, music theory, history, or composition. May be repeated for credit.

Credit Hour: 1-3
Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455 or equivalent; audition by committee, and instructor's consent

MUS_APMS 3970: Junior Recital
Preparation and presentation of Junior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 4455: Studio Instruction
For B.M. degrees in performance. Study of pedagogy in studio class. May be repeated for credit.

Credit Hour: 1-5
Prerequisites: 8 hours and 4 semesters of MUS_APMS 2455; audition; instructor's consent

MUS_APMS 4970: Senior Recital
Preparation and presentation of Senior Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

MUS_APMS 7435: Studio Instruction
For music teachers needing instruction in secondary instruments or voice. Maybe repeated for credit.

Credit Hour: 1

MUS_APMS 7455: Studio Instruction
For graduate credit on M.A., M.Ed., and Ph.D. degrees. Study of pedagogy in studio class. May be repeated for credit.

Credit Hour: 1-5
Prerequisites: audition; instructor's consent

MUS_APMS 8455: Studio Instruction
Required for graduate credit as major applied study on M.M. degree. Acceptable for graduate credit on M.A., M.Ed., Ed.D., and Ph.D. degrees. Maybe repeated for credit.

Credit Hour: 1-5
Prerequisites: audition by committee and instructor's consent

MUS_APMS 8970: Graduate Recital
Preparation and presentation of Graduate Recital. Appropriate applied music course to be taken concurrently. May be repeated for credit. Each recital must be approved by a committee at least two weeks before the recital.

Credit Hour: 1

Music-Courses for Non-Majors (MUSIC_NM)

MUSIC_NM 1005: Topics in Music-Humanities
Organized study of selected topics. Subjects vary from semester to semester. May be repeated once for additional credit with departmental consent.

Credit Hour: 1-3

MUSIC_NM 1085: Problems in Music
Independent investigation leading to a paper project. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy. May be repeated for credit.

Credit Hour: 1-99
Prerequisites: instructor's consent

MUSIC_NM 1211: Fundamentals of Music I
Introduction to rhythmic, melodic, harmonic, and structural elements of music. Designed for non-music majors. No credit for music majors or minors.

Credit Hour: 2
MUSIC_NM 1211 - MOTR MUSC 101: Music Fundamentals

MUSIC_NM 1300: Experiencing Music Through Concert Attendance
Development of music listening skills through concert attendance, reading and class attendance.

Credit Hour: 1

MUSIC_NM 1310: Masterpieces of Western Music
Introduction to the Western fine-art tradition through the study of representative masterworks, emphasis on developing listening skills; directed to non-majors.

Credit Hours: 3
MUSIC_NM 1310 - MOTR MUSC 100: Music Appreciation

MUSIC_NM 1311: Jazz, Pop, and Rock
Historical introduction to jazz (to approximately 1970) and the American popular song, including rock and roll (to approximately 1980); directed to non-majors.

Credit Hours: 3
MUSIC_NM 1311 - MOTR MUSC 100RP: Music Appreciation-Rock/Pop

MUSIC_NM 1313: Introduction to World Music
Introduction to the musical traditions of selected non-Western societies; emphasis on developing listening skills; directed to non-majors, but music majors may enroll.

Credit Hours: 3
MUSIC_NM 1313 - MOTR MUSC 102: World Music

MUSIC_NM 1314: Orchestral Masterpieces
In-depth study of selected symphonic works of masters from Joseph Haydn to Aaron Copland. Students develop critical listening skills to identify orchestral instruments and perceive the structure and character of
<table>

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC_NM 1315</td>
<td>Musical Profile-Bach</td>
<td>Systematic study of the music of J.S. Bach directed to the general student. Graded on A-F basis only.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1316</td>
<td>Music Profile--Wolfgang A. Mozart</td>
<td>A systematic introduction to the music of Wolfgang Amadeus Mozart. Graded on A-F basis only.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1318</td>
<td>Music Profile--Claude Debussy</td>
<td>A systematic introduction to the music of Claude Debussy. Graded on A-F basis only.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1320</td>
<td>Musical Profile-Copland</td>
<td>Systematic study of the music of Aaron Copland directed to the general student. Graded on A-F basis only.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1330</td>
<td>Introduction to African-American Music</td>
<td>Introduction to the history and scholarship of African American music from eighteenth through twentieth centuries. Focus on African legacies and retentions, slave culture, the black church, minstrelsy, folk traditions, spirituals, ragtime, blues, jazz, soul, R&amp;B, and hip hop.</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC_NM 1335</td>
<td>Introduction to Soul and Country (same as BL_STU 1335)</td>
<td>Examination of musical cultures signified by &quot;soul&quot; and &quot;country&quot;. Study of the evolution and aesthetics of these genres and how they deal with concepts like identity, class, race, and ethnicity; gender and sexuality; politics and patriotism.</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC_NM 1445</td>
<td>Studio Instruction</td>
<td>Acceptable for non-majors and majors requiring a half-hour lesson with instructor's consent. May be repeated for credit.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1608</td>
<td>Beginning Piano Class</td>
<td>For non-music majors only.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1609</td>
<td>Intermediate Piano Class</td>
<td>For non-music majors only. Continuation of MUSIC_NM 1608.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1612</td>
<td>Elementary Folk Guitar Class</td>
<td>Teaching correct hand position, strum patterns, and chords needed for accompaniment of popular and folk songs.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1618</td>
<td>Basic Musicianship</td>
<td>Development of musicianship through music reading, playing, creating, and perceptive listening, including study of pitch, rhythm, structure, style, expressive and interpretive elements, and related vocabulary. No credit for music majors or minors or students who have completed MUSIC_NM 1211 or MUSIC_NM 1212.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 1651</td>
<td>Voice Class I</td>
<td>Fundamentals of singing; posture, breath support, control, vocalization, concepts of tone quality, placement and resonance. Literature selected for students with no previous vocal training. Adapted to needs of drama and other interdisciplinary students.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 2306</td>
<td>Perceiving Musical Traditions and Styles</td>
<td>An introduction to music from the late Baroque to the present day, including fine art, folk, and popular music. Designed to serve as a foundation for developing knowledge and skills of musical perception that will eventually lead to thoughtful written commentary on musical performances. Graded on A-F basis only.</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC_NM 2310</td>
<td>Live Music: Up Close and Personal</td>
<td>Study of classical chamber music from 1770-present through live performances. Artistic, cultural and historical contexts; development of listening skills and basic music vocabulary. No credit for music majors and music minors.</td>
<td>1</td>
</tr>
<tr>
<td>MUSIC_NM 2320</td>
<td>History of the Classical Guitar</td>
<td>Historical development of the classical guitar and guitar music from 1400 to today.</td>
<td>2</td>
</tr>
<tr>

</tbody>
</table>
MUSIC_NM 2445: Studio Instruction for Non-Majors
Acceptable for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 4445: Studio Instruction for Non-Majors
Acceptable for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: audition by examining committee and instructor's consent

MUSIC_NM 7445: Studio Instruction for Non-Majors
Acceptable for graduate credit for non-majors only. May be repeated for credit.
Credit Hour: 1-2
Prerequisites: instructor's consent

Music-Ensemble Courses (MUS_ENS)

MUS_ENS 1841: Instrumental Ensemble
Provides experience in instrumental performance and repertory. Open to all MU students by audition. May be repeated for credit. Enrollment in Marching Band is limited to a maximum of five semesters. Sections are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Varsity Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition
MUS_ENS 1841 - MOTR PERF 102B: Music Performance-Band

MUS_ENS 1842: Choral Ensemble
Provides experience in choral performance and repertory. Open to all MU students. May be repeated for credit. Sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Chorale, Men's Chorus, Women's Chorus. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition required for all but Choral Union
MUS_ENS 1842 - MOTR PERF 102C: Music Performance-Choir

MUS_ENS 1846: Chamber Music
Preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble, Jazz Combo. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 1865: Opera Workshop
Study, preparation and performance of selected operatic or musical theatre works in staged or concert versions. Open to all MU students by audition. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 4866: Musical Theatre Performance
(same as THEATR 4460). A practical study for the actor of theatrical songs through character analysis, lyric interpretation, and movement. A performance course.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_ENS 8841: Instrumental Ensemble
Research, preparation and performance of instrumental compositions. May be repeated for credit. Sections and credit hours are: Philharmonic Orchestra, Chamber Orchestra, Symphonic Band, Wind Ensemble, Concert Band, Studio Jazz Ensemble, Jazz Lab Band, Marching Band. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8842: Choral Ensemble
Research, preparation and performance of choral compositions. May be repeated for credit. Sections are: University Singers, Chamber Singers, Choral Union, Vocal Jazz Ensemble, Concert Choral, Men's Chorus, Women's Chorus. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8846: Advanced Chamber Ensemble
Study, preparation and performance of chamber music. May be repeated for credit. Sections are: String Ensemble, Woodwind Ensemble, Brass Ensemble, Percussion Ensemble, Jazz Combo. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-1
Prerequisites: audition and instructor's consent

MUS_ENS 8865: Advanced Opera Workshop
Study, preparation and performance of selected operatic or musical theatre works in staged or concert versions. Credit arranged; may be repeated for credit. Some sections may be graded on an S/U or A-F basis only.
Credit Hour: 0-2
Prerequisites: audition and instructor's consent

Music-General (MUS_GENL)

MUS_GENL 1091: Recital Attendance for Undergraduate Music Majors
Required attendance at seven music events from the Music Department listing. 0 credit, and may be repeated until the total degree requirement is satisfactorily met. No tuition charged. Graded on S/U basis only.
Credit Hours: 0
Prerequisites: Undergraduate music or music education majors only

MUS_GENL 3085: Problems in Music
Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.
Credit Hour: 1-99
Prerequisites: instructor's consent

MUS_GENL 3085W: Problems in Music - Writing Intensive
Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.
Credit Hour: 1-99
Prerequisites: instructor's consent

MUS_GENL 4005: Topics in Music-Humanities
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.
Credit Hour: 1-99
Prerequisites: junior standing in Music and instructor's consent

MUS_GENL 4005W: Topics in Music-Humanities - Writing Intensive
Organized study of selected topics in music. Subjects and credit variable. May be repeated for additional credit with departmental consent.
Credit Hour: 1-99
Prerequisites: junior standing in Music and instructor's consent

MUS_GENL 4029: Music Travel Course
(cross-leveled with MUS_GENL 7029). Experience designed to broaden music students’ perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.
Credit Hour: 1-3
Prerequisites: instructor's consent

MUS_GENL 4050: Career Development for Musicians
Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.
Credit Hours: 2
Prerequisites: sophomore standing and instructor's consent

MUS_GENL 4514: Arts Marketing
(cross-leveled with MUS_GENL 7514). Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.
Credit Hour: 1
Prerequisites: MUS_GENL 4510; Sophomore standing or instructor's consent

MUS_GENL 4516: Grant Writing for the Arts
(cross-leveled with MUS_GENL 7516). Exploration of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.
Credit Hour: 1
Prerequisites: MUS_GENL 4510; sophomore standing or instructor's consent

MUS_GENL 4518: Arts Industry Survey
(cross-leveled with MUS_GENL 7518). In-depth survey of the commercial arts industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.
Credit Hour: 1
Prerequisites: MUS_GENL 4510 and sophomore standing

MUS_GENL 4520: Non-Profit Management in the Arts
Introduction to management strategy and its application within the not-for-profit arts sector.
Credit Hour: 1
Prerequisites: MUS_GENL 4510, sophomore standing or instructor's consent

MUS_GENL 4522: Community Engagement in the Arts
Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.
Credit Hour: 1
Prerequisites: MUS_GENL 4510, sophomore standing, or instructor's consent

MUS_GENL 4530: Leadership, Advocacy, and Policy in the Arts
(cross-leveled with MUS_GENL 7530). Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.
Credit Hour: 1
Prerequisites: MUS_GENL 4510 and sophomore standing

MUS_GENL 4540: Music Entrepreneurship Practicum
(cross-leveled with MUS_GENL 7540). Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.
Credit Hour: 1-2
Prerequisites: MUS_GENL 4510, sophomore standing or instructor's consent

MUS_GENL 4550: Movement and Wellness for Musicians (cross-leveled with MUS_GENL 7550). Students will actively engage with various somatic practices with the goal of holistically improving musical performance.
Credit Hour: 1
Prerequisites: Instructor's consent

MUS_GENL 7005: Topics in Music
Organized study of selected topics in music. Subjects and credit variable. May be repeated with departmental consent.
Credit Hour: 1-99
Prerequisites: departmental consent

MUS_GENL 7029: Music Travel Course (cross-leveled with MUS_GENL 4029). Experience designed to broaden music students' perspectives on music in different social and/or cultural context(s). Participant bears cost of the course.
Credit Hour: 1-3
Prerequisites: instructor's consent

MUS_GENL 7510: Career Development for Musicians
Examination of professional opportunities available in the Creative Economy; development of a framework for career planning, professional portfolio, and personal business plan.
Credit Hours: 2
Prerequisites: instructor's consent

MUS_GENL 7512: Principles of Arts Entrepreneurship (cross-leveled with MUS_GENL 4512). Provision of a solid foundation of the core principles of entrepreneurial practice: creation of new ventures, the decisions leading to their development, and the factors that lead to their success. Students identify a career objective and develop a framework for achieving it.
Credit Hours: 2
Prerequisites: MUS_GENL 7510 and instructor's consent

MUS_GENL 7514: Arts Marketing (cross-leveled with MUS_GENL 4514). Exploration of marketing the arts in the 21st Century. Students formulate a marketing plan for a project or career goal, including establishing a competitive advantage, identifying target markets, formulating marketing strategy, and measuring outcomes.
Credit Hour: 1
Prerequisites: MUS_GENL 7510 and instructor's consent

MUS_GENL 7516: Grant Writing for the Arts (cross-leveled with MUS_GENL 4516). Explorations of the nuts and bolts of grant writing, including resources for freelance performers and teachers, and alternative fundraising strategies for individual venture ideas. Students identify a grant opportunity and draft a funding proposal for a real or imagined project.
Credit Hour: 1

MUS_GENL 7518: Arts Industry Survey (cross-leveled with MUS_GENL 4518). In-depth survey of the commercial arts industry world, with emphasis on career opportunities within the recording, performing, music retail, and music management sectors.
Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7520: Non-Profit Management in the Arts
Introduction to management strategy and its application within the not-for-profit arts sector.
Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7522: Community Engagement in the Arts
Introduction to community-based arts and their relationship to personal branding in the non-profit arts sector.
Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7530: Leadership, Advocacy, and Policy in the Arts (cross-leveled with MUS_GENL 4530). Seminar investigating advocacy methods, the application of leadership within non-profit arts organizations, arts policy and implications for artists in the 21st century. Writing and research-based work is a heavy component.
Credit Hour: 1
Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7540: Music Entrepreneurship Practicum (cross-leveled with MUS_GENL 4540). Students either A) design and execute an entrepreneurial music leadership project in the community, or B) complete an internship (and accompanying report) with an approved partner organization, supervised by the instructor.
Credit Hour: 1-2
Prerequisites: MUS_GENL 7510 or instructor's consent

MUS_GENL 7550: Movement and Wellness for Musicians (cross-leveled with MUS_GENL 4550). Students will actively engage with various somatic practices with the goal of holistically improving musical performance.
Credit Hour: 1
Prerequisites: Instructor's consent

MUS_GENL 8085: Problems in Music
Independent investigation leading to a paper or project. May be repeated for credit. Sections are: Music Theory, Music Composition, Music History, Music Performance/Pedagogy.
Credit Hour: 1-99
Prerequisites: instructor's consent
MUS_GENL 8090: Research in Music
Thesis course. May be repeated for additional credit. Sections are: Music Theory, Music Composition, Music History. Performance/Pedagogy. Graded on S/U basis only.
Credit Hour: 1-99

MUS_I_VR 8773: String Instrument Repertory I  
Credit Hour: 1  
Prerequisites: MUS_I_VR 7455 or instructor's consent

MUS_I_VR 8774: String Instrument Repertory II  
Continuation of MUS_I_VR 8773.  
Credit Hour: 1  
Prerequisites: MUS_I_VR 8773

MUS_I_VR 8775: Orchestral Repertory  
A survey of orchestral repertory, emphasizing various aspects of performance practice. Appropriate for graduate music conducting majors who wish to pursue a career which includes conducting orchestras at the advanced high school, college, and professional levels. May be repeated.  
Credit Hours: 2  
Prerequisites: Conducting experience at the high school or college level and instructor's consent

Music-Instrumental And Vocal Techniques (MUS_I_VT)

MUS_I_VT 1610: Group Piano for Music Majors I  
Beginning piano for music majors and concentrations only.  
Credit Hour: 1  
Prerequisites: instructor's consent

MUS_I_VT 1611: Group Piano for Music Majors II  
Continuation of MUS_I_VT 1610.  
Credit Hour: 1  
Prerequisites: MUS_I_VT 1610 with a minimum grade of C- or instructor's consent

MUS_I_VT 1620: Jazz Piano Class  
Beginning piano technique and study of common jazz piano voicings for accompaniment and solo performance.  
Credit Hour: 1  
Prerequisites: MUSIC_NM 1211 or MUS_THRY 1220; instructor's consent required

MUS_I_VT 2610: Group Piano for Music Majors III  
Continuation of MUS_I_VT 1611.  
Credit Hour: 1  
Prerequisites: MUS_I_VT 1611 with a minimum grade of C- or instructor's consent

MUS_I_VT 2611: Group Piano for Music Majors IV  
Continuation of MUS_I_VT 2610.  
Credit Hour: 1  
Prerequisites: MUS_I_VT 2610 with a minimum grade of C- or instructor's consent

MUS_I_VT 2631: Basic Conducting and Score Reading  
To develop the basic psychomotor and score reading skills prerequisite to the art of conducting.  
Credit Hours: 2  
Prerequisites: grade of C- or better in MUS_THRY 2220

MUS_I_VT 2633: Rehearsal Clinic: Choral Conducting I  
To develop musical and interpersonal skills requisite for successful leadership of a choral ensemble, emphasizing rehearsal strategies and repertoire.  
Credit Hours: 2  
Prerequisites: Grade of C- or better in MUS_I_VT 2631 or instructor's consent

MUS_I_VT 2634: Rehearsal Clinic: Band Conducting I  
To develop musical and interpersonal skills requisite for successful rehearsal leadership, emphasizing strategies effective for rehearsal of wind and percussion ensembles.  
Credit Hour: 1  
Prerequisites: Grade of C- or better in MUS_I_VT 2631 or instructor's consent

MUS_I_VT 2635: Rehearsal Clinic: Choral Conducting II  
Continuation of MUS_I_VT 2633.  
Credit Hours: 2  
Prerequisites: Grade of C- or better in MUS_I_VT 2633

MUS_I_VT 2636: Rehearsal Clinic: Band Conducting II  
Continuation of MUS_I_VT 2634.  
Credit Hour: 1  
Prerequisites: Grade of C- or better in MUS_I_VT 2634

MUS_I_VT 2637: Woodwinds I  
Class instruction in clarinet and saxophone; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.  
Credit Hour: 1  
Prerequisites: major in Music or Music Education

MUS_I_VT 2638: Woodwinds II  
Class instruction in flute and double reeds; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.  
Credit Hour: 1  
Prerequisites: major in Music or Music Education

MUS_I_VT 2640: Strings I  
Class instruction in violin and viola; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly.  
Credit Hour: 1  
Prerequisites: major in Music or Music Education

MUS_I_VT 2641: Strings II  
Class instruction in violoncello and string bass; playing and methods and materials for teaching. Taught on a laboratory basis. Meets twice weekly.
Credit Hour: 1
Prerequisites: major in Music or Music Education

MUS_I_VT 2645: Brass I
Class instruction in trumpet and horn; playing and methods/ materials for teaching. Taught on a laboratory basis. Meets twice weekly.
Credit Hour: 1
Prerequisites: major in Music or Music Education

MUS_I_VT 2646: Brass II
Class instruction in trombone, euphonium, and tuba; playing and methods/materials for teaching. Taught on a laboratory basis. Meets twice weekly.
Credit Hour: 1
Prerequisites: major in Music or Music Education

MUS_I_VT 2648: Percussion
Class instruction in percussion instruments; playing and methods for teaching. Taught on a laboratory basis. Meets twice weekly.
Credit Hour: 1
Prerequisites: major in Music or Music Education

MUS_I_VT 2649: Percussion II
Extension of MUS_I_VT 2648. Topics include marching percussion, drumset, Latin accessory instruments, and percussion ensemble literature.
Credit Hour: 1
Prerequisites: MUS_I_VT 2648

MUS_I_VT 2661: Keyboard Skills for Piano Majors I
Study of sightreading, harmonization, transposition, figured bass realization, and duet skills.
Credit Hours: 2
Prerequisites: grade of C- or better in MUS_THRY 1221 and MUS_THRY 1231; instructor's consent

MUS_I_VT 2662: Keyboard Skills for Piano Majors II
Study of score reading, duet performance, and collaborative experiences with voice and instruments.
Credit Hours: 2
Prerequisites: grade of C- or better in MUS_I_VT 2661; instructor's consent

MUS_I_VT 3642: Seminar in String Techniques
In-depth study of publications, philosophies, repertory, grading, specific problems for the string player. May be repeated once for credit.
Credit Hour: 1
Prerequisites: MUS_I_VT 2640 and MUS_I_VT 2641, or instructor's consent

MUS_I_VT 3643: Symposium in Instrumental Music
Study of procedures, techniques and literature for variable combinations of wind, string, and percussion classes and the administration of instrumental music programs.
### MUS_I_VT 4645: Jazz Improvisation
Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

**Credit Hours:** 2  
**Prerequisites:** MUSIC_NM 1211 or MUS_THRY 1220, instructor’s consent

### MUS_I_VT 4661: Piano Pedagogy Survey I
Study of approaches for teaching young beginning and intermediate student; survey of materials and resources.

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 4662: Piano Pedagogy Survey II
Study of approaches for teaching older, more advanced and class piano students; survey of materials and resources.

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 4663: Piano Pedagogy Laboratory
Supervised instruction in private and class piano. May be repeated once for additional credit.

**Credit Hours:** 1  
**Prerequisites:** MUS_I_VT 4661 and MUS_I_VT 4662

### MUS_I_VT 4680: Classical Guitar Pedagogy
Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level, and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

**Credit Hours:** 1  
**Prerequisites:** Audition required and instructor’s consent

### MUS_I_VT 7640: Introduction to Improvisation
(cross-leveled with MUS_I_VT 4640). Introduction to contemporary improvisation, aimed at classically trained musicians. No improvisational experience necessary.

**Credit Hours:** 2  
**Prerequisites:** Consent of instructor

### MUS_I_VT 7645: Graduate Jazz Improvisation
Creation of a melodic vocabulary for jazz improvisation through study and application of jazz chord-scale theory, solo transcription, and careful listening to the vanguard of jazz.

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 7680: Graduate Classical Guitar Pedagogy
Basic anatomical and physiological aspects of guitar performance, setting technical and musical goals for students, repertoire development in relation to age, level and musical style. Career goals (building a private studio, lesson planning, organizational skills) are addressed.

**Credit Hours:** 1  
**Prerequisites:** MUS_I_VT 8681 and MUS_I_VT 8682 and instructor’s consent

### MUS_I_VT 8646: Jazz Pedagogy I
Study of historical and current trends in jazz education and pedagogy, including administration and curriculum, through assigned readings, supervised teaching, classroom discussion, survey of materials, and formation of an annotated bibliography. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor’s consent

### MUS_I_VT 8647: Jazz Pedagogy II
Continuation of MUS_I_VT 8646; formulation of an extensive philosophy of jazz education. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MUS_I_VT 8646 and instructor’s consent

### MUS_I_VT 8671: Principles of Singing I

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 8673: Advanced Choral Conducting
Advanced conducting techniques in the interpretation of choral literature; score analysis. May be repeated for additional credit.

**Credit Hours:** 2  
**Prerequisites:** MUS_I_VT 2633 or instructor’s consent

### MUS_I_VT 8674: Advanced Instrumental Conducting
Advanced conducting techniques in the interpretation of band and orchestral literature; score analysis. May be repeated for additional credit.

**Credit Hours:** 2  
**Prerequisites:** MUS_I_VT 2634 or instructor’s consent

### MUS_I_VT 8681: Advanced Piano Pedagogy I
A survey of materials and techniques of instruction for teaching the young beginner and the intermediate piano student.

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 8682: Advanced Piano Pedagogy II
A survey of materials and techniques of instruction for teaching class piano, the older beginner, and the advanced student.

**Credit Hours:** 2  
**Prerequisites:** instructor’s consent

### MUS_I_VT 8683: Piano Pedagogy Internship
Supervised teaching of individual and group lessons. May be repeated once for credit.

**Credit Hours:** 1  
**Prerequisites:** MUS_I_VT 8681 and MUS_I_VT 8682 and instructor’s consent
MUS_I_VT 8684: Group Piano Pedagogy
Preparation of graduate students to teach group piano to both college level music majors and adult beginners.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_I_VT 8689: Band Techniques
To develop individual conducting techniques as well as instrumental ensemble techniques. Emphasis is placed on the learning process to give the student a perspective to improve the techniques of others.

Credit Hours: 3
Prerequisites: instructor's consent

Music-Music Education (MUS_EDUC)

MUS_EDUC 1100: Orientation: Music Education
This course familiarizes and orients students with MU resources, Music Education degree expectations and career options. Graded on S/U basis only.

Credit Hour: 1

MUS_EDUC 4140: Teaching Music I
Study of skills, knowledge, and philosophical foundations necessary to teach general music to children in grades preK - 5, including methods, philosophies, and teacher and learner behaviors.

Credit Hours: 3
Prerequisites: junior standing; music education major or instructor's consent

MUS_EDUC 4141: Teaching Music I Field Experience
This field experience supports the MUS_EDUC 4140 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: junior standing; music education major or instructor's consent

MUS_EDUC 4142: Teaching Music II
Study of a broad repertoire of music literature and instructional materials, including critical evaluation and analysis for use in the general music classroom.

Credit Hours: 2
Prerequisites: MUS_EDUC 4140

MUS_EDUC 4142W: Teaching Music II - Writing Intensive
Study of a broad repertoire of music literature and instructional materials, including critical evaluation and analysis for use in the general music classroom.

Credit Hours: 2
Prerequisites: MUS_EDUC 4140

MUS_EDUC 4143: Teaching Music II Field Experience
This field experience supports the MUS_EDUC 4142 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: MUS_EDUC 4141

MUS_EDUC 4143W: Teaching Music II Field Experience - Writing Intensive
This field experience supports the MUS_EDUC 4142 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: MUS_EDUC 4141

MUS_EDUC 4144: Teaching Music III
A study of various strategies for the successful teaching of middle and high school music programs.

Credit Hours: 3
Prerequisites: MUS_EDUC 4142

MUS_EDUC 4144W: Teaching Music III - Writing Intensive
A study of various strategies for the successful teaching of middle and high school music programs.

Credit Hours: 3
Prerequisites: MUS_EDUC 4142

MUS_EDUC 4145: Teaching Music III Field Experience
This field experience supports the MUS_EDUC 4144 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: MUS_EDUC 4143

MUS_EDUC 4145W: Teaching Music III Field Experience - Writing Intensive
This field experience supports the MUS_EDUC 4144 course. Field experience expectations are delineated in the course syllabus. Graded on a S/U basis only.

Credit Hour: 1
Prerequisites: MUS_EDUC 4143

MUS_EDUC 8140: Advanced Techniques in Music Education-General
A review and evaluation of teaching/learning strategies in general music instruction.

Credit Hour: 2-5
Prerequisites: Music methods or instructor's consent

MUS_EDUC 8141: Advanced Techniques in Music Education-Early Childhood
A review and evaluation of teaching/learning strategies in early childhood music instruction.

Credit Hour: 2-5
**Prerequisites:** Music methods or instructor’s consent

**MUS_EDUC 8142: Curriculum Materials in Music Education-General**
A development of critical abilities in evaluation and selection of music education materials for general music.

**Credit Hour:** 2-5

**Prerequisites:** instructor’s consent

**MUS_EDUC 8143: Curriculum Materials in Music Education-Vocal**
A development of critical abilities in evaluation and selection of music education materials for secondary vocal music.

**Credit Hour:** 2-5

**Prerequisites:** instructor’s consent

**MUS_EDUC 8150: Foundations of Music Education**
A study of the history, philosophy and rationale of music education.

**Credit Hours:** 3

**Prerequisites:** instructor’s consent

**MUS_EDUC 8151: Measurement and Research in Music Education**
Introduction to measurement and research strategies and techniques employed by music educators to assess music achievement, aptitude, perception, performance, cognition, and affective development. Emphasis on reading with understanding and applying research to pedagogical practice. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Graduate standing in music education

**MUS_EDUC 8152: Psychology of Music Instruction and Performance**
Introduction to the study of psychological factors, theories and research related to the musical development and performance of children, adolescents, and adults, with implications and applications for music education programs and instruction. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Graduate standing in music education

**MUS_EDUC 8160: Current Issues in Music Education**
This course is designed to stimulate thinking about current issues related to the field of music education and the influences of these issues on approaches to music teaching and learning.

**Credit Hour:** 1-3

**Prerequisites:** Graduate standing in music education

**MUS_EDUC 8170: Doctoral Seminar in Music Education**
Emphasis on knowledge, strategies, and skills necessary for doctoral students to be prepared to make contributions to the profession as successful college teachers, researchers, master teachers in K-12 schools, and arts administrators. Graded on A-F basis only.

**Credit Hour:** 1-3

**Prerequisites:** Admission to doctoral study in music education

**MUS_EDUC 9090: Research in Music Education**
Research leading to the dissertation. Graded on S/U basis only.

**Credit Hour:** 1-12

**Prerequisites:** Doctoral student in Music Education who have submitted passed comprehensive examination

---

**Music-Music History And Literature (MUS_H_LI)**

**MUS_H_LI 1322: Introduction to Music in the United States**
Historical overview of American folk, popular, and fine-art music; emphasis on listening skills.

**Credit Hours:** 2

**Prerequisites:** Grade of C- or better in MUS_H_LI 1322

**MUS_H_LI 2307: History of Western Music I**
Historical survey of selected European practices up to 1700 following a consideration of the major fine-art traditions of the world.

**Credit Hours:** 2

**Prerequisites:** Grade of C- or better in MUS_H_LI 2307

**MUS_H_LI 2308: History of Western Music II**
Historical survey of Western fine-art music from approximately 1700 to the present.

**Credit Hours:** 2

**Prerequisites:** Grade of C- or better in MUS_H_LI 2307

**MUS_H_LI 4311: Historical Studies in Art Song**
Historical survey of works for solo voice and instruments.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in MUS_H_LI 2308 and instructor’s consent

**MUS_H_LI 4311W: Historical Studies in Art Song - Writing Intensive**
Historical survey of works for solo voice and instruments.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in MUS_H_LI 2308 and instructor’s consent

**MUS_H_LI 4312: Historical Studies in Choral Music**
Historical survey of works featuring choral ensembles.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in MUS_H_LI 2308 and instructor’s consent

**MUS_H_LI 4312W: Historical Studies in Choral Music - Writing Intensive**
Historical survey of works featuring choral ensembles.

**Credit Hours:** 3

**Prerequisites:** Grade of C- or better in MUS_H_LI 2308 and instructor’s consent

**MUS_H_LI 4313W: Historical Studies in Opera - Writing Intensive**
Historical survey of opera.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4315: Historical Studies in Chamber Music
Historical survey of works for small ensembles, instrumental and vocal.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4315W: Historical Studies in Chamber Music - Writing Intensive
Historical survey of works for small ensembles, instrumental and vocal.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4317: Historical Studies in Jazz and Popular Music
Historical survey of works from the realm of American jazz and popular music.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4317W: Historical Studies in Jazz and Popular Music - Writing Intensive
Historical survey of works from the realm of American jazz and popular music.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4318: Studies in World Music
(cross-leveled with MUS_H_LI 7318). Advanced systematic study of musical activities in selected world cultures, with the emphasis on developing listening skills and understanding the role of music in a culture.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2307 and MUS_H_LI 2308

MUS_H_LI 4318W: Studies in World Music - Writing Intensive
(cross-leveled with MUS_H_LI 7318). Advanced systematic study of musical activities in selected world cultures, with the emphasis on developing listening skills and understanding the role of music in a culture.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2307 and MUS_H_LI 2308

MUS_H_LI 4320W: Historical Studies in African-American Music - Writing Intensive
Exploration of history and current scholarship in African-American music from the eighteenth to twenty-first centuries. Genres include folk music, religious music, blues, ragtime, jazz, musical theater, art music, R&B, funk, soul, disco, house, hip-hop and rap.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and Instructor's consent

MUS_H_LI 4330: Music of the Postmodern Era
(Systematic study of fine-art musical practice from approximately 1945 to the present.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308

MUS_H_LI 4336: Music in the Baroque Era
(Systematic study of European musical practice from approximately 1600 to 1750.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4337: Music of the Classic Era
(Systematic study of European musical practice from approximately 1750 to 1800.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4338: Music of the Romantic Era
(Systematic study of European musical practice from approximately 1800 to 1900.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4338W: MUSIC OF ROMANTIC ERA - Writing Intensive
(Systematic study of European musical practice from approximately 1800 to 1900.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4339: Music of the Modern Era
(Systematic study of fine-art musical practice from approximately 1900 to the present.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308
MUS_H_LI 4340: Focal Composers
Systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4340W: Focal Composers - Writing Intensive
Systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4341: Advanced Studies in American Music
(cross-leveled with MUS_H_LI 7341). Systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4341W: Advanced Studies in American Music - Writing Intensive
(cross-leveled with MUS_H_LI 7341). Systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4342W: Contemporary Issues in Musicology - Writing Intensive
(cross-leveled with MUS_H_LI 7342). Systematic study of single musicological problem of contemporary relevance.

Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_H_LI 2308 and instructor's consent

MUS_H_LI 4350: Introduction to Ethnomusicology
Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.

Credit Hours: 3
Prerequisites: grade of C- or better in MUS_H_LI 2308; instructor's consent

MUS_H_LI 4350W: Introduction to Ethnomusicology - Writing Intensive
Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.

Credit Hours: 3
Prerequisites: grade of C- or better in MUS_H_LI 2308; instructor's consent

MUS_H_LI 4352W: Historical Studies in African Music - Writing Intensive
(same as BL_STU 4352) Ethnomusicological introduction to the music and culture of countries and ethnic groups in Africa. Traditional and contemporary popular styles are explored, and influences of Islamic invasions, missionary arrivals, colonial conquests, neo-colonial trends, and globalization.

Credit Hours: 3
Prerequisites: grade of C- or better in MUS_H_LI 2308; instructor's consent

MUS_H_LI 4376: American Musicals
(same as THEATR 4720). Historical survey of the development of the 20th-Century American Musical in Theatre and Film.

Credit Hours: 3

MUS_H_LI 4399: Graduate History Review
Review of history for graduate students. Does not fulfill graduate degree requirements. Graded on S/U basis only.

Credit Hours: 2
Prerequisites: instructor's consent

MUS_H_LI 7311: Historical Studies in Art Song
Advanced historical survey of works for solo voice and instruments.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7312: Historical Studies in Choral Music
Advanced historical survey of works featuring choral ensembles.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7313: Historical Studies in Opera
Advanced historical survey of opera.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7315: Historical Studies in Chamber Music
Advanced historical survey of works for small ensembles, instrumental and vocal.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7317: Historical Studies in Jazz and Popular Music
Advanced historical survey of works from the realm of American jazz and popular music.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7318: Studies in World Music
(cross-leveled with MUS_H_LI 4318). Advanced systematic study of musical activities in selected world cultures, with emphasis on developing listening skills and understanding the role of music in a culture.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7320: Historical Studies in African-American Music
Exploration of history and current scholarship in African-American music from the eighteenth to the twenty-first centuries. Genres include folk music, religious music, blues, ragtime, jazz, musical theater, art music, R&B, funk, soul, disco, house, hip-hop and rap.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7330: Music of the PostModern Era
Systematic study of fine-art musical practice from approximately 1945 to the present.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7336: Music in the Baroque Era
Advanced systematic study of European musical practice from approximately 1600 to 1750.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7337: Music of the Classic Era
Advanced systematic study of European musical practice from approximately 1750 to 1800.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7338: Music of the Romantic Era
Advanced systematic study of European musical practice from approximately 1800 to 1900.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7339: Music of the Modern Era
Advanced systematic study of fine-art musical practice from approximately 1900 to the present.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7341: Advanced Studies in American Music
(cross-leveled with MUS_H_LI 4341). Advanced systematic study of the diverse streams of musical practice in the United States from the colonial time to the present.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7342: Contemporary Issues in Musicology
(cross-leveled with MUS_H_LI 4342). Advanced systematic study of single musicological problem of contemporary relevance.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 7350: Introduction to Ethnomusicology
Study of theories, historical development, research methodologies, and practice of ethnomusicology, in an interdisciplinary approach. Topics include ethnographic research, oral and literate sources, transcription and analysis, critical analysis, and interpretative techniques.
Credit Hours: 3
Prerequisites: instructor's consent

MUS_H_LI 8313: Introduction to Graduate Study
Introduction to library procedures, basic sources of information in music and techniques for research.
Credit Hours: 2
Prerequisites: instructor's consent

MUS_H_LI 8314: Introduction to Graduate Studies in Music II
The application of basic music bibliography, research techniques, and conventions of music scholarship.
Credit Hour: 1
Prerequisites: MUS_H_LI 8313 or instructor's consent

MUS_H_LI 8340: Focal Composers
Advanced systematic study of the works of landmark composers: J.S. Bach, Mozart, Beethoven, Verdi/Wagner, Debussy, or Stravinsky, studied in rotation. Repeatable for up to 6 hours or credit.
Credit Hours: 3
Prerequisites: instructor's consent

Music-Music Theory (MUS_THRY)

MUS_THRY 1210: Introduction to Computer Technology and Music
Introduces Finale, music engraving and playback software, and introduces sequencing and other software applications that may impact students while they are in school and as professional musicians.
Credit Hours: 2

MUS_THRY 1213: Introduction to Music Theory
Introduction to music notation and to rhythmic, melodic, harmonic, and structural elements of music. Emphasis on written skills, but ear training, sight singing, and keyboard components included as well. Graded on A/F basis only.
Credit Hours: 2
Prerequisites: consent required. Placement by exam

MUS_THRY 1220: Syntax, Structure and Style of Music I
Review of fundamentals. Study of rhythm, melody, harmonic, structure and stylistic characteristics of various periods. Application through original...
composition projects. Prerequisites: none for Music majors; others:
instructor's consent.

Credit Hours: 2

MUS_THRY 1221: Tonal Music Theory II
Continuation of MUS_THRY 1220. Study of smaller forms and
introduction to chromatic harmony.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1220

MUS_THRY 1230: Aural Training and Sight Singing I
Development of aural and sight singing skills.

Credit Hours: 2
Prerequisites or Corequisites: MUS_THRY 1220

MUS_THRY 1231: Aural Training and Sight Singing II
Continuation of MUS_THRY 1230.

Credit Hours: 2
Prerequisites or Corequisites: MUS_THRY 1230

MUS_THRY 2215: Composition I
Fundamentals of composition and writing in small forms.

Credit Hours: 2
Prerequisites: grade of B- or better in MUS_THRY 1220, MUS_THRY
1221, MUS_THRY 1230, MUS_THRY 1231, and instructor's consent

MUS_THRY 2216: Composition II
Continuation of MUS_THRY 2215.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2215

MUS_THRY 2220: Syntax, Structure and Style of Music III
Chromatic harmony, variation techniques and contrapuntal genres.
Study of traditional forms in instrumental, vocal and choral compositions.
Applications through original composition projects.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1221

MUS_THRY 2221: Syntax, Structure and Style of Music IV
Continued study of chromatic harmony and compositions in larger forms.
Application through original composition projects.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2220

MUS_THRY 2230: Aural Training and Sight Singing III
Continuation of MUS_THRY 1231. Further development of aural
and sight singing skills with an emphasis on chromatic harmony and
decorative pitches. Introduction of structural perception.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 1231 and
MUS_THRY 2220 or MUS_THRY 2220 concurrently

MUS_THRY 2231: Aural Training and Sight Singing IV
Continuation MUS_THRY 2230.

Credit Hours: 2
Prerequisites or Corequisites: MUS_THRY 2221
Prerequisites: Grade of C- or better in MUS_THRY 2230

MUS_THRY 3215: Composition III
Further development of creative writing in traditional forms.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 3216: Composition IV
Continuation of MUS_THRY 3215.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 3215

MUS_THRY 4210: Jazz Harmony and Arranging I
(cross-leveled with MUS_THRY 7210). Study of basic melodic and
harmonic materials commonly used in jazz. Application through arranging
projects for small jazz groups.

Credit Hours: 2
Prerequisites: MUS_THRY 4210; instructor's consent

MUS_THRY 4211: Jazz Harmony and Arranging II
(cross-leveled with MUS_THRY 7211). Continuation of MUS_THRY
4210. Study of advanced melodic and harmonic materials commonly
used in jazz. Application through arranging projects for small and large
jazz groups.

Credit Hours: 2
Prerequisites: MUS_THRY 4210; instructor's consent

MUS_THRY 4212: Jazz Theory I
Comprehensive study of the grammar and syntax of jazz harmony.

Credit Hour: 1
Prerequisites: Grade of C- or better in MUSIC_NM 1211 or MUS_THRY
1220

MUS_THRY 4215: Composition V
Writing of works in larger forms for a solo instrument or chamber
ensemble.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 3216

MUS_THRY 4216: Composition VI
Continuation of MUS_THRY 4215. May be repeated for additional credit.

Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 4215

MUS_THRY 4220: 20th Century Composition Techniques
(cross-leveled with MUS_THRY 7220). The study and application of
analytical procedures to 20th century music literature. Special readings;
individual projects.
MUS_THRY 4221: Analysis of Music
An analytical study of rhythmic, melodic, harmonic and structural aspects of 18th-, 19th- and 20th-century music.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4223: Eighteenth-Century Counterpoint
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221 or equivalent

MUS_THRY 4225: Sixteenth-Century Counterpoint
(cross-leveled with MUS_THRY 7225). Analysis of contrapuntal procedures and representative compositions of 16th century. Emphasis on styles of Palestrina, Lassus and Victoria. Stylistic writing in two, three or more voices.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4227: Orchestration
(cross-leveled with MUS_THRY 7227). Study of orchestral instruments and the process of scoring for various orchestral combinations.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4229: Band Arranging
Transcription, scoring of solo and ensemble literature for band instrument combinations of varying sizes up to and including concert band.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4230: Choral Arranging
Transcription and arrangement of music suitable for performance by various vocal ensembles.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4231: Schenkerian Analysis
Techniques of musical analysis developed by Heinrich Schenker.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4232: Rhythmic Analysis of Tonal Music
Introduction to rhythmic analysis, including context of current thinking, basic concepts, various approaches, selected topics, performance issues, and particular problems.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4241: Advanced Schenkerian Analysis
(cross-leveled with MUS_THRY 7241). Continuation of MUS_THRY 4231, with a focus on the analysis of complete works, including larger forms.
Credit Hours: 3
Prerequisites: Grade of C-minus or better in MUS_THRY 4231, or equivalent at another institution

MUS_THRY 4245: Introduction to Electronic Music
(cross-leveled with MUS_THRY 7245). Techniques used in the creation of music with tape recorders, voltage-controlled synthesizers and electronics.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 4220

MUS_THRY 4250: Analysis of Musical Styles
Analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or MUS_THRY 4221 or equivalent. May be repeated for credit with departmental consent.
Credit Hours: 2

MUS_THRY 4252: Keyboard Harmony and Score Reading
Study of idiomatic chord progressions and harmonization strategies at the keyboard, including figured bass, score reading, and score playing. Skills are reinforce by analysis, both at sight and prepared.
Credit Hours: 3
Prerequisites: Grade of C- or better in MUS_THRY 2221; instructor’s consent

MUS_THRY 4271: Pedagogy of Music Theory I
Techniques and materials for teaching basic music theory courses for high schools and colleges.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4284: Contemporary Analytical Techniques
Study and application of various analytical systems for 20th century compositions. Analysis of music employing contemporary theories.
Credit Hours: 2
Prerequisites: Grade of C- or better in MUS_THRY 2221

MUS_THRY 4299: Graduate Theory Review
Review of music theory for graduate students in music. Does not fulfill graduate degree requirements. Graded on S/U basis only.
Credit Hours: 2
Prerequisites: instructor's consent

</tbody>
</table>
MUS_THRY 7250: Analysis of Musical Styles
(cross-leveled with MUS_THRY 4250). Advanced analytical study of specific rhythmic, melodic, harmonic, and structural factors which constitute the stylistic practices of a specific period or composer. May be repeated for credit with departmental consent. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

MUS_THRY 7252: Keyboard Harmony and Score Reading
Study of idiomatic chord progressions and harmonization strategies at the keyboard, including figured bass, score reading, and score playing. Skills are reinforce by analysis, both at sight and prepared.

Credit Hours: 3
Prerequisites: demonstrable keyboard proficiency at level of Bach invention; instructor's consent

MUS_THRY 7271: Pedagogy of Music Theory I
Advanced techniques and materials for teaching basic music theory courses for high schools and colleges.

Credit Hours: 2
Prerequisites: instructor's consent

Natural Resources (NAT_R)

NAT_R 1040: Conservation Studies
A one-week field experience in natural resource management issues—soil and water conservation, air pollution, fish and wildlife habitat requirements, importance of forest ecosystems. Limited to high school students who have completed their junior year and taken the PSAT or equivalent. Graded on S/U basis only.

Credit Hour: 1

NAT_R 1060: Ecology and Conservation of Natural Resources
Introduction to the principles of resource and conservation describing the foundation of the variety of natural resources and conservation practices used to protect and maintain these resources.

Credit Hours: 3

NAT_R 1070: Ecology and Renewable Resource Management
Introduction to ecological principles and their relationship to resource use and management.

Credit Hours: 3
Prerequisites: restricted to Natural Resources majors

NAT_R 2002: Topics in Natural Resources - Biological
Organized study of selected topics. Subjects and credit may vary from semester to semester.

Credit Hour: 1-99

NAT_R 2080: Outdoor Recreation Consortium
Outdoor Recreation Consortium is a collaborative course taught by MU, North Carolina State University, Penn State University, East Carolina University, Texas A&M University and Western Illinois University. The course uses Great Smoky Mountains National Park as a case study for understanding the relationship between ecosystem management, natural resource management, tourism, and outdoor recreation. This course is based around a one week trip to the Smokies. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: NAT_R 1070 or P_R_TR 2111 or ENV_SC 1100 and permission of instructor

NAT_R 2160: Issues in Natural Resources and the Environment
This course provides an introduction to ecological and environmental challenges in natural resource management in our rapidly changing world. Topical discussions will provide students with informed perspectives of several contemporary issues that affect the sustainability of our natural resources.

Credit Hours: 3
Recommended: This course is recommended as an introductory course for non-science majors

NAT_R 2325: Introduction to Geographic Information Systems
Cover basic theories and techniques of GIS; including vector and raster data representation, vector data digitizing, attribute data input, map projection, layout database manipulation, terrain analysis and spatial interpolation.

Credit Hours: 3
Prerequisites: NAT_R 1070 or instructor's consent

NAT_R 3110: Natural Resource Biometrics
Sampling methods and analysis as applied to a variety of natural resources, including fisheries, range, recreation, forests, water and wildlife.

Credit Hours: 3
Recommended: STAT 2500 or equivalent

NAT_R 3290: Hydrologic Measurement Techniques
Students will be introduced to field methods and tools used by water resource and environmental science professionals. Students will sample and measure hydrologic and environmental variables, learn about data storage systems, and access and analyze data. Course may be repeated for credit. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: MATH 1100 or permission of instructor

NAT_R 3290W: Hydrologic Measurement Techniques - Writing Intensive
Students will be introduced to field methods and tools used by water resource and environmental science professionals. Students will sample
NAT_R 4304: Water Quality and Natural Resource Management
(same as ENV_SC 3400). Introduction to broad aspects of water quality science, management, and policy. Topics include aquatic ecology, eutrophication, lake and coastal management, water supply and treatment, watershed management with respect to agriculture and urban development, and toxicology. Graded on A-F basis only.

Credit Hours: 3
Recommended: CHEM 1320 and ENV SC 1100 or NAT_R 1070

NAT_R 4001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 4024: Foundations of Environmental Education
(same as ENV_SC 4024; cross-leveled with NAT_R 7024). This course provides a theoretical foundation to environmental education (EE). The purpose of this course is to develop the knowledge and skills for developing quality, age-appropriate EE for students in both formal and non-formal education setting. The emphasis is on EE curriculum materials, resources, and programs that can be used with students in settings at classrooms, nature centers, museums, and parks. This course involves training in the Missouri Department of Conservation Discover Nature School educational materials, and in observing and teaching EE lessons in a local nature center. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1010 or ENV_SC 1100 or NAT_R 1060 or NAT_R 1070 or NAT_R 2160 or Instructor's consent

NAT_R 4100: Lake Ecology
(same as ENV_SC 4100; cross-leveled with NAT_R 7100). Ecology of inland waters with emphasis on productivity. Graded on A-F basis only.

Credit Hours: 3
Recommended: senior standing or BIO_SC 3650

NAT_R 4300: Methods in Aquatic Ecology
(same as ENV_SC 4300; cross-leveled with ENV_SC 7300, NAT_R 7300). Methods used for quantitative assessment of water quality and quantity in inland waters. Graded on A-F basis only.

Credit Hours: 3
Recommended: Senior standing or BIO_SC 3650 and ENV_SC 4100 or NAT_R 4100 or NAT_R 4200 or FOREST 4390 or NAT_R 3400

NAT_R 4353: Natural Resource Policy/Administration
Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.

Credit Hours: 3
Prerequisites: senior standing or instructor's consent

NAT_R 4365: GIS Applications
Introduces logical thinking and techniques in applying GIS to practical problems. Covers general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, grid, and remote sensing image processing.

Credit Hours: 3
Prerequisites: GEOG 4040 or NAT_R 2325

NAT_R 4385: Landscape Ecology and GIS Analysis I
(same as GEOG 4810). Examination of the landscape-scale approach to biodiversity, ecosystem dynamics, and habitat management. Particular emphasis on the use of Geographic Information Systems to analyze the spatial dimension of ecological patterns and processes.

Credit Hours: 3
Prerequisites: GEOG 3040 or NAT_R 2325

NAT_R 7001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 7024: Foundations of Environmental Education
(cross-leveled with NAT_R 4024, ENV_SC 4024). This course provides a theoretical foundation to environmental education (EE). The purpose of this course is to develop the knowledge and skills for developing quality, age-appropriate EE for students in both formal and non-formal education setting. The emphasis is on EE curriculum materials, resources, and programs that can be used with students in settings at classrooms, nature centers, museums, and parks. This course involves training in the Missouri Department of Conservation Discover Nature School educational materials, and in observing and teaching EE lessons in a local nature center. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: GEOG 4040 or NAT_R 2325

NAT_R 7100: Lake Ecology
(same as ENV_SC 7100; cross-leveled with ENV_SC 4100 and NAT_R 4100). Ecology of inland waters with emphasis on productivity. Graded on A-F basis only.

Credit Hours: 3

NAT_R 7300: Methods in Aquatic Ecology
(same as ENV_SC 7300; cross-leveled with NAT_R 4300, ENV_SC 4300). Methods used for quantitative assessment of water quality and quantity in inland waters. Graded on A-F basis only.

Credit Hours: 3
Recommended: senior standing or BIO_SC 3650. ENV_SC/NAT_R 4100 OR 3400 OR FOR 4390

NAT_R 7353: Natural Resource Policy/Administration
Principles of policy formation and analysis; relationship of organizational goals to structure, planning and budgeting. Historical background of present natural resource policies; examines current policy issues.
NAT_R 7365: GIS Applications
Introduces logical thinking and techniques in applying GIS to practical problems. Covers general GIS functionalities, Arc View Spatial Analyst including georeference, terrain analysis, hydrological analysis, and remote sensing image processing.

Credit Hours: 3
Prerequisites: instructor's consent

NAT_R 8001: Topics in Natural Resources
Organized study of selected topics. Subjects may vary from semester to semester.

Credit Hour: 1-99

NAT_R 8024: Program Development and Evaluation in Informal Settings
This advanced level course focuses on designing, conducting, and analyzing quantitative educational research data and evaluation studies that measure the impact and effectiveness of environmental education and/or STEM education programs. Applied statistics in educational research will be taught. Evaluation is a set of approaches and techniques used to make judgments about the effectiveness or quality of a program or treatment; to inform decisions about its design, development, and implementation. This course provides theoretical background and techniques of program development and evaluation. This course will practice using qualitative and quantitative data for data analysis and manuscript writing. This is designed for those who will be working in leadership or supervisory capacities to gain skills in conducting needs assessment, designing programs, and conducting formative and summative evaluations of these programs for citizen science, inquiry-based learning, place-based program, students-centered, science outreach program, and nature explore study programs. By the end of the semester, students will have a ready-to-submit manuscript completed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENV_SC 4024 or NAT_R 4024 or NAT_R 7024

NAT_R 8050: Masters Non-Thesis Research in Natural Resources
Research credits associated with a non-thesis M.S. project. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-10
Prerequisites: restricted to Masters students in the School of Natural Resources

NAT_R 8090: Master Thesis Research in Natural Resources
Research credits leading to M.Sc. thesis. May be repeated for credit. Graded on S/U basis only.

Credit Hour: 1-10
Prerequisites: Restricted to Masters students in the School of Natural Resources

NAT_R 8290: Hydrologic Measurement and Synthesis
Students are introduced to methods fundamental to measuring hydrologic processes, and assessing physical data, including field measurement, and data logging and acquisition information systems. Students will gain experience analyzing and synthesizing hydrologic data using tools commonly used by water resource professionals. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: MATH 1100, STAT 2530, PHYSCS 1210. If deficient in prerequisite courses, or unsure of qualification, contact instructor for consent

NAT_R 8300: Urban Biodiversity, Conservation, and Planning
The importance of urban biodiversity is debated by many in the conservation community. Some researchers and managers focus on threats to biodiversity associated with urbanization and land use change. In contrast to this approach people who live in, study, or care about cities: ecologists, wildlife managers, conservation biologists, planners, and local residents have debated what biodiversity means in urban settings. Recent literature on biodiversity in cities notes the range of ecological, social, and cultural meanings of urban biodiversity and stresses the importance of defining the setting and scales at which biodiversity is being assessed. This approach to urban biodiversity has documented the importance of conservation of rare species and habitats but also the importance of managing the range of habitats in and around where people live, work, and play. This course builds on the work of the NSF-funded Urban Biodiversity Research Coordination Network (UrBioNet), with course modules taught by UrBioNet steering committee members.

Credit Hours: 3
Recommended: Coursework in ecology, conservation / management or planning will be helpful in this course

NAT_R 8325: Introduction to Geographic Information Systems
Cover theories and techniques of GIS; including vector and raster data representation, vector data digitizing, attribute data input, map projection, layout database manipulation, terrain analysis and spatial interpolation.

Credit Hours: 3
Prerequisites: Instructor's consent

NAT_R 8355: Landscape Ecology and GIS Analysis II
(same as GEOG 8815). Provide students with principles and applications of landscape ecology and firm understandings of spatial analysis techniques using GIS. Discuss metrics for spatial pattern and models for landscape-scale dynamics.

Credit Hours: 3
Prerequisites: NAT_R 4365; FOREST 4320 or equivalent; basic statistics; instructor's consent
Recommended: GEOG 4810 or GEOG 7810

NAT_R 8860: International Comparative Rural Policy
(same as PUB_AF 8860. AAE 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.
NAVY 1100: Introduction to Naval Science
This course serves as an introduction to the organization of the Naval Service, the varied career opportunities available, the long held customs and traditions of the service, and the duties of a Junior Officer.

Credit Hours: 3

NAVY 1200: Seapower and Maritime Affairs
Seminars examine the application of seapower as an instrument of foreign policy by the major nations of the world. Emphasis placed on role of the Navy.

Credit Hours: 3

NAVY 2110: Naval Ship Systems I
Ship construction, stability and damage control, basic thermodynamics, the steam cycle and engineering plant, including introduction to gas turbine, diesel and nuclear powered systems.

Credit Hours: 3

NAVY 2130: Evolution of Warfare
Evolution of strategy, tactics, weapons and leadership from earliest beginning through the Vietnam period. Development of military policy, the impact of warfare on the political, social and economic structure of nations.

Credit Hours: 3

NAVY 2210: Naval Ship Systems II
Naval weapons systems, their employment and control, including the basic fire control problem, with emphasis on new systems.

Credit Hours: 3

NAVY 3120: Marine Navigation
Theoretical and practical application of the principles of marine navigation. Includes fundamentals of dead reckoning, piloting, tides and current, celestial navigation, electronic navigation.

Credit Hours: 3

NAVY 3140: Leadership and Management
This course will provide a basic understanding of the interrelationship between authority, responsibility and accountability within a task oriented organization. Students will learn to apply leadership and management skills to prioritize competing demands and to attain mission objectives; the importance of planning and follow-up; and develop a basic understanding of communication and counseling as it pertains to personnel management.

Credit Hours: 3

NAVY 3230: Fundamentals of Maneuver Warfare
This course prepares future military officers and other leaders for service by studying modern tactical principles, current military developments, and other aspects of warfare and their interactions with and influences on maneuver warfare doctrine. There is a specific focus on the United States Marine Corps as the premier maneuver warfighting organization. Study also includes historical influences on tactical, operational, and strategic levels of maneuver warfare practices in the current and future operating environments. Graded on A-F basis only.

Credit Hours: 3

NAVY 4940: Leadership and Ethics
(same as PEA_ST 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Paradigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a capstone course for juniors and seniors enrolled in NROTC it is open to all MU students.

Credit Hours: 3

Prerequisites: junior standing required
NAVY 4940W: Leadership and Ethics - Writing Intensive
(same as PEA_ST 4940). The curriculum provides a foundation in leadership, ethical decision making, the Law of Armed Conflict and the military justice system. Course explores ethical theories and helps students to build an ethical framework for decision making. Topic areas include: Kant, Utilitarianism, Stoicism, Constitutional Paradigm, Uniform Code of Military Justice and Law of Armed Conflict. Designed as a capstone course for juniors and seniors enrolled in NROTC it is open to all MU students.
Credit Hours: 3
Prerequisites: successful completion of the first two years of medical school

Nuclear Engineering (NU_ENG)

NU_ENG 2201: Topics in Nuclear Engineering
Current and new developments in nuclear engineering.
Credit Hours: 3
Prerequisites: sophomore standing; PHYSCS 1210 and PHYSCS 1220 and MATH 1100 or MATH 1120 or instructor's consent

NU_ENG 2303: Harnessing the Atoms in Everyday Life: Fulfill M Curie's Dream
Introduction to applications of nuclear science and technology, utilizing web-based learning scenarios.
Credit Hours: 3

NU_ENG 4001: Topics in Nuclear Engineering
Current and new developments in nuclear engineering. May be repeated for credit.
Credit Hour: 2-5
Prerequisites: instructor's consent

NU_ENG 4303: Radiation Safety
(same as RA_SCI 4303) Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.
Credit Hours: 3
Prerequisites: college physics, calculus based

NU_ENG 4315: Energy Systems and Resources
(same as ECE 4020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300 or equivalent

NU_ENG 4315W: Energy Systems and Resources - Writing Intensive
(same as ECE 4020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies. 
Credit Hours: 3
Prerequisites: ENGINR 2300 or equivalent

NU_ENG 4319: Physics and Chemistry of Materials
(same as PHYSCS 4190, BIOL_EN 4480, CHEM 4490, BME 4480; cross-leveled with NU_ENG 7319, PHYSCS 7190, BIOL_EN 7480, CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics,
Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2750, CHEM 1320 or equivalent, or instructors consent

---

**NU_ENG 4328: Introductory Radiation Biology**  
(same as BIO_SC 4328, RADIOL 4328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.  
**Credit Hours:** 3  
**Prerequisites:** junior standing, Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

---

**NU_ENG 4330: Science and Technology of Terrorism and Counter Terrorism**  
(same as PEA_ST 4330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.  
**Credit Hours:** 3

---

**NU_ENG 4331: Nonproliferation Issues for Weapons of Mass Destruction**  
Nonproliferation and impact on technology and world events.  
**Credit Hours:** 3  
**Prerequisites:** junior/senior standing or instructor's consent. May be repeated for credit

---

**NU_ENG 4331W: Nonproliferation Issues for Weapons of Mass Destruction - Writing Intensive**  
Nonproliferation and impact on technology and world events.  
**Credit Hours:** 3  
**Prerequisites:** junior/senior standing or instructor's consent. May be repeated for credit

---

**NU_ENG 4346: Introduction to Nuclear Reactor Engineering I**  
(same as ECE 4030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.  
**Credit Hours:** 3  
**Prerequisites:** ENGINR 1200, ENGINR 2300 or equivalent

---

**NU_ENG 4369: Principles of Direct Energy Conversion**  
Principles and utilization of thermolectric, thermonic, photovoltaic, magnetohydrodynamic generators and fuel cells.  
**Credit Hours:** 3  
**Prerequisites:** ENGINR 2300, MAE 3400, or equivalent

---

**NU_ENG 4375: Introduction to Plasmas**  
(same as ECE 4550; cross-leveled with NU_ENG 7375, ECE 7550). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.  
**Credit Hours:** 3  
**Prerequisites:** ECE 4930 or instructor's consent

---

**NU_ENG 4391: Nuclear Radiation Detection**  
Principles and application of radiation detectors and analyzers: ionization, Geiger-Muller, proportional, liquid and solid scintillation, semiconductor, pulse height analyzers, coincidence circuits, data reduction, tracer applications, activation analysis. Lectures, laboratory.  
**Credit Hours:** 3  
**Prerequisites:** senior standing or instructor's consent

---

**NU_ENG 7001: Topics in Nuclear Science and Engineering**  
Current and new developments in nuclear engineering.  
**Credit Hour:** 2-5  
**Prerequisites:** instructor's consent

---

**NU_ENG 7080: Medical Ethics for Medical Physics**  
This course will start with an introduction into medical ethics then transitions into research procedures with humans and animals. This course will cover research ethics, professional conduct, authorship, publishing, and plagiarism.  
**Credit Hour:** 1

---

**NU_ENG 7085: Special Problems in Nuclear Science and Engineering**  
Special Problems in Nuclear Science and Engineering.  
**Credit Hour:** 1-5

---

**NU_ENG 7087: Seminar in Nuclear Science and Engineering**  
Reviews of investigations and projects of importance in nuclear engineering.  
**Credit Hour:** 1

---

**NU_ENG 7302: Safe Handling of Radioisotopes**  
Introduction of methods and procedures for safe handling of radioisotopes in the research laboratory. Intensive lecture and laboratory training sessions designed for persons planning to use radioisotopes at the University.  
**Credit Hour:** 1  
**Prerequisites:** instructor's consent

---

**NU_ENG 7303: Radiation Safety**  
(same as RA_SCI 7303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.  
**Credit Hours:** 3  
**Prerequisites:** college physics, calculus based
NU_ENG 7306: Advanced Engineering Math
(cross-leveled with NU_ENG 7306). Applies ordinary and partial differential equations to engineering problems; Fourier's series; determinants and matrices; Laplace transforms; analog computer techniques.
Credit Hours: 3
Prerequisites: MATH 4100

NU_ENG 7313: Nuclear Science for Engineering for Secondary Science Teachers
This one-week course is for high school science and math teachers, and provides basic of nuclear scheme concepts and their applications, types of radiation (including radiation detection and protection), and industrial, medical and nuclear power generation application.
Credit Hours: 3
Prerequisites: instructor's consent; actively engaged in STEM teaching at the secondary level

NU_ENG 7315: Energy Systems and Resources
(same as ECE 7020). Analysis of present energy usage in Missouri, USA and the world, evaluation of emerging energy technologies and trends for the future. Economics and environmental impact of the developed technologies.
Credit Hours: 3
Prerequisites: ENGINR 2300 or equivalent

NU_ENG 7319: Physics and Chemistry of Materials
(same as PHYSCS 7190, BIOL_EN 7480, CHEM 7490; cross-leveled with NU_ENG 4319, PHYSCS 4190, BIOL_EN 4480, CHEM 4490, BME 4480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSCS 2750, CHEM 1320 or equivalent, or instructors consent

NU_ENG 7320: Natural Resources and Nuclear Energy
Not for engineering students. Lecture, demonstration; describes physical environment, energy, power plants, nuclear reactors; radioactivity, its biological effects; health physics measures, rad-waste disposal; nuclear safeguards, nuclear explosives, societal implications.
Credit Hours: 3
Prerequisites: high school algebra

NU_ENG 7328: Introductory Radiation Biology
(same as BIO_SC 7328, RADIOL 7328, and V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.
Credit Hours: 3
Prerequisites: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent

NU_ENG 7330: Science and Technology of Terrorism and Counter Terrorism
Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.
Credit Hours: 3

NU_ENG 7331: Nonproliferation Issues for Weapons of Mass Destruction
Nonproliferation and impact on technology and world events.
Credit Hours: 3
Prerequisites: junior or senior standing or instructor's consent

NU_ENG 7335: Nuclear Safeguards Science and Technology
(same as ECE 7335). This course provides an overview of nuclear materials management and safeguards, including physical protection systems, material accounting and control, monitoring, and regulatory issues.
Credit Hours: 3
Prerequisites: NU_ENG 4303 or NU_ENG 7303

NU_ENG 7341: Nuclear Chemical Engineering
Principles and processes of importance in the field of nuclear technology.
Credit Hours: 3

NU_ENG 7346: Introduction to Nuclear Reactor Engineering I
(same as ECE 7030). Engineering principles of nuclear power systems, primarily for the production of electrical energy.
Credit Hours: 3
Prerequisites: ENGINR 1200, ENGINR 2300 or equivalent

NU_ENG 7349: Nuclear Engineering Materials
Properties of materials for reactor components; radiation damage and corrosion; metallurgy of reactor materials.
Credit Hours: 3
Prerequisites: upper division or graduate standing in Physical Sciences or Engineering, or instructor's consent

NU_ENG 7353: Introduction to Fusion
Basic plasma physics, principles of thermonuclear fusion, plasma confinement and heating, and devices.
Credit Hours: 3
Prerequisites: graduate standing in Engineering or Science or instructor's consent

NU_ENG 7357: Nuclear Heat Transport
experiments on flow coast down, steady state and transient forced convection heat transfer, boiling heat transfer.

**Credit Hours:** 2  
**Prerequisites:** NU_ENG 4305, NU_ENG 4346 or instructor’s consent

---

**NU_ENG 7365: Nuclear Power Engineering**  
Nuclear reactor heat generation and removal; nuclear reactor coolants; analysis of nuclear reactor power plants.

**Credit Hours:** 3  
**Prerequisites:** ENGINR 2300

---

**NU_ENG 7369: Principles of Direct Energy Conversion**  
Principles and utilization of thermoelectric, thermionic, photovoltaic, magnetohydrodynamic generators and fuel cells.

**Credit Hours:** 3  
**Prerequisites:** ENGINR 2300, MAE 3400, or equivalent

---

**NU_ENG 7375: Introduction to Plasmas**  
(same as ECE 7550; cross-leveled with NU_ENG 4375, ECE 4550). Equations of plasma physics, interaction of waves and plasmas; plasma sheaths and oscillations; measurements and applications.

**Credit Hours:** 3  
**Prerequisites:** ECE 4930 or instructor's consent

---

**NU_ENG 8402: Nuclear Fuel Cycle**  
Covers the nuclear fuel cycle from mine through enrichment, fuel element burn-up reactor physics, chemical reprocessing, waste disposal, with special emphasis on the newer proliferation-resistant fuel cycles.

**Credit Hours:** 3  
**Prerequisites:** NU_ENG 4346 or NU_ENG 4305 and instructor’s consent

Credit Hours: 3
Prerequisites: MAE 3200 or instructor's consent

NU_ENG 8435: Physics of Diagnostic Radiology
Principles and applications of X-ray production and interactions. Images production concepts including X-ray film, intensifying screens, grids, fluoroscopy, image intensification and television monitors. Image quality analysis and assessment.

Credit Hours: 3
Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8439: Clinical Physics in Radiotherapy
Principles and applications of radiation producing units, exposure and dose measurements, and calibration. External beam physics parameters and application to fixed field and rotational field treatment planning.

Credit Hours: 3
Prerequisites: NU_ENG 8409 or equivalent or instructor's consent

NU_ENG 8452: Ultrasound and Magnetic Resonance Imaging
The physical principles of MRI and ultrasound including clinical instrumentation, artifacts in images, biological effects and quality control. Images obtained with both techniques will be presented.

Credit Hours: 3
Prerequisites: NU_ENG 4391, NU_ENG 8409, NU_ENG 4306 or equivalent

NU_ENG 8453: Advanced Fusion Theory
Plasma stability theory, charged particle diffusion, slowing down of charged particles, interaction of radiation with matter, direct energy conversion using charged particles, and engineering considerations.

Credit Hours: 3
Prerequisites: NU_ENG 4353 and NU_ENG 4375 or PHYSCS 8450 or instructor's consent

NU_ENG 8461: Neutron Transport Theory
The Boltzmann equation; general properties and solution; numerical methods of solving the transport equation; neutron thermalization and neutron spectra.

Credit Hours: 3
Prerequisites: NU_ENG 8412; MATH 4940, MATH 4300, or instructor's consent

NU_ENG 8470: Fast Reactor Analysis
Analytical methods for designing fast breeder reactor systems. Graded on a S/U basis only.

Credit Hours: 3
Prerequisites: NU_ENG 8412, NU_ENG 8432, NU_ENG 8451 or instructor's consent

NU_ENG 8471: Radiation Protection
Theory and applications of radiation protection and health physics. Radiation dosimetry methods and calculations, shielding evaluations, equipment surveys and inspection, environmental monitoring, radiation standards and regulations and administration presented.

Credit Hours: 3
Prerequisites: NU_ENG 4303 and NU_ENG 4328

NU_ENG 9090: Research in Nuclear Science and Engineering
Independent investigation in nuclear engineering to be presented as a thesis. Graded on an S/U basis only.

Credit Hour: 1-99

Nuclear Medicine (NUCMED)

NUCMED 1000: Introduction to Nuclear Medicine
Introduction to the profession of nuclear medicine technology. In addition to scheduled clinical experiences, topics include educational requirements, procedures, and professional trends. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Pre-Health Professions students only

NUCMED 3255: Orientation to Clinical Practice
This course provides an introductory experience to clinical practice. Must be accepted into Nuclear Medicine Program. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to Nuclear Medicine students, junior standing required

NUCMED 3256: Clinical Nuclear Medicine I
Introductory clinical course. Introduces instrumentation, administration, procedures, and laboratory techniques. Includes supervised clinical participation.

Credit Hours: 2
Prerequisites: NUCMED 3263 and restricted to Nuclear Medicine students only

NUCMED 3263: Morphological Correlations in Nuclear Medicine I
Anatomy, physiology, and pathology of the human body as assessed using medicine techniques. The first of two courses that address current clinical applications of nuclear medicine.

Credit Hours: 3
Prerequisites: restricted to Nuclear Medicine students only

NUCMED 3328: Introductory Radiation Biology
(same as BIO_SC 4328, NU_ENG 4328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.

Credit Hours: 3
Prerequisites: junior standing
Recommended: Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent
NUCMED 4085: Problems in Nuclear Medicine
Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.
Credit Hour: 1-3

PREREQUISITE:

NUCMED 4232: Clinical In Vitro
Detailed review of current regulations and procedures governing the use of open sources of radioactivity in a nuclear medicine setting.
Credit Hours: 3
Prerequisites: Restricted to Nuclear Medicine students

PREREQUISITE:

NUCMED 4268: Clinical Nuclear Medicine II
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.
Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

PREREQUISITE:

NUCMED 4268W: Clinical Nuclear Medicine II - Writing Intensive
Continuation of clinical series taught in conjunction with NUCMED 3256 and NUCMED 4232. Addresses advanced therapeutic and diagnostic procedures, computer applications, and quality assurance procedures.
Credit Hours: 3
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

PREREQUISITE:

NUCMED 4269: Clinical Nuclear Medicine III
Final course in clinical series. Seminar discussion of the areas of professional ethics, current medical-legal considerations, and future nuclear medicine applications.
Credit Hour: 1
Prerequisites: NUCMED 3256. Restricted to Nuclear Medicine students only

PREREQUISITE:

NUCMED 4299: Morphological Correlations in Nuclear Medicine II
Anatomy, physiology, and pathology of the human body as assessed using nuclear medicine techniques. The second of two courses that address current clinical applications of nuclear medicine.
Credit Hours: 3
Prerequisites: NUCMED 3263, restricted to Nuclear Medicine students

PREREQUISITE:

NUCMED 4327: Nuclear Medicine Instrumentation
Radionuclide imaging systems and the use of computers. Topics include Anger camera systems, emission tomography, ultrasound, nuclear magnetic resonance, and bone absorptionmetry.
Credit Hours: 3
Prerequisites: Restricted to Nuclear Medicine students

PREREQUISITE:

NUCMED 4329: Radiopharmaceuticals in Nuclear Medicine
Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.
Credit Hours: 3

PREREQUISITE:

NUCMED 4330: PET in Nuclear Medicine
Overview of special isotope production techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PHYSICS 1210 and NUCMED 4327 or instructor's consent. Restricted to Nuclear Medicine students only

PREREQUISITE:

NUCMED 4481: Microbiological Control and Radiation Monitoring
This lecture and laboratory class includes analytic techniques used for monitoring and controlling microbial, particulate, and radioactive contamination. Topics will include testing of QC supplies, monitoring of clean room environments, product testing both before and after sterilization, bioburden / microbial limit testing, sterility testing as a qualitative measure for contamination control, endotoxin testing, waste handling, and disposal techniques. Graded on A-F basis only.
Credit Hours: 4
Prerequisites or Corequisites: CDS 4328, or NUCMED 3328 and RA_SCI 4303; CHEM 2100 ; BIOCHM 3630; MICROB 2800; STAT 1200 or STAT 1300 or STAT 1400
Corequisites: concurrent enrollment in NUCMED 4842

PREREQUISITE:

NUCMED 4482: Statistical Analysis in Radioisotope Manufacturing
This combination lecture and computer lab class covers topics including statistical methods for sample evaluation, data analysis software coding (e.g., MINTAB), quality assurance methodologies used for ensuring radiochemical and radioisotopic quality and integrity during production, transportation, and end use, and practice standards for maintaining regulatory compliance. Graded on A-F basis only.
Credit Hours: 2
Prerequisites or Corequisites: CDS 4328, or NU_ENG 4328 and NU_ENG 4303; CHEM 2100; BIOCHM 3630; STAT 1200 or STAT 1300 or STAT 1400
Corequisites: concurrent enrollment in NUCMED 4841

PREREQUISITE:

NUCMED 4483: Quality Control of Radiochemical Products
This course is designed to be a correlative course taken in conjunction with other nuclear medicine courses and will provide an overview of reactor and accelerator based production of radioisotopes, and the techniques used to ensure product identity, strength, and purity. Additionally, course topics will include the discussion of the factors affecting radiochemical integrity, Good Laboratory Practice (GLP), Good Manufacturing Practice (GMP), FDA documentation practices, vendor qualifications, and control of materials. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: CDS 4328 or NU_ENG 4328 and NU_ENG 4303; CHEM 2100; BIOCHM 3630; STAT 1200 or STAT 1300 or STAT 1400

PREREQUISITE:

NUCMED 4939: Nuclear Clinical Internship I
Introduction to the practical experience in the clinical setting with imaging procedures performed in nuclear medicine and safe isotope in the production of radiopharmaceuticals. Graded on A-F basis only.
**NUCMED 4940: Nuclear Clinical Internship II**
Practical experience in the clinical setting with imaging procedures and safe isotope handling for radiopharmaceutical production performed in nuclear medicine. Graded on A-F basis only.

Credit Hours: 6  
Prerequisites: Restricted to Nuclear Medicine students

**NUCMED 4941: Nuclear Clinical Internship III**
Practical experience in clinical setting with advanced imaging techniques, radiopharmaceutical production, and instrument quality control. Graded on A-F basis only.

Credit Hours: 7  
Prerequisites: NUCMED 4940. Restricted to undergraduate Nuclear Medicine students

**NUCMED 7085: Problems in Nuclear Medicine**
Supervised investigation in an aspect of nuclear medicine technology, usually culminating in a written report.

Credit Hours: 3

**NUCMED 7329: Radiopharmaceuticals in Nuclear Medicine**
Introduces concepts of radiopharmacy, generator systems, labeling of materials, quality control procedures and FDA regulations concerning radiopharmaceuticals.

Credit Hours: 3  
Prerequisites: CHEM 1320 and instructor's consent

**NUCMED 7330: PET in Nuclear Medicine**
Overview of special isotope production in techniques for positron emitting agents; instrumentation concerns beyond standard Anger imaging; and image critique and analysis with morphologic correlation. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: PHYSCS 1210 and NUCMED 4327 or instructor's consent

**NURSE 1000: Advisory Seminar for Nursing**
Orientation to the undergraduate nursing program, professional role development, and introduction to the professional milieu. Graded on an S/U basis only.

Credit Hour: 1

**NURSE 2200: Foundations of Communication and Professionalism in Nursing**
In this course, students develop their interpersonal communication skills and cultural competency in health care. Topics include social determinants of health, biases in the healthcare setting, health literacy, and health disparities. Students will learn evidence-based communication techniques. Graded on A-F basis only.

Credit Hours: 3

**NURSE 2200H: Foundations of Communication and Professionalism in Nursing - Honors**
In this course, students develop their interpersonal communication skills and cultural competency in health care. Topics include social determinants of health, biases in the healthcare setting, health literacy, and health disparities. Students will learn evidence-based communication techniques. Graded on A-F basis only.

Credit Hours: 3

**NURSE 3002: Topics in Nursing - Biological, Physical, Mathematical**
Specialized topics in nursing not available through regularly offered courses. Sections may be offered either on S/U or A-F basis.

Credit Hour: 1-4

**NURSE 3002H: Topics in Nursing - Biological Sciences- Honors**
Specialized topics in nursing not available through regularly offered courses. Sections may be offered either on S/U or A-F basis.  
Prerequisites: Honors Eligibility required

**NURSE 3080: Introduction to Nursing Informatics**
Informatics is the science of managing information. This course provides basic content for understanding informatics in nursing. Principles, theories, and practices of informatics from seeking and storing to retrieving and analyzing information will be presented. Students will apply basic content as they consider informatics from consumer and provider perspectives for current or future use as nursing professionals.

Credit Hours: 2  
Prerequisites: clinical major

**NURSE 3080W: Introduction to Nursing Informatics - Writing Intensive**
Informatics is the science of managing information. This course provides basic content for understanding informatics in nursing. Principles, theories, and practices of informatics from seeking and storing to retrieving and analyzing information will be presented. Students will apply basic content as they consider informatics from consumer and provider perspectives for current or future use as nursing professionals.

Credit Hours: 2  
Prerequisites: clinical major

**NURSE 3100: Pharmacology for Nursing**
This course will focus on pharmacological classification and the nurse's role in medication administration and patient education. Medication issues with special populations will be addressed. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: PTH_AS 2201 and PTH_AS 2203 and MPP 3202

**NURSE 3170: Nursing Skills, Technologies, and Simulation**
Provides laboratory experiences for fundamental to complex nursing skills and procedures. Focuses on application of therapeutic interventions and procedure to provide safe, patient-centered care.
NURSE 3180: Role Transitions
Explores returning-to-school issues important to adult learners. Links previous basic nursing courses with baccalaureate courses and begins building new knowledge on prior nursing education.

Credit Hours: 4
Prerequisites: Clinical BSN Nursing CLN_BSN
Recommended: NURSE 3270

NURSE 3200: Pathophysiology
Focus is on commonly occurring alterations in health across the life span. Developmental concepts, diagnostics, and treatment modalities are integrated throughout course content. Enrollment requires admission to the clinical nursing major BSN option.

Credit Hours: 4
Prerequisites: Restricted to students in the Clinical Nursing Major

NURSE 3260: Pathophysiology
Focus is on commonly occurring alterations in health across the life span. Developmental concepts, diagnostics, and treatment modalities are integrated throughout course content. Course is designed for students applying to the accelerated BSN option.

Credit Hours: 3
Prerequisites or Corequisites: MICROB 2800 or MICROB 3200
Prerequisites: MPP 3202; PTH_AS 2201 and PTH_AS 2203

NURSE 3270: Foundations of Nursing: Physical Assessment and the Nursing Process
NURSE 3270 provides knowledge and skills in physical assessment and the application of the Nursing Process. Clinical application of foundational knowledge determines the health status of individuals.

Credit Hours: 5
Prerequisites or Corequisites: For Clinical BSN, students must have completed NURSE 2000 and NURSE 2100 and be concurrently enrolled in NURSE 3170, NURSE 3200, NURSE 3300; for Clinical BSN Accelerated students must have completed NURSE 3200 or NURSE 3260 and be concurrently enrolled NURSE 3170 and NURSE 3100 or NURSE 3300

NURSE 3280: Fundamentals of Nursing
This course assists students to identify and apply the nursing process in both laboratory and clinical settings. The course provides classroom, laboratory and clinical experiences for learning fundamental to complex nursing skills and technologies. Assists students with necessary application of foundational knowledge and critical thinking in the clinical setting. The student will utilize skills of data collection, documentation, communication, implementation and evaluation of a plan of care to meet health care needs. Graded on A-F basis only.

Credit Hours: 5
Prerequisites or Corequisites: NURSE 3200 and NURSE 3300 or NURSE 3100
Prerequisites: restricted to Clinical BSN Nursing Major
Corequisites: NURSE 3370

NURSE 3300: Pharmacology and Nursing Implications
This course will focus on pharmacological classifications and the nurse’s role in medication administration and patient education. Medication issues with special populations will be addressed. Graded on a A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Clinical Nursing Majors
Recommended: PTH_AS 2201 and PTH_AS 2203 and MPP 3202

NURSE 3350: Individual Study
Independent study for qualified students in specific areas of interest in nursing under faculty guidance. Some sections may be graded A-F only or S/U only.

Credit Hour: 0-6
Prerequisites: Instructor's consent

NURSE 3370: Health Assessment in Nursing
This course provides opportunities for students to acquire and build upon knowledge of health and illness and to develop skill in assessment of the whole individual. Students will learn a holistic approach to assessment, focused on physical, mental and social aspects, to determine the health status of individuals, families and communities. Students will develop skills in taking a health history and conducting a complete head-to-toe assessment of adults as well as individuals across the life-span from infants and children to older adults. Students will perform skills in a laboratory setting that are transferable to the clinical setting. The student is expected to apply knowledge from prerequisite and concurrent courses in data collection and interpretation of findings to determine the need for nursing care. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Traditional Students - Clinical Nursing Majors (CLN_BSN) NURSE 2200 or NURSE 2100; Accelerated Students - Acceptance into the Accelerated Nursing Program
Corequisites: Traditional Students - NURSE 3280; Accelerated Students - NURSE 3280

NURSE 3470: Mental Health Nursing
Students discover behavioral, social, interpersonal, and neuro-biological aspects of mental health nursing. Therapeutic use of self in designing and implementing nursing care for clients throughout the life cycle is emphasized. Content on psychopathology is included.

Credit Hours: 5
Prerequisites: NURSE 3270

NURSE 3670: Nursing of Adults I
Application of the nursing process to deliver care for hospitalized adults with health deviations. Evidence, technologies, professional standards and collaboration are used to enhance patient-centered, safe and effective care.

Credit Hours: 6
Prerequisites: NURSE 3170, NURSE 3270, NURSE 3100 or NURSE 3300, NURSE 3200 or NURSE 3260
Corequisites: NURSE 3900

</tbody>
</table>
literacy and critical thinking for health researchers. Graded on A-F basis only.

Credit Hours: 3

NURSE 7087: Leadership and Technology Institute
Introduction to knowledge and skills essential to support research and practice doctorates. May be repeated for credit.

Credit Hour: 1
Prerequisites: Admission to DNP or PhD program

NURSE 7100: Theoretical Basis for Advanced Nursing
Analysis, application and evaluation of a variety of nursing and non nursing theories used in advanced nursing practice and research.

Credit Hours: 3

NURSE 7110: Advanced Nursing Role Acquisition
An overview of the advanced nursing practice role and professional issues. Provides foundational knowledge on which other advanced nursing courses will build.

Credit Hours: 3
Prerequisites: Admission to the graduate program or faculty consent

NURSE 7120: Advanced Physiology and Pathophysiology
Focus on the normal and altered physiological functioning of body systems. Provides essential knowledge of human health and disease across the lifespan necessary for advanced nursing practice.

Credit Hours: 3

NURSE 7130: Advanced Pharmacology and Pharmacotherapeutics
Advanced practice nurse drug therapy management for health maintenance and treatment of acute episodic and chronic health problems in various populations over the life span.

Credit Hours: 3
Prerequisites: BSN or instructor's consent

NURSE 7140: Advanced Health Assessment and Promotion
Expands history and physical assessment techniques across lifespan. Addresses diagnostic reasoning, differential diagnosis, selection of common diagnostic test, disease risk factors, and health promotion strategies.

Credit Hours: 3.5
Prerequisites: BSN or instructor's consent

NURSE 7150: Research Basis for Advanced Nursing
Examines fundamentals of scientific inquiry. Addresses research design issues. Focuses on interpreting, critiquing, and synthesizing research findings.

Credit Hours: 3
Prerequisites: NURSE 7100

NURSE 7500: Foundations of Care Management: Professional, Legal, Financial, and Business
This course will introduce students to the interdisciplinary care management role. Topics covered include practice settings and models of care as well as professional, legal, financial, and leadership responsibilities within the context of the current U.S. health system. Graded on A-F basis only.

Credit Hours: 3

NURSE 7510: Pharmacology, Pathophysiology, & Physical Assessment for Care Managers
This course develops student's knowledge of common acute and chronic health conditions. Topics include normal and altered physiological functioning, physical assessment, and therapeutic interventions. Students gain an understanding of human health and disease across the lifespan, which can be applied to care management practice. Graded on A-F basis only.

Credit Hours: 3

NURSE 7750: Functional Dimensions of Aging
(same as ARCHST 7640, F_C_MD 7750, HMI 7750, H_D_FS 7750, SOC_WK 7752). This online course provides a variety of learning activities to facilitate understanding and appreciation of physical, psychosocial, and economic challenges older adults may experience. Content will include determinants of and approaches to quality of life and successful aging. Graded on A-F basis only.

Credit Hours: 3

NURSE 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, HMI 7751, H_D_FS 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

NURSE 8001: Topics in Advanced Clinical Nursing
Specialized topics in advanced clinical nursing not available through regularly offered courses.

Credit Hours: 3

NURSE 8002: Research Topics in Nursing and Health
Topics courses are intended for special offerings, or as opportunities to experiment with a new course prior to seeking approval for it as a regular course. Graded on A-F basis only.

Credit Hours: 3

NURSE 8010: Family Dynamics and Intervention
(same as H_D_FS 8012). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.

Credit Hours: 3

NURSE 8010: Family Dynamics and Intervention
(same as H_D_FS 8012). Theories of family function and dysfunction; techniques of assessment; models of family intervention. Practicum with selected families.

Credit Hours: 3

Prerequisites: NURSE 7100 (Nursing students)
NURSE 8020: Intermediate Statistical Methods for Health Researchers
Examination of generalized linear models, multiple logistic regression, and multilevel modeling as applied to health sciences research.
Credit Hours: 3
Prerequisites: NURSE 7010 or equivalent

NURSE 8030: Interpreting Statistical Evidence in the Health Sciences
Students learn to critically evaluate statistical designs and data analysis methods used in health sciences research and scientific evidence for health care decision making. May be repeated for credit.
Credit Hours: 3
Prerequisites: Graduate level statistics course

NURSE 8055: Problems in Nursing
Guided readings, special study and/or a practicum in an area of the student's interest or in an area which the student needs to strengthen. Selected sections of the course may be offered on A-F or S/U basis only.
Credit Hour: 1-4
Prerequisites: instructor's consent

NURSE 8090: Research in Nursing
Original investigation for presentation as thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: graduate statistics, instructor's consent

NURSE 8100: Principles of Epidemiology
Explores key concepts of epidemiology and epidemiologic methods for studying the distribution and determinants of health and disease in populations. Application to public health and population-based practice addressed.
Credit Hours: 3
Prerequisites: NURSE 7150 or faculty consent

NURSE 8210: Special Health Care Needs of Children
Perform developmental, neuro developmental, and psychosocial assessments of chronically ill children. Collaborate with families, schools; health care, community, family services to meet child's needs.
Credit Hour: 3.5-5
Prerequisites: NURSE 7100 or instructor's consent

NURSE 8300: Public Health and Sociocultural Issues
Explores concepts of public health with a focus on the advanced practice nurse in population-based/primary care practice; core public health functions will be addressed at three service levels--the aggregate, the family, and the individual.
Credit Hours: 3
Prerequisites: NURSE 7100

NURSE 8310: Health Disparities of Rural and Other Underserved Populations
In-depth examination of rural and other vulnerable populations and their interactions with the health care system including access, utilization, and outcomes. May be repeated for credit.
Credit Hours: 3
Prerequisites: NURSE 7087, NURSE 8300 or faculty consent

NURSE 8400: Adult and Geriatric Primary Care I
Advanced practice nursing clinical diagnosis and management of acute and chronic cardiovascular, respiratory, HEENT, renal, metabolic and musculoskeletal problems in adults, older adults and their families.
Credit Hour: 3.5-5
Prerequisites: NURSE 7120, NURSE 7130, NURSE 7140

NURSE 8410: Adult and Geriatric Primary Care II
Advanced practice nursing clinical diagnosis and management of acute and chronic gastrointestinal, endocrine, hematological, neuropsychological problems and bioterrorism and CAM issues in adults, older adults and their families.
Credit Hour: 3.5-5
Prerequisites: NURSE 8400

NURSE 8420: Newborn Through Adolescence Primary Care
Advanced nursing practice of newborn through adolescence of health maintenance/promotion, clinical diagnosis and management of common childhood illness, behavioral, developmental problems. Advanced knowledge of human growth, development, family dynamics, community resources, collaborative relationships. Integrated clinical practicum.
Credit Hour: 3.5-5
Prerequisites: NURSE 7140 or NURSE 7310

NURSE 8425: Participatory Approaches for Health and Health Systems
(same as F_C_MD 8425). Focuses on the use of participatory approaches for the design of health and health-system interventions. Graded on A-F basis only.
Credit Hours: 3.5-5
Prerequisites: NURSE 8100 or F_C_MD 8420 or instructor consent

NURSE 8430: Reproductive and Sexual Health Primary Care
Credit Hour: 3.5-5
Prerequisites: NURSE 8140 or F_C_MD 8420 or instructor's consent

NURSE 8540: Advanced Diagnostics and Reasoning
Expands upon knowledge of advanced assessment, diagnostic, and procedural skills; utilizes current technology in a cost-effective and patient-centered manner. Clinical increases specialty-specific knowledge. May be repeated for credit.
Credit Hour: 3.5-5
Prerequisites: 4th clinical specialty course
NURSE 8610: Diagnostics and Psychopharmacology for Mental Health Nurses
Emphasis is on the neurobiologic basis and diagnosis of mental health problems and advanced nursing management of psychiatric conditions using pharmaceutical agents.

Credit Hour: 3.5-4
Prerequisites: NURSE 7120, NURSE 7130 and NURSE 7140

NURSE 8620: Brief Individual Psychotherapy for Mental Health Nurses
Develops advanced skills in assessment, treatment, and follow-up evaluation of individuals experiencing acute mental health problems. Emphasizes brief psychotherapy based on frameworks from nursing and other disciplines.

Credit Hour: 3.5-4
Prerequisites: NURSE 8610

NURSE 8640: Group Therapy and Social Skills Training
Application of group and behavioral methods in mental health prevention, promotion, maintenance, and restoration. Designing, implementing, and evaluating mental health promotion groups and social skills training programs.

Credit Hour: 3.5-4
Prerequisites: NURSE 8610

NURSE 8660: Mental Health Nursing Interventions for Families
Application of nursing and family theories in advanced nursing management of families experiencing a variety of problems. Emphasis on designing, implementing, and evaluating advanced nursing interventions for families.

Credit Hour: 3.5-4
Prerequisites: NURSE 8620 or consent of instructor

NURSE 8660: Pediatric Mental Health Assessment and Treatment
Develops advanced skills in psychiatric assessment and follow-up evaluation of children and adolescents experiencing mental health problems. Explores diagnosis, treatment, and management of child and adolescent mental health disorders. Graded on A-F basis only.

Credit Hour: 3.5-4
Prerequisites: NURSE 8610 or faculty consent

NURSE 8720: Symptom Management in Acute and Chronic Illness
Clinical management of symptoms of acute and chronic illness across the lifespan. Preparation for teaching patient self-management strategies. Integrated clinical practicum with selected population and setting.

Credit Hour: 3-5
Prerequisites: NURSE 7140 and NURSE 7150 or faculty consent

NURSE 8820: Health Care Financial Management
Prepares nurses to use the techniques that facilitate financial analysis and decision-making for patient care programs across the healthcare continuum. Focuses on efficient, effective management of resources for delivery of quality healthcare services. Prerequisites: NURSE 7100

Credit Hours: 4

NURSE 8830: Informatics Applications and Innovations in Health Care Systems
This course explores informatics from the perspective of healthrelated fields through technology assessment and evaluation, and research and development in technological innovations. The impact of technology on patient privacy will also be examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7087 or instructor's consent

NURSE 8840: Nursing Leadership, Innovation, and Entrepreneurship
This course will provide an overview of leadership theories and strategies for managing individuals, groups, or systems within rapidly changing healthcare environments. Innovative and cutting edge phenomena in healthcare will be explored as well as entrepreneurship. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7087 or instructors consent

NURSE 8854: Teaching Strategies in Nursing
Examines principles, issues, techniques, and evaluation methods in teaching nursing. Focuses on the development of a variety of teaching strategies and evaluation methods for didactic and clinical settings.

Credit Hours: 3
Prerequisites: NURSE 7100 and NURSE 7110 or instructor's consent

NURSE 8860: Organizations & Human Resource Management in Nursing
This course will examine various organizational theories, organizational behavior, and the impact of change within organizations. Participants will apply and analyze workforce management principles in regard to employee rights, resources, and responsibilities. May be repeated for credit. Graded on an A-F basis only.

Credit Hours: 3
Prerequisites: NURSE 7087 or instructors consent

NURSE 8864: Curriculum Development in Nursing
Examines theoretical foundations, principles, and issues in curriculum design. Explores systematic evaluation of curriculum at all levels.

Credit Hours: 3
Prerequisites: NURSE 7100 and NURSE 7110 or instructor's consent
NURSE 8890: Clinical/Scholarly Project
Design, implement and evaluate nursing projects derived from theory, including written report with explanation or justification to support the empirical and/or theoretical basis for the project. Graded on a S/U basis only.

Credit Hour: 1-3
Prerequisites: NURSE 7100, NURSE 7150, graduate statistics

NURSE 8900: Research Practicum in Nursing
Selected independent research activities in conjunction with ongoing research programs of faculty. Graded on S/U basis only.

Credit Hour: 1-3
Prerequisites: NURSE 7150, graduate statistics, instructor's consent

NURSE 8910: Translational Evidence-Based Nursing Practice
Provides essential skills for utilizing research to support practice change: assessing practice based problems, analyzing current evidence, proposing practice changes, and developing plans for implementing evidence-based practice concepts.

Credit Hours: 3
Prerequisites: NURSE 8100 or faculty consent

NURSE 8920: Quality, Safety, and Performance Outcomes
Uses information systems to identify and analyze patient safety and other clinical issues and recommend system-wide actions and measurement plans that result in safe, effective, efficient, equitable, patient-centered outcomes.

Credit Hours: 3
Prerequisites: NURSE 8910

NURSE 8930: Health Program Design and Management
Designing, implementing and evaluating effective health programs. Addresses leadership and organizational change issues.

Credit Hours: 3
Prerequisites: NURSE 8920 or instructor's consent

NURSE 8940: Nursing and Health Policy
Designed to explore and critically evaluate the role of nursing and nurse leaders/scholars in health policy development and the organization and financing of health care in response to the health and social needs of the public.

Credit Hours: 3

NURSE 8950: Teaching Nursing Practicum
Participation in application of principles and methods of teaching, learning, and evaluation to the education of nursing students. Graded on S/U basis only.

Credit Hours: 4
Prerequisites: NURSE 8854 and NURSE 8864

NURSE 8954: Distance-Mediated Teaching Nursing Practicum
Faculty-guided application of distance mediated teaching, learning, and evaluation methods with graduate &/or undergraduate nursing students. Course graded on S/U basis only.

Credit Hours: 4
Prerequisites: NURSE 8854 and NURSE 8864 or equivalents

NURSE 8960: Leadership in Nursing and Healthcare Systems Practicum
Participation in application of principles and methods of leadership, management, and evaluation to facilitate patient care operations in various settings. Graded on S/U basis only.

Credit Hours: 5
Prerequisites: NURSE 8800, NURSE 8810, NURSE 8820

NURSE 8980: Advanced Clinical Nursing Practicum
Intensive preceptor or faculty-guided clinical experience that synthesizes previous theory and clinical coursework. Refined knowledge and skills required to transition to an autonomous advanced nursing practice role. Graded on S/U basis only.

Credit Hour: 2-7
Prerequisites: NURSE 8910

NURSE 9070: DNP Clinical Residency
Intensive clinical experience. Prepare experts in advanced nursing practice and leadership to effectively evaluate practice problems, translate evidence into practice, monitor outcomes, and implement innovative models of care. May be repeated for credit. Some sections may be graded on either an A-F or S/U basis only.

Credit Hour: 1-5
Prerequisites: NURSE 8930 and NURSE 8450 or NURSE 8610

NURSE 9080: DNP Residency Project
Final synthesis of DNP coursework culminating in an in-depth practice change project or case analysis impacting a rural or other undeserved population or critical healthcare system need. May be repeated for credit. Some sections may be offered on an A-F or S/U graded basis only.

Credit Hour: 1-3
Prerequisites or Corequisites: NURSE 9080 and NURSE 9070

NURSE 9087: Leadership and Transformational Role Institute
Synthesis of advanced nursing practice knowledge and leadership skills. Prepares DNP graduate to implement an advanced nursing practice role that will result in practice and/or policy change at the local, state, or national levels. May be repeated for credit.

Credit Hours: 2
Prerequisites or Corequisites: NURSE 8930 and NURSE 9070

NURSE 9090: Research in Nursing and Health
Original research leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-12
Prerequisites: Instructor's consent
### NURSE 9100: State of the Science

The existing body of research literature is the foundation upon which new scientific knowledge is built. This course will guide the student through the purpose and processes of scholarly writing. Students will conduct a systematic review of the scientific literature on a selected focus area in the health sciences. Students will work with course faculty, with input from the student’s advisor, to develop and implement strategies to search, evaluate, and synthesize the literature in the selected area. Scholarly writing will be emphasized in this course. Graded on an A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Admission to a doctoral program or permission of instructor

### NURSE 9120: Philosophical and Theoretical Basis for Research

Based on an understanding of the philosophy of science, critically appraise and adapt conceptual models and theoretical frameworks for use in research.

**Credit Hours:** 3  
**Prerequisites:** NURSE 7100 or faculty consent

### NURSE 9131: Responsible Conduct of Research in the Health and Social Sciences

(same as H_D_FS 9131) This course examines professional research ethics including the rights of human subjects. Graded on S/U basis only.

**Credit Hour:** 1  
**Prerequisites:** Instructor's permission required

### NURSE 9132: Writing Research Grants: Skill Building

(same as H_D_FS 9130). This course teaches the components of writing a research grant for external funding. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** NURSE 9120, graduate research methods course, or instructor's permission

### NURSE 9410: Advanced Quantitative Methods

(same as H_D_FS 9200). Study of explanatory and predictive quantitative designs in health-related research, including nested, double-blind, time series, casual models, retrospective cohort; secondary database use will be explored.

**Credit Hours:** 3  
**Prerequisites:** NURSE 9131, Advanced Statistics Course

### NURSE 9420: Qualitative Methods

(same as H_D_FS 9420) Examines the following selected qualitative research approaches appropriate for the study of nursing phenomena and the extension or modification of scientific knowledge so as to be relevant to nursing: case study research methods, verbal qualitative approaches, and nonverbal qualitative approaches. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** NURSE 7150 and doctoral status (or permission of faculty)

### NURSE 9450: Doctoral Seminar: Social Determinants of Health

Doctoral seminar on defining, measuring and conducting research on social determinants of health. May be repeated for credit.

**Credit Hours:** 3  
**Prerequisites:** NURSE 9120 and NURSE 9410

### NURSE 9460: Theories and Interventions in Health Behavior Science

Focuses on health behavior science theories, linking theories to measurement, and designing health behavior interventions. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites or Corequisites:** NURSE 9100, NURSE 9120 or faculty consent

### NURSE 9470: Technology Evaluation in Health Care Systems Research

(same as HMI 9440). Examines technology applications and evaluation methods used to determine outcomes, efficiencies, effectiveness, satisfaction, and cost of using technology. Prerequisites: 6 credit hours of graduate statistics;

**Credit Hours:** 3  
**Prerequisites or Corequisites:** NURSE 9410 or faculty consent

### NURSE 9540: Seminar in Nursing

Course content varies. May be repeated to a maximum of six hours.

**Credit Hour:** 1-99

### NURSE 9550: Meta-Analysis Research

(Same as H_D_FS 9550). Examines quantitative synthesis including research questions, search strategies, coding issues, meta-analysis statistical procedures, and interpretation of findings. Emphasizes conceptual understanding and practical methods.

**Credit Hours:** 3  
**Prerequisites:** 6 credit hours of graduate statistics courses, NURSE 9410 or graduate level quantitative methods course

### NURSE 9560: Qualitative Systematic Reviews

(Same as SOC_WK 9560 and H_D_FS 9560) Examine and carry out elements of qualitative systematic reviews: topic/problem identification, data collection, and analysis. Understand how to limit threats to validity and maximize generalizability.

**Credit Hours:** 3  
**Prerequisites:** NURSE 9420 or equivalent

### NURSE 9570: Advanced Research Practicum

Mentored research experience designed by student, mentor, and program committee based on student's substantive areas of interest and program of research. Graded on S/U basis only.

**Credit Hour:** 1-6  
**Prerequisites or Corequisites:** NURSE 9120; advisor consent

---

**Nutrition (NUTRIT)**
NUTRIT 7020: Monogastric Nutrition
(same as AN_SCI 7312 and NEP 7020; cross-leveled with AN_SCI 4312 and NEP 4020). Principles of nutrition, feed formulation and recent research in poultry feeding. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: AN_SCI 3242

Nutrition and Exercise Physiology (NEP)

NEP 1001: Topics in Nutritional Sciences
Supervised study in specialized topic of nutritional sciences.

Credit Hour: 1-99

NEP 1034: Introduction to Human Nutrition
Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3

NEP 1034H: Introduction to Human Nutrition - Honors
Basic nutrition principles, including: nutrient functions, food sources, and needs; healthy eating tools; energy balance and weight management; nutrition and fitness; nutrition through the life cycle; food safety; and consumer topics. No credit if taken after NEP 2340.

Credit Hours: 3
Prerequisites: Honors eligibility required

NEP 1210: The Ethics of Eating
This introductory course for non-majors provides a general overview of the scope of ethical issues we should consider surrounding the food we eat. We explore the intersection of the science and societal issues regarding what we eat. We will discuss what we choose to eat, how related issues such as agricultural practices and food transportation impact those choices with an emphasis on the intersection of the science and current societal considerations.

Credit Hours: 3

NEP 1310: Food and Cultures of the World
Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.

Credit Hours: 3

NEP 1310W: Food and Cultures of the World - Writing Intensive
Trans-disciplinary approach to nutrition, considering anthropological, physiological, geographical, socioeconomic and psychological elements in world nutrition. These ideas will be explored in the context of cuisines and cultures that are found in the US, but originate elsewhere.

Credit Hours: 3

NEP 1340: Introduction to Exercise and Fitness
Provides students with practical information about exercise and physical fitness. After taking this class, students will be prepared to be physically active, understand the "Do's and Don'ts" of exercise, and know how to live a healthy way of life. As part of the course, students will assess their current level of activity/fitness, develop a plan for improvement, and put that plan into action.

Credit Hours: 3

NEP 1485: Career Exploration in Exercise Science
Undergraduate course designed to provide an overview of the components important to developing an understanding and appreciation of all aspects of Exercise Science. Graded on A-F basis only.

Credit Hour: 1

NEP 1995: Nutritional Food Science
The study of components of food systems and how they are affected by processing, preservation, preparation and by techniques that improve taste, texture, flavor, appearance and nutrient retention. This course is 100% online and includes a virtual lab. Graded on A-F basis only.

Credit Hours: 3

NEP 2085: Problems in Nutritional Sciences
Supervised study in a specialized phase of nutritional sciences.

Credit Hour: 1-99
Prerequisites: consent required

NEP 2140: Exercise Practicum I
This course provides an overview of the necessary skills and techniques for successful implementation of exercise programing. This course will help prepare the student for completion of the PANHP degree and prepare for completion of the ACSM EP-C certification.

Credit Hours: 3
Prerequisites: NEP 1340 and NEP 1485

NEP 2222: Landscape of Obesity
The societal, economic, medical, behavioral, and psychological causes and results of the obesity epidemic and potential modes of treatment and prevention. Lecture course. Graded on A-F basis only.

Credit Hours: 3

NEP 2340: Human Nutrition I
Basic concepts of normal nutrition related to physiological/ chemical processes; changing nutrient needs during human life cycle, emphasis on adult; some social/psychological influences on dietary habits. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing required

NEP 2340H: Human Nutrition I - Honors
Basic concepts of normal nutrition related to physiological/chemical processes; changing nutrient needs during human life cycle, emphasis
NEP 3290: Food Service I: Supervised Practice Experience
A practicum designed to expose the student to concepts of quantity food production, evaluation of products and resources, personnel administration and application of food microbiological principles. 4 hours of supervised practice per week. Graded on A-F basis only.

Credit Hours: 1
Prerequisites: Open only to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics. Department consent required.

NEP 3360: Nutritional Assessment Supervised Practice Experience
Supervised practice to develop skills in screening individuals for nutrition risk; use of dietary, anthropometric, laboratory, clinical and sociocultural criteria to assess nutritional status of individuals, 8 hours of supervised practice per week. Enrollment limited to students who have taken or are concurrently enrolled in NEP 4360; Open to Nutrition and Food majors in the Coordinated Program in Dietetics only.

Credit Hours: 2
Prerequisites: Open only to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics. Departmental consent required.

NEP 3370: Medical Nutrition Therapy I: Supervised Practice Experience
Practice and application of principles of nutrition care for selected disease states. 12 hours of supervised practice per week. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Open to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics. Department consent required.

NEP 3390: Teaching and Counseling Techniques in Nutrition
Principles and theories of learning; Resources, methods and techniques for teaching food/nutrition principles and dietary guidelines; Group dynamics and facilitation; Introduction to counseling theories and methods used in nutrition care of individuals. Lecture course. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: C or better in PSYCH 1000 and NEP 2340

NEP 3400: Teaching & Counseling Techniques in Nutr. Supervised Practice Exp
Skill development and practice in counseling individuals for health promotion and disease prevention and the teaching of food and nutrition topics to groups. 4 hours of supervised practice per week. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Open only to students accepted into the Coordinated Program in Nutrition and Foods/Dietetics. Department consent required.
NEP 3420: Role of Inactivity in Chronic Diseases
This course is designed to provide an understanding of selected topics related to physical inactivity and chronic diseases and conditions including obesity, type 2 diabetes, hypertension, vascular dysfunction, atherosclerosis, heart failure, and dementia. Specifically, this course will focus on examining the scientific evidence supporting the role of sedentarism as a causal factor in the development of chronic diseases and the role of physical activity as a mitigating factor. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 1340 and MPP 3202 or BIO_SC 3700 - NEP majors must have a C or better in these courses.

NEP 3450: Activity Throughout the Lifespan
Course is designed to develop knowledge and understanding of the value of physical activity across the lifespan. The physiology, psychology, and guidelines of exercise, along with the integration of nutrition with physical activity, will be explored from pregnancy through early development and into old age. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 1340 - NEP majors must have a C or higher; May be restricted to Nutrition and Fitness/Physical Activity, Nutrition and Human Performance majors only during early registration.

NEP 3550: Corporate, Community, and Personal Fitness
Course is designed to develop the knowledge and understanding of exercise application for corporate wellness, community programs, and personal fitness. Topics covered will include exercise prescription, behavioral and motivational theories, legality, ethics, and professionalism, and how these topics relate to corporate, community, and personal fitness clients. Students should be able to understand the various needs of these populations and how to apply the science of physical activity, nutrition, and human performance to each. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 1340 and NEP 2340 or 2380. NEP majors must have a C or better in these courses to enroll.

NEP 3590: Community Nutrition Supervised Practice Experience
A practicum which explores and applies the concepts and techniques of nutrition programming in a community setting. 4 hours of supervised practice per week. Enrollment limited to students who have taken NEP 4590. Open to students enrolled in the Coordinated Program in Dietetics only. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Open to Nutrition and Foods students accepted into the Coordinated Program in Dietetics. Departmental consent required.

NEP 3800: Prevention and Care of Athletic Injury
Theory, practice in prevention, emergency care, rehabilitation of injuries encountered in vigorous games.

Credit Hours: 3
Prerequisites: PTH_AS 2201. Restricted from Pre-Nutrition and Fitness majors.

NEP 3850: Physiology of Exercise
This is the basic course in exercise physiology, which applies specific principles and concepts of human physiology to the physical work situation. This course will look at ventilation, oxygen transport, cardiovascular physiology, muscle physiology and the metabolic systems; and emphasis will be given to the adaptations to exercise and training. This course will first explore basic exercise physiology and then will explore many of the applied issues pertaining to performance and health. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PTH_AS 2201; MPP 3202 or BIO_SC 3700. Restricted from Pre-Nutritional and Fitness students.

NEP 3850W: Physiology of Exercise - Writing Intensive
This is the basic course in exercise physiology, which applies specific principles and concepts of human physiology to the physical work situation. This course will look at ventilation, oxygen transport, cardiovascular physiology, muscle physiology and the metabolic systems; and emphasis will be given to the adaptations to exercise and training. This course will first explore basic exercise physiology and then will explore many of the applied issues pertaining to performance and health. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or better in PTH_AS 2201; MPP 3202 or BIO_SC 3700. C or better in ENGLISH 1000.

NEP 4001: Topics in Nutrition and Exercise Physiology
Instruction in specific subject matter areas in the field of nutrition science and exercise physiology.

Credit Hour: 1-3

NEP 4200: Sports Performance and Conditioning
(cross-leveled with NEP 7200). Course utilizes scientific theory and applied instruction to teach procedures, techniques, and modalities used to improve physical sports performance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PTH_AS 2201, MPP 3202 or BIO_SC 3700. NEP majors must have a C or better in these courses. Junior or senior standing required.

NEP 4280: Food Service Management
(cross-leveled with NEP 7280). Issues related to marketing and financial control in the foodservice sector. Lecture course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MANGMT 3000 or equivalent.

NEP 4290: Food Serv. II: Adv. Food Service Manage. Supervised Practice Exp
A practicum tailored to apply marketing and budgetary principles in the foodservice industry. 8 hours of supervised practice per week. Enrollment limited to students with concurrent enrollment in NEP 4280. Open to students admitted to the Dietetics program. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Open to students accepted into the Coordinated Program in Dietetics only. Departmental consent required.
NEP 4330: Human Nutrition II Laboratory
(cross-leveled with NEP 7330). A techniques course in nutrition, usually taken concurrently with NEP 4340.

Credit Hours: 2
Prerequisites: NEP 2340, Biochemistry and instructor's consent

NEP 4340: Human Nutrition II Lecture
(cross-leveled with NEP 7340). Physiological and biochemical aspects of nutrition; functions of methods of measuring nutritional status; various aspects of applied nutrition. Continuation of NEP 2340. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 2340 - NEP majors must have a C or better to enroll and either BIOCHM 3630, BIOCHM 4270 or BIOCHM 4272

NEP 4360: Nutritional Assessment
(cross-leveled with NEP 7360). Introduction to the nutrition assessment process. The identification of dietary, anthropometric, laboratory, clinical and sociocultural parameters used to assess nutritional status of individuals. Lecture course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or better in NEP 2340

NEP 4370: Medical Nutrition Therapy I
(cross-leveled with NEP 7370). In-depth study of physiological/biochemical changes in selected disease states (cardiovascular disease, rehabilitation, diabetes and cancer); development of principles underlying nutrition therapy. Lecture course. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or better in NEP 4360

NEP 4380: Medical Nutrition Therapy II
(cross-leveled with NEP 7380). Evaluation, design and monitoring of the nutrition care of complex health disorders such as advanced gastrointestinal complications, major organ transplant, and metabolic disorders with an emphasis on nutrition support. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: C or better in NEP 4370

NEP 4385: Professional Development I
(cross-leveled with NEP 7385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics. Graded on A-F basis only. Enrollment limited to students enrolled in the coordinated program in Dietetics.

Credit Hour: 1
Prerequisites: Departmental consent required

NEP 4400: Pathophysiology of Diseases Affecting Metabolic Health
There is not a universally-accepted definition of “metabolic health”, however, a similar combination of assessment criteria including measurements of body weight/composition, blood pressure, lipid profile, insulin sensitivity/resistance, and systemic inflammation are frequently used for clinical and research purposes. This course will explore the disordered physiological processes in diseases affecting these metabolic health parameters. Focus will be on the leading causes of death in the US, cardiovascular disease, stroke and cancer, as well as the related diseases of diabetes and osteoporosis, all of which are diseases of enormous burden to the US healthcare system. The common theme of modifiable factors (diet, exercise, sleep) to prevent and manage these chronic conditions will be woven throughout the course. This course may be particularly useful for students seeking careers in health care and prevention. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: MPP 3202 or BIO_SC 3700 and BIOCHM 3630 or BIOCHM 4270
Recommended: NEP 2340 and PTH_AS 2201

NEP 4480: Pediatric Exercise Physiology
Course is designed to develop knowledge and understanding of the value of physical activity in the pediatric population. The physiology, psychology, and guidelines of exercise will be explored in the developmental process of youth. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 1340 and NEP 3850W - NEP majors must have a C or better in these courses

NEP 4590: Community Nutrition
(cross-leveled with NEP 7590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 2340 or NEP 2380. Restricted from Pre-Nutrition and Fitness majors

NEP 4750: Cardiopulmonary Rehabilitation - A Multifactorial Process
A guide to the practice of Cardiopulmonary Rehab in the 21st Century. We will explore the interdisciplinary aspects of a successful approach to the delivery of cardiac and pulmonary rehabilitation throughout a broad spectrum of patients. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: NEP 3450 and NEP 3850W. NEP majors must earn a C or better in these courses to enroll

NEP 4860: Exercise Prescription
Course investigates theory and methods of testing and prescribing exercise for circulatory fitness, body composition, muscle strength, joint and muscle ranges in motion, and posture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: NEP 3850W. All NEP majors must have a C- or better in this class to enroll
Prerequisites: MPP 3202 or BIO_SC 3700 and, PTH_AS 2201. All NEP majors must have a C or better in these courses to enroll

NEP 4940: Internship in Nutritional Science and Exercise Physiology
Combines study, observation and employment in an area of exercise physiology and/or nutrition. Written reports, faculty evaluation.

Credit Hour: 1-6
**Prerequisites:** instructor's consent required

**NEP 4950:** Capstone: Research in Nutritional Sciences
Introduction to research, including the types of basic, clinical, and outcomes-based research. Defining research problems related to nutrition and exercise sciences, developing hypotheses, reviewing scientific literature, writing research protocols, analyzing data. Lecture course.

**Credit Hours:** 2
**Prerequisites:** NEP 2340 and either STAT 2500 or ESC_PS 4170 and senior standing. Restricted from Pre-Nutrition and Fitness majors.

**NEP 4951:** Nutrition Research Communication
Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Graded on A-F basis only.

**Credit Hour:** 1
**Prerequisites:** NEP 4950 or instructor's consent

**NEP 4951W:** Nutrition Research Communication - Writing Intensive
Analyze and interpret data; present results of a research study in manuscript and seminar presentation formats. Emphasis on effective communication of nutrition research to scientific and lay audiences. Graded on A-F basis only.

**Credit Hour:** 1
**Prerequisites:** NEP 4950 or instructor's consent

**NEP 4970:** PANHP Capstone: Sports Nutrition
(cross-leveled with NEP 7970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only. Prerequisites: C or better in all pre-reqs: NEP 2340, and either MPP 3202 or BIO_SC 3700, and either STAT 1200 or ESC_PS 4170; Senior standing. Restricted to Nutrition and Fitness or Physical Activity, Nutrition and Human Performance majors only.

**Credit Hours:** 2

**NEP 4975:** Practice of Dietetics Supervised Practice Experience
Supervised practice in providing quality nutrition services in clinical, community, management and specialty settings. 40 hours of supervised practice per week.

**Credit Hours:** 10
**Prerequisites:** NEP 3590, NEP 4280, NEP 4290, NEP 4380,NEP 4381, and NEP 4590; Open to students admitted to the Dietetics Program only

**NEP 7001:** Topics in Nutritional Science and Exercise Physiology
Instruction in specific subject matter areas in the field of food science and nutrition.

**Credit Hour:** 1-99

**NEP 7085:** Problems in Nutritional Sciences and Exercise Physiology
Advanced problems in a selected field of food science and nutrition.

**Credit Hour:** NEP 7085
NEP 7385: Professional Development I
(cross-leveled with NEP 4385). Course designed to provide career exploration and assessment and prepare students for the final rotations in the coordinated program in dietetics.

Credit Hour: 1
Corequisites: Concurrent enrollment in NEP 7380, NEP 7381

NEP 7390: Professional Development II
Lectures and discussions focus on issues and trends in dietetics. Discussions are used to encourage the development of skills and attitudes that foster life-long professional learning. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: NEP 7385, and in the Coordinated Program for Dietetics

NEP 7500: Research in Nutritional Sciences and Exercise Physiology
Original investigations, usually in connection with one of the research projects of Agricultural Experiment Station. Written report required.

Credit Hour: 1-99

NEP 7590: Community Nutrition
(cross-leveled with NEP 4590). Public health nutrition and chronic disease prevention, food security, nutrition programs and food access, public policy, sustainable agriculture and food production systems, cultural food practices, needs assessment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Nutrition course or instructor's consent

NEP 7970: PANHP Capstone: Sports Nutrition
(cross-leveled with NEP 4970). Integration of research literature with knowledge from previous coursework, emphasis on sports nutrition research, nutrient requirements of athletes, critical evaluation of ergogenic aids. Graded on A-F basis only. Prerequisites: C or better in all pre-reqs: NEP 2340, and either MPP 3202 or BIO_SC 3700, and either STAT 1200 or ESC_PS 4170; Senior standing. Restricted to Nutrition and Fitness or Physical Activity, Nutrition and Human Performance majors only.

Credit Hours: 2

NEP 8001: Topics in Nutritional Sciences and Exercise Physiology
Instruction in specific subject matter areas in the field of nutrition science and exercise physiology. May be repeated for credit. Graded on A-F basis only.

Credit Hour: 1-3

NEP 8030: Etiology of Obesity
This course is designed to provide an understanding of the cause and implications of human obesity. General topic areas covered will include: methodologies of obesity research, physiology of obesity, behavioral and environmental factors influencing obesity, obesity and disease, therapeutic approaches to obesity, and emerging topics in obesity. The structure of this course will be mixture of lectures and interactive discussions/reviews of primary research articles in these areas. Students will be expected to present and critically evaluate research papers relevant to the field of obesity.

Credit Hours: 3
Prerequisites: NEP 7340

NEP 8085: Problems in Nutritional Sciences and Exercise Physiology
Individual studies include a minor research problems.

Credit Hour: 1-99

NEP 8087: Masters Seminar in Nutritional Sciences and Exercise Physiology
Seminar features expert presentations of current research and issue-based applications that represent the breadth of nutritional sciences and/or exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 8090: Masters Research in Nutritional Sciences and Exercise Physiology
Original investigation of advanced nature, leading to thesis. Graded on a S/U basis only.

Credit Hour: 1-99

NEP 8095: Internship in Exercise Physiology
Graduate level course designed to enhance the Exercise Science student's knowledge and skills in the administration of appropriate physiological assessments and the interpretation of the results from those tests. Course Objectives: 1) Understand the nature and importance of physiological assessments. 2) Understand the measurable components of physical fitness and how each of them relates to overall health. 3) Become familiar with and conduct various tests of physical and performance related parameters Body Composition - Girth measurements, skin folds, bioelectrical impedance; BODPOD, DEXA; Cardiorespiratory Fitness - Resting measurements, submaximal
NEP 8220: Cardiovascular Disease and Exercise
Advanced study through readings and discussion of selected topics related to cardiovascular risk and disease development, including hypertension, endothelial dysfunction, vascular insulin resistance, arterial stiffness, atherosclerosis and heart failure, with a particular emphasis on the effects of physical activity and exercise. Special focus will also be placed on understanding the links between lack of physical activity, metabolic disorders, and increased cardiovascular risk. Graded on A-F basis only.

Credit Hours: 3

Recommended: Undergraduate level exercise physiology is highly recommended.

NEP 8310: Nutritional Biochemistry of Lipids
(same as AN_SC 8431 and NUTRIT 8310). Current concepts in the nutritional regulation of lipid metabolism. Emphasis on integrating information and interpreting current research data.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272

NEP 8340: Nutrition in Human Health
(same as NUTRIT 8340). Nutritional aspects of maintaining human health with emphasis on micronutrients, basis for dietary recommendations, and nutrition public health initiatives. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: BIOCHM 4270 and BIOCHM 4272; 4000-level nutrition course; graduate standing or current enrollment in the Masters in Dietetics Program

NEP 8380: Medical Nutrition Therapy III
In-depth study of physiological/biochemical changes in advanced selected disease states focusing on special complex clinical issues of infants, children, and the geriatric population, as well as investigation into cutting edge treatments for these special populations. Graded on A-F basis only.

Credit Hours: 2

Prerequisites: NEP 7380; Coordinated Program students in Masters in Dietetics only

NEP 8850: Advanced Exercise Physiology
Lectures, laboratory experiences, and readings in current literature to provide reasonable depth in selected areas of physiology as applied to activity and health.

Credit Hours: 3

Prerequisites: NEP 4850 and Chemistry

NEP 8860: Exercise Endocrinology
The nervous system and the endocrine system integrate to regulate the functions of the body. These systems are tightly linked and frequently one system cannot be considered without consideration of the other system. This course integrates endocrine physiology and the impact that exercise has on the endocrine response. This class will focus on the glands producing hormones, the target organs, mechanisms and how both acute and chronic exercise impacts hormone action. This is an advanced exercise physiology course designed for graduate students in Exercise Physiology or the life sciences and will consist of lectures, readings and discussion. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: NEP 8850, V_BSCI 8420 or graduate standing in the Life Sciences

NEP 8870: Exercise Metabolism
Review of major metabolic pathways and the effect of exercise upon them. Special topics include indirect calorimetry, EPOC, anaerobic threshold; weight control, ergogenic aids, and exercise nutrition.

Credit Hours: 3

Prerequisites: NEP 4850 and Chemistry

NEP 8975: Dietetics Supervised Practice Experience
This course provides supervised practice for students in their final semester in the Coordinated Program in Dietetics at the University of Missouri. Supervised practice is designed to provide quality nutrition experiences in clinical, community and management settings. Students are in their field sites for 40 hours/week for supervised practice for approximately 13 weeks. In addition, classblocks are held in Columbia three times throughout the semester for a total of approximately three weeks (may also include supervised practice activities). Graded on A-F basis only.

Credit Hours: 10

Prerequisites: For dietetic students in their final semester in the Coordinated Program (CP) only. Consent required

NEP 9087: Doctorate Seminar in Nutritional Sciences and Exercise Physiology
Seminar features expert presentations of current research and issue-based topics that represent the breadth of nutritional sciences and exercise physiology. Graded on S/U basis only.

Credit Hour: 1

NEP 9090: Doctorate Research in Nutritional Sciences and Exercise Physiology
Original investigation of advanced nature, leading to a dissertation. Graded on a S/U basis only.

Credit Hour: 1-99

Obstetrics And Gynecology

OB_GYN 6004: Obstetrics/Gynecology Clerkship
Students rotate on the obstetric service, the gynecology service and the gynecologic oncology service, seeing a broad range of patients in both
OB_GYN 6014: Rural Obstetrics/Gynecology Clerkship
Rural Obstetrics/Gynecology Clerkship
Credit Hours: 8
Prerequisites: Successful completion of the first two years of medical school

OB_GYN 6024: Springfield Obstetrics and Gynecology Clerkship
Students rotate on the obstetric service, the gynecology service and the gynecologic oncology service, seeing a broad range of patients in both inpatient and outpatient settings. In addition, they attend lectures and interactive case presentations.
Credit Hours: 8
Prerequisites: Successful completion of the first two years of medical school

OB_GYN 6041: SCC Gynecologic Surgical Oncology Selective
The medical student will work as a member of the Gynecologic Oncology team providing hands-on clinical and surgical services in the inpatient, outpatient, and consultative settings. Students will learn using a variety of evidence-based resources, on-line resources, and from clinical dialogue with the members of the health care team.
Credit Hours: 5
Prerequisites: Successful completion of 5 of the 7 core clerkships. One of the 5 must be the Obstetrics and Gynecology Clerkship

OB_GYN 6053: SCC Obstetrics/Gynecology Selective
The fourth-year student will work as a member of the health-care team, providing hands-on clinical and surgical services in the inpatient, outpatient, and consultative settings. The medical student will participate in daily rounds under the direction of the attending physician. Students will learn using a variety of evidence-based resources, on-line resources, and dialogue with other team members in the clinical setting. The student will be expected to perform at a sub-intern level. To provide the student with additional clinical and surgical experience in obstetrics and gynecology. The student will learn how to integrate previously acquired knowledge and concepts, then apply them in the management of patients.
Credit Hours: 5
Prerequisites: Successful completion of 5 of the 7 core clerkships. One of the 5 must be the Obstetrics and Gynecology Clerkship

OB_GYN 6104: Remediation OB/GYN Clerkship
Enrolled students are those who received an unsatisfactory grade in a OB/GYN Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.
Credit Hours: 8
Prerequisites: OB_GYN 6004 Clerkship, received unsatisfactory grade

OB_GYN 6313: ABS OB/Gynecology Research
ABS OB/Gynecology Research
Credit Hours: 5
### Obstetric/Gynecological Outpatient

Prerequisites: Ob-Gyn Clerkship. Core reading for this rotation will include Obstetrics, Normal and Problem Pregnancies, latest edition, edited by Gabbe, Niebyl and Simpson.

Credit Hours: 5

### Urogynecology Selective

The 4th year medical student will work as part of a team providing hands-on clinical services in an inpatient, outpatient, and consultative setting. Students will participate in daily morning report, weekly didactic sessions, weekly surgical procedures and Friday afternoon seminars. Students will learn using a variety of evidence-based resources and direct faculty interaction. Successful completion of one of the core Obstetrics and Gynecology Clerkship courses: OB_GYN 6004 or OB_GYN 6014, and/or OB_GYN 6104.

Credit Hours: 5

Prerequisites: Successful completion of the first two years of medical school

### Obstetrics/Gynecology Outpatient Two-Week Elective

The 3rd or 4th year medical student will work as part of a team providing hands-on clinical services in an outpatient setting. Students will participate in daily clinic evaluations of patients. Students will learn using a variety of evidence-based resources and direct faculty teaching. Students will also participate in weekly teaching didactics within the OB/GYN department such as Grand Rounds.

Credit Hours: 2

Prerequisites: Successful completion of the first two years of medical school

### Gynecologic/Oncology Surgery

Goals/Objectives: To provide the student with additional surgical and gynecological clinical experience. All gynecologic surgical electives are performed at Ellis Fischel Cancer Center and the University Hospital. Evaluations: An evaluation for this rotation will be completed by the elective chairman and appropriate resident physicians. The students will be graded on their clinic, ward, and operating room performance. Notes: While on this rotation, students will have exposure to faculty members, three residents, and other fellow medical students. They will have the opportunity to assist in gynecologic oncology surgical cases, attend tumor clinics where they will encounter various procedures such as colposcopies, cryotherapy, and cervical and endometrial biopsies. A copy of a representative weekly schedule is available from the department student coordinator. In addition, students will be required to make two ten minute presentations with audio-visual aids on assigned topics. The students will not take night call, but are expected to attend patient rounds on weekdays and weekends with the residents. The department also holds conferences on Tuesdays and Thursdays which are to be attended. Core reading for this rotation will include Clinical Gynecologic Oncology by DiSaia and Creasman.*

Credit Hours: 5

Prerequisites: Ob-Gyn Clerkship

### Obstetrics/Gynecology Offsite Advanced Selective

Credit Hours: 5

#### Obstetrics/Gynecology Offsite Advanced Selective

OB_GYN 6964: Obstetrics/Gynecology Offsite Advanced Selective

Obstetrics/Gynecology Offsite Advanced Selective

### Occupational Therapy (OC_THR)

#### Introduction to Occupational Therapy

OC_THR 1000: Introduction to Occupational Therapy

Introductory course to provide students information about the occupational therapy profession. Registered therapists lecture on clinical aspects. Students participate in discussions on program requirements, placement, and trends in the profession.

Credit Hour: 1

#### Problems in Occupational Therapy

OC_THR 4085: Problems in Occupational Therapy

Independent investigation leading to the completion of a project or paper. Repeateable upon consent of department.

Credit Hour: 1-99

Prerequisites: Instructor's consent

Recommended: Junior standing

#### Professional Development

OC_THR 5010: Professional Development

This course provides a foundation for understanding professional development as students evolve into occupational therapy practitioners. Students are provided an introduction to professional associations, legislative processes affecting occupational therapy practice, and requirements for initial and ongoing professional registration, certification, and licensure. Students examine how occupational therapists interface with other stakeholders within a complex healthcare environment to ensure that the occupational needs of individuals and communities are met. Advocacy and ethical decision making as a part of contemporary practice are also introduced. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Occupational Therapy students

### Foundations and Theory in Occupational Therapy

OC_THR 5020: Foundations and Theory in Occupational Therapy

Historical, philosophical, and conceptual foundations of occupational therapy practice will be analyzed for the purpose of understanding current standards and models of practice. As a core concept of occupational therapy practice, students will be expected to analyze therapeutic activities to assure the therapy process is client and occupation centered. Concepts of occupation, occupational balance, and occupational justice will be addressed as related to contemporary domestic and global issues. Students will discover the value of professional organizations and learn how to access and utilize official documents of the OT profession. Development of a professional occupational therapy identity and methods to further personal and professional growth will be explored. Students will develop a foundational knowledge of occupational therapy management and the role of the occupational therapist in the supervision of OT assistants and OT students. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Restricted to Occupational Therapy students only
OC THR 5030: Human Development and Occupation
Overview from an occupational perspective of typical development from infancy through adolescence and the biopsychosocial development and aging process from young adulthood through end of life. Emphasis on the impact of personal and contextual factors on occupational development throughout the lifespan. This course will contain a variety of instructional methods including online learning, lecture, lab, and active learning assignments. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to occupational therapy students

OC THR 510: Introduction to Evidence-Based Practice
This course will introduce you to the importance of research for the profession of occupational therapy and provide you with basic skills necessary to locate, evaluate, and incorporate evidence into clinical practice. All of the classwork, assignments, and journal clubs are designed to provide you with the opportunity to put into practice the ideas, language, and components of research that are presented in the readings, lectures, and discussions. Writing assignments, interactive journal clubs, blog posts, and critical appraisals will be the methods of assessing your understanding of the material and assist you in learning how to communicate your understanding of evidence to support occupational therapy practice. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to occupational therapy students

OC THR 5120: Principles of Assessment
This course introduces foundational knowledge regarding assessment as part of the occupational therapy process. Students will develop an understanding of the complexity of assessment for individuals with a wide range of limitations in various areas of practice that reflects occupation and evidence and occupation based practice. Throughout the course, students will be provided with opportunities to develop self-reflection and critical thinking skills as they integrate knowledge of the human condition and the occupational needs of those served. Students will also develop an understanding of how assessment is guided by theoretical knowledge and clinical reasoning. An increased understanding of the role of the OT as a member of the healthcare assessment team within an ever evolving society is also addressed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to occupational therapy students only

OC THR 5130: Conditions in Occupational Therapy
This course introduces students to a variety of health conditions relevant to occupational therapy practice and each condition's potential impact on client factors and performance skills as they relate to occupational performance across the lifespan. Course content includes an overview of developmental, mental health, neurological, orthopedic, traumatic, and chronic health conditions commonly addressed in occupational practice settings. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Restricted to occupational therapy students

OC THR 5140: Human Motion and Occupation
Daily occupation will be explored through human movement within the context of the physical environment. Students will learn to analyze common activities while taking into account body structures and functions, activity demands, environmental supports, and technology supports. Assessment of human movement and movement-related deficits will be addressed and methods for adapting the environment and selecting appropriate assistive technologies will be introduced. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Occupational Therapy students only

OC THR 5150: Concepts of Neuroscience
This foundational course uses a systems-based approach to examine the major structures and functions of the human nervous system. The content will explore the effects of a normal and abnormal nervous system on occupational performance. Theories, evaluation, and treatment topics related to the neurological system will be introduced. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to occupational therapy students

OC THR 5160: Psychosocial Aspects of Occupational Therapy
This course will engage students in the examination of the role of the occupational therapist in the promotion of mental health and wellness in a variety of professional and community based contexts. Throughout this course students will demonstrate entry-level clinical competence in both the therapeutic use of self and in providing group interventions for clients represented by a wide range of developmental levels. Students will actively explore course content through self-guided learning, hands on and practical learning experiences including leadership of group interventions and development of service delivery plans. Upon completion of this course, students will synthesize knowledge of mental health conditions, sociocultural factors, occupational justice, and theory related to recovery and mental health interventions to develop roles for occupational therapists in addressing societies’ occupational and mental health needs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Occupational Therapy students only

OC THR 5210: Adult Practice
This course utilizes active learning methodologies to engage students in learning about occupational therapy intervention with the adult population in various practice settings. Students will use assessment results and activity analysis in combination with evidence and clinical reasoning to guide intervention planning for enhancing occupational performance. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Restricted to Occupational Therapy Students only

OC THR 5220: Pediatric Practice
This course is designed to provide students with an understanding of common frames of reference and theories utilized in pediatric practice, as well as increase student understanding of the interplay of common conditions and the influence of conditions on participation in the home and community and the role of the occupational therapist with children and as a member of the therapeutic team. Emphasis is also placed on development of clinical reasoning skills and implementation of evidence based practice. Graded on A-F basis only.

Credit Hours: 4
**Prerequisites:** Restricted to occupational therapy students

---

**OC_THR 5230: Application of Evidence Based Practice**
This course will expose you to the process of writing a research proposal. Specific topics include writing an answerable research question, literature searching, research ethics and Institutional Review Boards (IRBs), study designs, methods for recruitment, data collection, and data analysis, and funding for research. You will work with a group (or individually) to prepare a research proposal for a clinically-relevant question. Guest speakers from various healthcare fields (including physical therapy, communication sciences disorders, and medicine) will enhance learning. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Restricted to Occupational Therapy students

---

**OC_THR 5240: Clinical Reasoning and Documentation**
This course focuses on developing the observation, clinical reasoning, and documentation skills necessary in effectively reporting occupational therapy services across practice settings. Students are also introduced to ethical, legal, and reimbursement policies impacting occupational therapy documentation. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Occupational Therapy students only

---

**OC_THR 5250: Emerging Trends in Occupational Therapy**
Students explore contextual factors associated with individual and population access to quality rehabilitation, health, and wellness services in societies and communities. Using their knowledge of the changing landscape of occupational therapy service delivery, students will assess the potential roles of occupational therapists in strengthening the health and wellness of communities and populations. Additionally, students will explore ways in which occupational therapists can collaborate and partner with organizations and communities to promote the full inclusion and participation of individuals in all aspects of society. Students will explore and negotiate innovative ways to deliver occupational therapy services in non-traditional clinical practice settings. Graded on A-F basis only.

**Credit Hour:** 1

---

**OC_THR 5260: Occupational Therapy Practicum I**
This clinical course is designed to provide students an opportunity to implement the occupational therapy process with individuals experiencing limitations in occupational performance. Through this hands-on experience, students will gain opportunities for application of theory and a deepened understanding of occupational therapy practice by identifying strengths and limitations during the evaluation process, developing and measuring client-centered goals, planning and executing interventions, implementing home programs, and preparing and performing discharge procedures. Graded on S/U basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Occupational Therapy Students only

---

**OC_THR 5310: Advanced Practice Strategies**
Students will learn to synthesize knowledge regarding common conditions seen in children and adults and understand functional implications related to occupational performance. Students will also gain a greater understanding of the role of the occupational therapist across settings when working with children and adults in contemporary society. Learning will culminate with students applying theory and an understanding of cognitive, mental, physical and sensory contributions to occupational performance when developing assessment and intervention plans. Exploration and application of evidence-based practice is an essential component of this course. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to occupational therapy students

---

**OC_THR 5230: Performance, Participation, and Well-Being**
Students will explore occupational performance and participation in daily life through the lenses of health promotion and prevention. The factors that contribute to individuals’ lifestyle and health choices including culture, diversity, and disability, will be discussed. Topics such as health literacy and self-management will be covered in relation to participation. Contextual factors and the environment, from narrow to broad in scope, are also the focus of this course. Environmental modifications, assistive technologies, compensatory strategies, and advanced strategies for grading and adapting tasks to support occupational performance will be explored in depth beyond introductory coursework. Other non-traditional contexts for participation such as work integration, driving, community mobility and transportation will also be explored. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Occupational Therapy students only

---

**OC_THR 5330: Functional Cognition**
This course provides an overview of theoretical models of cognitive function, an overview of an occupational therapy cognitive assessment framework and assessment tools, and an introduction to models of intervention for working with individuals with cognitive disabilities across the lifespan. Graded on A-F basis only.

**Credit Hours:** 2

**Prerequisites:** Restricted to Occupational Therapy Majors

---

**OC_THR 5340: Evidence Based Practice Seminar**
Students who wish to pursue this one credit seminar option will implement the proposal that was designed during OC_THR 7830 - Application of Evidence-Based Practice. Working with a research mentor, the student will carry out the proposed research project including data collection, data analysis, and dissemination. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Restricted to Occupational Therapy students

---

**OC_THR 5410: Case Based Learning**
Integrates clinical reasoning and critical thinking, client-centered practice, and evidence-based decision making into the occupational therapy process across the lifespan in various practice domains. Problem-based methodology emphasizes small group learning and problem solving, self/peer evaluation, and self-directed learning. Graded on A-F basis only.

**Credit Hours:** 4

**Prerequisites:** Restricted to Occupational Therapy students
OC_THR 5420: Populations and Communities
This course provides students with foundational knowledge and background of the broad concept of community and community based practice in occupational therapy. Students will explore community health, wellness, occupational and social justice, and health disparities. Discovering the role and emerging roles of OT in addressing social and community issues will occur through reading, reflection, discussion, and other assignment work. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to occupational therapy students

OC_THR 5430: Leadership, Management, and Policy
This course will provide an overview of the leadership and management responsibilities of occupational therapy leaders in varying practice settings. The significance of public and organizational policy will be discussed as related to service delivery and advocacy of consumer access to occupational therapy services. Content includes the supervisory roles of occupational therapists, professional standards of practice, ethics in practice, quality improvement activities, and the importance of professional competencies. The course content also includes leadership and mentoring of individuals and teams to provide evidence-based, occupation-based, and client-centered practice across a wide range of socio-cultural contexts. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Occupational Therapy students

OC_THR 5440: Contemporary Issues in Occupational Therapy
This course focuses on the integration of clinical skills, professionalism, and current trends and topics in occupational therapy. Students will engage in direct application of knowledge through a variety of experiences and guided assignments. Collaboration with other professionals will be explored in the context of client supports, referrals, and supervision of OTAs. Students will determine appropriate interventions for clients and populations considering reimbursement, in terms of group design, home programming, and appropriate discharge from services. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Restricted to Occupational Therapy students only

OC_THR 5450: Occupational Therapy Practicum II
This course is designed to further advance practice skills and an understanding of the occupational therapy process through diverse experiences. Opportunities will be provided to increase professional development through application of evidence based practice in action. An increased emphasis and understanding of the role of families and caregivers, other stakeholders such as providers and service agencies and the greater community as they relate to occupational therapy practice are also addressed. Graded on S/U basis only.
Credit Hours: 2
Prerequisites: Restricted to occupational therapy students only

OC_THR 5460: Professional Seminar
This course requires students to apply and integrate information that they have learned throughout their professional coursework about the various roles of occupational therapists as practitioners, scholars, educators, and advocates. Students will reflect upon personal and professional competencies as they relate to the stated ability-based outcomes of the MU OT Department's curriculum design and each student's future career goals. They will design a plan for ongoing professional development as they prepare for transition to Level II Fieldwork and entry-level practice. To facilitate this process, this course requires students to review the AOTA Code of Ethics, AOTA Standards of Practice, AOTA Standards for Continuing Competence, and other AOTA Official Documents that guide occupational therapy practice. Students will also explore various resources for fieldwork, certification exam preparation, entry-level practice, professional development, involvement in professional associations, making ethical decisions, and resolving conflicts. Students will update their professional resume and develop a plan for employment search as they approach graduation. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Restricted to occupational therapy students

OC_THR 5499: Problems in Occupational Therapy
Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department. May be offered on S/U or A-F basis.
Credit Hour: 1-99

OC_THR 7085: Problems in Occupational Therapy
Independent investigation leading to the completion of a project or paper. Repeatable upon consent of department. May be offered on S/U or A-F basis.
Credit Hour: 1-99

OC_THR 7850: Emerging Trends in Occupational Therapy
Students explore contextual factors associated with individual and population access to quality rehabilitation, health, and wellness services in societies and communities. Using their knowledge of the changing landscape of occupational therapy service delivery, students will assess the potential roles of occupational therapists in strengthening the health and wellness of communities and populations. Additionally, students will explore ways in which occupational therapists can collaborate and partner with organizations and communities to promote the full inclusion and participation of individuals in all aspects of society. Students will explore and negotiate innovative ways to deliver occupational therapy services in non-traditional clinical practice settings. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Restricted to Occupational Therapy students

OC_THR 7853: Fieldwork Level II-A
Advanced practicum in various community settings such as the school system, hospitals, rehabilitation centers and residential facilities. Emphasis on hands-on experiences and translation of theory into practice. Graded on S/U basis only.
Credit Hour: 3-9

OC_THR 7993: Fieldwork Level II-B
Advanced practicum in rehabilitation and various community settings for application of more specialized practice in community based settings. Emphasis on critical analysis of human occupation, clinical reasoning, synthesis, and evidence based practice. Graded on S/U basis only.
Credit Hour: 3-9
Ophthalmology (OPHTH)

OPHTH 6050: SCC Introduction to Ophthalmology
This curriculum is designed to introduce you to the specialty of ophthalmology, which involves the recognition, diagnosis, and management of diseases of the eye. Students will work in the outpatient setting seeing patients Monday through Friday. The primary clinic for this course may be in Bolivar or Springfield. Students on the Ophthalmology elective are integrated into the outpatient, inpatient, and surgical care programs as if they were beginning first-year resident physicians in the specialty. They are taught ophthalmic instrumentation, ophthalmological examination techniques, and the fundamentals of ocular surgical procedures.
Credit Hours: 5
Prerequisites: Surgery Clerkship

OPHTH 6323: ABS Ophthalmology Research
ABS Ophthalmology Research
Credit Hour: 5-10

OPHTH 6585: Ophthalmology
Ophthalmology
Credit Hours: 5

OPHTH 6903: SCC Ophthalmology Two Week Elective
This curriculum is designed to introduce you to the specialty of ophthalmology, which involves the recognition, diagnosis, and management of diseases of the eye. Students will work with an attending Ophthalmologist from the Springfield Clinical Campus. This may involve travel to Bolivar. During this 2 week elective, students will become familiar with the screening eye examination, learn to perform a more comprehensive ocular examination, learn about common ocular abnormalities and treatments, and become familiar with the common ophthalmic instruments.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

OPHTH 6936: Introduction to Ophthalmology
Welcome to the Ophthalmology Elective. This curriculum is designed to introduce you to the specialty of ophthalmology, which involves the recognition, diagnosis, and management of diseases of the eye. Students will work in the outpatient setting seeing patients at the University Eye Institute. Students will participate in didactic sessions each week. During this 2 week elective, students will become familiar with the screening eye examination, learn to perform a more comprehensive ocular examination, learn about common ocular abnormalities and treatments, and become familiar with the common ophthalmic instruments.
Credit Hours: 2
Prerequisites: successful completion of the first two years of medical school

OPHTH 6990: Ophthalmology Surgical Selective
The medical student will be exposed to the full spectrum of medical and surgical ophthalmology. The medical student will work alongside Ophthalmology attendings, fellows, and residents in outpatient clinics and in the operating room. The medical student will take histories and perform ocular examinations in an outpatient setting. The medical student will observe inpatient consultations and operating room procedures.
Credit Hours: 5
Prerequisites: Successful completion of 5 of the 7 core clerkships

Parks, Recreation, Sport and Tourism (PRST)

PRST 1010: The American Leisure Experience
History of recreation and leisure movement; theories and philosophies of play, recreation and leisure. Developmental stages of leisure services to contemporary status. Graded on A-F basis only.
Credit Hours: 3

PRST 1011: Academic Planning and Career Orientation in Parks, Recreation and Tourism
Orientation to the field and analysis of career opportunities in leisure services. Academic planning leading to B.S. in parks, recreation and tourism. Graded on S/U basis only.
Credit Hour: 1
Recommended: Parks, Recreation and Sport Major

PRST 1081: Sport Facility Design
This course will investigate the functions of management in terms of design, implementation, operating and financing public assembly facilities in order to help sell the sport product. Venues such as public and private arenas, coliseums and stadiums will be studied. Graded on A-F basis only.
Credit Hour: 1
Prerequisites or Corequisites: PRST 1080
Prerequisites: May be restricted to Parks, Recreation, and Tourism majors
Corequisites: PRST 2082, PRST 2083

PRST 1084: Recreational Shooting Sports
This course provides introductory instruction and hands-on shooting with an introduction to shooting range management. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: instructor's consent

PRST 2010: Foundations of Sport
This course will examine the meaning of sport management in terms of its history, scope, principles, issues and future trends. In addition, this course examines the job responsibilities and competencies required of sport managers in a variety of sport organizations. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Parks, Recreation and Sport Major
PRST 2080: Global Sport Environments
This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. professional sports. The course will also look into facility design and technology used in sports environment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Parks, Recreation and Tourism; Parks, Recreation and Sport Major

PRST 2082: Domestic and International Sports Environment
This course will provide an overview of organization and management of domestic and international sport, including the Olympic movement and examination of the globalization of U.S. professional sports. Graded on A-F basis only.

Credit Hour: 1
Prerequisites or Corequisites: PRST 1080
Corequisites: PRST 1081, PRST 2083

PRST 2083: Technological Advancement in Sport
This course will teach students how to solve sports technology problems they will face in their future career, plus develop computer aided design and manufacturing skills. They will also gain skills in team work, communication and presentation, IT, research and project management. Graded on A-F basis only.

Credit Hour: 1
Prerequisites or Corequisites: PRST 1080
Corequisites: PRST 1081, PRST 2082

PRST 2101: Topics in Parks, Recreation, Sports and Tourism
Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3

PRST 2101W: Topics in Parks, Recreation, Sports and Tourism - Writing Intensive
Specialized topic content in parks, recreation and tourism programs, management and/or development. Subject content and credit may vary by semester based on faculty resources and student needs. Offered periodically.

Credit Hour: 1-3

PRST 2107: Aquatics Science
A scientific perspective on water chemistry, preventive maintenance of aquatic facilities with an emphasis on the newest safety and engineering design information and construction techniques. Graded on A-F basis only.

Credit Hours: 3

PRST 2111: Park Planning and Design
Presentation of basic planning principles. Evaluation of existing areas and facilities based upon planning guidelines. Consideration of park plans, standards, terminology, map preparation and evaluation.

Credit Hours: 3

PRST 2281: Business of Sport and Recreation
This course focuses on the business side of sport management, considering issues of marketing, sponsorship, and sales. Students will also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Parks, Recreation and Sport Major

PRST 2355: Private and Commercial Recreation Principles and Practice
Considers principles, practices, influences in public/private leisure services; influence of tourism/travel on public/private recreation services. Graded on A-F basis only.

Credit Hours: 3

PRST 2711: Experience Internship
This course is designed as an independent study for students to gain professional experience. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: PRT/PRST Major and Instructor Consent

PRST 2750: Methods in Research and Evaluation
An overview of social research methods, including terms, human and scientific inquiry, ethical behavior, literature review, sampling questionnaire construction, types of data collection, statistical analysis, and reporting of results. Graded on A-F basis only.

Credit Hours: 3
Prerequisites or Corequisites: PRST 1011

PRST 3101: Topics in Parks, Recreation and Tourism
Organized study of selected topics in parks, recreation and tourism. Subjects may vary from semester to semester.

Credit Hour: 1-3

PRST 3185: Sports Economics and Finance
This course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp the importance of financial and economic decision making. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRST 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent

PRST 3185H: Sports Economics and Finance - Honors
This course focuses on the economic and financial issues within the sport industry. The class will help students understand basic and complex concepts within economics and finance in a sport context, and to grasp
the importance of financial and economic decision making. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRST 1011; Restricted to Parks, Recreation, and Tourism majors with Sport Management emphasis or instructor consent. Honors eligibility required

PRST 3189: Pre-Internship and Career Development Seminar
The course is designed to prepare students for PRST 4940 and careers beyond the internship. Emphasis is placed on students' responsibilities prior to enrollment in PRST 4940, selecting internship sites and completing internship requirements. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: PRT/PRST Major in Junior/Senior Standing; PRST 1011

PRST 3210: Personnel Management and Leadership
Considers theories and practices of leadership and management in leisure services employment. Topic presentation in relationships, attitudes, supervision, motivation and group functioning. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Parks, Recreation and Tourism; Parks, Recreation and Sport Major

PRST 3210W: Personnel Management and Leadership - Writing Intensive
Considers theories and practices of leadership and management in leisure services employment. Topic presentation in relationships, attitudes, supervision, motivation and group functioning. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Parks, Recreation and Tourism; Parks, Recreation and Sport Major

PRST 3215: Program and Event Development
Fundamental principles and techniques of program development and event management; seasonal, year round, specialty areas and total agency program planning. The purpose of this course is to make students better prepared to implement and evaluate recreation programming and events that fulfill the diverse needs of society. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: PRST 1011, or instructor's consent; restricted to Parks, Recreation and Tourism, Parks, Recreation and Sport majors

PRST 3220: Introduction to Recreation for Individuals with Disabilities
Principles, concepts and historical development of recreation for individuals with disabilities. Explanation of attitudes, issues, practice and barriers related to recreation participation. Graded on A-F basis only.

Credit Hours: 3

PRST 3230: Outdoor Recreation Policy
An overview of parks and outdoor recreation, natural environment, supply-demand-need relationships, interpretative programming, management philosophies/practices will be studied.

Credit Hours: 3

PRST 3230W: Outdoor Recreation Policies - Writing Intensive
An overview of parks and outdoor recreation, natural environment, supply-demand-need relationships, interpretative programming, management philosophies/practices will be studied.

Credit Hours: 3

PRST 3231: Interpretation of Natural and Cultural Resources
Interpretive principles and techniques employed to communicate the values/meanings of natural and cultural resources to visitors.

Credit Hours: 3

PRST 3282: Governance and Policy in Sport and Leisure
This course serves as a comprehensive study in examining how leisure organizations address fundamental issues of governance and policy. Through careful use of policy and understanding of governance, organizations often form strategies in their attempts to gain an advantage. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRT/PRST Major

PRST 4101: Topics in Parks, Recreation and Tourism
Organized study of selected topics in parks, recreation and tourism. Subjects may vary from semester to semester.

Credit Hour: 1-3

PRST 4100: Ethics and Diversity
The purpose of this course is to provide students with an analysis and understanding of the various ways that people within sport and recreation organizations can differ, and how differences based on this diversity impact life experiences and outcomes.

Credit Hours: 3
Prerequisites: Parks, Recreation, & Sport Major

PRST 4101: Topics in Parks, Recreation and Tourism
Organized study of selected topics in parks, recreation and tourism. Subjects may vary from semester to semester.

Credit Hour: 1-3

PRST 4105: Contemporary Issues in Sport
(cross-leveled with PRST 7150). This course provides an analysis of the place of sport in American society and the impact of sport on American culture. Social and cultural contexts in which sport exists and how those contexts are influenced by sport will be examined. Concepts and theories will be utilized to examine how social issues and change, relationships, and organization affect sport. Emphasis will be placed on current issues and trends in sport and society. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRS Major

PRST 4208: Administration and Organizational Behavior
(cross-leveled with PRST 7208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator. Graded on A-F basis only.
PRST 4333: Park and Sport Facility Operations
(cross-leveled with PRST 7333). Basic principles, practices and problems associated with the operations of park and sport facilities including green space, aquatic facilities, sports fields, outdoor park facilities and buildings. Additional focus on necessary maintenance personnel management, equipment management and management of volunteers within a park system or sports facility. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor’s consent

PRST 4340: Recreation Land Management
(cross-leveled with PRST 7340). This course provides students with an understanding of the principles and practices of recreation land management. Topics include federal land management agencies, wilderness management, benefits based management, recreation opportunity spectrum, limits of acceptable change, citizen participation in decision making, and visitor experience/resource protection.

Credit Hours: 3

PRST 4350: Problems in Parks, Recreation, Sport and Tourism
Individual study with a designated faculty member.

Credit Hour: 1-3
Prerequisites: Instructor Consent

PRST 4357: Tourism Planning and Development
(cross-leveled with PRST 7357). Nature and scope of tourism planning at the local, regional, and national levels; economic social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.

Credit Hours: 3
Prerequisites: PRST 1011 and PRST 4356

PRST 4358: Legal Aspects of Sport
This course studies the U. S. legal system, its structure and terminology. Legal aspects of contract law, statutory law, constitutional law, intellectual property, torts, negligence, and risk management in sport will be examined. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRT/PRST Major; PRST 1011

PRST 4949: Western Canada Study Abroad
This course provides students an educational opportunity to explore Western Canada. Students analyze natural resource management, customer and visitor relations, community relations, cultural entrepreneurship, and transportation networks with US and Canadian Management methods.

Credit Hours: 3
Prerequisites: Instructor’s consent

PRST 7101: Topics in Parks, Recreation and Sport
Specialized topics in recreation and park administration dynamics. Subjects and credits vary by semester based on available faculty resources and expertise. Course content announced in advance. Graded on A-F basis only.

Credit Hour: 1-3

PRST 7208: Administration and Organizational Behavior
(cross-leveled with PRST 4208). Theoretical foundations of the organization and administration of leisure services in both community and institutional settings. Emphasis on the roles of the administrator. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PRST 1011; Restricted to Parks, Recreation and Tourism; Parks, Recreation and Sport majors

PRST 7250: Parks, Health and Wellness
(cross-leveled with PRST 4250). Exposure to nature in parks and natural areas can improve physical, psychological and social health. This course explores the concepts, research, theories and contemporary issues related to the health benefits of parks and exposure to nature. Through this course, students will examine the importance of parks and natural resources to public health. The course emphasizes case studies and practical applications in addition to guided discussions of assigned readings. Offered periodically. Graded on A-F basis only.

Credit Hours: 3

PRST 7333: Park and Sport Facility Operations
(cross-leveled with PRST 4333). Basic principles, practices and problems associated with the operations of park and sport facilities including green space, aquatic facilities, sports fields, outdoor park facilities and buildings. Additional focus on necessary maintenance personnel management, equipment management and management of volunteers within a park system or sports facility. Graded on A-F basis only.

Credit Hours: 3

PRST 7340: Recreation Land Management
(cross-leveled with PRST 4340). This course provides students with an understanding of the principles and practices of recreation land management. Topics include federal land management agencies, wilderness management, benefits based management, recreation opportunity spectrum, limits of acceptable change, citizen participation in decision making, and visitor experience/resource protection.

Credit Hours: 3
PRST 7357: Tourism Planning and Development
(cross-leveled with PRST 4357). Nature and scope of tourism planning at the local, regional, and national levels; economic, social, environmental, and policy considerations. Comparative study of initiating, planning and implementing tourism and the organization of community resources for developing and controlling a tourism industry.
Credit Hours: 3
Prerequisites: P_R_TR 7356

PRST 7960: Guided Reading in Parks, Recreation, Sport and Tourism
Selected reading in parks, recreation, sport and tourism identified to fulfill a graduate student's academic needs or specialized interests.
Credit Hour: 1-3
Prerequisites: instructor's consent

PRST 8080: Foundations of Sport
This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.
Credit Hours: 3

PRST 8088: Sport and Leisure Economics
This course focuses on the business side of sport management, primarily considering issues of marketing, sponsorship, and sales. In this, students will not only supplement knowledge of these concepts, but also be presented with actual models relevant to working in sales in the competitive sport environment. Graded on A-F basis only.
Credit Hours: 3

PRST 8089: Research Project
Individual research on approved project. Involves creativity and scholarly inquiry where product does not adhere to the traditional thesis format. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: Parks, Recreation and Tourism graduate major

PRST 8090: Thesis Research in Parks, Recreation, Sport and Tourism
Research leading to thesis in field of parks, recreation and tourism. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: Parks, Recreation and Tourism graduate major

PRST 8400: Constructs of Leisure
Review analysis and implications of fundamental psycho-social determinants of leisure behavior. Application theories of determinants to existing and proposed leisure service systems.
Credit Hours: 3

PRST 8401: Topics in Recreation and Park Administration
Specialized topics in recreation and park administration dynamics. Subjects and credits vary by semester based on available faculty resources and expertise. Course content announced in advance.
Credit Hour: 1-3
Prerequisites: instructor's consent

PRST 8411: Independent Work in Parks, Recreation, Sport and Tourism
Independent research or special projects in parks, recreation, sport and tourism.
Credit Hour: 1-3
Prerequisites: instructor's consent

PRST 8430: Research Methods in Parks, Recreation and Tourism
Analysis of basic research methodology. Review and analysis of research work completed in recreation, park and leisure field.
Credit Hours: 3

PRST 8436: Visitor Behavior and Policy
Course presents issues, concerns and policies dealing with multi-management/planning/operations of outdoor resource based recreation. Such issues as energy, economics, social/ political, pollution and user characteristics will be studied.
Credit Hours: 3

PRST 8450: Administration in Leisure Service Delivery
Review, analysis and synthesis of administrative functions as related to public and private recreation and leisure service enterprises.
Credit Hours: 3

PRST 8460: Financial Operations in Leisure Service Delivery
Review and critical analysis of financial functions, strategies and methodology as related to public and private recreation and leisure service enterprises.
Credit Hours: 3

PRST 8940: Internship in Parks, Recreation and Tourism
Supervised student practice in recreation, park or related settings under qualified instructor.
Credit Hour: 1-6
Prerequisites: Parks, Recreation and Tourism graduate major

Pathology & Anatomical Science (PTH_AS)

PTH_AS 2201: Human Anatomy Lecture
A systems-based survey of human gross anatomy including structure, function and history. Internet access required: lectures and assignments will be online. Graded on A-F basis only.
Credit Hours: 3
Recommended: Minimum cumulative MU GPA of 2.5 required
PTH_AS 2203: Human Anatomy Laboratory
A systems-based survey of human gross anatomy. Internet access required: most materials will be online. One on-campus laboratory meeting per week. Graded A-F only. Recommend: Minimum cumulative MU GPA of 2.5 and completed or currently enrolled in PTH_AS 2201.
Credit Hours: 2

PTH_AS 3460: Research and Instructional Techniques
Involves library and laboratory research. Includes development of oral and written communications skills.
Credit Hours: 3

PTH_AS 4210: Seminar in Pathology and Anatomical Sciences
Presentation and discussion of original investigations and current literature.
Credit Hour: 1

PTH_AS 4220: Forensic Pathology and Death Investigation
Forensic Pathology and Death Investigation.
Credit Hours: 2

PTH_AS 4220W: Forensic Pathology and Death Investigation - Writing Intensive
Forensic Pathology and Death Investigation.
Credit Hours: 2

PTH_AS 4222: Gross Human Anatomy (The Health Professions)
Gross structure and neuroanatomy of the human body; dissection of extremities, back, head, neck abdomen and thorax.
Credit Hours: 7
Prerequisites: instructor's consent

PTH_AS 6033: SCC ABS Surgical Anatomy
The 4th year anatomy student will work independently or as a team to dissect and explore regions of cadavers particular to their interests. We generally offer the following regions (Lower Limb, Upper Limb, Pelvis, Thorax, Abdomen, Head & Neck). Students will improve their anatomical knowledge and learn using hands-on experiences and a variety of evidence-based resources while exploring the human body. Requirements: A) Complete a dissection relevant to your interests of the following regions: brain, head and neck, thorax, abdomen, pelvis, upper limb (one side), lower limb (one side). B) Give a 15-minute presentation to Occupational Therapy or Physician Assistant class about the anatomy of your region behind clinical practice. Schedule this presentation with the course coordinator and/or the course director within two months of the scheduled block. However, presentation slides must be given to the course faculty leader by the end of the block. C) Prepare 5 PowerPoint slides for use in Occupational Therapy or Physician Assistant courses on clinically-relevant anatomy for the audience by the end of the block. After review by course faculty the slides will also be sent to Columbia for consideration of use in M1 classes. D) Complete an exit interview with a faculty member to discuss the student's experience during the course.
Credit Hours: 5
Prerequisites: Successful completion of the first 2 years of medical school and 5 of the 7 core clerkships

PTH_AS 6333: ABS Pathology/Anatomical Science Research
ABS Pathology/Anatomical Science Research
Credit Hours: 5

PTH_AS 6341: ABS Science Anatomical Science Teaching
ABS Science Anatomical Science Teaching
Credit Hours: 5

PTH_AS 6343: ABS Surgical Anatomy
ABS Surgical Anatomy
Credit Hours: 5

PTH_AS 6345: ABS Surgical Anatomy of the Head and Neck
ABS Surgical Anatomy of the Head and Neck
Credit Hours: 5

PTH_AS 6347: ABS Surgical Anatomy of the Back and Limbs
ABS Surgical Anatomy of the Back and Limbs
Credit Hours: 5

PTH_AS 6600: Anatomic Pathology
Anatomic Pathology
Credit Hours: 5

PTH_AS 6602: Clinical Pathology
Clinical Pathology
Credit Hours: 5

PTH_AS 6604: Forensic Pathology
Forensic Pathology
Credit Hours: 5

PTH_AS 6606: Anatomic/Clinical Pathology
Anatomic/Clinical Pathology
Credit Hours: 5

PTH_AS 6608: Anatomy Elective
Anatomy Elective
Credit Hours: 5

PTH_AS 7020: Forensic Pathology and Death Investigation
Summary of Forensic Death Investigation from beginning to end. Will include some of the current laboratory techniques seen on "CSI" Team taught by experts in the fields including medical examiners, death investigators, forensic anthropologists, police CSI teams, lawyers and others.
Credit Hours: 2
Prerequisites: Basic Biology
**PTH_AS 7222: Gross Human Anatomy (The Health Professions)**
Gross/human structure through dissection. Graded on A-F basis only.

**Credit Hours:** 7  
**Prerequisites:** Acceptance into Physical Therapy Programs or instructor's consent

**PTH_AS 7400: Seminars in Translational Medicine**
Students participate in regular seminars and discussion groups with other students interested in clinical and translational sciences. Students, working together with faculty in biomedical sciences and those working in clinical and translational fields, identify seminar topics. Learning objectives and written assignments are arranged on an individual basis. The course is open to all graduate level students and students enrolled in professional schools, for 0-5 credit hours, with instructor's approval. Graded on S/U basis only.

**Credit Hour:** 0-5

**PTH_AS 7450: Precision Medicine Informatics**
This course will introduce students with the theoretical and practical aspects of precision medicine informatics. Topics include: complex diseases, computational genomics/proteomics, informatics of molecular interactions and biological pathways, somatic mutations, signaling transduction and cancer, biomarker discovery, machine learning and data mining for PMI, networks methods for PMI, knowledge representation and reasoning for PMI. The course will consist of a set of didactic lectures, computational assignments, in-class demonstrations of PMI methods and discussions of recent publications. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** INFOINST 8005 with C or better or INFOINST 7010 with C or better or instructor's consent

**PTH_AS 8010: Current Issues in Anatomical Sciences**
Survey of the recent literature in integrative anatomy, including functional, evolutionary, developmental and translational anatomy, conducted through readings and discussion. Grade determined by participation and presentation of weekly readings. May be repeated for a maximum of 10 hours. Graded on S/U basis only.

**Credit Hour:** 1  
**Prerequisites:** instructor's consent

**PTH_AS 8090: Advanced Pathology**
Open only to properly qualified graduate students, with counsel of faculty. Focus of MS-related research in evolutionary morphology, genomics, neuroscience, pathobiology or laboratory sciences. Graded on S/U basis only.

**Credit Hour:** 1-99

**PTH_AS 8100: Fundamentals of Evolutionary Biology**
Principles of modern evolutionary biology. Topics include: phylogeny, paleobiology, developmental processes, genetic and phenotypic variation, form and function, speculation, macroevolution, and molecular mechanisms.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**PTH_AS 8150: Fundamentals of Evolutionary Morphology**
This course is a survey of the fundamentals of modern evolutionary morphology. Topics will include: patterns of vertebrate evolution, comparative methods, development and ontogeny, constraint, functional morphology, evolutionary innovations, and experimental methods. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent required

**PTH_AS 8201: Human Anatomy: Back and Upper Limb**
Developmental, gross, and clinical anatomy of the human back and upper limb, including skeletal, muscular, nervous, and vascular tissues. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** instructor's consent required

**PTH_AS 8202: Human Anatomy: Thorax and Abdomen**
Developmental, gross, and clinical anatomy of the human thorax and abdomen. Graded on an A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** instructor's consent required

**PTH_AS 8203: Human Anatomy: Head, Neck and Neuroanatomy**
Developmental, gross and clinical anatomy of the human head, neck and neuroanatomy. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** instructor's consent required

**PTH_AS 8204: Human Anatomy: Pelvis and Lower Limb**
Developmental, gross and clinical anatomy of the human pelvis and lower limb. Graded A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** instructor's consent required

**PTH_AS 8285: Problems in Pathology and Anatomical Sciences**
Regions or systems which may include developmental, microscopic, and gross anatomy.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**PTH_AS 8290: Research in Pathology and Anatomical Sciences**
Research unrelated to thesis work in evolutionary morphology, genomics, neuroscience, pathobiology or laboratory sciences.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**PTH_AS 8450: Human Anatomy Teaching Practicum**
Provides practical experience teaching clinically oriented human anatomy in lecture and laboratory settings. For students pursuing doctoral degrees in Pathobiology. Enrollment is limited to students who have completed PTH_AS 8201, PTH_AS 8202, PTH_AS 8203, and PTH_AS 8204. Graded on S/U basis only. May be repeated for credit.

**Credit Hour:** 1
Prerequisites: instructor's consent

**PTH_AS 8500: Seminar in Translational Neuroscience**  
Students participate in seminars and discussion groups. Masters students identify seminar topics and present existing data with findings. PhD students identify seminar topics, conduct research and present findings. Learning objective and written assignments are arranged individually. May be repeated for credit. Graded on S/U basis only.  
**Credit Hour:** 1-5

**PTH_AS 9090: Research in Pathology and Anatomical Sciences**  
Open only to properly qualified graduate students, with counsel of faculty. Focus of PhD-related research in evolutionary morphology, genomics, neuroscience or pathobiology. Graded on S/U basis only.  
**Credit Hour:** 1-99

**PTH_AS 9290: Research in Pathology and Anatomical Sciences**  
Open only with instructor's consent. Courses with specialized lectures in various topics such as evolutionary morphology, genomics, neuroscience and pathobiology, depending on faculty expertise and student demand. Graded on S/U basis only.  
**Credit Hour:** 1-99

---

**Peace Studies (PEA_ST)**

**PEA_ST 1050: Introduction to Peace Studies**  
Interdisciplinary overview including theories on the nature of aggression and war, case studies of contemporary conflicts, consideration of various peace proposals, conditions making war or peace likely.  
**Credit Hours:** 3  
**Recommended:** sophomore standing. Writing intensive not fulfilled unless ENGLISH 1000 or equivalent has already been taken

**PEA_ST 1050W: Introduction to Peace Studies - Writing Intensive**  
Interdisciplinary overview including theories on the nature of aggression and war, case studies of contemporary conflicts, consideration of various peace proposals, conditions making war or peace likely.  
**Credit Hours:** 3  
**Recommended:** sophomore standing. Writing intensive not fulfilled unless ENGLISH 1000 or equivalent has already been taken

**PEA_ST 1051: International Conflict Resolution and Group Reconciliation**  
Theories of conflict resolution. We will study achieving peace through techniques and institutions that attempt personal and interactive reconciliation of opposing groups personally. Case studies might include the "Truth and Reconciliation" committees following South African Independence, and similar projects to promote inter-group understanding in Middle East conflicts. The course will then analyze examples of the resolution of major international conflicts and issues, such as the Irish Peace Accords, the Camp David peace process for the Middle East, Strategic Nuclear Arms Limitation, and the Kyoto Protocol.  
**Credit Hours:** 3

**PEA_ST 1051W: International Conflict Resolution and Group Reconciliation - Writing Intensive**  
Theories of conflict resolution. We will study achieving peace through techniques and institutions that attempt personal and interactive reconciliation of opposing groups personally. Case studies might include the "Truth and Reconciliation" committees following South African Independence, and similar projects to promote inter-group understanding in Middle East conflicts. The course will then analyze examples of the resolution of major international conflicts and issues, such as the Irish Peace Accords, the Camp David peace process for the Middle East, Strategic Nuclear Arms Limitation, and the Kyoto Protocol.  
**Credit Hours:** 3

**PEA_ST 1052: Global Warming, Climate Change, Catastrophic Climate Destabilization**  
Global warming, climate change and catastrophic climate destabilization as alternate conceptualizations. The greenhouse gas effect; the consequences of climate change for oceans, fresh water ecosystems, forests, agriculture, biodiversity, public health, social justice and global social stability. Potential solutions will be considered, including sustainable energy sources, efficiency of energy use, divestment from fossil fuels, and putting a price on carbon.  
**Credit Hours:** 3

**PEA_ST 1052W: Global Warming, Climate Change, Catastrophic Climate Destabilization - Writing Intensive**  
Global warming, climate change and catastrophic climate destabilization as alternate conceptualizations. The greenhouse gas effect; the consequences of climate change for oceans, fresh water ecosystems, forests, agriculture, biodiversity, public health, social justice and global social stability. Potential solutions will be considered, including sustainable energy sources, efficiency of energy use, divestment from fossil fuels, and putting a price on carbon.  
**Credit Hours:** 3

**PEA_ST 1120: Population and Ecology**  
(same as RU_SOC 1120 and SOCIOL 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.  
**Credit Hours:** 3

**PEA_ST 1150: The Amish Community**  
(same as RU_SOC 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter cultural pressures, stresses and social change.  
**Credit Hours:** 3  
**Recommended:** RU_SOC 1000, SOCIOL 1000, or ANTHRO 1000

**PEA_ST 1150W: The Amish Community - Writing Intensive**  
(same as RU_SOC 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter cultural pressures, stresses and social change.  
**Credit Hours:** 3  
**Recommended:** RU_SOC 1000, SOCIOL 1000, or ANTHRO 1000
PEA_ST 2000: Exploration in Social and Economic Justice  
(same as SOC_WK 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000

---

(same as SOC_WK 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. May be repeated for credit. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ENGLISH 1000

---

PEA_ST 2003: Topics in Peace Studies: Behavioral Science  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour:** 2-3  
**Recommended:** Sophomore standing

---

PEA_ST 2003W: Topics in Peace Studies: Behavioral Science - Writing Intensive  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour:** 2-3  
**Recommended:** Sophomore standing

---

PEA_ST 2004: Topics in Peace Studies - Social Sciences  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 2-3  
**Recommended:** Sophomore standing

---

PEA_ST 2004W: Topics in Peace Studies - Social Sciences - Writing Intensive  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour:** 2-3  
**Recommended:** Sophomore standing

---

PEA_ST 2005: Topics in Peace Studies - Humanities  
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour:** 2-3  
**Recommended:** Sophomore standing

---

PEA_ST 2016: Authoritarian Societies, States, and the Prospects for Democracy  
The course analyzes and critiques current authoritarian tendencies in civil society and the state, in politics, economy, culture, and individually experienced social life. It will synthesize varied approaches and theories from several disciplines, and will place developments in the US and other nations in historical and multicultural context. Topics may include: authoritarian racism and social control, movements and resistance against authoritarianism, mobilization through mass and social media, and authoritarianism as a global phenomena.

**Credit Hours:** 3

---

PEA_ST 2016W: Authoritarian Societies, States, and the Prospects for Democracy - Writing Intensive

Topics may include: authoritarian racism and social control, movements and resistance against authoritarianism, mobilization through mass and social media, and authoritarianism as a global phenomena.

**Credit Hours:** 3

---

PEA_ST 2100: The Vietnam and Iraq Wars: Lessons for the Future  
An interdisciplinary analysis of the Vietnam War and the American-led war with Iraq. Course focuses on the reasons that America lost in Vietnam, the reasons it won in Iraq, and the lessons these conflicts provided for America's future. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing

---

PEA_ST 2140: ART: Visual Culture and The Iconography of Social Intent  
The focus of the course is to encourage students to view and discuss visual arts in an informed manner. The course will also raise key issues in the humanities, such as how certain artists reflect upon and explore the cultural, social and historical impact of human agency. Provided is a basic review of the visual arts during selected time periods of the past, along with an emphasis on creative responses by modern and post-modern artists to the changing socio-economic and cultural landscape of the present day. The influence, manipulation, and oftentimes, conflictual aspects of the arts, will be discussed together with an appropriate overview of context, and vocabulary. Students will come to recognize and appreciate art's intriguing versatility, and the power of art "to integrate individual and communal needs" (Dissanayake, 2000).

**Credit Hours:** 3

---

PEA_ST 2182: Critical Dialogues: Nonviolence in Peace/Democracy Movements  
(same as SOCIOL 2182). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics and factions in movements; relationship to state authority. Cases such as Gandhi's Independence, American Civil Rights, Arab Spring, and Occupy movements.
PEA_ST 2182W: Critical Dialogues: Nonviolence in Peace/Democracy Movements - Writing Intensive
(same as SOCIOL 2182). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics and factions in movements; relationship to state authority. Cases such as Gandhi's Independence, American Civil Rights, Arab Spring, and Occupy movements.

Credit Hours: 3
Prerequisites: PEA_ST 1050 or instructor's consent

PEA_ST 2200: Nuclear Weapons: Environmental, Health and Social Effects
(same as HLTH_SCI 2200 and SOCIOL 2281). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2200W: Nuclear Weapons: Environmental, Health and Social Effects - Writing Intensive
(same as HLTH_SCI 2200 and SOCIOL 2281). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2220: America in the 1960's
(same as HIST 2220). Examines the political and cultural main currents of the 1960s. Emphasizes the challenges mounted by protest groups and the responses of America's political leadership to the ferment of the period.

Credit Hours: 3
Prerequisites: sophomore standing

PEA_ST 2255: Youth, Islam, and Global Cultures
(same as SOCIOL 2255). Youth subcultures and the social issues and problems faced by youth, focusing on the Islamic world and Muslim immigrants, in the United States and elsewhere. Social and behavioral theories and concepts such as paths to modernization, Orientalism, post-colonialism, population movements, social construction, identity, and recognition will be illustrated.

Credit Hours: 3

PEA_ST 2280: Race, Democracy, and Violence in Cuba and Haiti
(same as SOCIOL 2280, GEOG 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2280W: Race, Democracy, and Violence in Cuba and Haiti - Writing Intensive
(same as SOCIOL 2280, GEOG 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2285: Large Corporations, Economic Crisis, Social Responsibility
(same as SOCIOL 2285). Institutional power of the corporate CEO; ethical regulatory restraint. Historical contexts of economic crisis. Theories of justice, alternative concepts of justice in popular culture. Politics of policy issues in prosecution and criminalization of corporate behavior. Graded on A-F basis only.

Credit Hours: 3

PEA_ST 2286: Technological Futures, National Security, and Civil Liberties
(same as SOCIOL 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.

Credit Hours: 3

PEA_ST 2286W: Technological Futures, National Security, and Civil Liberties - Writing Intensive
(same as SOCIOL 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.

Credit Hours: 3

PEA_ST 2287: Conspiracies, Popular Imagination, Evidence
In-depth and critical analysis of cases involving allegations of "conspiracy" in international affairs, contrasted with official reports and presentations of evidence in a variety of venues. Conspiracy theories considered might include those centering on 9-11 and the Kennedy assassination. Conspiracy theories will be compared and contrasted to what is known about secrecy and the functioning of elite political and economic institutions such as the Trilateral Commission and campaign financing organizations. Students will analyze a variety of NGO and government documents and investigative journalism drawing on Wiki Leaks. We will compare and contrast what is considered evidence in different venues such as the criminal justice system, government reports, journalism, and academic writing by historians, social and behavioral scientists, and natural scientists. Concepts clarified and utilized will include: state corporate crime, system determination, social construction,
narrative, historical memory, symbolic politics, and individual and group responsibility.

Credit Hours: 3

PEA_ST 2287W: Conspiracies, Popular Imagination, Evidence - Writing Intensive
In-depth and critical analysis of cases involving allegations of "conspiracy" in international affairs, contrasted with official reports and presentations of evidence in a variety of venues. Conspiracy theories considered might include those centering on 9-11 and the Kennedy assassination. Conspiracy theories will be compared and contrasted to what is known about secrecy and the functioning of elite political and economic institutions such as the Trilateral Commission and campaign financing organizations. Students will analyze a variety of NGO and government documents and investigative journalism drawing on WikiLeaks. We will compare and contrast what is considered evidence in different venues such as the criminal justice system, government reports, journalism, and academic writing by historians, social and behavioral scientists, and natural scientists. Concepts clarified and utilized will include: state corporate crime, system determination, social construction, narrative, historical memory, symbolic politics, and individual and group responsibility.

Credit Hours: 3

PEA_ST 2288: Sports, Protest Movements, and Conflict Resolution
This course will critically analyze the social significance of sports, focusing on events leading to and influencing protest movements and the peaceful outcomes (or lack thereof) of these movements through conflict resolution. We will identify the non-violent behaviors, strategies, and ideologies of numerous athletes such as: Muhammad Ali, Jim Brown, Harry Edwards, John Carlos and Tommy Smith, Colin Kaepernick, and their particular methods of rebellion and representation of issues. Furthermore, we will examine how fans, organizations, media, and sporting committees (i.e. International Olympic Committee) have reacted to athlete revolts, and the effectiveness of revolts in changing society.

Credit Hours: 3

PEA_ST 2288W: Sports, Protest Movements, and Conflict Resolution - Writing Intensive
This course will critically analyze the social significance of sports, focusing on events leading to and influencing protest movements and the peaceful outcomes (or lack thereof) of these movements through conflict resolution. We will identify the non-violent behaviors, strategies, and ideologies of numerous athletes such as: Muhammad Ali, Jim Brown, Harry Edwards, John Carlos and Tommy Smith, Colin Kaepernick, and their particular methods of rebellion and representation of issues. Furthermore, we will examine how fans, organizations, media, and sporting committees (i.e. International Olympic Committee) have reacted to athlete revolts, and the effectiveness of revolts in changing society.

Credit Hours: 3

PEA_ST 2289: Towns in Missouri and the Midwest: Voices and Inequalities
(same as GEGG 2289, RU_SOC 2289). Focusing on towns and communities and their regional history and cultural traditions, we will examine the issues and concerns of small town America in the context of recent hardships and adverse economic trends. Examples of topics to be covered include case studies of communities such as Marceline, Missouri (Walt Disney's boyhood home), race and the immigration of non-whites in rural areas; gender roles in small communities, the role of religion in small-town identity formation, and other current issues faced by “middle America”. The responsiveness of government, large corporations, and institutions to the problems of diverse communities will be critically examined, with a multidisciplinary approach that will draw on key theories and works in the disciplines of sociology, rural sociology, community development, and geography.

Credit Hours: 3

Credit Hours: 3

PEA_ST 2290: Drugs, Violence and the Police in Latin America and Latina/o Communities in the United States
A regional and global perspective on the "war on drugs" and violence in Latin American countries such as Mexico and Colombia, as well as the United States. The course may include units on such topics as: the recent history of gangs in US urban areas; political violence in Central America and such countries as Colombia and Venezuela; and attempts to mediate and reconcile social conflicts and war in those areas. The interplay between gangs, drug policies, policing, and citizens' action and protests in major cities of the hemisphere, such as in Argentina and Brazil. Drugs, policing, gangs, and violence as a symbolic and hot button issue in domestic politics, and the consequences for public policy and the character of the discourse about public policy.

Credit Hours: 3

PEA_ST 2291: Artificial Intelligence Big Data: Social, Political, Ethical Issues
This course will enable students to evaluate contrasting interpretations by leading thinkers about the development of information technologies, the internet, and robotics and artificial intelligence. Current debates will be covered; topics might include: views that social media are constraining the development of human relationships (Turkel); that commercialization of the internet reduces its function to attention getting (Wu); that automation degrades the humanity of work (Carr) and restricts the pay for producing creative content (Lanier). On the other hand, the course will consider arguments that human mind can be reverse reengineered to advance a new era of artificially intelligent machines (Kurzweil). Current theories of information technology and society will be grounded in the multidisciplinary thinking about mind, intelligence, art, and work.

Credit Hours: 3
PEA_ST 2292: Internet Identities, and the Clash of Global Countercultures and Oppositional Cultures
This course problematizes the development of individual and group identities on the internet and social media due to their multiple, global, shallow, shifting, segmented, and conflictual character. We emphasize a multidisciplinary examination of the internet presentation of diverse identities such as those of the 1960s counter-culture, the Christian right, militias, the alt-right, rural towns, terrorist cells, and lifestyle and sectarian political and religious groups. We will also examine the processes of publicity and celebrity in the creation of personal identities such as "entrepreneur" (Bill Gates and Steve Jobs), "geek", "hacker," and anonymous, and the development of internet technologies and personal identities in the context of commercialism and ideals such as freedom and rebellion. The intersection of personal, work, and professional identities will be considered. Sources will include autobiography, biography, and literature on such topics as diaspora, borders, Empire, and exile.
Credit Hours: 3

PEA_ST 2293: Globalization, Identity and Citizenship (same as GEOG 2293, POL_SC 2293). This course examines the forces of globalization that are transforming our world, and explores the various responses -- psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.
Credit Hours: 3

PEA_ST 2293W: Globalization, Identity and Citizenship - Writing Intensive (same as GEOG 2293W, POL_SC 2293W). The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.
Credit Hours: 3

PEA_ST 2294: Public Health, Social Justice, Health Activism
This course features a focus on (1) the literature on health and social justice movements and activism, and (2) community-based and local health problems and organizing, with a consideration of the relation between local community and the global. In a "place matters" assignment, students will identify, collect, analyze, synthesize, and present relevant place-based data on factors influencing health. The concept of 'structural competency' underlies the approach of this course. Topics pursued might include: the water crisis in Flint, Michigan; women's health; racism and morbidity and mortality crisis; HIV/ AIDS activism; public health mobilization for immigrant rights; and health educators and ethical issues.
Credit Hours: 3

PEA_ST 2294W: Public Health, Social Justice, Health Activism - Writing Intensive

Credit Hours: 3

PEA_ST 2320: Literature of Spanish Civil War (same as SPAN 2320). Study of the Spanish Civil War: History, Politics, Literature. May not be included in the area of concentration in Spanish.
Credit Hours: 3
Prerequisites: sophomore standing

PEA_ST 2321: Germany in War and Peace: Division and Unity 1945-89
This course will compare notions of war and peace in East (German Democratic Republic) and West Germany (Federal Republic of Germany), 1945-1989. In particular, there are three main ways to think about war and peace: 1. Dealing with the Nazi past; 2. Dealing with the Cold War present; Negotiating violence and peace within various dissent and peace movements.
Credit Hour: 2-3

PEA_ST 2322: Rise of Hitler: Politics and Society in Germany
This course will examine the social climate of Germany that contributed to the rise of Hitler and the National Socialist Party, 1914-1933. The Nazis, in order to revise the last peace at Versailles and to construct a New Racial Order, organized a national community and planned and initiated a world war.
Credit Hours: 2

PEA_ST 2410: Philosophies of War and Peace
(same as PHIL 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace,
social and personal. Special attention to the Vietnam War and the nuclear age.

**Credit Hours: 3**

**PEA_ST 2410W: Philosophies of War and Peace - Writing Intensive**
(same as PHIL 2410). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age.

**Credit Hours: 3**

**PEA_ST 2490: Introduction to Indigenous Literatures**
(Same as ENGLISH 2490). Introduces students to global indigenous literatures in English and translation. Graded on A-F basis only.

**Credit Hours: 3**

**PEA_ST 2550: Human Rights, Law, War and Peace**
Interdisciplinary exploration of how human rights, law, war and peace are connected through an analysis of various theories and contemporary examples, which may include issues regarding citizenship in the United States today, the regulation of economic markets in the U.S. today, state surveillance, the military industrial complex, the manner in which gender affects the experience of warfare and individuals.

**Credit Hours: 3**

**PEA_ST 2600: CAFO: Concentrated Animals, Deep Ecology**
Throughout the ages humans have toiled and tilled the land confirming their role as integral providers as well as graceful recipients of nature's bounty. The significant metamorphosis that this gentle and cautious stewardship of the earth has undergone, necessitates close scrutiny. This multi-disciplined humanities course will consider the prose of the human community as it intersects widespread industrialized animal production with its inevitable social, economic and environmental realities. Eco-Feminist readings and the Fine Arts with its theoretical underpinnings associated with a liberal arts aesthetic will invite a wider perspective.

**Credit Hours: 3**

**Credit Hours: 3**

**PEA_ST 3005: Topics in Peace Studies - Humanities**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour: 1-3**

**Prerequisites:** sophomore standing

**Recommended:** departmental consent

**PEA_ST 3005H: Topics in Peace Studies - Humanities - Honors**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.

**Credit Hour: 1-3**

**Prerequisites:** sophomore standing. Honors eligibility required

**PEA_ST 3008: Topics in Peace Studies - Behavioral Science**
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent.

**Credit Hour: 2-3**
PEA_ST 3350: Readings in Peace Studies
Students may receive 1 to 3 credit hours for doing readings and research in a particular area of peace studies. At least one paper will be required. Repeatable for a maximum of 6 hours.

Credit Hour: 1-3
Prerequisites: instructor's consent

PEA_ST 3496W: Digital Indigenous Studies - Writing Intensive
(same as GEOG 3496). This course introduces students to Indigenous studies in a digital world. The course begins with study of Indigenous sovereignty and representation, and moves quickly to critical and theoretical readings in new media, tracing both the historical impact of digital technologies (such as GIS) on Native communities, and the ways that both urban and rural Native communities have engaged in innovative digital projects that expand the way we understand information and storytelling in digital environments. The course materials will cover a wide range of platforms and audio-visual genres, from documentary, community video, and animation productions, to GIS, video games, and social media sites. Students will engage with both scholars and artists working with new media through a program of public lectures, classroom visits, and Skype interviews. All interview will be archived as podcasts from the course website. Students will write weekly short response papers and produce independent audio-visual projects over the course of the semester, with opportunities to revise their work leading up to substantial final projects. The course will also integrate community outreach into the curriculum through online participation of students from the Kiowa Kids, an Indigenous language immersion and storytelling program. Prerequisites: Honors eligibility required

Credit Hours: 3

PEA_ST 3496H: Digital Indigenous Studies - Honors
(same as GEOG 3496H). This course introduces students to Indigenous studies in a digital world. Credit Hours: 3

PEA_ST 3510: Think Global: Fundamentals of Globalization and Digital Technologies
(same as JOURN 3510, GERMAN 3510, DST 3510, T_A_M 3010). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Sophomore standing or instructor's consent
(same as GERMAN 3510HW, T_A_M 3010HW, JOURN 3510HW, DST 3510HW). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing required and 2.75 GPA. Honors eligibility required

(same as JOURN 3510W, T_A_M 3010W, GERMAN 3510W, DST 3510W). This interdepartmental course serves as one of the core seminars for students pursuing the undergraduate Certificate in Digital Global Studies. The course focuses on the impact of technological change and globalization on cultures around the world from various interdisciplinary perspectives. The course is open to students in any discipline. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Sophomore standing or instructor's consent

PEA_ST 3520: Collective Behavior
(same as SOCIOL 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.
Credit Hours: 3

PEA_ST 3520W: Collective Behavior - Writing Intensive
(same as SOCIOL 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.
Credit Hours: 3

PEA_ST 3521: Group Decision Making Processes
(same as COMMUN 3571). Procedures and techniques for interpersonal communication and decision making in small groups.
Credit Hours: 3
Prerequisites: sophomore standing

PEA_ST 3522: New Media, Conflict and Control
(same as SOCIOL 3522) This course will explore the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts will illustrate how citizens and regimes use new media to communicate, report, mobilize, monitor, and/or control. Students will utilize new media as they research instances of democracy and control.
Credit Hours: 3

PEA_ST 3600: Criminology
(same as SOCIOL 3600). Sociology of law; constitutional, psychological, sociological theories of criminal behavior; process of criminal justice; treatment of corrections; control of crime.
Credit Hours: 3

PEA_ST 3610: Ireland, 1100s to 1850
(same as HIST 3610), Ireland, from Conquest to Famine: Ireland's history as the first British Colony, from the conquests of the 1100s and 1500s-1600s to the Irish rebellion of 1798 and the Great Famine and mass emigration of 1845-50.
Credit Hours: 3

PEA_ST 3611: Ireland, 1850-1923
(same as HIST 3611). Ireland, from Famine to Partition: Irish history from the Great Famine of 1845-50 to the revolutions of 1916-23 that brought partial independence from Britain but partitioned Ireland into two hostile and trouble states.
Credit Hours: 3

PEA_ST 3612: Ireland, 1920-Present
(same as HIST 3612). Ireland, from Partition to the Present: After surveying the conflicts that led to Irish revolution and partition in 1916-23, the course focuses on the development of post partition Ireland and Northern Ireland, and on the violence that has scarred Northern Ireland since the 1960s.
Credit Hours: 3
Recommended: HIST 3610 and/or HIST 3611

PEA_ST 3615: Ireland, 1100s to 1500

PEA_ST 3620: World Political Geography
(same as GEOG 3780). Geographic factors in the development of political boundaries traditions, and societal perspectives. Spatial patterns and geopolitical processes are explored in selected regions of the world.
Credit Hours: 3
Prerequisites: GEOG 1100 or GEOG 1200 or sophomore standing

PEA_ST 3670: Social Revolution in Latin America
(same as HIST 3870 and SOCIOL 3870). Twentieth century social revolutions in selected Latin American countries.
Credit Hours: 3

PEA_ST 4003: Topics in Peace Studies - Behavioral Sciences
Upperclass Topics. Subject may vary from semester to semester.
Credit Hours: 3
Prerequisites: junior standing required

PEA_ST 4005: Topics in Peace Studies: Humanities
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated to a maximum of 6 hours with departmental consent. Graded on A-F basis only.
Credit Hour: 2-6
Recommended: sophomore standing
PEA ST 4080: American Foreign Policy from Colonial Times to 1898
(same as HIST 4080, CNST DEM 4080; cross-leveled with HIST 7080, PEA ST 7080). This class probes the entwined development of the U.S. nation and empire, to the backdrop of accelerating structures of global economic integration, technological innovation, and the hardening of national, racial, and ideological formations.
Credit Hours: 3

PEA ST 4230: Women, Development and Globalization
(same as SOCIOL 4230 and WGST 4230 and BL STU 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.
Credit Hours: 3
Prerequisites: BL STU 1332 or BL STU 2200; SOCIOL 2200, WGST 1332 or WGST 2010

PEA ST 4240: Theory and Practice of Theatre of the Oppressed
(same as THEATR 4240; cross-leveled with PHIL 7240, THEATR 7240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.
Credit Hours: 3
Prerequisites: instructor's consent

PEA ST 4260: The Age of Ascendancy: U.S. Foreign Relations, 1945-Present
(same as HIST 4260). Surveys the Cold War in Europe and Asia, the Korean and Vietnam Wars, and Middle East policy.
Credit Hours: 3
Prerequisites: sophomore standing

PEA ST 4287: Empire: Intellectual History, Literature, and Society
(same as REL ST 4287; cross-leveled with PEA ST 7287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras. Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.
Credit Hours: 3
Prerequisites: junior standing
Recommended: senior standing

PEA ST 4288: Law and Society: Corporate and White Collar Crime and Malfeasance
(cross-leveled with PEA ST 7288). Instances of corporate crime and ethical misconduct analyzed through major theories of the sociology of law including critical legal studies, Legal Realism, sociological jurisprudence, collective representation theory, state- corporate crime, rationalization of legal institutions/ critical theory, and post-structuralism.
Credit Hours: 3

Cases to be analyzed might include mortgage lending fraud and malpractice, insider trading, pyramid schemes, the Erie Railroad scandals, and Enron, Worldcom, Tyco, and other instances in the hi tech collapse of 2001. Other topics: Corporate crime in the media and in novels and popular culture, appropriate sentencing, global corporate crime.
Credit Hours: 3
Prerequisites: at least junior standing
Recommended: senior standing, 3.0 or above GPA, interest in graduate school

PEA ST 4331: Nonproliferation Issues for Weapons of Mass Destruction
(same as NU ENG 4331). Nonproliferation impact on technology and world events.
Credit Hours: 3
Prerequisites: junior or senior standing

PEA ST 4331W: Nonproliferation Issues for Weapons of Mass Destruction - Writing Intensive
(same as NU ENG 4331). Nonproliferation impact on technology and world events.
Credit Hours: 3
Prerequisites: junior or senior standing required or instructor's consent

PEA ST 4410: Politics and War
(same as POL SC 4410). Why do wars occur? The function of force and uses of a threat of force. Problems of national security strategy and arms control.
Credit Hours: 3

PEA ST 4520: Political Sociology
(same as SOCIOL 4520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change. MA core course.
Credit Hours: 3

PEA ST 4550: Gender and Human Rights in Cross Cultural Perspective
(same as WGST 4550 and SOCIOL 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.
Credit Hours: 3
Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required

PEA ST 4600: Political and Social Philosophy
(same as PHIL 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, liberalism, libertarianism, Marxism, Communitarianism and feminism may be among the views covered.
Credit Hours: 3
Prerequisites: sophomore standing or instructor's consent
Recommended: two courses in Philosophy

**PEA_ST 4810: Case Studies in an Inter/Multicultural World**
(same as GERMAN 4810, T_A_M 4810, DST 4805). This inter-departmental course examines the ways in which people across the globe are affected every day by an unprecedented array of linkages that defy geographic and political boundaries. Also serves as one of the seminars for the certificate in Digital Global Studies. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** Sophomore standing; 2.75 GPA or instructor's consent

**PEA_ST 4970: Senior Thesis I**
Senior essay on a Peace Studies topic requiring major research.

**Credit Hours:** 3

**Prerequisites:** PEA_ST 1050, senior standing, and instructor's consent

**PEA_ST 4980: Peace Studies Abroad - Social Sciences**
A study abroad experience organized by MU and led by MU faculty. Provides students with interdisciplinary study in foreign cultures, career development, and global experience with issues such as war, domestic conflict, sustainable development, human rights, and nonviolent movements for peace and justice. May be repeated for credit.

**Credit Hours:** 3-6

**PEA_ST 7240: Theory and Practice of Theatre of the Oppressed**
(same as THEATR 7240; cross-leveled with PEA_ST 4240, THEATR 4240). Theory and practice of Augusto Boal's liberatory interactive theatre process, including application of techniques of specific social issues.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**PEA_ST 7287: Empire: Intellectual History, Literature, and Society**
(same as REL_ST 7287; cross-leveled with PEA_ST 4287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras. Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

**Credit Hours:** 3

**PEA_ST 7288: Law and Society: Corporate and White Collar Crime and Malfeasance**
(cross-leveled with PEA_ST 4288). Instances of corporate crime and ethical misconduct analyzed through major theories of the sociology of law including critical legal studies, Legal Realism, sociological jurisprudence, collective representation theory, state-corporate crime, rationalization of legal institutions/ critical theory, and post-structuralism. Cases to be analyzed might include mortgage lending fraud and malpractice, insider trading, pyramid schemes, the Erie Railroad scandals, and Enron, Worldcom, Tyco, and other instances in the hi-tech collapse of 2001. Other topics: Corporate crime in the media and in novels and popular culture, appropriate sentencing, global corporate crime.

**Credit Hours:** 3

**PEA_ST 7550: Gender and Human Rights in Cross Cultural Perspective**
(same as SOCIOL 7750 or WGST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

**Credit Hours:** 3

**PEA_ST 7980: Peace Studies Abroad**
A study abroad experience organized by MU and led by MU faculty. Provides students with interdisciplinary study in foreign cultures, career development, and global experience with issues such as war, domestic conflict, sustainable development, human rights, and nonviolent movements for peace and justice. May be repeated for credit.

**Credit Hour:** 3-6

**Personal and Financial Planning (FINPLN)**

**FINPLN 1183: Financial Survival**
Examines financial management issues needed to survive the critical college years-credit/credit cards, budgeting/planning, financial aid, loans, common financial mistakes, debt management, setting financial goals, effective use of financial resources. Graded on S/U basis only.

**Credit Hour:** 1

**FINPLN 2083: Financial Planning Careers**
This course will provide the student with a broad, general introduction to careers in financial planning. Through readings, introspection, discussions, and guest speakers, the student will develop an understanding of the field.

**Credit Hour:** 1

**FINPLN 2183: Personal and Family Finance**
Individual and family finance, with particular emphasis on financial planning, savings, insurance, investments, taxes, use of credit, and financial aspects of housing. Math Reasoning Proficiency Course. Students who wish to pursue a Personal Financial Planning emphasis must earn a B- or better, in FINPLN 2183.

**Credit Hours:** 3

**Prerequisites:** MATH 1050 or MATH 1100 (or higher) with grade of C- or above

**FINPLN 2183H: Personal and Family Finance - Honors**
Individual and family finance, with particular emphasis on financial planning, savings, insurance, investments, taxes, use of credit, and financial aspects of housing. Math Reasoning Proficiency Course.
Students who wish to pursue a Personal Financial Planning emphasis must earn a B- or better, in FINPLN 2183.

Credit Hours: 3  
Prerequisites: MATH 1050 or MATH 1100 (or higher) with grade of C- or above; Honors eligibility required

FINPLN 3282: Financial Counseling  
Practical course on client financial counseling. Course emphasizes client money issues including budgeting, credit, debt management, bankruptcy and other issues. Students also will learn counseling strategies and communication skills to motivate clients to change negative behaviors and/or adopt positive behaviors.

Credit Hours: 3  
Prerequisites or Corequisites: FINPLN 2183 or instructor's consent

FINPLN 3283: Financial Planning: Computer Applications  
Development of expertise in analyzing and understanding family financial case situations. Applications include the use of leading financial planning software, as well as applications with spreadsheets.

Credit Hours: 3  
Prerequisites: FINPLN 2183 with grade of C or above

FINPLN 4000: Problems in Personal Financial Planning  
Supervised and independent work.

Credit Hour: 1-99  
Prerequisites: instructor's consent

FINPLN 4187: Tax Planning  
(cross-leveled with FINPLN 7187). Principles, current law and practice of income taxation and its impact on personal financial planning for individuals, couples and families in their roles as investors, employees, and business owners. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: FINPLN 2183; FINPLN 3283 or ACCTCY 2258. Restricted to Personal Financial Planning emphasis area with a 2.5 cumulative gpa or higher; restricted to Personal Financial Management Services emphasis area with a 2.0 cumulative gpa or higher; restricted to Financial Counseling emphasis area with a 2.25 cumulative gpa; or instructor consent

FINPLN 4188: Community Agencies and Volunteerism  
Service learning in a non-profit community social support agency. Examines economic role of non-profits and volunteerism. Students engage in service and evaluate experience in seminar. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: FINPLN 4187 or FINPLN 7187. Restricted to Personal Financial Planning majors or instructor's consent

FINPLN 4380: Assessing the American Dream  
A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology, the economy, mass media and social movements on household resource management.

Credit Hours: 3  
Prerequisites: ENGLISH 1000  
Recommended: junior standing

FINPLN 4380W: Assessing the American Dream - Writing Intensive  
A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology, the economy, mass media and social movements on household resource management.

Credit Hours: 3  
Prerequisites: ENGLISH 1000  
Recommended: junior standing

FINPLN 4382: Financial Planning: Risk Management  
(cross-leveled with FINPLN 7382). Analysis of family financial risks and conservation of family assets via risk management, with primary focus on personal lines of insurance.

Credit Hours: 3  
Prerequisites: FINPLN 2183; FINPLN 3283 or ACCTCY 2258; ECONOM 1014 or AG_EC 1041; ECONOM 1015 or AG_EC 1042; STAT 2500 or STAT 1300 and STAT 2200 or STAT 1400 and STAT 2200 or STAT 1200 and STAT 2200. Restricted to Personal Financial Planning emphasis area with a 2.5 cumulative gpa or higher; restricted to Personal Financial Management Services emphasis area with a 2.0 cumulative gpa or higher; restricted to Financial Counseling emphasis area with a 2.25 cumulative gpa; or instructor consent

FINPLN 4383: Financial Planning: Investment Management  
(cross-leveled with FINPLN 7383). Introduction to investment for family financial planning.

Credit Hours: 3  
Prerequisites or Corequisites: ECONOM 3229  
Prerequisites: FINPLN 2183; FINPLN 3283 or ACCTCY 2258; STAT 2500 or STAT 1300 and STAT 2200 or STAT 1400 and STAT 2200 or STAT 1200 and STAT 2200. Restricted to Personal Financial Planning emphasis area with a 2.5 cumulative gpa or higher; restricted to Personal Financial Management Services emphasis area with a 2.0 cumulative gpa or higher; restricted to Financial Counseling emphasis area with a 2.25 cumulative gpa; or instructor consent

Credit Hours: 3  
Prerequisites: FINPLN 4187 and FINPLN 4382 and FINPLN 4383

FINPLN 4387: Consumer and Household Economics  
Economic theory of consumer and household behavior, focusing on rationality, uncertainty, optimal search, heuristics, interactive decisions and considering implications for financial decision making and policy analysis.

Credit Hours: 3
Prerequisites: ECONOM 1014 or AG_EC 1041; STAT 2500 or STAT 1300 and STAT 2200 or STAT 1400 and STAT 2200 or STAT 1200 and STAT 2200

FINPLN 4389: Financial Planning: Capstone
The course emphasizes the use of analytical tools to develop effective financial plans for individuals and households.
Credit Hours: 3
Prerequisites: FINPLN 4187 and FINPLN 4382 and FINPLN 4383 and FINPLN 4386 and FINPLN 4393. Restricted to Personal Financial Planning majors or instructor's consent

FINPLN 4393: Financial Planning: Estate and Gift Planning
Fundamentals, practical problems and solutions in basic estate and gift planning, business succession planning, and taxation issues.
Credit Hours: 3
Prerequisites: FINPLN 4187 and FINPLN 4382 and FINPLN 4383 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 4418: Topics in Personal Financial Planning
Selected current topics in field of interest.
Credit Hour: 1-99
Prerequisites: instructor's consent

FINPLN 4483: Financial Success
Examines financial management issues needed to survive the critical post-college years - managing educational debt; after-school budgeting; auto, health, and other forms of insurance; retirement planning and other investment issues; setting financial goals; effective use of financial resources. Graded on S/U basis only.
Credit Hour: 1

FINPLN 4992: Readings in Personal Financial Planning
Selected readings in field of interest.
Credit Hour: 1-12
Prerequisites: Instructor's consent
Recommended: 2-3 hours in Personal Financial Planning

FINPLN 4993: Internship in Personal Financial Planning
Enrollment in a major in the Department of Personal Financial Planning - Financial Planning (PFP), Personal Financial Management Services (PFMS), or Financial Counseling (FC). An exception may be made for those with a minor in PFMS or who obtain consent from the Department.
Credit Hour: 1-99
Prerequisites: Enrollment in a major in the Department of Personal Financial Planning - Financial Planning (PFP), Personal Financial Management Services (PFMS), or Financial Counseling (FC). An exception may be made for those with a minor in PFMS or who obtain consent from the Department

FINPLN 7000: Problems in Personal Financial Planning
Prerequisites: Restricted to Personal Financial Planning Majors Only.
Credit Hour: 1-99

Prerequisites: 4000-level course in field of problem and instructor's consent

FINPLN 7001: Topics in Household Economics and Finance
Selected current topics in field of interest.
Credit Hour: 1-99

FINPLN 7183: Fundamentals of Personal Financial Planning
Issues and concepts related to the financial planning process, including determination of financial goals and expectations and analysis and evaluation of personal and family financial data with emphasis on savings, insurance, investments, taxes, credit and financial aspects of housing.
Credit Hours: 3

FINPLN 7187: Financial Planning: Tax Planning
(cross-leveled with FINPLN 4187). Principles, current law and practice of income taxation and its impact on personal financial planning for individuals, couples and families in their roles as investors, employees, and business owners. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: FINPLN 2183; FINPLN 3283 or ACCTCY 2258 or equivalent or instructor's consent

FINPLN 7282: Advanced Financial Counseling
Students will learn client-centered financial counseling. Includes development of interviewing techniques, focus on personality strengths and weaknesses, creation of the sales process, and the role of technology in counseling. Graded on A-F basis only.
Credit Hours: 3

FINPLN 7380: Assessing the American Dream
A systems perspective examining ways choice and culture shape American levels and standards of living. The impact of trends in personal and family values, technology the economy, mass media and social movements on household resource management.
Credit Hours: 3

FINPLN 7382: Financial Planning: Risk Management
(cross-leveled with FINPLN 4382). Analysis of family financial risks and conservation of family assets via risk management, with primary focus on personal lines of insurance.
Credit Hours: 3
Prerequisites: FINPLN 3283 or ACCTCY 2258; ECONOM 1014 or AG_EC 1041; ECONOM 1015 or AG_EC 1042; STAT 2500 or STAT 1300 and STAT 2200 or STAT 1400 and STAT 2200 or STAT 1200 and STAT 2200

FINPLN 7383: Financial Planning: Investment Management
Management of family financial investments.
Credit Hours: 3
Prerequisites or Corequisites: ECONOM 3229
Prerequisites: FINPLN 2183; FINPLN 3283 or ACCTCY 2258; STAT 2500 or STAT 1300 and STAT 2200 or STAT 1400 and STAT 2200 or
FINPLN 7386: Financial Planning: Employee Benefits and Retirement Planning
Credit Hours: 3
Prerequisites: FINPLN 4382, FINPLN 4383, or instructor's consent

FINPLN 7387: Consumer and Household Economics II
(cross-leveled with FINPLN 4387). Economic theory of consumer and household behavior, focusing on rationality, uncertainty, optimal search, heuristics, interactive decisions and considering implications for financial decision making and policy analysis.
Credit Hours: 3
Prerequisites: ECONOM 4351 or equivalent

FINPLN 7389: Financial Planning: Capstone
The course emphasizes the use of analytical tools to develop effective financial plans for individuals and households.
Credit Hours: 3
Prerequisites: FINPLN 4187, FINPLN 4382, FINPLN 4383 or instructor's consent. Not available to Pre-Personal Financial Planning majors

FINPLN 7393: Financial Planning: Estate and Gift Planning
Fundamentals, practical problems and solutions in basic estate and gift planning, business succession planning, and taxation issues.
Credit Hours: 3
Prerequisites: FINPLN 4382 and FINPLN 4382

FINPLN 7583: Personal Financial Issues of Older Adults
(same as H.D.FS 7583). Principles and practice of personal finance relevant to assessing and improving the financial security of older individuals. Topics covered include sources of income, management of cash flow, credit use and abuse, risk exposure, investment management, housing, and financial planning. Financial vulnerabilities of seniors will be explored. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Bachelor or Master's degree in human services, social work, mental health, nursing physical rehabilitation or psychology; Must be enrolled in Graduate Certificate in Geriatric Care Management program

FINPLN 7960: Readings in Household Economics and Finance
Readings in recent research in household economics and finance.
Credit Hour: 1-99
Prerequisites: instructor's consent

FINPLN 8001: Topics in Personal Financial Planning
Selected current topics in field of interest.
Credit Hour: 1-99

FINPLN 8085: Problems in Household Economics and Finance
Supervised independent work related to household economics and finance.
Credit Hour: 1-99
Prerequisites: instructor's consent

FINPLN 8087: Seminar in Household Economics and Finance
Report and discussion of recent research and practice in household economics and finance.
Credit Hour: 1-99
Prerequisites: instructor's consent

FINPLN 8090: Master's Thesis Research in Personal Financial Planning
Independent research leading to thesis or dissertation. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

FINPLN 8183: Military Personal Financial Readiness
Financial planning process applied to military personnel and their families. Focus on service member status; financial readiness; record-keeping; management of cash flow, risk, credit and debt, savings, investments, tax, savings; education planning, retirement and estate planning. Graded on A-F basis only.
Credit Hours: 3

FINPLN 8187: Professional Practices in Financial Planning
Practice management techniques for Financial Planners. Graded on A-F basis only.
Credit Hours: 3

FINPLN 8380: Family Systems
Exploration of the family as a system within the broader context of society.
Credit Hours: 3

FINPLN 8381: Theories and Research in Personal Financial Planning I
Course introduces students to the social science of family finances. Course covers the theories of family functioning, microeconomic theory related to family resource allocation decisions, the family as an economic unit, and the interaction of families and the economy. Graded on A-F basis only.
Credit Hours: 3

FINPLN 8382: Theories and Research in Personal Financial Planning II
Course reviews theories and empirical research in household financial decision-making, drawing from macroeconomic theory, theories of
household behavior, lifecycle hypothesis, behavioral economics and finance, theories of behavioral change and psychological theories of family well-being. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** FINPLN 8381

**FINPLN 8385: Housing and Real Estate**  
The study of real estate as a component to household wealth. Graded on A-F basis only.

**Credit Hours:** 3

**FINPLN 8389: Financial Planning Case Studies**  
The analysis and development of appropriate presentations for effective financial plans.

**Credit Hours:** 3

**FINPLN 8450: Applied Research in Household Economics and Planning**  
Independent research not leading to a thesis. Report required. For students completing Master's in Personal Financial Planning.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**FINPLN 8483: Family Economics**  
Multidisciplinary study of research on families as economic units. Examines trends in family income, wealth, labor market participation, household production, distribution of household resources, use of public goods, and underground economy.

**Credit Hours:** 3

**FINPLN 8485: Human Resource Development and Allocation**  
Economic analysis of conditions, programs and policies related to development and use of human resources, with special reference to impact on families and households.

**Credit Hours:** 3  
**Prerequisites:** FINPLN 4387 or instructor's consent

**FINPLN 8488: Household Financial Decision Making**  
This course provides a solid foundation for critical thinking and research on household financial decision making. A selective but extensive review of normative and descriptive theories and empirical studies pertinent to household financial decision making is provided. The focus is on developing a critical perspective in students that enables them to identify opportunities to advanced theory toward relevant applications through research on household financial decision making.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent. A knowledge of intermediate micro economics, introductory statistics, and introductory differential calculus is assumed

**FINPLN 8500: Personal Financial Planning Capstone**  
Independent work on project approved by major advisor and CFP (R) Program Director. For students completing Master's in Personal Financial Planning. May be repeated for credit.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**FINPLN 9090: Doctoral Dissertation Research in Personal Financial Planning**  
Independent research leading to thesis or dissertation. Graded on S/U basis only.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

---

**Philosophy (PHIL)**

**PHIL 1000: The Big Questions: An Introduction to Philosophy**  
Introduction to traditional philosophical problems and methods of philosophical inquiry. Consideration given to different philosophical theories on the nature of reality, human beings, nature and God; knowledge and how it is acquired; values and social issues.

**Credit Hours:** 3  
**Prerequisites:** PHIL 1000 - MOTR PHIL 100: Introduction to Philosophy

**PHIL 1000H: The Big Questions: An Introduction to Philosophy - Honors**  
Introduction to traditional philosophical problems and methods of philosophical inquiry. Consideration given to different philosophical theories on the nature of reality, human beings, nature and God; knowledge and how it is acquired; values and social issues.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

**PHIL 1100: The Difference Between Right and Wrong: An Introduction to Ethics**  
Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification.

**Credit Hours:** 3  
**Prerequisites:** PHIL 1100 - MOTR PHIL 102: Introduction to Ethics

**PHIL 1100H: The Difference Between Right and Wrong: An Introduction to Ethics - Honors**  
Introduction to different philosophical theories regarding when acts are morally right rather than wrong; when things are good rather than bad; nature of the "good life", nature of ethical reasoning and justification.

**Credit Hours:** 3  
**Prerequisites:** Honors eligibility required

**PHIL 1150: Introductory Bioethics**  
This course approaches moral problems in biomedical and scientific research from a philosophical perspective. First, we'll familiarize ourselves with ethics and political philosophy. Then we'll study the ethical issues that arise in connection with a series of issues, including research involving human and animal subjects, eugenics, the human genome project, cloning and stem cell research. By thinking about these issues, we learn how to think critically about particular moral quandaries, as well as to uncover and examine some of our deepest moral commitments.
Credit Hours: 3

PHIL 1200: How to Think: Logic and Reasoning for Everyday Life
Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic.

Credit Hours: 3
PHIL 1200 - MOTR PHIL 101: Introduction to Logic

PHIL 1200H: How to Think: Logic and Reasoning for Everyday Life - Honors
Methods of analyzing and evaluating arguments of all types. Uses both informal and formal techniques. Identifies informal fallacies and introduces elementary symbolic logic.

Credit Hours: 3
Prerequisites: Honors eligibility required

PHIL 2005: Topics in Philosophy-Humanities
Organized study of philosophical issues to which no regular course is devoted. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3

PHIL 2010: The Philosophy of Film
(same as FILM_S 2010). Philosophical problems having to do with film. Topic may include the nature of films, the differences between fiction and documentary film, ethical issues with film and filmmaking.

Credit Hours: 3

PHIL 2100: Philosophy: East and West
(same as S_A_ST 2100). Compares the interpretation and role of philosophical concepts such as experience, reason, permanence, change, immortality, soul, God, etc., in Indian, Chinese and European traditions.

Credit Hours: 3
Prerequisites: sophomore standing

PHIL 2150: Philosophy of Race
This course surveys developments in the philosophy of race. We will examine the ordinary conception of race and consider criticisms of it. Theorists in the field generally hold the ordinary notion of race in disrepute. The line of inquiry, then becomes 'what does race denote' and 'why'? In response, we will disambiguate race from closely associated concepts such as ethnicity, culture, nation, and class as part of a sustained investigation into the relationship between race and racism. Toward the end of the course, we will more directly reflect on implications of the inequality race seems to track with a focus on mass incarceration and reparations. Graded on A-F basis only.

Credit Hours: 3

PHIL 2410W: Philosophies of War and Peace - Writing Intensive
(same as PEA_ST 2410W). Moral issues about the recourse to war by the nation and the individual's obligations to participate. The nature of peace, social and personal. Special attention to the Vietnam War and the nuclear age.

Credit Hours: 3

PHIL 2420: Ethical Issues in Business
Major theories of moral obligation and justice and their application to business practices. Corporate responsibility, government regulation, investment and production, advertisement, the environment, preferential hiring, etc. through case studies, legal opinions and philosophical analysis.

Credit Hours: 3
Prerequisites: sophomore standing

PHIL 2430: Contemporary Moral Issues
Review of the major contemporary ethical theories and their contribution to the resolution of major social issues such as euthanasia, suicide, abortion, capital punishment, violence and war. Emphasis on nature, interests, and rights of persons. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: sophomore standing

PHIL 2440: Medical Ethics
Considers moral issues posed by developments in biological sciences and medical technology. Topics may include: genetic engineering, abortion and euthanasia, distribution of health care.

Credit Hours: 3
PHIL 2500: Philosophy and Gender  
(same as WGST 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution.  
Credit Hours: 3  
Prerequisites: sophomore standing  

PHIL 2500H: Philosophy and Gender - Honors  
A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution.  
Credit Hours: 3  
Prerequisites: Honors eligibility required  

PHIL 2600: Rational Decisions  
Principles for making decisions in a rational way. Special attention to principles that use probabilities and utilities. Some discussion of decisions made in conjunction with other people, and decisions made for other people. Math Reasoning Proficiency Course.  
Credit Hours: 3  
Prerequisites: sophomore standing and grade of C or better in MATH 1100 or MATH 1120  

PHIL 2700: Elementary Logic  
Credit Hours: 3  
Prerequisites: sophomore standing and grade of C or better in MATH 1100 or MATH 1120  

PHIL 2820: Minds, Brains, and Machines  
(same as PSYCH 2820 and LINGST 2820). Cognitive science is a many-splendored thing. It draws on a variety of disciplines, including psychology, neuroscience, computer science, linguistics, anthropology, and philosophy. The purpose of this course is to introduce the central questions of cognitive science, the conceptual and empirical tools used to investigate those questions, and some of the answers that have emerged so far. After an initial overview of the foundations of the cognitive-scientific enterprise as a whole, we will see what particular sectors of it have to say about mental capacities such as language, categorization, reasoning, social cognition, and consciousness.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: PSYCH 1000  

PHIL 2900: Environmental Ethics  
Environmental Ethics explores the ethical, ecological, and policy dimensions of a range of issues such as climate change, land and natural resource management, sustainability, animal rights, hunting and fishing, ecofeminism, property rights, and environmental justice. Graded on A-F basis only.  
Credit Hours: 3  

PHIL 3000: Ancient Western Philosophy  
(same as AMS 3025). Philosophical thought on nature, knowledge, the gods, human life and society, from Thales to Augustine. Emphasis on Plato and Aristotle. The relevance of the ancients to contemporary life.  
Credit Hours: 3  
Prerequisites: sophomore standing  

PHIL 3200: Modern Philosophy  
Surveys critical and speculative thinking of modern period from Descartes to Kant in relation to scientific, religious and social movements.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: one course in Philosophy  

PHIL 3200W: Modern Philosophy - Writing Intensive  
Surveys critical and speculative thinking of modern period from Descartes to Kant in relation to scientific, religious and social movements.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: one course in Philosophy  

PHIL 3400: 19th Century Philosophy  
A careful and sympathetic study of some of the major thinkers of this period, notably Kierkegaard and Nietzsche.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: one course in Philosophy  

PHIL 3500: Existentialism  
The nature of human existence, the meaning of life, the relation of the individual to nature, society, and any gods that may be, according to Kierkegaard, Nietzsche, Heidegger, Sartre, de Beauvoir, Camus and others. Students are encouraged to come to grips with the issues in relation to their own lives.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: one course in Philosophy  

PHIL 3600: 20th Century Philosophy  
The course will be a survey of some of the notable philosophers/thinkers whose contributions have been made in the twentieth century.  
Credit Hours: 3  
Prerequisites: sophomore standing  
Recommended: one course in Philosophy  

PHIL 3700: Selected Modern Philosophers  
Advanced study of a particular philosopher or a number of philosophers from the same school in the modern period. May be taken twice for credit with permission of the department.  
Credit Hours: 3  
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 3800: Selected Contemporary Philosophers
Advanced study of a particular contemporary philosopher or philosophers. May be taken twice for credit with permission of the department.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 4001: Topics in Philosophy-General
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-99
Prerequisites: sophomore standing and two courses in Philosophy, or instructor's consent; departmental consent for repetition

PHIL 4100: Philosophy of Language
(same as LINGST 4100). Examination of contemporary views of the relationship between language, minds, and the world.

Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700
Recommended: one other course in Philosophy

PHIL 4110: Advanced Logic
(same as LINGST 4110; cross-leveled with PHIL 7110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems. Math Reasoning Proficiency Course.

Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700

PHIL 4120: Selected Topics in Logic
Elementary set theory. Modal logic, the logic of possibility and necessity.

Credit Hours: 3
Prerequisites: sophomore standing and PHIL 2700

PHIL 4130: Probability and Induction
This course studies probability, its various interpretations, and its basic principles. It identifies forms of reasoning that establish the probability of a conclusion. The methods of reasoning it treats are at the heart of science and practical affairs.

Credit Hours: 3
Prerequisites: sophomore standing and either PHIL 2700 or PHIL 4110

PHIL 4150: Formal Semantics
(cross-leveled with PHIL 7150). The course provides a systematic introduction to the semantics of natural languages, using the tools of formal logic. Prerequisites: Sophomore standing and one of the following classes: PHIL 2700, PHIL 4110, or ENGLISH 4640.

Credit Hours: 3

PHIL 4200: Metaphysics
Metaphysics studies what there is and how things are, most generally speaking. Topics may include realism versus nominalism, substance and attribute, facts, modality, identity and causality.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: Previous work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 4210: Philosophy of Mind
Considers theories and arguments in contemporary philosophy of mind, focusing on the nature of mental states, their relation to brain states and the plausibility of various materialist theories of the mind.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two Philosophy courses

PHIL 4220: Philosophy of Religion
Considers basis for and nature of religious beliefs.

Credit Hours: 3
Prerequisites: sophomore standing

PHIL 4300: Epistemology
An examination of contemporary philosophical theories concerning the nature, sources and limits of knowledge and justified belief.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: Previous work in PHIL 1000, PHIL 3000, PHIL 3200

PHIL 4400: Philosophy of Science
Why believe the scientific world-view? What, if anything, is the scientific method? Are today's theories really superior to past theories? Examines contemporary philosophical answers to such questions.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two courses in Philosophy

PHIL 4410: Philosophy of History
Readings from classic and contemporary philosophers of history. Problems about nature and limits of historical knowledge; relation between history and other disciplines; the existence, nature, and kinds of historical laws.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two courses in Philosophy

PHIL 4420: Philosophy of Biology
A survey of philosophical problems arising from consideration of evolutionary theory and the biological sciences. Topics may include reductionism, sociobiology, biological laws, and epistemic problems relating to evolutionary theory.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two courses in Philosophy
PHIL 4500: Theories of Ethics
Normative and meta-ethical theories. Topics may include the rationality and objectivity of morality, the meaning of moral language, the differences between deontological, utilitarian and virtue theories.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two courses in Philosophy

PHIL 4600: Political and Social Philosophy
(same as PEA_ST 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, Liberalism, Libertarianism, Marxism, Communitarianism and Feminism may be among the views covered.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: two courses in Philosophy

PHIL 4610: Philosophy of Law
What is law? Are there pre- or trans-legal rights? Is punishment justifiable? How can judicial decisions be justified? What are the relations between law and morality?

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 4620: Marxism
A philosophical examination of (a) the notion of critique as seen in Marx's early and middle writings, and (b) specific topics by such authors as Lenin, Lukacs and Plekhanov.

Credit Hours: 3
Prerequisites: Sophomore standing
Recommended: one course in Philosophy

PHIL 4700: Aesthetics
Typical components of art; theories of art as representation, form, expression; relation of art to value.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 4700W: Aesthetics-Writing Intensive
Typical components of art; theories of art as representation, form, expression; relation of art to value.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 4800: Asian Philosophy
(same as S_A_ST 4800; cross-leveled with PHIL 7800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy.

Credit Hours: 3
Prerequisites: PHIL 2700 or instructor's consent
Recommended: Some work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 4810: Philosophy of India
(same as S_A_ST 4810). General development of Indian philosophy.

Credit Hours: 3
Prerequisites: sophomore standing
Recommended: one course in Philosophy

PHIL 4850: Special Readings in Philosophy
Special Readings in Philosophy.

Credit Hour: 1-3
Prerequisites: junior standing

PHIL 4950: Senior Seminar in Philosophy
A capstone course required of and only open to senior Philosophy majors. Course content will vary, depending on the professor teaching the course.

Credit Hours: 3
Prerequisites: senior Philosophy major

PHIL 4950W: Senior Seminar in Philosophy - Writing Intensive
A capstone course required of and only open to senior Philosophy majors. Course content will vary, depending on the professor teaching the course.

Credit Hours: 3
Prerequisites: senior Philosophy major

PHIL 4998: Honors I in Philosophy
Special work for Honors candidates.

Credit Hours: 3
Prerequisites: junior standing

PHIL 4999: Honors II in Philosophy
Special work for Honors candidates.

Credit Hours: 3
Prerequisites: junior standing

PHIL 7100: Philosophy of Language
(same as LINGST 7100). Examination of contemporary views of the relationship between language, minds, and the world.

Credit Hours: 3
Prerequisites: PHIL 2700 or instructor's consent
Recommended: Some work in PHIL 1000, PHIL 3000 or PHIL 3200

PHIL 7110: Advanced Logic
(same as LINGST 7110; cross-leveled with PHIL 4110, LINGST 4110). Presents the method of truth trees for sentence and predicate logic. Examines proofs concerning the decidability, soundness, and completeness of formal systems. Emphasizes the theory of formal systems.

Credit Hours: 3
PHIL 7120: Selected Topics in Logic
Elementary set theory. Modal logic, the logic of possibility and necessity.
Credit Hours: 3
Prerequisites: PHIL 2700 or PHIL 7110

PHIL 7130: Probability and Induction
This course studies probability, its various interpretations, and its basic principles. It identifies forms of reasoning that establish the probability of a conclusion. The methods of reasoning it treats are at the heart of science and practical affairs. Prerequisites: PHIL 2700
Credit Hours: 3

PHIL 7150: Formal Semantics
(cross-leveled with PHIL 4150). The course provides a systematic introduction to the semantics of natural languages, using the tools of formal logic.
Credit Hours: 3
Prerequisites: Basic proficiency in first order logic

PHIL 7210: Philosophy of Mind
Considers theories and arguments in contemporary philosophy of mind, focusing on the nature of mental states, their relation to brain states and the plausibility of various materialist theories of the mind.
Credit Hours: 3

PHIL 7220: Philosophy of Religion
Considers basis for and nature of religious beliefs. Philosophical approaches to religion, cultural implications of religion, psychoanalysis and religion, mysticism and myth.
Credit Hours: 3

PHIL 7300: Epistemology
An examination of contemporary philosophical theories concerning the nature, sources and limits of knowledge and justified belief.
Credit Hours: 3
Recommended: Previous work in PHIL 1000, PHIL 3000, or PHIL 3200

PHIL 7400: Philosophy of Science
Why believe the scientific world-view? What, if anything, is the scientific method? Are today's theories really superior to the past theories? Examines contemporary philosophical answers to such questions.
Credit Hours: 3

PHIL 7410: Philosophy of History
Readings from classic and contemporary philosophers of history. Problems about nature and limits of historical knowledge; relation between history and other disciplines; the existence, nature, and kinds of historical laws.
Credit Hours: 3

PHIL 7500: Theories of Ethics
Normative and meta-ethical theories. Topics may include the rationality and objectivity of morality, the meaning of moral language, the differences between deontological, utilitarian and virtue theories.
Credit Hours: 3

PHIL 7600: Political and Social Philosophy
(same as PEA_ST 4600). Contemporary and/or historical theories of justice and the state. Utilitarianism, Liberalism, Libertarianism, Marxism, Communitarianism and Feminism may be among the views covered.
Credit Hours: 3

PHIL 7610: Philosophy of Law
What is law? Are there pre- or trans-legal rights? Is punishment justifiable? How can judicial decisions be justified? What are the relations between law and morality?
Credit Hours: 3

PHIL 7700: Aesthetics
Typical components of art; theories of art as representation, form, expression; relation of art to value.
Credit Hours: 3

PHIL 7810: Philosophy of India
(same as S_A_ST 4810). General development of Indian philosophy.
Credit Hours: 3

PHIL 7850: Special Readings in Philosophy
Special Readings in Philosophy.
Credit Hour: 1-3

PHIL 8090: Research in Philosophy
Research not leading to thesis. Graded S/U only.
Credit Hour: 1-99

PHIL 8100: Protoseminar in Philosophy
Introduction to graduate level work in philosophy. Required of all students entering the program, in the first year. An intensive workshop focused on skills rather than any particular philosophical content.
Credit Hours: 3
Prerequisites: restricted to first year graduate students

PHIL 8210: Teaching of Philosophy I
Seminar meetings on course design, teaching methods, the evaluation of teaching, grading, instructor obligations, and teaching aids. Some individualized instruction, including help preparing for and assessing the effectiveness of practice teaching.
Credit Hour: 1
Prerequisites: graduate philosophy students
PHIL 8300: Dissertation Seminar
The course will address writing and time management for Ph.D. students writing a dissertation. Also discussed will be preparation for the academic job market in philosophy, especially the development of an application dossier. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Philosophy Ph.D. student

PHIL 8510: Metaphysics: A Survey
A graduate-level survey of central issues in metaphysics. May be repeated up to 6 hours of credit.
Credit Hours: 3

PHIL 8520: Philosophy of Mind: A Survey
A graduate-level survey of central issues in the philosophy of mind.
Credit Hours: 3

PHIL 8530: Epistemology: A Survey
A graduate-level survey of central issues in epistemology.
Credit Hours: 3

PHIL 8540: Philosophy of Language: A Survey
A graduate-level survey of central issues in philosophy of language.
Credit Hours: 3

PHIL 9001: Topics in Philosophy
Organized study of selected topics. Need departmental consent for repetition.
Credit Hour: 1-99
Prerequisites: instructor's consent

PHIL 9030: Topics in Modern Philosophy: 17th-19th Centuries
Interpretation and evaluation of philosophical debates from the 17th to the 19th centuries. These will be addressed in relation to their historical context and current philosophical problems.
Credit Hours: 3
Prerequisites: Graduate Philosophy Student

PHIL 9050: Plato
Advanced studies in Plato; emphasis on recent scholarship.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9060: Aristotle
Advanced studies in Aristotle; emphasis on recent scholarship.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9090: Research in Philosophy
Work toward preparation of thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

PHIL 9110: The Rationalists
Interpretation and evaluation of major works of Descartes, Leibniz, and/or Spinoza in relation to their historical context and current philosophical problems.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9120: The Empiricists
Epistemological and metaphysical doctrines of Locke, Berkeley and Hume.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9130: Kant
Critique of Pure Reason: historical context, meaning and cohesion of its claims, critical assessment of them.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9240: Russell and Wittgenstein
Each initially defends, but then rejects logical atomism. Metaphysical and epistemological themes of such intellectual phases and shifts of one or both philosophers.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9320: Social and Political Philosophy
Topics of current interest in social and political philosophy. Generally one of the following: social contract theory, utilitarianism, voting procedures, or convention.
Credit Hours: 3
Prerequisites: PHIL 4600 or instructor's consent and graduate Philosophy student

PHIL 9350: History of Eastern Ethics
Historical survey of major eastern ethical theories. Explores broad range of ethical theories developed in Asia: Hindu and Buddhist in India; Taoism and Confucianism in China; and Zen in Japan.
Credit Hours: 3
Prerequisites: PHIL 4600 or instructor's consent and graduate Philosophy student

PHIL 9510: Decision Theory
Principles for making rational decisions, including principles of expected utility theory, game theory, and social choice theory. A survey of basic ideas and an introduction to selected research topics.
Credit Hours: 3
Prerequisites: PHIL 4110; graduate Philosophy student

PHIL 9520: Ethical Theory
Contemporary theories of the right and the good. Metaethical topics such as moral language, reasoning, and justification.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9610: Metaphysics
Theories of the categories and structures of reality, e.g., appearance and reality, causality, space and time, God, Nature, the human being.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9710: Philosophy of Mind and Psychology
Survey of important recent work in contemporary philosophy of mind and psychology. Graduate seminar.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9720: Foundations of Cognitive Science
Examination of philosophical questions arising in cognitive science concerning, for instance, the nature of computation and representation, inter-disciplinary relations, the nature of cognitive scientific explanation, and its relation to folk psychological explanation.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9820: Epistemology
Knowledge and opinion, the types, sources, and extent of knowledge, according to a variety of views.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9830: Philosophy of Science
Examines central issues in general philosophy of science concerning the scientific method and the role in it of observation, the nature of rational theory-choice, progress, and the status of theories postulating unobservables.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9840: Philosophy of Language
Topics of current interest in the philosophy of language.
Credit Hours: 3
Prerequisites: graduate Philosophy student

PHIL 9850: Philosophy of Biology
Philosophical problems relating to the life sciences, with attention given especially to explanation and reductionism in biology.
Credit Hours: 3

PHIL 9887: Seminar in Logic
Topics of current interest in logic. Generally one of the following: inductive logic, set theory, conditionals, epistemic logic, or formal semantics.
Credit Hours: 3
Prerequisites: PHIL 4110 graduate Philosophy student

PHIL 9901: Seminar in Philosophy
Special topics. May be repeated for credit.
Credit Hours: 3
Prerequisites: graduate Philosophy student

Physical Medicine And Rehabilitation (PM_REH)

PM_REH 6615: Physical Medicine and Rehabilitation
Physical Medicine and Rehabilitation
Credit Hours: 5

PM_REH 6915: Rehabilitation of Musculoskeletal and Neurologic Diseases
The rotating student will be an integral part of the inpatient team, serving in an active role on the floor and participating in the evaluation and treatment of clinic patients. Daily morning rounds will be completed with the inpatient teams and will be followed by scheduled didactic sessions with various faculty throughout the week. Outpatient rotations will be included as a fundamental clinical experience and will encompass the breadth of PM&R to the best that can be accomplished in this short block. In-depth examinations of the neurologic and musculoskeletal systems will be performed.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

Physical Therapy (PH_THR)

PH_THR 1000: Introduction to Physical Therapy
Acquaints students with the physical therapy profession including the required educational preparation, practice settings, sample interventions, current issues, trends and research. Graded on S/U basis only.
Credit Hour: 1

PH_THR 2510: Human Anatomy for Rehabilitation Professionals
System-based human anatomy. Musculoskeletal, Neuromuscular, Cardiovascular, Pulmonary, Integumentary. Lab includes three-dimensional identification of structures and instruction in common system-based physical exam procedures. Graded on A-F basis only.
Credit Hours: 4

PH_THR 3022: Principles of Physical Therapy
History of physical therapy: the profession; basic skills: first aid, infection control, vital signs; medical terminology. Graded on S/U basis only.
Credit Hour: 1

PH_THR 4240: Applied Neurophysiology for Allied Health Students
(Cross-leveled with PH_THR 7240, OC_THR 7240). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.
Credit Hours: 3
PH_THR 4250: Human Kinesiology
(same as HTH_PR 4250). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Applications through analysis of daily functional performance, exercise, and sport.
Credit Hours: 3
Prerequisites: PTH_AS 2201 or PH_THR 2500

PH_THR 4330: Physical Agents
Biophysics, theory and technique concerning the use of physical agents as adjuncts to exercise programs. Includes thermal, electrical, light, hydrotherapy and mechanical agents.
Credit Hours: 3

PH_THR 4420: Foundations of Therapeutic Exercise
Physiological basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems and the effects of injury and disease on these systems.
Credit Hours: 3

PH_THR 5110: Fundamentals of Physical Therapy
Introduction to professional school and expectations, history of physical therapy; the profession, basic skills, first aid, infection control, vital signs, surface anatomy. Instruction includes lecture and discussion, lab activities, written assignments and practical examinations. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Admission to professional phase of doctor of physical therapy program

PH_THR 5240: Foundations of Therapeutic Exercise
Physiologic basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems and the effects of injury and disease on these systems.
Credit Hours: 3

PH_THR 5250: Human Kinesiology
(same as HTH_PR 4250, OC_THR 4220 or OC_THR 7220). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Applications through analysis of daily functional performance, exercise, and sport.
Credit Hours: 3
Prerequisites: Human Anatomy

PH_THR 5260: Introduction to Clinical Education and PhysZOU
Introduction to the aspects of clinical education. Development of foundational clinical skills and behaviors, includes clinical experience in PhysZOU. This course is graded on a S/U basis only.
Credit Hour: 1
Prerequisites: Successful completion of prior professional coursework

PH_THR 5310: Applied Therapeutic Exercise
Application of therapeutic exercise with an emphasis on evidenced-based exercise prescription, modes and techniques of exercise typically seen in rehabilitation.
Credit Hours: 3

PH_THR 5320: Clinical Kinesiology with Laboratory
Advanced Kinesiology addressing functional mobility; specifics of normal human gait; pathokinetics of gait. Assistive devices; wheelchairs; orthoses and prostheses. Includes laboratory.
Credit Hours: 3

PH_THR 5330: Clinical Pathophysiology
Interdisciplinary and case-based examination of the pathophysiology, prevention and general health management of disease/injury across the lifespan encountered in occupational and physical therapy practice.
Credit Hours: 3

PH_THR 5340: Introduction to Clinical Education and PhysZOU II
Continuation of Introduction to Clinical Education and PhysZOU I with further emphasis on current events in the Physical Therapy profession as well as the professional attributes of communication, teamwork and problem solving. Required experience in PhysZou clinical setting. This course is graded on a S/U basis only.
Credit Hour: 1
Prerequisites: Successful completion of prior professional coursework

PH_THR 5350: Introduction to Orthopedic Physical Therapy with Laboratory
The physical therapy management of musculoskeletal disorders. a systematic clinical decision making model is introduced that considers the stage of inflammation and repair, impairments, and the systematic

</table>
PREREQUISITES: Graded on A-F basis only. 

**PH_THR 6650: PHYSZOU IV**
Clinical experience through PhysZOU clinic, in three clinical areas (orthopedic, pediatrics, and neurologic). Each student will work as a team with students and a clinical instructor to develop, perform, and document physical therapy sessions. Graded on S/U basis only. 
**Credit Hours:** 0.5
**Prerequisites:** Successful completion of prior professional coursework

**PH_THR 6660: Psychosocial Issues for Health Promotion**
Psychological and social factors impact people's health and the American Physical Therapy Association has called for interprofessional approaches for the provision of fitness, health promotion, wellness, and risk reduction programs to enhance quality of life for persons across the lifespan. This course focuses on psychosocial issues for health promotion in order to help future health care providers and scientists to improve the health and well-being of people. Graded on A-F basis only. 
**Credit Hours:** 2
**Prerequisites:** Restricted to students who are admitted into the Physical Therapy-DPT program

**PH_THR 6710: Case Management: Neurological Impairments Across the Lifespan**
Traditional and contemporary theories of physical therapy in advanced rehabilitation of children and adults with neurologic disorders; education/employment, ethical/legal issues; patient/client advocacy. Problem based format; laboratory. 
**Credit Hours:** 5
**Prerequisites:** Restricted to students accepted into DPT professional major and successful completion of prior professional coursework

**PH_THR 6810: Case Management: Geriatrics and Orthopedics**
Complex orthopedic problems in persons of all ages; supervision, reimbursement, ethical/legal situations; community programs for injury prevention; work capacity evaluation/work hardening; consultation. Problem-based format; laboratory. 
**Credit Hours:** 5
**Prerequisites:** Restricted to students accepted into DPT professional major and successful completion of prior professional coursework

**PH_THR 6820: Clinical Education III**
A continuation of supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 7945 with advancing expectations of student physical therapist performance. Graded on S/U basis only. 
**Credit Hours:** 6
**Prerequisites:** Successful completion of PH_THR 7945

**PH_THR 6830: Health Policy for Physical Therapy**
This course is designed for physical therapy students and will provide an introduction to health policy along with an overview of the health care system in the United States, including its structures, financing mechanisms, and outcomes. Lecture/reflective writing/written exams. Graded on A-F basis only. 
**Credit Hours:** 2
**Prerequisites:** Successful completion of prior coursework

**PH_THR 6840: PhysZOU V**
Clinical experience through PhysZOU clinic, in three clinical areas (orthopedic, pediatrics, and neurologic). Each student will work as a team with students and a clinical instructor to develop, perform, and document physical therapy sessions. Graded on S/U basis only. 
**Credit Hours:** 0.5

**PH_THR 6850: Professional Issues**
The physical therapist as health care professional, administrator, and educator; legal, ethical, and political issues. Service delivery management; delegation of care; rural vs. urban health care needs. 
**Credit Hours:** 3

**PH_THR 6910: Clinical Education IV**
Full time supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 8945 with advancing expectations of student physical therapist performance. Graded on S/U basis only.
**Credit Hours:** 4
**Prerequisites:** Successful completion of prior professional coursework

**PH_THR 6920: PhysZOU VI And Professional Development Plan**
Complex orthopedic problems in persons of all ages; supervision, reimbursement, ethical/legal situations; community programs for injury prevention; work capacity evaluation/work hardening; consultation. Problem-based format; laboratory. 
**Credit Hours:** 4
**Prerequisites:** Restricted to students accepted into DPT professional major and successful completion of prior professional coursework

**PH_THR 6930: Seminar in Physical Therapy**
Integrate previously learned content in unique patient cases and comprehensive review and evaluation of readiness for entry level physical therapist practice, in both didactic and psycho-motor domains. Enrollment is limited to students in professional physical therapy program. 
**Credit Hours:** 4
**Prerequisites:** Restricted to students accepted into DPT professional major and successful completion of prior professional coursework

**PH_THR 6940: Special Skills in Physical Therapy**
This course will offer a menu of options to students to develop additional knowledge about specific skills in the physical therapy profession. Students may choose topics of interest in addition to the mandatory sessions to meet a minimum of 800 minutes of contact. Graded on S/U basis only. Prerequisites: Successful completion of prior professional coursework

**PH_THR 6950: Human Kinesiology**
(same as HTH_PR 4250, OC_THR 4220 or OC_THR 7220). Study of principles of physical laws, biomechanics and anatomic structure relative to human movement. Applications through analysis of daily functional performance, exercise, and sport. 
**Credit Hours:** 3
**Prerequisites:** Human Anatomy
PH_THR 7420: Foundations of Therapeutic Exercise
Physiologic basis of exercise throughout the lifespan with emphasis on the musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary systems and the effects of injury and disease on these systems.
Credit Hours: 3

PH_THR 7550: Psychosocial Issues for Health Promotion
Psychological and social factors impact people's health and the American Physical Therapy Association has called for interprofessional approaches for the provision of fitness, health promotion, wellness, and risk reduction programs to enhance quality of life for persons across the life-span. This course focuses on psychosocial issues for health promotion in order to help future health care providers and scientists to improve the health and well-being of people. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Restricted to students who are admitted into the Physical Therapy-DPT program

PH_THR 7850: Assessment and Neuropsychology of Pain
Pain is a common problem that impairs people's quality of life and costs millions of dollars annually. Yet, an investigation of physical therapy education programs in the U.S. supported inadequate coverage of pain. This course focuses on the assessment and neuropsychology of pain in order to help future health care providers and scientists to improve the health and well-being of people with impaired quality of life due to pain. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: Restricted to students who are admitted into the Physical Therapy-DPT program

PH_THR 7960: Special Readings in Physical Therapy
Independent readings selected in consultation with supervising faculty member. Identified educational goals and activities; discussion, annotated bibliography or report.
Credit Hours: 1-3
Prerequisites: instructor's consent

PH_THR 8945: Clinical Education IV
A continuation of supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 7945 with advancing expectations of student physical therapist performance. Graded on S/U basis only.
Credit Hours: 7
Prerequisites: Successful completion of PH_THR 7945

PH_THR 8950: Clinical Education V
Full time supervised clinical education with supervision from a licensed physical therapist that has at least one year of experience. This course is a continuation of 8945 with advancing expectations of student physical therapist performance. Graded on S/U basis only.
Credit Hours: 6
Prerequisites: Successful completion of PH_THR 8945

Physics (PHYSCS)

PHYSCS 1007: Topics in Physics and Astronomy - Physical Science
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3

PHYSCS 1050: Concepts in Cosmology
This course explores the development of our understanding of the origin and evolution of the Universe. We will embark on a qualitative description of the Big Bang theory, the expansion of the universe and its current structure, the cosmic microwave background radiation, the existence of dark matter and dark energy and their implications for the Universe's ultimate fate.
Credit Hours: 3
PHYSCS 1050 - MOTR ASTR 100: Astronomy

PHYSCS 1100: Science and Inventions
This course covers the history of some of the most important inventions in science and their impact on past civilizations, current advances in science and inventions, funding and policies, and critical advances in technology required for future generations.
Credit Hour: 1

PHYSCS 1150: Concepts in Physics
Introduction to fundamental concepts of physics for non-science majors. Concepts include the conservation of energy, the second law of thermodynamics, and the special theory of relativity. Students learn to reason and apply these concepts through writing assignments.
Credit Hours: 3
PHYSCS 1150 - MOTR PHYS 100: Essentials in Physics

PHYSCS 1200: Everyday Wonders: Explaining How Ordinary Things Work
How does an airplane fly? How does a steel boat float? How does your phone know when you are swiping the screen? Many things that seem wondrous can be explained using basic principles of physics. In this course students develop concepts in simple machines, fluids, waves, optics, and electricity as they explore real-world applications using simulations and hands-on experiments.
Credit Hours: 4

PHYSCS 1210: College Physics I
This introductory college physics course uses algebra and trigonometry in developing some of the fundamental concepts of classical physics. Topics covered are vectors, kinematics, dynamics, gravity, momentum, energy, rotational kinematics, rotational dynamics, fluids, simple harmonic motion, waves and sound, and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSCS 1210 or PHYSCS 2750, but not both.
Credit Hours: 4
Prerequisites: MATH 1100
PHYSCS 1210 - MOTR PHYS 150L: Physics I with Lab
phySCS 1220: College Physics II
This introductory second semester college physics course uses algebra and trigonometry in developing some of the fundamental concepts of classical physics. Topics covered include electricity and magnetism, optics and modern physics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSCS 1220 or PHYSCS 2760, but not both.

Credit Hours: 4
Prerequisites: grade of C- or better in PHYSCS 1210

PHYSCS 2002: Topics in Physics and Astronomy - Biological Science
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3
Prerequisites: MATH 1100

PHYSCS 2002H: Topics in Physics and Astronomy - Biological Science - Honors
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3
Prerequisites: MATH 1100; Honors eligibility required

PHYSCS 2007: Topics in Physics and Astronomy - Physical Science
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3
Prerequisites: MATH 1100

PHYSCS 2007H: Topics in Physics and Astronomy - Physical Science - Honors
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. Course may be repeated for credit.

Credit Hour: 1-3
Prerequisites: MATH 1100; Honors eligibility required

PHYSCS 2010: Undergraduate Seminar in Physics
Introduction to the Physics Department and presentation of topics of current interest in physics by faculty and students. Intended for physics majors at the freshman or sophomore level only. Graded on A-F basis only.

Credit Hours: 2
Recommended: for physics majors

PHYSCS 2200: Life and the Universe
This course explores the connection between our everyday existence and the underlying physics’ processes. Students will look at processes - essential to life - ranging from the very small (atomic level) to the very large (universe), and the many length scales in between (cellular level and human being level) as will as make connections between the laws of physics and the numbers that go into them and the prerequisites for the existence of life.

Credit Hours: 3

PHYSCS 2330: Exploring the Principles of Physics
A hands-on course covering topics in Electricity, Magnetism, Forces, Motion and Energy. Pedagogy reflects styles used in K-12 classrooms; emphasis on inquiry, concept development, quantitative applications and technology. Enrollment limited to Elementary and Early Childhood Education majors who have completed MATH 1100 or higher.

Credit Hours: 4
Prerequisites: instructor’s consent required

PHYSCS 2500: The Beautiful Invisible: Exploring Physics, Fiction, and Reality
This course explores the conceptual structure of modern physics from a humanistic perspective. Rather than describing the natural world “as it is”, physical science weaves some key observations in a convincing and memorable narrative. It is not within its power to explain reality, but it can make it understandable, sometimes even predictable. Due to the presence of internal and external constraints, physical theories are akin to myths, i.e., fiction created by many authors over an extended period of time. The mythical character of a theory does not diminish its scientific validity - quite the contrary. Convincing myths are not easily found and better observations demand better myths. The mythical content of the theory is not some extraneous content that we introduce for the sake of popularization, but an essential part of the science itself.

Credit Hours: 3

PHYSCS 2750: University Physics I
First course in calculus-based physics for science and engineering students. Topics covered are vectors, translational and rotational kinematics, translational and rotational dynamics, energy, momentum, gravity, oscillations, waves, fluids and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSCS 1210 or PHYSCS 2750, but not both.

Credit Hours: 5
Prerequisites: MATH 1500 or equivalent
Recommended: MATH 1700
PHYSCS 2750 - MOTR PHYS 200L: Advanced Physics I with Lab

PHYSCS 2750H: University Physics I - Honors
First course in calculus-based physics for science and engineering students. Topics covered are vectors, translational and rotational kinematics, translational and rotational dynamics, energy, momentum, gravity, oscillations, waves, fluids and thermodynamics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSCS 1210 or PHYSCS 2750, but not both. Graded on A-F basis only.

Credit Hours: 5
Prerequisites: MATH 1500 or equivalent. Honors eligibility required
Recommended: MATH 1700

PHYSCS 2760: University Physics II
Second semester course in calculus-based physics for science and engineering students. Topics covered are electrostatics, circuits, magnetism, electromagnetic phenomena, optics, matter waves and
particles and modern physics. Three lectures, one discussion, one lab weekly. Students may receive credit for PHYSCS 1220 or PHYSCS 2760, but not both.

**Credit Hours:** 5  
**Prerequisites:** MATH 1700 and grade of C- or better in PHYSCS 2750  
**Recommended:** MATH 2300

**PHYSCS 2760H: University Physics II - Honors**  
Second semester course in calculus-based physics for science and engineering students. Topics covered are electrostatics, circuits, magnetism, electromagnetic phenomena, optics, electromagnetic waves and relativity. Three lectures, one discussion, one lab weekly. Graded on A-F basis only.

**Credit Hours:** 5  
**Prerequisites:** MATH 1700 and grade of C- or better in PHYSCS 2750.  
**Honors Eligibility required**  
**Recommended:** MATH 2300

**PHYSCS 3002: Topics in Physics and Astronomy - Biological Science**  
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. May be repeated 3 times for credit.

**Credit Hour:** 1-3  
**Prerequisites:** PHYSCS 1210 or PHYSCS 2750

**PHYSCS 3007: Topics in Physics and Astronomy - Physical Science**  
Study of selected topics in physics and astronomy. Subjects and earnable credit may vary from semester to semester. May be repeated 3 times for credit.

**Credit Hour:** 1-3  
**Prerequisites:** PHYSCS 1210 or PHYSCS 2750

**PHYSCS 3010: Introduction to Modern Astrophysics**  
(same as ASTRON 3010). Elements of stellar, and galactic astrophysics. Interpretation of observations and physical conditions of various astronomical objects including stars, gaseous nebulae and, galaxies.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

**PHYSCS 3100: Teaching Physics**  
Introduces modeling and inquiry methods of teaching about force, motion, energy, electricity and magnetism. Students learn research-base physics teaching methods, including eliciting prior understanding, facilitating conceptual change, and active learning strategies.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 1220 or PHYSCS 2760

**PHYSCS 3150: Introduction to Modern Physics**  
Relativistic kinematics and Lorentz transformations; historical basis for quantum mechanics; atomic structure; physics of solids; nuclear structure and decay.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

**PHYSCS 3150W: Introduction to Modern Physics - Writing Intensive**  
Relativistic kinematics and Lorentz transformations; historical basis for quantum mechanics; atomic structure; physics of solids; nuclear structure and decay.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

**PHYSCS 3200: Physics of Space Explorations**  
The course provides an overview of the solar system, spaceflight history, a review of Newtonian physics and law of universal gravitation, the application of these laws to spacecraft launch, entry, and orbit, planetary trajectories, and other special topics. Three focused case studies of actual space missions are addressed. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** MATH 1100

**PHYSCS 3700: Introduction to Methods in Mathematical Physics**  
The course discusses the application of mathematical techniques that students need for upper-level physics courses. Topics include: applications of complex variables, second-order linear differential equations with applications to AC circuits, matrices/linear algebra, calculus of variations, Fourier transforms and vector analysis.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 and MATH 2300

**PHYSCS 4020: Astrophysical Techniques**  
(same as ASTRON 4020; cross-leveled with PHYSCS 7020). Elements of modern astronomical instruments, observations and analysis, with the emphasis in the optical regime. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ASTRON 3010

**PHYSCS 4050: Electronic Laboratory**  
(cross-leveled with PHYSCS 7050). Acquaints students with the foundations and techniques of electronics design, with emphasis on data acquisition and processing. Topics: circuits with discrete and integrated circuits, active and passive filters, amplifiers, power supplies, instrumentation and interfacing. Integrated lectures and labs. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** PHYSCS 2760

**PHYSCS 4060: Advanced Physics Laboratory I**  
This upper-level undergraduate laboratory course familiarizes students with the methods and procedures of experimental physics at an advanced level. The course covers principles of magnetism, graphic programming and interface techniques, weak-signal detection, and some modern physics discoveries such as, magneto-optical Kerr effect, digital holography and gamma-ray spectroscopy. Students work on research projects in the areas of condensed matter physics, materials science, modern spectroscopy, superconductivity, and quantum physics.

**Credit Hours:** 3  
**Prerequisites:** PHYSCS 3150
PHYSCS 4080: Major Themes in Classical Physics
Introduction to classical physics: mechanics, electromagnetism and thermodynamics, emphasizing the unity and the connections between different parts of it.
Credit Hours: 3  
Prerequisites: PHYSCS 2760

PHYSCS 4080W: Major Themes in Classical Physics - Writing Intensive
Introduction to classical physics: mechanics, electromagnetism and thermodynamics, emphasizing the unity and the connections between different parts of it.
Credit Hours: 3  
Prerequisites: PHYSCS 2760

PHYSCS 4100: Electricity and Magnetism I
Mathematical preliminaries, properties of charge distributions at rest and in motion, the field concept, introduces electromagnetic radiation.
Credit Hours: 3  
Prerequisites: PHYSCS 2760

PHYSCS 4102: Topics on Physics and Astronomy-Biological/Physical/Mathematics
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. Departmental consent for repetition.
Credit Hour: 1-3  
Prerequisites: PHYSCS 2760 or instructor's consent

PHYSCS 4110: Light and Modern Optics
Interaction of light with matter, spectroscopic techniques, wave optics, interferometry, multilayer films, polarization, non-linear optics, design of optical instruments, matrix methods, waveguides, fiber optics, acoustooptic and photo-elastic modulation. Includes both lectures and laboratory.
Credit Hours: 4  
Prerequisites: PHYSCS 2760

PHYSCS 4120: Introduction to Thermodynamics
Development of the concepts of temperature, heat, work, entropy, enthalpy and free energy. Applications to gases, liquids and solids. Statistical methods.
Credit Hours: 3  
Prerequisites: PHYSCS 2760

PHYSCS 4140: Mechanics
Development of fundamental concepts, principles of mechanics using mathematical methods. Many problems used.
Credit Hours: 3  
Prerequisites: PHYSCS 2760

PHYSCS 4180: Solar System Science
(same as GEOL 4180, ASTRON 4180; cross-leveled with GEOL 7180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.

PHYSCS 4190: Physics and Chemistry of Materials
(same as NU_ENG 4319, BIOL_EN 4480, CHEM 4490, BME 4480; cross-leveled with PHYSCS 7190, NU_ENG 4319, BIOL_EN 7480, CHEM 7490). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, and Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: PHYSCS 2750, CHEM 1320 or equivalent, or instructors consent

PHYSCS 4210: Contributions to Science from Under-represented Groups
(same as ASTRON 4210; cross-leveled with ASTRON 7210, PHYSCS 7210). STEM fields are amongst the areas of human endeavor that struggle with increasing their human diversity. Teaching of science rarely discusses the contributions or marginalizations of under-represented groups. Meanwhile, many women and indigenous cultures have contributed to progress in STEM but are often not recognized. In this course we will investigate these contributions, and the lack of recognition both historically and in the present day. The aim is to provide students with a better understanding of the advantages of and challenges in inclusive, diverse science. Initially the course will use astronomy as its frame of reference because the sky was one of the earliest laboratories and consequently it has a long history with many indigenous cultures developing their own cosmologies and ways of studying the sky. As we discuss the role of Indigenous peoples, people of color, and women, we will investigate the role of power structures as well as systemic biases in the marginalization of these groups. This class will be strongly discussion oriented, with assessment based on the development throughout the semester, of a final project. As many students will be pursuing graduate school in STEM fields, the final project will be to develop a Broader Impact statement. Many federal funding agencies request or even require that research grants include a component aimed at ‘broadening participation’, i.e. making STEM more inclusive and diverse. Student will work on a multipart assignment that will culminate in a Broader Impact statement that may well be directly applicable to an NSF GRFP (Graduate Research Fellowship Program) or NSF Post-Doctoral Fellowship. In addition to the Broader Impact statement - students will give presentations and learn how to be more inclusive in their presentation design, following the principles of Inclusive Design for Learning. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: PHYSCS 2760 or PHYSCS 1200 or instructors consent

PHYSCS 4230: Scanning and Transmission Electron Microscopy and Microanalysis
(cross-leveled with PHYSCS 7230). This course is designed for senior undergraduate/graduate students. This course covers the basic principles and practical considerations using SEM, TEM, EDS, and EELS in the characterization of materials. Graded on A-F basis only.
Credit Hours: 3  
Prerequisites: PHYSCS 3150 and instructor's consent
PHYSCS 4250: Stellar Astrophysics  
(same as ASTRON 4250). Basic astrophysics of stable and unusual  
stars, stellar systems. Investigates stellar dimensions, radiation, spectra,  
energy, evolution, populations; interstellar medium, stellar motions and  
aggregation.

Credit Hours: 3  
Prerequisites: ASTRON 3010

PHYSCS 4310: Physics in Cell and Developmental Biology  
(same as BIO_SC 4310). Discusses the role of physical mechanisms  
in specific cellular and developmental processes and phenomena, in  
particular those characterizing the embryonic stage of multicellular  
organisms. Each process and phenomenon is first described in biological  
terms and then within a physical model, with special emphasis on the  
interplay between the two descriptions.

Credit Hours: 3  
Prerequisites: PHYSICS 2760 and BIO_SC 2300 or instructor’s consent

PHYSCS 4350: Galactic Astronomy  
(same as ASTRON 4350). Observational properties of normal galaxies  
and clusters of galaxies, Seyfert and emission-line structure and  
dynamics of galaxies; interacting galaxies, quasi-steller objects.  
Introduction to cosmology.

Credit Hours: 3  
Prerequisites: PHYSICS 3010 or ASTRON 3010  
Recommended: PHYSICS 4140

PHYSCS 4360: Extragalactic Astronomy  
(same as ASTRON 4360; cross-leveled with PHYSICS 7360, ASTRON 7360). This course introduces students to the most basic knowledge of  
extragalactic astronomy, starting from Milky Way and extending to the  
most distant universe. Topics covered will include galaxy morphology and  
classification, groups and clusters of galaxies, active galactic nuclei, and  
galaxy formation and evolution.

Credit Hours: 3  
Prerequisites: ASTRON 3010

PHYSCS 4390: Problems in Physics  
Problems in Physics

Credit Hour: 1-99

PHYSCS 4410: Analysis of Biological Macromolecules and  
Biomaterials  
This interdisciplinary, team-taught course introduces basic concepts and  
experimental techniques for studying bio-macromolecules and  
biomaterials. A Problem Based Learn/Writing Intensive approach uses four modules: Proteins, membranes, cellular interactions and  
biomaterials.

Credit Hours: 3  
Prerequisites: PHYSICS 2760

PHYSCS 4420: Introduction to Biomedical Imaging  
(same as BIOL_EN 4420, BME 4420; cross-leveled with PHYSICS  
7420, BIOL_EN 7420). This course offers a broad introduction to  
medical imaging. Topics to be covered include the physics basics and  
instrumentation of X-ray, CT, PET, SPECT, ultrasound, MRI, and optical  
imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3  
Prerequisites: PHYSICS 2760

PHYSCS 4450: Introduction to Cosmology  
Develops the physical concepts necessary for understanding the major  
recent discoveries in cosmology, such as the acceleration of the universe  
and dark energy. No prior knowledge of general relativity is assumed.  
Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: PHYSICS 3150 or equivalent

PHYSCS 4460: Interstellar Medium  
(same as ASTRON 4460). The course discusses observational properties  
and physical and chemical processes occurring in the interstellar  
medium. Topics include interstellar diffuse and molecular clouds, HII  
regions, dust grains, interstellar chemistry, star formation, supernova  
remnants, and interstellar shock waves.

Credit Hours: 3  
Prerequisites: ASTRON 3010

PHYSCS 4500: Computational Biological Physics  
(cross-leveled with PHYSICS 7500). Provides a practical introduction  
(hands-on approach) to the study of the structure and function of  
biomolecular systems by employing computational methods and  
theoretical concepts familiar from the physical sciences.

Credit Hours: 3  
Prerequisites: PHYSICS 2760 or instructor’s consent

PHYSCS 4510: Single Molecule Biophysics  
(same as BIOCHM 4510; Cross-leveled with PHYSICS 7510). The course  
provides an overview of the biophysics of enzymes, nucleic acids and  
the cytoskeleton. Topics covered will include diffusion, molecular motors,  
polymerization and the cytoskelton and the polymer properties of nucleic  
acids and microtubules.

Credit Hours: 3  
Prerequisites: PHYSICS 2760

PHYSCS 4520: Introduction to Biophysics  
This course introduces the study of biological systems from the  
perspective of a physicist. Students will learn how to relate the structure  
of a particular system and its constituents to its function. The treatment  
of molecular and cellular phenomena will be based on physical principles  
quantified through the necessary analytical tools. Prominent biophysical  
methods and their fundamental operating principles will also be  
discussed. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: PHYSICS 1220 or PHYSICS 2760 or instructor’s consent

PHYSCS 4550: Cosmochemistry  
(same as ASTRON 4550). Cosmic dust, stardust, spectra, energy,  
interstellar medium, meteorites, astromineralogy.

Credit Hours: 3

<th>Prerequisites</th>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYSCS 4600</td>
<td>Semiconductor Optics</td>
<td>PHYSCS 3150</td>
<td>3</td>
<td>It is an introductory-level course in the field of optical processes in semiconductors (both inorganic and organic) and solid-state optoelectronics, designed both for graduate and undergraduate students of Physics, Chemistry and Electrical Engineering. Graded on A-F basis only.</td>
</tr>
<tr>
<td>PHYSCS 4620</td>
<td>Introduction to Materials Science</td>
<td>PHYSCS 3150</td>
<td>3</td>
<td>This course on the science and technology of materials explores the interrelationship between processing, structure, properties (electrical, optical, magnetic), and performance. Observable properties of materials will be used to explore and understand the consequences of atomic- and molecular-level events. Structure-property correlations, including electronic, thermal, and mechanical properties, will be presented for different classes of materials including nanoscale materials. Graded on A-F basis only.</td>
</tr>
<tr>
<td>PHYSCS 4650</td>
<td>Modern Condensed Matter Physics</td>
<td>PHYSCS 3150</td>
<td>3</td>
<td>Introduces the basic concepts and gives an overview of the latest developments of modern condensed-matter physics as the forefront of (nano) science and technology. Combines lectures and computational laboratory, where students use and develop interactive computer simulations. Graded on A-F basis only.</td>
</tr>
<tr>
<td>PHYSCS 4720</td>
<td>Nonlinear Dynamics</td>
<td>PHYSCS 3150 or instructor's consent</td>
<td>3</td>
<td>(cross-leveled with PHYSCS 7720). This course provides an introduction to nonlinear dynamical systems and chaos, with examples from physics, chemistry, biology and engineering. The emphasis will be on applications, using a combination of analytical, computational and intuitive geometrical methods. Topics covered include phase portraits, fixed point analysis, bifurcations, limit cycles, strange-attractors, iterated maps, period doubling, chaos, fractals, scaling and universality. Graded on A-F basis only.</td>
</tr>
<tr>
<td>PHYSCS 4800</td>
<td>Introduction to Quantum Mechanics I</td>
<td>MATH 4100 or instructor's consent</td>
<td>3</td>
<td>Foundations of wave mechanics; wave packets; Schrodinger equation and I-D problems; operators and eigenfunctions, spherically symmetric systems.</td>
</tr>
<tr>
<td>PHYSCS 4810</td>
<td>Introduction to Quantum Mechanics II</td>
<td>PHYSCS 3150 and MATH 4100</td>
<td>3</td>
<td>Review of quantum mechanics and units, forms of radiation, radiation detectors, spacetime symmetries, internal symmetries, nuclear structure and form factors, low-energy nuclear models, recent developments.</td>
</tr>
<tr>
<td>PHYSCS 4850</td>
<td>Computational Methods in Physics</td>
<td>PHYSCS 4800 or equivalent</td>
<td>3</td>
<td>Use of modern computational techniques in solving a wide variety of problems in solid state, nuclear, quantum and statistical physics.</td>
</tr>
<tr>
<td>PHYSCS 4900</td>
<td>Physics Internship</td>
<td>Instructor's Consent</td>
<td>0-3</td>
<td>This internship course will provide students with work experience in a public/private company/lab organization that is relevant to the physics major. It will enable students to apply their academic knowledge and critical thinking skills in a work environment, while enhancing personal and professional development. The internship is coordinated by a faculty member. Graded on S/U basis only.</td>
</tr>
<tr>
<td>PHYSCS 4950</td>
<td>Undergraduate Research in Physics</td>
<td>Instructor's Consent</td>
<td>1-3</td>
<td>Special studies for advanced undergraduate students in physics covering subjects not included in courses regularly offered. Departmental consent for repetition.</td>
</tr>
<tr>
<td>PHYSCS 4960</td>
<td>Senior Thesis in Physics</td>
<td>Instructor's consent</td>
<td>3</td>
<td>Special studies for senior undergraduate students in physics. The course requires an oral or poster presentations, or faculty-guided writing of a senior thesis involving independent research.</td>
</tr>
<tr>
<td>PHYSCS 4985</td>
<td>Issues in Modern Physics and Engineering</td>
<td>Instructor's consent and 3 units of PHYSCS 4950</td>
<td>3</td>
<td>Students are expected to write a major paper on a selected topic from modern physics or engineering. The paper will review the current state of the experimental and theoretical research on the topic at a level appropriate to their peers.</td>
</tr>
<tr>
<td>PHYSCS 7020</td>
<td>Astrophysical Techniques</td>
<td>ASTRON 3010</td>

</table>
instrumentation and interfacing. Integrated lectures and labs. Graded on A-F basis only.

**Credit Hours:** 4  
**Prerequisites:** PHYSCS 2760

**PHYSCS 7085: Problems in Physics**  
Laboratory work involving study of literature of special experiments in physics. Introduces research methods.  
**Credit Hour:** 1-99

**PHYSCS 7110: Light and Modern Optics**  
Interaction of light with matter, spectroscopic techniques, wave optics, interferometry, multilayer films, polarization, non-linear optics, design of optical instruments, matrix methods, waveguides, fiber optics, acousto-optic and photo-elastic modulation. Includes both lectures and laboratory.  
**Credit Hours:** 4  
**Prerequisites:** PHYSCS 2760

**PHYSCS 7180: Solar System Science**  
(same as GEOL 7180 and ASTRON 7180; cross-leveled with GEOL 4180 and ASTRON 4180). Investigates physical states, interior structures and comparative geology of solar systems bodies: planets, moons, asteroids, comets, sun. Solar system formation and evolution.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 1220 or PHYSCS 2760 or instructor's consent

**PHYSCS 7190: Physics and Chemistry of Materials**  
(same as NU_ENG 7319, BIOL_EN 7480, CHEM 7490; cross-leveled with PHYSCS 4190, NU_ENG 4319, BIOL_EN 4480, CHEM 4490, BME 4480). Physics and Chemistry of Materials is a 3 credit hours course offered every spring semester for students from Physics, Chemistry, Engineering and Medical Departments and consists of lectures, laboratory demonstrations, two mid-term and one final exam. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760 or PHYSCS 1200 or instructors consent

**PHYSCS 7230: Scanning and Transmission Electron Microscopy and Microanalysis**  
(cross-leveled with PHYSCS 4230). This course is designed for senior undergraduate/graduate students. This course covers the basic principles and practical considerations using SEM, TEM, EDS, and EELS in the characterization of materials. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 3150 and instructor's consent

**PHYSCS 7360: Extragalactic Astronomy**  
(same as ASTRON 7360; cross-leveled with PHYSCS 4360, ASTRON 4360). This course introduces students to the most basic knowledge of extragalactic astronomy, starting from Milky Way and extending to the most distant universe. Topics covered will include galaxy morphology and classification, groups and clusters of galaxies, active galactic nuclei, and galaxy formation and evolution.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760

**PHYSCS 7400: Physics of Electronic Devices**  
(cross-leveled with PHYSCS 4400). This course is designed for graduate students of Physics and Electrical Engineering who have an interest in learning the basic physical idea underlying the operation of electronic devices. The course consists of lectures, handout lecture notes, problem sets, two mid-term and one final exam.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 3150 or equivalent

**PHYSCS 7410: Analysis of Biological Macromolecules and Biomaterials**  
This interdisciplinary, team-taught course introduces basic concepts and experimental techniques for studying bio-macromolecules and biomaterials. A Problem Based Learn/Write Intensive approach uses four modules: proteins, membranes, cellular interactions and biomaterials.  
**Credit Hours:** 3  
**Prerequisites:** PHYSCS 2760
PHYSCS 7420: Introduction to Biomedical Imaging
(same as BIOL_EN 7420; cross-leveled with PHYSCS 4420, BIOL_EN 4420, BME 4420). This course offers a broad introduction to medical imaging. Topics to be covered include the physics basics and instrumentation of X-ray CT, PET, SPECT, ultrasound, MRI, and optical imaging, as well as recent developments in biomedical imaging.

Credit Hours: 3
Prerequisites: PHYSCS 2760

PHYSCS 7450: Introduction to Cosmology
Develops the physical concepts necessary for understanding the major recent discoveries in cosmology, such as the acceleration of the universe and dark energy. No prior knowledge of general relativity is assumed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 3150 or equivalent or instructor's consent

PHYSCS 7500: Computational Biological Physics
(cross-leveled with PHYSCS 4500). Provides a practical introduction (hands-on approach) to the study of the structure and function of biomolecular systems by employing computational methods and theoretical concepts familiar from the physical sciences.

Credit Hours: 3
Prerequisites: PHYSCS 1220 or PHYSCS 2760 or instructor's consent

PHYSCS 7510: Single Molecule Biophysics
(same as BIOCHM 7510; cross-leveled with PHYSCS 4510). The course provides an overview of the biophysics of enzymes, nucleic acids and the cytoskeleton. Topics covered will include diffusion, molecular motors, polymerization of the cytoskeleton and the polymer properties of nucleic acids and microtubules.

Credit Hours: 3
Prerequisites: PHYSCS 2760

PHYSCS 7550: Cosmochemistry
(same as ASTRON 7550; cross-leveled with PHYSCS 4550, ASTRON 4550). Cosmic dust, stardust, spectra, energy, interstellar medium, meteorites, astromineralogy.

Credit Hours: 3
Prerequisites: PHYSCS 3150 or equivalent instructor's consent

PHYSCS 7650: Modern Condensed Matter Physics
Introduces the basic concepts and gives an overview of the latest developments of modern condensed matter physics as the forefront of (nano) science and technology. Combines lectures and computational laboratory, where students use and develop interactive computer simulations. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PHYSCS 3150 or instructor's consent

PHYSCS 7720: Nonlinear Dynamics
(cross-leveled with PHYSCS 4720). This course provides an introduction to nonlinear dynamical systems and chaos, with examples from physics, chemistry, biology and engineering. The emphasis will be on applications, using a combination of analytical, computational and intuitive geometrical methods. Topics covered include phase portraits, fixed point analysis, bifurcations, limit cycles, strange-attractors, iterated maps, period doubling, chaos, fractals, scaling and universality. Graded on A-F basis only.

Credit Hours: 3

PHYSCS 7750: Interstellar Medium
The course discusses observational properties and physical and chemical processes occurring in the interstellar medium. Topics include interstellar diffuse and molecular clouds, HII regions, dust grains, interstellar chemistry, star formation, supernova remnants, and interstellar shock waves.

Credit Hours: 3
Prerequisites: PHYSCS 1220

PHYSCS 7804: Study of Techniques of Teaching College Physics
Objectives, methods and problems related to teaching college physics. Some credit in this course is required for all students teaching physics. May repeat for 3 hours maximum.

Credit Hour: 1-3

PHYSCS 8090: Research in Physics
Graduate research. Graded on S/U Basis only.

Credit Hour: 1-99

PHYSCS 8101: Topics of Physics and Astronomy
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.

Credit Hour: 1-3
Prerequisites: instructor's consent. Departmental consent for repetition

PHYSCS 8110: Physics for High School Teachers I
This is a physics course designed primarily for high school teachers. Topics include motion, forces, Newton's Laws, electricity, and magnetism. The course uses research based pedagogical methods utilizing inquiry, modeling, and hands-on techniques. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: instructor's consent

PHYSCS 8130: Physics for High School Teachers II
This is a physics course designed primarily for high school teachers. Topics include modern physics and history of science. The course uses research based pedagogical methods utilizing inquiry, modeling, and hands-on techniques. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: instructor's consent

<td>PHYSCS 8710</td>
<td>Quantum Mechanics I</td>
<td>Non-relativistic quantum theory in Hilbert space. States and self-adjoint observables, unitary time evolution in various pictures, the path-integral, identical particles, Fock space, angular momentum and some perturbation theory.</td>
<td>3</td>
</tr>
</tbody>
</table>
PHYSCS 8720: Quantum Mechanics II
More perturbation theory, variational methods, semi-classical methods and application to radiation theory, linear response theory and rudiments of relativistic quantum mechanics including the Klein-Gordon equation and the Dirac equation.

Credit Hours: 3
Prerequisites: PHYSCS 8710

PHYSCS 8820: Relativity and Gravitation
Special and general theories of relativity. Discussion of accelerated observers and the principles of equivalence. Einstein's gravitational field equations, black holes, gravitational waves and cosmology.

Credit Hours: 3
Prerequisites: PHYSCS 8610, PHYSCS 8620

PHYSCS 9090: Research in Physics
Research leading to Ph.D. dissertation. Graded on a S/U basis only.

Credit Hour: 1-99
Prerequisites: PhD candidacy has been established

Plant Science (PLNT_S)

PLNT_S 1002: Topics In Plant Science - Biological
Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 1120: Career Development
Introductory course for students planning a career in plant sciences. Includes an overview of each emphasis area, as well as development of professional skills required for a successful career. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: Plant Science majors only

PLNT_S 2002: Topics in Plant Science - Biological
Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 2075: Environmental Horticulture
Investigate interrelationships between plants and the environment. Special emphasis placed on improving homeowners' environmental stewardship and their knowledge of sustainable practices. Graded on A-F basis only.

Credit Hours: 3

PLNT_S 2100: Introduction to Soils
(same as SOIL 2100). Introduction to soil sciences with emphasis placed on physical, biological, and chemical properties and application to land use, plant growth and environmental problems.

Credit Hours: 3
Recommended: 3 hrs of Chemistry

PLNT_S 2110: Plants and their Cultivation
Principles of plant growth with emphasis on anatomy, physiology, and response to environmental factors. Production and protection of economically important crop and horticulture species.

Credit Hours: 3

PLNT_S 2125: Plant Structure and Function
Introduction to plant anatomy:physiology; how plant structures and processes are involved in growth/development. Labs explore photosynthesis, mineral nutrition, water relations, growth, and hormonal regulation.

Credit Hours: 3
Prerequisites: BIO_SC 1200 and CHEM 1100 or CHEM 1320

PLNT_S 2155: Interior Plants
Identification, cultural requirements and use of plants adaptable or capable of becoming acclimated to interior environments. Graded on A-F basis only.

Credit Hour: 1

PLNT_S 2195: Grapes and Wines of the World
(same as F_S 2195). Explores the world of wine through study of viticultural principles and practices, wine styles, classifying wine, the winemaking process and New World and Old World wine regions. Learn wine tasting skills and experience wines from around the world. World wine consumption, social and physical health benefits of moderate wine consumption.

Credit Hours: 3

PLNT_S 2210: Ornamental Woody Plants
Identification and evaluation of trees and shrubs for landscape use.

Credit Hours: 3
Prerequisites: BIO_SC 1200 or instructor's consent

PLNT_S 2215: Ornamental Herbaceous Plants
Annuals, biennials, perennials, ground covers, and bulbs; their identification, nomenclature classification, culture and use.

Credit Hours: 3
Prerequisites: BIO_SC 1010 or BIO_SC 1500 or BIO_SC 1200

PLNT_S 2220: Introduction to Floral Design
Introduction to the basics of floral design with special emphasis on design mechanics, flower processing, care and handling. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 2221: Everyday Floral Design
Intermediate floral design course expanding skills from introductory floral design with emphasis on the elements and principles of design. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2220

PLNT_S 2240: Landscape Graphic Communication
Landscape design is a blend of art and science. This course is designed to help students expand their artistic skills, including graphic communications. Topics included to achieve this goal are drawing mediums and techniques, coloring mediums and techniques, symbol usage, and elevation drawings. Graded on A-F basis only.

Credit Hours: 2
Recommended: ART_DRAW 1050

PLNT_S 2250: Landscape Site Analysis
In order to effectively design what a site can become a landscape designer must first be able to accurately see what it is. This course presents a detailed look at obtaining, calculating, and manipulating a site's topography and features while offering a glimpse into the methods and means required for implementation of the final landscape design. Graded on A-F basis only.

Credit Hours: 2
Recommended: MATH 1100 or equivalent

PLNT_S 2254: Landscape Design
An introduction into the processes, principles, and practices of landscape design, this course begins with site analysis and moves through the drawing and presentation of your landscape concepts.

Credit Hours: 3
Prerequisites: Completion of 30 hours

PLNT_S 3002: Topics in Plant Science - Biological
Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1–4

PLNT_S 3110: Horticultural Drainage and Irrigation Systems
This course is designed to provide practical knowledge of drainage and irrigation systems for golf courses, sports fields, lawns, landscapes, greenhouses, nurseries and vineyards. Graded on A-F basis only.

Credit Hours: 2

PLNT_S 3130: Undergraduate Seminar in Plant Science
Discussion of assigned or selected topics in Plant Science, including participation in a panel debate and individual seminar oral presentations.

Credit Hour: 1
Prerequisites: Completion of 60 credit hours

PLNT_S 3210: Principles of Weed Science
Introduction to principles of weed growth, reproduction, and impact on human activities. Discussion of weed control techniques and technology, weed identification, and developing weed management strategies.

Credit Hours: 4
Prerequisites: PLNT_S 2110 or BIO_SC 1200

PLNT_S 3213: Genetics of Agricultural Plants and Animals
(same as AN_SCI 3213). Concepts of molecular, transmission, and population and quantitative genetics. Emphasis given to breeding and biotechnological applications in plant and animal agriculture. Prerequisites: MATH 1100 or higher and one of the following: BIO_SC 1100 or BIO_SC 1200 or BIO_SC 1500 or FW 1100.

Credit Hours: 3

PLNT_S 3220: Special Occasion Floral Design
Advanced floral design course with emphasis in silk décor, sympathy design and public ceremony design. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2220 and PLNT_S 2221 with grade of B or above in both

PLNT_S 3221: Wedding Floral Design
Advanced floral design course with emphasis in wedding floral design and personal pieces design. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2220 and PLNT_S 2221 with grade of B or above in both

PLNT_S 3222: Retail Floral Management
Course focusing on all areas of retail floral management: business finance, marketing, products and services, employee management, and customer service. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2220 and PLNT_S 2221

PLNT_S 3222W: Retail Floral Management - Writing Intensive
Course focusing on all areas of retail floral management: business finance, marketing, products and services, employee management, and customer service. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2220 and PLNT_S 2221

PLNT_S 3225: Plant Breeding and Genetics
Mendelian genetic principles and related genetic developments applicable in plant breeding. Discussion of established and new plant breeding procedures applicable to cultivar development.

Credit Hours: 3
Prerequisites: PLNT_S 2110 or equivalent

PLNT_S 3230: Plant Propagation
Principles and practices of propagation of horticultural plants. Prerequisites: One of the following: PLNT_S 2075, BIO_SC 1200, or BIO_SC 1500 or Instructor's consent.

Credit Hours: 3

PLNT_S 3230W: Plant Propagation - Writing Intensive
Principles and practices of propagation of horticultural plants. Prerequisites: One of the following: PLNT_S 2075, BIO_SC 1200, or BIO_SC 1500 or Instructor's consent.

Credit Hours: 3
PLNT_S 3240: Principles of Viticulture I  
(same as F_S 3240). Grapevine growth, development, selection, propagation, training systems, pruning, and harvesting; vineyard site selection, design, and development. Graded on A-F basis only.

Credit Hours: 4  
Prerequisites: F_S 1010 and F_S 2195 or PLNT_S 2195; or PLNT_S 2100; or PLNT_S 2110; or PLNT_S 2125

PLNT_S 3250: Green Industry Bidding  
Principles of interpreting drawings, estimating labor, equipment, materials and other costs and recordkeeping for preparation of competitive green industry bids. Graded on A-F basis only.

Credit Hours: 2  
Prerequisites: Plant Science major and completion of 30 credit hours

PLNT_S 3252: Arboriculture and Pruning  
Concepts for establishment and management of urban trees. Emphasis on planting, fertilization, pruning, disease, hazard assessment and components of a municipal trees ordinance.

Credit Hour: 1  
Prerequisites: PLNT_S 2210 or instructor's consent

PLNT_S 3254: Landscape AutoCAD  
AutoCAD is the most widely utilized computer aided drafting software program in the professional landscape design industry. This course will teach students how to utilize AutoCAD to transform their landscape design skills into a digital format and investigate the benefits of utilizing technology as a design tool. We will also explore other industry utilized software, and their functionality, with focus on landscape design and presentation. Additional software will include, but not be limited to, AutoDesk Revit; Adobe Photoshop; and Sketchup. Graded on A-F basis only.

Credit Hours: 3  
Recommended: PLNT_S 2250 and PLNT_S 2254

PLNT_S 3260: Greenhouse Management  
Greenhouse design, environmental control and equipment. Practices associated with plant nutrition management, greenhouse pest control, postproduction handling and marketing of greenhouse crops, and greenhouse management are also covered.

Credit Hours: 4  
Prerequisites: PLNT_S 2075 or instructor's consent

PLNT_S 3270: Forage Crops  
An introduction to principle forage crops, including identification, anatomy, physiology, and growth characteristics. Pasture production and management, grazing systems, and forage preservation and utilization will also be covered.

Credit Hours: 3  
Prerequisites: PLNT_S 2125 or instructor's consent

PLNT_S 3275: Grain Crops  
Lecture and discussion covering production and utilization, plus growth and development of a wide range of grain crops, including Missouri crops. Problem solving tasks include agronomics, economics and environmental factors.

Credit Hours: 3  
Prerequisites: PLNT_S 2110 or PLNT_S 2125

PLNT_S 3355: Introductory Turfgrass Management  
Characteristics of turf materials, principles of establishment and maintenance.

Credit Hours: 3  
Prerequisites: PLNT_S 2100 or instructor's consent

PLNT_S 3385: Problems in Plant Science  
Not accepted as a substitute for any regularly scheduled course. Problems arranged with individual faculty member in specific matter area.

Credit Hour: 1-4  
Prerequisites: consent required

PLNT_S 3510: Biology of Fungi  
(same as BIO_SC 3510). The diverse roles of fungi in the biosphere will be explored by considering fungi we eat, fungi which destroy our food, fungi in folklore and fungi as global nutrient recyclers.

Credit Hours: 3  
Prerequisites: BIO_SC 1200 or BIO_SC 1500 or equivalent

PLNT_S 3710: Introductory Entomology  
(same as BIO_SC 3710). Emphasizes the role insects play in the scheme of life. Topics include insect structure, development, diversity, ecology, communication and behavior, and management. Prerequisites: Completion of 60 credit hours and one of the following: BIO_SC 1100 (or F_W 1100) or BIO_SC 1200, or BIO_SC 1500.

Credit Hours: 3

PLNT_S 3715: Insect Diversity  
(same as BIO_SC 3715). Laboratory exercises emphasizing external insect anatomy, classification, and identification (to family level). Preparation of an insect collection is required.

Credit Hours: 2  
Prerequisites or Corequisites: PLNT_S 3710 (or BIO_SC 3710)

PLNT_S 4002: Topics in Plant Science - Biological  
Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 4003: Topics in Plant Science - Biological- Lab  
Initial offering of a course(s) in a specific subject matter area. Offered when proposed by a faculty member in that area of expertise.

Credit Hour: 1-4

PLNT_S 4225: Principles of Plant Breeding  
(cross-leveled with PLNT_S 7225). This is an introductory course exploring the principles of plant breeding where we examine the application of genetics and the plant sciences to the breeding and
improvement of field crops, focusing on conventional plant breeding principles. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 2110 or PLNT_S 2125 or BIO_SC 1200

PLNT_S 4270: Laboratory Techniques in Forage Analysis
(cross-leveled with PLNT_S 7270). This course explores the analysis of forages for yield and nutritive value. Students will learn how to properly collect forage samples in the field, followed by proper preservation and processing techniques. Students will perform all of the laboratory analyses necessary to determine the full nutritive value of their sampled forages (dry matter yield, crude protein, fiber and digestibility), learning the what, how and why behind each analysis performed along the way. Lastly, students will learn how to compare different forage samples and draw conclusions based on their results. Students will be prepared for employment in the feed and forage analysis industry following completion of this course. Graded on A-F basis only.

Credit Hours: 2
Prerequisites or Corequisites: PLNT_S 3270

PLNT_S 4313: Soil Fertility and Plant Nutrition
(same as SOIL 4313; cross-leveled with PLNT_S 7313, SOIL 7313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

Credit Hours: 3
Prerequisites: SOIL 2100 or instructor's consent

PLNT_S 4315: Crop Physiology
(cross-leveled with PLNT_S 7315). Basic course on crop growth and development. Emphasis is on physiological processes and morphology of crop plants, and their application to crop breeding and management decisions.

Credit Hours: 3
Prerequisites: PLNT_S 2125 or equivalent

PLNT_S 4320: Molecular Plant Physiology
(same as BIO_SC 4320; cross-leveled with PLNT_S 7320, BIO_SC 7320). Modern physiology of higher plants using common cultivated plants as examples. Prerequisites: CHEM 1320 or CHEM 1330 and one of the following: BIO_SC 1500 or BIO_SC 1200.

Credit Hours: 3

PLNT_S 4325: Advanced Plant Breeding
(cross-leveled with PLNT_S 7325). Will introduce students to the application of genetics and the plant sciences to the breeding and improvement of self-pollinated field crops. Classical, current and innovative plant breeding techniques will be addressed.

Credit Hours: 3
Prerequisites: PLNT_S 2110 or PLNT_S 2125, and PLNT_S 3213 (or equivalent), and PLNT_S 3225 (or equivalent)

PLNT_S 4340: Principles of Viticulture II
(same as F_S 4340). Environmental and biological factors influencing vine physiology and wine grape quality. Irrigation, canopy management, pest and disease control, budgets and current trends in viticulture. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: F_S 3240 or PLNT_S 3240

PLNT_S 4345: Principles of Viticulture and Winemaking
(same as F_S 4345; cross-leveled with PLNT_S 7345, F_S 7345). This course will cover the basics needed by viticulturists and winemakers to understand grape vine growth and vineyard considerations along with winemaking principles. Viticultural topics will include grapevine growth and development, vineyard design and development, cultivar selection, grapevine propagation, training systems, and harvest and pruning. Winemaking topics will include sensory analysis of grapes, chemical, microbiological and technological aspects of winemaking, and the analytical methods used for juice and wine analysis. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: BIO_SC 1010 or BIO_SC 1020 or BIO_SC 1030

PLNT_S 4355: Advanced Turfgrass Management
(cross-leveled with PLNT_S 7355). Provides turfgrass majors a more informative and applicable look at mathematics of turfgrass management, application techniques, cultural practices, and soil/water relationships applicable to careers in golf course and sports turf management, lawn care, and professional grounds maintenance.

Credit Hours: 3
Prerequisites: PLNT_S 3355 or instructor's consent

PLNT_S 4360: Precision Agriculture Science and Technology
(same as AG_S_M 4360, SOIL 4360; cross-leveled with PLNT_S 7360, AG_S_M 7360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3
Prerequisites: PLNT_S 2100 or SOIL 2100, or PLNT_S 2110, or instructor's consent

PLNT_S 4365: Greenhouse Crops Production
(cross-leveled with PLNT_S 7365). Production management decision and commercial culture of the major floriculture crops.

Credit Hours: 4
Prerequisites: PLNT_S 3260 or instructor's consent

PLNT_S 4385: Problems in Plant Science
Special problem in plant pathology designed for the minor program in Plant Pathology. Problems arranged on an individual student basis.

Credit Hours: 3

PLNT_S 4400: Plant Anatomy
(same as BIO_SC 4400; cross-leveled with PLNT_S 7400, BIO_SC 7400). Comparative structure, growth of meristems; development, structure of important cell types, tissues systems; comparative anatomy
of stem, root, leaf. Emphasizes anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

<tr>
<td>PLNT_S 7313: Soil Fertility and Plant Nutrition</td>
<td>(same as SOIL 7313; cross-leveled with PLNT_S 4313, SOIL 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.</td>
<td>3</td>
<td>SOIL 2110 or instructor's consent</td>
</tr>
</tbody>
</table>
PLNT_S 7315: Crop Physiology (cross-leveled with PLNT_S 4315). Basic course on crop growth and development. Emphasis is on physiological processes and morphology of crop plants, and their application to crop breeding and management decisions.

Credit Hours: 3
Prerequisites: PLNT_S 2125 or equivalent

PLNT_S 7320: Molecular Plant Physiology (same as BIO_SC 7320; cross-leveled with PLNT_S 4320, BIO_SC 4320). Modern physiology of higher plants using common cultivated plants as examples. May be taken with or without laboratory.

Credit Hours: 3
Prerequisites: BIO_SC 1500 or BIO_SC 1200 and five hours of chemistry

PLNT_S 7325: Advanced Plant Breeding (cross-leveled with PLNT_S 4325). Will introduce students to the application of genetics and the plant sciences to the breeding and improvement of self-pollinated field crops. Classical, current and innovative plant breeding techniques will be addressed.

Credit Hours: 3
Prerequisites: PLNT_S 2110 or PLNT_S 2125, and PLNT_S 3213 (or equivalent), and PLNT_S 3225 (or equivalent)

PLNT_S 7355: Advanced Turfgrass Management (cross-leveled with PLNT_S 4355). Provides turfgrass majors a more informative and applicable look at mathematics of turfgrass management, application techniques, cultural practices, and soil/water relationships applicable to careers in golf course and sports turf management, lawn care, and professional grounds maintenance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PLNT_S 3355 or instructor's consent

PLNT_S 7360: Precision Agriculture Science and Technology (same as AG_S_M 7360 and SOIL 7360; cross-leveled with PLNT_S 4360, AG_S_M 4360, SOIL 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

Credit Hours: 3
Prerequisites: SOIL 2100, PLNT_S 2110 or instructor's consent

PLNT_S 7365: Greenhouse Crops Production (cross-leveled with PLNT_S 4365). Production management decision and commercial culture of the major floriculture crops.

Credit Hours: 4
Prerequisites: PLNT_S 3260 or instructor's consent

PLNT_S 7370: Small Fruit and Vegetable Production Emphasizes production, management and marketing practices for small fruit and vegetable crops.

PLNT_S 7400: Plant Anatomy (same as BIO_SC 7400; cross-leveled with PLNT_S 4400, BIO_SCI 4400). Comparative structure, growth of meristems; development, structure of important cell types, tissue systems; comparative anatomy of stem, root, leaf. Emphasized anatomy of gymnosperms, angiosperms. Includes lab. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: BIO_SC 1200 or equivalent

PLNT_S 7500: Biology and Pathogenesis of Plant-Associated Microbes (cross-leveled with PLNT_S 4500). Diagnosis of disease of plants caused by fungi, nematodes, viruses and bacteria. Environmental and genetic factors leading to disease development and strategies for disease management, including biotechnology.

Credit Hours: 4
Prerequisites: 5 hours BIO_SC

PLNT_S 7550: Plant Biotechnology (cross-leveled with PLNT_S 4550). Principles of gene expression, metabolic pathway analysis and data mining, plant tissue culture and transformation, transgene integration and expression analysis, plant epigenome, emerging transgenic technologies, etc.

Credit Hours: 4
Prerequisites: BIO_SC 2960 or equivalent; BIO_SC 2200 or equivalent; BIO_SCI 2300 or equivalent; PLNT_S 2125

Credit Hours: 5
Prerequisites: PLNT_S 3710 and PLNT_S 3715 or 10 hours Biological Sciences

PLNT_S 7720: Aquatic Entomology (cross-leveled with PLNT_S 4720). Identification, life histories, ecology of aquatic insects. Grading is based on lecture, lab, and a collection. For students of wildlife, fisheries management, aquatic biology, advanced entomology.

Credit Hours: 3
Prerequisites: PLNT_S 3710, PLNT_S 3715 or equivalent or instructor's consent

Credit Hours: 3
Prerequisites: PLNT_S 3710 or instructor's consent
PLNT_S 7820: Principles of Insect Physiology
Major concepts of insect physiology emphasizing functions of organ-systems sensory physiology hormones in development, nutrition.
Credit Hours: 4
Prerequisites: PLNT_S 3710, PLNT_S 3715 and PLNT_S 7810 or equivalent

PLNT_S 7965: Readings in Plant Stress Biology
Independent readings and discussion of recent research publications. Topics selected in consultation with supervisory faculty member.
Credit Hour: 1-9
Prerequisites: instructor's consent

PLNT_S 7970: Readings in Molecular Ecology of Herbivory
(cross-leveled with PLNT_S 4970). The application of molecular biology tools to the rich history of chemical, physiological, population, and multifracture ecology studies on plant herbivore interactions has made for an exciting, fast-paced field at the forefront of ecology, 'functional biology' and 'systems biology'. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: Instructor's consent

PLNT_S 8001: Topics
Instruction in specific subject matter areas in plant, insect or microbial sciences.
Credit Hour: 1-4
Prerequisites: instructor's consent

PLNT_S 8010: Professionalism and Ethics
Ethical issues in the conduct of scientific research including data integrity, plagiarism, and intellectual property. Scientific writing, lab management, peer review and other professional skills for the life sciences. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Instructor's consent

PLNT_S 8090: Thesis Research
Original investigations in plant, insect or microbial science in support of thesis for master's candidates. Graded on S/U basis only.
Credit Hour: 1-10

PLNT_S 8330: Molecular Breeding and Translational Genomics
Development of Molecular Breeding, Evolution of Transgenics, Transformation and Gene Transfer Methods, Transgenics in the Food Supply Genetics and Marker Technology, Genotyping Methods for Marker Assisted Selection (MAS, and Emerging Transgenic and Genotyping Technologies. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PLNT_S 3225

PLNT_S 8362: Introduction to Plant Metabolism
(same as BIO_SC 8362 and BIOCHM 8362). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant metabolism. Graded on A-F basis only.
Credit Hours: 2

PLNT_S 8365: Introduction to Molecular Cell Biology
(same as BIOCHM 8365 and BIO_SC 8365). This course is part of a series that aims to provide a solid conceptual foundation in interdisciplinary plant biology for graduate students with a research emphasis on plant biology. This course examines the basic concepts and techniques used to understand molecular cell biology. Graded on A-F basis only.
Credit Hours: 2

PLNT_S 8410: Advanced Weed Science
Discussion of herbicide physiology and fate in the environment, current development in weed science theory and methodology, and application of analytical procedures in weed research.
Credit Hours: 3
Prerequisites: PLNT_S 3210

PLNT_S 8420: Herbicide Mode of Action and Symptomology
Designed for graduate students to gain an understanding of the in-depth processes by which herbicides interrupt normal plant growth and development at a tissue, cellular, and enzymatic level while learning to diagnose visual symptoms associated with herbicide injury. Course maybe repeated for credit. Graded on A-F basis.
Credit Hours: 2
Prerequisites: PLNT_S 3210; instructor's consent

PLNT_S 8430: Introduction to Bioinformatics Programming
(same as AN_SCI 8430). This course provides the basics of programming and database development to students in the life sciences who have little prior programming experience. It covers Unix/Linux, Perl, MySQL, the relational database design process, and common data formats used in genome informatics. Students will learn how programming skills can enhance their ability to analyze large biological datasets, and will gain hands on experience with examples focused on genomics and bioinformatics. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Instructor's consent
Recommended: Undergraduate or graduate course in Genetics

PLNT_S 8505: Introduction to Plant Stress Biology
(same as BIO_SC 8505) This course is part of a series that aims to provide a solid conceptual foundation to interdisciplinary plant biology for graduate students with a research emphasis in plant biology. This course examines the basic concepts and techniques used to understand plant stress biology. Graded on A-F basis only.
Credit Hours: 2

PLNT_S 8530: Research with Plant Stress Agents
Students will learn key research strategies for abiotic and biotic plant stress agents. Students will complete two focused hands-on projects. Graded on A-F basis only.
PLNT_S 8720: Insect Behavior
An examination of the breadth of behaviors found in insects, such as orientation mechanisms, communication, dispersal and migration, defensive mechanisms, lost location, feeding strategies, pollination, courtship and reproduction, and social behavior.
Credit Hours: 3
Prerequisites: PLNT_S 7500 and PLNT_S 7510 or PLNT_S 7315, or PLNT_S 7320, or equivalent

PLNT_S 9001: Topics
Instruction in specific subject matter areas in plant, insect or microbial sciences.
Credit Hour: 1-4
Prerequisites: instructor's consent

PLNT_S 9087: Seminar in Plant Science
In-depth development of advanced aspects of plant, insect and microbial sciences through reviews of results of research in progress and current scientific publications. Graded on A-F or S/U basis dependent on section.
Credit Hour: 1

PLNT_S 9090: Dissertation Research
Original investigations in plant, insect or microbial science in support of dissertation for doctoral candidates. Graded on a S/U basis only.
Credit Hours: 1-10

PLNT_S 9310: Ecology of Grazing Lands Systems
Students travel to grazing lands ecosystems to learn: the components and function of grazing lands; research techniques in soil-plant-animal research; forage-livestock ecology; and the role of forages in conservation practices, wildlife habitat, and sustainable agriculture.
Credit Hours: 3
Prerequisites: instructor's consent

PLNT_S 9415: Advanced Plant Physiology
Advanced course in the physiology of plant growth and development. Discussion of current and classical studies in plant physiology with emphasis on responses to environmental variation.
Credit Hour: 1-3
Prerequisites: PLNT_S 4315 or PLNT_S 4320 or equivalent. Instructor's consent required

PLNT_S 9440: Applied Quantitative and Statistical Genetics
Estimation of genetic effects using means and variances, diallel analysis, environmental stability responses, index selection, and gain from selection.
Credit Hours: 3
Prerequisites: PLNT_S 4330, STAT 4510, STAT 4530, AN_SCI 9423, or equivalent

PLNT_S 9540: Genetics of Plant-Microorganism Interaction
Molecular and general genetics of the interactions between plants and pathogenic or symbiotic microorganisms.
Credit Hours: 3
Prerequisites: PLNT_S 7500 and PLNT_S 7510, one course each in Biochemistry and Genetics

PLNT_S 9810: Insect Ecology
Ecological aspects of insect populations and communities including population dynamics, predator-prey interactions, competition, diversity and stability. Quantitative methods are emphasized.
Credit Hours: 3
Prerequisites: PLNT_S 3710 and PLNT_S 3715 or 10 hours of Biological Sciences

POL_SC 1100: American Government
Topics covered include Constitution, federalism, civil liberties, political attitudes, interest groups, political parties, nominations, elections, and campaigns, voting behavior, Congress, Presidency, bureaucracy, and judiciary. Meets state law requirement.
Credit Hours: 3
POL_SC 1100 - MOTR POSC 101: American Government

POL_SC 1400: International Relations
Contemporary international affairs including family of nations, control of national foreign policies, competition and cooperation in legal, political, economic, social fields.
Credit Hours: 3
POL_SC 1400 - MOTR POSC 201: International Relations

POL_SC 2004: Topics in Political Science - Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-3

POL_SC 2100: State Government
Government and politics at the state level, with emphasis on Missouri. Meets state law constitutional requirement.
Credit Hours: 3

POL_SC 2200: The Judicial Process
Analysis of roles played by American judges and courts in democratic policy formation.
Credit Hours: 3

POL_SC 2250: Missouri Politics
This course examines the government and politics of the state of Missouri. We will study the Missouri Constitution, the structure and function of the Missouri state government, and the politics - partisan and otherwise - of the state of Missouri. We will consider public policy development and implementation and examine several areas of that
public policy: health, public safety, education, resource management, and others.

**Credit Hours: 3**

**POL_SC 2293: Globalization, Identity and Citizenship**
(same as PEA_ST 2293, GEOG 2293). This course examines the forces of globalization that are transforming our world, and explores the various responses -- psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.

**Credit Hours: 3**

**POL_SC 2293W: Globalization, Identity and Citizenship - Writing Intensive**
(same as PEA_ST 2293W, GEOG 2293W). This course examines the forces of globalization that are transforming our world, and explores the various responses -- psychological, social and political -- that people have been making over the past fifty years. Part I examines globalization as an economic and geographical process, generating huge social consequences, with rapid growth, population movements, political change and a vast gap between global wealth and poverty. Part II focuses on the ways in which individuals are now seeking to find themselves in this globalizing world. Emphasis will be placed on the ways in which national identity, faith, gender and sexuality are emerging as key loci around which contemporary people (especially young people) are trying to forge new social identities for themselves. The course will conclude by examining the recently emerging (and highly contested) concept of 'global citizenship'. Graded on A-F basis only.

**Credit Hours: 3**

**POL_SC 2245: American Constitutional Democracy**
(same as HIST 2445, CNST_DEM 2445) This course offers an introduction to American constitutional democracy. On the one hand, this course will strive to set the development of America's constitutional democracy into its historical context and to explain it in relation to larger social, political, military, and economic events. A second emphasis is on the nature and character of the American democratic system. Graded on A-F basis only.

**Credit Hours: 3**

**POL_SC 2450: The Intellectual World of the American Founders**
This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

**Credit Hours: 3**

**POL_SC 2450H: The Intellectual World of the American Founders - Honors**
(same as CNST_DEM 2450H). This course demonstrates that truly understanding the American constitutional and democratic traditions begins with acknowledging and studying how, in framing the Constitution and in imagining the new nation, the Founders drew on the work and cobbled together the ideas of thinkers from multiple eras and continents and, moreover, thinkers of vastly different political ideologies and disciplinary expertise.

**Credit Hours: 3**

**Prerequisites:** Honors eligibility required

**POL_SC 2455: Constitutional Debates**
While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in "high theory." Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. While we will discuss why the Federalists ultimately "won the day," we will also devote significant attention to how the Anti-Federalists both profoundly influenced how we understand constitutional democracy in the United States and provided an intellectual lineage that still informs contemporary political debate. We will, that is, give each side
their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

Credit Hours: 3  
Prerequisites: P0L_SC 1100

POL_SC 2455H: Constitutional Debates - Honors  
(same as CNST_DEM 2455H). While we will make reference to the work of canonical political thinkers from the Western tradition during the semester--and while we will also, at times, take a broadly philosophical approach to describing certain of the Founders' theses on governance--this is not a course in "high theory". Instead, our examination of the process of drafting and ratifying the United States Constitution will be more pragmatic in nature, focusing on the practical problems and questions concerning national governance that shaped the final design of the Constitution. At the same time, this description of the class as one that addresses the Constitution in terms of the practical problems that the Founders saw it solving drastically understates the complexity and contentiousness of the subject matter that we will be examining. Specifically, the readings for the course will allow us to identify the ways in which, and reasons for which, the Founders disagreed not only on how to solve the problems of governance that the nation faced in 1787 but, moreover, on what these problems actually were. With regard to this task of understanding the principles underlying the heated debates that arose during the drafting and ratification process, it should be noted that this is not a class in Framer-worship. We will, that is, give each side their due. In addition, we will conclude the semester by considering the Constitution's post-ratification history, looking at a handful of Supreme Court decisions and constitutional amendments in order to think about some of the questions that the 1787 Constitution left un-answered and some of the problems that it left un-solved.

Credit Hours: 3  
Prerequisites: Honors eligibility required; P0L_SC 1100

POL_SC 2600: Canadian Politics and Government  
Introductory survey of Canada, including constitutional development, governmental institutions, political participation, and Canadians' political attitudes and behaviors.

Credit Hours: 3

POL_SC 2700: Comparative Political Systems  
Analysis of major political systems selected from Europe, Asia, Africa, and Latin America, emphasizing basic concepts of comparative political study.

Credit Hours: 3  
P0L_SC 2700 - MOTR POSC 202: Introduction to Comparative Politic

POL_SC 2710: Politics and the Military  
Comparative study of post-cold war civil-military relations; military as an interest group, change agent, policy instrument and competitor of civilian politicians.

Credit Hours: 3

POL_SC 2720: European Democracies  
This course provides an introduction to the institutions and issues in contemporary European political systems. It covers domestic institutions and policies as well as the developments of the European Union.

Credit Hours: 3

POL_SC 2800: Liberty, Justice and the Common Good  
(same as P0L_SC 2800). Selected great political theorists and their contemporary relevance. How to think critically about political ideas and ideologies.

Credit Hours: 3

POL_SC 2860: American Political Thought  
Examines major themes that shaped three centuries of American political thought, including slavery, religion, and the tension between unity and difference. Readings are drawn from primary sources (Jefferson, Adams, Mason, Tocqueville, Calhoun, Lincoln, Stowe, Baldwin) as well as contemporary analytic commentary on those sources (Bercovitch, Hartz, Wolin, Guinier, Morrison).

Credit Hours: 3

POL_SC 3000: Introduction to Political Research  
This course is an introduction to the systematic analysis of political phenomenon. It examines the meaning of "explanation" and "causal reasoning." and research strategies designed to make valid causal inferences. The course overview experimental design, measurement, hypothesis formulation and testing, and the display of information, using substantive examples from two or more fields of political science for illustrative purposes. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Sophomore standing; C- or higher in STAT 1200, STAT 1300, STAT 1400, STAT 2200, or STAT 2500 or C- or higher in MATH 1300, MATH 1400, or MATH 1500

POL_SC 3000W: Introduction to Political Research - Writing Intensive  
This course is an introduction to the systematic analysis of political phenomenon. It examines the meaning of "explanation" and "causal reasoning." and research strategies designed to make valid causal inferences. The course overview experimental design, measurement, hypothesis formulation and testing, and the display of information, using substantive examples from two or more fields of political science for illustrative purposes. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: Sophomore standing; C- or higher in STAT 1200, STAT 1300, STAT 1400, STAT 2200, or STAT 2500 or C- or higher in MATH 1300, MATH 1400, or MATH 1500

POL_SC 3164: Nation Building through a Barrel of a Gun  
(same as M1L_SC 3164). This course was developed to provide students the opportunity to examine the dilemmas of military intervention, nation-building/peacekeeping operations and exit strategies. This course is designed to challenge students to think critically and arrive at their own
conclusions about the use of military power to settle differences between nations, and use of military forces to conduct nation building.

**Credit Hours:** 3

**POL_SC 3165:** "Chasing Ghost", The History of Irregular Warfare
(same as MIL_SC 3165). This course explores the history of irregular warfare from the guerrilla perspective. The course examines the works of Mau Tse-Tung, Che Guevara, T.E. Lawrence and several other guerrilla leaders. You will analyze the evolution of irregular warfare through history and understand the complexities associated with the difficulties of countering and defeating irregular warfare. Graded on A-F basis only.

**Credit Hours:** 3

**POL_SC 4004W:** Topics in Political Science - Social Science
Organized study of selected topics. Subjects and earnable credit vary from semester to semester.

**Credit Hours:** 1-99

**POL_SC 4004W:** Topics in Political Science - Social Science - Writing Intensive
Organized study of selected topics. Subjects and earnable credit vary from semester to semester.

**Credit Hours:** 1-99

**POL_SC 4010:** Computing Methods
Develops computer-based skills with political science data. SAS, and other packages used in mainframe and PC environments. Graded on S/U basis only.

**Credit Hours:** 1

**Prerequisites:** concurrent enrollment in POL_SC 4000

**POL_SC 4010: Political Parties and Election Campaigns**
Development, organization, functions, activities of major and minor political parties; principles and procedures of managing campaigns; campaign finance; election administration.

**Credit Hours:** 3

**Prerequisites:** POL_SC 3000

**POL_SC 4110:** Political Behavior
Economic, psychological, and social dimensions of political behavior; participation, leadership and elites; political attitudes; voting behavior and decision-making processes.

**Credit Hours:** 3

**Prerequisites:** POL_SC 3000

**POL_SC 4120:** Politics and the Media
The role and importance of mass media in the political process, primarily the U. S. Constitutional protections of the press, politics of media control, political news and advertising, effects of information on election campaigns, political institutions, and policymaking.

**Credit Hours:** 3

**POL_SC 4120W:** Politics and the Media - Writing Intensive
The role and importance of mass media in the political process, primarily the U. S. Constitutional protections of the press, politics of media control, political news and advertising, effects of information on election campaigns, political institutions, and policymaking.

**Credit Hours:** 3

**POL_SC 4130:** African-American Politics
(same as BL_STU 4130, CNST_DEM 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

**Credit Hours:** 3

**POL_SC 4131:** Race and Politics
This course provides a selective survey of the vast literature on race and politics in the contemporary United States. Our purpose is to understand the complex relationship between racial and ethnic identity and political outcomes in the United States. As such, we will explore broad political science concepts in the context of racial and ethnic groups. We will focus on African Americans and Latino/as in this course, but where appropriate, we will look to Asian Americans and Native Americans.

**Credit Hours:** 3

**POL_SC 4132:** Race, Immigration, and Urban Politics
The global world is increasingly an urban world: about half of humanity lives in cities and this trend is expected to continue apace. In the United States, over 80 percent of people live in metropolitan regions. Urban areas present enormously complex opportunities and challenges, from the perceived failure of urban public schools, to seemingly intractable racial inequalities, to the integration of a new wave of immigrants, to affordable housing, to efficient public transportation. On the other hand, cities have long been heralded as places of opportunity, spaces of economic development, entrepreneurship, and multiculturalism. Under what conditions are urban spaces socially just, diverse, and prosperous? Under what conditions do they become spaces contested by different interest groups? Cities are the canvas upon which many of the most pressing social issues of our day are being constructed. This course will give students an interdisciplinary understanding and analysis of these urban social problems, by bridging the literature on urban politics with that on urban geography. The complexity of urban issues calls for diverse perspectives in order to imagine creative responses. Approaching the urban experience from qualitative and quantitative perspectives will help students address structural as well as individual solutions to the problems urban residents face.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or MATH 1120 or equivalent, concurrent enrollment in POL_SC 4010

**POL_SC 4132:** Race, Immigration, and Urban Politics
The role and importance of mass media in the political process, primarily the U. S. Constitutional protections of the press, politics of media control, political news and advertising, effects of information on election campaigns, political institutions, and policymaking.

**Credit Hours:** 3

**POL_SC 4130:** African-American Politics
(same as BL_STU 4130, CNST_DEM 4130). Surveys political participation of African-Americans in American politics. Analyzes their public lives in the context of elections, behavior of political organizations, social movements, parties, and level of government.

**Credit Hours:** 3

**POL_SC 4131:** Race and Politics
This course provides a selective survey of the vast literature on race and politics in the contemporary United States. Our purpose is to understand the complex relationship between racial and ethnic identity and political outcomes in the United States. As such, we will explore broad political science concepts in the context of racial and ethnic groups. We will focus on African Americans and Latino/as in this course, but where appropriate, we will look to Asian Americans and Native Americans.

**Credit Hours:** 3

**POL_SC 4132:** Race, Immigration, and Urban Politics
The global world is increasingly an urban world: about half of humanity lives in cities and this trend is expected to continue apace. In the United States, over 80 percent of people live in metropolitan regions. Urban areas present enormously complex opportunities and challenges, from the perceived failure of urban public schools, to seemingly intractable racial inequalities, to the integration of a new wave of immigrants, to affordable housing, to efficient public transportation. On the other hand, cities have long been heralded as places of opportunity, spaces of economic development, entrepreneurship, and multiculturalism. Under what conditions are urban spaces socially just, diverse, and prosperous? Under what conditions do they become spaces contested by different interest groups? Cities are the canvas upon which many of the most pressing social issues of our day are being constructed. This course will give students an interdisciplinary understanding and analysis of these urban social problems, by bridging the literature on urban politics with that on urban geography. The complexity of urban issues calls for diverse perspectives in order to imagine creative responses. Approaching the urban experience from qualitative and quantitative perspectives will help students address structural as well as individual solutions to the problems urban residents face.

**Credit Hours:** 3

**Prerequisites:** MATH 1100 or MATH 1120 or equivalent, concurrent enrollment in POL_SC 4010
POL_SC 4140: Congress and Legislative Policy
(same as CNST_DEM 4140). Study of national and state legislative systems and legislative policy making, with emphasis on Congress.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4150: The American Presidency
(same as CNST_DEM 4150). Evolution of the presidency; particular emphasis on constitutional and political roles played by chief executive in shaping public policy.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4150W: The American Presidency - Writing Intensive
Evolution of the presidency; particular emphasis on constitutional and political roles played by chief executive in shaping public policy.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4160: Interest Groups
Development, organization, functions, activities, internal politics of special interest groups such as business, labor, agricultural and public interest groups; lobbying and techniques for influencing public policy in the American political system.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4160W: Interest Groups - Writing Intensive
Development, organization, functions, activities, internal politics of special interest groups such as business, labor, agricultural and public interest groups; lobbying and techniques for influencing public policy in the American political system.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4170: Politics of the American South
(same as CNST_DEM 4170). This course focuses on the politics of the American South in the latter part of the 20th century and the early years of the current millennium. For undergraduate credit only.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4190: Elections and Democracy in the United States
This is a class on United States election processes and their relationship to democratic governance. By election processes I mean the rules and procedures under which elections are contested. These include franchise, balloting methods, vote aggregation rules, apportionment, districting and related subjects. The class does not engage public opinion, partisanship, voter choice and other subjects typically classified as political behaviors. Elections are to an end; that end is normatively defensible democratic governance. Consequently, we discuss these subjects in the context of American democratic thought and ideals. Election processes can either contribute towards our democratic goals and aspirations or detract from them. More precisely, different election methods privilege different democratic values. To understand whether United States elections work well or poorly one must understand the democratic ideals that have most deeply influenced the American experience. We study election processes from a historical development perspective informed by political thought. However, our assessment of United States elections is deeply informed by contemporary theory and empirical analysis.

**Credit Hours:** 3

POL_SC 4200: The American Constitution
(same as CNST_DEM 4200). Leading American constitutional principles as they have evolved through important decisions of the United States Supreme Court.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4200W: The American Constitution - Writing Intensive
Leading American constitutional principles as they have evolved through important decisions of the United States Supreme Court.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4210: Constitutional Rights
(same as CNST_DEM 4210). Survey of Supreme Court cases involving the Constitution's protections for life, liberty, and property and guarantee of equal protection of the law.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4210W: Constitutional Rights - Writing Intensive
Survey of Supreme Court cases involving the Constitution's protections for life, liberty, and property and guarantee of equal protection of the law.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100

POL_SC 4220: The United States Supreme Court
Role of Supreme Court in American system of government; particular attention given to reading biographies and writings of the Justices.

**Credit Hours:** 3
**Prerequisites:** POL_SC 1100
are just the tip of the iceberg of how politics and policy affect the health of the US population. In addition to issues of health insurance coverage, this course will cover topics ranging from the quality of medical care, to socioeconomic disparities in health outcomes, to substance abuse and addition, to gender and reproductive health, to the question of what counts as a "disease," and more. All of these issues are deeply political, whether you may realize it or not, and all present public policy challenges. In addition to building your subject matter knowledge, this course will help you to develop critical thinking and argumentation skills about public policy issues. It will also give you experience in conceiving and drafting a policy memo, a common format of written communication in the policy world.

Credit Hours: 3

POL_SC 4415: Peacekeeping and Intervention
This course will survey the causes and consequences of peacekeeping and intervention as well as assess the conditions that lead to successful and failed missions.
POL_SC 4420: Politics of International Economic Relations
Study of reciprocal interaction between global politics and economics. Includes politics of north/south relations, multinational non-state actors, arms transfers and dependency.

Credit Hours: 3

POL_SC 4430: Global Human Rights
Human rights violations are widespread. The majority of the world's citizenry lives with inadequate civil and political and economic, social, and cultural rights, often with dire consequences on economic and human security. What caused this situation? And, moreover, what can be done to fix it? This course focuses on the social scientific study of human rights. We will focus on social scientific explanations of the rise of the human rights movement, political and economic explanations for human rights conditions, and the effects of advocacy efforts concerning human rights. After this class, you will have not only an understanding of the major players and factors influencing human rights, but a base understanding of the social scientific processes which govern human rights conditions and improvements. As such, this class is not a history class or a class on current events. Though current and historical events will be discussed, your grade will not depend on your rote memorization of these events. Instead, the focus will be on understanding the underlying interests of important actors towards human rights, the arenas in which these actors interact, and the rules which govern their interactions. This focus on the basic principles will provide you with a rich practical knowledge of human rights. At the conclusion of the course, you will be able to actively engage with the global human rights community.

Credit Hours: 3

POL_SC 4440: International Organization
Forms and functions of governmental (United Nations, European Union, NATO) and nongovernmental international organizations.

Credit Hours: 3
Prerequisites: POL_SC 1100

POL_SC 4540: American Foreign Policies
Bases, formulation, evaluation of current American foreign policies.

Credit Hours: 3

POL_SC 4540W: American Foreign Policies - Writing Intensive
Bases, formulation, evaluation of current American foreign policies.

Credit Hours: 3

POL_SC 4550: Environmental Conflict
This course introduces advanced undergraduate students to the linkages between the environment and conflict. This includes the use of natural resources to fund rebellion, the relationship between human-induced environmental stress and political violence, and competition between states over resources. During the course students will develop a basic understanding of climate change science, conflict studies, and conflict management strategies employed by local, regional, and international actors.

Credit Hours: 3

POL_SC 4600: Latin American Politics
Development, present status of political institutions in South America; emphasizes current political problems.

Credit Hours: 3

POL_SC 4610: European Political Systems
Comparison of political cultures, institutions, and processes of Britain, France, West Germany, and selected smaller countries in Western Europe.

Credit Hours: 3

POL_SC 4620: The Politics of Modern Europe
The course is an introduction to the politics of modern Europe. Europe provides an ideal setting to explore the central concepts and debates of comparative politics in industrialized countries. The course introduces the wide variety of political institutions, political economies and cultures existing in contemporary Europe and probes the question how such discrepancies might affect political outcomes and the possibility to coordinate EU policy. Several central topics in comparative politics, including political parties, elections, the welfare state, civil society and corruption will be introduced with application to modern European democracies. Graded on A-F basis only.

Credit Hours: 3

POL_SC 4630: The Politics of Modern Europe
The course is an introduction to the politics of modern Europe. Europe provides an ideal setting to explore the central concepts and debates of comparative politics in industrialized countries. The course introduces the wide variety of political institutions, political economies and cultures existing in contemporary Europe and probes the question how such discrepancies might affect political outcomes and the possibility to coordinate EU policy. Several central topics in comparative politics, including political parties, elections, the welfare state, civil society and corruption will be introduced with application to modern European democracies. Graded on A-F basis only.

Credit Hours: 3

POL_SC 4640: African Politics
(same as BL_STU 4640). A general comparative course focusing on post-independent Africa. Theories and concepts related to decolonization, nationalism, democratization, and ethnicity; also institutional forms and organizations: political parties, parliaments, and executives.

Credit Hours: 3

POL_SC 4650: Latin American Politics
Development, present status of political institutions in South America; emphasizes current political problems.

Credit Hours: 3

POL_SC 4660: The Political System of the European Union
This course examines the politics, political actors, and institutions of the European Union from a comparative perspective. It questions whether we can view the EU as a federal democratic system similar to the U.S.

Credit Hours: 3

POL_SC 4680: Chinese Politics and Foreign Policy
This course is intended to introduce you to the history and analysis of Chinese politics and foreign policy since 1949. The course has two main goals. The first is that during the semester, you should learn the key historical events in Chinese political development and foreign policy. Second, you will examine these events and developments in light of major theories in comparative politics and international relations.
POL_SC 4690: North and South Korea
This course is an introduction to the development of North and South Korea since 1945. By the end of the semester, students will 1) know the key events and historical trends in the political development and foreign policy of the two Koreas 2) be able to explain these developments using major theories in comparative politics and international relations. We will focus on processes of continuity and change, both for the two political systems and for the everyday lives of individuals on both sides of the DMZ. We will explore the questions and topics covered in the course using historical, literary, and audiovisual materials.
Credit Hours: 3

POL_SC 4695: Understanding Korea Through Film
This course will familiarize students with major historical developments, substantive political issues, and theoretical debates in the study of Korea's twentieth-century history and politics. The course touches on issues such as the impact of colonialism, revolution, civil and international conflict, political economy and corruption, contemporary social issues, and authoritarian and democratic political development in both North and South Korea. The course pairs analytical and explanatory readings with weekly films - either documentary or non-documentary - to interrogate major social and political developments on the Korean peninsula since the start of the twentieth century.
Credit Hours: 3

POL_SC 4700: America's Wars in Asia/War and Peace in Asia
This course is an introduction to the causes and character of conflict in Asia, especially the conflicts that either have involved or could plausibly involve the United States of America. These conflicts often combine aspects of civil conflict with aspects of international politics, and one of the important themes of the course will be to look at Asia's conflicts through both of these lenses. In addition, we will examine America's foreign policy options and how it selected strategies to deal with these conflicts. By the end of the semester, students will 1) be familiar with the key historical events and concepts related to conflict in East Asia 2) be able to explain these developments using a range of major theories and conceptual lenses in comparative politics and international relations. The course will explore the questions and topics covered in the course using historical, literary, and audiovisual materials.
Credit Hours: 3

POL_SC 4710: Terrorism: Religious, Ethnic and Ideological Politics
Terrorism as political violence extending beyond the acts themselves. Examines major modern movements, e.g. Northern Ireland, Basques (Spain), Germany, Algeria, Arab-Israeli, Iran, India, Sri Lanka, Peru, Argentina, Uruguay.
Credit Hours: 3

POL_SC 4720: Politics of Development
(same as BL_STU 4720). Comparative, interdisciplinary analysis of the politics of developing countries in Asia, Africa, and Latin America. Special attention given to the problems of political and socioeconomic development.
Credit Hours: 3

POL_SC 4730: Women and Politics
(same as WGST 4730). This course examines women's political participation and public policies towards women in countries around the world.
Credit Hours: 3

POL_SC 4750: Power and Money
This course provides an introduction to comparative political economy by focusing on the following questions. How and why do governments promote economic prosperity? Does democracy make people richer or poorer? Is it true that "money is power"? Can poor countries enjoy a stable democracy?
Credit Hours: 3

POL_SC 4770: Comparative Political Behavior
Explores research questions related to cross-national differences and similarities in public opinion formation, political culture and values, voting behavior, and other forms of political participation. Violent forms of political participation are also considered. Graded on A-F basis only.
Credit Hours: 3

POL_SC 4780: Dictatorship and Democracy
Why did the Arab Spring happen? Will China survive or collapse? Did North Korea's new dictator Kim Jong Un really execute his old girlfriend? Throughout history, the majority of the world's regimes have been dictatorships rather than democracies. This course is an introduction to the causes and character of contemporary authoritarian and democratic regimes: how and why they are created, why they survive, why people resist dictatorship or don't, and why regimes survive or fall. We will use academic articles, news stories, and films to study dictatorship and democracy. You will come away from this course with an understanding of the major theoretical debates about dictatorship and democracy, and how these debates apply to important countries and issues in the world today.
Credit Hours: 3

POL_SC 4790: The Age of Democratization?
Democracy has become a global norm. After repeated waves of democratization, democracy has now reached all corners of the world and spread far beyond the affluent West. How can we understand transitions to democracy and democratic stability? What is the relationship between democracy and development and what can America and other Western powers do to promote democracy abroad? Although democracy has been on the rise in the last decades we have also seen new challenges emerge. Many countries have adopted democratic facades hiding the persistent stability of authoritarianism. We have also seen the rise of China and Russia in world politics, creating a powerful counterweight to the previously dominant liberal order. How will this change affect the prospects for democratization in the future? These and other questions will be debated in this course as students will be introduced to central question, theories, and findings in comparative democratization.
Credit Hours: 3
POL_SC 4800: Classical Political Theory
(same as AMS 4800, CNST_DEM 4800; cross-leveled with AMS 7800). Great Greek, Roman, and Medieval political theorists on the relation of psychology, ethics, politics, and the best form of government.
Credit Hours: 3

POL_SC 4810: Modern Political Theory
(same as CNST_DEM 4810). Great political theorists from Machiavelli through Marx on the nation state, capitalism, liberalism, conservatism, and Marxism.
Credit Hours: 3

POL_SC 4830: Democracy in America (and Elsewhere)
(same as CNST_DEM 4830). This course focuses on the dynamics of democracy. We will explore various topics in the history, development, and practice of democracy through an examination of the writings of Alexis de Tocqueville, one of the most insightful and prescient observers of American political culture.
Credit Hours: 3
Prerequisites: POL_SC 1100

POL_SC 4840: Developing Dynamics of Democracy
(same as POL_SC 4840). This course examines developments in the theory and practice of democracy from the ancient Greeks to the present. Beginning with the origins of democracy in the Hellenic city states, we consider the transformation of democratic concepts in the classical liberal period, review the development of democratic institutions in the United States and Europe, examine the emergence of supra-national democratic institutions such as the European Union, and assess the future of democratization in the 21st century.
Credit Hours: 3
Prerequisites: POL_SC 1100

POL_SC 4850: Scots and the Making of America
(same as CNST_DEM 4850). This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.
Credit Hours: 3
Prerequisites: POL_SC 1100, Honors eligibility required

POL_SC 4850H: Scots and the Making of America - Honors
This class is on the influence of the Scottish Enlightenment on the founding of the United States. The Scottish Enlightenment refers to uniquely Scottish advances in social, political, scientific and literary thought that transpired in the 18th and early 19th centuries. This line of thought, especially in its social and political dimensions, was especially influential in shaping the founding of the United States.
Credit Hours: 3
Prerequisites: POL_SC 1100, Honors eligibility required

POL_SC 4900: Beltway History and Politics: American Constitutional Democracy in Theory and Practice
(same as HIST 4900, CNST_DEM 4900). This course is an experiential overview of American political history for students on the Kinder Forum's Washington program, showing how American constitutional democracy was developed and implemented right here on the Potomac, as much as possible in the actual places where the events occurred. Emphasis will be placed on interplay between constitutional theory and actual political experience over time, and the tensions and institutional changes that emerged as Americans and their government coped with cataclysmic social changes, unparalleled economic development, and fearsome international challenges.
Credit Hours: 3
Prerequisites: This course is limited to students participating in the Kinder Scholars Washington D.C. Internship program

POL_SC 4940: Political Science Internship
Work experience in a public or private organization that is relevant to the political science major coordinated by a faculty member.
Credit Hour: 3-6
Prerequisites: junior standing with a 3.0 GPA; or senior standing with 2.67 GPA. Must be in good standing

POL_SC 4975: Journal on Constitutional Democracy
(same as HIST 4975, CNST_DEM 4975). The journal is sponsored by the Kinder Institute on Constitutional Democracy and staffed by current former participants in the institute's undergraduate Society of Fellows program. Each volume of the journal is organized around a student-selected idea or era central to the historical development and philosophical foundations of constitutional democracy in the United States. Student-authored essays address this theme via arguments and historical overviews crafted from the close reading and analysis of primary source documents, with the exception being that participating in the journal will relate back to and advance students' study of American political thought and history.
Credit Hour: 1-3

POL_SC 4985: Problems in Political Science
Independent investigation to meet needs of the individual student.
Credit Hour: 1-99
Prerequisites: instructor's consent

POL_SC 4986: Special Readings in Political Science
Independent readings selected in consultation with supervisory faculty member.
Credit Hour: 1-99
Prerequisites: instructor's consent

POL_SC 4996: Political Science Capstone, Honors
Special readings, reports in the several fields of political science. For political science Honors students.
Credit Hour: 1-6
Prerequisites: senior standing. Honors eligibility required

</table>
POL_SC 9170: Legislative Institutions
Research seminar on the U.S. Congress and legislative institutions generally. Topics include the legislative process, policy change, committees, political parties, leadership, representation, and relations with other branches of government.
Credit Hours: 3

POL_SC 9175: Evolution of American Legislatures, 1619 to the Present
Examination of the organizational evolution of American legislatures from the colonial era to the present.
Credit Hours: 3

POL_SC 9180: Executive Politics
Research seminar on the U.S. Presidency, executive decision-making and influence. Topics include presidential leadership, historical development of the presidency, presidential power, agenda-setting, governors, mayors, and influences on opinion and other branches of government.
Credit Hours: 3

POL_SC 9190: Research in American Politics
Directed research into one or more specific aspects of American Politics, behavior, and institutions.
Credit Hours: 3

POL_SC 9210: Civil Rights and Civil Liberties
Research seminar on the U.S. Constitution, civil liberties, and civil rights. Topics include the First Amendment and freedom of expression and of belief, due process, the rights of the accused, privacy, equal protection, and constitutional interpretation. Graded on A-F basis only.
Credit Hours: 3

POL_SC 9230: Public Law
Research seminar on the judicial process in the United States.
Credit Hours: 3

POL_SC 9240: Racial and Ethnic Politics
Theories, institutional processes, and behaviors pertaining to social defined racial and ethnic groups. Topics include social dominance, representation, mobilization, public opinion, and the influence of racial and ethnic factors on the American political process.
Credit Hours: 3

POL_SC 9310: Public Policy
Covers the basic theory, approaches, problems and issues relating to the scope, development and implementation of public policy.
Credit Hours: 3

POL_SC 9320: Administrative Politics
Critical examination of literature relating to selected topics in public bureaucracies.

POL_SC 9330: Research in Policy and Administration
Contemporary research in public policy, bureaucratic politics, public management and administration.
Credit Hours: 3

POL_SC 9400: Introduction to International Relations
Analysis, evaluation of some basic theories which attempt to explain international affairs.
Credit Hours: 3

POL_SC 9430: International Political Economy
Theories of political economy and current problems such as North-South relations, international trade, monetary relations, aid regimes, and international divisions of labor.
Credit Hours: 3

POL_SC 9440: Foreign Policy Analysis
Research seminar assessing foreign policy decisions and outcomes with particular attention given to decision-making. Both theoretical and empirical methods for testing foreign policy are considered. Approaches include domestic politics, bureaucratic, and psychological models.
Credit Hours: 3

POL_SC 9450: International Conflict
This is an advanced seminar in international conflict. The range of material that might be included is vast, so an effort will be made to balance overall coverage with the need to look in more depth at some especially salient areas in the literature. The seminar unfolds in five parts.
Credit Hours: 3

POL_SC 9460: Coercive Diplomacy
Research seminar on how nations apply political and economic sanctions on other nations in order to compel or entice changes in foreign policy and/or government behavior. How threats (short of conflict) and incentives govern international relations.
Credit Hours: 3

POL_SC 9470: Theories of Civil War
Seminar on why groups may engage in violence against the state or other opposition groups. Topics include causes of civil wars, terrorism as a strategy of violence and possible solutions including third part security, partition, intervention, power sharing and treaty design. Graded on A-F basis only.
Credit Hours: 3

POL_SC 9480: Human Security
Seminar on cross-national civil, political, economic, social, and cultural rights. The determinants of human security issues and the efficacy and dynamics of efforts from intergovernmental organizations, foreign aid, peacekeeping, interventions, and treaties on human rights.
Credit Hours: 3
POL_SC 9490: Selected Themes in International Relations
Graduate seminar in International Relations. Variable content. May be repeated for credit.
Credit Hours: 3

POL_SC 9550: Strategic Studies
This graduate seminar analyzes important theories regarding strategic studies. The course explores topics such as war outcomes, military effectiveness, military history, military strategy, civil-military relations, counterinsurgency, military innovation, and air warfare. Graded on A-F basis only.
Credit Hours: 3

POL_SC 9600: Introduction to Comparative Politics
Study of theories and approaches to comparative politics in Europe, Asia and/or Latin America.
Credit Hours: 3

POL_SC 9610: Latin American Politics
Research seminar on politics and government in Central and South America. Topics include modernization and dependency theories, civil-military relations, economics adjustment, democratic transitions, and area and country studies.
Credit Hours: 3

POL_SC 9645: China and Political Science Research
This is a graduate-level seminar on Chinese politics and foreign policy since 1949 covering the key historical events in Chinese political development and foreign policy. These events and developments will be examined in light of major theories in and methodological approaches adopted by the subfields of comparative politics and international relations, with the goal of exploring the strengths and weaknesses of alternative perspectives. At the end of the course, students should be familiar with the key debates and questions in the study of Chinese politics and foreign policy, and have a better sense of how to research questions on these topics. The course is also intended to encourage a dialogue between the study of China and the broader fields of comparative politics and international relations. Thus by the end of the course, students should have a sense not only for how the study of Chinese politics and foreign policy applies broader CP/IR theories to explain key patterns and events in China, but also gain insight into the question of what China as a case (or cases) can contribute back to major theories and debates in these fields.
Credit Hours: 3
Prerequisites: POL_SC 9600

POL_SC 9690: Democracy and Dictatorship
Research seminar on comparative politics of authoritarian and democratic regimes. Topics include characteristics and durability of authoritarianism, political institutions under autocracy, tactics of rule, state-society relations, transition and breakdown of regimes.
Credit Hours: 3

POL_SC 9710: Comparative Political Economy
Interdisciplinary, comparative analysis of political aspects of political economy, rural development, and related issues.
Credit Hours: 3

POL_SC 9720: Comparative Political Institutions
Research seminar on comparative political institutions. Debates in comparative politics on the influence of rules and institutions on political decisions in developed democracies. Topics include political parties, legislatures, governments, and electoral rules.
Credit Hours: 3

POL_SC 9730: Comparative Elections and Voting Behavior
This is a graduate level seminar in comparative political behavior. We will discuss a variety of topics dealing with comparative political behavior, such as the formation of partisan identification, public opinion formation, the decision to vote, organize and protest, and how foreign and domestic policy influence elections. The readings will introduce you to the various methodological techniques—including case studies, quantitative analysis, and agent-based modeling—used to test the empirical expectations of these theories. The goal of this course is to provide a solid foundation upon which you can build for comprehensive examinations. Graded on A-F basis only.
Credit Hours: 3

POL_SC 9790: Seminar in Comparative Politics
Comparative study of selected aspects of political systems. Variable content. May be repeated for credit.
Credit Hours: 3

POL_SC 9970: Independent Readings for Ph.D. Comprehensive Examinations
Graded on S/U basis only.
Credit Hour: 1-9

Portuguese (PORT)

PORT 1100: Elementary Portuguese I
This is the first course in the three-part elementary Portuguese-language sequence. The focus is on building common vocabulary and learning basic verb tenses and syntax, as well as other grammar basics such as noun/adjective number and gender, adverbs, and preposition usage. Students gain practice with Brazilian Portuguese through written and oral homework assignments, and in-class structured conversation and discussion of texts, videos, music and additional cultural materials related to Brazilian and other Lusophone cultures. Audio and video recordings provide ample exposure to a variety of native speakers of Brazilian Portuguese, and to a lesser extent of European Portuguese.
Credit Hours: 3

PORT 1200: Elementary Portuguese II
This is the second course in the three-part elementary Portuguese-language sequence. The focus is on increasing vocabulary (including common idiomatic expressions) and reviewing basic verb tenses and
syntax. The course also includes further study of key grammatical concepts such as irregular and reflexive verbs, progressive and past tenses, the imperative, and pronoun usage. Students gain practice with Brazilian Portuguese through written and oral homework assignments, as well as in-class structured conversation and discussion of texts, videos, music and other cultural materials related to Brazilian and additional Lusophone cultures. Audio and video recordings provide ample exposure to a variety of native speakers of Brazilian Portuguese, and to a lesser extent of European Portuguese.

**Credit Hours:** 4  
**Prerequisites:** Grade in the C range or better in PORT 1100 or its equivalent

Psychiatry (PSCHTY)
PSCHTY 6005: Psychiatry Clerkship
Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings and on consultation services.
Credit Hours: 6

PSCHTY 6015: Rural Psychiatry Clerkship
Rural Psychiatry Clerkship
Credit Hours: 6

PSCHTY 6025: Springfield Psychiatry Clerkship
Students see patients with psychiatric disorders in the outpatient clinics, in hospital settings and on consultation services.
Credit Hours: 8
Prerequisites: successful completion of the first two years of medical school

PSCHTY 6105: Remediation Psychiatry Clerkship
Enrolled students are those who received an unsatisfactory grade in a Psychiatry Clerkship at any Mizzou Med location or site. This course gives the student an opportunity to rectify their deficiency.
Credit Hours: 6
Prerequisites: PSCHTY 6005 Psychiatry Clerkship, received unsatisfactory grade

PSCHTY 6363: ABS Psychiatry Research
ABS Psychiatry Research
Credit Hour: 5-10

PSCHTY 6630: Narrative Med and the Meaningful Life
The 4th year medical student will attend didactics and participate in discussions. They will complete suggested readings (short stories, poems and essays), assessments and writing assignments/projects. May be repeated for credit.
Credit Hours: 5
Prerequisites: 4th year medical student, all core clerkships

PSCHTY 6731: Psychiatry Rural Elective
The 4th year medical student will participate in the evaluation of adult psychiatric patients and child psychiatric patients in a clinical setting.
Credit Hours: 5
Prerequisites: PSCHTY 6005; restricted to 4th year medical students

PSCHTY 6835: Psychiatry Outpatient Clinic
Psychiatry Outpatient Clinic
Credit Hours: 5

PSCHTY 6836: Psychiatry Adult Inpatient Service
Psychiatry Adult Inpatient Service
Credit Hours: 5

PSCHTY 6837: Psychosomatic Medicine
Psychosomatic Medicine

Credit Hours: 5

PSCHTY 6838: Forensic Psychiatry
Forensic Psychiatry
Credit Hours: 5

PSCHTY 6839: Child/Adolescent Psychiatry
Child/Adolescent Psychiatry
Credit Hours: 5

PSCHTY 6840: Geriatric Psychiatry
Geriatric Psychiatry
Credit Hours: 5

PSCHTY 6939: Two Week - Psychiatry Adult Inpatient Service
The student will work as a member of an inpatient multidisciplinary team and participate in the evaluation and treatment of adults on an acute care inpatient psychiatry service at MUPC. Typical activities include following several patients, observing and conducting psychiatric evaluation, collecting collateral information, reviewing medical records, participation in staffings, rounds and therapeutic groups and documentation in the medical record.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

PSCHTY 6940: Two Week - Child and Adolescent Psychiatry
The student will work as a member of an inpatient multidisciplinary team and participate in the evaluation and treatment of children and adolescents on an acute care child inpatient psychiatry service at MUPC. Typical activities include following several patients, observing and conducting psychiatric evaluation, collecting collateral information, reviewing medical records, participation in staffings, rounds and therapeutic groups and documentation in the medical record.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

PSCHTY 6941: Two Week - Psychiatry Consultation and Liaison
Students will participate in the psychiatric consultation process for medical rehabilitation, medical and surgical inpatients. The types of patients seen present with a wide spectrum of psychiatric conditions such as depression, substance abuse, anxiety disorders, delirium, dementia, somatoform disorders, personality disorders, psychotic disorders and organic behavior/mood disorders. Typical duties include bedside evaluation in collaboration with attendings and residents, documentation and presentation of findings and recommendations and participation in rounds.
Credit Hours: 2
Prerequisites: Successful completion of the first two years of medical school

Psychology (PSYCH)
PSYCH 1000: General Psychology
Survey of theories, principles, and methods in the study of human behavior.
Credit Hours: 3
PSYCH 1000 - MOTR PSYC 100: General Psychology

PSYCH 1000H: General Psychology - Honors
Survey of theories, principles, and methods in the study of human behavior.
Credit Hours: 3
Prerequisites: Honors eligibility required

PSYCH 1003H: Topics in Psychology - Honors - Behavioral Science
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.
Credit Hour: 1-3
Prerequisites: Honors eligibility required. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 2001: Topics in Psychology-General
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department.
Credit Hour: 1-99
Prerequisites: May be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2003: Topics in Psychology-Behavioral Science
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.
Credit Hour: 1-99
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2110: Learning, Memory, and Cognition
Students will gain an understanding of the fundamental principles of learning, memory and cognition, and will be able to recognize important historical figures and their contributions. Students will also learn how the principles can be applied to their everyday lives.
Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2210: Mind, Brain, and Behavior
Introduction to the structures and processes of the mind and the nervous system, including the psychobiology of eating, sleeping, emotion, stress and learning. No credit if taken after PSYCH 4210.
Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2220: Drugs and Behavior
Basic principles of drug action on the nervous system; the effects of important psychoactive drugs; drug use and society.
Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2310: Social Psychology
An introduction to how people's thoughts, feelings and behaviors are influenced by the actual or imagined thoughts, feelings and behaviors of others.
Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2320: Introduction to Personality
Personality is the scientific study of individual differences (e.g., traits, motives, abilities). This course reviews historical theoretical perspectives as well as current research. Students will have an opportunity to learn about on their own motives and traits.
Credit Hours: 3
Prerequisites: This course may be restricted to undergraduate psychology majors during Early Registration
Recommended: PSYCH 1000

PSYCH 2410: Developmental Psychology
Origins and development of child behavior, emphasizing basic physical, cognitive, affective and social processes, and theory and research rather than application or guidance. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 2420 or H_D_FS 3420 or ESC_PS 2500.
Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000
PSYCH 2410H: Developmental Psychology - Honors
Origins and development of child behavior, emphasizing basic physical, cognitive, affective and social processes, and theory and research rather than application or guidance. Cannot receive credit for more than one of the following: PSYCH 2410, H_D_FS 2420 or H_D_FS 3420 or ESC_PS 2500.

Credit Hours: 3
Prerequisites: Honors eligibility required. This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

---

PSYCH 2510: Survey of Abnormal Psychology
Basic survey of maladaptive human behavior and experience, including personality disorders, alcohol and drug abuse, anxiety and mood disorders, sexual dysfunctions, and thought disorders.

Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

---

PSYCH 2810: Human Sexuality
Survey of research on sexual behavior including sex norms, gender identity, sexual dysfunctions, sexual deviation, homosexuality, and legal aspects of sexual behavior. Attendance at small group discussions may be required at the option of the instructor.

Credit Hours: 3
Prerequisites: This course may be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

---

PSYCH 2820: Minds, Brains, and Machines
(same as LINGST 2820 and PHIL 2820). Cognitive science is a many-splendored thing. It draws on a variety of disciplines, including psychology, neuroscience, computer science, linguistics, anthropology, and philosophy. The purpose of this course is to introduce the central questions of cognitive science, the conceptual and empirical tools used to investigate those questions, and some of the answers that have emerged so far. After an initial overview of the foundations of the cognitive-scientific enterprise as a whole, we will see what particular sectors of it have to say about mental capacities such as language, categorization, reasoning, social cognition, and consciousness.

Credit Hours: 3
Prerequisites: sophomore standing required. May be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

---

PSYCH 2830: Human-Companion Animal Interaction
Exploration of historical and theoretical bases of human-companion animal interaction (HAI), the nature issues, and clinical applications of HAI. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: May be restricted to Undergraduate Psychology Majors during Early Registration
Recommended: PSYCH 1000

---

PSYCH 2950: Special Problems in Psychology
Research apprenticeship with a faculty member, assisting a faculty member in the development and execution of research. May be repeated to 6 hours maximum.

Credit Hour: 1-99
Prerequisites: instructor's consent
Recommended: PSYCH 1000

---

PSYCH 3003: Topics in Psychology-Behavioral Science
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

PSYCH 3003H: Topics in Psychology-Behavioral Science
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department. Honors eligibility required

---

PSYCH 3003W: Topics in Psychology-Behavioral Science - Writing Intensive
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.

Credit Hour: 1-99
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

PSYCH 3010: Research Methods in Psychology I
Introduction to scientific reasoning, assessing validity and reliability in research, and basic research methods.

Credit Hours: 3
Prerequisites or Corequisites: concurrent enrollment in STAT 1200 or a grade of C or better in STAT 1200 (or its equivalent)
Prerequisites: PSYCH 1000. This course is restricted to psychology majors with sophomore standing and above

---

PSYCH 3020: Research Methods in Psychology II
Continuation of PSYCH 3010 and required for all further labs in psychology.

Credit Hours: 3
Prerequisites: MATH 1100 with a grade of C- or better or exemption, and PSYCH 1000, and a grade of C or better in PSYCH 3010 and STAT 1200 or exemption. This course is restricted to junior and senior psychology majors
PSYCH 3110: Theories of Learning
Discusses classical issues and theories in learning and conditioning, and considers them in contemporary form.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3110W: Theories of Learning - Writing Intensive
Discusses classical issues and theories in learning and conditioning, and considers them in contemporary form.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3140: Cognitive Psychology
A survey of psychological theory and research on human cognition.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3150: Human Memory
Surveys research on human memory, including basic laboratory studies with normal subjects as well as research on amnesia and other memory impairments, life-span memory development, and the cognitive neuroscience of memory.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3160: Perception and Thought
Covers research on various aspects of mental life: language, problem-solving, decision-making, sensory perception.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3170: Intergroup Relations
Provides an overview of the social psychological literature on stereotyping, prejudice, discrimination, and intergroup relations. Students learn theoretical frameworks and research findings regarding the development and maintenance of intergroup conflict.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3180: Positive Psychology
This course introduces students to the science of positive psychology, including its origin and the historical imbalances it addresses within the broader field of psychology. A wide variety of topics are covered, including happiness, materialism, purpose, flow, courage, humility, positive emotions, curiosity, mindfulness, savoring, gratitude, forgiveness, personal strengths, resilience, and compassion. Psychology majors cannot receive credit for both PSYCH 3350 and ESC_PS 4200.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3370: The Science of Mindfulness
To gain breadth and depth in understanding the empirical research on mindfulness and contemplative practices. To do well in the course, students must master the substantive content, psychological methodology, APA-style writing, peer-review, and presentation skills. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000 and a grade of C or better in PSYCH 3010. This course may be restricted to psychology majors through early registration

PSYCH 3370W: The Science of Mindfulness - Writing Intensive
To gain breadth and depth in understanding the empirical research on mindfulness and contemplative practices. To do well in the course, students must master the substantive content, psychological methodology, APA-style writing, peer-review, and presentation skills. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000 and a grade of C or better in PSYCH 3010. This course may be restricted to psychology majors through early registration

PSYCH 3420: Cognitive Development in Childhood
Theories and research on cognitive development in childhood.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3430: Social Development in Childhood
Overview of children's social and emotional development (infancy-adolescence), includes changes in social domains, impact of social functioning on subsequent development, and influence of interpersonal contexts (e.g., family, peers, community) on children's development.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3430W: Social Development in Childhood - Writing Intensive
Overview of children's social and emotional development (infancy-adolescence), includes changes in social domains, impact of social functioning on subsequent development, and influence of interpersonal contexts (e.g., family, peers, community) on children's development.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3440: Women's Professional Development
This class takes a lifespan developmental perspective in regards to understanding challenges in women's professional development. Topics include: perceptions and stereotypes of successful women, division of labor in families (housework versus paid work), motherhood and the work place, social policies for working parents, girls' and boys' interests...
in STEM professions, and gender and workplace economics (starting salaries, negotiation, the gender pay gap). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to undergraduate psychology majors through early registration

PSYCH 3440H: Women's Professional Development - Honors
This class takes a lifespan developmental perspective in regards to understanding challenges in women's professional development. Topics include: perceptions and stereotypes of successful women, division of labor in families (housework versus paid work), motherhood and the workplace, social policies for working parents, girls' and boys' interests in STEM professions, and gender and workplace economics (starting salaries, negotiation, the gender pay gap). Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000; Honors eligibility required. This course may be restricted to undergraduate psychology majors through early registration

PSYCH 3510: Introduction to Clinical Psychology
Comprehensive survey of the field's historical roots, research methods, concepts of abnormality, assessment and intervention methods; also specialties that constitute clinical psychology.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3510W: Introduction to Clinical Psychology - Writing Intensive
Comprehensive survey of the field's historical roots, research methods, concepts of abnormality, assessment and intervention methods; also specialties that constitute clinical psychology.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3815: Cross-Cultural Psychology
We will adopt a psychological approach to the study of the cross-cultural experience. We will spend our time investigating how culture affects and determines human, behavior, thoughts, emotions and interactions with others.

Credit Hours: 3
Prerequisites: PSYCH 1000

PSYCH 3815H: Cross-Cultural Psychology - Honors
We will adopt a psychological approach to the study of the cross-cultural experience. We will spend our time investigating how culture affects and determines human, behavior, thoughts, emotions and interactions with others.

Credit Hours: 3
Prerequisites: PSYCH 1000; Honors eligibility required

PSYCH 3825: Psychology at the Movies
We will watch, discuss, and interpret films from a psychological-social perspective. Connections will be made between cinematic content and contemporary theory and research in psychology and diversity studies. The focus of this course will be on watching and discussing films, as well as on reading and writing about psychological aspects of film.

Credit Hours: 3
Prerequisites: PSYCH 1000

PSYCH 3825H: Psychology at the Movies - Honors
We will watch, discuss, and interpret films from a psychological-social perspective. Connections will be made between cinematic content and contemporary theory and research in psychology and diversity studies. The focus of this course will be on watching and discussing films, as well as on reading and writing about psychological aspects of film. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000; Honors eligibility required

PSYCH 3830: Health Psychology
A hands-on approach to the study of health psychology including research on a topic of current relevance to the field.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3840: Individual Differences
Surveys individual and group differences. Contributions of various factors to variations in behavior.

Credit Hours: 3
Prerequisites: PSYCH 1000

PSYCH 3860: Law and Psychological Science
This survey course examines the interactions of law and psychology across the justice system. Emphasis is placed on how psychological research does (and does not) inform important legal issues. Requirements may include an in-class team debate of relevant controversy in law.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 3870: Sleep and Sleep Disorders
This course provides a critical review of the current research on both normal sleep and sleep disorders.

Credit Hours: 3

PSYCH 3880: African-American Psychology
(Same as BL_STU 3100 and ESC_PS 3100). The research, theories and paradigms developed to understand the attitudes, behaviors and psychosocial realities of African-Americans are discussed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors through Early Registration
PSYCH 4001: Topics in Psychology-General
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course may not be used toward behavioral science distribution credit. Repeatable upon consent of department. Enrollment limited to students who have completed PSYCH 1000.
Credit Hour: 1-99
Prerequisites: instructor's consent

PSYCH 4003: Topics in Psychology-Behavioral Science
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.
Credit Hour: 1-99
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4003W: Topics in Psychology-Behavioral Science - Writing Intensive
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester. This course carries behavioral science distribution credit for non-psychology majors. Repeatable upon consent of department.
Credit Hour: 1-6
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4010H: Topics in Psychology Capstone - Honors
Students review, evaluate and conduct research on selected topics in psychology. The particular topic will vary by semester and instructor. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent required, honors eligibility required

PSYCH 4010HW: Topics in Psychology Capstone - Honors/Writing Intensive
Students review, evaluate and conduct research on selected topics in psychology. The particular topic will vary by semester and instructor. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent required, honors eligibility required

PSYCH 4010W: Topics in Psychology Capstone - Writing Intensive
Students review, evaluate and conduct research on selected topics in psychology. The particular topic will vary by semester and instructor. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor's consent required

PSYCH 4110: Perception
Data and contemporary theories of perception in all of the senses, with emphasis on visual and auditory perception.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4200: Social Cognition
The overarching goal of this course is to provide an overview of current research and theory in social cognition. If there is a running theme to this course, it is in the use of “top down” processes in how we construct an understanding of the world around us. That is, we use our past experiences and memories to interpret new experiences, people and behavior. This fact does not dictate whether that understanding is accurate or not. However, social psychologists have historically been interested in the ways that this process leads to errors or biases in a vast array of human endeavors. This perspective has had a strong impact on the trajectory of social cognition. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PSYCH 2210 and PSYCH 4210

PSYCH 4210: Physiological Psychology
An introduction to neuroscience with an overview of the relation between the brain and behavior. Topics include intercellular communication, drugs and reward, emotions and stress psychoimmunology, psychopathology, nervous system development and repair, perception, cognition, learning and memory.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4220: Animal Behavior and Cognition
The purpose of this course is to introduce the basic findings, concepts and principles of animal behavior, associative learning, memory and cognition.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4230: Cognitive Neuroscience
The neural basis of human information processing in memory, attention, perception, imagery, movement, and language.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4240: Cognitive Neuroscience
The neural basis of human information processing in memory, attention, perception, imagery, movement, and language.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4240: Cognitive Neuroscience
The neural basis of human information processing in memory, attention, perception, imagery, movement, and language.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4240: Cognitive Neuroscience
The neural basis of human information processing in memory, attention, perception, imagery, movement, and language.
Credit Hours: 3
Prerequisites: PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

PSYCH 4360: Social Cognition
The overarching goal of this course is to provide an overview of current research and theory in social cognition. If there is a running theme to this course, it is in the use of “top down” processes in how we construct an understanding of the world around us. That is, we use our past experiences and memories to interpret new experiences, people and behavior. This fact does not dictate whether that understanding is accurate or not. However, social psychologists have historically been interested in the ways that this process leads to errors or biases in a vast array of human endeavors. This perspective has had a strong impact on the trajectory of social cognition. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PSYCH 2210 and PSYCH 4210

PSYCH 4440: Sex Differences
This course covers the evolution of sex differences and hormonal and environmental influences on their expressions in nonhuman species. These insights are used to understand human sex differences in mate choices, emotions, development, brain and cognition, and in modern societies.
Credit Hours: 3
**Prerequisites:** PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

**PSYCH 4520: Behavior Genetics**
(cross-leveled with PSYCH 7520). The study of genetic influences on behavioral traits such as mood, personality, intelligence, mental health, or activity level.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000; This course may be restricted to Undergraduate Psychology Majors during Early Registration

**Recommended:** Grade of C or better in PSYCH 3010 and STAT 1200 or higher

---

**PSYCH 4530: Research in Psychopathology**
Intensive survey and evaluation of the psychological literature on abnormal behavior, emphasizes experimental and explanatory approaches.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

**PSYCH 4540: Emotional Disorders in Childhood and Adolescence**
Surveys disturbed behavioral development during childhood and adolescence, emphasizing factors that produce deviation from normal developmental patterns.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

**Recommended:** PSYCH 2410

---

**PSYCH 4560: Schizophrenia**
This course will examine one of the most severe, debilitating, and complex mental disorders. We will review the major symptoms and clinical features of schizophrenia, explore possible causes of Psychosis disorder, and critically assess treatments for the disorder.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

**PSYCH 4561: Psychosis and the Brain**
The goal of this course is to better understand the nature of psychosis that occurs in psychotic disorders such as Schizophrenia and in many other disorders/conditions. The course will take a translational approach to understanding psychosis, focusing on neural mechanisms and their role in behavior. The nature of psychotic symptoms in psychotic disorders, in non-psychotic disorders and in the general population will be examined. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**PSYCH 4570: Pediatric Neuropsychology**
Introduction to the field of pediatric neuropsychology and the study of individuals with early brain dysfunction. Common central nervous system disorders of childhood (e.g. autism, ADHD, epilepsy) will be discussed.

**Credit Hours:** 3

---

**PSYCH 4580: Externalizing Spectrum Disorders**
The purpose of this course is to provide an overview of the symptoms, etiology, and treatment of psychiatric disorders that fall within the externalizing spectrum, including Attention-Deficit Hyperactivity Disorder, Oppositional Defiant Disorder, Conduct Disorder, Alcohol and other Substance Use Disorders, and Antisocial Personality Disorder. This course will attempt to provide an overview of key issues and topics related to the classification of psychiatric disorders and how research in this area has led to current conceptualizations of the externalizing spectrum. Graded on A-F basis only.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000. This course may be restricted to Undergraduate Psychology Majors during Early Registration

---

**PSYCH 4830: Psychology of Women**
Overview of current theories and research relating to the psychology of women. Topics include gender stereotyping, psychological sex differences, achievement motivation in women, and women and mental health.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**PSYCH 4840: The History of Psychology**
Historical foundations of contemporary psychology.

**Credit Hours:** 3

**Prerequisites:** PSYCH 1000

---

**PSYCH 4940: Internship in Psychology**
Work experience in an organization that is relevant to the psychology major. Enrollment limited to students who are in good standing and have completed 9 credit hours in psychology. Intended for students with junior or senior standing.

**Credit Hour:** 3-6

**Prerequisites:** Instructor's consent required

---

**PSYCH 4940W: Internship in Psychology - Writing Intensive**
Work experience in an organization that is relevant to the psychology major. Enrollment limited to students who are in good standing and have completed 9 credit hours in psychology. Intended for students with junior or senior standing.

**Credit Hour:** 3-6

**Prerequisites:** Instructor's consent required

---

**PSYCH 4950: Special Problems in Psychology**
Independent investigation leading to a project or paper. Repeatable upon consent of department.

**Credit Hour:** 1-99

**Prerequisites:** Instructor's consent
PSYCH 4960: Special Readings in Psychology
Independent readings selected in consultation with supervisory faculty member. Repeatable upon consent of department.

Credit Hours: 1-99
Prerequisites: instructor's consent

PSYCH 4971: Developmental Psychology Capstone
Introduces students to developmental research methods through relevant readings and by students conducting original research. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: consent required

PSYCH 4971W: Developmental Psychology Capstone - Writing Intensive
Introduces students to developmental research methods through relevant readings and by students conducting original research. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: consent required

PSYCH 4972: Animal Learning Capstone
Survey of principles of animal behavior and animal learning and cognition. The course includes laboratory projects on research in animal behavior and animal learning. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: Department consent required

PSYCH 4972W: Animal Learning Capstone - Writing Intensive
Survey of principles of animal behavior and animal learning and cognition. The course includes laboratory projects on research in animal behavior and animal learning. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: consent required

PSYCH 4973: Human Cognition Capstone
Students review, evaluate and conduct research on various aspects of human cognition. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: Department consent required

PSYCH 4973W: Human Cognition Capstone - Writing Intensive
Students review, evaluate and conduct research on various aspects of human cognition. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: consent required

PSYCH 4974W: The Human Senses Capstone - Writing Intensive
Psychophysical data, sense organs, psychological attributes, and theories of vision, hearing, and the vestibular (motion) senses. Elementary aspects of psychophysics.

Credit Hours: 3
Prerequisites: grade of C better in PSYCH 3020. This course is restricted to psychology majors with senior standing. Consent required

PSYCH 4975: Social/Personality Capstone
Experimental methods course emphasizing research in social psychology. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: Consent required

PSYCH 4975W: Social/Personality Capstone - Writing Intensive
Experimental methods course emphasizing research in social psychology. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.

Credit Hours: 3
Prerequisites: Consent required

PSYCH 4976: Independent Research Capstone I
Individual thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (with PSYCH 4977) and presented as posters in a spring conference. Weekly class discussions of student progress. For students who plan to pursue a PhD in Psychology or Neuroscience. Enrollment limited to psychology majors with senior standing who have taken PSYCH 3020.

Credit Hours: 3
Prerequisites: Consent required

PSYCH 4976H: Honors Research Capstone I
Individual thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (with PSYCH 4977H) and presented as posters in a spring conference. Weekly class discussions of student progress. For students who plan to pursue a PhD in Psychology or Neuroscience. Enrollment limited to psychology majors with senior standing, honors eligibility, a cumulative GPA of 3.5, who have taken PSYCH 3020.

Credit Hours: 3
Prerequisites: Consent required

PSYCH 4976HW: Honors Research Capstone I - Honors/Writing Intensive
Individual thesis on a topic selected with a faculty advisor. Student projects are carried out over the course of two semesters (with PSYCH 4977HW) and presented as posters in a spring conference. Weekly class discussions of student progress. For students who plan to pursue a PhD in Psychology or Neuroscience. Enrollment limited to psychology majors with senior standing, honors eligibility, a cumulative GPA of 3.5, who have taken PSYCH 3020.

Credit Hours: 3

</table>
PSYCH 4982W: Advanced Developmental Psychology II - Writing Intensive
Students conduct a research project involving observations of preschool children. The course teaches skills needed to collect data, analyze data, and write a research report. These skills provide excellent preparation for graduate school in psychology or a related field. Graded on A-F basis only. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.
Credit Hours: 3
Prerequisites: Departmental consent required

PSYCH 4983W: Consumer Psychology Capstone - Writing Intensive
This course examines numerous social and psychological issues related to the area of consumer psychology. The course begins by examining how media exposure influences consumption, prejudice in marketing and advertising, and the question of whether children should be targets of marketing strategies. The second section examines how consumption can be influenced by unconscious and automatic factors. The third section examines unhealthy forms of consumption and consumption's relationship to well being. The fourth section focuses on ethical and social responsibility issues like consumption's impact on the environment and the voluntary simplicity movement. The last section of the course is devoted to student presentations of term papers. Graded on A-F basis only. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.
Credit Hours: 3
Prerequisites: Consent required

PSYCH 4984W: Promoting Social Justice, Diversity, and Inclusion Capstone - Writing Intensive
This course is an advanced exploration of diversity and social justice in the United States and provides students with a framework for understanding specific forms and the interlocking systems of oppression; a process to explore how oppression affects our lives; a pedagogical framework for teaching and training about concepts of oppression and diversity; and an application of these ideologies and skills in community settings. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Department consent required

PSYCH 4985: Health Psychology Capstone
The objectives of this course are to understand the psychosocial processes that influence health and health care delivery. Topics to be examined are the psychophysiological and sociocultural bases of health and illness; pain and healing; adaptation to chronic illness; stress; personality and illness; death, dying, and grief; substance use; health-promoting behaviors; patient adherence; physician-patient communication; and using health care. Graded on A-F only. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020.
Credit Hours: 3
Prerequisites: Department consent required

PSYCH 4986: Perception and Action Capstone
Together we will explore how the brain creates our conscious experience of, and controls our actions in, the world. A variety of weekly assignments will challenge you to improve your written communication skills. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Departmental consent required

PSYCH 4986W: Perception and Action Capstone - Writing Intensive
together we will explore how the brain creates our conscious experience of, and controls our actions in, the world. A variety of weekly assignments will challenge you to improve your written communication skills. Enrollment limited to psychology majors with senior standing who have a grade of C or better in PSYCH 3020. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Departmental consent required

PSYCH 4987: Cross-Cultural Psychology Capstone
This course adopts a psychological approach to the study of the cross-cultural experience. It will investigate how culture affects and determines human behavior, thoughts, emotions, and interactions. Graded on A-F basis only. Enrollment is limited to senior Psychology majors who have completed PSYCH 1000; PSYCH 3020 with a grade of C or better.
Credit Hours: 3
Prerequisites: departmental consent

PSYCH 4987H: Cross-Cultural Psychology Capstone - Honors
This course will adopt a psychological approach to the study of the cross-cultural experience. It will investigate how culture affects and determines human behavior, thoughts, emotions, and interactions with others. Students will be part of public scholarship and have opportunities for public presentations of projects. Graded on A-F basis only. Enrollment is limited to senior Psychology majors who have completed PSYCH 1000; PSYCH 3020 with a grade of C or better; honors eligibility required.
Credit Hours: 3
Prerequisites: departmental consent

PSYCH 4987W: Cross-Cultural Psychology Capstone - Writing Intensive
This course adopts a psychological approach to the study of the cross-cultural experience. It will investigate how culture affects and determines human behavior, thoughts, emotions, and interactions. Graded on A-F basis only. Enrollment is limited to senior Psychology majors who have completed PSYCH 1000; PSYCH 3020 with a grade of C or better.
Credit Hours: 3
Prerequisites: departmental consent

PSYCH 4988: Medical Decision Making Capstone
Students will learn how patients make decisions about their own healthcare and how doctors make diagnostic and treatment decisions for their patients. Enrollment is limited to senior Psychology majors who have completed PSYCH 1000; PSYCH 3020 with a grade of C or better. Graded on A-F basis only.
Credit Hours: 3

</tbody>
</table>
PSYCH 8620: Personality Psychology
Graduate-level introduction to the field of personality psychology, including readings and discussion of both classic and contemporary works.

Credit Hours: 3
Prerequisites: instructor's consent

PSYCH 8710: General Linear Models in Psychology I
Principles of interval estimation and hypothesis testing, scalar and matrix forms of simple and multiple regression with continuous and categorical predictors, regression diagnostics.

Credit Hours: 4
Prerequisites: undergraduate course in statistics; concurrent enrollment in PSYCH 8730; instructor's consent

PSYCH 8720: General Linear Models in Psychology II
Complex analysis of variance; experimental design.

Credit Hours: 4
Prerequisites: PSYCH 8710 or equivalent, concurrent enrollment in PSYCH 8730; instructor's consent

PSYCH 8730: Statistical Software Packages
Computer implementation of data management and statistical analysis. Covers elementary computer operations, data entry and quality control, and computer implementation of statistical models covered in PSYCH 8710 and PSYCH 8720.

Credit Hour: 1
Prerequisites: instructor's consent

PSYCH 8910: Responsible Conduct of Research
This course exposes students to important concepts in the responsible conduct of research. Graded on A-F basis only.

Credit Hour: 1

PSYCH 8920: Social and Behavioral Sciences in Public Health
(same as P_HLTH 8920). This course will take both a theoretical and a practical approach to understanding health-related behavior and the field of public health. Students will gain an understanding of theory and empirical research in the social and behavioral sciences, as well as developing practical skills in critically evaluating research and in applying scientific evidence to address real world health concerns.

Credit Hours: 3

PSYCH 9001: Topics in Psychology-General
Organized study of selected topics in psychology. Particular topic and earnable credit may vary by semester.

Credit Hour: 1-99
Prerequisites: instructor's consent, departmental consent for repetition

PSYCH 9050: Research in Psychology - Non-Dissertation
Research in Psychology not leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

PSYCH 9090: Research in Psychology - Dissertation
Research in Psychology leading to dissertation. Graded on S/U basis only.

Credit Hour: 1-99
Prerequisites: instructor's consent

PSYCH 9100: Studies in Experimental Psychology
Critical consideration of selected research in neuroscience and cognitive psychology.

Credit Hours: 3
Prerequisites: PSYCH 4972 or PSYCH 4973; departmental consent for repetition; instructor's consent

PSYCH 9110: Studies in Physiological Psychology
Weekly seminars given by local and regional cognitive psychologists and cognitive neuroscientists. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: PSYCH 7210, departmental consent for repetition, and instructor's consent

PSYCH 9150: Human Learning and Memory
Current theory and research in the area of human learning and memory will be investigated. A major component of the course will involve the critical review of existing literature in this area.

Credit Hours: 3

PSYCH 9210: Psychopharmacology
Basic principles of drug action on the nervous system, the theory and clinical use of the various psychotherapeutic drugs, drug abuse and its treatment.

Credit Hours: 3

PSYCH 9240: Advanced Neural Systems
The course provides in-depth coverage of the neurophysiology, neuroanatomy, and function of the brain. Course lectures and discussions cover the brain and its systems in a "bottom-up" sequence starting with basic sensory pathways and concluding with higher cognitive functions.
functions. The course also includes hands-on laboratory sessions, which include dissection component. Graded on A-F basis only.

**Credit Hours: 3**

**PSYCH 9310: Theories of Social Psychology**
Intensive review of classic and contemporary concepts and theories of social psychology; emphasizes readings from primary sources. PhD candidates only. Required for all PhD candidates in social psychology.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9320: Social Psychology Methodology**
Advanced study of experimental methods in social psychological research.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9330: Field Research Methods**
Advanced course in research methods and designs commonly used in field settings; theoretical, ethical, and pragmatic issues that arise in field settings are considered; emphasis is on learning and skill acquisition through a series of hands-on assignments.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9340: Studies in Social Psychology**
Critical coverage of selected research and theory in social psychology.

**Credit Hours: 1-99**

**Prerequisites:** instructor's consent, departmental consent for repetition

**PSYCH 9350: Seminar in Social Psychology**
Intensive review of concepts and theories of social psychology; emphasizes readings from primary sources. Ph.D. candidates only. Required for all Ph.D. candidates in social psychology program. Graded on S/U basis only.

**Credit Hours: 1**

**Prerequisites:** instructor's consent

**PSYCH 9360: Studies in Evolution and Behavior**
Reading and discussion of classic and contemporary works in evolution.

**Credit Hours: 1**

**Prerequisites:** instructor's consent

**PSYCH 9470: Women's Professional Development**
This class takes a lifespan developmental perspective in regards to understanding challenges in women's professional development. Topics include: perceptions and stereotypes of successful women, division of labor in families (housework versus paid work), motherhood and the workplace, social policies for working parents, girls' and boys' interests in STEM professions, and gender and workplace economics (starting salaries, negotiation, the gender pay gap). Graded on A-F basis only.

**Credit Hours: 3**

**Prerequisites:** Instructor Consent Required

**PSYCH 9510: Studies in Clinical Psychology**
Contemporary research and theory for advanced graduate students in clinical psychology. Graded on S/U basis only.

**Credit Hour: 1-99**

**Prerequisites:** instructor's consent, departmental consent for repetition

**PSYCH 9515: Orientations in Psychotherapy**
The introductory psychotherapy course for students in the clinical psychology doctoral program. The focus of the course is on development of knowledge and skills in the following four areas: (1) Theory and practice of contemporary (brief) psychotherapy; (2) Basic interviewing skills; (3) Psychotherapy research and empirically supported treatments; and (4) The role and impact of managed care in contemporary psychotherapy.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9520: Psychometrics**
Introduction to concepts and issues essential to psychological assessment including psychometrics, test construction, controversies in psychological testing, behavioral assessment, and structured interviewing.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9525: Orientations to Clinical Assessment**
Topics include psychometric principles, intelligence testing, objective and projective personality testing and behavioral assessment.

**Credit Hours: 3**

**Prerequisites:** PSYCH 9520 and instructor's consent

**PSYCH 9530: Clinical Child Assessment**
Introduction to clinical instruments, techniques and problems in the psychological assessment of children.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9540: Ethical and Professional Issues II**
Legal issues, state and national codes, ethical decision-making, dangerousness, ethical clinical treatment issues, mandated reporting, and ethics in specialized clinical settings. This course is the second in a sequence for clinical psychology doctoral students.

**Credit Hours: 3**

**Prerequisites:** instructor's consent

**PSYCH 9545: Clinical Practicum**
Intensive supervised training in use and interpretation of psychological techniques and in psychotherapy. Graded on S/U basis only.
PSYCH 9550: Clinical Intervention with Children
Introduction to theory, research and practice in the area of behavior change with children and adolescents.
Credit Hours: 3
Prerequisites: instructor's consent and professional liability insurance

PSYCH 9555: Educational Psychology
Focus on educational psychology, including theories of learning, instruction, assessment, and educational settings. Emphasis on application to classroom settings.
Credit Hours: 3
Prerequisites: instructor's consent and PSYCH 9500

PSYCH 9560: Family and Group Process
Theory, intervention, and research in the areas of family and group dynamics. Emphasis on family therapy approaches.
Credit Hours: 3
Prerequisites: instructor's consent

PSYCH 9575: Clinical Research Methods
Focus on research design with emphasis on active critique of methodological challenges (e.g., subject selection, control groups, multimodal measures, and treatment issues), includes lecture and active review or research.
Credit Hours: 3
Prerequisites: instructor's consent

PSYCH 9585: Introduction to Alcohol Studies
Intensive seminar on alcohol research primarily intended for alcohol research training fellows. Covers a range of topics of interest to psychologist, including pharmacology, research methods, genetics, diagnosis, expectancies, and treatment.
Credit Hours: 3
Prerequisites: instructor's consent

PSYCH 9710: Multivariate Statistics in Psychology
Multivariate statistical methods, including multivariate analysis of variance, discriminant analysis, principal component analysis, and elements of matrix algebra, as applied to problems in psychology.
Credit Hours: 3
Prerequisites: PSCYH 8710 and PSYCH 8720; instructor's consent

PSYCH 9715: Multilevel Modeling
Introduction to random coefficient multilevel modeling of clustered data. Topics include two- and three-level models, estimation techniques, computing options, model fitting issues, advanced model applications, and growth modeling.
Credit Hours: 3
Prerequisites: instructor's consent, a graduate course in regression analysis

PSYCH 9720: Latent Variable Models in Statistical Analysis
Covers Matrix Algebra fundamentals, Factor Rotation, Communality Estimation techniques, High Order and Dynamic Factor Models, Path Analysis, Use of computer programs.
Credit Hours: 3
Prerequisites: instructor's consent and PSYCH 8720

PSYCH 9735: Psychological Process Models
Examines mathematical and statistical models of cognition and perception. Emphasis on modeling basics such as estimation, hypothesis testing, and assessment of fit.
Credit Hours: 3
Prerequisites: PSYCH 8710 and PSYCH 8720 or instructor's consent

PSYCH 9750: Advanced Structural Equation Modeling
Growth Mixture Models, Dynamic Factor models, and nonlinear structural models.
Credit Hours: 3
Prerequisites: PSYCH 8710 or departmental consent

PSYCH 9755: Quantitative Psychology Seminar
Quantitative Psychology Topics Seminar. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: departmental consent required

PSYCH 9910: Teaching of Psychology Practicum
Focuses on development and enhancement of teaching skills for graduate students in psychology who are primary instructors of undergraduate psychology courses. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

PSYCH 9920: Advanced History of Psychology
Advanced course in history of psychology designed to show how general philosophical models of mind and behavior have been linked to doctrines of mental health and pathology and to theories of social behavior.
Credit Hours: 3
Prerequisites: instructor's consent

Public Affairs (PUB_AF)

PUB_AF 4001: Topics in Public Affairs
Selected topics in public affairs.
Credit Hours: 3
PUB_AF 4175: Early Childhood Policy
(cross-leveled with PUB_AF 7175). This course explores early childhood development issues and their impacts on policy formation. We will study a range of family situations in the United States and other countries (e.g., maternal employment and job policies, divorce, child abuse and neglect) that may be of concern for child policy analysts and policy makers. Additionally, we will examine the effects of different early childhood programs in the United States and other countries using both qualitative and quantitative criteria. This course is applied in focus; as such, by the end of the semester, students should expect to understand policy analysis and the trade-offs of implementing policy choices, as well as be able to apply analytical skills for early childhood and family policies. Graded on A-F basis only.

Credit Hours: 3
Recommended: undergraduate junior or senior level; instructor consent

PUB_AF 4340: Regional and Economic Development Policy
(cross-leveled with PUB_AF 7340). Presents an overview of historical perspectives and current practice in regional development policy. Topics include the major theories of economic development in the U.S., major trends affecting local economic development, local strategies for economic development, analyzing data from secondary sources, and federal strategies for economic development and regional collaboration. Graded on A-F basis only.

Credit Hours: 3
Recommended: Senior standing, instructor consent

PUB_AF 7001: Topics in Public Affairs
Select current topics in public affairs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: consent required

PUB_AF 7175: Early Childhood Policy
(cross-leveled with PUB_AF 4175). This course provides an understanding of early childhood development issues and their impact on policy formation. Will study different family situations in the US and other countries (e.g. maternal employment and job policies, divorce, child abuse and neglect) that may be a concern for child policy makers and analysis. In addition we are going to examine the effects of different early childhood programs in the US and other countries around the world. Also, US federal regulations that have an impact on child policy, such as the National Health Policy and Welfare reform will be examined. Will use both qualitative and quantitative criteria to analyze these policies. This course is applied in focus, so by the end of the semester students should be able to understand policy analysis and the trade-offs of implementing policy choices, as well as being able to develop analytical skills for early childhood and family policies in their work. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 7300: Scientific and Technological Aspects Terrorism and Counter Terrorism
(same as NU_ENG 7330). Terrorism has been a familiar tool of political conflict, and it has assumed greater importance during the past twenty years. This subject has been treated by political scientists in various forms, but the scientific and technological aspects of different forms of terrorism cannot be found in a single place. It is important for persons who propose counter measures to understand the basics of different types of terrorism such as for instance the nature of chemical agents, their properties such as toxicity, etc. in order to build better defense systems.

Credit Hours: 3

PUB_AF 7340: Regional and Economic Development Policy
(cross-leveled with PUB_AF 4340). Presents an overview of historical perspectives and current practice in regional development policy. Topics include the major theories of economic development in the U.S., major trends affecting local economic development, local strategies for economic development, analyzing data from secondary sources, and federal strategies for economic development and regional collaboration. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 7700: Social Entrepreneurship
(cross-leveled with PUB_AF 4700). This course will help illustrate social entrepreneurship in a broad sense and understand how it differs from entrepreneurship as understood in the private sector, social innovation and social enterprise. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 7810: Comparative and Global Governance
This course examines governance and the policy process at the international. Course topics include differences in political regimes, the structure and powers of institutions and the effect on quality of governance, roles of multi-national and non-governmental organizations in coordinating efforts to promote peace and security, human rights, education, health, and economic development. The course also examines the situations within the world's poorest countries and how the international community act to improve the lives of citizens. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8001: Topics in Public Affairs
Select current topics in public affairs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

PUB_AF 8085: Problems in Public Affairs
Intensive study of an area of public affairs related to the student's special interest.

Credit Hour: 1-99

PUB_AF 8150: Collaborative Governance
Political, economic, and social context of government and public service; examines theories and models of collaborative governance and implications for policy-making, public management, and public service delivery. Graded on A-F basis only.

Credit Hours: 3
PUB_AF 8160: Organizational Dynamics and Leadership
Focuses on understanding human action in administrative situations and on developing personal capacities for effective action in varied and difficult organizational situations. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8170: Public Policy Processes and Strategies
Processes through which public demands are generated, converted into public policy, and implemented. Examines the intersection of politics, policy, and management as well as the diverse strategies and tools of public action. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8171: Environmental Policy
This course is an introduction to U.S. environmental policy, focusing on important political institutions and political actors. The course provides a survey of the primary laws, regulations, and policies that comprise pollution control and natural resource management policy.

Credit Hours: 3

PUB_AF 8174: Social Policy
This seminar will examine the nature and extent of poverty in the U.S., its causes and consequences, and the antipoverty effects of existing and proposed government programs and policies.

Credit Hours: 3

PUB_AF 8177: Energy Economics
The course examines economic theory and empirical analyses of global energy supply and demand. It examines the role of non-renewable and renewable energy in the economy and trends in energy production and consumption. Graded on A-F basis only.

Credit Hours: 3

Recommended: Principles of Economics, Instructor's permission

PUB_AF 8178: Sustainable Energy Policy
This course examines the concept of sustainability as it applies to energy production and consumption, and explores policy options for achieving sustainable energy use.

Credit Hours: 3

Prerequisites: PUB_AF 8177
Recommended: Principles of Economics, Instructor's permission

PUB_AF 8180: Research Methods and Inquiry in Public Affairs I
Introduction to research methods for graduate students in public affairs. Topics include measurement, quantitative description, problem definition, the policy research process, and basic analytical tools commonly applied in public affairs. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8181: Research Methods and Inquiry in Public Affairs II
Advanced topics and applications in research methods for public affairs. Topics include: multivariate analysis and other advanced quantitative techniques; evaluation of policy research products.

Credit Hours: 3

Prerequisites: PUB_AF 8180 or permission of instructor

PUB_AF 8185: Research Methods and Inquiry in Public Affairs - Mid Career
Applications in research methods for graduate students in public affairs mid-career program. Topics include: measurement; quantitative description; problem definition; the policy research processes; basic analytical tools commonly applied in public affairs; multivariate analysis and other advanced quantitative techniques; evaluation of policy research products. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8190: Economic Analysis for Public Affairs
Application of tools of economic analysis to understand and interpret the behavior of government, consumers and producers. Sources of economic inefficiency, including market failures and limitations, and policy solutions. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8195: Economic Analysis for Public Policy - Mid Career
Application of tools of economic analysis to understand and interpret the behavior of government, consumers and producers. Sources of economic inefficiency, including market failures and limitations, and policy solutions.

Credit Hours: 3

Prerequisites: instructor's consent

PUB_AF 8210: Public Service and Democracy
This course examines some of the challenges of public service in a liberal democracy. It addresses basic questions about the design of institutions through which public power is exercised and about the ethical and administrative obligations of people who work within those institutions. The aim of the course is to provide students with tools for thinking about such questions, and practice addressing them. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8211: MPA Capstone (Applied Project)
Application of concepts and methods of public affairs to actual policy or management problems. Diagnosis of problem or decision situation, collection of relevant data, development of alternative solutions, recommendations of proposed course of action.

Credit Hours: 3

PUB_AF 8280: Public Affairs Internship
Gives students an opportunity to gain experience in government operations by providing supervised work with an agency at the local, state, or federal level of government or in nonprofit agencies. Graded on A-F basis.

Credit Hours: 3

PUB_AF 8282: Practicum in Public Affairs
Supervised field experience in an approved community, public agency, or nonprofit organizations. Opportunity for observation and participation under the guidance of a qualified advisor. Formal study of advanced
theories and techniques is integrated into the student's experience. Graded on A-F basis only.

**Credit Hours:** 3-6  
**Prerequisites:** advanced standing and instructor's consent required

**PUB_AF 8320: Spatial Analysis for Public Affairs**  
Examines theoretical and empirical issues related to the spatial analysis of economic activity and local public issues. Major topics include the role of the public sector, the economics of public services, social accounting matrices, input-output analysis, econometric models of regional economies, and geographic information systems. Graded on A-F basis only.

**Credit Hours:** 3

**PUB_AF 8350: Regional Development Issues and Analysis**  
(same as AAE 8350). Examines theories of regional growth and development and methods for analysis with applications to current policy issues. Topics include firm location, new economic geography and agglomeration theory, clusters, human capital, migration, social capital, tax and development incentives, and sustainable regional development. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** ECONOM 7351 or PUB_AF 8190 or equivalent

**PUB_AF 8420: Public Program Evaluation**  
Covers implementation and outcome evaluation models, research design strategies, and data collection methods used to assess the effectiveness of public programs and means of their improvement. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** PUB_AF 8181 or equivalent

**PUB_AF 8430: Public Policy Analysis**  
Uses economic logic and statistical techniques to design, analyze and evaluate public policy. Applies social choice theory, cost/benefit analysis, forecasting, regression analysis, trend analysis, time series methods, and other analytic techniques to policy decision. Graded on A-F basis.

**Credit Hours:** 3  
**Prerequisites:** PUB_AF 8181 and PUB_AF 8190 or equivalent, or permission of instructor

**PUB_AF 8510: Public Budgeting and Taxation**  
Intensive study of the institutions, processes, politics, and social and economic impact of public taxation and expenditures.

**Credit Hours:** 3

**PUB_AF 8520: Human Resources Management and Development in Public and Nonprofit Sector**  
Examines the political, economic, and legal context of the personnel function, as well as the technical aspects of the personnel administrator's job. Stresses the dynamics of bureaucratic organizations. Graded on A-F basis only.

**Credit Hours:** 3

**PUB_AF 8530: Strategic Management of Public Service Organizations: People, Information and Money**  
Presents the rationale for strategic planning, and techniques and processes to develop and implement strategic planning in the public sector. Graded on A-F basis only.

**Credit Hours:** 3

**PUB_AF 8540: Local Government Management**  
Organization and division of service responsibility within local governments. Problems of managing delivery of services with special emphasis upon program implementation, productivity, planning, responsiveness. Graded on A-F basis.

**Credit Hours:** 3

**PUB_AF 8610: Group Dynamics and Conflict Resolution**  
Focuses on the study of group psychology in the context of communities and organizations. It provides a specific examination of the emergence and resolution of conflict. Graded on A-F basis only.

**Credit Hours:** 3

**PUB_AF 8620: Organizational Analysis and Change**  
Investigates processes and methodologies of organizational diagnosis, intervention strategies, and the role of a change agent. Graded on A-F basis.

**Credit Hours:** 3

**PUB_AF 8630: Organizational Change in a Community and Global Context**  
Examines changing organizations in their task environments, which include communities and the global economy. The phenomenon of ambiguous boundaries between public and private as well as nonprofit sectors will be investigated as these profound changes impact organizational behavior. Graded on A-F basis only.

**Credit Hours:** 3

**PUB_AF 8710: The Nonprofit and Voluntary Sector**  
Provides an overview of the history, function, size, scope, development, and management of the nonprofit sector. Historical, political, economic, and social perspectives are used to examine the meaning of voluntarism, charity, philanthropy, and the nonprofit sector. Graded on A-F basis.

**Credit Hours:** 3

**PUB_AF 8720: Budgeting and Financial Management in the Nonprofit Sector**  

**Credit Hours:** 3

**PUB_AF 8830: Grant Writing I**  
Provides students with knowledge regarding the process of seeking grant funding. Students will work in small groups to complete a letter proposal.
They will experience the peer review process both as applicant and reviewer. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 8831: Grant Writing II
Provides students with knowledge regarding the process of seeking grant funding. Students will work in small groups to complete a full-blown state or federal grant proposal. They will experience the peer review process both as applicant and reviewer. The course will cover a variety of funding sources and a range of funding types to provide students with an information base for preparing future grant applications.

Credit Hours: 3
Prerequisites: PUB_AF 8830

PUB_AF 8832: Sponsor Relationships
Provides students with knowledge of the landscape and culture of grant seeking with an emphasis on understanding how private and public sector sponsors are in many ways, significantly different enterprises. Students will gain an understanding of the pivotal role relationships play in grant seeking and gain an appreciation of the particularities and rigors of both public and private grant seeking.

Credit Hours: 3
Prerequisites: Proposed Grant Writing 2 course

PUB_AF 8833: Grant Award Management
Provides students with knowledge regarding the process and policies entailed in managing grant awards. Course content includes federal OMB circulars, basic human resource issues, project management strategies, reporting obligations, and project close-out.

Credit Hours: 3
Prerequisites: Proposed Grant Writing 2 course

PUB_AF 8850: Policies and Institutions of the European Union
Policies and Institutions of the European Union

Credit Hours: 3

PUB_AF 8860: International Comparative Rural Policy
(same as AAE 8860, NAT_R 8860). Compares the rural policy objectives and implementation strategies of various countries, and assesses these policies in terms of economic, social, environmental outcomes and their implications for international relations. Includes 2-weeks of study Abroad. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

PUB_AF 8864: Administrative Law
(same as LAW 5310). Administrative Law is concerned with the process government agencies use to make decisions. As such it develops the requirements for establishing rules and policies. It also covers the means by which agencies enforce regulations and statutory provisions, and the means for securing judicial review of rules and enforcement actions. Graded on A-F basis only.

Credit Hours: 3

PUB_AF 9000: Directed Individual Study
Supervised readings and research in area of doctoral specialization. Student must submit formal written proposal to doctoral supervising faculty member prior to registration. May be repeated up to 6 hours.

Credit Hours: 3
Prerequisites: PhD standing or permission of instructor

PUB_AF 9090: Dissertation
Independent research for Ph.D. dissertation. Graded on S/U basis only.

Credit Hours: 1-99
Prerequisites: PhD standing or permission of instructor

PUB_AF 9150: Governance and Public Affairs
Examines theories of governance, the role of the state and other social institutions. Other topics include administrative reform, the new public management, and the emergence of the multi-sector public service. International comparative dimensions emphasized. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PUB_AF 8150, PhD standing or permission of professor

PUB_AF 9160: Organization Studies in Public Affairs
Examines theories of public and nonprofit organizations, including classical and contemporary perspectives in organization science; individual and group behavior; leadership, power and influence; organization design and structure; and organizational culture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PhD standing or permission of instructor

PUB_AF 9170: Policy Theory
This seminar examines theories on the policy process, institutions, and delegation of power that influence public policy. Topics covered may include agenda setting, policy design, implementation, legislative decision-making, state political institutions, and federalism. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PhD standing or permission of instructor

PUB_AF 9180: Advanced Research Methods for Public Affairs I
Focuses on multiple regression analysis, the implications and treatment of serial correlation, heteroskedasticity, multicollinearity, specification error, and measurement error. Students estimate models, use diagnostic information, and interpret and present findings for public affairs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PUB_AF 8180 or equivalent, PhD standing or permission of professor

PUB_AF 9181: Advanced Research Methods for Public Affairs II
The seminar examines statistical modeling tools for limited dependent variables and complex data situations, such as time-series cross-sectional data, clustered observations, and multilevel data. Other topics include simultaneous equation modes and instrument variable in public affairs. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: PUB_AF 9180 or equivalent, PhD standing or permission of instructor

PUB_AF 9182: Logics of Inquiry in Public Affairs
This course examines the philosophical foundations of social inquiry public affairs. Topics include investigation of epistemological and methodological issues in development and use of social research, and exploration of the theoretical underpinnings of multiple paradigms in public affairs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: PhD standing or permission of instructor

PUB_AF 9183: Public Affairs Research and Professional Development Seminar
Research and professional development through participation in research seminars, colloquia, academic conferences, lectures, and professional workshops. Students required to register every spring semester in residence. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: PhD standing or permission of instructor

PUB_AF 9185: Supervised Research
Research experience directed by major professor designed to prepare doctoral students for independent scholarship in area of doctoral specialization.

Credit Hours: 3
Prerequisites: PUB_AF 8150, PhD standing or permission of instructor

PUB_AF 9446: Advanced Empirical Methods
(same as ECONOM 9446). Empirical and modeling techniques for evaluation of microeconomic policy questions. Graded A-F only.

Credit Hours: 3
Prerequisites: Instructors consent or PUB_AF 8181, PUB_AF 9180, and PUB_AF 9181

PUB_AF 9447: Topics in Microeconomic Policy Analysis
(same as ECONOM 9447). Applies the methods and techniques of microeconomics and to specific timely policy questions. Taught by applied-microeconomics faculty and focuses on current topics in labor economics, public economics, the economics of education, health economics, and other applied areas of microeconomics. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Instructor's consent
Recommended: PUB_AF 8181, PUB_AF 9180 and PUB_AF 9181

Public Health (P_HLTH)

P_HLTH 1000: Introduction to Public Health
Acquaints students with the Public Health profession including educational preparation, public health careers, current issues, trends, and research. Graded on A-F basis only.

Credit Hour: 1

P_HLTH 3450: Introduction to Epidemiology
(same as HLTH_SCI 3450). Epidemiology is the basic science of Public Health, focusing on the study of distribution and determinants of health-related states and events. The purpose of this course is to gain a basic understand of Epidemiology principles and methods and how to use these as a framework in assessing and addressing population health issues. Employing a mix of lecture, discussion, and assignments, students will explore the epidemiological investigation process, the etiology of disease, disability, and death, how to identify population subgroups with increased risk of disease, disability, and death and how to contribute to the development and evaluation of public health programs and services that improve the health of subgroups at risk and the general population. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Acceptance into the Public Health Program or by Department Consent

P_HLTH 3460: Introduction to Public Health and Emergency Preparedness
Introduces public health emergency preparedness procedures, including procedures for natural and technological disasters; terrorism; emerging threats; and methods to address these from planning and response perspectives. Includes domestic and international public health emergency contexts, and integrates knowledge and skills learned from other courses within the Health in Crisis: Human Rights, Disaster Preparedness and Humanitarian Assistance. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Public Health Science Majors during preregistration

P_HLTH 3560: Public Health and Environmental Justice
This course is designed to give students an overview of the connection between environmental justice and public health work. Students will use current and past events as a foundation for learning about environmental health disparities faced by minorities and indigenous communities. Looking through the lens of public health, students will tackle difficult topics such as social justice, environmental racism, and climate change as it relates to minority and indigenous communities. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Public Health Science Majors during preregistration

P_HLTH 3660: Chronic Disease and Public Health Approaches
The epidemiology of major chronic diseases of high income countries will be reviewed including heart disease, cancer, stroke, diabetes, neurological diseases, and selected other conditions. In addition students will examine emerging non-communicable disease epidemics in low-and middle-income countries. Methodologic issues related to the study of these diseases, disease surveillance and strategies for prevention will also be covered. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to Public Health Science Majors during preregistration
**P_HLTH 3760: Infectious Disease and Public Health Approaches**
In this course students will be able to define the basic concepts of Infectious Disease Epidemiology and identify past, present, and future infectious disease threats. Students will describe the basic methods of Infectious Disease Epidemiology and identify host factors, infectious agents, and transmission factors. By the end of the course students will be able to discuss and identify basic approaches to control and prevention of infectious disease. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*

**P_HLTH 3860: Autism Spectrum Disorder and Public Health**
This class is designed to help students think critically about the identification and treatment of autism spectrum disorder (ASD) in the United States. Students will explore current research and debates surrounding the definition, prevention and treatment of ASD in the United States. In addition to learning about the presentation and treatment of ASD, they will also be introduced to concepts in public health, psychology, psychiatry, and health services research. We will also discuss the history of our beliefs about ASD and how these beliefs have influenced policy, systems, services and treatment over the last century. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*

**P_HLTH 3960: Public Health, Drugs and Policy**
This course is a tool to provide basic understanding of the role of legal and illegal drugs of abuse on people and the addictive processes. Using this information, the major focus will be to understand the problems and opportunities for treatment and prevention relevant to recent and past policy issues. The public health implications of several Missouri and national policy decisions in treatment and prevention will be a major focus. An additional major focus will be on legal drugs of abuse - alcohol, tobacco and caffeine - which cause most of the mortality and morbidity due to drug use. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*

**P_HLTH 3965: Strategies for Effective Peer Education in Public Health**
(same as WGST 3960, HLTH_SCI 3965). Course designed to promote effective presentation skills on a variety of health topics, specifically sexual health. Students will engage in experiential practice and skill building surrounding cultural competency, difficult discourses, discussion facilitation and behavior management. Graded on A-F basis only.
*Credit Hour: 1*
*Prerequisites: Instructor's consent*

**P_HLTH 4001: Topics in Public Health**
Organized study of selected topics. Subjects will vary from semester to semester. Graded on A-F basis only.
*Credit Hour: 1-6*

**P_HLTH 4002: Public Health Study Abroad**
This course is designed for students to explore various public health issues through the global lens of study abroad. Public health is a diverse career field that touches every aspect of life and connects a global community through the mission of serving the public good. Public health issues are intertwined and complicated by culture, governments, and environmental systems. Each study abroad trip will uniquely address issues specific to the country of origin. Graded on A-F basis only.
*Credit Hour: 1-6*

**P_HLTH 4085: Problems in Public Health**
Individual study, topic/problem varies by instructor. Graded on A-F basis only.
*Credit Hour: 1-6*
*Prerequisites: Instructor's Consent*

**P_HLTH 4350: Principles of Environmental Health for Public Health**
This course is an introduction to Environmental Health as it relates to Public Health. Students will learn about the effects of environmental factors on a population's health and identify the connections between human health, animal health, and ecosystem health. Students will explore the role governments play in environmental health and identify the how globalization affects global burdens of disease. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*

**P_HLTH 4485: Ethics in Public Health**
This course provides an overview of the basis for ethics in public health. Ethical concepts, theories, and approaches that apply to public health practice will be presented. Specific topics include paternalism, confidentiality, informed consent, justice, and resource allocation. Ethical issues in the public health arena will be explored; with an emphasis on the social determinants of health and APHA's "health in all policies" approach. Legal and policy factors will also be considered related to ethical decision-making. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*

**P_HLTH 4960: Qualitative Approaches to Understanding Public Health Problems**
This course will define and describe the use of qualitative approaches to explore and solve public health problems. It will also provide opportunity for collecting, analyzing and working with qualitative data from a variety of data collection methods and using multiple analysis approaches. Discussion of analyzing photograph and video data will also provide students with insights on how best to analyze these types of data. Graded on A-F basis only.
*Credit Hours: 3*
*Prerequisites: Restricted to Public Health Science Majors during preregistration*
P_HLTH 4970: Public Health Capstone: Digital Storytelling
One of the primary tasks of the public health professional is to translate scientific evidence into sound programs and policies. To do this successfully, the public health practitioner must understand how to weigh and interpret evidence and how to communicate the meaning of that evidence to a variety of stakeholders, including policy makers and community members. This capstone will focus on the practical and ethical challenges inherent in public health practice through a focus on communication and storytelling. Students will choose a public health topic and conduct a literature review, conduct interviews with key stakeholders, develop a story proposal and a completed digital story that reflects current evidence and diverse viewpoints. In addition, through exercises, readings and reflection papers, they will explore their own relationship to the issue of choice, explore unfamiliar points of view on the topic and grapple with the ethical challenges of advocacy and representation. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Public Health Science Majors during preregistration

P_HLTH 4975: Public Health Capstone: Emerging Issues in Public Health
In this capstone course, students will apply what they have learned throughout the program to generate solutions for an emerging issue in public health (e.g. opioids). The course is taught using Open Educational Resources (OER) and is based on current resources and materials. Research (i.e. epidemiology), practice, interventions, policy, and evaluation will be addressed with readings, reports, articles, films, and podcasts. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Restricted to Public Health Science Majors during preregistration

P_HLTH 7150: Principles of Public Health
This course provides an overview of public health, including concentration areas of public health systems, epidemiology, social and behavioral determinants of health, environmental health, and public health policy. Case studies from local, state, national and international public health issues are incorporated into each segment, culminating in a discussion of the future of public health.
Credit Hours: 3

P_HLTH 7160: Interdisciplinary Perspectives in Global Health
This course is designed for those interested in health issues from a global perspective. It explores contemporary issues, problems, and controversies in global health through an interdisciplinary perspective. This course will follow a lecture and case study discussion format. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Department consent required

P_HLTH 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, HMI 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and SOC_WK 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 7850: Mental Health Policy
This course is an introductory survey of the principles and practice of mental health policy, beginning with its early history and continuing to the present day. Topics will include the nature of mental illness, its incidence and prevalence, mental health stigma, policy concerns related to mental health finance, the process of policy making, involvement of mental health care consumers in the policy process, and mental health in health policy reform. The needs of special populations including the homeless, persons in the criminal justice system, ethnic/minority groups, persons living in rural areas and veterans will be examined as well as needs specific to children and the elderly. Students are also expected to understand mental health policy considerations related to current health care reform and ethical issues in the practice of mental health policy. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 7900: Seminar in Health Education
(purposed with HLTH_SCI 4900). This course provides students pursuing careers in health education/promotion and public health with the opportunity to synthesize their relevant coursework and prepare for the Certified Health Education Specialist (CHES) examination. Graded S/U basis only.
Credit Hour: 1

P_HLTH 7952: Research Methods in Public Health
This course is designed to introduce students to the process of research as a sequence of events, systematically organized to further knowledge. A scientific and conceptual stance to knowledge development is emphasized, along with the importance of the empirical approach in establishing relationships between theories, concepts, and behavior phenomena. May be repeated for credit.
Credit Hours: 3

P_HLTH 8001: Topics in Public Health
Selected topics of interest related to Public Health.
Credit Hour: 1-3

P_HLTH 8085: Problems in Public Health
Guided readings, intensive study of an area in Public Health related to special interest of student or an area in which the student needs to strengthen.
Credit Hour: 1-99
Prerequisites: instructor's consent. May be repeated for credit.

P_HLTH 8090: Masters Thesis Research
Leads to preparation of masters thesis. May only be repeated for credit for six hours. Graded on S/U basis only.
Credit Hours: 1-99
Prerequisites: P_HLTH 8980. Instructor's consent required

P_HLTH 8120: Applied Epidemiology in Community Assessment
The purpose of this course is to enable students to gain skills and abilities in assessing population groups and determining their priority public health problems. Students will consider a variety of strategies for empowering and mobilizing populations in collaborative public health efforts. Communication skills are key to the community assessment and intervention process, particularly in translating epidemiological data to lay audiences, and advocating for action. Students will be challenged to communicate public health issues effectively both on-line and in writing. Graded on A-F basis only.
Credit Hours: 3
Prerequisites or Corequisites: P_HLTH 7952
Prerequisites: P_HLTH 8420, Graduate level Statistics (STAT 7020 or STAT 7410)

P_HLTH 8150: Human Health and the Environment
This graduate level course will address threats to public health related to environmental factors including biological, physical and chemical factors. Subjects will include environmental contamination and remediation, zoonotic disease food and water quality. This course will include recorded lectures with optional synchronous participation. Lectures will be recorded live and students will have the option to virtually attend live lecture, but this will not be required. Lecture recordings are archived for students to view at their convenience. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 8251: Immigrant Health
Public health professions have considerable interest in understanding the unique health concerns of immigrants, in order to prevent disease, promote health, and prolong life in this specific population and in the population as a whole. This course will be based on readings in the peer-reviewed literature, discussion in a seminar format, community visits and observations/interviews, and guest speakers on topics of importance when considering issues of public health particular to immigrant communities. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

P_HLTH 8260: Emergency Preparedness
An overview of current national guidance and basic assessment of the current health care system level of readiness focusing on the critical role of the health care system for community, regional, state, and nationally based emergency preparedness efforts. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 8270: Storytelling in Public Health and Public Policy
Storytelling for public health and public policy offers students an opportunity to become familiar with the literature and theoretical frameworks underlying the use of narrative and digital storytelling in public health and policy advocacy and public health interventions focused on behavior change. Students will review case studies of effective narrative communication and practice elements of effective storytelling in a variety of print and digital platforms. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 8300: Health Care in the United States
(same as PUB_AF 8172). Overview of financing, structure, and outcomes in the U.S. health care system. Contemporary health care issues, policy, and politics will be addressed. May be repeated for credit. Graded on A-F basis only.
Credit Hours: 3

P_HLTH 8400: Clinical Veterinary Regulatory Medicine and Public Health
(same as V_M_S 8400). The goal of this course is to familiarize the student with clinical aspects of veterinary public health/regulatory medicine. Must be enrolled in MPH (veterinary public health concentration) or DVM curriculum.
Credit Hours: 2

P_HLTH 8420: Principles of Epidemiology
This course is intended to provide a general introduction to the course epidemiological concepts and methods as grounded in the essential services of public health. The focus of the course is on developing critical thinking skills and providing a foundation in applied epidemiologic competencies. May be repeated for credit. Graded on A-F only.
Credit Hours: 3
Prerequisites: graduate level statistics; instructor's consent

P_HLTH 8425: Data Analysis for Health Researchers
The goal of this course is to introduce students to the systematic approach to data analysis, statistical computing, correct interpretation and presentation of results. Note that mathematical equations or their derivations forms are not emphasized. However, candidates taking this course are required to have a basic understanding of the epidemiologic and statistical principles and data analysis. The course is not expected to convert you into an expert data analyst within 16 weeks but upon
P_HLTH 8765: Strategic Health Communication
This course is designed to prepare students to evaluate global public health programs, preferably in developing countries. Students will identify a global public health issue, find one or more global health intervention or prevention programs, evaluate the programs using principles of evaluation research methods, and suggest implications for global public health promotion. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: P_HLTH 7952 or P_HLTH 8420

P_HLTH 8971: Veterinary Public Health Capstone
This capstone experience provides a unique set of opportunities and responsibilities. It is generally scheduled after completion of at least 2 semesters of the MPH curriculum and is designed to serve as a capstone experience integrating previous coursework and experiences. Exceptions to the requirement of completion of 2 semesters of MPH coursework will be granted for students who have completed or concurrent degree. Examples of relevant preparatory coursework will include epidemiology and veterinary public health. As an integrating experience, the capstone will require students to apply knowledge in an independent manner, integrate knowledge into cohesive production, and communication the results of this experience.

Credit Hour: 1-99
Prerequisites: completion of at least 2 semester of MPH curriculum

Radiologic Sciences (RA_SCI)

RA_SCI 3110: Radiography Procedures I
This course is an introduction to basic radiographic positioning and procedures. Specific radiographic procedures of the chest, upper extremity, shoulder girdle, pelvis and lower extremity are taught.

Credit Hours: 2
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3120: Fundamentals of Radiography
Orientation to radiology department, ethics, psychodynamics of patient care, medical legal considerations and radiation safety procedures.

Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3130: Basic Radiographic Skills
Radiographic film processing techniques, intensifying screens and sensitometry will be discussed. The x-ray tube, x-ray production and some of the factors which affect the quantity and quality of the x-ray beam as well as the x-ray image will also be introduced.

Credit Hours: 2
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only
RA_SCI 3140: Principles in Radiographic Exposure I
Theory and principles of X-ray technique; correlation of factors with application.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3150: Radiologic Pharmacology
Pharmacological principles, biopharmaceutics, pharmacokinetics, pharmacodynamics, drug classifications, drug names, administration routes, and infection prevention and control will be covered. Attention will be given to contrast agents relative to radiographic imaging. Ethical and legal implications will be explored.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3160: Radiologic Physics
Fundamental physics of electricity and radiant energy; principles of generation of electromagnetic radiation and applicable equipment; and principles of digital image capture, display and storage.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3170: Imaging Modalities
The study of radiographic and fluoroscopic equipment with attention to automatic exposure devices, image intensification, and imaging detectors. Consideration will be given to equipment in such modalities as computed tomography, magnetic resonance imaging, ultrasound, nuclear medicine and radiation therapy.
Credit Hours: 2
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3180: Radiography Procedures II
Instruction in radiographic procedures of the upper and lower gastrointestinal system, urinary system, bony thorax, vertebral column, and cranium.
Credit Hours: 2
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3190: Radiography Procedures III
Instructions in advanced radiographic imaging techniques with emphasis in trauma radiography, vascular studies and other specialty radiographic procedures.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3941: Clinical Education I
First in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience

emphasizing radiographic procedures of the chest, abdomen, and extremities.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 3942: Clinical Education II
Second in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing the development of technical skills and procedural knowledge of routine radiographic procedures,
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4085: Problems in Medical Imaging
Supervise investigation in an aspect of medical imaging science usually culminating in a written report.
Credit Hour: 1-3
Prerequisites: instructor’s consent

RA_SCI 4110: Sectional Anatomy
A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Graded on an A-F basis only.
Credit Hours: 3
Prerequisites: instructor’s consent required

RA_SCI 4140: Magnetic Resonance Imaging: Physics and Procedures
(cross-leveled with RA_SCI 7140). Magnetic Resonance imaging fundamentals, applications, instrumentation, physical principles. Basic imaging concepts including positioning, scanning protocols, contrast imaging, anatomy review, and pathological considerations. Graded on an A-F basis only.
Credit Hours: 5
Prerequisites: Acceptance into Radiologic Sciences

RA_SCI 4150: Computed Tomography: Physics and Procedures
(cross-leveled with RA_SCI 7150). Computed tomography imaging fundamentals, applications, instrumentation, physical principles. Applied concepts regarding patient care and CT imaging procedures. Graded on an A-F basis only.
Credit Hours: 5
Prerequisites: Acceptance into Radiologic Sciences

RA_SCI 4303: Radiation Safety
(same as NU_ENG 4303). Types and origins of radiation; radiation detection and measurement; radiation interactions; shielding; dose calculations; federal, state and local regulations; and procedures for safe uses of radiation. Laboratory experiments in radiation measurements and protection.
Credit Hours: 3
RA_SCI 4943: Clinical Education III
Third in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing the transition to self-directed practice of routine radiographic procedures and the development of technical skills and procedural knowledge of more advanced radiographic procedures.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Science, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4944: Clinical Education IV
Fourth in a five-part series focusing on the application and evaluation of radiography in the clinical setting. Supervised clinical experience emphasizing self-directed clinical practice and the development of technical skills and procedural knowledge of more advanced radiographic procedures and modalities.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Science students only

RA_SCI 4945: Clinical Education V
Final clinical course. Supervised clinical experience emphasizing self-directed performance of complex radiographic procedures, continued competency in routine diagnostic radiography and the investigation of advanced modalities, while transitioning to reflective, critical, and strategic professional practice.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program. Restricted to Radiologic Sciences students only

RA_SCI 4946: Advanced Medical Imaging Externship
(cross-leveled with RA_SCI 7946). Supervised clinical experience in a medical imaging specialty with emphasis on patient care and technical practice.
Credit Hours: 3
Prerequisites: Instructor's consent required. Certification in a primary area of imaging. An affiliation agreement between the University of Missouri Radiologic Sciences Program and the clinical facility. Satisfactory completion of all Clinical Screening Requirements

RA_SCI 4947: Radiography Overview
A comprehensive overview of all aspects of diagnostic radiology with emphasis on procedures, technique, radiation protection, positioning, radiographic anatomy and patient care.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

RA_SCI 4980W: Imaging Pathology - Writing Intensive
Etiology and processes of disease. Emphasis on pathology of body systems and the manifestation of pathology through imaging.
Credit Hours: 3
Prerequisites: Acceptance into Radiologic Sciences, Radiography Program

RA_SCI 7110: Sectional Anatomy
(same as DMU 7312; cross-leveled with RA_SCI 4110, DMU 4312). A study of human anatomy using the sectional approach; anatomical structures will be related to modern medical imaging techniques. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Instructor consent required

RA_SCI 7140: Magnetic Resonance Imaging: Physics and Procedures
(cross-leveled with RA_SCI 4140). Magnetic Resonance imaging fundamentals, applications, instrumentation, physical principles. Basic imaging concepts including positioning, scanning protocols, contrast imaging, anatomy review, and pathological considerations. Graded on A-F basis only.
Credit Hours: 5
Prerequisites: Instructor consent

RA_SCI 7150: Computed Tomography: Physics and Procedures
(cross-leveled with RA_SCI 4150). Computed tomography (CT) imaging fundamentals, applications, instrumentation, physical principles. Applied concepts regarding patient care and CT imaging procedures. Graded on an A-F basis only.
Credit Hours: 5
Prerequisites: Instructor's consent required

RA_SCI 7946: Advanced Medical Imaging Externship
(cross-leveled with RA_SCI 4946). Supervised clinical experience in a medical imaging specialty with emphasis on patient care and technical practice.
Credit Hours: 3
Prerequisites: Instructor's consent required. Certification in a primary area of imaging. An affiliation agreement between the University of Missouri Radiologic Sciences Program and the clinical facility. Satisfactory completion of all Clinical Screening Requirements

Radiology (RADIOL)

RADIOL 4328: Introductory Radiation Biology
(same as BIO_SC 4328, NU_ENG 4328, V_M_S 7328). Concepts of ionizing radiations, their actions on matter through effects on simple chemical systems, biological molecules, cell, organisms, man.
Credit Hours: 3
Prerequisites: junior standing Sciences/Engineering; one course in Biological Sciences and Physics/Chemistry; or instructor's consent
RADIOL 6044: SCC Radiation Oncology Elective
Students will enhance their knowledge, skills, and attitudes about patient-centered care through active participation in direct patient care activities while under the supervision of a faculty preceptor. Students will integrate previously acquired knowledge and concepts and apply them to the care and management of patients. During the elective, students will be expected to work up patients, perform physical exams, and present cases to faculty. Students will also be exposed to treatment planning, simulations, and treatment deliveries throughout the rotation. At the end of the elective, students will be expected to give a 10-minute presentation on a topic of their choosing.

Credit Hours: 5
Prerequisites: Successful completion of the first two years of medical school

Religious Studies (REL_ST)

REL_ST 1100: Introduction to Religion
Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history.

Credit Hours: 3
Prerequisites: Sections are restricted to Freshmen and Sophomores only or Juniors and Seniors only

REL_ST 1100H: Introduction to Religion - Honors
Engages students in reflection on the religious questions that human existence poses, and introduces them to conceptual tools for understanding and evaluating answers which have emerged in human history.

Credit Hours: 3
Prerequisites: Sections are restricted to Freshman and Sophomores only and Juniors and Seniors only. Honors eligibility required

REL_ST 2005: Topics in Religious Studies-Humanities
Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hour: 1-3

REL_ST 2100: Indigenous Religions
(same as ANTHRO 2100). Explores the central aspects of religious life in indigenous communities. Focusing on specific groups, it considers individual and group identity, the meaning of the sacred, and the impact of foreign domination.

Credit Hours: 3

REL_ST 2100H: Indigenous Religions - Honors
(same as ANTHRO 2100H). Explores the central aspects of religious life in indigenous communities. Focusing on specific native communities, it considers individual and group identity and the meaning of the sacred.

Credit Hours: 3
Prerequisites: Honors eligibility required

REL_ST 2110: Religions of the World
This course introduces students to a variety of religious traditions through the study of their myths, rituals, beliefs, and practices, and explores approaches to the academic study of religion.

Credit Hours: 3

REL_ST 2110H: Religions of the World - Honors
Explores the differing ways in which Asian and Western religions interpret life and reality. Includes study of Hinduism, Buddhism, Chinese and Japanese religions, Judaism, Christianity, and Islam.

Credit Hours: 3

</tbody>
</table>
Examines the historical development of Islamic traditions, noting the
narratives, globalization, religious violence, and heresy. May be repeated
Topic will include competing Christian theologies, colonialism, conversion
Christianities from the first century of the Common Era to the present day.

Prerequisites:

Credit Hours: 3

REL_ST 2610: Medieval Christianity
(same as HIST 2610). History of Christian practices and teachings from
the 5th-15th centuries, including Byzantine and Western Christianity
Themes such as the influence of the Islamic world on Christianity, popular
and elite formulations of theology and ritual activities.

Credit Hours: 3

REL_ST 2610H: Medieval Christianity - Honors
History of Christian practices and teachings from the 5th-15th centuries,
including Byzantine and Western Christianity Themes such as the
influence of the Islamic world on Christianity, popular and elite
formulations of theology and ritual activities.

Credit Hours: 3

REL_ST 2630: History of Christian Traditions
(same as HIST 2630). An overview of the origins and development of
Christianities from the first century of the Common Era to the present day.
Topic will include competing Christian theologies, colonialism, conversion
narratives, globalization, religious violence, and heresy. May be repeated
for credit.

Credit Hours: 3

REL_ST 2700: Islam
Examines the historical development of Islamic traditions, noting the
manner in which various sects & factions understand religion, humanity
and God.

Credit Hours: 3

REL_ST 2850: Religious History of the Middle East I
An introduction to the early history and development of religion in the
Middle East. The course begins with the religious traditions of ancient
Egypt, Anatolia, and Mesopotamia; describes how these traditions
shaped the subsequent development of Judaism, Christianity, and
Islam; and concludes with the transformation of the religious landscape
following the Islamic conquests. In addition to mapping out these
historical linkages, the course will focus on using the category of religion
as a unique method in the study of social and political history. Graded on
A-F basis only.

Credit Hours: 3

REL_ST 2860: Religious History of the Middle East II
This course is a historical introduction to the religions of the pre-modern
and modern Middle East. It follows the histories of Judaism, Christianity,
and Islam from the defeat of the Mongol army in Palestine in 1260 to the
present day. In particular it focuses on the social, political, and economic
interactions of the Jewish, Christian, and Muslim populations, and the role
religion has (and has not) played in the formation and development of the
modern Middle East. Graded on A-F basis only.

Credit Hours: 3

REL_ST 2900: Contemporary Religious Thought
Explores issues within contemporary Christian theology that cut
across denominational lines such as: the nature and existence of God;
secularization, relativism, and humanism; the authority of the Bible;
attitudes toward other religions; the moral integrity of Christianity; and the
purpose of human existence.

Credit Hours: 3

REL_ST 2910: Religion and Contemporary Social Issues
Study of the social ethics of Jewish and Christian theologians and
movements of the 19th and 20th centuries and an examination of
selected social problems in light of these systems.

Credit Hours: 3

REL_ST 2939: Religion and Human Sexuality
Examines how religion is understood from various psychological
perspectives, and how psychological theories reflect religious
presuppositions about the nature and purpose of human life.

Credit Hours: 3

REL_ST 2940: African Religions
(same as BL_STU 2940). This course will serve as an introduction to
various forms of religiosity in sub-Saharan Africa. Greater emphasis
will be devoted to the indigenous religious traditions of the continent, but we will also examine Christianity and Islam as they are practiced on the continent. The aim of this class is to help students to better understand various aspects of African cultures by dismantling stereotypes and assumptions that have long characterized the study of religions in Africa. The readings and lectures are will be drawn from historical, anthropological, sociological, and literary sources. Graded on A-F basis only.

**Credit Hours:** 3

**REL_ST 2950: Directed Readings in Religious Studies**
Independent readings selected in consultation with supervisory faculty member. May not be repeated.

**Credit Hours:** 3

**Prerequisites:** instructor's consent

**REL_ST 3000: History of Religion in America to the Civil War**
(same as HIST 3000). Surveys major American religious traditions, patterns, and themes from 1492 to the Civil War, especially the role of religion in American social, cultural, and political developments.

**Credit Hours:** 3

**Prerequisites:** sophomore standing or instructor's consent

**REL_ST 3005: Topics in Religious Studies-Humanities**
Organized study of selected topics which vary by semester and are announced at time of registration.

**Credit Hours:** 3

**REL_ST 3020: Religion, Health, and Healing**
What does it mean to "be healthy" and "to heal" in different contexts? What sorts of medical, ritual, or religious expertise authorizes different sorts of healers and forms of healing? What conceptions of human bodies and their capabilities are assumed? These questions probe entanglements of religion, culture, and medicine in everyday life. This course focuses on ways in which these issues might inform, challenge, and enrich thinking about global health. We will examine moral and religious histories of the global health movement alongside pressing contemporary questions such as, how do disease epidemics shape religious practice? How does religious belief shape the reception of biomedical technologies? We will consider examples from a range of contexts and traditions. Topics include colonialism, medical missionaries, social gospel and public health, human rights, bioethics, and liberation theology. Throughout the course, we will discuss the relevance of socio-economics, race, gender, and sexuality. Graded on A-F basis only.

**Credit Hours:** 3

**REL_ST 3020: Religion, Health, and Healing**
What does it mean to "be healthy" and "to heal" in different contexts? What sorts of medical, ritual, or religious expertise authorizes different sorts of healers and forms of healing? What conceptions of human bodies and their capabilities are assumed? These questions probe entanglements of religion, culture, and medicine in everyday life. This course focuses on ways in which these issues might inform, challenge, and enrich thinking about global health. We will examine moral and religious histories of the global health movement alongside pressing contemporary questions such as, how do disease epidemics shape religious practice? How does religious belief shape the reception of biomedical technologies? We will consider examples from a range of contexts and traditions. Topics include colonialism, medical missionaries, social gospel and public health, human rights, bioethics, and liberation theology. Throughout the course, we will discuss the relevance of socio-economics, race, gender, and sexuality. Graded on A-F basis only.

**Credit Hours:** 3

**REL_ST 3042: Sacred Humor: Tricksters, Clowns, and Contraries**
This class will explore the notion that humor plays an important role in conveying sacred meaning. To that end, we will need to adopt a fairly common vocabulary regarding the concepts "humor" and "sacred," and will do so while exploring some of the key aspects of the sacred humor discourse, especially the "trickster," "clown," and "contrary" motifs in mythic narrative.

**Credit Hours:** 3

**REL_ST 3100: Religious Literacy for the Public and Professions**
This course teaches students to engage and encounter religion in day-to-day life and in the professional workplace. Its primary goal is to examine religious diversity in private and professional contexts from a practical standpoint by examining a variety of case studies.

**Credit Hours:** 3

**REL_ST 3200: Hinduism**
(same as S_A_ST 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga, and meditation, Indian religious thought, and devotional Hinduism.

**Credit Hours:** 3

**REL_ST 3210: History of Religion in Post-Civil War America**
(same as HIST 3210). Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments.

**Credit Hours:** 3

**REL_ST 3210H: History of Religion in Post-Civil War America - Honors**
Surveys major American religious traditions, patterns, and themes from 1865 to the present, especially the role of religion in American social, cultural and political developments. Prerequisites: Honors Eligibility Required.

**Credit Hours:** 3

**REL_ST 3220: Tibetan Buddhism**
This course explores the Buddhist tradition in Tibet, from its introduction in the 8th century to the present. Topics include the merger of Indian Buddhism with the local Bon religion, the relationship between Tibetan Buddhism and Mahayana Buddhism, the Tibetan Buddhist canon, lamas and tulkus, religion and material culture in Tibet, and the influence of Tibetan Buddhism in Central Asia. Graded on A-F basis only.

**Credit Hours:** 3

**REL_ST 3230: Buddhism and Environmental Ethics**
(same as S_A_ST 3230). Global environmental crisis is associated with rapidly expanding human population. Buddhist teachings about the interdependent aspects of existence and interrelatedness of all life may provide critical insights for how humanity can achieve balance and reciprocity with nature.

**Credit Hours:** 3

**REL_ST 3240: Buddhism of South and Southeast Asia**
(same as S_A_ST 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in South and Southeast Asia.

**Credit Hours:** 3
REL_ST 3250: Buddhism in East Asia
This course will trace the transmission of Buddhism from the Indian subcontinent to China, and from there to Korea and Japan. We will examine the historical development of East Asian forms of Buddhism, deal with key issues of Buddhist thought and practice, and look at the role of Buddhism in modern East Asian societies.
Credit Hours: 3
Prerequisites: REL_ST 2110, REL_ST 2300, REL_ST 2310 or REL_ST 3200, or instructor's consent

REL_ST 3260: Hindu Goddesses
(same as S_A_ST 3261). This course examines the vast range of Hindu Goddesses and their worship in South Asia. It includes information about goddess origins, mythology, symbolism, and attendant ritual practices. In order to approach this topic, background information about the history of Hinduism, major religious narratives, devotional practices, and iconographic representations of the divine are discussed. The course introduces the approaches of various scholars to Hindu Goddess worship within the context of religion, social relations, and gender roles, and explores ways in which South Asian women experience and negotiate feminine power in contemporary socio-cultural contexts.
Credit Hours: 3

REL_ST 3270: Yoga and Meditation in the Modern World
(same as S_A_ST 3270). This course explores the practice of Yoga and meditation, both as an ancient tradition of India and as an example of the globalization of religion. It will examine how the ancient Hindu religious tradition of Yoga was reinvented against the backdrop of India's colonial experience. Then it will look at a variety of emerging and transforming varieties of Hindu inspired yoga and meditation that spread globally in the context of increasing transnational interaction. To better appreciate both the traditional and the modern aspects of yoga and meditation, a secular meditation practice is included as an instructional and experiential component of this class.
Credit Hours: 4

REL_ST 3310: The Problem of Evil: Theodicy in the Ancient Near East
A comparative study of Ancient Near Eastern reflections on the question of why bad things happen to good people, aka the Problem of Evil. Students read primary texts in translation from Ancient Egypt, Ancient Mesopotamia, and Ancient Israel, including such famous texts as the Dispute between a Man and his Ba, the Babylonian Theodicy, and the book of Job. Students will examine how different beliefs about the origins of the universe, the relationship between humans and the divine, the notion of sin, and the causes of suffering lead to different answers to the age-old question of why the righteous suffer.
Credit Hours: 3

REL_ST 3350W: Monsters in Western Religion and Folklore - Writing Intensive
This course focuses on monsters found in Western cultures and more specifically how monsters are instantiated and put to use in contexts of popular culture. Theoretical and methodological approaches to the material are drawn from both Religious Studies and Folkloristics. Graded on A-F basis only.
Credit Hours: 3

REL_ST 3360: Cults and New Religious Movements
While religious traditions constantly change, and new religions emerge in every historical time period, the new religious movements of the past century (many of which are often referred to negatively as "cults") present a particular challenge to contemporary cultures and societies. We will begin with a theoretical overview of new religious movements (NRMs) and will proceed gradually to discuss in detail the religion of the Peoples Temple and its charismatic leader and founder, Jim Jones. Recommended: An introductory course in any of the following disciplines/area studies: Religious Studies, Psychology, Communication Studies (emphasis on Media and Society/Media Theory); or Sociology.
Credit Hours: 3

REL_ST 3380: Native American Religions
(same as ANTHRO 3380). Investigation of religious lives of the native peoples of the Americas through cultural contact with modernity. Perspectives based on historical, anthropological and native texts.
Credit Hours: 3

Examination of the Gospels of Matthew, Mark, and Luke as single works and as literarily related compositions. Interpretation focuses on the literary form of passages and the theological and ethical themes expressed.
Credit Hours: 3

REL_ST 3410: Cities and Letters of Paul: an Archaeological Investigation
This course combines a close contextual reading of the seven undisputed letters written by the apostle Paul and the three disputed letters of uncertain authorship coupled with an in-depth historical and archaeological investigation of the cities to which they were written. Students will learn about ancient letter writing, how the conventions used differed from modern practice, and how understanding those differences is essential for a more accurate reading of Paul. Likewise, this course will demonstrate that knowing the circumstances in which a letter was written sheds additional light on its contents and therefore investigates the historical and social conditions of Thessalonica, Corinth, Rome, Phillipi, the cities of Galatia, Ephesus, and Colossae in an effort better to understand the purposes for which Paul presumably wrote to the Christian communities in these cities.
Credit Hours: 3

REL_ST 3500: Monsters in Western Religion and Folklore
This course focuses on monsters found in Western cultures and more specifically how monsters are instantiated and put to use in contexts of popular culture. Theoretical and methodological approaches to the material are drawn from both Religious Studies and Folkloristics. Graded on A-F basis only.
Credit Hours: 3
REL_ST 3410H: Cities and Letters of Paul: an Archaeological Investigation - Honors
This course combines a close contextual reading of the seven undisputed letters written by the apostle Paul and the three disputed letters of uncertain authorship coupled with an in-depth historical and archaeological investigation of the cities to which they were written. Students will learn about ancient letter writing, how the conventions used differed from modern practice, and how understanding those differences is essential for a more accurate reading of Paul. Likewise, this course will demonstrate that knowing the circumstances in which a letter was written sheds additional light on its contents and therefore investigates the historical and social conditions of Thessalonica, Corinthis, Rome, Phillipi, the cities of Galatia, Ephesus, and Colossae in an effort better to understand the purposes for which Paul presumably wrote to the Christian communities in these cities.

Credit Hours: 3
Prerequisites: Honors eligibility required

REL_ST 3420: Jesus in Myth, Tradition and History
This course will explore the identity and character of Jesus of Nazareth as depicted in various early Christian canonical and non-canonical sources and, using a variety of scholarly techniques, ascertain what information in those sources can be considered to describe accurately the real, historical Jesus.

Credit Hours: 3

REL_ST 3430H: Revelation and Apocalyptic Literature - Honors
A study of Jewish and Christian apocalyptic literature with an emphasis on the Revelation to St. John.

Credit Hours: 3
Prerequisites: Honors eligibility required

REL_ST 3445: The Body in Western Christianity
This course is a survey of Western Christian Perspectives of the human body ranging from the Early Church Fathers to trends in contemporary American culture.

Credit Hours: 3

REL_ST 3445W: The Body in Western Christianity - Writing Intensive
This course is a survey of Western Christian Perspectives of the human body ranging from the Early Church Fathers to trends in contemporary American culture.

Credit Hours: 3

REL_ST 3451: Religion in Science Fiction
Investigation of religious themes in science fiction novels, short stories and films. Themes include the nature of the sacred, the limits of human knowledge, understanding and experiencing transcendence, revelation and apocalypse.

Credit Hours: 3

REL_ST 3451W: Religion in Science Fiction - Writing Intensive
Investigation of religious themes in science fiction novels, short stories and films. Themes include the nature of the sacred, the limits of human knowledge, understanding and experiencing transcendence, revelation and apocalypse.

Credit Hours: 3

REL_ST 3455: Robots and Religion: Reflection on Self, Soul, and Humanity
This course explores ancient and modern texts about robots, androids, and other artificial and virtual humans in order to analyze cultural and religious notions of what it means to be human. Course readings include ancient Indian, Tibetan, and Chinese robot stories in translation, medieval Jewish legends about golems, as well as contemporary Western science fiction. It is essential for a more accurate reading of Paul.

Credit Hours: 3

REL_ST 3450: Judaism in the Time of Jesus
This course is an introduction to the origin and development of Judaism from the time of the destruction of the first Jerusalem temple (587 BCE) to the Bar Kochba revolt (132-135 CE).

Credit Hours: 3

REL_ST 3500: Judaism in the Time of Jesus
This course is meant to introduce students with little or no background to the history, content, and interpretive traditions of the Qur’an. Given the text’s unfamiliarity to most non-Muslim readers, students will spend the first half of the semester learning to navigate and read the Qur’an. Students then spend the second half of the semester examining what Muslims have said about and done with the Qur’an, with an emphasis on the diversity of voices – both past and present – engaged with the text. Graded on A-F basis only.

Credit Hours: 3

REL_ST 3540: Jewish-Christian Relations
Explores historical and contemporary relations between Christians and Jews, and the transformations in Christian thought and practice resulting from awareness of Christianity’s role in the Holocaust and from post-Holocaust dialogues between Jews and Christians.

Credit Hours: 3

REL_ST 3550: Introduction to the Qur’an
This course is meant to introduce students with little or no background to the history, content, and interpretive traditions of the Qur’an. Given the text’s unfamiliarity to most non-Muslim readers, students will spend the first half of the semester learning to navigate and read the Qur’an. Students then spend the second half of the semester examining what Muslims have said about and done with the Qur’an, with an emphasis on the diversity of voices – both past and present – engaged with the text. Graded on A-F basis only.

Credit Hours: 3

REL_ST 3610: Angry Theologians
This course examines how intense debates and furious prose helped define many of modern Christianity’s most widely agreed upon tenets of faith. Through close readings of theological treatises laced with profanity, insults, and outrage, we shall explore how central Christian theological convictions about baptism, the nature of Jesus, gender roles, sin, salvation, and other topics were constructed through argumentation and compromise. Though some theological disputes were settled politely through votes at church councils, even these peaceable compromises often emerged through a spate of insults and red-faced polemic. We shall read and discuss some of the most colorful—and enduringly influential—cases of theology developing through brash confrontation, from the Luther Insult Generator to the fiercely angry articulations of Christian theology in contemporary America. Students will learn to understand the logic and purpose behind these vehement arguments in their historical context and practice evaluating competing claims about complex issues such as the Trinity, the path to salvation, and sin. Graded on A-F basis only.
REL_ST 3610W: Angry Theologians - Writing Intensive
This course examines how intense debates and furious prose helped define many of modern Christianity's most widely agreed upon tenets of faith. Through close readings of theological treatises laced with profanity, insults, and outrage, we shall explore how central Christian theological convictions about baptism, the nature of Jesus, gender roles, sin, salvation, and other topics were constructed through argumentation and compromise. Students will learn to understand the logic and purpose behind these vehement arguments in their historical context and practice evaluating competing claims about complex issues such as the Trinity, the path to salvation, and sin. Graded on A-F basis only.
Credit Hours: 3

REL_ST 3619: Religion and Race in the U.S.
This course explores intersections of race and religion in the United States. Areas explored in this course include but are not limited to: the role of religious institutions in the construction of race and racialization; the complex relationships between race, religion, and U.S. law, as well as historical and contemporary theologies of race. Graded on A-F basis only.
Credit Hours: 3
Recommended: REL_ST 1100, REL_ST 2110

REL_ST 3710: Reality of God
Will explore the meaning of "the loss of God" (Tillich) and various modern and contemporary attempts to reaffirm the reality of God.
Credit Hours: 3

REL_ST 3740: Religion and Film
Addresses issues of interpretation and analysis in the convergence of religion and film. Addresses three areas under this broad rubric: 1) film representations of established religions; 2) film and the construction of social values; 3) film as contemporary "myth". Treating films as social texts, we will ask what such representations of ourselves to ourselves suggest about culture in general.
Credit Hours: 3

REL_ST 3760: Geography of the World’s Religions
(same as GEOG 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.
Credit Hours: 3
Prerequisites: 1000/2000 level Geography course; junior standing or instructor’s consent

REL_ST 3760W: Geography of the World’s Religions - Writing Intensive
(same as GEOG 3760). Explores the significance of place in the origin, diffusion, distribution and practice of religions, emphasizing imprints of religion on the cultural landscape and connections between culture, politics, economics, and religion.
Credit Hours: 3
Prerequisites: 1000/2000 level Geography course; junior standing or instructor’s consent

REL_ST 3840: Religion and Criminal Justice
This course helps students become more familiar with a religious, sociological, and American studies approach toward understanding the complicated relationship between religion and the U.S. prison system. It addresses the influence of religion on the development of the justice system in the United States and enables students to understand how this influence extends into the present day. Unit one centers on understanding religion and familiarizing ourselves with certain components of the criminal justice system. Unit two examines the direct relationship between the two institutions, and Unit three is an exploration specifically of religion and capital punishment (the death penalty).
Throughout this class we will also explore via the podcast “Serial”, as well as other sources both fictional and nonfictional that give students the opportunity to contemplate complex concepts frequently taken for granted such as criminality, justice, punishment, and of course - guilt and innocence. Recommended: Introductory courses in one or more of the following disciplines: Sociology, Religious Studies, Psychology, Philosophy, Interdisciplinary Studies, and Political Science.
Credit Hours: 3

REL_ST 3900: Islam and the Myth of Religious Violence
This course explores the widespread claim that Islam is an inherently violent religion. After an overview of the history of Islam, and an introduction to the concepts of myth, religion, and violence, we examine systematically the historical, social, political, and religious contexts of a series of case studies. These case studies will underscore the nature of religious language and motivation within specific contexts, exposing students to a much more complex picture of the means and ends of so-called religious violence. No prior knowledge of Islam is required. Graded on A-F basis only.
Credit Hours: 3

REL_ST 3990: Majors Seminar
In this seminar religious studies majors will be encouraged to form a community of inquiry focused on the subject of religion and public life. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: Religious Studies majors in their junior year

REL_ST 4001: Topics in Religious Studies-General
Organized study of selected topics which vary by semester and are announced at time of registration.
Credit Hours: 3
Prerequisites: junior standing or instructor’s consent
REL_ST 4005: Topics in Religious Studies-General
Organized study of selected topics which vary by semester and are announced at time of registration.
Credit Hours: 3

REL_ST 4100: Advanced Theories and Methods
(cross-leveled with REL_ST 7100). The course investigates the history of the modern academic study of religion, closely exploring influential theories and methods that have shaped scholarly perspective. May include approaches such as structuralism, phenomenology, Durkheimian and Weberian sociology, Marxism, feminism, thick description, psychoanalysis, and others.
Credit Hours: 3
Prerequisites: Restricted to Religious Studies majors and MA students

REL_ST 4100W: Advanced Theories and Methods - Writing Intensive
(cross-leveled with REL_ST 7100). The course investigates the history of the modern academic study of religion, closely exploring influential theories and methods that have shaped scholarly perspective. May include approaches such as structuralism, phenomenology, Durkheimian and Weberian sociology, Marxism, feminism, thick description, psychoanalysis, and others.
Credit Hours: 3
Prerequisites: Restricted to Religious Studies majors and MA students

REL_ST 4110: Religious Myth and Ritual
(cross-leveled with REL_ST 7110). This course will unpack theoretical and methodological issues surrounding the study of embodied religious practice and the nature of religious narrative using myths and rituals from around the world's religious traditions.
Credit Hours: 3

REL_ST 4130: Haunting and Healing: The Supernatural in American Culture
This course explores instances, stories, and representations of haunting in the United States. We apply a variety of theoretical and methodological approaches to illuminate the diversity of meanings, functions, and contexts of supernatural beings in American popular and folk cultures.
Credit Hours: 3

REL_ST 4140: Religion, Spirituality, and the Brain
Explores neuropsychology of religion, spirituality, transcendence, and mystical experience. Covers development in neuroscience about how the brain works in a variety of religious and spiritual contexts, including prayer, meditation, and altered states of consciousness.
Credit Hours: 3
Prerequisites: Restricted to juniors and seniors only

REL_ST 4200: African-American Religion
(same as BI_STU 4210). Historical and thematic examination of African American religious traditions and practices. Addresses intersections of religious expression with race, identity, culture, and society.
Credit Hours: 3

REL_ST 4210: African-American Religion
(same as BI_STU 4210). Historical and thematic examination of African American religious expression with race, identity, culture, and society.
Credit Hours: 3

REL_ST 4280: Archaeology of Religion
(same as ANTHRO 4280). This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.
Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

REL_ST 4287: Empire: Intellectual History, Literature, and Society
(same as PEA_ST 4287; cross-leveled with REL_ST 7287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras. Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.
Credit Hours: 3
Prerequisites: junior standing, senior standing preferred

REL_ST 4320: Introduction to Daoism
An introduction to the Daoist religious tradition, beginning with its background in earlier forms of philosophy, ritual, and belief. We will follow the development of the various Daoist schools and movements over the centuries and examine key aspects of their belief and practice, both historical and contemporary.
Credit Hours: 3

REL_ST 4380: Anthropological Theories of Religion
(same as ANTHRO 4380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology, and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.
Credit Hours: 3
Prerequisites: ANTHRO 2030, ANTHRO 2100 or REL_ST 2100, or instructor's consent

REL_ST 4400: The Catholic Intellectual Tradition
(cross-level with REL_ST 7110). Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman, Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.
Credit Hours: 3

REL_ST 4400H: The Catholic Intellectual Tradition - Honors
(cross-level with REL_ST 7110). Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman, Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.
REL_ST 4500: Greek and Roman Religion
(same as AMS 4500; cross-leveled with REL_ST 7500). Survey of religious development among the Greeks and Romans.
Credit Hours: 3
Prerequisites: Honors eligibility required

REL_ST 4535: Monastic Worlds
(same as MDVL_REN 4535; cross-leveled with REL_ST 7535, MDVL_REN 7535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. Following two weeks of online course modules, students will travel to the Benedictine communities of Conception Abbey in Conception, Missouri and Mount Saint Scholastica's in Atchison, Kansas, for additional face-to-face classes and research projects. On-site, students will participate in communal living and attend face-to-face classes on the historical and cultural worlds of medieval and early modern Europe. They will practice ethnography through observation of and participation in communal life of prayer, study, book production, and labor. Students will also have the opportunity to work with the manuscripts and rare books owned by these communities and visit the largest reliquary collection in North America, housed at the nearby Benedictine community of the Sisters of Perpetual Adoration in Clyde, MO. This course has an associated fee. Contact teaching faculty for this year’s fee details. Graded on A-F basis only.
Credit Hours: 3

REL_ST 4630: Sanskrit I
(same as S_A_ST 4350). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist Literature.
Credit Hours: 3

REL_ST 4704: Religion and Black Freedom
(same as BL_STU 4704). In this course, we will explore the role of religion in the shaping of the African diaspora in the Americas through discussions of the readings. We will focus on the use of religion to pursue emancipation from enslavement and the concept of full freedom. Research and theories from mainly historical, religious, studies, and literature will be used to examine some of the ways in which black people have improved their condition through religion. The main objective of this course is to study the connections between religion and the fashioning of black resistance to slavery and systems of domination after slavery.
Credit Hours: 3

REL_ST 4750: Women, Religion and Culture
(same as WGST 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs.
Credit Hours: 3

REL_ST 4750: Women, Religion and Culture
(Same as ANTHRO 7280) This course examines how anthropologists conceptualize religious behavior, and how archaeologists use material
remains to examine past religious behavior, rituals, religious practitioners, cosmological constructs, worldview and ideology in the Americas.

Credit Hours: 3
Prerequisites: ANTHRO 2020 and/or REL_ST 2100

REL_ST 7287: Empire: Intellectual History, Literature, and Society
(same as PEA_ST 7287; cross-leveled with REL_ST 4287). Intellectuals and writers passionately debated the wisdom of colonies, free trade, and war as economies became increasingly global over the centuries. The proponents, critics, and interpreters of Empire will offer us rich examples of themes and theories in the culture of specific nations and eras. Intellectual life will be studied in the context of developments in social inequality, the culture of classes, media of communication, education, identities, transnational governance, and the nation-state. The course will be offered with different national and historical foci under different instructors, and may be repeated for credit with different instructors. Counts as the capstone experience for Peace Studies and is open to majors of other disciplines.

Credit Hours: 3

REL_ST 7380: Anthropological Theory of Religions
(same as ANTHRO 7380). Course provides a critical evaluation of anthropological explanations of various forms of traditional religious behavior such as magic, shamanism, divination, ritual, mythology and witchcraft. The anthropological explanations examined range from nineteenth century classics to the current approaches of today.

Credit Hours: 3

REL_ST 7500: Greek and Roman Religion
(cross-leveled with REL_ST 4500, AMS 4500). Survey of religious development among the Greeks and Romans.

Credit Hours: 3
Recommended: AMS 1060 and junior standing

REL_ST 7510: The Catholic Intellectual Tradition
(cross-leveled with REL_ST 4400), Students will read the great thinkers of the Catholic church such as Augustine, Abelard, Bernard of Clairvaux, Aquinas, Bonaventure, Nicholas of Cusa, Pascal, Newman, Maritain, Rahner, Johnson, Tracy. The theme examined may vary from year to year.

Credit Hours: 3

REL_ST 7535: Monastic Worlds
(same as MDVL_REN 7535; cross-leveled with MDVL_REN 4535, REL_ST 4535). Monastic Worlds is an experiential learning course designed to serve as a Humanities Field School in medieval and early modern studies. It will be taught by faculty from UMKC and UMC through the Intercampus Course Sharing initiative. The class introduces students to humanities research methodology and the religious history and culture of premodern Europe and the contemporary Midwest by using the monastic communities as a focal point to learn about musicology, history, art history, literature, and religion. This course has an associated fee. Contact teaching faculty for this year's fee details. Graded on A-F basis only.

Credit Hours: 3

REL_ST 7630: Sanskrit I
(same as S_A_ST 7630). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist literature.

Credit Hours: 3

REL_ST 7640: Sanskrit II
(same as S_A_ST 7640). This course is intended as a "sampler" of Sanskrit literature. We will read Sanskrit texts in the original. The objectives of the course are 1) Expanding the students' knowledge of the Sanskrit language, 2) To acquaint the students with a broad range of textual genres in Sanskrit literature, and 3) To acquaint the students with some central ideas of Hindu and Buddhist philosophy.

Credit Hours: 3

REL_ST 7720: Introduction to Daoism
An introduction to the Daoist religious tradition, beginning with its background in earlier forms of philosophy, ritual, and belief. We will follow the development of the various Daoist schools and movements over the centuries and examine key aspects of their belief and practice, both historical and contemporary.

Credit Hours: 3

REL_ST 7750: Women, Religion and Culture
(same as WGST 7750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

Credit Hours: 3

REL_ST 7990: Independent Readings in Religious Studies
Independent readings and research selected in consultation with supervisory faculty.

Credit Hours: 3

REL_ST 8005: Topics in Religious Studies-Humanities
Organized study of selected topics which vary by semester and are announced at time of registration.

Credit Hours: 3

REL_ST 8090: Research and Thesis in Religious Studies
Research and writing for master's thesis. Graded on S/U basis only.
REL_ST 8200: Religious Texts and Interpretation: The Veda
(same as S_A_ST 7200). This course examines the Veda, the foundational scripture of Hinduism. It includes close study of Vedic texts and rituals and the influence, interpretation, and application of the Veda in the later Hinduism.

Credit Hours: 3

REL_ST 8210: Indian Buddhism
This course examines the role of sacred texts in the Theravada and Mayayana Buddhist traditions. The course will emphasize canon formation and ideas about sacred texts in Buddhist traditions.

Credit Hours: 3

REL_ST 8700: Seminar in Folklore
(same as ANTHRO 8157 and ENGLSH 8700). Focus on the roots of folklore scholarship and methodology and their evolution in modern approaches to the study of oral, traditional verbal genres and their performance in natural folk groups.

Credit Hours: 3

**Respiratory Therapy (RS_THR)**

RS_THR 1000: Introduction to Respiratory Therapy
Introductory course to assist students acquiring information about the respiratory therapy profession. Students observe therapists in hospitals and participate in lectures on credentialing, program requirements, placement and future trends in the profession. Graded on S/U basis only.

Credit Hour: 1

RS_THR 3000: Fundamentals of Respiratory Care
Orientation to the profession. Focus on professional attributes of communication, teamwork, licensure and safety.

Credit Hour: 1

Prerequisites: acceptance into respiratory therapy major

RS_THR 3220: Equipment and Therapeutics

Credit Hours: 3

Prerequisites: Restricted to students in the Respiratory Therapy Program

Corequisites: RS_THR 3240

RS_THR 3240: Assessment and Therapeutics Lab
Evidence-based application of assessment techniques and therapeutic management of cardiopulmonary disorders. Course content includes equipment and skills associated with physical examination, blood gas analysis, chest imaging, oxygen and aerosolized pharmaceutical delivery, airway clearance therapy, lung expansion, and airway management. Emphasis placed on competency development for clinical application. Graded on S/U basis only.

Credit Hours: 3

Prerequisites or Corequisites: RS_THR 3220, RS_THR 3941

Prerequisites: Restricted to students admitted into the Respiratory Therapy Program

RS_THR 3290: Cardiopulmonary Pharmacology
To provide the student with specific knowledge of the pharmacologic strategies in treating cardiopulmonary disorders. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: restricted to students in the respiratory therapy program

RS_THR 3420: Principles of Mechanical Ventilation
Continuation of RS_THR 3220. Emphasis on the principles of mechanical ventilation, including physiologic and clinical application.

Credit Hours: 3

Prerequisites: RS_THR 3220, RS_THR 3941 and RS_THR 4040

RS_THR 3420W: Principles of Mechanical Ventilation - Writing Intensive
Continuation of RS_THR 3220. Emphasis on the principles of mechanical ventilation, including physiologic and clinical application.

Credit Hours: 3

Prerequisites: RS_THR 3220, RS_THR 3941 and RS_THR 4040

RS_THR 3440: Mechanical Ventilation Lab

Credit Hours: 3

Prerequisites: RS_THR 3220, RS_THR 3941, RS_THR 4040

RS_THR 3941: Clinical Practice I
To be taken concurrently with RS_THR 3220 for which it serves as an extension of the laboratory time and an opportunity for structured clinical experience exposures.

Credit Hours: 2

RS_THR 3942: Clinical Practice II
To be taken concurrently with RS_THR 3240, for which it serves as an extension of the laboratory time, and an opportunity for structured clinical experience exposures.

Credit Hours: 4

RS_THR 3943: Clinical Practice III
Continuation of supervised clinical experience from RS_THR 3942. Graded on A-F basis only.

Credit Hours: 2

<td>Independent work on special problems related to cardiopulmonary health. Course not offered for graduate credit. Some sections of the course may be graded on either A-F or S/U basis only.</td>
<td>1-99</td>
<td>Credit Hour: 1-99; Prerequisites: instructor's consent required</td>
<td></td>
</tr>
<tr>
<td>RS_THR 4220: Community and Patient Education I</td>
<td>Design and implement materials for educational presentations for a given patient population. Graded on A-F basis only.</td>
<td>1</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4240: Pulmonary Rehabilitation</td>
<td>Focus is on an interdisciplinary approach to pulmonary rehabilitation and home care of the adult cardiopulmonary patient. Graded on A-F basis only.</td>
<td>3</td>
<td>Credit Hours: 3; Prerequisites: instructor's consent required</td>
<td></td>
</tr>
<tr>
<td>RS_THR 4220: Pediatric Respiratory Care</td>
<td>Evaluation and management of pulmonary, medical and surgical pediatric conditions requiring respiratory care. Emphasis on pediatric resuscitation, pathophysiology, treatment and prevention of respiratory conditions, mechanical ventilation, lab interpretation.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4440: Organization and Administration (same as RA_SCI 4440 and CPD 4440)</td>
<td>Examines design and operation of allied health service departments and educational programs, including facilities, personnel procedures, record systems, ethics, medical-legal aspects, interdepartmental relations and curriculum development.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4460: Evidence-Based Medicine in Respiratory Care</td>
<td>This course is intended to facilitate the development of the student's ability to obtain and integrate patient assessment information and key findings and to formulate clinical decisions in respiratory therapy practice as well as use an evidence-based medicine approach to define respiratory clinical practice.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4460W: Evidence-Based Medicine in Respiratory Care - Writing Intensive</td>
<td>This course is intended to facilitate the development of the student's ability to obtain and integrate patient assessment information and key findings and to formulate clinical decisions in respiratory therapy practice as well as use an evidence-based medicine approach to define respiratory clinical practice.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4620: Pulmonary Function Technologies</td>
<td>This course will provide the student with a specific knowledge of the testing procedures and equipment for pulmonary function technology. The student will learn to interpret pulmonary function tests and perform quality assurance within the pulmonary function laboratory.</td>
<td>2</td>
<td>Restricted to Respiratory Therapy students only</td>
<td></td>
</tr>
<tr>
<td>RS_THR 4640: Teaching Practicum</td>
<td>Structured and supervised experience identifying student characteristics, methods for teaching, improving assessment, current development and instructional design.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4660: Advanced Mechanical Ventilation Theory</td>
<td>Exploration of advanced disease management via specific disease processes as well as concepts and modes of mechanical ventilation. Emphasis will be placed on mode selection for various disease and how new modes of mechanical ventilation impact disease management.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4720: Advanced Pulmonary Function Technology</td>
<td>This course will focus on the respiratory therapist's role in diagnostic testing. Topics include pulmonary function tests, exercise tests, and metabolic studies. In addition the course briefly addresses polysomnography, pulmonary rehabilitation, and home care. Graded on A-F basis only.</td>
<td>2</td>
<td>Restricted to Respiratory Therapy students only</td>
<td></td>
</tr>
<tr>
<td>RS_THR 4820: Adult Critical Care</td>
<td>This course will focus on the respiratory therapist's role in the adult critical care environment. Topics include airway management, mechanical ventilation, general adult critical care and functioning as a vital member of the critical care team.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>RS_THR 4930: Current Issues in Respiratory Care (cross-leveled with RS_THR 7930)</td>
<td>Identification and analysis of current issues in Respiratory Care with practice implications. Emphasis given to identification and evaluation of nontraditional information sources (e.g., social networking, internet). Graded on A-F basis only.</td>
<td>3</td>
<td>Restricted to Respiratory Therapy students only</td>
<td></td>
</tr>
</tbody>
</table>
**RS_THR 4940: Clinical Practice IV**
Structured and supervised clinical experience and case conferences regarding bioterrorism response and emergency/disaster planning.
Credit Hours: 5

**RS_THR 4973: Clinical Practice V**
An extension of the supervised practicum begun in RS_THR 4940. Emphasis in adult critical care and special procedures including bronchoscopies, cardiac catheterization and chest tube placement.
Credit Hours: 4

**RS_THR 4983: Clinical Practice VI**
An extension of the supervised practicum begun in RS_THR 4940. Emphasis in perinatal and pediatric critical care including pediatric pulmonary function testing and airway management.
Credit Hours: 4

**RS_THR 4990: Respiratory Therapy Capstone**
Integration of literature, knowledge of previous coursework and clinical experience.
Credit Hours: 2
Prerequisites: Respiratory Therapy Majors Only

**RS_THR 4993: Clinical Practice VII**
An extension of the supervised practicum begun in RS_THR 4940. Emphasis in rehabilitation and home care, inservice education, and management. Students will participate in on-going research projects and community service activities.
Credit Hours: 5

**RS_THR 7930: Current Issues in Respiratory Care**
Identification and analysis of current issues in Respiratory Care with practice implications. Emphasis given to identification and evaluation of nontraditional information sources (e.g., social networking, internet).
Credit Hours: 3
Prerequisites: CDS 4955 or HLTH SCI 3900 or Instructor consent

**RM_LAN 2310: Literature of the African Diaspora**
A postcolonial analysis of selected literary texts interpreting the African diaspora in the Americas. Exemplary texts from the Caribbean (English, French, Spanish), South America and the United States are discussed in comparative perspective. No knowledge of Spanish required.
Credit Hours: 3
Prerequisites: ENGLISH 1000

**RM_LAN 2820: Trends in World Cinema**
This course is a historical overview of the major trends in international cinema. It focuses on the intersection of aesthetics, industry, and ideological and social concerns in cinematic production.
Credit Hours: 3
Prerequisites: sophomore standing, ENGLSH 1800 or FILM_S 1800

**RM_LAN 3200: Catalan Culture and Identity**
Students in this course are not expected to have previous exposure to Catalan instruction. If they do, it will enhance their learning experience. Knowledge of another Romance language might be beneficial as well. This is a course focused on Catalan culture and identity. Students will learn about the history of the language, the language policies in Spain and Europe, Catalan literature, cinema, music, and food. Students will read different materials in English for the most part. Course is taught in English.
Credit Hours: 3
Prerequisites: sophomore standing required

**RM_LAN 4310: Literature of the African Diaspora**
A study, in English translation, of writings by authors of African descent in the Americas.
Credit Hours: 3
Prerequisites: junior standing

**RM_LAN 8085: Problems in Romance Languages**
Credit Hour: 1-99
Prerequisites: instructor's consent

**Rural Sociology (RU_SOC)**

**RU_SOC 1000: Rural Sociology**
Introduction to basic concepts and principles of sociology with a focus on rural populations and places. The course explores interconnections between rural/urban and local global economies and cultures. Students are exposed to the rich diversity of rural society, social changes underway, and to current social issues. (Students may not earn credit for both RU_SOC 1000 and SOCIOL 1000).
Credit Hours: 3

**RU_SOC 1104: Topics in Rural Sociology - Social Science**
Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.
Credit Hour: 1-3
RU_SOC 1000 or SOCIOL 1000

RU_SOC 1120: Population and the Environment
(same as SOCIOL 1120 and PEA_ST 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.

Credit Hours: 3

RU_SOC 1150: The Amish Community
(same as PEA_ST 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter-cultural pressures, stresses, social change.

Credit Hours: 3

RU_SOC 1150W: The Amish Community - Writing Intensive
(same as PEA_ST 1150). Examines historical antecedents and contemporary culture and social structure of the Amish. Topics include cultural symbols, life ceremonies, the family, counter-cultural pressures, stresses, social change.

Credit Hours: 3

Recommended: RU_SOC 1000 SOCIOL 1000 or ANTHRO 1000

RU_SOC 2203W: Topics in Rural Sociology - Behavioral Science - Writing Intensive
Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 1-3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2225: Science, Technology and Society
Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2225W: Science, Technology and Society - Writing Intensive
Overview of the social influences that shape science including how scientific knowledge is contested and legitimated; how social forces (among them mass communication) influence the choice of innovations; and the role social systems and sectors play in the use and benefit of science. Communication intensive-discussion, presentation and essay based.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 2289: Towns in Missouri and the Midwest: Voices and Inequalities
(same as PEA_ST 2289, GEOG 2289). Focusing on towns and communities and their regional history and cultural traditions, we will examine the issues and concerns of small towns in the context of recent hardships and adverse economic trends. Examples of topics to be covered include case studies of communities such as Marceline, Missouri (Walt Disney's boyhood home), race and the immigration of non-whites in to rural areas; gender roles in small communities, the role of religion in small-town identity formation, and other current issues faced by "middle America". The responsiveness of government, large corporations, and institutions to the problems of diverse communities will be critically examined, with a multidisciplinary approach that will draw on key theories and works in the disciplines of sociology, rural sociology, community development, and geography.

Credit Hours: 3

RU_SOC 2950: Social Research I
(same as SOCIOL 2950). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research. Required for Sociology majors.

Credit Hours: 3

RU_SOC 3010: Leadership in Today's World
(same as AG_ED_LD 3010). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

Credit Hours: 3

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 3010H: Leadership in Today's World - Honors
(same as AG_ED_LD 3010H). Critically examines the leaders and leadership surrounding the greatest challenges to society today and in the future, while developing awareness and understanding of global and local issues in agriculture, democracy, civil society, business, and the environment. Course also focuses on fostering civil discourse and enhancing engagement. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: Honors eligibility required

Recommended: RU_SOC 1000 or SOCIOL 1000

RU_SOC 3085: Problems in Rural Sociology
Credit Hour: 1-99

Prerequisites: instructor's consent

RU_SOC 3100: Recent Theories in Sociology
(same as SOCIOL 3100). Introduction to major theoretical positions and issues in contemporary American sociology. Logical and intellectual structure of major theoretical schools: functionalism, conflict, exchange, symbolic interaction, phenomenological-ethnomethodological theories.

Credit Hours: 3

Recommended: SOCIOL 2200
RU_SOC 3235: Global Perspectives and Realities
Designed for students who have or wish to study, live or work outside of their home country. Presents sociological perspectives on globalization and intercultural communication as well as the steps needed to prepare for a valuable and safe experience abroad.

Credit Hours: 3

RU_SOC 3235W: Global Perspectives and Realities - Writing Intensive
Designed for students who have or wish to study, live or work outside of their home country. Presents sociological perspectives on globalization and intercultural communication as well as the steps needed to prepare for a valuable and safe experience abroad.

Credit Hours: 3

RU_SOC 3304: Topics in Rural Sociology - Social Science
Organized study of selected topics. Subjects and earnable credit vary from semester to semester. May be repeated.

Credit Hour: 2-3
Recommended: 6 hours Rural Sociology or Sociology, or junior standing

RU_SOC 3310: Society, Agriculture and Natural Resources
Explore the human dimensions of agriculture and natural resources through an overview of key areas in natural resource social science. Diverse conceptual approaches and empirical research topics related to society-natural resource interactions are included.

Credit Hours: 3
Recommended: junior standing or instructor's consent

RU_SOC 3325: Sociology of Food and Nutrition
This class explores individual food choices and larger social forces. Topics include: world hunger, food and the environment; food choices and culture, class and personal identity; the effects of social stigmas, advertising trends, and government regulations on body image; new social movements for sustainable food systems.

Credit Hours: 3
Recommended: ENGLISH 1000 and junior or senior standing or instructor's permission

RU_SOC 3325W: Sociology of Food and Nutrition - Writing Intensive
This class explores individual food choices and larger social forces. Topics include: world hunger, food and the environment; food choices and culture, class and personal identity; the effects of social stigmas, advertising trends, and government regulations on body image; new social movements for sustainable food systems.

Credit Hours: 3
Recommended: ENGLISH 1000 and junior or senior standing or instructor's permission

RU_SOC 3950W: Social Research I - Writing Intensive
(same as SOCIOL 3950W). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research. Required for Sociology majors.

Credit Hours: 3

RU_SOC 4325: American Community Studies
(cross-leveled with RU_SOC 7325). An introduction to the study of American communities. The course starts with community theories and then focuses on a wide variety of historic and contemporary community studies such as Plainville, Middletown, Sidewalk and others. Seminar format.

Credit Hours: 3

RU_SOC 4335H: Social Change and Development - Honors
(same as SOCIOL 4335; cross-leveled with SOCIOL 7335, RU_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3
Prerequisites: Honors eligibility required
Recommended: RU_SOC 1000 or SOCIOL 1000 and junior standing

RU_SOC 4335: Social Change and Development
(cross-leveled with RU_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3

RU_SOC 4341: Building Communities from the Grassroots
(same as PEA_ST 4341; cross-leveled with RU_SOC 7341). Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue.

Credit Hours: 3
Recommended: instructor's consent

RU_SOC 4342: Empowering Communities for the Future
(cross-leveled with RU_SOC 7342). Focuses on the professional practice and applications of community-based development including participatory action research, community economic development, organizational development, use of technology, citizen education and integration of practice. Graded on A-F basis only.

Credit Hours: 3
Recommended: instructor's consent

RU_SOC 4343: Creating Capacity for Dynamic Communities
(cross-leveled with RU_SOC 7374). Addresses community and citizen power; large group intervention processes for change; facilitating small group process; community organizing; community sustainability, dealing with poverty and disenfranchisement; community conflict resolution; ethics; and integration into practice. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent
RU_SOC 4370: Environmental Sociology
(same as SOCIOL 4370; cross-leveled with SOCIOL 7370, RU_SOC 7370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.
Credit Hours: 3
Prerequisites: Instructor's consent

RU_SOC 7370: Environmental Sociology
(same as SOCIOL 7370; cross-leveled with SOCIOL 4370, RU_SOC 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.
Credit Hours: 3

RU_SOC 7120: Social Statistics
(same as SOCIOL 7120; cross-leveled with RU_SOC 4120, SOCIOL 4120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.
Credit Hours: 3
Prerequisites: SOCIOL 2950

RU_SOC 7325: American Community Studies
(cross-leveled with RU_SOC 4325). An introduction to the study of American communities. The course starts with community theories and then focuses on a wide variety of historic and contemporary community studies such as Plainville, Middletown, Sidewalk and others. Seminar format.
Credit Hours: 3

RU_SOC 7335: Social Change and Development
(same as SOCIOL 7335; cross-leveled with SOCIOL 4335, RU_SOC 4335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from other disciplines.
Credit Hours: 3
Prerequisites: RU_SOC 1000 or SOCIOL 1000

RU_SOC 7341: Building Communities from the Grassroots
(cross-leveled with RU_SOC 4341). Introduction and application of basic community development concepts, methods and practical skills for involving and empowering local citizens and leaders effectively in community-based efforts regardless of the issue.
Credit Hours: 3
Prerequisites: instructor's consent

RU_SOC 7342: Empowering Communities for the Future
(cross-leveled with RU_SOC 7342). Focuses on the professional practice and applications of community-based development including participatory action research, community economic development, organizational development, use of technology, citizen education and integration of practice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

RU_SOC 7343: Creating Capacity for Dynamic Communities
(cross-leveled with RU_SOC 4343). Addresses community and citizen power; large group intervention processes for change; facilitating small group process; community organizing; community sustainability, dealing with poverty and disenfranchisement; community conflict resolution; ethics; and integration into practice. Graded on A-F basis only.

RU_SOC 8085: Problems in Rural Sociology
Research for student capable of semi-independent work.
Credit Hour: 1-99
Prerequisites: Instructor's consent

RU_SOC 8090: Research in Rural Sociology
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

RU_SOC 8130: Advanced Social Statistics
Credit Hours: 3
Prerequisites: RU_SOC 4120 or equivalent

RU_SOC 8287: Seminar on Sustainable Development
(same as SOCIOL 8287). An interdisciplinary examination of sustainable development focusing on social, economic, cultural and environmental dimensions of development. International and domestic issues and approaches to sustainable development are included.
Credit Hours: 3

RU_SOC 8435: Political Ecology
Political ecology is an analytical approach to environment and natural resource issues at local, regional and global scales, emphasizing political, economic, cultural, social and historical factors and their relationship to ecological trends and processes. Seminar format. Graded on A-F basis only.
Credit Hours: 3

RU_SOC 8436: Community, Natural Resources and Sustainability
A graduate seminar on conceptual and methodological (mixed methods) approaches to natural resource sustainability issues at the human community level. Focuses on theoretical, methodological, and empirical topics related to the interactions between community, natural resources and sustainability. Graded on A-F basis only.
Credit Hours: 3
RU_SOC 8444: Agriculture, Food and Community
Introduces key debates in the sociology of food and agriculture. Includes research on the structure and history of the agriculture system and its impacts on farmers, communities and the natural environment.
Credit Hours: 3

RU_SOC 8447: Seminar on Contemporary Issues in Rural Sociology
Seminar on Contemporary Issues in Rural Sociology
Credit Hour: 1-99

RU_SOC 8450: Research in Rural Sociology
Research not expected to terminate in thesis or dissertation.
Credit Hour: 1-99
Prerequisites: instructor's consent

RU_SOC 8510: Research Methods and Design
(same as AG_ED_LD 8510, AAE 8510). This course will give students a foundational understanding of quantitative research methods and design in the social and behavioral sciences. The main objective is to help students identify and formulate their own research questions and develop and implement a process for answering them. Students will examine the nature of the research process, explore the connection between theory and empirical research, identify viable research topics, critique published research, learn how to structure good arguments, understand the structure of research papers and proposals, plan and manage research activities, and become familiar with research ethics. Graded on A-F basis only.
Credit Hours: 3

RU_SOC 8540: Methods of Qualitative Research
(same as AG_ED_LD 8540). Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.
Credit Hours: 3

RU_SOC 8610: Economic and Sociological Approaches to Collective Action
(same as AAE 8610). This course identifies analytical and methodological tools, including rational choice and social capital, to deal with practical problems of collective action in: agricultural cooperatives, rural community development, political interest groups and other mutuals.
Credit Hours: 3
Prerequisites: AAE 7972

RU_SOC 9090: Research in Rural Sociology
Research leading to thesis or dissertation. Graded on a S/U basis only.
Credit Hour: 1-99

RU_SOC 9287: Seminar in Qualitative Methods in Sociology
(same as SOCIOL 9287). Examination of various qualitative methods of research, including problem-formulation, access and interpretation of data, theory-generation, and preparation of research reports.
Credit Hours: 3
Prerequisites: RU_SOC 8510 or instructor's consent

RU_SOC 9437: Synthesis of Theory and Method in Sociology
The purpose of the course is to provide the student with a critical understanding of the basic theoretical paradigms employed in the development of research projects in sociology. The course is designed for graduate students.
Credit Hours: 3
Prerequisites: RU_SOC 4130 and RU_SOC 8510, or instructor's consent

RU_SOC 9480: Community Survey Research
(same as SOCIOL 9987). This course applies social science survey research methods to the unique kinds of problems that arise in the study of whole communities.
Credit Hours: 3
Prerequisites: RU_SOC 8510 or equivalent

RU_SOC 9510: Data Collection, Analysis and Interpretation
(same as AG_ED_LD 9510). A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: AG_ED_LD 8510 or RU_SOC 8510 or instructor's consent

Russian (RUSS)

RUSS 1100: Elementary Russian I
Five hours of classroom instruction, with one hour lab work weekly. For beginners with no prior knowledge of Russian.
Credit Hours: 6

RUSS 1200: Elementary Russian II
Five hours of classroom instruction, with one hour lab work weekly.
Credit Hours: 6
Prerequisites: C- or better in RUSS 1100 or equivalent. or instructor consent

RUSS 2001: Undergraduate Topics in Russian-General
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-3
RUSS 2005: Undergraduate Topics in Russian-Humanities  
Organized study of selected topics. Subjects and credits may vary from semester to semester. May be repeated for credit with departmental consent. No language credit.

<td>RUSS 2100:</td>
<td>Classics and Iconoclasts: An Introduction to Russian Literature</td>
<td>Designed to introduce students to some of the major genres, issues, and approaches in the study of Russian literature. Begins with the most classic of Russian authors, the so-called &quot;father of Russian literature&quot; Aleksandr Pushkin, then moves on to two &quot;classics&quot; from the 19th century (Gogol, Chekhov) and two &quot;iconoclasts&quot; from the first part of the 20th (Mayakovsky, Kharms). Covers a range of genres, including poetry, short story, and drama, as well as letters, essays and manifestoes. Course reading list includes secondary essays that both shed light on specific texts/authors as well as provide models for critical and theoretical approaches to literature, with an emphasis on Russian Formalism. Readings and discussions in English; no knowledge of Russian language or literature required.</td>

**RUSS 3390W: True Fictions: Russian Prose since 1900 - Writing Intensive**
Survey of Russian prose fiction of the twentieth and early twenty-first century. During this time Russia experienced a series of drastic changes in society and culture, and as often happens the artists responded more rapidly and insightfully than anyone else. This was a time of radical experimentation with the very nature of literature, and we will ready and examine some of the fascinating results. Course gives a short history of Russian prose fiction after 1900, offers a theory of analytical reading of imaginative prose, and hones the skills of intelligent writing about evaluative reading. Readings, lecture and discussion in English; no previous knowledge of Russian literature is assumed.

**Credit Hours:** 3  
**Prerequisites:** sophomore standing, or instructor's consent

---

**RUSS 4001: Topics in Russian-General**
Organized study of selected topics. Subjects and eamable credit may vary from semester to semester. May be repeated for credit with departmental consent.

---

**RUSS 4005: Topics in Russian-Humanities**
Organized study of selected topics. Subjects and eamable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: instructor's consent,

**Credit Hour:** 1-3

---

**RUSS 4005W: Topics in Russian-Humanities - Writing Intensive**
Organized study of selected topics. Subjects and eamable credit may vary from semester to semester. May be repeated for credit with departmental consent. Prerequisites: instructor's consent,

**Credit Hour:** 1-3

---

**RUSS 4160: Advanced Russian Conversation**
Advanced syntax, idiomatic constructions, and vocabulary building.

**Credit Hours:** 3  
**Prerequisites:** RUSS 3130 or RUSS 3160 or instructor's consent

---

**RUSS 4350: Special Readings in Russian**
Special Readings in Slavic literature or linguistics.
RUSS 4420: Russian Poetry
Survey of readings in Russian poetry from its beginnings to present.

Credit Hours: 3
Prerequisites: instructor's consent

RUSS 4430: Russian Drama
Selected readings in and discussions of major Russian plays of the nineteenth and twentieth century.

Credit Hours: 3
Prerequisites: junior standing or instructor's consent

RUSS 4430W: Russian Drama - Writing Intensive
Selected readings in and discussions of major Russian plays of the nineteenth and twentieth century.

Credit Hours: 3
Prerequisites: junior standing or instructor's consent

RUSS 4435: Russian Prose
Explores the development of prose writing in modern Russian letters, paying special attention to native generic designations. Considers dual imagery of realist/naturalist and romantic/fantastic approaches. Studies diverse examples: rasskaz (story), the povest' (tale), the novella, novel essay early 19th c. through 20th c. Considers ways in which literature can itself stand as a philosophical form.

Credit Hours: 3
Prerequisites: junior standing or instructor's consent

RUSS 4550: Nabokov's Russian Fiction
Systematic analysis of Vladimir Nabokov's fiction, both novels and short stories. Emphasis on the artistic properties of prose. Lectures and class discussion in English. Readings in Russian (English translations for undergraduate students).

Credit Hours: 3
Prerequisites: junior standing or instructor's consent

RUSS 4820: Blogging the World: The Web in Cultural Context
(same as GERMAN 4820, FRENCH 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Students in journalism, foreign language, international studies, political science and various other disciplines track cultural developments and information on no-US Web sites, blogs and digital social networks along with exploring various historical forms of communication that preceded the digital era of the Web. Students analyze the potential and limitations/ effects of blogs and the web in specific contemporary cultural contexts and as part of the broader historical evolution of the web. The course is taught in English. The goal of this course is two-fold: students learn the particulars of web blogging, explore various features of the contemporary social network landscape while focusing on the concept of culture, in particular the cultures of Europe and the US. Questions asked are: what is culture? What is common or popular right now in other cultures? And how do new social networks amplify or alter certain features or culture across national and international contests?

Credit Hours: 3
Prerequisites: sophomore standing required

RUSS 4820W: Blogging the World: The Web in Cultural Context - Writing Intensive
(same as GERMAN 4820, FRENCH 4820). Innovative interdisciplinary course addresses issues of access to international news and specific cultural context working in cross-disciplinary teams. Credit Hours: 3
Prerequisites: sophomore standing required

RUSS 4840: Totalitarianism and Culture
(same as GERMAN 4840; cross-leveled with GERMAN 7840, RUSS 7840). In this course, we will explore the politics and poetics of totalitarian culture by examining the paintings, music, sculptures, buildings, and films produced under the rule of these regimes. In the process, we will learn how Nazi and Soviet culture producers made carefully calibrated appeals to their respective mass audiences, drawing upon the German and Russian cultural traditions - and on scientific rhetorics of cultural history and racial destiny - in crafting their utopian visions of worlds transformed, wrongs righted, and societies perfected.

Credit Hours: 3
Recommended: Junior standing or above; students taking this course for WI should have taken a 2000- or 3000-level WI course before beginning this class

RUSS 4840H: Totalitarianism and Culture - Honors
(same as GERMAN 4840W; cross-leveled with GERMAN 7840, RUSS 7840). In this course, we will explore the politics and poetics of totalitarian culture by examining the paintings, music, sculptures, buildings, and films produced under the rule of these regimes. In the process, we will learn how Nazi and Soviet culture producers made carefully calibrated appeals to their respective mass audiences, drawing upon the German and Russian cultural traditions - and on scientific rhetorics of cultural history and racial destiny - in crafting their utopian visions of worlds transformed, wrongs righted, and societies perfected.

Prerequisites: instructor's consent

RUSS 8050: Research in Russian
Translations or creative work not leading to thesis.

Credit Hour: 1-99
Prerequisites: instructor's consent

RUSS 8085: Problems in Russian and Slavonic Studies
Special problems in Slavic literature or linguistics.

Credit Hour: 1-99
Prerequisites: instructor's consent

RUSS 8085: Problems in Russian and Slavonic Studies
Special problems in Slavic literature or linguistics.
RUSS 8090: Thesis Research in Russian
Independent research leading to a Master's thesis. Graded on S/U basis only.
Credit Hour: 1-6
Prerequisites: instructor's consent

RUSS 8220: Russian Intellectual History and Critical Theory I
Survey of Russian literary and cultural criticism of the 18th and 19th centuries. Course texts will include representative critical essays as well as selected literary texts. May be taken before or after RUSS 8230.
Credit Hours: 3

RUSS 8305: Topics in Slavic Linguistics
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hour: 1-99
Prerequisites: instructor's consent

RUSS 8405: Topics in Slavic Literatures
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester.
Credit Hours: 1-99
Prerequisites: instructor's consent

RUSS 8510: The Art and Life of Pushkin
Gives a conceptual thematic overview of Alexander Pushkin's lyrical poetry, as well as some dramatic work and prose. Special attention paid to the parallel development of his artistic and religious beliefs. Poetry read in Russian; prose and dramatic poems in Russian and English.
Credit Hours: 3

RUSS 8650: Old Church Slavonic
Designed to familiarize student with the phonological system, inflectional morphology and most important literature of the oldest recorded Slavic language. Comparisons of OCS to modern Slavic languages.
Credit Hours: 3

SCI_AG_J 1160: Introduction to Science and Agricultural Communication
Overview of communications theory and practice related to the specific challenges of communicating about science and the food system. History of science and agricultural communications and how it is shaped by cultural values. Emphasis on learning to write clearly, concisely and effectively for a variety of formats including web, social media and print. News media writing, Media relations and informational campaigns. Ethics of public relations and journalism. Understanding audience. Overview of career opportunities.
Credit Hours: 3
Recommended: ENGLSH 1000

SCI_AG_J 2150: Problems in Science and Agricultural Journalism
For undergraduates majoring in science and agricultural journalism. May be repeated.
Credit Hour: 1-6
Prerequisites: instructor's consent

SCI_AG_J 2210: Communicating Science to the Public
Introduction to the history, theory and practice of communicating science to the general public. Emphasis on the interplay of science, human values and politics; also, the art and craft of writing and talking to lay audiences. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: ENGLSH 1000
Recommended: Sophomore standing

SCI_AG_J 2940: Internships in Science and Agricultural Journalism
May be repeated for credit.
Credit Hour: 1-3
Prerequisites: instructor's consent

SCI_AG_J 3201: Topics in Science and Agricultural Journalism
Instruction in select subject matter areas in the field of communications.
Credit Hour: 1-3
Prerequisites: instructor's consent

SCI_AG_J 3210: Fundamentals of Communications
Learn to write about complex topics so that your audience understands and relates to the issues. Students are challenged to become critical thinkers by evaluating and revising business documents. Discuss the free flow of information to the public in a democratic society, media literacy and becoming a discerning consumer of information. Ethical issues related to communicating in the workplace. Through practical application, learn skills in writing effective business messages: positive, negative, and persuasive messages. Learn to apply basic rules of grammar to written communications. Identify the purpose and audience for a written document and organize the information needed to write it. Develop and demonstrate oral presentation skills.
Credit Hours: 3
Prerequisites: ENGLSH 1000 and sophomore standing

SCI_AG_J 3210W: Fundamentals of Communications - Writing Intensive
Learn to write about complex topics so that your audience understands and relates to the issues. Students are challenged to become critical thinkers by evaluating and revising business documents. Discuss the free flow of information to the public in a democratic society, media literacy and becoming a discerning consumer of information. Ethical issues related to communicating in the workplace. Through practical application, learn skills in writing effective business messages: positive, negative, and persuasive messages. Learn to apply basic rules of grammar to written communications. Identify the purpose and audience for a written document and organize the information needed to write it. Develop and demonstrate oral presentation skills.
Credit Hours: 3
Prerequisites: ENGLISH 1000 and sophomore standing

**SCI_AG_J 3240: Communicating on the Web**
Learn to make a useful, content-driven web site using web authoring software (this is not a programming class). This course emphasizes informative content and functional design.

Credit Hours: 3

**SCI_AG_J 3385: Problems in Science and Agricultural Journalism**
Opportunity to apply journalism skills to agricultural subjects; opportunity to integrate communication processes within single medium or across media. Section 1: Corner Post Staff, Section 2: Problems in Science and Agricultural Journalism. May be repeated for up to 9 credit hours.

Credit Hour: 1-4
Prerequisites: instructor's consent

**SCI_AG_J 4301: Topics in Science and Agricultural Journalism**
Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: JOURN 4450 and Junior standing

**SCI_AG_J 4301HW: Topics in Science and Agricultural Journalism - Honors/Writing Intensive**
Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: JOURN 4450 and Junior standing; Honors Eligibility required

**SCI_AG_J 4301W: Topics in Science and Agricultural Journalism - Writing Intensive**
Instruction in select subject matter areas in the field of communications. Graded on A-F basis only.

Credit Hour: 1-3
Prerequisites: JOURN 4450 and Junior standing

**SCI_AG_J 4410: Readings in Science and Agricultural Journalism**
An examination of modern journalistic book-length storytelling about science, the food system, environment, natural resources and society. Students will learn about the authors and how they use theory and techniques of storytelling. Students will gain a deeper knowledge about how to pursue such information-gathering and writing, as well as develop their critical-thinking abilities and expertise in the subject matter covered by the books. They will read, analyze and write about the books and the ideas and times that shaped them. Each course will examine a particular subject grouping of books, for example several on farming, or on conservation, or on climate change.

Credit Hour: 1-3
Prerequisites: English 1000

**SCI_AG_J 4414: Field Reporting on the Food System and Environment**
(Same as JOURN 4414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day field trip. Graded A-F only.

Credit Hours: 3
Prerequisites: instructor's consent

**SCI_AG_J 4415: Current Issues in Science Journalism**
(Same as JOURN 4415) Focuses on covering the interplay of one or more current issues of concern to journalists, scientists and society. The focus for any given semester may be biotechnology, climate change, energy, food safety, global population growth, wildlife or another issue. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 2100 or instructor's consent

**SCI_AG_J 4480: Will Write for Food (and Wine)**
(Same as JOURN 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804. Restricted to Journalism and Science Agricultural Journalism students only

**SCI_AG_J 4480W: Will Write for Food (and Wine) - Writing Intensive**
(Same as JOURN 4480) Course focuses on food and wine writing in current U.S. culture. Come ready to create mouthwatering narrative and actively seek publishing your finished work. An emphasis will be placed on class participation and written critiques of peer-reviewed articles in class. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 4450 or JOURN 4804. Restricted to Journalism and Science Agricultural Journalism students only

**SCI_AG_J 4482: Field Reporting: Wine Country Writing**
(Same as JOURN 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 2100

**SCI_AG_J 4482W: Field Reporting: Wine Country Writing - Writing Intensive**
(Same as JOURN 4482). Students will examine wine culture, agricultural issues in the vineyard, wine trends, the historical context of wine and Missouri settlement, and more. Come ready to shape articles into sharp focus and make them fresh with input from fellow student critiques. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: JOURN 2100

**SCI_AG_J 4940: Internships in Science and Agricultural Journalism**
May be repeated for credit.

Credit Hours: 3
Prerequisites: JOURN 4450 and Junior standing; Honors Eligibility required
Credit Hour: 1-3
Prerequisites: instructor's consent
Recommended: 60 or more credit hours completed

SCI_AG_J 4970: Agriculture and the Media Senior Seminar Capstone
Provides background, knowledge of trends and experience with agricultural media.
Credit Hours: 3
Prerequisites: instructor's consent
Recommended: Science and Agricultural Journalism seniors take last Spring semester before graduation

SCI_AG_J 7301: Topics in Science and Agricultural Journalism
Selected current topics in science and agricultural journalism. Specific topics to be announced at time of registration. Course graded on A-F basis only.
Credit Hour: 1-3
Prerequisites: Instructor's consent

SCI_AG_J 7414: Field Reporting on the Food System and Environment
(same as JOURN 7414). Field reporting on the social, political, scientific, economic and ethical dimensions of the food system and environment, with emphasis on explanatory story-telling. Includes multi-day filed trip. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

Service Learning (SRV_LRN)

SRV_LRN 1090: Independent Study-Service Learning
Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community
Credit Hour: 1-3

SRV_LRN 1090H: Independent Study-Service Learning - Honors
Students participate in community service activities, attend regular meetings, conduct research, submit four journals, a short bibliography and a research paper on their service in the community.
Credit Hour: 1-3
Prerequisites: Honors eligibility required

SRV_LRN 2021: MU Community Engagement Project
The MU Community Engagement Project offers students the opportunity to engage in academically-based community services; project sections include tutoring and mentoring, public health policy and outreach, international services, and community development.
Credit Hour: 2-3
Prerequisites: Honors eligibility required

SRV_LRN 2021HW: MU Community Engagement Project - Honors/ Writing Intensive
The MU Community Engagement Project offers students the opportunity to engage in academically-based community services; project sections include tutoring and mentoring, public health policy and outreach, international services, and community development.
Credit Hour: 2-3
Prerequisites: Honors eligibility required

SRV_LRN 2021W: MU Community Engagement Project - Writing Intensive
The MU Community Engagement Project offers students the opportunity to engage in academically-based community services; project sections include tutoring and mentoring, public health policy and outreach, international services, and community development.
Credit Hour: 2-3

SRV_LRN 3028: Civic Leaders Internship
Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.
Credit Hour: 3-6
Prerequisites: consent and application required

SRV_LRN 3028H: Civic Leaders Internship - Honors
Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.
Credit Hour: 3-6
Prerequisites: consent and application required. Honors eligibility required

SRV_LRN 3028HW: Civic Leaders Internship - Honors/Writing Intensive
Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.
Credit Hour: 3-6
Prerequisites: consent and application required. Honors eligibility required

SRV_LRN 3028W: Civic Leaders Internship - Writing Intensive
Students in any major may enroll in 3-6 credit hour internships with state government offices and agencies.
Credit Hour: 3-6
Prerequisites: consent and application required

Social Work (SOC_WK)
SOC_WK 1110: Introduction to the Social Work Major
Students examine their interest in social work and other human service professions; learn of career possibilities in their interest area; and develop an educational plan to reach their goal.

Credit Hours: 1
Prerequisites: freshman or sophomore standing

SOC_WK 1115: Social Welfare and Social Work
Survey course that examines the history and development of social welfare in the United States and the profession of social work, as well as contemporary issues.

Credit Hours: 3

SOC_WK 1200: Criminal Justice
This course provides an introduction to the history and development of criminal justice in our country and includes policing and law enforcement, and the adjudication and court process as well as the terminology associated with each system. Theories on crime, prison, community corrections and reentry discussions for both juvenile and adult systems will be addressed. Emphasis will be placed on an overview to the major sociological and psychological perspectives on variations from normative individual and group behaviors prevalent in the U.S. society while providing a strengths perspective in which to understand them. Finally, this course will evaluate the delicate balance between community interest and personal freedom that criminal justice decision-making requires.

Credit Hours: 3

SOC_WK 2000: Exploration in Social and Economic Justice (same as PEA_ST 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. Course may be repeated two times for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 1000

SOC_WK 2000W: Exploration in Social and Economic Justice - Writing Intensive (same as PEA_ST 2000). This course explores issues of fairness and equality in economic, political and social systems, and applies social justice principles to major social problems. Course may be repeated two times for credit. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 1000

SOC_WK 2220: Human Behavior in the Social Environment
The first of two required courses providing an introduction to selected theories, multidisciplinary knowledge, and perspectives into human development and behavior. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 1000 or sophomore standing

SOC_WK 2220W: Human Behavior in the Social Environment - Writing Intensive
The first of two required courses providing an introduction to selected theories, multidisciplinary knowledge, and perspectives into human development and behavior. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: ENGLSH 1000 or sophomore standing

SOC_WK 3101: Topics in Social Work
Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate and graduate students.

Credit Hour: 1-3
Prerequisites: departmental consent required

SOC_WK 3101W: Topics in Social Work - Writing Intensive
Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. For undergraduate and graduate students.

Credit Hour: 1-3
Prerequisites: departmental consent required

SOC_WK 3320: Understanding Personality in a Social Context
Introduces students to diverse personality theories and examines background, key concepts, motivation, structure, development dynamics and applications of each theory in a social context. Required of all undergraduate social work majors.

Credit Hours: 3

SOC_WK 4101: Topics in Social Work
Special and emerging topics in social work and social welfare. Subject, content and credit varies depending on available faculty and student interest. May be repeated for credit.

Credit Hour: 1-6
Prerequisites: departmental consent required

SOC_WK 4310: Social Statistics
Descriptive, analytic techniques applied to qualitative and quantitative social data. Math Reasoning Proficiency Course.

Credit Hours: 4
Prerequisites: sophomore standing required

SOC_WK 4330: Addiction Treatment and Prevention
Provides knowledge generic to social work and other disciplines involved in substance abuse treatment. Integrated approach to problems of substance abuse and development of self-awareness are emphasized. Didactic and experiential methods employed.

Credit Hours: 3
Prerequisites: junior standing

SOC_WK 4370: Delinquency, Corrections and Social Treatment
Focuses on problems and causative factors in developing and maintaining delinquent and criminal behavior and attitudes: addressing
critical and comparative understanding of social change strategies employed in this field.

**Credit Hours:** 3  
**Prerequisites:** junior standing

---

**SOC_WK 4390: Helping Strategies With Children and Adolescents**  
(cross-leveled with SOC_WK 7390). Theory and practice of work with children and adolescents. Focus on youth in transition, protective services and permanency planning, and special needs populations.

**Credit Hours:** 3  
**Prerequisites:** junior standing

---

**SOC_WK 4395: Death, Grief and Loss**  
This course is designed to provide an awareness of the impact of grief and loss whether as a result of a death or major life alteration. The perspective that grief exists in many contexts beyond death will be a focal point of the course. Theory associated with the process of dying, grief and grief resolution will be examined. Additionally, students will explore influencing factors such as life span development, religion, culture and personal responses to loss.

**Credit Hours:** 3  
**Prerequisites:** junior standing

---

**SOC_WK 4400: Domestic Violence**  
(same as WGST 4400; cross-leveled with SOC_WK 7400, WGST 7400). Covers history of the domestic violence movement, intimate partner violence theories and data, legislative and organizational policy issues, and intervention models for practice with individuals who have experienced domestic violence including co-occurring issues such as trauma.

**Credit Hours:** 3  
**Prerequisites:** Junior or Senior standing required

---

**SOC_WK 4410: Law and Social Work Practice**  
(cross-leveled with SOC_WK 7410). This course explores the intersection of human services, law, and policy. It explores how law shapes services directed at children, families, women, and racial and sexual minorities. Students learn to work with legal professionals, prepare for proceedings, and avoid malpractice.

**Credit Hours:** 3  
**Prerequisites:** junior standing

---

**SOC_WK 4450: Professional Perspectives on Child Welfare Services in the 21st Century**  
(cross-leveled with SOC_WK 7450) This course examines the development and current state of child welfare services in America with an emphasis on the role of the public child welfare agency in delivery of those services. It is an overview course which addresses the relationship between practice issues in service delivery and administrative policy issues which enable and constrain service delivery activities. The overarching concepts of child safety, family stability, permanency for the child, and well-being of the child as a long-term outcome will be used to examine the five focal service delivery areas in child welfare; family support, preservation and reunification, child protection, foster placement, residential care, and adoptive services. This is a dual level BSW/MSW course and is an elective within the program's curricular structure. The differentiating objectives and assignments for the MSW members of the class are noted in the appropriate areas of the syllabus.

**Credit Hours:** 3

---

**SOC_WK 4480: Helping Strategies with Older Persons**  
This course is designed to provide knowledge and skill development for work with older adults and their families. It offers an intensive examination of the concepts and skills needed for effective social work practice with these populations. In particular, sociological, psychological, political, and economic factors affecting older adults will be examined as they relate to intervention, programmatic, and policy responses. Special attention will be given to assessment and intervention from macro, mezzo, and micro perspectives. The interrelationship between the aging person, the family, and society is explored since these factors affect all levels of practice. Content in this course related to the social and economic mission of the School of Social Work.

**Credit Hours:** 3  
**Prerequisites:** Junior standing in Social Work and instructor's consent required

---

**SOC_WK 4710: Social Justice and Social Policy**  
Based on the concepts of human need and social justice, a historical and analytical approach to social welfare policies and programs. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** junior standing and departmental consent required

---

**SOC_WK 4711: Social Justice and Social Policy II**  
Advanced course in the analysis of policies and programs relevant to social work and social welfare. Prepares students to understand and conduct policy analysis of public, voluntary, and proprietary human service organizations. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** SOC_WK 4710; Social Work Professional standing

---

**SOC_WK 4720: Variations in Human Behavior**  
Basic concepts and principles regarding psychological/social dynamics of deviance; implications for social welfare policy and social interventions.

**Credit Hours:** 3  
**Prerequisites:** junior standing and departmental consent required

---

**SOC_WK 4730: Introduction to Social Work Practice**  
Introductory, generalist practice theory course promoting student's understanding of professional social work practice as holistic, identifiable, unique configuration of knowledge, values and skills. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Social Work Professional Standing and departmental consent required

---

**SOC_WK 4740: Introduction to Community and Organizational Processes**  
Introduction to contextual framework of social work practice with particular emphasis on community and organization as social systems. Graded on A-F basis only.
SOC_WK 4750: Interaction Skills Workshop
Generalist practice at individual, group and community levels. Group communication and social influence theories address generic and unique aspects of interaction across systems. Uses laboratory instruction. Graded on A-F basis only.
Credit Hours: 4
Prerequisites: Social Work professional standing and departmental consent required

SOC_WK 4760: Theory and Practice of Social Group Work
Focuses on small group dynamics and models of group work practice suitable in all social work fields. Emphasizes practice theory and skills. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Social Work Professional standing and departmental consent required

SOC_WK 4770: Strategies of Direct Practice
Examines social structures, processes, underlying assumptions/concepts of social change, client constellation, organizational arrangements, role relationships by which social workers define professional intervention.
Credit Hours: 3
Prerequisites: SOC_WK 4730 and SOC_WK 4750; third semester professional program standing; departmental consent required
Corequisites: SOC_WK 4971 and SOC_WK 4970

SOC_WK 4770W: Strategies of Direct Practice - Writing Intensive
Examines social structures, processes, underlying assumptions/concepts of social change, client constellation, organizational arrangements, role relationships by which social workers define professional intervention.
Credit Hours: 3
Prerequisites: SOC_WK 4730 and SOC_WK 4750; third semester professional program standing; departmental consent required
Corequisites: SOC_WK 4971 and SOC_WK 4970

SOC_WK 4951: Research for Social Work Practice
This course introduces social work research and its relevance to practice, emphasizing the School of Social Work's social justice mission. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Social Work Professional standing or consent required

SOC_WK 4951W: Research for Social Work Practice - Writing Intensive
This course introduces social work research and its relevance to practice, emphasizing the School of Social Work's social justice mission. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Social Work Professional standing or consent required

SOC_WK 4952: Research Methods for Social Work
Survey of research methods germane to the development of the knowledge base of social work practice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Social Work Professional standing or consent required

SOC_WK 4952W: Research Methods for Social Work - Writing Intensive
Survey of research methods germane to the development of the knowledge base of social work practice. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Social Work Professional standing or consent required

SOC_WK 4960: Special Readings in Social Work
Extensive readings in selected area or intensive reading in a special field.
Credit Hour: 1-3
Prerequisites: departmental consent required

SOC_WK 4970: Senior Professional Seminar
Integrative professional practice seminar for BSW students, focusing on the principles of generic social work and its application to direct practice in diverse fields, career planning and responsibilities. Enrollment is limited to students who have completed SOC_WK 2220, SOC_WK 4710, SOC_WK 4730, SOC_WK 4740, SOC_WK 4750, SOC_WK 4760, and SOC_WK 4720; and currently enrolled in SOC_WK 4770 and SOC_WK 4971.
Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 4971: Undergraduate Field Practicum
Supervised social work practice in a school-approved agency focusing on development of direct practice skills. Fall semester, three days per week. Graded on S/U basis only.
Credit Hours: 6
Prerequisites: senior standing; SOC_WK 2220, SOC_WK 4710, SOC_WK 4730, SOC_WK 4740, SOC_WK 4750, SOC_WK 4760, and SOC_WK 4720; departmental consent required
Corequisites: SOC_WK 4770 and SOC_WK 4970

SOC_WK 4971H: Advanced Study for Social Work Honors
Individual study and research or practicum leading to Honors in Social Work. Enrollment is limited to students accepted into the Professional BSW Program and for Social Work Honors. Enrollment is limited to students who are Honors eligible, have an Social Work Honors application, completed SOC_WK 2220 and completed or currently enrolled in SOC_WK 4730, SOC_WK 4740 and SOC_WK 4750.
Credit Hours: 3-6
Prerequisites: Instructor's consent

SOC_WK 7000: Professional Social Work Practice
This course introduces the social work profession within a historical and contemporary context, provides an overview of key concepts, standards and regulations, and assists students in examining personal and professional values and ethics related to practice. Graded on an A-F basis only.
SOC_WK 7001: Topics in Social Work
Special and emerging topics in social work and social welfare. Subject, content, and credit varies depending on available faculty and student interest.

Credit Hour: 1-3
Prerequisites: departmental consent required

SOC_WK 7085: Problems in Social Work
Intensive study of an area of social welfare related to special interest of student.

Credit Hour: 1-6
Prerequisites: departmental consent required

SOC_WK 7220: Advanced Social Work Practice in Integrated Healthcare
The course will introduce students to the essential practice skills needed to effectively address the challenges of integrating services, care, and support for persons with health, mental health, and substance use problems. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7230: Integrative Behavioral Health Clinic
This is an elective course devoted to assessment, intervention and research with under-served individuals, couples, groups and families. This course is facilitated as a skills-training laboratory. Intervention methods will be applied to client's coping with major life stressors and relational problems. Students should leave this course with increased confidence in their ability to analyze patterns, assess, and intervene using diverse clinical methods. Graded on A-F basis only.

Credit Hour: 2-4
Prerequisites: Masters of Social Work students only

SOC_WK 7320: Rural Human Services
A study of the effect of rural and small community environments on the planning and delivery of social and health services. Emphasis on policy and program analyses relevant to rural issues and concerns.

Credit Hours: 3

SOC_WK 7330: Addiction Treatment and Prevention
Provides knowledge generic to social work and other disciplines involved in substance abuse treatment. Integrated approach to problems of substance abuse and development of self-awareness are emphasized. Didactic and experiential methods employed.

Credit Hours: 3

SOC_WK 7340: Military Culture
An introduction to the branches of the military and related cultural issues. Examines the historical and contemporary complexities of military service and personal and professional values and ethics related to practice with military personnel, families, and veterans. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7370: Delinquency, Corrections and Social Treatment
Focuses on problems and causative factors in developing and maintaining delinquent and criminal behavior and attitudes; addressing critical and comparative understanding of social change strategies employed in this field.

Credit Hours: 3

SOC_WK 7390: Helping Strategies With Children and Adolescents
(cross-leveled with SOC_WK 4390). Theory and practice of work with children and adolescents. Focus on youth in transition, protective services and permanency planning, and special needs populations.

Credit Hours: 3

SOC_WK 7395: Death, Grief and Loss
This course is designed to provide an awareness of the impact of grief and loss whether as a result of a death or major life alteration. The perspective that grief exists in many contexts beyond death will be a focal point of the course. Theory associated with the process of dying, grief and grief resolution will be examined. Additionally, students will explore influencing factors such as life span development, religion, culture and personal responses to loss.

Credit Hours: 3

SOC_WK 7400: Domestic Violence
(same as WGST 7400; cross-leveled with SOC_WK 4400, WGST 4400). Covers history of the domestic violence movement, intimate partner violence theories and data, legislative and organizational policy issues, and intervention models for practice with individuals who have experienced domestic violence including co-occurring issues such as trauma.

Credit Hours: 3

SOC_WK 7410: Law and Social Work Practice
(cross-leveled with SOC_WK 4410). This course explores the intersection of human services, law, and policy. It explores how law shapes services directed at children, families, women, and racial and sexual minorities. Students learn to work with legal professionals, prepare for proceedings, and avoid malpractice.

Credit Hours: 3

SOC_WK 7450: Professional Perspectives on Child Welfare Services in the 21st Century
This course examines the development and current state of child welfare services in America with an emphasis on the role of the public child welfare agency in delivery of those services. It is an overview course which addresses the relationship between practice issues in service delivery and administrative policy issues which enable and constrain service delivery activities. The overarching concepts of child safety, family stability, permanency for the child, and well-being of the child as a long term outcome will be examined to determine the five focal service delivery areas in child welfare; family support, preservation and reunification, child protection, foster placement, residential care, and adoptive services. This is a dual level BSW/MSW course and is an elective within either program's curricular structure. The differentiating objectives and assignments for the MSW members of the class are noted in the appropriate areas of the syllabus.
Credit Hours: 3

Intensive seminar in meso-level practice in the field of child welfare. Examines communication theory, team building, and interorganizational dynamics as they affect professional practice in child welfare.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 7480: Helping Strategies with Older Persons
Focus on interdisciplinary methods of assessment and intervention strategies designed to optimize healthy functioning for older persons and their families.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 7485: Military Social Work
An overview of military culture, resilience, challenges, and behavioral health needs of military personnel and veterans. Content draws on theories and research relevant to this population. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7490: Family Treatment
Comparative study of theories and methods required for work with problems of family functioning. Both conjoint and subsystem approaches to family treatment are examined.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 7710: Social Policy and Service Delivery in Social Work
Covers historic and contemporary issues in social welfare policy. Focuses on relationships among social problems, public policies, private actions, poverty, racism, sexism and social work practice/values. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: restricted to graduate Social Work majors

SOC_WK 7720: Foundations of Human Behavior
Substantive sources from behavioral sciences used in social work toward understanding the biosocial processes and constraints of human development.

Credit Hours: 3
Prerequisites: restricted to graduate Social Work majors

SOC_WK 7730: Social Work Skills
Introduces theory and application of strengths-based generalist practice. Develops knowledge, values, and techniques of professional social work practice at micro, mezzo, and macro levels, emphasizing assessment and interaction skills.

Credit Hours: 3
Prerequisites: graduate standing in social work; Foundation level course

SOC_WK 7740: Large Group Theory
Examination of social environment in which social work is practiced with particular emphasis on development of analytic framework for understanding formal organizations and communities.

Credit Hour: 2-3
Prerequisites: graduate standing in Social Work

SOC_WK 7751: Psychosocial Function and Older Adults
(same as ARCHST 7650, F_C_MD 7751, H_D_FS 7751, NURSE 7751, P_HLTH 7751 and HMI 7751). This course takes an Interdisciplinary approach to understanding the psychosocial function of older adults and explores approaches to alleviate disabling conditions that interfere with psychosocial function and quality of life in old age. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 7760: Social Justice Seminar
Provides integrative learning experience in social work practice in foundation level social work practice focusing on social and economic justice experiences in field practicum.

Credit Hours: 2
Prerequisites: restricted to graduate Social Work majors
Corequisites: SOC_WK 7971

SOC_WK 7770: Strategies of Clinical Social Work Intervention
Strategies of social treatment with individuals and small groups applicable to practice in public and private social agency settings.

Credit Hours: 3
Prerequisites: graduate standing in social work; departmental consent required

SOC_WK 7780: Fundamentals of Social Work Administration
Basic managerial skills which social workers need for supervision, planning, staff development and administrative positions in social agencies; focus on individual management functions and skills associated with them.

Credit Hours: 3
Prerequisites: restricted to graduate Social Work majors

SOC_WK 7820: DSM V and Psychopathology: A Social Work Perspective
Examines psychopathology of human behavior within social work context, prevailing diagnostic models (Diagnostic and Statistical Manual of Mental Disorders V), and historically oppressive categorizations.

Credit Hours: 3
Prerequisites: Graduate standing in Social Work

SOC_WK 7920: Advanced Foundations of Human Behavior for Administrators
Examination of relevant theoretical and behavioral foundations in order that students can acquire the knowledge to function as a social work administrator.

Credit Hours: 3
Prerequisites: graduate Social Work majors
SOC_WK 7952: Research Methods in Social Work
Examines research methodology and design as applied to the study of social work techniques and problems. Emphasizes differential uses of scientific observation and techniques for developing knowledge and improving practice.

Credit Hours: 3
Prerequisites: Graduate Social Work Majors

SOC_WK 7971: Graduate Field Practicum I
Supervised social work practice in a school-approved agency providing a full range of interventive experiences. Graded on S/U basis only.

Credit Hour: 2-4
Prerequisites: admission to MSW program; SOC_WK 7710, SOC_WK 7720, SOC_WK 7730, SOC_WK 7740, SOC_WK 7760. Departmental Consent Required

SOC_WK 8020: Social Work in Schools
The course focuses on the etiology and development of child and adolescent educational, social, emotional, and behavioral health disorders encountered, identified and treated in school settings. Educational disabilities and related polices and the interdisciplinary nature of school settings will be highlighted. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8050: Resiliency and Solution-Focused Practice
Focuses on brief therapy approaches to dealing with clinical problems in a time-efficient, clinically effective method. Various approaches to solution-oriented work based in resiliency theory are presented. Stresses client empowerment across the lifespan.

Credit Hours: 3
Prerequisites: Social Work [SOC_WK] 7770; graduate level Social Work Majors only. Graded on A/F basis only

SOC_WK 8060: Trauma Practice and Crisis Intervention
Focuses on clinical techniques for social work with trauma survivors. Addressing effects of disasters, personal violence and war are included. Resiliency in survivors is presented as basis for interventions.

Credit Hours: 3
Prerequisites: SOC_WK 7770; graduate level Social Work majors only

SOC_WK 8070: Cognitive Behavioral Practice
Focuses on the theory, concepts, and techniques of cognitive behavioral therapies, with a particular emphasis on clinical intervention methods that may be used by the social worker to address specific client needs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: SOC_WK 7770. Restricted to graduate Social Work majors

SOC_WK 8080: Introduction to Dialectical Behavioral Therapy Practice
This course is an introduction to the theory, concepts and practice of Dialectical Behavioral Therapy, an evidenced-based practice and form of cognitive-behavioral treatment. There will be an emphasis on application methods across settings that a social worker may use to work with clients with pervasive emotion dysregulation as well as other difficult to treat clients where other forms of treatment have not been effective. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Graduate level Social Work majors only

SOC_WK 8210: Disability Rights Advocacy
Highlights historical views of disabilities in relationship to contemporary policies, programs and services. This cross-disability focus examines the shift in focus from cure, care, and treatment to participation, capabilities, adapting environments, and building community. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8220: Integrated Health Policy and Services
The course focuses on the role of social workers as social policy practitioners within an Integrated Behavioral Health environment. Strategies to influence policies and promote change in the interest of service consumer, agency, and society will be presented. Graded on A-F basis only.

Credit Hours: 3

SOC_WK 8240: Social Policy for Older Adults
Examines local, state, and federal social policies related to older adults highlighting challenges related to diverse and special needs. Students will explore and appraise needs, values, ageism, and human rights related to social policies for older adults.

Credit Hours: 3

SOC_WK 8350: Management of a Social Agency
Basic resource management and control techniques common to social agencies with emphasis on personnel management, information and data management, and fiscal management.

Credit Hours: 3

SOC_WK 8952: Evaluative Research in Clinical Social Work Practice
Develop ability to systematically evaluate effectiveness of interventive strategies designed to produce positive change in clients' environment and/or cognitive, affective and behavioral functioning.

Credit Hours: 3
Prerequisites: SOC_WK 7952. Restricted to graduate Social Work majors

SOC_WK 8953: Evaluative Research in Social Work
Develop ability to design and implement appropriate evaluative research methods and strategies employed in social and human service delivery.

Credit Hours: 3
Prerequisites: SOC_WK 7952. Restricted to graduate Social Work majors
SOC_WK 8955: Independent Study in Social Work
Intensive investigation of phenomena germane to area of concentration carried out with guidance of faculty. May include data collection; leads to a written report in publishable format.

Credit Hour: 1-6
Prerequisites: departmental consent required

SOC_WK 8970: Professional Practice Seminar I
Provides integrative learning experience in social work practice in an area of beginning specialization in autonomous social work practice.

Credit Hours: 3
Prerequisites: restricted to graduate Social Work majors
Corequisites: SOC_WK 8971

SOC_WK 8971: Graduate Field Practicum II
Field instruction tailored to concentration interests, developing depth in clinical skills in direct service or in planning and administration. Graded on S/U basis only.

Credit Hour: 1-13
Prerequisites: Restricted to graduate Social Work majors. Completion of all required graduate coursework except SOC_WK 8970
Corequisites: SOC_WK 8970

SOC_WK 9001: Topics in Social Work
Special and emerging topics in social work and social welfare. Subject, content, and credit vary depending on available faculty and student interest. May be repeated for credit.

Credit Hour: 1-3
Prerequisites: departmental consent required

SOC_WK 9090: Research in Social Work
Research in Social Work. Graded on S/U basis only.

Credit Hour: 1-12

SOC_WK 9100: Knowledge Building I
Advanced systemic review of theories requisite for study and implementation of practice and policy centered research in social welfare and development; emphasis placed on critical analysis of theories needed for research and study of integrated social development.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 9150: Statistical Concepts in the Social and Behavioral Sciences
This course is designed to import knowledge in the basic principles of statistics and data analysis for the social and behavioral sciences. Skills in data input, management, and analysis will be covered, including the construction of analytical tables, graphical analysis of data, use and interpretation of statistical tests, application of univariate and bivariate statistics, and ANOVA models to social work data as well as the use of software to analyze those data. Graded on A-F basis only.

Credit Hours: 3
Recommended: Basic college level math

SOC_WK 9300: Research Methodology and Design Seminar
Review of historical development of social welfare and social work research with emphasis on critical analysis of seminal studies; examination of "state-of-the-art" social welfare and development initiatives, designs and methodology.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 9400: Macro Social Theory
(Same as NURSE 9400). Building on the foundation laid in SOC_WK 9100, in depth examination of human development and social environment theories appropriate to scientific examination of social welfare practice with formal organizations, interorganizational combinations, communities and larger political entities.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 9500: Pro Seminar I
Joint student-faculty exercise in intellectual discovery focusing on current and emerging issues in the field of social work and social development; emphasis on integration of multi-disciplinary perspectives. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: departmental consent required

SOC_WK 9600: Professional Seminar II
This second seminar focuses on topics related to long term professional success for doctoral students. The seminar covers topics on conference presentations, peer-reviewed publications, external funding, and academic job search process. Graded on S/U basis only.

Credit Hour: 1

SOC_WK 9650: Pedagogical Methods in Social Work and Applied Professional Programs
An in depth examination of the pedagogical issues, policies, and principles associated with teaching social work in higher education. Topics include the history and philosophy of social work education, instructional models and methods, assessing educational outcomes, and instructional improvement methods. Issues specific to social work include the need to differentiate teaching methods relative to direct practice, human services administration, community organization, policy practice, and program evaluation. Particular focus will be directed toward online education and its role in the 21st century. Graded on S/U basis only.

Credit Hour: 1

SOC_WK 9700: Social Welfare Policy Seminar
(Same as NURSE 9700). Critical examination of comparative models of social policy development; preparation of a professional social work policy analysis in the student's area of interest/specialization that is suitable for submission to an appropriate referred journal.

Credit Hours: 3
Prerequisites: departmental consent required

SOC_WK 9800: Research Application I
Research practicum for Social Work doctoral students.
Credit Hours: 3  
Prerequisites: departmental consent required

**SOC_WK 9850: Research Application II**  
Research Practicum. In most cases it will be a second research practicum but may also be a continuation of the research conducted in SOC_WK 9800. Prerequisites: departmental consent required  
Credit Hours: 3

**SOC_WK 9890: Dissertation Seminar**  
This course will assist doctoral students in planning and writing the dissertation.  
Credit Hours: 3  
Prerequisites: departmental consent required

**SOC_WK 9900: Doctoral Dissertation Research in Social Work**  
Independently conducted research that includes concept development, data collection, statistical analysis and social policy implications prepared in a format suitable for publication. Graded on S/U basis only.  
Credit Hour: 1-99  
Prerequisites: departmental consent required

---

**Sociology (SOCIOL)**

**SOCIOL 1000: Introduction to Sociology**  
Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU_SOC 1000.  
Credit Hours: 3  
Recommended: PEA_ST 1050

**SOCIOL 1000H: Introduction to Sociology Honors**  
Nature of organization and activities of human groupings-family, community, crowd, social class, etc.; structure, function of institutions; social influences shaping personality, behavior, social change. No credit for both SOCIOL 1000 and RU_SOC 1000.  
Credit Hours: 3  
Prerequisites: Honors eligibility required

**SOCIOL 1010: Social Problems**  
Introduces a sociological perspective on what constitutes social problems and their impact on individuals and societies. Emphasizes critical thinking skills. Topics covered may include poverty, inequalities of gender, race, class, religion, education, and political power, the environment and global conflicts among others.  
Credit Hours: 3

**SOCIOL 1120: Population and Ecology**  
(same as RU_SOC 1120 and PEA_ST 1120). Changes in the structure and characteristics of population groups and their relationship to both human and non-human aspects of the biophysical environment.  
Credit Hours: 3

---

**SOCIOL 1360: The Female Experience: Body, Identity, Culture**  
(same as WGST 1360). Study of the experience of being female in American culture. Course will focus on development of women’s identities through such topics as: sexuality, reproduction, self-image, rape and health care.  
Credit Hours: 3

**SOCIOL 1650: Social Deviance**  
Survey of approaches to the study of behaviors commonly regarded as deviant such as crime, sexual abuse, substance abuse, mental illness, etc.  
Credit Hours: 3

**SOCIOL 2103: Topics in Sociology-Behavioral Science**  
Organized study of selected topics. Particular topics may vary from semester to semester. Departmental consent for repetition.  
Credit Hour: 1-3

**SOCIOL 2182: Critical Dialogues: Nonviolence in Peace/Democracy Movements**  
(same as PEA_ST 2182). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics and factions in movements; relationship to state authority. Cases such as Gandhi's Independence, American Civil Rights, Arab Spring, and Occupy movements.  
Credit Hours: 3  
Recommended: PEA_ST 1050

**SOCIOL 2182W: Critical Dialogues: Nonviolence in Peace/Democracy Movements - Writing Intensive**  
(same as PEA_ST 2182W). History and theory of movements for peace, justice, and democracy. Development of violent and nonviolent tactics and factions in movements; relationship to state authority. Cases such as Gandhi's Independence, American Civil Rights, Arab Spring, and Occupy movements.  
Credit Hours: 3  
Recommended: PEA_ST 1050

**SOCIOL 2200: Social Inequalities**  
(same as BL_STU 2200). Survey of inequalities based upon criteria such as race, ethnicity, sex, age, religion and social class in contemporary societies. Focus on dynamics by which privilege and inequalities are structured.  
Credit Hours: 3

**SOCIOL 2210: The Black Americans**  
(same as BL_STU 2210). Analysis of history of blacks in the United States. Assessment of contemporary black community in terms of its institutions, styles of life, patterns of work and intergroup relations.  
Credit Hours: 3
SOCIOL 2255: Youth, Islam, and Global Cultures
(same as PEA_ST 2255). Youth subcultures and the social issues and problems faced by youth, focusing on the Islamic world and Muslim immigrants, in the United States and elsewhere. Social and behavioral theories and concepts such as paths to modernization, Orientalism, post-colonialism, population movements, social construction, identity, and recognition will be illustrated.
Credit Hours: 3

SOCIOL 2280: Race, Democracy, and Violence in Cuba and Haiti
(same as PEA_ST 2280, GEOG 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 2280W: Race, Democracy, and Violence in Cuba and Haiti - Writing Intensive
(same as PEA_ST 2280, GEOG 2280). A sociological approach to understand race/ethnicity, identity, citizenship, human rights, violence, and political and economic systems in the Caribbean. Comparisons of the culture, politics, and historical trajectories of Cuba and Haiti using Post-Colonial and Feminist theories. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 2281: Nuclear Weapons: Environmental, Health and Social Effects
(same as HLTH_SCI 2200 and PEA_ST 2200). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 2281W: Nuclear Weapons: Environmental, Health and Social Effects - Writing Intensive
(same as HLTH_SCI 2200 and PEA_ST 2200). Environmental consequences of the nuclear arms race, "regional" nuclear war, and weapons testing for human health, agriculture, and society. Examining "a world without nuclear weapons"; political dialogue on proliferation; Iran, North Korea, and nuclear weapons conventions. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 2285: Large Corporations, Economic Crisis, Social Responsibility
Credit Hours: 3

SOCIOL 2286: Technological Futures, National Security, and Civil Liberties
(same as PEA_ST 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.
Credit Hours: 3

SOCIOL 2286W: Technological Futures, National Security, and Civil Liberties - Writing Intensive
(same as PEA_ST 2286). Contemporary practices and future trends in data collection and mining by the NSA and by businesses. The interplay of government and corporate power, and possibilities of regulation and maintenance of privacy and civil liberties. The development of digital intellectual copyright and its consequences on patterns of dissemination of knowledge.
Credit Hours: 3

SOCIOL 2300: Self and Society
Analysis of the self in modern society. Topics covered include social interaction, social perception, language and learning, the sociology of emotions and the social construction of identity.
Credit Hours: 3

SOCIOL 2310: Culture and Mass Media
Sociological study of modern folk, local, popular and mass cultural production and consumption; mass media, diffusion, change, differentiation.
Credit Hours: 3

SOCIOL 2950: Social Research I
(same as RU_SOC 2950). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research.
Credit Hours: 3

Prerequisites: Required for Sociology majors

SOCIOL 3000: Urban Sociology
Urbanism as a world phenomenon; ecological, demographic characteristics of cities; organization of urban society including status systems, occupational structure, formal and informal associations, racial and cultural relations, forms of communication, housing, city planning.
Credit Hours: 3

SOCIOL 3100: Recent Theories in Sociology
(same as RU_SOC 3100). Introduction to major theoretical positions and issues in contemporary American sociology. Logical and intellectual structure of major theoretical schools: functionalism, conflict, exchange, symbolic interaction, phenomenological-ethnomethodological theories.
Credit Hours: 3

Prerequisites: Sociology majors only. Non-sociology majors may petition the instructor to add the course
SOCIOL 3200: Class, Status, and Power
Study of the structure of wealth, poverty, prestige, and power. Concepts of social justice in political, economic and legal issues and policies. Provides student engagement in research.
Credit Hours: 3

SOCIOL 3210: Sociology of Globalization
Globalization's origin and dynamics; the social and political effects of globalization: countervailing forces to economic globalization, in particular reassertions of "traditional" identities, labor movements, new social movements, and the global democracy movement.
Credit Hours: 3

SOCIOL 3230: Education and Social Inequalities
Examination of the ways in which inequalities are constructed, reproduced, maintained or transformed by and within educational institutions. Particular attention will be given to inequalities based on gender, race, and social class.
Credit Hours: 3

SOCIOL 3255: Youth in Today's World
Study of what factors influence the development of youth in today's society. Examined are types of behavior such as mating, deviance and the role of schools, parents, TV and friendship groups.
Credit Hours: 3

SOCIOL 3300: Queer Theories/Identities
(same as WGST 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.
Credit Hours: 3
Prerequisites: SOCIOL 2200 or instructor's consent

SOCIOL 3300W: Queer Theories/Identities - Writing Intensive
(same as WGST 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.
Credit Hours: 3
Prerequisites: SOCIOL 2200 or instructor's consent

SOCIOL 3310: Social Psychology
Survey of theories and research concerned with the ways in which individuals construct social situations and are affected by them. Topics covered include self-identities, social influence, personal relationships, prejudice and discrimination.
Credit Hours: 3

SOCIOL 3310W: Social Psychology - Writing Intensive
Survey of theories and research concerned with the ways in which individuals construct social situations and are affected by them. Topics covered include self-identities, social influence, personal relationships, prejudice and discrimination.
Credit Hours: 3

SOCIOL 3320: Sociology of Gender
(same as WGST 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure.
Credit Hours: 3

SOCIOL 3330: Environmental Justice
(same as PEA_ST 3330). Environmental justice refers to the ways in which the "cost and benefits" of modern industrial society are distributed among social groups. This course is concerned with justice, not as an abstract concept, and inequality not in terms of numbers in a bank account. Social justice or inequality are lived, embodied experiences. An individual's likelihood of experiencing environmental harm is related to intersecting gender, race and class formations, among other things. Justice or inequality is not only embodied, it also happens in places--national and regional differences matter. In this course we will look at some of the extensive literature documenting the ways in which communities of color and poor communities are subject to disproportionate environmental risks. In addition, we will focus on gender as an important category in understanding environmental inequality.
Credit Hours: 3

SOCIOL 3400: Politics of the Media
(same as PEA_ST 3400). In this course we study critical thinking skills and use them to compare and contrast U.S. media coverage of current issues with media in other parts of the world. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 3400W: Politics of the Media - Writing Intensive
(same as PEA_ST 3400). In this course we study critical thinking skills and use them to compare and contrast U.S. media coverage of current issues with media in other parts of the world. Graded on A-F basis only.
Credit Hours: 3

SOCIOL 3420: The Family
Families, kin and households as interacting groups; roles, socialization, problems, structural change; family in relation to other social institutions; historical, cultural and class variations.
Credit Hours: 3

SOCIOL 3430: The Sociology of Sport
The role of sport in modern society. Includes violence in sport; politics and economics of sport; male, female, and racial inequalities; and international comparisons of sport structures.
Credit Hours: 3

SOCIOL 3440: Sociology of Health
A survey of sociological thinking and research on health, health problems, health occupations and health services. How these are shaped
by the society. Problems faced by individuals and the system. Potential solutions to problems.

Credit Hours: 3

**SOCIOL 3450: The Sociology of Religion**
Sociology of religious experience, action, organization, movements and social change; contemporary trends, including mainline and new religions, civil religion, secularization.

Credit Hours: 3

**SOCIOL 3460: Technology and Society**
In the last few decades science and technology have permeated our lives as never before. This has led to wide ranging intellectual debates and social movements in and around the issue of relationship between science, technology, and society. This course, which is organized on a lecture-seminar format, will critically investigate different aspects of the relationship between science, technology, and society. Graded on A-F basis only.

Credit Hours: 3

**SOCIOL 3460W: Technology and Society - Writing Intensive**
In the last few decades science and technology have permeated our lives as never before. This has led to wide ranging intellectual debates and social movements in and around the issue of relationship between science, technology, and society. This course, which is organized on a lecture-seminar format, will critically investigate different aspects of the relationship between science, technology, and society. Graded on A-F basis only.

Credit Hours: 3

**SOCIOL 3520: Collective Behavior**
(same as PEA_ST 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

Credit Hours: 3

**SOCIOL 3520W: Collective Behavior - Writing Intensive**
(same as PEA_ST 3520). Analysis of crowd behavior and related phenomena: rumors, disasters, fashions. Social responses to unclear, dangerous or unjust conditions. The dynamics of conflict, consensus and change.

Credit Hours: 3

**SOCIOL 3522: New Media, Conflict and Control**
(same as PEA_ST 3522). This course will explore the increasing role of new media tools in conflict and surveillance. Examples from recent conflicts will illustrate how citizens and regimes use new media to communicate, report, mobilize, monitor, and/or control. Students will utilize new media as they research instances of democracy and control.

Credit Hours: 3

**SOCIOL 3600: Criminology**
(same as PEA_ST 3600). Sociology of law; constitutional, psychological, sociological theories of criminal behavior; process of criminal justice; treatment of corrections; control of crime.

Credit Hours: 3

**SOCIOL 3700: Institutions and Society**
Institutions of societies with focus on institutional arrangements (economy, polity, media, education, religion); organizational structures; interorganizational networks; interrelations of institutional sectors.

Credit Hours: 3

**SOCIOL 3710: The Sociology of Work**
Analysis of occupational, professional aspects of American society. Division of labor; occupational mobility; work and the self; colleagueship and informal organizations of work.

Credit Hours: 3

**Prerequisites:** SOCIOL 1000 or SOCIOL 1650

**SOCIOL 3942: Service Learning in Sociology**
The service learning course combines an independent study with a faculty member with practical experience in a related non-profit or other worksite.

Credit Hours: 3

**Prerequisites:** instructor's consent

**SOCIOL 3950W: Social Research I - Writing Intensive**
(same as RU_SOC 3950W). Introduction to principles of methodology; theory and research; survey of basic research designs and perspectives; preparation for understanding and conducting social research.

Credit Hours: 3

**Prerequisites:** Required for Sociology majors

**SOCIOL 4210: Aging and the Life Course**
Course will take a life course perspective on the sociological aspects of aging in contemporary American society. Begins with birth, then childhood, adolescence, emergent adulthood, middle life, old age, and death. Graded on A-F basis only.

Credit Hours: 3

**Prerequisites:** Junior standing or above
**Recommended:** At least three credits in Sociology prior to enrollment is preferred

**SOCIOL 4220: Race and Ethnic Relations**
The experience of racial and ethnic minorities; inequality, assimilation, ethnic and racial conflict, accommodation.

Credit Hours: 3

**Prerequisites:** junior standing or instructor's consent

**SOCIOL 4230: Women, Development, and Globalization**
(same as BL_STU 4230 and WGST 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews
women's strategies in defining and instituting programs to improve quality of life in communities.

Credit Hours: 3
Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200; WGST 1332 or WGST 2010

SOCIOL 4235: Social Perspectives on Gender and Emotion
(same as BL_STU 4235, WGST 4235; cross-leveled with BL_STU 7235, SOCIOL 7235, WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

SOCIOL 4320: Culture, Identity and Interaction
Examines the interplay between culture, identity, and interaction as these intersect with issues of social inequality, social control, social change, and the everyday production of subjectivities.

Credit Hours: 3
Prerequisites: SOCIOL 3310 graduate standing or instructor's consent

SOCIOL 4335: Social Change and Development
(same as RU_SOC 4335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.

Credit Hours: 3
Prerequisites: RU_SOC 1000 or SOCIOL 1000 and junior standing

SOCIOL 4370: Environment and Society
(same as RU_SOC 4370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.

Credit Hours: 3
Prerequisites: junior, senior or graduate standing

SOCIOL 4500: Sociology of Social Policy
Sociological theories and methodologies focused on social policy; policy as process; contextual and critical policy analyses; assessing policy effects and consequences.

Credit Hours: 3
Prerequisites: senior standing

SOCIOL 4510: Social Movements and Conflicts
Survey of approaches and research on social movements and social change. Historical and contemporary social movements in the U.S.; collective protest and violence; political revolutions. MA core course.

Credit Hours: 3
Prerequisites: SOCIOL 3520, SOCIOL 3700, or SOCIOL 3320 or graduate standing

SOCIOL 4520: Political Sociology
(same as PEA_ST 4520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change.

Credit Hours: 3
Prerequisites: SOCIOL 3200, SOCIOL 3510, SOCIOL 3520, or SOCIOL 3700

SOCIOL 4545: Sociology of Immigration
(cross-leveled with SOCIOL 7545). This course will cover both classic and contemporary research on immigration within US sociology. Major topics of concern will be how immigration intersects with issues of law, race and ethnicity, gender and sexuality, social mobility, education, employment, politics, urban studies, marriage and family, health, and social networks. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 4550: Gender and Human Rights in Cross Cultural Perspective
(same as WGST 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and non-Western perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3
Prerequisites: WGST 1120 or SOCIOL 2200; senior standing required

SOCIOL 4610: Society and Social Control
The concept of social control is analyzed from both micro and macro theoretical perspectives. Focus is on patterns of social domination.

Credit Hours: 3
Prerequisites: SOCIOL 3700 or SOCIOL 3710

SOCIOL 4620: Drugs and Society
Course will examine the social, political, and economic aspects of legal and illegal drug use in American society. Issues include: theories of drug use, the social correlates of drug use, the war on drugs and policy alternatives, and the rise of the pharmaceuticals industry. Graded on A/F basis only

Credit Hours: 3

SOCIOL 4630: Sociology of Mental Health
Course examines the social aspects of mental health and illness. Topics include: stress and mental health, medicalization of behavior, stigma and labeling, mental health care systems, social correlates of mental health (such as gender, childhood, work status, and social support).

Credit Hours: 3

Recommended: 1000 level sociology course or 1000 level Psychology course

SOCIOL 4940: Internship in Sociology
Professional experience under faculty supervision. Project must be arranged by student and faculty member prior to registration.

Credit Hour: 1-9
Prerequisites: junior standing and instructor's consent
SOCIOL 4950: Research in Sociology
Students gain research experience by assisting a faculty member with a research project in sociology. Enrollment is limited to Sociology majors with Junior standing. Repeatable upon consent of the department.
Credit Hours: 3
Prerequisites: Instructor consent

SOCIOL 4960: Special Readings in Sociology
Extensive reading in selected area or special field.
Credit Hour: 1-99
Prerequisites: 12 hours Sociology and departmental consent

SOCIOL 4970: Senior Seminar
Integrates perspectives, methods, substantive foci of undergraduate courses. Analysis of sociology as a discipline and profession. Discussion of opportunities for graduate study, employment.
Credit Hours: 3
Prerequisites: SOCIOL 2950 and SOCIOL 3100 and senior sociology major

SOCIOL 4970W: Senior Seminar - Writing Intensive
Integrates perspectives, methods, substantive foci of undergraduate courses. Analysis of sociology as a discipline and profession. Discussion of opportunities for graduate study, employment.
Credit Hours: 3
Prerequisites: SOCIOL 2950 and SOCIOL 3100 and senior sociology major

SOCIOL 4995: Honors in Sociology
Intensive work in a selected field within sociology, including readings and research. Repeatable up to 6 hours with departmental consent.
Credit Hours: 3
Prerequisites: for honors candidates; SOCIOL 2950 and SOCIOL 3100

SOCIOL 7004: Topics in Sociology-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with departmental consent.
Credit Hour: 1-99
Prerequisites: junior standing and instructor's consent

SOCIOL 7085: Problems in Sociology
Directed research not leading to thesis or dissertation.
Credit Hour: 1-99
Prerequisites: 12 hours Sociology and departmental consent

SOCIOL 7110: Feminist Research and Criticism
(same as WGST 7110). Examination of both feminist critiques of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.
Credit Hours: 3
Prerequisites: SOCIOL 2950 and SOCIOL 3100 and senior sociology major

SOCIOL 7120: Social Statistics
(same as RU_SOC 7120). Descriptive statistics and bivariate quantitative analysis techniques commonly used by social scientists. Includes coverage of parametric and non-parametric methods. Introduction to computer analysis.
Credit Hours: 3
Prerequisites: SOCIOL 2950

SOCIOL 7200: Social Inequalities
Examination of theories and research concerned with inequalities based on social class, gender, and race-ethnicity. M.A. core course for sociology students.
Credit Hours: 3

SOCIOL 7230: Women, Development and Globalization
(same as WGST 7230 and BL_STU 7230; cross-leveled with WGST 4230). Examines the history and structure of “development” discourse and practices. Stresses the interconnections and impact on women globally. Reviews women’s strategies in defining and instituting programs to improve quality of life in communities.
Credit Hours: 3

SOCIOL 7232: Culture, Identity and Interaction
Examines the interplay between culture, identity, and interaction as these intersect with issues of social inequality, social control, social change, and the everyday production of subjectivities.
Credit Hours: 3
Prerequisites: SOCIOL 3310

SOCIOL 7320: Social Change and Development
(same as RU_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.
Credit Hours: 3
Prerequisites: RU_SOC 1000 or SOCIOL 1000

SOCIOL 7335: Social Change and Development
(same as RU_SOC 7335). Nature of social change and development. Emphasizes sociological theories of social change and development contrasting them with approaches from the disciplines.
Credit Hours: 3
Prerequisites: RU_SOC 1000 or SOCIOL 1000

SOCIOL 7340: Self, Language, and Social Life
Examines the interplay between self, language, and social life. Particular attention is paid to how the everyday construction of inner lives relates to diverse social worlds. The effects of situational and institutional conditions as they shape identity and social interactions are important considerations.
Credit Hours: 3

SOCIOL 7370: Environment and Society
(same as RU_SOC 7370). An interdisciplinary examination of domestic and international environmental issues focusing on social, cultural, and policy dimensions. Perspectives of the social sciences and humanities are included.
Credit Hours: 3

SOCIOL 7410: Sociology of Education
(same as ED_LPA 7458; cross-leveled with SOCIOL 4410). Contexts, structures and processes of schooling; effects on class, race, ethnicity
and gender; social change, educational policy, and organizational dynamics; higher education and the economy.

Credit Hours: 3

SOCIOL 7500: Sociology of Social Policy
Sociological theories and methodologies focused on social policy; policy as process; contextual and critical policy analyses; assessing policy effects and consequences.

Credit Hours: 3

SOCIOL 7510: Social Movements and Conflicts
Survey of approaches and research on social movements and social change. Historical and contemporary social movements in the U.S.; collective protest and violence; political revolutions.

Credit Hours: 3

SOCIOL 7520: Political Sociology
(same as PEA_ST 7520). Social bases of power and politics, economic and political elites, the political economy of the advanced societies, sources of political conflict and change.

Credit Hours: 3

SOCIOL 7545: Sociology of Immigration
(cross-leveled with SOCIOL 4545). This course will cover both classic and contemporary research on immigration within US sociology. Major topics of concern will be how immigration intersects with issues of law, race and ethnicity, gender and sexuality, social mobility, education, employment, politics, urban studies, marriage and family, health, and social networks. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 7550: Gender and Human Rights in Cross Cultural Perspective
(same as PEA_ST 7550 and WGST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and non-western perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

Credit Hours: 3

SOCIOL 7610: Society and Social Control
The concept of social control is analyzed from both micro and macro theoretical perspectives. Focus is on patterns of social domination.

Credit Hours: 3

SOCIOL 7960: Special Readings in Sociology for the Graduate Level
Extensive reading in selected area or special field. Graded on A-F basis only.

Credit Hour: 1-99

Prerequisites: instructor's consent

SOCIOL 8086: Teaching Sociology
This graduate seminar will cover current issues in higher education, building a teaching portfolio, the daily work of teaching, and work/life balance in academia. Graded on A-F basis only.

Credit Hours: 3

SOCIOL 8087: Critical Race Theory
Critical examination of key sociological theories of race, racialization, and racism in contemporary society.

Credit Hours: 3

SOCIOL 8100: Theoretical Thinking in Sociology
Close analysis of the texts of classical and contemporary social theory. Key concepts will be elaborated in the context of intellectual history, and will be applied to deepening the theoretical significance of an empirical research question on the student's emerging agenda. Required for all entering graduate students in Sociology.

Credit Hours: 3

SOCIOL 8110: Research in Sociology
Research not expected to terminate in thesis or dissertation.

Credit Hour: 1-6

Prerequisites: instructor's consent

SOCIOL 8120: The Logic of Social Research
Meta-theoretical and conceptual issues at the core of design decision making, questionnaire construction, qualitative field techniques, interviewing, scaling, panel analysis, computer applications to qualitative data; experimental, survey and case study designs, ethics. Required for Ph.D. students.

Credit Hours: 3

SOCIOL 8130: Advanced Social Statistics

Credit Hours: 3

Prerequisites: SOCIOL 7120 or equivalent

SOCIOL 8140: Seminar in Population Health
Graduate Seminar on the social distribution of morbidity and mortality. Covers major theoretical perspectives and the state of empirical evidence regarding several individuals and contextual explanations of health disparities. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SOCIOL 7120 or equivalent

SOCIOL 8187: Seminar on Interview Theory and Technique
The seminar has three goals: First is the consideration of literature dealing with recent theoretical formulations of the interview. This will provide a basis, second, for critically examining a number of popular interview guidebooks. The third goal is to offer the opportunity to put theory and technique into practice by analyzing selected interview material.
SOCIOL 8250: Media and Power in Comparative Perspective Seminar
This course traces the historical development of U.S. and selected international media systems. We analyze and debate the relationship of differing media systems to political power, popular culture, and the facilitation or inhibition of democratic practices. Students do comparative analyses of international media institutions and related analyzes of media content.
Credit Hours: 3
Prerequisites: doctoral standing

SOCIOL 9187: Seminar in Sociological Theory I
Traces development of sociological theory from the "generation of 1890" through the 1940s, including the work of Durkheim, Weber, Parsons and others.
Credit Hours: 3
Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9287: Seminar in Qualitative Methods in Sociology
(same as RU_SOC 9287). Examination of various qualitative methods of research, including problem-formulation, access and interpretation of data, theory-generation, and preparation of research reports.
Credit Hours: 3
Prerequisites: SOCIOL 8120 and instructor's consent

SOCIOL 9288: Ethnographic Fieldwork
History of sociological ethnography, the analysis of key ethnographic texts, forms of ethnographic fieldwork, and recent debates related to representational practices. Applications to participant observation, field interviewing, and strategies of discourse analysis in various social settings.
Credit Hours: 3
Prerequisites: SOCIOL 9287, instructor's consent

SOCIOL 9350: Graduate Seminar in Environmental Discourses
This seminar explores human cultural interactions with nature: how we understand ourselves in relation to space, how we interact with and learn about nature, and how we use nature. Readings will include exemplary texts from sociology, geography and anthropology, science studies and cultural studies. Graduate Standing required.
Credit Hours: 3

SOCIOL 9487: Seminar in Sociological Theory II
Theoretical developments in sociology in Europe and United States since 1950. Recent formulations, controversies.
Credit Hours: 3
Prerequisites: SOCIOL 8100 or equivalent

SOCIOL 9525: Culture, Difference, and Inequality
This course is an examination of exemplary, interdisciplinary texts employing a variety of cultural approaches to understanding difference and inequality. In this seminar, we will think about what is gained from various cultural approaches to difference and inequality, how such approaches can be achieved methodologically, and how students can apply such approaches to their own research. The main focus of the course is on cultural studies and poststructural feminist studies, but readings will also be included from intersectionality studies, affect studies, critical race studies and cultural sociology.
Credit Hours: 3
Prerequisites: restricted to Sociology graduate students or instructor permission

SOCIOL 9687: Topical Seminar in Historical Sociology
Methodological approaches to sociological explanation of historical phenomena; related sociological theories of historical development,
including Weberian, Marxist and other perspectives applied to a topical historical problem.

**Credit Hours:** 3  
**Prerequisites:** SOCIOL 8100 or equivalent

**SOCIOL 9777: Graduate Seminar in Body and Society**
The course is organized around three major themes - body as a site of personal and political experience; the social body, emphasizing the relationship between society, culture, and individuals; and the body as a site and instrument of politics. Readings assigned for the course are aimed at critical engagement with the "body: within and across these themes. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** SOCIOL 2100 and ENGLSH 1000  
**Recommended:** 3 hours of chemistry

**SOCIOL 9887: Seminar in Sociology of Gender**
Analysis of recent research in which gender is a major focus. This research is chosen to exemplify a variety of theoretical perspectives, research strategies, and substantive topics.

**Credit Hours:** 3

**SOCIOL 9920: Independent Readings in Preparation for Comprehensive Examinations**
Independent readings for PhD comprehensives. Open only to PhD candidates who have passed qualifying examinations.

**Credit Hour:** 1-99  
**Prerequisites:** consent of major advisor

### Soil Science (SOIL)

**SOIL 2100: Introduction to Soils**  
(same as PLNT_S 2100). Introduction to soil sciences with emphasis placed on physical, biological, and chemical properties and application to land use, plant growth and environmental problems.

**Credit Hours:** 3  
**Recommended:** 3 hours of Chemistry

**SOIL 2106: Soil Science Laboratory**
Laboratory application of fundamental soil science concepts.

**Credit Hours:** 2  
**Corequisites:** SOIL 2100

**SOIL 3085: Problems in Soil Science**
Special individualized non-thesis research projects or readings in soil science.

**Credit Hour:** 1-99

**SOIL 3290: Soils and the Environment**  
(same as ENV_SC 3290). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100 and ENGLSH 1000  
**Recommended:** 3 hours of chemistry

**SOIL 3290W: Soils and the Environment - Writing Intensive**  
(same as ENV_SC 3290W). Addresses the role of soils and soil properties on environmental pollution and management. Emphasis will be placed on carbon, nitrogen, phosphorus, and sulfur transformations and transport in natural and disturbed ecosystems and soil management practices and technology to prevent or remediate environmental pollution.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100 and ENGLSH 1000  
**Recommended:** 3 hours of chemistry

**SOIL 4085: Problems in Soil Science**
Special individualized non-thesis research projects or readings in soil science.

**Credit Hour:** 1-99

**SOIL 4305: Environmental Soil Physics**  
(same as ENV_SC 4305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100

**SOIL 4306: Environmental Soil Physics Laboratory**  
(same as ENV_SC 4306). Introduction to the methodology and equipment for measurement of soil physical properties and processes.

**Credit Hours:** 2  
**Prerequisites or Corequisites:** SOIL 4305

**SOIL 4312: Environmental Soil Microbiology**  
(same as ENV_SC 4312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformation bioremediation, etc.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100  
**Recommended:** general microbiology

**SOIL 4313: Soil Fertility and Plant Nutrition**  
(same as PLNT_S 4313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100  
**Recommended:** general microbiology

**SOIL 4318: Environmental Soil Chemistry**  
(same as ENV_SC 4318 and GEOL 4318). Study of chemical constituents and processes occurring in soils. Topics include soil
minerals, and weathering processes, organic matter, solution chemistry, oxidation-reduction reactions and adsorption processes.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100 or GEOL 2400, CHEM 1320 and CHEM 1330; junior standing or instructor's consent

**SOIL 4320: Genesis of Soil Landscapes**
The co-evolution of soil landscapes. The role of water in the accumulation of parent materials and development of soil horizons. Factors and processes of soil genesis. Distribution of soil in their natural settings.

**Credit Hours:** 4  
**Recommended:** introductory soil science or introductory geology course

**SOIL 4360: Precision Agriculture Science and Technology**  
(same as AG_S_M 4360, PLNT_S 4360; cross-leveled with SOIL 7360, AG_S_M 7360, PLNT_S 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

**Credit Hours:** 3  
**Prerequisites:** PLNT_S 2100 or SOIL 2100, or PLNT_S 2110, or instructor's consent

**SOIL 4940: Soil Science Internship**
Supervised professional experience with an approved public or private organization. Course may be repeated for credit. Graded on S/U basis only.

**Credit Hour:** 1-12  
**Prerequisites:** Soil and Atmospheric Sciences majors only, instructor's consent

**SOIL 7085: Problems in Soil Science**
Special individualized non-thesis research projects or readings in soil science.

**Credit Hour:** 1-99  
**Prerequisites:** graduate standing

**SOIL 7305: Environmental Soil Physics**  
(same as ENV_SC 7305). Study of soil physical properties and processes important in solving environmental problems. Topics include soil solids, water content and energy, and transport of water, solutes, gas and heat.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100, PHYSICS 1210 or equivalent

**SOIL 7306: Environmental Soil Physics Laboratory**  
(same as ENV_SC 7306). Introduction to the methodology and equipment for measurement of soil physical properties and processes.

**Credit Hours:** 2  
**Prerequisites or Corequisites:** SOIL 4305

**SOIL 7308: Soil Conservation**
Conservation of soil with respect to topsoil, soil productivity, and fertility.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100  
**Recommended:** AG_S_M 4420

**SOIL 7312: Environmental Soil Microbiology**  
(same as ENV_SC 7312). Microbiology/ecology of life in the soil ecosystem. Emphasis is placed on the role of microbes in nutrient cycling, microbial pesticide/xenobiotic transformations bioremediation, etc.

**Credit Hours:** 3  
**Prerequisites:** general microbiology, SOIL 2100, or instructor's consent

**SOIL 7313: Soil Fertility and Plant Nutrition**  
(same as PLNT_S 7313). Explanation of principles of delivery of plant nutrients to plants, discussion of the role of each essential nutrient in crop plants and introduction to the management of soil amendments.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100 or instructor's consent

**SOIL 7314: Soil Fertility and Plant Nutrition Laboratory**  
(same as PLNT_S 7314). The application of elementary analytical procedures to the evaluation of the nutrient status of soils and crop plants.

**Credit Hours:** 2  
**Prerequisites or Corequisites:** SOIL 7313

**SOIL 7320: Genesis of Soil Landscape**
The co-evolution of soil landscapes. The role of water in the accumulation of parent materials and development of soil horizons. Factors and processes of soil genesis. Distribution of soil in their natural settings.

**Credit Hours:** 4  
**Prerequisites:** introductory soil science or introductory geology or permission of instructor

**SOIL 7360: Precision Agriculture Science and Technology**  
(same as AG_S_M 7360 and PLNT_S 7360; cross-leveled with SOIL 4360, AG_S_M 4360, PLNT_S 7360). Precision agriculture is an information-based approach to farming whereby variability is managed to optimize crop production and reduce environmental pollution. This course provides an overview of precision agriculture technologies (like GIS, GPS, remote sensing), mapping methods, and case studies illustrating decisions and management.

**Credit Hours:** 3  
**Prerequisites:** SOIL 2100, PLNT_S 2110 or instructor's consent

**SOIL 8001: Topics in Soil Science**
Organized study of selected topics in soil science. Intended for graduate students.

**Credit Hour:** 1-99
SOIL 8085: Problems in Soil Science
Special individualized non-thesis research projects or readings in soil science.
Credit Hour: 1-99

SOIL 8090: Masters Research in Soil Science
Original investigations in soil science for presentation in a thesis. Graded on S/U basis only.
Credit Hour: 1-10

SOIL 8400: Solute Transport in the Vadose Zone
(same as ENV_SC 8400). Transport of water and solutes in geomedia with emphasis on development of the equations of flow. Evaluation of analytical and numeral solutions to equations describing transport phenomena.
Credit Hours: 3
Prerequisites: ENV_SC 7305 or SOIL 7305

SOIL 8500: Chemistry of the Vadose Zone
(same as ENV_SC 8500). Chemical reactions occurring in geomedia with emphasis on understanding molecular scale processes occurring at the solid-water interface, aqueous geochemistry, and soil organic matter.
Credit Hours: 3
Prerequisites: SOIL 7318 or GEOL 7300 or instructor's consent

SOIL 9085: Problems in Soil Science
Special individualized non-thesis research projects or readings in soil science.
Credit Hour: 1-99

SOIL 9087: Seminar in Soil Science
In-depth development of advanced aspects of soil science through reviews of results of research in progress and current scientific publications.
Credit Hour: 1

SOIL 9090: Doctoral Research in Soil Science
Original investigations in soil science for presentation in a dissertation. Graded on S/U basis only.
Credit Hour: 1-10

SOIL 9422: Pedology
Three one-hour lectures. Detailed study of processes of soil horizonization and current topics in soil genesis including quantitative assessment of spatial and temporal variability and application of GIS in landuse planning.
Credit Hours: 3
Prerequisites: SOIL 7320, one statistics course beyond ANOVA

S_A_ST 1152: Asian Humanities
(same as REL_ST 1820, HIST 1820 and VS_ARH 1230). This course is an introduction to the literature and visual arts of Asia through selected master works. It focuses principally on India and China and investigates the distinctive features of their cultures.
Credit Hours: 3

S_A_ST 1861: History of Modern India
(same as HIST 1861). This course surveys the history of the South Asian subcontinent from the early seventeenth through the twentieth century. Emphasis will be placed on cultural and social history, religion, arts and literature, imperialism and colonialism, and the sources used for the study of modern civilizations. Students will develop a basic knowledge and vocabulary necessary to pursue additional South Asian courses.
Credit Hours: 3

S_A_ST 2100: Philosophy: East and West
(same as PHIL 2100). Compares the interpretation and role of philosophical concepts such as experience, reason permanence, change, immortality, soul, God, etc., in Indian, Chinese and European traditions.
Credit Hours: 3
Prerequisites: sophomore standing

S_A_ST 3200: Hinduism
(same as REL_ST 3200). Origin and development of central themes of traditional Hinduism from earliest times to the modern period. Topics include: the Vedic tradition, rituals and practice, varieties of yoga and meditation, Indian religious thought and devotional Hinduism.
Credit Hours: 3

S_A_ST 3230: Buddhism and Environmental Ethics
(same as REL_ST 3230). Global environmental crisis is associated with rapidly expanding human population. Buddhist teachings about the interdependent aspects of existence and interrelatedness of all life may provide critical insights for how humanity can achieve balance and reciprocity with nature.
Credit Hours: 3

S_A_ST 3240: Buddhism of South and Southeast Asia
(same as REL_ST 3240). Examines the origins of Buddhism in India, the narratives of the life of the Buddha, the development of early Buddhist schools, the extension of Buddhism into Central and Southeast Asia, and the current practice of Buddhism in south and Southeast Asia.
Credit Hours: 3

S_A_ST 3261: Hindu Goddesses
(same as REL_ST 3260). This course examines the vast range of Hindu Goddesses and their worship in South Asia. It includes information about goddess origins, mythology, symbolism, and attendant ritual practices. In order to approach this topic, background information about the history of Hinduism, major religious narratives, devotional practices, and iconographic representations of the divine are discussed. The course introduces the approaches of various scholars to Hindu Goddess worship within the context of religion, social relations, and gender roles, and
explores ways in which South Asian women experience and negotiate feminine power in contemporary socio-cultural contexts.

Credit Hours: 3

S_A_ST 3270: Yoga and Meditation in the Modern World
(same as REL_ST 3270). This course explores the practice of Yoga and meditation, both as an ancient tradition of India and as an example of the globalization of religion. It will examine how the ancient Hindu religious tradition of Yoga was reinvented against the backdrop of India's colonial experience. Then it will look at a variety of emerging and transforming varieties of Hindu inspired yoga and meditation that spread globally in the context of increasing transnational interaction. To better appreciate both the traditional and the modern aspects of yoga and meditation, a secular meditation practice is included as an instructional and experiential component of this class.

Credit Hours: 4

S_A_ST 4630: Sanskrit I
(same as REL_ST 4630). This intensive course will cover the essentials of Sanskrit grammar in one semester and prepare students for further readings in Hindu and Buddhist Literature.

Credit Hours: 3

S_A_ST 4790: Culture and Society in South Asia
(same as ANTHRO 4790). Survey of the cultures, social organizations, and lived experience of people from across the Indian subcontinent. Major topics include caste, kinship, gender, religion, village life, urbanization, public culture, popular culture, social change, and the South Asian diaspora.

Credit Hours: 3

Recommended: junior standing

S_A_ST 4800: Asian Philosophy
(same as PHIL 4800). This course traces the origins of Indian and Chinese philosophical world views. Included are the major ideas in Hindu, Jaina, and Buddhist thought in India, and Taoism and Confucianism in China. Emphasis is placed on the diverse, assimilative, and pragmatic nature of Indian thought and its impact on contemporary Asian philosophy.

Credit Hours: 3

Prerequisites: sophomore standing and one course in Philosophy; or instructor's consent

S_A_ST 4850: Traversing the Muslim World
(same as HIST 4850). The traveler's tale formed an important part of the medieval world's system of knowledge. The writing intensive discussion-based course examines a wide array of the most influential travelers in Muslim lands such as Ibn Fadlan, Ibn Buttuta, Benjamin of Tudela and Marco Polo.

Credit Hours: 3

S_A_ST 4850W: Traversing the Muslim World - Writing Intensive
(same as HIST 4850W). The traveler's tale formed an important part of the medieval world's system of knowledge. The writing intensive discussion-based course examines a wide array of the most influential travelers in

Spanish (SPAN)

SPAN 1100: Elementary Spanish I
An introductory course for students who wish to begin their study of Spanish. It teaches the four skills - listening, speaking, reading, and writing. The class meets four days a week (with the exception of the online section, which taught completely online). Class time is used to integrate new structures and vocabulary into spoken and written language.

Credit Hours: 4

SPAN 1100H: Elementary Spanish I - Honors
This designated honors section of Elementary Spanish will challenge students to explore more deeply the currently existing thematic units of the SPAN 1100 curriculum. Students will participate in group discussions, creative projects, independent study and use of authentic written and aural material from primary sources. Honors Spanish 1100 will integrate cultural events outside the classroom such as movies, guest lectures, art exhibits, seminars or concerts as available. Once a semester, Honors Spanish 1100 will meet with Honors SPAN 1200H and SPAN 2100H as a cohort group for further intellectual exchange and enrichment. Graded on A-F basis only.

Credit Hours: 4

Prerequisites: Honors eligibility required

SPAN 1200: Elementary Spanish II
The second course of the beginning sequence in the continuation of SPAN 1100. It places equal emphasis on the four skills; listening, speaking, reading, and writing. Students who have prior knowledge of Spanish are encouraged to take this course.

Credit Hours: 4

Recommended: Grade in the C range or better in SPAN 1100 or equivalent course

SPAN 1200H: Elementary Spanish II - Honors
This course, designed for students who have taken SPAN 1100 or an equivalent course and enrolled in the Honors College, offers an introduction to the Spanish language and the many cultures in encompasses. Your course work will allow you to develop all four language skills: reading, speaking, listening and writing along with the
cultural background necessary to help you to communicate effectively in Spanish. With the honors designation section, the course will allow students to access greater challenges in the existing thematic units in the curriculum through group discussion, creative projects and authentic situations. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Honors eligibility required

SPAN 2005: Undergraduate Topics in Spanish-Humanities/Fine Arts
Organized study of selected topics. Subjects may vary from semester to semester. May be repeated with departmental consent.

Credit Hour: 1-3
Prerequisites: SPAN 1200 with a grade of C or better

SPAN 2100: Elementary Spanish III
A multi-skill course following SPAN 1200, centering on cultural/literary readings, and including a grammar review, practice in the spoken language, as well as some practice in written expression.

Credit Hours: 4
Recommended: grade in the C range or better in SPAN 1200, or equivalent course

SPAN 2100H: Elementary Spanish III - Honors
A multi-skill course following SPAN 1200, centering on cultural/literary readings, and including a grammar review, practice in the spoken language, as well as some practice in written expression. The course seeks to improve student's fluency in Spanish and to expose them to the many cultures it encompasses. This course will integrate cultural events outside the classroom as well such as movies, guest lectures, art exhibits, seminars or concerts as available. Graded on A-F basis only.

Credit Hours: 4
Prerequisites: Honors eligibility required

SPAN 2160: Intermediate Spanish Composition and Conversation
This course is designed specifically to strengthen overall writing skills and to develop further conversational ability with equal emphasis on both of these aspects. Classwork will involve written compositions and oral presentations.

Credit Hours: 3
Prerequisites: SPAN 2100 or equivalent

SPAN 2160H: Intermediate Spanish Composition and Conversation - Honors
This class is fundamentally different from other 2160 classes in that it focuses on the application and refinement of grammatical concepts through the introduction of new vocabulary and cultural topics. In this course it is assumed that students have mastered the vocabulary and grammatical concepts taught in the elementary levels. Throughout the semester students enrolling in Spanish 2160 for Honors credit will write a series of essays on current and past events, as well as literary analysis utilizing the grammar and material learned in learned in class. The goal is to strengthen their communicative and written skills while allowing them to be creative and engage in research.

Credit Hours: 3
Prerequisites: SPAN 2100 or equivalent from any other institution. Honors eligibility required

SPAN 2320: Literature of Spanish Civil War
(same as PEA_ST 2320). Study of the Spanish Civil War: History, Politics, Literature. May not be included in the area of concentration in Spanish.

Credit Hours: 3
Prerequisites: sophomore standing

SPAN 2330: Latin American Civilization
Survey of Latin American history, arts and culture. Open to any student interested. No knowledge of Spanish required. May not be included in area of concentration in Spanish.

Credit Hours: 3

SPAN 2340: Hispanic Minority Literature
This course studies the literature of Hispanic minorities in the United States: Chicanos (Mexican American), Mainland Puerto Ricans, and Cuban exile writers. It explores the question of minority versus majority literatures and the creation of a Hispanic minority discourse. No knowledge of Spanish required.

Credit Hours: 3
Prerequisites: ENGLISH 1000

SPAN 3005: Topics in Spanish-Humanities/Fine Arts
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.

Credit Hour: 1-3
Prerequisites: sophomore standing

SPAN 3150: Advanced Spanish Conversation
Course puts into practice the linguistic skills learned at intermediate levels. It develops and increases the capacity for comprehension and oral expression in the language. Focus is on practice of certain syntactic structures and idiomatic expressions, and on acquisition of new vocabulary.

Credit Hours: 3
Prerequisites: SPAN 2160 or equivalent

SPAN 3150H: Advanced Spanish Conversation
Course puts into practice the linguistic skills learned at intermediate levels. It develops and increases the capacity for comprehension and oral expression in the language. Focus is on practice of certain syntactic structures and idiomatic expressions, and on acquisition of new vocabulary.

Credit Hours: 3
Prerequisites: SPAN 2160 or equivalent. Honors Eligibility required

SPAN 3160: Advanced Spanish Composition
Course emphasizes writing at an advanced level, with a certain degree of sophistication about varied subjects and using different techniques of composition. Classwork consists mainly of the discussion of both the ideas and techniques used in different textual forms.

Credit Hours: 3
**Prerequisites:** SPAN 2160 or equivalent

**SPAN 3170: Conversational Spanish Practice**  
Study Abroad Conversational Spanish course for students who have already completed SPAN 3150, but want more practice. Does not count for majors/minors. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3150 and instructor's consent

**SPAN 3280: Commercial Spanish**  
Business terminology and forms. Translate and compose business letters and documents for advertising and promotion, trade and commerce, imports and exports, money and banking.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 2160 or equivalent

**SPAN 3420: Introduction to Hispanic Literature I**  
Selected prose fiction and nonfiction prose of Spain and Spanish America.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3160 or equivalent

**SPAN 3420W: Introduction to Hispanic Literature I - Writing Intensive**  
Selected prose fiction and nonfiction prose of Spain and Spanish America.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3160 or equivalent

**SPAN 3430: Introduction to Hispanic Literature II**  
Selected plays and poetry of Spain and Spanish America.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3160 or equivalent

**SPAN 3430H: Introduction to Hispanic Literature II - Honors**  
Selected plays and poetry of Spain and Spanish America.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3160 or equivalent. Honors eligibility required

**SPAN 3430W: Introduction to Hispanic Literature II - Writing Intensive**  
Selected plays and poetry of Spain and Spanish America.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 3160 or equivalent

**SPAN 3710: Survey of Minority and Creole Languages of the U.S. and the Caribbean**  
(same as FRENCH 3710 and LINGST 3710). Analysis of the state of the minority languages of the U.S. and the Creole languages of the Caribbean with particular attention to the social status of these languages and speakers' attitudes toward them in the context of ethnic, culture and national identity (taught in Eng.).  
**Credit Hours:** 3  
**Prerequisites:** sophomore standing

**SPAN 3721: Spanish Phonetics**  
(same as LINGST 3721). Introductory course to the study of Spanish phonological, phonetic and spelling systems, practice of pronunciation, phonetic transcriptions, and introduction to the variation of Spanish pronunciation in the Hispanic world. The course is conducted in Spanish.  
**Credit Hours:** 3  
**Prerequisites:** SPAN 2160 or equivalent

**SPAN 3885: Twenty-First Century South American Cinema**  
(same as FILM_S 3885, PORT 3885). Broad overview of the major national cinemas of the 21st century in South America. Approximately 14 feature films screened from Argentina, Brazil, Chile and other nations of the region. Instructor provides a thematic framework for films within the context of film theory, Latin American cinematic history and cultural studies. Course taught in English. Graded on A-F basis only.  
**Credit Hours:** 3  
**Prerequisites:** ENGLSH 1000 or ENGLSH 1000H

**SPAN 4070: Intensive Beginning Spanish**  
Designed for rapid acquisition of a reading knowledge of Spanish. Cannot be taken to fulfill undergraduate language requirement.  
**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**SPAN 4120: Foreign Language Teaching Methodology**  
(same as FRENCH 4120, LATIN 4121; cross-leveled with FRENCH 7120, SPAN 7120). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used towards Arts and Science major.  
**Credit Hours:** 3  
**Prerequisites:** departmental consent

**SPAN 4130: Stylistics**  
Advanced composition class. Discussion of complex grammatical structures necessary for formal writing as well as orthographic rules in Spanish. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production.  
**Credit Hours:** 3  
**Recommended:** SPAN 3420 and SPAN 3430

**SPAN 4130W: Stylistics - Writing Intensive**  
(cross-leveled with SPAN 7130). Advanced composition class. Discussion of complex grammatical structures necessary for formal writing as well as orthographic rules in Spanish. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production.  
**Credit Hours:** 3  
**Recommended:** SPAN 3420 and SPAN 3430

**SPAN 4420: Golden Age Poetry**  
Poetry of the principal Spanish poets of the 16th and 17th centuries and of literary criticism devoted to it. Special emphasis is placed on the works

SPAN 4723: Language and Society: Spanish in the U.S.
(same as LINGST 4723). This class surveys linguistic and social issues pertaining to Spanish in the U.S. (past, present and future). Topics include bilingualism, code switching (a.k.a. Spanglish), first language attrition, linguistic identity, and the role of Spanish in education, services and media. Graded on A-F basis only.
Credit Hours: 3
Recommended: four 3000-level courses in Spanish

SPAN 4960: Special Readings in Spanish
Independent study through readings, conferences, reports.
Credit Hour: 1-3
Prerequisites: SPAN 3420 and SPAN 3430 and departmental consent

SPAN 4980: Special Themes in Spanish
Subject varies according to instructor. May be repeated for credit.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 4993: The Capstone Experience in Spanish
This course is required of all majors. Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in Spanish, and the ability to think critically and analytically.
Credit Hours: 3

SPAN 7004: Topics in Spanish-Social Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated for credit with departmental consent.
Credit Hour: 1-99

SPAN 7120: Foreign Language Teaching Methodology
(same as FRENCH 7120; cross-leveled with FRENCH 4120, SPAN 4120 and LATIN 4121). Theory and techniques of current foreign language methodology and their application in the classroom. Presentation of instructional projects, classroom observations, and strategies for classroom management. May not be used towards Arts and Science major.
Credit Hours: 3

SPAN 7130: Stylistics
(cross-leveled with SPAN 4130). Advanced composition class. Discussion of complex grammatical structures necessary for formal writing as well as orthographic rules in Spanish. Examination of stylistic devices and structures beyond sentence level, in order to learn to organize discourse level production.
Credit Hours: 3
Recommended: SPAN 3420 and SPAN 3430

SPAN 7422: Spanish Theatre in the Golden Age
Dramatists to be studied include Lope de Vega, Calderon, Ruiz de Alarcon, Tirso de Molina, Guillen de Castro, Velez de Guevara, and some of Cervantes’ theatre.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7423: Don Quijote
In this course students read the two parts of Don Quijote in the original Spanish. Analysis and class discussion highlight elements of literary interest. Neo-positivist methodology, factual background, formalist considerations and psychoanalytic approaches are used in this course.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7460: Advanced Contemporary Culture of Spanish America
(cross-leveled with SPAN 4460). A study of Spanish-American culture and civilization through selected readings in history and literature, and the use of visual media. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: SPAN 3150 and SPAN 3160

SPAN 7470: Survey of Spanish American Literature I
This is a course in Spanish American literature. The reading material in prose and verse is studied in chronological order from the early 16th to the early 20th century. Readings include selections from 22 major Spanish American authors.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7471: Survey of Spanish American Literature II
Survey of contemporary Latin American literature from approximately 1910 to the present. Close analysis and reading of representative major texts of Latin American literature. Students read complete selections and short excerpts from a standard anthology, and three complete novels.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7480: Mexican Literature
Analysis of selected poetry, prose, and drama of contemporary Mexico. Course examines the writings of major and minor figures from several critical perspectives. Works by Agustin, Aviles, Fabila, Carballido, Castellanos, Fuentes, Paz, and others are read.
Credit Hours: 3
Prerequisites: SPAN 3420 and SPAN 3430

SPAN 7490: Hispanic Oral Traditions
This course proposes to examine the Hispanic Oral Tradition through a study of romances and related genres, the corrido, decima and folktale.
SPAN 7903: The Capstone Experience in Spanish
Topics vary but all courses synthesize and review essential components of the major: speaking, writing, reading in Spanish, and the ability to think critically and analytically.
Credit Hours: 3

SPAN 7980: Special Themes in Spanish
Subject varies according to instructor.
Credit Hours: 3

SPAN 8085: Problems in Spanish
Problems in Spanish.
Credit Hour: 1-99

SPAN 8087: Seminar in Spanish
Subject varies according to instructor.
Credit Hour: 2-3

SPAN 8090: Research in Spanish
Leads to preparation of MA or MALT thesis. Graded on S/U basis only.
Credit Hour: 1-99

SPAN 8120: Bilingualism and Language Contact
(same as FRENCH 8120 and LINGST 8120). Global analysis of the study of Bilingualism from a combined sociocultural, sociolinguistic and psycholinguistic perspective based on current research and examination of various phenomena of language contact (taught in English).
Credit Hours: 3

SPAN 8412: Studies in Spanish Literature of the Medieval Period
Studies in Spanish Literature of the Medieval Period.
Credit Hours: 3
Recommended: SPAN 8460

SPAN 8416: Studies in Spanish Literature in the Golden Age
Studies in Spanish Literature in the Golden Age
Credit Hours: 3

SPAN 8420: Studies in Twentieth-Century Spanish Literature
Studies in Twentieth-Century Spanish Literature
Credit Hours: 3
SPAN 8460: Old Spanish—Phonology, Morphology and Syntax
Credit Hours: 3
Prerequisites: knowledge of Latin, to be demonstrated by passing departmental written examination or by completing LATIN 7110 with grade of B or better

SPAN 9080: Readings in Spanish
Independent readings in preparation for Ph.D. comprehensive examination in Spanish.
Credit Hour: 3-6

SPAN 9090: Research in Spanish
Leads to preparation of PhD dissertation in Spanish. Graded on S/U basis only.
Credit Hour: 1-99

Special Education (SPC_ED)

SPC_ED 3100: Applied Behavior Analysis and Autism
Students will learn the behavioral principles and techniques currently employed to help children with autism acquire functional language, appropriate social behavior, and general academic and living skills as well as decrease problematic behaviors. The objectives of this course are: 1) To identify and describe key features of applied behavior analysis (ABA), particularly as it applies to intervention for children with autism. 2) To identify and describe key issues in curricular design, program development, and evidence-based interventions in autism. 3) To become familiar with key outcome research in behavioral interventions for children with autism. 4) To become familiar with key research on language, social skills, self-help skills, and problem behavior reduction as these areas relate to the behavioral treatment of autism. Graded on A-F basis only.
Credit Hours: 3

SPC_ED 4020: Teaching the Exceptional Learner
Teaching the Exceptional Learner addresses topics in the foundations of pedagogy for students with disabilities in inclusive settings, including the roles and responsibilities of the general educator and related service personnel with respect to special education law and policy, behavior management, universal design for learning, and evidence-based practices. Graded on A-F basis only.
Credit Hours: 3
Recommended: Progression into Phase II

SPC_ED 4300: Introduction to Special Education
Introductory overview of the field of special education; historical developments, characteristics of special populations, and compliance with state and federal regulations.
Credit Hours: 3

SPC_ED 4310: Behavioral Management for Exceptional Students
Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision-maker in the design, implementation, evaluation of individual and group management programs.
Credit Hours: 3
Prerequisites: SPC_ED 4300

SPC_ED 4320: Assessment and Evaluation in Special Education
Procedures and instruments used in the assessment of individual with disabilities, including standardized and non-standardized measures of intellectual ability, academic achievement, oral language, social/ emotional behaviors, career/vocational needs.
Credit Hours: 3
Prerequisites: SPC_ED 4300

SPC_ED 4325: Language Development of Exceptional Students
Study of language and communication issues and disorders in special education; normal and atypical language development; language assessment and intervention models and programs.
Credit Hours: 3
Prerequisites: SPC_ED 4300

SPC_ED 4330: Collaboration and Consultation in Special Education
Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams.
Credit Hours: 3
Prerequisites: SPC_ED 4300

SPC_ED 4340: Collaboration and Consultation in Special Education
Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams.
Credit Hours: 3
Prerequisites: SPC_ED 4300

SPC_ED 4350: Literacy in Special Education
Addresses specific literacy needs of students who are at-risk or have special needs with a focus on assessment and instruction in general education classrooms.
Credit Hours: 3
Prerequisites or Corequisites: SPC_ED 4300

SPC_ED 4370: Literacy in Special Education II
Advanced study in literacy methods and research for students with disabilities. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: SPC_ED 4370 or SPC_ED 7370

SPC_ED 4371: Literacy in Special Education II
Advanced study in literacy methods and research for students with disabilities. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: SPC_ED 4370 or SPC_ED 7370

SPC_ED 4375: Cross Categorical Special Education
Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.
Credit Hours: 3
Recommended: Admittance to Phase II

SPC_ED 4380: Methods in Cross-Categorical Special Education
(cross-leveled with SPC_ED 7380). This course is designed to provide students with research-based instructional and behavior management methods for use with student with cross-categorical disabilities.
Credit Hour: 3-4
Prerequisites: SPC_ED 4375 and SPC_ED 4940
Recommended: Admittance to Phase II
SPC_ED 4380W: Methods in Cross-Categorical Special Education - Writing Intensive
(cross-leveled with SPC_ED 7380). This course is designed to provide students with research-based instructional and behavior management methods for use with students with cross-categorical disabilities.

Credit Hour: 3-4
Prerequisites: SPC_ED 4375 and SPC_ED 4940
Recommended: Admittance to Phase II

SPC_ED 4390: Methods in Vocational Education for the Disabled and Disadvantaged
(same as LTC_V 4770). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

Credit Hour: 2-3
Prerequisites: SPC_ED 4300

SPC_ED 4401: Topics in Special Education
In-depth study of certain developments, findings, trends and issues in one or more areas of special education.

Credit Hours: 3

SPC_ED 4500: Science and Social Studies for Struggling Learners
This course will focus on the study of diagnostic and instructional techniques for the teaching of science and social studies. In this course, students will study the characteristics of students who struggle in science and social studies. Students with develop a knowledge base of effective practices for assessment and teaching strategies in science and social studies. Graded on A-F basis only.

Credit Hours: 3
Recommended: Admitted to Phase II in Special Education

SPC_ED 4940: Cross-Categorical Special Education: Practicum I
Involvement in meaningful field-based activities that extend and/or apply content information from SPC_ED 4375.

Credit Hour: 1-4
Prerequisites or Corequisites: SPC_ED 4375
Recommended: Admittance to Phase II

SPC_ED 4941: Practicum in Cross-Categorical II
(cross-leveled with SPC_ED 7941). The purpose of this course is to provide students with experience in applying the content of Special Education 4380 (i.e. assessment and intervention strategies for use with students with cross categorical disabilities). This course may be repeated for credit.

Credit Hour: 2-3
Prerequisites or Corequisites: SPC_ED 4380
Prerequisites: SPC_ED 4375 and SPC_ED 4940

SPC_ED 4972: Capstone Seminar and Portfolio in Special Education
Students in final student teaching internship will meet weekly to examine and compare their internship experiences. Analysis, synthesis, evaluation and problem solving are the focus of the examination of various aspects of pedagogy and experience. Additionally, students will develop and submit for scoring their State mandated certification portfolio.

Credit Hour: 1
Prerequisites: SPC_ED 4981
Recommended: Enrollment in final semester of student teaching internship

SPC_ED 4981: Internship in Special Education
(cross-leveled with SPC_ED 7981). This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preservice intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

Credit Hour: 4-10
Prerequisites: ED_LPA 4060
Recommended: Admittance to Phase II

SPC_ED 7020: Teaching the Exceptional Learner
Teaching the Exceptional Learner addresses topics in the foundations of pedagogy for students with disabilities in inclusive settings, including the roles and responsibilities of the general educator and related service personnel with respect to special education law and policy, behavior management, universal design for learning, and evidence-based practices. Graded on A-F basis only.

Credit Hours: 3
Recommended: Progression into Phase II

SPC_ED 7300: Introduction to Special Education
Introductory overview of the field of special education; historical developments, characteristics of special populations, and compliance with state and federal regulations.

Credit Hours: 3

SPC_ED 7310: Behavioral Management for Exceptional Students
Study of classroom management and applied behavior analysis strategies. Focus on teacher as decision-maker in the design, implementation, evaluation of individual and group management programs.

Credit Hours: 3

SPC_ED 7320: Assessment and Evaluation in Special Education
Procedures and instruments used in the assessment of individual with disabilities, including standardized and non-standardized measures of intellectual ability, academic achievement, oral language, social/ emotional behaviors, career/vocational needs.

Credit Hours: 3

SPC_ED 7325: Language Development of Exceptional Students
Study of language and communication issues and disorders in special education; normal and atypical language development; language assessment and intervention models and programs.
### SPC_ED 7330: Collaboration and Consultation in Special Education
Study of communication, problem-solving, collaboration strategies. Application of strategies to work with exceptional students, their families, other professional members of interdisciplinary, interagency teams.

| Credit Hours: | 3 |
| Prerequisites: | SPC_ED 4300 |

### SPC_ED 7370: Literacy in Special Education
Addresses specific literacy needs of students who are at-risk or have special needs with a focus on assessment and instruction in general education classrooms.

| Credit Hours: | 3 |
| Prerequisites: | SPC_ED 4300 |

### SPC_ED 7371: Literacy in Special Education II
Advanced study in literacy methods and research for students with disabilities. Graded A-F only.

| Credit Hours: | 3 |
| Prerequisites: | SPC_ED 4300 or SPC_ED 7370 |

### SPC_ED 7375: Cross Categorical Special Education
Study of characteristics of students with cross categorical disabilities and other pertinent issues including inclusion, assessment, and evaluation practices.

| Credit Hours: | 3 |
| Prerequisites: | professional standing in Phase II |

### SPC_ED 7380: Methods in Cross-Categorical Special Education
This course is designed to provide students with research-based instructional and behavior management methods for use with students with cross-categorical disabilities.

| Credit Hours: | 4 |
| Prerequisites: | professional standing in Phase II, SPC_ED 4375, SPC_ED 4940 |

### SPC_ED 7390: Methods in Vocational Education for the Disabled & Disadvantaged
(same as LTC_V 7770). Study of legislation, interagency cooperation, curriculum, transition, evaluation/grading role of support personnel. For educators, counselors and administrators working in vocational settings with special needs students and students with disabilities.

| Credit Hours: | 2-3 |
| Prerequisites: | SPC_ED 4300 |

### SPC_ED 7941: Practicum in Cross-Categorical II
(cross-leveled with SPC_ED 4941). The purpose of this course is to provide students with experience in applying the content of Special Education 4380 (i.e. assessment and intervention strategies for use with students with cross categorical disabilities). This course may be repeated for credit.

| Credit Hour: | 2-3 |
| Prerequisites or Corequisites: | SPC_ED 4380 |
| Prerequisites: | SPC_ED 4375 and SPC_ED 4940 |

### SPC_ED 7981: Internship in Special Education
(cross-leveled with SPC_ED 4981). This field experience provides preservice interns a semester-long public school experience where they simultaneously engage in a unique combination of observation and teaching. Through observation, conferencing, reading, discussion, demonstration, and participation, the preservice intern will synthesize the course concepts of the Senior Year On-Site Program (SYOSP). Graded on A-F basis only.

| Credit Hour: | 4-10 |
| Prerequisites: | ED_LPA 7060; Admittance to the College of Education |
| Recommended: | Admittance into Phase II |

### SPC_ED 8085: Problems in Special Education
Graded on A-F basis only.

| Credit Hour: | 1-99 |
| Prerequisites: | instructor's consent |

### SPC_ED 8090: Masters Thesis Research Hours
Restricted to students enrolled in the graduate program. Graded S/U only.

| Credit Hours: | 3 |

### SPC_ED 8100: Concepts and Principles in Behavior Analysis
This course will provide an overview of both classic and contemporary theory and research on nonhuman and human learning. We will focus on a behavior-analytic conceptualization of learning and the underlying research on basic processes and operations that result in learning. The readings and class discussions will provide you with a strong foundation in the psychology of learning from a behavioral orientation, with particular emphasis on the relation between biological and environmental contributions to selection of behavior. To effectively produce socially significant behavior change among members of clinical populations, we must approach the task with a thorough understanding of these basic principles - we cannot stray from our principles.

| Credit Hours: | 3 |
| Prerequisites or Corequisites: | Admission to the Master's Program in Applied Behavior Analysis or Graduate Certificate program in Applied Behavior Analysis. Others need to contact faculty individually |

### SPC_ED 8210: Using Assessment to Guide Instruction
This course is designed to present information on the evaluation of individual student skills and the effects of instruction on those skills. Graded on A-F basis only.

| Credit Hours: | 3 |
SPC_ED 8250: Developmental Processes in Autism and Neurodevelopmental Disorders
This graduate level course will focus on understanding autism and other neurodevelopmental disorders from within a developmental framework. An understanding of typical development is essential in order to recognize when developmental problems arise. By the same token, developmental disorders can elucidate the complexity of development among typically functioning children. The course will compare and contrast typical and atypical development across major developmental domains. We will begin with an overview of the field and foundational concepts, and will then move to an examination of key developmental domains and selected neurodevelopmental disorders (as examples of atypical development in each domain). Throughout the course, students will be encouraged to relate concepts and empirical findings to their respective professional interests. Graded on A-F basis only.

Credit Hours: 3
Recommended: Recommended for students in the Applied Behavior Analysis master's and graduate certificate program

SPC_ED 8300: Students with Behavioral Disorders
Study of characteristics of students with behavioral disorders as they relate to best practices for assessment, instruction, and intervention.

Credit Hours: 4
Prerequisites: SPC_ED 4300 and instructor's consent

SPC_ED 8305: Ethics in Applied Behavior Analysis
This graduate level course provides the student with an in-depth coverage of ethics and professional behavior in applied behavior analysis. This course will help the student become prepared to sit for the Behavior Analyst Certification Board exam. This course primarily emphasizes Content Area #1 (Ethical Considerations) but also Content Areas #4, 5, and 8 (Behavioral Assessment, Experimental Evaluation of Interventions, and Selecting Intervention Outcomes and Strategies) of the Behavior Analysis Task List - Fourth Edition. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Student must be enrolled in the Graduate Certificate in ABA or Master's in ABA program

SPC_ED 8340: Advanced Studies in Developmental Disabilities
Current theories and practices and their historic roots through examination of empirical and descriptive literature.

Credit Hours: 3
Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8350: Research with Exceptional Children
Explores significant, historical, and current research in special education. Emphasizes the application of research, methodology, and findings relative to problems facing the practitioner.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8353: Advanced Studies: Single Subject Design
The course is for advanced graduate students in special education, k psychology, related fields and includes behavioral measurement, single subject research designs, data analysis methods, critical analysis and evaluation of single subject research and research proposal. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8355: Grant Writing
Preparation of research, demonstration, training, or other grant proposals meeting the criteria for competitive funding by a federal agency; review and evaluation of proposals.

Credit Hours: 3
Prerequisites: admission to graduate study and instructor's consent

SPC_ED 8360: Special Education Administration
Principles, protective safeguards, and general practices associated with the organization and administration of special education; legal foundations for special education; selection, training, and supervision of personnel.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8365: Research Design in Special Education
Overview of professional writing and intermediate research applications with a focus on knowledge and skills needed for higher level doctoral work in statistics and research design.

Credit Hours: 3
Prerequisites: ESC_PS 4170 or equivalent, SPC_ED 8350 or equivalent, and instructor's consent

SPC_ED 8370: Foundations I: History, Law and Policy in Special Education
The changing concept of disability will be viewed from the perspectives of history, legal issues, and policy traced from early Greek and European periods through contemporary times.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8375: Foundations II: Pedagogical Theories in Special Education
A study of theories of teaching as they apply to special education with emphases on empirically based practices, historical trends, current theories, and the relationship between theories of learning and teaching.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8380: Nature and Needs of Gifted and Talented Students
A conceptual and empirical examination for educational personnel of student identification procedures, special populations, programming issues, research topics and teacher competencies.

Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8385: Individualized Assessment and Intervention
This course builds upon the basic principles of learning and applied behavior analysis presented during previous courses in the Behavior

SPC_ED 8495: Introduction and Methods of Early Childhood Special Education
This course will enhance individual knowledge and skills necessary to design, implement, and evaluate research-based strategies and practices in community or public school integrated programs for preschools with disabilities, consistent with the philosophical and legal requirements of IDEA Part B Section 619.
Credit Hours: 2-3

SPC_ED 8500: Systems Level Behavior Analysis
This course will offer an introduction to the application of behavior analytic concepts and principles to problems of human behavior at the systems level. Students will learn the basics of modifying behavior at the systems level, which includes clinical settings. Class assignments will help the students learn to apply the concepts discussed in class to their own work environment. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: HLTHPSYC 8100

SPC_ED 8520: Meeting the Needs of all Learners
The purpose of this course is to provide information on current research and methodology on teaching students who are struggling or who have disabilities. Open only to teaching fellows. Graded on A-F basis only.
Credit Hours: 3

SPC_ED 8601: Introduction to Autism
This course provides an introduction of children youth with autism spectrum disorders. Topics include: historical and theoretical foundations, diagnostic and assessment approaches, and characteristics. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: Introduction to Special Education; instructor's consent

SPC_ED 8602: Methods of Instruction for Students with Autism
Overview of interventions for individuals with autism spectrum disorders and strategies needed for teaching. Best practices and promising practices will be presented. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: SPC_ED 8601, instructor's consent required

SPC_ED 8603: Social Competency for Students with Autism
Course provides a framework for addressing social competence deficits experienced by students with autism. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: SPC_ED 8601, instructor's consent required

SPC_ED 8604: High Functioning Students with Autism
The course is designed to increase understanding and ability to support individuals on the Autism Spectrum who have average to above average intelligence. Course graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8605: Young Children with Autism
Current research on characteristics, diagnosis, and intervention for very young children with autism. Strategies for support children and their families. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8606: Assessment in Autism, Special Education
This course covers procedures and instruments used in assessment of school-aged children with autism, including screening, diagnosis, interpretation of assessment findings, and application to instructional plans. Graded on A-F only.
Credit Hours: 3
Prerequisites: SPC_ED 7300
Corequisites: SPC_ED 8601

SPC_ED 8608: Practicum: Students with Behavioral Disorders
Graduate field experience in educational setting for students with behavioral disorders. Application of competencies from Special Education 8300.
Credit Hours: 1-10
Prerequisites: Graduate student in the M.S. program in Applied Behavior Analysis

SPC_ED 8609: Capstone in Applied Behavior Analysis
The capstone will consist of a clinical question or direct replication of previous research, which will serve as a demonstration of the student's knowledge of applied behavior analysis. The expectation is that the thesis will add to our current clinical knowledge in ABA. Graded on S/U basis only.
Credit Hour: 1-9
Prerequisites: Graduate student in the M.S. program in Applied Behavior Analysis

SPC_ED 8800: Practicum in Applied Behavior Analysis
The Practicum in Applied Behavior Analysis provides practical training in ABA. Graduate students will participate in an intensive practicum that focuses on developing well-rounded training in ABA. Students will work hands on with children at the MU Thompson Center for Autism and Neurodevelopmental Disorders. By the completion of the practicum, students will be well versed in the development of skill building programs as well as behavioral reduction programs that focus on function-based interventions (e.g., functional analyses). Graded on S/U basis only.
Credit Hour: 1-3
Prerequisites: Students must be enrolled in the Graduate Certificate in ABA or Masters of Science in ABA programs

SPC_ED 8900: Capstone in Applied Behavior Analysis
The capstone will consist of a clinical question or direct replication of previous research, which will serve as a demonstration of the student's knowledge of applied behavior analysis. The expectation is that the thesis will add to our current clinical knowledge in ABA. Graded on S/U basis only.
Credit Hour: 1-9
Prerequisites: Graduate student in the M.S. program in Applied Behavior Analysis

SPC_ED 8940: Practicum: Students with Behavioral Disorders
Graduate field experience in educational setting for students with behavioral disorders. Application of competencies from Special Education 8300.
Credit Hours: 3
Prerequisites: instructor's consent

SPC_ED 8943: Practicum in Special Education
Provides graduate practicum experience relevant to the education of exceptional students.
Credit Hour: 1-10
Prerequisites: SPC_ED 4300 and instructor's consent

SPC_ED 8946: Practicum: Gifted Education
Provides graduate field experience in the area of gifted education.
Credit Hours: 3
Prerequisites: instructor or advisor's consent

SPC_ED 8947: Practicum: Early Childhood Special Education
Graduate field experience in an approved setting for young children with special needs. May be repeated.
Credit Hour: 1-10
Prerequisites: instructor's consent

SPC_ED 9090: Research in Special Education
Graded on a S/U basis only.
Credit Hour: 1-99
Prerequisites: instructor's consent

SPC_ED 9387: Professional Seminar in Special Education
Designed to provide overview of Special Education, COE program requirements, and general graduate student expectations. Students STRONGLY encouraged to take course first semester in graduate program. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: acceptance into a master's degree program

SPC_ED 9940: Internship: College Teaching in Special Education
Individually guided and supervised college teaching experiences. Competency based activities using portfolio assessment methods. May be taken more than once. Graded on S/U basis only.
Credit Hours: 3
Prerequisites: instructor's consent

V_M_S 6001: Topics in Veterinary Medicine
Current topics, infrequently-taught courses, or new courses not yet designated by a permanent course number. Some sections may be graded A-F only or S/U only. Course instructor consent prior to enrollment is required.
Credit Hour: 0.5-6
Prerequisites: Restricted to Veterinary Medicine students

V_M_S 6002: Veterinary Raptor Medicine
This multiple-block course is designed to introduce veterinary students to wildlife rehabilitation practices through lectures, laboratories, hands-on rehabilitation, and release of wild birds of prey. Professional veterinary students organize this course with oversight by the course directors. Graded on S/U basis only.
Credit Hours: 0.5
Prerequisites: first year veterinary students

V_M_S 6005: Clinical Skills
A hands-on laboratory class to provide experience with handling and examining Horses, Cattle, Small ruminants and Camelid species, Cats and Dogs for veterinary students.
Credit Hours: 0.5
Prerequisites: first year veterinary students

V_M_S 6010: Evaluated Veterinary Preceptorship
This required co-op style course provides the student with practical exposure and experience in nonacademic veterinary medicine. Duration of 2-6 weeks. Graded on S/U basis only.
Credit Hour: 1-99
Prerequisites: VM-3 standing

V_M_S 6020: Veterinary Radiology with Laboratory
Introduces through lectures and demonstrations the principles of radiographic examination and interpretation of disease processes of domestic animals. Instructional period 8.
Credit Hours: 2
Prerequisites: first year veterinary students

V_M_S 6030: Veterinary Anesthesiology with Laboratory
Basic principles of anesthesia for any species of domestic and exotic animals. Instructional period 9.
Credit Hours: 2

V_M_S 6040: Companion Animal Medicine with Laboratory
Covers basic principles of veterinary internal medicine and selected subdisciplines. Instructional period 9.
Credit Hours: 4

V_M_S 6050: Small Animal Medicine
Didactic presentations regarding pathophiology, diagnosis and therapeutic management of organ system diseases in small animals.
Credit Hours: 2.5
V_M_S 6060: Small Animal Surgery with Laboratory
Basic principles including suture materials, suture patterns, operative techniques, wound healing, and body system approach to soft tissue surgery conditions.

Credit Hours: 2

V_M_S 6071: Small Animal Surgery
Continuation of V_M_S 6060 lectures, focusing primarily on orthopedics.

Credit Hours: 2

V_M_S 6072: Optional Surgery and Anesthesia Laboratory
Designed to teach entry-level surgical and anesthesia skills using models, live animals, and cadavers. This laboratory is offered as a substitute to V_M_S 6073 for students who wish to gain anesthesia and surgical experience with live tissues. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: V_M_S 6060

V_M_S 6073: Fundamental Surgery Laboratory
Designed to teach entry-level surgical skills using models and cadavers. Canine cadavers will be substituted for pigs in the first two celiotomy laboratories. Students will not anesthetize pigs but will observe clinical anesthesia by following one clinical case from start to finish. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: complete V_M_S 6060

V_M_S 6081: Food Animal Medicine and Surgery
Covers the important diseases of cattle, goats, sheep, camelids, and swine recognition, management and prevention of diseases are stressed.

Credit Hours: 2.5

V_M_S 6082: Food Animal Medicine and Surgery
Continuation of V_M_S 6081. Covers the important diseases of cattle, goats, sheep, camelids, and swine recognition, management and prevention of diseases are stressed.

Credit Hours: 2

V_M_S 6090: Small Animal Emergency and Critical Care with Laboratory
Basic principles of emergency and critical care of companion animals, and body system approach to emergency and critical care.

Credit Hour: 1

V_M_S 6100: Evaluation of Animal Disease Monitoring and Surveillance Program (cross-leveled with V_M_S 8100). This course will allow students to articulate and share what they have learned in coursework and to supplement previous learning by exploring additional areas of knowledge relevant to their readiness for professional practice. It will enable students to test theoretical knowledge against real life practical experiences, and to integrate and refine basic and advanced concepts, values, and methods acquired during the professional education. Graded on A-F only.

Credit Hours: 2

Prerequisites: second year standing in the DVM program, enrollment in the dual degree MPH program, or consent of instructor

V_M_S 6110: Theriogenology
Reproductive function, estrous cycle manipulation, and breeding of individual domestic animals and herds. Pathogenesis, diagnosis and management (medical and surgical) of common reproductive disorders.

Credit Hours: 3

V_M_S 6120: Veterinary Ophthalmology
Covers examination, diagnostic procedures and treatment of important eye diseases of domestic animals.

Credit Hour: 1

V_M_S 6130: Fundamentals of Veterinary Business Management
To realistically present to the second-year veterinary student a basic explanation of the essential need for strong base of knowledge pertaining to business and management in order to be successful in the veterinary profession.

Credit Hour: 1

V_M_S 6140: Nutrition with Laboratory
Nutrition of companion and food producing animals and nutritional principles important to veterinary medicine. Subjects presented include feeding of animals for maintenance of healthy conditions during all life stages, evaluation of foods and supplements, and methods of diet formulation and evaluation.

Credit Hour: 1.5

V_M_S 6151: Equine Medicine and Surgery
Covers the fundamentals of diseases of the equine species. Case Management approaches are utilized to provide examples of disease conditions.

Credit Hours: 2

V_M_S 6152: Equine Medicine and Surgery
Continuation of V_M_S 6151. Covers the fundamentals of diseases of the equine species. Case Management approaches are utilized to provide examples of disease conditions.

Credit Hours: 1.5

V_M_S 6400: Food Animal Medicine and Surgery I
Clinical Rotation. Technical, diagnostic and therapeutic procedures common to the practice of large animal medicine and surgery. Experience in the operation of a large animal hospital and farm outpatient practice.

Credit Hours: 6

V_M_S 6411: Small Animal Internal Medicine
Clinical rotation in small animal internal medicine for veterinary degree students. Students will obtain history and conduct physical examination of client-owned dogs and cats. After reviewing findings with faculty, they will perform diagnostic tests and carry out treatments. Graded on A-F basis only. May be repeated for credit.

Credit Hour: 1-99
Prerequisites: the entire pre-clinical curriculum of the CVM must be completed before taking this course; that is, students must have successfully completed the DVM curriculum through instruction period 12. Restricted to students in years 3 and 4 of the DVM curriculum.

V_M_S 6412: Small Animal Community Practice
Clinical rotation in small animal general medicine and surgery for veterinary degree students. Students will obtain history and conduct physical examination of client-owned dogs and cats. After reviewing findings with faculty, they will perform diagnostic tests and carry out treatments. The entire course may not be repeated for credit but smaller sections may with approval.

Credit Hour: 1-99
Prerequisites: the entire pre-clinical curriculum of the CVM must be completed before taking this course; students must have successfully completed the DVM curriculum through instructional period 12. Restricted to students in years 3 and 4 of the DVM curriculum.

V_M_S 6413: Small Animal Behavior and Dermatology
The Small Animal Behavior and Dermatology Rotation is designed to give students experience in the evaluation and management of dogs and cats with behavioral problems and to provide students with hands-on experience in the evaluation, diagnosis and management of dermatology cases. During the rotation the student will develop skills in history taking, behavioral evaluations, dermatology examinations and diagnostic procedures and in the management of behavioral and dermatology cases. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to third- and fourth-year Veterinary Medicine students

V_M_S 6420: Equine Medicine and Surgery I

Credit Hours: 6

V_M_S 6432: Small Animal Soft Tissue Surgery
Clinical rotation. Diagnostic procedures and surgical techniques applicable to companion animal soft tissue surgery. Practical experience in the operation of a small animal soft tissue surgical practice.

Credit Hours: 2
Prerequisites: completion of Vet Med years 1 and 2 and specifically V_M_S 6072 or V_M_S 6073

V_M_S 6434: Small Animal Orthopedic Surgery
Clinical rotation. Diagnostic procedures and surgical techniques applicable to companion animal orthopedic surgery. Practical experience in the operation of a small animal orthopedic surgical practice. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: completion of Veterinary Medicine years 1 and 2

V_M_S 6436: Veterinary Neurology/Neurosurgery
Clinical rotation. A hands-on applied clinical rotation to provide experience in examination and diagnosis of domestic animals with neurologic disease.

Credit Hours: 2
Prerequisites: completion of preclinical curriculum of Veterinary Medicine years 1 and 2. Restricted to VM3 and VM4 students

V_M_S 6441: Clinical Radiology I

Credit Hours: 3

V_M_S 6442: Clinical Anesthesiology I
Clinical rotation. Fundamentals of anesthesiology: indications for use techniques, pathophysiologic alterations, and interpretations of results, patient aftercare.

Credit Hours: 3

V_M_S 6450: Theriogenology I
Clinical rotation. Practical experience in reproductive techniques, obstetrics, breeding soundness and herd reproductive problems.

Credit Hours: 2

V_M_S 6460: Clinical Ophthalmology I
Clinical rotation. Practical application in problem solving and medical and surgical management of eye conditions of domestic animals.

Credit Hours: 2

V_M_S 6490: Small Animal Specialty Medicine I
Clinical rotation in small animal oncology. Taught in the clinical setting using animals presented to the VMTH for evaluation and treatment of oncologic diseases.

Credit Hours: 2

V_M_S 6700: Food Animal Medicine and Surgery II Elective
Additional food animal experience located off-site or on-site under special circumstances.

Credit Hour: 2-6
Prerequisites: V_M_S 6400. Consent required

V_M_S 6710: Small Animal Medicine II Elective
Clinical rotation offered to VM3 and VM4 students. Opportunity for concentrated study and experience in medical areas. Enrollment subject to approval of course coordinator.

Credit Hour: 2-6
Prerequisites: The entire pre-clinical curriculum of the CVM must be completed before taking this course

V_M_S 6711: Small Animal Internal Medicine Elective Clinical or Research Rotation
Clinical rotation in SAIM to focus on either clinical diagnostics and therapy, or research relevant to clinically important issues of pet animals.

Credit Hours: 2
Prerequisites: Veterinary curriculum up until the clinical rotations; must be VM3 or VM4 students
V_M_S 6712: Private Practice Small Animal Internal Medicine Elective
Clinical rotation. Improve critical thinking skills in disease diagnosis and management for internal medicine of dogs and cats. Clinical rotation off-site at Associated Veterinary Specialists. Teaching by cases seen by AVS clinician on duty. Student participation determined by supervising clinician.
Credit Hours: 2
Prerequisites: All required VM1 and VM2 courses. VM3 or VM4 standing required

V_M_S 6713: Shelter Medicine Elective at the Humane Society of Missouri
Comprehensive shelter medicine rotation at Humane Society of Missouri.
Credit Hour: 2-6
Prerequisites: Restricted to VM3 and VM4 students

V_M_S 6714: Shelter Medicine Clinical Elective
The shelter medicine clinical elective provides the veterinary student with a diverse training experience in shelter medicine accompanied by exposure to the critical aspects of animal sheltering. Graded on A-F basis only.
Credit Hours: 2
Prerequisites: Restricted to Veterinary Medicine students

V_M_S 6720: Equine Medicine and Surgery II Elective
Clinical rotation. Continuation of V_M_S 6420. Open to VM3 and VM4 students, subject to approval of course coordinator. Opportunity for concentration in specific area of interest.
Credit Hour: 2-6

V_M_S 6732: Small Animal Soft Tissue Surgery II Elective
Clinical rotation. Opportunity for concentrated study and advanced soft tissue surgical experience.
Credit Hours: 2
Prerequisites: V_M_S 6432 and completion of year VM1 and VM2

V_M_S 6734: Small Animal Orthopedic Surgery II Elective
Clinical rotation. Opportunity for concentrated study and advanced orthopedic surgical experience.
Credit Hours: 2
Prerequisites: completion of VM years 1 and 2

V_M_S 6736: Veterinary Neurology/Neurosurgery-Elective
A hands-on applied clinical rotation to provide experience in examination and diagnosis of domestic animals with neurologic disease.
Credit Hours: 2
Prerequisites: completion of preclinical curriculum of Veterinary Medicine years 1 and 2. Restricted to VM3 and VM4 students

V_M_S 6741: Clinical Radiology II Elective
Clinical rotation. Continuation of V_M_S 6441.
Credit Hour: 1-99

V_M_S 6742: Clinical Anesthesiology II Elective
Clinical rotation. Continuations of V_M_S 6442. This course will focus on anesthetizing and monitoring the more challenging anesthetic cases during rotation. Required projects include a review paper on a relevant topic of choice, a written case report and assistance in research activities.
Credit Hour: 1-99

V_M_S 6743: Radiology - Special Imaging Elective
Introduction to special imaging modalities including ultrasound, computed tomography, magnetic resonance and nuclear scintigraphy with emphasis towards small animal patients. A major part of the course will be devoted to recognition and interpretation of abdominal ultrasound. Graded on A-F basis only. Prerequisites: V_M_S 6020; VM III and VM IV
Credit Hour: 2-3

V_M_S 6750: Theriogenology II Elective
Continuation of V_M_S 6450. Opportunity for concentrated study and experience. An elective, subject to approval of course coordinator and faculty member(s) who supervise student's work.
Credit Hour: 1-99

V_M_S 6751: External Food Animal Service and Theriogenology Teaching Program
Additional options for off-site clinical training in Theriogenology and Food Supply Veterinary Medicine beyond the core curriculum.
Credit Hour: 1-99
Prerequisites: V_M_S 6081, V_M_S 6082, V_M_S 6110, and VM3 or VM4 students

V_M_S 6760: Small Animal Nutrition
Clinical rotation designed to allow students to gain hands-on experience with canine and feline nutrition.
Credit Hours: 2
Prerequisites: V_M_S 6140. Restricted to VM3 or VM4

V_M_S 6800: Clinical Ophthalmology II Elective
Clinical rotation offered to VM 3 and VM 4 students. Opportunity for concentrated study and experience. Subject to approval of course coordinator and faculty member(s) who supervise student's work.
Credit Hour: 1-99

V_M_S 6810: Cardiology II Elective
Cardiology course consists of a three-week clinical rotation in the small animal clinic. Duties include primary care receiving and patient care with clinical case work-up. Additional responsibilities include attendance at clinical rounds and participating in related clinical activities.
Credit Hour: 1-99

V_M_S 6820: Small Animal Emergency and Critical Care
Clinical rotation offered to VM 3 and VM 4 students. Opportunity for concentrated study and experience in small animal emergency and critical care.
Credit Hour: 1-99
V_M_S 6821: Small Animal Emergency Critical Care Elective
Clinical rotation providing focused experience in care management and issues pertinent to small animal emergency and critical care. Graded on A-F basis only. May be repeated for credit.

Credit Hour: 2-6
Prerequisites: Restricted to levels VM 3 or VM 4

V_M_S 6830: Food Animal Production Medicine
Clinical rotation will focus primarily on beef, dairy, and swine with emphasis on preventive medicine by looking at the herd incorporating spreadsheet and the date base application analysis. The course participants will visit various operations and write reports to the producer, which will enhance their farms.

Credit Hour: 1-99

V_M_S 6850: Clinical Oncology
Clinical rotation in small animal oncology. Taught in the clinical setting using animals presented to the VMTH for evaluation and treatment of oncologic diseases.

Credit Hour: 1-99

V_M_S 6920: Equine Techniques Elective
This course provides an opportunity for equine oriented veterinary students wishing to enhance their understanding of the clinical techniques used in equine veterinary medicine and gain hands on practical experience in selected clinical techniques. It is offered as a 2 credit, 2 week elective clinical rotation.

Credit Hours: 2

V_M_S 6986: Advanced Clinical Neurology and Neurosurgery
This is a supplement to neurology taught in the small animal course to improve preparedness for clinical practice. Topics include neurolocalization techniques, electrodiagnostic and CT/MR interpretation, wider exposure to differential diagnosis, and neurosurgical principals.

Credit Hour: 1
Prerequisites: Passing grade in V_M_S 6040

V_M_S 6987: Problem-Based Learning Clinic Preparation
This course is designed to prepare the VM 3 student about to enter clinics for a systematic approach to a clinical case. Emphasis will be placed on developing focused problem and differential lists, and logical choices of diagnostic tests. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: VM 3 level

V_M_S 6988: Small Animal Clinical Nutrition
Application of nutritional principles to prevention and management of common diseases of dogs and cats. Including review of nutrients, commercial and home diets, and basic pathophysiology of nutritional aspects of disorders seen in companion animal practice.

Credit Hour: 1

V_M_S 6898: Advanced Oncology of Animals
Expanded discussion of veterinary oncology topics not covered in the oncology section V_M_S 6050. Important for veterinary students who intend to enter private or academic practice and manage oncology cases, specific tumor types, diagnostic tools, and treatment modalities.

Credit Hour: 1

V_M_S 6990: Zoological Medicine
Interested students of Zoological Medicine would significantly broaden their understanding of this discipline and increase the likelihood they could enter zoological veterinary practice or a zoological veterinary medical residency. Graded on A-F basis only

Credit Hours: 2

V_M_S 6991: Advanced Equine Lameness with Laboratory
Learn to recognized forelimb and hind limb lameness through diagnostic techniques for localization of lameness. Gain practical experience in limb support for sever musculoskeletal injuries. One surgical laboratory using equine cadaver limbs to illustrate and practice common distal limb surgeries.

Credit Hour: 1

V_M_S 6993: Advanced Veterinary Anesthesia
Advanced Veterinary Anesthesia

Credit Hour: 1

V_M_S 6994: Advanced Techniques in Small Animal Surgery with Laboratory
Course designed for students who want exposure to small animal surgical techniques above and beyond the experience gained from the basic surgical training in V_M_S.

Credit Hour: 1
Prerequisites: V_M_S 6072; limited enrollment

V_M_S 6995: Clinical Cardiology
Students will utilize a combination of lectures, hands on laboratories, and problem based clinical correlates covering cardiovascular physical examination, radiographic and electrocardiographic interpretation, and the pathophysiology and management of congenital and acquired cardiac diseases.

Credit Hour: 1

V_M_S 6996: Advanced Dermatology
This is a lecture course that will supplement and expand upon the canine and feline dermatology principles covered in the general pathology and small animal medicine courses. Graded on A-F basis only.

Credit Hour: 1
Prerequisites: V_M_S 6050

V_M_S 6997: Food Animal Diagnostic Exercises
Discussion based course designed to integrate and review didactic coursework to increase knowledge of livestock diseases. A list of appropriate differential diagnoses will be generated for each problem.

Credit Hour: 1
V_M_S 6998: Small Animal Behavioral Medicine
Small Animal Behavioral Medicine
Credit Hour: 1

V_M_S 6999: Food Animal Surgery Laboratory
Routine food animal surgical procedures laboratory.
Credit Hour: 1

V_M_S 7301: Topics in Veterinary Medicine and Surgery
Organized study of select topics.
Credit Hour: 1
Prerequisites: junior standing and instructor's consent

V_M_S 7320: Fundamentals of Small Animal Emergency and Critical Care
(cross-leveled with BIOMED 4320). This course will provide students with the knowledge and skills to assist in a small animal medical emergency and critical care facility.
Credit Hours: 3
Prerequisites: a bachelor's degree in biological science or veterinary technology, or DVM degree, or instructor's consent

V_M_S 7328: Introductory Radiation Biology
(same as RADIOL 7328, NU_ENG 7328, BIO_SC 7328).
Credit Hours: 3
Prerequisites: junior standing Sciences/Engineering; one course in biological sciences and physics/chemistry; or instructor's consent

V_M_S 7355: Advanced Techniques in Radiology
Special application to domestic animals.
Credit Hour: 1-99
Prerequisites: D.V.M

V_M_S 7510: Equine Clinical Anatomy: Forelimbs
Basic Foundation in selected aspects of equine clinical anatomy for veterinary technicians, pre-veterinary students, and other students wishing to enhance their understanding of anatomical structure of the horse's forelimbs.
Credit Hour: 1
Prerequisites: A bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

V_M_S 8021: Neurology Journal Review
Weekly journal review and seminar on current topics in veterinary neurology, related clinical disciplines and basic neurosciences. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: DVM degree

V_M_S 8022: Internal Medicine Clinopathologic Conference
Advanced discussion of small animal medicine cases with an emphasis on pathophysiology and clinicopathologic findings. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8023: Internal Medicine Journal Review
Resident led review of the current veterinary internal medicine literature. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8024: Medicine-Surgery-Pathology Conference
This is a case-based course in which clinical and pathological findings of interesting cases from the VMTH are presented by those who treated and interpreted the case. Dogs, cats, cows, horses, and small ruminants are included with occasional non-traditional species. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8025: Equine Medicine Journal Review
Aid Residents in preparing for board certification in ACVIM and ACVS. Articles pertaining to current equine veterinary literature are reviewed on a weekly basis. Participants select, distribute articles to group prior to meeting, then present short review with a discussion following. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8026: Surgery Journal Review
Resident led review of the current veterinary surgical peer-reviewed literature. Graded on S/U basis only.
Credit Hour: 1

Critical review of the scientific literature with a focus on ACVIM board preparation. May also be used as a forum for information exchanged relevant to ACVIM board preparation. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8028: Cardiovascular Medicine Journal Review
Resident led review of the current veterinary cardiovascular medicine literature. Graded on S/U basis only.
Credit Hour: 1

V_M_S 8029: Emergency and Critical Care Journal Review
This course will concentrate on review of emergency and critical care literature. Graded on S/U basis only.
Credit Hour: 1
Prerequisites: DVM degree

Review of clinical cases presented in two formats: histopathology slides and kodachrome slides. Graded on S/U basis only.
Credit Hour: 1  
Prerequisites: DVM degree or equivalent and acceptance into an ophthalmology residency program

Weekly journal review and seminar on current topics in veterinary ophthalmology, review of pertinent literature in human ophthalmology, and review of ophthalmic texts. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: DVM degree or equivalent and acceptance into the ophthalmology residency program

V_M_S 8032: Seminars in Veterinary Anesthesiology  
A journal review will focus on advances in veterinary anesthesiology, pharmacology, and physiology. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: DVM and graduate school enrollment or instructor's consent

V_M_S 8033: Seminars in Clinical Sciences-Equine Surgery Journal Review  
Journal review will focus on advances in equine surgery and will consist of a review of recent manuscripts pertaining to equine surgery in current journals and review of pertinent book chapters. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: DVM degree and instructor's consent

V_M_S 8034: Seminars in Veterinary Radiology  
This journal review will focus on advances in veterinary radiology, ultrasound and alternate imaging. Current and past literature will be reviewed weekly and will be chosen by the class coordinator. Graded on S/U basis only.

Credit Hour: 1  
Prerequisites: DVM and graduate school enrollment or instructor's consent

V_M_S 8036: Advanced Physiology of the Dog and Cat  
To understand advanced medical physiology: cell physiology, muscle function, cardiac and circulatory physiology, renal function, distribution of fluid in the body, functions of red and white blood cells, mechanisms of hemostasis, resistance to infection and pulmonary physiology. Graded on A-F basis only.

Credit Hours: 2  
Prerequisites: Instructor's consent

V_M_S 8040: Advanced Small Animal Clinical Nutrition  
Advanced study of veterinary clinical nutrition in the dog and cat. Includes review of applied biochemistry, nutrients, and feeding principles along with pathophysiology and nutritional management of common diseases. May be repeated for credit. Graded on A-F basis only.

Credit Hours: 2  
Prerequisites: Introductory Veterinary Nutrition

V_M_S 8090: Research in Veterinary Medicine and Surgery (Thesis)  
Thesis research. Graded on a S/U basis only.

Credit Hour: 1-99

V_M_S 8100: Evaluation of Animal Disease Monitoring and Surveillance Programs  
This course will allow students to articulate and share what they have learned in coursework and to supplement previous learning by exploring additional areas of knowledge relevant to their readiness for professional practice. It will enable students to test theoretical knowledge against real life practical experiences, and to integrate and refine basic and advanced concepts, values, and methods acquired during the professional education. Graded on A-F basis only.

Credit Hours: 2

V_M_S 8401: Topics in Veterinary Clinical Sciences  
Current topics, infrequently-taught courses, or new courses not yet designated by a permanent course number. Some sections may be graded A-F only or S/U only.

Credit Hour: 1-3

V_M_S 8402: Seminar in Veterinary Clinical Sciences  
Graduate seminars and conferences with a focus on current literature within a specialty area. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8405: Comparative Respiratory Pathophysiology  
A consideration of clinical pathophysiology of the respiratory system relative to diseases of the thorax and clinical anesthesiology.

Credit Hour: 1

V_M_S 8406: Topics in Veterinary Medicine and Surgery  
Current topics, infrequently taught courses, or new courses not yet designated by a permanent course number.

Credit Hour: 1-99  
Prerequisites: must be a DVM or be enrolled in the Veterinary curriculum; instructor's consent

V_M_S 8410: Veterinary Medicine and Surgery Research Seminar  
Current research in veterinary medicine and surgery. Literature reviews and presentation or original graduate student research. Graded on S/U basis only.

Credit Hour: 1

V_M_S 8411: Clinical Veterinary Endocrinology  
A 2-hour course for post-DMV graduate students. It will focus on clinically relevant physiology, pathophysiology, and diagnostic evaluation of hormone systems.

Credit Hours: 2

V_M_S 8413: Equine Internal Medicine  
The purpose of the course is to aid in the preparation of the Resident for board certification in the American College of Veterinary Internal
Medicine-LAIM. Current concepts in the pathophysiology, diagnosis and management of medical disorders of horses.

Credit Hours: 2
Prerequisites: DVM degree or equivalent

V_M_S 8415: Advanced Veterinary Neurology
Basic neuroscience as it relates to clinical neurology and the pathophysiology of diseases of the brain, spinal cord, peripheral nerve and muscle in domestic animals. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: DVM degree

V_M_S 8417: Advanced Veterinary Internal Medicine - Clinical Oncology
Provides graduate students in the clinical and basic sciences alike with a working knowledge of the biological mechanisms of cancer development and progression and the related approaches to cancer prevention and therapy. It is assumed that students will have a strong background in biology as a foundation for discussion.

Credit Hours: 2
Prerequisites: DVM or equivalent degree recommended

V_M_S 8418: Advanced Veterinary Internal Medicine: Food Animal Medicine
Current concepts in the pathophysiology, diagnosis and management of medical disorders, diseases of the limbs, and infectious diseases of cattle and food producing animals.

Credit Hours: 2

V_M_S 8419: Advanced Topics in Cancer Biology and Clinical Oncology
This course will provide students with a knowledge base in cancer cell biology that may be applied to the practice of clinical oncology. Monthly clinically-oriented seminars by invited speakers will be preceded by a weekly in-depth review of the basic science related to the seminar topic.

Credit Hours: 2
Recommended: MD or DVM

V_M_S 8421: Advanced Veterinary Surgery: Small Animal Surgery
Current concepts in the pathophysiology, diagnosis and management of surgical disease of the dog and the cat. Includes laboratories of advanced surgical techniques.

Credit Hour: 2-4

V_M_S 8423: Comparative Arthrology
Lectures and discussion covering anatomy, physiology, biomechanics, pathophysiology, and clinical aspects of mammalian diarthrodial joints.

Credit Hours: 3

V_M_S 8425: Advanced Veterinary Surgery: Equine Surgery
Current concepts in the pathophysiology, diagnosis and management of surgical disorders of the horse. Taught yearly as sections A, B, C. Repeatable to a maximum of 10 credit hours (individual sections may be taken once).

Credit Hour: 1-3
Veterinary Pathobiology (V_PBIO)

**V_PBIO 2001: Fundamentals of Microbiology**
This course, which is designed for microbiology or life sciences majors, provides an overview of the classification, structure, metabolism, genetics, and isolation and identification of the principal groups of bacteria. Additional topics to be covered include an introduction to viruses, protozoa, and fungi, the nature of infectious diseases, and the immune response. The course includes both lecture and laboratory.

*Prerequisites: DVM or equivalent degree and acceptance into the ophthalmology residency program*

**V_M_S 8445: Veterinary Critical Care and Emergency Medicine**
Advanced study of veterinary critical care and emergency medicine and surgery focusing on current research and literature as well as clinical application.

*Credit Hours: 2-3*

**V_M_S 8450: Research in Veterinary Medicine and Surgery (non-thesis)**
Non-Thesis research.

*Credit Hour: 1-99*

**V_M_S 8485: Problems in Veterinary Clinical Sciences**
Supervised individuals studies arranged with a faculty member and approved by the advisory committee. Some sections may be graded A-F only or S/U only.

*Credit Hour: 1-3*

**V_M_S 8487: Nuclear Medicine**
Principles of radiation detection instrumentation, monitoring radiological safety and diagnostic procedures used on veterinary nuclear medicine.

*Credit Hours: 3*

*Prerequisites: one year College Physics, D.V.M. degree, and departmental consent*

**V_M_S 8488: Radiation Therapy**
Intermediate level course to review basic and advanced concepts in radiation biology, radiation physics, and clinical application of ionizing radiation for the treatment of cancer Teletherapy, brachytherapy and radiation oncology are covered.

*Credit Hours: 3*

*Prerequisites: A basic course in radiation physics/dosimetry, radiation biology and medical oncology. One year college physics, D.V.M degree and departmental consent*

**V_M_S 8489: Veterinary Radiographic Physics**
In depth review of the fundamental principles of radiographic physics, with an emphasis on preparation for the American college of Veterinary Radiology board examination. Graded on an S/U basis only.

*Credit Hour: 1*

*Prerequisites: DVM and graduate school enrollment or instructor's consent*

**V_PBIO 3551: Introduction to Immunology I**
Comprehensive introduction to the basic principles of immunology. The course is designed for undergraduates majoring in biology, biochemistry or health professions. Introduction to cells and organs of the immune system, innate and adaptive immunity, development, activation and effector functions of lymphocytes, hypersensitivity, host response to infection and vaccination, autoimmunity and tumor immunology. Introduction to Immunology 1. Graded on A-F basis only.

*Credit Hours: 5*

*Recommended: BIO_SC 1500 or equivalent*

**V_PBIO 3554: Introduction to Virology**
Comprehensive introduction to the basic principles of virology. The course is designed for undergraduates majoring in biology, biochemistry, or health professions. The course covers general virology including the molecular structure of viruses, the multiplication strategies of the major virus families, and viral latency, persistence, and oncology. The major families of the bacterial, plant, and animal viruses are discussed. Human viruses and infectious diseases are emphasized. Viral immunology, viral defenses, viral vaccines and antiviral compounds will also be addressed. Graded on A-F basis only.

*Credit Hours: 3*

*Prerequisites: BIO_SC 2300*

*Recommended: BIO_SC 2200*

**V_PBIO 3555: Microbial Pathogenesis I**
This is the first of two courses that examine the relationships between microbes and their hosts that lead to human disease. Emphasis is placed on bacterial and fungal infection, and the basic mechanisms of pathogenesis that lead to disease. Graded on A-F basis only.

*Credit Hours: 3*

*Prerequisites: BIO_SC 2200; BIO_SCI 3750*

**V_PBIO 3558: Microbial Pathogenesis II**
This course is the second of two courses that examine the relationships between pathogens and their hosts that lead to human disease. Emphasis is placed on viral and parasite infection and the basic properties of pathogenesis. Graded on A-F basis only.

*Credit Hours: 3*

*Prerequisites: BIO_SCI 3750; V_PBIO 3554*

**V_PBIO 3560: Microbial Physiology**
The course will focus on introducing the basic principles of the functions and activities of microorganisms and we will discuss on the normal cellular mechanisms associated with growth, metabolism, reproduction
and survival. The course will cover our understanding and knowledge about the way in which a living microorganism functions including all physical and chemical processes. We will also focus on anatomy i.e., physical characteristics, growth and living, metabolism, chemical processes and control functions and functional entities. Graded on A-F basis only.

Credit Hours: 3  
Recommended: A course in microbiology or biochemistry or permission of the instructor

V_PBIO 3650: Applied Microbiology and Biotechnology  
Introduction to the basic principles of molecular microbiology in relation to the industrial applicability. The course will focus on microorganisms commonly used in industrial microbiology and biotechnology with an emphasis on the biological and molecular basis of productivity. We will also focus on nutrition of industrial organisms and metabolic pathways for the biosynthesis of industrial microbiology products such as engineered or designer proteins, antibiotics and products of medical importance. Manipulation of the genome of industrial organisms will be discussed in the context of making beneficial products. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: BIO_SC 3750  
Recommended: BIO_SC 2200

V_PBIO 3658: Public Health Microbiology  
Epidemiology of transmissible diseases including pathogenic characteristics of the infectious organism, modes of transmission, mechanism of infection, diagnostic aids, effective treatments, immunizing procedures, and methods of preventing infection. Subjects covered will include emerging infectious diseases, vector borne diseases, control of infectious human disease, water and food borne disease, zoonotic diseases, sexually transmitted diseases and antibiotic resistance. Graded on A-F basis only.

Credit Hours: 3  
Prerequisites: BIO_SC 1500 or equivalent

V_PBIO 4787: Historical, Societal and Ethical Topics in Medicine and Biomedical Research  
(cross-leveled with V_PBIO 7787). Advances in medicine, genetics, reproduction and technologies underpinning biomedical research can have profound implications not only scientifically but in terms of societal and ethical impact. Using several historical events such as the establishment of the first immortal cell line, the Tuskegee syphilis study, the eugenics movement in the United States and the cloning of Dolly the sheep as starting points, we will explore the historical, societal and ethical context and issues surrounding these events and relate them to current ethical and moral questions that have been generated by recent scientific and medical progress. Graded on A-F basis only.

Credit Hours: 2  
Prerequisites: B or better in BIO_SC 2300 and BIO_SC 2200

V_PBIO 5511: Veterinary Immunology  
(same as V_PBIO 8451). Basic immunology techniques. Topics include innate and adaptive immunity, development of the immune system, induction and expression of the immune response, structure and function of antibodies, antigen-antibody reactions, the major histocompatibility complex, aspects of immunology in disease.

Credit Hours: 2

V_PBIO 5512: Veterinary Immunology  
(same as V_PBIO 8451). Continuation of V_PBIO 5511.

Credit Hours: 1.5

V_PBIO 5522: Veterinary Bacteriology with Laboratory  
Classification and properties of pathogenic bacteria and fungi of animals; relationship to public health; considers pathogenesis, immunology of infection. Instructional period 5.

Credit Hours: 3  
Prerequisites: enrollment in the College of Veterinary Medicine

V_PBIO 5533: Veterinary Bacteriology II  
Continuation of V_PBIO 5552. Instructional period 6.

Credit Hours: 2.5

V_PBIO 5544: Veterinary Virology  
(same as V_PBIO 8454). Classification and properties of viruses. Considers the etiologic, pathologic and immunologic aspects of viral diseases of animals. Instructional periods 6 and 7.

Credit Hours: 2.5  
Prerequisites: enrollment in the College of Veterinary Medicine

V_PBIO 5555: Epidemiology and Biostatistics with Laboratory  
(same as V_PBIO 8455). This course introduces students to methods of determining the influence of disease on populations and how this information is applied to individual animals. Biostatistics and evidence based medicine are also discussed in this course. The knowledge gained in this course is applied to reading professional literature during the course. Instructional period 4.

Credit Hours: 2

V_PBIO 5557: Veterinary Parasitology with Laboratory  
(same as V_PBIO 8457). Parasites and parasitic diseases of ruminants, horses, swine, dogs, cats, poultry and other animals. Includes classification, morphology, and bionomics of protozoa, helminths, and arthropods. Instructional period 6.

Credit Hours: 3

V_PBIO 5558: Veterinary Public Health  
(same as V_PBIO 8458). In this course students are introduced to the wide range of veterinary involvement in maintaining and assuring human health, nationally and globally. Topics discussed include: agencies such as USDA, FDA, CDC, food safety and meat inspection, veterinary responsibility in identifying diseases, legal issues of drug use, and zoonotic diseases. Instructional period 7.

Credit Hours: 2

V_PBIO 5559: Veterinary Pathology with Laboratory  
General Pathology. Tissue reactions to various disease agents in domestic animals. Instructional period 5.

Credit Hours: 3
**V_PBIO 5576: Veterinary Systemic and Special Pathology with Laboratories**
Special and systemic pathology. Tissue reactions to disease in special systems in domestic animals. Instructional period 6.

**Credit Hours:** 3

**V_PBIO 5577: Veterinary Systemic and Special Pathology II with Laboratories**
Follows the general pathology and continues the systemic pathology taught in V_PBIO 5576. The course, consisting of daily lectures and weekly laboratories, covers disease, mainly in domestic animals, of the following systems or organs: cardiovascular, respiratory, lymphoid, cutaneous, mammary, ophthalmic, and otic. Instructional period 7.

**Credit Hours:** 3

**Prerequisites:** enrollment in College of Veterinary Medicine

**V_PBIO 5578: Veterinary Clinical Pathology with Laboratory**
Physiologic basis, interpretation and clinical application of laboratory assays in hematology, chemistry, cytology, and urinalysis, utilization of laboratory methods to define pathological states and to diagnose disorders of domestic animals. Instructional period 8.

**Credit Hours:** 3

**Prerequisites:** enrollment in College of Veterinary Medicine

**V_PBIO 5579: Veterinary Genomics**
Study of genomes, an organism's entire set of the genetic information. Used for detection of pathogen genomes, and markers for mutation causing inherited disease. Instructional period 5.

**Credit Hour:** 1

**V_PBIO 5601: Animals in Emergencies & Basic Emergency Response Training for Vet Students**
This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.

**Credit Hour:** 1

**Prerequisites:** Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

**V_PBIO 5991: Introduction to Avian Medicine**
Introduction to Avian Medicine

**Credit Hour:** 1

**V_PBIO 5995: Foundations in Veterinary Research and Discovery**
This course will introduce veterinary students to concepts of research including hypothesis development, experimental design, data interpretation, grantsmanship, responsible conduct of research, biomedical research careers and presentation and publication methods.

**Credit Hours:** 2

**V_PBIO 6010: Laboratory Animal Medicine**
Principles of Veterinary Medicine applied to laboratory animals as pets and in research. Husbandry, handling and clinical techniques, diseases, and use as disease models are discussed. Instructional period 8.

**Credit Hour:** 1.5

**V_PBIO 6647: Diagnostic Pathology and Special Species Medicine**
Application of laboratory techniques used to diagnose disease by macroscopic, microscopic, biochemical, microbiologic, and toxicologic findings. Case method of teaching. Domestic avian species and laboratory animals included. Six times yearly.

**Credit Hours:** 8

**V_PBIO 6676: Laboratory Animal Medicine and Management**
Elective offered 3rd- and 4th-year students, subject to approval of course coordinator and supervising faculty. Concentrated study/experience in laboratory animal disease(s)/colony management. Available to veterinarians as a continuing education program.

**Credit Hour:** 2-6

**Prerequisites:** V_PBIO 5558 or instructor's consent

**V_PBIO 6679: Diagnostic Pathology and Special Species Medicine**
Third- and fourth-year students. Elective. Approval of coordinator and supervisory staff. Continuation of V_PBIO 6647 with more depth. Available to D.V.M.'s as part of continuing education program.

**Credit Hour:** 2-6

**Prerequisites:** V_PBIO 5558 or instructor's consent

**V_PBIO 6684: Research Techniques in Veterinary Pathobiology**
Research Techniques in Veterinary Pathobiology

**Credit Hour:** 1-6

**V_PBIO 7110: Veterinary Cytology**
(cross-leveled with BIOMED 4110). This course of Veterinary Cytology is designed to hone the skills of the practicing Veterinary Technician, Veterinary Student, or Veterinarian and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease.

**Credit Hours:** 2

**Prerequisites:** DVM or equivalent degree or instructor's consent

**V_PBIO 7120: Principles of Toxicology**
(cross-leveled with BIOMED 4120). This course will provide an introduction to the general principles of toxicology, including the history
and scope of the field; risk assessment and management; mechanisms of toxicology; the disposition of toxicants; non-target organ-directed toxicity; toxic responses of specific target organs; and various toxicological application, such as environmental toxicology.

**Credit Hours:** 3  
**Prerequisites:** BS in Biology, Biochemistry, or equivalent, or permission of instructor

**V_PBIO 7210: Animal Issues in Disasters**  
(cross-leveled BIOMED 4210). Animal Issues in Disasters describes the various aspects of responding to disasters that involve animals. Government involvement, legal requirements, effects on the human-animal bond, preparation for disasters of different kinds, and impacts on animal-related businesses will be discussed.

**Credit Hour:** 1  
**Prerequisites:** a bachelor's degree in a biological science or veterinary technology, or DVM degree, or instructor's consent

**V_PBIO 7787: Historical, Societal and Ethical Topics in Medicine and Biomedical Research**  
(cross-leveled with V_PBIO 4787). Advances in medicine, genetics, reproduction and technologies underpinning biomedical research can have profound implications not only scientifically but in terms of societal and ethical impact. Using several historical events such as the establishment of the first immortal cell line, the Tuskegee syphilis study, the eugenics movement in the United States and the cloning of Dolly the sheep as starting points, we will explore the historical, societal and ethical context and issues surrounding these events and relate them to current ethical and moral questions that have been generated by recent scientific and medical progress. Graded on A-F basis only.

**Credit Hours:** 2  
**Prerequisites:** Consent of Instructor

**V_PBIO 8090: Thesis Research in Veterinary Pathobiology**  
Open to graduate students with requisite preparation. Research on specific animal diseases, prevention and treatment. Graded on a S/U basis only.

**Credit Hour:** 1-99

**V_PBIO 8401: Topics in Veterinary Pathobiology**  
Courses with lectures in various topics in veterinary pathobiology will be given on a trial basis, depending on faculty expertise and student demand. Credit hours are usually 1 or 3. Specialized topics will be covered.

**Credit Hour:** 1-99  
**Prerequisites:** instructor's consent

**V_PBIO 8410: Seminar in Veterinary Pathobiology**  
Discussion of current research methods in veterinary pathobiology.

**Credit Hour:** 1

**V_PBIO 8431: Research Methods and Data Analysis**  
Specific assignments on diagnostic methods including surgical pathology, necropsies, toxicology.

**Credit Hour:** 2-4

**Prerequisites:** departmental consent

**V_PBIO 8432: Advanced Histopathology**  
Advanced microscopic study of pathological tissues.

**Credit Hours:** 5  
**Prerequisites:** departmental consent

**V_PBIO 8434: Advanced Clinical Pathology**  
Lecture/tutorial teaching; pathogenesis of clinical laboratory abnormalities in the common domesticated species. Emphasis is placed on mechanisms of disease and pathophysiology of the changes seen in each organ system.

**Credit Hours:** 3  
**Prerequisites:** departmental consent

**V_PBIO 8435: Advanced Microscopy in Veterinary Clinical Pathology**  
Recognition and pathogenesis of abnormalities found via microscopic analysis of blood smears or cytology.

**Credit Hour:** 1  
**Prerequisites:** V_PBIO 5578 and departmental consent; DVM or current enrollment in veterinary curriculum

**V_PBIO 8436: Pathogenic Mechanisms in Veterinary Pathobiology**  
This course will include disease mechanisms, described at the cellular and molecular level, which result in tissue morphologic (gross and microscopic) and clinical abnormalities. Examples of discussion topics include soluble mediators of inflammatory processes, host-agent interactions, and host defense mechanisms.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**V_PBIO 8445: Vectors and Vector-borne Diseases**  
This course will focus on arthropod vectors (insects and ticks) and the medically important pathogens / diseases that they transmit, including arboviruses, bacteria, protozoa and nematodes. An emphasis will be on the interactions between the vectors and disease-causing pathogens. Topics include: introductions to systematics, anatomy, physiology, life cycles, and ecology of vectors and classification and biology of the pathogens responsible for such diseases as dengue, yellow fever, malaria, leishmaniasis, lymphatic filariasis, etc. The focus will be not only on specific pathogen-vector interactions but also on big picture topics / discussions of vector competence, insecticide resistance, vector control (including genetically modified insects) and other current issues in vector biology research. Students will learn how these important vector-borne diseases are transmitted, how they are spread and introduced into new regions, and what control strategies exist or are currently under development. Students will realize what impact vector-borne diseases have on global human and animal health as well as develop and hone critical thinking skills.

**Credit Hours:** 3  
**Prerequisites:** Graduate standing in the Life Sciences

**V_PBIO 8448: Molecular Methods in Nucleic Acids**  
The course will focus on the most recent developments in technology related to eukaryotic and prokaryotic molecular biology and as analysis
a manipulation of nucleic acids and their application to define structure, function and biosynthesis of macromolecules.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**V_PBIO 8450: Non-Thesis Research in Veterinary Pathobiology**  
Research not expected to terminate in dissertation.  
**Credit Hour:** 1-99

---

**V_PBIO 8451: Introduction to Immunology**  
(same as V_PBIO 5511 and V_PBIO 5512). Fundamentals of immunology as applied to domestic animals.  
**Credit Hours:** 3

---

**V_PBIO 8452: Cell and Molecular Electron Microscopy**  
Lecture class that describes the use of electron microscopy (transmission and scanning) in biomedical research. Students receive hands-on experience by completing a laboratory project.  
**Credit Hours:** 4

---

**V_PBIO 8454: Domestic Animal Virology**  
**Credit Hours:** 2.5

---

**V_PBIO 8455: Epidemiology and Biostatistics**  
Graduate level introduction to veterinary epidemiology and bio-statistics.  
**Credit Hour:** 2-3

---

**V_PBIO 8457: Animal Parasitology**  
(same as V_PBIO 5557).  
**Credit Hour:** 3-5

---

**V_PBIO 8458: Veterinary Public Health**  
(same as V_PBIO 5558).  
**Credit Hours:** 2

---

**V_PBIO 8552: Veterinary Pathogenic Bacteriology and Mycology I**  
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic problems, appropriate treatments and prevention measures. Course graded A-F only.  
**Credit Hours:** 3  
**Prerequisites:** instructor's consent

---

**V_PBIO 8553: Veterinary Pathogenic Bacteriology and Mycology II**  
This course deals with the bacterial pathogens of animals emphasizing the pathogenesis and pathology of the diseases, diagnostic procedures, appropriate treatments and prevention measures. Graded on A-F basis only.  
**Credit Hours:** 2.5

---

**V_PBIO 8601: Animals in Emergencies & Basic Emergency Response Training for Vet Students**  
This course will enable veterinary and graduate students to understand their role in society during disasters and credential as responders. Graded on A-F basis only.  
**Credit Hour:** 1  
**Prerequisites:** Students must be enrolled in the College of Veterinary Medicine and pursuing a DVM degree or be a student pursuing an MPH degree. Instructor consent required for non-veterinary graduate students seeking MPH degrees

---

**Women's and Gender Studies (WGST)**

**WGST 1004: Topics in Women's and Gender Studies-Social Science**  
Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.  
**Credit Hour:** 1-3  
**Recommended:** sophomore standing

---

**WGST 1005: Topics in Women's and Gender Studies-Humanities**  
Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 6 hours.  
**Credit Hour:** 1-3  
**Recommended:** sophomore standing

---

**WGST 1120: Introduction to Women's and Gender Studies**  
Introduction to the basic issues of Western feminist thought through a study of classical and contemporary sources. Course will consider images, conditions, activities and visions of women as they vary historically and socially.  
**Credit Hours:** 3

---

**WGST 1360: The Female Experience: Body, Identity, and Culture**  
(same as SOCIOL 1360). Study of the experience of being female in American Culture. Course will focus on development of women's
identities through such topics as: sexuality, reproduction, self-image, rape and health care.

**Credit Hours:** 3

**WGST 1500: The Black Woman in America**
(same as BL_STU 1500). Review and critique of a variety of materials about Black women from slavery to the social and philosophical impact of the Black woman's struggle on all women.

**Credit Hours:** 3
**Recommended:** sophomore standing

**WGST 2003: Topics in Women's and Gender Studies-Behavioral**
Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 8 hours.

**Credit Hour:** 1-3
**Recommended:** sophomore standing and/or WGST 1120

**WGST 2005: Topics in Women's and Gender Studies-Humanities**
Organized study of selected topics in women's and gender studies. Subjects and earnable credit may vary from semester to semester. Repeatable up to 8 hours.

**Credit Hour:** 1-3
**Recommended:** sophomore standing and/or WGST 1120

**WGST 2010: Gender and Identity: Understanding Intersectionality**
Explores historical and contemporary dimensions of social inequality in gender, race, class and sexuality. Uses an interdisciplinary lens and feminist analysis to analyze social, cultural, political and economic experiences of individuals and communities. Prerequisites: WGST 1120

**Credit Hours:** 3

**WGST 2020: Feminist Theory**
Introduces central themes and problems in feminist thought, including consciousness-raising, motherhood, class, race, sexuality, nationalism, and transnational feminism.

**Credit Hours:** 3
**Prerequisites:** WGST 1120 or sophomore standing

**WGST 2040: Perspectives on Empowerment**
Women's Empowerment is a popular catch phrase in culture, politics and research. This course explores the meaning of empowerment, the ways empowerment is practiced in organizations and in the everyday lives of girls and women, and the challenges in empowering girls and women in contemporary society. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2050: Gender Perspectives: Issues in Public Health**
Addresses issues of gender and public health in the US and abroad. Considers how race, class, gender, sexuality, and geopolitical context may impact health. May focus on specific health issues. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2080: Perspectives on Sexual and Gender Diversity**
This interdisciplinary, cross-cultural course investigates modern constructions of sexed and gendered bodies, paying particular attention to those systems of gender-based oppression that suppress multiple gender identities and expressions. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2100H: British Women Writers - Honors**
Study of works by important British women writers. We also consider the development of women's writing and the contribution of women writers to literature and to larger societal debates. May be repeated for credit.

**Credit Hours:** 3
**Prerequisites:** honors eligibility required
**Recommended:** sophomore standing

**WGST 2180W: Introduction to Women’s Literature - Writing Intensive**
(same as ENGLISH 2180W). A study of traditional and non-traditional literature written by women from the perspective of feminist themes-love, power, work, family and other relations. No more than six hours may be taken in the Introduction to Women's Literature series.

**Credit Hours:** 3
**Recommended:** ENGLISH 1000

**WGST 2200: Perspectives on Mass Media: Constructions of Gender, Race and Sexuality in the Americas**
Examines constructions of gender, race, class and sexuality in the US media in the twentieth and twenty first centuries. Emphasis placed on media's coverage and uses of various socially constructed identities. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2205W: Perspectives on Gender, Race, Class and Sexuality in the Americas - Writing Intensive**
Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sxism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2210H: Perspectives on Gender and Race in the Americas - Honors**
Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sxism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2220: Perspectives on Gender, Race, Class and Sexuality in the Americas - Writing Intensive**
Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sxism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2250: Perspectives on Gender, Race, Class and Sexuality in the Americas**
Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sxism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2250W: Perspectives on Gender, Race, Class and Sexuality in the Americas - Writing Intensive**
Introduction to the formation of identities in the Americas. Some areas covered are immigration, transnational identity, pop culture, literary expression, body image, spirituality, racism/sxism, assimilation, acculturation, and activism. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 2260: Perspectives on Mass Media: Constructions of Gender, Race and Sexuality**
Examines constructions of gender, race, class and sexuality in the US media in the twentieth and twenty first centuries. Emphasis placed on media's coverage and uses of various socially constructed identities. May be repeated for credit with different semester themes.

**Credit Hours:** 3

<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites/Recommended</th>
</tr>
</thead>
<tbody>
<tr>
<td>WGST 2340</td>
<td>Perspectives on Gender and Popular Culture</td>
<td>Explores issues in popular culture in the 20th and 21st centuries with respect to feminism, gender, sexuality, race, class, and ability. Areas of study may include television, movies, music, advertisements, magazines, fiction, newspapers, the internet, and social media. May be repeated for credit.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>WGST 2400</td>
<td>Social History of U.S. Women</td>
<td>(same as HIST 2400). This course, the social history of US women, offers a general overview of US women, beginning with the colonial period up to the present day.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>WGST 2410</td>
<td>African American Women in History</td>
<td>(same as HIST 2410 and BL_STU 2410). Covers major issues affecting black women since their introduction into English-speaking North America to the present.</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>WGST 2500</td>
<td>Philosophy and Gender</td>
<td>(same as PHIL 2500). A critical examination of central ideas and themes in feminist philosophical thought. Topics may include: sex, marriage, parenthood, reproduction, body image, pornography, prostitution.</td>
<td>3</td>
<td>sophomore standing</td>
</tr>
<tr>
<td>WGST 2960</td>
<td>Sexual Health Advocacy and Service Learning</td>
<td>Students will critically investigate sexuality and reproductive health within a cultural context including religious, political, social justice, familial, and societal influences. Through assigned readings, reflection, experiential learning, small group activities and discussion, students will increase their awareness of sexual health issues, enhance self awareness, and learn how to effectively educate their peers surrounding issues of sexual health.</td>

<td></td>
</tr>
<tr>
<td>WGST 3260</td>
<td>Themes in Gender, Law and Justice</td>
<td>Course addresses issues related to gender, law and the justice system in the U.S. and/or globally. Topics may include history of women's rights</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>
in the U.S.; contemporary issues in law and justice such as incarceration, human trafficking, and gay marriage; and the ways race, class, sexuality and citizenship shape experiences of justice. May be repeated for credit with different semester themes.

**WGST 3270: Themes in Masculinities**
Explores how male experiences are shaped by gender expectations and social context, with emphasis on psychosocial challenges and privileges associated with negotiating masculine gender role expectations. Evaluates the psychological impact of gender, especially in American popular culture, on diverse men and their families. Studies how gender interacts with other aspects of identity, such as race, religion, ethnicity, socioeconomic status, sexual orientation and non-conforming gender identity. Course may be repeated for credit. Recommended: WGST 1120 and sophomore standing.

**Credit Hours:** 3
**Recommended:** junior standing

**WGST 3300: Queer Theories/Identities**
(same as SOCIOL 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.

**Credit Hours:** 3
**Prerequisites:** SOCIOL 2200 or instructor's consent

**WGST 3300W: Queer Theories/Identities - Writing intensive**
(same as SOCIOL 3300). Analysis of gay, lesbian, bisexual, transgender (GLBT) and queer identities in culture and society with an emphasis on the contributions of queer theory and other GLBT standpoint theories to sociology and the study of society.

**Credit Hours:** 3
**Prerequisites:** SOCIOL 2200 or instructor's consent

**WGST 3320: Sociology of Gender**
(same as SOCIOL 3320). Study of the ways in which femininities and masculinities are constructed in American society with particular attention to gender ideologies and the gendered nature of the social structure.

**Credit Hours:** 3
**Prerequisites:** SOCIOL 1000 or SOCIOL 1360

**WGST 3370: Themes in Gender and Religion**
Students acquire a basic knowledge and understanding of gender in religious communities including the construction of women's/men's religious identities, their gender relations, societal roles and status. Themes may explore how the organizational structures of religion can be a vehicle of oppression and a place for justice and autonomy; may explore the representation and practices of specific religions; or may address the intersections of gender, class, race, geopolitics, and religion. May be repeated for credit.

**Credit Hours:** 3
**Recommended:** junior standing

**WGST 3450: Feminist Methodologies**
This course is an opportunity to explore the difference that feminism makes in doing research. Students can begin to identify the research tools and strategies suited to questions they want to pursue.

**Credit Hours:** 3
**Prerequisites:** sophomore standing

**WGST 3450W: Feminist Methodologies - Writing intensive**
This course is an opportunity to explore the difference that feminism makes in doing research. Students can begin to identify the research tools and strategies suited to questions they want to pursue.

**Credit Hours:** 3
**Prerequisites:** sophomore standing

**WGST 3480: Themes in Sexuality and Literature**
Examines sexuality and representations of sexuality in literature. The specific topic will be announced at the time of registration. May be repeated for credit with different semester themes.

**Credit Hours:** 3

**WGST 3490: Themes in Gender and Globalization**
Introduces transnational feminist theories, considers the practices and material circumstances related to globalization, and explores how class, gender, place/nation, (dis) ability, sexuality and colonial practices complicate our understanding of globalization. May be repeated for credit with different semester themes.

**Credit Hours:** 3
**Prerequisites:** WGST 1120
**Recommended:** sophomore standing
WGST 3850: Themes in Gender and the Politics of Representation
Examines the gendered politics of representation by analyzing film, literature, popular media, and/or other popular cultural texts. May be repeated for credit with different semester themes.
Credit Hours: 3

WGST 3960: Strategies for Effective Peer Education
(same as HLTH_SCI 3965, P_HLTH 3960). Course designed to promote effective presentation skills on a variety of health topics, specifically sexual health. Students will engage in experiential practice and skill building surrounding cultural competency, difficult discourses, discussion facilitation and behavior management. Graded on A-F basis only.
Credit Hour: 1
Prerequisites: instructor's consent

WGST 4001: Topics in Women's and Gender Studies-General
Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.
Credit Hour: 1-3
Recommended: junior standing and/or WGST 1120

WGST 4003: Topics in Women's and Gender Studies-Behavioral Sciences
Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.
Credit Hour: 1-3
Recommended: junior standing and/or WGST 1120

WGST 4005: Topics in Women's and Gender Studies-Humanities
Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable up to 6 hours.
Credit Hour: 1-3
Recommended: junior standing and/or WGST 1120

WGST 4020: Studies in Feminist Thought
(same as BL_STU 4020; cross-leveled with WGST 7020). Examines recent problems and critical debates within feminist theory. May be repeated for credit with different semester themes.
Credit Hours: 3
Prerequisites: WGST 2020

WGST 4110: Feminist Research and Criticism
(same as SOCIOL 4110) Examination of both feminist critique of traditional social research and recent, feminist-oriented research that attempts to answer these criticisms.
Credit Hours: 3

WGST 4115: Relationship and Sexual Violence Prevention: Intersections of Social Justice
This course explores the nature and dynamics of power-based personal violence under a social justice framework. Students will learn about the anti-violence movement, increase understanding of oppression and how it relates to sexual assault, and acquire facilitation skills necessary to provide presentations on various related topics. Graded on A-F basis only.
Credit Hours: 3

WGST 4188: Major Women Writers, 1789-1890
(same as ENGLISH 4188). See WGST 4180 for course description.
Credit Hours: 3

WGST 4188W: Major Women Writers, 1789-1890 - Writing Intensive
(same as ENGLISH 4188). See WGST 4180 for course description.
Credit Hours: 3

WGST 4189: Major Women Writers, 1890-Present
(same as ENGLISH 4189). See WGST 4180 for course description.
Credit Hours: 3

WGST 4230: Women, Development, and Globalization
(same as SOCIOL 4230, BL_STU 4230 and PEA_ST 4230). Examines the history and structure of "development" discourse and practices. Stresses the interconnections and impact on women globally. Reviews women's strategies in defining and instituting programs to improve quality of life in communities.
Credit Hours: 3
Prerequisites: BL_STU 1332, BL_STU 2200; SOCIOL 2200; WGST 1332 or WGST 2010

WGST 4235: Social Perspectives on Gender and Emotion
(same as BL_STU 4235, SOCIOL 4235; cross-leveled with BL_STU 7235, SOCIOL 7235, WGST 7235). Examines theories of affect and emotions, the social contexts and the implications for human development and behavior, with special emphasis on sex, gender, race, class and culture. Graded on A-F basis only.
Credit Hours: 3
Prerequisites: WGST 1332 or WGST 1360; SOCIOL 1360 or SOCIOL 2300; BL_STU 1332 or BL_STU 2200; junior standing

WGST 4310: Adoption, Child Welfare and the Family, 1850-Present
(same as HIST 4310; cross-leveled with WGST 7310, HIST 7310). This interdisciplinary U.S. history course will address topics such as: changing legal and social meaning of adoption since 1850; historical connections between adoption and poverty, family, gender race, sexuality, class, fertility, identity; and more recent issues such as transnational adoption.
Credit Hours: 3

WGST 4350: Studies in Gender and the Environment
(cross-leveled with WGST 7350). Explores how gendered social relations affect the relationship between human beings, non-human nature, and the environment. Also examines how historically, the human relationship with nature has been governed by a dualism of culture and nature that enables both an ideology of technical control and the objectification of the environment and people. Draws from ecological feminism, the
environmental justice movement, feminist science studies, materialist feminism, and feminist dystopian fiction. May be repeated for credit.

**Credit Hours:** 3  
**Prerequisites:** junior standing  
**Recommended:** WGST 1120

---

**WGST 4370: Anthropology of Gender**  
(same as ANTHRO 4370; cross-leveled with ANTHRO 7370, WGST 7370). The Anthropology of Gender introduces the student to the variation in the relationships between male and females; and between men, women, and other genders from around the world. The different approaches to understanding and modeling gender are discussed, as are specific case-studies from many different cultures.

**Credit Hours:** 3

---

**WGST 4400: Contemporary Issues in Domestic Violence**  
(same as SOC_WK 4400; cross-leveled with SOC_WK 7400, WGST 7400). Covers history of the domestic violence movement, intimate partner violence theories and data, legislative and organizational policy issues, and intervention models for practice with individuals who have experienced domestic violence including co-occurring issues such as trauma. Graded on A-F basis only.

**Credit Hours:** 3  
**Prerequisites:** Junior or Senior standing required

---

**WGST 4420: Studies in Gender, Culture, and Politics**  
Examines ethical issues, social policies and politics, and cultural practices affecting women in specific national and global contexts. May be repeated for credit with different semester themes.

**Credit Hours:** 3  
**Prerequisites:** junior standing or instructor's consent

---

**WGST 4488: Major African Diaspora Women Writers, 1789 to 1890**  
(same as BL_STU 4488, ENGLSH 4488). See WGST 4480 for course description.

**Credit Hours:** 3

---

**WGST 4489: Major African Diaspora Women Writers, 1890 to Present**  
(same as BL_STU 4489, ENGLSH 4489; cross-leveled with ENGLISH 7489, BL_STU 7489, WGST 7489). See WGST 4480 for course description.

**Credit Hours:** 3

---

**WGST 4489W: Major African Diaspora Women Writers, 1890 to Present - Writing Intensive**  
(same as BL_STU 4489W, ENGLSH 4489W; cross-leveled with ENGLISH 7489, BL_STU 7489, WGST 7489). See WGST 4480 for course description.

**Credit Hours:** 3

---

**WGST 4550: Gender and Human Rights in Cross Cultural Perspective**  
(same as SOCIOL 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

**Credit Hours:** 3  
**Prerequisites:** WGST 1120 or SOCIOL 2200  
**Recommended:** senior standing required

---

**WGST 4550W: Gender and Human Rights in Cross Cultural Perspective - Writing Intensive**  
(same as SOCIOL 4550 and PEA_ST 4550). This course focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of rights, Western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

**Credit Hours:** 3  
**Prerequisites:** WGST 1120 or SOCIOL 2200  
**Recommended:** senior standing required

---

**WGST 4600: Studies in Women and Health**  
A survey of international and domestic women’s health issues; considers historical antecedents and specific effects of socio-cultural variables and economic development on women’s health in developing and developed nations. May be repeated for credit with different semester themes.

**Credit Hours:** 3

---

**WGST 4640: Studies in Gender and Performance**  
Examines the relationship among gender, race, class, and/or sexuality, and performance. Course materials may include theatre performance, visual art, literacy context, theoretical essays, films, and popular culture. May be repeated for credit with different semester themes.

**Credit Hours:** 3  
**Prerequisites:** junior standing

---

**WGST 4716: Women and the Media**  
(same as JOURN 4716; cross-leveled with WGST 7716, JOURN 7716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.

**Credit Hours:** 3

---

**WGST 4730: Women and Politics**  
(same as POL_SC 4730). This course examines women's political participation and public policies towards women in countries around the world.

**Credit Hours:** 3

---

**WGST 4750: Women, Religion and Culture**  
(same as REL_ST 4750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

**Credit Hours:** 3

<td></td>
</tr>
</tbody>
</table>

experienced domestic violence including co-occurring issues such as trauma. Graded on A-F basis only.

**Credit Hours:** 3

**WGST 7420: Studies in Gender, Culture, and Politics**
Examines ethical issues, social policies and politics, and cultural practices affecting women in specific national and global contexts.

**Credit Hours:** 3

**WGST 7550: Gender and Human Rights in Cross Cultural Perspective**
(same as SOCIOL 7550 and PEA_ST 7550). Focuses on the global discourse on human rights and gender, emphasizing cross-cultural theories. Course includes the meaning of human rights, western and nonwestern perspectives, feminist contributions, important substantive debates, violations, policymaking and activism.

**Credit Hours:** 3

**WGST 7716: Women and the Media**
(same as JOURN 7716; cross-leveled with WGST 4716, JOURN 4716). Focus on portrayal of women in American mass media. Other goals: historical perspective on women as journalists; exposure to issues usually not covered by mass media; research and writing skills.

**Credit Hours:** 3  
**Prerequisites:** instructor's consent

**WGST 7750: Women, Religion and Culture**
(same as REL_ST 7750). An advanced study of the role of women in religion, focusing on the methods of determining the significance of gender in religious life, sacred texts, symbols, rituals and/or beliefs. Traditions studied include Christianity, Islam, contemporary pagan communities, and Native American traditions.

**Credit Hours:** 3

**WGST 7780: Women's Folklore and Feminist Theory**
(same as ENGLISH 7780). Examines folklore and artistic expression of women in relations to feminist theory and in multicultural contexts. Includes verbal genres (narrative/song) as well as material genres (quilting/arts).

**Credit Hours:** 3

**WGST 7875: Women’s and Gender Studies Abroad - Humanities**
This interdisciplinary study abroad course provides students the opportunity to study women's issues in the globe, to study in a foreign culture and augment their global competencies across the Women's and Gender Studies curriculum and extend a global perspective to their study and/or career development.

**Credit Hours:** 3

**WGST 8004: Topics in Women's and Gender Studies-Social Science**
Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

**Credit Hour:** 1-3

**WGST 8005: Topics in Women's and Gender Studies-Humanities**
Problems, topics, issues or review of research in any area of women's and gender studies and/or experimental development of new content areas. Repeatable.

**Credit Hour:** 1-3

**WGST 8020: Graduate Feminist Theory**
This course will explore the texts and contexts of feminist theories including women of color socialist/Marxist feminism, queer theory, postmodern feminism, and feminist postcolonial theory.

**Credit Hours:** 3

**WGST 8040: Seminar: Problems and Issues in Feminist Scholarship**
This course is a broad based exploration of a range of current feminist scholarship, both multidisciplinary and interdisciplinary. Issues of identity and difference, community and change are explored through the complicating lenses of race and sexuality.

**Credit Hours:** 3

**WGST 8060: New Directions in Feminist Theory**
Offers an in-depth exploration of a recent direction in feminist theory. Students will learn a specific feminist approach to scholarship. Theory explored will change based on the semester and professor teaching the course.

**Credit Hours:** 3

**WGST 8965: Problems in Women's and Gender Studies**
Directed individual study on selected topics for qualified graduate students. Plan of study subject to approval by supervising faculty.

**Credit Hour:** 1-6  
**Prerequisites:** departmental consent

**WGST 9440: Race, Gender, Ethnicity in Higher Education**
(same as ED_LPA 9440). Historical relationships of race, gender, and ethnic issues in United States higher education. Issues include: theory and research of curriculum and teaching, diversity within the academy, and leadership, governance, and policy.

**Credit Hours:** 3
Faculty

Below is a listing of faculty who are currently scheduled to teach Spring 2019 through Spring 2020. Information includes the faculty’s name, title, department, highest degree attained and institution of highest degree. The last two items of information are self-reported.

Additional faculty members may be listed on the Faculty tabs in the degree areas within the catalog, or on the College, School, or Department websites.

Abbott, Carmen Casanova; SHP/Physical Therapy; Doctor of Philosophy; University of Missouri
Abbott, Colleen Marie; Specialist; Applied Soc Sci; Specialist of Education; University of Missouri
Abbott, Jeanne Martha; Journalism; Doctor of Philosophy; University of Missouri
Abbott, Kati Marie; Part-Time Adjunct Faculty; Economics; Master of Education; Truman State University
Abdelaziz, Amr Samy; Radiology; Master's Degree - 1st entry; Cairo University, Egypt
Abdulkarim, Ghaith Ahmed; Anesthesiology; Doctor of Medicine; Jordan University of Science and Technology
Abdulkhalik, Karim Salaimy; Part-Time Adjunct Faculty; Aerospace Studies
Aberbach, Ian M; Mathematics; Doctor of Philosophy; University of Michigan
Abeyta, Audrey Nasya; Communication; Master of Arts; UC Santa Barbara
Abou Leila, Ahmad; Anesthesiology; Doctor of Medicine
Abou el ela, Ashraf Shaaban; Surgery-Cardiothoracic; Master of Science
Abrams, Douglas E; Law; Juris Doctor; Columbia University
Acton, James D; Child Health-Pulmonary; Doctor of Medicine; University of Illinois
Adam, Balkozar S; Psychiatry; Master's Degree; University of Missouri
Adamovicz, Jeffrey Joseph; Veterinary Pathobiology; Doctor of Philosophy; Uniformed Services University of Heath Sciences
Adams, Allison Nicole; Mizzou K-12 Online; Bachelor's Degree; Georgia State University
Adams, Catherine Comley; Part-Time Adjunct Faculty; State Historical Society; Bachelor's Degree - 2nd entry; William Jewell College
Adams, Johanna R; Prof, Asoc Extns; Social Sciences CD; Doctor of Philosophy; University of Missouri
Adams, John E; Emeritus; Chemistry; Doctor of Philosophy; University of California, Berkeley
Adelstein, Edward H; Path & Anat Sci-Anatomic Path; Doctor of Medicine; University of Missouri
Aderton, Andrea Hope; Social Work

Adib Keleh, Shady; Anesthesiology; Doctor of Medicine; University of Cairo
Adkins, Denice C; Info Science & Learning Tech; Doctor of Philosophy; The University of Arizona
Adkins, Pamela Rae; Veterinary Medicine & Surgery; Doctor of Veterinary Medicine; The Ohio State University
Adkins, Tanner Luke; Extns Professional, Ast; East Ctrl Region-Youth; Master of Science; University of Missouri
Adolph Sr, Jessie Lamar; Black Studies; Doctor of Philosophy; University of Missouri-Columbi
Adu-Gyamfi, Yaw Okyere; Civil/Environmental Engr; Doctor of Philosophy; University of Delaware
Agca, Yuksel; Veterinary Pathobiology; Doctor of Philosophy; Purdue University - North Central
Aggarwal, Ajay; Orthopaedic Surgery
Aggarwal, Arpit; Psychiatry
Aggarwal, Kul B; Medicine; Doctor of Medicine; Medical College Amritsar
Agha, Mohammad Tariq; Physical Medicine & Rehab; Doctor of Medicine; University of Missouri - Kansas City
Aguayo, David; Fellow, Post Doctoral; Ed Leadership & Pol Analysis; Doctor of Philosophy
Aguilar, Francisco Xavier; Part-Time Adjunct Faculty; School of Natural Resources; Doctor of Philosophy; Louisiana State University
Ahmad, Salman; Surgery-Acute Care
Ahsan, Humera; Radiology; Doctor of Medicine; Royal College of Radiologist
Ailor, Susan Kay; Dermatology; Doctor of Medicine; University of Missouri
Akhmadullin, Iskander V; School of Music; University of North Texas
Akin, Heather Elizabeth; Journalism; Doctor of Philosophy; University of Wisconsin-Madison
Akturk, Ismail; Electrical Eng & Computer Sci; Doctor of Philosophy; University of Minnesota, Twin Cities
Al Juboori, Alhareth; Medicine-Gastroenterology
Al Wekhian, Jamil A; Multidisciplinary Programs; Doctor of Philosophy; Kennesaw State University
Al-Samarraie, Mohannad Moayad; Ophthalmology; Doctor of Medicine; University of Baghdad, College of Medicine
Alafaireet, Patricia Elaine; Health Mgmt & Informatics; Master's Degree; University of Missouri
Alavi, Amirhossein; Civil/Environmental Engr; Doctor of Philosophy; Michigan State University
Albright, Emily Laraine; Surgery-Surgical Oncology; Doctor of Medicine; St Louis University
Albright, Joyce Gay; Management; Master of Business Administration; Saint Louis University
Alcazar-Estela, Asier; Romance Languages & Literature; Doctor of Philosophy; University of Southern California

Alden, Michael F; Prof, Asoc Teach; Educ, School, & Counsel Psych; Master of Education; Arizona State University

Aldrich, Eric Michael; Part-Time Adjunct Faculty; VP Undergraduate Studies; Master of Science; University of Missouri

Aldridge, Kristina J; Path & Anat Sci - Anatomy; Doctor of Philosophy; Johns Hopkins University

Alexander, Amanda Caroline; ZZZ-Hospitality Management; Doctor of Philosophy; University of Missouri

Alexander, Anne Michele; Law

Alexander, Gregory Lynn; School of Nursing; Doctor of Philosophy; University of Missouri

Alexander, Rachel Lynn; Health & Specialized Libs; Master of Library Science; University of Missouri

Alexander, Ross Cory; Truman School of Pub Aftrs Adm; Doctor of Philosophy

Alexenko, Andrei Petrovitch; Animal Science; Doctor of Philosophy; VNII Genetika

Ali Akbarpour, Hadi; Electrical Eng & Computer Sci; Doctor of Philosophy; University of Coimbra

Aljabari, Salim A; Child Health Critical Care; Doctor of Medicine; Alquds Scool Of Medicine

Allen, Brittany Jean; Psychiatry; Doctor of Philosophy; Saint Louis University

Allen, Carla McCaghren; SHP/Clinical & Diagnostic Sci; Doctor of Philosophy; University of Missouri

Allen, Stephanie Marie; MO Health Prof Consortium; Master’s Degree; University of Missouri

Allen, William D; Finance; Doctor of Philosophy; University of Missouri

Allen, William H; Emeritus; Applied Soc Sci; Master’s Degree; University of Illinois at Urbana-Champaign

Allison, Emily Bess; Law; Juris Doctor; Washington University in St Louis School of Law

Allmon, Amanda Lou; Family & Community Medicine; Doctor of Medicine; University of Missouri

Almasri, Mahmoud Faud; Electrical Eng & Computer Sci; Doctor of Philosophy; Southern Methodist University

Almubarak, Renas Fadiallah; Emergency Medicine; Master of Public Health; University of Oslo

Alnijoumi, Mohammed Mustafa; Medicine-Pulmonary & Environ; Doctor of Medicine; University of Khartoum

Alonzo, Donette Rose; Part-Time Adjunct Faculty; HR Service Center; Doctor of Education; UMKC

Aloysius, Noel R; Biological Engineering; Doctor of Philosophy; Yale University

Alpert, Martin Alvin; Medicine; Doctor of Medicine; Ohio State University

Alsabbagh, Mustafa; Radiology; Bachelor's Degree - 1st entry; Al-Anbar University

Alston, Jason Kelly; Info Science & Learning Tech; Doctor of Philosophy; University of Southern California

Altes, Talissa Ann; Radiology; Doctor of Medicine; University of Washington

Altman, Claire Estelle; SHP/Health Sciences; Doctor of Philosophy; The Pennsylvania State University

Alvarado, Sethabel Levi; Anesthesiology; Doctor of Medicine

Amass, Mariann D; Part-Time Adjunct Faculty; Mizzou Online; Specialist of Education; University of Missouri

Amelon, Sybill K; Part-Time Adjunct Faculty; School of Natural Resources; Doctor of Philosophy; University of MO Columbia

Amos Landgraf, James Michael; Veterinary Pathobiology; Doctor of Philosophy; Case Western Reserve University

An, Jella Angela; Ophthalmology; Doctor of Medicine; McGill University

Anastasiadou, Artemis; School of Visual Studies; Master of Fine Arts; University of Texas at Austin

Anbari, Allison Brandt; School of Nursing; Doctor of Philosophy; University of Missouri

Anderson, Alex I; Part-Time Adjunct Faculty; Dean of Arts & Science; Master of Education; University of Missouri

Anderson, Deborah Mae; Veterinary Pathobiology; Doctor of Philosophy; University of California, Los Angeles

Anderson, Derek T; Electrical Eng & Computer Sci; Doctor of Philosophy; University of Missouri

Anderson, Erin Abbott; Dean of College of Business

Anderson, Katherine Marie; MU Libraries; Master of Library Science; University of Wisconsin - Madison

Anderson, Kerin Kay; Part-Time Adjunct Faculty; Dean of College of Business; University of Missouri

Anderson, Laura L; Part-Time Adjunct Faculty; School of Nursing; Bachelor's Degree; University of Missouri

Anderson, Nichole Chapel; Animal Science; Doctor of Philosophy; Purdue University

Anderson, Paul Ervin; Veterinary Pathobiology; Doctor of Philosophy; University of California, Los Angeles

Anderson, Sharlette Dawn; SHP/Clinical & Diagnostic Sci; Master's Degree; University of Missouri

Anderson, Stephen H; ZZZ-School of Natural Resource; Doctor of Philosophy; North Carolina State University

Anderson, Thomas Lee; Part-Time Adjunct Faculty; Biological Science; Doctor of Philosophy; University of Missouri

Andrus, Joel Leavitt; Management; Doctor of Philosophy; Texas A&M

Ang, Jonathan Ross; Medicine-Pulmonary & Environ

Angelovici, Ruthie; Biological Science; Doctor of Philosophy; Weizmann Institute of Science
Anguah, Katherine Osei; Nutrition & Exercise Phys-HES; Doctor of Philosophy; Purdue University

Anilkumar, Arayampambal Chidambaram; Child Health - Neurology; Doctor of Medicine; University of Calcutta

Ansaf, Baha Ibraheem; Part-Time Adjunct Faculty; Mechanical & Aerospace Engr; Doctor of Philosophy; University of Baghdad

Anthony, Douglas C; Part-Time Adjunct Faculty; Path & Anat Sci-Anatomic Path; Doctor of Philosophy; Duke University

Anthony, Sarah Elizabeth; Part-Time Adjunct Faculty; Dean of Health Professions; Bachelor's Degree; University of Missouri

Appleton, Kathy Jane; German & Russian Studies; Master of Arts; University of Missouri

Appold, Martin Stephan; Geological Sciences; Doctor of Philosophy; Johns Hopkins University

Arce, Moises; Political Science; Doctor of Philosophy; The University of New Mexico

Aregbe, Farouk Olufunmilayo; Part-Time Adjunct Faculty; Ctr for Acad Success & Exllence; University of North Dakota

Arend, Lauren Elizabeth; Learning Teaching & Curriculum; Doctor of Philosophy; Saint Louis University

Argerich, Alba; School of Natural Resources; Doctor of Philosophy; University of Barcelona, Spain

Ariew, Andre I; Philosophy; Doctor of Philosophy; The University of Arizona

Armbrust, Catherine Paisley; Art & Art History; University of Missouri

Armenta, Brian Erik; Psychological Sciences

Armer, Jane M; School of Nursing; Doctor of Philosophy; University Of Rochester

Arndt, Haley Elizabeth; Journalism; Bachelor's Degree - 1st entry; University of Missouri, School of Journalism

Arndt, Jamie L; Psychological Sciences; Doctor of Philosophy; The University of Arizona

Arnold, Jessie Lynne; Mizzou K-12 Online; Master of Education

Arns, Megan Elizabeth; School of Music; Doctor of Musical Arts; Eastman School of Music

Aro, Michael R; Radiology; Doctor of Medicine; University of Ilorin

Aronson, Everett; Part-Time Adjunct Faculty; Veterinary Medicine & Surgery

Aroor, Annayya R; Medicine-Endocrinology; Doctor of Medicine

Arora, Niraj Ashok; Neurology; Doctor of Medicine; Drexel University College of Medicine

Arouca, Raquel Alexandra; Part-Time Adjunct Faculty; Graduate School; Doctor of Philosophy; University of Montana

Arteaga-Cox, Irma Angela; Truman School of Pub Aftrs Adm; Doctor of Philosophy; University of Minnesota

Arunachalam, Vairam; Accountancy; Doctor of Philosophy; University of Illinois at Urbana-Champaign

Ashcraft, Nikki L; Learning Teaching & Curriculum; Doctor of Philosophy; The University of Georgia

Asher, Morgan Whitney; Nutrition & Exercise Phys-HES; Bachelor's Degree - 1st entry; University of Missouri-Columbia

Askins, Joseph D; MU Libraries; Master of Library Science; University of Illinois at Urbana-Champaign

Asmar, Nakhele; Mathematics; Doctor of Philosophy; University of Washington

Assena, Mahaletwork Yeshitela; Medicine Hospitalist

Atasoy, Ulus; Part-Time Adjunct Faculty; Surgery-Administration; Doctor of Medicine; University of Minnesota

Atkins, Fran Coppage; Learning Teaching & Curriculum; Master of Arts; St. Mary's University

Atkinson, Grace Elizabeth; MU Libraries; Master's Degree - 1st entry; The University of Texas at Austin

Atkinson, Sine Mairi; Mizzou K-12 Online; Bachelor's Degree - 1st entry; University of Glasgow

Atwood, Jerry L; Chemistry; Doctor of Philosophy; University of Illinois

Aura, Saku Petteri; Economics; Doctor of Philosophy; Massachusetts Institute of Technology

Avella Patino, Diego Mauricio; Surgery-Cardiothoracic; Doctor of Medicine; Universidad el Bosque. Escuela Colombiana de Medicina

Avery, Eileen E; Sociology; Doctor of Philosophy; The Ohio State University

Avery, Patricia Lynne; Learning Teaching & Curriculum; Master of Education; Univ Of Mo Columbia

Aviles Quinones, Alicia; Romance Languages & Literature; Doctor of Philosophy; Tulane University

Ayllon, Miguel Elias; Part-Time Adjunct Faculty; International programs; Doctor of Philosophy; University of Missouri

Azharuddin, Muhammad; Medicine Hospitalist; Doctor of Medicine; Dow Medical College

Ba, Leigh Kathryn; Political Science; Doctor of Philosophy; UNC Chapel Hill

Bachrach, Bert E; Child Health-Endocrinology; Doctor of Medicine; Saint Louis University

Backes, Teresa Marie; Medicine Hospitalist; Doctor of Medicine; University of Missouri

Backus, Bob C; Veterinary Medicine & Surgery; Doctor of Philosophy; University of California, Davis

Backus, Kathleen Q; Veterinary Medicine & Surgery; Doctor of Veterinary Medicine; University Of California-Davis

Bader, Valerie Gwen; School of Nursing; Master's Degree - 1st entry; University of Washington

Badiane, Mamadou; Romance Languages & Literature; Doctor of Philosophy; The University of Iowa

Badoer, Dominique Carlo; Finance; Doctor of Philosophy; University of Florida
Baer, Leah Mae; Accountancy; Doctor of Philosophy; University of Colorado Boulder

Bagby-Stone, Stephanie D; Psychiatry; Doctor of Medicine; University of Missouri

Bailey, Eric Arthur; Animal Science; Doctor of Philosophy; Kansas State University

Bailey, Gina Marie; VP for International Programs; Bachelor's Degree; University of Missouri

Bailey, Rachel Michelle; Social Work; Master of Social Work; University of Missouri

Bailey, Robert Gary; Provost; Juris Doctor; University of Missouri

Bailey, Ruby Lee; Journalism; Bachelor's Degree - 1st entry; Wayne State University

Baines, Christopher Philip; Biomedical Sciences; Doctor of Philosophy; University of South Alabama

Baker, Christi Suzanne; SHP/Speech Lang & Hearing Sci; Master of Science; Southwest Missouri State University

Baker, Elizabeth A; Learning Teaching & Curriculum; Doctor of Philosophy; Vanderbilt University

Baker, Gary Allen; Chemistry; Doctor of Philosophy; University at Buffalo, The State University of New York

Baker, Molly Danielle; SHP/Health Sciences; Master of Public Health; University of Missouri

Baker, Sheila N; Chemistry

Balakrishnan, Bimal; Architectural Studies; Doctor of Philosophy; The Pennsylvania State University

Balasundaram, Naveen; Surgery - Vascular; Doctor of Medicine; Stanley Medical College, Dr MGR University

Balboula, Ahmed Zaky; Animal Science; Doctor of Philosophy; Mansoura University, Egypt

Baldwin, Michael Robert; Molec Microbio & Immunology; Doctor of Philosophy; King's College

Ball, Angela Dawn; Part-Time Adjunct Faculty; Women's & Children's Hospital; University of Missouri

Ball, Anna Leigh; ZZZ-Agricultural Ed and Leader; Doctor of Philosophy; University of Missouri

Ball, Elizabeth Quares; Part-Time Adjunct Faculty; Dean of Health Professions; Master of Education; University of Missouri

Ball, Stephen Daniel; Nutrition & Exercise Phys-HES; Doctor of Philosophy; Arizona State University

Bailou, Matthew Glenn; ZZZ-Art; Master of Fine Arts; Indiana University Bloomington

Balser, Christina J; Part-Time Adjunct Faculty; Student Success Center; Doctor of Education; University of Missouri

Balser, Nicholas P; Part-Time Adjunct Faculty; Dean of Engineering; Master of Education; University of Missouri

Bana, Gergely Istvan; Electrical Eng & Computer Sci; Doctor of Philosophy

Banaszynski, Jacqueline M; Emeritus; Journalism; Bachelor's Degree; Marquette University

Bandypadhyay, Susanta; Neurology; Doctor of Medicine

Banks, William D; Mathematics; Doctor of Philosophy; Stanford University

Bao, suping; School of Nursing; Doctor of Philosophy; Goldfarb School of Nursing

Barabtario, Gene Alexis; Emeritus; German & Russian Studies; Doctor of Philosophy

Baram, Mujahida; Emergency Medicine; Doctor of Medicine; St. George's University

Bardhan, Sougata; ZZZ-School of Natural Resource

Barker, Alex W; Director; Museum of Art & Archaeology; Doctor of Philosophy; University of Michigan

Barker, Anne K; MU Libraries; Master of Library Science; University of Illinois

Barksdale, Debra David; Mizzou Online; Master of Education; Northwest Missouri State University

Barnes, Courtney Leigh; Ob, Gyn & Women's Health; Doctor of Medicine; University of Missouri

Barnes, Stephen L; Surgery-Acute Care; Doctor of Medicine; The University of Alabama at Birmingham

Barstnone, Alik Dora; English; Doctor of Philosophy; University of California, Berkeley

Barondones, Royce De; Law; Juris Doctor; University of Virginia

Barquero-Molina, Miriam; Director; Geological Sciences; Doctor of Philosophy; The University of Texas at Austin

Barrett, Bruce Allen; Plant Sciences; Doctor of Philosophy; Washington State University

Barrett, Michael Kane; Political Science; Juris Doctor; Southern Illinois University School of Law

Barrett, Steve William; Mizzou Online; Doctor of Philosophy; University of Missouri

Barrier, Breton Foster; Ob, Gyn & Women's Health; Doctor of Medicine; The University of Texas Health Science Center

Bartholow, Bruce D; Psychological Sciences; Doctor of Philosophy; University of Missouri

Bartlett, Lyria Dickason; Architectural Studies; Master's Degree; Washington University

Bartley, Kathryn Elise; Accountancy; Master of Accountancy; University of Missouri

Bassett, Cynthia Wyatt; Law Library; Master of Library Science; University of Missouri

Bassett, Damon Joel; Geological Sciences; Master of Science; University Of Missouri-Columbia

Bastos Gurgel Silva, Felipe; Accountancy; Doctor of Philosophy; Cornell University

Bath, Jonathan Ming; Surgery - Vascular; Doctor of Medicine
Bauer, Lisa M; Psychological Sciences
Bauerband, Loren Andrew; Fellow, Post Doctoral; SHP/Health Sciences; Doctor of Philosophy; University of Rhode Island
Bax, Joshua Terrance; Marketing; Master of Public Admin; University of Missouri
Bazan Antequera, Ronny Cristian; Electrical Eng & Computer Sci; Master of Science; University of Missouri
Beach, Elaine Kimberly; Part-Time Adjunct Faculty; Medical Intensive Care; Registered Nurse
Beamer, Lesa J; Biochemistry; Doctor of Philosophy; Johns Hopkins University
Bean, Jennifer Dianna; Nutrition & Exercise Phys-HES; Master of Science; University of Missouri
Beatty, Tami L; Part-Time Adjunct Faculty; Dean of Engineering
Becchi, Michela; Part-Time Adjunct Faculty; Mechanical & Aerospace Engr
Becevic, Mirna; Dermatology; Doctor of Philosophy; University of Missouri
Bechtold, Matthew L; Medicine
Beck, Mary M; Law; Juris Doctor; University of Missouri
Beck, Mary Sue; Part-Time Adjunct Faculty; Executive Admn UHC; Doctor of Nursing Practice; Rush University College of Nursing
Beck Jr, Niels Christian; Psychiatry
Beckett, Adam Harty; Emergency Medicine
Beckmann, Jessica Lee; Part-Time Adjunct Faculty; Intercollegiate Athletics; Doctor of Physical Therapy; Creighton University
Beckmann, Joseph Albert; Family & Community Medicine; Doctor of Medicine; University of Missouri
Bedford, Melissa Ann; Part-Time Adjunct Faculty; SHP/Health Sciences; Master's Degree - 1st entry; Saint Xavier University
Bedwinek, Anne Louise; Part-Time Adjunct Faculty; SHP/Speech Lang & Hearing Sci; Doctor of Philosophy
Beemtsen, Brenda T; Veterinary Pathobiology; Doctor of Philosophy; University of Wisconsin - Madison
Behura, Susanta Kumar; Animal Science; Doctor of Philosophy
Belcher, David C; Ed Leadership & Pol Analysis; Doctor of Education; University of Missouri
Belden, Jeffery L; Family & Community Medicine; Doctor of Medicine; Southern Illinois University
Bell, Angela D; History; Master's Degree; University of Missouri
Bell, Debora Jeneen; Psychological Sciences; Doctor of Philosophy; West Virginia University
Bell, Jacqueline Sue; Journalism; Master of Arts; Ohio University
Bell, Robert Dale; Emergency Medicine; Master's Degree; University of Nebraska
Belmore, Dawn Lanae; SHP/Physical Therapy
Belmore, Keith M; SHP/Physical Therapy; Master of Education; University of Missouri
Belt, Dustin David; Mathematics; Doctor of Philosophy; Purdue University
Benard, Julie Ann; Child Health-Gen & Ambulatory; Doctor of Medicine; University of Missouri
Bender, Shawn B; Biomedical Sciences; Doctor of Philosophy; Ohio University
Benjamin, Andrea; Political Science; Doctor of Philosophy
Benson, Craig A; Part-Time Adjunct Faculty; Career Center; Master of Business Administration; University of Missouri
Benson, Jacquelyn J; Human Devl & Family Science; Doctor of Philosophy; University of Missouri
Benson, Jerry Kenneth; Emeritus; Sociology; Doctor of Philosophy; The University of Texas at Austin
Bent, Elizabeth Oliver; Part-Time Adjunct Faculty; Dean of Agriculture; Master of Science; The University of Missouri
Bentley, Clyde; Emeritus; Journalism; Doctor of Philosophy; University of Oregon

Gregory, Rabia Anne-Geha: Religious Studies; Doctor of Philosophy; The University of North Carolina at Chapel Hill

Greimann, Beth Marie: Vice Provost for International Programs; Master of Education; Ashford University

Greitens, Sheena Elise: Political Science; Doctor of Social Science; Harvard University

Grider, Chris: School of Nursing; Master's Degree; University of Missouri

Griffith, Samuel Vincent: School of Music; Doctor of Musical Arts; University of Colorado Boulder

Grigsby, Mary: Emeritus; Applied Soc Sci; Doctor of Social Science; University of Missouri

Grillo, Anthony P: Ophthalmology; Doctor of Medicine; University of CA - Los Angeles

Grim, Autumn Monique: SHP Public Health; Master of Public Health; Saint Louis University

Grisanti, Laurel Ann: Biomedical Sciences; Doctor of Philosophy; University of North Dakota

Grobman, Megan Elizabeth: Fellow, Post Doctoral; Veterinary Medicine & Surgery

Groh, Ashley Marie: Psychological Sciences; Doctor of Philosophy; University of Illinois Urbana-Champaign

Grollemund, Rebecca Beatrice: English; Doctor of Philosophy; Université Lyon 2, France

Groom, Kathryn Maureen: Veterinary Medicine & Surgery; Doctor of Veterinary Medicine; University of Missouri - Columbia

Grothaus Day, Cyrene D: Anesthesiology; Doctor of Medicine

Gruen, Ingolf Uwe: Food Science; Doctor of Philosophy; Virginia Polytechnic Institute and State University

Grujic, Ana: Mizzou K-12 Online; Doctor of Philosophy; SUNY University at Buffalo

Gruner, Barbara A: Child Health-Hematology; Doctor of Medicine; University of Missouri

Grupe, Gregory A: Learning Teaching & Curriculum; Specialist of Education; University of Missouri

Gu, Chao: Economics; Doctor of Philosophy; Cornell University

Gu, Li-Qun: Biological Engineering; Doctor of Philosophy; Nankai University

Gu, Zezong: Path & Anat Sci-Anatomic Path

Gubera, Christopher C: Electrical Eng & Computer Sci; Master of Education; University of Missouri

Gubrium, Jaber Fandy: Emeritus; Sociology; Doctor of Philosophy; Wayne State University

Guess, Trent M: SHP/Physical Therapy; Doctor of Philosophy; The University of Kansas

Guha, Suchismita: Physics; Doctor of Philosophy; Arizona State University

Guidoboni, Giovanna: Electrical Eng & Computer Sci; Doctor of Philosophy; Universita' di Ferrara

Guilliams, Donald Joseph: Instructor, Residnt; Electrical Eng & Computer Sci; Master of Business Admin; Saint Louis University

Guillotte, Sharon Kimberly: Mizzou K-12 Online; Bachelor's Degree - 1st entry; Midstate College
Guinn, Jeffrey A; ZZZ-Hospitality Management; Master of Science
Gull, Tamara Brownsey; Veterinary Pathobiology; Doctor of Philosophy; Texas A&M University
Gunn, Victoria; Dermatology; Master's Degree; University of Missouri
Gunther, Cathy Veronica; Honors College; Doctor of Philosophy; The University of Utah
Guo, Huatao; Molec Microbio & Immunology; Doctor of Philosophy; The University of Texas at Austin
Guo, Yicheng; Physics; Doctor of Philosophy; University of Massachusetts
Gupta, Bina; Philosophy; Doctor of Philosophy; Southern Illinois University-Carbondale
Gupta, Sumit Kumar; Orthopaedic Surgery; Doctor of Medicine; University of Texas at Austin
Gutshall, Tara Lea; Learning Teaching & Curriculum; Master's Degree - 1st entry
Gutwein, Laura Lynn; Mizzou K-12 Online; Bachelor's Degree - 1st entry; William Paterson University
Guyette, Richard; Emeritus; School of Natural Resources; Doctor of Philosophy; University of Missouri
Ha-Brookshire, Jung Eun; Textile and Apparel Mgmt; Doctor of Philosophy; The University of North Carolina at Greensboro
Habilbi, Javad; Medicine-Endocrinology; Doctor of Philosophy; University of Wisconsin - Madison
Hagglund, Lindsey N; Part-Time Adjunct Faculty; Dean of Health Professions; Bachelor's Degree; University of Missouri
Hahn, Bumsuk; Surgery; Doctor of Philosophy; Pohang University of Science and Technology
Hahm, Bumsuk; Surgery; Doctor of Philosophy; Pohang University of Science and Technology
Hall, Cindy Leigh; Journalism; Bachelor's Degree - 1st entry; Northwestern University
Hall, Damon Meredith; School of Natural Resources; Doctor of Philosophy; Texas A&M University
Hammond, Karl Daniel; Chemical Engineering; Doctor of Philosophy; University of Massachusetts Amherst
Hammoud, Ghassan M; Medicine; Doctor of Medicine; The University of New Mexico
Hannen, Daniel Joseph; Social Work; Master of Social Work; University of Missouri
Hancock, Tamara Suzanne; Biomedical Sciences; Doctor of Philosophy; University of Missouri
Hamoodi, Shakir Abdul; German & Russian Studies; Doctor of Philosophy; UMC
Han, Xun; Medicine-Cardiology; Doctor of Philosophy; Unv. of Kentucky
Hagely, Julia Struble; Medicine Hospitalist; Doctor of Medicine; University of Missouri
Hager, Nora Lynn; Human Devl & Family Science; Master's Degree; University of Missouri
Hagglund, Kristofer; SHP/Health Psychology; Doctor of Philosophy; The University of Alabama at Birmingham
Hagedorn, John; Chemical Engineering; Doctor of Science; Kansas State University
Hannink, Mark; Biochemistry; Doctor of Philosophy; University of California, San Diego
Hans, Chetan Parkash; Medicine-Cardiology; Doctor of Philosophy; Panjab University, Chandigarh India
Hansen, Benjamin Jacob; Orthopaedic Surgery; Doctor of Medicine; University of Utah
Hansen, Kelli Bruce; ZZZ-Art History & Classical Ar; Master's Degree - 2nd entry; University of Texas at Austin
Hao, Hong; Medicine-Cardiology; Doctor of Philosophy; Queen's university, Canada
Harcharras, Asma; Mathematics; Doctor of Philosophy; Pierre-and-Marie-Curie University - Paris VI
Hardin, Christopher D; Nutrition & Exercise Phys-HES; Doctor of Philosophy; University of Cincinnati
Harding, Gareth; Part-Time Adjunct Faculty; Dean of Journalism
Hargis, Ardyth Dale; Part-Time Adjunct Faculty; Mizzou K-12 Online; Master of Education; University of Missouri
Harmata, Michael; Chemistry; Doctor of Philosophy; University of Illinois at Urbana-Champaign
Harms, Aaron A; Part-Time Adjunct Faculty; Learning Center; Master's Degree; University of Missouri
Harper Morris, Casandra Elena; Ed Leadership & Pol Analysis; Doctor of Philosophy; University of Missouri
Harre, Edward J; Mizzou Online; Master of Business Administration; University of Missouri
Harris, Catharine Jean; Child Health-Genetics; Doctor of Medicine; Medical College of Ohio
Harris, Gary Allen; Mizzou Online; Specialist of Education; University of Missouri
Harris, Keith Raymond; Fellow; Post Doctoral - Teach; Philosophy; Bachelor's Degree - 1st entry
Harris, Michael Curt; Health Mgmt & Informatics; Master of Science; University of Missouri
Harris, Robin Christine; School of Nursing; Doctor of Nursing Practice; Rush University
Harris, Trevor N; Part-Time Adjunct Faculty; Career Center; Master's Degree - 1st entry

Yoo, Ilhoi; Health Mgmt & Informatics; Doctor of Philosophy; Drexel University

Yoon, Dongpill; Social Work; Doctor of Philosophy; University of Illinois at Urbana-Champaign

Yore, Adam Shane; Finance; Doctor of Philosophy; Drexel University

Yoshida, Tadashi; Medicine-Cardiology; Doctor of Philosophy; The University of Tokyo

Yoshida, Yilin; Health Mgmt & Informatics; Doctor of Philosophy; LSU Health Sciences Center

You, Seung Kwon; Part-Time Adjunct Faculty; Vice Provost for International Programs; Doctor of Philosophy; University of Missouri

Young, Jason S; School of Natural Resources; Bachelor of Science; University of Missouri
Young, Matthias John; Chemical Engineering; Doctor of Philosophy

Young, Virginia A; Journalism; Master's Degree; University of Missouri

Young Walker, Laine M; Psychiatry; Doctor of Medicine; University of Missouri

Younger, Sarah Beth; Child Health; Doctor of Medicine; University of MO - Columbia

Youngquist, Robert Steven; Veterinary Medicine & Surgery; Doctor of Veterinary Medicine; Iowa State University

Younker, Thomas Dirk; Anesthesiology; Doctor of Medicine; Medical College of Georgia

Youse, M Elizabeth; School of Nursing; Bachelor's Degree - 1st entry; University of Missouri

Yu, Mansoo; Social Work; Doctor of Philosophy; Washington University

Yu, Ping; Physics; Doctor of Philosophy; Hong Kong University of Science & Technology

Yu, Qingsong; Mechanical & Aerospace Engr; Doctor of Philosophy; University of Missouri

Yun Fowler, Sue Jean; School of Nursing; Master's Degree - 1st entry; University Of Missouri-Columbia

Zachary, Iris; Health Mgmt & Informatics; Doctor of Philosophy; University of Missouri

Zaghouani, Habib; Molec Microbio & Immunology; Doctor of Philosophy; University of Paris

Zaheer, Asgar; Neurology; Doctor of Philosophy; Bombay University, India

Zambito, Peter I; School of Music; Doctor of Musical Arts; University of North Carolina at Greensboro

Zangori, Laura Ann; Learning Teaching & Curriculum; Doctor of Philosophy; University of Nebraska - Lincoln

Zanilett, Isabella; Statistics; Doctor of Philosophy; University of Missouri

Zapata, Maria Angelica; Learning Teaching & Curriculum; Doctor of Philosophy; The University of Texas at Austin

Zarek, Shvetha Murthy; Ob, Gyn & Women's Health; Doctor of Medicine; University of Virginia School of Medicine

Zeichik, Harmony Albrette; Mizzou K-12 Online; Bachelor's Degree - 1st entry; Columbia College

Zemke, John M; Romance Languages & Literature; Doctor of Philosophy; University of California, Davis

Zeng, Wenjun; Part-Time Adjunct Faculty; Electrical Eng & Computer Sci; Doctor of Philosophy; Princeton University

Zerrer, Jason D; Emergency Medicine; Doctor of Medicine

Zhang, Anqing; Health Mgmt & Informatics; Doctor of Philosophy; North Dakota State University

Zhang, Bing; Biological Science; Doctor of Philosophy; Cornell University

Zhang, Guoquan; Veterinary Pathobiology; Doctor of Philosophy; Gifu University

Zhang, Michael Z; Biomedical Sciences; Doctor of Philosophy; Kansas State University

Zhang, Qi; Mathematics; Doctor of Philosophy; Duke University

Zhang, Shuping; Veterinary Pathobiology; Doctor of Philosophy; Kansas State University

Zhang, Shuqun; Agriculture Biochemistry; Doctor of Philosophy; The University of Texas at Austin

Zhang, Suling; Part-Time Adjunct Faculty; VP for International Programs

Zhang, Yi; Biological Engineering; Doctor of Philosophy; Georgia Institute of Technology

Zhang, Yun; Physics; Doctor of Philosophy; University of California, San Diego

Zhang, Yuwen; Mechanical & Aerospace Engr; Doctor of Philosophy; University of Connecticut

Zhang, Zhanyuan; Plant Sciences; Doctor of Philosophy; University of Nebraska - Lincoln

Zhao, Li; Textile and Apparel Mgmt; Doctor of Philosophy; University of Missouri

Zhao, Shuoli; Fellow, Post Doctoral; Applied Soc Sci; Doctor of Philosophy; University of Minnesota

Zhao, Yunxin; Electrical Eng & Computer Sci; Doctor of Philosophy; University of Washington

Zhou, Jianfeng; Agric Systems Management; Doctor of Philosophy; Washington State University

Zhou, Shuhua; Journalism; Doctor of Philosophy; Indiana University

Zhuang, Xinhua; Emeritus; Electrical Eng & Computer Sci; Doctor of Philosophy; Peking University

Zitsch III, Robert P; Otolaryngology; Doctor of Medicine

Zohrabian, Armineh; Health Mgmt & Informatics; Doctor of Philosophy; Auburn University

Zou, Shaoming; Marketing; Doctor of Philosophy; Michigan State University

Zou, Xiaojin; Physics; Doctor of Philosophy; University of California, San Diego

Zulovich, Joseph M; Prof, Ast Extns; Ag Ext-Food Sci & Nutrition; Doctor of Philosophy; University of Nebraska - Lincoln

Zumwalt, Andrew Mark; Prof, Ast Extns; Human Environmental Sci Ext; Master of Science; University of Missouri

Zurowski, Susan Marie; Dermatology; Doctor of Medicine; Rush University

Zweig, Alexander Paul; Family & Community Medicine; Doctor of Medicine; University of Missouri

Zweig, Steven C; Family & Community Medicine; Doctor of Medicine; University of Missouri
Below are definitions of academic terms used throughout the University catalog. Additional terms used at MU can be found in the Mizzou Glossary. (http://glossary.missouri.edu)

**Academic Action:** Students who do not meet requirements for University academic standing requirements are subject to academic action, such as being placed on probation or being declared ineligible to enroll, which is often called dismissal. NOTE: Academic units may have more restrictive standards. (Also refer to Academic Standing and Satisfactory Progress for additional policy information.)

**Academic Plan:** A primary field of specialized study also referred to as a degree program or major.

**Academic Program:** The academic organization to which a student applies, is admitted, and ultimately graduates. These will, in most cases, correspond to schools and colleges.

**Academic Progress for Financial Aid:** Federal regulations require the University of Missouri to establish, publish, and apply standards of satisfactory academic progress (SAP) for financial aid eligibility. For detailed criteria, please visit Student Financial Aid's website (http://financialaid.missouri.edu/eligibility/satisfactory-academic-progress.php).

**Academic Standing:** For further information see, Academic Policies: Academic Standing (p. 771).

**Academic Sub-plan:** An emphasis area or concentration within a specific academic plan.

**Academic Unit:** Colleges and schools are approved to offer degree programs or oversee degree or non-degree programs approved by the state Coordinating Board of Higher Education. Because the organization of these units varies across the campus, these entities are referred to as academic units, or AUs for short.

**Applied Course:** A course that is focused on the personal practice of the subject matter. Applied courses are typically found in music, art, and courses preparing for certain vocations.

**Audit:** A method of taking a course in which a student receives no grade or credit. Sometimes referred to as Hearer. See Academic Policies: Auditing a Course (Hearer (p. 772)).

**Basic Skills Courses:** Basic skills courses are considered remedial or preparatory for college level course work that follows. Credit hours for basic skills courses do apply toward minimums required for financial aid and grades earned in these courses show on the transcript and are averaged into the cumulative grade point average. However, credit hours earned in basic skills courses do NOT apply to the minimum number of hours required for a degree.

**Capstone Experience:** An academic activity that integrates general knowledge with the specialized knowledge each student has developed in the major area and, when appropriate, the related field.

**Certificate:** A program of study that requires completion of a minimum of 12 credits. It can be part of a degree program, may be completed in addition to a degree program, or may stand-alone. Officially approved Certificates are listed on transcripts.

**Commencement:** A ceremony in which students are recognized for degree completion. In May and December, each MU school and college holds commencement ceremonies for graduates, during which students walk across the stage and are recognized individually. Ceremonies are not held for summer session graduates; however, these students are invited to participate in May or December commencements.

**Consent Required:** Courses that require the permission of the instructor, department or division. Also referred to as permission required.

**Corequisite:** A course or requirement that must be met prior to or concurrent with enrolling in a course. Exceptions may be made with permissions.

**Core Requirements:** The basic, required courses or standards that students must meet for a given major, degree, minor, emphasis or concentration.

**Course Components:** A portion or part, (i.e. subset) of a course.

- **Lecture/Standard (LST):** Faculty delivered instruction to multiple students often in, but not always, a classroom setting. A lecture or standard class is the primary portion of the course that is often delivered face to face, but does not have to be. It may be presented on-line or via other delivery methods. While it is usually presented in a small or large group setting led by a faculty member the course might also be very interactive and include group activities. It may be offered in a traditional lecture format, a seminar format, sections with group interaction, etc.

- **Discussion (DIS):** A small group that meets to discuss topics introduced in a related lecture to supplement the instruction and allow for discussion.

- **Lab (LAB):** A class or the “practice” portion of a course in which experimentation, class projects or other exercises or skills conjunction with material presented, are performed.

- **Individual Study (IST):** One-on-one instruction allowing for greater individualized learning and self direction. Individual study may be directed studies that are based upon an agreed upon topic between instructor and student. Titles may include but are not limited to research, problems and readings.

- **Lesson (LES):** Typically a musical or other performance art instruction delivered one-on-one or in a small group.

- **Studio (STU):** Hands-on, interactive, project-oriented instruction that is delivered one-on-one or in a small group. May apply to art, architectural studies, textile and apparel management, broadcast media, film creation, and communication instruction.

- **Exam-only (EXM):** Graduate student enrollment required to complete the final, comprehensive examination.

- **Internship/Externship (IXT):** Provides opportunity for students to gain experience in their field outside the classroom. Instruction is hands-on, experimental learning that may require additional research and written assignments. Titles may include, but are not limited to, preceptorships, clinical, practicums.

- **Field Study (FLD):** Off-campus, hands-on instruction directed by a faculty member with one or more students. Typically part of science and social science, as well as some humanities instruction.

**Credit by Exam:** Credit earned by passing advanced-standing examinations in a subject-matter field. Examinations can include: departmental exams, CLEP subject-matter exams and International Baccalaureate and Advance Placement exams given by the College
Entrance Examination Board of Princeton, N.J. See Academic Policies: Advanced Standing - Credit By Exam. (p. 771)

**Credit:** *The following applies to MU courses, regardless of mode of delivery.* One credit represents approximately three hours of a student’s time each week for one semester. This may mean one hour in lecture or standard classroom instruction, in addition to two hours spent in preparation. According to State of Missouri policy, a credit hour is a permanently transcribed instructional activity in which one semester credit hour shall consist of a minimum of 750 minutes (for example, 15 weeks x 50 minutes per week) of classroom experiences, such as lecture, discussion, or similar instructional approaches, or a minimum of 1,500 minutes of such experiences as laboratory, studio or equivalent experiences. Both of the above are exclusive of registration and final examination time. Greater amounts of supervised practicum or internship instruction are normally required to be the equivalent of one credit. (Also referred to as Units.)

**Cross-level Course:** A cross-level course is a course offered at both the undergraduate and the graduate level. Undergraduate students enroll in a course numbered in the 4000 range and graduate students enroll in a course numbered in the 7000 range. Lectures and discussions may be held jointly, but different graduate level work will be required of students in the 7000-level courses. (They are also referred to as combined sections.)

**Cross-listed Course:** A course that is considered the same as, and often may meet with a section of, another course with a different curricular abbreviation and possibly a different course number. (They are also referred to as combined sections.)

**Curriculum:** An organized program of study arranged to provide integrated cultural or professional education.

**Curriculum Designator (Subject Area):** A specific area of instruction within an academic organization. These are the subject matter headings that appear in the Course Catalog and the Schedule of Classes.

**Dean’s Signature:** The dean’s signature is the mark of approval for certain academic actions, such as approvals to withdraw at certain points in the term. Usually a “dean’s signature” refers to a stamped signature from the academic advising office within the academic unit. A dean’s signature may also be the signature of the dean or associate dean of the college or school. When instructions indicate that a student should obtain a dean’s signature for approval of a process, students should first inquire in the academic advising office for their degree program.

**Degree:** A formal award or title conferred upon an individual for the completion of a program or courses of study.

**Degree Audit Report:** MU uses a degree audit system called DARS for short, which tracks degree programs. Many academic units and departments use these reports to assist in advising students. Students may look at their own DARS reports using myZou.

**Degree Program:** A primary field of specialized study also referred to as a major or academic plan.

**Discipline:** A branch of learning or field of study (e.g., mathematics, history or psychology).

**Dual Degree (undergraduate):** A student may be granted two baccalaureate degrees if all requirements for both degrees have been met and the student has completed at least 12 semester hours of course work beyond that required for the first degree. See Faculty Handbook (http://facultycouncil.missouri.edu/handbook/article-9.html)

**Emphasis Area:** A sub-area of specialized study within a major that has been formally approved. Emphasis areas are printed on students’ transcripts.

**General Education (University):** The MU Faculty has developed a comprehensive program of University general education course work that equips students with the skills, knowledge and foundations in the disciplines required of all informed citizens. All MU students must satisfy University general education requirements as a part of their undergraduate degrees. See General Education Requirements. (p. 31)

**GPA of Record:** The GPA stands for grade point average. A GPA of record is the official GPA. See Academic Policies: Grades. (p. 782)

**Graded Course:** A course in which credit is awarded if successfully completed. A course in which a student has enrolled as a “Hearer/Auditor” is not regarded as a graded course for that student.

**Grading Basis:** The grading system used to assign a grade. See Academic Policies: Grades (p. 782).

**Graduation:** Graduation is the completion of all degree requirements, as recorded on the official transcript, and the conferring of a diploma.

**Honors Course-Departmental:** See Academics at MU: Course Numbering section (p. 800). Catalog number is not followed by an “H”.

**Honors Course-General:** A course limited to honors-eligible students. Course has been approved by Honors college for use towards Honors Certificate or University Honors. Catalog number is followed by an “H”.

**Honors Eligibility:** See Undergraduate/Graduate: Honors College (p. 738) for more information.

**Instructional Mode:** The dominant delivery method of instruction of the class content.

- **Traditional (TR):** No online technology used -- content is delivered in writing or orally. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- **Web Facilitated (WF):** Includes face-to-face instruction. Includes those courses in which zero to 29 percent of the content is delivered online. May have a video of the class that is used during the initial delivery and viewed later. Course attributes should indicate this.
- **Blended class instruction (BL):** Defined as having between 30 percent and 80 percent of the course content delivered online. It is sometimes called hybrid.
- **On-line (OL):** A course where most or all (80% or greater) of the content is delivered online. Typically these sections have no face-to-face meeting, but there may be some or face-to-face exams, etc.
- **E-Learning (EL):** A course where 100% of the content is delivered online. (May have proctored exams)

**Interdisciplinary:** A course of study that combines two or more academic disciplines.

**Location:** An indication of where a student is taking a course for billing and informational purposes.

**Lower Division:** Undergraduate courses numbered less than 3000.

**Major:** A primary field of specialized study also referred to as a degree program or academic plan.

**Minor:** A secondary field of specialized study that does not lead to a degree. A minor will be noted on the transcript by not on the diploma.
Mizzou Online: Mizzou Online partners with academic units to develop, market, and deliver programs and courses designed for distance students.

Mizzou Online-Self Paced: Students may enroll in self-paced, online courses year-round, (minimum six weeks, maximum six months) and complete coursework at their own pace. Students with 60 or more approved credit hours may complete a bachelor of general studies degree online.

Mizzou Online-Semester Based: Semester-based courses have specific start and end dates and follow the University semester calendar. Students participate with other students and instructors in the courses and have assignment due dates and deadlines. Enrollment periods are the same as campus sections.

myZou: MU's online student information system.

Option: A track or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Prerequisite: A course or requirement that must be met prior to enrolling in a course. Exceptions may be made with permissions.

Readmission: See Admissions Office (http://admissions.missouri.edu/apply/re-admission) for information on the readmission process and standards.

Recommended course: A course that is beneficial or preferred for the student to have taken before enrolling in a subsequent course. It is a strong suggestion, but not a requirement.

Registration: The act of enrolling in classes for a given semester or term. At the University of Missouri, registration refers to the process in which students select course work for a term and, reserve spaces (enroll) in the courses in the University’s computer system. This may be done through myZou.

Repeat for Credit: Courses that may be taken more than once for credit (e.g., music performance courses.)

Satisfactory Progress towards degree: The time progression in meeting the requirements of the student’s established educational objective, typically, the completion of a degree program. Satisfactory progress is based on two concepts:

- Minimum number of credits completed expressed as a percentage of total credits attempted
- Maximum time to complete the degree as expressed by a total number of credits attempted

The term may also refer to financial aid requirements. See Financial Aid (http://financialaid.missouri.edu).

Second Undergraduate Degree: Some academic units will admit students who have already earned one undergraduate degree to pursue a different degree program. Ordinarily students who enroll for a second degree are expected to meet requirements in place at the time of beginning work of the second degree instead of requirements in place at the beginning of work on the first degree.

Sequence of Courses: Two or three closely related courses that must be taken in specified order.

Session: A class scheduling/enrollment control time period within an academic term.

Student Center (myZou): The page in myZou where a student can view a synopsis of all their information. (i.e. schedule, service indicators, enrollment dates, financial information.)

Student Level: Students are assigned to a particular class level based upon the number of credits they have completed. (i.e. freshmen, sophomore, junior and senior.) See Academic Policies: Student Level (p. 795).

Track: An option or other portion of a major that may be required or optional. A separate designation is not made on the transcript or diploma for an option or track.

Upper Division: Undergraduate courses numbered 3000-4000.

Variable Credit (Units): For some courses, the student may choose the number of credits.

Waive: To waive a requirement is to set it aside without credit. In other words, if a requirement is waived for a student that student does not have to meet the requirement, but no credit hours are earned. For example, an international student pursuing a BA degree in the College or Arts and Science has the foreign language requirement waived but will not receive academic credit for his/her native language.

Writing Intensive Course: All writing intensive courses use writing as a tool for thinking and learning; all require revision as a way of improving critical thinking. WI courses can be identified on the Schedule of Classes in two ways: they will have a "W" after the catalog number and they will have an attribute of Writing Intensive Section attached to the course.

Writing Intensive Requirement: After completing ENGLISH 1000, select one Writing Intensive (WI) course from anywhere in the University curriculum to meet the WI requirement in general education. After that, select a WI course at a 3000- or 4000-level in your major area of study. In some cases, your department may ask you to take a 3000- or 4000-level WI course in another department but still in an area closely related to your major. To receive credit for taking a writing intensive course, students must earn a grade in the C-range or better.
