Total Credits 34-36

+ Needs a C- or above in ENGLSH 1000, MATH 1100, STAT 2500.
> Must have either a C- in MATH 1300 or MATH 1400.

Emphasis Areas

General Education Requirement 27
Upper Level Admissions Courses 34
Required Courses 26

Online - Major Core Requirements

The online BSBA program provides students flexible access to a highly competitive degree. Coursework provides students with the tools to be successful in careers in Banking and Finance, Business Management, Human Resources, Insurance or Marketing and Sales. Students must complete all university requirements (p. 35), including general education (p. 36), and Department Level Requirements (p. 38), in addition to the degree requirements below.

General Education (see University General Education Requirements) 27 hrs
Upper Level Admission Courses 34 hrs
Required Core Business Courses 26 hrs
Additional Business Courses 27 hrs
Second Writing Intensive Course in Business 3 hrs
Senior Capstone 3 hrs
Total 120 hrs

Online - Upper Level Admission Courses (completed outside of program) 21 hrs
ECONOM 1014 Principles of Microeconomics 3
ECONOM 1015 Principles of Macroeconomics 3
ENGLSH 1000 Exposition and Argumentation 3
MATH 1100 College Algebra 3
MATH 1300 Finite Mathematics 3
MATH 1400 Calculus for Social and Life Sciences I 3
STAT 2500 Introduction to Probability and Statistics 3

Online - Upper Level Admission Courses (completed within program) 13 hrs
ACCTCY 2026 Accounting I 3
or ACCTCY 2036 Accounting I 3
ACCTCY 2027 Accounting II 3
or ACCTCY 2037 Accounting II 3
ACCTCY 2258 Computer-Based Data Systems 3
BUS_AD 1500 Foundations of Business and Professional Development Principles 2
BUS_AD 2500 Intermediate Professional Development Principles 2

Online - Required Business Core Courses (completed outside of program) 6 hrs
ECONOM 3229 Money, Banking and Financial Markets 3
STAT 3500 Introduction to Probability and Statistics II 3

Online - Required Business Core Courses (completed within the program) 20 hrs
BUS_AD 3500 Advanced Professional Development Principles 3
BUS_AD 4500 Professional Development Program - Internship 3

MANGMT 3000 Principles of Management 3
MANGMT 3300 Introduction to Business Processes and Technologies 3
MANGMT 3540 Introduction to Business Law 3
MRKTNG 3000 Principles of Marketing 3

Online - Additional Business Courses (completed within the program) 27 hrs
Coursework must be numbered 3000 or above and include at least one course from 3 of the 5 knowledge areas (Accountancy, Economics, Finance, Management, or Marketing)

Second Writing Intensive Course
MANGMT 4140W Business Communication - Writing Intensive 3

Online - Capstone Course (completed within the program)
MANGMT 4970 Strategic Management 3
Total 120 hours
+ Needs a C- or higher
# Needs a C- or higher in MATH 1300 or MATH 1400

Semester Plan

On-Campus Semester Plan

Please refer to the degree program page (p. 387) for a list of emphasis areas. The semester plans are specific to the emphasis area for on-campus students.

Online Semester Plan

Below is a sample plan of study, semester by semester. This plan reflects coursework a student will complete within the BSBA online program. All degree requirements not listed in this plan are completed outside of the BSBA online program. A student's actual plan may vary based on course choices and where options are available. Work with your academic advisor on questions specific to your plan of study.

BSBA in Business Administration with Emphasis in Economics

Degree Program Description

Students pursuing a degree in Business Administration will gain exposure to multiple areas of business including Accounting, Economics, Finance and Banking, Management, and Marketing. By choosing to study business administration with an emphasis in Economics, students ready themselves for business careers from the broad perspective of economics, developing expertise in topics such as economic forecasting, analysis of interest rates and financial markets, labor economics and international economics. Students typically prepare for careers in a range of industrial, commercial, and financial organizations as well as government agencies and political institutions. Typical careers include business economist, financial analyst, risk manager, or economic research analyst.

Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

General Education Requirements 27
Upper Level Admission Courses 34
Required Core Courses 26
ECONOM 3229 Money, Banking and Financial Markets
FINANC 3000 Corporate Finance
MANGMT 3000 Principles of Management
MANGMT 3300 Introduction to Business Processes and Technologies
MANGMT 3540 Introduction to Business Law
MRKTNG 3000 Principles of Marketing
STAT 3500 or STAT 4510 Introduction to Probability and Statistics II or Applied Statistical Models I
BUS_AD 3500 Advanced Professional Development Principles
BUS_AD 4500 Professional Development Program - Internship

Required Economics Courses 6
ECONOM 4351 Intermediate Microeconomics
ECONOM 4353 Intermediate Macroeconomics

Additional Economic Courses
Courses selected from the following: 9-12

Total Credits: 120

### BSBA in Business Administration with Emphasis in Finance and Banking

**Degree Program Description**

Students pursuing a degree in Business Administration will gain exposure to multiple areas of business including Accounting, Economics, Finance and Banking, Management, and Marketing. An emphasis in Finance and Banking prepares students for careers in commercial banking, corporate finance, financial planning, insurance, investment banking, or money management. Students learn how to independently analyze security markets, understand the basic valuation techniques and use their knowledge to make investment decisions. In addition, students learn basic theoretical concepts in corporate finance and their application to corporate financing and investment decisions.

### Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

Degree Program Description

International Business is a joint degree program offered by the College of Arts and Science and the Trulaske College of Business. The program incorporates foreign language, geographic region and cultural environment courses with core and international business courses. Completion of this degree program requires 139-147 credits depending on emphasis.

Major Program Requirements

To complete this course of study, students must be accepted in both the Bachelor of Arts in International Studies program in the College of Arts and Science and the Bachelor of Science in Business Administration program in the Trulaske College of Business. Students must also complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

**Social Sciences**
- **GEOG 1100** Regions and Nations of the World I
- **GEOG 1200** Regions and Nations of the World II
- **POL_SC 1400** International Relations
- **POL_SC 2700** Comparative Political Systems

**State Requirement**
- **ANTHRO 2030** Cultural Anthropology

**Behavioral Sciences**
- **ARCHST 1600** Fundamentals of Environmental Design
- **ARTH_ 1110** Ancient and Medieval Art
- **ARTH_ 1120** Renaissance through Modern Art
- **ENGLISH 2155** Introduction to World Literatures
- **ENGLISH 2159** Introduction to World Literatures, 1890 to Present
- **FILMS_VS 2820** Trends in World Cinema
- **GN_HON 2112H** The Middle Ages and the Renaissance

**Additional Humanities**
- **ARCHST 1600** Fundamentals of Environmental Design
- **ARTH_ 1110** Ancient and Medieval Art
- **ARTH_ 1120** Renaissance through Modern Art
- **ENGLISH 2155** Introduction to World Literatures
- **ENGLISH 2159** Introduction to World Literatures, 1890 to Present
- **FILMS_VS 2820** Trends in World Cinema
- **GN_HON 2112H** The Middle Ages and the Renaissance

**Biological & Physical Sciences**

**Foreign Language**
- One course must include a lab
- All in the same language

**Area Support**
- To be selected with the A&S advisor. Coursework typically includes classes in Culture, Geography, Government, or History related to language studied.

**Upper Level Admission Courses**
- **ECONOM 3229** Money, Banking and Financial Markets
- **ECONOM 3251** Managerial Economics
- **FINANC 3000** Corporate Finance
- **MANGMT 3000** Principles of Management
- **MANGMT 3300** Introduction to Business Processes and Technologies
- **MANGMT 3540** Introduction to Business Law
- **MRKTNG 3000** Principles of Marketing
- **STAT 3500** Introduction to Probability and Statistics II
- **STAT 4510** Applied Statistical Models I
- **BUS_AD 3500** Advanced Professional Development Principles
- **BUS_AD 4500** Professional Development Program - Internship

**College of Business WI Course**
- **MANGMT 4970** Strategic Management (minimum C-GPA requirement)

**Total Credits**
- **139-148**

### BSBA in Business Administration with Emphasis in Management

#### Degree Program Description

Students pursuing a degree in Business Administration will gain exposure to multiple areas of business including Accounting, Economics, Finance and Banking, Management, and Marketing. By selecting an emphasis in management, students will take courses focusing on supply chain management, human resource management, and entrepreneurship.

Students will learn knowledge and skills needed to manage value-adding processes and projects; to coordinate and lead human resources to accomplish organizational goals; and the mindset and skills to become an entrepreneur and to innovate within an organization. Students with a management emphasis accept positions as consultants, project managers, supply chain analysts, human resource managers, and in management rotational career positions.

### Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

#### General Education Requirements 27

#### Upper Level Admission Courses 34

#### Required Core Courses 26

BSBA in Business Administration with Emphasis in Marketing

Degree Program Description

Students pursuing a degree in Business Administration will gain exposure to multiple areas of business including Accounting, Economics, Finance and Banking, Management, and Marketing. An emphasis in Marketing focuses on acquiring and managing customers by studying business activities that connect consumers with goods and services. The degree deals with the strategies, tactics and business processes involved in researching markets, deciding which markets and segments to pursue, identifying what unique value to provide and then assembling the products, services, people and partner firms needed to build, communicate and deliver that value. The marketing major is an exciting option for those students seeking an in-depth knowledge of the tools, concepts and practice of modern marketing. This program prepares students for a career in marketing, sales, and marketing analytics. Students are able to earn an in-degree certificate in Sales and Customer Development and in Marketing Analytics (newly launched in fall 2020). Courses in this area span the domains of marketing management, marketing analytics, sales, marketing communications, digital marketing, sales promotion, retail, services, brand management, and global marketing.

Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

| General Education Requirements | 27 |
| Upper Level Admission Courses | 34 |
| Required Core Courses | 26 |
| ECONOM 3229 Money, Banking and Financial Markets |
| or ECONOM 3251 Managerial Economics |
| FINANC 3000 Corporate Finance |
| MANGMT 3000 Principles of Management |
| MANGMT 3300 Introduction to Business Processes and Technologies |
| MANGMT 3540 Introduction to Business Law |
| MRKTNG 3000 Principles of Marketing |
| STAT 3500 Introduction to Probability and Statistics I |
| or STAT 4510 Applied Statistical Models I |
| BUS_AD 3500 Advanced Professional Development Principles |
| BUS_AD 4500 Professional Development Program - Internship |
| Required Marketing Courses | 6 |
| MRKTNG 4000 Marketing Management |
| MRKTNG 4050 Marketing Research |
| Additional Marketing Courses | 12 |
| Select from the following: |
| MRKTNG 3410 Personal Selling |
| MRKTNG 3510 Procurement Processes and Analytics |
| MRKTNG 3901 Special Topics in Marketing * |
| MRKTNG 3975 Current Issues in International Marketing * |
| MRKTNG 4185 Problems in Marketing * |
| MRKTNG 4220 Consumer Behavior |
| MRKTNG 4250 Retail Marketing |
| MRKTNG 4420 Sales Management |
| MRKTNG 4430 Advanced Professional Selling |
| MRKTNG 4440 Services Marketing |
| MRKTNG 4510 Artificial Intelligence and Machine Learning Applications in Sales and Marketing |
| MRKTNG 4550 Integrated Marketing Communications |
| MRKTNG 4650 e-Marketing |
| MRKTNG 4720 Global Marketing |
| MRKTNG 4880 Contemporary Issues in Marketing |
| MRKTNG 4890 Marketing Supply Chain Analytics |
| MRKTNG 4900 Analyzing and Communicating Business Data |
| MRKTNG 4910 Marketing Data Analytics |
| MRKTNG 4920 Data Visualization |
| MRKTNG 4930 Databases for Marketing Decisions |
| MRKTNG 4950 Data-Based Decision-Making in Marketing |

Emphasis Support Courses 12
Courses to be selected from: **
- Accountancy: Any 3000 or 4000 level class
- Economics: Any 3000 or 4000 level class
- Finance: Any 3000 or 4000 level class
- Management: Any 3000 or 4000 level class
- Marketing: Any 3000 or 4000 level class (if not used in required core courses)
- Other 3000+ level courses taken in fulfillment of requirements for an official certificate, minor or dual major
- Capstone course - senior year (on campus) Minimum grade of C required
- MANGMT 4970 Strategic Management

Total Credits 120
* Only one may be used to fulfill additional marketing course requirement.
** NOTE: Only courses not used to fulfill other Marketing or Trulaske College of Business requirements (except some WI) qualify as emphasis support electives. Check the Undergraduate Course Catalog for prerequisites.
*** Note: A maximum of 6 credits from MRKTNG 3901, MRKTNG 3975, and MRKTNG 4185, can be counted towards emphasis support courses.

BSBA in Business Administration with Emphasis in Real Estate

Degree Program Description

Students pursuing a degree in Business Administration will gain exposure to multiple areas of business including Accounting, Economics, Finance and Banking, Management, and Marketing. Students who pursue an emphasis in Finance and Banking can add on an emphasis in Real Estate. Real estate is an ideal field for those with an entrepreneurial spirit who seek career options around the globe. The Real Estate emphasis is for students contemplating a career in real estate investment, property management, mortgage banking, or associated field. Related careers include real estate investment analyst, property manager, mortgage banking officer, REIT (real estate investment fund) manager, and real estate valuation specialist.

Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), and the degree requirements below.

| General Education Requirements | 27 |
| Upper Level Admissions Courses | 34 |
| Required Core Courses | 26 |

MBA in Business Administration

Degree Requirements

Crosby MBA

Required course work in Quantitative Analysis, Finance, Management, Marketing, and Professional Development provides a comprehensive business education for Crosby MBA students. Our curriculum assures that graduates enter the 21st century business world with tools that will enable them to be successful.

The program consists of 36 required credits, including foundation and advanced coursework, plus 21 elective credits. The delivery format includes 1.5 credit hour (8-week modules) to allow for focused attention to a particular topic, as well as 3 credit (16 week) courses. The structure of the Crosby MBA allows students to concentrate in a specific area of business, develop a broad managerial focus, or complement business training with coursework from other areas on campus. Total graduate course work necessary to qualify for the Crosby MBA degree is 57 credit hours; however, students who meet the criteria for waiving certain beginning level courses may substitute those courses with electives. For graduation, MBA students must earn a cumulative grade point average of 3.0 or better.

**REQUIRED COURSES**

- ACCTCY 7310 Accounting for Managers 3
- BUS_AD 7050 MBA Communications Practice 3
- BUS_AD 7340 Business Ethics and Leadership 1.5
- BUS_AD 8010 MBA Seminar 1.5
- BUS_AD 8030 MBA Seminar 1.5
- BUS_AD 8500 Business Problem Analysis: Field Project 3
- FINANC 7210 Microeconomics for Business 1.5
- FINANC 7440 Managerial Finance 3
- FINANC 8350 Financial Statement Analysis I 1.5
- MANGMT 7380 Organizational Behavior and Management: The Individual 1.5
- MANGMT 7390 Organizational Behavior and Management: Dyadic, Group and Organizational Processes 1.5
- MANGMT 7410 Management Information Systems 1.5
- MANGMT 7420 Managerial Statistics 1.5
- MANGMT 7430 Operations Strategy 1.5
- MANGMT 7470 Data Analysis for Managers 1.5
- MANGMT 7480 Managerial Analytics 1.5
- MANGMT 7970 Introduction to Strategic Management 1.5
- MANGMT 8970 Strategy and Global Competitiveness 1.5
- MANGMT 8510 Project Management 1.5
- MANGMT 8550 Launching a High-Growth Venture 1.5

**ELECTIVES (offerings vary semester by semester)**

- **Accounting Electives**
  - ACCTCY 8453 Taxes and Business Strategies 3
  - BUS_AD 8001 Topics in Business Administration 1-99
  - BUS_AD 8600 Business Consulting 3
  - BUS_AD 8730 International Study Abroad 1-6

- **Business Administration Electives**
  - FINANC 7020 Investments 3
  - FINANC 7201 Special Topics in Finance 1-3
  - FINANC 7820 Investment Fund Management 1-3
  - FINANC 8352 Financial Statement Analysis II 1.5-3
  - FINANC 8360 Equity Securities Analysis 1-3
  - FINANC 8510 Management of Financial Institutions 1-3

execMBA

Total graduate course work necessary to qualify for the execMBA degree is 48 credit hours. For graduation, execMBA students must earn a cumulative grade point average of 3.0 or better.

The program curriculum, designed with executives in mind, is inventive, practical and market-facing. Students will build skills that increase self- and global-awareness, develop strategic risk-taking, and heighten influence. Delivery is a blend of approximately 75% online and 25% in-class coursework. Students will amplify global expertise and value in the marketplace with an 8- to 10-day international residency. This lock-step, cohort program – meaning students will take the same classes together in the same order – is conducive to personal interactions with the other high-level professionals.

Required Courses

| ACCTCY 7310 | Accounting for Managers | 3  |
| BUS_AD 8001 | Topics in Business Administration | 6  |

PhD in Business Administration

The PhD program in Business Administration is designed to prepare graduates for careers as effective university researchers and teachers, or for senior research positions in business or government. A primary objective of the program is to train PhD candidates to become proficient researchers. Therefore, course work involves research activities such as literature review and critique, theoretical modeling, research design, computer-assisted empirical analysis and preparation of proposals and research papers. Another objective is to train students to become high-quality teachers. PhD candidates are provided the opportunity to teach undergraduate courses in their specialty area. In addition, students are expected to participate in national and regional academic conferences and are encouraged to work with faculty in developing individual research and teaching skills. The PhD in Business Administration offers three concentration areas: Finance (https://business.missouri.edu/programs-and-admissions/phd/academics/business-administration/phd-concentration-finance/), Management (https://business.missouri.edu/programs-and-admissions/phd/academics/business-administration/phd-concentration-management/) and Marketing (https://business.missouri.edu/programs-admissions/phd/phd-marketing/). (Concentrations will not appear on diplomas or transcripts.) See the page for the emphasis in Business Administration (p. 405) for details on the three concentration areas.

Degree Requirements

Below are the degree requirements for all PhD students in Business Administration, regardless of the concentration chosen.

General Business Courses

Before enrolling in concentration area courses, all students must take or have waived the following courses (students with an MBA typically have these requirements waived):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Concentration Area of Finance, Management or Marketing

Minimum of 15 hours of 8000/9000 level courses.

Support Areas

Supporting areas offer students considerable latitude in identifying a course of study that can be tailored to the individual's interests and goals.

Two support areas of at least 9 credit hours each, one of which must be taken outside the College of Business

OR

One support area of at least 12 credit hours

Research Methods and Analysis Sequence

Includes appropriate courses in economics, mathematics, psychology, sociology, statistics or other areas deemed appropriate by the program committee.

- If 2 support areas chosen, student must satisfy 12 hours analytical tool requirement.
- If 1 support area chosen, student must satisfy 18 hours analytical tool requirement.

Seminar

Ongoing seminar experience each semester until successful completion of comprehensive exams, to acquaint student with current literature and research in the major area of interest. This is in addition to other seminars offered departmentally. Minimum of 4 credit hours.

Dissertation

Minimum 12 hours of credit in 9090.

These requirements are independent of one another; courses taken to satisfy one requirement may not be used to satisfy any other requirement. Previous graduate work taken before admission to the PhD program may be used to satisfy these requirements if it is deemed appropriate by the student’s program committee.

Qualifying Process

Program Committee

During the first semester of course work, the PhD Coordinator, a member of the doctoral faculty from the major area of study (finance, management or marketing), serves as the student’s faculty advisor.

By the end of the first year of course work, a student should make formal application for the doctoral degree and, after consultation with faculty, request appointment of a Doctoral Program Committee. This committee consists of at least three members from the student’s major area of study and at least one member from a supporting area of study.

The Doctoral Program Committee conducts the qualifying examination and works with the student to design a plan of study.

Residency Requirement

In compliance with University regulations, the doctor of philosophy degree requires the completion of 72 semester hours of graduate work beyond the baccalaureate degree. Within the credit-hour requirement is the residency requirement. To satisfy the residency requirement, a student must complete at least two 9-hour semesters or three 6-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be MU courses approved for graduate credit and approved by the student’s doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirement. This program is designed for full-time students and requires a minimum 4-year on-campus commitment.

Qualifying Examination and First-Year Project

Every marketing doctoral student is required to pass the qualifying exam consisting of two major components. The first component is a comprehensive evaluation of overall performance in coursework and RA assignments and participation in formal and informal doctoral program elements. The second component is a first-year project addressing a scholarly research topic in marketing consisting of three major parts: a written outline, presentation, and paper suitable for submission to
a conference or journal. The goal of this project is to promote early research engagement, interaction with faculty, and the development of communication and presentation skills that will enhance the overall experience of the student throughout the doctoral program.

**Finance** students take the comprehensive exam following the completion of their doctoral course work requirements. The exam consists of written and oral sections and is typically scheduled at the beginning of the fall semester in the third year of study.

**Management** doctoral students are required to pass a qualifying exam composed of two parts: 1) major written sections of a faculty-led research paper and 2) an oral presentation of the entire research project.

First year students are expected to write first drafts of one or more major sections of the paper and to present the entire project before the end of the Spring semester of their first year. During this presentation, students are expected to demonstrate excellence in their specific contributions and to demonstrate they understand all aspects of the research project.

### Comprehensive Examination Process

Typically, after completion of the course work specified on the plan of study, the student’s doctoral program committee determines the student’s readiness to undertake the comprehensive examination. The student must be enrolled at MU the semester s/he takes this examination. The comprehensive examination process differs by department, but consists of written and oral sections. Both sections must be completed within one month of each other, and at least seven months before a final dissertation defense. Successful completion of the comprehensive examination requires that the student’s doctoral program committee vote to pass the student on the entire examination, both written and oral sections, with no more than one dissenting or abstaining vote. The student who fails this exam may not take a second comprehensive examination for at least 12 weeks. Failure to pass two successive comprehensive examinations automatically prevents candidacy.

### Dissertation Requirements

A dissertation is required to complete the doctoral program. Each student, working under the supervision of the doctoral program committee chair, must propose an original scholarly research project. The dissertation proposal is normally defended at the end of the third year of the program in an oral presentation. The proposal must be approved formally by the student's program committee. Following completion of the research, the written dissertation must be orally defended and approved by the student's program committee.

**Admissions**

**PhD in Business Administration with Emphasis in Business**

The PhD program is designed to prepare graduates for careers as effective university researchers and teachers or for senior research positions in business or government. A primary objective of the program is to train PhD candidates to become proficient researchers. Therefore, course work involves research activities such as literature review and critique, theoretical modeling, research design, computer-assisted empirical analysis and preparation of proposals and research papers. Another objective is to train students to become high-quality teachers. PhD candidates are provided the opportunity to teach undergraduate courses in their specialty area. In addition, students are expected to participate in national and regional academic conferences and are encouraged to work with faculty in developing individual research and teaching skills. The PhD in Business Administration offers three concentration areas: Finance, Management (Concentrations will not appear on diplomas or transcripts.)

### Concentration in Finance

The PhD program with a concentration in Finance emphasizes university-level research and teaching skills. The program of study is flexible to meet individual needs and interests, but all students take advanced classes in Finance, Economics, and Statistics. Students are only admitted on a full-time basis and normally work as research or teaching assistants. Students must complete an on-campus interview before any decision can be made regarding their ultimate admission. The GMAT is strongly preferred with the GRE only considered in special circumstances.

### Concentration in Management

PhD students with a concentration in Management emphasize university-level research and teaching skills. The program of study is flexible to allow students to focus on their personal interests. The program includes a business core of at least 15 hours, at least 15 hours of doctoral seminars in management, one 12-hour or two 9-hour support areas, and a minimum of 12 hours in research methods and statistics (18 hours with one 12-hour support area). Students typically work as research or teaching assistants. The PhD program in management is designed to provide students with a sound foundation for a productive career as an academic at a research-oriented university.

### Concentration in Marketing

Students with an interest in behavioral, strategic, or methodological issues marketing are a great fit for this program. It emphasizes the development of research and teaching skills needed to pursue career placement at a research-oriented university. The program is flexible to meet individual needs and interests and graduates annually well-situated professionals prepared for the market. In addition, the program offers small class sizes, a set of doctoral specific seminars, and a collaborative environment. Students develop research skills by working with faculty on research projects and from faculty mentoring. Students also gain valuable experience by teaching undergraduate courses.

**Degree Requirements - all concentrations**

Below are the degree requirements for all PhD students in Business Administration, regardless of the concentration chosen.
General Business Courses
Before enrolling in concentration area courses, all students must take or have waived the following courses (students with an MBA typically have these requirements waived):

Ongoing seminar experience each semester until successful completion of comprehensive exams, to acquaint students with current literature and research in the major area of interest. This is in addition to other seminars offered departmentally. Minimum of 4 credit hours.

Dissertation
Minimum 12 credit hours in 9090.

These requirements are independent of one another; courses taken to satisfy one requirement may not be used to satisfy any other requirement. Previous graduate work taken before admission to the PhD program may be used to satisfy these requirements if it is deemed appropriate by the student's program committee.

Degree Requirements - Finance Concentration

Prerequisites typically needed for Finance program of study:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
</tbody>
</table>

Support Areas
Students must complete either two 9-hour Support Areas or one 12-hour Support Area to complement advanced training in Finance. Successful completion may require a written examination. At least one Support Area must come from outside the College of Business.

- Most students choose Support Areas in Microeconomics and Statistics resembling the following examples.
  
  **Example support area in Microeconomics:**
  - ECONOM 7370 Quantitative Economics
  - ECONOM 8451 Microeconomic Theory
  - ECONOM 9452 Advanced Microeconomic Theory II

  **Example support area in Statistics:**
  - STAT 7510 Applied Statistical Models I
  - STAT 7750 Introduction to Probability Theory
  - STAT 7760 Statistical Inference

Collateral Area
Students must complete a Collateral Area (12 hours if completing two 9-hour Support Areas, or 18 hours if completing one 12-hour Support Area) selected in cooperation with a student's program committee. Coursework applied to a Support Area cannot be applied to a Collateral Area.

The purpose of the Collateral Area for Finance students is to provide them with the necessary quantitative skills to undertake original empirical research.

- Recommended is a Collateral Area in Accounting, Econometrics, Economics, Mathematics, Statistics, or Corporate Law. Some representative examples are shown below.
  
  **Example collateral area in Econometrics:**
  - ECONOM 8472 Econometric Methods I
  - ECONOM 9473 Econometric Theory II
  - ECONOM 9476 Advanced Topics in Econometrics II

  **Example collateral area in Economics:**
  - ECONOM 8451 Microeconomic Theory
  - ECONOM 9452 Advanced Microeconomic Theory II

  **Example collateral area in Corporate Law:**
  - LAW 5385 Bankruptcy
  - LAW 5395 Business Organizations
  - LAW 5470 Criminal Clinic

  **Example collateral area in Statistics:**
  - STAT 7210 Applied Nonparametric Methods
  - STAT 7750 Introduction to Probability Theory
Degree Requirements - Management Concentration

Seminars

Students are required to take four core seminars, and 3 credits of additional seminars that will be offered to match the needs and interests of current students.

Four core seminars:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MANGMT 9030</td>
<td>Seminar in Macro Organizational Behavior</td>
<td>3</td>
</tr>
<tr>
<td>MANGMT 9040</td>
<td>Seminar in Human Resource Management</td>
<td>3</td>
</tr>
<tr>
<td>MANGMT 9060</td>
<td>Seminar in Corporate Strategy</td>
<td>3</td>
</tr>
<tr>
<td>MANGMT 9080</td>
<td>Seminar in Entrepreneurship</td>
<td>3</td>
</tr>
</tbody>
</table>

While pursuing required course work, all students participate in MANGMT 9101 Topics Seminar in Management (1 hour per semester), which is taken on a Pass/Fail basis.

Support Areas

Students must complete either two 9-hour or one 12-hour Support Areas, tailored to the research and teaching goals of the student. Programs are highly individualized to reflect student interests and desired focus, and subject to approval by the student’s program committee.

Typical Support Areas include psychology, economics, research methods and statistics, career development, sociology, marketing, and communication. Below are examples of Support Areas.

Example support area in Psychology:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 8610</td>
<td>Motivation</td>
</tr>
<tr>
<td>PSYCH 8620</td>
<td>Personality Psychology</td>
</tr>
<tr>
<td>ESC_PS 7200</td>
<td>Positive Psychology</td>
</tr>
<tr>
<td>PSYCH 9350</td>
<td>Studies in Social Psychology</td>
</tr>
</tbody>
</table>

Example support area in Economics:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAE 8050</td>
<td>Economics of Institutions and Organizations</td>
</tr>
<tr>
<td>AAE 9001</td>
<td>Advanced Topics in Economics II</td>

<td>1</td>
</tr>
<tr>
<td>MRKTNG 9090</td>
<td>Research in Marketing (Dissertation - minimum of 12 hours with at least 2 hours each fall and spring and 1 hour each summer semester)</td>
<td>12</td>
</tr>
</tbody>
</table>

Support Areas

Students must complete either two 9-hour Support Areas or one 12-hour Support Area, to provide depth in theory and research appropriate for the particular research interests of the student.

Typical Support Areas are social psychology, organizational behavior, economics, and statistics, but other areas may be appropriate. See examples below.

Example support area in Psychology/Social Psychology:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYCH 8610</td>
<td>Motivation</td>
</tr>
<tr>
<td>PSYCH 9310</td>
<td>Theories of Social Psychology</td>
</tr>
<tr>
<td>PSYCH 9360</td>
<td>Seminar in Social Psychology</td>
</tr>
</tbody>
</table>

Example support area in Organizational Behavior:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MANGMT 9087</td>
<td>Seminar in Management (Human Resource Management)</td>
</tr>
<tr>
<td>MANGMT 9087</td>
<td>Seminar in Management (Organizational Behavior I)</td>
</tr>
<tr>
<td>MANGMT 9087</td>
<td>Seminar in Management (Organizational Behavior II)</td>
</tr>
<tr>
<td>MANGMT 9087</td>
<td>Seminar in Management (Strategic Management I)</td>
</tr>
</tbody>
</table>

Total Credits: 49
All Concentrations

Qualifying Process

Program Committee

During the first semester of course work, the PhD Coordinator, a member of the doctoral faculty from the major area of study (finance, management or marketing), serves as the student’s faculty advisor.

By the end of the first year of course work, a student should make formal application for the doctoral degree and, after consultation with faculty, request appointment of a Doctoral Program Committee. This committee consists of at least three members from the student’s major area of study and at least one member from a supporting area of study.

The Doctoral Program Committee conducts the qualifying examination and works with the student to design a plan of study.

Residency Requirement

In compliance with University regulations, the doctor of philosophy degree requires the completion of 72 semester hours of graduate work beyond the baccalaureate degree. Within the credit-hour requirement is the residency requirement. To satisfy the residency requirement, a student must complete at least two 9-hour semesters or three 6-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be MU courses approved for graduate credit and approved by the student’s doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirement. This program is designed for full-time students and requires a minimum 4-year on-campus commitment.

Qualifying Examination and First-Year Project

Every marketing doctoral student is required to pass the qualifying exam consisting of two major components. The first component is a comprehensive evaluation of overall performance in coursework and RA assignments and participation in formal and informal doctoral program elements. The second component is a first-year project addressing a scholarly research topic in marketing consisting of three major parts: a written outline, presentation, and paper suitable for submission to a conference or journal. The goal of this project is to promote early research engagement, interaction with faculty, and the development of communication and presentation skills that will enhance the overall experience of the student throughout the doctoral program.

Finance students take the comprehensive exam following the completion of their doctoral course work requirements. The exam consists of written and oral sections and is typically scheduled at the beginning of the fall semester in the third year of study.

Management doctoral students are required to pass a qualifying exam composed of two parts: 1) major written sections of a faculty-led research paper and 2) an oral presentation of the entire research project.

First year students are expected to write first drafts of one or more major sections of the paper and to present the entire project before the end of the Spring semester of their first year. During this presentation, students are expected to demonstrate excellence in their specific contributions and to demonstrate they understand all aspects of the research project.

Comprehensive Examination Process

Typically, after completion of the course work specified on the plan of study, the student’s doctoral program committee determines the student’s readiness to undertake the comprehensive examination. The student must be enrolled at MU the semester s/he takes this examination.

The comprehensive examination process differs by department, but consists of written and oral sections. Both sections must be completed within one month of each other, and at least seven months before a final dissertation defense. Successful completion of the comprehensive examination requires that the student’s doctoral program committee vote to pass the student on the entire examination, both written and oral sections, with no more than one dissenting or abstaining vote. The student who fails this exam may not take a second comprehensive examination for at least 12 weeks. Failure to pass two successive comprehensive examinations automatically prevents candidacy.

Dissertation Requirements

A dissertation is required to complete the doctoral program. Each student, working under the supervision of the doctoral program committee chair, must propose an original scholarly research project. The dissertation proposal is normally defended at the end of the third year of the program in an oral presentation. The proposal must be approved formally by the student’s program committee. Following completion of the research, the written dissertation must be orally defended and approved by the student’s program committee.

Admissions

BusinessPhD@Missouri.edu
407 Cornell Hall
Columbia, MO 65211
573-882-0181
http://business.missouri.edu/programs-and-admissions/phd/ (http://business.missouri.edu/programs-and-admissions/phd/)

Finance

Through the study of finance, students learn to independently analyze security markets, understand basic valuation techniques and use their knowledge to make financial decisions. In addition, students learn basic theoretical concepts in corporate finance and their application to corporate financing and investment decisions. Coursework focuses on investments, portfolio management, real estate, financial institutions, corporate finance, and risk management/insurance.

Faculty

Professor J. Howe**, K. Pukthuanthong**
Associate Professor M. O’Doherty**
Assistant Professor F. Bereskin*, M. Binfare, K. Holland*, S. Jannati*, J. Shen*, M. Young, A. Yore*, J. Wang
Associate Teaching Professor M. Griswold, D. Johnson, J. Stansfield*
Assistant Teaching Professor M. Dorigan, D. Fischer, J. Hegger, K. Kim

*Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.

**Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.
Undergraduate

While the Trulaske College of Business does not offer an undergraduate degree in Finance, we do offer the BSBA (Bachelor of Science in Business Administration) (p. 387) or BSAcc (Bachelor of Science in Accountancy) (p. 380).

Graduate

• MS in Finance (p. 410)

The emphasis areas are currently unavailable, however the MS in Finance degree (p. 410) and Graduate Certificate in Investments (p. 414) are available.

MS in Finance

Mizzou’s online MS Finance is the degree for individuals who want to advance their knowledge of finance in our global business environment and enhance their analytical and financial decision skills. The design of the program fits career objectives of:

• Working finance professionals who seek to enhance their career opportunities by gaining additional financial skills and knowledge.
• Recent degree recipients looking to strengthen their career prospects by furthering their financial training.
• University of Missouri undergraduate senior-level students wanting to jump-start their career by continuing their financial education.

Degree Requirements

Delivery of this program is 100% online. You may choose to complete an optional one-week international experience. Successful completion of the master’s degree requires a combination of required coursework and elective credits. You must complete four prerequisite courses or equivalents before enrolling in finance master’s degree courses. Online courses are offered as 16-week/3 credit hour classes or 8-week paired class modules at 1.5 credit hours each.

NOTE: Certain required courses may be waived depending upon candidate experience, credentials or undergraduate degree.

Elective Courses

Any online 7000 or 8000 level course in FINANC

Graduate

• MS in Finance (p. 410)

The emphasis areas are currently unavailable, however the MS in Finance degree (p. 410) and Graduate Certificate in Investments (p. 414) are available.

MS in Finance with Emphasis in Financial Management

Degree Requirements

• 30 credit hours – finish in 1 year (full-time) or 2 years (part-time)
• Fully online or a combination of online and on-campus classes
• One-week study-abroad experience with costs covered by the program
• CFA Institute Affiliated University
• The Trulaske College of Business is accredited by AACSB

Approved electives in Finance (9)

Approved electives in Finance or any of the interdepartmental approved courses: Accountancy, Agricultural Economics, Architectural Studies, Economics, Management, Marketing, Personal Financial Planning, or Law.

MS in Finance with Emphasis in Investments

Degree Requirements

• 30 credit hours – finish in 1 year (full-time) or 2 years (part-time)
• Fully online or a combination of online and on-campus classes
• One-week study-abroad experience with costs covered by the program
Additional Minors and Certificates - Business

Undergraduate Certificates
- Certificate in Human Resource Management (p. 411)
- Certificate in Marketing Analytics (http://catalog.missouri.edu/undergraduategraduate/collegeofbusiness/additionalminorsandcertificates/cert-marketing-analytics/)
- Certificate in Risk Management and Insurance (p. 412)
- Certificate in Sales and Customer Development (p. 412)

Business offers an interdisciplinary Undergraduate Certificate in Global Supply Chain Management (p. 807) with Engineering.

Undergraduate Minors
- Minor in Entrepreneurship and Innovation Management (p. 412)

Graduate Certificates
- Certificate in Assurance (p. 413)
- Certificate in Investments (p. 414)
- Certificate in Marketing Analytics (p. 414)
- Certificate in Taxation (p. 415)

Business offers the following interdisciplinary certificate programs in collaboration with other departments across campus: Graduate Certificate in Center for the Digital Globe (p. 807), Graduate Certificate in Global Supply Chain Management (p. 810) and Graduate Certificate in Life Science Innovation and Entrepreneurship (p. 811).

Certificate in Human Resource Management

Human capital can be a source of sustainable competitive advantage for organizations. Human Resource Management (HRM) is a specialized management track for those interested in helping employees meet professional goals and organizations optimize employee talent in order to directly enhance business results.

Requirements

Required Courses 9
- MANGMT 4020 Human Resource Management
- MANGMT 4030 Organizational Behavior
- BUS_AD 4500 Professional Development Program - Internship
  or MANGMT 4940 Professional Management Internship

Elective Courses (choose any 6 hours below) 6
- MANGMT 3700 Diversity and Inclusion in Management
- MANGMT 3920 Managing People in the Global Enterprise
- MANGMT 4120 Human Resource Management Law
- MANGMT 4130 Advanced Organizational Behavior
- MANGMT 4220 Compensation Theory and Practice
- MANGMT 4320 Selected Problems in Human Resource Management
- MANGMT 4350 Leadership Development
- MANGMT 4420 Collective Bargaining
MANGMT 4520  Change Management in Business

Required GPA: 3.0 or higher for these 15 credit hours

Note: for the purposes of this Certificate, a student can transfer in credit from another institution only for MANGMT 3000. Management 3000 is a prerequisite for all other Management courses.

Total hours: 15

Certificate in Risk Management and Insurance

The Certificate in Risk Management and Insurance is a specialized track for students interested in career opportunities in this field. The coursework allows students to develop skills for identifying, assessing and managing risks faced by individuals, businesses and organizations. These risk management strategies require an understanding of the sources, dimensions and qualities of risk, as well as the development and implementation of efficient techniques to mitigate, control or avoid risks.

Requirements

Students must have a 3.0 overall GPA.

Certificate Requirements and Curriculum

Certificate in Sales and Customer Development

Through the required coursework and internship of the certificate, students acquire vital skills and knowledge of current best practices in the sales profession and sales management. Students who finish the 13-15 credit-hour curriculum earn the Certificate in Sales and Customer Development upon completion of their bachelor's degree, offering employers tangible evidence of a strong background in sales.

Requirements

Required Courses (a minimum 3.2 cumulative GPA is required for these three courses)

<table>

</tr>
</tbody>
</table>

Note: A student can transfer in credit from another institution only for MRKTNG 3000, which is a pre-requisite for all other Marketing classes, as well as the Sales Certificate. Students may however enroll in MRKTNG 3000 concurrently (as a co-requisite) with MRKTNG 3410.

Internship Requirement (Minimum 1 credit hour) 1-3

Certificate Requirements and Curriculum 13-15

• Satisfactory completion of at least one credit hour for a supervised internship (summer or regular semester), with significant customer contact and a minimum of 120 hours on-the-job experience. This credit hour can be earned in any College at MU. Internships that qualify for this Certificate will need to be approved by the Program Coordinator as a part of the Certificate application process.

Notes:

• Trulaske College of Business students can satisfy the internship requirement by completing a suitable internship under the College's BUS_AD 4500 requirement. Students who have already completed BUS_AD 4500 with an internship that does not meet the requirements of this certificate are advised to register for one credit hour under BUS_AD 4500 just for that purpose.

Minor in Entrepreneurship and Innovation Management

Requirements

15 credit hours are required, at least 6 of the required 15 credit hours must be taken from Management designated course numbers from the approved course list.

Required Core (3 credit hours): Choose one of the following 3

JOURN 4984  Magazine Staff  

• Students must be Journalism Majors for the course to count towards the minor.  
• Internship option based on Consistent Standards (no more than three credit hours total of internship credit can be counted toward the minor and specific internship must be preapproved by the Director of the Minor). Must be in a declared degree program within the School or College offering the course. For example: MU_GENL if only for A&S students to take. Only exception is MANGMT 4940 which can be taken by both business majors and non-majors with approval from the Director of the Minor.

Graduate Certificate in Assurance

About the Certificate
The Assurance Certificate program will provide students with advanced skills necessary to succeed in Assurance Services-related careers. Through completion of the required coursework, students will be able to:
• Assess business and financial reporting risks  
• Understand and apply auditing concepts and procedures  
• Design and implement internal controls  
• Understand the role of corporate governance in risk management  
• Implement fraud prevention and detection procedures  
• Understand how corporate taxes can impact a corporation’s financial statements  
• Understand the basis of corporate taxation and book-to-tax differences (ASC 740)

School of Accountancy graduates with an Assurance Certificate will be prepared for a variety of careers including: external and internal auditor, risk management, fraud examination, and consulting on risk, assurance, and fraud prevention.

Eligibility
Students may be admitted to the MAcc program to pursue the Assurance Certificate. For students working towards an accountancy degree, courses will count towards the degree programs for the School of Accountancy. Additional credit hours beyond those needed for the MAcc will not be required in most cases. Students may also pursue the certificate as a stand-alone certificate or be working towards their Master of Science in Business. Students must achieve an average of 3.0 GPA in all courses. Coursework may only count towards two graduation requirements for students pursuing multiple graduate certificates.

Requirements
Students are required to complete 15 credit hours to receive the certificate. Courses are listed below for the assurance certificate.

Required:
ACCTCY 4384/7384  Auditing Theory and Practice I  

Electives:
ACCTCY 8373  Taxation of Corporations and Shareholders  
ACCTCY 8404  Internal Auditing  
ACCTCY 8414  Audit of Internal Controls  
ACCTCY 8424  Fraud Examination  

* This Spring course is open to students from all disciplines but students must apply for instructor consent by a deadline in the Fall.
The Graduate Certificate in Investments is designed to provide cutting-edge knowledge to those who wish to pursue a career in financial services. The certificate program allows students to focus on one aspect of Finance. Students can obtain the certificate as a stand-alone program. This may best serve students who are seeking to augment their education and to enhance their knowledge in order to advance in their careers. For students who are seeking their master's degree, the certificate is a big step towards completion of their degree program requirements.

**Requirements**

Students must complete a minimum of 12 credit hours with at least a 3.0 GPA from the courses listed below.

**Required Courses (6.0 credit hours)**
- **FINANC 8360** Equity Securities Analysis 3.0
- **FINANC 8370** Fixed-Income Securities Analysis 3.0
- **FINANC 8380** Financial Markets 1.5
- **FINANC 8330** Investment Policy and Portfolio Management 1.5
- **FINANC 8340** Derivative Financial Securities 3.0
- **FINANC 8350** Financial Statement Analysis I 1.5
- **FINANC 8352** Financial Statement Analysis II 1.5
- **FINANC 8380** Investment Banking 3.0
- **FINANC 8450** Ethics and Standards of Financial Practice 1.5

**Elective Courses (6.0 credit hours)**
- **FINANC 8350** Advanced Accounting 3
- **ACCTCY 8428** Data Visualization and Data Mining 3
- **ACCTCY 8436** Advanced Audit 3
- **ACCTCY 8444** Emerging Issues in Accounting Information Systems 3
- **ACCTCY 8456** Corporate Governance 3

**Total Hours: (12 of 15 credit hours must be graduate credit) 15**

Note: Additional coursework may count towards the assurance certificate with Acct 8401 - Topics in Accounting courses, please inquire with an academic advisor in the School of Accountancy to discuss available coursework.

---

**Graduate Certificate in Marketing Analytics**

The Graduate Certificate in Marketing Analytics is focused on the development, implementation, and delivery of data-driven solutions that assist in marketing strategies, tasks, and decisions. The certificate can either be completed as a stand-alone credential or in conjunction with another master’s degree.

For those applying to complete the coursework as a stand-alone certificate, a GMAT/GRE score is optional. Applicants must complete the typical application process through the Graduate School and must also provide evidence of basic statistical knowledge, which can be demonstrated by completion of introductory undergraduate, graduate, or online statistics coursework. Contact the College of Business Graduate Programs Office for further information about qualifying coursework. Admitted applicants who have not taken an undergraduate, graduate, or online marketing course will be required to take a marketing course during the first semester of the program unless they have qualifying marketing-related job experience. Due to course sequencing, students begin taking courses in the fall semester only.

**Requirements**

The graduate certificate requires completion of 12 credit hours. See the list below of required courses. The Department of Marketing may approve course substitution if prior equivalence is determined.

- **MRKTNG 8180** Applied Statistics for Marketing Analytics 3
- **MRKTNG 8760** Marketing Analytics for Business Decisions 1.5
- **MRKTNG 8780** Advanced Marketing Analytics 1.5
- **MRKTNG 8770** Marketing Databases and SQL 3
- **MRKTNG 8800** R for Marketing Analytics 1.5
- **MRKTNG 8810** Python for Marketing Analytics 1.5
  or **MRKTNG 8820** Artificial Intelligence and Machine Learning Applications in Marketing 1.5

**Total Credits** 12

**Sample Plan of Study**

The certificate can be completed in nine months for a student who takes six credit hours per semester. This is only a sample plan of study and could change per student.

Graduate Certificate in Taxation

About the Certificate
Depending on the course configuration in the program, completion of the Certificate in Taxation indicates that a student has developed expertise in tax planning and preparation in regard to international, federal, state, or estate issues for corporations, partnerships, or individuals.

Eligibility
Students may be enrolled in the MAcc graduate degree program in the School of Accountancy at MU to be eligible for the Taxation Certificate. For students working towards an accountancy degree, courses will count towards the degree programs for the School of Accountancy. Additional credit hours beyond those needed for the MAcc will not be required in most cases.

Students may also pursue the certificate as a stand-alone certificate or be working towards their Master of Science in Business.

Students must achieve an average of a 3.0 GPA in all courses. Coursework may only count towards two graduation requirements for students pursuing multiple graduate certificates.

Requirements
Students are required to complete 15 credit hours to receive the certificate. Courses are listed below for the tax certificate.

The College of Education, established in 1868, is the oldest teacher preparation program west of the Mississippi River. Today’s MU graduates are employed in a variety of educational institutions and non-school settings. The college serves the educational community through research-based professional practice and a variety of learning constructs applied to real-world experiences. The college is a member of the American Association of Colleges for Teacher Education. All programs are fully accredited by the North Central Association of Secondary Schools and the Teacher Education Accreditation Council.

The College of Education has a number of undergraduate and graduate programs. All programs that lead to earning a certificate by the Missouri Department of Elementary and Secondary Education (DESE) are fully approved by the State Board of Education. DESE accredits all teacher certification programs at MU. The Office of Educator Quality at DESE is working with representative stakeholder groups to redesign the standards for educator preparation including certification requirements. These changes and implementation schedule are communicated to students through individual advising sessions or other university communications.

Academic Policy Manual

Policies for Undergraduate and Graduate Education majors can be found in the Faculty and Academic Policy Manual. Admission requirements to Phase II for Undergraduate & Initial Teaching Certification can also be found in the Faculty and Academic Policy Manual.

Policy for Admission to Phase II and Phase III for Undergraduate and Initial Teacher Certification

1. The Bachelor of Science in Education degree within the College of Education consists of four distinct phases of preparation, the first three are part of the 4-year undergraduate degree. Phase I of the program is generally completed during the first 2 years of the undergraduate experience. All students who meet the minimum admission requirements to MU and declare education as a major are admitted into Phase I. In order to be admitted to Phases II and III of the programs, students must demonstrate competence in areas they have studied in the previous phase(s). In order to be admitted to Phase II, students must provide evidence of readiness.

Baseline criteria for admittance to Phase II consist of the following:
2. All candidates admitted into Phase II must meet the traditional first-year admission requirements to the University of Missouri (see MU Admissions Requirements (https://admissions.missouri.edu/apply-freshmen/admission-requirements/) for more information), which includes a qualifying ACT score. For external transfer candidates, the candidate must submit the ACT score (or SAT) and the following GPA requirements must be met

a. Traditional first-year Classification: 2.600 or higher
b. Sophomore Classification: 2.700 or higher
c. Junior Classification: 2.750 or higher
d. Senior Classification: 2.750 or higher

Candidates can appeal and submit appropriate materials if they do not meet the satisfactory entrance score. Within the appeal, candidates can provide other test scores, exam credits, GPA from similar coursework, or proof of accommodations. The Teacher Preparation Review Committee will review the materials and determine if the entrance requirement can be waived.

3. A student who progresses to Phase II must maintain the standards met at the time of entry. Continued assessment will be made of the characteristics associated with effective performance in the role of a professional at the level(s) and in the major(s) selected.

4. All students pursuing initial teacher certification and/or the BSEd degree (regardless of level) must complete all professional education courses with a C-range grade or higher (i.e., C- minimum).

This policy will go into effect immediately upon the revision to the College of Education Faculty & Academic Policy Manual eliminating any contradictory requirements to those specified herein. Any changes made to these requirements will be recommended by the Teacher Education Council (TEC) and approved by LTC and Special Education faculty.

**Graduate**

Expand your career opportunities by pursuing graduate studies in the MU College of Education. A range of online and face-to-face professional and graduate education degrees (https://education.missouri.edu/degrees-programs/graduate-degrees/) and certificates (https://education.missouri.edu/degrees-programs/certificates-minors/) are available.

Our faculty members provide a rich environment through their innovative teaching and cutting-edge research. Choosing the right college for graduate studies is not an easy or simple decision. We welcome you to visit our website (https://education.missouri.edu/) or the MU Columbia campus (for face-to-face programs) and meet with our faculty and current students to find out more about the College of Education.

**Note:** Prospective graduate students must apply to both the degree program of interest and to the Graduate School. The application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

**Applied Behavior Analysis**

The Master of Science in Applied Behavior Analysis (ABA) program is designed to address the state-wide and national shortage of health care providers by training practitioners to affect meaningful change. ABA is a discipline that relies upon evidenced-based behavioral interventions to improve socially significant behaviors. It has been used as an intervention to improve the quality of life for a variety of populations including, but limited to, individuals with autism spectrum disorder (ASD). The goal of our master’s program is to become a leading, accredited professional program that will train highly-skilled Behavior Analysts who apply behavioral science to address the behavioral challenges of individuals in need.

**Faculty**

**Assistant Teaching Professor:** L. A. Becerra*, J. R. Weyman*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

Currently MU does not offer undergraduate degrees specifically in Applied Behavior Analysis. The University does offer an undergraduate course (SPC_ED 3100: Autism and ABA) which prepares students to complete the required 40 hr content for the Registered Behavior Technician (RBT) certification. Additional baccalaureate opportunities are available in a number of related areas in the other Schools and Colleges at the University. The catalog provides a complete list of these degree options (p. 20).

**Graduate**

- MS in Applied Behavior Analysis (p. 417)
- Certificate in Applied Behavior Analysis (p. 418)

The Master of Science in Applied Behavior Analysis (ABA) program will train you to be an exceptional behavior analyst who has the skills to improve quality of life for people with behavioral challenges, including children and adults with developmental needs. You will also gain experience, and knowledge, in cutting edge research in the field of ABA. Behavior analysts successfully use ABA techniques across a variety of populations and settings to bring about meaningful and positive change in behavior. Behavior analysts are employed in numerous fields, including general and special education, mental health, disability, business, and institutions of higher learning. There is a high demand for individuals who finish their degree and obtain certification who then can practice as independent educational specialists or clinicians. The Behavior Analyst Certification Board, Inc. (http://bacb.com/) has approved the course sequence as meeting the coursework requirements for eligibility to take the Board Certified Behavior Analyst Examination. Applicants will have to meet additional requirements to qualify.

**MS in Applied Behavior Analysis**

The Master of Science in Applied Behavior Analysis (ABA) program will teach you to be an exceptional behavior analyst who has the skills to
improve quality of life for people with behavioral challenges, including children and adults with developmental needs. In our program, you will learn the conceptual foundations of ABA and how these behavioral principles are applied to improve behavior. Central to this program is a collaboration with the MU Thompson Center for Autism and Neurodevelopmental Disorders (https://thompsoncenter.missouri.edu/), which serves as the primary practicum site to give you an exceptional experiential learning opportunity working with individuals with developmental needs. We place a heavy emphasis on face-to-face contact.

Degree Requirements

A minimum of 39 semester credit hours must be completed in fulfillment of degree requirements. Completion of this degree includes completion of a Thesis/Capstone. In addition to the coursework requirement, you will need to meet experience standards. The BACB has two experience categories: (a) supervised fieldwork (2000 hrs) and (b) concentrated supervised fieldwork (1500 hrs). Students in the Master's program will be required to complete concentrated supervised fieldwork at the MU Thompson Center for Autism and Neurodevelopmental Disorders.

Sample Plan of Study

The course sequence can be completed in two years on campus. The following is a sample program:

Graduate Certificate in Applied Behavior Analysis

A Graduate Certificate in Applied Behavior Analysis (ABA) program will train you to be an exceptional practitioner of ABA-based interventions to improve quality of life for people with behavioral challenges, including children and adults with developmental needs. MU graduate students can complete the certificate program while pursuing a degree, and the certificate also complements the skills of recent graduates and experienced professionals who want to specialize in ABA. The program is designed to meet eligibility requirements to sit for the Behavior Analyst Certification Board’s (BACB) (http://www.bacb.com/) Board Certified Behavior Analyst (BCBA) (http://www.bacb.com/?page=53) exam.

In this program, you will learn the conceptual foundations of ABA and methods to apply these behavioral principles to improve behavior. Central to this program is a collaboration with the MU College of Education (https://education.missouri.edu/) and the MU Thompson Center for Autism and Neurodevelopmental Disorders (http://thompsoncenter.missouri.edu/). Partnerships with the College of Education incorporates interdisciplinary educational and training opportunities by professors from the School of Health Professions and the College of Education. The MU Thompson Center serves as the primary practicum site to prepare you for an exceptional experiential learning opportunity working with individuals with developmental needs.

Requirements

The 5th Edition Task list requirements include 21 hours of coursework (315 classroom hrs). Please note that we value in person face-to-face contact. Therefore, this is an on-campus program only.

The BACB has two experience categories: (a) supervised fieldwork (2000 hrs) and (b) concentrated supervised fieldwork (1500 hrs). Students in the graduate certificate program are not required but are encouraged to enroll in Practicum and complete their concentrated supervised fieldwork at the MU Thompson Center for a minimum of 6 credits. If they do not enroll in Practicum, the student is responsible for gaining the appropriate fieldwork experience if they wish to become a BCBA.

Additional Information

For additional information about the Graduate Certificate in Applied Behavior Analysis including a program description go to: https://gradstudies.missouri.edu/degreecategory/applied-behavior-analysis (https://gradstudies.missouri.edu/degreecategory/applied-behavior-analysis/)

Early Childhood Education

Dr. Laurie Kingsley, Director of Teacher Education

Graduate

While the College of Education does not offer a graduate degree specifically in Early Childhood Education, we do offer other graduate programs in closely related areas. The catalog provides a complete list of these degree options (p. 20).
BSEd in Early Childhood Education

Degree Program Description

The Bachelor of Science in Education in Early Childhood will prepare you to work with children from birth through third grade in public, private, and alternative school systems. Students consider a degree in education if they enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successful completion of the initial teacher certification process, the state grants you certification in early childhood education. Practical and rewarding clinical experience in schools and agencies, which will enhance your teaching abilities and confidence, begins during the sophomore year, and continues each semester, culminating in a senior-level teaching internship. Coursework within Early Childhood will challenge you to consider ways to support the development and learning of young children from birth through age eight.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor (https://education.missouri.edu/students/advising/) to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

### Educational, School, and Counseling Psychology

ESCP provides a diverse, supportive, and caring environment for students. Our faculty members create rich and stimulating learning opportunities through their teaching, research, and service. Our faculty are more than academic advisors and teachers - they are mentors providing students with role models featuring the scientist-practitioner model.

### Faculty

**Associate Teaching Professor** K. Boggs*, C. A. Offutt**  
**Assistant Teaching Professor** B. Beasley*, M. Easter**, G. Sullivan**  
**Clinical Professor** A. J. Knoop**  
**Dean of Education** K. Chval  

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

### Undergraduate

While MU does not offer undergraduate degrees specifically in educational and counseling psychology, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

### Graduate

- **MA in Educational, School, and Counseling Psychology** (p. 421)  
  - with emphasis in Counseling Psychology (p. 421)  
  - with emphasis in Educational Psychology (p. 422)  
  - with emphasis in Health Education and Promotion (p. 423) (not accepting applications)  
  - with emphasis in School Psychology (p. 424)  
  - with emphasis in Statistics, Measurement, and Evaluation in Education (p. 425)
- **MEd in Educational, School, and Counseling Psychology** (p. 426)  
  - with emphasis in Career Counseling Psychology (p. 426)  
  - with emphasis in Counseling Psychology (p. 427)  
  - with emphasis in Educational Psychology (p. 428)  
  - with emphasis in Health Education and Promotion (p. 429) (not accepting applications)  
  - with emphasis in Mental Health Practices in Schools (p. 430)  
  - with emphasis in Positive Coaching and Athletic Leadership (p. 431)
- **with emphasis in School Counselor, Elementary, Certification** (p. 433)
- **with emphasis in School Counselor, Elementary and Secondary, Certification** (p. 434)
- **with emphasis in School Counselor, Secondary, Certification** (p. 435)
- **with emphasis in School Psychology** (p. 436)
- **with emphasis in Sport Psychology** (p. 437) (not accepting applications)
- **with emphasis in Statistics, Measurement, and Evaluation in Education** (p. 438)
- **EdSp in Educational, School, and Counseling Psychology** (p. 439)  
  - with emphasis in Counseling Psychology (p. 439)  
  - with emphasis in Mental Health Practices in Schools (p. 440)  
  - with emphasis in School Psychology, Certification (p. 441)
- **PhD in Educational, School, and Counseling Psychology** (p. 442)  
  - with emphasis in Counseling Psychology (p. 442)  
  - with emphasis in Educational Psychology (p. 443)  
  - with emphasis in Health Education and Promotion (p. 445) (not accepting applications)  
  - with emphasis in School Psychology, Certification (p. 445)  
  - with emphasis in Statistics, Measurement, and Evaluation in Education (p. 446)
Chair: David Bergin, Ph.D.

About the Program

The PhD programs in counseling psychology and school psychology is accredited by the American Psychological Association. The 2005 Faculty Scholarly Productivity Index ranked MU’s graduate program in counseling psychology 4th in the nation and the 2018 U.S. News & World Report ranked it 3rd nationally.

Our faculty members create a rich and stimulating learning environment for students through their teaching, research, and service. ESCP has centers that provide students and faculty with many opportunities to collaborate on research and service-related projects while focusing on improving life for learners in all environments.

Career Opportunities

Our graduates find employment in a wide range of settings, including colleges and universities, public schools, agencies, clinics, hospitals, business and industry, research laboratories and government service. Occupations include, but are not limited to, school counselors, licensed professional counselors, faculty members, school psychologists, psychometricians, health educators and educational researchers.

Application Deadlines

- Fall Deadline: December 1st for Counseling and School Psychology Doctoral programs
- Fall Deadline: January 15th for Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE)
- Fall Deadline: February 1st for Counseling Psychology Masters programs
- M Ed in Ed Psych/Student Learning and Well-being focus (online degree) - rolling admission
- M Ed, EdSp in Mental Health Practices in Schools (online degrees) - rolling admission
- M Ed in Positive Coaching (online degree) - rolling admission
- Graduate Certificate in Multicultural Education - rolling admission
- Graduate Certificate in Positive Psychology - rolling admission
- Graduate Certificate in Quantitative Research - rolling admission

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

MA in Educational, School, and Counseling Psychology

Degree Requirements

The MA in Educational, School, and Counseling Psychology has several emphasis areas for a student to choose from: Counseling Psychology (p. 421), Educational Psychology (p. 422), School Psychology (p. 424), and Statistics, Measurement, and Evaluation in Education (p. 425). A student must select an emphasis area to complete the degree.

Admission Criteria

- Minimum GPA: 3.0
- Minimum TOEFL scores:
  - Internet-based test (iBT) 92
  - Paper-based test (PBT) 580
- Recommended GRE scores:
  - When did you take the GRE?
    - On or After August 1, 2015
      - Verbal + Quantitative 305
      - Analytical 4.0

Application Deadlines

- Fall deadline:
  - December 1st Counseling Psychology and School Psychology Doctoral programs
  - January 15th Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE)
  - February 1st Counseling Psychology Masters programs

Note: If an applicant is admitted but does not hold a bachelor’s degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Official transcripts
- GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

MA in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements

The MU Masters program in Counseling Psychology provides students training and education in the scientist-practitioner philosophy that is consistent with most Counseling Psychology Ph.D. programs, including the one at MU. Students will complete core coursework in counseling psychology and receive clinical training in the form of practicum experience and research training through faculty labs, research teams,
and other research projects. They will also be required to complete an independent research manuscript during their second year in the program. This program has more of a research focus than most counseling masters programs. The program is not designed for students interested exclusively in practicing at the masters level, and students who graduate from this program will not yet be license-eligible for a LPC in the state of Missouri (this would require additional coursework and training).

**Thesis/Non-Thesis Requirements**

The thesis/research manuscript is a project that the student completes with his or her advisor and receives advisor approval. This project will serve as the student's comprehensive examination. Two additional committee members will be required to approve the project. The project can be either a comprehensive literature review (i.e., modeled after a review article one would see in a scholarly journal) or an independent research study written in manuscript form (i.e., introduction, method, results, discussion) or traditional thesis format. The topic of the project should be selected by the beginning of the student's second year in the program. The project is to be completed by the deadline date for comprehensive examinations, dissertations, and thesis in April of the student's second year.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

**MA in Educational, School, and Counseling Psychology with Emphasis in Educational Psychology**

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people’s thinking, motivation, and behavior change across time. We study how different social settings like classroom, family, work, and peers affect people’s well-being, learning, and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand how:

- to improve learning, academic achievement, and motivation to improve human performance
- development influences learning and well-being
- society influences learning and behavior
- school influences students’ development in other settings
Degree Requirements

The master’s degree program requires at least 33 credit hours. Students enrolled in the MA do a thesis or research manuscript that demonstrates research competence and includes an oral defense of the paper. The MA is the preferred degree for students who intend to pursue a PhD.

Master’s students must have completed or plan to complete 15 hours of prerequisite course work as listed below. The prerequisite coursework is over and above that required for the master’s degree itself, and thus cannot be counted on the Program of Study for the master’s degree. Many students will have completed these prerequisites in their undergraduate programs.

1. **Statistics**: A course in statistics covering descriptive statistics, correlation, t-tests, and chi-square. If undergraduate coursework does not include an introductory level course in statistics, ESC_PS 4170/ESC_PS 7170 must be taken to satisfy this prerequisite, but it then cannot count on the Program of Study.

2. **Psychological Theory**: Two courses in psychological theory (not including the introductory course in psychology), for example, personality, social, developmental, or learning.

3. **Additional courses**: Two additional courses in education, psychology, or sociology.

| Human Diversity | 3 |
| Relevant Course | |
| General Electives | 12 |

For MA with thesis or manuscript, 6 hours of these courses must be ESC_PS 8090. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Studies, Psychological Sciences, or Information Science and Learning Technology.

### Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests and should be completed in consultation with the advisor.

### Thesis/Non-Thesis Requirements

After working with the academic advisor on developing a thesis proposal, the student meets with the thesis committee to obtain approval. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the committee. The defense can occur only when MU is officially in session.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational, School, and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

### MA in Educational, School, and Counseling Psychology with Emphasis in Health Education and Promotion

Health Education is a strong graduate program within the Department of Educational and Counseling Psychology. The graduate program serves bachelors and masters degreed students from the state of Missouri as well as from other states. Many of our graduate students are professionals practicing in the field and come to MU for graduate training. A number of our graduate students cross train in health related fields like athletics, nursing, nutrition, physical training, physical therapy, occupational therapy, and psychology.

### Degree Requirements

Students who earned a bachelor’s degree in a health-related program of study are qualified to enter the masters program in health education. A minimum of 30 credit hours are required for the M.A. M.A. students are required to write a thesis. Students who earn a master’s degree are encouraged to take the CHES (Certified Health Education Specialist) examination for certification.

Total Credits: 18
Thesis/Non-Thesis Requirements

All MA students are required to complete a Thesis in the last semester of the program.

Admissions

This program is not accepting applications at this time.

MA in Educational, School, and Counseling Psychology with Emphasis in School Psychology

Degree Requirements

The Masters of Arts (M.A.) program in School Psychology is completed concurrently with the Doctoral (Ph.D.) program in School Psychology. The M.A. program itself is not a terminal degree program. Students admitted to the Doctoral program in School Psychology (Ph.D.) who have already completed an advanced degree in School Psychology or a related field, including completion of a data-based graduate level research project, may not be required to complete a Masters of Education (M.A.) program in School Psychology. Students admitted to the Ph.D. degree program typically complete degree requirements (coursework and comprehensive examination) for the Masters of Arts by the end of their second year in the program. Students admitted to the M.A./Ph.D. programs in School Psychology are prepared to support the learning, behavior, and mental health of youth and their families as well as support the enhancement of the educational and mental health systems that serve those children and families. Through coursework as well as research, clinical, and teaching experiences, graduates are prepared to serve as leaders in clinical settings as well as researcher/scholars in higher education settings. Completion of the M.A. program alone does not lead to licensure as a Psychologist nor state certification as a School Psychologist; however, graduates of both the M.A. and Ph.D. programs are eligible for licensure as a Psychologist and state certification as a School Psychologist, pending completion of additional examinations specified in their intended jurisdiction.

Thesis/Non-Thesis Requirements

Students are required to complete a data-based research project in order to earn their M.A. in School Psychology. Students have two options, the master’s thesis or the master’s manuscript, both requiring similar scholarly and scientific rigor to their project. The thesis option requires that students comply with the graduate school expectations for committee membership and formatting, while the manuscript option does not. Students taking the latter option often format their manuscript for publication in professional journals.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational, School, and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
MA in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

Degree Requirements

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement, covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses, from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

Selected graduate level courses in the Psychology Department with advisor approval (e.g., latent variable models in statistical analyses, categorical data analysis)

Selected graduate level courses from the Statistics Department with advisor approval (e.g., Bayesian statistics, nonparametric statistics). NOTE: MA with thesis or manuscript, 6 hours of these courses must be ESC_PS 8090.

Sample Plan of Study

The plan of study will depend on the student's career goals and research interests and should be completed in consultation with the Master's Committee.

Thesis/Comprehensive Exam Requirements

The student will consult with the academic advisor about whether to complete a thesis or comprehensive exam.

If choosing a thesis, students work with the academic advisor on developing a thesis proposal, and the student then meets with the Master's program committee to obtain approval of the written thesis proposal. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the Master's program committee. The defense can occur only when MU is officially in session.

If choosing a comprehensive exam, the student must complete: 1) Demonstration of Knowledge via a written exam; and 2) Oral Exam on the Demonstration of Knowledge exam.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational, School, and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (https://gradschool.missouri.edu/admissions/eligibility-process/). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Apply online by submitting the following documents using the MU Graduate School (http://gradstudies.missouri.edu/admissions/apply/) application form by January 15th for the next Fall cohort.

- Three letters of recommendation
- Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
  - Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, statistics, or a related major.
- Statement of purpose addressing the following:
  - Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU's program will benefit your career aspirations.
  - Describe interests or experience in designing empirical studies and/or analyzing empirical data. (500 words max.)
  - Describe interest or experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study. (250 words max.)
- Official Graduate Record Examination (GRE) scores (preferred, Verbal score > 151 and Quantitative score > 155)
MEd in Educational, School, and Counseling Psychology

Degree Requirements
The MEd in Educational, School, and Counseling Psychology has several emphasis areas for a student to choose from. Please see the degree offerings (p. 420) page for information. A student must select an emphasis area to complete the degree.

Admission Criteria
- Minimum GPA: 3.0
- Minimum TOEFL scores:
  - Internet-based test (iBT) 92
  - Paper-based test (PBT) 580
- Recommended GRE scores:
  - When did you take the GRE? On or after August 1, 2015
  - Verbal + Quantitative: 305
  - Analytical: 4.0
- Recommended Analytic Writing score = 4

Application Deadlines
- Fall deadline:
  - December 1st Counseling Psychology and School Psychology Doctoral programs
  - January 15th Educational Psychology and Statistics, Measurement, and Evaluation in Education (SME)"n  - February 1st Counseling Psychology Masters programs

Note: If an applicant is admitted but does not hold a bachelor’s degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials
To the Graduate School:
- All required Graduate School documents
- Official transcripts
- GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

MEd in Educational, School, and Counseling Psychology with Emphasis in Career Counseling Psychology

Career Psychology provides the theoretical basis for this program. It prepares one to practice in a variety of settings, most notably college career or advising centers, other student affairs settings, or business settings where there may be opportunity for defining or developing career roles for students or employees. MU’s Career Center is where students practice what is learned in classes making this a strong scientific-practitioner model of training. This program was designed to move one toward qualifying a student to meet most but not all of the State of Missouri’s curricular requirements for Licensure as a Professional Counselor (LPC). In addition to completing course work beyond what is required for this degree, the graduate must also complete 3000 hours of supervised counseling and pass a licensure examination.

Total Credits: 45-57

Thesis/Non-Thesis Requirements

Students are required to pass the National Counselor Examination in Fall or Spring semester of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application by February 1st for the next Fall cohort.

1. Three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum).
   b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
   c. Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 1000 words)

5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2015 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 IBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master’s degree itself and is not counted on the Program of Study for the master’s degree.

MEd in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

The MU Masters program in Counseling Psychology provides students training and education in the scientist-practitioner philosophy that is consistent with most Counseling Psychology Ph.D. programs, including the one at MU. Students will complete core coursework in counseling psychology and receive clinical training in the form of practicum experience and research training through faculty labs, research teams, and other research projects. They will also be required to complete an independent research manuscript during their second year in the program. This program has more of a research focus than most counseling masters programs. The program is not designed for students interested exclusively in practicing at the masters level, and students who graduate from this program will not yet be license-eligible for a LPC in the state of Missouri (this would require additional coursework and training).

Total Credits: 48-63

Thesis/Non-Thesis Requirements

Students are required to pass the National Counselor Examination in Fall or Spring semesters of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/ degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master’s degree itself and is not counted on the Program of Study for the master’s degree.

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people’s thinking, motivation, and behavior change across time. We study how different social settings like classroom, family, work, and peers affect people’s well-being, learning and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand how:

• to improve learning, academic achievement, and motivation
• development influences learning and well-being
• society influences learning and behavior
• school influences students' development in other settings

Degree Requirements

The master’s degree program requires at least 33 credit hours. Students enrolled in the MEd take a 4 hour comprehensive exam at the end of the program unless in the online program. Master’s students must have completed or plan to complete 15 hours of prerequisite course work as listed below. The prerequisite coursework is over and above that required for the master’s degree itself, and thus cannot be counted on
the Program of Study for the master’s degree. Many students will have completed these prerequisites in their undergraduate programs.

1. **Statistics**: A course in statistics covering descriptive statistics, correlation, t-tests, and chi-square. If undergraduate coursework does not include an introductory level course in statistics, ESC_PS 4170/ESC_PS 7170 must be taken to satisfy this prerequisite, but it then cannot count on the Program of Study.

2. **Psychological Theory**: Two courses in psychological theory (not including the introductory course in psychology), for example, personality, social, developmental, or learning.

3. **Additional courses**: Two additional courses in education, psychology, or sociology.

For MA with thesis or manuscript, 6 hours of these courses must be 8090. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Science, Psychological Sciences, or Information Science and Learning Technology.

### Student Learning and Well-being (online)

An online master’s degree with a student learning and well-being focus is also available. The 33-hour program was developed with the working K-12 classroom teacher in mind. Course work is completely online and provides practical applications of learning theory, motivation, assessment of student well-being, mental health, issues of bullying, positive psychology, and the development of a safe and supportive school environment.

No GRE is required.

Complete program details (e.g., how to apply, course planner) are available at the [Student Learning and Well-being website](https://studentlearningandwellbeing.missouri.edu).

### Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests and should be completed in consultation with the advisor.

### Thesis/Non-Thesis Requirements

After working with the academic advisor on developing a thesis or project proposal, the student meets with his or her committee to obtain approval. This happens before data collection begins. After the project is completed, the student submits a written thesis and defends the thesis to the committee. The defense can occur only when MU is officially in session.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program ([https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/](https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/)) and the minimum requirements of the Graduate School ([http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php](http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php)).

Apply online by submitting the following documents using the MU Graduate School ([https://applygrad.missouri.edu/apply/](https://applygrad.missouri.edu/apply/)) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe experiences teaching, designing instruction, and engaging in research and how these experiences have prepared you for graduate study. (500 word maximum)
   b. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty (3) your career objectives, and (4) how being accepted into MU’s program will benefit your career aspirations. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2012 should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program. This prerequisite coursework is over and above that required for the master’s degree itself and is not counted on the Program of Study for the master’s degree.

### MEd in Educational, School, and Counseling Psychology with Emphasis in Health Education and Promotion

Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Educational, School and Counseling Psychology (p. 420).

Health Education is a strong graduate program within the Department of Educational and Counseling Psychology. The graduate program serves bachelors and masters degree students from the state of Missouri as well as from other states. Many of our graduate students are professionals practicing in the field, and come to MU for graduate training. A number of our graduate students cross train in health related fields like athletics,
nursing, nutrition, physical training, physical therapy, occupational therapy, and psychology.

Degree Requirements

Students who earned a bachelor’s degree in a health-related program of study are qualified to enter the masters program in health education. A minimum of 30 credit hours are required. The MEd Students who earn a master’s degree are encouraged to take the CHES (Certified Health Education Specialist) examination for certification.

Sample Plan of Study

A student’s plan of study will vary depending on their program track and career goals and should be completed in consultation with her/his academic advisor.

Comprehensive Examination

The M.Ed. student is required to take a comprehensive examination during the last semester in the program.

Admissions

This program is not accepting applications at this time.

MEd in Educational, School, and Counseling Psychology with Emphasis in Mental Health Practices in Schools

The online Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/masters/) program is intended for school personnel, educators and other community mental health professionals who work with children and adolescents in schools and community agencies. This includes elementary and secondary teachers, special education professionals, school counselors, school nurses, administrators, at-risk coordinators and resource officers, safety coordinators, substance abuse coordinators, speech/language pathologists, itinerant and migrant educators, and private practitioners.

Courses are designed to offer practical applications of psychological concepts and are taught by experts in the field. The program identifies and deals with issues that promote positive mental health of children and adolescents. Courses in the program provide a solid base to increase awareness, knowledge, and skills in areas such as:

- Identifying and assessing evidence-based prevention and intervention strategies and programs
- Communicating effectively with parents, children and school personnel
- Building resiliency and optimism in children and adolescents
- Increasing awareness of multicultural and diversity issues
- Understanding mental, emotional, and behavioral factors in youth
- Managing crisis interventions
- Applying wellness management for self and others
- Implementing positive behavior support and strategies in the classroom
- Collaborating with families and other school personnel

Note: This program does not provide school counselor certification, nor any professional counseling licensure.

Website: Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/masters/).

Degree Requirements

This is a 34 credit hour program. Students take 25 hours of required course work and 9 hours of electives.

Admission Criteria (M Ed)

1. Successful completion of the baccalaureate degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.
4. GRE scores are NOT required.

Application Process

1. Complete the online Graduate Admissions application (https://gradstudies.missouri.edu/admissions/apply/).
2. As part of the submission process, applicants are required to upload UNOFFICIAL copies of all transcripts to the online application.
   NOTE: If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Graduate School, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.
3. Three letters of recommendation will need to be submitted via the online application. Each recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.
4. You must also provide the following supplementary materials:
   a. Your previous/current experience serving in a teaching, helping or counseling role,
   b. Your interests and career objectives,
   c. How these interests and career objectives have developed, and
   d. How being accepted into the program will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. Include interests and experiences working with diverse groups (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation, grade levels, ages), leadership roles, or other skills or experiences (not previously mentioned) that you believe distinguish you as a candidate for graduate study. (Please limit to 1000 words).
5. If your native language is other than English, the Test of English as a Foreign Language (TOEFL) is required. Please send this to the Graduate School using school code 6875.

   • Please be sure to upload all supplemental materials BEFORE you submit the application.

For applicants currently enrolled as graduate students at MU

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.
2. Provide UNOFFICIAL copies of your University of Missouri transcripts.
3. Provide 3 letters of recommendation.

Send application materials to David Lineberry (Lineberry@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211

Application deadline: None - rolling admission.

MED in Educational, School, and Counseling Psychology with Emphasis in Positive Coaching and Athletic Leadership

The online Positive Coaching program (http://online.missouri.edu/degreeprograms/education/positive-coaching/masters/) is intended for all athletic coaches and sports coordinators who have completed a bachelor's degree program, and now wish to pursue their master's degree. The program is well-suited for athletic coaches at all levels of sport participation, as well as any individuals in educational or other settings, who provide instructional, leadership or counseling services to students or to others.

The required core courses focus on identifying and applying the most pertinent and impactful aspects of sport, coaching and positive psychology. The core courses also focus on leading individuals, teams and groups to experience the fulfillment and happiness associated with striving for and achieving excellence. Emphasis is on the understanding, skills and strategies of highly effective teaching, learning and leading.
The electives emphasize the development of professional knowledge and awareness of key topical issues and areas pertinent to preparing to serve as competent, caring and committed coaches for others. Course topics include:

- Administration of athletics programs
- Ethical and legal aspects of athletics
- Athlete training and conditioning
- Gender and multicultural issues in sports
- Positive coaching
- Positive interventions contributing to coordinated school health programs
- Healthier total school or organizational environments

**Degree Requirements**

This is a 30 credit hour program. Students take 21 hours of required core course work and 9 hours of electives.

**Required Core Courses (21 hours, 7 courses)**

**Thesis/Non-Thesis Requirements**

Students complete a project in the capstone course ESC_PS 8300 Positive Leadership in Sport.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (below) and the minimum requirements of the Graduate School (https://gradstudies.missouri.edu/admissions/eligibility-process). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

**Admission criteria (M Ed)**

1. Successful completion of the baccalaureate degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework.
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.
4. GRE scores are NOT required.

**Application Process:**

1. Complete the online Application to the Graduate School (https://applygrad.missouri.edu/apply/).
2. As part of the submission process, applicants are required to upload UNOFFICIAL copies of all transcripts to the online application. **NOTE:** If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Graduate School, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.
3. One letter of recommendation will need to be submitted via the online application. The recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.
4. If your native language is other than English, the Test of English as a Foreign Language (TOEFL (http://www.toefl.org/))) is required. Please send this to the Office of Graduate Studies using school code 6875. **Note:** If your undergraduate GPA (last 60 hours) is below 3.0 additional information will be required.

Please be sure to upload all supplemental materials BEFORE you submit the application.

**For applicants currently enrolled as graduate students at MU:**

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.
2. Provide unofficial copies of your University of Missouri transcripts.
3. Provide one letter of recommendation.

Send application materials to Sandy Sites (SitesS@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211

**Application deadline:** None - rolling admission.
MEd in Educational, School, and Counseling Psychology with Emphasis in School Counselor, Elementary, Certification

Students who select this specialty have an interest in working as elementary school, middle school, or high school counselors. The curriculum of this specialty is based on the scientist-practitioner model of training as well as the comprehensive school guidance and counseling program model, both of which emphasize the best in counseling psychology theory, research, and practice. The missions of the MU School Counseling Masters and Specialist degree programs are to prepare individuals to practice successfully as entry-level multiculturally sensitive professional school counselors in socially and economically diverse work settings.

Degree Requirements

The specific courses that meet these requirements are as follows:

I. General Psychology Core 9

<table>

VI. Credential Preparation

Candidates must apply for an official evaluation of their credentials in the Office of Certification, 102 Hill Hall prior to the completion of the last 15 hours of required course work.

VII. Licensure, Certification and Registry

The courses in this planner are designed to meet the requirements of the Department of Educational, School, and Counseling Psychology (42 hours), the College of Education, and the University of Missouri Graduate School. They also fulfill state certification requirements to become entry-level professional school counselors, but do not fulfill requirements for state licensure as a psychologist or counselor, for certification as a marriage and family therapist, alcoholism counselor or other specialties, or certification by the National Board of Certified Counselors. If you wish to fulfill the requirements for licensure, certification or registry, you will need to inform yourself accordingly and add to your M.Ed. degree planner the additional coursework necessary. Information about psychologist and counselor licensure, certification, and registry in Missouri is available in Room 16 Hill Hall.

VIII. Prerequisites to Master’s Programs

In order to apply for any master’s degree program in the Department of Educational, School, & Counseling Psychology, an applicant either must have completed or plan to complete 15 hours of prerequisite course work as indicated below:

**Statistics.** A course in statistics covering descriptive statistics, correlation, t-tests and Chi-square.

**Psychological Theory.** Two courses in psychological theory (not including the introductory course in psychology) for example: personality, social, developmental or learning.

**Additional Courses.** Two additional courses in education, psychology and/or sociology.

If you are deficient in one or more of these areas, you may still be admitted with the provision that you make up any prerequisites during your graduate enrollment. Such make-up work will not count toward the hours required for any degree.

IV. Policy on Non-degree Graduate Students (NGS) for School Counseling

If admitted to an ESCP program, a NGS may apply up to 12 hours. The ONLY courses a NGS may take to apply to the Elementary and Secondary School Counseling program are:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>

ESC_PS 8082 Foundations of Educational and Psychological Measurement
ESC_PS 8100 Psychological Assessment of Children and Adolescents: Cognitive Assessment
ESC_PS 8125 Professional Iss. in Sch. Psych. I.Hist., Trends & Ethical Pract.
ESC_PS 8140 Psychological Assessment of Children and Adolescents: Behavior and Social Emotional Assessment
ESC_PS 8145 Psychological Interventions with Children and Adolescents: Behavioral Intervention
ESC_PS 8250 School Psychology Practicum: Introduction
Degree Requirements

This degree program provides a strong, fortified (51 credit hours) Masters Degree that blends the two fields of Sport Psychology and Career Counseling.

The Counseling Sport Psychology program was designed to move one toward qualifying a student to meet most but not all of the State of Missouri’s curricular requirements for Licensure as a Professional Counselor (LPC). In addition to required course work, the graduate must also complete 3000 hours of supervised counseling and pass a licensure examination. The Counseling Sport Psychology program was also designed to qualify a student to meet some of the Association for the Advancement of Applied Sport Psychology’s (AAASP) curricular requirements to become a Certified AAASP Consultant. Additional courses/experiences necessary for AAASP Certification are included in a separate Sport Psychology electives section.

Degree Requirements

This degree program provides a strong, fortified (51 credit hours) Masters Degree that blends the two fields of Sport Psychology and Career Counseling.

The Counseling Sport Psychology program was designed to move one toward qualifying a student to meet most but not all of the State of Missouri’s curricular requirements for Licensure as a Professional Counselor (LPC). In addition to required course work, the graduate must also complete 3000 hours of supervised counseling and pass a licensure examination. The Counseling Sport Psychology program was also designed to qualify a student to meet some of the Association for the Advancement of Applied Sport Psychology’s (AAASP) curricular requirements to become a Certified AAASP Consultant. Additional courses/experiences necessary for AAASP Certification are included in a separate Sport Psychology electives section.

Thesis/Non-Thesis Requirements

No thesis is required from the Masters of Education program in school psychology.

Admissions

Students are admitted concurrently to the M.Ed. and Ed.S. programs in School Psychology based on the admissions criteria identified below in the Educational Specialist program.

MEd in Educational, School, and Counseling Psychology with Emphasis in Sport Psychology

Our department is not currently admitting students to this emphasis area. We invite you to explore the other graduate degree options within Educational, School and Counseling Psychology (p. 420).

Students who choose this specialty area have an interest in working with the careers of individuals in the world of sports (sport coaches, strength and conditioning coaches, athletic trainers, athletic academic counselors, Life Skills coordinators, athletic administrators, career coaches, life coaches, and the like). The curriculum is based on a scientist-practitioner model of training as well as a holistic view of how sport, career choice, and personal adjustment provide one with both an engaging and rewarding career and personal life. There is a strong emphasis on learning thru experience, where the experiences derived in and with athletic teams and with a college career center.

Thesis/Non-Thesis Requirements

No thesis is required from the Masters of Education program in school psychology.

Admissions

Students are admitted concurrently to the M.Ed. and Ed.S. programs in School Psychology based on the admissions criteria identified below in the Educational Specialist program.
Examination

Students are required to pass the National Counselor Examination in Fall or Spring semesters of the second year to demonstrate they have gained the requisite knowledge for the profession.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational and Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MEd in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses, from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

Total Credits: 44-54

Research Methods Emphasis Area

Courses in this area may vary. Possible course selection includes:

- ESC_PS 8087 Seminar in Educational, School, and Counseling Psychology
- ESC_PS 8655 Item Response Theory
- ESC_PS 8690 Educational Planning and Evaluation
- ESC_PS 8860 Statistical Data Management and Analysis in Educational Research
- ESC_PS 9660 Generalized Linear Modeling
- ESC_PS 9710 Structural Equation Modeling
- ESC_PS 9720 Hierarchical Linear Modeling

Selected graduate level courses in the Psychology Department with advisor approval (e.g. latent variable models in statistical analyses, categorical data analysis).

Selected graduate level courses from the Statistics Department with advisor approval (e.g. Bayesian statistics, nonparametric statistics).

Sample Plan of Study

The plan of study will depend on the student's career goals and research interests and should be completed in consultation with the Master's Committee.

Thesis/Comprehensive Exam Requirements

The student must complete: 1) Demonstration of Knowledge via a written exam; and 2) Oral Exam on the Demonstration of Knowledge.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

1. Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application form by January 15th for the next Fall cohort.
2. The three letters of recommendation
3. Curriculum Vita
4. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
5. Statement of purpose addressing the following:
a. Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU's program will benefit your career aspirations.

b. Describe interests or experience in designing empirical studies and/or analyzing empirical data. (500 words max.)

c. Describe interest or experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study. (250 words max.)

6. Official Graduate Record Examination (GRE) scores (preferred Verbal score > 151 and Quantitative score > 155)

7. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

EdSp in Educational, School, and Counseling Psychology

Degree Requirements

The EdSp requires students to select one of the three emphasis areas offered: Counseling Psychology; Mental Health Practices in Schools; School Psychology, Certification. Requirements differ for each emphasis area, so students should refer to their chosen emphasis area page for detailed requirements.

Admission Criteria

- Minimum GPA: 3.0
- Minimum TOEFL score:
  - Internet-based test (iBT)
    - Paper-based test (PBT)
    - 92 580
- Recommended GRE Score:

Application Deadlines

- Fall deadline:
  - December 1st Counseling Psychology and School Psychology Doctoral programs
  - January 15th Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEED)
  - February 1st Counseling Psychology Masters programs

Note: If an applicant is admitted but does not hold a bachelor's degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Official transcripts
- GRE scores
- TOEFL scores
- 3 letters of recommendation via the online application

- Personal statement and vitae via online application per departmental requirements

Admission Contact Information

Brooke Hartman (Hartmanem@missouri.edu)
16 Hill Hall; Columbia, MO 65211
573-882-7738

EdSp in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements

The program of study outlined for the degree must contain a minimum of 30 semester hours of approved graduate credit beyond the master's degree. No more than 12 semester hours of non-degree seeking (NGS) course work may be used in a program. Evidence of proficiency in the areas of educational statistics and research methodology must be shown prior to the candidates’ taking the final comprehensive examination. This will normally be provided through satisfactory completion of ESC_PS 7170 Introduction to Applied Statistics and ESC_PS 8020 Overview of Research Methods or equivalent. If not completed as part of the master’s degree, the program must include a course in the behavioral, social, historical, or philosophical foundations of education. The program may consist entirely of courses in education or may be made up, in part, of courses from other disciplines selected to fit the candidate’s professional needs. A minimum of 15 semester hours of the program must be courses offered in the College of Education. A minimum of 15 semester hours of the program must also be courses numbered 8000 or above. To adhere to the concept of a planned program, at least eight semester hours of the program must be completed after the Program of Study has been filed with the Graduate School.

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and should be completed in consultation with the student's advisor.

Comprehensive Examination Process

The Comprehensive Exam is administered once a year in July or August. The Comprehensive Exam is administered as a take-home exam and follows an essay/long answer response format. It is expected that responses will not exceed 10 pages (double-spaced; not including references) in length and will adequately provide both breadth and depth on the topic. Appropriate citations are expected. Attention should also be paid to grammar, APA style, and overall professional writing conventions. Students will have two consecutive weekends to complete the exam. Students schedule an oral exam after successfully passing the written portion of the comprehensive exam.

The Comprehensive Exam is designed as an integrative, culminating assessment of foundational knowledge of (1) counseling theories, assessment and practice, (2) research design, measurement, and statistics, (3) multicultural and professional issues, and (4) career development. Thus, the exam is designed to assess students’ ability to (a) use counseling theories and appropriate assessment strategies
to conceptualize clinical cases and to identify appropriate intervention strategies in clinical practice; (b) design research studies, including developing appropriate research questions, addressing issues related to a study’s internal and external validity, applying appropriate methods for the research methodology, and identifying appropriate statistical analyses; (c) understand multicultural, ethical and professional issues related to counseling psychology; and (d) apply appropriate vocational theories and assessment in practice.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (https://gradstudies.missouri.edu/admissions/eligibility-process/). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Office of Graduate Studies and the degree program to which you’ve applied before official admission to the University of Missouri.

EdSp in Educational, School, and Counseling Psychology with Emphasis in Mental Health Practices in Schools

The online Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/education-specialist/) program is intended for school personnel, educators and other community mental health professionals who work with children and adolescents in schools and community agencies. This includes elementary and secondary teachers, special education professionals, school counselors, school nurses, administrators, at-risk coordinators and resource officers, safety coordinators, substance abuse coordinators, speech/language pathologists, itinerant and migrant educators, and private practitioners.

Courses are designed to offer practical applications of psychological concepts and are taught by experts in the field. The program identifies and deals with issues that promote positive mental health of children and adolescents. Courses in the program provide a solid base to increase awareness, knowledge and skills in areas such as:

- Identifying and assessing evidence-based prevention and intervention strategies and programs
- Communicating effectively with parents, children and school personnel
- Building resiliency and optimism in children and adolescents
- Increasing awareness of multicultural and diversity issues
- Understanding mental, emotional, and behavioral factors in youth
- Managing crisis interventions
- Applying wellness management for self and others
- Implementing positive behavior support and strategies in the classroom
- Collaborating with families and other school personnel

Note: This program does not provide school counselor certification, nor any professional counseling licensure.

Website: Mental Health Practices in Schools (http://online.missouri.edu/degreeprograms/education/mental-health-practices-in-schools/education-specialist/).

Degree Requirements
The educational specialist degree is a 31-hour program of specialization built upon the master's degree. To earn the Mental Health Practices in Schools educational specialist degree, students complete 31 credit hours from among the courses listed below. The only required courses are the research methods (ESC_PS 8020) and capstone (ESC_PS 8490). At least 5 courses must be at the 8000 level. Students can select the remaining courses that best fit their educational and professional experience and interests.

Required Courses

- ESC_PS 8020 Overview of Research Methods 3
- ESC_PS 8490 Mental Health in Schools Capstone Paper 1

Elective Courses

- ESC_PS 7160 Developmental Aspects of Human Learning 3
- ESC_PS 7460 Foundations of School Mental Health 3
- ESC_PS 8087 Seminar in Educational, School, and Counseling Psychology (Empirically Supported Treatments and Interventions for Youth Mental Health) 3
- ESC_PS 8425 Effects of Maltreatment on Child and Adolescent Development 3
- ESC_PS 8430 Mental, Emotional, and Behavioral Disorders in Youth 3
- ESC_PS 8435 Wellness Management for School Personnel 3
- ESC_PS 8440 School Mental Health: Policy, Law and Ethics 3
- ESC_PS 8445 Building Resiliency and Optimism in Youth 3
- ESC_PS 8450 Diversity Issues in School Mental Health 3
- ESC_PS 8455 Bully and Youth Violence: Prevention and Reduction 3
- ESC_PS 8460 Communication and Collaboration with Children and Families 3
- ESC_PS 8465 Vital Issues in School Mental Health 3
- ESC_PS 8470 Preventions and Interventions in School Mental Health 3
- ESC_PS 8475 Proactive Behavior Management 3

Additional Electives are available through the other ESCP online programs (http://online.missouri.edu/degreeprograms/escp.aspx) with advisor approval.

Comprehensive Examination Process
Capstone paper
The program requires a capstone integrative paper allowing students to demonstrate the knowledge, skills, and competencies acquired through the program's course work.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational and Counseling Psychology (https://gradstudies.missouri.edu/degrecategory/educational-school-and-counseling-psychology/) program and the minimum requirements of the Graduate School (https://gradstudies.missouri.edu/admissions/eligibility-process/). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you have applied before official admission to the University of Missouri.

Admission criteria (EdSp)

1. Successful completion of the baccalaureate and master’s degree at an accredited college/university.
2. 3.0 or better grade point average in the last 60 hours of baccalaureate coursework
3. TOEFL score: Minimum 580 (paper) or 92 (ibt). Applies to non-native English speaking applicants only. If the non-native English-speaking applicant has successfully completed one year of full-time post-secondary (college-level) study in a country where English is the native language within the past two years, then the TOEFL is waived.
4. GRE scores are NOT required.

Application Process:

1. Complete the online Application to the Graduate School (https://gradstudies.missouri.edu/admissions/apply/).
2. As part of the submission process, applicants are required to upload unofficial copies of all transcripts to the online application.
   NOTE: If you are accepted by our academic program, you will then be asked to provide official copies of all transcripts to: Graduate School, University of Missouri, 210 Jesse Hall, Columbia, Missouri 65211.
3. Three letters of recommendation will need to be submitted via the online application. Each recommender will receive directions on how to submit the recommendation once you have entered their contact information in the application system.
4. You must also provide the following supplementary materials: Personal Statement and Vita/Résumé via the online Application to the Graduate School (https://gradstudies.missouri.edu/admissions/apply/). In your statement describe:
   a. Your previous/current experience serving in a teaching, helping or counseling role,
   b. Your interests and career objectives,
   c. How these interests and career objectives have developed, and
   d. How being accepted into the program will benefit your career aspirations and help you act upon your beliefs, goals and philosophy. Include interests and experiences working with diverse groups (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation, grade levels, ages), leadership roles, or other skills or experiences (not previously mentioned) that you believe distinguish you as a candidate for graduate study. (Please limit to 1000 words).
5. If your native language is other than English, the Test of English as a Foreign Language (TOEFL (http://www.toefl.org/)) is required. Please send your score to the Graduate School using school code 6875.
6. Please be sure to upload all supplemental materials BEFORE you submit the application.

For applicants currently enrolled as graduate students at MU:

1. Complete the Change of Degree (http://gradstudies.missouri.edu/forms-downloads/repository/change-degree.pdf) form.
2. Provide unofficial copies of your University of Missouri transcripts.
3. Provide 3 letters of recommendation.

Send application materials to Sandy Sites (SitesS@missouri.edu) or mail to the ESCP Dept., 16 Hill Hall, Columbia, MO 65211

Application deadline: None - rolling admission.

EdSp in Educational, School, and Counseling Psychology with Emphasis in School Psychology, Certification

Degree Requirements

Graduates of the Ed.S. program in School Psychology are prepared to work with children, youth, families, and educators to promote effective functioning in the areas of learning, behavior, and mental health in schools. Operating from a problem solving framework, our focus is on preparing data-based decision makers capable of intervening to address both individual- and systems-level challenges. Students develop professional competencies in assessment, intervention, consultation, and research/evaluation. Graduates of the Ed.S. program are eligible for state certification as a School Psychologist in Missouri and in most other states, though additional requirements may need to be fulfilled per each state’s certification rules.

Comprehensive Examination Process

The comprehensive examination for the Ed.S. in School Psychology includes two components: a portfolio documenting specific clinical experiences completed during the internship year and the Praxis II national School Psychology exam (administered by the Educational Testing Service).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

PhD in Educational, School, and Counseling Psychology

Degree Requirements

The PhD in Educational, School, and Counseling Psychology has several emphasis areas for a student to choose from. Please see the degree offerings (p. 420) page for information. A student must select an emphasis area to complete the degree.

Admission Criteria

- GRE score with combined score of 305 preferred
- Minimum TOEFL scores per the Graduate School

<table>

Application Deadlines

- Fall deadline:
  - December 1st Counseling Psychology and School Psychology Doctoral programs
  - January 15th Educational Psychology and Statistics, Measurement, and Evaluation in Education (SMEE)
  - February 1st Counseling Psychology Masters programs

Note: If an applicant is admitted but does not hold a bachelor’s degree in a related discipline or does not have relevant background course work, the applicant must complete prerequisite courses as specified by the faculty of the department.

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Official transcripts
- GRE score within the last 5 years
- TOEFL scores
- 3 letters of recommendation via the online application
- Personal statement and vitae via online application per departmental requirements

PhD in Educational, School, and Counseling Psychology with Emphasis in Counseling Psychology

Degree Requirements

I. GENERAL PSYCHOLOGY CORE* 27
Statistics and Research Methodology 12
Psychological Foundations 15

II. COUNSELING PSYCHOLOGY CORE 89
(Exclusive of and in addition to the General Psychology Core)
Historical and Research Foundations 9
before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application form by December 1st for the next Fall cohort.

- Three letters of recommendation
- Curriculum Vita
- Official academic transcripts of all previous undergraduate and graduate work
  - Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
- Statement of purpose addressing the following:
  a. Describe interests and experiences working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
  b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
  c. Describe (1) your previous experience serving in a helping or counseling role, (2) your interests and career objectives, (3) how these interests and career objectives have developed, (4) how these interests match those of specific program faculty, and (5) how being accepted into the program of your choice will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (1000 word maximum)
- Official Graduate Record Examination (GRE) scores for tests taken on or after August 1, 2015 should have a combined Verbal and Quantitative score of 305.
- TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

Applicants with a bachelor’s degree in a field not related to psychology will be required to complete 15 hours of prerequisite courses in the behavioral sciences (including an introductory statistics course) either prior to, or concurrently with, coursework in the program.

PhD in Educational, School, and Counseling Psychology with Emphasis in Educational Psychology

The Educational Psychology program is committed to the dissemination and development of knowledge and skills in human learning and cognition, development, and motivation. We use quantitative and qualitative methods to study how people’s thinking, motivation, and behavior change across time. We study how different social settings

Sample Plan of Study

A student’s plan of study will vary depending on her/his program track and career goals and should be completed in consultation with her/his academic advisor.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as a achieving a grade of “B” or better in each of the courses comprising the “core” courses for each of four emphasis areas. These courses are:

ESC_PS 7120 Theories and Techniques of Counseling
ESC_PS 8040 Counseling Methods and Practices
ESC_PS 8135 Foundations of Career Psychology

Comprehensive Examination Process

The Comprehensive Exam is administered once a year in July or August. The Comprehensive Exam is administered as a take-home exam and follows an essay/long answer response format. It is expected that responses will not exceed 10 pages (double-spaced; not including references) in length and will adequately provide both breadth and depth on the topic. Appropriate citations are expected. Attention should also be paid to grammar, APA style, and overall professional writing conventions. Students will have two consecutive weekends to complete the exam. Students schedule an oral exam after successfully passing the written portion of the comprehensive exam.

The Comprehensive Exam is designed as an integrative, culminating assessment of foundational knowledge of (1) counseling theories, assessment and practice, (2) research design, measurement, and statistics, (3) multicultural and professional issues, and (4) career development. Thus, the exam is designed to assess students’ ability to (a) use counseling theories and appropriate assessment strategies to conceptualize clinical cases and to identify appropriate intervention strategies in clinical practice; (b) design research studies, including developing appropriate research questions, addressing issues related to a study’s internal and external validity, applying appropriate methods for the research methodology, and identifying appropriate statistical analyses; (c) understand multicultural, ethical and professional issues related to counseling psychology; and (d) apply appropriate vocational theories and assessment in practice.

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student

Ethic and Legal Standards 3

like classroom, family, work, and peers affect people’s well-being, learning, and behavior. The study of educational psychology is relevant to teachers, coaches, athletes, nurses, counselors, software developers, trainers, social workers, program evaluators, and administrators.

Educational psychologists attempt to understand:
- how to improve learning, academic achievement, and motivation
- developmental influences on learning and well-being
- how society influences learning and behavior
- school influences on students’ development in other settings
- improving human performance

Degree Requirements

The Ph.D. program focuses on generating original research and consists of a minimum of 72 semester hours of graduate credit beyond the bachelor’s degree. The plan of study provides additional details about requirements. The following is a synopsis.

I. Core Statistics and Research Courses 21
ESC_PS 8020 Overview of Research Methods 3
ESC_PS 8082 Foundations of Educational and Psychological Measurement 3
ESC_PS 8850 Quantitative Foundations in Educational Research 3
ED_LPA 8957 Qualitative Methods in Educational Research I 3
ESC_PS 9660 Generalized Linear Modeling 3
Electives 6

II. Core Learning and Development 15
ESC_PS 8060 Lifespan Development 3
ESC_PS 8320 Advanced Human Learning 3
ESC_PS 8355 Cognition and Emotion 3
ESC_PS 9450 Motivation 3
Human Diversity (Relevant Course) 3

III. Electives 27
Students can take more than 6 research hours if they wish to enroll in more electives. Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Human Development and Family Science, Psychological Sciences, or Information Science and Learning Technology.

IV. Dissertation 6-18

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and should be completed in consultation with the Doctoral Dissertation Committee.

Qualifying Process

The Graduate School requires that students pass a qualifying examination as a condition of official admittance to the PhD program. Acceptable performance on the Departmental Qualifying Examination is defined as a achieving a grade of “B” or better in each of the courses comprising the “core” courses. For educational psychology, these courses are the following:

- ESC_PS 8060 Lifespan Development
- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC_PS 8355 Cognition and Emotion

Comprehensive Examination Process

To complete the comprehensive exam, students must complete evidence of professional activity, evidence of teaching, two assigned papers, and an oral exam. The two papers are administered as a take-home exam with one week for completion of each paper. The procedure is described in a separate document. The papers can be written during any semester. They must be scored as passing before the oral exam can be conducted. The oral exam must be scheduled during fall or spring semesters.

Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with the doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degrecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe experiences teaching, designing instruction, and engaging in research and how these experiences have prepared you for graduate study. (500 word maximum)
   b. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty (3) your career objectives, and (4) how being accepted into MU’s program will benefit your career aspirations. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for tests taken within the last 5 years should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)
PhD in Educational, School, and Counseling Psychology with Emphasis in Health Education and Promotion

Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Educational, School, and Counseling Psychology (p. 420).

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee.

Admissions

This program is not accepting admissions at this time.

PhD in Educational, School, and Counseling Psychology with Emphasis in School Psychology, Certification

The doctoral program in School Psychology is focused on training the next generation of research, teaching, clinical, and policy leaders who are singularly focused on solving significant societal problems in education and psychology. We utilize an integrated systems approach to address academic and behavioral evidence-based practice with world-class research lines in prevention science, assessment, and intervention. Our graduates are prepared to work in higher education and research settings as well as clinical settings, such as schools, community health agencies, and hospitals. The PhD program is accredited by the American Psychological Association and approved by the National Association of School Psychologists. The Doctoral (PhD) program in School Psychology is completed concurrently with the Masters in Arts (MA) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.Ed. coursework.

Sample Plan of Study

Below is a sample plan of study for completion of the coursework requirements for the Ph.D. in school psychology; however, each individual student’s plan of study varies depending on their pace in the program and individual choices when options are available. The Doctoral program in School Psychology is completed concurrently with the Masters in Education (M.A.) program in School Psychology. As a result, the first year after admission to the program is predominately focused on the M.A. coursework.
### Qualifying Process

The qualifying examination for the Ph.D. in School Psychology includes a take-home written examination. It is typically completed at the start of the Fall semester of year 2 in the program, presuming successful completion of ESC_PS 8125, ESC_PS 9125, and ESC_PS 8082.

### Comprehensive Examination Process

The comprehensive examination for the Ph.D. in School Psychology includes a take-home written examination followed by an oral examination with the doctoral committee. This examination process is typically completed at the beginning of the winter semester in year 3 or the start of the fall semester in year 4. Students jointly enrolled in the Masters of Arts program in School Psychology must have completed their master’s thesis/manuscript prior to sitting for their Doctoral Comprehensive Exams.

### Dissertation Requirements

After working with the academic advisor on developing a dissertation proposal, the student meets with her/his doctoral program committee to obtain approval of the written dissertation proposal. This happens before data collection begins. After the project is completed, the student submits a written dissertation and defends her/his dissertation project to the doctoral program committee. The dissertation proposal must be approved by committee prior to applying for terminal internships.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/ degreecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application form by December 1 for the next Fall cohort.

1. Three letters of recommendation
2. Curriculum Vita
3. Official academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe interests and experiences with working with people from diverse backgrounds (e.g. ethnic, cultural, socio-economic, religious, ability status, sexual orientation). How have these experiences influenced you? (250 word maximum)
   b. Describe experiences that demonstrate your potential for leadership that you believe distinguish you as a candidate for graduate study. (250 word maximum)
   c. Describe (1) your research interests that you hope to pursue in graduate school (2) how these interests match those of specific faculty. (Please limit to 500 words)
   d. Describe (1) your career objectives (2) how these career objectives have developed, and (3) how being accepted into MU's program will benefit your career aspirations and help you act upon your beliefs, goals, and philosophy. (Please limit to 500 words)
5. Official Graduate Record Examination (GRE) scores for test taken within the last 5 years should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher)

### PhD in Educational, School, and Counseling Psychology with Emphasis in Statistics, Measurement, and Evaluation in Education

The Statistics, Measurement, and Evaluation in Education program offers courses in applied statistics, from the quantitative foundations of educational research to advanced methods such as multivariate statistics, multilevel modeling, and latent variable modeling. We also offer a number of courses in educational measurement covering topics such as classical test theory, item response theory, and generalizability theory. In addition, our students have the opportunity to take a wide range of advanced statistics and quantitative methods courses from probability, sampling methodology, and categorical data analysis to stochastic theory, time series analysis, Bayesian statistics, and other cutting-edge quantitative techniques. We train our students in various statistical software programs including SPSS, SAS, R, Mplus, Amos, HLM, and BILOG-MG. Our students also take courses in learning theories, aspects of human development, and program evaluation.

III. General Electives 6

Elective courses can be taken from Educational, School, & Counseling Psychology or from other departments such as Psychological Sciences, Statistics, or Information Science and Learning Technology.

IV. Dissertation 6-18

Sample Plan of Study

The plan of study will depend on the student’s career goals and research interests, and it should be completed in consultation with the doctoral dissertation committee.

Qualifying Process

Acceptable performance on the departmental qualifying examination is defined as achieving a grade of “B” or better in each of the courses comprising the selected courses. If a student receives lower than a “B” on a course, the student must retake the course. Failure to receive the appropriate grade a second time could result in dismissal from the program. For Statistics, Measurement, and Evaluation in Education, these courses are the following:

- ESC_PS 8082 Foundations of Educational and Psychological Measurement
- ESC_PS 8020 Overview of Research Methods
- ESC_PS 8850 Quantitative Foundations in Educational Research

Comprehensive Examination Process

To complete the comprehensive exam, students must complete: 1) Curriculum Vitae including teaching experience, 2) Demonstration of knowledge via written exam, 3) Demonstration of research via published work, submitted manuscript, conference paper presentation, or a literature review created specifically to meet this requirement; 4) Oral exam on both the demonstration of knowledge and demonstration of research items from above.

Dissertation Requirements

The student works with an academic advisor to develop a dissertation proposal. The student meets with the doctoral program committee to obtain approval of the written dissertation proposal. Upon study completion, the student defends the dissertation to the doctoral program committee. The defense can occur only when MU is officially in session.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Educational, School & Counseling Psychology program (https://gradstudies.missouri.edu/degerecategory/educational-school-and-counseling-psychology/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php).

Apply online by submitting the following documents using the MU Graduate School (https://applygrad.missouri.edu/apply/) application form by January 15th for the next Fall cohort.

1. The three letters of recommendation
2. Curriculum Vitae
3. Unofficial academic transcripts of all previous undergraduate and graduate work
   a. Minimum undergraduate GPA of 3.0 from an accredited institution in psychology, education, or a related major.
4. Statement of purpose addressing the following:
   a. Describe (1) your research interests that you hope to pursue in graduate school, (2) your career objectives, and (3) how being accepted into MU’s program will benefit your career aspirations (500 words max).
   b. Describe your experiences in educational measurement, assessment, or evaluation (250 words max).
   c. Describe interests and experience in analyzing empirical data. Briefly describe why you have chosen particular statistical models to answer the research questions (250 words max).
   d. Describe experiences that demonstrate your potential in applied, theoretical, and/or computational statistics that you believe distinguish you as a candidate for graduate study (250 words max).
5. Official Graduate Record Examination (GRE) scores for tests taken within the last 5 years should have a combined Verbal and Quantitative score of 305.
6. TOEFL for international students (preferred score of 580 for paper test, 92 iBT, IELTS 6.5 or higher).

Educational Leadership & Policy Analysis

ELPA - Our mission is to create knowledge while preparing leaders to critically shape and transform educational issues, policies, and practices. Consider ELPA if you:
• Want to improve your organizational leadership skills and knowledge in elementary, secondary, or postsecondary settings
• Are interested in principal or superintendent certification
• Want to work in student affairs or higher education administration
• Want to become a scholar or researcher in an academic setting
• Desire to shape policy through legislative or research activity

Department of Educational Leadership and Policy Analysis
202 Hill Hall
Columbia, MO 65211
phone: 573-882-8221
fax: 573-884-5714
email: elpagrad@missouri.edu

Faculty

Professor J. Hart**, S. Graham**
Assistant Professor M. Dorine-Williams*, S. W. Lee*, M. Williams*
Associate Teaching Professor G. Malfatti
Assistant Teaching Professor C. Belcher*, J. Fellibaum-Toston*, B. Whitaker*
Distinguished Adjunct Professor T. Whitaker*
Associate Professor Emerita K. Cockrell*, P. Placier*, J. Simmons*
Clinical Associate Professor Emeritus D. Cockrell*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in educational leadership and policy analysis, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

• MA in Educational Leadership and Policy Analysis (p. 449)
  • with emphasis in Higher Education (p. 449)
• MEd in Educational Leadership and Policy Analysis (p. 450)
  • with emphasis in PK-12 Educational Leadership and Administration, Elementary Principal, Certification (p. 450)
  • with emphasis in PK-12 Educational Leadership and Administration, Secondary Principal, Certification (p. 450)
  • with emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 451)

Director of Graduate Studies: Sarah Diem

About ELPA's Graduate Programs

The graduate programs in the Department of Educational Leadership and Policy Analysis are designed to meet the specific educational needs of the student in a particular area of emphasis. Graduates find employment in a wide range of settings including colleges and universities, public schools, policy agencies, professional associations, government and business and industry.

The PhD Program in ELPA requires a minimum of 60 hours beyond the master’s degree. The goal of the PhD program is the preparation of professional researchers and scholars who have high levels of competence in conducting research that adds to the knowledge base.

The program also has a goal of meeting the student’s individual career goals and interests through the development of an appropriate plan of study. Each emphasis area has slightly different requirements and areas of focus; however, all 3 emphasis areas require a department-wide
core; emphasis area coursework; electives; a research core; and the completion of a minimum of 6 hours for the dissertation.

**The Statewide Cooperative EdD Program** in Educational Leadership is a cohort program designed for practicing educational leaders to enhance their knowledge and competencies so they provide optimal leadership in organizations that educate a wide range of learners from youth to adult. The program’s curriculum is designed to prepare leaders who are inquiring, reflective practitioners who are competent in defining and solving complex problems in education.

The **Educational Specialist (EdSp) Program** is designed to enhance the knowledge and competencies of K-12 educational administrators and to lead to advanced principal certification and/or superintendent certification. The program has a thematic, integrated, problem-based curriculum intended to prepare school and district leaders who are inquiring, reflective practitioners. The curriculum is aligned with state standards for certification.

The department’s **Master’s Programs** are intended to provide initial preparation for leaders in a variety of educational contexts, including higher education and PK-12 schools. Programs vary according to emphasis area and are designed to meet student’s individual career goals and interests — e.g., student affairs administration, initial principal certification and higher education administration.

A minimum of 33 credit hours is required for the M Ed or MA in Higher Education and a minimum of 30 hours is required for the M Ed in Educational Leadership.

**Note:** Per ELPA policy, students have 5 years to complete their MA or M Ed degree.

**Graduate Certificates:**
- College Teaching
- Education Policy
- Higher Education Administration

**Satisfactory Rate of Progress**

All ELPA students are expected to make satisfactory progress toward their degrees. Satisfactory progress of students will be determined through an annual review by the director of graduate studies, graduate students’ academic advisors and their committees. Judgments about satisfactory progress will include consideration of the following:

- University-wide time limits for degree completion
- GPA for departmental courses
- Continuous enrollment and active engagement in course work or research (EdD and PhD)
- Student performance in research credits
- Timely resolution of incomplete grades

**Financial Aid from the Program**

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

---

**MA in Educational Leadership and Policy Analysis**

**Degree Requirements**

Master’s degree candidates can complete the required 33 hours by selecting courses with their advisers that will most fully meet the students needs. At least 16 hours in professional education must be taken at the 8000 or 9000 level.

A maximum of 6 semester hours of graduate-level graded course work completed at another accredited college or university may be transferred with approval of the adviser, the department director of graduate studies and the Graduate School. Up to 12 hours earned as a post-baccalaureate graduate student at MU may be applied to the degree pending admission to the program and approval of higher education faculty.

Students pursuing a master of arts (MA) degree are required to take 12 hours (of the 33) dedicated to research design, methods, and thesis writing. If the thesis is not successfully completed in 33 hours, additional research hours may be required. Because of the time involved in completing a thesis, the program may take longer than 2 years for full-time students.

The MA in Educational Leadership and Policy Analysis has emphasis areas in Higher Education (p. 449). Please see the individual emphasis area page for degree requirements and admissions information.

Admissions

Contact Information:
College of Education
202 Hill Hall
573-882-8221
573-884-5714 (fax)
ELPA website: https://education.missouri.edu/educational-leadership-policy-analysis/

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MEd in Educational Leadership and Policy Analysis

Degree Requirements

The MEd in Educational Leadership and Policy Analysis has emphasis areas in Higher Education (p. 450), PK-12 Educational Leadership and Administration, Elementary Principal, Certification (p. 451), PK-12 Educational Leadership and Administration, Secondary Principal, Certification (p. 452), and PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 451). Please see the individual emphasis area page for degree requirements and admissions information.

Elective 1
Thesis/Non-Thesis Requirements

In addition to 33 hours of coursework, to complete a Master of Education (MEd), students must write a reflective capstone paper, drawing on knowledge gained throughout the program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis/) and the minimum requirements of the Graduat (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php)ie School. Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/degree/higher-education-med/#apply

MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary Principal, Certification

At this time we are not offering an MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary Principal, Certification.

You do have the option of getting both certifications – Elementary and Secondary. Please refer to MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 451).

MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Secondary Principal, Certification

At this time we are not offering an MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Secondary Principal, Certification.

You do have the option of getting both certifications – Elementary and Secondary. Please refer to MEd in Educational Leadership and Policy Analysis with Emphasis in PK-12 Educational Leadership and Administration, Elementary and Secondary Principal, Certification (p. 451).

EdD in Educational Leadership

The University of Missouri Statewide Cooperative EdD Program (https://education.missouri.edu/degree/educational-leadership-edd/) is an innovative, cohort-based program in educational leadership. This professional doctorate enhances knowledge and competencies of leaders in PK-20+ educational organizations. The emphasis of the doctor of education program is on developing effective, thoughtful, and reflective practitioners who are competent in identifying and solving complex problems of practice in educational settings.

Locations

We work with four partner institutions to deliver the program at locations throughout the state of Missouri:

• Missouri State University
• Northwest Missouri State University
• Southeast Missouri State University
• University of Central Missouri

Students are employed full time as educational leaders while in the program. Following graduation, many remain in their current positions, often receiving a pay raise for completing an advanced degree. Several of our students have also received promotions while in the program or soon after graduating, and some have even transitioned into higher level positions within other educational organizations.

Degree Requirements

This educational doctorate program is known as The Statewide Cooperative EdD Program.

The EdD program requires a minimum of 76 credit hours beyond the baccalaureate degree. The program, offered in a cohort format, includes 34 hours of course work in 6 contiguous semesters, beginning in the summer of odd years and concluding in the spring semester 2 years later. In addition to course work credit, 12 credit hours of dissertation-in-practice research are required.

Admission Contact Information

Educational Leadership & Policy Analysis
202 Hill Hall
573-884-2163
573-884-5714 (fax)
http://edd.missouri.edu/

Admission Criteria

• GPA of 3.0 (4.0 scale) in the last 60 hours of undergraduate education
• GPA of 3.5 (4.0 scale) in Graduate School (Master’s Degree)
• A competitive GRE score - only required if both of the above GPA requirements are not met.
• Official English Proficiency Test Scores (if applicable): Minimum scores accepted by the MU Graduate School for TOEFL, IELTS, PTE, or the Cambridge C1 Advanced Exams for non-native English Speakers: https://gradschool.missouri.edu/admissions/eligibility-process/international-applicants/

EdD Application Information
This cohort program accepts applicants only during even-numbered years with a deadline of October 15.

http://edd.missouri.edu/

Candidates who are selected during the initial screening are invited to participate in an Interview Day, which includes completing a problem-solving activity and interviewing with program faculty and alumni.

**Note:** Admissions screening and decisions for all graduate programs are not made until all required materials have been submitted. Admissions recommendations are based on a profile developed from data that include undergraduate (last 60 hours) and graduate grade point averages, scores on the Graduate Record Examinations (GRE), recommendations, evidence of consistency between candidate and program goals, and relevant organizational or educational leadership experience.

For additional information: [https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/educational-leadership](https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/educational-leadership)

For general questions: 573-884-2163

---

**EdSp in Educational Leadership and Policy Analysis**

The EdSp program prepares students to become inquiring, reflective school leaders at the school and district levels. We serve a diverse population of graduate students who are making a positive difference in students’ lives. The program is delivered through a series of authentic learning experiences and formative assessments designed to meet the individual and group needs of students in each class. Students are expected to demonstrate their competence across a broad range of school and district issues such as instructional leadership, organizational development, fiscal and legal compliance, professional ethics and responsibility, professional development, and internal/external interpersonal relationships. Classes are typically taught as ‘hybrid’ courses, which include online coursework and face-to-face meetings on weekends. Typically, in the Fall and Spring semesters, classes meet once a month on Friday evenings and Saturdays, during the day. In the summer, courses meet on Fridays and Saturdays, but only for three weekends during the first (June) or second (July) summer sessions.

The program meets the requirements for both building-level and district-level certification requirements in Missouri, as well as many other states. Certification may require additional or particular course choices. Check with your advisor.

The EdSp requires a student to select one of three emphasis areas. While the general degree requirements are listed below, students should refer to the emphasis area pages (p. 448) for detailed information on degree requirements.

**Degree Requirements**

The EdSp degree is a 30-hour or more program of study, which includes the following required courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED_LPA 8417</td>
<td>Site-Level Organization and Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 8419</td>
<td>Structures and Processes for Effective Schools</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 8423</td>
<td>Advanced Leadership for Learning Environments</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 8424</td>
<td>Education Politics and Policymaking</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 8431</td>
<td>Leadership for Data-Driven Change (this course may be waived if student had similar course in Master's program)</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 9420</td>
<td>Superintendent: Fiscal Leadership and Management</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 9424</td>
<td>Superintendent: Instructional Leadership</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 9429</td>

<td>3</td>
</tr>
<tr>
<td>ED_LPA 9435</td>
<td>Superintendent: Legal Leadership and Management</td>
<td>3</td>
</tr>
<tr>
<td>ED_LPA 9461</td>
<td>Ethics in Education</td>
<td>3</td>
</tr>
</tbody>
</table>

**Internship Requirement**

Two internships are offered as part of the EdSp program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ED_LPA 9481</td>
<td>Internship in Educational Leadership and Policy Analysis (Principal Internship)</td>
<td>3-4</td>
</tr>
<tr>
<td>ED_LPA 9481</td>
<td>Internship in Educational Leadership and Policy Analysis (Central Office/ Superintendent Internship)</td>
<td>4</td>
</tr>
</tbody>
</table>

Internship hours will vary depending upon how many certifications the student desires. Students may take more than six hours of electives if the student does not need the internship credit associated with a particular certification (building or district level). If a student already has, or does not desire to have, any type of certification, then internship courses are not required.

</tbody>
</table>

Internship Requirement

Students may become eligible for both elementary and secondary level principal certifications by completing two internships, but in two or three semesters (a total of 4 graduate hours). To be eligible for PK-12 building level certifications, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over two or three semesters and two hours of coursework per semester (a total of 4 graduate hours).

To be eligible for central office/superintendent certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

All internships may be completed simultaneously, if the student's workday and class schedule allows. (For two building level internships and one central office internship, however, it is unlikely that a student would be able to complete all requirements.) The total number of graduate hours required for both elementary principal and central office/superintendent certifications is 8. NOTE: DESE requires two years of building-level administration before they will issue a superintendent certificate.

Qualifying Process
Contact department for more information.

Comprehensive Examination Process
Upon completion of course work and during the semester of graduation, all students must take and pass a capstone.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdSp in Educational Leadership and Policy Analysis (https://gradstudies.missouri.edu/degreecategory/educational-leadership-policy-analysis/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

For application instructions, see: https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/pk-12-administration/ (http://catalog.missouri.edu/undergraduategraduate/collegeofeducation/educationalleadershippolicyanalysis/edsp-educational-leadership-policy-analysis-emphasis-pk12-elem-sec-princ-super-cert%20https://education.missouri.edu/educational-leadership-policy-analysis/degrees-programs/pk-12-administration/)

The internship experience required by ELPA for graduation and recommendation to the MO DESE for secondary principal certification is gained over two semesters and two hours of coursework per semester (a total of 4 graduate hours). To be eligible for secondary building level certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.
Certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

Students may become eligible for central office/superintendent certification by completing the internship experience required by ELPA for graduation and recommendation to the MO DESE for central office/superintendent certification. This is gained over three semesters and two hours of coursework per semester (a total of 6 graduate hours). To be eligible for central office/superintendent level certification, 300 internship hours must be completed. Specific activities and expectations are provided to students by their internship advisor.

The internships may be completed simultaneously, if the student's workday and class schedule allows. The total number of graduate hours required for both secondary principal and central office/superintendent certifications is 10. NOTE: DESE requires two years of building-level administration before they will issue a superintendent certificate.

## PhD in Educational Leadership and Policy Analysis

### Degree Requirements

The PhD Program in ELPA requires a minimum of 60 hours beyond the master’s degree. The PhD in Educational Leadership and Policy Analysis has several emphasis areas for degree choices. For detailed information on degree requirements, please refer to the emphasis area pages (p. 448). Each emphasis area has slightly different requirements and areas of focus. However, all three emphasis areas require a department-wide core, emphasis area coursework, electives, a research core, and the completion of a minimum of 6 hours for the dissertation.

Educational Studies

Dr. Casandra Harper Morris  
Department of Educational Leadership and Policy Analysis  
202 Hill Hall  
573-882-2818  
harpercas@missouri.edu

The Bachelor of Educational Studies (BES) is for students with interests in the scientific and scholarly study of education and/or education-related careers in non-school settings. Specific areas of interest may include learning theory, technology in education (including game design), educational and community leadership, organizational change, and policies that shape learning environments. BES coursework provides a foundation in educational theory, research, and practice that engages students in settings where they can influence change (e.g., schools; international contexts; student affairs; churches; sports, non-profit, and private organizations).

This degree may be completed on campus or online and offers an interdisciplinary approach with flexibility to personalize a program of study based on career aspirations and interests.

For information about the online BES program, contact the College of Education Advising Office.  
Phone: 573-882-2818  
Address: 101 Hill Hall

Assistant Professor  

Assistant Teaching Professor  
J. Alston, C. L. Beau, B. Brendler, A. Klimczak, K. Robinson

Associate Professor  
D. Adkins , J. Bossaller, I. Jahnke, H. M. Sandy, C. A. Seavey

Associate Professor Emeritus  
J. A. Caplow, T. R. Kostantek

Professor  
D. Johassen, R. M. Marra, J. L. Moore, J. Strobel

Professor Emeritus  
B. Allen, J. M. Budd, S. Erdelez, G. Fitzgerald, J. M. Laffey, M. E. Sievert, J. Wedman

Teaching Professor  
L. R . Esser. J. L. Howland,

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

- **Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees.** Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- • BES in Educational Studies (p. 461)
  - with emphasis in Interdepartmental (p. 462)

Graduate

For graduate degree programs related to educational studies, please see the Department of Educational Leadership and Policy Analysis (p. 448) or other College of Education (p. 416) programs. You might also browse the complete list of degree options (p. 20) at the University of Missouri.

BES in Educational Studies

Degree Program Description

The Bachelor of Educational Studies (BES) is for students with interests in the scientific and scholarly study of education and/or education-related careers in non-school settings. Specific areas of interest may include learning theory, technology in education (including game design), educational and community leadership, organizational change, and policy. BES coursework provides a foundation in educational theory, research, and practice that engage students in settings where they can influence change (e.g., schools; international contexts; student affairs; churches; sports, non-profit, and private organizations). The College of Education will not recommend certification to teach in the public schools on the basis of this degree. The Bachelor of Educational Studies may be completed on campus or online. Students interested in this degree on campus may complete an individualized major course of study developed with an advisor from the office of Advising Services.

Major Program Requirements

Candidates for the BES degree must complete a total of at least 120 semester hours of college credit applicable to the Bachelor of Educational Studies degree.

The remaining degree program graduation requirements are as follows:

1. The candidate for the Bachelor of Educational Studies degree must meet the general education requirements of MU.

2. The candidate must complete at least 24 semester hours of course work offered by the College of Education in accordance with the candidate’s educational and career objectives.
3. The candidate must complete at least one area of concentration totaling 24 or more semester hours (exclusive of 2 above) in accordance with the candidate’s educational and career objectives.

4. The candidate must have a cumulative GPA of at least 2.500 based upon all MU coursework as well as an overall GPA of 2.500 based upon all college coursework completed.

5. The candidate must meet the residence requirement of MU.

6. Candidates shall have a professional practicum or field experience for academic credit appropriate to their degree program. This credit shall be for a minimum of 2 credit hours. The instructor of record for this experience will be a faculty member within the College of Education.

7. The candidate must be recommended for the degree by the faculty of the College of Education.

8. At 60 credit hours of completed coursework, students will be required to complete a Graduation Plan that will serve as a preliminary graduation check.

9. Degree candidates must earn 30 of their last 36 semester hours of credit through the University of Missouri-Columbia in order to obtain the degree of Bachelor of Educational Studies.

Semester Plan
This degree does not currently have a sample semester plan. Please schedule an appointment with a College of Education academic advisor (MizzouEdAdvising@missouri.edu) to discuss courses.

BES in Educational Studies with Emphasis in Interdepartmental

Degree Program Description
The Bachelor of Educational Studies (BES) is for students with interests in the scientific and scholarly study of education and/or education-related careers in non-school settings. Specific areas of interest may include learning theory, technology in education (including game design), educational and community leadership, organizational change, and policy. BES coursework provides a foundation in educational theory, research, and practice that engage students in settings where they can influence change (e.g., schools; international contexts; student affairs; churches; sports, non-profit, and private organizations). The College of Education will not recommend certification to teach in the public schools on the basis of this degree. The Bachelor of Educational Studies may be completed on campus or online. Students interested in this degree on campus may complete an individualized major course of study developed with an advisor from the office of Advising Services.

Major Program Requirements
Candidates for the BES degree must complete a total of at least 120 semester hours of college credit applicable to the Bachelor of Educational Studies degree.

The remaining degree program graduation requirements are as follows:

1. The candidate for the Bachelor of Educational Studies degree must meet the general education requirements of MU.

2. The candidate must complete at least 24 semester hours of course work offered by the College of Education in accordance with the candidate’s educational and career objectives.
in order to obtain this degree. Coursework focuses on development of the knowledge, skills, and dispositions needed to support teaching and learning in a variety of diverse settings, and includes elementary methods courses designed to support elementary school teaching and learning in all subject areas. Each semester includes extensive experiences in elementary classrooms working with teachers and children, with immediate opportunities to put course ideas into practice. Placements are carefully chosen to represent schools that represent diverse demographics and populations. The culminating Senior Year On-Site Program (SYOSP) is a unique yearlong internship that gives interns the opportunity to experience all facets of the teaching profession. SYOSP is designed to immerse the interns in the life and culture of a school community, and begins with teacher back-to-school meetings and assisting with classroom set-up. Interns are regarded as full-time members of the school faculty and participate in all school events and experiences such as teacher workdays, professional learning communities, and data team meetings. Students will spend a minimum of three full days per week in the schools during the first semester while also completing a full course load that complements the internship. During the second semester, the internship extends to five full days in a single classroom where the SYOSP intern completes the student teaching experience.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and degree requirements (p. 463). Please meet with a Mizzou Ed Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

The BSEd in Elementary Education has an emphasis area in Elementary Education. Please see the emphasis area page for a semester plan.

BSEd in Elementary Education with Emphasis in Elementary Education

Degree Program Description

The Elementary Education program leads to a Bachelor of Science in Education in Elementary Education, grades one through six. Coursework focuses on development of the knowledge, skills, and dispositions needed to support teaching and learning in a variety of diverse settings, and includes elementary methods courses designed to support elementary school teaching and learning in all subject areas. Each semester includes extensive experiences in elementary classrooms working with teachers and children, with immediate opportunities to put course ideas into practice. Placements are carefully chosen to represent schools that represent diverse demographics and populations. The culminating Senior Year On-Site Program (SYOSP) is a unique yearlong internship that gives interns the opportunity to experience all facets of the teaching profession. SYOSP is designed to immerse the interns in the life and culture of a school community, and begins with teacher back-to-school meetings and assisting with classroom set-up. Interns are regarded as full-time members of the school faculty and participate in all school events and experiences such as teacher workdays, professional learning communities, and data team meetings. Students will spend a minimum of three full days per week in the schools during the first semester while also completing a full course load that complements the internship. During the second semester, the internship extends to five full days in a single classroom where the SYOSP intern completes the student teaching experience.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

### Faculty

**Professor** R. Marra**, J. Moore**, J. Strobel**  
**Associate Professor** D. Adkins**, J. Bossaller**, I. Jahnke**, H. Mouaison-Sandy**  
**Assistant Professor** S. Buchanan**, H. Cho**, T. Gibson**, D. Oprean*, X. Xu**  
**Teaching Professor** J. Howland*  
**Assistant Teaching Professor** J. Alston*, B. Brendler*, A. Klimczak*, K. Robinson*,  

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- **Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

### Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education (specifically, the Bachelor of Educational Studies (p. 461)), and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

### Graduate

- PhD in Information Science and Learning Technologies (p. 465)

### About the PhD in Information Science & Learning Technologies

In January 1997, the School of Information Science & Learning Technologies (SISLT) became the home for MU’s graduate programs in Library and Information Science and Educational Technologies as well as a new, interdisciplinary doctoral program in Information Science & Learning Technologies.

As a SISLT doctoral student you can follow interdisciplinary paths. Approaches to inquiry include technical, cognitive, epistemological, cultural, political, and economic aspects of informing and learning. Interest areas include:

- Advanced study of contemporary learning and instructional theories  
- Learner-centered design, interface design, and information access design
PhD in Information Science and Learning Technologies

About the Program

The PhD program prepares professionals to understand and influence learning, information and performance in diverse settings, especially through the use of interactive technologies. We seek individuals who are committed to conducting research that integrates theory and practice.

You will gain the competencies required to:

- Analyze specific informational organization and retrieval, learning and performance needs and evaluate systems to meet these needs.
- Design, develop and implement technologies and technological interventions to improve information organization and retrieval, learning and performance.
- Conduct systematic research, which contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology.

Degree Requirements

1-3 master's level conceptual courses in Educational Technology or Library Science (if entering doctoral program without Master's in Educational Technology, Library Science, or a related field)

Doctoral Seminar Courses (9 credit hours)

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Research Methodologies (minimum of 9 credit hours)

9 credit hours minimum includes: at least one course in qualitative research design and one course in quantitative research design. You should choose research methods courses that will support your dissertation. You may choose them from the College of Education’s research method courses, or you may look outside the College of Education if your Program of Study committee thinks it is appropriate.

</tbody>
</table>

Support Field (9 or more credit hours)

Coordinated coursework related to an area of emphasis outside IS_LT and research courses selected in consultation with your program committee

Dissertation

Course work, internships and independent study projects support the achievement of these competencies, and your program centers on producing a portfolio of achievements indicating that the competencies have been attained. While course work supports production of the portfolio, we encourage students to develop products that cut across several courses, resulting in products that are personally satisfying, solve real problems and represent high quality work. We are particularly interested in products developed in collaboration with other students, faculty, practicing professionals and others beyond our program and campus.

The program culminates with a significant research effort - the dissertation - that contributes to the knowledge base of learning, information organization and retrieval, performance and/or technology. Whether one major study or a series of smaller studies, the research is designed to position our graduates alongside the leading theorists, researchers and practitioners in the field. There is no minimum number of 9090 research hours.

Sample Plan of Study

During your first two academic semesters, you will work with your assigned advisor to select courses and identify Professional Immersion activities that will successfully lead toward the completion of your degree. During this same time period, you should work to establish professional relationships with faculty in SISLT and your supporting field who you would like to include on your Program Committee. Prior to the beginning of your second academic year of study, you must have identified your Program Committee and conducted a Program of Study meeting with your Program Committee. Early approval of your Program of Study will enhance your academic experience in SISLT. This is a very important part of the degree planning process; failure to receive approval of your Program of Study prior to the second academic year may mean that courses or activities completed afterward may not count toward your degree.

Qualifying Examination

Approximately one to two semesters after you have had your Program of Study and Residency plan approved by your committee, AND BEFORE you may complete your portfolio and take comprehensive exams, you will be required to complete a qualifying examination. The exam task will require you to complete a task that academic professionals would be required to perform. For example, we might have you provide a scholarly review of a journal or conference paper submission. Your advisor will provide more details.

Comprehensive Examination Process

The comprehensive examination is an assessment of your comprehensive knowledge of information science and learning technologies. It is your responsibility to inform your committee members of your intent to complete your comprehensive exam prior to the beginning of the semester in which you plan to complete the exam. The IS&LT examination consists of three parts:
Dissertation Requirements

You should become involved in research throughout your program so that, by the time the comprehensive examination is completed, you have a well-formulated topic for research. Research may include required coursework activities, collaborations with faculty, or an independent effort. Earlier research can serve to explore a dissertation topic, serve as a pilot study, or become part of a dissertation prospectus. However, formal approval of a dissertation prospectus by your Committee must precede the serious pursuit of the study.

Dissertation Committee

Following the completion of the comprehensive examination, the responsibility of the Program Committee is completed. You will then form a committee to direct your dissertation. This committee may, but does not have to, consist of the same members as the Program Committee. You are encouraged to include those faculty members who can best support your line of research as members of your Dissertation Committee. During your academic program, your interests may change and should be reflected in the Dissertation Committee membership. The Dissertation Committee must consist of a minimum of three SISLT faculty members. The Dissertation Committee chair must be a member of the MU doctoral faculty. A faculty member or practitioner holding a terminal degree from outside of SISLT who has expertise in your research may be added as a special Committee member with program approval. At least one member must be from a program other than IS&LT, typically from your minor or supporting field.

Dissertation Proposal Meeting

You will be required to schedule a dissertation proposal meeting prior to beginning your research. Your Dissertation Committee must approve your conceptualization and methodology prior to beginning any data collection. The proposal meeting is open to all faculty and students in the School. The proposal should include the first three chapters (Chapter 1: Rationale for the Study, Chapter 2: Literature Review, Chapter 3: Description of Methodology) of the dissertation unless your Committee has approved an alternative form.

Dissertation Defense

After receiving your Dissertation Chair’s approval, you may schedule your dissertation defense. A copy of your dissertation must be sent to each committee member at least three weeks prior to the defense meeting. Other faculty, students, and staff may also attend your oral defense. It will be announced to the entire program at least one week prior to the scheduled examination time. These people will be excused while the Committee evaluates your performance.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Information Science and Learning Technologies program (http://sislt.missouri.edu/islt/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Learning, Teaching and Curriculum

Professionals interested in advancing their careers in education can specialize in a variety of disciplines in MU's Department of Learning, Teaching and Curriculum. LTC specializes in teacher preparation and in graduate programming for professionals in education. Students find challenging, yet rewarding, opportunities through MU's dynamic research centers and projects and are supported by faculty who are subject matter experts.

Consider LTC if you:

• want to advance as a professional in education through a field specialization
• enjoy exercising independent judgment, and
• desire to help all learners achieve success and strengthen the future through education.

https://education.missouri.edu/learning-teaching-curriculum/

Director of Graduate Studies: Dr. Patricia Friedrichsen

About the Program

Graduate study in Learning, Teaching, & Curriculum prepares teachers, curriculum leaders and teacher educators for professional excellence. With the rapid changes in education—especially developments in instructional materials and techniques, curriculum construction and classroom organization—teachers who have completed their certification may need to update, refine and extend their knowledge and skills.

Further, many educators enter new roles as subject-matter specialists, curriculum coordinators, supervisors of instruction, department heads, leaders of professional development education or teacher educators. Graduate programs in Learning, Teaching, & Curriculum are designed to prepare the professionals for these new roles.

Areas of Study

Depending on the degree program, students can pursue discipline-specific emphasis areas (e.g., English education, mathematics education, science education and others) and focus on curriculum development, research, or teacher education.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

MEd in Learning, Teaching and Curriculum

Degree Requirements

The M.Ed. program requires a minimum of 30 hours in Learning, Teaching, & Curriculum coursework.

The following emphasis areas are currently offered: Art Education, Early Childhood Education, Elementary Education, English Education, Literacy Education, Mathematics Education, Science Education, Social Studies Education, and Teaching English to Speakers of Other Languages (TESOL).

Admission Requirements

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.
• Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
• Evidence of at least 2 years of successful experience in an appropriate field

Applicants can submit all required materials and information through the Graduate School's online application system. (https://applygrad.missouri.edu/apply/)

Required Application Materials:
• Unofficial transcripts of all prior coursework
• Statement of Purpose
• Letters of recommendation (minimum 2 letters; confidential and sent through the online application system)
• Personal Data Sheet
• Official TOEFL scores (if applicable):
  - Internet-based test (iBT)
  - Paper-based test (PBT)
  - 80 550
• Official GRE scores (required for Science Education and TESOL M.Ed. applications only):
  - When did you take the GRE?
    - On or After August 1, 2011 291 = (V150, Q141)

Confirmation Materials (required to finalize admission upon acceptance, sent to the Graduate School):
• Official transcripts
• Any additional required documentation

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements for the Master's program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant's professional aspirations.
- For students whose native language is not English, a score of 80 IBT or better on the TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

- Overview (p. 469)
- Degree Requirements (p. 469)
- Admissions (p. 470)

Overview

In the early childhood education emphasis, students will gain increased knowledge and skills in the design, delivery and evaluation of educational services to children from birth through age 8. The program addresses the essential problems of practice with special emphasis given to effective teaching approaches for children who are at risk for school failure: children with special needs, children who are English-language learners and children who have challenging behaviors.

The program is designed for early childhood practitioners, Head Start teachers, early childhood special education teachers, child-care center staff and others who work with children from birth through age 8.

More information about the Early Childhood Education M.Ed. program (http://online.missouri.edu/degreeprograms/education/early-childhood/masters/) can be found on the Mizzou Online website.

Degree Requirements

Delivery of this program is 100% online: no campus visits are required. Successful completion of the program requires 30 credit hours of required course work.

LTC Core Courses

- LTC 8913 Curriculum Development 3
- LTC 8914 Culturally Responsive Pedagogy 3

MEd in Learning, Teaching and Curriculum with Emphasis in Elementary Education

The online masters degree in elementary education from MU is designed to support new elementary school teachers in the early stages of their career. With a classroom-focused approach, bridging research and practice with relevant course work and mentorship, this program prepares early-career teachers for success.

Degree Requirements

The online masters in elementary education is 100 percent online: no campus visits are required. This program has rolling admission and accepts students to matriculate in the fall term only. Students take four to eight credit hours each semester and finish the program in two years.

Course work covers:
• Managing classrooms for learning
• Meeting the needs of all learners
• Culturally responsive pedagogy
• Curriculum development
• Classroom research

To receive an the degree, you must complete 30 hours of graduate-level coursework. This coursework includes nine hours of core courses in elementary education and six hours of research courses.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program ([https://gradstudies.missouri.edu/degreetcategory/learning/](https://gradstudies.missouri.edu/degreetcategory/learning/)) and the minimum requirements of the Graduate School ([http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php](http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php)). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

### MEd in Learning, Teaching and Curriculum with Emphasis in English Education

#### Overview

The English area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

#### Degree Requirements

This degree program is a completely online masters of education degree in English Education. It requires successful completion of the program requires 30 credit hours: 9 credit hours in the Learning Teaching and Curriculum Core, 12 from the English Education Core, and 9 from electives. At least 16 credit hours must be at the 8000 level.

More information about the E ([http://online.missouri.edu/degreeprograms/education/early-childhood/masters/english教育教学M.Ed.程序](http://online.missouri.edu/degreeprograms/education/early-childhood/masters/english教育教学M.Ed.程序)) can be found on the Mizzou Online website.

MEd in Learning, Teaching and Curriculum with Emphasis in Literacy Education

Overview

A masters degree in literacy education from MU can help you advance your career in reading instruction. If you want to better serve students in overcoming their challenges in reading and writing, this may be the program for you.

Degree Requirements

The MEd degree in Literacy Education requires a minimum of 30 semester hours of graduate coursework. Courses are sequenced and semester-based. You can choose from a 2 year plan or 4 year plan.

The majority of students take two classes per semester, and earn their masters degree in two years. Successful completion of the program requires 9 credit hours of core course work, courses in literacy pedagogy and assessment (12 credit hours), and courses in language, culture, and leadership (12 credit hours).

More information about the Literacy Education M.Ed. program (https://online.missouri.edu/degreeprograms/education/literacy/masters/) can be found on the Mizzou Online website.

Certification

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.
Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**MEd in Learning, Teaching and Curriculum with Emphasis in Mathematics Education**

The Master of Education degree in Mathematics Education is intended for those who wish to improve their mathematics teaching practice and to gain a broader understanding of issues related to teaching and learning mathematics, K-12.

**This program emphasizes**

- Current issues in mathematics education
- Elementary or secondary mathematics content
- Increasing equity in mathematics teaching and learning
- Recent research in mathematics education
- Strategies for incorporating technology into mathematics instruction

**Degree Requirements**

Delivery of this program is 100 percent online: no campus visits are required. However, you may choose to enroll in electives that require face-to-face meetings on campus. Course work may be tailored for teachers of any grade level with optional areas of focus in elementary or secondary education. Successful completion of the program requires 30 credit hours. At least 16 credit hours must be at the 8000 level.

More information about the Mathematics Education M.Ed. program ([https://online.missouri.edu/degreeprograms/education/mathematics/master/](https://online.missouri.edu/degreeprograms/education/mathematics/master/)) can be found on the Mizzou Online website.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program ([https://gradstudies.missouri.edu/degreecategory/learning/](https://gradstudies.missouri.edu/degreecategory/learning/)) and the minimum requirements of the Graduate School ([http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php](http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php)). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**MEd in Learning, Teaching and Curriculum with Emphasis in Mathematics Education, Certification**

Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

The Master of Education degree in Learning, Teaching and Curriculum with emphasis in Mathematics Education, Certification is intended for those who wish to improve their mathematics teaching practice and to gain a broader understanding of issues related to teaching and learning mathematics, K-12, and qualify for certification.
Degree Requirements

Successful completion of the program requires 30 credit hours. In addition to the teaching related courses listed below, minimum mathematics credits must also be completed.

- LTC 7040 Inquiring into Schools, Community and Society I 2-3
- LTC 7560 Reading and Writing in Content Areas 3
- LTC 8861 Teaching, Learning & Research in Middle & Secondary School Math I 3
- LTC 8862 Teaching, Learning & Research Middle & Secondary School Math: II 3
- LTC 8863 Teaching, Learning, and Research Middle and Secondary Math III 3
- LTC 8900 Seminar in Curriculum and Instruction 1-3
- LTC 8942 Advanced Internship in Curriculum and Instruction 1-10
- ESC_PS 7000 Foundation of Teacher Prep I 3
- SPC_ED 7020 Teaching the Exceptional Learner 3

MEd in Learning, Teaching and Curriculum with Emphasis in Science Education

The MU Master’s Program in Science Education is intended for classroom teachers who want to become reflective and inquiring professionals by:

- Enhancing their knowledge and skills about science teaching and learning,
- Inquiring into and improving their practice and
- Building leadership skills in science education.

Degree Requirements

The MEd program requires a minimum of 32 semester hours beyond the Bachelor’s (16 hours at the 8000 or 9000 level, 16 hours of education courses), planned in agreement with the student’s Advisory Committee. Listed below are the requirements for a Master's degree in Science Education.

- Science Education (9 or more semester hours)
- Science Content (9 or more semester hours)
- Educational Foundations (1 course in sociology, philosophy, or history of education--e.g., ED_LPA 9462, or educational psychology--e.g., ESC_PS 8320)
- Research Methods (1 course in research methods: LTC 8714 or Action Research)
- Comprehensive Exam (Written comps, either in exam or project format, are individually designed for each student by committee members.)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degerecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

MEd in Learning, Teaching and Curriculum with Emphasis in Science Education, Certification

Overview

The MU Master’s Program in Science Education is intended for students who have a BA or BS in a science field and want to become classroom teachers by:

- Enhancing their knowledge and skills about science teaching and learning,
- Inquiring into and improving their practice and
- Building leadership skills in science education.

Degree Requirements

The MEd program requires a minimum of 32 semester hours beyond the bachelors (16 hours at the 8000 or 9000 level), planned in agreement with the student’s Advisory Committee. Listed below are the requirements for a Masters degree in Science Education.

- Science Education (9 or more semester hours)
- Science Content (9 or more semester hours)
- Educational Foundations (1 course in sociology, philosophy, or history of education--e.g., ED_LPA 9462, or educational psychology--e.g., ESC_PS 8320)
- Research Methods (1 course in research methods: LTC 8714 or Action Research)
- Comprehensive Exam (Written comps, either in exam or project format, are individually designed for each student by committee members.)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degerecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the
The masters degree program in Social Studies Education is primarily for classroom teachers, grades 1-12, who wish to advance their knowledge and practice of social studies while obtaining an advanced degree. If you want to engage in meaningful discussion about the role of social studies and how research and theory can inform classroom practice, this may be the degree for you.

**Degree Requirements**

This degree program is completely online. It requires successful completion of a minimum of 30 credit hours. Courses are semester-based. Students typically take one or two classes each semester and finish in two years.

More information about the S (https://online.missouri.edu/degreeprograms/education/mathematics/masters/socialStudies/masters/) can be found on the Mizzou Online website.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**MEd in Learning, Teaching and Curriculum with Emphasis in Teaching English to Speakers of Other Languages**

The University of Missouri’s Teaching English to Speakers of Other Languages (TESOL) program is designed to meet the challenges of a diverse student body in a variety of education settings. Given the use of English as a global lingua franca, learning the unique methodology and theories associated with second language teaching is crucial to effectively meeting the challenges of a multilingual global society.

The TESOL program at MU can meet the needs of teachers seeking ESOL certification in the state of Missouri, those seeking advanced education in ESL/EFL teaching and learning, as well as those who seek further education in TESOL. Currently, many of our students begin the ESOL certification courses but find the topic so intriguing that they go on to pursue advanced education in the field.

The student body in the TESOL program at MU is made up of teachers in the U.S and abroad who work with a wide range of learner populations, including children and adults. We welcome traditional and nontraditional students as the program is designed to meet the needs of a variety of learners in a variety of academic settings.

The TESOL program at MU is informed by the second language acquisition theories and pedagogy unique to students who speak English in addition to their native language(s). The courses in the TESOL program are taught by faculty with expertise and knowledge in the field of English language learning including applied linguistics, sociolinguistics, intercultural communication, and English language education. By focusing on the interplay of theory and methods, as well as the cultural
and linguistic diversity of English Language Learners, this program focuses on developing effective, responsive scholars and practitioners who use theory and research to enhance their work in a global, diverse, and technological society.

**Degree Requirements**

The MEd program in TESOL requires 33 semester hours beyond the Bachelor’s (21 hours at the 8000 or 9000 level), planned in agreement with the student’s Advisory Committee.

**TESOL Focus Courses (21 semester hours)**

Other electives may be chosen in consultation with your advisor.

**Exams**

To complete the masters programs, students are required to pass ‘comprehensive exams’ or equivalent. Please speak with your advisor what this exam/project may entail.

**Admission**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MEd in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degerecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria.

Complete admission requirements for the Master’s program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- A minimum of two letters of recommendation; three letters, if your undergraduate GPA (last 60 hours) is below a 3.0.
- Statement of purpose clearly indicating that the proposed Masters degree is appropriate to the applicant’s professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150,Q145,A3.5 or higher). The verbal must meet the 150 minimum in order to be considered for the program.
- For students whose native language is not English, a score of 550 or better on the TOEFL or a 6.5 on the IELTS taken within the past two years.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.

Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**EdD in Learning, Teaching and Curriculum**

Our department is not currently admitting students to this degree program. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

**Degree Requirements**

The EdD in Learning, Teaching and Curriculum requires completion of a minimum of 72 credit hours above the bachelor’s. The program is currently offered with an emphasis in General LTC studies, Elementary Education, or Reading Education. Students must choose an emphasis area. More details are available on the emphasis area pages.

**Admissions Requirements**

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

- Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field
Applicants can submit all required materials and information through the Graduate School's online application system (https://applygrad.missouri.edu/apply).

**Required Application Materials:**
- Unofficial transcripts of all prior coursework
- Statement of purpose
- Letters of recommendation (minimum 3 letters; confidential and sent through the online application system)
- Personal Data Sheet
- Official GRE Scores

**EdD in Learning, Teaching and Curriculum with Emphasis in Elementary Education**

Our department is not currently admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

**Overview**
This program prepares students to:
- Understand the depth and breadth of elementary education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in elementary education;
- Become outstanding teachers/advisors of college students;
- Become a leader in elementary school settings; and
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of coursework, internships, and authentic experiences with research, development, and teacher education.

**Degree Requirements**
The Ed.D. in LTC with an emphasis in elementary education is a 72-hour program above the bachelor's. Coursework includes core education courses, research courses, electives and internships.

**EdD in Learning, Teaching and Curriculum with Emphasis in General**

Our department is not currently admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

**Overview**
This program prepares students to:
- Understand education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research related to education;
- Become outstanding teachers/advisors of college students;
- Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of coursework, internships, and authentic experiences with research, development, and teacher education.

**Degree Requirements**
The Ed.D in LTC is a 72-hour program above the bachelor's. Coursework includes core education courses, research courses, electives and internships.

**EdD in Learning, Teaching and Curriculum with Emphasis in Reading Education**

Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

**Overview**
This program prepares students to:
- Understand the depth and breadth of literacy education in terms of research, curriculum, policy, teacher development and student learning;
- Develop, carry out, and report independent research in literacy education;
- Become outstanding teachers/advisors of college students;
• Understand the role of service in the university setting and begin those memberships in organizations that can lead to a service agenda.

These goals are achieved through a combination of course-work, internships, and authentic experiences with research, development, and teacher education.

Degree Requirements

The Ed.D. in Reading Education is a 72-hour program above the bachelor's. Coursework includes core reading education courses, research courses, electives and internships.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdD in Learning, Teaching and Curriculum program (https://gradstudies.missouri.edu/degerecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum

Degree Requirements

The EdSp is a 30-hour program beyond a master's degree. Curriculums involve courses in the core area, research, and electives. Students must select from one of three emphasis areas: Literacy Education, Mathematics Education, and Science Education. Specific degree requirements can be found on the emphasis area pages.

Admissions Requirements

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

• Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
• Evidence of at least 2 years of successful experience in an appropriate field

Applicants can submit all required materials and information through the Graduate School's online application system (https://applygrad.missouri.edu/apply/).

Required Application Materials:

• Unofficial transcripts of all prior coursework
• Statement of purpose
• Letters of recommendation (minimum 3 letters; confidential and sent through the online application system)
• Personal Data Sheet
• Official TOEFL scores (if applicable):

EdSp in Learning, Teaching and Curriculum with Emphasis in Literacy Education

Degree Requirements

The EdSp is a 30-hour program of specialization built on the master's degree. The program requires course work in core, research, and electives. The program is directed by an advisory committee (3 members) and supervised by the major advisor. Coursework will generally comprise upper-level graduate work in literacy education, tailored to the student's needs and career objectives.

• Prerequisites
  • Foundations of Educational Psychology (or equivalent)
  • Introduction to Statistics (or equivalent)

• English Education or Literacy Education Core
  • To be negotiated with advisor to meet your professional goals

• Education Core (3+ semester hours)
  • If not completed as a part of the master's degree, one or more graduate courses in the behavioral, social, philosophical, or historical foundations of education

• Research Courses (6+ semester hours)
  • Introduction to Educational Statistics
  • Overview of Educational Research
Sample Plan of Study

Please consult with an advisor to inquire what a sample program of study may look like.

Comprehensive Examination Process

A thesis or seminar paper and final examination are required.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdS in Learning, Teaching and Curriculum program (https://gradschool.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The Educational Specialist degree in Mathematics Education is intended for teachers who have already completed a master's degree and are seeking additional work related to leadership, curriculum development, research and/or improving their own teaching skills.

Degree Requirements

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members. Courses for this program are 100 percent online: no campus visits are required. However, you may choose to enroll in electives that require face-to-face meetings on campus.

More information about the Mathematics Education Ed.S. program (https://online.missouri.edu/degreeprograms/education/mathematics/education-specialist/) can be found on the Mizzou Online website.

The course work for the Educational Specialist degree in Mathematics Education is comprised of three key areas: Mathematics Education, general electives, and research.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdS in Learning, Teaching and Curriculum program (https://gradschool.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program.
Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Learning, Teaching and Curriculum with Emphasis in Science Education

The Educational Specialist (EdS) Program in Science Education is designed for individuals holding a Master's in Science Education who desire further education. The EdS in Science Education is typically considered a terminal degree, not a stepping stone to the PhD.

Degree Requirements

The Ed.S. is a 30-hour program beyond a master's degree. Coursework is comprised of at least 15 hours at the 8000 level or higher; and at least half the coursework in education. The program of study is approved by the student's advisor and two committee members.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the EdS in Learning, Teaching and Curriculum program (https://gradschool.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum

Degree Requirements

The PhD in Learning, Teaching and Curriculum is offered with emphasis in Art Education, Early Childhood Education, Language and Literacies For Social Transformation, Mathematics Education, Science Education and Social Studies Education. Students must choose an emphasis area.

To receive a PhD degree, you must complete a minimum of 72 hours of coursework beyond a bachelor's degree. A minimum of 15 credit hours must be at the 8000-level or above, exclusive of research, problems, and independent study experiences. Programs of study are individually planned with a faculty committee. More details are available on the emphasis area pages.

Admissions Requirements

Applicants are encouraged to submit their applications as early in the process as possible. Applications can take 6-8 weeks to complete through the procedures and processing system. Every reasonable effort will be made to process the application for the semester requested.

- Completion of an appropriate baccalaureate degree with a GPA of 3.0 or better
- Evidence of at least 2 years of successful experience in an appropriate field

Applicants can submit all required materials and information through the Graduate School's online application system (https://applygrad.missouri.edu/apply/).

Priority Deadline: While admissions are rolling, the priority deadline for Fall admission is November 15 of the previous year. For full consideration in funding opportunities, applications must be submitted and complete prior to the deadline. The graduate admissions committee will begin reviewing applications shortly after that date.

Required Application Materials:

- Unofficial transcripts of all prior coursework
- Statement of purpose
- Letters of recommendation (minimum 3 letters; confidential and sent through the online application system)
- Personal Data Sheet
- Official GRE Scores

PhD in Learning, Teaching and Curriculum with Emphasis in Art Education

The MU Art Education PhD program prepares individuals for research and teacher education careers in higher education and for leadership positions in various educational settings. The program offers opportunities to expand a teaching repertoire and research current topics in art education as well as to develop expertise in conceptualizing, conducting and reporting research in the arts arena.

The individual and a faculty committee develop an individualized program of study based upon a candidate's background, experiences, and professional goals. The majority of MU PhD graduates take positions in Colleges of Education or Fine Arts in Art and Art Education at universities or colleges. However, some graduates move into administrative and supervisory positions at art museums, and arts agencies.

Degree Requirements

The PhD in art education is a 72-hour hybrid program of on-campus and online courses beyond a bachelor's degree. Nine hours of core content courses must be taken on campus at either the beginning or end of your program of study. This program does not lead to certification.

Or other advanced education research course work focusing on specific methodologies

Electives and/or minors 12-15

Courses that help focus and support your research interests (with committee approval). Possible minors include educational policy, educational leadership, educational technology/digital media, college teaching, learning theory, art studio and art history.

Dissertation 12

LTC 9090 Research in Curriculum and Instruction 12

In addition to the course work above, students pursue other competencies in consultation with your advisor including:

• Conference presentation (single or co-author)
• Colloquium participation and presentation
• Submission of manuscript to a refereed journal (single or co-author)
• Experience with grant writing
• Comprehensive examination
• Teaching/teacher education internship (in your emphasis area)
• Experience with teacher professional development (K–16)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Early Childhood Education

The faculty and students in early childhood education work closely together. Faculty and students share ideas and learn from one another. Your faculty advisor has the strongest interest in your professional/personal growth, but each early childhood faculty member will be a valued part of your community.

Goals of the PhD Program

These goals are achieved through a combination of course-work, internships and authentic experiences with research, development, and teacher education.
• Understand the depth and breadth of the field of early childhood education in terms of research, curriculum, policy, teacher development and student learning;
• Develop, carry out, and report independent research in some area of early childhood education;
• Become outstanding teachers/advisors of college students;
• Understand the role of service in the university setting and learn how memberships in organizations can lead to a service agenda.

Degree Requirements
To receive a PhD degree, you must complete a minimum of 72 hours of coursework beyond a bachelor’s degree. This includes at least 18 hours of early childhood education core course and a minimum of 12 hours of research methodology.

Admissions
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Elementary Education
Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

Overview
This program consists of a combination of coursework, internships and authentic experiences with research, development, and teacher education that are directed toward the following goals:
• Understand the depth and breadth of the field of elementary education in terms of research, curriculum, policy, teacher development and student learning;
• Develop, carry out, and report independent research in some area of elementary education;
• Become outstanding teachers/advisors of college students; and

• Understand the role of service in the university setting and learn how membership in organizations can lead to a service agenda.

Degree Requirements
To receive a PhD degree, you must complete a minimum of 72 hours of coursework beyond a bachelor's degree. This includes at least 18 hours of education core courses and a minimum of 12 hours of research methodology.

PhD in Learning, Teaching and Curriculum with Emphasis in Foreign Language Education
Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

PhD in Learning, Teaching and Curriculum with Emphasis in General
Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

PhD in Learning, Teaching and Curriculum with Emphasis in Language and Literacies for Social Transformation
The Language and Literacies for Social Transformation emphasis area gives students a strong background in reading and writing pedagogy, adolescent literature, and media literacy. We also emphasize lesson planning, curriculum creation and teaching, classroom management, diversity and social equity.

We prepare candidates to be English teachers and follow the guidelines of National Council of Teachers of English (NCTE), as well as those of the National Middle School Association (NMSA).

Degree Requirements
A minimum of 72 semester hours beyond the bachelor's degree is required.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

Admission requirements will be based upon the following criteria. Complete admission requirements (https://education.missouri.edu/admissions/) for the PhD program.

- Completion of an appropriate Bachelor's degree with a GPA of 3.0 or better.
- Completion of an appropriate master's degree with a GPA of 3.0 or better.
- A minimum of three letters of recommendation.
- Statement of purpose clearly indicating that the proposed graduate degree is appropriate to the applicant's professional aspirations.
- GRE scores taken within the last 5 years (preferred minimum scores should be V150, Q144, A4.0 or higher)
- For students whose native language is not English, a score of 100 or better on the IBT TOEFL or a 6.5 on the IELTS taken within the past two years

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Mathematics Education

The MU Ph.D. program in Mathematics Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. The program aims to enhance student knowledge about the field of mathematics education and develop expertise in conceptualizing, conducting and reporting research studies. Programs of study are individually planned with a faculty committee, and are based upon candidate's background, experiences, and professional goals. The majority of our graduates take positions in Colleges of Education or Departments of Mathematics at universities or colleges. However, some graduates move into administrative and supervisory roles at district or state levels.

Degree Requirements

The PhD program is designed to require about four years of study, which consists of a minimum of 72 hours of coursework beyond the bachelor's degree, participation in a variety of research and teaching internships, and the design and implementation of a dissertation study focused on original research.

Mathematics Education (about 30 credit hours)

Experiences in Research, College Teaching, Design, Teacher Development (in consultation with advisor)

It is expected that doctoral students will have a range of 'beyond-course' experiences, including:

- Completing a second-year study
- Teaching mathematics teaching methods course(s)
- Supervising and working with student teachers
- Preparing grant proposals
- Design
- Planning and facilitating professional development for teachers
- Formulating and delivering presentations at professional meetings
- Critiquing submissions to mathematics education journals or professional conferences
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Reading Education

Our department is no longer admitting students to this emphasis area. We invite you to explore the other graduate degree options within Learning, Teaching and Curriculum (p. 467).

The Doctoral Program in Literacy Education is designed to prepare individuals for careers in higher education and leadership positions in a variety of educational settings. Besides enhancing students' knowledge of literacy education, students develop expertise in conceptualizing, conducting and reporting research studies.

Degree Requirements

To receive a PhD degree in reading education, you must complete a minimum of 72 hours of coursework beyond a bachelor's degree. A minimum of 15 credit hours must be at the 8000-level or above, exclusive of research, problems, and independent study experiences. Programs of study are individually planned with a faculty committee. Recommendations include the following:

I. Literacy Education Core (18+ hours)
   A. Foundations (9-12 hours)
      • Theoretical Foundations of Literacy
      • Whole Language Curriculum or Talk in the Curriculum
      • History of Literacy or Issues and Trends of Literacy Education
      • Linguistics, Sociolinguistics, Psycholinguistics
   B. Concentration (9-12 hours)
      Declared area of interest or specialization selected in consultation with advisor. Possible areas of specialization include:
      • Early Literacy
      • Children's Literature
      • Linguistics and Literacy
      • Literacy in a Digital World
      • Literacy for Special Needs Children
      • Other

II. Professional Education Core
   (12 hours, 3 hours from each category)
   A. Humanistic Dimensions of Education
   B. Psychological Foundations of Education
   • Social and Philosophical Aspects of Teaching
   • Sociology of the Classroom
   • Issues in Education and Human Development: Historical and Philosophical
   • Multicultural Dimensions of Education
   B. Psychological Foundations of Education
   • Psychological Foundations of Education
   • Human Learning
   • Human Cognition
   • Applications of Computer Based Systems to Educational Settings
   • Instructional Programs for Young Children
   • Parents, the School, and the Community

III. Research Core
    (12 hours of the following or equivalent courses)
    • Quantitative Methods in Educational Research I
    • Quantitative Methods in Educational Research II
    • Qualitative Methods of Educational Research I
    • Qualitative Methods of Educational Research II

IV. Teaching and Research Internships
    (0-6 hours)
    To be negotiated with advisor to meet your professional goals

V. Electives (0-12+ hours)
    Select courses within or outside the College of Education that will help focus and support your research interests (with committee approval). Or take a concentrated set of 9-12 hours as a minor

VI. Dissertation (12 hours)
    Includes proposal approval, Institutional Review Board Approval, approval from participants, write up, and oral defense

PREREQUISITES:
• Introduction to Statistics (or equivalent)
• Foundations of Educational Psychology (or equivalent)

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the
Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Science Education

The doctoral program emphasizes science education research and culminates with a dissertation project completed under the supervision of a science education faculty member. The program requires coursework in science education, science content, educational foundations, and educational research.

Degree Requirements

The Science Education Ph.D. requires a minimum of 72 semester hours beyond the Bachelor's degree (the Master's degree can be counted toward this total). The Science Education Ph.D. program includes three emphasis areas:

1. Elementary Science Education
2. Middle/Secondary Science Education
3. College Science Teaching

Each emphasis area requires coursework in science education, science content, and educational research as well as teaching and research experiences.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Learning, Teaching and Curriculum with Emphasis in Social Studies Education

The Ph.D. in Social Studies Education at the University of Missouri provides increased opportunities for its graduates to assume leadership roles in a variety of academic, knowledge-driven, and/or governmental and politically-based institutions and organizations. The core of the Ph.D. experience lies in scholarship and in the process by which graduate students transition from being knowledge-consumers to knowledge-producers. Hence, the doctoral experience involves a journey of personal growth and development, which leads the graduate student towards a deeper sense of the self and towards crafting a personal agenda for scholarship in the social studies field.

The Culture of the Social Studies Education Doctoral Program

Unique among graduate programs, the social studies doctoral students and faculty form a community of learners and employ democratic practices to shape the direction of the community, its scholarship, and future coursework. As a result, in dialogue with faculty members, doctoral students help co-direct the structure of their Ph.D. experience. This occurs in two ways. First, doctoral students have flexibility in much of the design of their own coursework, research endeavors, and scholarship. Second, in community with the other doctoral students and faculty members, doctoral students vote on coursework requirements, expectations for the program, and program goals.

An important aspect of forming this community of learners involves identifying and clarifying the academic and research interests of its members. As a result, the current doctoral students have established four research clusters, or areas that describe their often overlapping research interests in the social studies education field. At this time, these clusters include the following:

- **Social Studies Teacher Education for Social Justice**: addressing issues of citizenship, diversity, and social justice in teacher education.
- **Multicultural and Global Education**: Preparing teachers and students to address local, national, and global concerns of culture, environment, and the socio- and geopolitical landscape in education.
- **Social Studies Curriculum and Instruction**: Confronting persistent issues in social studies curriculum and teaching, including official and master narratives, teaching methodologies, assessment, technology, and student engagement in the classroom.
- **Educational Policy and Politics Affecting Social Studies Teaching**: Investigating the power structures, political dynamic, curriculum control, and educational policy and system structure influence social studies education and teaching.

These research clusters not only clarify and support doctoral students in team-oriented scholarship, but also inform social studies faculty on which courses to offer and what kinds of research opportunities to promote. Research clusters are reviewed and revised on a yearly basis. Because admission into the doctoral program also includes membership into our community of learners, we recommend that individuals interested in applying for the Social Studies Education doctoral program at the University of Missouri demonstrate research interests that align with one or more of these research clusters.
Degree Requirements

In order to receive a PhD, you must complete a minimum of 72 hours of coursework beyond a bachelor’s degree. This coursework includes a minimum of 12 hours of social studies core courses, a minimum of 9 hours of research method courses and your dissertation.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Learning, Teaching and Curriculum (https://gradstudies.missouri.edu/degreecategory/learning/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

The LTC graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**  Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

• MS in Learning Technologies and Design (p. 486)
  • with emphasis in Online Education (p. 486)
  • with emphasis in Technology in Schools (p. 487)
• EdSp in Learning Technologies and Design (p. 489)
  • with emphasis in Online Education (p. 489)
  • with emphasis in Technology in Schools (p. 490)

The Learning Technologies and Design Master’s and Educational Specialist programs have been fully online since 2003. We prepare students for a variety of professional positions in the fields of education, instructional design, digital media and web design, training, and more. All areas emphasize project-based learning where you learn while working on projects relevant to your interests. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into your reality.

We also offer two 12 credit hour Graduate Certificate programs which apply to any of the MS or EdSp programs – User Experience and Usability (https://sislt.missouri.edu/certificates/user-experience-and-usability/) and Online Educator (https://sislt.missouri.edu/certificates/online-educator/). The Online Educator Certificate program is endorsed by the Association for Educational Communications and Technology, a leading international organization in the field of instructional design and technology.

MS in Learning Technologies and Design

Degree Requirements

The masters degree is offered in two emphasis areas: Online Education, and Technology in Schools. The MS consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. Specific degree requirements for each emphasis can be found on the emphasis pages: Online Education (p. 529), and Technology in Schools (p. 487).

MS in Learning Technologies and Design with Emphasis in Online Education

In the Online Education emphasis area you will develop the knowledge and skills in eLearning offerings. You will prepare for jobs in an expanding field where online education is used in schools, universities, industry, health care, museums, and other learning settings. Your work
will culminate in an authentic capstone project that documents your learning and accomplishments.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The MS consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. The Online Educator curriculum allows you to customize your course work by focusing on technology design and development or technology implementation.

Total Credits: 30

Capstone

You will meet the LT Goals and Objectives throughout your program; however, the Online Education (OE) emphasis area culminates in a capstone course project showing mastery of the OE competencies. The capstone is used as the comprehensive exam at the end of the program of study. Students should enroll in the capstone course during the last semester of their program.

Capstone

You must enroll in the one credit hour 9483 Capstone: Online Education. The capstone is designed as the means for you to synthesize your learning and demonstrate mastery of the competencies for this emphasis area.

Although each capstone project will be as unique as the individuals in the Learning Technologies program, all share the following elements:

- Design and development of an online course (or redesign/development of an existing online course)
- Evaluation of the course by two external reviewers
- Report including evaluation results, your reflection and critique

How Is the Capstone Project Created?

After enrolling in IS_LT 9483 Capstone: Online Education Emphasis Area, immediately notify your advisor about the online learning environment you will use for your project. Most students will request that a course is set up on a learning management system such as CourseSites, Canvas or Moodle. After creating your online course, you are responsible for finding two reviewers who will provide feedback you should use to improve your course before submitting for faculty review.

How Is the Capstone Evaluated?

Three SISLT faculty members evaluate a student’s capstone project. The review process asks two basic questions:

- Has the student fulfilled the requirements of the capstone course?
- Has the student demonstrated adequate mastery of the competencies?

Faculty reviewers do not consider your evaluators’ data, only the online course and your report. Additionally, consideration is given to the entry knowledge and skills of the student and the student’s professional goals. If a capstone project is found to be lacking, the student is given the opportunity to make the necessary adjustments (e.g., make improvements to the online course, enhance the instructional products or innovations).

Admissions

Email: sislt@missouri.edu
SISLT Student Services Coordinator
304 Townsend Hall
Columbia, MO 65211
Phone: 573-882-4546 or toll free 877-747-5868
http://edtech.missouri.edu/oe

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Learning Technologies and Design program (http://sislt.missouri.edu/edtech/online-education/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Learning Technologies and Design with Emphasis in Technology in Schools

The Technology in Schools emphasis area is your portal to excellence and leadership in designing, developing, and implementing technology in education, training and performance support. In the TiS focus area you will prepare to use innovative and effective technology to improve teaching and learning in a wide variety of settings. In addition to gaining a working knowledge of the underlying theories and strategies involved, you will get practical experience using technology as an effective teaching and learning tool.
Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The MS consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. The Technology in Schools curriculum allows you to customize your course work by focusing on technology design and development or technology implementation.

Portfolio

Your performance in the Technology in Schools emphasis area will be assessed through a portfolio process. You should start on your portfolio early in your course work. SISLT will not provide a server. You may build your portfolio on a web hosting site such as BlueHost, Neocities, Weebly, Wix, etc. This gives you control of your portfolio and its availability after you graduate.

Portfolio Assessment

You will meet the LT Goals and Objectives throughout your program; however, your portfolio will be based on documenting your mastery of the ISTE standards through narratives and supporting examples of work. You will work with a faculty advisor to ensure that your portfolio meets all requirements.

Each portfolio includes:

- Professional resume, including a list of technology in schools-related skills and experiences
- Documentation of ISTE standards mastery using the ISTE template
- Self-assessment narrative of your mastery of the ISTE standards with special attention given to the terms learning, evaluation and leadership
- Reflection paper linking program content to classroom practice
- Learning technologies concept map

Portfolio Details

A portfolio is a website consisting of products and artifacts demonstrating mastery of the Technology in Schools emphasis area competencies and ISTE standards (https://sislt.missouri.edu/lt/technology-in-schools/#standards). There might be a few elements that are not actually included in the website (e.g., video clips of needs assessment interviews, a network solution you designed), but there is some representation of these products (e.g., a slide show about the interviews, blueprints or design documents for the network).

Ideally, products and artifacts are added to the portfolio as the work is completed rather than waiting until the last minute to assemble the portfolio. Creating the portfolio is just like creating any other website: Design it, build it, test it and revise it. Periodically, you may add something to the website.

In addition, a one-credit-hour course is offered to assist students in portfolio development (7378: Portfolio Development). The course should be taken during your final semester of coursework.

A SISLT advisor will examine the portfolio before it is presented for formal review and make suggestions for improvement when warranted.

Presenting and Evaluating Your Portfolio

Portfolios are presented completely online. The portfolio must be available for faculty review on the date given. Consideration is given to the entry knowledge and skills of the student and the student’s professional goals. The SISLT review committee examines your portfolio and either passes it or suggests revisions.

The review process asks:

- Does the student know what the competencies/standards mean?
- Has the student demonstrated adequate mastery of the competencies/standards?

If a portfolio or presentation is found to be lacking, the student is given the opportunity to make the necessary adjustments (e.g., add elements to the portfolio, enhance the products or innovations). A conference call or email correspondence will be used to get the portfolio back on track. The review committee will offer suggestions for additional work or changes to the portfolio. Once the committee is satisfied the competencies are adequately addressed, the portfolio is accepted.

You must be a registered student the semester in which you plan to graduate. Simply put: You cannot finish all of your course work and present your portfolio the following semester without being enrolled in something. This means you must register for at least one course, or there is an exam-only option available for students who have completed all required course work.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Learning Technologies and Design program (http://edtech.missouri.edu/#admission) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

304 Townsend Hall
EdSp in Learning Technologies and Design

Degree Requirements

The EdSp in Learning Technologies and Design requires students to select an emphasis area from the two options offered: Technology in Schools (p. 490), and Online Educator (p. 489). While general degree requirements information is below, students should refer to the emphasis page for detailed requirements.

The EdSp consists of 30 graduate credit hours, with a minimum of 15 at the 9000 level or above. The curriculums allow you to customize your course work by focusing on technology design and development or technology implementation.

Courses required of both emphasis areas

EdSP in Learning Technologies and Design with Emphasis in Online Education

The Educational Specialist degree at MU is your portal to excellence and leadership in designing, developing, and implementing technology in education, training, and performance support. In the Online Educator emphasis area you will develop the knowledge and skills in eLearning offerings. You will prepare for jobs in an expanding field where online education is used in schools, universities, industry, health care, museums, and other learning settings. Your work will culminate in an authentic capstone project that documents your learning and accomplishments.

Working with a faculty advisor, each student develops a customized program of study. You pick the professional goal that makes sense to you, and our faculty will help you transform your goal into reality.

Your degree in Online Educator will open an array of career options. Some graduates work in K-12 schools, others work in corporations, and still others apply their skills in government, healthcare, higher education, and other settings. For example, some of our recent graduates are Software Designers and Developers, Learning Strategy Managers, Adaptive Technology Specialists, Training Designers, School Technology Coordinators, and Online Instructors. Whatever the setting, you will graduate with a skill set that will serve you well in the future.

Degree Requirements

The Educational Specialist degree is a 30-hour program of specialization built upon the master’s degree. It requires 27 credit hours of coursework relevant to the Online Educator competencies plus 3 credit hours in

ESC_PS 7170 Introduction to Applied Statistics. At least 15 credit hours must be at the 8000/9000 level.

Comprehensive Examination Process

In your final semester, you will develop and present a portfolio of your work to demonstrate your mastery of the competencies specific to your focus area. The portfolio contains descriptions of competencies and what they mean to you, explanations of artifacts, and reflections. You should start on your portfolio early in your coursework.

Portfolios can be submitted spring, fall, and summer semesters. Portfolios must be submitted to the assigned portfolio coach for review no later than three (3) weeks prior to the last day of classes; you will be notified by the SISLT Student Services Office of the specific date at the beginning of your final semester.

The student will work with the portfolio coach who will provide feedback and support to the student as she/he prepares the portfolio for review.

The review process asks three basic questions:

1. Does the portfolio demonstrate the student’s knowledge of what the competencies mean?
2. Does the portfolio demonstrate the student’s mastery of the competencies?
3. Does the portfolio present the student in a positive and professional manner?

Once a portfolio is deemed acceptable or unacceptable by the portfolio coach, the coach will notify the student and the SISLT Student Services Office. Should the portfolio be deemed unacceptable by the portfolio coach, the student may appeal this decision by petitioning the Director of SISLT and requesting that two other faculty review the portfolio.

Admissions

Teaching Professor J. Howland*
Assistant Teaching Professor J. Alston*, B. Brendler**, A. Klimczak*, K. Robinson*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in information science and learning technologies, the University does offer baccalaureate opportunities in a number of related areas, both within the College of Education, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

• MLIS in Library and Information Science (p. 491)
  • with emphasis in Archival Studies (p. 492)
  • with emphasis in E-Learning Information Professionals (p. 493)
  • with emphasis in Library Media Specialist, Certification (p. 494)

This is a Master of Library and Information Science degree.

The program is accredited (http://www.ala.org/cfapps/lisdfr/listing.cfm) by the American Library Association (ALA) (http://www.ala.org/), which granted continued accreditation status in 2015. The Library and Information Science (LIS) Program contributes to the essential knowledge, skills, and values of librarianship and the information professions through research, education, and engagement. SISLT is a member of the iSchools consortium, an international consortium of information schools in institutions of higher education dedicated to advancing the information field in the 21st century.

MLIS students can also earn transcripted emphasis areas in Electronic Learning Information Professional (ELIP) and Archival Studies, or earn an MLIS with School Library Media Certification (https://sislt.missouri.edu/lis/ lis-masters-degree-forms/#forms-pos).

The MLIS can be completed fully online.

We use several different course structures to provide you with the broadest and most instructionally appropriate class opportunities.

• Online asynchronous classes allow you to participate anytime, anywhere.
• Online synchronous classes, scheduled at fixed times to allow online, offer real-time interaction without the drive time.
• Hybrid classes, combine face-to-face and online instruction.

Most library and information science faculty are based in Columbia. Clinical faculty in St. Louis and Kansas City, and a Program Liaison in Omaha, NE provide student support and coordinate extracurricular activities.

Degree Requirements

The program consists of 39 credit hours, including 18 credits of required courses (https://missouri.box.com/s/wcmkuxnx6y74bws8kuvqphxj7x8p4y9sk/).

Each student completes a practicum (https://sislt.missouri.edu/lis/practicum/#practicum) (two to three credits)

Elective courses are selected in consultation with faculty advisers.

Prior to graduation, all students must complete a graduate examination which requires them to demonstrate mastery of the LIS Student Learning Outcomes (http://sislt.missouri.edu/lis/#outcomes), demonstrated in an ePortfolio.

Missouri School Library Media Certification:

In the State of Missouri, School Library Media Certification for school librarians is granted by the Missouri Department of Elementary and Secondary Education (DESE). The University of Missouri is approved to offer courses that lead to both Stand Alone and Add-on Certification through our MLIS degree, under the Library Media Specialist emphasis area.

If you are not a Missouri resident but are seeking school library media certification, you will have to meet the certification requirements set forth by your state. School Library Connection (https://blog.schoollibraryconnection.com/school-library-media-certification-by-state/) and the American Association of School Librarians (http://www.ala.org/aasl/about/ed/recruit/state/) have compiled some information about the certification requirements for various states, but we recommend you contact your state’s certification office directly.

SISLT Student Services, 304 Townsend Hall
573-882-4546 or toll free 877-747-5868
http://sislt.missouri.edu/

MLIS in Library and Information Science

The Library and Information Science (LIS) Program contributes to the essential knowledge, skills, and values of librarianship and the information professions through research, education, and outreach. Our Program offers the only Master’s Degree (https://sislt.missouri.edu/lis/ academics/) in the state of Missouri that is accredited (http://www.ala.org/ cfapps/lisdfr/listing.cfm) by the American Library Association (ALA) (http://www.ala.org/). ALA’s initial accreditation was granted in 1966/67, and the program was given continued accreditation in 2015.

The MLIS can be completed online.

We use several different course structures to provide you with the broadest and most instructionally appropriate class opportunities.

• Online asynchronous classes allow you to participate anytime, anywhere.
• Online synchronous classes, scheduled at fixed times to allow online, offer real-time interaction without the drive time.
• Hybrid classes combine face-to-face and online instruction.
Most library and information science faculty are based in Columbia. Clinical faculty in St. Louis and Kansas City, and a Program Liaison in Omaha, NE provide student support and coordinate extracurricular activities.

Students can seek the MLIS with emphasis areas of Archival Science, eLearning Information Professional, or Library Media Specialist, as well as Library Media Specialist with Certification.

Degree Requirements

The program consists of 39 credit hours, including 18 credits of required courses (https://missouri.box.com/s/wcmkuxn6y74bws8kuvqohxs7x8p4y9sk/). Each student completes a practicum (https://sislt.missouri.edu/lis/practicum/#practicum) (two to three credits). Elective courses are selected in consultation with faculty advisers. The program of study must include 15 credit hours of 9000-level courses, and 12 hours of courses taught by a full-time faculty member.

**Required Courses - must be taken prior to eportfolio development**

**Elective Courses**

(at least 15 hours of 9000 level courses required)

Graduate Examination Process

In your final semester, you will develop and present a portfolio of your work to demonstrate your mastery of the https://sislt.missouri.edu/lis/#outcomes LIS Student Learning Outcomes. The portfolio contains descriptions of competencies and what they mean to you, explanations of artifacts, and reflections. You should start on your portfolio early in your coursework.

Admissions

Email: sislt@missouri.edu
SISLT Student Services
304 Townsend Hall
Columbia, MO 65211
Phone: 573-882-4546 or toll free 877-747-5868
http://lis.missouri.edu

Applicants are required to meet two sets of minimum qualifications for admission: the https://sislt.missouri.edu/lis/students/#apply minimum requirements of the Master of Library & Information Science program and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

MLIS in Library and Information Science with Emphasis in Archival Studies

The MLIS emphasis area of Archival Studies will prepare students to work within the expanding arena of archives and records management within the information field. Students will graduate with the credentials of an American Library Association (ALA) accredited library program, which is required to work in most archives and libraries, and the skills and knowledge that they need to work as archivists and records managers.

An archivist selects, preserves, and makes available primary sources that document the activities of institutions, communities, and individuals. Archivists increasingly provide long-term stewardship for archival materials in both analog and digital formats- from traditional paper records, photographs, audio recordings, and moving images, to email messages, word processing documents and websites. The core values of archivists include access and use, accountability, advocacy, diversity, history and memory, preservation, professionalism, responsible custody, selection or appraisal, service, and social responsibility. There are many job listings that articulate the qualifications that students will gain by completing the coursework in the Archival Studies emphasis area.

Degree Requirements

The MLIS degree consists of 39 credit hours, including 18 credits of required courses. Elective courses are selected in consultation with faculty advisors, and specifically, must include 15 credit hours of 9000-level courses, and 12 hours of courses taught by a full-time faculty member.

Archival Studies students will be advised to complete their practicum (two to three credits) in an archival setting. Each student completes a practicum unless they have an approved practicum waiver. Students will be advised to complete the one-credit MLIS portfolio course.

**Required Core Courses (18 credit hours)**

MLIS in Library and Information Science with Emphasis in E-Learning Information Professionals

The MLIS in E-Learning Information Professionals (ELIP) will prepare students to work within an emerging and crucial field within librarianship: e-learning and information delivery. An e-learning information professional is a link between the library and people who use library materials online, either in formal or informal educational environments. They are advocates for the library and for informational materials that enhance the learning experience and they can aid instructors in information provision.

Graduates will have the credentials of an American Library Association (ALA) accredited library program. Students will have the skills and knowledge needed to work in institutions such as schools, libraries, and with companies requiring effective information provision and online teaching skills.

Degree Requirements

The MLIS degree consists of 39 credit hours, including 18 credits of required courses. Elective courses are selected in consultation with faculty advisors, and specifically, must include 15 credit hours of 9000-level courses, and 12 hours of courses taught by a full-time faculty member.

SISLT Student Services
304 Townsend Hall
Columbia, MO 65211
Phone: 573-882-4546 or toll free 877-747-5868
http://lis.missouri.edu

Applicants are required to meet two sets of minimum qualifications for admission: the minimum requirements of the Master of Library & Information Science program (https://sislt.missouri.edu/lis/students/#apply) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a
degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MLIS in Library and Information Science with Emphasis in Library Media Specialist, Certification

In the Library Media Specialist emphasis area you will develop knowledge, skills, and abilities in school librarianship, culminating in a practicum or internship experience to help strengthen your skills and develop your professional networks. Please visit the Library and Information Science web page (https://sislt.missouri.edu/lis/) for the most current information.

Working with a faculty advisor, each student develops a customized program of study. Your degree will open an array of career options beyond school librarianship, including academic librarianship and public librarianship.

Degree Requirements

for Students Who Already Hold a Teaching Certificate

For students who already hold Missouri teaching certificates, the program consists of 39 credit hours, including 30 credits of required courses. Each student completes a three-credit school library practicum (https://sislt.missouri.edu/lis/practicum/). Elective courses are selected in consultation with faculty advisers.

Applicants are required to meet two sets of minimum qualifications for admission: The minimum requirements of the Master of Library & Information Science program (https://sislt.missouri.edu/lis/students/#apply) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.
The Bachelor of Science in Education in Middle School Education (BSEd in Middle School Education) is offered in four emphasis areas: Language Arts (p. 495), Mathematics (p. 497), Science (p. 498), and Social Studies (p. 499). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university (p. 35), general education (p. 36), and content requirements in addition to the degree requirements. Please meet with a Mizzou Ed Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE [https://dese.mo.gov/]). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

The BSEd in Middle School Education has emphasis areas in Language Arts (p. 495), Mathematics (p. 497), Science (p. 498), and Social Studies (p. 499). Please see the emphasis area pages for semester plans specific to the emphasis.

Major and Career Exploration

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers/) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in the Discovery Center (https://discoverycenter.missouri.edu/) by calling (573)884-9700 or through MU Connect (https://mizzou.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=service/3761489) Discovery Center service in your success network.
- If you have decided on a major, visit an academic advisor in the School or College that you are interested in to discuss the process of declaring the major (https://advising.missouri.edu/majors-minors/changing-major/).
- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Majors (https://majors.missouri.edu) website.
- If you would like information about MU majors and degree programs, visit:
  - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 20) page in the catalog,
  - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 34) in the catalog.

BSEd in Middle School Education with Emphasis in Language Arts

Degree Program Description

The Bachelor of Science in Education in Middle School Education prepares students to work with children from fifth through ninth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and/or want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework will help you learn about general teaching and learning strategies as well as those specific to your discipline.

Major Program Requirements

The BSEd in Middle School Education is offered in four emphasis areas: Language Arts (p. 495), Mathematics (p. 497), Science (p. 498), and Social Studies (p. 499). Students must choose one of the emphasis areas to earn the BSEd. BSEd in Middle School Education with Emphasis in Mathematics

Degree Program Description

The Bachelor of Science in Education in Middle School Education prepares students to work with children from fifth through ninth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in middle school mathematics. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Middle School Mathematics will teach you ways to support the development and mathematical learning of middle school students by learning research-based instructional practices.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

BSEd in Secondary Education

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence.

Major Program Requirements

The BSEd in Secondary Education is offered in emphasis areas: Biology (p. 502), Chemistry (p. 504), Earth Science (p. 505), Language Arts (p. 506), Mathematics Education (p. 508), Physics (p. 509), and Social Studies (p. 510). Students must choose one of the emphasis areas to earn the BSEd. Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to the degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

BSEd in Secondary Education with Emphasis in Art Education

- Degree Description
- Major Program Requirements
- Semester Plan
- Degree Audit
- Major and Career Exploration

Our department is not currently admitting students to this emphasis area. We invite you to explore the other degree options within Secondary Education, or Learning, Teaching and Curriculum (p. 467).

Degree Description

The Bachelor of Science in Education with an emphasis in Art Education prepares students to work with children in public, private and alternative school systems. You may consider a degree in education if you are an artist/designer, enjoy working with children and/or adolescents, want to strengthen the future through art education, and want to make a difference in how students see and respond to their world and the lives of others. MU students work closely with artists, mentors, practicing teachers, administrators, and university faculty in the School of Visual Arts.
Studies to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in K-12 Art Education. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Art Education provides you with experience in the methods of teaching art at all levels in supporting learners in the development of visual literacy. This includes consideration of visual art production, responding to art, connecting art to all content areas, and presenting art for varied audiences. This includes methods for teaching art, talking about art, design, and digital/mass media, strategies for assessing art learning, and pathways for developing into a professional artist educator.

**Major Program Requirements**

| Phase 1 education coursework | 18 |
| Phase 2 education coursework | 30 |
| Education Internship | 12 |
| Art or Art-related coursework | 30 |

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

**Semester Plan**

At this time, it is recommended that a student consult with their advisor to develop a semester-by-semester plan of study.

**Degree Audit**

The degree audit is an automated report reflecting a student’s academic progress toward the completion of a degree. Degree Audits are not available for all programs; however, please consult with the appropriate college or school for audit information.

**MU students can** request a degree audit by logging in to myDegreePlanner (https://mydegreeplanner.missouri.edu/). Students may also access myDegreePlanner via myZou, in the Student Center, by clicking on the Request Degree Audit link. The audit automatically pulls in the student’s MU course work, transfer courses and courses in progress. This is available to current students, admitted students, and those who last attended less than three terms ago.

**Past MU students** can request a degree audit by contacting the Academic Advising Unit of the division in which they were last enrolled at MU. For contact information, go to http://advising.missouri.edu/contact/.

**Prospective students** can access a preliminary MU degree audit via https://www.transferology.com/index.htm (https://www.transferology.com/). Information on the college credits already earned will have to be manually entered before it can be evaluated against current degree requirements.

For additional details on degree audits, go to http://registrar.missouri.edu/degree-audits/index.php (http://registrar.missouri.edu/degree-audits/).

**Major and Career Exploration**

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers/) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in the Discovery Center (https://discoverycenter.missouri.edu/) by calling (573) 884-9700 or through MU Connect (https://mizzou.starfishsolutions.com/starfish-ops/di/instructor/serviceCatalog.html?bookmark=service/3761489) Discovery Center service in you success network.

- If you have decided on a major, visit an academic advisor in the School or College that you are interested in to discuss the process of declaring the major (https://advising.missouri.edu/majors-minors/changing-major/).

- If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http://career.missouri.edu/connect/). No Appointment is necessary to explore career options with one of our staff members.

- If you would like information about MU majors and degree programs, visit:
  - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 20) page in the catalog,
  - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 34) in the catalog.

**BSEd in Secondary Education with Emphasis in Biology**

**Degree Program Description**

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary biology. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary Biology provides you with experience in the methods of teaching biology in supporting learners in the development of scientific literacy. This includes consideration of the nature of science, methods for teaching science, strategies for assessing science learning, and pathways for developing into a professional biology educator.
Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE [https://dese.mo.gov/]). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

**BSEd in Secondary Education with Emphasis in Earth Science**

**Degree Program Description**

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary earth science. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary Earth Science provides you with experience in the methods of teaching earth science and supporting learners in the development of scientific literacy. This includes consideration of the nature of science, methods for teaching science, strategies for assessing science learning, and pathways for developing into a professional earth science educator.

**Major Program Requirements**

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

**BSEd in Secondary Education with Emphasis in General Science**

The College of Education is no longer accepting applications to the BSEd in Secondary Education with emphasis in General Science. Please see our science emphasis areas (Biology (p. 502), Chemistry (p. 504), Earth Science (p. 505), or Physics (p. 509)).

**BSEd in Secondary Education with Emphasis in Language Arts**

**Degree Program Description**

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on
students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary language arts. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary language arts provides you with experience in the methods of teaching language arts. Education courses include an introduction to language arts education, and three teaching language arts methods and assessment courses focused on literature, writing, and mass media.

**Major Program Requirements**

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE [https://dese.mo.gov/] ). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

BSEd in Secondary Education with Emphasis in Mathematics Education

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers' roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary mathematics. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary Mathematics provides you with research-based methods of teaching mathematics.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE [https://dese.mo.gov/]). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary physics. Practical and rewarding clinical training in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Physics provides you with experience in the methods of teaching earth science and supporting learners in the development of scientific literacy. This includes consideration of the nature of science, methods for teaching science, and strategies for assessing science learning.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE (https://dese.mo.gov/)). ### BSEd in Secondary Education with Emphasis in Social Studies

#### Degree Program Description

The Bachelor of Science in Education in Secondary Education prepares students to work with children from ninth through twelfth grade in public, private, and alternative school systems. You may consider a degree in education if you enjoy working with children and/or adolescents, want to strengthen the future through education, and want to make a difference in the lives of others. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants you certification in secondary social studies. Practical and rewarding clinical training
in schools and agencies begins sophomore year, and continues each semester culminating in a senior-level teaching internship, enhancing teaching skills and confidence. Coursework within Secondary social studies provides you with experience in the methods of teaching social studies. Education courses include an introduction to social studies education, methodology for teaching science and assessment within the field. Inquiry courses focus on how issues related to schools, family, community and society affect educators, classroom management, and special needs learners.

**Major Program Requirements**

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE [https://dese.mo.gov/]). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Special Education

Our mission is to prepare educators to work with children, youth and adults with disabilities to be academically and socially successful life-long learners. The department offers comprehensive degree programs that blend pedagogy and practices across developmental, specific content, and exceptionality to prepare educators to work with individuals at-risk and those with disabilities. In addition, the department offers comprehensive programs within exceptionalities, curriculum development for learners with disabilities, policy, and research across the lifespan.

Assistant Professor J. Rodrigues*
Assistant Research Professor H. Hatton, B. Mitchell, J. Randolph*, K. Morris
Assistant Teaching Professor L. Becerra*, L. Goran*, J. Weyman*
Professor Emeritus J. E. Leigh
Associate Professor Emeritus M. Pullis
Assistant Professor Emeritus S. Huntze

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BSEd in Special Education (p. 513)
  - with emphasis in Cross Categorical Special Education (p. 513)

The requirements for the Bachelor of Science in Education are specified in three areas: University general education (p. 36), professional education and a teaching major. All students preparing to be teachers in early childhood, elementary, special education, middle or secondary schools, regardless of the major field, are required to complete the University general education program. Students transferring from other institutions are required to fulfill the equivalencies of these courses.

Graduate

- MA in Special Education (p. 514)
  - with emphasis in Special Education, General (p. 515)
- MEd in Special Education (p. 516)
  - with emphasis in Autism (p. 517)
  - with emphasis in Behavior Disorders (p. 517)
  - with emphasis in Combined Early Childhood and Autism (p. 518)
  - with emphasis in Cross-Categorical, Certification (p. 519)
  - with emphasis in Early Childhood Special Education (p. 519)
  - with emphasis in Gifted Education (p. 520)
  - with emphasis in Learning Disabilities (p. 521)
- EdSp in Special Education (p. 521) (not accepting applications)
- PhD in Special Education (p. 522)
  - with emphasis in Administration and Supervision of Special Education (p. 522) (not accepting applications)
  - with emphasis in Behavior Disorders (p. 523)
  - with emphasis in Early Childhood Special Education (p. 523)
  - with emphasis in Learning Disabilities (p. 524)

About Special Education Graduate Programs

We strive to prepare educators to assist children, youth and adults with disabilities to be academically and socially successful life-long learners. Our faculty are consistently recognized — internationally and across the U.S. — for their individual and collaborative teaching and research excellence. The department’s unique mix of faculty expertise areas creates a wide range of opportunities for students and researchers. Special Education hosts or co-hosts several state and federally supported training, demonstration and research projects, including the following three centers that focus on facilitating positive developmental outcomes for children and youth with disabilities:
Areas of Study

Students pursuing a master’s degree may pursue course work in autism, behavior disorders, early-childhood special education, general special education, gifted education, or learning disabilities.

Doctoral student may study in areas such as behavior disorders, early-childhood special education, general special education, or learning disabilities.

Careers

Undergraduate and graduate programs prepare teachers and leadership personnel in the field of special education. Program graduates assume roles as teachers in a variety of educational settings, as consulting teachers, college professors, researchers, school administrators and leaders in state and federal governmental agencies. Programs meet students’ needs and interests within the framework of the requirements of each specific degree and state certification guidelines.

BSEd in Special Education

Degree Program Description

The Bachelor of Science in Education in Special Education prepares students to work with children from kindergarten through twelfth grade in public, private, and alternative school systems. Students should consider a degree in special education if they enjoy working with children and/or adolescents who are struggling or who have special needs, want to help these students develop into strong citizens, and are excellent collaborators. MU Students work closely with mentors, practicing teachers, administrators, and university faculty to develop the knowledge and skills to enhance learning outcomes for children and youth with and at risk for disabilities. The coursework through the College of Education focuses on teachers’ roles in facilitating learning at all levels of development and considers the influences of cultural, political, historical, and economic factors on students, teachers, and schools. Upon successfully completing the initial teacher certification process, the state grants certification in Special Education: Mild-Moderate Cross Categorical. Practical and rewarding clinical training in schools begins sophomore year, and continues each semester culminating in a full year senior-level teaching internship, enhancing teaching skills and confidence. Students focus on understanding and teaching students with a range of mild and moderate disabilities. Courses within special education address foundational principles of how to teach students with special needs, including methods in mathematics and literacy, behavior management, language, and introduction and methods in cross categorical instruction, among others.

Major Program Requirements

Students must complete all university (p. 35), general education (p. 36), and content requirements, in addition to degree requirements. Please meet with an Academic Advisor to discuss degree requirements and to create a semester plan.

Teacher Education programs in the College of Education are accredited by the Missouri Department of Elementary and Secondary Education (DESE). Curriculum changes mandated to earn teacher certification may become effective at any point during your academic program. Therefore, it is extremely important that you DO NOT SELF ADVISE.

Semester Plan

The BSEd in Special Education has an emphasis are in Cross Categorical Special Education. Please see the emphasis area page for a semester plan.
MA in Special Education

Degree Requirements

The Master of Arts program emphasizes research and requires 33 hours. MA candidates must follow graduate school guidelines with respect to timeliness and committee formation. The Master of Education program requires a comprehensive examination and project or thesis.

Admissions Criteria

Application Submission/Completion Deadline:

Fall deadline: May 1
Spring deadline: October 1
Summer deadline: March 1

Minimum GPA: 3.0/4.0
Minimum TOEFL/IELTS scores: 100 (TOEFL Internet-based Test), 7.0 (IELTS)
Minimum preferred GRE scores:

When did you take the GRE?

Verbal + Quantitative

On or After August 1, 2011 291+ (V 150, Q 141) / Analytic Writing 3.5+

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and
performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

**Required Application Materials**
- Unofficial transcripts of all prior coursework
- Statement of Purpose
- Letters of recommendation (minimum 2 letters; confidential and sent through the online application system)
- Personal Data Sheet
- Official GRE scores
- Official TOEFL scores (if applicable)

**Confirmation Materials (required to finalize admission upon acceptance, sent to the Graduate School):**
- Official transcripts
- Any additional required documentation

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

**Financial Aid from the Program**
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

**Retention**
To remain in good standing in the master’s program and earn a master’s degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student’s GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of “C” in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of “I” prior to the end of the following semester.

**Satisfactory Progress**
For information on general progress guidelines and the dismissal policy, see the Special Education website.

### MA in Special Education with Emphasis in Special Education, General

**Degree Requirements**
Delivery of this program is 100% online with no campus visits required. The degree requires completion of 33 credit hours: 28 credit hours in required course work and 5+ credit hours of electives. More information about this graduate program can be found at the Mizzou Online program page (https://online.missouri.edu/degreeprograms/education/special/masters/).

Master’s candidates must follow the guidelines of the Graduate School with respect to timeliness and committee formations and complete paperwork.

**Degree prerequisite (does not count toward degree)**
- SPC_ED 7300 Introduction to Special Education 3

**Required courses**
- SPC_ED 7370 Behavioral and Classroom Management 3
- SPC_ED 7320 Assessment and Evaluation in Special Education 3
- SPC_ED 7330 Collaboration and Consultation in Special Education 3
- SPC_ED 7375 Cross Categorical Special Education 3
- SPC_ED 7380 Methods in Cross-Categorical Special Education 4
- SPC_ED 8090 Masters Project Research Hours 3
- SPC_ED 8350 Research with Exceptional Children 3
- SPC_ED 8440 Advanced Behavior Management: Applied Behavior Analysis 3
- ESC_PS 7170 Introduction to Applied Statistics 3

**Electives**
- SPC_ED 7325 Language Development of Exceptional Students 3
- SPC_ED 7370 Literacy in Special Education 3
- SPC_ED 7390 Methods in Vocational Education for the Disabled & Disadvantaged 2-3
- SPC_ED 8387 Seminar in Special Education 1-3

**Admissions**
Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

MEd in Special Education with Emphasis in Autism

This program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The MU Autism Master’s program prepares personnel to effectively implement evidenced based practices for students along the full continuum of autism spectrum disorders (ASD). The program enables special educators to integrate all areas of curriculum to effectively assess and develop social competence benchmarks for students with ASD.

Degree Requirements

The College of Education’s Special Education program delivers curriculum and practice in collaboration with the Thompson Center for Autism and Neurodevelopmental Disorders (https://mizzougivedirect.missouri.edu/Division.aspx?division=C905). A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements. The MEd in Autism is available on campus or online through Mizzou Online. More information about the online degree program is available at the Mizzou Online program page (https://online.missouri.edu/degroeprogram/education/autism/masters/).

MEd in Special Education with Emphasis in Behavior Disorders

Coursework and practica in MU's Behavioral Disorders Program focus on the preparation of high quality teachers for students with behavioral disorders. MU prepares teachers for a variety of delivery settings, including general education classrooms as well as resource and self-contained classes from kindergarten through 12th grade.

The program is grounded in the MOSTEP Quality Indicators, the DESE Cross-Categorical Competencies, the standards of the Council for Exceptional Children, relevant research pertaining to best practice, significant field work and a problems-based approach to content. The MEd in Behavior Disorders emphasizes applied knowledge to prepare special educators to work directly with children and youth across a variety of settings.

Degree Requirements

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements. A minimum of 15 of those credit hours must be at or above the 8000 level.

Admissions

Faculty selection committees review applications for admission into the various graduate programs. MEd in Special Education with Emphasis in Cross Categorical, Certification

MU's cross-categorical disabilities program is tailored to graduate students who are receiving initial and secondary certification in cross-categorical special education. Upon completion of the degree, graduates are certified to teach students with mild disabilities (i.e., learning disabilities, emotional/behavior disorders, mental retardation) and are certified to teach all grades K-12.

Degree Requirements

In addition to enrolling in courses to fulfill general certification requirements, students are required to take graduate coursework (30 hours) in the area of cross-categorical disabilities.

The coursework represents a broad scope of content including language development, assessment, advanced behavior management, vocational education, collaboration and consultation, literacy instruction, mathematics instruction, research, and trends and issues in special education. In addition to the above requirements, students in the cross-categorical program also need to take a 3-hour characteristics of students with cross-categorical disabilities course and a 4-hour strategies for students with cross-categorical disabilities course.

To enhance the generalization of critical skills and knowledge to the classroom setting, students are also required to take two practica concurrent with the characteristics and methods courses that include field experiences and applications of key concepts. Students are required to have their practica represent the range of grade levels for which they will be responsible. More specifically, if their first practicum was in an elementary setting, then their second will be in a middle school, junior high or high school setting or vice versa.

Admissions

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant's motivation, professionalism and writing competencies. A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Retention

To remain in good standing in the master's program and earn a master's degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student's GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of "C" in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of "I" prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education website.

MEd in Special Education with Emphasis in Early Childhood Special Education

The Early Childhood Special Education (ECSE) Program is a graduate program that provides students with the necessary experiences and information to work with young children, both typically developing and those with disabilities, and their families in a variety of settings, including both home and school. The program also focuses on working effectively with families and children from a variety of cultures and how to provide intervention in a culturally consistent manner.

Degree Requirements

The Masters program in ECSE is 30 credit hours. In the campus program there are six required courses. Additional coursework is negotiated with the advisor.

The online program coursework is set and can be found at Mizzou Online (https://online.missouri.edu/degreeprograms/education/early-childhood-special-education/masters/).

Admissions

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Retention

To remain in good standing in the master’s program and earn a master’s degree, each student must earn and maintain an overall grade point of 3.0 or higher in all required and elective course work each semester. If student’s GPA falls below 3.0 for any semester, they will be dropped from the degree program. If students receive a grade of “C” in any core or required course, remedial activities will be required. Students must also complete course work assigned a grade of “I” prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education website.

MEd in Special Education with Emphasis in Gifted Education

The Gifted Education Master’s Program (MEd) is a graduate level program designed to provide candidates with advanced preparation in gifted education methodology and practices. Candidates become equipped with the knowledge and skills necessary to work with children and youth in the field of gifted education. The program meets Missouri Department of Education (DESE) academic requirements for Missouri Gifted Certification. This program is offered through Mizzou Online (http://online.missouri.edu/degreeprograms/education/gifted/masters/).

Degree Requirements

Applicants who are accepted into the master’s program will participate in a 30-hour online degree program with 15 hours of gifted education courses and 15 hours of core course work. Courses are selected to provide educators with skills and knowledge in current learning theory and to translate this knowledge into practical strategies and techniques for use in the classroom.

The 15 hours of gifted focus courses include content covering, nature and needs of gifted students, curriculum methods, differentiated curriculum, assessment and evaluation, and gifted practicum. The 15 hours of core course work in this program include study in learning theory, research with exceptional children, instructional technology, instructional leadership, and instructional strategies.

### Gifted education courses

- SPC_ED 8380 Nature and Needs of Gifted and Talented Students 3
- SPC_ED 8391 Curriculum Methods for Gifted and Talented Students 3
- SPC_ED 8405 Assessment and Evaluation in Gifted Education 3
- SPC_ED 8406 Differentiating Instruction: Reaching Gifted, Typical and Struggling Learners 3
- SPC_ED 8946 Practicum: Gifted Education 3

### Core requirements

- ESC_PS 7115 Human Learning 3
- ESC_PS 7160 Developmental Aspects of Human Learning 3
- SPC_ED 8350 Research with Exceptional Children 3
- SPC_ED 8410 Administration and Supervision of Gifted Education Programs 3
- SPC_ED 8085 Problems in Special Education 3

- Required for certification.

### Missouri gifted certification preparation

The 23 hours of gifted education course work above meet Missouri Department of Elementary and Secondary Education (DESE) requirements for Missouri gifted education certification. DESE requires 15 credit hours of gifted education course work in addition to SPC_ED 8410, SPC_ED 8350, and a course in Psychology and/or Education of the Exceptional Child (if not already taken as an undergraduate course) for a total of 23 credit hours.

Check the DESE educator certification web page (https://dese.mo.gov/educator-quality/certification/teacher/) for details.

If you wish only to enroll to complete the course work required for Missouri gifted certification, no formal application is required.

Admissions

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies.
Interviews with faculty are often arranged as part of the admissions review process.

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

Financial Aid from the Program

Students must also complete course work assigned a grade of “I” prior to the end of the following semester.

Satisfactory Progress

For information on general progress guidelines and the dismissal policy, see the Special Education website.

MEd in Special Education with Emphasis in Learning Disabilities

A Master’s degree with an emphasis in Learning Disabilities may be earned in conjunction with certification to teach in the state of Missouri. Although the state no longer offers certification in the area of learning disabilities, certification in cross-categorical special education can be obtained, along with a Master's degree in Learning Disabilities, through supplemental coursework. Coursework and practica in the LD program focus on the preparation of high quality teachers for students with a range of learning and behavioral needs. Graduates may work in a variety of service delivery settings, including general education classes as well as resource and self-contained classes from kindergarten through 12th grade.

Degree Requirements

A minimum of 30 semester credit hours must be completed in fulfillment of degree requirements. Students are required to complete course work that addresses a broad range of content pertaining to special education in areas such as:

- Language development
- Assessment
- Behavior management
- Collaboration and consultation
- Literacy instruction
- Mathematics instruction
- Research

Students in the learning disabilities emphasis area who are not seeking certification will complete a four-credit-hour field-based practicum in learning disabilities working in conjunction with a faculty supervisor as well as a certified learning disabilities or cross-categorical teacher in the public schools.

Admissions

Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

EdSp in Special Education

Our department is no longer admitting students to the EdSp program. We invite you to explore the other graduate degree options within the Special Education Department (p. 512).
PhD in Special Education

The Doctorate of Philosophy in Special Education is offered with emphasis options in Behavior Disorders, Early Childhood Special Education, and Learning Disabilities.

Degree Requirements

The PhD program requires 72 hours beyond the requirements of the master’s degree. Candidates will develop a program to meet their learning and research goals in the chosen emphasis area.

- Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.
- After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted to the department.
- Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
- Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
- Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
- Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
- Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
- Students must also comply with all College of Education and Graduate School guidelines.

Qualifying Exam

Doctoral students must successfully pass a qualifying exam. This is given to assess the student’s current knowledge of the field, their ability to synthesize professional literature, engage in professional writing practices, and orally present/discuss key issues within the field. This process is conducted by three faculty members and may be used to help define the student’s plan of study.

Comprehensive Exam and Dissertation Admission Criteria

Fall deadline: January 15
Spring deadline: August 15
Minimum GPA: 3.5/4.0
Minimum TOEFL/IELTS scores: 100 (TOEFL iBT), 7.0 (IELTS)
Minimum preferred GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
</tr>
</thead>
<tbody>
<tr>
<td>On or After August 1, 2011</td>
<td>297+ (V153 +Q144) / Analytic Writing 4.0</td>
</tr>
</tbody>
</table>

The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

Required Application Materials

- Unofficial transcripts of all prior coursework
- Statement of Purpose
- Letters of recommendation (minimum 3 letters; confidential and sent through the online application system)
- Personal Data Sheet
- Official GRE scores
- Official TOEFL scores (if applicable)

Confirmation Materials (required to finalize admission upon acceptance, sent to the Graduate School):

- Official transcripts
- Any additional required documentation

The Special Education graduate program cannot assure admission to all applicants who meet minimum standards specified for the degree program. Resource constraints do not permit the admission of all qualified applicants.

A committee of faculty reviews the credentials of each applicant. It is the responsibility of this committee to exercise professional judgment related to the criteria that applicants must meet in order to be considered for admission to the program.

PhD in Special Education with Emphasis in Administration and Supervision of Special Education

Our department is not currently admitting students to the PhD in Special Education with Emphasis in Administration and Supervision of Special Education program. We invite you to explore the other graduate degree options within the Special Education Department (p. 512).
PhD in Special Education with Emphasis in Behavior Disorders

Degree Requirements
The Doctorate of Philosophy in Special Education with an emphasis in Behavior Disorders supports advanced instruction and research in Behavior Disorders. Candidates complete individualized programs of study to meet their learning objectives and prepare for further research in the field. The candidate will build on prior graduate coursework through special education doctoral coursework, specified behavior disorders coursework, and dissertation preparation and defense. Students meeting entrance criteria will be conditionally admitted to the program, assigned an advisor, and expected to enroll in designated requisite coursework.

1. After completion of 9 credit hours, including 3 credits of quantitative methods plus 6 credits of special education doctoral core coursework, students must pass a qualifying examination to be fully admitted into the department.
2. Upon successful completion of the qualifying examination, students form a program committee and develop a program plan. The committee shall consist of four or more graduate faculty members (at least three from within the department and at least one from outside the department). The program plan will delineate coursework and competency activities to meet department requirements.
3. Once the majority of course-work and competencies are completed (80-90%), students will be required to pass a comprehensive examination to advance to candidacy.
4. Upon successful completion of the comprehensive examination, students will form a dissertation committee and develop a research proposal. The dissertation committee may be the same as the program committee or may change based on the need to include faculty members with specific areas of expertise. Once all committee members approve the proposal, students can begin implementation of the dissertation study.
5. Upon completion of the study, students must submit a written draft to the dissertation committee and orally defend their work.
6. Students will graduate only after all dissertation committee members approve the written dissertation and oral defense.
7. Students must also comply with all College of Education and Graduate School guidelines.

Qualifying Exam
Doctoral students must successfully pass a qualifying exam. This is given to assess the student’s current knowledge of the field, their ability to synthesize professional literature, engage in professional writing practices, and orally present/discuss key issues within the field. This process is conducted by three faculty members and may be used to help define the student’s plan of study.

Comprehensive Exam and Dissertation
Doctoral students must complete comprehensive exams, which have a written and oral component, which is constructed and evaluated by the student’s doctoral committee in order to advance to “candidacy” status. A minimum of six hours of 9090 Research is required for the doctoral program in completion of the dissertation.

Admissions
Faculty selection committees review applications for admission into the various graduate programs. Factors considered in the graduate student review process include previous academic course work and performance, GRE scores, letters of recommendation from professors or professional supervisors and relevant professional work experiences. The letter of intent is evaluated for advising purposes and is an indication of the applicant’s motivation, professionalism and writing competencies. Interviews with faculty are often arranged as part of the admissions review process.

- Certificate in User Experience and Usability (p. 531)

Graduate Minors
- Minor in Multicultural Psychology (p. 532)

Minor in Education

Requirements
To receive a Minor in Education students will complete a minimum of 15 credit hours. Students must receive a grade of C- or better and a 2.0 overall minimum GPA in Education courses for the minor.

Some of these courses will require permission numbers. Please see the Enrollment Information and Course Description in MyZou for more information.

A minor must be completed and awarded at the same time as the MU undergraduate degree (i.e., minors cannot be claimed after graduation).

At least one course from the following (3 or 6 credits):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 2000</td>
<td>Experiencing Cultural Diversity in the United States</td>

Graduate Certificate in Digital Humanities

The Graduate Certificate in Digital Humanities (GCDH) is a twelve-credit hours (4 courses), online and hybrid delivery, interdisciplinary graduate certificate that will be offered through the Digital Humanities Commons at the Allen Institute at the University of Missouri's School of Information Science & Learning Technologies (SISLT). The Certification is an additional credential for students enrolled in graduate programs at MU and as a ‘stand alone’ diploma for distance students.

The Graduate Certificate in Digital Humanities certifies that students are equipped with skills in interdisciplinary research using new digital technologies- skills that university researchers and public and private sector employers recognize as essential in the 21st Century. The Certificate requires completion of a major paper or digital project that integrates specialized disciplinary knowledge and digital media. The Certificate can be completed in two semesters; there is no mandatory time frame for finishing.

“Digital Humanities” (DH) is a rapidly growing “bridge discipline” spanning various subject areas: liberal arts, library and information science, communication arts, media studies, education, journalism, cultural studies, history and philosophy of science and technology, computer science, and informatics. Also, the contexts of the academy, libraries, archives, museums, media, and industry are important for understanding Digital Humanities. A DH scholar uses new computational and statistical tools and methods to address research problems in arts and humanities subject areas, and they apply humanistic modes of inquiry and interpretation to information, “big data,” new electronic media, and computer science.

Committee

Students who register for the Graduate Certificate in Digital Humanities will form a committee of two professors who will supervise their program. The supervisor will typically be from the student’s home discipline in the humanities, social sciences, or professional school (e.g., English, Romance Languages, Classics, History, Sociology, Computer Science, Library & Information Science, or Journalism). The other advisor will be from the iSchool.

Requirements

The graduate certificate requires 12 graduate credit hours. The overall program structure includes coursework in two categories:

- Required (6 credit hours)
- Electives (6 credit hours). Selected by students in consultation with their committee

Graduate Certificate in Education Policy

Through an interdisciplinary partnership among Education, Law, and Public Policy scholars, our Education Policy Graduate Certificate serves to develop critical leaders, policymakers, and scholars who demonstrate excellence in implementing and analyzing policy. A carefully planned set of courses will provide students with the knowledge, skills, and tools to answer tough policy questions facing our society, for instance: How do we address the rising costs of higher education? Segregated schooling? Undocumented immigrant students? Families who speak languages other than English?

The Education Policy Graduate Certificate will provide students with:

- **Knowledge** that they can apply to the study of education policy within their major discipline or their work in policy settings;
- **Skills** in analyzing education policy issues, i.e., understanding differing values, political and economic arguments, costs/benefits, and policy processes;
- **Conceptual tools** to use in understanding and resolving issues faced in educational policy development and implementation.

Requirements

**Foundations - Students choose 1 of the following:**

- PUB_AF 8170 Public Policy Processes and Strategies 3
- ED_LPA 9402 Educational Policy Analysis 3

**Knowledge/Concepts - Students choose 1 or 2 of the following:**

- ED_LPA 9451 Higher Education Finance 3
- ED_LPA 9457 Higher Education Policy 3
- ED_LPA 7485 Sociology of Education 3
- ED_LPA 9462 History of U.S. Education Policy 3
- ED_LPA 9463 Politics of Education 3
- LAW 5525 Education Law 1-3

**Skills - Students choose 1 or 2 of the following:**

- ED_LPA 8955 Discourse Analysis in Education 3
- ED_LPA 9465 Policy Analysis Using Large Data Bases 3
- PUB_AF 8190 Economic Analysis for Public Affairs 3
- PUB_AF 8420 Public Program Evaluation 3
- PUB_AF 8430 Public Policy Analysis 3
- ESC_PS 8690 Educational Planning and Evaluation 3

After coursework is complete, students will develop a mini-portfolio to demonstrate their learning. **NOTE:** Before taking courses and assembling a portfolio, you will need to fill out an initial plan of study (available at [https://missouri.app.box.com/s/tdcz06h6857mp1x4y9ksjj74vriz8](https://missouri.app.box.com/s/tdcz06h6857mp1x4y9ksjj74vriz8)) and have a meeting with the policy certificate coordinator.

Graduate Certificate in Elementary Mathematics Specialist

The program is designed for inservice K-6 teachers interested in pursuing advanced learning experiences and training to increase their knowledge and skill to teach or lead others in teaching mathematics in elementary classrooms. That is, the program is designed for teachers currently working full time.

Requirements

The EMS graduate certificate program includes five integrated mathematics content/pedagogy courses, each with an attached internship and two leadership development courses (total of 24 credits). The courses will be offered over a 2-year cycle beginning in the Fall semester (6 semesters of part-time student effort).

Graduate Certificate in Global Education and Leadership

The Graduate Certificate in Global Education and Leadership prepares and positions educators to develop, sustain, and lead globally-minded schools, (from preschool through high school). Regardless of geographic location, educators and students are growing and learning in a transnational world. Examining global and local contexts, this certificate will provide the theories, tools, and resources for aspiring principals, curriculum leaders and other educators to successfully lead colleagues.

For more information, visit [https://education.missouri.edu/degrees-programs/certificates-minors/global-education/](https://education.missouri.edu/degrees-programs/certificates-minors/global-education/).
and students to be critical, reflective, and inquiring global stewards with refined intercultural skills.

The required four courses each take an inquiry approach that allows educators to question and examine locally-relevant and globally-minded leadership principles and practices. The program as a whole expands upon ELPA’s commitment to developing equitable and inclusive leadership by bridging best practices in school leader development with the underpinning values of the International Baccalaureate (IB) organization (ibo.org) and the Sustainable Development Goals of the United Nations (https://sustainabledevelopment.un.org/sdg4). In turn, the core value underlying the certificate is to foment intercultural understanding and global-mindedness in each of these critical aspects of educational leadership: Effective curriculum and instruction, collaborative teamwork, risk-taking and innovation, reflective practice, leadership development, and systems of continuous improvement.

**Requirements**

The 12 credit hour Graduate Certificate in Global Education and Leadership will be offered as a stand-alone certificate.

### Graduate Certificate in Higher Education Administration

The Graduate Certificate in Higher Education Administration is designed to address the need for enhanced understanding of the higher education institutional context and for improved skills in areas required for effective administration in higher education. The graduate certificate program provides students with an overview of higher education administration and governance, and technical knowledge about various aspects of administration (e.g., finance, law, policy).

### Graduate Certificate in Multicultural Education

This certificate will provide the requisite awareness, knowledge and skill to effectively work with students and families from diverse cultural backgrounds and is ideal for teachers, counselors and administrators in P-12 school settings. By creating this online certificate, Mizzou is working to increase the number of qualified teachers and other school personnel who can serve diverse populations and prepare all students to function more effectively in society.

Certificate web site: Multicultural Education Graduate Certificate. (http://online.missouri.edu/degreeprograms/education/multicultural/grad-cert/)

**Requirements**

The 12 hour certificate can be completed entirely online, but some students may choose electives that are offered on campus.

**Core Courses**

The foundation of the certificate starts with the following two courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8450</td>
<td>Diversity Issues in School Mental Health</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8550</td>
<td>Diversity and Multiculturalism II - Practical Application</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Students complete two courses (6 credit hours):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8555</td>
<td>African American Education - Historic and Current Issues</td>

<td>3</td>
</tr>
<tr>
<td>ESC_PS 8560</td>
<td>Immigrant Issues in Education</td>
<td>3</td>
</tr>
</tbody>
</table>
How To Apply
Certificate program admission requirements will be the same as those for the Graduate School. (https://gradschool.missouri.edu/admissions/apply/)
• Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master’s degree.
• Submit the Graduate School online application (https://applygrad.missouri.edu/apply/).
• Upload unofficial transcripts when using the Graduate School online application system.
• Two letters of recommendation.
• GRE scores are NOT required.

Application Deadline
None. Rolling admission.

Financial Aid
To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

Contact Information
• Dr. Francisco Sanchez (SanchezF@missouri.edu) - Multicultural Education Faculty Coordinator
• Sandy Sites (SitesS@missouri.edu) - ESCP Online Program Coordinator

Graduate Certificate in Online Educator
The Online Educator Graduate Certificate Program will equip individuals with the knowledge and skills needed to design and provide effective online learning experiences including:
• Designing online learning activities and assessments for meaningful learning
• Designing, facilitating, and evaluating online discussions
• Promoting student engagement and motivation in online learning environments
• Understanding unique characteristics of online learning environments
• Selecting appropriate technology tools and learning objects to support online learners
• Using Learning Management Systems to support and deliver online learning
• Seeking for and evaluating Internet-based information and resources that can be used to enhance online learning
• Organizing course materials in an online format

Requirements
The graduate certificate requires 12 graduate credit hours, with a maximum of 3 hours of transfer credit.

Graduate Certificate in Positive Psychology
This certificate in positive psychology from Mizzou’s Department of Educational, School, and Counseling Psychology (ESCP) is designed for individuals seeking a program that emphasizes applied interventions and theory in building thriving individuals, families, communities and organizations. Combining 21st century psychology and several ancient philosophies, contemporary positive psychology is focused on advancement of individuals and their collective well-being.

The program will provide you with a thorough understanding of the science of well-being and flourishing that will allow you to be more effective in your professional and personal life. Individuals may use this graduate certificate for personal enrichment or to increase their professional marketability across many career paths such as life/career coaching, teaching, managing, and organizational consulting.

Note: This graduate certificate does not provide counselor certification.
Certificate web site: Positive Psychology Graduate Certificate (http://online.missouri.edu/degreeprograms/education/positive-psychology/grad-cert/)

Requirements
An online graduate certificate program requiring 15 credit hours to complete.

**How To Apply**

Certificate program admission requirements will be the same as those for the Graduate School.

- Grade point average of B or better in the last 60 hours of undergraduate education for applicants with less than a master's degree.
- Submit the Graduate School online application (https://applygrad.missouri.edu/apply/).
- Upload unofficial transcripts when using the Graduate School online application system.
- Statement of interest: Briefly describe how this program will benefit your career aspirations and help you act upon your personal beliefs, goals, and philosophy. (Maximum of 500 words)
- Two letters of recommendation.
- Résumé or curriculum vitae.
- GRE scores are NOT required.

**Application Deadline**

None. Rolling admission.

**Financial Aid**

To receive financial aid, students must be admitted to the graduate certificate program. Financial aid is generally available to eligible students who are fully accepted into the program and who carry a course load of at least four credit hours per semester.

**Contact Information**

- Dr. Patrick Rottinghaus (RottinghausP@missouri.edu) - Positive Psychology Faculty Coordinator

<td></td>
</tr>
</tbody>
</table>

**Total Credits**

18

**Prerequisites**

Students must have taken LTC 8957 Qualitative Methods in Educational Research I* or a comparable course outside the College of Education, as approved by the certificate committee. LTC 8957 will not count towards the 18 hours required for the certificate.

*Note: LTC 8957 is cross-listed as ED_LPA 8957 and ESC_PS 8957.

**Graduate Certificate in Quantitative Research**

The Quantitative Research Certificate (QRC) is designed to prepare researchers and scholars to be users and critical consumers of quantitative research. Certificate holders are trained to conduct rigorous, scientific quantitative research.

Students completing the QRC (depending on the chosen track) will be able to:

- Design effective experimental and quasi-experimental studies
- Manage and use large scale datasets
- Analyze various types of datasets (e.g., nested data, longitudinal data) with the appropriate modeling techniques
- Apply advanced statistical methods (e.g., structural equation modeling, multilevel modeling) in their own research
- Critically review studies that make use of a diverse set of statistical methods
- Conduct measurement-related studies using techniques such as factor analysis or item response theory

**Requirements**

Earning the Quantitative Research Certificate (QRC) requires students to complete 18 hours of approved coursework with a grade of at least a B in all courses. A plan of study must be approved by the QRC committee and may include the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 7170</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 8082</td>

**Contact**

For more information about the quantitative research certificate, email quantcertificate@missouri.edu.
Graduate Certificate in Serious Game and Simulation Design

The SGSD certificate program prepares students as significant professional contributors to the design and prototype of Games and Simulations that have purposes that go beyond entertainment. Certificate graduates would have a competitive advantage to market themselves as prepared practicing professionals in the Serious Game and Simulation Industry.

Educational Objectives:

- Learn and apply a systematic, agile, team-based and flexible process for game and simulation design.
- Learn and apply skills for prototyping game and/or simulation designs using appropriate software and/or game engine tools.
- Analyze existing games and simulations for usage of game/simulation strategies and mechanisms shown to be effective in achieving cognitive, affective and psychomotor learning outcomes.
- Become fluent in usage of serious gaming and simulation technology equipment (e.g. HTC Vive, Oculus Rift, Samsung GearVR, etc.)
- Analyze needs needs of user groups (e.g. accessibility, diversity, gender/LGBTQ representations, anti-harassment, etc.) using different methods, design, and prototype a “serious” game and/or simulation using strategies and mechanisms shown to be effective in achieving cognitive, affective and psychomotor “serious” outcomes.
- Assess and evaluate learning outcomes from employing game/simulation strategies using user experience and usability methods.

Requirements

The graduate certificate is a 16 credit hour program. All courses are online.

Required Courses:

Graduate Certificate in Teaching English to Speakers of Other Languages

The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) prepares English language teachers, English language program administrators, language testers, and educational materials writers to work in contexts where English is a foreign language (EFL contexts). The objectives of the certificate are to develop professionals with a) knowledge of the structure of the English language; b) an understanding of how languages are used and learned; and c) skills in designing and implementing pedagogical tasks to facilitate language learning.

Requirements

The certificate consists of 18 graduate credit hours divided among five core courses and one elective course. Begin your course work with LTC 8645, LTC 8648 or both.

Required core courses

<table>
<thead>
<tr>
<th>Course Code</th>

Graduate Certificate in User Experience and Usability

The User Experience and Usability (UXU) Certificate, offered by the School of Information Science & Learning Technologies (https://
sislt.missouri.edu/), prepares students to design and evaluate technology tools and information systems. The multi-faceted human-centered lens for design and evaluation is a systematic process supported by research and best practices.

Our UXU certificate is uniquely positioned in the area of usability because our Information Experience Laboratory (IE Lab) performs extensive usability and user experience research with internal and external clients. You will prepare for jobs in an expanding field where UXU competencies are used in education, industry, healthcare, museums and other learning and performance settings.

Requirements

The certificate curriculum consists of 12 graduate credit hours that may be transferred into SISLT’s M.S. or Ed.Sp. programs. The 12 graduate credit hours apply toward any of the emphasis areas: Online Education, Technology in Schools.

Graduate Minor in Multicultural Psychology

As we enter the new millennium, the U.S. population is becoming more multiracial, multiethnic, and multilingual. Some estimate that by the year 2020, racial and ethnic minorities will become the numerical majority. This demographic shift has already occurred in specific contexts, such as K-12 schools in Los Angeles. Applied psychologists and educators have begun to develop competency standards for professionals to provide culturally relevant and effective services to our ever-changing population. In fact, multiculturalism has been identified as the fourth focus in counseling psychology. The purpose of the graduate minor in multicultural psychology and education would be to (a) expose graduate students to the growing theoretical and empirical research completed in the fields of multicultural psychology and education, (b) help graduate students develop multicultural competencies in research and practice, and (c) provide graduate students with training necessary to meet the psychological and educational demands of diverse populations.

Requirements

- A minimum of 12 credit hours
- 9 credit hours must be taken as a graduate student at the University of Missouri
- No more than 6 credit hours should be listed in the masters or doctoral planner. That is, a maximum of 6 hours can overlap between the courses applied to the Minor in Multicultural Psychology and the courses applied toward a masters or doctoral degree.
- A minimum of 9 credit hours must be 8000 or above (graduate level)
- 6 credit hours must be taken within the core area with a focus on racial and ethnic minorities (see listing below)
- 3 credit hours must be taken in the auxiliary area (see listing below)
- 3 credit hours must be taken in the skills area (see listing below)

Core Courses

Must complete at least 6 credit hours from the following courses with a main emphasis on race/ethnicity in psychology and/or education

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8590</td>
<td>Multicultural Counseling Competencies: Theory and Research</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9000</td>
<td>Multicultural Issues in Counseling</td>
<td>3</td>
</tr>
</tbody>
</table>

Other racial/ethnic-focused graduate level courses in other departments, with pre-approval.

Auxiliary Courses

Must complete 3 credit hours from the following courses emphasizing a wide range of diversity and social change issues.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8990</td>
<td>Career Development Theory for Women</td>
<td>3</td>
</tr>
<tr>
<td>ESC_PS 9020</td>
<td>Psychology of Crossing Cultural Borders</td>
<td>3</td>
</tr>
</tbody>
</table>

Other diversity issues and inequality in social systems graduate level courses in other departments, with pre-approval.

Skill Courses

Must complete 3 credit hours from one of the options below.

I. Research Skills *

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESC_PS 8943</td>
<td>Practicum in Multicultural Counseling Interventions</td>
<td></td>
</tr>
</tbody>
</table>

Pre-approved Multiculturally-designated applied course (e.g. counseling practica, teaching practica, group counseling practica)

Applied experience via community outreach programs, work placements in agencies, or extended volunteer experiences in community agencies.

Multicultural Competency Portfolio to demonstrate awareness, knowledge and skill competencies, as approved by a Center Director.

Consultation courses in organization or systemic changes including applied consultation activities, as pre-approved by a Center Director.
The scope and quality of the research project is expected to be of such a caliber that it could be submitted to a refereed journal in the student's discipline. The research project must be on a multicultural-related topic (i.e. issues related to race, sexual orientation, gender, and international concerns). Successful completion of this requirement will consist of approval of the project from a Director of the Center for Multicultural Research, Training and Consultation, or have an ESCP faculty affiliated with the Center on the committee with at least one committee member having expertise in multicultural issues.

The person must demonstrate competencies in working with diverse populations (with an emphasis on racial and ethnic minority populations).
University of Missouri

College of Engineering

Administration

Noah D Manring, Interim Dean
W1024 Lafferre Hall
(573) 882 4378
manringly@missouri.edu

The University of Missouri College of Engineering recruits high-caliber students and offers research opportunities in laboratories, a wide variety of opportunities to develop leadership skills through more than 50 College-supported student organizations, and supports interdisciplinary collaboration through our many campus partnerships.

The College strives to develop a new generation of engineering leaders who are focused on using engineering creatively to solve the grand challenges facing the world, the nation and the state of Missouri.

Mission

The mission of the College of Engineering is to provide students with the resources and services needed to reach their academic and professional goals. This is accomplished through a focus on four core values: Integrity, Accountability, Collaboration and Excellence.

This mission is supported by:

• Supporting the academic and research mission of the University of Missouri, the College of Engineering and College of Engineering departments
• Providing programs and resources to support student success
• Valuing and promoting diversity, multiculturalism and an inclusive environment within the College of Engineering
• Encouraging positive self-growth through academic planning and accountability
• Creating an environment that fosters development by focusing on individual student needs

Undergraduate

• Admissions (p. 534)
• Graduation Requirements (p. 535)
• Academic Regulations (p. 535)
• Student Services (p. 536)

The MU College of Engineering is committed to a longstanding tradition of educating future engineering leaders. Here, students are inspired and challenged. Students work, learn, research and create in an atmosphere where innovation, collaboration and finding ways to rise above challenges are more than aspirations — they are simply how we operate.

Admissions

Freshman Admission to Engineering

Entering freshmen are expected to have completed 17 units of approved high school course work (in grades 9-12), including 4 units in English, 4 in mathematics and 3 in science with laboratory. Mathematics should include 2 units of algebra, 1 unit of plane and solid geometry (combination course), and 1/2 unit of trigonometry. Additional senior mathematics is recommended.

The College of Engineering has two levels of admissions. Direct Program admits and Pre-Engineering admits. The two levels are explained further below.

Direct Program Admits

For direct admission to one of the College of Engineering degree programs (excluding Information Technology), the applicant must meet the qualifications listed below.

• ACT-Math of at least 26 AND
• ACT-Composite of at least 26 OR High school class rank in the top 25 percent

Students pursuing Information Technology must meet MU’s General Admission Standard to be considered Direct Admits.

Pre-Engineering Program

Freshmen who do not meet the criteria for Direct Program admit are admitted into the Pre-Engineering Program. Pre-Engineering students will utilize additional support systems; such as transition and onboarding programming for entering students, major and career exploration programming and advising, tutoring support, and early alert outreach.

Pre-Engineering students will be admitted to desired departments when they meet the following requirements:

Electrical Engineering, Computer Engineering, or Computer Science: C- or better in Math 1500, C or better in Comp Sci 1050
Chemical Engineering: C or better in Math 1500 and Chem 1320, 2.5 GPA based on grades taken at Mizzou.
Biological Engineering, Biomedical Engineering, Civil and Environmental Engineering, Industrial and Manufacturing Systems Engineering, Mechanical and Aerospace Engineering: C or better in Math 1500, Math 1700, Chem 1320, Phys 2750.

Transfer Students

Students wishing to transfer to MU from an accredited college or university are subject to University regulations described in this catalog. The MU College of Engineering cooperates with many colleges through articulation agreements that help students transfer to MU with maximum ease and minimum loss of credits. A student may contact the College of Engineering Admissions Office to determine if their home institution participates in an agreement with the College of Engineering. Students who have completed all courses specified in the articulation agreement will be admitted into their desired degree program. All other transfer students are admitted on program discretion. Typically, transfer students with freshmen status must satisfy same requirements as pre-engineering students. Other students are admitted only after review of transcript.
To be recommended for the BS degree from the College of Engineering, a student transferring from an accredited institution must complete at least 30 upper-level credits in the degree program at a UM System campus. At least 21 of the 30 credits must be upper-level engineering courses approved by the department awarding the degree.

A student transferring with senior standing from another UM System campus must complete the last 15 credits in residence on the campus where the degree program is located. Twelve of these 15 credits must be in engineering and approved by the department awarding the degree.

Any student whose enrollment in any college-level academic program resulted in dismissal, departure or who are on probation will not be admitted to the College of Engineering.

International Admission

Admission of international students is determined on an individual basis by a committee of representatives from the Admissions Office and the College of Engineering.

Before registering for classes at the University, international students must take the MU English Language Test, developed for international students. Students passing the test are eligible to take ENGLSH 1000 and any other required English courses.

International students whose test scores indicate that additional English training is needed, including those with transferred English credit, are required to register for English-language support courses. The course, developed for international students, should be taken during the first semester of enrollment. These courses do not count toward graduation credit, but regular attendance is required and failure to attend may result in dismissal. The English-language support course taken must be satisfactorily completed before the student can enroll in ENGLSH 1000 or transfer any course equivalent to English 1000 from another institution.

Students not satisfactorily completing the course in the first semester of enrollment must re-enroll in the second semester. If the student does not satisfactorily complete the English-language support class in the second term of enrollment, the student may not be permitted to re-enroll in the College of Engineering.

Graduation Requirements

The curriculum provides a solid foundation of mathematics and physical sciences followed by the application of these sciences in engineering specialties. The balance of the curriculum encompasses communication skills, English, social sciences and humanities courses.

Students should access the engineering web site (http://engineering.missouri.edu) for details regarding social and behavioral sciences and humanities and fine arts requirements.

In addition to the University’s general education and graduation requirements, the departments in the College of Engineering may require further specific courses to better equip students to perform in their chosen fields of study.

While many students complete the BS degree program in four years, some may find it advisable to extend the curriculum in order to carry lighter semester loads, add preparatory courses or compensate for part-time work.

GPA Requirements for Graduation from the College of Engineering

- GPA of record of at least 2.0
- GPA of at least 2.0 in all engineering courses offered by one of the four campuses of the UM System. ‘Engineering courses’ include all courses that are offered through the College of Engineering or its equivalent on the four campuses, or that have ‘Engineering’ in the curricular designator. Only the last grade in a repeated course will be used in the calculation.

Academic Regulations

Degree with Honors Requirements

A student must have earned 60 hours on this campus to be eligible for Latin Honors, which will be determined by the MU grade point average. Latin Honors are granted to students who meet the following cumulative GPA requirements:

<table>
<thead>
<tr>
<th>Latin Honor</th>
<th>GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>summa cum laude</td>
<td>3.9</td>
</tr>
<tr>
<td>magna cum laude</td>
<td>3.7</td>
</tr>
<tr>
<td>cum laude</td>
<td>3.5</td>
</tr>
</tbody>
</table>

Departmental Honors

The college maintains an undergraduate honors program to further challenge those who have established a minimum GPA of 3.0 at the beginning of the junior year. A comparable grade point average is required of transfer students. The program leads to an undergraduate honors thesis on a research or advanced design project, provides for additional curricula flexibility and contains features that ease the transition to graduate school.

Opportunities available to honors students include:

- More personal attention from an honors advisor
- Independent study or undergraduate research with a senior faculty member whose specialty interests the honors candidate

A student who successfully completes the engineering honors program, including the independent project, will be designated an “Honors Scholar in Engineering.” Interested students should contact their departmental office.

Qualified engineering students are also welcome to join the programs of the Honors College and may enroll in various honors courses and honors sections of regular courses.

Courses in Basic Skills

No basic skills courses may be taken to fulfill graduation requirements.

Curriculum of Record

The curriculum of record is the curriculum a student must satisfy to meet graduation requirements. For students who maintain continuous, full-time enrollment, the curriculum of record is the one approved by the College of Engineering at the time the student achieves upper-division status in the discipline of choice. For others, the curriculum of record is decided by the department faculty.
Academic Probation and Dismissal

1. A student whose term and cumulative UM GPA are 2.0 or higher is in good academic standing. A “term” is defined as a semester or summer session.

2. A student will be placed on academic probation if while in good academic standing the student has a term GPA less than 2.0 but equal to or greater than 1.0.
   - While on academic probation, a student must enroll in and complete each semester at MU at least 12 credits of course work necessary for the degree. Courses taken through MU’s Mizzou Online (self-paced) count as part of these 12 credits. Part-time students must enroll in at least as many credits each semester as the college rules governing part time enrollment.
   - A student will be removed from probation at the end of the term when the term and cumulative GPA are 2.0 or higher, provided the student completed 12 or more hours applicable toward the degree. Students who work part time may also be removed from probation with fewer completed hours. (9 credit hours completed if over 20 work hours per week, 6 credit hours if over 30 hours per week. Must provide proof.)
   - A student will be continued on probation if while on probation the student has a term GPA greater than or equal to 2.0, but whose cumulative GPA is below 2.0.

3. A student will be dismissed from the College of Engineering if the student:
   - Receives a term GPA of less than 1.0.
   - Receives a term GPA of less than 2.0 while on probation.

4. Readmission:
   - Students who are dismissed from the College of Engineering and who wish to appeal their case for continuation must write an appeal letter and submit it to the academic appeals committee.
   - If the appeals committee allows a student to re-enroll on final probation, it may set conditions such as courses to be taken, minimum grades, total hours, etc to which the student must adhere.
   - A student who has been dismissed for academic reasons may be readmitted upon a successful appeal to the academic appeals committee of the College of Engineering.
   - Similarly, students who wish to re-enroll in the college of Engineering after having been out of school as a result of a dismissal must write a letter of appeal to the College of Engineering academic appeals committee requesting readmission.
   - Letter of appeal may be addressed to: Engineering Academic Appeals Committee, W1025 Lafferre Hall, University of Missouri, Columbia, MO 65211. A personal visit with the director of undergraduate studies of the students’ department and advisor before appealing by letter is recommended and often helpful, both to the student and to the committee.
   - One of the primary objectives of the appeals committee is to evaluate indicators of the likelihood of future success of the student. Accordingly, any appeal letter should include an explanation for past poor performance and reason for expecting better outcomes in the future.

5. A student who is dismissed while on final probation will normally be ineligible for readmission.

Satisfactory/Unsatisfactory Grading Option

Under Satisfactory/Unsatisfactory (S/U) grading, an S is assigned for a grade in the A, B or C range, and a U is assigned for a grade in the D range or for an F. Neither an S nor a U will be calculated into a student’s grade point average. A student enrolled in the College of Engineering may not take any math, science or engineering course that counts toward degree requirements under the S/U grading option, unless the course is only offered S/U. In addition, any course specifically required (by course number) in the curriculum may not be taken S/U. This includes ENGLSH 1000 or ENGLSH 1000H. The 18 credits taken to fulfill the University general education distribution requirement may be taken S/U.

Restrictions

- First-semester freshmen are ineligible to take any course S/U unless it is only offered S/U.
- Only one course per semester may be taken S/U.
- Students on academic probation are not allowed to take any course S/U.
- To be eligible for the Dean’s List each term, a student must complete 12 graded credits (S/U courses are not considered “graded”).

Student Services

Advising

Each student in the College of Engineering is assigned an advisor from the College of Engineering Advising Office who assists the student in reaching academic and professional goals, as well as assist students with time management and academic success strategies. Students are encouraged to meet with their advisors as often as needed. Engineering students have advising holds placed on their accounts each semester and will work with their advisor to verify enrollment and degree progress before enrolling for the following semester.

Diversity and Outreach Initiatives

At Mizzou Engineering we honor our values by insuring a diverse and inclusive college. The College of Engineering Office of Diversity and Outreach Initiatives facilitates the outreach, recruitment, retention, and overall success of all members of our community, especially those from backgrounds traditionally underrepresented in engineering. The Office of Diversity and Outreach Initiatives provides professional development programming surrounding inclusion, equity, and diversity for all of our undergraduate and graduate students, staff, and faculty. The Office houses many programs including:

- The Inclusivity Center which provides a physical space where everyone is welcome as well as a venue for our events and activities.
- The Women in Engineering Program which focuses on all activities that support and recruit women students.
- The Multi-cultural Engineering Program which fosters a support network between students, faculty, and staff to ensure academic success by providing structured progress checks, professional development trainings, early research experience, counseling, academic enrichment, mentoring and information about graduate study for the Engineering Diversity Scholarship recipients.
- The Office of Diversity and Outreach Initiatives serves as a resource for the College of Engineering student organizations to further engage them in diversity and inclusion efforts.
Study Abroad
College of Engineering and STEM students have opportunities to pursue academic, leadership, and service opportunities around the world. Students can participate in short-term study abroad programs in Europe, Asia, and Latin America and earn college credit towards general education requirements, core engineering requirements, and engineering technical electives to complete graduation requirements. Students can also participate in semester long programs.

Professional Engineering Registration
The revised statutes of Missouri (Section 327.221) require that each applicant for registration as a professional engineer in Missouri must be a graduate of and hold a degree in engineering in a curriculum accredited by the Accreditation Board for Engineering and Technology. The MU undergraduate programs in biological engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, industrial engineering, mechanical engineering, and computer science are so accredited.

Senior students are strongly encouraged to take the Fundamentals of Engineering Exam leading to the Fundamentals in Engineering (FE) status as a first step toward registration.

The MU undergraduate programs in bioengineering, chemical, civil, computer engineering, electrical, industrial and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET and computer science is accredited by the Computing Accreditation Commission of ABET www.abet.org (http://www.abet.org).

Naval Reserve Officers Training Corps (NROTC)
NROTC was established in 1926 to offer college students the necessary naval science courses to qualify for commissions in the Navy or Marine Corps Reserve. Today, NROTC is one of the primary accession sources of officers for the Navy and Marine Corps. MU represent one of 77 host colleges across the country with an NROTC program.

Navy students should major in a technical course of study while Marine students may major in any course of study leading to a baccalaureate degree. Academic credit for naval science courses is accepted toward a baccalaureate degree by most MU schools and colleges. Midshipmen take one naval science course for credit each semester, which provides education and training in various aspects of the Navy or Marine Corps. These courses are available to any student at MU, who can earn a Minor in Naval Science (p. 601). Associated with each course is a leadership laboratory for program students. NROTC activities include water survival, self-defense, physical fitness, orienteering, aviation, nuclear power indoctrination, pistol/rifle marksmanship and a variety of field trips.

Scholarship NROTC midshipmen incur no military obligation during their freshman year. This allows students to get a better understanding and appreciation of the life of a Navy or Marine Corps officer before committing. Navy NROTC graduates incur a minimum five years military obligation. Marine NROTC graduates incur a minimum four year military obligation. Upon graduation, midshipmen who successfully complete the program are commissioned as Ensigns in the Navy or Second Lieutenants in the Marine Corps.

For additional information, contact:
Department of Naval Science
105 Crowder Hall

Graduate
The College of Engineering graduate programs at the University of Missouri promotes technology, innovation and entrepreneurship with abundant interdisciplinary opportunities in research and education. MU Engineering sustains a variety of research centers, programs, groups and facilities along with other departmental groups that are designated as areas of exemplary expertise and success. The college contributes significantly to MU’s overall annual research and development spending. The College also offers exceptional business opportunities to corporations, small businesses and start-ups.

MU graduate students have gone on to become faculty at world-class academic institutions in the U.S. and around the world, have created start-up companies as successful entrepreneurs and have secured jobs with leading Fortune 500 companies and National Laboratories.

Graduate engineering programs include

- Biological Engineering
- Biomedical Engineering
- Chemical Engineering
- Civil & Environmental Engineering
- Computer Science
- Electrical & Computer Engineering
- Industrial Manufacturing & Systems Engineering
- Mechanical & Aerospace Engineering
- MU Informatics Institute

Note: Prospective graduate students must be accepted to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest on the graduate admissions page.

Biological Engineering
Kevin Gillis, Interim Chair
College of Engineering
College of Agriculture, Food and Natural Resources
222B Dalton Cardiovascular Research Center
(573) 884-8805
gillisk@missouri.edu

Recognizing the immense promise of biological engineering and the unique position of Mizzou for a strong biological engineering program, the College of Agriculture, Food and Natural Resources (CAFNR) and the College of Engineering (CoE) joined forces.

The Department of Biomedical, Biological & Chemical Engineering unites existing faculty and infrastructure from both colleges. CoE contributes biomedical engineering capabilities while CAFNR brings strengths in bioprocess and bioenvironmental engineering.
Mission and Objectives

The department mission is to educate biological engineers to integrate engineering and biological sciences in the contexts of health, sustainability and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth.

Program Educational Objectives:

1. An ability to identify, formulate, and solve engineering programs by applying principles of engineering, science, and mathematics
2. An ability to apply both analysis and synthesis in the engineering design process, resulting in designs that meet desired needs
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. An ability to integrate engineering and biological sciences for the modeling and development of systems and processes to realize improvements in health, bio-resource use, environmental protection, and/or other fields

Student Outcomes:

Students from the BE program will attain (by the time of graduation):

1. An ability to identify, formulate, and solve engineering programs by applying principles of engineering, science, and mathematics
2. An ability to apply both analysis and synthesis in the engineering design process, resulting in designs that meet desired needs
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. An ability to integrate engineering and biological sciences for the modeling and development of systems and processes to realize improvements in health, bio-resource use, environmental protection, and/or other fields

About Biological Engineering

Biological engineering (BE) or bioengineering is a science-based engineering discipline that integrates engineering with biological sciences in one curriculum. Bioengineers apply scientific and engineering principles of design and analysis to develop products, systems, and/or processes for improving human and animal health, bio-resource utilization, and environment protection.

The BE Graduate Program awards PhD (p. 542) and MS (p. 541) degrees in Biological Engineering with three emphasis areas: biomedical engineering, bioprocess engineering, and bioenvironmental engineering. We also administer the Master of Engineering (ME (p. 581)) degree offered by the College of Engineering with a focus in Biological Engineering.

BE graduate faculty members conduct interdisciplinary research and have close collaborations with other faculty across the campus. Such a diverse yet synergetic faculty body is unique at University of Missouri and provides an excellent environment to educate and train the next generation engineers and scientists with knowledge and skills crossing traditional boundaries.

Facilities and Resources

BE faculty members maintain state-of-the-art laboratory facilities in their research areas. Laboratories are well equipped for research in biomaterials, biomechanics, biophotonics & imaging, biosensors, electrophysiology, nanoeengineering, neural engineering, bioprocessing, environmental engineering, hydrology and renewable energy, precision agriculture, properties of biological and food materials, soil physics. The department has access to the University of Missouri System computing network and maintains its own computing laboratory for student use.

Financial Aid

Admission decisions to the BE graduate programs are made independent of a student’s financial need. Once admitted, a qualified student will be considered for funding support in forms of fellowships, graduate research assistantships (GRAs), and graduate teaching assistantships (GTAs). Nominations for college- and campus-wide fellowship competitions are initiated by the department. GRAs and GTAs are awarded by individual faculty members or course instructors upon approval from the department. Applicants who are interested in funding support should submit the graduate admission application by the “priority” deadlines as indicated on the graduate admission page (https://gradschool.missouri.edu/degreecategory/bioengineering/).

BSBE in Biological Engineering

Degree Program Description

Biological Engineering is a science-based engineering curriculum that integrates engineering and biological sciences in the areas of health, sustainability and environmental stewardship. Students are prepared in three engineering areas: biomedical, bioprocess, and bioenvironmental engineering. In addition to the core program courses, the program includes courses in basic sciences; social, behavioral and engineering sciences; and humanities and fine arts. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies and government agencies, or opt to further their education in graduate, medical or veterinary medical school.

Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license. The BSBE in biological engineering is accredited by the Engineering Accreditation Commission of ABET.

Major Program Requirements

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education (p. 36) requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better.

**MS in Biological Engineering**

**About**

Bioengineering or biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. Bioengineers apply scientific and engineering principles to develop products, systems, and/or processes to improve human and animal health, bio-resource utilization, and environment protection.

The Department of Biomedical, Biological and Chemical Engineering offers both thesis and non-thesis based Master of Science (MS) degrees in Biological Engineering. Our MS degree programs have three emphasis areas: biomedical engineering, bioprocess engineering and bioenvironmental engineering.
The department also offers a 100% online, non-thesis Master's degree (https://online.missouri.edu/degreeprograms/engineering/biological/masters/) in Biological Engineering with a focus in biomedical engineering. In addition, the department administers the Master of Engineering (ME) (http://catalog.missouri.edu/undergraduategraduate/collegeengineering/engineering/me-engineering/) degree with a focus in Biological Engineering that is offered by the College of Engineering.

**Degree Requirements**

- **The MS thesis (MST)** degree requires a minimum of 30 semester hours beyond the baccalaureate degree. The Program of Study for MST should include the following:
  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

<td>Numerical Methods in Engineering Research</td>
<td>3</td>
</tr>
<tr>
<td>BIOL_EN 8990</td>
<td>Masters Thesis Research in Biological Engineering</td>
<td>6-12</td>
</tr>
</tbody>
</table>

A graduate level Statistics course is required.

Two additional Bioengineering 8000 level courses (excluding Problems or Research) are required, with a minimum of 9 semester hours.

Additional graduate level courses to fulfill the requirement of a minimum of 30 semester hours.

A M.S. thesis and a scholarly manuscript are required.

- **The MS non-thesis (MSNT)** degree requires a minimum of 30 semester hours (a minimum of 15 hours at 8000 level and above) beyond the baccalaureate degree. We offer both on campus and online MSNT. The detailed requirements for the 100% online, non-thesis MS degree in Biological Engineering can be found on the degree website from Mizzou Online (https://online.missouri.edu/degreeprograms/engineering/biological/masters/). The Program of Study for MSNT should include the following:
  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tbody>
</table>

A graduate level Statistics course is required.

Three additional Bioengineering 8000 level courses (excluding Problems or Research) are required, with a minimum of 9 semester hours.

Additional graduate level courses to fulfill the requirement of a minimum of 30 semester hours. The combined hours of Research (8990) and Problems (8085) cannot be more than 3 hours.

A project/independent study report is required.

- **The ME** degree requires a minimum of 36 semester hours beyond the baccalaureate degree. A minimum of 15 hours must be at 8000 level and above and a minimum of 21 hours must be from engineering.
  
  The Program of Study for ME should include the following:
  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL_EN 8087</td>
<td>Seminar in Biological Engineering</td>

</tr>
<tr>
<td>BIOL_EN 8180</td>
<td>Numerical Methods in Engineering Research</td>
<td>3</td>
</tr>
</tbody>
</table>

A graduate level Statistics course is required.

Two additional Bioengineering 8000 level courses (excluding Problems or Research) are required, with a minimum of 6 semester hours.

Additional graduate level courses to fulfill the requirement of a minimum of 36 semester hours. The combined hours of Research (8990) and Problems (8085) cannot be more than 3 hours.

- If approved by the student's Master's Program Committee, the MS program of study may include up to six hours of graduate credits transferred from another university or from another campus of the MU system. Graduate students are required to demonstrate proficiency in at least two of the technical proficiency areas listed in the current bioengineering graduate student handbook (https://engineering.missouri.edu/academics/bbce/bbce-degrees/).

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the biological engineering degree program (https://gradschool.missouri.edu/degreecategory/bioengineering/) and the minimum requirements of the graduate faculty (https://gradstudies.missouri.edu/admissions/eligibility-process/), enforced by the Graduate School. Because requirements vary, you must refer to a degree program's graduate admission page (https://gradschool.missouri.edu/degreecategory/bioengineering/) to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

For inquiries about the MS degrees in biological engineering, please visit the corresponding degree program's graduate admission page (https://gradschool.missouri.edu/degreecategory/bioengineering/) for detailed contact information.

**PhD in Biological Engineering**

**About**

Bioengineering or biological engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. Bioengineers apply scientific and engineering principles to develop products, systems, and/or processes to improve human and animal health, bio-resource utilization, and environment protection.

The Department of Biomedical, Biological and Chemical Engineering offers the PhD degree in Biological Engineering in three emphasis areas: biomedical engineering, bioprocess engineering and bioenvironmental engineering.

**Degree Requirements**

The PhD degree requires a minimum of 72 semester hours beyond the baccalaureate degree. If approved by the student's doctoral committee, the PhD program of study may include up to 30 hours of graduate credits transferred from another university or from another campus of the MU system. The plan of study must include a minimum of 15 credit hours beyond the baccalaureate degree. If approved by the student's doctoral committee, the PhD program of study may include up to 30 hours of graduate credits transferred from another university or from another campus of the MU system. Graduate students are required to demonstrate proficiency in at least two of the technical proficiency areas listed in the current bioengineering graduate student handbook (http://bioengineering.missouri.edu/graduate/).

The Plan of Study must be approved by the doctoral program committee and should include the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL_EN 8402</td>
<td>Research Methods</td>
<td>2</td>
</tr>
<tr>

<td>Seminar in Biological Engineering</td>
<td>1</td>
</tr>
<tr>
<td>BIOL_EN 8180</td>
<td>Numerical Methods in Engineering Research</td>
<td>3</td>
</tr>
</tbody>
</table>

A graduate level Statistics course is required.
Two additional Bioengineering 8000 level courses (excluding Problems or Thesis Research) 6

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL_EN 9990</td>
<td>Doctoral Dissertation Research in Biological Engineering</td>
<td>0-28</td>
</tr>
</tbody>
</table>

Additional graduate level courses to fulfill the requirement of a minimum of 30 semester hours.

**Qualifying Process**

Within 18-month in the program, each PhD student must pass a qualifying examination before continuing enrollment. The exam is designed to test the student’s ability to undertake advanced learning and carry out independent research. In general, the qualifying examination will have both a written part and an oral part in the format determined by the student’s doctoral committee.

**Comprehensive Examination Process**

The comprehensive examination must be completed within 5-year from the student’s starting date as a Ph.D. student. Prior to the comprehensive examination, students must have completed the majority of the course work in the Plan of Study, carried out the initial work of their projected research, and demonstrated that they will be able to complete all the remaining requirements for the doctoral degree. The comprehensive examination shall in general include both a written and an oral section. These two sections must be completed within one month. The doctoral committee chair shall work with other committee members to decide on the specific format of the examination.

**Dissertation Defense**

A dissertation based on the original research completed by the doctoral student constitutes the written part of the final dissertation defense. An oral dissertation defense will be conducted after the dissertation has been completed and submitted to the doctoral committee. The dissertation defense must be conducted at least 7-month after the completion of the comprehensive examination.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the biological engineering degree program (https://gradschool.missouri.edu/degreecategory/bioengineering) and the minimum requirements of the graduate faculty (https://gradstudies.missouri.edu/admissions/eligibility-process/), enforced by the Graduate School. Because requirements vary, you must refer to a degree program’s graduate admission page (https://gradschool.missouri.edu/degreecategory/bioengineering/) to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

For inquiries about the PhD degree in biological engineering, please visit the degree program’s graduate admission page (https://gradschool.missouri.edu/degreecategory/bioengineering/) for detailed contact information.

The Department of Biomedical, Biological & Chemical Engineering, which is home to the undergraduate biomedical and biological engineering degree programs, seeks to educate the next generation of bioengineering leaders who integrate engineering and biological sciences in the contexts of health, sustainability, and environmental stewardship, thus preparing them for productive careers characterized by continual professional growth. Our undergraduates are part of a diverse and vibrant department with over one hundred years of excellence in engineering education. We provide a supportive and stimulating environment that combines talented students, a diverse faculty body, and excellent teaching and research facilities. Biomedical, Biological & Chemical Engineering uniquely positions graduates to pursue careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics.

Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of integrated, 5 -year, bachelor plus master degree programs at MU.

**Faculty**

**Primary Faculty:**

Professor Emeritus: F. H. Hsieh

**Affiliated Faculty:**

Assistant Professors: L. A. Martinez-Lemus**, L. Polo-Parada**, R. A. White*, J. Zulovich*

Adjunct Professors: T. Rahhal, E. J. Sadler*, K. A. Sudduth**, E. Vories

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

• BS in Biomedical Engineering (p. 544)

**Advising and Scholarship Contacts:**

Charles Darr, Undergraduate Director  
DarrCM@missouri.edu

Jean Gruenewald, Academic Advisor
Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biomedical engineering program is a broad-based curriculum that prepares students for careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. Biomedical engineering graduates are hired by biotechnology, medical, and pharmaceutical companies, as well as by government agencies and major research laboratories. Many of our undergraduate students attend graduate, medical, or law schools post-graduation. Graduates are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

The Bachelor of Science with a major in Biomedical Engineering (B.S. B.M.E.) program at MU was developed to meet the mission, program objectives and student outcomes described below.

Program Educational Objectives:
The undergraduate programs lead to a Bachelor of Science degree in Biomedical Engineering (BME), producing graduates who will, within 3-5 years:

1. An ability to identify, formulate, and solve engineering programs by applying principles of engineering, science, and mathematics
2. An ability to apply both analysis and synthesis in the engineering design process, resulting in designs that meet desired needs
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. An ability to integrate engineering and biological sciences for the modeling and development of systems and processes to realize improvements in health, bio-resource use, environmental protection, and/or other fields

Graduate
A graduate degree in Biomedical Engineering is not currently offered. Please see Biological Engineering (p. 537) for similar graduate degree programs.

BS in Biomedical Engineering

Degree Program Description
The Biomedical Engineering undergraduate degree program offers four tracks from which our students can develop their primary expertise: biomaterials, biomechanics, biomedical imaging and instrumentation, and bioinformatics. In collaboration with colleagues from the School of Medicine, the College of Veterinary Medicine, the School of Health Professions, the Sinclair School of Nursing, the Honors College, and the College of Engineering, we develop students into engineering leaders with skills in creative and critical thinking, problem-solving, innovation, engineering design, communication, entrepreneurship, and team-building. Our award-winning faculty offer exceptional classes and research experiences for our students, and our flexible, tracked curriculum integrates easily with the pre-medicine and Honors Certificate programs, as well as a number of accelerated plans to earn a bachelor's plus a master's degrees at MU.

Biomedical engineering is a science-based engineering discipline that integrates engineering and biological sciences in one curriculum. The MU biomedical engineering program is a broad-based curriculum that prepares students for careers in traditional engineering as well as medicine, veterinary medicine, law, health care, policy, and academics. Biomedical engineering graduates are hired by biotechnology, medical, and pharmaceutical companies, as well as by government agencies and major research laboratories. Many of our undergraduate students attend graduate, medical, or law schools post-graduation. Graduates are well-prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license; many additionally take the MCAT, the LSAT, and the GRE in preparation for their graduate or professional studies.

Major Program Requirements
The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biomedical engineering principles and design. In a capstone design course sequence, each student completes a design project under the direction of a faculty mentor. Technical electives allow students to place emphasis on biomaterials, biomechanics, bioinformatics, and biomedical imaging and instrumentation.

Students earning a Bachelor of Science in Biomedical Engineering are required to complete all University general education (p. 36), University undergraduate requirements (p. 35), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better. Courses designated a core
biomedical engineering course must be completed with a grade of C or better.

Total Credits: 127

Chemical Engineering

Kevin Gillis, Interim Chair
Department of Biomedical, Biological, & Chemical Engineering
W2033A Lafferre Hall
(573) 882-4877
gillisk@missouri.edu
https://engineering.missouri.edu/academics/bbce/

Chemical Engineering at the University of Missouri focuses on education and research involving industrial chemicals, materials, environmental, and life-sciences processes. We aim to be a reservoir of talent for the research, design, and management of complex process challenges. The Department strives to provide its faculty and students with an environment for research, learning, and professional growth.
The faculty of the MU Department of Chemical Engineering prepares its students for careers in a broad range of fields and to assume leadership roles in society through a well-rounded general and rigorous technical education. The technical curriculum challenges students with a broad education in Chemical Engineering theory and practice, and to improve their skills in problem solving, critical thinking, and appreciation of the relationship between technology and society. Innovative development and use of technology facilitates both research and teaching, creating a diverse, learning environment.

MU Chemical Engineering program aims to develop versatile professionals who can excel in a variety of career environments. Our curriculum is focused on the basic sciences, engineering topics, and problem solving and design. A flexible program offering environmental, material, and biochemical options allows our graduates to move into non-traditional careers as well as traditional chemical engineering. Additionally, we build teamwork and design skills by integrating team design projects, laboratories, and reports into our curriculum.

**Faculty**

Professor P. J. Pinhero**, Y. Xing**  
Associate Professor R.E. Rogers**  
Assistant Professor K. D. Hammond**, B. D. Ulery**, M.J. Young**, Z. Yan**  
Associate Teaching Professor M. A. Myers*, J. Park*  
Assistant Teaching Professor S.P. Christensen, V. K. Gupta  
  * Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.  
  ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BSChE in Chemical Engineering (p. 548)  
  - with emphasis in Biochemical (p. 549)  
  - with emphasis in Environmental (p. 550)  
  - with emphasis in Materials (p. 550)

**Advising and Scholarship Information Contact**  
Mary Myers (Director of Undergraduate Studies)  
W2010 Lafferre Hall  
(573) 882-1332

Teresa Pinhero  
W1006 Lafferre Hall  
(573) 882-2684

The educational objectives of the Chemical Engineering program at the University of Missouri are:

- Graduates will meet the expectations of employers of chemical engineers.  
- Graduates will pursue advanced study if desired.  
- Graduates will pursue leadership positions in their profession and/or communities.

**Exploratory Course**

A student wanting to explore chemical engineering as a major should take CH_ENG 1000 Introduction to Chemical Engineering.

**Graduate**

- MS in Chemical Engineering (p. 551)  
- PhD in Chemical Engineering (p. 552)

**Admissions and Advising Contacts:**  
Department of Chemical Engineering  
Reginald E. Rogers, Jr. (Director of Graduate Studies)  
E2404B Lafferre Hall  
(573)882-4103

Teresa Pinhero  
W1006 Lafferre Hall  
(573) 882-2684

**About Chemical Engineering**

Established in 1906, MU Chemical Engineering has a long standing commitment to provide quality undergraduate and graduate education. Our department serves the discipline well by providing state of the art research in many cutting edge fields including batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling & simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

**Faculty Research**

Currently active research areas include batteries, biochemical engineering, biomaterials, carbon, ceramics, catalysis, corrosion, electrochemistry, environmental sciences, ionic liquids, materials science, computational modeling and simulation, nanomaterials, nuclear materials, polymers, separations, solar energy, and surface science.

**Facilities and Resources**

There are excellent facilities for research students, including electron microscopy, ultra-high vacuum (UHV) surface science, atomic force microscopy, a heterogeneous catalysis and reaction kinetics laboratory, a heat and mass transport laboratory, an air pollution monitoring and control laboratory, a biochemical engineering laboratory, a computational laboratory, and a transport properties phenomena laboratory. Excellent library facilities provide the latest domestic and international journals specific to chemical engineering and physical sciences research.

**Internal Funding**

Research and teaching assistantships are available to qualified students for the entire year. The yearly stipend for graduate students ranges from $17,500 to $20,000, depending on the student’s terminal degree. Assistantships also include a tuition waiver and health insurance. Academically qualified students may receive additional scholarship awards. Grant research assistantships and some industrial and Graduate School fellowships may also be available. Extremely well-qualified students may be eligible for the Robert and Dorcas Holtzsmith Graduate Fellowship.

RA and TA appointments allow for 12 credit hours of advanced study each semester. The applicant’s academic record and research potential determine the financial assistance offered. Students who receive financial
assistance are expected to continue their appointment during the summer session as well, as these appointments are year long positions.

**BSChE in Chemical Engineering**

**Degree Program Description**

The curriculum provides a well-rounded general and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as Chemical Engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences and other engineering disciplines.

**Major Program Requirements**

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational, and experimental techniques. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below in addition to University graduation requirements, including University general education (p. 36) and College of Engineering requirements. Students may also add an emphasis in the Biochemical (p. 549), Environmental (p. 550), or Materials (p. 550) areas by completing that emphasis area’s requirements.

**Major core requirements**

**Required entry-level courses**

- a CH_ENG 3261 and CH_ENG 3262 satisfy the semester physical chemistry prerequisite.
- b CHEM 4490 is the same as BIOL_EN 4480, BME 4480, NU_ENG 4319, and PHYSCS 4190.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.
BSChE in Chemical Engineering with Emphasis in Biochemical

Degree Program Description

The biochemical emphasis builds on the core Chemical Engineering curriculum (p. 548) to create expertise in chemical reactions associated with biological processes. Students achieving this emphasis area will be exposed to basic concepts of living systems, metabolism, biological polymers, hormones, and basic genetics through courses in biology and biochemistry, as well as biomass, enzyme, yeast, and other biochemical processes, including the associated industrial operations. Students completing this emphasis will be well-poised for careers in biomedical engineering, human or veterinary medicine, pharmaceuticals, and agricultural/food engineering. Students will also be in a strong position to pursue graduate degrees in biological or biomedical engineering, dentistry, or human or veterinary medicine.

Major Program Requirements

Students must complete all BSChE requirements (p. 548), including the emphasis area requirements below.

BSChE in Chemical Engineering

with Emphasis in Biochemical
BSChE in Chemical Engineering with Emphasis in Environmental

Degree Program Description

The environmental emphasis builds on the core Chemical Engineering curriculum (p. 548) to provide students an opportunity to explore courses centered around environmental engineering, wastewater treatment, and environmental regulation. A major focus of this emphasis is to prepare students for careers in policy, industry, or research. A student who completes this emphasis will also be in a position to pursue a graduate degree in programs focused on environmental science and engineering.

Major Program Requirements

Students must complete all BSChE requirements (p. 548), including the emphasis area requirements below.

BSChE in Chemical Engineering with Emphasis in Materials

Degree Program Description

The materials emphasis builds on the core Chemical Engineering curriculum (p. 548) to include courses of interest to students who wish to pursue careers and/or interests in materials science and solid-state physics. The emphasis area requirements cover basic topics in materials science, after which the student is asked to choose at least one course covering a more specific area of materials: ceramics, polymers, biological materials, or composites. Students are then free to choose electives in other areas, including optical materials, semiconductors, advanced materials, structural materials, and materials characterization. Students selecting the materials emphasis have all the advantages of an education in chemical engineering along with specialized knowledge of materials, giving them a valuable base from which to build a career.

Major Program Requirements

Students must complete all BSChE requirements (p. 548), including the emphasis area requirements below.

Total Credits: 126

**MS in Chemical Engineering**

**Degree Requirements**

- The student’s program must include a minimum of 30 hours of graduate credit beyond the bachelor’s degree (or its equivalent).
- At least 3 credits must be in 8000+ level courses, not including special readings, seminar, or research; and no more than 40% of the total can be research-based.
- The candidate must have completed all graduate work attempted at MU with a GPA of 3.0 or better.
- Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of Chemical Engineering.
- Students must present a thesis.
- Students must be enrolled.

**Core Coursework**

**Total Credit Hours**

30

* Electives must be approved by student’s advisor and Graduate Committee to complement their research.

**Admissions**

Applicants are required to meet two sets of minimum qualifications for admission consideration: the requirements of the M.S. in Chemical Engineering program (https://gradschool.missouri.edu/degreecategory/chemical-engineering/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/apply/). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, eligibility and application process. Before official admissions to the University of
Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Application Deadlines

- Fall Deadline: March 15
- With change of degree within MU: May 15
- Spring Deadline: October 15
- With change of degree within MU: November 1

Civil Engineering

Praveen Edara, Chair
Department of Civil & Environmental Engineering
E2509 Lafferre Hall
(573) 882-1900
http://engineering.missouri.edu/civil/

Civil engineers are responsible for planning, design, construction, and operation of public and private facilities essential to modern life; including infrastructure for transportation of people and goods, water supply and water treatment, waste disposal, communications, and energy. Civil engineers are problem solvers, meeting societal challenges pertaining to infrastructure, the environment, drinking water supply, energy, resilience, national security, traffic congestion, smart cities, urban redevelopment, and sustainable community planning.

Faculty

Assistant Professor Y. Adu-Gyamfi*, S. Anowar*, B. Wang*

Adjunct Faculty H. Brown*, P.E., A. Elisit*, C. J. Nemmers*, P.E., A. Saucier*

Courtesy Faculty R. Rogers*, N. Aloysius*

Undergraduate

Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSCIE in Civil Engineering (p. 554)

The Department of Civil and Environmental Engineering offers a Bachelor of Science in Civil Engineering (BSCIE). Most graduates take the Fundamentals of Engineering Exam. Graduates are encouraged to become registered professional engineers and to continue their education throughout their careers.

Departmental Honors

Students who will graduate with a 3.0 GPA or higher are eligible for the College of Engineering honors program. Interested students should ask their advisor for details about this highly rewarding program that can include earning a salary for research performed under the guidance of a faculty member, and eligibility for dual enrollment in graduate classes.

Educational Mission

The educational objectives of the Bachelor of Science in Civil Engineering describe the expected accomplishments of graduates after graduation. It is expected that nearly all students completing the requirements of the Bachelor of Science in Civil Engineering will engage in the life-long learning necessary to advance professionally in the field of civil engineering and contribute to society and the profession through involvement in professional or other service activities.

It is expected that most graduates will

1. Enter the profession of civil engineering with proficiency in environmental engineering, geotechnical engineering, structural engineering, transportation engineering and water resources engineering. In doing so, these students will
   a. Take and pass the Fundamentals of Engineering exam
   b. Gain employment as an engineer-in-training
   c. Take and pass the Professional Engineers Exam, and
   d. Be licensed to practice engineering in one or more states

It is expected that some graduates will

1. Begin careers in civil engineering-related industries, especially construction and other careers not requiring professional licensure
2. Begin and complete graduate study in civil engineering at MU or other Carnegie doctoral extensive universities, and
3. Begin and complete graduate/professional study in other associated fields

The following list of outcomes describes what graduates are expected to know and to be able to do when they complete the program. At graduation, graduates will have:

• Ability to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry and at least one additional area of basic science
• Ability to conduct laboratory experiments and to critically analyze and interpret experimental data

Graduate

• MS in Civil Engineering (p. 556)
• PhD in Civil Engineering (p. 556)

http://engineering.missouri.edu/civil/

Director of Graduate Studies: Praveen Edara

About the Program

Civil engineering education at MU began in 1856. Graduate programs offered by the department prepare students for leadership positions in academia, research and advanced practice engineering careers. Major program areas include: structural mechanics, structural engineering and materials, transportation engineering, geotechnical and geoenvironmental engineering, environmental engineering, hydrology and water resources engineering.

Areas of Study

Structural Mechanics, Structural Engineering and Materials. Study areas: fracture and failure of composites, model-based simulation, inelastic response of materials and structures, bridge engineering, linear and nonlinear structural dynamics, explosion resistant structural design, timber engineering, microstructure of porous materials, concrete and aggregate durability, advanced fiber reinforced composites for construction and nondestructive structural health evaluation

Environmental Engineering. Study areas: water and air pollution control, water purification, wastewater treatment, environmental remediation, hazardous and solid waste treatment and management, membrane processes, implication and application of environmental nanotechnology and renewable energy issues. Other areas of research include the application of physical, chemical and biological principles to design of water supply systems, pollution control facilities and fate and transport of contaminants in soils and groundwater.

Geotechnical and Geoenvironmental. Study areas: strength, deformation and flow properties of earthen materials and application of this understanding to foundation engineering, slope stability analyses,
earth structures design, pavement design and performance, and
geoenvironmental challenges. Research areas include: unsaturated soil
mechanics, soil improvement techniques, geosynthetics, landfills and
waste containment, stabilization and maintenance of earth slopes, in
situ soil cleanup technologies, geotechnical earthquake engineering,
nondestructive geophysical technologies for subsurface applications,
satellite – and ground-based remote sensing risk analysis and reliability-
based design.

Transportation Engineering. Study areas: traffic engineering, intelligent
transportation systems, highway safety, network modeling and simulation,
geographic information systems, security and evacuations, transportation
planning, traffic flow theory, highway design, intersection operations,
bicycle and pedestrian facilities, infrastructure management, driver
behavior, airport engineering, transportation legal issues, artificial
intelligence and advanced computing applications in transportation.

Water Resources Engineering. Study areas: hydrologic, hydraulic,
regulatory/public policy and geographic information system applications
for transportation, surface water quality and storm water management
and decision making.

Facilities and Resources

The department has laboratories for experimental research in structural
engineering, materials, geotechnical and geoenvironmental engineering,
environmental engineering, and transportation engineering.

Structural Testing. Several computer-controlled electrohydraulic testing
machines and associated instrumentation are available in the high-
bay structural engineering and materials engineering laboratories. The
laboratories are serviced by a 5-ton overhead crane. An additional
structural testing facility located south of the campus houses a 100-foot
by 20-foot structural floor with anchor points on a 4-foot-square grid. This
high-bay facility is serviced by a 10-ton overhead crane. There is also a
materials laboratory for concrete mix design and evaluation.

Geotechnical Testing. The laboratories house state-of-the-art
permeability, consolidation, triaxial, geosynthetics, soil dynamics and
unsaturated soil mechanics testing equipment and is home to the
Missouri Soil Characterization Laboratory. Additional laboratories include
facilities and equipment for large-scale model testing of slopes, piles and
other geotechnical systems, including a 10-acre geotechnical experiment
site.

Environmental Labs. The laboratories are supplied with analytical
equipment for the complete physical, chemical and microbiological
analysis of environmental samples. Additional capacities include
membrane fabrication and characterization facilities, and chemical
reactors and bioreactors for contaminant removal and/or degradation.

Transportation Laboratory. The laboratories include capabilities in
advanced surveillance and video image processing, transportation
modeling and simulation, Geographical Information Systems, traffic
management and control, driver behavior, and safety, and ZouSim
(bicycle, wheelchair, and driving simulator).

Missouri Asphalt Pavement and Innovation Laboratory (MAPIL).
Advanced asphalt binder and mixture tests, including bending beam
rheometer, dynamic shear rheometers (2), extraction and recovery
apparatus, mixture creep, fatigue, rutting and fracture tests, compaction
and fabrication equipment, advanced numerical modeling workstations
and software, and an innovation center focusing on sustainable and
resilient infrastructure development and intelligent infrastructure sensing
and data analytics.

Funding

In addition to assistantships sponsored by the National Science
Foundation (NSF), the US Environmental Protection Agency, Federal
Highway Administration and other governmental agencies, several
graduate assistantships are available each year. The assistantships
are primarily research appointments; however, the Department does
make a limited number of teaching assistantship appointments. Most
assistantships offer tuition waivers and health insurance.

BSCiE in Civil Engineering

Degree Program Description

Civil engineers are responsible for design, construction, and operation of
our public and private infrastructure, for protecting our natural resources,
and for preserving the health and safety of the general public. Civil
engineers are vital to our nation’s economic vitality as they provide
infrastructure for safe, efficient, and sustainable transportation of
people and goods. The curriculum includes fundamental coursework
in math and basic sciences, specialized coursework covering the
subdisciplines of structural engineering, transportation engineering,
geotechnical engineering, environmental engineering, and water
resources engineering, as well as general education courses in the
humanities and social sciences. Graduates are well prepared to become
licensed Professional Engineers. The BS degree in civil engineering
is accredited by the Engineering Commission of ABET. Graduates are
commonly employed by private firms that provide design and consulting
services, by construction contractors that build our infrastructure, and by
government agencies responsible for specific components of the nation’s
infrastructure. Some graduates opt to further specialize within the civil
engineering profession by pursuing graduate degrees.

Major Program Requirements

Engineering topics start with basic computer and graphics courses.
These are followed with basic engineering science courses, which ground
the students in the fundamentals necessary for future course work and a
sophomore design experience.

Engineering topics courses in the junior year provide students with
the basic fundamentals in the areas of environmental engineering,
geotechnical engineering, hydrology/water resources, structural
engineering, and transportation/traffic engineering. Many of these
courses contain elements of civil engineering design. Elective courses
in the senior year enable students to either begin to specialize within or
to maintain a broad educational background across the civil engineering
discipline.

Design and communication skills are integrated throughout the curriculum
culminating in a capstone design project, which is usually supplied
by consultants or governmental agencies. This ‘final’ course requires
working in teams, making oral and written presentations, and completing
a final design report. Oversight, interaction, and evaluation are provided
by practicing engineers from industry and governmental organizations.

Students earning a Bachelor of Science in Civil Engineering are required
to complete all University general education (http://catalog.missouri.edu/
academicdegerequirements/generaleducationrequirements/), University
undergraduate requirements (http://catalog.missouri.edu/...
academic degree requirements/university requirements/), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Approximately one-third of the course work for the degree is completed in engineering or professionally related courses.

**Accelerated BScIE to MS**

Students pursuing a degree in BScIE in Civil Engineering have the option of accelerating into the MS in Civil Engineering. This will give students the opportunity to complete the BS and MS degree within a shorter amount of time versus completing each degree separately.

Students in the MS program, traditional or accelerated, are required to take a minimum of 30 hours (transportation area) or 31 hours of graduate credit beyond the bachelor’s degree; in the accelerated program, up to 12 credit hours can be taken as part of their undergraduate degree and also counted towards the MS, requiring only an additional 18 or 19 credit hours after the bachelor’s degree.

The requirements for the MS degree are the same as the traditional MS degree program (p. 556).

**Program structure**

- Total Credits Required for Graduation:
  - Total Undergraduate Credits: 125
  - Total of Dual Credits: 12
  - Total Graduate Credits: 30-31

**Residency Requirements:** one academic year as full time graduate student.

**Core Courses required to complete MS (at least 15 must be 8000 level or above).**

**Admissions**

The application deadline for the MS accelerated program will be March 1st for fall admission and October 1st for spring admission. Undergraduate seniors will be considered for the program, but depending on the number and level of courses taken, the length of their program may be extended. An individual plan of study will be developed for students applying later than the second semester of their junior year.

In order for a student to participate in the accelerated program they must:

- Have completed at least 90 credit hours towards a bachelor’s degree.
- Maintain a minimum GPA of 3.0 by the end of their junior year.
- Identify a faculty member in the area of interest that can serve as graduate advisor.
- Meet admission criteria for the MS set by each program area within the department.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

### First Year

MS in Civil Engineering

Degree Requirements
A student's program must include a minimum of 30 hours (transportation area) or 31 hours of graduate credit beyond the bachelor's degree (or its equivalent). A total of 15 hours of the 30-hour minimum must be selected from courses at the 8000 or 9000 level. No more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, research (CV_ENG 8990), readings and/or problems courses. The student's GPA must be 3.0 or greater. Students should consult with their academic advisor to ensure all requirements are satisfied.

• 8 or more courses (3 credit hours each) at the appropriate level
• Up to 6 hours of research (CV_ENG 8990)
• One or more 1-hour seminars associated with your specialty area (seminar is not required in all areas; see your academic advisor for details).

Thesis/Non-Thesis Requirements
All candidates for the Master of Science degree are required to complete a substantial independent effort reflecting some measure of creativity and/or originality and to produce evidence of such effort. A final oral examination is required of all master's candidates. Approximately two weeks before this examination, a candidate must submit to an examining committee a thesis, a formal report or a design of professional quality applying the knowledge gained in course work to the solution of an engineering problem. Students who receive research appointments or traineeships are required to submit a thesis. Formal or design report is at the discretion of the advisor.

Academic credit allowed for this portion of a student's program of study shall be for 3 credit hours for a report and 6 credit hours for a thesis.

Admissions
Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria
• Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
• BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
• GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and 3.0 for Analytical.
• Minimum TOEFL and IELTS scores for international students: See language requirements set by the Graduate School.

Required Application Materials
Upload to the G (https://applygrad.missouri.edu/apply/graduate_School):
• All required Graduate Admissions documents
• 3 Letters of Recommendation (at least two from faculty members who have taught or advised you)
• GRE scores
• Résumé
• Statement of Purpose

Financial Aid from the Program
If you wish to be considered for financial aid, please complete the financial aid section of the departmental application.

PhD in Civil Engineering

Degree Requirements
PhD programs are committee administered and tailored to fit the needs of each individual student. A minimum of 72 credit hours, including the credit hours taken during the MS program beyond the bachelor's degree, are required. Students who received the MS degree from other than MU may transfer up to 30 hours of credit from their MS degree. The candidate must pass a comprehensive examination and submit and defend a dissertation at a final oral examination.

Residency Requirement
A student must complete at least two nine-hour semesters or three six-hour semesters in an 18-month period at MU. All courses taken to satisfy the residency requirement must be approved by the student's doctoral program committee. Correspondence and off-campus courses may not be counted toward the residency requirements.
Qualifying for Candidacy

Students are accepted for advisement upon CE Graduate Admissions Committee review. Formal acceptance to the PhD program is based on a qualifying examination during the first year of post-master's work.

The Qualifying Examination is required to determine the formal acceptance to candidacy for the PhD. degree and is based on a written and/or oral examination administered by faculty members in the student’s area of concentration. The student, upon passing this examination, will be advised on the program of coursework that should be taken to prepare for the PhD. degree.

Comprehensive Examination Process

Candidacy for a doctoral degree is established by passing the comprehensive examination. The comprehensive examination includes written and oral sections and is completed as the candidate is completing the prescribed coursework to determine if the PhD. candidate is adequately prepared to conduct the doctoral research. This examination will focus on the coursework and/or research/proposal writing. The student may be advised to take some additional coursework. A written proposal of the research must be submitted to the student’s doctoral committee for review after which an oral presentation and examination on the proposed work will be administered.

Dissertation Requirements

The third examination, called the Defense of the Doctoral Dissertation, is required to determine if the PhD. degree should be awarded on the basis of the research that is presented. The student must submit the written dissertation to the committee members at least two weeks prior to the exam. This is an oral examination that is administered by the Doctoral Committee.

Graduate students are required to submit one copy of their dissertation or thesis to the Graduate School, 210 Jesse Hall on a CD.

Admissions

Application Deadlines

Priority admission and funding consideration are given to applications received by February 15/September 15. Applications submitted after February 15/September 15 will be considered, with preference going to those received by May 1/December 1. Prospective students applying after May 1/December 1 will be considered for fall/spring admission on a case by case basis.

Admission Criteria

- Minimum GPA: 3.0 in last 2 years of coursework. Note: Lower than 3.0 GPA requires special action and substantiation such as good test scores on the GRE or other recognized examinations.
- BS in engineering. Applicants with BS degrees in related fields may be considered for admission. If admitted, non-engineers are required to complete remedial courses as determined by their advisor and advisory committee.
- GRE test is required but no minimum score set. Typical acceptance scores: around 300 for Verbal + Quantitative and 3.0 for Analytical.
- Minimum TOEFL and IELTS scores for international students: See language requirements set by the Graduate School.

Financial Aid from the Program

If you wish to be considered for financial aid, please complete the financial section of the departmental application.

Computer Engineering

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org/). At the graduate level, the EECS Department offers MS and ME degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with more than 50 faculty members.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million
in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) ([https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/](https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/)) and Bachelor of Science in Electrical Engineering (BS EE) ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/)) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively. Not to mention majors and minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/dual-bachelor-science-electrical-engineering-physics/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/dual-bachelor-science-electrical-engineering-physics/)). At the MS and PhD levels, the ECEP offers the following graduate degrees:

- Master of Science in Computer Engineering ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-computer-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-computer-engineering/))
- Master of Science in Electrical Engineering ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-electrical-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-electrical-engineering/))
- Doctoral Degree in Electrical and Computer Engineering ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/phd-electrical-computer-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/phd-electrical-computer-engineering/))

with options for dual masters and Masters in Engineering (ME) -- i.e. coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Computer Engineering, Electrical Engineering, Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized CoE and EE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, that is often multidisciplinary in nature, spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research and development as well as product teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the ECEP are among the leading faculty in University’s Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

**Summary**

The ECE Program offers undergrad degrees:

- Bachelor of Science in Computer Engineering (BS CoE) ([https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/](https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/))
- Bachelor of Science in Electrical Engineering (BS EE) ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/))
- Dual Bachelor of Science in Electrical Engineering & Physics ([https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics/](https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics/))

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-computer-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-computer-engineering/))
- Master of Science in Electrical Engineering (MS) ([https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-electrical-engineering/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/master-science-electrical-engineering/))
• Doctoral Degree in Electrical and Computer Engineering (PhD)
  (https://engineering.missouri.edu/academics/eecs/eecs-degrees/phd-electrical-computer-engineering/)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep networks, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasmatechnology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;
- autonomous systems;
- real-time embedded architectures;
- high performance computing;
- sensor networks; and
- human-computer interfaces.

Research
The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

- Communications and Signal Processing (CSP)
- Intelligent Systems and Robotics (ISR)
- Physical and Power Electronics (PPE)
- Applied Physics (AP)
- Systems Modeling and Control (SMC)
- Computer Architecture and Systems (CAS)
- Nano/Micro Technology (NMT)

Faculty

Assistant Professor I. Akturk**, G. Bana*, K. Anuarul Hoque** T. Joshi*, G. Scott*, P. Valettas*

Assistant Research Professor H. Aliakbarpour*, A. Buck, F. Bunyak**

Associate Teaching Professor D. Musser*

Assistant Teaching Professor F. Wang*

Associate Professor of Practice J. Fischer

Assistant Professor of Practice J. Ries, N. Wergeles*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- ** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 142-credit program. These students receive both the BS EE and BS CpE degrees.
Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program are:

- Graduates will meet or exceed the expectations of their employers
- Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:

- Graduates will meet or exceed the expectations of their employers
- Qualified graduates will pursue advanced study if desired
- Graduates will pursue leadership positions in their profession and/or communities

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements (p. 35) including University general education (p. 36), as well as all degree and college or school requirements.

**Electrical and Computer Engineering (ECE) Honors Program**

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

**Graduate**

- MS in Computer Engineering (p. 562)

The Department of Electrical Engineering and Computer Science (EECS) offers both the Master of Science with a major in Electrical Engineering and the Master of Science with a major in Computer Engineering, as well as a Doctor of Philosophy Degree in Electrical and Computer Engineering. The graduate programs in both at the University of Missouri provide students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

**BSCoE in Computer Engineering**

**Degree Program Description**

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department.

**Major Program Requirements**

The computer engineering degree offers a balanced approach to both hardware and software, as well as other areas of engineering. Focused areas of work in additional hardware or software, communications, discrete and integrated electronics, and robotics are offered by the department. (Focus areas are not listed on transcripts or diplomas.)

Students must complete all university requirements (p. 35), including general education (p. 36), and Department Level Requirements (p. 359), in addition to the degree requirements below.

**Major core requirements**

Double Major

Electrical Engineering and Computer Engineering

Many students in the EECS department combine the BS in Electrical Engineering with the BS in Computer Engineering in a special 138-credit program. These students receive both the BS EE and BS CoE degrees.

### MS in Computer Engineering

#### Degree Requirements

To fulfill the requirements for the MS degree, the following course requirements are required:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the Electrical and Computer Engineering Department course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master's thesis or a master's Report.
- The student’s cumulative GPA must be at least 3.0 to graduate.
• The student must attend at least 10 seminars given by the department during their course of study.

The requirements for the MS degree must be met within an eight year period. Each candidate must pass a final oral examination to demonstrate mastery of the work included in the thesis or in a substantial independent project.

**Academic Probation**

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

**Selection of an Advisor**

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student’s graduate program. M1 - Program of Study form.

The form is forwarded through the DGS to the Graduate School for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.

**Thesis Option**

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student’s second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person’s curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vita of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

**Non-Thesis Option**

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of EECS be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in EECS. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee.

**Report of the Master’s Examining Committee**

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. The form is due in the Graduate School two weeks prior to graduation.

**Computer Science**

Dr. Kamrul Islam, Department Chair
College of Engineering

Islams@missouri.edu
https://engineering.missouri.edu/academics/eecs/

**Introduction**

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the ECEP Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org (http://www.abet.org/). At the graduate level, the EECS Department offers MS and ME degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate CS degree program prepares students for rewarding careers in software systems and computing technologies and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 as the first Electrical Engineering department in the nation, after Thomas Edison helped
generate interest in electrical engineering by presenting an electrical
dynamo and some incandescent lamps to the University of Missouri in
1882. The EECS department is now home to more than 600
undergraduate students and over 300 graduate students in CS, CoE,
EE and ECE, with 35 faculty members (https://engineering.missouri.edu/
academics/eeecs/eeecs-faculty/), not including instructors, teaching
professors, and emeriti.

About Computer Science Programs

The Computer Science Program (CSP) in the Electrical Engineering
and Computer Science (EECS) Department continues to be a dynamic,
rapidly evolving and research-active unit at the University of Missouri.
The Computer Science Program offers a comprehensive curriculum
culminating in a capstone project that provides a solid foundation for
undergraduate students to pursue rewarding careers in computing and
information technology. Students are able to pursue dual degrees in
related fields including information technology, computer engineering and
electrical engineering as well as minors in other colleges. Students have
opportunities to gain in-depth hands-on knowledge in specialized areas
through undergraduate research experiences working with faculty. The
faculty lead computer science activities on campus and their research
covers both well established and emerging fields including big data
analytics, machine learning, cloud computing, cyber-physical, Internet
of Things, artificial intelligence, computer vision, robotics, autonomous
systems, embedded architectures, high performance computing,
computational biology and bioinformatics, biomedical and geospatial
informatics, cyber-security, distributed and mobile computing, learning
systems, multimedia communications, data visualization, information
fusion, sensor networks, spoken language processing, human-computer
interfaces, virtual and augmented reality.

The CSP offers graduate programs in masters, dual masters, and
doctoral degrees. The graduate degree programs prepare graduates of
four-year BS degrees in Computer Science or closely related areas for
further study at the doctoral level or for successful careers as specialized
computer professionals in emerging fields. The Ph.D program is a
professional research degree designed to prepare students for advanced
professional careers, including college teaching and research, as well as
research and development in industrial, government, and nonprofit
organizations. Specialized training, state-of-the-art technology, innovation
and entrepreneurship experience is available through close interaction
with the faculty in their respective fields of research expertise.

The faculty members in the Computer Science Program participate
in the full spectrum of undergraduate and graduate education.
Graduate education, has a strong innovation component with faculty
initiated research projects funded by the federal government, state
government and industry, and is often multidisciplinary in nature spanning
interdepartmental and cross-college research. The aim is to produce
computer scientists who can function well as part of interdisciplinary
research teams. Close integration of research with education is a
constant goal in the department’s graduate programs. It emphasizes in-
depth studies that can also be tailored to fit graduate students’ individual
interests. Additionally, members of the CSP lead the University’s
institutional efforts in developing infrastructure for bioinformatics,
computational biology, and high-performance computing and networking.
Our major research projects are funded by both federal agencies and
industry including the National Science Foundation (NSF), National
Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA),
Department of Energy (DoE), and Department of Defense (DoD) which
are examples of federal funding, Microsoft, Honeywell and Monsanto are
representative of industrial funding.

Research facilities are well established around faculty expertise in
cloud computing, bioinformatics and computational biology, biological
and biomedical image analysis, graphics, visualization and virtual
reality, mobile computing, artificial intelligence, multimedia, networking,
human-computer interaction, information web services, and computer
science foundations. These facilities are clustered in core laboratories
for bioinformatics, multimedia and visualization, video processing,
senton- and spoken-language processing, mobile networking and communications,
wireless sensor networks, high-performance computing, cyber security,
and medical informatics. Faculty in the Computer Science Program
work closely with faculty in the Computer Engineering and Electrical
Engineering Programs within the EECS Department.

Careers and Graduate study

The Computer Science curriculum prepares graduates of four-year B.S.
degrees in Computer Science for successful careers as computer and
information technology professionals in industry as part of the rapidly
expanding and pervasive information economy. Graduates with B.S.
degrees in Computer Science or closely related areas can choose to
pursue advanced study at the masters and doctoral level under the
mentorship of a faculty in specialized research fields within the broad
discipline of computing with engaging opportunities in multidisciplinary
collaborative research across departments and colleges.

The M.S. and Ph.D. programs are a professional research degree
designed to prepare students for advanced professional careers,
including college teaching and research, as well as research and
development in industrial, government, and nonprofit organizations.
Specialized training is available through close interaction with
faculty mentors in their active research fields. For highly motivated
undergraduate students a fast-track five year program of study leading
to the BS plus MS degrees in Computer Science is available. Teaching
assistantships with the EECS Department and research assistantships
with faculty are available to fund graduate study especially at the PhD
level.

With foundations in undergraduate courses covering algorithms,
compilers, software engineering, web technologies, database,
programming languages, artificial intelligence and computational complexity, the graduate programs are integrated over many application areas and multidisciplinary fields such as:

- cyber-security
- social multimedia and databases
- big data analytics
- web services and content delivery networks
- wearable and embedded devices, architectures and systems
- smartphone applications
- video games, film and entertainment
- mobile and sensor networks
- personalized learning systems
- high performance computing and networking
- information search, discovery and retrieval systems
- smart communities and smart grid energy systems
- robotics and industrial automation systems
• bioinformatics and computational biology
• biomedical image analysis
• medical informatics and healthcare
• human and animal medicine
• space, defense and security imaging systems
• precision agriculture and food security
• management information systems and business analytics
• journalism and the media of the future

Research

This CSP is the hub of computer science research activities on campus that involve theoretical, experimental, computational and applied research areas in:

• cloud computing and high performance computing
• big data science and machine learning
• bioinformatics and computational biology
• bioimaging and phenomics
• graphics, visualization, virtual and augmented reality
• computer vision and image processing
• geospatial information mining and retrieval
• biomedical image analysis
• satellite and aerial imaging
• information fusion & filtering
• cyber-security and cryptography
• cyber-physical and IoT
• multimedia communications and databases
• ambient intelligence and sensor networks
• mobile, distributed and pervasive computing
• spoken language processing
• gesture and human-computer interfaces, etc.

Additionally, members of the CSP lead the University’s institutional efforts in developing infrastructure for cloud computing, bioinformatics, computational biology, visualization and high-performance computing and networking.

Faculty

**Assistant Professor** I. Akturk**, G. Bana*, K. Anuarul Hoque**, T. Joshi*, G. Scott*, P. Valettas*

**Assistant Research Professor** H. Aliakbarpour*, A. Buck, F. Bunyak**

**Associate Teaching Professor** D. Musser*

**Assistant Teaching Professor** F. Wang*

**Associate Professor of Practice** J. Fischer

**Assistant Professor of Practice** J. Ries, N. Wergeles*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BS in Computer Science (p. 566)
• Minor in Computer Science (p. 569)

The Computer Science Program (CSP) in the Electrical Engineering and Computer Science (EECS) Department offers a broad curriculum that spans the theory, design and applications of computing. The Bachelor of Science degree in Computer Science includes a strong component of mathematics and sciences along with more theoretical courses in computer science. A Computer Science minor is available.

Graduate

• MS in Computer Science (p. 569)
• PhD in Computer Science (p. 569)

Graduate Admissions Advisor
JoAnna Chandler
Electrical Engineering & Computer Science
201 Naka Hall
University of Missouri
Columbia, MO 65211
https://engineering.missouri.edu/academics/eecs/

The EECS graduate programs lead to the degrees of Master of Science in Computer Science (MS CS), Computer Engineering (MS CE) and Electrical Engineering (MS EE), Master of Engineering (ME), and Doctor of Philosophy in Computer Science (PhD CS) and Doctor of Philosophy in Electrical and Computer Engineering (PhD ECE). The EECS graduate degree programs prepare prior recipients of four-year BS degrees in Computer Science, Computer Engineering, Electrical Engineering or closely related areas for further study at the doctoral level or for successful careers as specialized computer professionals. The Ph.D. program is a research degree designed to prepare students for various advanced professional careers, including college teaching and research, as well as research and development in leading industrial and government R&D facilities.

The ME degree is designed for entering master students interested in a terminal master's degree, who have a demonstrated need for a
professional, non-research degree in engineering, and have an academic interest in the department.

**Application Procedures for CS MS and PhD Programs**

In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

**Fall admission:** Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th.

**Spring admission:** Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the online application system. An application must be accompanied by an application fee. In addition, the applicant must have the following original paperwork sent directly from the originating institutions to the Graduate School:

- Official transcripts from ALL institutions attended
- Official GRE score report from Educational Testing Service in New Jersey (and TOEFL or IELTS scores for international applicants)

The following supplemental materials must be uploaded in the online application:

- Your résumé
- A personal goal statement indicating why you feel prepared to pursue the degree program and why you want to pursue this degree
- Three letters of recommendation from professors who know your abilities that must address your ability and readiness to pursue a graduate program in computer science (submitted by your references directly to your online application)
- Copies (unofficial) of all transcripts
- Copies of GRE results (and TOEFL or IELTS, if applicable).

Note: Copies of the required documents (transcripts, GRE scores, etc.) cannot be accepted in lieu of the official reports from the originating institutions. Copies of these records should be submitted for evaluation, but any decision on admission is non-binding until the official records have been received.

**Current/Former MU students:** All current and former MU students must meet the same requirements as external students and file one of the following forms (in lieu of an MU Application Form):

- Current Non-Degree Graduate Students: Change of Division, Degree, Program, Emphasis, or Advisor form,
- Current graduate students in another department: Change of Division, Degree, Program, Emphasis, or Advisor form (same as 1)
- Previous graduate students returning to same program: Re-Activation form.

**Degree Completion Requirements**

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees. The Master of Science degree program has both a thesis and a non-thesis option, which can be chosen by the student after consultation with their selected advisor.

**Credit toward a Second Master’s Degree**

A student who has completed one Master’s degree at MU or elsewhere may present, upon the recommendation of the student’s advisor and approval by the Director of Graduate Studies and the Graduate School, a maximum of six hours of credit earned in the previous program toward a second Master’s degree.

**Fast Tracking**

In an effort to streamline and accelerate the student acquisition of graduate degrees, we establish fast-tracking options for our current undergraduate students. This option allows students who have completed 75 hours of undergraduate coursework, and maintained a 3.0 or better GPA to apply to the Masters Program, become integrated in the research environment of the EECS Department, and earn between 6 and 12 hours of graduate credit during their undergraduate studies. The program allows students to complete both and BS and MS in as few as five years, and the application process is much easier than the formal application process; a GRE score is not required, there is no application fee, and Fast Track students are given higher priority for teaching assistant positions. Please see the link below for the application.

[https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-master-computer-science-engineering/dual-degree-bs-ms-application-form/](https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-master-computer-science-engineering/dual-degree-bs-ms-application-form/)

**Internal Funding**

**Teaching Assistantships**

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

**Research Assistantships**

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

**Fellowships**

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

**BS in Computer Science**

**Degree Program Description**

Computer Science emphasizes the study of algorithms, programming methodology, software systems, computational theories and algorithms, computer organization, networking, computer graphics, cyber-security, machine learning, artificial intelligence, high performance computing, and database. In the two-semester capstone design courses, students complete design projects that serve as a culminating academic
experience. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. The BS CS degree is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems, or attend graduate schools.

Major Program Requirements

The Bachelor of Science with a major in Computer Science emphasizes the study of software systems, computational theories and algorithms, computer organization, networking, and programming methodology. Students who complete the BS in Computer Science can work for government agencies, academic institutions, or private industry creating and applying new technologies to solve complex problems.

The BS degree requires the completion of the three-semester calculus sequence plus discrete math and statistics. A student who selects an appropriate additional math course as a technical elective and has at least 9 credits in math with appropriate grades at MU can earn a math minor.

The BS degree requires the completion of 126 credits. Computer Science students must pass all CS core courses that are prerequisites for other CS core courses that the student takes with a C or better grade. All other CS core courses must be passed with a C-grade or better. To graduate, a student must earn an overall GPA of 2.0 or better and a 2.0 GPA or better in all CS or IT courses.

The Engineering Leadership, Engagement & Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities upon graduation and for internship/co-op positions.

Course requirements listed here apply to students beginning as regular college freshmen in Fall 2019 or after. A student who started college before Fall 2019 and who has been continuously enrolled as a full-time student may be pursuing the previous program and should contact the department for information on these degree requirements.

In addition to the major core requirements, students must complete all University graduation requirements (p. 35) including University general education (p. 36), as well as all degree and college or school requirements.

**Course is recommended but is not required after 60 credits have been completed.

Computer Science Electives | 24 |

At least 18 credit hours of computer science electives must be numbered above 4000; one of the 4000-level courses must be CMP_SC 4410 or CMP_SC 4450. A maximum of 6 hours of 3000/4000-level IT courses (excluding INFOTC 4400 and INFOTC 4500) can be taken as CS electives but are counted as lower level (below 4000) CMP_SC courses. INFOTC 4400, INFOTC 4500, ECE 3220, and ECE 4220 are counted as CS 4000 level courses. Students may also take up to six hours of problems or research courses, and up to three hours of CMP_SC 3940 internship credit.

- CMP_SC 2010 Intellectual Property for Engineers | 3 |
- CMP_SC 2830 Web Application Development I | 3 |
- CMP_SC 3530 UNIX Operating System | 3 |
- CMP_SC 3940 Internship in Computer Science | 1-3 |
- CMP_SC 4001 Topics in Computer Science | 1-99 |
- CMP_SC 4060 String Algorithms | 3 |
- CMP_SC 4070 Numerical Methods for Science and Engineering | 3 |
- CMP_SC 4080 Parallel Programming for High Performance Computing | 3 |
- CMP_SC 4085 Problems in Computer Science | 1-6 |
- CMP_SC 4270 Computer Architecture | 4 |
- CMP_SC 4280 Network Systems Architecture | 4 |
- CMP_SC 4330 Object Oriented Design I | 3 |
- CMP_SC 4350 Big Data Analytics | 3 |
- CMP_SC 4380 Database Management Systems I | 3 |
- CMP_SC 4405 iOS App Development I | 3 |
- CMP_SC 4410 Theory of Computation I | 3 |
- CMP_SC 4430 Compilers I | 3 |
- CMP_SC 4440 Malware Analysis and Defense | 3 |
- CMP_SC 4450 Principles of Programming Languages | 3 |
- CMP_SC 4460 Introduction to Cryptography | 3 |
- CMP_SC 4530 Cloud Computing | 3 |

- CMP_SC 4610 Computer Graphics I | 3 |
- CMP_SC 4620 Physically Based Modeling and Animation | 3 |
- CMP_SC 4630 Game Development | 3 |
- CMP_SC 4650 Digital Image Processing | 3 |
- CMP_SC 4670 Digital Image Compression | 3 |
- CMP_SC 4720 Introduction to Machine Learning and Pattern Recognition | 3 |
- CMP_SC 4730 Building Intelligent Robots | 4 |
- CMP_SC 4740 Interdisciplinary Introduction to NLP | 3 |
- CMP_SC 4750 Artificial Intelligence I | 3 |
- CMP_SC 4770 Introduction to Computational Intelligence | 3 |
- CMP_SC 4830 Web Application Development II | 3 |
- CMP_SC 4910 Digital Forensics | 3 |
- CMP_SC 4990 Undergraduate Research in Computer Science | 0-6 |
- CMP_SC 4995 Undergraduate Research in Computer Science - Honors | 1-6 |
- INFOTC 4400 C#/.NET Development | 3 |
### INFOTC 4500
Team-Based Mobile Device Application Development 3

### ECE 3220
Software Design in C and C++ 3

### ECE 4220
Real Time Embedded Computing 3

### Math Courses 19
**MATH 1500**
Analytic Geometry and Calculus I 5

**MATH 1700**
Calculus II 5

**MATH 2300**
Calculus III 3

**MATH 2320**
Discrete Mathematical Structures 3

**STAT 4710**
Introduction to Mathematical Statistics 3

### Technical Electives 9
Technical electives can be 2000 level and above CS or IT courses, 4000 level Math courses, 2000 level and above Engineering courses, IS_LT 4099, MANGMT 3000, MRKTNG 3000, FINANC 3000, and other courses that meet the prior approval of the student’s CS advisor. All technical electives taken outside the CS Department must meet the prior approval of the student’s CS advisor.

### Science Courses minimum 7
One of the following 2-semester sequences has to be taken (at least one of the courses must include a lab). Labs listed separately are not considered a 2nd science course (for example, Bio 1010 and 1020 count as one science course).

#### Physics sequence:
(credit not given for both PHYSCS 1210 and PHYSCS 2750, or PHYSCS 1220 and PHYSCS 2760)

- **PHYSCS 1210**
  College Physics I 8
  & **PHYSCS 1220**
  College Physics II
- **OR**
  **PHYSCS 2750**
  University Physics I 10
  & **PHYSCS 2760**
  University Physics II

#### Chemistry sequence:
- **CHEM 1320**
  College Chemistry I 4
- **CHEM 1330**
  College Chemistry II 4

#### Biology sequence:
- **BIO_SC 1010**
  General Principles and Concepts of Biology 3
- **BIO_SC 1020**
  General Biology Laboratory 2
  Select one of the following:
  - **BIO_SC 1200**
    General Botany with Laboratory 5
  - **BIO_SC 2100**
    Infectious Diseases 3
  - **BIO_SC 2150**
    Genetic Diseases 3
  - **BIO_SC 3050**
    Genetics and Society 3
  - **BIO_SC 3210**
    Plant Systematics 4
  - **BIOCHM 2110**
    The Living World: Molecular Scale 3
  - **BIOCHM 2112**
    Biotechnology in Society 3
  - **ANTHRO 2051**
    Introduction to Biological Anthropology 5
    & **ANTHRO 2052**
    or **ANTHRO 2050**
    Introduction to Biological Anthropology with Laboratory

#### Geology sequence:
- **GEOL 1100**
  Principles of Geology with Laboratory 4
  or **GEOL 1200**
  Environmental Geology with Laboratory
  Select one of the following:
  - **GEOL 2150**
    The Age of the Dinosaurs 3
  - **GEOL 2300**
    Earth Systems and Global Change 3
  - **GEOL 2350**
    Historical Geology 3
  - **GEOL 2400**
    Surficial Earth Processes and Products with Laboratory

### GEOL 2450
Global Water Cycle 3

### GEOL 2600
Mineral and Energy Resources of the Earth 3

### General Requirements
1. English 1000 - Exposition and Argumentation - 3 hours 'C' range grade is required
2. Complete at least 9 hours in each of the following categories. One course in one of the categories must be numbered 2000 or higher. A list of MU courses that count for social sciences, behavioral sciences, and humanities can be found at: http://generaleducation.missouri.edu/courses/.

- **(1) Humanities/Fine Arts - Must include COMMUN 1200 Public Speaking and courses from at least two different departments**
- **(2) Social/Behavioral Sciences - Must include courses from at least two different departments and fulfill the Missouri Constitutional Requirement.**
- **3. Complete enough elective hours to bring the total credit hours that count towards the degree to 126. The electives may not include remedial courses (i.e., MATH 1100, MATH 1160).**
- **4. Two courses must be designated "Writing Intensive." A C-range grade in English 1000 is a prerequisite for all WI courses. A C-range grade is required in the WI courses. The required course CMP_SC 4970 (Senior Capstone Design I) is writing intensive and counts as one of these courses. For more information on WI guidelines and courses, visit https://cwp.missouri.edu/.

### Semester Plan
Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

#### First Year
- **Fall**
  - CMP_SC 1000 1
  - CMP_SC 2050 4
  - CMP_SC 1050 4
  - MATH 1500 5
  - MATH 1700 5
  - COMMUN 1200 3
  - Non-Science Elective 1
  **Total:** 16

- **Spring**
  - CMP_SC Elective 2000/3000 level 3
  - CMP_SC 3050 3
  - MATH 1500 5
  - MATH 1700 5
  - STAT 4710 3
  - Non-Science Elective 1
  **Total:** 16

#### Second Year
- **Fall**
  - CMP_SC 3050 3
  - CMP_SC Elective 2000/3000 level 3
  - MATH 2300 3
  - Science Sequence 5
  - Humanities/Fine Art (writing intensive) 3
  **Total:** 17

- **Spring**
  - CMP_SC 3330 3
  - CMP_SC Elective 2000/3000 level 3
  - Science Sequence 5
  - Behavioral Science 3
  **Total:** 17

#### Third Year
- **Fall**
  - CMP_SC 3280 3
  - CMP_SC 3380 3
  - CMP_SC 4050 3
  - STAT 4710 3
  **Total:** 15

- **Spring**
  - CMP_SC 4020 3
  - CMP_SC Elective 4000 level 3
  - CMP_SC 4850 3
  - CMP_SC Elective 4000 level 3
  **Total:** 15
Minor in Computer Science

Requirements

To obtain a minor, a student must complete 20 hours of courses approved by the Department of Electrical Engineering and Computer Science. The student must earn a grade of C or better in CMP_SC 1050, CMP_SC 2050, and CMP_SC 2270/ECE 2210. The student must earn a grade of C- or better in the three additional department-approved CMP_SC courses with at least one numbered above 3000 counting toward the minor (except when the prerequisite for the course is C) and have a 2.0 GPA in all courses counting toward the minor. At least 9 hours must be taken in residence. The following courses are required.

Social/Behavioral Science 2000 level 3 Technical Elective 3

Fourth Year

Fall                  CR     Spring                  CR

CMP_SC 4520          3        CMP_SC 4970  (writing intensive) 3
CMP_SC 4970           3        Technical Elective 4000-level 3
CMP_SC 4410 or 4450  3        CMP_SC elective 4000-level 3
Technical Elective    3        CMP_SC elective 4000-level 3
Humanities/Fine Arts  3

Total Credits: 126

* Denotes General Education Requirements

Degree Requirements

All students completing a master's degree must fulfill the following minimum requirements:

The student must earn a minimum of 30 credit hours of computer science (CS) course work approved by the EECS Department. This course work must include at least 15 credit hours of computer science course work numbered 8000 or above (CMP_SC 8990 Research-Masters Thesis Computer Science credit is counted in the required 15 credit hours, but CMP_SC 8980 is not).

The overall GPA of course work taken as an enrolled graduate student must be at least 3.0 (out of 4.0).

Thesis/Non-Thesis Requirements

Non-Thesis Option

In order to complete the non-thesis option, the student must complete an independent project under a faculty advisor approved by the department.

This project is carried out by enrolling in CMP_SC 8980 (Non-Thesis Research) for at least one hour of credit. This project is documented and presented to a faculty committee of at least three graduate faculty members and defended in a public defense as part of a final oral examination. The CMP_SC 8980 course grade is assigned by the student's faculty advisor upon the conclusion of the oral examination. This course is graded on an S/U basis and cannot be used to increase the student's overall GPA in graduate work.

Thesis Option

In order to complete the thesis option, the student must complete an independent project under a faculty advisor approved by the department. This project is carried out by enrolling in CMP_SC 8990 (Thesis Research) for at least three hours of credit. A maximum of six credit hours of CMP_SC 8990 can be counted toward the required 30 credit hours for the MS degree program. The thesis project is documented in a formal thesis, presented to a faculty committee of at least three graduate faculty members (one of whom is a faculty member from another department) and defended in a public defense as part of a final oral examination. The CMP_SC 8990 course grade(s) is/are assigned by the student's faculty advisor upon the conclusion of the oral examination. CMP_SC 8990 is graded on an S/U basis and cannot be used to increase the student's overall GPA in graduate work. In this option, at most 9 credit hours of Research, Reading, and/or Problem courses (such as CMP_SC 8980, CMP_SC 8990, CMP_SC 8085) can be counted toward the 30-hour MS graduate requirements.

Seminar Attendance

The approval of the M3 form is tied to the attendance records for the department's seminar series. MS and ME students are required to attend a total of at least ten EECS seminars during the course of their Master's program. PhD students are required to attend a total of at least twenty EECS seminars during the course of their PhD program. Master's students who add the PhD program can apply their seminar attendance as part of their Master's program toward the attendance requirement for PhD students.

M Forms

By the end of the second semester in the program, the M1 Plan of Study form should be prepared and submitted, with the aid of a faculty advisor in the department. A faculty advisor should be selected during the student's first year. If a thesis option is chosen, the student must form a thesis committee and submit an M2 Request for Thesis Committee form. The M3 Report of Master's Examining Committee form is submitted after the thesis or project defense during the final semester.

PhD in Computer Science

Degree Requirements

All students completing a PhD degree must fulfill the following minimum requirements:

Complete all of the computer science (CS) course work requirements of the Master's degree in CS or have an MS degree in CS from another institution. The required 15 hours at the 6000-level must be regular CS courses, excluding Research or Problems courses. The student must...
maintain an overall GPA of at least 3.4/4.0 in their graduate level course work (excluding Research and Problems courses). Earn a minimum of 72 credit hours of course work and research past the student’s Bachelor’s degree.

Qualifying and Comprehensive Examination Process

Students will need to pass a qualifying examination to be admitted to candidacy in the CS PhD program within three years of program enrollment and will need to pass a comprehensive examination covering their areas of expertise within five years of program enrollment.

Students will complete a doctoral dissertation on a topic approved by the candidate’s advisory committee and defend the dissertation in a final oral examination.

Students will have at least one journal paper submitted, accepted or published, as approved by the advisor.

Students will present on a research topic as part of the CS Seminar Series at some point between passing the qualifying exam and the dissertation defense. This policy is effective for entering PhD students in Spring 2013 and after.

Seminar Attendance

The approval of the D4 form is tied to the attendance records for the department’s seminar series. PhD students are required to attend a total of at least twenty EECS Seminar Series presentations. Master’s students who add the PhD program can apply their seminar attendance as part of their Master’s program toward the attendance requirement for doctoral students.

Islams@missouri.edu

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Computer Science Program (CSP) and the Electrical & Computer Engineering Program (ECEP). At the undergraduate level, the EECS Department grants three distinct BS degrees including Computer Science (CS), Computer Engineering (CoE) and Electrical Engineering (EE). The CS undergraduate program is accredited by the Computing Accreditation Commission of ABET, while the CoE and EE undergraduate programs are accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. At the graduate level, the EECS Department offers MS degrees in CS, CoE and EE, and PhD degrees in CS and Electrical & Computer Engineering (ECE). EECS is undergoing a new wave of innovation broadly referred to as Internet of Things (IoT) or Internet of Everything (IoE) and cyber-physical systems from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with more than 50 faculty members.

About Electrical and Computer Engineering Program

The Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research. The ECE Program offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in computer and electrical engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs) and Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively. Not to mention majors and minors in other colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experiences working with faculty. The faculty research areas covers both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep networks, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasmatechnology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/academics/eecs/eecs-degrees/dual-bachelor-science-electrical-engineering-physics). At the MS and PhD levels, the ECEP offers the following graduate degrees:

• Master of Science in Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering)
The ECE Program offers undergraduate degrees at the PhD level. Assistantships with faculty are available to fund graduate study especially for teaching assistantships with the EECS Department and research opportunities available.

Programs of study leading to the BS plus MS degrees in CoE or EE is available. For highly motivated undergraduate students a fast-track five year program of study leading to the BS in Computer Engineering, Electrical Engineering, Computer Science or closely related areas for further study at the doctoral level or for successful careers as specialized CoE and EE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with the faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often multidisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the ECEP are among the leading faculty in University’s Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department. For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

**Summary**

The ECE Program offers undergraduate degrees:

- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/)
- Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/)
- Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics/)

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-computer-engineering/)
- Master of Science in Electrical Engineering (MS) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering/)
- Doctoral Degree in Electrical and Computer Engineering (PhD) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering/)

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
- parallel processing;
- computer architecture;

- Master of Science in Electrical Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/master-science-electrical-engineering/)
- Doctoral Degree in Electrical and Computer Engineering (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/phd-electrical-computer-engineering/)
- Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/dual-bachelor-science-electrical-engineering-physics/)

with many more options for dual degrees within the EECS department and outside.
• autonomous systems;
• real-time embedded architectures;
• high performance computing;
• sensor networks; and
• human-computer interfaces.

Research
The ECEP in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research with faculty conducting research in the broad emphasis areas of:

• Communications and Signal Processing (CSP)
• Intelligent Systems and Robotics (ISR)
• Physical and Power Electronics (PPE)
• Applied Physics (AP)
• Systems Modeling and Control (SMC)
• Computer Architecture and Systems (CAS)
• Nano/Micro Technology (NMT)

Faculty
Assistant Professor I. Akturk**, G. Bana*, K. Anuarul Hoque**, T. Joshi*, G. Scott*, P. Valettas*
Assistant Research Professor H. Aliakbarpour*, A. Buck, F. Bunyak**
Associate Teaching Professor D. Musser*
Assistant Teaching Professor F. Wang*
Assistant Professor of Practice J. Fischer

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields.

See Electrical Engineering (p. 576) and Computer Engineering (p. 559) for details on the undergraduate degree programs.

Research Areas
The ECE Program in EECS is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

• Applied Physics
• Communications, Signal Processing
• Computer Architectures, Cyber-Physical Systems
• Nano/Micro Technology
• Neuroscience, Neural Engineering
• Physical and Power Electronics
• System Modeling, Control, Robotics

Application Procedures for PhD Programs
In order to be considered for admission in a particular semester we must receive all required paperwork by these deadlines:

Fall admission: Applications and all paperwork must be received by March 1st. NOTE: If applying for financial assistance in the department, applications and all paperwork must be received by January 15th.

Spring admission: Applications and all paperwork must be received by October 1st.

Application for admission involves submitting a formal application through the online application system. An application must be accompanied by an application fee. In addition, the applicant must have the following original paperwork sent directly from the originating institutions to the Graduate School:
• Official transcripts from ALL institutions attended
• Official GRE score report from Educational Testing Service in New Jersey (and TOEFL or IELTS scores for international applicants)

The following supplemental materials must be uploaded in the online application:
• Your résumé
• A personal goal statement indicating why you feel prepared to pursue the degree program and why you want to pursue this degree
• Three letters of recommendation from professors who know your abilities that must address your ability and readiness to pursue a graduate program in computer science (submitted by your references directly to your online application)
• Copies (unofficial) of all transcripts
• Copies of GRE results (and TOEFL or IELTS, if applicable).

Note: Copies of the required documents (transcripts, GRE scores, etc.) cannot be accepted in lieu of the official reports from the originating institutions. Copies of these records should be submitted for evaluation, but any decision on admission is non-binding until the official records have been received.

Current/Former MU students: All current and former MU students must meet the same requirements as external students and file one of the following forms (in lieu of an MU Application Form):
• Current Non-Degree Graduate Students: Change of Division, Degree, Program, Emphasis, or Advisor form,
• Current graduate students in another department: Change of Division, Degree, Program, Emphasis, or Advisor form (same as 1)
• Previous graduate students returning to same program: Re-Activation form.

Degree Completion Requirements

Use the links at the top of the page to direct you to details on the requirements that must be completed in order to earn the respective graduate degrees.

Financial Aid

Teaching and research assistantships are available on a competitive basis for qualified students in the graduate programs. International students who have not completed a MS or UG courses at an American University are not eligible for Teaching assistantships during their first semester of study.

Teaching assistantships and research assistantships are available with tuition waivers in the Department. Once an applicant is accepted into the program, their application materials are shared with faculty for review. Individual faculty are responsible for hiring their own assistants, and will choose from the pool of applicants.

Teaching Assistantships

Teaching assistantships are normally awarded to qualified graduate students with appropriate communication skills who assist faculty members in various phases of instruction. International students may not be appointed to teaching assistantships in their first semester on campus. International students must pass a language screening test at a proper level to be eligible for the TA positions available.

Research Assistantships

Research assistantships are granted to students qualified for working with professors on particular research projects. The research assistants are selected by faculty members who have research funds to support graduate students. Therefore, students should contact the faculty members directly for the RA possibility.

Fellowships

The department faculty actively pursue funding for selected research fellowships. Available fellowship opportunities can be found by contacting the ECE Graduate Office. Additionally, a limited number of “Teaching Fellows” are awarded annually to outstanding PhD students, particularly for those preparing for academic careers. Details can obtained from the ECE Graduate Office.

PhD in Electrical and Computer Engineering

Degree Requirements

The student must be qualified to be a PhD candidate. Students admitted with an MS degree must prove competency in the PhD Qualifying Exam Process. Students admitted directly from a BS degree program must complete the 24 hours of graded coursework requirements of the MS degree during the first two years of their program. This will prepare them for the PhD Qualifying Exam Process, and will allow them to obtain an MS degree if a thesis or project report is completed and defended, consistent with MS requirements, or to obtain an ME degree once the course work requirement has been satisfied. A student may petition the faculty for an extension of the two year requirement.

A minimum of 72 semester hours beyond the BS are required by the Graduate School; the student’s doctoral program committee sets the total number of credit hours and specific courses to be completed as part of his/her PhD program. However, the Graduate School requires a minimum of 15 hours of 8000/9000 level classes to be taken at MU exclusive of research, problems, and supervised study.

The candidate must pass a written and oral comprehensive examination.

The student must complete a doctoral dissertation on a topic approved by his or her Doctoral Committee and defend the dissertation in an oral final examination.

The student must present on a research topic as part of the EECS seminars between the qualifying process being met and the dissertation defense. This policy is effective for ECE PhD students entering in Spring 2020 and after.

Selection of an Advisor

The student selects an advisor or co-advisors, by mutual consent, from doctoral faculty members in the department. In the event that an advisor retires or leaves MU, he/she may continue to serve as a student’s advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the director of graduate studies, will assist to ensure that a replacement is found.

Doctoral Degree Forms

By the end of the second semester of study at MU, a student should begin submitting degree program forms which will aid the academic program and the Graduate School in tracking the student’s progress toward degree completion. These forms include the following:

• D1 Qualifying Exam Results & Doctoral Committee Approval (http://gradstudies.missouri.edu/forms-downloads/repository/d1.pdf)
Submitted after passing qualifying process

- D2 Plan of Study Form (http://gradstudies.missouri.edu/forms-downloads/repository/d2.pdf)
  Submitted after passing qualifying process
- D3 Result of the Comprehensive Examination (http://gradstudies.missouri.edu/forms-downloads/repository/d3.pdf)
  Submitted to the Graduate School within one month of exam completion
  Submitted by the Graduate School deadline for the semester in which the students plan to graduate.
- Change of Committee (http://gradstudies.missouri.edu/forms-downloads/repository/cocform.pdf)
- Plan of Study Course Substitution Form (http://gradstudies.missouri.edu/forms-downloads/repository/subform.pdf)

PhD Qualifying Process

To be eligible to take the PhD Qualifying Process, graduate students must be accepted for advisement in the ECE PhD program. The process must be completed before the end of his or her second year of advisement as a Ph.D. student.

- Within 2 years in the ECE PhD program, a student must complete at least 3 8000-level ECE regular courses, excluding research, problems, and special topic courses. The GPA of three of these courses with the highest grades must be at least 3.4, and overall GPA of all 8000-level courses must be 3.0 or higher. If the student cannot meet the requirements within the two year time limit, the student can file an appeal to the Director of Graduate Studies.

Appeal Process for the Qualifying Process Result

Electrical Engineering

Introduction

The Department of Electrical Engineering & Computer Science is one of the academic departments within the College of Engineering at the University of Missouri. It manages two sets of Programs: the Electrical and Computer Engineering Program (ECEP) in the Electrical Engineering and Computer Science (EECS) Department is the most research-active program among all other programs and units in the College of Engineering at the University of Missouri, with over $5 million in externally funded research. The ECEP offers a comprehensive undergraduate curriculum culminating in a capstone project that provides a solid foundation for undergraduate students to pursue rewarding careers in electrical and computer engineering. Students seeking either one of the two undergraduate degrees offered -- Bachelor of Science in Computer Engineering (BS CoE) (https://engineering.missouri.edu/departments/electrical-engineering-computer-science/bachelor-science-computer-engineering-bs/) and Bachelor of Science in Electrical Engineering (BS EE) (https://engineering.missouri.edu/academics/eecs/eecs-degrees/bachelor-science-electrical-engineering/) -- are able to pursue dual degrees in related fields including information technology and computer science, as well as in the other degree of the ECEP, i.e. BS EE and BS CoE, respectively, along with majors and minors in other Colleges. Students have opportunities to gain in-depth hands-on knowledge in specialized areas through undergraduate research experience working with faculty. Faculty research areas cover both well established and emerging fields including mobile video communication; wireless and digital communications; satellite remote sensing; geospatial image and video processing; computational neuroscience; systems biology; eldercare technology; computational intelligence, machine learning, pattern recognition, deep learning, fuzzy systems; computer vision; robotic vision; robotic assistive technology; human/robot interaction; landmine detection; pulsed power and plasma technology; nuclear and renewable energy systems; semiconductor devices; photonics; accelerators and beams; antennas and radar systems; nano and microelectromechanical systems; bioMEMS; heterostructures, microfabrication; feedback and control systems; parallel processing; computer architecture; autonomous systems; real-time embedded architectures; high performance computing; sensor networks; and human-computer interfaces.

The ECEP in EECS also offers a Dual Bachelor of Science in Electrical Engineering & Physics (https://engineering.missouri.edu/academics/eecs/eecs-degrees/dual-bachelor-science-electrical-engineering-physics/). At the MS and PhD levels, the ECEP offers the following graduate degrees:

- from wearable biocompatible sensors, low power flexible integrated circuits, hybrid multicore computer architectures and hardware level security to new cryptographic protocols, mobile apps, cloud computing, deep learning, robotics, autonomous systems and smart cities. The four year undergraduate degree program prepares students for rewarding careers in hardware and software systems and lays the foundation for graduate study in the next wave of technological innovation.

The department was established in 1885 as the first Electrical Engineering department in the nation, after Thomas Edison helped generate interest in electrical engineering by presenting an electrical dynamo and some incandescent lamps to the University of Missouri in 1882. The EECS department is now home to more than 600 undergraduate students and over 300 graduate students in CS, CoE, EE and ECE, with more than 50 faculty members (https://engineering.missouri.edu/academics/eecs/eecs-faculty/).
The ECE Program offers undergraduate degrees:

- Master of Science in Electrical Engineering [link]
- Master of Science in Computer Engineering [link]
- Doctoral Degree in Electrical and Computer Engineering [link]

with options for dual Masters and the Masters in Engineering (ME) which is coursework only, without thesis. The graduate degree programs prepare graduates of four-year BS degrees in Electrical Engineering, Computer Engineering, and Computer Science or closely allied fields for further study at the doctoral level or for successful careers as specialized EE and CoE professionals in emerging fields. The PhD program is a professional research degree designed to prepare students for advanced professional careers, including college teaching and research, as well as research and development in industrial, government, and nonprofit organizations. Specialized training, state-of-the-art technology, innovation and entrepreneurship experience is available through close interaction with faculty in their respective fields of research expertise.

The faculty members in the ECE Program participate in the full spectrum of undergraduate and graduate education. Graduate education, has a strong innovation component with faculty initiated research projects funded by the federal government, state government and industry, and is often multidisciplinary in nature spanning interdepartmental and cross-college research. The aim is to produce professionals who can function well as part of interdisciplinary research teams. Close integration of research with education is a constant goal in the department’s graduate programs. It emphasizes in-depth studies that can also be tailored to fit graduate students’ individual interests. Additionally, members of the ECEP are among the leading faculty in University’s Research Revenue, with major research projects funded by both federal agencies and industry including the National Science Foundation (NSF), National Institute of Health (NIH), National Geospatial-Intelligence Agency (NGA), Department of Energy (DoE), and Department of Defense (DoD) as well as Microsoft, Honeywell and Monsanto, to cite just a few.

Research facilities are well established around faculty expertise in the broad emphasis areas of Communications and Signal Processing (SP), Intelligent Systems and Robotics (ISR), Physical and Power Electronics (PPE), Applied Physics (AP), Systems Modeling and Control (SMC), Computer Architecture and Systems (CAS), Nano/Micro Technology (NMT). Faculty in the Electrical and Computer Engineering Program work closely with faculty in the Computer Science Program within the EECS Department.

For highly motivated undergraduate students a fast-track five year program of study leading to the BS plus MS degrees in CoE or EE is available.

Teaching assistantships with the EECS Department and research assistantships with faculty are available to fund graduate study especially at the PhD level.

Summary

The ECE Program offers undergraduate degrees:

- Bachelor of Science in Computer Engineering (BS CoE) [link]
- Bachelor of Science in Electrical Engineering (BS EE) [link]
- Dual Bachelor of Science in Electrical Engineering & Physics [link]

with many more options for dual degrees within the EECS department and outside.

Graduates with BS degrees in CoE, EE, CS or closely related areas can choose to pursue advanced study towards the following degrees:

- Master of Science in Computer Engineering (MS) [link]
- Master of Science in Electrical Engineering (MS) [link]
- Doctoral Degree in Electrical and Computer Engineering (PhD) [link]

The MS and PhD are professional research degrees designed to prepare students for advanced professional careers, including teaching and research at university level, as well as research and development in industrial, government, and nonprofit organizations.

The ECE Program offers learning and research opportunities for both undergraduate and graduate students in the areas of:

- mobile video communication;
- wireless and digital communications;
- satellite remote sensing;
- geospatial image and video processing;
- computational neuroscience;
- systems biology;
- eldercare technology;
- computational intelligence, including machine learning, pattern recognition, deep learning, fuzzy systems;
- computer vision;
- robotic vision;
- robotic assistive technology;
- human/robot interaction;
- landmine detection;
- pulsed power and plasma technology;
- nuclear and renewable energy systems;
- semiconductor devices;
- photonics;
- accelerators and beams;
- antennas and radar systems;
- nano and microelectromechanical systems;
- bioMEMS;
- heterostructure and microfabrication;
- feedback and control systems;
• parallel processing;
• computer architecture;
• autonomous systems;
• real-time embedded architectures;
• high performance computing;
• sensor networks; and
• human-computer interfaces.

Research

The ECEP in EECS is the most research-active program among all programs and units in the College of Engineering at the University of Missouri, with over $5 million in expenditures with faculty conducting research in the broad emphasis areas of:

• Communications and Signal Processing (CSP)
• Intelligent Systems and Robotics (ISR)
• Physical and Power Electronics (PPE)
• Applied Physics (AP)
• Systems Modeling and Control (SMC)
• Computer Architecture and Systems (CAS)
• Nano/Micro Technology (NMT)

Faculty

(573) 882-2648
beattyt@missouri.edu

The Department of Electrical Engineering and Computer Science (EECS) offers both the Bachelor of Science with a major in Electrical Engineering and the Bachelor of Science with a major in Computer Engineering. The undergraduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields.

In addition, technical electives allow concentration in selected areas.

The EECS department emphasizes close interaction with industry. Industry engineers visit regularly and industry-sponsored student projects are provided to give extra dimension to the program.

Many students in the EECS department combine the electrical engineering major with the computer engineering major in a special 142-credit program. These students receive both the BS EE and BS CoE degrees.

Students interested in interdisciplinary studies may use some electives to study business, premedicine, prelaw, and other areas. Students are able to choose from a wide variety of courses offered by other departments in the College of Engineering, as well as from other MU colleges, taking advantage of the multidisciplinary nature of the campus.

The current educational objectives of the electrical engineering program are:

• Graduates will meet or exceed the expectations of their employers
• Qualified graduates will pursue advanced study if desired
• Graduates will pursue leadership positions in their profession and/or communities

The current educational objectives of the computer engineering program are:

• Graduates will meet or exceed the expectations of their employers
• Qualified graduates will pursue advanced study if desired
• Graduates will pursue leadership positions in their profession and/or communities

Both the Bachelor of Science in Electrical Engineering (BS EE) and the Bachelor of Science in Computer Engineering (BS CoE) require that students earn a 2.0 GPA or better in all courses that have an MU engineering prefix. All ECE courses require a grade of C or better in ECE prerequisites.

Engineering design in both the electrical engineering and computer engineering programs is provided through an integrated laboratory structure. Beginning with the first laboratory course in the fourth semester of each program, students have a significant design and laboratory experience in each semester of their respective programs.

In addition to the major core requirements, students must complete all University graduation requirements including University general education, as well as all degree and college or school requirements.

Electrical and Computer Engineering (ECE) Honors Program

The ECE Honors Program follows the general rules and philosophy of the College of Engineering Honors Program. Students may enter the program
from the beginning of the junior year and must have a GPA of 3.0/4.0 at the start. Eligible students participate in the program by enrolling in ECE 4995 Undergraduate Honors Research in Electrical Computer Engineering for one to three credit hours, which replaces an equivalent number of hours of ECE technical electives.

The heart of the program is a research or advanced design project culminating in an undergraduate honors thesis. The project is conducted under the supervision of the honors advisor, who is an ECE faculty member selected by mutual agreement between the student and the professor. Satisfactory completion of the project requires approval (signatures) of the honors thesis by both the honors advisor and an additional faculty member, who serves as second reader of the thesis. Students who complete the program and graduate with a GPA of at least 3.0 receive the designation “Honors Scholar in Engineering” at graduation and on their diploma.

Another valuable feature of the Honors Program is that participants may reduce the number of credit hours required for degree completion to the University minimum of 120 by substituting up to six hours of credit from graduate courses through dual (undergraduate/graduate) enrollment during the last four semesters of the undergraduate program and after completion of the honors project.

Graduate

• MS in Electrical Engineering (p. 579)

The Department of Electrical Engineering and Computer Science (ECECS) offers both the Master of Science with a major in Electrical Engineering and the Master of Science with a major in Computer Engineering, as well as a Doctor of Philosophy Degree in Electrical and Computer Engineering. The graduate program in both degrees at the University of Missouri provides students with the requisite fundamentals in either discipline and prepares them for beginning practice in both the traditional and emerging fields of these disciplines. The degree programs are flexible 126-credit structures that provide the fundamentals of engineering, in addition to a thorough coverage of the major specialties within their respective fields. In addition, technical electives allow concentration in selected areas.

BSEE in Electrical Engineering

Degree Program Description

The Bachelor of Science in Electrical Engineering allows students to learn about electrical power generation, communication systems, instrumentation, circuit design and microprocessor design. Students have the opportunity to gain hands-on experience as well as research experience and the opportunity to develop new products.

Major Program Requirements

The electrical engineering degree course work in all traditional areas of the electrical engineering field. Focused areas of work are offered in the areas of communications, digital systems, discrete and integrated electronics, electromagnetics, energy systems and power electronics, robotics and system control. (Focus areas are not listed on transcripts or diplomas).

Students must complete all university requirements (p. 35), including general education (p. 36), and degree requirements below.

Economics Elective

Select one of the following:

- ECON 1014 Principles of Microeconomics
- ECON 1015 Principles of Macroeconomics

Constitutional Elective

Select one of the following:

- HIST 1100 Survey of American History to 1865
- HIST 1200 Survey of American History Since 1865
- HIST 1400 American History
- HIST 2210 Twentieth Century America
- HIST 2440 History of Missouri
- HIST 4000 Age of Jefferson
- HIST 4220 U.S. Society Between the Wars 1918-1945
- HIST 4230 Our Times: United States Since 1945
- HIST 4310 American Government
- HIST 4310 State Government
- Humanities/Fine Arts courses
- Social Science/Behavioral Science courses

Other major core requirement courses:

- ENGR 1000 Introduction to Engineering
- CMP_SC 1050 Algorithm Design and Programming I
- ECE 2100 Circuit Theory I
- ECE 2210 Introduction to Logic Systems
- ECE 3210 Microprocessor Engineering for Electrical Engineers
- ECE 3810 Circuit Theory II
- ECE 3830 Signals and Linear Systems
- ECE 3410 Electronic Circuits and Signals I
- ECE 3510 Electromagnetic Fields
- ECE 3610 Semiconductors and Devices
- ECE 3840 Measurement and Instrumentation
- ECE 4960 Senior Capstone Design I - Writing Intensive
- ECE 4980 Senior Capstone Design II (Senior Capstone Design II)

Electives

- ECE or CMP_SC 2000+ Elective
- ECE 4000 Technical Elective
ECE 4000+ Senior Lecture/Lab 4
Any Elective 2

* ENGINR 1000 waiver: Students with 60 or more credits have completed the ENGINR 1000 requirement.

- POL_SC 2100 State Government 3
- Humanities/Fine Arts courses 9
- Social Science/Behavioral Science courses 3
Select two of the following:
- ENGINR 1200 Statics and Elementary Strength of Materials 3
- ENGINR 2300 Engineering Thermodynamics 3
- IMSE 2710 Engineering Economic Analysis 3

**Other major core requirement courses:**
- MATH 1500 Analytic Geometry and Calculus I 5
- MATH 1700 Calculus II 5
- MATH 2300 Calculus III 3
- MATH 2320 Discrete Mathematical Structures 3
- MATH 4100 Differential Equations 3
- STAT 4710 Introduction to Mathematical Statistics 3
- PHYSICS 2750 University Physics I 5
- PHYSICS 2760 University Physics II 5
- CHEM 1320 College Chemistry I 4
- ENGLISH 1000 Exposition and Argumentation 3
- ECONOM 1014 Principles of Microeconomics 3
- or ECONOM 1015 Principles of Macroeconomics
- CMP_SC 1050 Algorithm Design and Programming I 4
- CMP_SC 2050 Algorithm Design and Programming II 4
- ECE 1000 Introduction to Electrical and Computer Engineering 2
- ECE 2100 Circuit Theory I 4
- ECE 2210 Introduction to Logic Systems 3
- ECE 3210 Microprocessor Engineering for Electrical Engineers 4
- ECE 3220 Software Design in C and C++ 3
- ECE 3410 Electronic Circuits and Signals I 4
- ECE 3510 Electromagnetic Fields 3
- ECE 3610 Semiconductors and Devices 3
- ECE 3810 Circuit Theory II 4
- ECE 3830 Signals and Linear Systems 3
- ECE 4220 Real Time Embedded Computing 3
- ECE 4250 VHDL and Programmable Logic Devices 4
- ECE 4270 Computer Architecture 4
- ECE 3840 Measurement and Instrumentation 3
- ECE 4960W Senior Capstone Design I - Writing Intensive 3
- ECE 4980 Senior Capstone Design II (Senior Capstone Design II) 3
Semester Plan

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

Total Credits: 142

MS in Electrical Engineering

Degree Requirements

To fulfill the requirements for the MS degree, the following course requirements are required:

- A candidate must complete 30 hours, including at least 12 hours of 8000-level graded course work (exclusive of ECE 8990 or ECE 8085 or ECE 8010 hours).
- At least six of these graded 8000 level course hours need to come from ECE.
- At least 15 hours of graded course work (total combination of 7000 and 8000 level courses, exclusive of ECE 8990, ECE 8085, or ECE 8010 hours) must be taken from the ECE course offerings.
- A maximum of six hours of graduate credit may be transferred from another campus in the University of Missouri System or other university, while a maximum of eight hours of graduate credit may be used from a previous MU master’s degree.
- At most, three hours of course work in supervised study (ECE 8010) may be taken during the MS program and they will be graded on an S/U basis.
- A minimum of 3 hours to a maximum of 6 hours of research (ECE 8990) or problems (ECE 8085) are required, based on whether the student writes a master’s thesis or a master’s Report.
- The student’s cumulative GPA must be at least 3.0 to graduate.
- The student must attend at least 10 seminars given by the EECS department during the course of study.

Academic Probation

A student whose GPA drops below 3.0 is automatically placed on academic probation. In such a case, the student has one semester to raise his or her cumulative GPA to 3.0. Failure to do so will result in expulsion from the program. Additionally, a student who receives the grade of “C” in 9 hours of coursework will be expelled. As with acceptance, students here also have a right to the same formal appeal process described above.

Selection of an Advisor

Students must choose an academic advisor who will then provide guidance for the selection of coursework, and in the choice and execution of a research question. The student’s academic advisor and the Director of Graduate Studies must approve all coursework used to satisfy the credit hour requirements for this degree. After performing satisfactorily for a minimum of one semester, the student, with the advisor’s assistance, completes the Program of Study form that outlines the plan of study for the student's graduate program. M1 - Program of Study form

The form is forwarded through the DGS to the Graduate School for approval. In the event that an advisor retires or leaves MU, he/she may continue to serve as the student’s main advisor unless there is written academic program policy prohibiting such an arrangement. If an advisor is unable or unwilling to continue to serve, the academic program, with the leadership of the DGS, will assist the student to ensure that a replacement is found.
Thesis/Non-Thesis Requirements

Thesis Option

For students under the thesis option of the MS degree, i.e., students enrolling for ECE 8990, an M-2 Request for Thesis Committee form is required to be submitted for approval by the department DGS and the Graduate School by the end of the student's second semester.

A thesis committee is composed of three members of the MU faculty: a major advisor from the academic program, a second reader from the academic program, and an outside reader who is a member of the graduate faculty from a different MU graduate program. Upon approval of the department DGS, the student may petition the Graduate School to allow a person who is not a member of the MU graduate faculty to serve as the third reader. The petition should include a written justification for such a request and a copy of the person's curriculum vitae. The Graduate School maintains copies of curriculum vitae previously received and approved, and if such a request is anticipated, the student should contact the Graduate School to see if the curriculum vitae of a particular person is already on file. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date.

Information about submitting the thesis can be found in the Thesis and Dissertation Guidelines.

Non-Thesis Option

For students who enroll in ECE 8085 (Problems), a problem report rather than a thesis is required. The student is not required to submit the M-2 form (request for a thesis committee). Instead, the student must have the report approved by his or her advisor and two other members of the graduate faculty, forming the student’s Problem Committee. It is not required that a member outside of EECS be included, although it is permissible for such a member of the MU graduate faculty to be appointed. At least one of the three members must have a primary academic appointment in EECS. Students need to supply committee members with copies for review/evaluation at least one week prior to the defense date. At that time, an announcement is to be made to the department faculty and graduate students to allow them to attend the defense. The student must defend the problem report to the committee, and make any needed adjustments in format and corrections/clarifications based on input from the committee.

Report of the Master’s Examining Committee

The purpose of the M-3 Report of the Master’s Examining Committee Form is to have an official record of the final examining process, whether it is a thesis defense or presentation of a report. The student’s committee will indicate on this form if the student has passed the final exam. This form must be submitted to the Graduate School by a deadline for the semester in which the students plan to graduate. The form is due in the Graduate School two weeks prior to graduation.

Engineering

Programs in Engineering are multi-department programs, and administered by the College of Engineering. Requirements are determined based on the specific area of interest. Options include a minor at the undergraduate level, and a master’s degree at the graduate level.

College of Engineering
W1024 Lafferre Hall

Columbia, MO 65211
http://engineering.missouri.edu

Faculty

Please see the appropriate degree program pages for faculty information.

- Graduate Faculty Member - membership is required to teach
  graduate-level courses, chair master's thesis committees, and serve
  on doctoral examination and dissertation committees.

- Doctoral Faculty Member - membership is required to chair
doctoral examination or dissertation committees. Graduate faculty
  membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- Minor in Engineering (p. 580)

Graduate

- ME in Engineering (p. 581)

The College of Engineering offers the Master of Engineering degree for graduate students interested in a terminal master's degree, who have a demonstrated need for a professional, non-research degree in engineering, and have an academic interest in a specific focus area within engineering.

Several departments in the College of Engineering administers an ME degree focusing in that area.

Note: A focus area is not listed on the MU transcript. Hence the transcript and the diploma for any student completing an ME degree will only indicate Master of Engineering, with no designation of any specific department.

Minor in Engineering

The minor in engineering is designed for students majoring in disciplines such as physics, math, chemistry and computer science, but it is available to students in all disciplines. It consists of 18 or 20 hours of engineering courses as listed below.

Requirements

ME in Engineering

The Master of Engineering degree is offered in several focus areas: Biological Engineering, Electrical Engineering, Computer Engineering, Industrial and Manufacturing Systems Engineering, or Mechanical and Aerospace Engineering. Note that the focus areas do not appear on diplomas or transcripts.

Degree Requirements

An ME student must complete a minimum of 36 credit hours of graduate course work. At least 15 hours must be in 8000+ level courses and a minimum of 21 hours must be from the College of Engineering. The student must maintain at least a 3.0 cumulative GPA and complete the program in eight years. A project may be required by the advisor. For additional degree requirements based on the focus area, students should consult with the specific College of Engineering Department.

ME with a focus in Biological Engineering

Consult with the department of Biological, Biomedical, and Chemical Engineering for details.

ME with a focus in either Electrical or Computer Engineering

The entrance requirements for the ME degree/Electrical and Computer Engineering Focus are the same as for the MS in Electrical Engineering and MS in Computer Engineering. Note: When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri-Columbia and your program of interest as locations to receive the scores. MU’s Institutional Code for the GRE and TOEFL is: 6875. Consult with the department of Electrical Engineering and Computer Science.

ME with a focus in Industrial and Manufacturing Systems Engineering

Of the 36 required credit hours, 21 must be at the 8000 level and the rest at 7000 or above level. Consult with the department of Industrial and Manufacturing Systems Engineering for additional details.

ME with a focus in Mechanical and Aerospace Engineering

Of the 36 hours required for the ME degree with focus in mechanical and aerospace engineering:

- A minimum of 18 hours must be 8000 level coursework
- A minimum of 18 hours of coursework must be in the MAE department
- A minimum of 18 hours must be taken at the University of Missouri-Columbia
- A maximum of 18 hours may be transferred from another school with the UM system
- A maximum of 6 hours may be transferred from a school external to the UM system
- A maximum of 6 hours of problems in MAE (MAE 8085) may be counted

ME Entrance requirements

- GPA of 3.0 on 4.0 scale in the last 60 hours of the BS program
- Minimum GRE scores may vary according to area.
- When did you take the GRE?
  - Prior to August 1, 2011 will be considered
  - On or After August 1, 2011 will be considered
- Minimum TOEFL scores (international applicants only):
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550
- Minimum Academic IELTS scores 6.5 with no section below 6.0
- Item Score
  - Listening 6.0
  - Reading 6.0
  - Writing 6.0
  - Speaking 6.0

When registering for the GRE and TOEFL exams, be sure to designate the University of Missouri - Columbia and your program of interest as locations to receive the scores. MU’s institutional code for the GRE and TOEFL is 6875.

How to Apply

Applicants must concurrently apply to the MU Office of Graduate School and the engineering department offering the focus area interest.

Industrial Engineering

James S. Noble, Chair and Director of Undergraduate Studies
College of Engineering
E3437 Lafferre Hall
(573) 882-2691
https://engineering.missouri.edu/academics/imse/

Industrial and Manufacturing Systems Engineering builds on a foundation of science, mathematics, computing and data analytics in order to address a wide range of issues in the socio-technical system (complex combinations of people and technology) and environmental (sustainability) domains. With this unique blend of skills, industrial engineering bring optimization-based approaches to a variety of problems in manufacturing, healthcare, supply chain / logistics, sustainability and service organizations.
Industrial engineers in manufacturing organizations address many issues including designing workplaces, considering both the capabilities of machines and humans. They may design computer-integrated manufacturing systems that include automation and robotics. They may also control production, optimize inventory, design quality systems, evaluate new product proposals and build new or improved production facilities.

Industrial engineers working in the supply chain / logistics domain address issues ranging from supplier selection, demand forecasting, inventory systems, facility location, distribution network design, and transportation.

Industrial engineers are also involved in sustainable systems design where they seek to minimize environmental impact while cost-effectively delivering the goods and services demanded by humanity. Issues addressed range from optimizing the environmental performance of an individual product to quantitatively assessing the performance of energy systems.

Industrial engineering skills are used to design better healthcare delivery where they increase the efficiency of the healthcare system. They also work to reduce errors in a wide range of human-centered systems with expertise from data-driven science and ergonomics.

Finally, industrial engineering skills can help facilitate the judicial process, provide faster and more accurate mail distribution, and optimize airline routing and reservation methods. In summary, the industrial engineer may be involved in the design and operation of a range of systems that provide services at a cost that society can afford at the quality that is required.

The MU IMSE department offers the ABET-accredited Bachelor of Science degree with a major in Industrial Engineering (BSIE), and 5 year Industrial Engineering BSIE/MS and BSIE/MBA programs. At the graduate level, the department offers the Master of Science in Industrial Engineering (MSIE) and the Doctor of Philosophy in Industrial Engineering (PhD IE) degrees. The department also offers students the opportunity to obtain Lean Six Sigma Green Belt certification and/or an interdisciplinary Global Supply Chain Management certification.

Faculty

Professor C. M. Klein**, J. S. Noble**, B. Wu**
Associate Professor R. G. McGarvey**, L. G. Occeña**
Assistant Professor J. H. Kim**, S. Rajendran*, K. Seo*, S. Srinivas*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BSIE in Industrial Engineering (p. 584)

Advising Contact
James S. Noble, Chair and Director of Undergraduate Studies

Scholarship Information Contact
Luis G. Occeña

Industrial engineering undergraduates complete a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling. They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design.

These fundamental skills provide the foundation from which students learn to develop systematic, integrated, and optimal solution approaches to large-scale enterprise problems. In order to be successful as they begin their careers (or graduate study) students learn to communicate effectively in both oral and written forms, and become proficient in working in diverse teams of individuals. Lastly, the curriculum introduces the student to ethical and professional issues in engineering practice.

Industrial engineering design experiences are integrated throughout the curriculum, most often in a team-based environment. Industrial engineering design is the process of developing and improving integrated systems that include people, materials, information, equipment and energy.

Admission Requirements

• All incoming freshmen with ACT math score of at least 26, and ACT composite of at least 26 or a class rank in the upper 25 percent are directly admitted into the program.

• All other incoming freshmen will be admitted when they have passed, with a C or better grade in Math 1500 (or equivalent) Math 1700 (or equivalent), Physics 2750 (or equivalent) and Chem 1320 (or equivalent), and if they are in good academic standing.

• Students transferring from other institutions (not having a MU GPA) will be admitted after a review of their transcript if they have passing grade in an equivalent of Math 1500, Math 1700, Physics 2750 and Chem 1320 and satisfactory overall prior academic performance.

Program Educational Objectives

The IE Program educational objectives have been developed to address the needs of our constituencies and to be consistent with the University of Missouri mission. Within 3-5 years of graduation from the industrial engineering program in the Industrial and Manufacturing Systems Engineering Department at the University of Missouri:

• Graduates will create value for their employers, demonstrating entrepreneurial initiative, and make contributions that benefit society.

• Graduates will expand their capabilities through professional development and advanced education.

• Graduates will provide leadership and be agents of change in their profession and/or communities.

The objectives are based on a few key concepts: value, entrepreneurial initiative, expanding capability, leadership, and being agents of change. ‘Value’ creation is defined as what a graduate’s employer requires in order to achieve its stated objectives. The IMSE graduate adds value to the organization by taking entrepreneurial initiative that contributes to the greater good of society. Graduates face an environment where technology is advancing at an ever increasing pace, therefore, they will need to expand their knowledge and capabilities through professional...
development and advanced education. Due to their systems view of the enterprise, industrial engineers are often called upon to provide leadership within an enterprise and, as such, are required to manage the change that is inherent in today's dynamic environment.

**Student Outcomes**

Student Outcomes (SO) are defined as the abilities the department’s BSIE graduates will have upon graduation that will enable them to achieve the program’s educational objectives. The student objectives reflect the assimilation of what has been taught in the curriculum upon completion of the undergraduate education.

All MU BSIE graduates should have:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

In summary, graduates of the Department of Industrial and Manufacturing Systems Engineering (IMSE) will possess a strong foundation upon which they can grow professionally, and continue to build a focused set of fundamental and engineering knowledge and skills that are integrated and applicable to real-world problems in any enterprise setting.

**Accreditation**

The University of Missouri program in industrial engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET.

**IMSE Honors Program**

The IMSE Honors Program follows the regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 3 to 6 credits of IMSE 4995 (http://catalog.missouri.edu/search/?P=IMSE%204995) - Undergraduate Research Industrial Engineering - Honors. The academic credit for the honors project (3-6 credits in IMSE 4995 (http://catalog.missouri.edu/search/?P=IMSE%204995)) replaces an equivalent number of credits of IMSE or Technical electives. The project is conducted under the direction of an IMSE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and a second reader. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**Academic Qualifications for the Honors Program**

Honors students must maintain and graduate with a 3.0 overall GPA. In the case of a transfer student, their transferred credit plus their MU credit will average 3.0/4.0. Students must have a minimum of 60 credit hours.

The successful honors scholar has a degree of flexibility in their program of study. Honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program. Any 8000 level course may be substituted, but only courses at the 7000 level that are not required for the BSIE degree at the 4000 level (eg. IMSE elective courses, technical electives) may be substituted.

**Lean Six Sigma Green Belt Certification**

IMSE students have the opportunity to obtain a Lean Six Sigma Green Belt certification either during their degree program or after. Certification requires students to obtain a GPA average of 2.5 or better in IMSE 4110 (http://catalog.missouri.edu/search/?P=IMSE%204110), IMSE 4310 (http://catalog.missouri.edu/search/?P=IMSE%204310), and IMSE 4610 (http://catalog.missouri.edu/search/?P=IMSE%204610), then they must successfully complete IMSE 4385 (http://catalog.missouri.edu/search/?P=IMSE%204385) - Lean Six Sigma Green Belt Project (a 1 credit hour course where DMAIC is used to improve a process within an organization).

**Global Supply Chain Management Certificate**

IMSE students have the opportunity to obtain an interdisciplinary undergraduate Certificate in Global Supply Chain Management (GSCM) which is jointly offered by the Department of Management and the Department of Industrial and Manufacturing Systems Engineering. Certification requires students to complete 15 credit hours with a 3.0 GPA. There are nine required credit hours (MGMT 4070, IMSE 4350 and IMSE 4910), plus six elective hours from a list of courses.

**Graduate**

- MS in Industrial Engineering (p. 585)
- PhD in Industrial Engineering (p. 586)

**Industrial & Manufacturing Systems Engineering Graduate Programs**
College of Engineering
E3437 Lafferre Hall
(573) 882-2691
http://engineering.missouri.edu/imse/

**Interim Director of Graduate Studies:** Luis G. Occeña

**About IMSE**

The graduate program in industrial engineering provides a scholarly environment in which highly qualified, creative students may obtain the knowledge and develop the skills necessary to solve complex industrial, governmental and societal system design problems. These systems are required to operate within increasingly complex constraints, thus requiring the use of sophisticated and creative designs. The industrial engineer responsible for such designs must be capable of applying a
broad spectrum of scientific tools if the most effective systems are to be obtained.

Our master of science program is designed to provide a basic understanding of these tools and experience in the application of these tools in the design process. The doctor of philosophy program is designed to provide the specialized knowledge and skills necessary to develop new tools or methods for solving complex systems design problems. Graduate students are able to obtain an interdisciplinary Global Supply Chain Management certificate as part of their academic program.

General Admission Guidelines

Acceptance for advisement in the department’s graduate programs is available to students with an ABET accredited undergraduate engineering degree. Engineering graduates who have not taken linear programming, linear algebra, statistical quality control or engineering economic analysis must complete 12 hours of additional course work before graduation.

Students with baccalaureate degrees in mathematics, physics, chemistry or computer science may be accepted if they have completed 13 hours of calculus, three hours of differential equations and six hours of calculus-based probability and statistics. Several factors are considered in evaluating an applicant’s capability, such as overall GPA, grade trends and major area grades. In addition, each applicant is required to take the general test of the GRE and international students must take the TOEFL and TWE, or IELTS.

Facilities and Resources

Laboratory facilities in several major application areas, both within the department and in the college, support the academic program. Neighboring industries, city, county and state government agencies, local hospitals and nearby large metropolitan centers provide a reservoir of research and design opportunities.

Computing and Reference Materials

The department has access to the University of Missouri System computing network and maintains its own computing facilities for student use. Besides Ellis Library facilities, an excellent collection of mathematical, statistical and engineering books and reference materials are housed in the engineering library and the industrial and manufacturing systems engineering departmental library.

Funding

Fellowships, scholarships and teaching and research assistantships are available to qualified graduate students. These forms of financial assistance are supported by funds made available through state, federal and industrial graduate support programs and through research grants from various industrial and governmental agencies.

BSIE in Industrial Engineering

Degree Program Description

The Bachelor of Science in Industrial Engineering has a core engineering curriculum during the first two years. The objective of this curriculum is to give the student a rigorous foundation in mathematics, natural sciences, basic engineering sciences, applied probability, and computer science, as well as a complementary and meaningful exposure to the humanities and social sciences.

Building on the core courses, students gain knowledge of optimization methodologies, human factors, data analytics and systems modeling. They also learn to model and evaluate integrated systems of people, technology and information in the areas of production and service system design, supply chain design and management, control systems, quality systems, sustainability, data engineering, product and process design. Students have the opportunity to obtain Lean Six Sigma Green Belt certification and/or an interdisciplinary Global Supply Chain Management (p. 807) certificate while completing the program requirements.

Major Program Requirements

Students earning a Bachelor of Science in Industrial Engineering are required to complete all University general education (http://catalog.missouri.edu/academicdegreetrequirements/ generaleducationrequirements/), University undergraduate requirements (http://catalog.missouri.edu/academicdegreetrequirements/ universityrequirements/), degree, and major requirements, including selected foundational courses, which may fulfill some University general education requirements. Over half of the course work for the degree is completed in ENGR/IMSE or professionally related courses.

### MS in Industrial Engineering

Master of Science of Industrial Engineering Online: Preparing Professionals to Face the Challenges and Take Advantage of the Opportunities of the Fourth Industrial Revolution

As we enter the Fourth Industrial Revolution, a period of time when emerging technological breakthroughs are rapidly creating new challenges as well as opportunities, we are focused on providing an up-to-date education that is relevant and useful for our students’ future work and career. Having established two national-level centers of research and education in the department, the faculty’s collective expertise provides our students with multidisciplinary skills to take advantage of the opportunities related to the design, operation and management of the next generation of smart industrial, service and healthcare systems.

The program aims to provide the students with the necessary concepts and tools — such as those in the architecture of smart industrial and service systems, analytical and simulation modeling, big data analytics and smart devices, energy and environmental management — that will put our students on a fast-track career in the new technological and business environment.

### Degree Requirements

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built

| IMSE 4970W | Capstone Design I - Writing Intensive | 1 |
| IMSE 4980W | Capstone Design II - Writing Intensive | 3 |
| **IMSE electives** | 6 |
| Choose from the following: | 6 |
| IMSE 3030 | Manufacturing and Supply Systems | 3 |
| IMSE 4001 | Topics in Industrial and Manufacturing Systems Engineering | 3 |
| IMSE 4085 | Problems in Industrial Engineering | 1-3 |
| IMSE 4220 | Optimization Modeling and Computational Methods | 3 |
| IMSE 4330 | Material Flow and Logistics System Design | 3 |
| IMSE 4360 | Supply Chain Engineering | 3 |
| IMSE 4370 | Service Systems Engineering and Management | 3 |
| IMSE 4380 | Six Sigma Methodology | 3 |
| IMSE 4420 | Web-Based Information Systems | 3 |
| IMSE 4560 | Introduction to Rapid Prototyping | 3 |
| IMSE 4570 | Computer Integrated Manufacturing Control | 3 |
| IMSE 4580 | Industrial Energy Efficiency and Management | 3 |
| IMSE 4720 | Introduction to Life Cycle Analysis | 3 |
| IMSE 4750 | Entrepreneurial Innovation Management: Enterprise Conception | 3 |
| IMSE 4810 | Cognitive Ergonomics | 3 |
| IMSE 4910 | Industrial Engineering Internship | 3 |
| IMSE 4920 | Industrial Engineering COOP | 3 |
| IMSE 4990 | Undergraduate Research in Industrial Engineering | 1-3 |
| IMSE 4995 | Undergraduate Research Industrial Engineering - Honors | 1-3 |
| **Engineering elective** | 3 |
| Choose from the following: | 3 |
| ENGINR 2100 | Circuit Theory for Engineers | 3 |
| ENGINR 2300 | Engineering Thermodynamics | 3 |
| **Technical electives** | 6 |

A technical elective is defined as any course relevant to the degree program but not required, such as Computer Science, Engineering, Mathematics, Science courses that are at a level beyond courses required in the IE curriculum, and select business (Economics, Finance, Management, Marketing) courses above 3000 and Accounting courses beyond 2000.

### Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

MS in Industrial Engineering Online: Preparing Professionals to Face the Challenges and Take Advantage of the Opportunities of the Fourth Industrial Revolution

As we enter the Fourth Industrial Revolution, a period of time when emerging technological breakthroughs are rapidly creating new challenges as well as opportunities, we are focused on providing an up-to-date education that is relevant and useful for our students’ future work and career. Having established two national-level centers of research and education in the department, the faculty’s collective expertise provides our students with multidisciplinary skills to take advantage of the opportunities related to the design, operation and management of the next generation of smart industrial, service and healthcare systems.

The program aims to provide the students with the necessary concepts and tools — such as those in the architecture of smart industrial and service systems, analytical and simulation modeling, big data analytics and smart devices, energy and environmental management — that will put our students on a fast-track career in the new technological and business environment.

### Degree Requirements

The Master of Science in Industrial Engineering (MS) degree consists of two options: a 30-credit hour research oriented program requiring a thesis or a 30-credit hour application oriented program requiring a project report. The MS Industrial Engineering thesis option curriculum is built
upon the choice of a concentration area around which students can mold their overall academic effort including six hours of research. The current focus areas are Data Analytics and Operations Research, Manufacturing and Production Systems, Sustainable Systems Engineering, Service and Supply Chain Systems, and Healthcare and Human-centered Systems. The MS Industrial Engineering project option requires three hours of an approved project advised by a faculty member in lieu of a thesis, and one more course.

### Required Courses (12 credit hours)

- **IMSE 8030**: Advanced Manufacturing and Supply Systems
- **IMSE 8110**: Design and Analysis of Engineering Experiments
- **IMSE 8410**: Advanced Computational Systems and Data Engineering
- **IMSE 8085**: Problems in Industrial and Manufacturing Systems Engineering

### Electives (18 credit hours)

- **IMSE 7220**: Optimization Modeling and Computational Methods
- **IMSE 7350**: Production and Operations Analysis
- **IMSE 7370**: Service Systems Engineering and Management
- **IMSE 7580**: Industrial Energy Efficiency and Management
- **IMSE 8310**: Advanced Integrated Production Systems
- **IMSE 8370**: Supply Chain Modeling and Analysis
- **IMSE 8850**: Health Care Systems Design and Analysis

### Required Application Materials

**To the Graduate School:**
- All required Graduate School documents

**To the IMSE Graduate Program:**
- 3 letters of recommendation
- Statement of Purpose
- Curriculum Vitae (CV)
- GRE scores (Note: GRE is waived for applicants who have graduated from an ABET-accredited institution.)

### PhD in Industrial Engineering

#### About the Doctoral Degree

Programs are individually tailored to meet students' objectives and to culminate in an original research dissertation. The PhD builds upon the graduate MS and fundamental BS programmatic areas. The current focus areas are Data Analytics and Operations Research, Manufacturing and Production Systems, Sustainable Systems Engineering, Service and Supply Chain Systems, and Healthcare and Human-centered Systems. Fundamental IE knowledge in each is expected. The basic goals of the PhD program are to provide students with a solid understanding of the theoretical bases for the latest tools and techniques of systems analysis and design, an extensive experience in applying these analyses and design tools and techniques, and research experience in the development of new tools or applications of existing techniques to design or analyze problems.

#### Degree Requirements

The PhD program is a 72 credit hour program beyond the bachelor's degree. Only 12 hours of research will count towards the 72 hours. A minimum of 24 hours of 8000-level work at MU, other than research hours, independent study hours, and problems hours is required. Students must earn a B+ or above for all core courses.

Transfer credits (up to a maximum of 30) may be accepted and will be determined by the student's doctoral committee. Once the committee has approved of the courses to be transferred, the Graduate School must make the final review of the transfer request to determine if the credit meets the minimum guidelines.

### Admissions

For more information regarding the program and application, please see: https://online.missouri.edu/degreeprograms/engineering/industrial/masters/

You can also contact the Program Director, Dr. Bin Wu, directly at: wubi@missouri.edu

### Application Deadlines

Applications accepted throughout the year.

- Fall application deadline: March 1 (Priority deadline: January 1)
- Spring application deadline: September 15

Minimum Admission Criteria

- Minimum GPA: 3.0/4.0
- Test of Written English (TWE) of 4.0 (international applicants only)
- Minimum Academic IELTS OVERALL score: 6.0; or Minimum TOEFL scores:
  - Internet-based test (iBT): 80
  - Paper-based test (PBT): 550
- Minimum GRE scores:
  - Verbal: 350
  - Quantitative: 700
  - Prior to August 1, 2011: 350, 700
  - On or After August 1, 2011: 143, 155
- Foreign Language: No foreign language is required in either program.
Graduation Requirements
The granting of a PhD requires completion of five major requirements:
1. A qualifying examination (D1 form).
2. A course of study (Study Plan, D2 form).
3. Comprehensive examination, and
4. Acceptance of dissertation proposal (D3 form)
5. Final defense and submission of completed dissertation (D4 form).

Admission to Candidacy
Admission to candidacy for the PhD degree requires three steps:
1. Passing the qualifying examination,
2. Selecting and advisory committee, and
3. Filing the Qualifying Examination Results and Doctoral Committee Approval Form (D-1).

All three steps must be completed by the end of the second semester of enrollment.

Qualifying Process
Qualifying exam requirements:
A doctoral student must take and pass the Ph.D. qualifying examination in order to be a Ph.D. candidate in the department. The qualifying exam will offered twice a year, in fall and spring semesters.

The qualifying exam can be taken only after completing IMSE 8110 and the other four IMSE 8000 level courses. The format is as follows:

In-class written exam: Doctoral faculty members from the IMSE department will develop the in-class exam. The written exam will focus on both methodology knowledge and its application. It will be an open-book, open-notes exam. In total, there will be five questions and the student can choose to answer three out of the five questions. Students will take the exam in-class and each faculty member will grade the student’s answers. One of the following outcomes will be the result of this evaluation for each student:
1) If the student passes all three questions, they pass the test and can further work toward their research. 2) If the student passes two out of three questions, they conditionally pass and the student's doctoral committee will decide on what is to be done next. 3) If the student passes one or none of the questions, then they fail the written exam and the faculty will provide feedback on the student’s performance. If the student fails the exam for a second time, then they must leave the program.

A student cannot take the qualifying exam unless an advisor has been identified. However, there is no need to re-take qualifying exam if the student’s advisor is changed.

A student can take a maximum of two attempts to pass the qualifying exam.

Doctoral Committee
The Doctoral Committee is composed of a minimum of four members of the MU graduate faculty and will include at least three members from the student’s doctoral degree program and an outside member from a different MU program. At least two of the doctoral committee members, including the student’s adviser, must be MU doctoral faculty. Additional committee members with specialized expertise who do not meet the criteria for the MU graduate faculty or doctoral faculty may serve on a doctoral committee as a fifth or sixth member, with special permission of the Dean of the Graduate School.

Program of Study
After successfully completing the Qualifying Process, the doctoral candidate, in conjunction with their advisor and the Director of Graduate Studies, will design a program of study that meets the needs of their emphasis area and the requirements of the Graduate School. The student’s doctoral committee must approve this program of study. The total program of study must constitute a definite educational plan for research and scholarly investigation in their emphasis area. The Plan of Study for the Doctoral Degree (D-2) form should be submitted to the Graduate School by the end of the third semester. The purpose of this form is to plan the program of study that the student will follow and certify that all committee members approve the program, including the recommended hours of transfer credit. MU requires a minimum of seventy-two semester hours beyond the baccalaureate degree for the PhD. No more than twelve research hours may be included in this seventy-two hour requirement. At least 24 credit hours must be 8000-level regular courses (non-research or non-problems credits) from MU.

Comprehensive Examination
In the Department of Industrial and Manufacturing Systems Engineering the doctoral comprehensive exam is held in conjunction with the student’s dissertation proposal defense. This defense is of the proposed research that will be completed by the candidate in order to prepare their dissertation and constitutes the written part of the test. During the oral defense of the proposal, the faculty will also conduct the oral part of the comprehensive examination. Students must provide the committee members with a copy of their research proposal two weeks prior to the proposal defense.

For the comprehensive examination to be successfully completed, the doctoral program committee must vote to pass the student on the entire examination, both written and oral sections, with no more than one dissenting or abstaining vote. The Doctoral Comprehensive Examination Results (D-3) form, carrying the signatures of all members of the committee, must be sent to the Graduate School not less than two weeks after the comprehensive examination is conducted. If failure is reported, the committee recommends remedial measures.

The student who fails may not take a second comprehensive examination for at least twelve weeks. Failure to pass two comprehensive examinations automatically prevents candidacy.

After successful completion of the comprehensive exam, doctoral candidates need only enroll in the minimum research hours necessary to meet the current continuous enrollment requirements; they will be still considered as full-time for reporting purposes.

Final Examination
During the process of developing and completing the research work, the student must submit at least two articles, to advisor-approved refereed journals. This requirement must be met prior to soliciting the Final Exam/Dissertation Defense. The submission of the student’s journal article must be reported to the director of graduate studies and must include a copy of the paper and a letter from the journal confirming the review process. In
addition, copies of the paper should be submitted to the members of the
doctoral committee.

After the PhD dissertation is completed, the candidate should submit a
copy to each member of the Committee.

All students completing graduate degrees will be required to submit final
dissertations to the Graduate School in the required electronic format.
Hard copy dissertations will no longer be accepted. Please consult The
Graduate School’s Electronic Theses and Dissertation Guidelines.

At this time, the candidate is eligible to take the Final Examination. The
PhD candidate is responsible for arranging the time and place of the Final
Examination. An announcement must be sent to each member of the
department faculty and publicly posted at least two weeks prior to the
examination. Committee members should also be provided with a copy of
the dissertation at this time.

Also, the candidate must make arrangements to present his/her
dissertation at a departmental seminar, either in the IMSE 8087 seminar
or a special seminar, during the month prior to the formal defense of
the dissertation. It is the policy of the Department of Industrial and
Manufacturing Systems Engineering to require the Final Examination be
an oral defense of the work included in the dissertation and open to all
members of the University graduate faculty.

The candidate must be enrolled at the time of this examination and the
examination cannot be taken when MU is not officially in session. It is
recommended that the Report of the Dissertation Defense (D-4) form be
taken to the defense, along with the dissertation approval page so that
committee members can sign both forms for students who successfully
defend their dissertation. The purpose of this form is to record the official
results of the dissertation defense.

Admissions

Admission Contact Information

Luis G. Occeña, Interim Director of Graduate Studies
E3437 Thomas and Nell Lafferre Hall
Columbia, MO 65211
(573) 882-2691

Application Deadlines

Applications accepted throughout the year.
Fall application deadlines: March 1 (Priority deadline: January 1)
Spring application deadline: September 15

Minimum Criteria to be Considered for Admission

• Minimum GPA: 3.5/4.0
• Demonstrated research experience
• Compatible research interests or capabilities with a member of the
campany
• Minimum OVERALL IELTS scores: 6.5; or Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

• Minimum GRE scores

When did you take the GRE? | Verbal | Quantitative |
--------------------------|--------|--------------|
Prior to August 1, 2011    | 350    | 700          |
On or After August 1, 2011 | 143    | 155          |

Note: Only highly qualified students are accepted for advisement in
the PhD program. The faculty looks for excellence in undergraduate
and graduate work, high GRE scores, research experience, and strong
indications of research potential.

Admission Cycle

This department does not use “rolling admission.” Applicants will be
notified within a month after the application deadline.

Required Application Materials

To the Graduate School (https://applygrad.missouri.edu/apply/):

• All required Graduate School documents

To the IMSE Graduate Program:

• 3 letters of recommendation
• Writing sample demonstrating research experience
• Statement of Purpose
• Curriculum Vitae (CV)
• GRE scores

TA/RA Hiring

This academic department does not have any function of financial
Aid. Rather, IMSE hires TA/RA automatically based on the department
needs. No separate application or contacts are necessary; all top ranked
applicants will be considered.

Information Technology

Dong Xu, Director
College of Engineering
201 Naka Building
(573) 882-2299
https://engineering.missouri.edu/academics/it/

Welcome to the Information Technology (IT) Program at Mizzou!
Established in 2005, the IT program is home to more than 300 students
studying a spectrum of traditional and cutting-edge industry topics.
The program has two emphasis areas: (1) Software Engineering and
Computer Management (mobile application development, computer
programming, web development, networks and database management,
system administration, cyber-security, and project management). (2)
Media Technology and Post Production (media design, color engineering,
digital production systems, digital effects and animation, virtual reality and
game design).

The IT graduates have a great outlook in the job market. According to
the Bureau of Labor Statistic list of Computer Information Technology
Occupations, the median salaries in 2017 are $103,560 for Software
Developers, $95,510 for Information Security Analyst, $88,270 for
Computer Systems Analysts, $81,100 for Network and Computer
Systems Administrators, $70,530 for Multimedia Artists and Animators,
$67,990 for Web Developers, and $58,810 for Film and Video Post-
Production specialists. Designed for the increasingly digital world, our IT
program prepares students to pursue a variety of IT-related careers in
programming, software engineering, database and system administration,
video and audio post-production, digital effects and virtual reality, web developers, IT implementation specialists, and business analysts, both in the public and private sector. Equipped with marketable skills, most graduates in our IT program achieved roles in companies with high-pay jobs, some of whom had six-figure starting salaries. Additionally, the program provides well-trained IT workforce for Missouri and beyond.

The IT program offers rich curricula and student learning experience. In order to both offer traditional Information Technology competencies as well as emerging technologies and techniques, our courses are evaluated and created by the faculty in response to the evolving trends of the industry. These frequent updates allow our program to reflect the state of art developments each year. Our program offers some course sequences that are established in media technology, software programming, and security, etc. Some courses targeting cutting-edge technologies, such as cloud computing, virtual reality, and mobile App development are also offered. Many courses are offered online and in the summer. The teaching style of the IT program is highly hands-on, using experiential learning and challenge-based learning. The IT program also has a study-abroad program, with activities in both the summer and winter breaks. Our program offers both in-seat and online options, catering to the student's need and availability. The BSIT is offered entirely online for those seeking a distanced education.

The IT program is suitable to students with a wide range of background, including those students seeking to transfer from other degree programs, or community colleges. The IT Program also offers flexibility in career design, as we require fewer core course requirements than other programs, allowing the student to pick and choose a personalized selection of courses to tailor their career goals and areas of interest. In addition, the program offers a spectrum of collaborations, including a fast-track IT-MBA program with the Business School and a co-sponsored annual Reynolds Journalism Institute student competition, as well as numerous academic and social events by student organizations. Abundantly available and encouraged, students may seek research opportunities with faculty, and participate in internships for credit towards the program. Finally, the IT Program offers a number of both internal and external certificates, in software engineering, cyber-security, and media technology.

The IT program has distinguished faculty, who are highly trained and experts in their teaching areas, achieving various awards throughout their careers. The program has a number of IT-specific labs and classrooms, including Media and Software Development Lab and Classroom, Software Engineering Classroom, Networks and Security Lab, Virtual Reality Lab, VR and AR Capture Facility, and Audio Engineering Lab and Studio. The program provides the very best experience for the future IT Professional, preparing them for the ever-changing technology-fueled world and industry.

**Faculty**

**Assistant Professor of Practice:** R. Bazan, C. Gubera, B. Maurer, N. Wergeles

**Associate Teaching Professor:** D. Musser*

**Assistant Teaching Professor:** F. Wang

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

**Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.**

**Undergraduate**

- BS in Information Technology (p. 589)
- Minor in Information Technology (p. 591)

**Advising Contact**

**Scholarship Information Contact**

Heather Ralph
(573) 882-4765
ralphhm@missouri.edu

This degree program is offered by the College of Engineering. Career opportunities include database administration, web design, cyber security, game development, film production, and more.

**Graduate**

While the College of Engineering does not offer a graduate degree specifically in Information Technology, it does offer a number of graduate degrees in closely related areas such as Computer Science (p. 565), and Computer Engineering (p. 560). There is a Master of Engineering degree through the department. The University also offers a number of information technology degrees in its other Colleges, and through interdisciplinary programs such as Health Informatics (p. 779), Health Administration (p. 776), Informatics (p. 785), or Information Science and Learning Technology (p. 464).

A joint degree program administered through the School of Engineering and the Crosby MBA Program is available for students who wish to earn a Bachelor of Science in Information Technology (BS IT) and a Master of Business Administration (MBA) (p. 388). Individuals interested in pursuing engineering and business will find that this program provides them with a valuable set of skills to excel in this rapidly growing field. If earned separately, the BS IT degree would take four years and the MBA degree would take two years. The dual degrees may be completed in five years assuming normal progress toward each degree.

Or you may browse a complete list of degree options (p. 20) at the University of Missouri.

**BS in Information Technology**

**Degree Program Description**

Information Technology (IT) students engage and collaborate with other disciplines to create software applications, design and manage technology-based infrastructures, manage database systems, develop web applications, build networks, implement cyber security, and use technology to solve a wide range of complex problems. This traditional IT core competencies are supplemented by a range of technical electives in a range of topics including virtual environments, augmented reality, digital media systems and post production processes, and 2D/3D animation. The program finishes with a one-semester highly collaborative capstone course, in which students complete design projects that serve as a culminating academic experience. As it is a growing international field,
the IT Program proudly offers as often as possible international study abroad courses. Internships with companies for real-world experience and undergraduate research opportunities with faculty are abundant and encouraged. The MU Engineering Leadership, Engagement and Career Development Academy, W1025 Lafferre Hall, can assist students in searching for employment opportunities and for internship/co-op positions. Students are prepared to pursue a variety of IT related careers in today's evolving markets of programmer analyst, software engineer, web developers, database administration, digital media post production specialists, VR/AR environment designers, all within both public and private sectors. Our program is designed to cater to your interests, as well as the ever-changing high-demand industry our students enter upon graduation.

**Major Program Requirements**

To receive the Bachelor of Science Degree in Information Technology, the candidate must successfully complete 126 semester hours of credit including the following distribution: 30 hours of INFOTC core courses, 24 hours of INFOTC technical electives or equivalent Computer Science (CMP_SC) courses, 12 hours of related math and business courses, 10 hours of science, 15-22 hours of courses in a possible minor and any remaining hours for elective courses. General education courses include ENGLSH 1000, 9 hours of Social/Behavioral Sciences and 9 hours of Humanities/Fine Arts, with at least one course from Social/Behavioral/ Humanities at the 2000 level or higher.

Information Technology students must earn a C-range grade or better in all INFOTC/CMP_SC courses that are prerequisites for other INFOTC/CMP_SC courses that the student takes. To graduate, a student must earn a cumulative UM grade point average of 2.0 or better and a 2.0 grade point average or better in all INFOTC/CMP_SC courses.

In addition to the major core requirements, students must complete all University graduation requirements (p. 35) including University general education (p. 36), as well as all degree and college or school requirements. See course descriptions for prerequisites.

Minor or Science Concentration
Ten hours in biological or physical science are required including one laboratory science. If student completes a minor by pursuing the formal course requirements for minors in a department outside Electrical Engineering & Computer Science, only 9 credit hours of science with one lab are required.

Semester Plan
Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available. Summer courses are available, as well as internship credit. These courses may help to reduce the two 18-credit semesters. 12 hours is the minimum amount of hours that can be enrolled in to qualify for full time.

Total Credits: 126

Minor in Information Technology
A minor in Information Technology is offered through the College of Engineering. To obtain a minor, a student must complete the following requirements. The student must earn a 2.0 GPA in all courses that count towards the minor. No substitutions or courses taken outside the University of Missouri may be applied. After the necessary courses have been completed, please contact the IT Program's adviser to submit a request to minor in Information Technology.

Requirements
• 15 hours of INFOTC courses are required
• At least 9 hours must be taken at the 3000 level
• One sequence of courses must be completed with a minimum of 2000 level or higher
  • INFOTC 1040 and INFOTC 2830 and INFOTC 4830
  • INFOTC 1610 and INFOTC 2610 and INFOTC 3610 OR INFOTC 4610
  • INFOTC 1040 and INFOTC 2910 and INFOTC 3910 OR INFOTC 4910
  • INFOTC 1610 and INFOTC 3640 and INFOTC 4640
  • INFOTC 1040 and INFOTC 4405 and INFOTC 4425
  • or similar

In some cases, other department core courses can qualify for prerequisites in our program. Please be sure to consult with the Director of Undergraduate Studies as well as the Advisor of Information Technology prior to beginning this process to ensure that the track you have chosen will qualify for the minor.

Mechanical and Aerospace Engineering
Noah D. Manring, Chair and Glen A. Barton Professor
College of Engineering
E2412 Lafferre Hall
(573) 882-0693
ManringN@missouri.edu

The Department of Mechanical and Aerospace Engineering is an academic department within the College of Engineering at the University of Missouri. Established in 1891, this ABET accredited program is home to many undergraduate and graduate students and faculty.

Faculty
See web site for faculty listing: https://engineering.missouri.edu/academics/mae/mae-faculty/
• Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BSME in Mechanical Engineering (p. 594)

Additional minors and certificates (p. 597) are offered through the College of Engineering, including the Aerospace Engineering Minor and the Energy Engineering Minor.

**Advising Contact**

Justin Rich  
573-884-6961  
RichJ@missouri.edu

**Scholarship Contact**

Craig Kluever, Undergraduate Director  
KlueverC@missouri.edu

The Department of Mechanical and Aerospace Engineering prepares students for productive careers in mechanical engineering related disciplines. The program focuses on instruction in the thermal and mechanical systems areas as defined by the Accreditation Board for Engineering and Technology (ABET). To support that mission, the Department has been divided into the focus areas of Design and Manufacturing, Dynamics and Control, Materials, and Thermal-Fluid Sciences. (NOTE: Focus areas are not listed on transcripts or diplomas.)

The department endeavors to present an experimental program through laboratory experiences. Students take three lab courses that focus on instrumentation and measurements, materials and manufacturing, and thermal-fluid systems.

The MU Mechanical Engineering program offers a Bachelor of Science in Mechanical Engineering (BSME) and prepares students for practice of the profession in industry or government or for further study toward other degrees such as the JD, MD, MS, and PhD.

**Mission Statement**

The mission of the Mechanical and Aerospace Engineering Department is to:

Prepare our students for successful careers in the mechanical engineering profession, conduct high-quality and innovative research, and serve the community and industry providing educational and research resources.

**Program Educational Objectives**

The educational objectives of the undergraduate program in Mechanical Engineering are to produce graduates who (within a few years of graduation):

1. successfully practice the mechanical engineering disciplines;  
2. contribute to society and the engineering profession;  
3. engage in life-long learning to advance professionally through continuing education and training;  
4. succeed in graduate studies in mechanical engineering or a related field if pursued.

**ABET Definition for Program Educational Objectives:** Program Education Objectives are broad statements that describe what graduates are expected to attain within a few years of graduation. Program Educational Objectives are based on the needs of the program's constituencies.

**Program Outcomes**

Students from the Mechanical Engineering program will attain (by the time of graduation):

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics  
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors  
3. an ability to communicate effectively with a range of audiences  
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts  
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives  
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions  
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

**Double Majors and Dual Degrees**

Dual majors and dual degrees are possible at the undergraduate level. These could lead to degrees in the College of Engineering and the College of Arts and Sciences or the College of Agriculture. Dual enrollments could also lead to two engineering majors within the College of Engineering. Any of these dual enrollments would add to the traditional 126-credit undergraduate degree program. Consult with the directors of undergraduate studies of the departments involved for further information.

**MAE Honors Program**

The MAE Honors Program follows the general rules, regulations and philosophy of the College of Engineering Honors Program, and as such is intended to encourage, facilitate and reward independent study by high-ability undergraduate students.

The heart of the program is an undergraduate honors project, undertaken and completed by the time of graduation while enrolling in 1 to 6 credits of MAE 4995 Undergraduate Honors Research Mechanical & Aerospace Engineering. The academic credit for the honors project (1-6 credits in MAE 4995 replaces an equivalent number of credits of technical or MAE elective. The project is conducted under the direction of an MAE professor (honors advisor) who is selected by the student, with agreement by the professor. The project culminates in an honors thesis, which is read and approved by the honors advisor and then approved by the chair of the MAE honors committee. A finished copy of the honors thesis, signed by the honors advisor and second reader, is required for satisfactory completion of the project.

**Academic Qualifications for the Honors Program**
Honors students must maintain and graduate with an overall GPA of 3.0 or higher. In the case of a transfer student, the overall GPA computed from the transferred credit plus MU credit must be 3.0 or higher. A student is typically eligible for the honors program at the junior year of their undergraduate program.

The successful honors scholar is given a degree of flexibility in the program of study. Additionally, honors scholars may reduce the credits required for degree completion to the University minimum (i.e., 120 credits) by substituting graduate course credits through dual enrollment (undergraduate/graduate at MU) during the last two semesters of the undergraduate program.

### Graduate

- MS in Mechanical and Aerospace Engineering (p. 595)
- PhD in Mechanical and Aerospace Engineering (p. 596)

College of Engineering
E2413 Lafferre Hall
https://engineering.missouri.edu/academics/mae/

**Director of Graduate Studies:** Matthew Maschmann

### About Mechanical & Aerospace Engineering

Like markets merging together to create a global economy, this decade has approached the exciting frontier of joint research. The marriage of Mechanical Engineering to related fields has contributed to a new “Interdisciplinary Era”. In meeting the challenges brought on by this co-operative approach to engineering, the Department of Mechanical & Aerospace Engineering (MAE) at the University of Missouri has broadened its scope in both education and research while maintaining strengths in the fundamental disciplines: Dynamics & Control, Design & Manufacturing, Materials & Solids and Thermal & Fluid Science Engineering. Such well-established academic traditions in the undergraduate and graduate curriculum as well as nationally renowned research programs are the basis for MAE having become the largest department in the College of Engineering at MU. An equally important aspect contributing to the quality of the MAE department is the aggressive pursuit of funding, by our faculty, to establish nationally recognized research programs. Well-earned support through sizable funding from both federal agencies and industry are valuable resources in the promotion of our graduate research and undergraduate teaching.

### Career Opportunities

Graduate programs are planned to prepare students for advanced professional engineering careers. In recognition of the broad nature of the field of mechanical and aerospace engineering, considerable latitude in programs is encouraged so students may prepare for employment in industry, education and government. The usual purpose of a PhD program is to prepare a person for a career in research or teaching. The program is oriented toward research culminating in a dissertation suitable for publication.

### Areas of Study

A student may pursue an area of concentration selected from AI/expert systems, automation, bioengineering, combustion, control, creep and plasticity, design optimization, numerical methods, computational fluid dynamics, fracture mechanics, heat transfer, interactive computer graphics, laser diagnostics, manufacturing systems, materials science, mechanical syntheses, mechatronics, mechanics, parallel computation, residual stress, robotics, thermal systems design and management and ultrasonic nondestructive evaluation.

### Licensure

Information on degree requirements for engineering licensure is detailed under Professional Engineering Registration.

### Facilities and Equipment

The department has several specialized laboratories in aerosol mechanics, combustion, computer control, creep and fracture mechanics, fluid mechanics and heat transfer, manufacturing, materials science and structural dynamics.

Besides the modern instrumentation and equipment normally found in well-equipped mechanical and aerospace engineering laboratories, the department has, or has access to, such specialty items as MTS and Instron material and structural test equipment, wind tunnels, X-ray and a scanning electron microscope facility, computer control systems, a scanning laser vibrometer, a microscale heat transfer and electronic coding laboratory, an experimental stress laboratory, a fluid power laboratory and the university research reactor.

### Information Technology and Computing

A combination of the campus Division of Information Technology and the Engineering Technical Services (ETS) provided advanced engineering computation for College of Engineering faculty and students. CAD/CAM and graphics are the primary emphasis, although artificial intelligence, multiple high-level programming languages and computational and simulation libraries also are available.

The College of Engineering operates one high performance enterprise server, two super minicomputers and 17 HP workstations. The ETS also provides hardware/software support, locally, to nine College of Engineering departments and their affiliated research centers. These units are networked via Ethernet to the superminicomputers operated by the College of Engineering.

The Division of IT operates two remote terminal sites in the Engineering Buildings East. The University also supports an extensive computer system consisting of IBM mainframe computers, remote terminal sites, and PC and Macintosh labs throughout the campus.

### Financial Aid from the Program

Admission decisions to the graduate program are made without considerations of a student’s financial need. Once admitted, a student may be considered for fellowships, research assistantships (RAs) and teaching assistantships (TAs). Awarding of fellowships is initiated by the department. RAs are awarded by individual faculty members. A student may apply by contacting faculty members directly. Application forms for TAs are available in the department office. International students are not eligible for TAs in their first semester of study. For specific departmental requirements, please refer to the MAE Graduate Handbook. Please see the department website for information on how to contact the professors individually about research assistantships offered.
BSME in Mechanical Engineering

Degree Program Description

The mechanical engineering curriculum provides students a foundation in mathematics, the basic sciences, and engineering. Students take core courses in the mechanical sciences (dynamics, engineering materials, manufacturing, dynamic systems and control, and machine element design) and the thermal-fluid sciences (thermodynamics, fluid mechanics, and heat transfer). In addition, students obtain laboratory experience through three lab courses focused on instrumentation and measurements, materials and manufacturing, and thermal-fluid systems.

The Bachelor of Science in Mechanical Engineering (BSME) prepares students for employment in industry or government or for further study toward other degrees such as the JD, MD, MS, and PhD.

Major Program Requirements

The MAE curriculum allows students to transfer among departments during the first two years. Students concentrate on departmental requirements at the beginning of the junior year. The senior year includes five MAE electives that allow students to develop individual programs of study. This flexibility enables students to complete a traditional program or create their own with special emphasis on areas such as materials, manufacturing, thermal-fluid systems, dynamics and control, or aerospace.

Experience in design is distributed throughout the required courses in the curriculum and culminates in the senior capstone design course. The capstone design experience integrates earlier technical work with economic, safety, ethical, and environmental considerations. The projects are primarily obtained from industrial or private business clients. The presentations of project results are made to a review panel consisting of members of the faculty, the MAE Industrial Advisory Council, and representatives of the client firms.

Major Core Requirements

In addition to the University general education (p. 36) and graduation requirements (p. 35), the Department of Mechanical and Aerospace Engineering requires the following courses:

MS in Mechanical and Aerospace Engineering

Degree Requirements

The master's requires a minimum of 30 hours beyond the bachelor's degree, with a minimum of 18 hours at the 8000 level. Included within the 30 hours must be a special project report or thesis. A special project consists of three to five hours of MAE problems.

Alternatively, programs directed toward a thesis shall include three to eight hours of MAE 8990 (Research). A thesis or a report is approved by designated faculty committees and is deposited in the department libraries.

Passing the MS final committee fulfills the degree requirements.

Core Course Requirements

Students must take two core courses from one of the four core subject areas listed below. A thesis committee may approve, by majority vote, that the core course requirement be waived for a M.S student's plan of study.

Students in Dynamics and Control area must take at least two from the following:

- MAE 7660 Vibration Analysis 3
- MAE 8001 Advanced Topics in Mechanical and Aerospace Engineering (Optimal Control) 3
- MAE 8280 Finite Element Methods 3
- MAE 8620 Advanced Dynamics 3
- MAE 8750 Nonlinear Control 3
- MAE 8320 Continuum Mechanics 3

Students in Thermal/Fluids area must take at least two from the following:

- MAE 7310 Intermediate Heat Transfer 3
- MAE 7320 Design of Thermal Systems 3
- MAE 7420 Intermediate Fluid Mechanics 3
- MAE 8300 Microscale Heat Transfer 3
- MAE 8311 Heat Transfer-Convection 3
- MAE 8420 Computational Heat Transfer and Fluid Dynamics 3
- MAE 8430 Introduction to Two Phase Flow 3
- MAE 7380 Intermediate Thermodynamics 3

Students in Design and Manufacturing area must take at least two from the following:

- MAE 7290 Welding Engineering 3
- MAE 7930 Applied Mechanical Optimization 3
- MAE 8510 Manufacturing Design 3
- MAE 8910 Modular Machine Tool Design 3
- MAE 8930 Advanced Mechanical System Modeling and Optimization 3

Students in Mechanics and Materials area must take at least two from the following:

- MAE 8330 Theory of Elasticity 3
- MAE 8320 Continuum Mechanics 3
- MAE 8240 Mechanical Behavior of Materials 3
- MAE 8001 Advanced Topics in Mechanical and Aerospace Engineering (Materials Characterization) 3
- MAE 8001 Advanced Topics in Mechanical and Aerospace Engineering (Wave Propagation) 3

Plan of Study

A plan of study is developed by the student and the advisor, subject to approval.

Thesis/Special Project Requirements

Special Project

If the report option is chosen, a report must be prepared and submitted to the MAE Department. Reports follow the same manuscript guidelines as a thesis.

- Minimum 9 hrs of 8000 level MAE courses
- Maximum of 15 hrs 7000 level courses
- Maximum of 15 hrs 8000 level courses (excluding 1 hr seminar)
- 3-5 hrs of MAE problems
- 1 hr seminar

Thesis

If the thesis option is chosen, a master's thesis must be prepared and submitted to the Graduate School as a PDF with required supplemental materials (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/checklist-ch2.php). The students will be sent ‘Guidelines for Preparing Theses and Dissertations (http://gradschool.missouri.edu/policies/thesis-dissertation/guidelines/)’ from the Graduate School as soon as their Program of Study Form is submitted. See also: Thesis Process for Master's Students. (http://gradschool.missouri.edu/academics/thesis-dissertation/process/)

- Minimum 9 hrs of 8000 MAE courses
- Maximum of 12 hrs 7000 level courses
- Maximum of 12 hrs 8000 level courses (excluding 1 hr seminar)
- 3 hrs 7000 or 8000 math (except Mathematics History)
- Maximum of 8 hrs research
- 1 hr seminar

Admissions

Admission Contact Information

muengrgraduatesup1@missouri.edu

Application Deadline for all applicants

- Fall deadline: May 31 (priority deadline Jan. 1)
- Spring deadline: October 31 (priority deadline Oct 1)
- Summer deadline: April 30

Admission Criteria

- BS in same or closely related field
- Minimum GPA: 3.0 during last 2 years
• Minimum GRE Score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 80
• Minimum academic IELTS overall score: 6.5
• Resume

Note: Lower GPAs require special action and substantiation, such as good test scores on the GRE or other recognized examinations.

How to apply to the MAE master’s program:
Step 1: All documents should be uploaded directly at https://applygrad.missouri.edu/apply (https://applygrad.missouri.edu/apply/).
Step 2: Required documents:
• Unofficial Transcripts (all Universities and Colleges attended) Uploaded in S (http://gradstudies.missouri.edu/admissions/apply/late
• TOEFL/IELTS score - sent electronically to the University by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation - uploaded in Slate by the recommenders. Letters must come from a school e-mail address, not personal accounts (like yahoo, gmail, etc).
• GRE score - sent electronically by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted (uploaded in Slate)
• CV/Résumé (Uploaded in Slate)

Contact: Mechanical & Aerospace Engineering, Graduate Admissions muenggrgraduatesup1@missouri.edu

PhD in Mechanical and Aerospace Engineering

Degree Requirements
A minimum of 72 semester hours are required including the credit hours taken during the MS program. Students who received the MS degree from other than MU may transfer a maximum of 30 hours from their MS degree hours. The 72 hours must include at least 18 hours of coursework at the 8000 level excluding problems and research hours. All research credits on the Plan of Study form must be designated as MAE 9990 – Research.

Plan of Study
The PhD candidate plans a plan of study and research under the immediate supervision of an advisor and in close cooperation with the doctoral program committee approved by the dean of the Graduate School upon the department’s recommendation.

Qualifying Examination
A qualifying examination is given twice each year. Successful completion of this examination is a prerequisite to formal acceptance into the PhD program. Students are allowed two attempts to pass the exam. The first attempt must be made within the student's first year of enrollment. The second attempt, if needed, must be made at the at the next scheduled exam date following the first attempt.

Comprehensive Examination & Dissertation
A comprehensive examination is given after all course work requirements have been satisfied. Upon completion of the plan of study and research a final examination, essentially a defense of the dissertation, is administered.

Admissions
Admission Contact Information
muenggrgraduatesup1@missouri.edu

Application Deadlines for all Applicants
Fall deadline: May 31 (priority deadline Jan 1)
Spring deadline: October 31 (priority deadline Oct 1)
Summer deadline: April 30

Admission Criteria
• Minimum GPA: 3.0
• Minimum GRE score: 298 combined score on Verbal and Quantitative sections
• Minimum TOEFL score: 80
• Minimum Academic IELTS Overall score: 6.5

Note: Doctoral degree program applicants are closely and individually reviewed.

How to apply to the MAE doctoral program:
Step 1: All documents should be uploaded directly in Slate: https://gradstudies.missouri.edu/admissions/apply/
Step 2: Required documents:
• Unofficial Transcripts (all Universities and Colleges attended) Uploaded in S (https://app.applyyourself.com/AYApplicantLogin/fl_ApplicantConnectLogin.asp?id=umc-grad)late
• TOEFL/IELTS score - sent electronically to the University by ETS (Institution Code 6875 Department Code 1502)
• 3 letters of recommendation (preferably from MS advisor and 2 other letters) - uploaded in Slate by the recommenders. Letters must come from a school e-mail address, not personal accounts (like yahoo, gmail, etc).
• GRE score - sent electronically by ETS (Institution Code 6875 Department Code 1502)
• Statement of Objectives - one page letter telling about yourself and the area you will study if accepted
• CV/Résumé

Additional Minors and Certificates - Engineering

Undergraduate Certificates
- Certificate in Biomaterials Engineering (p. 597)
- Certificate in Cyber Security (p. 597)
- Certificate in Neural Engineering-Signals (p. 598)
- Certificate in Neural Engineering-Systems (p. 598)

Industrial and Manufacturing Systems Engineering offers an interdisciplinary Undergraduate Certificate in Global Supply Chain Management (p. 807) with the College of Business.

Undergraduate Minors
- Minor in Aerospace Engineering (p. 598)
- Minor in Computational Neuroscience (p. 599)
- Minor in Construction Management (p. 599)
- Minor in Energy Engineering (p. 600)
- Minor in Engineering Sustainability (p. 600)
- Minor in Medical/Health Physics (p. 601)
- Minor in Naval Science (p. 601)
- Minor in Nuclear Engineering (p. 601)
- Minor in Radioenvironmental Sciences (p. 601)

Graduate Certificates
- Certificate in Aerospace Engineering (p. 602)
- Certificate in AI and Machine Learning (p. 602)
- Certificate in Construction Management (p. 603)
- Certificate in Sustainable Energy and Policy (p. 603)

Industrial and Manufacturing Systems Engineering offers an interdisciplinary Graduate Certificate in Global Supply Chain Management (p. 810) with the College of Business.

Certificate in Biomaterials Engineering

The Certificate in Biomaterials Engineering will prepare engineering students to work in biomaterials related jobs and disciplines. Students will be provided the opportunity to pursue educational objectives beyond those normally associated with their academic major in engineering.

Certificate holders will be trained in various skills in order to design, synthesize, process, characterize, analyze, deploy, and select materials for bio-engineering applications ranging from tissue engineering to implantable devices to prosthetic devices.

Requirements
The 12 credit hour Certificate in Biomaterials Engineering will be offered as a stand-alone certificate. Many of the courses offered for the certificate program can be counted towards engineering technical elective requirements for graduation within the students major.

Certificate in Cyber Security

The Certificate in Cyber Security is an stand-alone online certificate program withing the College of Engineering. Students will have the flexibility to focus on the technical aspects of computer, software, network, and information security at different levels. They will achieve a foundation in information security, such as, securing and defending networks, recovering from security failures, use cases of computer forensics, and overall data security management. For more information regarding this certificate, please contact the Information Technology Program's advisor, or the Director of Undergraduate Studies for the IT Program.

Requirements
A minimum GPA of 2.5 is required for admission. Prior background in information security is not required.

Certificate in Neural Engineering-Signals

The Certificate in Neural Engineering-Signals will enable students to gain both fundamental and applied understanding of brain signals, a rapidly growing component of neural big-data research. The program includes the study of basic concepts related to brain waves, recording techniques and to types of noise. The student will also gain expertise in the usage of signal processing concepts in applications ranging from detecting the onset of epilepsy in LFP and EEG signals to the design of brain machine interfaces.

Requirements

A total of 12 credit hours are required to obtain the certificate. At least one course must be neuro-related.

Certificate in Neural Engineering-Systems

The Certificate in Neural Engineering-Systems will enable students to gain both a fundamental and applied understanding of brain signals, a rapidly growing component of neural big-data research. The program includes the study of basic concepts related to modeling the nonlinear electrical circuits in the brain which use concepts from signal processing, modeling and control. Students will gain expertise in understanding the fundamentals required for the design of neural prostheses, and brain machine interfaces.

Requirements

A total of 12 credit hours are required to obtain the certificate. At least one course must be neuro-related.

Minor in Aerospace Engineering

Purpose

- To provide a foundation in aerospace engineering
- To help students compete for positions in the aerospace industry

Requirements

Students will take courses from the 4 fundamental areas of aerospace engineering for a total of 18 credit hours:

- Aerodynamics
- Aerospace structures
- Flight mechanics
- Propulsion

Must take both:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAE 3400</td>
<td>Fluid Mechanics</td>
<td>3</td>
</tr>
<tr>
<td>MAE 3600</td>
<td>Dynamic Systems and Control</td>
<td>3</td>
</tr>
</tbody>
</table>

Select at least 2 from:

</tbody>
</table>
Process

- Meet with your advisor during your sophomore/junior year to plan minor courses into your schedule.
- Submit the application form (list of completed/planned aerospace courses) in the semester before you graduate.
- When completed, the Aerospace Minor will appear on your transcripts.

Minor in Computational Neuroscience

Computational neuroscience is becoming an important tool for neuroscientists to understand how complex brain circuits work, for example, what causes post-traumatic stress disorder. This intersection of engineering and neuroscience is allowing great advances in health care, manufacturing, and communication.

Requirements

Required Core 4
ECE/BIO_SC 4590 Computational Neuroscience 4

Biology Core for Engineering/Physics/Math Students 6
Take 6 credit hours from the following list:
BIO_SC 1010 General Principles and Concepts of Biology 5
& BIO_SC 1020 and General Biology Laboratory
or F_W 1100 Introductory Zoology with Laboratory
or BIO_SC 1500 Introduction to Biological Systems with Laboratory
or BIO_SC 2300 Introduction to Cell Biology
PSYCH 2210 Mind, Brain, and Behavior 3
or PSYCH 4210 Physiological Psychology
ECE 2007 World of Neuroscience 1
or BIO_SC 2007 Topics in Biological Sciences-Physical Sciences
or CMP_SC 2007 World of Neuroscience

Engineering/Physics/Math Core for Biology/Psychology Students 6
Take 6 credit hours from the following list:
PHYSICS 1220 College Physics II 4-5
or PHYSICS 2760 University Physics II 4
INFO TC 1040 Introduction to Problem Solving and Programming 3
BIOL_EN 2080 Introduction to Programming for Engineers 3
ECE 2007 World of Neuroscience 1
or BIO_SC 2007 Topics in Biological Sciences-Physical Sciences
or CMP_SC 2007 World of Neuroscience

Higher Level BIOL_EN or CMP_SC courses with approval

All students must select two courses from the following list: 6*

Biological Science Courses:
MPP 3202 Elements of Physiology 5
BIO_SC 3700 Animal Physiology 5

BIO_SC 4500 Neurobiology 3
BIO_SC 4560 Sensory Physiology and Behavior 3
BIO_SC 4986 Neurology of Motor Systems 3
BIO_SC 4988 Nerve Cells and Behavior 3
ECE 2007 World of Neuroscience 1
or BIO_SC 2007 Topics in Biological Sciences- Physical Sciences
or CMP_SC 2007 World of Neuroscience

Engineering or Physics Courses:
BIOL_EN 4070 Biophysics 3
ECE 4310 Feedback Control Systems 3
ECE 4830 Introduction to Digital Signal Processing 4
PHYSICS 4310 Physics in Cell and Developmental Biology 3
PHYSICS 4500 Computational Biological Physics 3
BIOL_EN 4075 Brain Signals and Brain Machine Interfaces 3
or BME 4075 Brain Signals and Brain Machine Interfaces
BIOL_EN 4540 Neural Models and Machine Learning 3
or BME 4540 Neural Models and Machine Learning
ECE 2007 World of Neuroscience 1
or BIO_SC 2007 Topics in Biological Sciences- Physical Sciences
or CMP_SC 2007 World of Neuroscience

Minor in Construction Management

The Minor in Construction Management requires a minimum of 15 credits of course work, consisting of a minimum of six credit hours of core courses and a minimum of nine credit hours from the list of approved emphasis area courses.

Requirements

Required Core Courses
CV_ENG 4500 Introduction to Construction Management 3
CV_ENG 4145 Civil and Environmental Engineering 3

* CV_ENG 4125 can also be used, but only one of the two courses can be taken to satisfy the 15 credit hours requirement.

Approved Emphasis Area Courses (select minimum of 9 credit hours)
ARCHST 2310 Building Systems 3
ARCHST 2323 Sustainable Building Design 3
Fundamentals
ARCHST 4320 Materials, Methods and Products 3
ARCHST 4323 Sustainable Technologies and Systems 3
ARCHST 4333 Compliance and Specifications 3
ARCHST 4815 Construction Documents and Building Information Modeling Studio 4
CV_ENG 3313 Structural Steel Design 3
CV_ENG 3312 Reinforced Concrete Design 3
CV_ENG 4104 Pavement Materials and Design 3
CV_ENG 4120 Airport Engineering 3
CV_ENG 4125 Transportation Legal Issues 3
CV_ENG 4130 Transportation Safety 3
CV_ENG 4145 Civil and Environmental Engineering Legal Issues 3
CV_ENG 4185  Location Analysis/Site Selection 3  
CV_ENG 4190  Infrastructure Project Development 3  
CV_ENG 4250  Environmental Regulatory Compliance 3  
CV_ENG 4300  Advanced Structural Steel Design 3  
CV_ENG 4302  Prestressed/Advanced Reinforced Concrete 3  
CV_ENG 4360  Bridge Engineering 3  
CV_ENG 4404  Geotechnical Earthquake Engineering 3  
CV_ENG 4410  Foundation Engineering 3  
CV_ENG 4412  Applied Geotechnical Engineering 3  
CV_ENG 4413  To be course-shared with Missouri S&T 3  
CV_ENG 4232  Water and Wastewater Treatment Facilities 3  
CV_ENG 4250  Environmental Regulatory Compliance 3  
CV_ENG 4302  Prestressed/Advanced Reinforced Concrete 3  
CV_ENG 4410  Foundation Engineering 3  
CV_ENG 4412  Applied Geotechnical Engineering 3  
CV_ENG 4413  To be course-shared with Missouri S&T 3  

Only one course can be selected from the list below, but it is not required.  
FINANC 1000  Principles of Finance 3  
FINANC 3000  Corporate Finance 3  
FINANC 4010  Financial Management 3  
FINANC 4500  Principles of Real Estate 3  
FINANC 4520  Introduction to Risk Management and Insurance 3  
ECONOM 1014  Principles of Microeconomics 3  
ECONOM 3229  Money, Banking and Financial Markets 3  
ECONOM 3251  Managerial Economics 3  
ECONOM 4355  Industrial Organization and Competitive Strategy 3

Minor in Energy Engineering  

Energy engineering requires many different types of engineers, and this minor lets you choose from several different tracks to fit your career interests.  

Requirements  
The minor requires completion of 18 credit hours between the core and the tracks.  

Required Core Courses:  
ECE 4020  Energy Systems and Resources 3  
ENGRINR 2100  Circuit Theory for Engineers 3  
or ECE 2100  Circuit Theory I 3  
MAE 2300  Thermodynamics 3  
or CH_ENG 3261  Chemical Engineering Thermodynamics I 3  
IMSE 2710  Engineering Economic Analysis 3  
ECE Utility Generation Track  
ECE 4410  Power Electronics I 4  
ECE 4460  Energy and Machines 3  
ECE 3510  Electromagnetic Fields 3  

MAE 4320  Design of Thermal Systems 3  
ECE 3510  Electromagnetic Fields 3  
ECE 4410  Power Electronics I 4  

Electric Utility Transmission & Distribution Track  
ECE 3510  Electromagnetic Fields 3  
ECE 4410  Power Electronics I 4  

Energy Infrastructure and Efficiency Track  
MAE 4320  Design of Thermal Systems 3

Minor in Medical/Health Physics

The Minor in Medical/Health Physics is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the biological effects of radiation in medical utilization and in occupational health and safety.

Requirements

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4328 Introductory Radiation Biology 3
- NU_ENG 4391 Nuclear Radiation Detection 3
- CHEM 4600 Introduction to Radiochemistry with Lab 3

Select additional courses from the below options:
- NU_ENG 2201 Topics in Nuclear Engineering 3
- NUCMED 3256 Clinical Nuclear Medicine I 2
- CHEM 4170 Medicinal Chemistry 3
- NU_ENG 4319 Physics and Chemistry of Materials 3
- NUCMED 4329 Radiopharmaceuticals in Nuclear Medicine 3
- BIOL_EN 4570 Fluorescent Imaging 3
- BIOCHM 3630 General Biochemistry 3

Minor in Nuclear Engineering

The Minor in Nuclear Engineering is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related disciplines who are interested in nuclear power.

Requirements

The minor requires a minimum of 15 credits of course work. As background preparation, the minor requires math through differential equations and two semesters of calculus-based physics.

Required courses:
- ENGINR 2300 Engineering Thermodynamics 3
- NU_ENG 4315 Energy Systems and Resources 3
- NU_ENG 4346 Introduction to Nuclear Reactor Engineering I 3
- NU_ENG 4391 Nuclear Radiation Detection or CHEM 4600 Introduction to Radiochemistry with Lab 3

Select one additional course from the list below:
- NU_ENG 2201 Topics in Nuclear Engineering 3
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4330 Science and Technology of Terrorism and Counter Terrorism 3
- ECE 7550 Introduction to Plasmas 3
- NU_ENG 2303 Harnessing the Atoms in Everyday Life: Fulfill M Curie’s Dream 3

Minor in Radioenvironmental Sciences

The Minor in Radioenvironmental Sciences is one of three minors offered within the Nuclear Engineering academic curriculum to provide students the opportunity to obtain education and training in the nuclear sciences. It is designed for students from Biology, Chemistry, Engineering, Physics or related discipline who are interested in the environmental aspects of radiation and radioactive materials.

Requirements

The minor requires a minimum of 15 credits of course work. As background preparation, the student must have had the prerequisites of a minimum of college algebra and two semesters of college physics.

Required courses:
- NU_ENG 4303 Radiation Safety 3
- NU_ENG 4328 Introductory Radiation Biology 3
Graduate Certificate in Aerospace Engineering

Students who pursue a Graduate Certificate in Aerospace Engineering will achieve the following educational objectives:

1. The ability to apply the fundamentals of both incompressible and compressible flows, wing and airfoil theory, and fluid kinematics and dynamics.
2. How to analyze aircraft engines and spacecraft propulsion systems.
3. The mechanics and design issues associated with aerospace structures; including the analysis of thin skins with stiffeners for external surfaces, bulkheads and frames for shape support, and fasteners for holding components together.
4. How to analyze the flight mechanics of aircraft and spacecraft, including flight performance, flight dynamics and stability, orbital maneuvers, and flight control.

Requirements

The certificate will be both a stand-alone and for degree seeking students. It is comprised of 12 hours of graduate study at the 7000 level, requiring 4 courses to be taken, one from each core area within our aerospace curriculum.

Choose one 3 credit hour course from each of the following areas:

Aerospace Fluid Mechanics

Graduate Certificate in AI and Machine Learning

The recent advancement in AI and Machine Learning has made significant impact in a wide range of research fields and industries. The purpose of the graduate certificate is to prepare students and professionals to understand the foundation and advanced skills in AI and machine learning and to handle the growing demands in applying cutting-edge AI techniques.

Requirements

The 15 credit hours Graduate Certificate will be offered as a stand-alone certificate. Students will need to have a 3.00 GPA to complete the program.

Graduate Certificate in Construction Management

The Graduate Certificate in Construction Management prepares students and professionals to succeed in the construction industry. The construction industry builds the basic infrastructure necessary to sustain modern cities and communities. The successful delivery of such infrastructure requires skillful project managers to navigate the various steps of the project delivery process. Certificate holders will acquire experience in various aspects of construction management such as planning, environmental compliance, design, right-of-way acquisition, estimation, resource management, financing and scheduling.

Requirements

The 12-credit hour Graduate Certificate in Construction Management will be offered as both part of a graduate program and as a stand alone certificate. The following is a partial list of course offerings which can be used to complete the certificate program. Other classes could also be used as part of the certificate.

Graduate Certificate in Sustainable Energy and Policy

To achieve the goal of reliable and sustainable energy, we need to educate engineers in basics of energy with emphasis on renewable energy, sustainable practices in manufacturing that are informed by new technology, and impact of energy usage on society, economy and the environment. The goal of the Graduate Certificate in Sustainable Energy and Policy is to give students a broad view of energy engineering, energy economics and policy, and sustainability. The certificate is a stand-alone certificate open to both degree seeking and non-degree seeking students.

Requirements

As of this edition of the catalog, the program and the courses in the program are still being built and not yet ready for students.

The School of Health Professions is Missouri’s only state-supported health professions school on a campus with an academic health center. It is uniquely positioned to educate highly qualified health care professionals committed to fulfilling the mission of improving the health and well-being of individuals and communities. Its seven departments and eleven accredited academic programs have long and distinguished histories. Graduates of the School of Health Professions are nationally recognized leaders in their fields.

The school offers undergraduate degrees with majors in Communication Science and Disorders, Diagnostic Medical Ultrasound, Health Sciences, Public Health, Respiratory Therapy, Radiologic Sciences with emphasis in Radiography or Nuclear Medicine Technology, and Clinical Laboratory Sciences with an emphasis in Medical Technology. The school offers graduate degrees in Athletic Training (beginning in 2020), Communication Science and Disorders with an emphasis in Speech-Language Pathology, Occupational Therapy, Physical Therapy and Public Health.

Students gain valuable experience by participating in nationally recognized service centers including PhysZou, Tiger OT, The Adult Day Connection, the MU Speech and Hearing Clinic, Robert G. Comb’s Language Preschool, MU Thompson Center for Autism and Neurodevelopmental Disorders, and more than eight hundred fieldwork sites.

Undergraduate

- Admissions (p. 604)
- Exploratory Courses (p. 604)
- Required Entry Level Courses (p. 604)
- International Admissions (p. 605)
- Academic Regulations (p. 605)
- Enrolling in Other Institutions Simultaneously (p. 605)
- Advising (p. 605)
- Career Development (p. 605)

Admissions

Undergraduate students enrolled in the School of Health Professions work with a professional academic advisor to ensure timely completion of degree program requirements, as well as developing a personalized plan for achieving academic success. Students admitted to a clinical program may be advised by a professional advisor in Student Services or a faculty advisor in the major.

Admission to the University and to the School of Health Professions as a pre-health professions student does not guarantee admission for most Bachelor of Health Science degree programs. Application deadlines and requirements vary for each program (the health science major does not require an application). Students are strongly encouraged to seek advising to ensure they are making satisfactory progress towards prerequisites. MU General Education (p. 36), and program requirements.

Exploratory Courses

The School of Health Professions offers introductory courses and experiences to provide information about career opportunities in these areas. These courses are listed below:

<table>

</tbody>
</table>

Required Entry-level Courses

All students in the School of Health Professions must complete College Algebra (MATH 1100 or equivalent) and Exposition and Argumentation (ENGLSH 1000) upon completing 60 university-level credit hours, including transfer and MU credit. In addition, the School of Health Professions requires students who are declaring a ‘pre-Health Professions’ or ‘Undeclared’ major to meet the minimum GPA requirement for that program of interest. All undergraduate students are required to declare a plan upon completion of 60 university-level credit hours.

In addition to academic record, attributes such as interpersonal skills, motivation, attitude, interest, commitment and knowledge of the field are considered in selecting students to participate in the professional phase of any program. Applicants may also be evaluated on school and college aptitude tests, pattern of academic achievement, verbal expression, extracurricular activities and motivation demonstrated by employment and volunteer activities.

The application deadlines for the professional component of each program are shown below.

International Admissions

Students whose native language is not English should contact the School of Health Professions for requirements.

Prerequisite Curriculum Requirements

See the degree requirements in the following pages for specific course requirements in the various programs. The student is responsible for meeting graduation requirements for the program and the University. Academic advisors in the School of Health Professions assist students with understanding degree requirements and progress towards degree completion.

Graduation Requirements

In addition to degree and major requirements, students must complete university graduation requirements (p. 35), which include university general education (p. 36) requirements.

Degree Core Requirements

The Bachelor of Health Science degree is granted to candidates who have successfully fulfilled all didactic and clinical requirements of the program as described for each area, in addition to all University requirements (p. 35), including University general education (p. 36) requirements.

In addition to the academic and clinical education requirements of a program, students must possess and exhibit those personal qualities and characteristics that are associated with patient welfare and professional trust. These elements are a part of the overall evaluation process for the professional phase of each program. Should it be determined that these qualities are not present in sufficient degree or that a student does not demonstrate satisfactory growth and progress in these areas, the student is subject to dismissal from the program.

Degree with Honors Requirements

Information about specific requirements for students to graduate with Latin honors is available at http://healthprofessions.missouri.edu.

Academic Regulations

Time Limits on Credits Earned

Contact each department for information on time limits.

Credits by Examination

Students with previous training or experience may be allowed to earn advanced-standing credit through challenge or equivalency evaluation in certain programs. Contact the Health Professions advising office for information pertaining to the awarding of credit for these exams.

Maximum Credits Enrolled

A student may not enroll for more than 18 credits in a fall or spring term and 9 in a summer term without permission from the advising office; students should contact their advisor for more information.

Independent Study

Students must receive prior approval before enrolling in independent study courses.

Satisfactory/Unsatisfactory Grades

A student wishing to enroll in a course on an S/U basis must receive permission from the advising office.

Enrolling in Other Institutions Simultaneously

Students should consult with their advisor before enrolling in another institution while being enrolled at the University of Missouri.

Advising

All undergraduate students are assigned a professional academic advisor in the School of Health Professions.

Career Development

The Office of Career Services in the School of Health Professions offers career advising, résumé, cover letter and personal statement review, mock interviews, LinkedIn consultation, job search strategies, and workshops to enhance students’ career development. In addition, the SHP Office of Career Services offers a bi-annual Career and Opportunities Fair, which allows SHP students to connect with employers, graduate and professional programs, internships, and experiential learning opportunities. Students are encouraged to seek out and use SHP Career Services early in their undergraduate career to connect with shadowing opportunities, find part-time employment, and explore clinical and non-clinical career paths.

Graduate

The School of Health Professions offers a wide variety of programs of study for students interested in careers in healthcare. At the graduate level, we offer degrees in

- Athletic Training
- Communication Science and Disorders, with an emphasis in Speech-Language Pathology
- Occupational Therapy
- Physical Therapy
- Public Health, with a dual degree option with Social Work, emphasis areas in Health Promotion and Policy and Veterinary Public Health, and graduate certificates in Public Health, Global Public Health, and Epidemiology

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

Department Overview

The Department of Clinical and Diagnostic Sciences is the academic home of programs in the following cardiopulmonary and diagnostic science professions. Our on-campus undergraduate programs prepare students for entry-to-practice careers. Our online undergraduate, certificate, and graduate programs prepare credentialed professionals to advance their practice in clinical leadership and clinical specialist positions. Employment opportunities for all of these professions are projected to grow much faster than average.

Clinical Laboratory Science (also known as Medical Laboratory Science) includes the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, blood banking, serology, immunology, and molecular pathology. Clinical Laboratory Scientists perform chemical, biological, and other analytical procedures used by physicians to diagnose and monitor the treatment of disease. These professionals work in hospitals, clinics, laboratories, and research centers.

Diagnostic Medical Ultrasound uses high-frequency sound waves to produce dynamic visual images capturing size, function, and structure of organs, tissues or blood flow with real time tomographic images in two, three, and four dimensions. Sonographers function with a high degree of independence, to gather and analyze data and to prepare reports of their findings for interpretation and diagnosis by a physician. These professionals work in hospitals, clinics, private physician offices, and other medical facilities performing examinations in their areas of specialization.

Nuclear Medicine utilizes radionuclides to produce functional, molecular images that demonstrate physiologic processes. Nuclear Medicine technologists administer extremely small amounts of radioactive compounds used for cancer treatment or to produce images used in diagnosing many diseases. These professionals work in hospitals, imaging and research centers, commercial radiopharmacies, and nuclear research reactors.

Radiography employs ionizing radiation (X-ray, computed tomography or CT, fluoroscopy, mammography, bone densitometry) and strong magnetic fields (magnetic resonance or MRI) to image anatomy. Radiologic technologists work closely with physicians to assist with medical interventions such as angioplasty and stent insertion used to diagnose, monitor, and treat disease. These professionals work in hospitals, clinics, imaging centers, mobile services, research centers, and industry.

Respiratory Therapy (also known as Respiratory Care) uses positive pressure, gases (oxygen, helium, nitric oxide) and aerosolized medication to diagnose and treat cardiovascular and pulmonary disorders. Respiratory therapists work under the direct or indirect supervision of physicians to manage ventilators (respirators) and artificial airways, perform pulmonary function testing, and analyze arterial blood specimens. These professionals work in hospitals, intensive care units, emergency rooms, air and ambulance transport, neonatal and pediatric units, patient homes, sleep laboratories, and in the medical device industry.

MHS CDS Program Director: Kathy Moss

The Master of Health Science in Clinical and Diagnostic Science (MHS CDS) includes three emphasis areas from which students may choose: MHS CDS-Clinical Laboratory Science, MHS CDS-Imaging Sciences and MHS CDS-Respiratory Therapy.

Prospective students for the MHS CDS program will most commonly be credentialed in Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine Technology, Radiography or Respiratory Therapy. Our program aligns well with health care providers who have a goal to build advanced, profession-specific competencies while also fostering beliefs and choices essential to the development of safe and effective interprofessional health care teams.

The MHS CDS program is a 30-credit, online program designed to be completed part-time by practicing health care professionals who are employed full time.

The curriculum is organized into three parts with integrated opportunities to achieve stackable credentials. Interprofessional core courses (9 credits) offer practical preparation for effective team functioning. Leadership electives (minimum 12 credits) offer preparation for one of three career paths: Health care facilities (hospitals, clinics); Higher education programs preparing entry-to-practice health care professionals (colleges, universities); or Health care industry (medical equipment or pharmaceutical sales and customer support). Emphasis area electives (minimum 6 credits) prepare students for one or more advanced professional credentials. The program culminates in a capstone project centered on a topic of personal or professional interest that is tailored to the student's goals (3 credits).

The program is facilitated by nationally recognized faculty and content experts. Students benefit from high quality, well-resourced distance learning support. Admission may be granted at any time to qualified candidates.

Future Certification and Careers

Students may earn graduate certificates and prepare for advanced professional certifications and credentials, consistent with their elective course choices. The program is designed to prepare credentialed professionals in Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiography, and Respiratory Therapy for careers as clinical specialists, educators, and leaders.

BHS in Clinical and Diagnostic Sciences

Degree Program Description

For this degree program, students must choose an emphasis area: Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine, Radiography, or Respiratory Therapy. Each emphasis area prepares graduates for critical diagnostic and disease management roles that are highly technical and primarily situated in acute care environments. These nationally accredited entry-to-professional practice programs emphasize experiential learning in a wide variety of clinical sites that are highly relevant to current workforce demands. Refer to the degree program descriptions for the emphasis areas for more details.

Major Program Requirements

Please refer to the emphasis area pages for degree requirements: Clinical Laboratory Science (p. 607), Diagnostic Medical Ultrasound (p. 609), Nuclear Medicine (p. 610), Radiography (p. 611), Respiratory Therapy (p. 613).

Semester Plan

Please refer to the emphasis area pages for semester plans: Clinical Laboratory Science (p. 607), Diagnostic Medical Ultrasound (p. 609), Nuclear Medicine (p. 610), Radiography (p. 611), Respiratory Therapy (p. 613).

BHS in Clinical and Diagnostic Sciences with Emphasis in Clinical Laboratory Science

Degree Program Description

Clinical laboratory Scientists are skilled, certified professionals trained in the theoretical and practical aspects of clinical laboratory medicine – chemistry, hematology, microbiology, immunology, molecular pathology, and blood banking. Clinical Laboratory Scientists have various levels of responsibility – as staff technologists, research technologists, supervisors, managers, or educators – and can work in a variety of settings, including hospitals, clinics, laboratories, and research centers. Approximately 60 to 70 percent of all medical decisions regarding a patient's diagnosis and treatment, as well as their hospital admission and discharge, are based upon laboratory test results obtained by Clinical Laboratory Scientists.

The Clinical Laboratory Science (CLS) program at MU is a unique collaboration with the University of Nebraska Medical Center in Omaha. The CLS program includes three years of pre-requisite coursework, and 11 months of clinical coursework. The clinical year begins during the third week of May, with 13 weeks of coursework and clinical lab rotations in a dedicated summer student lab facility at the University of Nebraska's Medical Center in Omaha. After the initial 13 weeks in the program, CLS students return to Columbia and complete their clinical laboratory rotations at one of three local clinical sites. Students graduate with a Bachelor of Health Science (BHS) degree in Clinical and Diagnostic Sciences with an emphasis in Clinical Laboratory Science from the University of Missouri with a Certificate in Medical Technology from the University of Nebraska Medical Center. Upon completion of the program, students are eligible to challenge the Medical
Technology credentialing examination administered by the American Society for Clinical Pathology (ASCP). The CLS program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) via its partnership with the NAACLS-accredited Clinical Laboratory science program of the University of Nebraska Medical Center.

**Major Program Requirements**

Students must complete the courses below with a grade of C- or higher to earn the BHS in Clinical and Diagnostic Sciences with an emphasis in Clinical Laboratory Science degree. In addition, students must meet degree and University requirements (p. 35), including University general education (p. 36). In addition to the degree requirements below, the CLS program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the pre-requisites and prepare for the program application. The application process is competitive, and meeting minimum criteria does not guarantee admission. There are a limited number of clinical positions available. A minimum 2.5 cumulative in addition to a math/science course GPA are required to be considered for acceptance.

### BHS in Clinical and Diagnostic Sciences with Emphasis in Diagnostic Medical Ultrasound

#### Degree Program Description
Sonographers (Ultrasound technologists) use high-frequency sound waves to produce dynamic visual images of organs, tissues, or blood flow in two, three, and four dimensions. Sonographers work in hospitals, clinics, private physician offices and other medical facilities performing examinations in their areas of specialization. Areas of specialization include: Abdomen, Obstetrics/Gynecology, Echocardiography, and Vascular technology. Sonographers function with a high degree of independence, using skill, judgment and knowledge to gather data required to reach a diagnosis. The DMU program includes two years of pre-requisite coursework and two years of professional coursework. Students graduate with a Bachelor of Health Science (BHS) degree in Clinical and Diagnostic Sciences with an emphasis in Diagnostic Medical Ultrasound from the University of Missouri. Graduates of the program are eligible to challenge the credentialing examination administered by the American Registry for Diagnostic Medical Sonography (ARDMS). The program is accredited by the Commission on Accreditation of Allied Health Education.

#### Major Program Requirements
Students must complete Program Pre-requisite courses below with a grade of C- or higher to be eligible to apply to the BHS in Clinical and Diagnostic Sciences with an emphasis in Diagnostic Medical Ultrasound major. Major Core Requirements must be completed with a grade of C (2.0) or higher within the program, unless otherwise noted. Students must also meet degree and University requirements (http://catalog.missouri.edu/academicdegreerequirements/), including University general education requirements (http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/). In addition to the degree requirements below, the Diagnostic Medical Ultrasound program requires an application, including an interview, and students are encouraged to work with an advisor in order to best structure the pre-requisites and prepare for the program application.

** DMU 1000 Introduction to Diagnostic Medical Ultrasound is required for application to the DMU Program. Prospective students may enroll in the fall semester or the spring semester.

BHS in Clinical and Diagnostic Sciences with Emphasis in Nuclear Medicine

Degree Program Description

Nuclear medicine (NM) technologists use radioactive compounds to produce functional, molecular images as well as to treat many cancers. They work in a variety of settings, including hospitals, imaging and research centers, commercial radiopharmacies, and nuclear research reactors. Nuclear medicine procedures are used to diagnose and treat diseases as well as to tailor treatment regimens. The NM program includes two years of pre-requisite coursework and two years of professional coursework. Students graduate with a Bachelor of Health Science (BHS) degree in Clinical and Diagnostic Sciences with an emphasis in Nuclear Medicine. Graduates of the program are eligible to challenge the nuclear medicine technology credentialing examinations administered by the Nuclear Medicine Technology Certification Board and the American Registry of Radiologic Technologists. The program is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology.

Major Program Requirements

Students must complete the Program Pre-requisite courses below with a grade of C- or higher. All Major Core Requirements require a grade of C (2.0) or higher, unless otherwise noted. Students must also meet degree and University requirements (http://catalog.missouri.edu/academicdegreerequirements/universityrequirements/), including University general education (http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/) requirements. In addition to the degree requirements below, the Nuclear Medicine program requires an application, including an interview. Students are encouraged to work with an advisor in order to best structure the pre-requisites and prepare for the program application.

BHS in Clinical and Diagnostic Sciences with Emphasis in Radiography

Degree Program Description

Radiographers employ ionizing radiation (x-rays) and strong magnetic fields to image anatomy and aid in the diagnosis of injury and disease. Radiographers work closely with radiologists and other physicians to provide patient services such as general x-ray, magnetic resonance imaging (MRI), computed tomography (CT), cardiac and vascular interventional procedures, mammography, and bone densitometry. Radiographers work in a variety of settings including hospitals, clinics, imaging centers, mobile services, research centers, and industry. The Radiography program includes two years of pre-requisite coursework and six semesters of professional coursework, including clinical experiences at several local facilities. The program includes advanced didactic training in MRI or CT. Graduates of the program may elect to enroll in the

Professional Certification

Upon completion of the program, students are eligible to take the national certifying examinations given by the Nuclear Medicine Technology Certification Board. Students may also pursue credentials offered through the American Registry of Radiologic Technologists.

Semester Plan

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.
advanced imaging clinical externship to complete clinical requirements in the semesters following graduation. Students graduate with a Bachelor of Health Science (BHS) degree in Clinical and Diagnostic Sciences with an emphasis in Radiography. Graduates of the program are eligible to challenge credentialing examinations administered by the American Registry of Radiologic Technologists. Accreditation of the program is granted by:

The Joint Review Committee on Education in Radiologic Technology
20 North Wacker Drive, Suite 2850
Chicago, Illinois 60606-3182
(312) 704-5300
mail@jrcert.org

Major Program Requirements

Students must complete all Program Pre-Requisite courses below with a grade of C- or higher for admission to the BHS in Clinical and Diagnostic Sciences with an emphasis in Radiography program. Once admitted to the program, all Major Core Requirements must be completed with a grade of C (2.0) or higher, and students must maintain a 2.5 or higher GPA each semester while in the program. In addition, students must meet degree and University requirements (http://catalog.missouri.edu/academicdegreerequirements/universityrequirements/), including University general education (http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/) requirements. A separate application is required for admission to the program. Students are encouraged to work with an advisor and the Radiography Program Director in order to best structure the pre-requisites and prepare for the program application. Students transferring from other institutions should contact the program director and work with an advisor to evaluate coursework and ensure they will meet the program’s pre-requisite requirements.

BHS in Clinical and Diagnostic Sciences with Emphasis in Respiratory Therapy

Degree Program Description

Respiratory therapists assess and treat dysfunction involving the heart and lungs. Respiratory therapists work in hospitals, intensive care units, emergency rooms, air and ambulance transport, neonatal and pediatric units, patient homes, sleep laboratories, skilled nursing facilities, and in the medical device industry. They work closely with physicians to manage ventilators and artificial airways, administer prescribed inhaled medications, perform pulmonary function testing, and analyze arterial blood specimens. The Respiratory Therapy program at MU includes two years of pre-requisite coursework and two years (including summer semesters) of professional coursework, which can be completed in Columbia or at the program’s satellite campus at Mercy Hospital in St. Louis. Students graduate with the Bachelor of Health Science (BHS) degree in Clinical and Diagnostic Sciences with an emphasis in Respiratory Therapy. Graduates of the program are eligible to challenge credentialing examinations administered by the National Board for Respiratory Care (NBRC https://www.nbrc.org) (https://www.nbrc.org/). An online degree advancement program is available for credentialed respiratory therapists who seek the bachelor’s degree. For additional information on the profession of Respiratory Care, please visit; https://be-an-rt.org/.

Major Program Requirements

Students must complete the courses below with a grade of C (2.0) or higher to earn the BHS in Clinical and Diagnostic Sciences with an emphasis in Respiratory Therapy degree. In addition, students must meet degree and University requirements (p. 35), including University general education (p. 36) requirements. A separate application is required for admission to the program. Students are encouraged to work with an advisor in order to best structure the pre-requisites and prepare for the program application.

Professional Credentialing/Licensure

After graduation, students are eligible to take the credentialing exams offered by the National Board for Respiratory Care (NBRC) (https://www.nbrc.org/). Graduates will also be required to apply for licensing in the state in which they choose to work.

Accreditation

The University of Missouri Respiratory Therapy Program’s Bachelor of Health Science in Clinical & Diagnostic Sciences with an emphasis in Respiratory Therapy, CoARC # 200033, in Columbia, MO is accredited by the Commission on Accreditation for Respiratory Care (www.coarc.com (http://www.coarc.com)).

The University of Missouri at Mercy Hospital Respiratory Therapy Program’s Bachelor of Health Science in Clinical & Diagnostic Sciences with an emphasis in Respiratory Therapy, CoARC # 300006, in St. Louis, MO is accredited by the Commission on Accreditation for Respiratory Care (www.coarc.com (http://www.coarc.com)).

Programmatic outcomes data (https://www.coarc.com/Students/Programmatic-Outcome-Data.aspx) is available to the public on the CoARC website.

MHS in Clinical and Diagnostic Sciences

The MHS CDS program prepares clinical professionals for leadership in three distinct contexts: Health care facilities, higher education programs preparing entry-to-practice health care professionals, and health care industry. Students will build on their unique disciplinary knowledge and expand their foundation as leaders while tailoring a program specific to their individual career aspirations. The MHS CDS offers three emphasis areas: Clinical Laboratory Science, Imaging Sciences, and Respiratory Therapy.

Prospective students for the MHS CDS program will most commonly be credentialed in Clinical Laboratory Science, Diagnostic Medical Ultrasound, Nuclear Medicine Technology, Radiography or Respiratory Therapy. Our program aligns well with health care providers who have a goal to build advanced, profession-specific competencies while also fostering beliefs and choices essential to the development of safe and effective interprofessional health care teams.

The program is facilitated by nationally recognized faculty and content experts. Students benefit from high quality, well-resourced distance learning support. Admission may be granted at any time to qualified candidates.

Degree Requirements

The Master of Health Science in Clinical and Diagnostic Science is a 30 credit-credit hour (minimum) online, graduate program designed to be completed part-time by practicing health care professionals who are employed full time.

The program curriculum is organized into three parts, with integrated opportunities to achieve stackable credentials. Interprofessional core courses (9 credit hours) offer practical preparation for effective team functioning. Leadership electives (minimum 12 credit hours) offer preparation for one of three career paths: Health care facilities (hospitals, clinics); higher education programs preparing entry-to-practice health care professionals (colleges, universities); or health care
industry (medical equipment or pharmaceutical sales and customer support). Emphasis area electives (minimum 6 credit hours) prepare students for one or more advanced professional credentials. All students will complete a personalized experiential capstone project tailored to their goals in clinical leadership (3 credit hours). At least 15 credit hours must be 8000 or 9000 level courses. Students may have the ability to earn a graduate certificate while completing the masters degree requirements, depending on their choice of leadership elective courses. Please refer to the specific emphasis area page for complete degree requirements: Clinical Laboratory Science, Imaging Sciences, and Respiratory Therapy.

MHS in Clinical and Diagnostic Sciences with Emphasis in Clinical Laboratory Science

The Master of Health Science in Clinical and Diagnostic Science with emphasis in Clinical Laboratory Science is an interprofessional program that will prepare students from diverse health professions for leadership positions in health care facilities, higher education programs preparing entry-to-practice health care professionals, and the medical equipment and pharmaceutical industries. Students will build on their unique disciplinary knowledge to expand their foundation as leaders and prepare to achieve their academic and career goals.

Upon completion of the program students will be able to:

• Implement evidence-based clinical systems in ways that optimize patient outcomes using analytic techniques
• Reflect on the impact of leadership decisions and incorporate current trends into clinical practice
• Provide leadership in regulatory compliance, risk management, fiscal responsibility and strategic planning
• Build interprofessional team competence, assess clinical performance, and implement professional development activities
• Integrate advanced clinical specializations to provide stackable skills that meet the changing needs of evolving disciplines

Graduates of this program will merge their discipline-specific knowledge and experience with new leadership skills, advanced professional competencies, and interprofessional collaborative practice experiences to lead the delivery of the highest quality care.

Degree Requirements

The Master of Health Science in Clinical and Diagnostic Science with emphasis in Clinical Laboratory Science is a 30 credit-credit hour (minimum) graduate degree program.

The program curriculum is organized into three categories: interprofessional core courses (9 credit hours), leadership electives (minimum 12 credit hours), and emphasis area electives (minimum 6 credit hours). All students will complete a personalized experiential capstone project tailored to their goals in clinical leadership (3 credit hours). At least 15 credit hours must be 8000 or 9000 level courses.

Students may earn a graduate certificate while completing the MHS CDS requirements, depending on their chosen leadership elective courses.

MHS in Clinical and Diagnostic Sciences with Emphasis in Respiratory Therapy

The Master of Health Science in Clinical and Diagnostic Science with emphasis in Respiratory Therapy is an interprofessional program that will prepare students from diverse health professions for leadership positions in health care facilities, higher education programs preparing entry-to-practice health care professionals, and the medical equipment and pharmaceutical industries. Students will build on their unique disciplinary knowledge to expand their foundation as leaders and prepare to achieve their academic and career goals.

Upon completion of the program students will be able to:

- Implement evidence-based clinical systems in ways that optimize patient outcomes using analytic techniques
- Reflect on the impact of leadership decisions and incorporate current trends into clinical practice
- Provide leadership in regulatory compliance, risk management, fiscal responsibility and strategic planning
- Build interprofessional team competence, assess clinical performance, and implement professional development activities
- Integrate advanced clinical specializations to provide stack-able skills that meet the changing needs of evolving disciplines

Graduates of this program will merge their discipline-specific knowledge and experience with new leadership skills, advanced professional competencies, and interprofessional collaborative practice experiences to lead the delivery of the highest quality care.

Degree Requirements

The Master of Health Science in Clinical and Diagnostic Science with emphasis in Respiratory Therapy is a 30 credit-credit hour graduate degree program.

The program curriculum is organized into three categories: interprofessional core courses (9 credit hours), leadership electives (minimum 12 credit hours), and emphasis area electives (minimum 6 credit hours). All students will complete a personalized experiential capstone project tailored to their goals in clinical leadership (3 credit hours). At least 15 credit hours must be 8000 or 9000 level courses. Students may earn a graduate certificate while completing MHS CDS requirements, depending on their chosen leadership elective courses. Total credit hours to completion may vary depending on selection of elective courses.

Health and Rehabilitation Science

School of Health Professions
510 Lewis Hall
701 S. 5th St.
Columbia, MO 65211

Faculty

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in health and rehabilitation science, the University does offer baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

- PhD in Health and Rehabilitation Science (p. 616)

PhD in Health and Rehabilitation Science

The Ph. D. in Health and Rehabilitation Science is an interdisciplinary research-focused doctoral program that will prepare students for high-impact careers in research, post-secondary education, and organizational leadership in the health disciplines (including physical therapy,
occupational therapy, speech-language pathology and public health). Students will be prepared to serve as faculty in health professions schools and colleges, and will have a range of other opportunities including working in non-governmental organizations and government agencies addressing community health problems and contributing to product development in rehabilitation/health care industries.

The program curriculum is based on a mentorship-model of graduate education. Students who are accepted to the program will work with a specific faculty mentor or mentors. Coursework will be tailored to ensure breadth and depth of didactic learning that will provide the foundation for development of an independent research program.

**Degree Requirements**

Students are required to complete 72 credit hours of post-baccalaureate study. Curriculum will include foundational course work in Health and Rehabilitation Science, and core courses focused on statistics and research methodology. Students will complete additional graduate coursework that advances their line of research and is approved by their faculty mentor(s). Students will complete at least 15 credit hours of 8000-9000 level coursework in their research area, along with an additional 11+ mentor-directed learning credit hours in readings, problems or research. Up to 28 credit hours of research credits may be counted towards the 72 hours minimum required, though students may take more than 28 credit hours of research to complete their research and defend their dissertation.

Students will collaborate with their faculty mentor to create a plan of study for their doctoral degree by the end of their first semester in the program. The program will consist of core courses and additional coursework decided upon with their mentor. Students will be expected to take courses from academic programs outside of their faculty mentor’s home department to allow for interdisciplinary research.

</tbody>
</table>

**Qualifying Process**

**Comprehensive Examination Process**

All students will complete a comprehensive examination at the end of required coursework that will include written and oral sections.

**Dissertation Requirements**

All students will complete a minimum of two independent research projects, including their dissertation research. Students will write a dissertation proposal that must be reviewed and approved by the student's doctoral committee and must successfully complete a doctoral dissertation focused on original research.

**Admissions**

Admissions procedures will follow those specified by the MU Graduate School (https://gradschool.missouri.edu/admissions/). Candidates will be asked to specify faculty member(s) they would prefer to work with. Students will be selected for admission based on recommendations by the program faculty and with final approval by the Program Director.

**Health Science**

J. Goodman, R. Hogan, Interim Co-Chairs
B. Blackburn, Program Director
School of Health Professions
501 Clark Hall
(573) 882-8422
hoganr@health.missouri.edu

The Department of Health Sciences (DHS) is part of the School of Health Professions (SHP), which serves the citizens of Missouri through its outstanding research, community service clinics, and the education of students in the areas of health literacy and health promotion. Faculty in DHS teach courses for the health science program and are actively involved in a wide range of interdisciplinary research. Our faculty provide expertise in several domains including public health, psychology, sociology, medical anthropology, education, and social work. Faculty research covers a wide range of topics including health promotion, health communication, decision support, health disparities for disadvantaged groups, and access to healthcare. Our research also spans a number of substantive areas including Autism Spectrum Disorders, breast cancer, HIV/AIDS, aging, and adolescent health.

Students can only earn the BHS in Health Science concurrently with the Doctor of Physical Therapy (p. 833) if they have been admitted through the Department of Physical Therapy's early admission program option. Students who choose to pursue this option are strongly encouraged to work with their advisor to ensure completion of degree requirements.

**Faculty**

**Associate Professor** N. Cheak-Zamora**, A. Frech**, W. Majee**
**Associate Teaching Professor** B. Blackburn, K. Flynn Peters, M. Kuhnert, C. Orbann, D. Ruggeri
**Assistant Professor** C. Allen, C. Altman**, L. Bauerband, H. Choi**
**Assistant Teaching Professor** G. Cox, B. Ramirez, M. Vetter-Smith, J. Wintemberg

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Undergraduate

- BHS in Health Science (p. 618)
  - with emphasis in Health & Wellness Services (p. 620)
  - with emphasis in Leadership & Policy (p. 621)
  - with emphasis in Pre-Professional (p. 622)
  - with emphasis in Rehabilitation Sciences (p. 623)

The Department of Health Sciences’ BHS in Health Science degree program is for students who wish to enter non-clinical health careers such as medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates of the Health Science degree program may also be qualified to enter either graduate or professional health sciences programs such as Occupational Therapy, Physical Therapy, Health Administration and Public Health. The Health Science program requires physical, biological, behavioral and social sciences to provide students with an education in foundational sciences, human function, health research, service and policy.

The department offers the Bachelor of Health Science in Health Science (BHS). Students who start at the University of Missouri or declare the health science degree in Fall 2016 or later must declare an emphasis area upon declaring the major. Students in the Mizzou Online program will not be required to declare an emphasis area, though declaring an emphasis area may be an option depending on the student's interests and background.

** Departmental Requirements

Courses may be delivered using traditional or distance delivery methods. The Health Science degree program credits must include a minimum of 120 university-level credit hours, including general education (p. 36) coursework, core required courses that comprise a minimum of 20 credit hours, professional emphasis requirements, 18 hours of approved, required electives that complement the student’s intended pathway.

Students are required to file a graduation plan for the Health Science degree by the time they have completed 60 university-level credit hours, including all MU and transfer credits. Students should meet with their academic advisor to discuss the graduation plan, and then file their plan prior to early registration for the fall and spring semesters. Students who transfer from another institution or another school/college at MU with 60 or more hours must file their graduation plan within the first semester of enrollment in the Health Science program.

** Residency Requirement

There is a residency requirement for Health Science majors. Students must complete, at minimum, their last 30 hours of coursework for the degree as declared Health Science majors in the School of Health Professions. The 30 hour residency requirement applies to students who wish to declare an emphasis area, as well. Students must be in the Health Science major at the beginning of a semester to include the hours in the residency requirement. Residency requirement hours for students transferring into the major during the semester will begin the following semester.

** Admission to the BHS in Health Science

The BHS in Health Science Program does not require an application. Students may declare the major, and emphasis area, by indicating it on the MU admission application (for new students), completing a transfer of division form (for current MU students), or notifying their academic advisor of their intention to declare a Health Science major (for current SHP students). There is a 2.0 MU, cumulative and term GPA requirement to declare a major in Health Science. The cumulative GPA is calculated using all MU and transfer coursework. Students must maintain the 2.0 GPA, term and cumulative, to remain in the Health Science program.

Students who do not maintain the required 2.0 term and cumulative GPA will receive communication regarding probation or ineligible to re-enroll status. Students who fail to achieve the GPA requirement may continue in the program for two probationary semesters.

** Graduate

While MU does not offer graduate degrees specifically in health sciences, the University does offer post-baccalaureate opportunities in a number of related areas, both within the School of Health Professions, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

** BHS in Health Science

** Degree Program Description

A Health Science major is for students who are interested in non-clinical health careers and for those interested in graduate or professional health science programs. Non-clinical health career options include medical case management, corporate wellness, human services, medical sales, pharmaceutical manufacturing and distribution, and more. Graduates holding the BHS in Health Sciences may also be qualified to enter either graduate or professional health science programs, such as physical therapy, public health, chiropractic medicine, health informatics and hospital administration. On-campus, Health Science majors choose one of four sub-plans. These sub-plans include: Rehabilitation Sciences, for students pursuing physical therapy, occupational therapy, chiropractic, orthotics/prosthetics, and similar degrees; Pre-Professional, for students who are pre-medicine, dentistry, pharmacy, physician assistant studies, optometry and related graduate/professional programs that require an undergraduate degree; Leadership and Policy, for students who are interested in pursuing non-clinical pathways after graduation, through graduate programs in health administration or working in areas such as health informatics, sales, program coordination and support areas in healthcare; and Health and Wellness Services, for students who wish to pursue health promotion, wellness programming, non-profit work, applied behavioral analysis, as well as students who wish to pursue accelerated nursing after graduation with the health science degree. The health sciences curriculum includes courses in public health, health literacy, healthcare leadership and management, healthcare policy and funding, and clinical ethics. The capstone course sequence includes a required internship experience appropriate for the chosen sub-plan. Students may choose a health sciences study abroad experience approved by the Office of Experiential Learning to meet the internship requirement.

** Major Program Requirements

- Students must have a 2.0 GPA, most recent fall or spring term, cumulative including all transfer credit, and MU GPA to declare the Health Science major.
Capstone Requirement

The BHS in Health Science capstone is comprised of two courses: HLTH_SCI 4975 and HLTH_SCI 4985. HLTH_SCI 4975 is an internship that is approved by the Department of Health Sciences’ Office of Experiential Learning. Students may find their own internship experience or work with the course instructor/internship advisor to identify an appropriate placement given interests and goals.

Students may choose from:

• an internship at an agency, company, or corporation of their choice. For an internship to be approved as a capstone experience, it must help students solidify and explore areas of concentration. Internships must have prior approval from the Health Sciences Internship advisor;
• service learning project which allows a student to serve approximately 50 clock hours in an organization. This can be arranged with the Internship advisor or through the Office of Service Learning on campus, and
• an approved study abroad program

In addition to University of Missouri requirements, including University general education, the Health Science degree requires the following, each of which must be completed with a grade of C- or higher:

## BHS in Health Science with Emphasis in Health & Wellness Services

### Degree Program Description

The health and wellness services emphasis will prepare students for application to clinical or graduate programs in fields such as accelerated nursing, applied behavior analysis, or health education and promotion. The health and wellness services emphasis may also prepare students who have appropriate work experience as an undergraduate to work in fields such as health and human services, non-profit organizations, and corporate health promotion, and wellness programming. The health and wellness emphasis services area includes 20 hours of core required courses, professional emphasis requirements and required health science electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the health and wellness services emphasis include: approved study abroad, health promotion, physical fitness and nutritional services through WELLWARE at Boone Hospital Center, Safe Kids Columbia, and Case Management at Lutheran Family and Children's Services. OK!

### Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Health and Wellness Services emphasis requires the following, each of which must be completed with a grade of C- or higher:

#### Program Requirements

<table>
<thead>
<tr>

### Health Science Electives

Students must complete 18 hours of approved elective coursework. At least 9 credit hours must be taken as 3000/4000 level courses. Transfer courses taken at the freshman-sophomore level and accepted as equivalent to a 3000/4000 level course at the University may not count towards the 9 hour upper-level Health Science Elective requirement for the Health Science degree.
Semester Plan

Students are strongly encouraged to work with an academic advisor in the School of Health Professions to develop an individualized eight-semester plan based on strengths, interests and career goals.

BHS in Health Science with Emphasis in Leadership & Policy

Degree Program Description

The leadership and policy emphasis in the health science major prepares students to enter careers in health administration, informatics, or sales. The leadership and policy emphasis may also prepare students for graduate studies in health administration, informatics, public health, policy or law. The leadership and policy emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student’s pathway. In addition, the health science program requires an internship that is appropriate for a student’s career goals. Examples of internships include health administration, health consultant, clinical analysis and strategic planning at RehabCare, Health Literacy Missouri, Institute for People, Place and Possibility, Tiger Institute and Cerner Corporation.

Major Program Requirements

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Leadership and Policy emphasis requires the following, each of which must be completed with a grade of C- or higher:

**BHS in Health Science with Emphasis in Pre-Professional**

**Degree Program Description**

The pre-professional emphasis in the health science major prepares students to apply for graduate and professional programs in medicine, dentistry, pharmacy, physician assistant studies, optometry and related areas. The pre-professional emphasis may also prepare students who have appropriate work experience as an undergraduate to work for clinical research companies, medical or pharmaceutical sales or other non-clinical health careers that require a background in science and knowledge of health care. The pre-professional emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the pre-professional emphasis include: Missouri Telehealth Network, MedZou Community Health Center, PhysAssist, and Scribe America.

**Major Program Requirements**

In addition to University of Missouri requirements, including University general education, the Health Science degree with a Pre-Professional emphasis requires the following, each of which must be completed with a grade of C- or higher:

### Program Requirements

- **ENGLISH 1000** Exposition and Argumentation 3
- **ENGLISH 1000H** Honors Exposition English
- **MATH 1100** College Algebra 3-5
- **MATH 1160** Precalculus Mathematics

### Major Core Requirements

- **HLTH_SCI 1000** Introduction to the Health Professions 3
- **or HLTH_SCI 1000H** Introduction to the Health Professions - Honors
- **HLTH_SCI 2100** Health Sciences Seminar 1
- **HLTH_SCI 3300** Public Health Principles, Practice, and Education 3
- **or HLTH_SCI 3300H** Public Health Principles, Practice, & Education - Honors
- **or HLTH_SCI 3300W** Public Health Principles, Practice, and Education - Writing Intensive
- **HLTH_SCI 3900W** Introduction to The Research Process and Evidence Base - Writing Intensive 3
### Pre-Professional Emphasis Requirements

### Health Science Electives

Students must complete 18 hours of approved elective coursework. At least 9 credit hours must be taken as 3000/4000 level courses. Transfer courses taken at the freshman-sophomore level and accepted as equivalent to a 3000/4000 level course at the University may not count towards the 9 hour upper-level Health Science Elective requirement for the Health Science degree.

### Semester Plan

Students should meet with an academic advisor in the School of Health Professions to discuss an individualized 8-semester plan based on their career goals, strengths and interests.

### Degree Program Description

The rehabilitation science emphasis prepares students for application to graduate programs in fields such as occupational therapy, physical therapy, chiropractic, orthotics/prosthetics and similar degrees. The rehabilitation science emphasis may also prepare students who have appropriate work experience as an undergraduate to work as coaches for alternative community training organizations. The rehabilitation science emphasis area includes 20 hours of core required courses, general education, professional emphasis requirements and required electives that complement the student's pathway. In addition, the health science program requires an internship that is appropriate for a student's career goals. Examples of internships for the rehabilitation science emphasis include: Therapeutic Equine Center, MU Adaptive Gymnastics, MU Thompson Center for Autism and Neurodevelopmental Disorders, Mizzou Therapy Services, Wonderland Camp.

### Major Program Requirements

**Occupational Therapy Assistant**

Department of Occupational Therapy
School of Health Professions
AOTA is (301) 652-AOTA and its Web address is 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association has applied for accreditation by the Accreditation Council for Occupational Therapy Education. The baccalaureate-degree-level occupational therapy assistant program has applied for accreditation by the Accreditation Council for Occupational Therapy Education. The program has applied for accreditation by the Accreditation Council for Occupational Therapy Education. The program must be granted Candidacy Status, have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT), located at One Bank Street, Suite 300, Gaithersburg, MD 20878. NBCOT’s telephone number is (301) 990-7979 and its Web address is www.nbcot.org (http://www.nbcot.org). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

Students must complete 16 weeks of Level II fieldwork as well as a baccalaureate project within 24 months following the completion of the didactic portion of the program.
- Demonstrate entry-level clinical competence to meet the demands of an ever-changing practice environment in rural and metropolitan areas and with a variety of client populations.
- Address the occupational needs of individuals and communities to improve community health outcomes.
- Engage in lifelong learning behaviors reflective of professionalism as expected in the healthcare environment.
- Develop a professional identity through a baccalaureate project in the area of clinical practice, administration, leadership, advocacy, or education.

**Major Program Requirements**

**Courses Required Pre-BHS-OTA:**

Prior to acceptance to the BHS-OTA program, students must complete a minimum of 52 credit hours which includes foundational and pre-requisite content for the professional component of the curriculum. Students will be required to earn a grade of ‘C’ or higher in each pre-requisite course and complete all science courses within four years of their application to the program. These 52 hours must include the courses listed below. A student must complete all general education requirements (p. 36) and BHS-OTA prerequisites prior to starting the professional coursework in the BHS-OTA program.

1. One Writing Intensive course is included in the BHS-OTA professional coursework that will qualify as the one writing intensive course required in your major to meet these general education requirements.

A minimum CUM GPA of 3.0 on a 4.0 scale, including all undergraduate completed coursework, is required.

**Courses Required within BHS-OTA:**

An additional 74 credit hours of Occupational Therapy Assistant curriculum will be required.

**Physical Therapy**

K. Gibson, Chair
Department of Physical Therapy
School of Health Professions
801 Clark Hall
(573) 882-7103
Fax: (573) 884-8369
https://healthprofessions.missouri.edu/physical-therapy/

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed.

Faculty

Emeritus Professor M. Brown*, M. A. Minor*
Teaching Professor T. Briedwell*, K. Gibson*
Clinical Professor C. C. Abbott*
Associate Professor E. A. Dannecker**, T. M. Guess**, S. P. Sayers**
Associate Teaching Professor D.E. Martin*, E. Prost*, K. Stephens*
Associate Clinical Professor M. S. Hargrove*
Assistant Professor J. Craggs*
Assistant Teaching Professor R. Bliss*, C. Blow*, J. Bridges*, A. Campbell**, J. Hall*, B. Willis*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

• BHS in Pre-Professional Physical Therapy (p. 627)

Graduate

The Department of Physical Therapy does not offer any graduate-level degrees. We do offer Doctor of Physical Therapy at the professional level. Please see the Professional Physical Therapy section (p. 833) in the catalog for more information.

BHS in Pre-Professional Physical Therapy

Degree Program Description

Physical Therapy involves the evaluation and treatment of physical disability and pain that may result from injury, disease or developmental disability. Prevention of disability and public education are also roles of the physical therapist. Physical therapists use tests and measurements to assess body system dysfunction and determine diagnosis and treatment. Daily living skills, including work, are also addressed. The University of Missouri offers a Doctor of Physical Therapy degree. This degree is granted to some students who gain Advanced Admission to the Doctor of Physical Therapy program. Students may not major in the BHS in Preprofessional Physical Therapy unless they have applied and been accepted for Advanced Admission to the Doctor of Physical Therapy program.

Major Program Requirements

Advanced Admission grants students the opportunity to apply to the DPT program during the junior year and enter the DPT program after completing 90 credit hours of college level coursework. Students who seek to gain early admission to the DPT program must complete a minimum of three years (six fall/spring semesters or 12 quarters of full-time enrollment) of residential coursework on a college campus prior to starting the DPT program. To be eligible to apply for advanced admission, students must have a 3.5 cumulative GPA. Students accepted for the early admission program must complete 90 credit hours, including University of Missouri requirements, University general education, and pre-requisite coursework prior to beginning the professional phase of the program. At the time of application, students may have up to three of the following courses to be completed, with no more than two planned for the spring semester: Statistics, Chemistry, Physics 1, Physics 2, Biology, Physiology, Medical Terminology and Anatomy*.

Public Health

E. Schatz, Chair
M. Teti, Associate Chair

Public health is an exciting field of work dedicated to protecting and improving the health and well-being of communities, particularly those seen as the most vulnerable. While a doctor treats people who are sick, public health practitioners try to prevent people from getting sick or hurt in the first place and promote wellness by encouraging healthy behaviors. Examples of public health and an effective public health system surround us every day. Public Health graduates will contribute to an increasingly needed skilled public health workforce that will work on protecting our current and future public health. Public Health graduates can work in numerous sub-disciplines such as epidemiology or disease tracking, biostatistics, health education, environmental health, health policy, or disaster preparedness. For example, graduates may develop health education materials or health education curricula for communities, hospitals, or health agencies. In positions at local health departments, graduates may work in teams to track emerging diseases, develop and administer HIV testing programs, or identify and address health disparities. They also may work in industry or academia researching public health problems and solutions. Graduates also may help develop policy briefs for public health agencies, assist in the development and implementation of disaster management policies and plans, or track and address environmental public health concerns. The opportunities for rewarding careers in public health are as diverse as public health itself.

Faculty

Professor B. Beernsten*, M. Hosokawa*
Assistant Professor K. Lewis, R. Raghavan*, W. Majee*,
Associate Teaching Professor S. Lee*, L. Satfran*, L. Schultz*
Assistant Teaching Professor L. Phillips*, M. Vetter*, N. Yazdani
Associate Research Professor L. Tenku-Lepper*
Assistant Adjunct Professor T. Rose*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.
Undergraduate

- BHS in Public Health (p. 629)

The mission of the Bachelor of Health Science in Public Health is to teach students to advance public health knowledge, promote healthy behaviors and environments, address and eliminate health disparities, and prevent disease. We value:

- Health as a right, and strive to reduce or eliminate inequity and injustice that affects the health and dignity of all people;
- Diversity as a strength in our education, research, and work as the right thing to do and the best strategy to engage and help the communities we care about;
- Interdisciplinary collaboration as the key to creatively solving today’s challenging health issues;
- Critical thinking to forge new solutions.

All students enrolled in the Bachelor of Health Science in Public Health (abbreviated as BHS in Pub_Hlth) Program are subject to the general regulations of the University. Students seeking admission to the BHS in Pub_Hlth Program must be admitted to the University. In addition to meeting minimum standards established by the University of Missouri, students must also comply with the rules and regulations set forth in this policy statement. Students should be aware that this degree program requires a high degree of individual research, planning, and self-motivation to be successful. Questions or concerns should be directed to the BHS in Pub_Hlth Program Director, or an academic advisor. Rules and regulations governing students at the University of Missouri can be found in the undergraduate catalog and the University’s collected rules and regulations.

For more information please email MUBPHProgram@health.missouri.edu (DHSPublicHealth@health.missouri.edu) or contact Dr. Michelle Teti (tetim@health.missouri.edu), Associate Chair of the Dept. of Public Health, with questions.

Graduate

- MPH in Public Health (p. 631)
  - with emphasis in Health Promotion and Policy (p. 633)
  - with emphasis in Veterinary Public Health (p. 633)
- Graduate Certificate in Public Health (p. 634)

Program Director: Lise Saffran

The MPH Program has two emphasis areas, Health Promotion and Policy or Veterinary Public Health; dual degrees with Public Affairs, Journalism, Social Work, and Veterinary Medicine; and graduate certificates in Public Health, Global Health, and Epidemiology. This public health coursework reflects the University of Missouri’s strength in the health professions, social work, nursing, medicine, veterinary medicine, and arts and sciences. The MPH is appropriate for students with a wide variety of undergraduate degrees including social work, political science, biology, communication, and related fields.

BHS in Public Health

Degree Program Description

Public health includes activities needed to promote and protect the health of people and the communities that they live in. While doctors treat people who are sick, the field of public health is organized around trying to prevent illness and injuries in the first place; and promote healthy behavior. People in the field of public health work to assure the conditions in which people can be healthy by tracking disease and outbreaks, preventing injuries, and studying how and why some people are more likely to suffer from poor health and health inequities than others. The many facets of public health include speaking out for laws or policies that promote smoke-free indoor air, school nutrition, and seat belts; collecting and disseminating education about how to stay healthy, and offering science-based solutions to health problems - among others.

The Bachelor of Health Science in Public Health degree prepares students for introductory careers in all core areas of public health, such as health education, epidemiology, health policy, and environmental health. The courses introduce students to key concepts, theories, problems, and solutions in public health, and also focus on the links between public health and social justice and human rights.

Major Program Requirements

All students enrolled in the Bachelor of Health Science in Public Health (abbreviated as BHS in Pub_Hlth) Program are subject to the general regulations of the University. Students seeking admission to the BHS in Pub_Hlth Program must be admitted to the University. In addition to meeting minimum standards established by the University of Missouri, students must also comply with the rules and regulations set forth in the BHS in Pub_HLTH policy document. Students should be aware that this degree program requires a high degree of individual research, planning, and self-motivation to be successful. Questions or concerns should be directed to the BHS in Pub_Hlth Program Director, or an academic advisor. Rules and regulations governing students at the University of Missouri can be found in the undergraduate catalog and the University’s collected rules and regulations.

All students with a 2.75 GPA of Record and students in their first semester who do not yet have an established GPA of Record may declare the Public Health major. The Bachelor of Health Science in Public Health program is interested in students with a wide range of life experiences and skills. Students who do not meet the 2.75 GPA of Record may petition the Associate Chair of the Department of Public Health. In addition to meeting University of Missouri and School of Health Professions requirements, students in the BHS in Public Health program must:

- Adhere to all University of Missouri guidelines and policies for admission and continued enrollment at the University as an undergraduate student.
- Maintain a 2.75 term GPA and GPA of Record (cumulative GPA listed in MyZou). Students may petition this requirement and handled on a case by case basis.
- Complete all Public Health core courses with a grade of C (2.0 on a 4.0 scale) or higher, except P_HLTH 2200 (or equivalent, i.e. HLTH_SCI 3300), which requires a grade of B– or higher.
• Complete BIO_SC 1010/1020 or 1500, a physical science course, PSYCH 1000, and SOCIOL 1000 or RU_SOC 1000 with a grade of C- or higher.
• Complete 12 approved diversity credit hours, including at least 6 hours of Public Health Electives with a grade of C (2.0 on a 4.0 scale) or higher.
• Earn a minimum of 30 credit hours taken at the 3000/4000 (junior/senior) level. Lower-division transfer courses accepted as upper-division courses at MU cannot be used to fulfill this requirement.

Students who fail to comply with the BHS in Pub_Hlth policies or do not maintain a 2.75 term GPA and GPA of Record will receive communication regarding program probation from the BHS in Pub_Hlth Program. Students who fail to achieve the term GPA and GPA of Record requirement will be given two semesters to bring their term GPA and GPA of Record up to the 2.75 requirement, provided they meet the University’s standards for continued enrollment. Students who do not meet the 2.75 GPA of Record may petition the Associate Chair of the Department of Public Health and will be handled on a case by case basis.

Students are encouraged to talk with their instructors and use the support of their advisors if they struggle with coursework. If a student is dismissed from the BHS in Public Health program, and they want to petition to stay in the program, they must submit a petition in writing to the Associate Chair of the Department of Public Health, who in collaboration with the Department of Public Health Chair will make a decision. Further appeals can be made to the School of Health Professions Senior Associate Dean.

Note: Credit accepted by the University will be accepted without limitation towards this degree. Students must Complete 30 of the last 36 credits with MU authored courses.

In addition to University of Missouri requirements, including University general education, the Bachelor of Health Science in Public Health degree requires the following:

^ Program Requirements require grades of C- or higher.
^ Major Core Requirements require grades of C or higher.
Degree Requirements

Students in the MPH must select an emphasis area from the two available options: Health Promotion and Policy and Veterinary Public Health. Requirements are determined by the emphasis area chosen. All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce. The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri’s strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

Dual Degree Options

DVM in Veterinary Medicine/MPH in Public Health

For students who are admitted to the Master of Public Health and Doctor of Veterinary Medicine, they will need to take 44 credit hours of public health coursework (22 credit hours of this coursework is with the College of Veterinary Medicine). The Doctor of Veterinary Medicine curriculum, they will need to take 147.5 credit hours of College of Veterinary Medicine courses, for a total of 191.5 credit hours.

A dual degree candidate who subsequently decides to pursue only one of these degrees must complete degree requirements subject to the same rules as a student not pursuing the dual degree.

Dual degree candidates must enroll in the Master of Public Health Program prior to the start of their third semester in the Doctor of Veterinary Medicine program. Likewise, Master of Public Health students who gain admission to the Doctor of Veterinary Medicine curriculum while enrolled as Master of Public Health students must enroll in the Doctor of Veterinary Medicine program prior to the start of their third semester in the Master of Public Health Program for consideration as dual degree students.

There will be a separate advisor and graduate committee for the Master of Public Health Program. Committee structure and governance will be based upon standards defined for the Master of Public Health Program. Governance and administration of the Doctor of Veterinary Medicine component of the dual degree will remain unchanged.

There will be two separate diplomas awarded upon completion of all degree program requirements.

The Master of Public Health Program and the College of Veterinary Medicine reserve the right to limit participation in the program, including dismissal. Those interested in pursuing the dual degree program are encouraged to discuss the possibility with advisors in both units and to submit applications for admission at the earliest possible time.

MA in Journalism/MPH in Public Health

The School of Journalism and the program in Public Health have created a dual degree option that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

MPH in Public Health

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

Total Credits: 120-121

### MPH in Public Health

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.
MPA in Public Affairs/MPH in Public Health

The Master in Public Affairs dual-degree with Master in Public Health is a 54 credit hour program comprised of 18 hours of public affairs coursework, 18 hours of public health coursework, and 18 hours of shared coursework between both programs.

Public Health 18
P_HLTH 7150 Principles of Public Health 3
or P_HLTH 7160 Interdisciplinary Perspectives in Global Health 3
P_HLTH 8150 Human Health and the Environment 3
P_HLTH 8420 Principles of Epidemiology 3
P_HLTH 8920 Social and Behavioral Sciences in Public Health 3
STAT 7020 Statistical Methods in the Health Sciences 3

Public Affairs 18
PUB_AF 8110 Introduction to Public and Nonprofit Management 3
PUB_AF 8180 Research Methods and Inquiry in Public Affairs I 3
PUB_AF 8210 Public Service and Democracy 3

Shared Courses 18
P_HLTH 8300 Health Care in the United States 3
PUB_AF 8181 Research Methods and Inquiry in Public Affairs II 3
PUB_AF 8170 Public Policy Processes and Strategies 3
P_HLTH 8980 Public Health Internship 1-99
P_HLTH 8970 Public Health Capstone 3

* Students who select a track in Public Health, or are working on a specialization in Public Affairs, will have additional coursework they can take to complete the dual-degree. Please speak with an advisor.

MSW in Social Work/MPH in Public Health with emphasis in Health Promotion and Policy

The dual degree program in Social Work and Public Health is a combination of the MSW in Social Work and the MPH in Public Health. Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://publichealth.missouri.edu/) (MPH) with an emphasis in Health Promotion and Policy. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS), full-time MSW students (both clinical or PP&A concentration) will be admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits and reduces the length of study by one academic year. If completed separately, students would be required to complete 105 credit hours (60 credit hours for RS MSW; 45 credit hours for MPH) Students completing both degrees will be required to complete 78-81 credit hours, with 51-54 of those being discipline specific (18 MPH and 33 [PP&A]; 36 [Clinical] MSW) and 27 credits shared between the two programs. Students will complete the both degree programs in 7 semesters, including one summer session.

Credit requirements, shared hours, and curriculum focus conform to the requirements of the MU Graduate School, the national accrediting body for graduate education in public health (CEPH), and the national accrediting body for graduate education in social work (CSWE). The capstone and internship will satisfy the requirements of both programs and will focus on the intersection of subject matter between social work and public health.

Admissions

Application Deadlines

- Fall semester: June 1
- Spring semester: October 1
- Summer semester: April 1
- International students*: May 1 (fall semester)

* International applicants will only be accepted for Fall Semester admission, unless the applicant is currently a University of Missouri (MU) student enrolled in another full-time program.

Admission Criteria

- Minimum TOEFL scores:
Internet-based test (iBT)  Paper-based test (PBT)
80  550

- Minimum Academic IELTS overall score: 6.0
- Minimum GRE score: not set
- Minimum GPA: 3.0 in last 60 hours of undergraduate coursework

Required Application Materials
For more information to apply click here (https://healthprofessions.missouri.edu/mph/about/admission/).

Admissions for MSW/MPH Dual Degree
Students will apply separately to each program and be admitted to both programs before they are accepted as a dual degree student. Students may apply at any point before beginning graduate school or during the first year of either program. Once accepted into both programs, the student must complete the Intent to Complete MSW/MPH Dual Degree form (http://ssw.missouri.edu/docs/msw/dualDegree.pdf).

Admissions
For admission requirements, refer to the Graduate School's website for the minimum qualifications for the degree program (http://gradschool.missouri.edu/academics/programs/) and the Graduate School (https://gradschool.missouri.edu/admissions/eligibility-process/).

Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

MPH in Public Health with Emphasis in Veterinary Public Health
Students in this emphasis area receive training in zoonotic disease prevention, food safety and other emerging issues in animal and human health. An ideal complement for an undergraduate degree in animal science, biology or related fields. For more information about this program please visit: https://healthprofessions.missouri.edu/mph/mph-degree/emphasis-areas/.

Graduate Certificate in Public Health

Requirements

This 12-credit-hour program provides students with the core public health education that they need to enhance their professional knowledge. The certificate program includes the following courses:

- P_HLTH 7150 Principles of Public Health 3
- P_HLTH 8150 Human Health and the Environment 3
- P_HLTH 8920 Social and Behavioral Sciences in Public Health
- P_HLTH 8420 Principles of Epidemiology
- STAT 7020 Statistical Methods in the Health Sciences 3

One approved elective

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission

Students wishing to pursue a Graduate Certificate in Public Health should complete the Graduate School’s online application (standardized test scores are not required). Certificate candidates must provide the MPH Program’s Personal Data Sheet and official transcripts to the MPH Program.

Applying to the Graduate Certificate Program

Students who complete the Graduate Certificate in Public Health with a minimum grade of B in each of the four courses will be recommended for admission to the Master of Public Health (MPH) program should they wish to continue their studies. The course credits earned for the graduate certificate will be credited toward the MPH degree. To apply click here (https://healthprofessions.missouri.edu/mph/about/admission/). (https://healthprofessions.missouri.edu/mph/about/admission/)

Speech, Language and Hearing Sciences

Stacy Wagovitch, Chair
School of Health Professions
301 Lewis Hall
(573) 884-2940
mucsd@health.missouri.edu

Undergraduate Advising Contacts:
Lindsey Hagglund (last names A-L)
(573) 882-8011

Jill S. Diener (last names M-Z)
(573) 882-8011

Includes the study of normal language, speech, and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. Speech, Language and Hearing Sciences includes the professions of speech-language pathology and audiology.

Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language. They also plan and carry out programs for the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments.

The professions of speech-language pathology and audiology require master’s or doctoral degrees. Acceptance to an undergraduate program does not guarantee acceptance to a graduate program. Refer to the Graduate Catalog for information about the MHS degree (p. 636).

Faculty

- Associate Professor M. Dietrich**, J. C. Goodman**, S. A. Wagovich**
- Assistant Professor R. Botezatu**, E. S. Kelley**, M. Kuruvilla-Dugdale**, N. A. Smith**
- Clinical Professor D. R. Fritz*
- Associate Clinical Professor L. B. Lawrence*, B. A. McLay*
- Assistant Clinical Professor C. Baker
- Research Associate Professor Emerita L. S. Day*

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BHS in Speech, Language and Hearing Sciences (p. 635)

Graduate

- MHS in Speech, Language and Hearing Sciences (p. 636)
  • with emphasis in Speech-Language Pathology (p. 637)

Kelsey Pritchett
301 Lewis Hall
(573) 884-6085
About Speech, Language and Hearing Sciences

The field of Speech, Language and Hearing Sciences encompasses the related but distinct disciplines of speech-language pathology (SLP), audiology, and speech, language, and hearing sciences (SLHS). Speech-language pathologists and audiologists are professionals educated in human communication and its disorders. Speech-language pathologists diagnose and treat disorders such as delayed language development, stuttering, articulation, and voice problems. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders. Speech, language, and hearing scientists are professionals concerned with exploring trends in the communication sciences, as well as developing strategies for improving or adding to the knowledge base within the fields of speech-language pathology and audiology.

MU established its first independent master’s and doctoral programs in speech-language pathology and audiology in the 1940s. The MU master’s degree program in speech-language pathology has been continuously accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology since 1966. An active local chapter of the National Student Speech Language Hearing Association is sponsored by the program.

The master’s degree prepares students for national certification in speech-language pathology and for professional clinical practice in both health care and educational settings. The doctoral degree involves a program of research and advanced study beyond the clinical master’s degree in preparation for a career in research and college teaching or administration.

Career Opportunities

A wide variety of work settings are available to speech-language pathologists and audiologists. Possibilities range from hospitals, clinics, and rehabilitation centers to schools, colleges and universities, government agencies, and private practice. Speech, language, and hearing scientists work primarily in colleges and universities, research labs and government agencies. Professional certification in speech-language pathology and audiology is awarded by the American Speech-Language-Hearing Association (ASHA). The master’s degree, which is the entry-level degree for speech-language pathologists, typically takes two years beyond the undergraduate degree. Additional prerequisite coursework is required for students with undergraduate degrees outside the field. Students wishing to pursue a career in audiology will need to attend a program that offers a clinical doctorate in audiology (AuD), the entry-level degree for audiologists.

Facilities and Resources

The department uses many cooperative facilities in Columbia, both on and off the MU campus, as clinical and scientific resources. Among these are the University Hospitals and Clinics, Rusk Rehabilitation Center, Ellis Fischel Cancer Center, Truman Memorial Veterans Hospital, Adult Day Connection, Assistive Technology Evaluation Center, Thompson Center for Autism and Neurodevelopmental Disorders, and Columbia Public Schools.

Other cooperative facilities are available both within and outside the State. The department operates the MU Speech and Hearing Clinic, a diagnostic and treatment center serving individuals with communication disorders from the campus and the community, the MU Robert G. Combs Language Preschool, and the Accent Modification and Pronunciation Program. In addition, there are many research opportunities for students in the laboratories of individual faculty where they may gain experience with sophisticated equipment for research and clinical evaluation in normal and disordered speech, language, and hearing. A master’s thesis option is available to students interested in conducting research.

Funding

All graduate students are considered for available scholarships, fellowships, work-study grants, traineeships and graduate teaching and research assistantships.

BHS in Speech, Language, and Hearing Sciences

Degree Program Description

Speech, Language and Hearing Sciences (SLHS) includes the study of normal language, speech and hearing across the life span, as well as communication disorders that result from biological, environmental, and behavioral factors. The SLHS major is the first step in preparing for careers in the professions of speech-language pathology and audiology. Speech-language pathologists evaluate the speech and language of children and adults to determine whether problems exist in such areas as voice, articulation, fluency, and receptive or expressive language, and they plan and carry out the treatment of these problems. Audiologists evaluate hearing, identify hearing loss, and participate in the rehabilitation of persons with hearing impairments. The SLHS undergraduate curriculum fully prepares students for graduate study in either of these fields. (The professions of speech-language pathology and audiology require masters or doctoral degrees). The SLHS undergraduate coursework provides students with a broad understanding of the scientific bases of speech, language, and hearing, the different types of communication disorders, and the types of diagnostic and therapeutic methods utilized in the field. Undergraduate students in the SLHS department at MU benefit from a low student-faculty ratio, practical clinical experience in our language preschool, our accent modification program, and our research labs led by outstanding faculty, and a well-established student organization.

Major Program Requirements

Students are required to apply to the Speech, Language and Hearing Sciences major. Applications for admission into the BHS program are considered once a year, and they must be submitted by February 1 of the student’s sophomore year. (Note: Later applications will be considered if open seats remain in the upcoming junior class). In most cases, applicants will have completed at least 42 hours of college credit before applying, and students who are admitted will have completed 60 hours of college credit before beginning coursework as Speech, Language and Hearing Sciences majors. A minimum GPA of 2.75 on a four-point scale and a composite score of 22 or above on the ACT are strongly recommended. However, meeting the minimum criteria and declaring a major of Pre-Speech, Language and Hearing Sciences do not guarantee acceptance into the program. A grade of C- or higher is required in the program and major core requirements.

Students must complete the following course requirements, as well as university (p. 35) and general education requirements (p. 36).
for graduation with a bachelor's degree from the School of Health Professions and the University of Missouri:

**Total Credits: 120**

**MHS in Speech, Language and Hearing Sciences**

The Master of Health Science (MHS) in Speech, Language and Hearing Sciences provides students with a background in speech, language and hearing sciences. Students in this program receive a strong academic background in current theory and application from faculty who are committed to excellence in teaching and who are involved in clinical and basic research. Students in this program are often looking to focus on research and possibly continue on to a PhD program within the discipline.

**Degree Requirements**

MHS candidates are required to complete a minimum of 48 semester credit hours in graduate-level courses with grades of B- or higher. No fewer than 24 credit hours must be earned in 8000/9000-level course work offered by the program. This program does not include an emphasis is speech-language pathology; therefore, additional credit hours are
required beyond the MHS to meet clinical practicum requirements for certification and licensure in the field. A thesis is required.

</tbody>
</table>

The thesis is prepared under the supervision of a SLHS faculty member. A thesis committee of three faculty members must be formed during the student's second semester in the program. In addition to the Departmental guidelines, students should review the MU Graduate School's Thesis Process for Master's Students (http://gradstudies.missouri.edu/academics/thesis-dissertation/process/). During the Fall semester of year one, students will work with their thesis advisor to make progress on their project.

The MHS degree in Speech, Language and Hearing Sciences typically takes students two full years to complete if their baccalaureate degree is in speech, language and hearing sciences. If their undergraduate study was in another field, the degree program requires a series of prerequisite courses that may be completed through any college or university that offers an undergraduate degree in SLHS. All students must have successfully completed a baccalaureate degree (in some field) before beginning the MHS program in Speech, Language and Hearing Sciences. For more information, contact the Department at mucsd@health.missouri.edu.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MHS in Speech, Language and Hearing Sciences and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you have applied.

The SLHS MHS program at MU is relatively small and selective. Students benefit from a low student-faculty ratio, close academic and research supervision, and a challenging yet supportive learning environment.

Faculty in SLHS are easily accessible, and strong student-faculty relationships are easily developed.

The SLHS department welcomes all visitors interested in meeting our faculty and students and touring our facilities. If you would like to visit, we recommend that you schedule an appointment by e-mailing us at mucsd@health.missouri.edu.

### MHS in Speech, Language and Hearing Sciences with Emphasis in Speech-Language Pathology

The Master of Health Science (MHS) in Speech, Language and Hearing Sciences (SLHS) with an Emphasis in Speech-Language Pathology prepares students for professional practice in speech-language pathology. Students in this program receive a strong academic and clinical background in current theory and application in the field of communication disorders from faculty who are committed to excellence in teaching and who are involved in clinical and basic research.

### Degree Requirements

MHS candidates are required to complete a minimum of 48 semester credit hours in graduate-level courses with grades of B- or higher. No fewer than 24 credit hours must be earned in 8000/9000-level course work offered by the program. A maximum of 9 credit hours in clinical practicum courses may be counted toward the 48-hour requirement. Additionally, a minimum of 375 hours of clinical practicum that is supervised by certified clinical faculty are required to meet clinical practicum requirements for certification and licensure in the field. In addition to the MU Speech and Hearing Clinic, the city of Columbia and surrounding communities in mid-Missouri provide for a wide range of clinical practicum opportunities as well as a diverse client population. Students who wish to also pursue clinical practicum experiences in other geographical locations during their final semester in the program. A thesis option also is available for students interested in research and/or further study toward the Doctor of Philosophy (PhD) degree.

SLHS 8945  Clinical Practice in Speech-Language Pathology  1-10

The MHS degree in Speech, Language and Hearing Sciences typically takes students two years to complete full time, or their baccalaureate degree is in SLHS. If their undergraduate study was in another field, the degree program requires at a minimum 30 additional credit/semester hours of prerequisite coursework. This coursework may be completed through any college or university that offers an undergraduate degree in SLHS and must include courses in both basic communication sciences and some communication disorders. It is recommended that the student have their prerequisite coursework approved by the Department’s graduate program director prior to application to the MHS degree program. Applicants do not have to complete all prerequisite coursework before applying to, or beginning, the MHS program; however, they must be, at a minimum, in the process of doing so. All students must successfully complete a baccalaureate degree (in some field) before beginning the MHS program in Speech, Language and Hearing Sciences. For more information, contact the Department at mucsd@health.missouri.edu.

MHS graduates are required to meet all academic and clinical requirements for the Certificate of Clinical Competence (CCC) awarded by the American Speech-Language Hearing Association (ASHA). A passing score of 162 on the PRAXIS II Speech-Language Pathology examination is required for graduation from the MHS program in SLHS. In addition to serving as the comprehensive examination for masters candidates in SLHS, the PRAXIS II also is required for the Certificate of Clinical Competence, for Missouri professional licensure, and for employment as a speech language pathologist in Missouri public schools. For well over 20 years, 100% of all graduates from MU's SLHS program have passed this national exam and our mean and median scores are significantly higher than the national averages. In addition, graduates of the program have enjoyed excellent job opportunities upon graduation, with many having more than one job offer before finishing their masters program.

Thesis Option

The student may choose the thesis option for the master’s degree; work toward the thesis may count for up to six semester hours of credit.

Prerequisite Coursework

All applicants to the MHS program in Speech, Language and Hearing Sciences with an emphasis in Speech-Language Pathology must have completed, or be in the process of completing, standard prerequisite course work in SLHS. Any prospective applicant with an undergraduate degree in a major field other than Speech, Language and Hearing Sciences should contact the Department prior to submitting an application to the MHS program. Prerequisite course work must be approved by the SLHS Director of Graduate Studies prior to application. Many options exist for completing prerequisite course work nationwide. Please contact the Department for more information.

Examination

During the final semester of course work, we expect master’s degree candidates to achieve a passing score on the PRAXIS II Examination in Speech-Language Pathology. This exam serves as the comprehensive examination for the degree. See the program’s online MHS Student Handbook for additional information.

Admission Contact Information

Kelsey Pritchett mucsd@missouri.edu
301 Lewis Hall; Columbia, MO 65211
(573) 884-6085

Admission Criteria

Deadline for Summer entrance (required for all applicants): February 1

- Minimum Undergraduate GPA: 3.0 (on last 60 credit hours of course work)
- Minimum TOEFL scores:
- Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal + Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011</td>

<td></td>
</tr>
<tr>
<td>On or After August 1, 2011</td>
<td>300 (preferred)</td>
<td></td>
</tr>
</tbody>
</table>

Required Application Materials

All applicants to the MHS program in Speech, Language and Hearing Sciences with an emphasis in Speech-Language Pathology must apply through the Communication Sciences and Disorders Centralized Application Service (CSDCAS) Application (https://csdcas.liaisoncas.com/applicant-ux/#/login). The Applicant Portal Link will open on July 15, 2020 to begin accepting applications for the 2020-21 academic year. Additional information about the application process may be found on the Speech, Language and Hearing MHS Application (https://healthprofessions.missouri.edu/communication-science-and-disorders/degrees/master-of-health-science-csd/#application-process) web page, which includes the correct institution code for submitting GRE scores. A personal online video interview is required.

Students who are accepted into the MHS program and commit to attending the University of Missouri will be required to complete the MU Graduate School's online application which includes an additional fee. Information will be provided when admission is offered.

Admission Process

The current graduate admission process in Speech-Language Pathology is highly competitive nationwide. All MHS admission decisions are made by the Departmental Graduate Admissions Committee.

Financial Aid from the Program

All applicants accepted for admission to the MHS program will be considered for departmental financial aid.
Additional Minors and Certificates
- Health Professions

Graduate Certificates

- Certificate in Epidemiology (p. 640)
- Certificate in Global Public Health (p. 640)
Graduate Certificate in Epidemiology

The certificate will allow prospective and current students to become competent in advanced aspects of epidemiological analysis such as assessing population groups and determining their priority health problems, empowering and mobilizing populations in a collaborative public health effort. Prerequisite courses: STAT 7020 and P_HLTH 7952.

Graduate Certificate in Global Public Health

Requirements

The Graduate Certificate in Global Public Health includes 15 credit hours of course work and a required international public health experience. This certificate may be taken independently or combined with an MPH. Course credits earned for the Graduate Certificate may also be credited toward the MPH degree. It is recommended that Graduate Certificate students start with Interdisciplinary Perspectives in Global Health.

About the College

The College of Human Environmental Sciences (HES) has never been more ready to impact the lives of the citizens of Missouri, the United States, and the world. The college continues to make a difference in the things most basic to people’s lives – nutrition, clothing, shelter, finances, family and community. The only human sciences unit in Missouri, MU HES houses an array of teaching, research, and extension activities, including exceptional undergraduate and graduate programs. In both 2019 and 2020, the College was ranked #4 in the nation for its academic programs.

A window to the world for more than 120 years and deeply rooted in the land-grant mission, the College has award winning faculty renowned throughout the state, nation and the world for their expertise. We connect our students and faculty to the ever-changing and challenging world around us. Each and every day we strive to live our mission of making a difference in the lives of others – developing and nurturing human potential.

Our alumni and friends and industry partners are instrumental in strengthening our ability to provide outstanding on-campus, experiential and study abroad experiences in each of our academic units. HES faculty have received many grants and contracts for research that strengthens families, provides access to healthy food, and, participate in collaborative and community-oriented, outreach. HES is a magnet for those who want to meet the challenges of an ever-challenging world. We make a difference!

College Level Requirements

Freshmen and transfer students entering the College of Human Environmental Sciences are recommended to enroll in GN_HES 1100 Introduction to Human Environmental Sciences; freshman Social Work students are required to enroll in SOC_WK 1110 Introduction to the Social Work Major. These courses provide an orientation to the campus and the College, as well as skills for student success, and career decision-making. In addition, the College recommends all HES students enroll in GN_HES 1234, Successful Adulting, which is a course designed to empower students to overcome challenges in the transition from student to adulthood.

T_A_M 1300  Softgoods Retailing  3
T_A_M 2200  Science of Textiles  3
T_A_M 2400  Global Consumers  3
T_A_M 2500W  Social Appearance in Time and Space - Writing Intensive  3
T_A_M 3800  Retail Entrepreneurship  3

Students also must fulfill a communications requirement by completing 3 credit hours of either COMMUN 1200, COMMUN 3571, COMMUN 3575, or a course designated within the department.

Academic Standing
A student whose term and cumulative grade point averages are 2.0 or higher is considered to be in Good Standing. (Note: The word “term” in these Regulations applies to semester, summer session, or intersession.) A student in Good Standing whose term grade point average falls below 2.0 is placed on scholastic probation. Any beginning student admitted to the University of Missouri who does not meet the minimum entrance standards as specified in Article II, Admissions, Advanced Standing, and Classification will enter on Scholastic Probation. A student on Scholastic Probation must establish a 2.0 cumulative grade point average within two successive terms: otherwise, he/she is Ineligible to Enroll. A student who has been Ineligible to Enroll for a period of one year may apply to be readmitted by writing a letter to the HES Status and Appeals Committee.

Programs
The College of Human Environmental Sciences (HES) addresses human needs and enhances individual and family life in a diverse and global society by conducting advanced research. HES faculty have earned national and international research reputations while building programs that are valued by private citizens, government, business and industry, and human services agencies. The College has more than 400 graduate students enrolled in a variety of master’s and doctoral degrees. Graduate certificates and online study are other academic options in several disciplinary areas.

- Architectural Studies
- Human Development & Family Science
- Nutrition & Exercise Physiology
- Personal Financial Planning
- Textile & Apparel Management
- Social Work

The School of Social Work (http://ssw.missouri.edu/), housed within the College, offers a CSWE accredited Master of Social Work (MSW) Program that prepares competent, effective and ethical social work professional leaders for social change. The PhD program prepares students as educators and researchers with knowledge and skills to inform policy making, program development and evaluation, and research on clinical practice issues.

Note: Prospective graduate students must apply to both the degree program of interest and to the Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column. For a look at the College’s online graduate degree programs, see Mizzou Online (http://online.missouri.edu/).

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
• BS in Architectural Studies (p. 645)
  • with emphasis in Architectural Studies (p. 645)
  • with emphasis in Interior Design (p. 647)
  • Minor in Architectural Studies (p. 648)

The Program
Our mission is to develop the next generation of leaders in the design professions, advance research to enhance the design of built environment and provide service to improve quality of life for people. Our work prepares graduates to become designers of the built environment.

Through teaching, research, and service, faculty and students conduct systematic inquiry into 1) the design process, 2) sustainable products and practices, 3) the interaction between people and the built environment, and 4) the implications of digital technologies for the above. The program highlights the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good.

For professional development and career information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) and Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html).

Coursework
Coursework includes design studios as well as lecture classes and online learning opportunities centering on the synthesis of functional, technological, aesthetic and symbolic attributes of interior design and architecture emphasizing physical environments that support human needs and aspirations.

Minors & Certificates
Students who are non-majors may receive a Minor in Architectural Studies with 15 credits.

In partnership with the College of Engineering, Architectural Studies students may receive a minor in Sustainability with required courses in Architectural Studies, and an additional 6 credits of specified Engineering coursework. Minor in Sustainability (https://engineering.missouri.edu/academics/engineering-minors/sustainability-minor/)

In partnership with the College of Engineering, Architectural Studies students may receive a minor in Construction Management with required courses in Architectural Studies, and an additional 6 credits of specified Engineering coursework. Minor in Construction Management (https://engineering.missouri.edu/academics/engineering-minors/construction-management-minor/)

In partnership with the Trulaske School of Business, Architectural Studies students may receive a minor in Minor in Entrepreneurship and Innovation Management. (p. 412)

In partnership with the College of Agriculture, Food & Natural Resources, Architectural Studies students may receive a certificate in Sustainability with required courses in Architectural Studies, and an additional 3 credits of specified coursework. Certificate in Sustainability. (https://snr.missouri.edu/undergrad-studies/sustainability-certificate/)

Admission to Professional Program

Studio Sequence
Students apply for admission to the professional program studio sequence required for undergraduate majors. Portfolio review and applications are submitted in May of each year. In order to submit a portfolio for review, students must complete ARCHST 1100, ARCHST 1200, and ARTDR_VS 1050 or ARTDR_VS 1060. More information about portfolio review and the application process can be found at the department website (http://arch.missouri.edu/academics Ugadmit.html).

Laptop Computer Requirements
A laptop computer is required when admitted to the professional program studio sequence. See department website (http://arch.missouri.edu/resources_computing.html) for recommended specifications.

Graduate
• MA in Architectural Studies (p. 648)
  • with emphasis in Design with Digital Media (p. 649)
  • with emphasis in Environment and Behavior (p. 650)
• MS in Architectural Studies (p. 650)
  • with emphasis in Design with Digital Media (p. 651)
  • with emphasis in Environment and Behavior (p. 652)

The College offers a PhD in Human Environmental Sciences with an emphasis in Architectural Studies (p. 670).

Program Contact
Dr. Bimal Balakrishnan
gradarchst@missouri.edu
137 Stanley Hall
The Program

For both the MA and MS, the student’s program of study must include a minimum of 30 hours of graduate credit beyond the bachelor’s degree (or its equivalent). Fifteen of the 30-hour minimum must be selected from courses numbered at 8000 or 9000 level; no more than 40% of the 30-hour credit requirement can be satisfied by Research, Readings and Problems coursework.

The MA is a non-thesis option culminating in a creative project. The MS culminates in a thesis meeting University thesis requirements (http://gradstudies.missouri.edu/academics/thesis-dissertation/process/).

In consultation with one’s graduate advisor, each student is required to enroll in selected “core” courses appropriate to her/his degree program. The academic program should be established in consultation with one’s advisor.

Professional Opportunities

Career opportunities for master’s and doctoral graduates of the Department and College include leadership positions in design and consulting practices in industry, government and education; and academic and administrative positions in higher education and research.

The MA degree leads to career opportunities in design firms, computer graphics and design visualization, retail establishments, corporate institutions and consultancy. Graduates contribute their skill to design of commercial, institutional, corporate and health care facilities, as well as residential settings. They collaborate with related design professionals providing solutions to social and environmental problems.

Graduates of the MS and PhD degree programs pursue academic and professional careers integrating design theory with their research skills.

See Career Information for Graduate Students (http://arch.missouri.edu/resources_careers.html) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

Online Study

Online courses and distance-learners are taught by the same accomplished professors. This is a fully integrated model of online instruction with established quality. The Department of Architectural Studies offers 100% online graduate education:

- Master of Arts (http://arch.missouri.edu/academics_masters.html#page_MA) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Master of Science (http://arch.missouri.edu/academics_masters.html#page_MS) in the emphasis areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).
- Doctor of Philosophy (http://arch.missouri.edu/academics_phd.html) in Human Environmental Sciences and in the concentration* areas of Environment and Behavior (http://arch.missouri.edu/academics_ebs.html) and Design with Digital Media (http://arch.missouri.edu/academics_ddm.html).

Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html)* as stand-alone coursework or as part of a masters or doctorate.

Stand-alone courses for non-degree (http://gradschool.missouri.edu/admissions/eligibility-process/non-degree-applicants/) graduate students. Students select online courses from an extensive menu for professional advancement. Up to 12 credit hours of graduate credit taken as a non-degree graduate student may be applied to a graduate degree program upon approval of the academic program if the student is accepted.

- concentrations will not appear on diplomas or transcripts

Graduate courses are delivered as:

- Asynchronous or Synchronous. Asynchronous coursework is completed independently according to the provided schedule. Synchronous courses will include real-time discussion during arranged weekly class periods via video conferencing technology.
- Semester-based or self-paced online.

See MizzouOnline (http://online.missouri.edu/course-search/) for online offerings open for registration.

Architectural Studies Graduate Degrees

Graduate students select one of two areas of emphasis: 1) Environment and Behavior studies with a creative project leading to an MA degree and with research leading to the MS and PhD degrees OR 2) Design with Digital Media studies leading to the MA, MS and PhD degrees. The graduate program builds on Architectural Studies course work and a core of courses in design theory, research methods, graduate seminars, research and readings in digital media and environment and behavior.

Design Research Concentration

The Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) is developed for

- Designers engaged in architecture, interior design, graphic, or interaction design who require applied research skills from companies/organizations.
- Researchers with a background in social sciences, anthropology etc. who conduct research for creative product development in industry - Healthcare IT companies, Product Design firms, corporate research labs etc.
- Business and market professionals to advance understanding of design research for marketing.

Graduate Program Requirements

The academic program should be developed in consultation with an advisor. See the Graduate School (http://gradstudies.missouri.edu/) website for guidelines and requirements regarding course work and role of committee. Students are required to self-report academic performance, degree program milestones and related achievements in scholarship, research and creative work on an annual basis. Students complete an annual review. See department Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) for details.

Financial Aid from the Program

Limited teaching and/or research assistantships and scholarships are available to graduate students. GTA appointments are available to resident graduate students and are based on the match between the
BS in Architectural Studies

Degree Program Description

Architectural Studies promotes connections between people and place, and between interior design and architecture with the intention of preparing graduates to become lifelong designers of the built environment. Students in this program conduct systematic inquiry into the design process, sustainable products and practices, the interaction between people and the built environment, and digital technologies. The program highlights research as it advances the interdisciplinary interaction between interior design, architecture, the human sciences and aesthetics to improve quality of life for the public good. Following the freshman year students must submit a portfolio of their work for acceptance into the professional phase of the program.

Major Program Requirements

The BS in Architectural Studies connects interior design, architecture, the human sciences and aesthetics to improve quality of life. Students are engaged in the processes, procedures, observations, and techniques of design.

The BS is offered with two emphasis area options: Design.

The BS in Architectural Studies has emphasis areas in Architectural Studies (p. 645), and Interior Design (p. 647). Please see the individual emphasis area pages for degree requirements and admissions information.

Semester Plan

The BS in Architectural Studies has emphasis areas in Architectural Studies (p. 645), and Interior Design (p. 647). Please see the individual emphasis area pages for degree requirements and admissions information.

Major and Career Exploration

The University of Missouri has many resources to assist you in exploring majors and career possibilities. For guidance, visit the Majors and Careers (https://career.missouri.edu/majors-careers/) website or view specific resources below.

- If you are considering a change of major or are exploring multiple majors, schedule an appointment with an advisor in the Discovery Center (https://discoverycenter.missouri.edu/) by calling (573)884-9700 or through MU Connect (https://mizzou.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=service/3761489) Discovery Center service in your success network.

- If you have decided on a major, visit an academic advisor in the School or College that you are interested in to discuss the process of declaring the major (https://advising.missouri.edu/majors-minors/changing-major/).

  - If you would like to learn more about your career interests, abilities, values and talents, visit the MU Career Center (http://career.missouri.edu/connect/). No Appointment is necessary to explore career options with one of our staff members.

  - If you would like information about MU majors and degree programs, visit:
    - the Degrees, Majors (Degree Programs), Emphasis Areas, Minors and Certificates (p. 20) page in the catalog,
    - the MU Majors (https://majors.missouri.edu) website.

For additional major and career exploration resources, visit Major & Career Exploration (p. 34) in the catalog.

BS in Architectural Studies with Emphasis in Architectural Studies

Degree Program Description

The Architectural Studies emphasis is a four-year, professional baccalaureate program often referred to as a Pre-Architecture program. The architectural studies emphasis prepares students for success in entry-level jobs in the design and construction industry and also to prepare students for advanced study in architecture M. Arch. (Masters of Architecture) programs. See Opportunity for Employment (http://arch.missouri.edu/academics_arch.html), Careers in Architectural Studies (http://arch.missouri.edu/resources_arch.html), and Spotlight on Alumni (http://arch.missouri.edu/alumni.html). Students benefit from the enriched academic research environment and the emphasis on the thinking and making of physical environments that address the needs and aspirations of people. The program strives to blur the boundaries between architecture and interior design by stressing the experience of people in buildings. Students interested in becoming a licensed architect continue their education in graduate architectural programs that are accredited. Missouri residents may benefit from the Reciprocity Agreement with the University of Kansas which may waive out of state tuition for their M. Arch. degree. Alumni are admitted to many highly ranked graduate programs throughout the U.S. With coursework being part of a CIDA (http://accredit-id.org/) Accredited Interior Design Program, pre-architecture students may be eligible for the NCIDQ (https://www.cidq.org/) examination upon graduation. For more information see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. See Architectural Studies web page for more highlights (http://arch.missouri.edu/home_welcome.html) of program.

Major Program Requirements

Coursework

Students complete University of Missouri general education coursework that includes physics and calculus. Professional design coursework is in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning
environment emphasizing personal intellectual development as well as content learning. Course work includes studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes architecture that support human needs and their aspirations. See Studio Description (http://arch.missouri.edu/academics_arch.html) on the department website for more information.

Application for the Professional Program
After completing three required classes of Drafting (ARCHST 1200), Visual Design (ARCHST 1100), and Drawing (ARTDR_VS 1050) during the first year, students apply for admission to the studio sequence. Applications are made at the end of the spring semester of the first year granting permission to enroll in Studio I. The application form is available at the department's web site. (http://arch.missouri.edu/academics_ugadmit.html) Transfer Coursework is evaluated by faculty on a case by case basis. Please contact the Undergraduate Advisor for more information.

| Grade requirements
The University requires the following courses to have a grade of C- or above: ENGLSH 1000, ARCHST 4323 Sustainable Technologies, ARCHST 1600W Fundamentals of Environmental Design and
ARCHST 3600W Human Factors Programming meeting Writing Intensive requirements, and ARCHST 4815 Construction Documents and BIM satisfying the capstone experience.

BS in Architectural Studies with Emphasis in Interior Design

Degree Program Description

The Interior Design emphasis is a four-year, professional baccalaureate program accredited by the Council for Interior Design Accreditation (CIDA). The interior design program's mission is to prepare students for success in entry-level interior design practice and advanced study. Core competencies protect human health, safety, and welfare through the design of interior environments. Our educational philosophy is grounded in the values of creating sustainable and meaningful interior spaces to integrate aesthetic quality and compassion for the human condition. The NCIDQ definition (https://www.cidq.org/) clarifies the scope of the services and tasks of the profession. Curriculum incorporates signature characteristics of interior design such as furniture, fixtures, and equipment, color, and interior materiality. The program benefits from its enriched academic research environment with outstanding faculty. Emphasizing the thinking and making of spaces, our interior design program stresses the inside of buildings and those experiences that help to create peoples' individual meaning in life. For more information on professional advancement and examples of opportunities see Careers in Interior Design (http://arch.missouri.edu/resources_pd.html) with links to professional organizations and regulations. Also see post-graduate placements at Spotlight on Alumni (http://arch.missouri.edu/alumni.html). See Architectural Studies web page for highlights (http://arch.missouri.edu/home_welcome.html) of program.

Major Program Requirements

Coursework

Students complete University of Missouri general education coursework and professional interior design coursework in the following content areas: basic creative development, design planning and analysis, design communication, technical knowledge, history of art/architecture/interiors, business, and design theory.

Studio Description

It is the design studio setting where learning by doing is experienced and realized. The studio is a collaborative and cooperative learning environment emphasizing personal intellectual development as well as content learning. Course work includes studios and coursework centering on the synthesis of functional, technological, social, aesthetic and symbolic attributes of interior design that support human needs and their aspirations. See Studio Description (http://arch.missouri.edu/academics_id.html) on the department website for more information.

Application for Professional Program

After completing the three required classes of Drafting (ARCHST 1200), Visual Design (ARCHST 1100), and Drawing (ARTDR_VS 1050) during the first year, students apply for admission to the studio sequence and submit work from these classes in their design portfolio. Applications are made at the end of the spring semester granting permission to enroll in Studio I. The application form is available at the department's web site (http://arch.missouri.edu/academics_ugadmit.html). Transfer coursework is evaluated by faculty on a case by case basis. Please contact the Undergraduate Advisor for more information.

For exceptional students, with consent of instructor and department approval, additional course work in the department may be selected.

**Application for Minor**

Complete the Apply for HES Minor form (http://arch.missouri.edu/academics_minor.html).

**Online Minor in Architectural Studies**

See Online Study and Degrees (http://arch.missouri.edu/academics_online.html) in Architectural Studies for a listing of online courses currently open for registration.

**MA in Architectural Studies**

- Degree Requirements (p. 649)
- Non-Thesis Requirements (p. )
- Admissions (p. 649)

The creative, project-based MA plan of study is preparation for advanced careers in the design professions and higher education. The non-thesis project is conducted in one or two areas: (1) environment and behavior or (2) design with digital media. The MA project is an in-depth investigation of a design problem culminating in a design solution or visual research presentation.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), and Architectural Studies
Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

Design Research Concentration
A Design Research concentration is offered for:

- Designers engaged in interior design, architecture, graphic or interaction design who would like to acquire applied research skills for companies or organizations.
- Researchers with a background in social sciences, anthropology, etc. who conduct research for creative product development in industries such as Healthcare, IT companies, Engineering, etc.
- Business and marketing professionals to advance understanding of design research for marketing.

The coursework for the concentration is applied to the program of study. For specifics, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on the department website. Concentrations do not appear on diplomas or transcripts.

Degree Requirements
The MA degree must include a minimum of 30 hours of graduate credit beyond the bachelor’s degree (or its equivalent). Fifteen of the 30-hour minimum must be selected from courses numbered at 8000 or 9000 level; no more than 40% of the 30-hour credit requirement can be satisfied by Independent Study style courses such as Research, Readings and Problems coursework.

In consultation with one’s graduate advisor, you will enroll in “core” courses and additional courses appropriate to your degree program. The academic program should be established in consultation with your adviser at the end of the first full semester.

Non-Thesis Requirements
The creative project-based MA plan of study is preparation for advanced careers in the design professions and higher education. The project (instead of a written thesis) is conducted in one or two areas: (1) environment and behavior or (2) design with digital media. The MA project is an in-depth investigation of a design problem culminating in a design solution or a visual research presentation.

Admission Criteria
Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Architectural Studies Graduate Program (http://arch.missouri.edu/graduate.html) and the minimum requirements of the graduate faculty, enforced by the Graduate School (https://gradschool.missouri.edu/admissions/eligibility-process/).

Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Required Application Materials
See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admission requirements.

Apply online to the Graduate School (https://gradschool.missouri.edu/).

MA in Architectural Studies with Emphasis in Design with Digital Media

The Design with Digital Media program attracts a diverse group of talented, intellectually engaged graduate students for interdisciplinary and trans-disciplinary exploration in the design arts. The curriculum enables students to investigate innovative approaches to contemporary theory and practice, and fosters both individual inquiry and high-level collaboration. The primary objective of the program is to prepare creative critical thinkers to become leaders in their fields.

Structured to promote thought and work that crosses traditional lines between disciplines, the digital media curriculum challenges students to consider non-standard approaches to the computer as a creative and expressive medium. Study of technology, art and design is balanced with inquiry grounded in conceptual, critical, social, cultural and historical considerations.

Design with Digital Media, as an integral part of the design process, focuses on graphic ideation and the application of computer technology for architecture, interior and related disciplines. This program of study has an emphasis on design with digital media leading to the MA degree. Applicants are strongly encouraged to review the research interests of program faculty (http://arch.missouri.edu/people.html) prior to applying.

Current study areas in the digital media program include:

- Design computing and cognition
- Design process using digital media and creativity research
- Virtual reality (VR) and augmented reality (AR) technologies for design visualization
- Advanced visualization technologies for environment-behavior simulation
- Building Information Modeling (BIM)
- Building Performance Simulation
- Human-computer interaction aspects of digital tools for design

See resources in our Immersive Visualization Lab (iLab web site). (http://arch.missouri.edu/ilab/)

The culmination of the degree is a written and/or visual project employing computer applications for design methods. Applicants interested in the Design with Digital Media option should contact the Director of Graduate Studies, for course content and research proposals. Also see the Department’s website (http://arch.missouri.edu/) and the Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

Degree Requirements
Successful completion requires a minimum of 30 credit hours beyond the baccalaureate degree. Required courses include:
ARCHST 8050  Research Methods in Environmental Design  3
ARCHST 8850  Seminar in Environmental Design  1
ARCHST 8833  Theoretical Perspectives of Design Computing  3
ARCHST 8820  Graduate Digital Design Studio  3

Remaining credits to meet degree requirements can be chosen from graduate courses (7000 level or above) listed on the Architectural Studies Graduate Course website (http://arch.missouri.edu/academics_gradcourses.html). A minimum of 15 credit hours should be at the 8000 or 9000 level and no more than 40% of the 30-hour credit requirement can be satisfied by independent study style courses such as Readings, and Problems coursework.

Admissions
Applicants are required to meet the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MA in Architectural Studies with Emphasis in Environment and Behavior

The Environment and Behavior focus is on the multifaceted relationship between people and their physical, social and cultural environments. Environment-behavior research explores a variety of environments, linking them to a range of behavioral concerns. This program is suitable for persons who seek careers in research, consulting, and/or teaching in architecture, interior design, and other environmental design disciplines. A design project leads to the MA degree. Applicants are strongly encouraged to review the research interests of program faculty (http://arch.missouri.edu/people.html) prior to applying.

Focus areas in environment and behavior include:
- Health and Well-Being
- Sustainable Design
- Design Education
- Social and Cultural Bases of Design
- Place Attachment
- Environments for Learning
- Inclusive Design/Accessibility
- Environment and Aging

• Housing and Neighborhood Design
• Programming, Design and Post-Occupancy Evaluation

The culmination of the degree is a written and/or visual project. Applicants interested in the Environment and Behavior option should contact the Director of Graduate Studies. Also see the Department web site (http://arch.missouri.edu/) and the Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

MS in Architectural Studies

Research is conducted in one of two emphasis areas: (1) environment and behavior or (2) design with digital media. Within each of these emphasis areas, specific course work is chosen on the basis of subject matter and the type of research method selected: quantitative, qualitative or a combination of both. The MS may be a research-based study or a design and research-based design project. The MS culminates in a thesis meeting University thesis requirements. The MS plan of study is in preparation for advanced professional practice or preparation for the doctoral degree.

Also see the Department web site for additional information: Masters Programs (http://arch.missouri.edu/academics_masters.html), Emphasis Areas (http://arch.missouri.edu/graduate.html), Online Study (http://arch.missouri.edu/academics_online2.html), and Architectural Studies
Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf).

**Design Research Concentration**

The Design Research Concentration can be applied toward the program of study. The concentration is of interest to:

- Designers engaged in interior design, architecture, graphic or interaction design who wish to acquire applied research skills for companies/organizations.
- Researchers with a background in social sciences, anthropology, etc. who conduct research for creative product development in industries such as Healthcare, IT companies, Engineering etc.
- Business and marketing professionals to advance understanding of design research for marketing.

For more information, see Design Research Concentration (http://arch.missouri.edu/academics_DesignResearch.html) on the department's web site. Concentrations do not appear on diplomas or transcripts.

**Degree Requirements**

The student's program for MS degree must include a minimum of 30 hours of graduate credit beyond the bachelor's degree (or its equivalent). Fifteen of the 30-hour minimum must be selected from courses numbered at 8000 or 9000 level; no more than 40% of the 30-hour credit requirement can be satisfied by Independent Study style courses such as Research, Readings, and Problems coursework.

**Thesis Requirements**

Research is conducted in one of two emphasis areas: environment and behavior studies (see http://arch.missouri.edu/academics_ebs.html) or design with digital media (see http://arch.missouri.edu/academics_ddm.html). Within each of these emphasis areas, specific coursework is chosen based on subject matter and the type of research method selected: quantitative, qualitative, or a combination of both. The coursework lays the foundation for a research-based, written thesis investigating a theoretical or applied problem using appropriate research methods. The research-based MS study is often undertaken as preparation for the doctoral degree.

**Admission Criteria**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Architectural Studies Graduate Program (http://arch.missouri.edu/graduate.html) and the minimum requirements of the graduate faculty, enforced by the Graduate School (https://gradschool.missouri.edu/eligibility-process/). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.

**Required Application Materials**

See Application and Admission (http://arch.missouri.edu/academics_gradadmit.html) for Department's graduate admission requirements.

Apply online to the Graduate School (https://gradschool.missouri.edu/).

**Admission Contact**

A registered dietitian (RD) or registered dietitian nutritionist (RDN) has completed education and training established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) (https://www.eatrightpro.org/acend/). In order to be eligible to become a RD/RDN, one must complete required coursework and supervised practice from an ACEND accredited dietetics program and pass the national Registration Examination for Dietitians. The RD/RDN holds a minimum of a bachelors degree. In 2024 candidates must have a masters degree in order to take the national Registration Examination for Dietitians.
Students who complete the Coordinated Program in Dietetics at Mizzou will meet the requirement to take the national exam.

The department offers a Bachelor of Science in Nutrition and Exercise Physiology with an emphasis in Nutrition and Foods, followed by entry into the Masters of Science in Dietetics.

**Faculty**

**Associate Professor**  S. Gable**, J. Padilla**, C. A. Peterson**, R. S. Rector**, V. Vieira-Potter**  
**Assistant Professor**  J. Limberg*, K. Anguah*  
**Teaching Associate Professor**  J. Bean*, D. Smith  
**Teaching Assistant Professor**  S. Buckallew*, M. Raedeke*,  
**Adjunct Instructor**  B. Baker, A. Bryant, S. Burcks, K. Eifert, T. Roberts, M. Stevens  
**Extension Faculty**  J. Britt-Rankin*, K. Keller, K. Miller, S. Mills-Gray, R. Mott, J. Tryfier, K. Weitzel, S. Wood  
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.  
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

The department of Nutrition and Exercise Physiology offers a BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 677). Only students who successfully complete prerequisites, have been admitted to the Coordinated Program (CP) and completed all undergraduate requirements for the Coordinated Program will receive this emphasis area for the bachelor's degree. The completion of this bachelor's degree only does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification statement is given after completion of only the bachelor's degree. Students who receive this degree emphasis and are in good academic standing will transition seamlessly to the Coordinated Program's fifth year master's program.

Application requirements to the CP are posted each year on the department's webpage at http://ns.missouri.edu/. Applications are due in January. To be eligible to apply, the applicants must have a minimum 3.2 GPA and have completed or be able to complete the first four semesters of courses listed under the course requirements for nutrition and foods (http://nep.missouri.edu/dietetics.html). The student must be enrolled in or already have completed NEP 2340 and BIOCHM 3630 (or equivalent transfer course approved by faculty) at the time the CP application is submitted. Students must achieve a final course grade of B- or better in both, as well as earn a minimum UM System GPA term of 3.0 for the semester they are accepted into the program. Failure to meet the criteria will result in forfeiture of their slot in the Coordinated Program. Accepted Students must also successfully pass background checks, a drug screen and submit the required health records prior to starting the program.

**Graduate**

- MS in Dietetics (p. 653)

The Coordinated Program in Dietetics (http://nep.missouri.edu/dietetics.html) (CP) at the University of Missouri has a rich tradition. Established in 1972, it is among the oldest accredited coordinated programs in the United States. The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics and is approved for accreditation through 2024.

The Coordinated Program in Dietetics prepares students to become Registered Dietitian/Nutritionists (RD/N). RDNs specialize in applied nutrition and work in a variety of practice settings, such as hospitals and clinics, schools, business and industry, private practice, and public health clinics. Upon completion of the program, students are eligible to take the national Registered Examination for Dietitians (RD Exam). The four-year pass rate for first-time test takers is 98%.

This degree is a non-thesis Master of Science Coordinated Program in Dietetics which offers a concentration in Medical Nutrition Therapy. In our coordinated program both the didactic coursework and field work/supervised practice experience are conducted simultaneously. It is a combined BS/MS program with application and acceptance occurring at the undergraduate level. It is not a stand-alone master's program, nor does it offer a didactic only program.

The master's degree is only for students who have been accepted into the Coordinated Program in Dietetics. See BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods (p. 677) for application information and criteria to apply.

After acceptance to the program, students must successfully complete 2 years of coursework at the undergraduate level, at that time they will receive their bachelor's degree in Nutrition and Exercise Physiology with an emphasis in Nutrition and Foods. If all requirements for the program are met, the student will transition seamlessly into the graduate program. Requirements for continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu/).

Upon completion of their final year in the program, students will receive a Masters in Dietetics. At that time, they will have completed all coursework and supervised practice within the Coordinated Program. Both are needed in order to receive their verification statement. In addition, both the BS and MS must be conferred as evidenced by their MU transcripts to be eligible to receive the verification statement. This statement is required for students to be eligible to take the National Registration Examination for Dietitians.

**MS in Dietetics**

**Degree Requirements**

The Coordinated Program in Dietetics requires a minimum of 30 hours of graduate courses in the program. Students must maintain a 3.0 GPA to remain in the program. This program is not a stand alone master's program, it is part of a BS + MS program. The first two years are prerequisites for admission and the last three years are in the Coordinated Program in Dietetics. Within the three years, students complete their BS in Nutrition and Exercise Physiology with an emphasis in Nutrition and Food, and then the final year earn a Masters in Dietetics.
Below are listed the graduate courses to complete the MS portion of the program. All graduate level courses require a minimum grade of B.

Total Credits: 152

Thesis/Non-Thesis Requirements

This is a professional program and will not require a Thesis, but will require a comprehensive exam.

Admissions

This degree is only for students accepted into the Coordinated Program in Dietetics and who have completed their first two years in the actual program. These students will have earned a bachelors degree in Nutrition and Exercise Physiology with an emphasis in Nutrition and Foods. Application information and criteria on how to apply can be found at http://nep.missouri.edu/nutrition_foods.html (http://nep.missouri.edu/dietetics.html) for application information and criteria.

Requirements for program continuation during the master's year will be posted on the Nutrition and Exercise Physiology website (http://ns.missouri.edu/).

**Associate Professor** S. Gable**, J. Padilla**, C. A. Peterson**, R. S. Rector**, V. Vieira-Potter**

**Assistant Professor** J. Limberg*, K. Anguah*

**Associate Teaching Professor** J. Bean*, D. Smith

**Teaching Assistant Professor** S. Buckallew, M. Raedeke*,

**Adjunct Instructor** B. Baker, A. Bryant, S. Burcks, K. Eiffert, T. Roberts, M. Stevens

**Extension Faculty** J. Britt-Rankin*, S. Mills-Gray, K. Keller, K. Miller, R. Mott, J. Tryfter, K. Weitzel, S. Wood

* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Fitness Programming and Management (p. 655)

This program is scheduled to start in the Fall of 2021

This program is designed as a 100% online degree program leading to a BS in Fitness Programming and Management. This degree is designed for students who are interested in fitness and program management, but do not wish or are unable to be on campus. It is a good option for both traditional and non traditional students, including those in the military.

The program is housed within the Department of Nutrition and Exercise Physiology at the University of Missouri. The department's mission is to improve the health of Missourians and the larger population through research, teaching, and outreach related to nutrition and physical activity. We strive to be a diverse set of leaders, innovators, and educators who promote improved human health through our focus on nutrition and physical activity.

The Bachelor of Science in Fitness Programming and Management provides students with the knowledge and skills to assist individuals across the lifespan in adopting physical activity, exercise, and other healthy behaviors that lead to increased fitness, wellness and optimal health. Students are prepared to pursue national certifications provided by professional organizations in fields of study related to exercise, strength and conditioning, and sports medicine. Graduates will be experts at teaching exercise to most populations. Additionally, students will complete the coursework needed to earn a Minor in Business preparing them for a variety of jobs in the fitness industry and beyond.

Information on the minor, courses, grades and other qualifications to earn the minor can be found at: https://business.missouri.edu/programs-admissions/undergraduate/business-administration/minors-and-certificates/business-minor (https://business.missouri.edu/programs-admissions/undergraduate/business-administration/minors-and-certificates/business-minor/)

Learning objectives:

- Skills in designing, implementing, administering and evaluating effective exercise/health promotion programs in private, work-site, community, health care, medical, and agency settings.
- Foundational knowledge in fitness, exercise, and physical activity.
- Methods for helping people make healthy behavior changes and lessen unhealthy behaviors.
- Competencies required to be qualified to take a national certification from the American College of Sports Medicine as a Certified Personal Trainer (ACSM-CPT) or Group Exercise Instructor (ACSM-GEI).

Students who earn a degree in Fitness Programming and Management often pursue careers in fitness centers, college and university wellness and health promotion, community health agencies, fitness manufacturing companies, hospitals and medical facilities, insurance companies, nonprofit disease prevention agencies, private health care organizations, schools, state and county health departments, wellness centers, and work-site wellness and health promotion.

Major Program Requirements

This program is designed as a 100% online degree program leading to a BS in Fitness Programming and Management and requires a minimum of 120 total credit hours to complete. General Education requirements and approved courses from other institutions and entities may be transferred for credit, these will be evaluated by admissions and the department for equivalency. Upon completion of this academic program and as part of the student's capstone project, the student will be required to sit for, and pass, the ACSM Personal Training Certification.

Students must complete all university requirements (p. 35), including general education (p. 36), and those of the College of Human
Environmental Sciences (p. 641) in addition to the degree requirements below.

The Department of Human Development and Family Science (HDFS) offers a BS in Human Development and Family Science, which combines basic understanding of human development with preparation for professional service to individuals and families. Career opportunities are primarily found in human service agencies serving children, adolescents, older adults, parents and families. The human development and family science major also prepares the student for graduate study in HDFS and related fields. Students in the HDFS major must select one of the emphasis areas listed above. (Note: Emphasis areas appear on transcripts but not on diplomas.)

Graduate

- MA in Human Development and Family Science (p. 665)
  - with emphasis in Family and Community Services (p. 666)
  - with emphasis in Gerontology (p. 667)
  - with emphasis in Youth Development (p. 667)
- MS in Human Development and Family Science (p. 668)

Director of Graduate Studies
Ashlie Lester
411 Gentry Hall
573-882-1301
http://hdfs.missouri.edu/

The College of Human Environmental Sciences offers a PhD in Human Environmental Sciences with emphasis in Human Development and Family Studies (p. 671). They also offer Graduate Certificates in related areas: Youth Development Specialist (p. 710), Youth Development Program Management and Evaluation (p. 709), and Gerontology.

Our department has nationally recognized faculty whose research productivity consistently has been ranked in the top 5% of the 235 family studies programs across the country. We actively prepare our students to become successful academic scholars both in terms of research and teaching. The range of careers for which we prepare our students is unparalleled. Our graduates have found success in academia (they are faculty at all ranks at all levels of institutions), administration, program evaluation, and program development. We have developed an outstanding reputation as a place to study individual and family diversity and multiculturalism across the life course. Because we define multiculturalism broadly, our focus is on the multitude of ways that individuals and families may differ, including but not limited to race, ethnicity, socioeconomic status, age, gender, family structure, nationality, geographic location, and sexual orientation.

Financial Aid from the Department
All applicants for the on-campus program are automatically considered for assistantships, fellowships, and other funding packages. Check the HDFS website or ask the program contact for additional details.

About the Master's Degrees
The Department of Human Development and Family Science (HDFS) offers Master of Arts (applied emphasis) and Master of Science (research emphasis; on-campus only) degrees. The MA and MS degrees prepare students for positions in junior college or college teaching and leadership in public and private human services institutions. The MS degree also provides research training toward the PhD degree.

Areas of Study
On-campus students create an individualized plan of study that includes theory, research methods, family diversity, and capstone courses. We also offer a dual-degree program in HDFS and the School of Law. Online students may select an MA specializing in family and community services.

Master's Plan of Study Options
Programs are structures to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences. The number of hours required for each master's degree is as follows:

Child Life: 30 (fast track) or 36 hours
Dual MS or MA and JD: approximately 113 hours
Family and Community Services: 36 hours
Gerontology: 36 hours
Human Development and Family Science: 36 hours
Youth Development: 36 hours

About the Online Certificate Programs
HDFS offers three online graduate certificates with specialization in youth development specialist (13 hours), youth development program management and evaluation (13 hours), and gerontology (15 hours).

BS in Human Development and Family Science

Degree Program Description
The Human Development and Family Science program is developed from a foundation of human development and family science courses. It is essential for the student working with children, adolescents or adults to understand and to be able to maximize the resources offered by the family. It is equally important for the student concerned with the quality of family life to recognize the intricate spiral of changing needs in the growing individual.

Major Program Requirements
A students must choose an emphasis area and complete a minimum of 120 credit hours to receive the degree.

Majors in all of the emphasis areas in HDFS must complete the core courses below and additional course requirements (including General Education (p. 36) courses and Requirements in Related Areas) specific to each emphasis area. Requirements for each emphasis area are listed on their respective catalog pages: Child Development and Education (p. 658), Child Life Specialist (p. 659), Early Childhood Education in a Mobile Society (p. 661), Family and Consumer Sciences Education (p. 662), and Family and Lifespan Development (p. 662).

Students must achieve a grade of C (2.0) in all HDFS courses taken to meet degree requirements.

1 H_D_FS 1600 should be taken before H_D_FS 2300 and any 3000/4000-level H_D_FS course.
2 Statistics is recommended prior to H_D_FS 2200. Consult with advisor for appropriate course options.
3 Some HDFS students may be able to select H_D_FS 2400 (non-WI) Student should consult with academic advisor prior to course enrollment for appropriate course selection.

Child Development Laboratory Courses such as H_D_FS 3500, H_D_FS 3700, and H_D_FS 4971 have pre/co-requisites and require the consent of the instructor. Because enrollment may be limited, students must see the assigned HDFS academic advisor to be placed on an enrollment permission list. Students in the Family and Lifespan Development emphasis may substitute another practicum experience with consent of department advisor.

In addition to the required core courses listed above, the degree program is completed with courses selected from within the department, from other areas in the College of Human Environmental Sciences, and from the social sciences and allied professional fields such as education, recreation, business and health. For some students, courses in the arts, humanities, or biological sciences may be appropriate.

Background Checks, Health Screenings and Other Required Elements:
It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program, and prior to beginning any practical or clinical education experience, students may be required to:

- pass multiple criminal background checks
- pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- provide proof of health insurance coverage
- provide proof of required immunizations
- provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.

Semester Plan
The BS in Human Development and Family Science has emphasis areas in Child Development and Education (p. 658), Child Life Specialist (p. 659), Early Childhood Education in a Mobile Society (p. 661), Family and Consumer Sciences Education (p. 662), and Family and Lifespan Development (p. 662). Please see the individual emphasis area pages for semester plans specific to the emphasis area.

BS in Human Development and Family Science with Emphasis in Child Development and Education

Degree Program Description
The Child Development and Education emphasis provides instruction and experiences to help students gain competence in understanding,
guiding, and teaching young children. Coursework includes hands-on learning through the Child Development Lab, a full-day, full-year teacher-training lab school located on the MU campus. Graduates are prepared for positions of responsibility and leadership in public and private nursery schools, child care centers, infant-care programs, after-school programs, and other educational and social service facilities for children. Additional job opportunities include group homes, shelters, child care and provider training agencies, Parents as Teachers, and YMCA/YWCA.

Major Program Requirements

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below, and must achieve a grade of C (2.0) in all HDFS courses taken to meet degree requirements. A minimum of 120 credit hours must be completed.

BS in Human Development and Family Science with Emphasis in Child Life Specialist

Degree Program Description

The Child Life Specialist emphasis prepares students to support child development and family coping within the context of pediatric illness, injury, medical treatment, and grief in a variety of health care and community settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce the anxiety and stress related to illness, disability, hospitalization and medical procedures. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support.
support, help them understand psychosocial needs, and provide tools to help them prevent or minimize psychological trauma. Courses focus on understanding normal and exceptional child and family development, effective methods of working with children and families, as well as integration of theory and research into hands-on clinical practice experiences. In addition to a 100-hour practicum experience (selection is on a competitive, space-available basis) at MU’s Children’s Hospital, the student’s last semester is spent off-campus completing a 600-hour, unpaid clinical internship in a pediatric hospital setting. Students who successfully complete the degree program are eligible to take the Child Life Professional Certification Exam presented by the Child Life Certification Commission (CLCC).

Major Program Requirements

This academic emphasis requires that students successfully complete child life volunteer, practicum, and clinical internship experiences to attain this degree, as well as be eligible to take the Child Life Professional Certification Examination to obtain the CCLS credential after graduation. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any clinical education experience in child life. Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to the beginning of these experiences may necessitate dismissal from the child life emphasis in HDFS. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below, and must achieve a grade of C (2.0) in all HDFS courses taken to meet degree requirements.

1. H_D_FS 1600 should be taken before H_D_FS 2300 and any 3000/4000-level H_D_FS course.
2. Statistics is recommended prior to H_D_FS 2200H_D_FS 2200. Consult with advisor for appropriate course options.
3. Should be completed no later than the 2nd semester of Sophomore year.
4. Students are admitted to H_D_FS 4130 on a competitive, space-available basis. Interview applications are considered the semester before the student wishes to take H_D_FS 4130. Students must have attained a 3.2 CUM GPA to be eligible to interview, in addition to completing coursework requirements. See the HDFS Child Life academic advisor for more information.
5. Students are admitted to H_D_FS 4993 only after successful completion of all other coursework including a grade of B (3.0) or higher in H_D_FS 4130. Students must be selected by hospitals outside of Columbia through a student-initiated, competitive nationwide application process.
6. PHIL 2440 is preferred for child life certification eligibility purposes.

BS in Human Development and Family Science with Emphasis in Early Childhood Education in a Mobile Society

Degree Program Description
This online bachelor’s of science degree prepares students to work in the field of early childhood education. This program emphasizes the following areas: Child development, growth, and learning; Early education curricula and frameworks; Learning activities, technology use, and other experiences for young children; Family and community influences on children; Challenges facing families in today’s world; Assessment of children and environments; Professional and ethical standards; Hands-on experience and clinical practice. Upon completion of the program, students are qualified to work in various early education and care settings serving children from birth through eight years in a wide variety of community and military settings, including early education centers and preschools, family and home care settings, Head Start and Early Head Start programs, and before/after school programs.

Major Program Requirements
The program is offered by Human Development and Family Science faculty in conjunction with other university partners as part of the Great Plains IDEA. Interested applicants will apply for admission to this program through the undergraduate admissions office at the University of Missouri and to the Department of Human Development and Family Science. Courses will be taught by University of Missouri faculty and by scholars from other Great Plains IDEA institutions, including Iowa State University, Michigan State University, Oklahoma State University, South Dakota State University, Texas Tech University, and University of Nebraska-Lincoln. Your degree will be awarded by the University of Missouri. Students in the Early Childhood Education in a Mobile Society program have amended College of Human Environmental Sciences course requirements due to the availability of online course options.

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below, and must achieve a grade of C (2.0) in all HDFS courses taken to meet degree requirements.

Total Credits: 120

**Applying**

To be eligible for enrollment in the 3000-level program requirements, students must earn a 2.5 GPA in at least 30 credit hours and complete H_D_FS 2400 or an equivalent lifespan development course.

For information about applying to this program, visit Mizzou Online (http://online.missouri.edu/degreeprograms/human-environmental-sciences/early-childhood-in-mobile-society/bachelors/).

**Contact Information**

Please contact the Human Environmental Sciences Student Services office at HESstudentservices@missouri.edu or Ehren Oncken, the undergraduate enrollment counselor at Mizzou Online, at (800) 609-3727, with questions about this program.

**BS in Human Development and Family Science with Emphasis in Family and Consumer Sciences Education**

Our department is no longer admitting students to this emphasis area. We invite you to explore the other undergraduate degree options within Human Development and Family Science (p. 657).

**Degree Program Description**

Family and Consumer Science Education emphasis prepares students to teach family and consumer sciences from birth to grade 12 in public schools. Students take required coursework in nutrition, child development, interpersonal relationships, personal finance, interior design, consumer behavior and courses from the College of Education required to become a certified teacher for middle school or high school.

**Major Program Requirements**

This academic emphasis requires that students successfully complete field experiences and a student teaching internship. Public schools require that students provide proof of up-to-date immunizations and professional liability insurance. Criminal background checks and other qualifications may be required depending on the school.

Due to changes from the Missouri Department of Elementary and Secondary Education (DESE) that affect certification beginning in 2017, new students are not being accepted into this program at this time.

**Semester Plan**

There is not a semester plan built for this emphasis area.

**BS in Human Development and Family Science with Emphasis in Family and Lifespan Development**

**Degree Program Description**

In the Family and Lifespan Development emphasis, students become familiar with theory and research about families and individuals across the lifespan. Coursework focuses on bio-psycho-social development, family functioning, and interpersonal relationships in relevant settings such as at home, in child care, at school, and in the work place. Diversity is emphasized through examining multicultural families and diverse family structures and processes, and variations in individual development and relationships associated with such factors as gender, race, ethnicity, social class and health status. Opportunities are available for the practical application of theory and research in working with individuals, families, schools, and communities.

**Major Program Requirements**

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below, and must achieve a grade of C (2.0) in all HDFS courses taken to meet degree requirements.

B. Requirements in H_D_FS
H_D_FS 1600 Foundations of Family Science 3
H_D_FS 2200 Research Methods in Human Development and Family Science 3
H_D_FS 2300 Multicultural Study of Children and Families 3
H_D_FS 2400W Principles of Human Development - Writing Intensive 3-4
or H_D_FS 2400 Principles of Human Development
H_D_FS 2450 Human Sexuality Across the Life Span 3
H_D_FS 3050 Child Development: Birth to 3 (Infant/Toddler) 3
H_D_FS 3150W Child Development 4-8 (Early Childhood) - Writing Intensive 3
H_D_FS 3430 Adolescence and Young Adulthood 3
H_D_FS 3440 Adulthood and Aging 3
H_D_FS 3500 Infant-Toddler Practicum 3-6
or H_D_FS 3700 Preschool Practicum
or H_D_FS 3730 Field Training Practicum
H_D_FS 4610 Stress and Resilience in Families 3
or H_D_FS 4700 Children and Families in Poverty (if not taken as a required course - see requirements in HDFS above)
H_D_FS 4620 Family Interaction 3
H_D_FS 4630 The Process of Divorce 3
H_D_FS 4700 Family Communication 3
H_D_FS 4720 Child and Family Advocacy 3
H_D_FS 4740 Parent-Child Relations Over the Life Course 3

In addition, students may select advisor-approved 3000+ level HDFS courses not listed above and not used elsewhere to meet degree requirements, to fulfill HDFS Related Electives requirements. Students may also select up to 6 hours of 3000+ level, advisor approved courses from related disciplines such as Anthropology, Black Studies, Communication Studies, Educational, School and Counseling Psychology, Psychology, Sociology, and Women’s and Gender Studies (0-6 credits). The student must obtain HDFS academic advisor approval prior to enrolling in these courses.

Students may plan a program of study which will help prepare them for earning the Certified Family Life Educator (CFLE) credential from the National Council on Family Relations (NCFR). Consultation with the student’s academic advisor is recommended to determine the current requirements for this credential.

1  H_D_FS 1600 should be taken before H_D_FS 2300 and any 3000/4000-level H_D_FS course.
2  Statistics is recommended prior to H_D_FS 2200. Consult with advisor for appropriate course options.
3  Cannot be completed until successful completion of H_D_FS core courses and H_D_FS 3430, H_D_FS 3440 and 12 credit hours from H_D_FS 4610, H_D_FS 4620, H_D_FS 4630, H_D_FS 4640 and H_D_FS 4700 or consent of instructor. Three (3) credit hours of these 3000/4000-level courses can be taken concurrently with H_D_FS 4970.

C. HDFS Related Electives
Select 21 credits from the following: 21
H_D_FS 1610 Intimate Relationships and Marriage 3
H_D_FS 3085 Problems in Human Development and Family Science 1-3
or H_D_FS 4085 Problems in Human Development and Family Science
H_D_FS 3090 Research Experience in Human Development and Family Science 1-6
H_D_FS 3500 Infant-Toddler Practicum (if not taken as a required course - see requirements in HDFS above) 6
H_D_FS 3600 Partnering with Parents and Families 3
H_D_FS 3700 Preschool Practicum (if not taken as a required course - see requirements in HDFS above) 6
H_D_FS 3730 Field Training Practicum (if not taken as a required course - see requirements in HDFS above) 3
H_D_FS 3800 Children's Play 3
H_D_FS 4001 Topics in Human Development and Family Science 1-6
H_D_FS 4090 Advanced Research in Human Development and Family Science 1-6
H_D_FS 4200 Latino/a Youth and Families 3
H_D_FS 4300 Black Families 3

H_D_FS 4420 Environmental Influences on Lifespan Cognition 3
H_D_FS 4610 Stress and Resilience in Families (if not taken as a required course - see requirements in HDFS above) 3
H_D_FS 4630 The Process of Divorce 3
H_D_FS 4680 Family Communication 3
H_D_FS 4700 Children and Families in Poverty (if not taken as a required course - see requirements in HDFS above) 3
H_D_FS 4720 Child and Family Advocacy 3
H_D_FS 4740 Parent-Child Relations Over the Life Course 3

Minor in Human Development and Family Science

Requirements

To earn a minor in HDFS, an undergraduate student must successfully complete 15-16 credit hours of coursework, as indicated in the two groups listed below. Students must earn a grade of C (2.0) in all HDFS courses taken to meet the HDFS Minor requirements – no exceptions. Satisfactory/unsatisfactory (pass/fail) graded courses will not be accepted.

A total of 6 hours of transfer credit from other colleges or universities outside of the University of Missouri – Columbia will be accepted for the minor in HDFS, provided the transfer courses are a direct equivalent to MU HDFS courses.

A minor must be completed and awarded at the same time as the MU undergraduate degree (i.e., minors cannot be claimed after graduation). Once an HDFS minor is awarded, a student cannot return to MU to complete a second undergraduate major in HDFS.

Students cannot earn a major and a minor in HDFS.

REQUIRED COURSES

ELECTIVES - choose two courses from the list below:

For additional major and career exploration resources, visit Major & Career Exploration (p. 34) in the catalog.

Application for Minor

Undergraduate students interested in obtaining a minor in HDFS should fill out the online application, located on the College of Human Environmental Sciences website. This minor can be completed entirely online. Consult with the HDFS Minor advisor for appropriate course selections.
Students must meet the minor requirements in place at the time of application, thus the application should be submitted when they begin taking courses for the minor in HDFS, and before all of the required courses are complete.

**MA in Human Development and Family Science**

Programs are structured to provide students with an integration of theoretical perspectives, empirical research training, and practical experiences.

**Degree Requirements**

Students in the degree program must choose an emphasis area. Degree Requirements are specific to the emphasis and can be found on those catalog pages. The number of hours required for each emphasis is as follows:

- **Family and Community Services**: 36 hours
- **Gerontology**: 36 hours
- **Youth Development**: 36 hours
- **Dual MSorMA/JD**: approximately 113 hours Research

Courses are selected from the following:

<table>

</tr>
</tbody>
</table>

**Comprehensive Exam, Internship, or Project Options**

Master of Arts students may complete a comprehensive exam, an internship, (H_D_FS 8972), for up to six credit hours, or, for on-campus students only, a project, (H_D_FS 8090), for up to six credit hours. The project option is no less scholarly than a thesis, but usually has an applied focus. For instance, a project may involve designing a program and developing curriculum materials (e.g., instructional videotapes, websites, resource manuals). Internships are often conducted off-campus and must be negotiated with the student’s advisor and approved by the student’s faculty committee. Students completing the comprehensive exam option must take additional elective course credit. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

**Satisfactory Progress**

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

**Time Limits for Masters’ Degree Completion**

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

**Background Checks, Health Screenings and Other Required Elements**

It is essential that HDFS majors develop professional relationships with vulnerable populations, thus during the course of the degree program and prior to beginning any practical or clinical education experience, students are required to:

- pass multiple criminal background checks
- pass mandatory drug screens
- pass other qualification checks required by the practical or clinical education sites
- provide proof of health insurance coverage
- provide proof of required immunizations
- provide proof of student professional liability insurance coverage

The student is responsible for all costs incurred with these requirements. Failure to provide appropriate documentation, or pass required checks prior to the beginning of practical or clinical experiences may result in dismissal from the degree program in HDFS.
Admission Criteria

Admission for Campus Programs:

Fall deadline: December 15
Spring deadline: November 1

Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Effective July 1, 2015 must have score of 80</td>
<td>Effective July 1, 2015 must have score of 550</td>
</tr>
</tbody>
</table>

Minimum GRE scores:

<table>
<thead>
<tr>
<th>When did you take the GRE?</th>
<th>Verbal</th>
<th>Quantitative</th>
<th>Analytical</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to August 1, 2011 50th percentile</td>
<td>50th percentile</td>
<td>50th percentile</td>
<td></td>
</tr>
<tr>
<td>On or After August 1, 2011 50th percentile</td>
<td>50th percentile</td>
<td>50th percentile</td>
<td></td>
</tr>
</tbody>
</table>

*Some exceptions are made

- Minimum GPA: 3.0 for last 60 hours
- Required Application Materials for Campus Programs (submitted online via the online application system)
  - Application form
  - 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
  - GRE score (and TOEFL score for international applicants)
  - Personal statement
  - Résumé or Curriculum Vitae
  - Official Transcripts

Admission for Online Programs:

- No Admission Deadlines (We guarantee processing of complete applications received at least two months prior to the beginning of the expected term of admission. This will give admitted students adequate time to enroll in coursework.)
- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Online Programs

submit online via the online application system (https://applygrad.missouri.edu/apply/)

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).

MA in Human Development and Family Science with Emphasis in Family and Community Services

The mission of the Human Development and Family Science Master's degree emphasis in Family and Community Sciences may be summed up in three words – *Understand, Deliver, Manage*. The goal of the Family and Community Services online MA option in Human Development and Family Science is to create alumni capable of understanding family, interpersonal, and community dynamics in order to help individuals and their families through education, resource management, and effective service delivery. In addition, graduates of this degree option will acquire knowledge and skills in program and agency management.

Degree Requirements

The Family and Community Services MA emphasis consists of 36 credit hours, including the 10 core courses shown below. For the remaining 6 credits students may choose from: (a) 6 credits of electives and a capstone examination, (b) 3 credits of electives and a 3 credit internship, or (c) 6 credits of an internship. Elective courses will be offered annually. Exams and internships will include an independently produced paper and an oral examination by the student's MA committee.

Admissions

For admission requirements, refer to the Graduate School website for the minimum qualifications for the degree program (https://gradschool.missouri.edu/degrecategory/human-development-family-science/) and Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate
admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both Graduate School and the degree program to which you’ve applied.

MA in Human Development and Family Science with Emphasis in Gerontology

This online-only Master’s program is designed to prepare professionals who are either working directly with older people or are involved in education and research related to the elderly. Professionals offering direct services often are involved in health promotion programs; directing intergenerational activities; managing senior centers or retirement communities; counseling older people and their families; and helping people plan for retirement.

NOTE: Up to 6 credits can be transferred from other graduate programs if the courses are deemed relevant by your advisor.

Admissions

For admission requirements, refer to the Graduate School website for the minimum qualifications for the degree program (https://gradschool.missouri.edu/deegreecategory/human-development-family-science/) and the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

MA in Human Development and Family Science with Emphasis in Youth Development

This online-only Master of Arts degree in Youth Development prepares graduates to focus on developing the strengths of youth in an estimated 17,000 organizations (e.g., 4-H, Boys and Girls Clubs, Boys Scouts and Girls Scouts) nationwide.

Degree Requirements

The 36 credit master’s degree program (MA) consists of 9 required core courses (25 credits), 5-11 credits of electives, and either a comprehensive exam or an internship experience totaling 2-6 credits. Core courses offered within the program include eight 3-credit courses and a 1-credit professional development seminar.

<td>3-6</td>
</tr>
</tbody>
</table>

Thesis

Master’s of Science students must complete a thesis (H_D_FS 9090). Students who wish to pursue the thesis must petition the department’s graduate faculty for approval. The thesis requires testing a hypothesis or exploring a research question. Student will submit and orally defend the thesis to their committee. For more detailed information, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

Time Limits for Masters’ Degree Completion

Students working toward the master’s degree have 5 years from the semester the first course is taken in which to complete all degree requirements. Extensions for one additional year to complete the degree may be granted with submission of a detailed plan for completion, including a timetable. Students must be making progress toward completion when they apply for the extension. A maximum of two extensions may be granted.

Admission Criteria for Campus Programs

Fall deadline: December 15
Spring deadline: November 1

Minimum TOEFL scores:

<table>
<thead>
<tr>
<th>Internet-based test (IBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>61 Effective July 1, 2015 must have score of 80</td>
<td>500 Effective July 1, 2015 must have score of 550</td>
</tr>
</tbody>
</table>

- Minimum GRE scores:
  - Prior to August 1, 2011 50th percentile 50th percentile
  - On or After August 1, 2011 50th percentile 50th percentile

- Minimum GPA: 3.0 for last 60 hours

Required Application Materials for Campus Programs (submitted online via the online application system)

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors).
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Résumé or Curriculum Vitae
- Official Transcripts

Human Environmental Sciences

Human Environmental Sciences Degree Programs

In addition to the undergraduate and graduate degree programs offered through the individual school/departments, the College offers a BS in Human Environmental Sciences and a PhD in Human Environmental Sciences.

Faculty

Millsap Professor G. Carlo**

Satisfactory Progress

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).
Please see the Emphasis in Family and Consumer Sciences (p. 669) page for a semester plan.

BS in Human Environmental Sciences with Emphasis in Family and Consumer Sciences

Degree Program Description

Students may tailor a plan of study using the BS in Human Environmental Sciences with Emphasis in Family and Consumer Sciences. The options vary widely as students have many choices to meet their interests and career goals. Every department within the College of Human Environmental Sciences focuses on aspects of improving the quality of life for people wherever they live and work. This may be through improving the quality of the ‘built environment’ or through improving health and wellness, or expanding financial literacy, as well as other areas of interest.

Students interested in a BS in Human Environmental Sciences with Emphasis in Family and Consumer Sciences will map out a plan of study and explore the career paths connected to that plan in concert with the advisor. An important part of the advising process in the beginning will be to identify the goals and interests of the student to build a plan focused on the career path expectations. The various certifications or credentials connected to the career path will guide the course selections for the emphasis. A few possible certifications include Certified Family Life Educator (National Council for Family Relations) https://www.ncfr.org/cfle-certification/what-family-life-education/; AFC (Accredited Financial Counselor) https://www.aicpe.org/; or Certified Life Coach (CLC) https://coachfederation.org/.

Major Program Requirements

Program requirements include the General Education (p. 36) requirements, the University graduation requirements, the College of Human Environmental Sciences requirements for Intro to HES, Public Speaking, Statistics and three areas of concentration.

The primary area of concentration must include courses from within one HES unit, and requires 18 hours, with six hours at the 3000-level or higher. The second area of concentration must be chosen from other HES units and will require 15-18 hours, with six hours at the 3000-level or higher. This area of study should complement the primary area and provide support for practical knowledge base. The third area of concentration can include courses from HES, or from any other unit on campus that forms a cohesive and logical area of study to meet the student's academic and career interests, with six hours at the 3000-level or higher. The remaining general electives will be chosen to complete the minimum 120 hours required for the degree, (30 of the last 36 hours must be from MU courses).

Major Program Requirements

Program requirements are outlined on the Emphasis in Family and Consumer Sciences. (p. 669) These include the General Education (p. 36) requirements, the University graduation requirements, the College of Human Environmental Sciences requirements for Intro to HES, Public Speaking, Statistics and three areas of concentration. A student must complete 120 credit hours to earn the degree.

PhD in Human Environmental Sciences with Emphasis in Architectural Studies

The Program

Our program is designed for individuals who are interested in acquiring the knowledge and skills needed to conduct substantive, and original research that contributes to the theoretical and methodological foundation of architecture, interior design, and related disciplines. Curriculum emphasizes research and expands knowledge in the “major” areas of either environment and behavior or design with digital media. The major area is defined as that area of specialization in the doctoral program within which the student is expected to write his/her dissertation. Students will choose a “supportive cognate area” and courses in this area are selected from a broad spectrum of disciplines providing students with the opportunity to design an individualized program of study that capitalizes on their unique interests and talents. Also see the Department website for additional information on the two major areas of faculty expertise (Environment and Behavior (http://arch.missouri.edu/academics_ebs.html), & Design with Digital Media (http://arch.missouri.edu/academics_ddm.html))

Degree Requirements

The University of Missouri requires a minimum of 72 semester hours beyond the baccalaureate degree for the PhD. The doctoral program committee provides departmental approval of the student’s plan of study (Form D-2), a list of the courses and the credit to be earned in each of them, which will, when completed:

• Prepare the student for research or scholarly investigation in the chosen field of study.
• Satisfy the credit-hour and residency requirement of the department.
• Satisfy any special requirements (collateral field, other special research skills) imposed by the department.
• Satisfy the Graduate School’s requirement for a minimum of 15 hours of course work at the 8000/9000 level (exclusive of research, problems and independent study experiences).

The committee also recommends as part of the plan of study, any request for transfer of graduate credit. The student must substantially complete the course work outlined in the plan of study to the satisfaction of the doctoral program committee and the Graduate School before being declared ready for the comprehensive examination. Details regarding the qualifying process, comprehensive examination and dissertation requirements are detailed below. See Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) and Spotlight on Alumni (http://arch.missouri.edu/alumni.html).

PhD Minimum Course Requirement Summary

<thead>
<tr>
<th>Core Courses</th>
<th>13 credits minimum</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARCHST 8850</td>
<td>Seminar in Environmental Design</td>
</tr>
</tbody>
</table>
ARCHST 8630  Philosophy of Environmental Design Research 3
ARCHST 8887  Environment and Behavior II 3
ARCHST 8050  Research Methods in Environmental Design 3
ARCHST 8950  Qualitative Research Methods 3
Coursework in Architectural Studies (choose 6 hrs from the following) 6
ARCHST 8840  Graduate Design Studio 1-99
ARCHST 8960  Readings in Environmental Design 1-99
ARCHST 8001  Topics in Environmental Design 1-99
ARCHST 9555  Recent Trends in Environmental Design 1-99

Supportive Cognate Area 9
Advisors and committee members will help you identify appropriate cognate courses based on the area of interest.

Pilot Project for Dissertation 2
ARCHST 9995  Pilot Project for Dissertation 2

Dissertation Research 6
ARCHST 9990  Dissertation Proposal 1
ARCHST 9090  Doctoral Research in Environmental Design 5

Qualifying Process

The program considers the experience of original research with data collection, analysis, and report as the D1 Qualifying Exam. This could be satisfied with Masters research project or a dissertation pilot project. See Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) for additional information on the qualifying examination process.

Comprehensive Examination Process

Based on the pilot project for the dissertation, students write a “Proposal-in-Principle”. Committee members set comprehensive exam questions in their area of expertise as it relates to the student’s research as described in the Proposal-in-Principle. The student has two and one half weeks to complete the exam and submit the responses. The oral defense part of the comprehensive examination evaluates the ability to further discuss each of the questions and responses and clarify follow up questions from committee members. The written and the oral examination must be completed within one month. If successful, members sign the Form D-3 and it is submitted to the Graduate School. The student officially becomes a Doctoral Candidate. Students must maintain continuous enrollment during their candidacy (the period after successful completion of the comprehensive examination).

Dissertation Requirements

Following the comprehensive exam, the student should develop the full Dissertation Research Proposal that is reviewed and approved by the committee through a formal proposal defense. A minimum of two weeks should be allowed for the committee members to review the proposal before the defense. The dissertation proposal approved by the committee sets the roadmap for dissertation research. The research-based plan of study leads to the written doctoral dissertation. PhD students must complete a final oral examination by an approved faculty committee. In order to pass the examination, and thus qualify as the basis for the award of the PhD degree, the dissertation should have the following attributes:

• It shows that the candidate has a thorough grasp of the appropriate methodological techniques and an awareness of limitations;
• It makes a distinct contribution to knowledge because of the originality of the approach and/or interpretation of the findings and, in some cases, the discovery of new facts;
• It demonstrates an ability to communicate research findings effectively in the professional arena and in an international context;
• It is a careful, rigorous and sustained piece of work demonstrating that a research “apprenticeship” is complete and the holder should be admitted to the community of scholars in the discipline.

See Architectural Studies Graduate Handbook (http://arch.missouri.edu/docs/academics/PhD/handbook.pdf) for additional information regarding dissertation requirements including expectations, timelines and guidelines.

Admissions

Admission Requirements

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Ph.D. program in Human Environmental Sciences with an emphasis in Architectural Studies (http://arch.missouri.edu/academics_gradadmit.html) and the minimum requirements of the graduate faculty, enforced by the Graduate School (https://gradschool.missouri.edu/admissions/eligibility-process/).

Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

Admission Contact

137 Stanley Hall; Columbia, MO 65211
Telephone: 573-882-7224

PhD in Human Environmental Sciences with Emphasis in Human Development and Family Studies

The PhD in Human Environmental Sciences with emphasis in Human Development and Family Studies degree prepares students for careers in research, college or university teaching, or leadership positions in public and private human service institutions.

Degree Requirements

Over the course of their degree program all doctoral students are required to enroll in six credit hours of research practicum, three credit hours of teaching practicum, and complete coursework in theory, research methods, statistics, and their collateral area. In addition, all doctoral students complete a minimum of 12 credit hours of research for their dissertation.

Plan of Study

Students selecting the doctoral degree work with members of their doctoral committee to create an individualized plan of study tailored to
their specific research interests. A sample plan of study can be found on the HDFS website (http://hdfs.missouri.edu/).

**Qualifying Process for Doctoral Students**

To be officially admitted to the HDFS doctoral program, students generally must have completed a master’s degree in HDFS or a related field, although exceptions are granted.

**Satisfactory Progress**

Satisfactory progress is based on the student maintaining a sufficient GPA according to the student’s program or funding guidelines and completing all degree forms and milestones according to departmental timelines. For a detailed description of the department’s description of a satisfactory rate of academic progress, please refer to the HDFS Graduate Handbook found on the HDFS website (http://hdfs.missouri.edu/).

**PHD Comprehensive Matriculation Exam**

Students must complete a comprehensive exam prior to beginning their dissertation. For a detailed description of the comprehensive exam options, directions, and timeline, please refer to the Handbook found on the HDFS website (http://hdfs.missouri.edu/).

**Admission to Candidacy**

After students pass the comprehensive examination, they complete the D3 form to apply to the Graduate School for admission to doctoral candidacy. Following admission to candidacy, students complete a dissertation proposal. The proposal includes a pertinent review of the literature, statement of the problem, the purpose of the proposed study, description of the research design, and discussion of the specific means by which the data will be analyzed. Subsequently, the dissertation committee will meet to evaluate, request revisions to, and approve the student’s dissertation proposal. After the dissertation proposal is approved, the students completes and defends the dissertation.

**Time Limits on Degree Completion**

A graduate degree represents current knowledge of the field as of the date the degree is granted. Limitations have therefore been set regarding the number of years to finish the degree. Doctoral students have 6 years in which to complete degree requirements. The clock starts the semester that the first class beyond the master’s degree is taken. The comprehensive exam must be completed no later than by the end of the fourth year of study, HDFS doctoral students have only three years after passing the comprehensive examination to complete the doctoral degree.

**Petitions for Extension**

On petition of the candidate, an extension of up to 1 year may be granted by the HDFS graduate faculty. The student may petition for no more than two one-year extensions. Therefore, a doctoral student may have no more than 5 years, including two one-year extensions, to complete the doctoral degree after passing the comprehensive exam. On petition of the candidate and the candidate’s department, an extension of this time limit may be granted by the Graduate School.

**Admission Criteria**

Fall deadline: December 15
Spring deadline: November 1

**Required Application Materials**

Submit via the apply yourself system

- Application form
- 3 letters of recommendation from people who can speak to applicant’s potential to do graduate work (e.g., professors, advisors)
- GRE score (and TOEFL score for international applicants)
- Personal statement
- Résumé or Curriculum Vitae
- Official Transcripts

**PhD in Human Environmental Sciences with Emphasis in Personal Financial Planning**

The doctoral program is designed to develop skill in the evaluation and generation of research that advances the disciplines engaged in Personal Financial Planning, such as Personal Finance, Family Economics, Consumer Economics, Corporate Finance, Law, among others. This program prepares students for careers in university research and teaching, government, Extension, or public policy evaluation.

**Degree Requirements**

A minimum of 72 credit hours are required for the degree with at least 15 credit hours at the 8000 level or above exclusive of problems, readings and research. Students must complete a research dissertation. Up to 6 credit hours are earned for this portion of the degree by registering for FINPLN 9090 Doctoral Dissertation Research in Personal Financial Planning. The first six hours can be included in the required total of 72 hours.

- Minimum GRE scores:
  - Verbal + Quantitative
  - Prior to August 1, 2011 50th percentile 50th percentile
  - On or After August 1, 2011 50th percentile 50th percentile
- Some exceptions are made.
- Minimum GPA: 3.0 for last 60 hours
Degree Requirements

The degree requires a minimum of 78 credit hours beyond the bachelor's degree, with at least 15 credit hours at the 8000 level or above exclusive of research, problems and independent study. It is expected that students will have a minimum of 9 credits in Research/Qualitative/Quantitative methods, of which 3 credits will be Research Methods and 3 credits will be Statistics. Students are required to take T_A_M 8087 Seminar in Clothing and Textiles and T_A_M 9190 Theory Development and Evaluation in Textile and Apparel Research.
Core Course Requirements

| Textile and Apparel Management (focused group of courses) | minimum of 9 credit hours |
| Research Methods/Statistics | minimum of 9 credit hours |
| Supporting area (for broadening the theoretical base for the research project) | minimum 9 credit hours |
| T_A_M 9090 Research in Textiles and Apparel Management (including pre-proposal, proposal, job market research, and defense presentations) | minimum 12 credit hours |
| Coursework from Master's degree | maximum 30 credit hours |

Application Deadlines

Fall deadline: February 1 (January 15 for early financial support considerations)
Spring deadline: September 1

Admission Criteria

- Minimum GPA: 3.0 in last 60 hours
- Bachelor’s degree from an accredited college or university in textile and apparel management or related field. Those with unrelated majors will need to do make-up work
- Minimum TOEFL scores:
  - Internet-based test (iBT) 79
  - Recommended Minimum GRE scores:
    - Verbal + Quantitative
      - Prior to August 1, 2011 500/500
      - On or After August 1, 2011 150/144
    - Analytical 3.0

Required Application Materials

To the Graduate School (https://applygrad.missouri.edu/apply/):
- All required Graduate School documents
- Statement of professional objectives (upload to application)
- Three letters of recommendation
- Official transcripts from every college or university you have attended
- Your official GRE scores (sent directly from the Educational Testing Service).
- Latest vitae or résumé
- A 2-minute video to show about who you are, why you want to pursue graduate degrees, and what your career goals are
- TOEFL scores or IELTS scores if international student
- A digital design portfolio if pursuing design research
- Writing samples optional

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Faculty

We have recently been recognized as a partner with the designation of the first combined 5 year bachelors and master's standing Coordinated Programs in Dietetics in the country; it also holds education on campus. We hold the honor of being the longest poises and challenges us to be a model of interdisciplinary research.

The mission of the Department of Nutrition and Exercise Physiology at the University of Missouri is to improve the health of Missourians and the larger population through research, teaching, and outreach related to nutrition and physical activity. We strive to be a diverse set of leaders, innovators, and educators who promote improved human health through nutrition and exercise.

The department has a long tradition of education excellence and is the only department on campus that spans three colleges (School of Medicine, College of Human Environmental Sciences, and College of Physical Therapy, Occupational Therapy, cardiac rehab, wellness resource centers, and community health programs. Students who major in Nutrition and Exercise Physiology may choose from three emphasis areas:

- Human Physiology and Translational Sciences
- Nutrition and Foods/Master's in Dietsetics
- Physical Activity, Nutrition and Human Performance

Students majoring in NEP are exposed to a strong science base including biology, chemistry, biochemistry, physics, anatomy, physiology, kinesiology, exercise science/exercise physiology, and human nutrition. In addition, they must take a set of core courses for each emphasis area and complete the required general education requirements for the University of Missouri. Specific GPA requirements and/or grades are required in each area. This information can be found on our department website: http://nep.missouri.edu

Students who want to explore the major can take:
- NEP 1034 Introduction to Human Nutrition
- NEP 1340 Introduction to Exercise and Fitness
- NEP 1485 Career Exploration in Exercise Science
- NEP 2380 Diet Therapy for Health Professionals.

Two minors are available:
- Nutritional Sciences (http://ns.missouri.edu/minors.html) (intended for students majoring in food science, biological sciences, biochemistry, medicine, dentistry, pharmacy, or for health sciences, or related fields)
- Wellness (http://ns.missouri.edu/minors.html) (intended for both non-science and science students interested in coursework focused on empowering them to make informed decisions related to lifelong personal nutrition and exercise choices)

Graduate
- MS in Nutrition and Exercise Physiology (p. 680)
  - with emphasis in Exercise Physiology (p. 681)
  - with emphasis in Nutritional Sciences (p. 682)
- PhD in Nutrition and Exercise Physiology (p. 683)
  - with emphasis in Exercise Physiology (p. 683)
  - with emphasis in Nutrition (p. 684)

BS in Nutrition and Exercise Physiology

Degree Program Description

The BS in Nutrition and Exercise Physiology offers three different paths, each with a different focus. All three areas use a science based approach; integrating human physiology, chemistry, biology, biochemistry, and social/psychological sciences to study the influences of nutrition and physical activity on human health and disease. All students within these areas are exposed to significant opportunities for undergraduate research, student organizations, study abroad, hands on internships and field work as well as interaction with nationally recognized faculty in their chosen fields. Students majoring in our emphasis areas will be well prepared for health-related careers in numerous fields such as: Registered Dietitian Nutritionist (RDN), medicine, dentistry, pharmacy, physician's assistant, physical therapy, occupational therapy, or for employment in fitness assessment, lifestyle intervention, cardiac rehab, education, health and wellness, exercise supervision and program administration and several different certifications. They are also prepared for graduate study in biomedical/translational sciences, exercise physiology and numerous other fields.

Undergraduate

- BS in Nutrition and Exercise Physiology (p. 675)
  - with emphasis in Human Physiology and Translational Sciences (p. 676)
  - with emphasis in Nutrition and Foods (p. 677)
  - with emphasis in Physical Activity, Nutrition and Human Performance (p. 679)

The mission of the Department of Nutrition and Exercise Physiology at the University of Missouri is to improve the health of Missourians and the larger population through research, teaching, and outreach related to nutrition and physical activity. We strive to be a diverse set of leaders, innovators, and educators who promote improved human health through nutrition and physical activity.

The department has a long tradition of education excellence and is the only department on campus that spans three colleges (School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources). This unique configuration poises and challenges us to be a model of interdisciplinary research and education on campus. We hold the honor of being the longest standing Coordinated Programs in Dietetics in the country; it also holds the designation of the first combined 5 year bachelors and master's degree. We have recently been recognized as a partner with Exercise is Medicine® on Campus (EIM-OC), a global health initiative managed by the American College of Sports Medicine (ACSM) earning a silver medal for activities in our first year.

Our faculty is nationally-recognized for their contributions to the fields of nutrition and exercise. Students in our programs are prepared for a wide variety of career paths in the healthcare/medical fields, corporate and commercial industries, government and non-profit sectors, and graduate programs. Typical areas our students are found in are: Medicine (allopathic and osteopathic), Dentistry and Pharmacy, Physicians Assistants, Registered Dietitian Nutritionists, Exercise Physiologist, Physical Therapy, Occupational Therapy, cardiac rehab, wellness resource centers, and community health programs. Students who major in Nutrition and Exercise Physiology may choose from three emphasis areas:

- Human Physiology and Translational Sciences
- Nutrition and Foods/Master's in Dietsetics
- Physical Activity, Nutrition and Human Performance
Major Program Requirements

The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 676), Nutrition and Foods (p. 677), and Physical Activity, Nutrition and Human Performance (p. 679). All degree requirements are listed at the emphasis level. A student must choose an emphasis area for this degree.

Semester Plan

The BS in Nutrition and Exercise Physiology is offered with three emphasis options: Human Physiology and Translational Sciences (p. 676), Nutrition and Foods (p. 677), and Physical Activity, Nutrition and Human Performance (p. 679). Please refer to the emphasis area for semester plans. A student must choose an emphasis area for this degree.

BS in Nutrition and Exercise Physiology with Emphasis in Human Physiology and Translational Sciences

Degree Program Description

This degree program is highly multidisciplinary, integrating human physiology, nutrition, pathophysiology, pharmacology, biochemistry, organic chemistry, biology, sociology/psychology, and related areas to gain both a broad and a deep understanding of the determinants of human health and disease. Due to the department's unique configuration (only department on campus that spans three colleges - School of Medicine, College of Human Environmental Sciences, and College of Agriculture, Food, and Natural Resources), students in this program have access to many researchers and resources represented from each unit. Students selecting this area of study will be well-prepared for health-related careers such as Medicine (allopathic and osteopathic), Dentistry, Pharmacy, Physician's Assistant, as well as for graduate study in Biomedical/Translational Sciences.

The department also offers significant opportunities for undergraduate research, including an opportunity to apply for paid undergraduate research internship (http://ns.missouri.edu/ug_summerintern.html) opportunities that span the academic year.

Major Program Requirements

To transfer into the nutrition and exercise physiology program after their first semester on campus, students are required to have a minimum overall GPA of 2.65 and be enrolled in at least one required biology, chemistry, physics, or biochemistry course or one required NEP course. All NEP courses require a grade of C or higher.

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below.

Total Credits: 120-122

**BS in Nutrition and Exercise Physiology with Emphasis in Nutrition and Foods**

**Degree Program Description**

The emphasis in Nutrition and Foods prepares students to integrate and apply the principles of the biomedical sciences and food and nutrition sciences to design and manage effective nutrition programs in a variety of settings. Nutrition and Exercise Physiology with emphasis in Nutrition and Foods is a five-year BS-MS program. Nutrition and Foods is the first step to acceptance into the Professional Coordinated Program in Dietetics (p. 653).

During the first two years of the curriculum, students develop a foundation in science and general education. This is followed by a three year course of study devoted to professional courses and supervised practice (fieldwork). The Dietetics program is a five year program where students complete:

- A Bachelor of Science (Nutrition and Foods)
- A Master of Science (Dietetics)
- All supervised practice (fieldwork) necessary to meet the requirements to take the Registration Examination for Dietitians (RD Exam)
- A verification statement providing proof of completion will be provided after the graduate degree is awarded

The completion of this bachelor's degree only, does not allow the student to be eligible to take the national Registration Examination for Dietitians. Furthermore, it is not a didactic program in dietetics. No verification state is given after completion of only the bachelor's degree.

**Major Program Requirements**

This is a professional and competitive program that requires acceptance to the Coordinated Program in Dietetics to complete the degree. Students who successfully complete prerequisites, have been admitted to the Coordinated Program in Dietetics and complete all university and College of Human Environmental Sciences requirements, including general education in addition to the degree requirements listed below will earn their degree in Nutrition and Exercise Physiology with emphasis in Nutrition and Foods. Students who receive this degree emphasis, who are in good academic standing and meet program requirements, will transition seamlessly to the Coordinated Program's fifth year master's program (p. 653).

**Pre-Professional Requirements**

| BIO_SC 1010 & BIO_SC 1020 | General Principles and Concepts of Biology and General Biology Laboratory Introduction to Biological Systems with Laboratory |
| CHEM 1320                  | College Chemistry I |
| CHEM 2030                  | Survey of Organic Chemistry |
| or CHEM 2100               | Organic Chemistry I |
| CHEM 2130                  | Organic Laboratory I |
| BIOCHM 3630               | General Biochemistry (B- or better required) |
| or BIOCHM 4270            | Biochemistry |
| CDS 2190                  | Medical Terminology |
| COMMUN 1200               | Public Speaking |
| HLTH_SCI 1000             | Introduction to the Health Professions |
| NEP 1995                  | Nutritional Food Science |
| MPP 3202                  | Elements of Physiology |
| NEP 2340                  | Human Nutrition I (B- or better required) |
| NEP 2380                  | Diet Therapy for Health Professionals |
| PSYCH 1000                | General Psychology |
| MATH 1100                 | College Algebra (C- or higher required) |

Additional courses may be required to meet college requirements or career objectives. On-campus research internships are available and highly recommended.

**Admission Requirements:**

- Students must have applied and be admitted to the University of Missouri
- A CUM GPA of 3.2 or higher is required to apply (MU and transfer courses will be considered)
- Completed or enrolled in courses listed on the 1st 4 semesters of the sample plan
- Completed or enrolled in NEP 2340 and BIOCHM 3630 (or approved equivalent course) at time of application. Grade of B- or higher is required to remain in the program.
- A minimum UM System term GPA of 3.0 or higher for the semester in which the student is accepted to the Coordinated Program is required to remain in the program.
- If admitted, student must successfully pass all background checks, drug screening, and required health records prior to start of program
- Submit an application (due in January), required application materials are posted each year on the department's webpage (http://ns.missouri.edu).
- Participate in an interview with admissions committee

Note: Admission is limited to a maximum of 20 students per year.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student's actual plan may vary based on course choices where options are available.

Note: Changes in course requirements may occur, as the program is required to meet accreditation standards.

BS in Nutrition and Exercise Physiology with Emphasis in Physical Activity, Nutrition and Human Performance

Degree Program Description

This program is for students with a passion for health and wellness, evidence-based science, helping other people, and learning how and why physical activity and nutrition impact human performance. Students earning this degree are well-prepared for employment opportunities that include fitness assessment, lifestyle intervention education, health and wellness, exercise supervision and program administration in schools, businesses and hospitals, health education, and promotion and entry-level positions in cardiac and pulmonary or spine rehab. This is a rapidly expanding area with opportunities in corporate and commercial industries, government, and non-profit sectors.

In addition to the job opportunities listed above, past graduates of this area have continued their studies in a variety of areas such as graduate school for Exercise Science/Physiology, Kinesiology, Athletic Training, Physical Therapy, Occupational Therapy, Physician's Assistant, Chiropractic, Nursing, Public Health.

Graduates of this program are qualified to sit for the following certifications without any additional courses or education beyond our core requirements: ACSM Certified Exercise Physiologist (ACSM EP-C), ACSM Certified Personal Trainer (ACSM CPT), ACSM Certified Group Exercise Instructor (ACSM GEI), NSCA Certified Personal Trainer, NSCA Certified Strength & Conditioning Coach, ACE Certified Personal Trainer.

Major Program Requirements

Nutrition and Exercise Physiology with emphasis in Physical Activity, Nutrition, and Human Performance does not require an application or have a pre-program status. Students may declare the major and emphasis area by indicating it when they apply to MU and transition directly into the program. After the first semester at MU, students must have a minimum of a 2.0 GPA (term and CUM) to declare the program.

The student will need to complete a transfer of division form or if a current student in another program within the department or college of HES, notify their advisor and/or HES Student Services of their wishes. There are specific grade requirements for most courses within the emphasis, these are outlined on the degree requirement sheet and noted on the degree audit.

Grade Requirements:

C or higher: BIO_SC 1010 /BIO_SC 1020 or BIO_SC 1500, MPP 3202 or BIO_SC 3700, PTH_AS 2201 (or the equivalent). All NEP courses (unless noted below)

C- or higher: MATH 1100, CHEM 1320, CHEM 2030 or CHEM 2100, NEP 2380

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below.

### Emphasis Core Requirements

#### Nutritional Sciences
- NEP 2340 Human Nutrition I 3
- NEP 2380 Diet Therapy for Health Professionals 3
- NEP 2450 Nutrition Throughout the Life Span 3
- NEP 4970 PANHP Capstone: Sports Nutrition 2

#### Exercise Physiology
- HTH_PR 4250 Human Kinesiology 3
- NEP 1340 Introduction to Exercise and Fitness 3
- NEP 1485 Career Exploration in Exercise Science 1
- NEP 2140 Exercise Practicum I 3
- NEP 3450 Activity Throughout the Lifespan 3
- NEP 3550 Corporate, Community, and Personal Fitness 3
- NEP 3850 Physiology of Exercise 3
- NEP 4200 Sports Performance and Conditioning 3
- NEP 4860 Exercise Prescription 3

#### Supporting Electives
9 credit hours (only 1 course can be taken outside of NEP area).
Select a minimum of 3 classes from the list below.

**NEP:**
- NEP 3001 or NEP 4001 Topics in Nutritional Science 1-3
- NEP 2460 Eating Disorders 3
- NEP 3131 International Nutrition and Exercise Physiology (study abroad; may double dip in Humanities) 3
- NEP 3390 Teaching and Counseling Techniques in Nutrition 2
- NEP 3420 Role of Inactivity in Chronic Diseases 3
- NEP 4330 Human Nutrition II Laboratory 2
- NEP 3440 Human Nutrition II Lecture 3
- NEP 4360 Nutritional Assessment 3
- NEP 4370 Medical Nutrition Therapy I 3
- NEP 4480 Pediatric Exercise Physiology 3
- NEP 4550 Exercise is Medicine 2
- NEP 4590 Community Nutrition 3
- NEP 4750 Cardiopulmonary Rehabilitation - A Multifactorial Process 3
- NEP 4940 Internship in Nutritional Science and Exercise Physiology 1-6

**Other Areas:**
- BIO_SC 2200 General Genetics 4
- ESC_PS 4200 Positive Psychology 3
- H_D_FS 3430 Adolescence and Young Adulthood 3
- H_D_FS 3440 Adulthood and Aging 3
- HLTH_SCI 3300 Public Health Principles, Practice, and Education 3
- MICROB 3200 Medical Microbiology and Immunology 4
- PHYSCS 1210 College Physics I 4
- or PHYSCS 1220 College Physics II 4
- PSYCH 2210 Mind, Brain, and Behavior 3
- PSYCH 3830 Health Psychology 3
- SOCIOL 3310 Social Psychology 3
- SOCIOL 3430 The Sociology of Sport 3

Electives to equal 120 credit minimum

**MS in Nutrition and Exercise Physiology**

The Nutritional Sciences Graduate Program (NSGP) provides world class training that can open the door to a wide variety of career opportunities in the life sciences. We offer outstanding training that will help you achieve your career goals. Our graduate program is part of a campus-wide network of research programs that provides integrative research in the biomedical sciences. The MS in Nutrition and Exercise Physiology is offered with two emphasis area options: Nutritional Sciences, and Exercise Physiology. These programs provide outstanding educational...
and cutting edge research opportunities for our students in the areas of nutrition, physical activity, exercise, and its relationship to human health and disease. Our research programs are grant funded both nationally and locally and include research in:
- Human exercise physiology and metabolism
- Cardiovascular physiology
- Bone density and exercise
- Vitamin D and bone growth
- Lipid and carbohydrate metabolism
- Molecular mineral nutrition
- Obesity research.

Degree Requirements

The MS is Nutrition and Exercise Physiology has two emphasis areas. Please see the emphasis area pages in Nutritional Sciences (p. 682) and in Exercise Physiology (p. 681) for degree information.

MS in Nutrition and Exercise Physiology with Emphasis in Exercise Physiology

About the Program

The graduate program in Nutrition and Exercise Physiology is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, and overall metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting. Graduate students will receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies at the University of Missouri offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. The Exercise Physiology research program collaborates closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others.

Exercise physiology faculty seek to develop new knowledge in the area of exercise training, exercise metabolism, and obesity. The current focus of the program is physical inactivity, exercise and nutrition strategies for weight management and the prevention of lifestyle related diseases. The mission of the Exercise Physiology Graduate Program is to train graduate students who will provide professional leadership and research developments in areas of human health and sports conditioning.

The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Exercise physiology research emphasizes human studies, but other exercise models are available on campus, including the pig (Vet. Biomedical Sci.) and the rat (Medical School and VA).

Degree Requirements

Master's students in Nutrition and Exercise Physiology emphasis will choose between two options for final completion: thesis or internship. Students should indicate their preference on their application to the program. The course curriculum will be the same for both options, except for the thesis or internship. Students will complete a minimum of 36 credits of graduate coursework beyond the bachelor's degree. For a full explanation of the thesis/non-thesis options, see section below on Thesis/Non-Thesis Requirements (p. 681) or view the information on the programs website: http://ns.missouri.edu/exphyma.html.

Prerequisites courses for the program are a B or better in General Chemistry, Physiology, Human Anatomy and Physiology of Exercise, Biochemistry, Organic Chemistry and Nutrition are recommended.

A public health certificate can be obtained if the 4 electives are taken in Public Health (NEP 8340 counts as one of these courses). Other certificates could also possibly work with this masters program.

Thesis/Non-Thesis Requirements

1. Internship Option

This option is oriented toward improving a practitioner’s professional proficiency in the applied aspects of exercise physiology. The program of study will include courses and learning experiences that will develop the student’s knowledge in the theoretical aspects of exercise physiology. They will be required to complete an approved internship (300 hours minimum) which will provide them with experience in an applied or clinical setting. The student is responsible for identifying and securing the internship. Students selecting this option will graduate with the some preparation for credentialing from organizations including the American College of Sports Medicine (ASCM) and the National Strength and Conditioning Association (NSCA). Completion of this degree as well as obtaining certification will prepare students for careers such as registered
clinical exercise physiologists, strength and conditioning coaching, personal trainer or wellness coach, health/fitness instructor, as well as in other health professions. The program of study can be complemented with a certificate of public health: https://healthprofessions.missouri.edu/mph/mph-degree/certificates/graduate-certificate-public-health/

2. Thesis Option

This option is research-oriented, focusing on designing and conducting research in exercise physiology. The program of study will include courses and learning experiences that will maximize a student’s progress in developing lab skills and critical thinking that will enable the student to continue his/her education in a research-oriented area. The thesis option requires a minimum of 36 hours of graduate credit. A written thesis, based upon original research, that is the student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Exercise Physiology Program Applicants must have a 3.0 undergraduate GPA. TOEFL scores are required from international applicants. Entering MS students are expected to have a B or better in undergraduate training in biology, chemistry, anatomy/physiology, and exercise physiology. It is also advantageous to have nutrition, organic chemistry and biochemistry, as it helps students in their required coursework. Courses should be taken at an accredited institution.

Applications to our graduate programs should be submitted by December 30th. While applications received after that date will still be considered, there is no guarantee that we will have space for additional students. Admission at the beginning of spring semester is possible, but limited.

Minimum TOFEL Scores

<table>

Minimum GRE Scores - the department is no longer requiring the GRE

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

MS in Nutrition and Exercise Physiology with Emphasis in Nutritional Sciences

About the Program

The Nutritional Sciences Graduate Program provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in Nutritional Sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the 21st Century (F21C), the Botanical Center, the Life Sciences Center and MU Nutritional Center for Health (MUNCH). The graduate program is administered by the Department of Nutrition and Exercise Physiology in association with the College of Human Environmental Sciences, the College of Agriculture, Food and Natural Resources, and the School of Medicine.

Degree Requirements

The program consists of a total of 30 hours of credit beyond the bachelor’s degree, of which 15 credits must be at the 8000 or 9000 level; no more than 40 percent of the 30-hour credit requirement can be satisfied by a combination of special investigations, Research, Readings and/or Problems courses. The master of science degree is awarded in part for the completion of a thesis. The thesis is based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought is required. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

The minimum department course requirements for the master of science degree are:

- AN_SCI 9442 Vitamins and Minerals
- BIOCHM 7270 Biochemistry & BIOCHM 7272 and Biochemistry
- NEP 7340 Human Nutrition II Lecture
- NEP 8087 Masters Seminar in Nutritional Sciences and Exercise Physiology
- NEP 8090 Masters Research in Nutritional Sciences and Exercise Physiology
- NEP 8310 Nutritional Biochemistry of Lipids
- NEP 8340 Nutrition in Human Health
- Statistics

Total Credits 30

Thesis/Non-Thesis Requirements

The M.S. program in Nutritional Sciences only offers a thesis option.

Students earning this degree must provide a written thesis, based upon original research, that is student’s own work and that demonstrates a capacity for research and independent thought. In addition, the graduate student must present their thesis research in a seminar that is open to the general faculty and successfully defend their thesis to their committee.

Admissions

Complete instructions on the application process can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

PhD in Nutrition and Exercise Physiology

The PhD in Nutrition and Exercise Physiology is unique in providing foundational knowledge in both disciplines with a research focus in how nutrition and exercise impact chronic disease. This degree prepares students for careers in academia, industry or the public sector.

Degree Requirements

The PhD in Nutrition and Exercise Physiology has two emphasis areas, Exercise Physiology (p. 683) and Nutrition (p. 684). A student must choose an emphasis area.

The Exercise Physiology PhD Emphasis Area is designed to provide advanced training in both the basic and applied aspects of exercise, physical activity and physical inactivity. The curriculum has a scientific basis with core courses in exercise physiology, nutrition, biochemistry, and physiology. Currently, the research focus is to examine the mechanisms by which physical activity levels and/or exercise modulate risk and development of obesity, type 2 diabetes, as well as metabolic and cardiovascular diseases using both animal models and human subjects, and to be able to translate the findings into the clinical or applied setting.

The Nutrition PhD Emphasis Area provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Basic, translation and clinical research focuses on obesity and associated conditions such as fatty liver disease, diabetes and bone fragility.

Graduate students receive training in laboratory research, seminar preparation, scientific writing, problem solving and grant writing. Graduate studies in Nutrition and Exercise Physiology offer the advantage of interdisciplinary exercise research that is facilitated by numerous collaborations at the many research centers at MU. The MU Nutritional Center for Health (MUNCH), which is used for study meal preparation and feeding studies is housed in NEP. The Exercise Physiology and Nutrition research programs collaborate closely with other units on campus including the Department of Biomedical Sciences in the Vet School, and the Departments of Internal Medicine and Medical Pharmacology and Physiology in the School of Medicine among others. Interdisciplinary nutrition research that is facilitated via the many research centers including the Botanical Center and the Life Sciences Center.

Teaching and research assistantships are available on a competitive basis.

Admissions

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Graduate Admissions Committee. Please contact the department for more information on this subject.

PhD in Nutrition and Exercise Physiology with Emphasis in Exercise Physiology

Degree Requirements

Students previous coursework must include biology, chemistry, anatomy, physiology and exercise physiology to be considered. It is also advantageous to have organic chemistry, biochemistry and some nutrition.

The PhD program in Exercise Physiology requires 75 hours beyond the bachelor’s degree. A committee of 4 faculty members must approve all graduate courses, including those from other universities. The graduate course work includes coursework in exercise physiology, physiology, nutrition and biochemistry. Research requirements include NEP 7500 (9 hours of research projects) and NEP 9090 (12 hours dissertation).

One semester of teaching experience is highly recommended, as is participation on an external grant proposal and co-authoring two manuscripts. NEP 8850 Advanced Exercise Physiology is used as your competency course a grade of B or better is required. If the student has a similar course in their transfer courses from a masters, then another course will be used - this must be approved by the graduate director and committee.

Note: Masters courses may be transferred from other institutions (30 hours maximum), and may count toward the doctoral program at the discretion of the student’s committee (3 members in dept., 1 member outside).

**GRE Scores - this department no longer requires the GRE**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Exercise Physiology (http://nep.missouri.edu/grad_admission.html) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied.

**Exercise and Physiology Program Applicants** must have a 3.00 undergraduate GPA and a 3.5 graduate GPA. TOEFL scores are required from international applicants. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program, it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

**Deadline for Applications is December 30th**. While applications received after that date will still be considered, they will not be eligible for all fellowships.

Complete instructions for applying to the program can be found on the programs website: http://ns.missouri.edu/graduate_apply.html

**PhD in Nutrition and Exercise Physiology with Emphasis in Nutrition**

**About the Program**

The PhD in Nutrition and Exercise Physiology with Emphasis in Nutrition provides training in the distinct core nutrition knowledge described by the Graduate Nutrition Education Committee of the American Society for Nutrition: general research skills; structure and biochemical and metabolic functions of nutrients and other dietary constituents; food, diets, and supplements; nutritional status assessment; nutrition and disease; nutrition interventions and policies; and, analytical skills. Graduate students also receive training in laboratory research, seminar preparation and delivery, scientific writing, problem solving and research grant writing. Graduate study in nutritional sciences at the University of Missouri offers the advantage of interdisciplinary nutrition research that is facilitated via the many research centers at MU, including Food for the
21st Century (F21C), the Botanical Center, the Life Sciences Center and
the MU Nutritional Center for Health (MUNCH).

Nutrition is, by definition, an applied and multi-disciplinary science that
integrates other disciplines such as biochemistry, physiology, biology,
psychology, sociology, and economics. A primary research focus in
the department of Nutrition and Exercise Physiology is the role of diet
in the prevention and treatment of chronic diseases that are prevalent
in the United States today: obesity, the metabolic syndrome, diabetes,
immune disorders, neurodegenerative diseases, and osteoporosis.
Specific dietary components being studied for their role in human health
include protein, calcium, vitamin D, copper, iron, omega-3 fatty acids,
and nutraceuticals. Another important research area is the determinants of
eating behavior, including neuro-psychological, sociologic, and economic
factors. Investigative approaches include epidemiology, clinical trials,
human studies, experimental and transgenic animal models, and cultured
cell models.

Degree Requirements

A total of 75 hours beyond the bachelor's degree, including but not
limited to courses from the emphasis areas are required; courses from
the Masters degree may be counted at the discretion of the student's
committee. At least 15 of the 75 hours must be at the 8000/9000 level
(exclusive of research, problems and independent study experiences).
Graduate students may elect to take suggested courses from the
following focus areas:

- Human/Clinical Nutrition
- Public Health Nutrition
- Behavioral Science
- Food Science
- Biochemistry/Cell Physiology

A list of possible courses that fall within these areas can be found on the
department website: http://ns.missouri.edu/graduate_phd.html.

Sample Plan of Study

Because students in the PhD program are from a wide variety of
circumstances, and pursue the PhD at different paces, a sample plan
of study is not easily produced. Students are encourage to work out their
plan of study with their advisor.

Qualifying Process

Nutrition Applicants must pass a Qualifying Exam before a student is
officially admitted to the doctoral program. The Qualifying Exam should
be completed by the end of the second semester (D1 form should be filed
with the Graduate School). The Qualifying Exam consists of a knowledge-
based written exam and an oral exam.

Comprehensive Examination Process

A doctoral student must successfully complete the comprehensive
examination within a period of three (3) years beginning with the first
semester of enrollment as a PhD student. In addition, the program for
the doctoral degree must be completed within three (3) years of passing
the comprehensive examination. Time spent in the armed services will
not count toward the six (6)-year limit (See Graduate School Active
Duty Policy). For any extension of either of these time limitations, the
student must petition their faculty advisor/mentor and the academic
program’s director of graduate studies in writing during the semester prior
to reaching the time limitation. The director of graduate studies will notify
the advisor in writing of the decision. The two sections of the examination
must be completed within one month. A report of this decision (pdf)
(http://gradschool.missouri.edu/forms-downloads/repository/d3.pdf),
carrying the signatures of all members of the committee, must be sent to
the Graduate School and the student no later than two weeks after the
comprehensive examination is completed.
Dissertation Requirements

The dissertation must be written on a subject approved by the candidate's doctoral program committee, must embody the results of original and significant investigation and must be the candidate's own work. All dissertation defenses shall be open to the general faculty. For the dissertation to be successfully defended, the student's doctoral committee must vote to pass the student on the defense with no more than one dissenting or abstaining vote.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the PhD in Nutritional Sciences (http://nep.missouri.edu/graduate_phd.html) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Before official admission to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you applied. Specific information can be found on the department website: http://ns.missouri.edu/grad_admission.html

Nutritional Program PhD Applicants are expected to have undergraduate training (lecture and laboratory courses) in general and organic chemistry and biology, a two-semester course in biochemistry, and an upper-level human nutrition course. They must have an average of B or better in science courses (chemistry, biology, physics, biochemistry, mathematics, etc.) taken at an accredited institution and must provide GRE scores. TOEFL scores are required for all international applicants.

At this time, the program does not accept students into the doctoral program without a master's degree. A student without a master's degree who would like to pursue a doctoral degree must apply to the master's graduate program. Once accepted into the master's program it is possible to apply and transfer to the doctoral program after the first year of graduate study. Specified criteria must be met for the transfer to be approved by the Nutritional Sciences Graduate Admissions Committee. Please contact the department for more information on this subject.

Deadline for Applications is December 30th. While applications received after that date will still be considered, they will not be eligible for all fellowships.

The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP® certification examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial coaching in our Office for Financial Success, and to conduct research with a purpose.

Extension Assistant Professor G. McCaulley, A. Zumwalt
Emeritus Professor P. Lieurance, R. O. Weagley

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

- BS in Personal Financial Planning (p. 688)
  - with emphasis in Financial Counseling (p. 688)
  - with emphasis in Personal Financial Management Services (p. 689)
- Certificate in Personal Financial Planning (p. 691)
- Minor in Personal Financial Management Services (p. 692)

The Department of Personal Financial Planning is nationally and internationally recognized for its premier education and research programs. Not only does the department have one of only four PhD financial planning degrees in the U.S., it offers undergraduate, graduate, and certificate CFP Board-Registered Programs that prepare students to meet the education requirement to sit for the CFP® certification examination.
examination. The award-winning faculty provide an ideal environment for student success. Students have excellent opportunities to intern at leading financial planning firms, to participate in peer financial coaching in our Office for Financial Success, and to conduct research with a purpose.

The program leading to the BS in Personal Financial Planning offers designated emphasis areas in personal financial planning, personal financial management services, and financial counseling.

**PERSONAL FINANCIAL PLANNING**

The PFP degree option enables graduates to meet the education requirements to sit for the comprehensive CFP® examination to earn the right to use the CFP® designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client-centered financial planning advice.

To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

**PERSONAL FINANCIAL MANAGEMENT SERVICES**

PFMS is a degree option that prepares students to work with individuals and families in a wide range of financial service occupations, from insurance, investments, or banking to financial counseling, education, or a social change occupation. This degree program gives graduates a broad understanding of household financial management. Many students choose to complement this degree with a minor in business, economics, social work, or other related program.

To be admitted to the Personal Financial Management Services emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.0, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Management Services emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

**FINANCIAL COUNSELING**

Financial Counseling brings together a sound knowledge of personal finance with a solid background in counseling, utilizing the expertise of our colleagues in the School of Social Work and the Department of Human Development and Family Science. Besides preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops the tools a financial professional needs to help address the human issues often accompanying financial problems. In addition, graduates may take the exam that leads to earning the Accredited Financial Counselor (AFC®) designation, which is offered through the Association for Financial Counseling and Planning Education (http://www.afcpe.org/)® (AFCPE®).

To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

**MINOR**

The Minor in Personal Financial Management Services is intended for students interested in course work focused on empowering them to make more informed decisions related to lifelong personal finance choices.

**UNDERGRADUATE CERTIFICATE PROGRAM**

An undergraduate certificate in Personal Financial Planning was approved by the Missouri Coordinating Board for Higher Education and the Certified Financial Planner Board of Standards, Inc. Those who complete the certificate are eligible to sit for the CERTIFIED FINANCIAL PLANNER™ certification exam, upon graduation with a bachelor's degree. This student must have an MU cumulative GPA of at least a 2.5 upon application.

Students who want to explore the major can take FINPLN 2083 Financial Planning Careers and FINPLN 2183 Personal and Family Finance.

**Graduate**

- MS in Personal Financial Planning (p. 692)
  - with emphasis in Consumer and Family Economics (p. 692)
  - with emphasis in Personal Financial Planning (p. 693)
  - Graduate Certificate in Personal Financial Planning (p. 694)

The College also offers a PhD in Human Environmental Sciences with an emphasis in Personal Financial Planning (p. 672).

**Director of Graduate Studies and GPIDEA/Online Program**

Deanna L. Sharpe (http://pfp.missouri.edu/faculty_sharpe.html), PhD, CFP®, CRPC®, CRPS 239C Stanley Hall Columbia, MO 65211 573-882-9652 http://pfp.missouri.edu/

**Director CFP Board-Registered Program**

Frances C. Lawrence, PhD 241 Stanley Hall (573) 882-9651 http://pfp.missouri.edu (http://pfp.missouri.edu/)

**Program Information**

Individuals and families today bear an ever-growing responsibility for achieving and sustaining financial and economic success across their life span. Never has there been a greater need for well-trained professionals who can help individuals and families make informed and effective financial and economic decisions. In addition, research that helps to evaluate and recommend public policies that influence the economic opportunities and futures of individuals and families is in high demand.

Graduate course work in Personal Financial Planning at the University of Missouri analyzes household and consumer economic conditions and behavior, evaluating the interrelationships between households and markets with a focus on improving social policy. Students' programs are designed to develop professional competencies and interests. A resident doctoral and two masters programs are available. Online graduate offerings may be viewed at http://pfp.missouri.edu/graduate_distance.html.
Certification Information

Degrees registered with the Certified Financial Planner Board of Standards Inc. include: a graduate Certificate in Personal Financial Planning and an Applied Master’s Degree.

Financial planning course work could also be completed as a doctoral program that is registered with the Certified Financial Planner Board of Standards Inc.

Financial Aid

If you wish to be considered for internal assistantships, fellowships, or other funding packages, check the program website (http://pfp.missouri.edu/) or contact the Director of Graduate Studies, Rui Yao (http://pfp.missouri.edu/faculty_yao.html) for details.

Faculty Areas of Study

We conduct research pertaining to financial issues of individuals, families and households. Our research is highly applied and provides practical implications to researchers, financial planning professionals and policy makers on helping individuals, families and households make better financial decisions, improve their financial well-being, and reach their financial goals. Specifically, our research focuses on the following areas:

- Behavioral finance
- Risk management
- Investment
- Retirement and later-life financial issues
- Financial literacy and education

BS in Personal Financial Planning

Degree Program Description

Major Program Requirements

The BS in Personal Financial Planning offers three emphasis areas: Personal Financial Planning, Financial Counseling, and Personal Financial Management Services. Professional program requirements are listed at the emphasis level.

Semester Plan

The BS in Personal Financial Planning has emphasis areas in Financial Counseling (p. 688), Personal Financial Management Services (p. 689), and Personal Financial Planning (p. 690). Please see the individual emphasis area pages for degree requirements and admissions information.

BS in Personal Financial Planning with Emphasis in Financial Counseling

Degree Program Description

The Financial Counseling emphasis brings together a sound knowledge of personal finance with a solid background in counseling. Courses cover personal finance, social work, and human development and family science. In addition to preparing students to work with individuals and families in a wide range of financial service occupations, this emphasis area develops tools needed to help address the human issues often accompanying financial problems. Students may prepare for the Certified Retirement Counselor® (CRC®) or Certified Retirement Administrator® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor (http://afcpe.org/)® (AFC®) designation.

Major Program Requirements

Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Financial Counseling emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.25, based on at least 50 credits attempted. Students who wish to pursue a Financial Counseling emphasis must earn at least a grade of C (2.0) or better in FINPLN 2183 and FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

BS in Personal Financial Planning with Emphasis in Personal Financial Planning

Degree Program Description

The Personal Financial Planning degree program is registered with the Certified Financial Planner Board of Standards, Inc. (https://www.cfp.net/) allowing graduates to sit for the comprehensive CFP® examination to earn the right to use the CFP® designation. Coursework includes principles of personal financial planning, investments, insurance, taxation, retirement planning, and estate planning, complemented by courses that develop an understanding of the economic and social contexts within which clients make financial decisions. Graduates excel in providing client–centered financial management advice. Students may prepare for the Certified Retirement Counselor® (CRC®) or Certified Retirement Administrator® (CRA®) designation, or take the exam that leads to earning the Accredited Financial Counselor® (AFC®) designation. Graduates are employed as financial planners, private wealth manager, investment strategist, employee benefits advisor, retirement benefits administrator, insurance specialist, financial counselor, compliance officer, client service manager, trust & estate administrator, Extension agents, and consultants or counselors in financial, social, educational, legal, and government agencies.

Graduates must complete education requirements, pass a national professional exam, obtain professional experience, and agree to adhere to the professional code of ethics before being able to use the CFP® marks.

Major Program Requirements

Professional Program

The Professional Program is comprised of three areas listed below: departmental core requirements, supporting coursework, and professional specialization courses. To be admitted to the Personal Financial Planning emphasis area, students must have a University of Missouri cumulative GPA of at least a 2.5, based on at least 50 credits attempted. Students who wish to pursue a Personal Financial Planning emphasis must earn a grade of B- (2.7) or better, in FINPLN 2183 and a grade of C (2.0) or better in FINPLN 3283 to move to the professional program. A grade in the D range is allowed in only one course in the professional program (unless otherwise noted), regardless of emphasis area.

Total Credits  22

The undergraduate certificate in Personal Financial Planning has been approved by both the Missouri Coordinating Board for Higher Education and the Certified Financial Planner Board of Standards, Inc. Those who complete the certificate are eligible to sit for the CERTIFIED FINANCIAL PLANNER™ certification examination upon graduation with a bachelor's degree. Students must have a University of Missouri cumulative GPA of at least a 2.5 upon application.

This certificate completes the education requirement to allow one to take the CFP® examination. For more information on the CFP® examination, please see http://www.cfp.net/become-a-cfp-professional/cfp-certification-requirements/cfp-exam-requirement/about-cfp-exam/.

Minor in Personal Financial Management Services

Requirements

The Personal Financial Management Services minor is available to undergraduate students. Students earning a BS in any Personal Financial Planning emphasis areas are not eligible for the Personal Financial Management Services minor. At least 7 of the 16 hours must be taken from the MU Personal Financial Planning department. FINPLN 2183 must be taken for Math Reasoning Proficiency credit.

* Requires a grade of C (2.0) or higher.

MS in Personal Financial Planning

Degree Requirements

The MS in Personal Financial Planning has two emphasis area options: A Resident Master of Science emphasis in Consumer and Family Economics (p. 692) (thesis option), or a resident or online Applied Master of Science emphasis in Personal Financial Planning (p. 693) (non-thesis option). Students must choose an emphasis area. Professional program requirements are listed at the emphasis level.

MS in Personal Financial Planning with Emphasis in Consumer and Family Economics

The resident Research and Policy Master of Science track prepares students for college teaching, consumer research positions, social service agencies, extension or other adult education programs, financial services institutions, consumer journalism and other positions in business, the public sector and not-for-profit institutions. Studies culminate in a research-based thesis that may either have a theoretical or applied focus. This masters degree also prepares students for subsequent work on a doctoral degree. Course work focuses on critical analysis of the interaction of the household sector with the markets for labor, consumer goods and financial products. Emphasis is placed on developing analytical skills.

Degree Requirements

The thesis-based Resident Master of Science program requires a minimum of 30 hours. Course work culminates in a master’s thesis.

Plan of Study

Each student’s plan of study will vary to some degree, depending on the student’s background, needs, and career plans.

Please review the following degree program handbooks for degree requirements and plan of study: Resident Research and Policy Master’s Degree Program Handbook.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Personal Financial Planning program (https://gradstudies.missouri.edu/degreecategory/personal-financial-planning/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied. Acceptance to this program requires GRE or GMAT scores that meet department standards.

Application Deadlines
Fall deadline: April 1st
Spring deadline: October 1st
*Exceptions will be considered on a case by case basis

• Résumé

MS in Personal Financial Planning With Emphasis in Personal Financial Planning

The resident Applied Master of Science is for students who view the MS as their terminal degree and plan to work as a financial services professional following graduation. The Applied MS focuses on understanding issues and solving practical problems in the financial services industry. An industry-relevant capstone research project, rather than a thesis, is required for graduation. The program is registered with the Certified Financial Planner Board of Standards, Inc. Course work is designed to complete the education required to sit for the national CERTIFIED FINANCIAL PLANNER™ (CFP®) exam and to broaden the practitioner’s understanding of the various factors that can affect and enhance a client’s financial security and economic well-being. Coursework culminates in a creative component, providing students an opportunity to integrate theory and practice in exploring or resolving issues related to personal financial planning.

Degree Requirements

The Applied Master of Science is a non-thesis 36-hour program.

• This degree is also available via distance education through the Great Plains IDEA group. Note, the Great Plains IDEA (https://www.gpidea.org/program/family-financial-planning/) degree option also requires 36 hours to complete. Please see http://pfp.missouri.edu/graduate_distance.html for more information.

Graduate Certificate in Personal Financial Planning

The Personal Financial Planning Certificate is an 18 hour non-degree, post-baccalaureate program that will enable students to meet the education requirement for the CERTIFIED FINANCIAL PLANNER™ exam.

Program applicants must have completed a bachelor’s degree. Completing the Personal Financial Planning Certificate satisfies the Certified Financial Planner Board of Standard’s education requirement, which is one of four requirements leading to approval to use the CFP® designation. The other three requirements are passing the national exam, meeting an experience requirement and agreeing to adhere to the CFP® code of ethics. The CERTIFIED FINANCIAL PLANNER™ designation is widely recognized as the premier professional designation in the personal financial management services industry. (This certificate is also available via distance education through the Great Plains IDEA group. Please see http://pfp.missouri.edu/graduate_distance.html for more information.)

The Bachelor of Social Work (BSW) Program is a professional program that prepares you for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. The program provides an educational experience that prepares graduates for a diverse range of career choices and pathways.

The Bachelor of Social Work (BSW) professional program is built upon a rigorous liberal arts foundation that prepares students for general practice in social work. Within this framework, students are prepared to apply a configuration of knowledge, values and skill to a variety of individual, family and community problems to effect positive change.

The School of Social Work is accredited by, and a charter member of, the Council on Social Work Education. BSW students and graduates are eligible for membership in the National Association of Social Workers. BSW graduates are eligible for accelerated, Advanced Standing status in Master of Social Work degree programs.

Departmental Honors

Candidates for Departmental Honors must be students who are admitted to the professional BSW program and members of the MU Honors College in good standing. Students must submit a proposal for approval for Social Work Honors and successfully complete SOC_WK 4971H Advanced Study for Social Work Honors.

Career Opportunities

Jobs in social work are expected to grow much faster over the next decade. Through social work’s unique person-in-environment focus, BSW graduates are prepared to work effectively with individuals, families, small groups, communities and organizations.

Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Graduation Requirements

A minimum of 120 credits with a GPA of 2.5 is required for graduation. The requirements include liberal arts foundation courses, professional BSW core courses and general electives. Students are allowed only two grades of a C+ in the professional program.

The professional BSW core consists of 46 credits. BSW core courses are offered only once each year in sequence and require three semesters to complete. In the third semester of the BSW core, each student will complete a practicum in a social service agency that includes 400 hours of supervised field instruction.

Admission to the School of Social Work

Students in good academic standing with fewer than 55 hours may declare a social work major. Students are required to complete a range of courses in liberal arts as foundation to the BSW professional program and as electives.

Admission to the BSW professional program is competitive. In the spring, students may apply for fall admission to the BSW professional program if they meet the following criteria:

1. Completion of at least 42 credits (second semester sophomore status) by the application deadline and
2. Completion of at least 55 credits completed before the beginning of the first semester (fall) of the BSW foundation curriculum
3. Minimum 2.5 cumulative GPA required
School of Social Work

The mission of the MU School of Social Work is to promote leadership and excellence in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work is to prepare students for professional social and economic justice by preparing students for professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.

BSW in Social Work

Degree Program Description

The Bachelor of Social Work (BSW) Program is a professional program that prepares students for immediate entry into direct human service professional positions, graduate-level education, and life-long learning. BSW-level social workers assist individuals, families, small groups, organizations, and communities to effectively resolve problems, deal with their relationships, and function optimally within their environment. Graduates are employed in many different settings, including nursing homes, hospices, hospitals, home care agencies, family service agencies, children and youth services, aging services, residential treatment programs, domestic violence shelters, criminal justice agencies, schools, and legal services agencies.

Major Program Requirements

Required Entry-Level Courses: Specific liberal arts requirements for graduation are listed below (* denotes a prerequisite course to the BSW program that must be completed before beginning social work core courses).

Students must complete all university requirements (p. 35), including general education (p. 36), in addition to the degree requirements below. The minimum grade for all non-Social Work courses is a C-.

Graduate

- MSW in Social Work (p. 698)
- PhD in Social Work (p. 700)

About the School of Social Work

For over ninety years, social work education has been offered to students at Missouri's premier public institution. The school is proud of its grass roots history: an early pioneer of social work education in 1906, a founding member of the original accrediting body for social work education in 1919, an institution advancing research and scholarship throughout the 20th century, and finally, to its role as an innovator in doctoral education, with a nationally distinctive PhD program emphasizing state social policy.

The mission of the MU School of Social Work is to promote leadership for social and economic justice by preparing students for professional excellence and leadership in practice, research, and policy. Within the context of a land grant institution, the mission of the School of Social Work reflects the University of Missouri's tightly interlocked missions of teaching, research, outreach, and economic development.

Careers

The nation faces a critical shortage of qualified personnel who possess the rigorous research skills needed to develop, plan, and evaluate social work interventions and the structure of social services. The Master of Social Work (MSW) Program prepares graduates for leadership in professional social work practice within the areas of Advanced Clinical Social Work Practice or Policy, Planning and Administration in Human Services. Doctoral programs in social work are the major resource for social work researchers and scholars. The rapid growth and development in new social work undergraduate and graduate programs throughout the country has also increased the demand for doctoral social work faculty. In recent years, there have been 400-500 doctoral faculty vacancies advertised annually in schools of social work, while the number of graduates has remained at 250-300 per year, with one hundred of those graduates seeking non-academic positions.
BIO_SC 1020 General Biology Laboratory 2

SOC_WK 4970 Senior Professional Seminar 3
SOC_WK 4971 Undergraduate Field Practicum 6

Social work elective (4000-level) in a field of practice 3

**Total Credits** 120

\(^1\) SOC_WK 2000W, SOC_WK 2220W, SOC_WK 4951W, SOC_WK 4952W, SOC_WK 4770W are all required courses. No additional courses are required for the Writing Intensive (WI) requirement toward graduation.

\(^2\) Humanities include art and music history and appreciation classes, classical studies courses, foreign civilization courses, literature courses in English or other languages and religious studies courses. Students should check the MU General Education website for a list of courses.

\(^3\) One course in humanities or biological, physical or mathematical sciences must be at the 2000 level or higher. SOC_WK 4310 meets the upper-level requirement in Mathematical Science.

\(^4\) Exploration of Power, Privilege & Oppression: Social Work BSW majors are required to take SOC_WK 2000W to count for three credit hours of the six credit hours requirement. Students should select one additional course that reflects the cultural diversity of our society; often selected from social work, sociology, anthropology, peace studies, English, religious studies, human development and family science, black studies, and women and gender studies. Students can find a complete list on the School of Social Work website.

\(^5\) In addition to the above liberal arts requirements and the 50-credit Professional BSW Core (inclusive of SOC_WK 2220W), students select elective courses to reach the total credit hour requirement. SOC_WK 1115 Social Welfare and Social Work is strongly recommended.

**Capstone Requirements**

All students accepted into the professional BSW program must take SOC_WK 4971 Undergraduate Field Practicum and SOC_WK 4970 Senior Professional Seminar to complete their capstone requirement. Please note: As a student, if you have acquired any criminal background history which includes misdemeanors or felony charges your choices of placements may be affected. In an effort to assist you we strongly encourage you to make an appointment with the Director of the Undergraduate Program to assist in facilitating options for your completion of educational requirements.

**Basic Skills Credit Limitations**

No more than 4 credits may be taken from "skills" courses to count toward the required 120 credits. More skill classes may be taken, but will be in excess of the 120 credits. Examples of skills courses are applied art and music performance classes, computer skills, self-defense and first aid.

**Semester Plan**

Below is a sample plan of study, semester by semester. A student’s actual plan may vary based on course choices where options are available.

MSW in Social Work

The University of Missouri’s Master of Social Work (MSW) Program prepares competent, effective and ethical social work professional leaders for social change. The MSW Program emphasizes a commitment to enhancing human well-being by alleviating social problems, embracing diversity and promoting social and economic justice with systems of all sizes through advanced clinical social work practice and policy planning and administration in human services. The MSW program prepares students to promote social and economic justice that responds to the broad economic, social, and cultural needs of the public and private. The MSW Program is fully accredited by the Council on Social Work Education, of which the School of Social Work is a charter member.

Degree Requirements

Preparation for professional leadership encompasses two major components: Foundation and Concentrations.

Foundation

Develops knowledge and skills related to social interaction, human development, community dynamics, social policy and societal values applicable to generalist social work practice.

Concentrations

The MSW program offers two concentrations: Advanced Clinical Practice and Policy, Planning and Administration (PP&A). Within these concentrations, students have the opportunity to create a plan of study based on their individual interests and professional goals. Decisions regarding their chosen concentration are made by students in consultation with faculty advisors. A brief description of the two concentrations is as follows:

Advanced Clinical Social Work Practice: includes strategies of clinical intervention with socially and economically disadvantaged individuals, families, and small groups in a variety of health, mental health, family and children services, and senior citizen agencies.

Clinical concentration courses

- Advanced Clinical Selective (choose 1 from those offered) 3
- Elective (must be graduate level) 3
- Elective (must be graduate level) 3
- Elective (must be graduate level) 3

Policy, Planning and Administration in Human Services: includes intervention strategies that effect change at the organizational, interagency, community, and societal levels to advance social and economic justice for consumers of social and human services and to empower practitioners within those agencies.

Policy, Planning & Administration courses

- Elective courses offered will vary from year to year.
- The third elective course is only required for regular standing students.

Total Credits: 120
Course Format

On Campus MSW Program courses are primarily offered in-person. A few foundation, concentration and elective courses are offered online through Canvas, a learning management system licensed to the University of Missouri for online courses.

The Online MSW program is designed for part-time study with two courses, typically 6 credit hours of course work, per semester. All courses are offered online through Canvas with the exception of the practicum, which requires 680 hours of supervised work at an approved agency.

Standing and Additional Information

Regular Standing: Non-Social-Work Bachelor’s

The regular 60-credit hour degree is appropriate for students who have undergraduate degrees other than accredited social work degrees. The school admits full-time (on-campus) and part-time (online) students to the regular 60-credit hour program.

Advanced Standing: Bachelor’s in Social Work (BSW)

Students who have graduated within the past seven years from a baccalaureate social work program accredited by the Council on Social Work Education may be eligible for the Advanced Standing Program, which is an accelerated 39-credit hour degree.

Starting Dates

On-campus students admitted to the Regular Standing Program are admitted in fall semester (full-time). On-campus students admitted to the Advanced Standing Program are admitted in the fall or spring semester. Online students admitted to the Regular Standing program are admitted for the summer semester (part-time) and online students admitted to the Advanced Standing Program are admitted for fall semester (part-time).

Length of Study & Satisfactory Progress

Full-time Regular Standing students take 15 credits each semester and graduate in two years (4 semesters of study). Full-time Advanced Standing students take 3-5 classes each semester (9-15 credits) and graduate in 12-17 months (3 semesters of study). Part-time Regular Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in three years (9 semesters of study). Part-time Advanced Standing students take 2-3 classes (6-9 credits) every semester, including summer, and graduate in two years (6 semesters of study). All students are full-time during their last semester while completing block placement. All students must complete at least eight hours per academic year to maintain a satisfactory rate of progress.

Financial Aid from the Program

Scholarship opportunities are available for full-time and part-time program applicants who meet the early application deadline. A separate Scholarship Application is available on the department website. Submission of the Scholarship Application is due by early application deadline.

Admission Criteria

Application Deadlines

Summer/Fall deadline: January 15 (early priority), March 1 (final)

Spring deadline: September 15 (early priority), November 15 (final)

Admission Criteria

- Minimum GPA: 3.0.
- Bachelor’s degree from an accredited college or university with the applicant’s undergraduate transcript reflecting a sound liberal arts foundation, including courses in the humanities, as well as in the social and behavioral sciences.
- All International students must submit Internet-based (iBT) TOEFL scores or IELTS scores. No waivers will be given.

Minimum iBT TOEFL scores:

Prerequisites

All MSW applicants must complete an approved college level statistics course with a grade of C- or higher before they will be accepted to enroll in the MSW program. SOC_WK 4310 is the recommended course for University of Missouri students. The following University of Missouri courses are also approved and may be taken in lieu of SOC_WK 4310: STAT 1200, STAT 1400, STAT 2500, and ESC_PS 4170. Statistics courses completed at other academic institutions may substitute for University of Missouri statistic courses, pending submission of official transcript and approval by the MSW Program Director. Completion of the statistics course prior to application submission is preferred and strongly recommended. If an applicant is enrolled in a statistics course at the time of application and accepted into the MSW Program, the acceptance will be ‘pending successful completion of the approved statistics class’.

Note: Priority admission deadline for On-campus and Online, Regular Standing Applicants and Online, Advanced Standing Applicants: January 15. A student qualifies for Regular Standing Admission if s/he has an undergraduate degree in any field other than Social Work. An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any applicant who applies after the priority deadline will be considered on the rolling admission cycle until March 1.

Note: Priority admission deadline for On-campus, Advanced Standing applicants: September 15. An applicant qualifies for Advanced Standing admission if they have a bachelor’s degree in Social Work earned within the last seven (7) years. Any Advanced Standing applicant that applies after the priority deadline of September 15 for spring admission will be considered on a rolling admission cycle until November 15.
Required Application Materials

To the Graduate School:

• All required Graduate School documents

To the MSW Program:

• Personal statement (see department instruction)
• Résumé/CV
• Three letters of professional reference from persons who can address the applicant’s intellectual ability and interpersonal skills, potential for graduate education, and potential for professional social work practice through observation in an educational or work (paid or volunteer) setting. Letters of reference should not be submitted from friends or family
• Unofficial transcripts
• Advanced standing students only: the most recent copy of your field evaluation (see department instruction) or one of your three required references should be from your supervisor at your practicum site.

PhD in Social Work

About the Program

The Doctor of Philosophy (PhD) program in social work focuses on research that informs social welfare policy and practice. It is designed to prepare scholars for research, teaching and program development positions in academic and professional social work practice and policy settings.

Degree Requirements

The PhD program is available to both persons with a Masters of Social Work (MSW) degree and those with other master’s degrees. The curriculum consists of a minimum of 55 post MSW semester credit hours or, for applicants without an MSW, 67 hours. The curriculum is divided among three distinct but highly interrelated elements designed to complement one another in assisting students to achieve the competencies expected of a graduate of this program. A core of social work courses provides the foundation in the traditions and knowledge in the profession and exposure to state-of-the-art research and techniques for the 21st century. Electives from the broad spectrum of social and behavioral sciences offering available through MU departments provide students with the opportunity to design an individualized plan of study that capitalizes on their unique interests and talents. A strong regimen of research methodology, theory, and policy analysis are designed to prepare students for use of both current and emerging methods of scientific inquiry.

Financial Aid from the Program

Scholarship opportunities are available for full-time program applicants who meet the application deadline. Graduate teaching and research assistantships are also often available. Some forms of support require additional forms from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

Admission Criteria

Admission deadline: Midnight December 1

• Minimum GPA: 3.0; 3.5 in graduate study
• Minimum TOEFL scores:
  - Internet-based test (iBT) 80
  - Paper-based test (PBT) 550

  • An MSW or related master’s is required. Applicants without the MSW must take a minimum of 12 credit hours of MSW course work. This
requirement may be waived for applicants with additional graduate work.

- Minimum of two years post-master’s practice experience encouraged.

**Note:** These criteria are used flexibly to assess the applicant’s potential for study and research in this program.

**Required Application Materials**

*To the Office of Graduate School:*

- All required Office of Graduate School documents

*To the Director of the Doctoral Program in Social Work (via the Graduate School’s online application system):*

- Three letters of recommendation
- CV
- Writing proficiency sample
- Personal statement
- A personal interview is required, and if possible, will be arranged at MU. A Skype interview may be utilized in some cases.

- Graduate Faculty Member - membership is required to teach
graduate-level courses, chair master's thesis committees, and serve
on doctoral examination and dissertation committees.
- Doctoral Faculty Member - membership is required to chair
doctoral examination or dissertation committees. Graduate faculty
membership is a prerequisite for Doctoral faculty membership.

**Undergraduate**

- BS in Textile and Apparel Management (p. 702)
- Minor in Textile and Apparel Management (p. 704)

The Department of Textile and Apparel Management is a global leader focusing on the apparel and textile supply chain. TAM's award-winning faculty is internationally recognized. TAM prepares students for a wide variety of career options such as merchandising, buying, sourcing, product development, technical design, e-retailing or retail operations. The curriculum focuses on leadership, the global supply chain, sustainability, creativity/innovation and technology. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the skills they need for top industry positions.

Students who major in Textile and Apparel Management may choose from the following tracks:

- Apparel Retailing and Digital Merchandising
- Apparel Product Development

These tracks are designed to provide students with knowledge and skills necessary to function in the global textile and apparel industry. (Note: Tracks do not appear on transcripts or diplomas). Students majoring in Textile and Apparel Management are required to take a set of core courses. Students may not take departmental courses using the Pass/ Fail grading option. In addition to college and department requirements, students must meet all University graduation requirements (p. 35) including University general education (p. 36).

Students who want to explore Textile and Apparel Management may take the following classes:

Graduate programs in textile and apparel management offer the following areas of study: apparel design; apparel product development; consumer behavior; global supply chain management; history; marketing; retailing; and merchandising.

Careers

Career opportunities for graduates exist in many areas, such as higher education, industry, museums, product development, production management and cooperative extension.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

BS in Textile and Apparel Management

Degree Program Description

Textile & Apparel Management (TAM) is a program which focuses on the apparel and textile supply chain. The curriculum emphasizes leadership, the global supply chain, sustainability, creativity/innovation and technology. Students have access to state-of-the-art design and apparel technology labs. The Apparel Retailing and Digital Merchandising track prepares students for careers in merchandising, buying, planning, allocation, e-retailing, and retail management. The Apparel Product Development track prepares students for careers in technical and creative design, sourcing, and product development. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the skills they need for top industry positions.

Major Program Requirements

There are two tracks available in Textile and Apparel Management: Apparel Retailing and Digital Merchandising (ARDM), and Apparel Product Development (APD). The ARDM track provides students with an understanding of digital and brick-and-mortar retailing which emphasizes apparel merchandising within both formats. The APD track provides students with an understanding of the apparel design and apparel technology labs. The Apparel Retailing and Digital Merchandising track prepares students for careers in merchandising, buying, planning, allocation, e-retailing, and retail management. The Apparel Product Development track prepares students for careers in technical and creative design, sourcing, and product development. Through coursework, field study experiences, internships, leadership conferences and student organizations, TAM students develop the skills they need for top industry positions.

* Courses required for the Business Minor (p. 385).
Minor in Textile and Apparel Management

An undergraduate minor in Textile and Apparel Management is available for students pursuing a major in another department. Students who wish to complete a minor should declare the minor by completing the form at https://hes.missouri.edu/academics/hes-minors-certificates/.

Requirements

A minimum of 18 credit hours is required with at least six hours at the 2000 level or above. At least 15 of the 18 total credit hours must be taken in residence at the University of Missouri. Prerequisites for all courses must be met, or the student must have the permission of the instructor.

Required Courses:

- **T_A_M 1200** Basic Concepts of Apparel Design and Production 3
- or **T_A_M 1300** Softgoods Retailing
- **T_A_M 2200** Science of Textiles 3

Select 12 credits from any area listed below in consultation with a TAM Advisor. Credits may be taken in a variety of interest areas.

**Apparel Industry Studies**

- **T_A_M 2100** Introduction to Digital Presentation Techniques 3
- **T_A_M 2400** Global Consumers 3
- **T_A_M 3010** Think Global: Fundamentals of Globalization and Digital Technologies 3
- **T_A_M 3200** Softgoods Quality Evaluation 3
- **T_A_M 4110** Global Sourcing 3
- **T_A_M 4400** The Clothing/Textile Consumer: Data Analytics 3
- **T_A_M 4549** International Experiential Learning in Textiles and Apparel 1-3
- **T_A_M 4810** Case Studies in an Inter/Multicultural World 3
- **T_A_M 4949** Field Training in Textiles and Apparel Management 1-3
- **T_A_M 4998** Experiential Learning in Textiles and Apparel 1-3

**Historical/Behavioral Studies in Dress**

- **T_A_M 2500** Social Appearance in Time and Space 3
- **T_A_M 2520** History of Western Dress 3
- **T_A_M 3520** 19th and 20th Century Western Dress 3

**Apparel Retailing & Digital Merchandising**

- **T_A_M 2300** Retail Finance and Merchandise Control 3
- **T_A_M 3300** Retail and Merchandising Analysis 3
- **T_A_M 3700** Omnichannel Retailing in the Digital World 3
- **T_A_M 3800** Retail Entrepreneurship 3
- **T_A_M 4000** Digital Marketing Strategies for Fashion 3
- **T_A_M 4300** Softgoods Brand Management and Promotion 3
- **T_A_M 4600** Digital Merchandising 3
- **T_A_M 4990** Retail Marketing and Merchandising 3

**Apparel Product Development**

- **T_A_M 2280** Apparel Production 4

MA in Textile and Apparel Management

Degree Requirements

A minimum of 30 credit hours at the 7000 level or above is required for the degree, with at least 15 credit hours at the 8000 level or above. A minimum of 9 credits in Research/Qualitative/Quantitative methods is expected, of which 3 credits are Research Methods and 3 credits Statistics. A project is required for the degree. The examples of the project include teaching, outreach, exhibit, or public presentation with clear statements of backgrounds, methods or approaches, and outcomes of the project. Six credit hours can be earned for the completion of the project. A maximum of 6 credit hours in problems and/or readings may be counted toward the required 30 credit hours.

Core Course Requirements

- Textile and Apparel Management: minimum 9 credit hours focused group of courses
- Research Methods/Statistics: minimum 9 credit hours
- Supporting areas: minimum 6 credit hours for broadening the theoretical or practical base for the project
- Project in Clothing and Textiles: minimum 6 credit hours

Admission Criteria

Fall deadline: January 15 for financial support considerations

- Minimum GPA: 3.0 in last 60 hours
- Bachelor’s degree from an accredited college or university in textile and apparel management or related field. Those with unrelated majors will need to do make-up work
- Minimum TOEFL or IELTS scores:
  - Internet-based test (iBT): 80
  - Paper-based test (PBT): 550
  - IELTS: 6.5
- Recommended Minimum GRE scores:
  - On or After August 1, 2011: Verbal + Quantitative 153/144, Analytical 3.0

Required Application Materials

To the Graduate School:

- All required Graduate School documents
- Statement of professional objectives (upload to application)
• Official transcripts from every college or university you have attended
• Three letters of recommendation
• GRE Scores
• Latest vitae or résumé
• A 2 minute video about the applicant's career goals
• TOEFL or IELTS scores if international student
• Others; such as writing examples or design portfolio if design student

Minor in Criminology/Criminal and Juvenile Justice

The Criminology/Criminal and Juvenile Justice minor is available for ALL students, regardless of major. The courses aim to have students develop an understanding of the criminal and juvenile justice system and criminal behaviors through a social justice lens. This lens allows students to recognize the impact of the justice system on vulnerable and marginalized populations and offers a critical reflection of the ways in which evidence-based intervention and sensible social policy can reduce criminal justice involvement. The School of Social Work and Arts and Science will offer experiential learning opportunities to apply skills within criminal and juvenile justice settings, with adviser approval, which will count towards the minor requirements.

Requirements

A minimum of 18 hours, comprised of the courses below, is required to complete the minor. Students must have a 2.5 minimum GPA to apply for and earn the minor. Note that students must earn a grade of C- or higher in all courses and a maximum of 6 credit hours from transfer institutions may be applied toward the minor.

Minor in Financial Literacy for Helping Professionals

Individuals who struggle to meet their financial needs may have problems with their credit history or lack of experience with mainstream financial institutions and the language they speak. It is easy for someone who lives in or near poverty to fall prey to unscrupulous lenders, who take advantage of unstable situations. This program will prepare professionals to help clients avoid predatory lending practices, as well as access programs designed to supplement income for the impoverished.

The School of Social Work, in collaboration with the Department of Personal Financial Planning in the College of Human Environmental Sciences at MU, has developed a minor that will prepare students to work with vulnerable clients who are in need of financial counseling and education. Coursework includes classes in personal and family finance, financial counseling, tax planning, economics, community agencies, social policy, and exploration in social and economic justice.

Requirements

The minor requires completion of 15 credit hours as defined below, with a grade of C- or above. Also required in the student’s major curriculum is Microeconomics and College Algebra. A student must be admitted to the University of Missouri with a declared academic major. The student must have an overall GPA requirement of a 2.5 to apply for and earn the minor. This minor is available to students regardless of academic major. The non-academic certificate and training program include a financial simulation activity and related coursework.

Minor in Social Work-Gerontology

The Undergraduate Gerontology Minor is designed to provide students with basic knowledge about older adults and the aging process, and applied skills for aging-related practice. Students who complete the Gerontology Minor come from a variety of undergraduate programs, in order to augment their studies with an in-depth focus on older adults. The field of Gerontology is interdisciplinary by nature and rapidly expanding, therefore jobs are available in just about every sector of our economy. The Gerontology Minor compliments this diversity, by offering coursework from several academic units on campus.

Students enrolled in the Gerontology Minor will:

- Build a firm understanding of the aging process, including biological, cognitive, psychological, and social processes that occur across late adulthood.
- Be able to critically analyze social problems that exist, which affect older adults in today’s society.
- Gain knowledge of the U.S. healthcare system, with emphasis on health policy affecting older adults.
- Develop assessment and intervention skills to work with older adults and their families in interdisciplinary settings.

Students who complete the Gerontology Minor are uniquely positioned for employment opportunities in the aging field after graduation.

Requirements

To obtain the Gerontology Minor, a student must complete the minimum 15 credit hours as outlined above. A minimum grade of ‘C-’ in all coursework is needed to qualify for the minor.

Graduate Certificate in Financial and Housing Counseling

The purpose of the Financial and Housing Counseling Certificate is to develop a student’s financial counseling skills and to prepare a student to sit for the Accredited Financial Counselor (AFC®) exam offered through the national Association for Financial Counseling and Planning Education (AFCPE®). Students with this background would be equipped to provide professional assistance in debt counseling, financial management, and housing finance to those in need. Typical clients would include those with low levels of income and resources, disaster recovery, and military personnel dealing with financial and housing issues related to deployment, relocation.

This certificate is offered as part of the Family Financial Planning programs in the Great Plains Interactive Distance Education Alliance. More information is available at https://www.gpidea.org/course-planner/family-financial-planning/financial-and-housing-counseling/.

Requirements
The certificate program requires the completion of 18 credit hours. Courses are taught online.

Graduate Certificate in Geriatric Care Management

The Geriatric Care Management certificate is a web-based, four course certificate designed for those who provide independent case management services to elder Americans or who wish to do so in the future. The certificate provides an educational credential in addition to preparing students to sit for certification examinations given by national credentialing organizations.

Graduate Certificate in Gerontology

A certificate in gerontology (21 credit hours) is ideal for professionals in a variety of aging-related fields. Areas include senior-services organizations like centers on aging; senior centers; nursing homes; assisted, independent, and aging-in-place living facilities; non-profit organizations; faith-based groups; and extension educators.

Graduate Certificate
Gerontological Social Work

The University of Missouri Graduate Certificate in Gerontological Social Work is open to MSW students from any social work program nationwide, as well as currently practicing social workers with a BSW or MSW degree. The University of Missouri School of Social Work has a long history of training gerontological social workers and conducting research in the field of aging.

Training Social Workers to Respond to a Growing Need

Gerontological social work is one of the fastest growing fields within the profession, with a 25-34% job growth in the past decade. Therefore, the demand for social workers who have specialized training in working with older adults is very high. This certificate program is designed to help train the next generation of geriatric social work practitioners. Individuals enrolled in this certificate program will build knowledge and expertise in working with older adults and their families in a variety of settings that serve the aging population. This program offers an interdisciplinary emphasis, as social workers often work on large, interdisciplinary teams on behalf of their older clients. In addition, this program also focuses on building awareness of aging policies and services, as well as advocacy of older adults.

As a result of earning this Graduate Certificate in Gerontological Social Work, students enrolled in an MSW program as well as practicing social workers who hold a BSW or MSW degree can expect enhanced employability in the field.

Graduate Certificate in Gerontological Social Work Curricula

Courses are available online, and some are available in-seat as well. If you would like to propose a substitution for one of these courses, please contact the Director with the course number, course name, and the course description. These requests will be taken into consideration and you will be notified with a decision of your request.

Please note that the semester in which courses are offered and the method of delivery (i.e. class type) can frequently change. Please consult the current degree offerings at MU to verify that a particular course will be offered when you aim to enroll. You may also contact the Director of the certificate program if you have questions about course offerings.

Requirements

This certificate program consists of 12 credit hours.

Required Courses (take both courses): 6
SOC_WK 7480 Helping Strategies with Older Persons
SOC_WK 8240 Social Policy for Older Adults

Choose one elective course: 3
SOC_WK 7395 Death, Grief and Loss
SOC_WK 8210 Disability Rights Advocacy

Choose one interdisciplinary course: 3
H_D_FS 7255 Aging Policy
H_D_FS 7256 Environments and Aging
H_D_FS 7257 Aging and the Family
H_D_FS 7259 Mental Health and Aging
H_D_FS 7260 Women and Aging
H_D_FS 7261 Biological Principles of Aging
H_D_FS 8221 Gerontechnology
H_D_FS 8222 Creativity and Aging
H_D_FS 8251 Perspectives in Gerontology
H_D_FS 8253 Physical Health in Aging
H_D_FS 8254 Gerontology Research Methods and Program Evaluation
H_D_FS 8258 Professional Seminar in Gerontology

Contact Information:
For additional information about the Graduate Certificate in Gerontological Social Work, please contact Dr. Erin Robinson at robinsonel@missouri.edu.

Graduate Certificate in Youth Development Program Management and Evaluation

A certificate in Youth Development Program Management and Evaluation is ideal for professionals in a variety of youth-related fields. Areas include youth-serving organizations like 4-H; Boys and Girls Club; non-profit organizations; faith-based groups; community recreation facilities; correctional professions; elementary, middle and high school educators; and extension educators.

Certificate web site: http://hdfs.missouri.edu/grad_youthprogram.html

Requirements

A total of 13 credit hours is required.

Required
H_D_FS 7231 Foundations of Youth Development 1

Elective (select 4 of the following for 12 credits)
H_D_FS 8235 Administration and Program Management 3
Graduate Certificate in Youth Development Specialist

A youth development specialist graduate certificate is ideal for professionals in a variety of youth-related fields. Areas include youth-serving organizations like 4-H; Boys and Girls Club; non-profit organizations; faith-based groups; community recreation facilities; correctional professions; elementary, middle and high school educators; and extension educators.

Certificate web site: http://hdfs.missouri.edu/grad_youthspecialist.html

Requirements

Total of 13 credit hours required.

About the School
The Missouri School of Journalism was established in 1908 to strengthen the effectiveness of public communication in a democratic society. The school awarded the world’s first undergraduate degree in journalism (1909), master’s degree in journalism (1921) and doctorate in journalism (1934).

The school emphasizes hands-on learning-by-doing, a philosophy that began with the publication of a community newspaper in 1908 and continues today through its public-facing professional newsrooms and agencies. Known as the “Missouri Method” this approach allows students to prepare for careers in journalism and strategic communication. Students gain experience at an NBC affiliate television station, NPR-member station, a digital-first community newspaper, monthly arts and culture magazine and at niche media outlets focused on current issues in business or international affairs. Students learn about advertising and public relations work through two strategic communication agencies creating campaigns for local, regional and national paying clients.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist and strategic communication practitioner. Faculty members work to consistently improve a dynamic array of course offerings that lead the way in journalism education and research. Faculty also have a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners.

Through the Reynolds Journalism Institute and the Novak Leadership Institute, the school creates entrepreneurial and innovative methods to build future leaders and to sustain the flow of news and information for the betterment of society. At the Murray Center for Documentary Journalism, students create films with journalism’s strong tradition of accuracy and fact-finding.

The school has 25 study away programs in 18 countries – where students earn credit and gain work experience. The school maintains year-round offices in Barcelona, Brussels, New York and Washington, D.C. and provides strategic communication programs in Hong Kong, Prague and Tokyo.

Graduates are assured of a well-rounded liberal arts education, plus a balance of theory and hands-on courses. Employers routinely report Missouri School of Journalism students are ready for the workforce, from day one.

The school has maintained continuous accreditation from the Accrediting Council on Education in Journalism and Mass Communication since the accrediting process began in 1949, with the most recent re-accreditation in 2017.

Undergraduate
• Admissions (p. 711)
• Special Programs (p. 713)
• Advising (p. 711)
• Senior Assessment Program (p. 712)
• Opportunities for Graduate Study on MU Campus (p. 712)

Admissions
First-time college students admitted to the University of Missouri are eligible to pursue a Bachelor of Journalism degree.

As a worldwide leader in journalism and strategic communication, the Missouri School of Journalism directly admits students who have met high academic standards in their high schools or based on their aptitude as evidenced by their performance on standardized college admission tests (ACT or SAT). The School also welcomes students as pre-journalism majors who will demonstrate through college coursework their readiness for the School’s rigorous academic program.

Admission to the Major
Both directly admitted and pre-journalism students take prerequisite courses designed to acquaint them with career options in the field while building a foundation in core skills.

Following the successful completion of select prerequisite courses and achievement of a minimum GPA of 3.0, both directly admitted and pre-journalism students transition into the major. Students continue in the major coursework as long as they continue to meet academic standards.

Advising
Students are expected to seek the advice of an academic advisor in the selection of courses and semester planning. Students are encouraged to seek advice from the faculty and career services for career counseling and specific journalism and strategic communication-related issues.

The university provides degree audits for students to track the completion of degree requirements. Students are responsible for enrolling in an appropriate schedule of courses each semester; however, students are highly encouraged to consult with their advisor when necessary. The responsibility for meeting admission and graduation requirements rests with the student.

Dual-Degrees
To receive two bachelor’s degrees, a student must complete a minimum of 132 credits and complete all of the specific requirements for both degrees. Normally, a minimum of one additional semester is required for both degrees. Each candidate for a dual degree is assigned an advisor in the School of Journalism and in the additional academic unit.
Ethics of Journalism

The School of Journalism is committed to the highest standards of academic and professional ethics and expects its students to adhere to those standards. Students should be familiar with the Code of Ethics of the Society of Professional Journalists and adhere to its restrictions. Students are expected to observe strict honesty in academic programs and as representatives of school-related media. Should any student be guilty of plagiarism, falsification, misrepresentation or other forms of dishonesty in any assigned work, that student may be subject to a failing grade from the instructor and such disciplinary action as may be necessary under university regulations.

Independent Study

Mizzou Online offers a variety of online courses that can be taken self-paced. Many of the courses can be used to satisfy degree requirements. Students may enroll themselves for as many as 4 credit hours per semester of online self-paced courses. Enrolling in more than 4 credit hours per semester requires approval from an academic advisor.

Students can also work under the supervision from journalism faculty to provide special opportunities to work outside of the classroom to receive journalism course credit.

International Students

In addition to meeting the standards for admission to the university, international students must meet the following English-language proficiency standards:

- **Pre-Journalism:** Minimum Test of English as a Foreign Language (TOEFL) paper-based score of 550 or minimum TOEFL electronic score of 80 or International English Language Testing System (IELTS) band score of 6.5 with minimum section scores of 6.
- **Direct Admission:** Minimum Test of English as a Foreign Language (TOEFL) paper-based score of 600 or TOEFL electronic score of 100 or International English Language Testing System (IELTS) band score of 7 with minimum section scores of 6.

Opportunities for Graduate Study on MU Campus

The accelerated bachelor/master degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The program allows students to apply and begin their master’s program during the senior year of the undergraduate program. Students in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism.

At the present time, areas include broadcast management, computer-assisted reporting, convergence, magazine editing, magazine writing, photojournalism, public affairs reporting, publication design, reviewing and reporting on arts and entertainment, strategic communication, and visual editing.

Senior Assessment Program

In compliance with the standards set forth by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC) and guidelines established by the University of Missouri, the Missouri School of Journalism regularly conducts an assessment of student learning.

The school uses both direct and indirect measures to provide faculty and administrators with information to improve student learning. A key component of student assessment is feedback from external reviewers who have substantial experience in the areas being evaluated. The professionals conduct one-on-one interviews with students, critique portfolios and evaluate other relevant evidence of student learning and preparation for their chosen fields. The school also routinely solicits feedback from visiting alumni and industry professionals. The assessment information is regularly used to guide curriculum decisions and inform teaching and learning practices. The school has provided continuous assessment of graduating students since 1994.

Learning Outcomes:

The School strongly adheres to the learning competencies and values defined by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC) which states that irrespective of a student’s particular specialization all graduates should be able to:

- understand and apply the principles and laws of freedom of speech and press for the country in which the institution that invites ACEJMC is located, as well as receive instruction in and understand the range of systems of freedom of expression around the world, including the right to dissent, to monitor and criticize power, and to assemble and petition for redress of grievances;
- demonstrate an understanding of the history and role of professionals and institutions in shaping communications;
- demonstrate an understanding of gender, race ethnicity, sexual orientation and, as appropriate, other forms of diversity in domestic society in relation to mass communications;
- demonstrate an understanding of the diversity of peoples and cultures and of the significance and impact of mass communications in a global society;
- understand concepts and apply theories in the use and presentation of images and information;
- demonstrate an understanding of professional ethical principles and work ethically in pursuit of truth, accuracy, fairness, and diversity;
- think critically, creatively and independently;
- conduct research and evaluate information by methods appropriate to the communications professions in which they work;
- write correctly and clearly in forms and styles appropriate for the communications professions, audiences, and purposes they serve;
- critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style, and grammatical correctness;
- apply basic numerical and statistical concepts;
- apply current tools and technologies appropriate for the communications professions in which they work, and to understand the digital world.

Standards for Academic Performance

Academic Actions

The School of Journalism is a challenging and rigorous environment in which students are expected to maintain high standards of academic achievement. The faculty expects each student to maintain a minimum GPA of 3.0 to be considered in good standing.
Probation and dismissal are the two potential academic actions for students who are not meeting the standards for academic performance.

**Probation**
Probation indicates a student is struggling to meet academic expectations.

Students placed on probation are required to meet with their advisor frequently during the subsequent semester. During these meetings, students will be assessed to determine which types of intervention are needed to return to good academic standing.

Removal from probation occurs when the student meets satisfactory academic standards.

**Ineligible**
Students who are ineligible are having significant challenges in meeting academic expectations. Students are encouraged to seek admission to another academic college at the University at Missouri to regain eligibility for course enrollment.

Students can appeal to return to the School of Journalism when the student meets satisfactory academic standards.

**Categories**
Each category ensures students are making progress toward achieving a 3.0 GPA. The standards for academic performance are applied based on the following two categories:

**First Semester Freshmen and Transfer Students**

- **Probation:** GPA is between 0.50 – 2.50
  First-semester freshman and transfer journalism students are placed on probation when their first semester GPA is between 0.50 and 2.50. They are removed from probation when the student meets satisfactory academic standards.

- **Ineligible:** GPA is below 0.50
  First-semester freshman and transfer journalism students become ineligible to enroll for a minimum of one semester when their first semester GPA is below 0.50.

**Students Who Have Completed One Semester at MU**
The credit hour classifications include University of Missouri courses, transfer courses, advanced placement credit, and other credits by examination. While the credit hours from all of these sources are included in the following categories, only the grades in courses completed in the University of Missouri system will be computed for GPA purposes.

Students who have completed one semester at MU who do not meet the following standards will be ineligible to enroll in the School of Journalism and will not be permitted to re-enroll for a minimum of one semester:

- **0-29 credit hours**
  Students must maintain a minimum cumulative MU GPA of 2.5.

- **30-59 credit hours**
  Students must maintain a minimum cumulative MU GPA of 2.75.

- **60 or more credit hours**

**Readmission**
A student who has been dismissed and declared ineligible to enroll may be readmitted only on the approval of the dean of the school or college in which the student desires to enroll. As a condition of readmission, the dean may set forth stipulations with regard to minimum standards of academic work that must be maintained by the student. If the student, after readmission, again becomes ineligible to re-enroll, their ineligibility normally is considered permanent.

**Minimum Grade in Journalism Courses**
Students must maintain a minimum cumulative MU GPA of 3.0. Students must maintain a minimum cumulative MU GPA of 3.0. The standards for academic performance are applied based on the following two categories, only the grades in courses completed in the University of Missouri system will be computed for GPA purposes.

- **0-29 credit hours**
  Students must repeat any required journalism course in which they do not earn a grade of C- or higher. A student who fails to achieve a C- or better during the second attempt will be dismissed from the School of Journalism for lack of acceptable progress.

Students may be readmitted only with the consent of the faculty chair of the student’s major area and the associate dean for undergraduate studies. Before recommending approval for the student to re-enroll, the faculty chair will consult with the instructor or instructors of record in the required course to determine the likelihood of that student passing the course on the third attempt. The faculty chair will make a recommendation to the associate dean, who shall make the final decision to readmit or deny admission to the School of Journalism.

**Excessive Incomplete Grades**
A student may be placed on probation or dismissed for excessive incompletes at the discretion of the associate dean for undergraduate studies. In such cases, the associate dean shall set a time limit for successful completion of all the courses in which the student has an incomplete. The time limit will not exceed one calendar year from the scheduled completion of the course and may be of shorter duration. The associate dean also may place limitations on the number of additional credits hours in which the student may enroll until the incomplete grades are resolved. If the student fails to finish the required courses within the time limit set by the associate dean, the student is subject to dismissal.

**Transfer Credit**
The Office of Undergraduate Admissions, 230 Jesse Hall, determines transfer equivalencies for the University, including the School of Journalism. Transfer students from other accredited schools and colleges in Missouri should check the MU website to see how coursework will transfer to MU or contact the Office of Admissions. Students can also contact the Journalism Student Services office to see how these courses could apply toward the degree. The School of Journalism can accept courses from other accredited journalism programs or from Missouri colleges with which the School of Journalism has working agreements.

Current MU journalism students may not transfer journalism major courses from other institutions.

**Walter Williams Scholars Program**
The School of Journalism attracts some of the best students at MU. The School encourages high-achieving students to enroll in the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible. Such courses are taught by some of MU’s best professors. The School recognizes incoming high-ability students with a special designation and the following benefits:
Those students who have first been admitted to the Honors College may be invited by the School of Journalism to receive additional benefits through the Walter Williams Scholars program. The program is designed for the top tier of an already exceptional group.

**Qualifications:** To be invited into the exclusive circle of top Walter Williams Scholars, incoming freshmen must first apply and be accepted to the MU Honors College (https://honors.missouri.edu/).

Additionally, applicants must:

- Earn an ACT composite score of 33 or a combined SAT score of 1450 and
- Rank in the top 20 percent of the high school class (if the school ranks) or have a weighted Core GPA of 3.5 or higher.

**Admission is by invitation only.**

**Benefits:**

- Additional renewable scholarship funds directly from the School of Journalism.
- Placement in a special Freshman Interest Group, space permitting.
- Assigned individual faculty mentors.
- A $1,000 scholarship that can be used for School of Journalism global programs (http://www.mujournalismabroad.com/), including our New York or Washington programs. The scholarship can be used at any time before graduation.
- Automatic admission to the one-year BJ/MA program at the School of Journalism, which allows students to complete their graduate degrees in one year rather than two. Admission is contingent upon the following criteria:
  - Maintenance of a 3.25 GPA in your journalism coursework and for your cumulative average, throughout your undergraduate career;
  - Submission of a complete MA application, including payment of the application fee, and with two (out of three) of your letters of recommendation from journalism faculty. You do not need to take the GRE.

To make the most of the program, the School encourages high-ability students to apply to the MU Honors College (http://honors.missouri.edu) and take honors courses whenever possible.

**Graduate**

**About Our Graduate Programs**

The University of Missouri's School of Journalism is the recognized leader for graduate study in journalism and strategic communication, having awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively.

The Missouri Method is the time-honored process of journalism and strategic communication education: Graduate students gain valuable research-based, managerial experience while honing tactical skills. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate four major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate. Our strategic communication students design media campaigns for local and national clients. Examples: Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko's, Eastman Kodak and many other leading international brands. Graduate studies in CAFNR are taking an innovative, high-tech approach to traditional agriculture, food and natural resources. Our students are highly engaged with expert faculty mentors who are impacting the future with findings on health breakthroughs, sustainable agriculture techniques and food safety. Prospective students are able to choose from a range of academic programs consistently recognized for excellence.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. In most cases, the entire application process may be completed online. Find admission and application details by selecting the degree program of interest in the left navigation column.

We operate educational programs in Washington, D.C., New York, and Brussels where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

Our 80+ faculty members have earned impressive credentials from years of working in journalism and strategic communication. School resources include an extensive journalism library and Freedom of Information Center, Center for Advanced Social Research, and the Stephenson Research Center, named for the late William Stephenson, known globally as the inventor of Q-methodology.

**Journalism**

The world's first School of Journalism was established in 1908 at the University of Missouri to strengthen the effectiveness of public communication in a democratic society. The school's first dean, Walter Williams (who went on to become president of the University in 1930) wrote the Journalist's Creed, which stresses the profession's rights and responsibilities as a public trust.

The faculty is committed to educating students in the responsibilities and skills of the professional journalist. It also has a broader commitment to advance the profession of journalism through scholarly research, analysis and criticism and through special programs to serve practitioners. The school also prepares students for careers in corporate communication through its strategic communication emphasis area. Students in that area typically pursue careers in advertising or public relations or in strategic communication.

The Missouri Method assures a journalism student will graduate with a broad, liberal education essential for a journalist whose work may span many segments of today's complex society. In addition to a liberal arts education, students complete practical laboratory work in a variety of settings, including a public radio station, a commercial daily newspaper and a network-affiliated television station. The school offers the Bachelor of Journalism, Master of Arts and Doctor of Philosophy degrees, along with cooperative programs with other divisions in the University. It was the first school in the world to offer all three of those degrees.

The Accrediting Council on Education in Journalism and Mass Communication has accredited the undergraduate program and a professional master's degree.

**Administration**

David D. Kurpius, Dean
Earnest Perry, Associate Dean for Graduate Studies
Lynda Kraxberger, Associate Dean for Undergraduate Studies and Administration
Undergraduate Programs

Undergraduate students in the School of Journalism pursue their degree in Journalism or with an emphasis in Strategic Communication as approved by the University Board of Curators and the Missouri Coordinating Board of Higher Education.

A minor in Journalism is also offered.

Global and Domestic Programs

The School of Journalism offers exchange, internship, and a variety of short-term programs in the United States and abroad. Students interested in these programs should consult with an advisor in the Journalism Global Programs Office.

Degree with Honors Requirements

Graduation with Latin honors is based on the grade point average from all UM-system courses. Cum laude requires 3.5, magna cum laude 3.7, and summa cum laude 3.9. The School computes the grades to three decimal points and does not round up. Students are reviewed for honors prior to the graduation ceremony and after the semester concludes.

Kappa Tau Alpha is a journalism honorary society that accepts the top 10 percent of each graduating class. Qualifying students are sent a letter with details about the society and are recognized at the journalism graduation ceremony.

Graduate

- MA in Journalism (p. 720)
  - with emphasis in Health Communication (p. 721)
  - with emphasis in Interactive Media (p. 722)
  - with emphasis in Media Management (p. 723)
  - with emphasis in Strategic Communication (p. 723)
- PhD in Journalism (p. 724)

About Journalism's Graduate Degree Programs

The Missouri School of Journalism awarded the first master's and doctoral degrees in journalism in 1921 and 1934, respectively. The master's and doctoral programs at the School enjoy superb reputations, both among scholars and among practitioners in news, advertising, public relations and strategic communication.

Master's Programs

For the master's program, Missouri Journalism offers a complete set of real-media experiences. We operate the only network affiliate (NBC) television station in the country used to train journalism students. We publish a community daily newspaper (not a campus paper), and we operate several major web sites, a local magazine and an international magazine. Students also may train at our campus-based NPR affiliate.

Our strategic communication students design media campaigns for local and national clients through our two student-run advertising agencies, MOJO Ad and Adzou. Our students have created advertising and public relations campaigns for Nokia, Apple, Dr Pepper, Anheuser-Busch, Duncan Hines, DuPont, Dow Chemical, Kinko’s, Eastman Kodak and many other leading international brands.

We operate educational programs in Washington, D.C., New York, Brussels and Barcelona where many of our students carry out their capstone projects or do research. We also partner with educational programs around the world.

The MA is offered in an on-campus program and an online program.
On-Campus Master's Program: https://journalism.missouri.edu/degrees-programs/graduate-degrees/masters/
On-Campus Master's Program: https://journalism.missouri.edu/degrees-programs/graduate-degrees/online-masters/

On-Campus Options - MA in Journalism
Students who wish to pursue a traditional on-campus experience, should refer to the MA in Journalism page (https://journalism.missouri.edu/degrees-programs/graduate-degrees/masters/). Students choose from more than 20 program models, and complete a thesis or professional project. An accelerated BJ to MA program is available, as well as a joint Journalism and Law program, and a dual degree option with the Masters of Public Health.

Online Options - MA in Journalism with emphasis
Professional journalists or others who cannot travel to mid-Missouri to attend the on-campus program might consider doing their program in an online format, available to applicants who have a minimum of three years professional journalism-related experience. Students in the online program are required to make two short visits, two to three days each, to campus during their program. Learn more about our online master’s programs here https://journalism.missouri.edu/degrees-programs/graduate-degrees/online-masters/.

The online option is offered in four emphasis areas: Health Communication, Interactive Media, Media Management, and Strategic Communication.

Graduate Minor in Law and Conflict Resolution
This program is for journalism doctoral students who are interested in teaching and researching in journalism, law and conflict resolution in a school of journalism or communication department. For details, refer to the Graduate Minor in Law and Conflict Resolution (p. 725).

Facilities and Resources
A variety of special facilities and resources are available to help students meet their educational objectives. These include the Columbia Missourian, a general circulation daily newspaper with full-leased wires of The Associated Press and The New York Times Service; KOMU-TV, an NBC affiliate; KBIA-FM, a National Public Radio station; MOJO Ad and Adzou advertising agencies; and Vox magazine, a weekly city magazine. All provide students the opportunity for hands-on learning under faculty supervision and to conduct applied research.

The Journalism Library subscribes to more than 125 newspapers and magazines worldwide and catalogs more than 40,000 volumes. Many more resources are available in electronic format.

The State Historical Society of Missouri, located on-campus, has an extensive collection of state newspapers dating from 1808.

The Freedom of Information Center maintains a day-to-day study of the actions by government, media and society affecting the movement of information.

The national headquarters of Investigative Reporters and Editors and the National Institute for Computer Assisted Reporting provide educational services to reporters, editors and others interested in investigative journalism.

The Association of Health Care Journalists is headquartered at Missouri and is dedicated to advancing public understanding of health care issues. Its mission is to improve the quality, accuracy and visibility of health care reporting, writing and editing.

The Center on Religion & the Professions works to improve religious literacy among professionals, to help them serve a diverse public. As America grows more religiously diverse, professionals need to better understand the religious traditions and beliefs of the public they serve. CORP’s interdisciplinary, practical and applied work centers on that mission. Founded in 2003 with a grant from The Pew Charitable Trusts, the Center is one of Pew’s 10 Centers of Excellence. CORP is affiliated with Religion Newswriters Association.

The American Society of News Editors focuses on leadership development and journalism-related issues. Founded in 1922 as a nonprofit professional organization, ASNE promotes fair, principled journalism, defends and protects First Amendment rights, and fights for freedom of information and open government.

Founded in 2003 with a generous gift from the Donald W. Reynolds Foundation, the Reynolds Journalism Institute is committed to developing and testing new ways to improve journalism through new technology and improved processes.

Special Events
Each year the school sponsors the Missouri Honor Medal Award program, which brings contemporary leaders in mass communications to the campus. The school also directs a number of professional development and awards programs, including the international competition for the best Pictures of the Year.

Honor Society
Kappa Tau Alpha, national honor society for scholarship in journalism, founded at the university in 1910, has its headquarters in the school.

Funding
An array of competitively awarded fellowships, assistantships, scholarships and other financial aid opportunities are available.

BJ in Journalism

Degree Program Description
Journalism is the study and practice of analyzing, gathering, creating and presenting news and information through different media.

The curriculum includes focused study and hands-on experience within the career paths of broadcasting, cross-platform editing and producing, photojournalism and documentary journalism, reporting and writing, and social and audience strategy.

Students customize their degree through elective courses that allow them to gain depth and breadth in a wide array of subject areas and specializations.

Upon graduation, students pursue careers in a wide range of journalism and communication professions including: account management, art direction, audience engagement, audience development, audience research, business journalism, data analysis and visualization, digital content editing, digital strategy, documentary editing and producing, international journalism, investigative reporting, media planning, media production, magazine editing, mobile production, multimedia editing,
news editing, photo editing, photography, podcasting, public relations, project management, product management, science communication, SEO strategy, social media producing, sports reporting, sports and entertainment promotion, strategic communication, television news reporting or production, television sports reporting or production, radio reporting and production, videography, website editing and writing.

**Major Program Requirements**

The Bachelor of Journalism degree requires 120 credits. The faculty expects each student to maintain a minimum GPA of 3.0 to be considered in good standing.

To obtain the Bachelor of Journalism degree, a student must complete the following:

- University Graduation Requirements (p. 35)
- University General Education (p. 36)
- **Major Core**: 24 credit hours
- **Major Career Path**: 6 credit hours
- **Major Capstone**: 3 credit hours
- **Major Specialty Areas**: 15 credit hours
- **Non-Journalism Electives**: 28 credit hours

| JOURN 4180 Newsroom Content Creation | 3 |

**Career Path (minimum of two courses from one area required)** 6

- Broadcast
- Cross-Platform Editing and Producing
- Photojournalism and Documentary
- Reporting and Writing
- Social and Audience Strategy

**Specialty Areas (may choose from several)** 15

**Capstone** 3

**Non-Journalism Electives from the areas below:** 28

(Must be numbered 2000 or above)

**Area 1** 3

Students choose from one of these areas: Animal Science, Anthropology, Astronomy, Atmospheric Science, Biochemistry, Biology, Chemistry, Computer Science, Environmental Science, Food Science, Geology, Mathematics, Physics, Plant Science, Psychology, Rural Sociology, Sociology or Statistics.

Honor's College students can also choose from: GN_HON 2243H, GN_HON 2310H, GN_HON 2430H, GN_HON 2244H, GN_HON 2450H, GN_HON 2461H, GN_HON 2462H, GN_HON 3210H, GN_HON 3241H, GN_HON 3242H, GN_HON 3450H.

**Area 2** 6

Students choose from the following areas: Agribusiness Management, Black Studies, Economics, Geography, History, Peace Studies, Political Science, and Women's and Gender Studies.

Honor's College students can also choose from: GN_HON 2230H, GN_HON 2245H, GN_HON 2246H, GN_HON 3230H.

**Area 3** 6

Honor's College students can also choose from: GN_HON 2015H, GN_HON 2111H, GN_HON 2121H, GN_HON 2113H, GN_HON 2114H, GN_HON 2120H, GN_HON 3112H, GN_HON 3113H, GN_HON 3120H

**Area 4** 13

- Any non-journalism course**
- *Students can earn credit in courses from additional Career Paths. These additional credits will apply to the fifteen credit hours in the Specialty Area requirements.*
- **Some courses are prohibited in the Bachelor of Journalism. Students should consult with their academic advisor for questions regarding courses in these areas.

**General Electives**

Electives may be necessary to complete a minimum of 72 credits of non-journalism classes and 120 total credits. Any course acceptable to the School of Journalism is allowed.
Semester Plan

The following four-year plan is a sample. A student’s path to graduation may vary based on a host of factors. Working with an academic advisor is necessary to determine the best plan for each student.

BJ in Journalism with Emphasis in Strategic Communication

Degree Program Description

Students will develop a solid foundation in the liberal arts and sciences while achieving competency in journalism.

Journalism is the study and practice of analyzing, gathering, creating and presenting news and information through different media.

Within this degree program, students choose an emphasis in Strategic Communication. Strategic Communication is the study of principles and practices of all communication designed to create a desired response from a given audience. The curriculum includes focused study and hands-on experience within a variety of subject areas and specializations. Upon graduation, students pursue careers in a wide range of strategic communication and public relations professions including: account management, advertising management art direction, audience research, copywriting, digital strategy, marketing, media planning, public relations, strategic communication research and sports and entertainment promotion, social media management, and sports information.

Major Program Requirements

The Bachelor of Journalism degree requires 120 credits. The faculty expects each student to maintain a minimum GPA of 3.0 to be considered in good standing.

To obtain the Bachelor of Journalism degree, a student must complete the following:

- University Graduation Requirements (p. 35)
- University General Education (p. 36)
- Major Core: 24 credit hours
- Major Career Path: 6 credit hours
- Capstone: 3 credit hours
- Major Specialty Areas: 15 credit hours
- Non-Journalism Electives: 28 credit hours

Total Credits: 120

Minor in Journalism

Requirements

The Journalism minor consists of 15 credit hours of journalism coursework. It is intended for students from other MU academic divisions who wish to broaden their understanding of the news media’s role in society.

Courses

Students are required to take either JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society or JOURN 1100 Principles of Journalism in Democracy.

Students who decide to pursue the minor after completing JOURN 1100 Principles of Journalism in Democracy are ineligible to take JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society.
Admissions

All students are required to apply for the Journalism minor. To apply for a minor in Journalism, students must have completed 60 credit hours with a minimum UM system cumulative GPA of 3.0. An application form is available from the Minor Coordinator in the Journalism Student Services Office, 76 Gannett Hall.

Students pursuing a Journalism major are ineligible for the Journalism minor program.

Transfer students may use up to three credit hours of approved Journalism transfer credit toward a Journalism minor.

Registration

Students are permitted to self-enroll in JOURN 1000 The News Media: Journalism and Advertising in a Democratic Society. Other courses are offered on a space-available basis and after the early registration period has ended. Students are required to submit a course preference list to the Journalism Minor Coordinator. If space is available, a permission number to enroll will be provided.

Academic Status

Students are subject to probationary or suspension status as determined by the student’s major division. Students must earn a minimum grade of C- in Journalism courses. Journalism courses may be repeated one time. Upon repeating a course, if a student fails to earn a C- or better, the student is no longer eligible for the Journalism Minor.

Pre-Journalism or Undeclared Journalism students who complete lower-level journalism courses with a C- or better and then decide to minor in Journalism must maintain a minimum cumulative GPA of 3.0 to be eligible to take additional Journalism courses.

The journalism minor is awarded after the student completes 15 journalism credits.

Fees

School of Journalism course fees are applied to all Journalism courses.

Advising

Journalism minors are not assigned a faculty advisor or academic advisor within the School of Journalism. Academic advising occurs in the division of each student’s major. Students pursuing a Journalism minor are encouraged to consult with either the designated Minor Coordinator or with School of Journalism faculty on course-specific matters.

MA in Journalism

The program leading to the MA degree is designed to accommodate several objectives, including: comprehensive professional preparation for careers in the news media, mass communications and strategic communication; expansion of previous professional preparation and experience (e.g., newspaper editing) into a new area (e.g., broadcasting reporting); comprehensive academic preparation for careers in journalism and strategic communication teaching and research; and combinations of the three.

Program Models

Students choose from more than 20 program models, covering the full range of skills and media of journalism and strategic communication. Because the faculty periodically update these models, students should visit the school’s Web site for the latest details. In addition to the course work in any model, students complete either a thesis or a professional project. Students who make progress on the degree requirements and maintain at least a B average each semester are considered to be in good standing.

Degree Requirements

Students are required to complete a minimum of 37 hours, unless in the Accelerated BJ-MA program (see below for additional information) where it is required to complete a minimum of 30 credit hours. For all students, at least half of the credit hours must be at the 8000-level. Specific course requirements vary depending on the model selected.

Electives 18

Total Credits 37

Length of Study

The degree must be earned within eight years of beginning the program.

Professional Project or Thesis

Students must enroll in either the Project Seminar or the Thesis Seminar in the semester prior to embarking on their professional project or thesis. These seminar courses guide students in developing proposals for their professional project or thesis. After proposal approval, students enroll in JOURN 8190, Area Problem (for projects) or JOURN 8090, Research (for thesis). Students earn nine credit hours for either the professional project or thesis research.

Students in any model may choose to complete the professional project or thesis off campus. The school operates programs in Washington D.C., New York City, Brussels, and Barcelona which is supervised by a full-time faculty member. In the Missouri state capital the school has a program focusing on public affairs reporting in any medium. Other off-campus opportunities can be arranged.

Additional Program Options

Accelerated Bachelor to Master Program

The accelerated bachelor to master’s degree program was designed for students in the Missouri School of Journalism to attain a graduate education. The new program will allow students to apply and begin their master’s program in the senior year of undergraduate program. Students
in the program complete requirements as outlined for the Bachelor of Journalism degree and then spend one more year (approximately 12 months) to earn a master’s degree. The program requires students to carry 9-12 credits each semester. Course work in the program builds on the undergraduate program and enhances student’s skills and understanding of the chosen area of journalism. At the present time, areas include strategic communication, newspaper design, broadcast management, computer-assisted reporting and magazine areas such as magazine writing and magazine design.

Joint Journalism and Law Programs
The School of Journalism and the School of Law have created a joint program (https://journalism.missouri.edu/degrees-programs/graduate-degrees/masters/journalism-law-programs/) that provides an opportunity to earn a MA in Journalism and a JD in Law. Students in the joint program complete one of the journalism models and the course requirements for the law degree with a block of courses that are used for both degrees.

Dual-degree option with Masters of Public Health
The School of Journalism and the program in Public Health have created a dual-degree option (p. 631) that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

Admission Criteria
On-Campus program deadlines:
Fall deadline: January 1
Spring deadline: September 1

</tbody>
</table>

- Minimum GPA: 3.0 in last 60 hours
- Accelerated Minimum GPA: 3.5 in last 45 hours

Note: Deadlines are adhered to strictly, and no applicant is considered for admission until all required information is received.

Required Application Materials
To the Graduate School
All required Graduate School documents

To the Journalism Master's Program:
Please upload the following application materials into the online Graduate School application in Slate:

• 3 essays as specified on Departmental application website
• Résumé
• Unofficial transcripts from all undergraduate institutions attended
• 3 letters of recommendation (use the online Graduate School application system)

Please submit official GRE scores to the School of Journalism using the GRE Department Code: 4503 and Institution Code: 6875.

Admission Contact Information
Journalism Graduate Studies
179 Gannett Hall
Columbia, MO 65211
573-882-4852
Email: jourgraduatestudies@missouri.edu

Financial Aid from the Program
Limited fellowships, assistantships, scholarships and other financial aid opportunities are available. All applicants for admission are considered for any available funding. No separate application form is needed. Check the program Web site or ask the program contact for details.

MA in Journalism with Emphasis in Health Communication

Degree Requirements
The Health Communication emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements
The program core is completed by all students:

| JOURN 8000 | Mass Media Seminar | 3 |
| JOURN 8006 | Quantitative Research Methods in Journalism | 3 |
**Qualitative Research Methods in Journalism**

**Proseminar in Communications (Section 4)**

**Proseminar in Communications (Section 5)**

**Media Ethics**

### Emphasis Area Electives

Students may select 15-17 hours of the following courses:

- **Communications Law**
- **Public Relations**
- **Strategic Communication Practicum**
- **Principles and Tools in Strategic Communication Planning**
- **Health News and Promotion**
- **Theory of Mass Communication**
- **Communication in Media Organizations**

### Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 MA Thesis Seminar, or JOURN 8098 MA Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degerecatory/journalism/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

### MA in Journalism with Emphasis in Interactive Media

### Degree Requirements

The Interactive Media emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be course from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student's advisor, subject to approval of the associated dean for graduate studies.

### Core Requirements

The program core is completed by all students:

- JOURN 8000 Mass Media Seminar
- JOURN 8006 Quantitative Research Methods in Journalism
- JOURN 8070 Proseminar in Communications (Section 4)
- JOURN 8070 Proseminar in Communications (Section 5)
- JOURN 8080 Media Ethics

### Emphasis Area Requirements

Students may select 15-18 hours of the following courses:

- JOURN 8050 Using Infographics
- JOURN 8075 Public Relations
- JOURN 8076 Digital Strategy I
- JOURN 8077 Visual Communications
- JOURN 8078 Engaged Journalism
- JOURN 8079 Changing Media Business Models
- JOURN 8080 Seminar on Topics in Journalism (Theoretical Foundations/Interactive Media)
- JOURN 8085 Theory of Mass Communication
- JOURN 8086 Communication in Media Organizations

### Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degerecatory/journalism/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.
to which you’ve applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Media Management

Degree Requirements

The Media Management emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000 Mass Media Seminar 3
JOURN 8006 Quantitative Research Methods in Journalism 3
or JOURN 8008 Qualitative Research Methods in Journalism
JOURN 8070 Proseminar in Communications (Section 4) 2
JOURN 8070 Proseminar in Communications (Section 5) 1
JOURN 8080 Media Ethics 3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7000 Communications Law 3
JOURN 7436 Investigative Reporting 3
JOURN 7700 Engaged Journalism 1.5
JOURN 7736 Changing Media Business Models 3
JOURN 7978 Media Management and Leadership 3
JOURN 8044 Strategic Conflict Management 3
JOURN 8056 Theory of Mass Communication 3
JOURN 8058 Communication in Media Organizations 3

Capstone Thesis/Project

JOURN 8100/8090 MA Thesis Seminar 1-10
JOURN 8098/8190 MA Project Seminar and Area Problem in Journalism

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradstudies.missouri.edu/degreecategory/journalism/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MA in Journalism with Emphasis in Strategic Communication

Degree Requirements

The Strategic Communication emphasis area is only available in the online MA program. This area, which includes a minimum of 37 credits to graduate, includes both required and elective courses. The electives may be courses from within the same area, from another area or transferred graduate hours from another accredited institution. For students with special needs, an individualized curriculum may be designed with the student’s advisor, subject to approval of the associate dean for graduate studies.

Core Requirements

The program core is completed by all students:

JOURN 8000 Mass Media Seminar 3
JOURN 8006 Quantitative Research Methods in Journalism 3
or JOURN 8008 Qualitative Research Methods in Journalism
JOURN 8070 Proseminar in Communications (Section 4) 2
JOURN 8070 Proseminar in Communications (Section 5) 1
JOURN 8080 Media Ethics 3

Emphasis Area Electives

Students may select 15-17 hours of the following courses:

JOURN 7256 Public Relations 3
JOURN 7262 Digital Strategy I 3
JOURN 7736 Changing Media Business Models 3
JOURN 8020 Principles and Tools in Strategic Communication Planning 3
JOURN 8044 Strategic Conflict Management 3
JOURN 8056 Theory of Mass Communication 3
JOURN 8058 Communication in Media Organizations 3

Capstone Thesis/Project

JOURN 8100/8090 MA Thesis Seminar 2-10
JOURN 8098/8190 MA Project Seminar and Area Problem in Journalism

Thesis/Non-thesis Requirements

Students may choose from two options: thesis or professional project. The thesis is an independent research study and is appropriate for students who may intend to pursue a doctorate. The professional project
is appropriate for students who wish to work as professionals in the journalism industry.

To prepare for the capstone semester students will enroll in either JOURN 8100 Thesis Seminar, or JOURN 8098 Project Seminar, in the semester prior to their capstone. During the seminar students will form their faculty committee and develop and gain approval for their thesis or project proposal. Successful completion of the seminar is one of the prerequisites to beginning the capstone semester.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MA in Journalism program (https://gradschool.missouri.edu/program/ma-journalism) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

PhD in Journalism

About the Doctorate

The objective of the doctoral program is to develop an ability to conduct independent and advanced scholarly research and to integrate this skill with a depth of scholarship in journalism and mass communication. Although it is primarily a research degree, the PhD is designed to facilitate a variety of academic aims. Students must expand their intellectual horizons, gain a theoretical framework for examining and understanding communication and refine their own communication competencies.

Degree Requirements

Doctoral study in journalism and mass communication is an interdisciplinary enterprise. The doctoral program is designed by the student in collaboration with the advisor and doctoral committee. Course selections are based on the intellectual requirements of the dissertation and the teaching areas the student wishes to pursue. No courses that focus primarily on professional skills may be counted toward the doctoral program, whether taken at the master’s or the doctoral level. Courses from journalism should compose no more than two-thirds of the total credit.

Students must develop two research tools, pass qualifying and comprehensive examinations, submit and defend a dissertation, and satisfactorily meet all other requirements of the Graduate School. Doctoral Theory and Research I (JOURN 9000), and Professional Development (JOURN 9087) are required of all PhD students.

Qualifying Examination

Students are admitted to the PhD program in journalism when they have passed Doctoral Research Portfolio (qualifying examination), which must be taken the semester in which the student completes 18 hours. Graduate School regulations about comprehensive examinations, dissertations, plans of study, residency and other matters are specified in the Degree Requirements section of the catalog.

Research Method Requirements

Students are expected to take a minimum of four research methods courses during the course of their doctoral coursework. These courses include three research methods courses from within journalism with at least one being an advanced research methods course. Students are also required to take at least one research methods course from a department other than journalism. At the discretion of the student’s doctoral committee and the associate dean for graduate studies, students may substitute a course from outside the institution if it is deemed equivalent to a required research methods course offered within the school of journalism.

Teaching

Doctoral students who plan to teach will participate in a teaching program. Each student’s teaching skills will be evaluated in the first year of study, at which point planning for the student’s future teaching opportunities begins. Most students will serve as teaching assistants in such classes as JOURN 1100 or JOURN 2100 during their third semester in the program.

In the student’s fourth semester, he/she may have an additional teaching experience, either as a teaching assistant, co-instructor or instructor of record in a course. Depending on the student’s ability and desire, students might teach a course independently during later semesters.

Doctoral Admission Criteria

Fall deadline: January 15

- Minimum Academic IELTS scores:
  - Listening
  - Reading
  - Writing
  - Speaking: 25
  - Overall: 7.0

- Minimum TOEFL scores:
  - Internet-based test (IBT)
  - Paper-based test (PBT)
  - Speaking: 25
  - Listening: 600

- Typical successful applicant GRE scores:
  - When did you take the GRE? Verbal + Quantitative
    - Prior to August 1, 2011: 1100
    - On or After August 1, 2011: V: 156+; Q: 146+
  - Minimum GPA: 3.0, undergraduate, 3.5, graduate

Applicants should have demonstrated interest, education or professional experience in journalism, advertising, public relations, mass communication or a related field. A degree (bachelor’s or master’s) in one of those fields or two years of full-time professional media experience is preferred. All required information must be received before the admission review can begin. Applicants may be required to participate in an interview with the doctoral faculty as part of the review process. Students who did not write a thesis in their master’s program may be required to complete a project to demonstrate their ability to do independent research.
Deadlines for application are January 15 for fall entry. Deadlines are firm, and no applicant is considered for admission until all required information is received.

**Required Application Materials**

Upload the following application materials into the Graduate School's online application system:

- All required Graduate School documents
- Statement of Doctoral Objectives
- Résumé
- An abstract of your master’s thesis (or thesis proposal, if your thesis is not yet complete)
- Unofficial transcripts
- 3 letters of recommendation (use the online Graduate School application system)

**Admission Contact Information**

Journalism Graduate Studies
179 Gannett Hall
Columbia, MO 65211
573-882-6194
jourgraduatestudies@missouri.edu
https://journalism.missouri.edu/degrees-programs/graduate-degrees/ph-d/

**Financial Aid from the Program**

Doctoral students are provided assistantship and scholarship support for a maximum of six terms (three years). Contact the department for details on this financial assistance.

**Additional Minors and Certificates - Journalism**

**Graduate Certificates**

- Certificate in Interactive Media (p. 725)

**Graduate Minors**

- Minor in Law and Conflict Resolution for Journalism Doctoral Students (p. 725)

**Graduate Certificate in Interactive Media**

The Graduate Certificate in Interactive Media prepares early to mid-career professionals in the journalism and strategic communication fields to work in the rapidly changing newsrooms, media organizations, corporate communications offices and non-profit organizations. The certificate prepares students in the use of interactive, digital and social media. It provides insights into how people perceive and process digital messages. Students will investigate the psychological, social, ethical and legal issues regarding the roles and effects of digital news, advertising and public relations on society.

Objectives of certificate:

- An understanding of the importance of audience engagement and development
- The skills to create an interactive media plan in their given organizations

**Requirements**

The certificate consists of 15 hours divided over three core courses and two electives.

**Required Courses**

**Graduate Minor in Law and Conflict Resolution for Journalism Doctoral Students**

This program is designed for doctoral students who are interested in teaching and researching in journalism and law and conflict resolution in a school of journalism or communication department.

**Requirements**

Students may receive the Minor upon completion of at least 15 credits at the Law School, including both core courses and at least 9 credits of electives. The Minor will appear on the student’s transcript.

**Required Core Courses**

<table>

**Electives**

Students may take any available course at the Law School in satisfying this requirement. Actual course offerings and availability vary by semester, and enrollment is subject to professor approval. The following courses are ones that are expected to be generally available. They are grouped by tracks to help students more quickly identify areas of specific interest, and to develop deeper concentrations in desired areas. However, students may take any of the courses in meeting the elective requirement for the Minor. Students should consult with a member of the School of Law faculty or administration about which Law School courses or sequences may be most appropriate to the student’s curricular needs.

School of Medicine

As the first publicly supported medical school west of the Mississippi River, the University of Missouri School of Medicine has improved health, education and research for more than 170 years. More Missouri physicians received their medical degree from MU than from any other university. The School of Medicine’s more than 680 faculty physicians and scientists educate more than 1,000 medical students, residents, fellows and others seeking advanced degrees, as well as more than 1,000 undergraduate students each semester. Our researchers focus on lifesaving discoveries that address the most prevalent health problems. The school is nationally ranked in such areas as family and community medicine, primary care, pharmacology and physiology, and health management and informatics.

Graduate

For the Professional program with the School of Medicine please see Medicine. (p. 824)

Additional Minors and Certificates

Graduate Certificates

• Certificate in Healthcare Project Management (p. 727)

Graduate Certificate in Healthcare Project Management

The Graduate Certificate in Healthcare Project Management is a standalone certificate within the Department of Health Management and Informatics. The educational objective is to provide the cross professional training needed to enable health and health workers of all levels of medical or health qualification to better manage projects needed to improve quality of care and decrease healthcare costs. Students will gain basic knowledge of issues in healthcare project management and competence with skills techniques, and tools used for effective, safe, and compliant healthcare project management. The Graduate Certificate can be completed on-campus, in blended format, and online while working or finishing a degree.

Requirements

This Graduate certificate will require completion of four courses of three credit hours each, for a total of 12 credit hours. Two courses are required core courses and students select two additional courses based on which professional (PMI) certification exam they wish to pursue in addition to the graduate certificate.

Admission Requirements

Students who are interested in applying for the Graduate Certificate in Healthcare Project Management will need to complete and submit the online Graduate School application. The application and admission requirements include:

• A minimum of a baccalaureate degree from an accredited institution.
• Official transcripts sent directly from each university or college attended.
• A GPA of 3.00 or greater for all undergraduate and graduate coursework.
• Current resume or curriculum vitae.
• A personal essay outlining the applicant's professional plans and career objectives, explains how educational, work or other experiences led to the decision to pursue a graduate certificate in Project Management for Healthcare, and includes specific issues and challenges in healthcare that are of strong personal interest.
• Two letters of recommendation from professional colleagues.
• International students whose native language is not English must submit test scores from TOEFL (Test of English as a Foreign Language) of at least 550 on the paper-based version, 215 on the computer-based version, or 80 on the internet-based version.
• Students who fall short in one or more elements of the above standards, but who believe they have the skills and motivation to do well in the Project Management for Healthcare courses, may be granted ‘Conditional Acceptance’ into the graduate certificate program at the discretion of the Admissions Committee.
• The University of Missouri Application fee applies for domestic and nonresident international students.
• An interview (on-campus, by telephone, or skype) with program faculty may be requested.
• Standardized test scores are not required for admission.

University of Missouri students who have completed their baccalaureate studies, are enrolled in a master’s or doctoral program, and are working toward a graduate degree in good standing, are also eligible to add the Graduate Certificate Program in Healthcare Project Management.

University of Missouri students with post-baccalaureate status (non-degree seeking) may be granted permission to enroll, but must complete the application and admissions requirements listed above for full admission to the Graduate Certificate program and conferral of the certificate upon completion of required coursework.

Sinclair School of Nursing
S235 School of Nursing
(573) 882-0277
https://nursing.missouri.edu

The nursing program at MU began in 1901 with the establishment of Parker Memorial Hospital Training School. Today, the Sinclair School of Nursing is committed to promoting, maintaining and improving health and health-care delivery in Missouri and worldwide through nursing education, research and service. Nursing faculty combine research and education to offer students hands-on experience in the art and science of nursing.

The MU Sinclair School of Nursing's BSN programs have the full approval of the Missouri State Board of Nursing (http://pr.mo.gov/nursing.asp). The Baccalaureate, Masters, and Doctor of Nursing Programs at the University of Missouri is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington DC, 20001

Undergraduate

• Admissions (p. 728)
• Advising (p. 729)
• Health Care (p. 729)

Admissions

Traditional BSN Option

The Traditional BSN is for first-time and transfer students. Incoming freshmen and transfer students are admitted as Pre-Nursing majors. Pre-Nursing students must complete their first 60 credit hours in prerequisite and general education courses. Students apply for admission to the clinical major during their last semester of general education and prerequisite courses. Students are admitted to the clinical nursing major on a competitive and space-available basis.

Each student's application is systematically reviewed and considered from a holistic perspective for each admission period. Clinical application criteria include:

• Minimum Pre-Nursing grade point average of 3.25 (on a 4.0 scale)
• Completion of four of the five science courses (in-progress is a maximum of one course):
  • Chemistry, Microbiology, Anatomy, Physiology, and Pathophysiology
• Minimum grade of C in Science courses, NURSE 2200, and NURSE 3200
• Minimum grade of C- in ENGLISH 1000, MATH 1050 or 1100, STAT 1200, and Writing Intensive courses
• Successful completion/currently enrolled in all general education and prerequisite coursework at the time of application
• Evidence of capacity to uphold the practice standard, functional abilities as listed in the Undergraduate Student Handbook, and ethical codes of the Nursing profession

Nursing Scholars who have applied to the clinical major, and who have met general education and prerequisite coursework, are guaranteed admission to the clinical nursing major. Please see the Nursing (https://nursing.missouri.edu/academic-programs/traditional-bsn/nursing-scholars-program/) and Honor's College (https://honors.missouri.edu/) websites for eligibility information and application details.

BSN graduates must complete a minimum of 120 credits hours. A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

Accelerated BSN Option

The Accelerated BSN Option is a 15-month program designed for individuals who have completed a non-Nursing bachelor's degree. Like the clinical nursing major, admission is on a competitive and space-available basis. Students are evaluated for admission to the Accelerated BSN based on the following criteria:

• A baccalaureate or higher degree from an accredited college or university
• A minimum GPA of 3.0 (4.0 grading scale)
• Two letters of reference from individuals that can attest to the student's motivation and ability to complete a course of intensive study
• Personal statement
• Professional resume
• Completion of prerequisite courses with a minimum of a C or better
• Evidence of potential and motivation for nursing
• Evidence of prior work success and/or ability to handle a fast-paced academic program

Transfer students must apply for admission through the MU Admissions Office. An additional, required application for non-MU and MU students is available on the School of Nursing (https://nursing.missouri.edu/academic-programs/accelerated-bsn/) website from mid-July to early October. Clinical course work begins the following summer and requires consecutive enrollment in the fall, spring, and a second summer to complete the degree.

A Bachelor of Science (BSN) degree is awarded at graduation, and the graduate may be eligible to take the licensing examination to become a registered nurse (RN).

RN to BSN Option

The RN to BSN is for registered nurses who have earned a diploma or associate degree in nursing, with a cumulative GPA of 2.5 of higher. All RN to BSN courses are offered online.

RN to BSN registered nurse applicants must be currently licensed to practice nursing (or eligible for licensure) in Missouri or another state. The RN to BSN major requires completion of a minimum of 120 credit hours, which includes completed credit hours from other institutions. The length of the program varies, depending on previously completed equivalent prerequisite courses and the student's choice of part-time or full-time enrollment. More details about the program, including program prerequisites, can be found on the School of Nursing (https://nursing.missouri.edu/academic-programs/rn-to-bsn-online/) website.
Transfer Students

Students transferring to MU from another accredited institution of higher education or other schools and colleges within the University are subject to the regulations established by the MU Faculty Council concerning transfer of credit.

For more information regarding the transfer guidelines for the School of Nursing, call (573) 882-0277. Prior to admission, transfer students must have the following:

- Minimum 3.25 GPA
- Approval from the Nursing Student Affairs office

Transfer students must apply for admission through the MU Admissions Office.

International Students

In addition to the admission criteria described above, international students must meet the following criteria:

- Internet-based Test of English as a Foreign Language (TOEFL) composite score of 84, with speaking sub-score of 26
- International English Language Testing System (IELTS) overall score of 6.5, with a speaking band score of 8

Advising

The academic advising office is in S235 of the School of Nursing Building, (573) 882-0277. Students are assigned an academic advisor upon enrollment at MU. In addition, each clinical nursing major can work with faculty advisors who are available for consultation about academic and professional matters.

Health Care

Nursing students participate in a variety of on- and off-campus educational experiences. The School of Nursing does not assume responsibility for health-care expenses incurred in either setting. Students assume responsibility for all health care for illness and injury, including emergency treatment. Student Health is located at University Physicians Medical Building, 1101 Hospital Drive, (573) 882-7481. For additional information, visit their web site at https://studenthealth.missouri.edu/.

Graduate

Nursing Graduate Programs

Masters of Science (Nursing) and Masters of Science

The Master of Science degree programs prepares nurses with post baccalaureate or post graduate degrees for roles as nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership to meet the healthcare needs of its citizens of Missouri and beyond.

Doctor of Philosophy (PhD)

Doctor of Nursing Practice

The DNP program prepares nurses to develop clinical programs based on the latest evidence. The student will choose an area of study (Adult CNS, FNP, PNP, or FMHN) on which to focus their clinical practice. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Note: Prospective graduate students must apply to both the degree program of interest and to the MU Graduate School. All graduate programs are distance mediated, providing online coursework with minimal, short, intensive campus experiences at specific times during the program to augment learning opportunities and allow for individualized faculty evaluation of educational competencies. The PhD program also offers a residential on-campus option for International Students only.

Care Management

The Master’s of Science in Care Management program is an interdisciplinary degree with an overarching goal to educate health care professionals to improve health outcomes, enhance care quality, and reduce health care costs. Graduates will provide care coordination to diverse people across the life span using care management principles and approaches that include facilitating delivery of health care to individuals/family, engagement of individuals/family in care plan design, and implementation resulting in high quality, high value, cost effective care using a collaborative, interdisciplinary approach.

Qualified applicants may have a bachelor’s degree from any health care discipline. Enrollees will be required to successfully complete 33 graduate credits, which will include 240 hours of clinical practice, and a master’s exam. The sequencing of courses builds on the students’ unique perspectives and foundational knowledge of theory applications of care coordination, research principles, an understanding of basic physiology and pharmacology, and care management principles and skills. The clinical practica will allow students to apply these principles and skills in order to determine how care management practices are used within health care settings. Students will learn how to use the principles of quality improvement to evaluate the impact of care management on vulnerable populations of people, including those with multiple chronic conditions.

This program supports preparation for national certification as a care manager through the American Nurses Credentialing Center, American Case Management Association, and the Commission for Case Manager Certification.

The Care Management Program will begin enrollment Fall 2019.

Faculty

Assistant Professor J. Chase*, L. Despins*, U. Jefferson**, L. Sherwin*
Teaching Professor J. Sherman*
Associate Teaching Professor G. Oliver*, S. Ulbrich*, R. Harris*, K. Bowman*
Assistant Teaching Professor V. Bader*, S. Birk*, N. Birtley*, M. Butler*, P. Evans-Smith*, J. Sabrowski, S. Thomas*, L. Wood*, A. Heyen*
Adjunct Associate Professor R. McDaniel**,
Adjunct Assistant Professor  M. Beck*, C. Crumley*, S. Revelle*, T. Rood*, J. Miller
Adjunct Teaching Professor  J. Bostick*
Adjunct Instructor  B. Hanson, C. Yonkman, C. Thompson, B. Davenport
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in care management, the University does offer baccalaureate opportunities in nursing (p. 731) and a number of related areas, both within the School of Nursing, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

• MS in Care Management (p. 730)
• Certificate in Care Management (p. 731)

MS in Care Management

Degree Requirements

A minimum of 33 hours beyond the bachelor's degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour management, the University does offer baccalaureate opportunities in nursing (p. 731) and a number of related areas, both within the School of Nursing, and in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Key components of this program include:

• Facilitating the delivery of health care to individuals and families
• Engaging individuals and families in care plan design
• Participating in high quality, high value, and cost-effective care

HMI 7430  Introduction to Health Informatics  3
NURSE 7500  Foundations of Care Management: Professional, Legal, Financial, and Business  3
NURSE 7510  Pharmacology, Pathophysiology, & Physical Assessment for Care Managers  3
NURSE 7150 or P_HLTH 7952  Research Basis for Advanced Nursing  3
or SOC_WK 7952  Research Methods in Public Health
NURSE 8150  Interprofessional Practice: Transforming Healthcare
NURSE 8940 or SOC_WK 8220 or SOC_WK 8240 or P_HLTH 7850  Nursing and Health Policy
or Integrated Health Policy and Services
or Social Policy for Older Adults
or Mental Health Policy
NURSE 8160  Evidence Based Care Management Practice for Individuals and Populations

Elective Courses

NURSE 8310  Health Disparities of Rural and Other Underserved Populations  3
NURSE 8920  Quality, Safety, and Performance Outcomes  3
NURSE 8955  Care Management Role-Focused Practicum

Other electives upon advisor approval

To satisfy requirements for the MS, a student must:

• Complete an approved plan of study with a cumulative GPA of 3.0
• Successfully complete the Master's Exam
• Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements (http://online.missouri.edu/prepare/computer.aspx)).

Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage (http://nursing.missouri.edu/academic-programs/msn/areas-of-study/).

Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master's Exam (MS exam).

In the School of Nursing, the Master's Examination (MS exam) consists of a paper that should reflect the graduate student's grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master's program with their faculty advisor. The Critical Review of the Literature master's exam is now the only option available. Details about the Master's examination can be found on the School of Nursing Master's Student Handbook (http://nursing.missouri.edu/handbooks/).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Care Management program (http://nursing.missouri.edu/academic-programs/msn/apply/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you've applied.
The Doctor of Nursing Practice Degree (or practice doctorate) prepares post baccalaureate and post graduate students in a specific advanced nursing roles (clinical nurse specialist, family nurse practitioner, and leadership) at the highest level of nursing practice. Our doctor of philosophy in nursing (PhD) program prepares clinical scholars, educators, and researchers for leadership roles in a variety of academic, industry, and healthcare settings. Because the knowledge and skills needed to produce excellent health-related research is not discipline specific, the PhD program does not require a prior degree in nursing. Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work.

**Faculty**

**Professor** S. Thompson*

**Associate Professor** T. Bloom**, K. Lane**, L. Popejoy***, B. Reeder, A. Vogelsmeier**, B. Wakefield**, D. Wipke-Tevis**

**Graduate Certificate in Care Management**

The Graduate Certificate in Care Management educates health care professionals to improve health outcomes, enhance care quality, and reduce health care costs. Upon completion of the graduate certificate students will be prepared to provide care coordination to diverse people across the lifespan using care management principles and approaches that include facilitating delivery of health care to individuals and families, engagement of individuals and families in care plan design, and implementation resulting in high quality, high value, cost effective care using a collaborative, interdisciplinary approach.

**Requirements**

The certificate is an online program for degree seeking students as well as a stand alone program.

Total credit hours for completion: 15

**Nursing**

The Traditional BSN is designed for undergraduate students who plan to complete the degree after graduating from high school or transferring from another college. As freshman and sophomores, nursing students are considered Pre-Nursing. Students typically are admitted to the clinical major during their junior and senior years.

Other BSN options include the accelerated option for students with a college degree and RN to BSN for nurses with an associate’s degree.

The Master of Science degree programs prepares nurses with post-baccalaureate or post-graduate degrees for roles as advanced practice nurses, nurse educators, nurse leaders, and care managers. Graduates of the Masters of Science program proceed to prepare future nurses, promote health, provide care management, and nursing leadership.

**Undergraduate**

• BSN in Nursing (p. 733)

**Academic Regualtions**

**College Credits**

Students applying to the Sinclair School of Nursing may transfer coursework from accredited four-year institutions and community/junior colleges. There is no time limit imposed on transfer courses.

Students may earn advanced standing credit in some courses by satisfactorily completing examinations in certain subjects. The student may acquire College Level Examination Program (CLEP) advance standing by subject examinations in general education and required support courses. Departmental examinations are may also be available. Departmental examinations are comparable to final examinations given...
in the required courses offered on campus. A student who has a record of enrollment in a course with a grade less than a ‘C’ shall not be eligible later for credit on the basis of examination covering the same subject.

Students in the RN to BSN may take advance standing by subject examinations, when transferring in less than 90 credit hours. For RN to BSN students, a standardized nursing examination from the National League for Nursing (NLN) is available for nutrition. If an unsatisfactory score is obtained from the first attempt the student may repeat the failed examination one time. A CLEP examination is available for the subject of Human Growth and Development. If an unsatisfactory score is obtained from the first attempt, the examination may not be repeated for six months.

Distance Education Courses

Certain courses offered by the Mizzou Online (self-paced) may be applied toward degree requirements. Courses such as literature, advanced psychology or sociology may be taken through independent study. Students should not expect to begin nor continue work on independent study courses during the regular semester except by special permission of the associate dean and then only when carrying less than a full course load in residence.

Progression Criteria

Pre-Nursing

Minimum Cumulative Pre-Nursing GPA Requirements

- First semester at MU (new and transfer students): 2.8
- Successive semesters at MU: 3.25

These grade standards apply to current MU students seeking to transfer from another major to Pre-Nursing.

Academic Actions

- **Required major transfer**: Students who do not meet the GPA requirements must transfer to another major at MU.
- **Probation**: Students whose term GPA falls below 2.0, but is above 1.0 are placed on probation.
- **Ineligible**: Students whose semester GPA falls below 1.0 are ineligible to enroll at MU.

Minimum Pre-Nursing Course Grade Requirements:

- A grade of ‘C’ or better is required in the following courses:
  - CHEM 1100 *
  - ENGLISH 1000
  - H_D_FS 2400 *
  - MICROB 2800
  - MPP 3202
  - NEP 2380
  - NURSE 2200
  - NURSE 3200
  - PTH_AS 2201
  - PTH_AS 2203
  - Writing Intensive courses
- * Consult your advisor for alternative course choices.
- A grade of “C-” or better is required in MATH 1050 or MATH 1100, and STAT 1200.
- Students may repeat a course in which an unsatisfactory grade was earned. If less than a C is earned in a repeated course, students are ineligible to continue enrollment in the School of Nursing.

Clinical Nursing

- Progression into the next semester’s nursing courses is contingent on the completion, with a grade of C or better, of all of the previous semester’s courses.
- A satisfactory academic standing for clinical students is a minimum semester GPA and cumulative GPA of 2.0. A student who does not meet this requirement may be placed on academic probation.
- A grade of C or better is required for all nursing courses. One repetition of a course is permitted, but requires approval of the Student Academic Progression (SAP) committee. Students who earn less than a C in a repeated nursing course are ineligible to continue enrollment in the School of Nursing.
- Students in the clinical nursing phase who withdraw in good standing for any reason must contact the Associate Dean for readmission.
- Students who have been dismissed may reapply through the established admissions procedure for all students and petition the Faculty Assembly Student Admissions and Progression Committee. Students who are readmitted are guided by the rules in operation for the class they join.
- A student in the clinical nursing phase who has been dismissed from the School of Nursing for a second time may not reapply for admission.

Additional Requirements

Students in the clinical phase of the degree requirements must be prepared to provide their own transportation to clinical agencies. In addition, they must meet the following requirements:

- Required Immunizations and Health Requirements
- Drug Screening
- Criminal Background Check
- CPR Certification (American Heart Association, BLS for Healthcare Providers)
- School of Nursing scrubs/student uniform
- Functional Abilities

Practicums

Clinical practicums (patient/client care) are an integral part of the curriculum. Students have the opportunity to practice in a variety of health care and related agencies, including:

- University of Missouri Health Care
- Boone Hospital Center
- Truman Veterans Hospital
- Fulton State Hospital
- Multiple county and city health departments
- Long-term care facilities
- Day-care centers
- Schools (K-12)
Licensure by the Missouri State Board of Nursing

On receipt of the Bachelor of Science in Nursing degree, students may be eligible to take the NCLEX examination for licensure as registered nurses. The Missouri State Board of Nursing grants a license to practice to persons who meet the policies and regulations contained within the Nursing Practice Act, Chapter 335.011 to 335.096.

Graduate

- MS in Nursing (p. 735)
  - with emphasis in Adult Gerontology Clinical Nurse Specialist (p. 736)
  - with emphasis in Family Nurse Practitioner (p. 736)
  - with emphasis in Leadership in Nursing and Health Care Systems (p. 737)
  - with emphasis in Nurse Educator (p. 738)
  - with emphasis in Pediatric Clinical Nurse Specialist (p. 738)
  - with emphasis in Pediatric Nurse Practitioner-Primary Care (p. 739)
  - with emphasis in Psychiatric Mental Health Nurse Practitioner (p. 739)
- PhD in Nursing (p. 740)
- DNP in Nursing (p. 742)
  - with emphasis in Adult-Gerontology Clinical Nurse Specialist (p. 743)
  - with emphasis in Family Nurse Practitioner (p. 744)
  - with emphasis in Nurse Leadership and Innovations in Health Care (p. 745)
  - with emphasis in Pediatric Clinical Nurse Specialist (p. 746)
  - with emphasis in Pediatric Nurse Practitioner- Primary Care (p. 747)
  - with emphasis in Psychiatric-Mental Health Nurse Practitioner (Across the Lifespan) (p. 748)

About the Sinclair School of Nursing

Sinclair School of Nursing
S235 Sinclair School of Nursing Building
573-882-0277
http://nursing.missouri.edu/

Nursing was an integral part of the Parker Memorial Hospital Training School, which served as the university’s first hospital in 1901. Although a nursing program was not officially established until 1920 within the School of Medicine, MU graduated its first nursing class in 1904. Sixteen years later, the Curators approved a Graduate Nursing designation. Today, the Sinclair School of Nursing provides a rich and rewarding learning environment for our students. Our faculty includes knowledgeable and skillful teachers, respected scholars and researchers in the nursing profession, and experienced, caring practitioners. The master’s and Doctor of Nursing Practice (DNP) program is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001

Facilities and Resources

Graduate students in the School of Nursing have access to all campus libraries and the various services they provide. The School of Nursing building is adjacent to University Hospital and Clinics, MU Psychiatric Center and Ellis Fischel Cancer Center. Women and Children’s Hospital is located nearby. A variety of learning experiences also are available at other hospital and health and social service agencies in and around Columbia.

Career Opportunities

Nursing is a professional career for those who would like to combine the following words in any number of ways: Servant leadership, challenge, advanced nursing skills, caring, science, and meaningful work. Graduates of our program work in a variety of settings - from hospital inpatient units and hospital based clinics, to community health centers, private practices, and schools, to areas of research and teaching.

Funding

Financial assistance is available as scholarships, fellowships, assistantships and traineeships.

BSN in Nursing

Degree Program Description

The Bachelor of Science in Nursing (BSN) curriculum encompasses general, foundational, and professional studies within a liberal arts education. The curriculum is driven by the belief that nursing theory has much to offer in the education of professional nurses and in improving the health and well-being of patient populations. Nursing knowledge is developmental in nature; each course is designed to build on knowledge and skills acquired in previous nursing and non-nursing courses.

The BSN program is offered in three formats:

1. Traditional BSN: A traditional four-year degree for freshmen and transfer students
2. Accelerated BSN: An accelerated program for non-Nursing post-baccalaureate students
3. RN-BSN: An online program for graduates of Associate Degree in Nursing programs

Traditional BSN

The traditional program accepts new students to the Pre-Nursing program in the fall, spring, and summer semesters. These students must formally apply to the clinical major as they are completing 60 credit hours of general education and prerequisite coursework. Admission is based on a competitive, space-available basis through a systematic and holistic review of each applicant.

Upon admission to the clinical major, students must earn 60 additional credit hours to complete the degree. Admission to the clinical major can begin in the fall or spring. A semester plan for students beginning the in the fall or spring is listed below. The School of Nursing also offers an additional plan which utilizes a summer semester for students seeking to expedite their graduation plan. More information on the summer option can be found on the School of Nursing (https://nursing.missouri.edu/academic-programs/traditional-bsn/curriculum/) website.

Accelerated BSN

Non-Nursing post-baccalaureate students with a minimum GPA of 3.0 are eligible to apply for this fast-paced fifteen month program. Like the Traditional program, students are admitted on a competitive, space-available basis. Applications are accepted between mid-July and early...
October. More information and the online application can be found on the School of Nursing (https://nursing.missouri.edu/academic-programs/accelerated-bsn/) website.

**RN to BSN**

This online program admits new students throughout the year to start courses in the fall, spring, or summer semesters. Minimum admission requirements include a 2.5 GPA, RN licensure or evidence of eligibility to take the National Council Licensure Examination (NCLEX) during the first semester of enrollment. More information on program prerequisites, semester plans, and how to apply can be found on the School of Nursing (https://nursing.missouri.edu/academic-programs/rn-to-bsn-online/) website.

**Research Opportunities**

The school offers a diverse range of research projects that provide care to healthy and ill people of all ages. The Essig Clinical Simulation Learning Center in the school is where students practice technical skills and learn to manipulate various equipment in this simulated clinical setting.

**Major Program Requirements**

The completion of all requirements for graduation is the responsibility of the student. The Bachelor of Science in Nursing (BSN) is granted to candidates who have satisfactorily completed all of the following requirements:

- Successful completion of all general education, prerequisite, and clinical nursing courses
- Minimum cumulative GPA of 2.0
- No more than 30 credits through independent study or extension courses
- Minimum of 120 credit hours
- Completion of all University graduation requirements (p. 35), including University general education requirements (p. 36)

**NOTE:** Curriculum subject to change.

### MS in Nursing

#### About

Students in the distance mediated Master's of Science program obtain advanced nursing preparation in one of two areas:

- Nursing Education (http://nursing.missouri.edu/academic-programs/msn/areas-of-study/)
- Leadership in Nursing and Healthcare Systems (http://nursing.missouri.edu/academic-programs/msn/areas-of-study/)

#### Degree Requirements

A minimum of 30 hours beyond the bachelor’s degree is required. Students must take a minimum of 15 hours of 8000-9000 level course work. No more than forty percent of the total required credit hours may be problems, readings and research hours. For example, in a 38-hour master's degree program, 15 hours may be from problems, readings and research hours.

To satisfy requirements for the MS, a student must:

- Complete an approved plan of study with a cumulative GPA of 3.0
- Successfully complete the Master's Exam
- Complete the program within a five-year period

Because the program is distance-mediated, students are required to obtain the required computer technology for successful participation in distance-mediated courses (see Mizzou Online Computer Requirements [http://online.missouri.edu/prepare/computer.aspx]).

#### Sample Plan of Study

Sample plans of study can be found on the Sinclair School of Nursing Master's webpage (http://nursing.missouri.edu/academic-programs/msn/areas-of-study/).

#### Thesis/Non-Thesis Requirements

Each candidate must pass a final examination to demonstrate mastery of the fundamental principles of the work included in the course of study offered for the degree. This requirement may be fulfilled by completion of the Master’s Exam (MS exam).

In the School of Nursing, the Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study. The MS exam is offered on a pass/fail basis. Students are required to discuss the focus of their MS exam early in their master’s program with
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://nursing.missouri.edu/academic-programs/msn/how-to-apply/) and the minimum requirements of the Graduate School (http://gradstudies.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

* Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in various states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Deadline for Summer entrance: April 1

MS in Nursing with Emphasis in Adult Gerontology Clinical Nurse Specialist

The Adult Gerontology Clinical Nurse Specialist MS(N) program curriculum prepares nurses as expert clinicians to: as expert clinicians to provide direct patient care from wellness through acute care with a focus on complex and vulnerable adult and older adult populations. The Adult Geriatric Clinical Nurse Specialist student will also be prepared to influence care outcomes by acting as a resource and providing expert consultation for nursing staff and other health professionals by implementing evidence based practice initiatives to support improvements in health care delivery systems.

- Manage clinical efforts across health care settings
- Provide visionary leadership
- Lead quality and safety initiatives
- Implement evidence-based practice

Degree Requirements

The MS(N) AGCNS curriculum provides core master’s coursework in combination with Adult Gerontology Clinical specialty courses. Adult Gerontology Clinical Nurse Specialist specialty courses focus on principles of leadership within healthcare organizations, management of human resources, health care financial management, and managing quality, safety and performance outcomes.

The American Nurses Credentialing Center (ANCC) offers certification as an Adult Gerontology Clinical Nurse Specialist. Students who have completed a master’s degree in Nursing in the Adult Gerontology Clinical Nurse Specialist emphasis area are eligible to sit for the exam.

Students must complete the core course required of the MS in Nursing in addition to coursework for the declared emphasis area.

MS in Nursing with Emphasis in Family Nurse Practitioner

Students who pursue the Family Nurse Practitioner MS(N) will be prepared to deliver evidence-based comprehensive primary healthcare to individuals of all ages, from birth through older adulthood, including the diagnoses and treatment of common acute episodic health problems and the management of chronic diseases. The student will utilize current research to provide health education to individuals and families and demonstrate expertise in health promotion and disease prevention. The student will be prepared to work independently and collaboratively to integrate advanced knowledge in the delivery of care to all populations including rural and other under-served communities.

- Manage clinical efforts in the primary care setting
- Provide visionary leadership
- Implement evidence-based practice

Degree Requirements

The MS(N) Family Nurse Practitioner curriculum provides core Master’s coursework in combination with Family Nurse Practitioner specialty courses. The specialty courses focus on care of the individual and the...
family, with a special emphasis on the rural and under-served, utilizing evidence practice guidelines.

The American Nurses Credentialing Center (ANCC) and the American Academy of Nurse Practitioners (AANP) offers certification as a Family Nurse Practitioner. Students who have completed a Master’s degree in Nursing in the Family Nurse Practitioner emphasis area are eligible to sit for the exam.

Students must complete the core course required of the MS in Nursing in addition to coursework for the declared emphasis area.

### MS in Nursing with Emphasis in Leadership in Nursing and Health Care Systems

#### Degree Requirements

All students pursuing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student’s area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

The MS(N) Leadership curriculum provides core master’s coursework in combination with leadership specialty courses. Leadership specialty courses focus on principles of leadership within healthcare organizations, management of human resources, health care financial management, and managing quality, safety and performance outcomes.

### Thesis/Non-Thesis Requirements

In addition to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The Master’s Thesis (NB090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.
Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://nursing.missouri.edu/academic-programs/msn/how-to-apply/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Nurse Educator

Degree Requirements

All students pursing the MS(N) degree must complete a minimum of 33 to 41 credit hours of graduate coursework. Credit hours vary depending upon the student’s area of study. Previous graduate level coursework from another institution may be accepted toward the degree depending upon transcript review. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate. The MS(N) Educator curriculum provides core master’s coursework in combination with leadership specialty courses. Educator specialty courses focus on advanced knowledge in teaching strategies and curriculum development as well as advanced knowledge in pathophysiology, pharmacology, and advanced health assessment.

Thesis/Non-Thesis Requirements

In addition to the Course Requirements, all Masters Students are required to complete either a Thesis or Masters Examination. The Master’s Thesis (NURSE 8090) requires independent research aimed at discovery and/or development of elements or relationships derived from a nursing theory. The Master’s Examination (MS exam) consists of a paper that should reflect the graduate student’s grasp and synthesis of the clinical and theoretical knowledge gained in the course of study.

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the MS in Nursing program (https://gradstudies.missouri.edu/degreecategory/nursing/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

MS in Nursing with Emphasis in Pediatric Clinical Nurse Specialist

The Pediatric Clinical Nurse Specialist MS(N) program curriculum prepares nurses as expert clinicians to: provide direct patient care from wellness through acute care with a focus on complex and vulnerable pediatric populations. The Pediatric Clinical Nurse Specialist student will also be prepared to influence care outcomes by acting as a resource and providing expert consultation for nursing staff and other health professionals by implementing evidence based practice initiatives to support improvements in health care delivery systems.
• Manage clinical efforts across health care settings
• Provide visionary leadership
• Lead quality and safety initiatives
• Implement evidence-based practice

Degree Requirements

The MS(N) Pediatric Clinical Nurse Specialist curriculum provides core master’s coursework in combination with Pediatric Clinical specialty courses. Pediatric Clinical Nurse Specialist specialty courses focus on care of the patient, the family, and the providers working with a special emphasis on system evaluation and change. They do so by utilizing the principles of leadership within healthcare organizations, and managing quality, safety and performance outcomes.

The American Association of Critical Care Nurses (AACN) offers certification as a Pediatric Clinical Nurse Specialist (ACCNS-P). Students who have completed a master’s degree in Nursing in the Pediatric Clinical Nurse Specialist emphasis area are eligible to sit for the exam.

Students must complete the core course required of the MS in Nursing in addition to coursework for the declared emphasis area.

MS in Nursing with Emphasis in Pediatric Nurse Practitioner - Primary Care

Students who pursue the Pediatric Nurse Practitioner area of study will be prepared as primary pediatric nurse clinicians providing comprehensive healthcare from birth through young adulthood by assessment, diagnosis, management, and evaluation of care. Special emphasis is placed on the knowledge, skills, and expertise to emphasize health promotion, injury and disease prevention, and management in coping with chronic illness among children.

• Manage clinical efforts in the primary care setting
• Provide visionary leadership
• Implement evidence-based practice

Degree Requirements

The MS(N) Pediatric Nurse Practitioner – Primary Care curriculum provides core master’s coursework in combination with Pediatric Nurse Practitioner specialty courses. Pediatric Nurse Practitioner – Primary Care specialty courses focus on care of the patient and the family, with a special emphasis on the rural and underserved. They do so by utilizing evidence practice guidelines.

The Pediatric Nursing Certification Board (PNCB) offers certification as a Pediatric Nurse Practitioner – Primary Care. Students who have completed a master’s degree in Nursing in the Pediatric Nurse Practitioner – Primary Care emphasis area are eligible to sit for the exam.

Students must complete the core course required of the MS in Nursing in addition to coursework for the declared emphasis area.

MS in Nursing with Emphasis in Psychiatric Mental Health Nurse Practitioner

Students who pursue the Psychiatric Mental Health Nurse Practitioner MS(N) will be prepared to deliver evidence based advanced primary mental health care to individuals of all ages (e.g., children, adolescents,
Indeed, we have had PhD students with academic preparation in health administration, health education, medical ethics, nursing, occupational therapy, physical therapy, public health and social work. The MU Sinclair School of Nursing (MUSSON) offers a challenging and yet enriching PhD program with two options. The PhD curriculum, program requirements, and program outcomes are the same whether you choose the Online PhD option or the International Residential Nursing PhD option. Only the method of course delivery varies. Additional details can be found on the Sinclair School of Nursing PhD Program Options webpage (http://nursing.missouri.edu/academic-programs/phd/program-options/).

- **Online PhD Program Option**: PhD coursework may be accessed online through the Online PhD program option by learning over the World Wide Web using the Canvas learning management system. This option also requires a 5 Day On Campus visit (held the first week of the summer semester on the Columbia campus) the first summer of enrollment and 4 Day On Campus Intensives every April until coursework is completed (see PhD On Campus Dates (http://nursing.missouri.edu/academic-programs/phd/on-campus-dates/)). Because the program is online, students are responsible for obtaining the required technology for successful participation in synchronous online courses (see Technology Requirements (http://nursing.missouri.edu/for-students/technology-requirements/)). Additionally, students are responsible for all the costs associated with travel and housing for the On Campus Intensives;

- **International Residential PhD Option**: Through the International Residential PhD option, international students attend the MU campus hybrid classes in Columbia, Missouri. The International Residential PhD student attends the hybrid classes in person, while the Online student cohort participates virtually via videoconferencing software. International Residential PhD students may also enroll in traditional residential course offerings through the MU Sinclair School of Nursing and the rest of the MU campus. Students in the International Residential PhD option must enroll in 4 credits during their first summer and maintain full-time status by enrolling in 9 credits each fall and spring term thereafter. Of the 9 credits each term, at least 6 credits must be either traditional face-to-face or hybrid coursework in order to qualify for and retain the F-1 or J-1 student visa status. The remaining 3 credits each term may be taken 100% on-line.

### Degree Requirements

MU requires a minimum of 72 credit hours, including 15 hours of 8000-9000 level coursework exclusive of readings, research, problems and independent study experiences, beyond the bachelor's degree for the PhD. The student's doctoral committee may recommend that the student have a minimum of 30 hours of post-baccalaureate graduate credit from a regionally accredited university be transferred toward the total hours required for the doctoral degree. With program approval, up to 6 hours of coursework for which professional credit was received may be counted toward the 72 credit-hour requirement. It is the responsibility of the doctoral committee to determine whether it is appropriate to transfer credit; however, the Graduate School must make the final review of the transfer request to determine if the credit meets the minimum guidelines. Ultimately, the student's doctoral committee, in collaboration with the student, determines the student's plan of study and total credit hours necessary to adequately prepare the student to successfully complete their dissertation research. Typical post-baccalaureate student takes ~77 credits. Typical
post-master’s student takes ~59. Typical post-clinical doctorate student takes ~48 credits. The PhD curriculum is divided into two categories:

- **Foundational Core** - Minimum of 26-38 credit hours (theory analysis and development, statistics and measurement, qualitative and quantitative methods courses)
- **Individualized Specialty Area** - Minimum of 27-39 credit hours of of research focus seminars, interdisciplinary collateral coursework (coursework taken outside the School of Nursing that helps to support the dissertation research topic), faculty mentored research practicum experiences, specialty area applied sciences including education or leadership courses, and dissertation research.

The PhD program at the MU SSON can be completed in three to five years of full time study, depending on whether the student entered as a post-baccalaureate or a post-graduate degree student. International Residential PhD students are required to be enrolled in full-time study. Part-time study also is available for students in the Online option.

Once the plan of study is completed, you prepare for your doctoral comprehensive examination, develop your research proposal, and begin your dissertation research project. The doctoral dissertation and its defense are the program’s culmination and demonstrate your ability to identify and pursue research that meets the highest of professional standards.

**Sample Plan of Study**

Sample plans of study can be found on the Sinclair School of Nursing PhD Curriculum webpage (http://nursing.missouri.edu/academic-programs/phd/curriculum/).

**Qualifying Process**

To be officially admitted to the PhD program, the student must pass a qualifying examination or process. Students admitted with a graduate degree have completed the qualifying process.

Students admitted with a bachelor’s degree are admitted to the PhD program on a provisional basis. Following successful completion of a qualifying process, bachelor’s prepared students will be granted admission to the PhD program. To fully qualify for the PhD program, BS-PhD students must earn at least a grade of B in the following:

- NURSE 7087 Leadership and Technology Institute
- NURSE 7010 Biostatistical Foundations for Health Researchers
- NURSE 7100 Theoretical Basis for Advanced Nursing
- NURSE 7150 Research Basis for Advanced Nursing
- Nine credits in nursing applied sciences

The student initiates the qualifying process by enrolling in three credits of NURSE 8900 Research Practicum in Nursing with a member of their BS-PhD program committee. The student is officially admitted to the PhD program following approval of the written report and oral presentation for NURSE 8900 by the BS-PhD Program Committee.

**Comprehensive Examination Process**

Through the PhD Comprehensive Examination process, the student demonstrates his/her ability to address the theoretical, methodological and substantive issues of his/her field of study. The examination tests the breadth and depth of knowledge and the ability to integrate ideas across research focus areas. The student must be enrolled to take this examination and it may be administered only when MU is officially in session. The student is not allowed to sit for the PhD comprehensive examination until the last semester of course work or when course work is substantially completed, all incomplete grades are satisfied, and the PhD Competencies are met.

The Comprehensive Exam, which is prepared by the student’s PhD program committee, has a written component followed by an oral section. The written component of the examination is completed at home or another site of the student’s selection during five consecutive days. The oral defense is a two-hour examination by the PhD program committee. The two sections of the examination must be completed within one month. The student is expected to complete the Comprehensive Examination within five (5) years of enrollment in the PhD program and it must be completed at least seven (7) months before the final defense of the doctoral dissertation. Additional details of the process can be found in the MU School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/2017-18-PhD-Nursing-Handbook.pdf).

**Dissertation Requirements**

The culmination of the PhD degree is the completion of a written doctoral dissertation. The dissertation must:

- Be written on a subject approved by the candidate’s doctoral dissertation committee
- Embody the results of original and significant investigation
- Be the candidate’s own work.

Within the MU Sinclair School of Nursing, the PhD Dissertation process consists of:

- Development of a dissertation proposal
- Approval of the proposal by the doctoral dissertation committee
- Approval of the research project by the Health Sciences Institutional Review Board
- Ethical conduct of the research project
- Writing the doctoral dissertation
- Public defense of the doctoral dissertation
- Approval of the dissertation by the candidate’s doctoral dissertation committee
- Submission of the written doctoral dissertation in an approved format.

Students have five (5) years from completion of the PhD Comprehensive Exam to complete the doctoral dissertation. Additional details of the process can be found in the MU Sinclair School of Nursing PhD Handbook (http://nursing.missouri.edu/wp-content/uploads/2016/07/2017-18-PhD-Nursing-Handbook.pdf).

**Admissions**

Students interested in the PhD program are encouraged to apply for admission as early as possible. All admitted students are required to start the PhD program during the summer semester.

**Early Acceptance Deadline: January 1st** Recommended for applicants desiring to be full-time students who are planning to apply for a competitive fellowship(s) and international residential PhD option applicants who need time to obtain a visa and move to Columbia, MO prior to classes starting in early June.

**Regular Acceptance Deadline: March 1st**

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Sinclair School of Nursing PhD
The DNP program at Mizzou prepares leaders in the advanced nursing practice roles of Adult-Gerontology Clinical Nurse Specialist, Family Nurse Practitioner, Pediatric Nurse Practitioner, and Leadership and Innovation in Health Care. Our program strengths include a strong clinical focus and a well-developed trajectory for the development of clinical scholarship. Unique aspects of our program are a focus on rural and underserved populations and the opportunity for students to select electives in family dynamics, financial management, nursing education, or symptom management. Successful completion of the program prepares nurses for an advanced clinical practice in primary care, hospital and community settings as well as leadership roles in practice settings and clinical faculty positions.

Upon admittance to the program, the following must be completed by the student and documentation of these items must be submitted before registering for coursework:

- Current required immunizations
- Satisfactory criminal background check
- Satisfactory drug screen
- Current CPR certification
- Proof of undisciplined nursing licensure

**Degree Requirements**

DNP Program Requirements include completion of required coursework, clinical hours, and the DNP Scholarly Project. The DNP in nursing requires a minimum of 72 credits beyond the baccalaureate degree. Of the 72 hours, 36.5 credits must be completed at the University of Missouri. In addition, a minimum of 1000 faculty/preceptor supervised academic clinical hours must be completed. Post-master’s students may transfer in clinical hours completed in their previous master’s degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student’s emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

Ultimately, the student, in collaboration with their academic advisor determines the student’s plan of study, total credit hours, and clinical hours necessary to adequately prepare the student for the DNP degree.

DNP students are required to spend one week on campus the first summer of enrollment and during their last semester of enrollment. Specific On-campus competency days are also required during the course of the program. For specific dates click on On Campus dates. Further explanation of program requirements can be found on the DNP Program Requirements web page.

**DNP Curriculum**

All students pursuing the DNP degree must complete a minimum of 72-74.5 credit hours of graduate coursework. Credit hours required vary depending upon the students’ emphasis area. Up to 38 credit hours of previous graduate level credit hours from another institution may be accepted toward the total hours required for the DNP degree pending upon transcript review and applicability to the specific area of study. Students must maintain a minimum cumulative Grade Point Average (GPA) of 3.0 in order to graduate.

**DNP Clinical Hours**

All DNP students must complete a minimum of 1000 faculty/preceptor supervised academic clinical hours. Post-master’s students may transfer in clinical hours completed in their previous master’s degree pending approval of their academic advisor. Total number of clinical hours may vary depending upon the student’s emphasis area, proof of national certification in an advanced practice role, and previous graduate clinical coursework completed.

**DNP Scholarly Project**

The DNP Residency Project is a faculty-guided scholarly experience that provides evidence of the student’s critical thinking and ability to apply research principles through identification of a significant practice problem, systematic appraisal of relevant scientific literature and outcome data; design of cost-effective, evidence-based, therapeutic interventions or programs; successful implementation of the selected interventions or program, and comprehensive evaluation of specific, measurable, and appropriate outcomes. The project will reflect the culmination of knowledge and skills developed during the DNP program. DNP students must complete a DNP Residency Project, write a scholarly paper or executive summary, present an electronic poster to peers, committee members, and stakeholders, and defend the project results with their DNP Project Committee.

**Sample Plan of Study**

Sample plans of study can be found on the Sinclair School of Nursing DNP webpage.
Doctor of Nursing Practice Residency Project Requirements

The DNP Residency Project is an in-depth, evidence-based practice change project that will focus on a theoretically and clinically relevant problem impacting a rural or other underserved population or critical healthcare system need. Specifics of the DNP Residency Project can be found in the Sinclair School of Nursing DNP Student Handbook (http://nursing.missouri.edu/for-students/handbooks/).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the Doctor of Nursing Practice program (http://nursing.missouri.edu/academic-programs/dnp/apply/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to the degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Before official admissions to the University of Missouri, your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied.

*Due to higher education regulation changes, the University of Missouri is unable to accept applications for admission to online programs from students residing in several states. You may find more information at this link: http://online.missouri.edu/about/stateauthorization.aspx.

Application Deadlines: Once application materials have been processed through the online application system and after a preliminary review of academic credentials and applications materials, an interview will be arranged. The interview process will take place within weeks of the completed application being received. Student interviews may take place in person or via electronic means for distance students. Applicants will receive notification of their acceptance decision within two weeks. Students applications received after April 1 will be considered for the following academic year.

DNP in Nursing with Emphasis in Adult-Gerontology Clinical Nurse Specialist

Students who pursue the Clinical Nurse Specialist area of study will be prepared as expert clinicians in a specialized area of nursing practice (Adult-Gerontology). In addition to providing direct patient care, Clinical Nurse Specialists influence care outcomes by providing expert consultation for nursing staff and by implementing evidence based practice initiatives to support improvements in health care delivery systems.

# Nursing Course Electives from which to choose:
- NURSE 8010 Family Dynamics and Intervention
- NURSE 8720 Symptom Management in Acute and Chronic Illness
- NURSE 8854 Teaching Strategies in Nursing
- NURSE 8864 Curriculum Development in Nursing
- NURSE 8820 Health Care Financial Management

Additional interdisciplinary online elective choices can be found in the areas of geriatric care management, gerontology, grantmanship, health ethics, health informatics, multicultural education, online education, public health, and youth development (see [http://online.missouri.edu/degreeprograms/degrees.aspx](http://online.missouri.edu/degreeprograms/degrees.aspx)).

*** Reflects minimum required DNP clinical and project hours. Additional clinical hours may be required based on specialty and complexity of DNP clinical residency project.

### Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing ([http://nursing.missouri.edu/academic-programs/dnp/apply/](http://nursing.missouri.edu/academic-programs/dnp/apply/)) and the minimum requirements of the Graduate School ([http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php](http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php)). Because requirements vary, you must refer to a degree program’s graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you’ve applied before official admission to the University of Missouri.

Total Credits: 77.5-80

1110-1260 Clinical Hours ***

* Preceptor required for clinical courses.

# Nursing Course Electives from which to choose:
- NURSE 8010 Family Dynamics and Intervention
- NURSE 8720 Symptom Management in Acute and Chronic Illness
- NURSE 8854 Teaching Strategies in Nursing
- NURSE 8864 Curriculum Development in Nursing
- NURSE 8820 Health Care Financial Management

Additional interdisciplinary online elective choices can be found in the areas of geriatric care management, gerontology, grantsmanship, health ethics, health informatics, multicultural education, online education, public health, and youth development (see [http://online.missouri.edu/degreeprograms/degrees.aspx](http://online.missouri.edu/degreeprograms/degrees.aspx)).

*** Reflects minimum required DNP clinical and project hours. Additional clinical hours may be required based on specialty and complexity of DNP clinical residency project.

## Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing ([http://nursing.missouri.edu/academic-programs/dnp/apply/](http://nursing.missouri.edu/academic-programs/dnp/apply/)) and the minimum requirements of the Graduate School ([http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php](http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php)). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

## DNP in Nursing with Emphasis in Nurse Leadership and Innovations in Health Care

Individuals with a master's degree in nursing or related field may apply to this program. Students must complete a total of minimum of 38.5-47 credit hours to earn the degree. Credit hours vary depending upon review of transcripts and previously completed clinical hours.

- NURSE 7010 Biostatistical Foundations for Health Researchers 3
- NURSE 7087 Leadership and Technology Institute 1
- NURSE 8100 Principles of Epidemiology 3
- NURSE 8830 Informatics Applications and Innovations in Health Care Systems 3
- NURSE 8840 Nursing Leadership, Innovation, and Entrepreneurship 3
- NURSE 8910 Translational Evidence-Based Nursing Practice 3
- NURSE 9080 DNP Residency Project (x 3) 1-3
- NURSE 8820 Health Care Financial Management 4
- NURSE 8920 Quality, Safety, and Performance Outcomes 3
- NURSE 8860 Organizations & Human Resource Management in Nursing 3
- NURSE 8930 Health Program Design and Management 3
- NURSE 9070 DNP Clinical Residency (x 3) 1-5
- NURSE 8940 Nursing and Health Policy 3
- NURSE 9087 Leadership and Transformational Role Institute 2

For more information on Area of Study Information please see the Nurse Leadership and Innovations in Health Care page ([http://nursing.missouri.edu/academic-programs/dnp/areas-of-study/](http://nursing.missouri.edu/academic-programs/dnp/areas-of-study/)).

Total Credits: 42.5-56

** 510-1020 clinical hours

** more clinical hours may be needed to meet the 1000 required hours depending upon review of transcripts

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing (http://nursing.missouri.edu/academic-programs/dnp/apply/) and the minimum requirements of the Graduate School (http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php). Because requirements vary, you must refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you've applied before official admission to the University of Missouri.

DNP in Nursing with Emphasis in Pediatric Clinical Nurse Specialist

Effective FALL 2018 we are no longer admitting to this Area of Study.

Students who pursue the Pediatric Nurse Practitioner area of study will be prepared as primary pediatric nurse clinicians providing comprehensive healthcare from birth through young adulthood by assessment, diagnosis, management, and evaluation of care. Special emphasis is placed on the knowledge, skills, and expertise to emphasize health promotion, injury and disease prevention, and management in coping with chronic illness among children.

# DNP in Nursing with Emphasis in Psychiatric-Mental Health Nurse Practitioner (Across the Lifespan)

Students who pursue the Psychiatric-Mental Health Nurse Practitioner (Across the Lifespan) area of study will deliver evidence based advanced primary mental health care to individuals of all ages including children, adolescents and their families in a variety of healthcare settings. FPMHNPs engage in independent and interdependent decision making, manage psychotropic medications, and deliver psychotherapeutic and psychoeducational interventions.

Additional Minors and Certificates - Nursing

Graduate Certificates

- Certificate in Adult Gerontology Clinical Nurse Specialist (p. 749)
- Certificate in Family Nurse Practitioner (p. 750)
- Certificate in Participatory Health Research (p. 750)
- Certificate in Pediatric Clinical Nurse Specialist (p. 750)
- Certificate in Psychiatric Mental Health Nurse Practitioner (p. 751)

Graduate Minors

- Minor in Health System Innovations (p. 751)
- Minor in Nursing Education (p. 751)

Graduate Certificate in Adult Gerontology Clinical Nurse Specialist

The Graduate Certificate in Adult Gerontology Clinical Nurse Specialist will prepare students as expert clinicians to provide direct patient care from wellness through acute care with a focus on complex and vulnerable adult and older adult populations. The students will be prepared to influence care outcomes by acting as a resource and providing expert consultation for nursing staff and other health professionals by implementing evidence based practice initiatives to support improvements in health care delivery systems.
Requirements

This is an online program for both degree seeking and stand alone for those students with previous APRN certification.

Total credit hours for completion: 21.5

Graduate Certificate in Family Nurse Practitioner

The Graduate Certificate in Family Nurse Practitioner will prepare students to deliver evidence-based comprehensive primary healthcare to individuals of all ages, from birth through older adulthood, including the diagnose and treatment of common acute episodic health problems and the management of chronic diseases. The student will utilize current research to provide health education to individuals and families and demonstrate expertise in health promotion and disease prevention. The student will be prepared to work independently and collaboratively to integrate advanced knowledge in the delivery of care to all populations including rural and other under served populations.

Requirements

This is an online program for both degree seeking and stand alone for those students with previous APRN certification.

Total credit hours for completion: 18.5

Graduate Certificate in Participatory Health Research

The Graduate Certificate in Participatory Health Research confirms the completion of graduate level training in the rationale, theoretical underpinnings, methods, and applications of community based participatory health research (CBPR) and patient centered outcomes research (PCOR). Community based participatory approaches are innovative methods that intersect with patient centered outcomes. When used together, CBPR and PCOR, there is significant potential for patient empowerment, enhancement of patient care, and improved population health outcomes. A collaborative effort between the Sinclair School of Nursing, Department of Family and Community Medicine, School of Social Work, and the Masters in Public Health program, individuals completing the Graduate Certificate in Participatory Health Research will gain highly valued skills necessary to conduct clinical research in partnership with a community. Participatory Health Research methods are ideal for addressing patient-centered questions related to informed choices, health outcomes, and quality of life. This graduate certificate is open to all health-related professions. These innovative types of research skills traditionally have not been included in health-related graduate program curricula.

Requirements

Requirements for the Graduate Certificate in Participatory Health Research include a graduate level statistics course, three didactic courses, and one research practicum experience.

Courses for this program are online: no campus visits are required.

Graduate Certificate in Pediatric Clinical Nurse Specialist

The Graduate Certificate in Pediatric Clinical Nurse Specialist will prepare students as expert clinicians to provide direct patient care from wellness through acute care with a focus on complex and vulnerable pediatric
populations. Students will also be prepared to influence care outcomes by acting as a resource and providing expert consultation for nursing staff and other health professionals by providing systems leadership to implement evidence-based practice initiatives, collaboration, research, coaching, and advocacy to support improvements in health care delivery systems and patient outcomes.

Requirements

This is an online program for both degree seeking and stand alone for those students with previous APRN certification.

Total credit hours for completion: 21.5

Graduate Certificate in Psychiatric Mental Health Nurse Practitioner

The Graduate Certificate in Psychiatric Mental Health Nurse Practitioner will prepare students to be able to deliver evidence based advanced primary mental health care to individuals of all ages and their families in a variety of healthcare settings, including in rural and under served populations. The student will engage in independent and interdependent decision-making, managing psychotropic medications, and delivering psycho-therapeutic, and psycho-education interventions.

Requirements

This certificate is an online program, for both degree seeking and as a stand alone program.

Graduate Minor in Health System Innovations

The minor is open to graduate students in the Sinclair School of Nursing as well as all students with graduate status who are interested in health care leadership. This minor is designed for those who have a desire to understand growing innovative trends, who want to learn how to integrate innovation into health system organizations, and who want to determine which innovative practices are financially viable to support health care institutions.

Requirements

Students with graduate standing may select 9-12 credit hours from the designated courses listed below to be awarded the graduate minor in Health System Innovation.

- N8820 Healthcare Financial Management (4 credits)
- N8830 Informatics, Application and Innovation in Health Care Systems (3 credits)
- N8840 Nursing Leadership, Innovation, and Entrepreneurship (3 credits)
- N8860 Organizations & Human Resource Management in Nursing (3 credits)

Graduate Minor in Nursing Education

The Graduate Minor in Nursing Education is open to graduate students in the Sinclair School of Nursing as well as nurses interested in teaching in a school of nursing who are graduate students in other departments on campus (e.g. Health Education, Public Health, Health Management and Informatics, Human Development and Family Studies, etc.). Graduate nursing students who already have a MS in Nursing Education or a Graduate Certificate in Nursing Education will not be eligible for a graduate minor in nursing education as their prior graduate coursework is substantively identical to the required courses.

Requirements

The graduate minor in nursing education consists of a minimum of 10 graduate credit hours of nursing education coursework.

- NURSE 8854 Teaching Strategies in Nursing (3 credits)
- NURSE 8864 Curriculum Development in Nursing (3 credits)

After completion of the two core courses, students will complete a faculty supervised 4 credit teaching nursing practicum. Students may select from two practicum courses which best meet their learning needs and professional goals:

- NURSE 8950 Teaching Nursing Practicum (4 credits) or NURSE 8954 Distance-Mediated Teaching Nursing Practicum (4 credits).

These aforementioned courses also can be supplemented by problems courses.

College of Veterinary Medicine

The college was established in 1946.

For more information about the College of Veterinary Medicine, call (573) 882-3768. http://cvm.missouri.edu (http://cvm.missouri.edu/)

Undergraduate

In addition to the four-year professional curriculum leading to the Doctor of Veterinary Medicine (DVM) degree, the college offers a variety of undergraduate (BIOMED) courses. Courses serve as electives for other degree programs, a component to the online Health Science and Bachelor of General Studies degrees, and as partial requirements in the MU Pre-veterinary Medicine Scholars program. BIOMED courses are also recommended electives in meeting the requirements to apply for a DVM program.

Graduate

The College of Veterinary Medicine offers several graduate level degrees within the Department of Biomedical Sciences, Veterinary Medicine and Surgery, and Veterinary Pathobiology.

Microbiology

Fax: (573) 884-5414

Microbiology, which includes the sub-disciplines of bacteriology, virology, mycology, parasitology, and immunology, is a cornerstone discipline in the fields of public health, food safety, medicine, veterinary medicine, dentistry, biotechnology, and biomedical research. A course of study in the Department of Veterinary Pathobiology leads to the Bachelor of Science in Microbiology. This degree program positions graduates favorably for either direct entry into the job market or for additional post-baccalaureate training in medicine, veterinary medicine, dentistry, nursing, or biomedical research. Job opportunities for graduates exist in the private sector with medical, animal health, pharmaceutical, and biotechnology-based companies and with government laboratories such as the Center for Disease Control and Prevention, the National Institutes of Health, and the United States Department of Agriculture. A degree in microbiology provides a strong science background which can be beneficial for specialization in such diverse careers as journalism (science and public health reporting) and law (biotech, patent, and environmental law). Students are encouraged to gain research experience by working on mentored projects in faculty labs.

Faculty

Assistant Professors A. Ericsson**, S. Odemuyiwa*, A. Royal

• Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
• Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

BS in Microbiology

Degree Program Description

From the Greek words mikros (small), bios (life), and logos (science), microbiology is the branch of science that studies microscopic forms of life, including bacteria, viruses, algae, fungi, protozoa, and parasites. Although most commonly thought of as causing infection and disease, microorganisms are often beneficial, with many uses in the pharmaceutical, biotech, food, and agricultural industries. A bachelor of science (BS) in microbiology provides direct entry into a number of employment opportunities in the private sector with medical, animal health, pharmaceutical, and biotechnology-based companies and with government laboratories such as the Center for Disease Control and Prevention (CDC), the National Institutes of Health, and the United States Department of Agriculture. A degree in microbiology provides a strong science background which can be beneficial for specialization in such diverse careers as journalism (science and public health reporting) and
To earn a bachelor’s degree in microbiology, all undergraduate students must complete the university’s general education requirements, degree specific requirements set by the Department of Veterinary Pathobiology, and university total credit hour and writing intensive class requirements. The following courses are required for the microbiology major. All courses must be taken for a letter grade (satisfactory/unsatisfactory grades will not count toward the major). A grade of C- or higher is required for each class and an overall GPA of 2.0 for these courses is also required.

**Major Program Requirements**

To earn a bachelor’s degree in microbiology, all undergraduate students must complete the university’s general education requirements, degree specific requirements set by the Department of Veterinary Pathobiology, and university total credit hour and writing intensive class requirements.

The following courses are required for the microbiology major. All courses must be taken for a letter grade (satisfactory/unsatisfactory grades will not count toward the major). A grade of C- or higher is required for each class and an overall GPA of 2.0 for these courses is also required.

### Required Courses

- **PHYSICS 1210** College Physics I 4-5
  - or **PHYSICS 2750** University Physics I
- **PHYSICS 1220** College Physics II 4
  - or **PHYSICS 2760** University Physics II
- **BIO_SC 1500** Introduction to Biological Systems with Laboratory 5
- **MATH 1400** Calculus for Social and Life Sciences I 3
- **CHEM 1320** College Chemistry I 4
- **CHEM 1330** College Chemistry II 4
- **CHEM 2100** Organic Chemistry I 3
- **CHEM 2110** Organic Chemistry II 5
  - & **CHEM 2130** and Organic Laboratory I
- **BIOCHM 3630** General Biochemistry 3
  - or **BIOCHM 4270** Biochemistry
- **V_PBIO 2001** Fundamentals of Microbiology 5
  - or **BIO_SC 3750** General Microbiology
  - or **BIO_SC 3760** and Microbiology Laboratory
- **MICROB 3200** Medical Microbiology and Immunology 4
- **V_PBIO 3345** Fundamentals of Parasitology (or **V_PBIO 3554** Introduction to Virology) 3
- **V_PBIO 3551** Introduction to Immunology I 3
- **V_PBIO 3554** Introduction to Virology (or **V_PBIO 3345** Fundamentals of Parasitology) 3
- **V_PBIO 3600** Bacterial Genetics and Genomics 3
- **V_PBIO 4970** Capstone Undergraduate Research in Microbiology (or **V_PBIO 4980**) 3
- **V_PBIO 4980** Capstone Senior Seminar (or **V_PBIO 4970**) 3

Microbiology Electives (15 credit hours selected from the following):

- **BIOCHM 4272** Biochemistry 3
- **BIO_SC 2300** Introduction to Cell Biology 4
- **BIO_SC 4976** Molecular Biology 3
- **ENV_SC 4312** Environmental Soil Microbiology 3
- **F_S 2172** Elements of Food Microbiology 3
- **F_S 4370** Food Microbiology 3
- **F_S 4375** Food Microbiology Laboratory 2

- **MICROB 4304** Immunology 3
- **V_PBIO 3345** Fundamentals of Parasitology 3
- **V_PBIO 3554** Introduction to Virology 3
- **V_PBIO 3557** Microbial Pathogenesis I 3
- **V_PBIO 3700** Medical and Veterinary Entomology 4
- **V_PBIO 3560** Microbial Physiology 3
- **V_PBIO 3568** Public Health Microbiology 3
- **V_PBIO 3650** Applied Microbiology and Biotechnology 3
- **ANTHRO 3560W** Plagues and Peoples - Writing Intensive 3
- **V_PBIO 3950W** Current Topics in Emerging Infectious Diseases 3
- **V_PBIO 3900W** Beneficial Microbes 3
- **V_PBIO 4950** Advanced Undergraduate Research in Microbiology 1-3

*One of these 2 courses must be taken as a major requirement; the other can be taken as a major elective.

**Can be repeated for a maximum of 6 credit hours.

If all degree requirements are met, microbiology majors who enroll in the MU College of Veterinary Medicine prior to receiving their baccalaureate degree will be eligible to receive the BSM degree at the end of their second year in the professional curriculum. The following course substitutions for required core courses will be accepted:

- **V_PBIO 5552** Veterinary Bacteriology and Mycology I and **V_PBIO 5553** Veterinary Bacteriology and Mycology II for **MICROB 3200** Medical Microbiology and Immunology
- **V_PBIO 5511** Veterinary Immunology 1 and **V_PBIO 5512** Veterinary Immunology 2 for **V_PBIO 3551** Introduction to Immunology
- **V_PBIO 5557** Veterinary Parasitology for **V_PBIO 3345** Fundamentals of Parasitology

The following courses will be accepted as major electives:

- **V_PBIO 5554** Veterinary Virology
- **V_PBIO 5555** Veterinary Epidemiology and Biostatistics
- **V_PBIO 5558** Veterinary Public Health

### University Requirements for Graduation

- Satisfactory completion (grade of C- or better) of a 3 credit upper division writing intensive class in the microbiology major. Acceptable classes are:
  - **ANTHRO 3560W** Plagues and Peoples
  - **HLTH_SCI 3900W** Introduction to the Research Process and Evidence Base
  - **V_PBIO 3950W** Current Topics in Emerging Infectious Disease
  - **V_PBIO 3900W** Beneficial Microbes

- Additional electives to meet the 120 credit hour minimum for graduation. These electives can be taken using the satisfactory/unsatisfactory grading system if in compliance with university academic policies.

Minor in Microbiology

The Minor in Microbiology, through the Department of Veterinary Pathobiology in the College of Veterinary Medicine, will be of interest to students majoring in fields related to microbiology, such as biological sciences, food science, and biochemistry. Students pursuing admittance to professional programs, such as medical, dental, and veterinary schools, may also find this minor to be relevant.

Requirements

To complete the minor, students must successfully complete 15 credit hours from the courses listed below. A minimum grade of C- and an overall GPA of 2.0 for all minor coursework indicates successful completion. At least nine hours of coursework for the minor must be completed at MU.

Students will need to take BIO_SC 1500 prior to enrolling in any of the courses listed for the minor. Students who opt to take BIO_SC 3750 and BIO_SC 3760 in place of V_PBIO 2001 will be required to take BIO_SC 2200 and BIO_SC 2300 as prerequisites.

Interested students should complete the online form at http://vpbio.missouri.edu/undergraduate-studies.html. Questions about the program should be sent to: microbiology@missouri.edu.

Certificate in Biomedical Sciences

This 16-credit hour online undergraduate certificate is intended to better prepare pre-professional students planning a career in veterinary medicine or allied biomedical sciences. The courses required encompass biomedical terminology, cell biology, anatomy, and physiology.

Requirements

A total of 16 credit hours in online BIOMED courses are required. Thirteen credit hours are core courses and 3 credit hours are selected from the list of elective courses.

Required Core Courses (13 Hours)

BIOMED 3000  Specialty Careers for Veterinary Technicians  1
BIOMED 3100  Biomedical Pathophysiology  3
BIOMED 3300  Animal Welfare and Ethics  3
BIOMED 3400  Domestic Animal Behavior in Veterinary Practice  2
BIOMED 4001  Topics in Biomedical Sciences (Canine and Feline Nutrition)  3
BIOMED 4110  Veterinary Cytology  2
BIOMED 4120  Principles of Toxicology  3
BIOMED 4210  Animal Issues in Disasters  1
BIOMED 4300  Clinical Veterinary Neurology  3
BIOMED 4320  Fundamentals of Small Animal Emergency and Critical Care  3
BIOMED 4400  Veterinary Surgical Nursing  3
BIOMED 4410  Small Animal Physical Rehabilitation  3
BIOMED 4500  Equine Critical Care and Nursing  3
BIOMED 4510  Equine Clinical Anatomy: Forelimbs  1

Minimum Academic Standards: Satisfactory completion of a certificate requires a grade point average of at least 3.0 in BIOMED courses and no grade less than a C in all courses.

Certificate in Veterinary Science

This online undergraduate certificate has been developed to help prepare pre-professional students planning a career in veterinary medicine in the areas of biomedical and veterinary terminology, animal handling, sanitation, and welfare. Courses may be used as partial requirement to apply to a college of veterinary medicine.

Requirements

A total of 16 credit hours in online BIOMED courses are required. Twelve credit hours are core courses and 4 credit hours are selected from the elective course list.

Required Core Courses (12 hours):
BIOMED 2110  Biomedical Terminology  3
BIOMED 2111  Veterinary Medical Terminology  1
BIOMED 2120  Essentials of Animal Handling and Physical Restraint  2
BIOMED 2230  Animal Sanitation and Disease Prevention  3
BIOMED 3300  Animal Welfare and Ethics  3

Electives (4 hours):
BIOMED 1010  Biomedical Career Explorations  1
BIOMED 2130  Introduction to Veterinary Anatomy and Physiology  3
BIOMED 3000  Specialty Careers for Veterinary Technicians  1
BIOMED 3100  Biomedical Pathophysiology  3
BIOMED 3219  Elements of Comparative Anatomy  3
BIOMED 3326  Principles of Veterinary Pharmacology  3
BIOMED 3400  Domestic Animal Behavior in Veterinary Practice  2

Electives (12 credit hours):
STAT 7020  Statistical Methods in the Health Sciences  3
V_PBIO 7110  Veterinary Cytology  2
V_PBIO 7120  Principles of Toxicology  3
V_PBIO 7210  Animal Issues in Disasters  1
V_M_S 7320  Fundamentals of Small Animal Emergency and Critical Care  3
V_BSCI 7333  Veterinary Cell Biology  4
V_M_S 7510  Equine Clinical Anatomy: Forelimbs  1

The Graduate Certificate in Veterinary Science is ideal for veterinary professionals who are seeking employment in the public sector (government or state biomedical programs), industry or education. Those who are preparing to take exams for specialty certifications, or desire employment in private referral practices that require advance training, will also benefit from this certificate. Students who successfully complete the coursework required to earn an online graduate certificate in Veterinary Science will have acquired current, advanced information within the area of veterinary medicine and closely related topics.

This certificate can stand alone or may be earned by Master’s students within other approved graduate programs.

Requirements:

In order to successfully complete the certificate program, students must complete 12 hours of courses through Veterinary Online programs and 3 credit hours of graduate level statistics. Problems, Research and courses graded Satisfactory/Unsatisfactory are not applicable, and all courses must be graduate level (7000 level or above) BIOMED, V_BSCI, V_PBIO, or V_M_S courses unless approved by the student’s graduate committee.

Courses required by the certificate program can be finished within 36 weeks, and must be completed within 80 weeks (five 16-week semesters) after the student is accepted into the program. Students must maintain at least a 3.0 cum GPA, and no grade lower than a C may be earned in any course offered through Veterinary Online Programs.

Required Course (3 credit hours):

Electives (12 credit hours):
V_PBIO 7110  Veterinary Cytology  2
V_PBIO 7120  Principles of Toxicology  3
V_PBIO 7210  Animal Issues in Disasters  1
V_M_S 7320  Fundamentals of Small Animal Emergency and Critical Care  3
V_BSCI 7333  Veterinary Cell Biology  4
V_M_S 7510  Equine Clinical Anatomy: Forelimbs  1
V_M_S 8040  Advanced Small Animal Clinical Nutrition  2
BIOMED 8100  Veterinary Online Course Development and Teaching  3
BIOMED 8310  Advanced Topics in Stress Physiology  3
V_PBIO 8436  Pathogenic Mechanisms in Veterinary Pathobiology  3
BIOMED 8700  Principles of Veterinary Pain Management  2
BIOMED 8710  Essentials of Radiation Biology  2

Admissions Requirements:

- Completion of a Bachelors or Professional degree through an AVMA and the Council for Higher Education Accredited program.
- Veterinary technicians with a bachelor's degree must have achieved a minimum cumulative GPA of 3.0 in the last 60 credit hours prior to achieving a bachelor's degree.
- Acceptance by the University of Missouri Graduate School.
- When appropriate, a score of 520 or greater on the Test of English as a Foreign Language (TOEFL) exam.
- When appropriate, a score of 220 or greater on the Test of Spoken English (TSE) exam.
- Acceptable references from at least three people who know the candidate well, but are not related to the candidate.
The mission of the Graduate School at the University of Missouri is to advocate for, support, and advance graduate and postdoctoral education. For more information about the Graduate School please go to: https://gradschool.missouri.edu/

Honors College

The Honors College is a community of motivated and high-achieving students from all the undergraduate colleges at the University of Missouri. The Honors College offers an innovative and dynamic curriculum that encourages in-depth study in traditional fields of learning as well as other kinds of intellectual inquiry, including interdisciplinary and experiential learning. The College fosters scholarly engagement through research opportunities, study abroad, internships, and other experiences that expand learning beyond the classroom. Students receive personalized advising through a team of professionally-trained advisors.

The Honors College gives honors students maximum flexibility to serve their individual interests. Honors courses, taught by many of the university’s best professors, encourage close interaction between students and faculty and allow students to experience a small-college atmosphere within a large research university.

Opportunities in the Honors College are described below.

Honors Curriculum

Honors courses offered through the Honors College are listed in the University Catalog. The Honors College also offers the following alternative ways by which to earn Honors Credit:

- Honors Learning-by-Contract. This arrangement allows honors students to take a non-honors course for honors credit by completing additional or alternative work. To do an Honors Learning-by-Contract, students must enter into a contractual agreement with a professor and gain approval from the director of the Honors College.
- Honors Credit via Graduate Course Work. Honors students may earn credit toward the Honors Certificate by taking graduate-level classes.
- Honors Credit via Study Abroad. Up to six hours of study abroad credit completed while a student at MU can be considered as honors credit.
- Honors Courses offered through individual departments. These include special topics courses and honors sections of regularly-offered courses.
- Research and other independent-study types of courses, offered both through departments and the Honors College.

Honors course information and course application forms can be found on the Honors College website. (https://honors.missouri.edu/current-students/courses/)

Special Programs and Services

Advising

The Honors College offers one-on-one academic advising for all honors students.

Honors Housing

The Honors Learning Community fosters a living and learning space that enriches intellectual and social stimulation and encourages residents to succeed academically and socially during their time at the University of Missouri. Honors Freshman Interest Groups (FIGs) are available in a number of interest areas.

Honors College Admissions

Interested students are encouraged to visit our website (https://honors.missouri.edu/admission/) for more information on how to apply and on the profile of a “typical” successful Honors applicant, as well as the required materials for admission—including official transcripts, official score report, essays, and more. The Honors College does not accept applications from conditionally admitted students. A student must be fully admitted to MU, by our required deadlines, before Honors will consider their application.

Program Requirements

Maintaining Honors Eligibility

GPA Requirement

To retain membership in the Honors College, students must maintain an MU cumulative GPA of 3.5 or above. Students with an MU cumulative GPA below 3.5 will receive a warning letter the first semester in which this occurs. Students with an MU cumulative GPA below 3.5 for a second consecutive semester will no longer be members of the Honors College. Students with a cumulative Mizzou GPA below 3.0 will be removed immediately.

Participation Requirement

Students are required to complete two honors courses per year for their first two years at MU. All honors courses will count toward this requirement, including honors-designated courses and Honors Learning-by-Contract.

Honors Certificate Requirements

Students who complete 24 or more hours for honors credit and maintain a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate. In addition to General Honors and Departmental Honors course credits, the 24 hours may include up to 6 hours of honors transfer credit, 6 hours of approved study abroad credit (form required), 8 hours of Learning-by-Contract credit, and 8 hours of approved graduate credit (form required). Students must achieve a minimum letter grade for each course: a C or better for regular honors credit completed while a student at MU can be considered as honors credit, a 3.5 cumulative GPA (as calculated after final grades are posted at the end of the semester in which the student is graduating) are eligible to graduate with an Honors Certificate.

Honors Certificate Application

Students must apply for the Honors Certificate by completing the application (https://honors.missouri.edu/graduating-with-honors/honors-certificate-application/). In order to participate in the Honors Convocation, students must apply no later than the end of their permanent transcript. See your departmental advisor for information about departmental honors programs.

University Honors Designation

Students who complete the Honors Certificate and a qualified departmental honors program (https://honors.missouri.edu/graduating-with-honors/) will be eligible for this designation, which will be noted on their permanent transcript. See your departmental advisor for information about departmental honors programs.

Faculty

There are faculty from all disciplines who teach Honors College courses.
Certificate in General Honors

Students who complete 20 or more honors credit hours and have a 3.3 MU GPA may graduate with general honors. The General Honors Certificate is noted on a student's final transcript. Up to six hours of departmental honors courses, six hours of transfer honors courses, and six hours of Learning by Contract courses may be used toward the 20 hours. In order to receive honors credit for an honors designated course, you must earn a "C" or better.

Upon completion of the 20 hours of honors course work, students must apply for their honors certificate. Graduating students must apply for their honors certificate by mid-semester to graduate with general honors and to have the notation on their transcript.

For additional information on the certificate, contact:
MU Honors College
211 Lowry Hall
Columbia, MO 65211
phone: 573-882-3893
fax: 573-884-5700
email: umchonorscollege@missouri.edu
website: http://honors.missouri.edu/contact (http://honors.missouri.edu/contact/)

Interdisciplinary Academic Programs

MU offers a number of academic degree programs that are planned, administered and taught collaborative by faculty from numerous disciplines. Those interdisciplinary programs are enumerated in this section of the catalog.

Academic Medicine

A Master of Science in Academic Medicine (post-doctorate) is offered by the Department of Family and Community Medicine in the College of Medicine. Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents, and licensed to practice in a primary care specialty.

Faculty

Assistant Professor K. Craig, D. Howenstine, P. Koopman, J. McElroy*, L. Morris, A. Swenson, S. Swofford, P. Tatum III*

Research Professor D. Oliver*

Associate Research Professor K. Hoffman*, R. L. Kruse*

Professor Emeritus R. L. Blake Jr.*, J. M. Colwill*

* Graduate Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Academic Medicine, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

In addition there are a number of online elective courses that may be substituted upon approval of the faculty advisor.

Admissions

Applicants must be graduates of an accredited medical school, U.S. citizens or permanent residents and licensed to practice in a primary care specialty.
Application Deadline
This program accepts rolling admissions, so you can apply at any time. We recommend you submit your application at least six weeks before the beginning of the term in which you wish to start your course work.

Admission Criteria
- Board-certified or board-eligible physicians who have already received MD, DO, MBBS or equivalent degrees may apply. Typically, physicians have completed residency training in their primary specialty prior to enrollment, but current residents may apply with the permission of their program director.
- Physicians in clinical or academic fellowship programs (or both) are also welcome to apply. Prospective students with other doctoral and graduate degrees will also be considered.
- If English is not your native language, please submit a TOEFL (http://www.ets.org/toefl/) score of at least 80 (internet-based test) or an IELTS (https://www.ielts.org/) score of at least 6.5.
- This program accepts rolling admissions, so you can apply at any time. We recommend you submit your application at least six weeks before the beginning of the term in which you wish to start your course work.

Required Application Materials
Submit the following via the online application (https://applygrad.missouri.edu/apply/):
- Transcripts of all previous college or university education. Upload unofficial transcripts in your online application. If you are accepted, you will be asked to provide official transcripts.
- Two letters of recommendation. In the online application, you will need to supply names and contact details of two professionals who can attest to your critical thinking, analytical and writing skills, demonstrating your potential as a graduate student and professional.
- Personal statement of research goals and interests.
- Curriculum vitae or résumé.
- Verification from residency program or other relevant post-graduate training.
- TOEFL or IELTS score reports for applicants whose native language is not English.
- A personal phone interview.

Carefully follow the instructions on the Graduate School's (https://applygrad.missouri.edu/apply/) application site.
- Upload the above documents in the online application site. Use the following information to complete your application:
  a. Application type: Master’s Program.
  b. Degree/Delivery: Masters - Distance (Online/Remote Site/etc.)
  c. Academic Program: Academic Medicine-Distance (MS)
  d. TOEFL or IELTS scores: Institution Code 6875 (if applicable).

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.

This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students’ home countries or with foreign clients doing business in the U.S.

Faculty
- Professor R. Gely*, J. Lande*, R. Uphoff*
- Associate Professor C. Conklin*, D. Crouch*, S.I. Strong*
- Adjunct Assistant Professor J. Levin*
  a. Graduate Faculty Member - membership is required to teach graduate-level courses, chair master’s thesis committees, and serve on doctoral examination and dissertation committees.
  b. Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate
While MU does not offer undergraduate degrees specifically in American Law. The University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options.

Graduate
- LLM in American Law (p. 762)

About the American Law Program
This program will provide an introduction to the American legal system and U.S. legal practice for students who received their first degree in law outside the United States. It will help prepare students for a U.S. bar exam, for U.S. law practice, or to work with U.S. clients in the students’ home countries or with foreign clients doing business in the U.S.

Create new opportunities for both LL.M. and J.D. students.
LLM in American Law

Graduates of the LLM in American Law program should:

- Possess substantial knowledge of the legal system in the United States
- Possess substantial knowledge in legal analysis and reasoning, legal research, problem solving, and oral communication as practiced in the U.S. legal community
- Understand the goals, structure, values, rules, and responsibilities of the U.S. legal profession and conduct their legal practice in a professional and ethical manner
- Possess the lawyering skills generally regarded as necessary for effective and responsible participation in the U.S. legal profession
- Possess substantial knowledge in areas of the law considered to be foundational for admission to the bar, and for the practice of law in the United States

Degree Requirements

The LLM in American Law is a 24 credit hour program. There will be three core required courses - Overview of the U.S. Legal System, Legal Research and Writing, and Professional Responsibility. Elective courses will be selected from the existing J.D. or LL.M. curriculum. This will provide flexibility for students to customize study in any number of fields in the law school such as intellectual property, commercial law, international law, tax, environmental law, and employment law.

Program open only to international students who have their first degree in law from an institution outside the U.S.

Biomedical Sciences

The study of biomedical sciences includes the major disciplines of:

- anatomy (gross or microscopic)
- physiology/pharmacology (molecular, cellular and integrative)
- biochemistry/molecular biology
- endocrinology
- toxicology

Specific areas of interest are exercise biology including cardiac, vascular and muscle biology; cardiovascular biology including neuroendocrine regulation; membrane transport biology including cystic fibrosis and cardiac disease; and reproductive biology including environmental estrogen toxicities and developmental processes.

All of the biomedical sciences degrees at MU are at the graduate level, and within two very distinct programs. See the Graduate tab for details on these options.

For undergraduate students interested in studying biomedical sciences, there are more than two dozen courses taught at the undergraduate level. See the Courses tab for details on these options.

Adjunct Professor M. B. Brown*, V. H. Huxley, S. S. Segal**
Undergraduate

While MU does not offer undergraduate degrees specifically in biomedical sciences, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

- **MS in Biomedical Sciences** (p. 764)
  - with emphasis in Biomedical Sciences (Biomedical Sciences Area program) (p. 763)
  - with emphasis in Comparative Medicine (post DVM degree only) (Veterinary Medicine program) (p. 764)
  - with emphasis in Pathobiology (Veterinary Medicine program) (p. 766)
  - with emphasis in Veterinary Medicine and Surgery (Veterinary Medicine program) (p. 766)
  - with emphasis in Veterinary Sciences (Veterinary Medicine program) (p. 767)
  - PhD in Biomedical Sciences (Biomedical Sciences Area program) (p. 768)

An Array of Biomedical Degrees Offered

The University of Missouri offers several degree program options in Biomedical Sciences:

- The **Biomedical Sciences Area Program** offers a master’s program in basic biomedical sciences and a PhD area program. Dual biomedical-DVM degrees are other options. Students in the Biomedical Sciences Area Program do not have to be enrolled in the College of Veterinary Medicine.

- The Graduate School also confers three MS degrees related to veterinary biomedical sciences. Available emphasis areas are (a) comparative veterinary medicine, (b) pathobiology and (c) veterinary medicine and surgery. Generally, applicants to these biomedical degree programs are concurrently enrolled in College of Veterinary Medicine or have previously earned a Doctorate in Veterinary Medicine (DVM).

Additional Program Options

Pathobiology

The Pathobiology Area Program offers a PhD in Pathobiology (p. 804).

DVM/Graduate degree in Biomedical Sciences

The Biomedical Sciences graduate programs enable veterinary medical students to pursue studies in the basic biomedical discipline of their choice for a PhD or MS degree while enrolled in the College of Veterinary Medicine. The program is designed to prepare students for advanced professional careers in universities and colleges, research institutes and industrial research.

With consent of the student’s graduate program committee, courses from the professional curriculum (which includes a major portion of the core curriculum) can be accepted toward the graduate degree.

Master of Science: The MS/DVM program enables veterinary medical students to complete a master’s degree while enrolled in the College of Veterinary Medicine. The program allows qualified students to seek in-depth involvement in the basic biomedical discipline of their choice. Six hours of 9090 Research that result in an original thesis are required. Financial support may be provided to VM2-4 students through teaching assistantships in gross anatomy laboratory (V_BSCI 5500 Veterinary Anatomy with Laboratory).

Doctor of Philosophy: The PhD/DVM program requires a minimum of 30 credit hours of 9090 Research culminating in completion of original research and defense of a written dissertation.

Major biomedical disciplines include anatomy of domestic species (gross or microscopic); physiology/pharmacology (molecular, cellular and integrative); biochemistry/molecular biology; endocrinology; and toxicology. Specific areas of interest are exercise sciences; cardiovascular and neurosciences; muscle biology; membrane transport biology; reproductive biology; and developmental toxicology.

Admission Contact Information

Kevin J. Commings (cumingske@missouri.edu), PhD
Associate Professor
E102 Veterinary Medicine Building
(573) 882-0283

http://biomed.missouri.edu/

MS in Biomedical Sciences with Emphasis in Biomedical Sciences

The MS in Biomedical Sciences with emphasis in Biomedical Sciences provides in-depth training to prepare scientists in interdisciplinary basic research (molecular, cellular, organ and integrative). Departmental faculty members represent diverse Medical-related basic science disciplines that provide a unique opportunity for biomedical research training. Core courses include physiology, cell biology and an introduction to research methodology. The multidisciplinary focus of the program is also emphasized in the candidate’s MS program committee.

Degree Requirements

To attain the master’s degree, 30 hours of graduate credit must be completed.

- 15 hours or more must be at the 8000 level (exclusive of research, problems and independent study courses)
- 6 to 9 hours of 8090 Research.
A grade of 3.0 or better is required in all core courses and serves as the qualifying examination for the degree.

In addition to the departmental core courses, students may take courses specifically planned to meet the needs and strengths of the individual.

Evaluation
The master's candidate is evaluated semiannually for satisfactory rate of progress as defined by timely completion of course courses and progress on research activities as stipulated by the master's program committee. The master's candidate must carry out original research culminating in a written thesis, present the thesis work at a departmental seminar and defend the thesis in an oral examination by the master's program committee.

Length of Study
The time limit for the master's degree is five years after initiating the program.

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: January 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:
  - Internet-based test (iBT): 100
  - Paper-based test (PBT): 600
- Minimum TOEFL scores:
  - When did you take the GRE?
    - Prior to August 1, 2011: 300
    - On or After August 1, 2011: 300
- Minimum GRE scores:
  - Verbal + Quantitative
    - Prior to August 1, 2011: 3.5
    - On or After August 1, 2011: 3.5
- Required prerequisite courses: Biology (10 hrs), Physics (3 hrs), Biochemistry (3 hrs), Chemistry (10 hrs), Calculus (3 hrs)

NOTE: The GRE requirement may be waived for applicants with an MD or DVM. Prerequisite courses may be completed during the master's program.

Required Application Materials

To the Graduate School:
- All required Graduate School documents

To the Biomedical Sciences MS Program:
- Program-specific application
- Letter of intent
- GRE scores
- Copy of transcripts
- 3 letters of recommendation

MS in Biomedical Sciences

Students in the MS in Biomedical Sciences must select an emphasis area. Emphasis Areas are housed both in the Biomedical Sciences Area program, and in Veterinary Medicine. Below are the general requirements for a Master's degree at the University of Missouri.

Degree Requirements
To attain the master's degree, 30 hours of graduate credit must be completed.

- 15 hours or more shall be 8000 level (exclusive of research, problems and independent study courses)
- minimum GPA of 3.0 or above

MS in Biomedical Sciences with Emphasis in Comparative Medicine (post DVM)

About This Degree

The University of Missouri Comparative Medicine Program provides advanced graduate training to veterinarians who wish to pursue careers in comparative medicine. Trainees may combine one year of residency training in clinical, administrative and diagnostic laboratory animal medicine with two or more years of research training. Training is designed to prepare individuals for a variety of careers including comparative medicine research and laboratory animal medicine/collaborative research. Students may either pursue an MS or PhD. Research opportunities are available in several areas including infectious disease, reproductive biology, genetics, metagenomics, biomedical engineering, cancer and cardiovascular physiology. Resources available include the University of Missouri Office of Animal Resources (OAR), the Laboratory of Infectious Disease Research (LIDR), Mutant Mouse, Rat and Swine Resource and Research Centers, MU's Metagenomics Center and Animal Modeling Core, and IDEXX BioAnalytics, an internationally known research animal diagnostic laboratory.

Programmatic Strengths

- The opportunity for comparative studies in a joint veterinary and human medical environment
• The multidisciplinary nature of the faculty participating in the training program
• The potential to couple training in research with residency training in laboratory animal medicine, comparative pathology, diagnostics, and training toward board certification
• Strong research resources including AAALAC-accredited research animal facilities, a full-service, internationally-recognized research animal diagnostic laboratory, a BSL-3 infectious disease research facility and NIH-funded research resource centers for mice, rats and swine
• A long history of successful training in comparative medicine

Class Size and Resources
Typically there are 10-12 postdoctoral trainees in the program at a given time. Networking and sharing of experiences and cooperation among trainees is an important factor in the success of the program.

Degree Requirements
The CMP emphasizes comparative medicine research training and includes graduate course work. The minimum number of credit hours required is 30 for the MS.

Research training is performed under an established investigator in one of several life science departments on the MU campus. Research typically deals with the application of an animal model in the investigation of human diseases or the study of naturally occurring diseases of laboratory animals. Requirements for elective course work, residency and teaching experience are determined with the student’s advisory committee. Trainees also participate in teaching and instructional programs offered to veterinary students and research personnel.

The five required core courses for this program are listed below. Trainees also participate in weekly seminar and rounds. Elective courses can be taken to supplement the trainee's interests.

The MS degree requires the completion of a significant first author manuscript suitable for publication in a refereed journal, or an approved equivalent scholarly effort as judged by their MS graduate committee. For board certification eligibility, the manuscript must meet criteria established by the American College of Laboratory Animal Medicine (ACLAM).

Residency
For trainees enrolled in the combined graduate/residency program, residency rotations are performed during the first year of training and research training occurs in years two and three.

Residency rotations include:
• clinical medicine and animal resource management in the Office of Animal Resources (OAR)
• colony management, diagnostic, comparative and research pathology in the Mutant Mouse Resource & Research Center (MMRRC) and Rat Resource and Research Center (RRRC)

Moving to a PhD Program
Trainees desiring to change to a PhD program have the opportunity to do so in a variety of programs including the Pathobiology Area Program.

Admission Criteria
• Candidates must have a DVM or VMD degree (or equivalent) from an accredited college of veterinary medicine or successful completion of the foreign equivalency examination.
• Candidate must have or be pursuing a license to practice veterinary medicine in the state of their choice. The majority of funded slots require US citizenship or permanent residency.
• Applicants to the MU CMP must first apply through the Veterinary Internship & Residency Matching Program (VIRMP). Requirements and deadlines are updated annually and can be found at https://www.virmp.org/
• Application to the VIRMP typically begins mid-October and ends in early December. However, PLEASE NOTE that Laboratory Animal Medicine (LAM) training programs require a deadline in early November. Deadline specifics can be found in LAM training program descriptions.
• The CMP reviews applications in mid-November and invites selected candidates for interviews in early December. For candidates invited to interview with the MU CMP, it is highly recommended that you participate; therefore, you are encouraged to save these dates. Conflicts for invited candidates who absolutely cannot attend the interview will be addressed on an individual basis.
• Candidates who match with the CMP through VIRMP process must then apply to the MU graduate school and thus must also meet all graduate school requirements.

Required Application Material
To the CMP Postdoctoral MS Program:
• The CMP uses the Veterinary Internship and Residency Matching Program (see above). Candidates must match through VIRMP before applying to the MU Graduate School.

To the Graduate School:
• All required Graduate School documents.

Admission Contact Information

MS in Biomedical Sciences with Emphasis in Pathobiology

About the Program
The College of Veterinary Medicine offers a Master of Science degree in biomedical sciences with a specialization in veterinary pathobiology and/or laboratory animal medicine, which is administered through the Department of Veterinary Pathobiology.

Degree Requirements
The degree requires 30 credit hours of work including courses, seminars, research, and problems courses. The program includes research in a particular field and defense of a thesis which embodies the results of this work. Certain areas of emphasis require submission of a formal master’s thesis while others require preparation of a publishable manuscript.

Admission Criteria
- Fall deadline: no deadline
- Spring deadline: no deadline
- Summer deadline: no deadline
- Undergraduate GPA of last 60 credit hours: 3.0
- Designated faculty mentor

International Applicants:
Minimum TOEFL score:

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

Required Application Materials

Graduate School
- All required Graduate Admissions documents https://gradschool.missouri.edu/admissions/

Veterinary Pathobiology Program:
- Official Transcripts
- Letter of support from mentor
- CV
- Statement of Purpose
- 3 letters of recommendation (can be submitted through the Office of Graduate School online application as well)

PhD in Pathobiology
For admission information about the doctorate of philosophy (PhD) in Pathobiology, refer to Pathobiology Area Program in this catalog.

Director of Graduate Studies: Jerod Skyberg

MS in Biomedical Sciences with Emphasis in Veterinary Medicine and Surgery

About the Program
The College of Veterinary Medicine, through the Department of Veterinary Medicine and Surgery, offers graduate work leading to the master of science degree in veterinary biomedical sciences with an emphasis in veterinary medicine and surgery. Many but not all graduate students in this area of study combine their graduate degree training with clinical residency programs leading to board certification in some specialty field within veterinary medicine. The program provides advanced training in anesthesiology, comparative cardiology, equine, food animal and companion animal medicine and surgery, neurology, oncology, comparative ophthalmology, radiation oncology, radiology, nutrition, and theriogenology among other areas. The goal of the Veterinary Medicine and Surgery emphasis area graduate degree-training program is to prepare individuals for investigative careers as specialists in veterinary medicine or as researchers in academia, industry, or governmental settings.

Degree Requirements
Master's degrees will be conferred on candidates admitted to the graduate degree program who satisfy the general requirements of the MU Graduate School and the specific requirement of the graduate program. Requirements include:

Advisors and the Advisory Committee
Formulating a plan of study is the joint responsibility of the student, the advisor and the student’s advisory committee. An advisory committee of at least three faculty members should be chosen during the first semester of enrollment. The advisory committee offers guidance and is responsible for approving a definitive plan of study.

The advisory group should consist of the major advisor and appropriate faculty members from the department, and at least one other member from another department within the college or university. Members of this committee may be recommended later for appointment to the examining committee. Members of the final examination committee should be chosen in the same manner as the advisory committee.

Resources and Facilities
Graduate students have ready access to clinical patients, medical records and facilities of the Veterinary Medical Teaching Hospital to aid them in clinical research. The college has its own library. More detailed information regarding the emphasis area of veterinary medicine and surgery can be found at the website http://www.cvm.missouri.edu/VMS/index.htm (http://www.cvm.missouri.edu/VMS/)

Financial Aid from the Program
Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program Web site or ask the program contact for details.
Admissions

Admission Criteria

Fall deadline: n/a

• Completion of a bachelor’s or professional degree.
• Identification of a mentor with graduate faculty standing within the Department of Veterinary Medicine and Surgery.
• Identification of funding (with advice of mentor) for the period of research and study.
• Minimum TOEFL score (when appropriate):

<table>
<thead>
<tr>
<th>Internet-based test (iBT)</th>
<th>Paper-based test (PBT)</th>
</tr>
</thead>
<tbody>
<tr>
<td>80</td>
<td>550</td>
</tr>
</tbody>
</table>

• Minimum GRE score: 292; 146 in verbal and 146 in quantitative. Minimum scores should be considered as guidelines not a guarantee of admission.
• Approval of admission by the Departmental Graduate Committee.

Departmental Graduate Committee approval will be determined by perceived likelihood of successful completion of the program as based on the academic qualifications of the candidate, match of candidate and faculty advisor, and when requested, a minimum of 3 suitable letters of recommendation.

The majority of MS students within our program are completing specialty residency training programs in some field of veterinary medicine simultaneously with the MS degree. Admission to these programs generally precedes admission to our graduate programs. The GRE requirement may be waived for exceptional students by the Veterinary Medicine and Surgery Departmental Research and Graduate Studies Committee. Applicants may be asked to strengthen any deficiencies in prerequisites to the chosen area of concentration through enrollment in a post- or non-degree graduate student program.

Required Application Materials

To the Graduate School:

• All required Graduate Admissions documents

To the Veterinary Medicine and Surgery Emphasis Program:

• GRE scores

Contact: Connie Sievert

Director of Graduate Studies: Leah Cohn

MS in Biomedical Sciences with Emphasis in Veterinary Sciences

Degree Requirements

• Completion of all graduate work attempted at MU with a GPA of 3.0 or better.

• A minimum of 30 semester hours of graduate course credit, including at least 15 hours of graded, 8000-level course work. No more than 40% of the 30-hour credit requirement can be satisfied be Research, Readings, and Problem Courses.

• As part of their program of study during their enrollment in the Veterinary Medicine and Surgery (VMS) graduate degree program, graduate students must receive a passing grade from an approved graduate-level experimental design or statistics course. Following a request by the student’s major advisor, this requirement may be waived by the departmental graduate studies committee for those students who have successfully completed a similar course previously.

• All VMS graduate students must submit a report of progress and plans regarding their degree program to the Departmental Graduate committee by April 30 of each year they are enrolled in the program. This report must be derived from the outcome of at least one annual meeting of their graduate degree committee and must be signed by their major advisor. The Annual Review of Graduate Student Progress will be used by students and committees to satisfy these requirements.

• The Departmental Graduate committee will review all reports and will schedule meetings with students and their advisors if deficiencies are noted. Failure to comply may result in disqualification of the student. The major advisor will be disqualified from receiving internal discretionary grant funds during the following calendar year.

• Completion of a thesis describing original investigative research completed by the candidate. Detailed guidelines for preparation of the thesis are available through the Graduate School.

• Documentation of a passing evaluation on the defense of the thesis work by an examination committee (make-up of the committee is described in the graduate catalog) as well as demonstration of mastery of the fundamental principles of the work included in the course of study for the degree.

• The candidate must be enrolled at MU in the semester when their thesis work is defended.

• The master's degree must be completed within eight years of enrollment from the time the student is accepted into the degree program.

Advising and Support Services:

Director: C.B. Chastain, DVM, MS, DACVIM, Professor
Administrative Assistant: June Kelly, Administrative Associate I
PhD in Biomedical Sciences

About the Doctoral Degree Program

The Biomedical Sciences Area PhD is a multidisciplinary program that integrates molecular, cellular and systemic biology within the context of biomedical research. The program provides the student with the background to investigate questions relevant to the Medical sciences at the integrative, molecular or cellular level and to relate the findings to mammalian physiology. Training in both fundamental and state-of-the-art research methodologies help students develop the skills necessary for competitive biomedical research. The program is administered through the Department of Biomedical Sciences (College of Veterinary Medicine) that has research faculty representing a diversity of medical-related basic science disciplines, including anatomy, biochemistry, histology, pathology, molecular biology, physiology, pharmacology and toxicology. The program offers a rich environment for graduate study and a unique opportunity for training scientists in comprehensive interdisciplinary research.

Degree Requirements

To attain the PhD degree, 72 hours of graduate credit must be completed, including 15 hours or more at the 8000/9000 level (exclusive of research, problems and independent study courses).

The core curriculum includes:

- physiology (10 credit hours)
- biochemistry/cell biology or histology (4 or 5 credit hours, respectively)
- multidisciplinary approaches to biomedical research (2 credit hours)
- departmental seminar (2 credit hours)

Minimum of 1 additional 7000-level course in each of the following areas:

- molecular biology
- cellular biology
- integrative biology

Rate and Quality of PhD Progress

A grade of 3.0 or better is required in the core curriculum and serves in lieu of a qualifying examination for the degree. The choice of additional courses will be made individually by the student in consultation with his/her advisor and doctoral program committee. Following completion of the plan of study, candidates for the PhD degree must pass a comprehensive examination designed by the doctoral program committee that reflects an understanding of the multidisciplinary approach to biomedical research. The PhD candidate is evaluated semiannually by a faculty committee to ensure a satisfactory rate of progress as defined by timely completion of core courses and productivity in research activities as stipulated by the student’s doctoral program committee. The PhD candidate must carry out original research culminating in a written dissertation, present the dissertation work at a departmental seminar and defend it in an oral examination given by the doctoral program committee. The program for the PhD degree must be completed within five years of passing the comprehensive examination.

Financial Aid from the Program

Some programs require an extra form or statement from those who wish to be considered for internal assistantships, fellowships or other funding packages. Check the program website or ask the program contact for details.

Admission Criteria

- Fall deadline: December 15
- Spring deadline: September 15
- Summer deadline: Not Applicable
- Minimum TOEFL scores:

Data Science and Analytics

Data Science is an emerging discipline that, by its nature, integrates traditional disciplines. The degree program leverages prior investments in the computing disciplines across campuses and colleges within each campus. The MU Institute for Data Science & Informatics coordinates this collaborative degree program with other MU departments to deliver hands-on, problem-based learning, core, and emphasis area courses. The learning objectives for these novel courses were informed by our industry review board and are taught by dedicated faculty that support a high-touch, interactive learning environment.

The confluence of big data, massively powerful cloud computing platforms, and need of businesses from all sectors to leverage their data repositories has created a high-growth environment and demand for data scientists. Data scientists routinely leverage tools and techniques from computer science, information systems, advanced statistics, and machine learning. To satisfy the growing need for data scientists who can transform large collections of data into actionable decision making products for their employers, we are offering the Master of Science in Data Science and Analytics.
This multidisciplinary Data Science and Analytics (DSA) degree program consists of 34-credit hours of learning that can be completed on-campus or as an executive online program. The online students will visit campus one time each academic year for an intensive on-site learning experience. The academic program has 19 credit hours of core, fundamental data science courses; followed by 9 credits of emphasis area-specific courses (Geospatial, BioHealth Analytics, High-Performance Computing, Human-Centered Science Design, Data Journalism & Strategic Communication) and 6 credits of industry-relevant case studies and capstone project courses.

Faculty

Associate Professor: S. Khan*, T. Matisziw**, B. Reeder*, J. Uhlmann**
Assistant Professor: M. Kearney**, G. Scott**
Teaching Professor: L. Ries*
Assistant Teaching Professor: E. Garwood*, KSM Tozammel Hossain*,
Professor, Professional Practice: D. Herzog*, J. T. Stemmle*
Post-Doctoral Fellow: I. Ersoy*
Adjunct Instructor: C. Bottoms, T. Green, W. Spollen
* Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.
** Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in Data Science and Analytics, the University does offer baccalaureate opportunities in a number of related areas.

A listing of current degree programs can be found here (p. 20).

Graduate

- MS in Data Science and Analytics (p. 769)
  - with emphasis in BioHealth Analytics (p. 770)
  - with emphasis in Geospatial Analytics (p. 770)
  - with emphasis in High Performance Computing (p. 770)
  - with emphasis in Human Centered Science Design (p. 771)
  - with emphasis in Strategic Communications and Data Journalism (p. 771)
- Graduate Certificate in Data Science and Analytics (p. 771)

Instruction Cyberinfrastructure

The DSA program is continually expanding its internal Big Data infrastructure, including Hadoop/Spark clusters, Kubernetes and Docker containers for scalable compute, and a variety of database technologies (relational, NoSQL, graph, geospatial, etc.). All of these technology interactions are facilitated from our customized JupyterHub environment, allowing students to conduct hands-on learning using Jupyter Notebooks online at the time and pace of their choosing. In addition, students learn to utilize a rich collection of programming APIs, including cutting-edge machine learning (TensorFlow, Scikit-Learn, SparkML, etc.) as well as cloud computing (boto3, etc.)

MS in Data Science and Analytics

Graduates will be able to individually acquire and stage large data sets, design and conduct experiments, and analyze results for complex data analytical problems using their foundational and specialized data science tools and techniques; taking a problem from conceptualization stage through to the production of data-derived business intelligence.

The special skills the graduating students will acquire or possess include:

- Real-world experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.
- A clear understanding of the ethics and security mechanisms required to safeguard large-scale data collections that contain sensitive and critical information.
- A comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.
- A solid foundational understanding of database systems, database design, and information retrieval; allowing exploitation of a broad spectrum of data repositories and streaming data systems.
- A demonstrated ability to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods. Students will be able to convey the meanings behind specific data analysis techniques to audiences of various technical knowledge.
- Training in the latest data analytic methods and tools; including fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built (machine learning, pattern recognition, data mining, etc.).
- Specialized, advanced training in a chosen emphasis area, such as BioHealth Analytics, High-Performance Computing, Strategic Communications/Data Journalism, Human-Centered Science Design, or Geospatial Analytics.

Degree Requirements

All students will take ‘Core Courses’ that will provide a foundation of knowledge and an introduction to state-of-the-art technology in Big Data, database design, data ethics, and visualization of high-dimensional and high-volume data.

To understand real-world Big Data issues in context, students will select three courses in an emphasis area. These elective courses will support in-depth analyses and training on data analytic techniques, issues, and problems students will face within a given emphasis area. Students will take a Case Study course to gain hands-on experience with large data sets and use the relevant technology and techniques. A Capstone project will enable students to refine and demonstrate knowledge and skills learned throughout the program. Both courses will provide students with mentoring from faculty, as well as insight from industry partners.

Total Credits: 34

**MS in Data Science and Analytics with Emphasis in BioHealth Analytics**

**Degree Requirements**

In addition to the core program objectives (p. 769), graduates of the Masters of Science in Data Science and Analytics who pursue the BioHealth Analytics emphasis area will achieve the following educational objectives:

- Students will be able to possess an in-depth understanding of the data analytics needs in biotechnology and healthcare industries in the US and worldwide;
- Students will develop hands-on skill sets in understanding and processing multi-omics data and public/population health data, as well as large-scaled electronic health records;
- Students will have the ability to practice their analytic skill sets to applications in areas such as, agriculture, animals, and human healthcare, through case studies and capstone projects;
- Students will be able to visualize and interpret their data analytic results with actionable plans in biotech and healthcare industries.

**MS in Data Science and Analytics with Emphasis in Geospatial Analytics**

Graduates of the Master of Science in Data Science and Analytics who pursue the Geospatial Analytics Emphasis Area will achieve the following educational objectives, in addition to the core program objectives (p. 769) while becoming immersed in Geospatial Big Data computational ecosystems:

- Students will have a firm understanding of the structure of spatial data and its integration with spatial analysis tools. Students will develop a robust understanding of the caveats that can be encountered in geospatial data structures and analysis.
- Students will have a firm understanding of geospatial data structures such as vector and raster data and their use in data analytics.
- Students will develop expertise in designing, managing, accessing, and manipulating geospatial data repositories.
- Students will gain knowledge and experience with the exploitation of geospatial data that is stored in a variety of formats and source locations, as well as experience developing geospatial visualizations of data, blending multiple geospatial data layers as well as non-spatial data.
- Students will have a solid understanding of the basic concepts, principles, and techniques in remote sensing.
- Students will understand the spatial and spectral characteristics of remote sensing data for passive, active, thermal, and other sensor phenomenologies.
- Students will have an ability to acquire and exploit remote sensing data using a variety of tools and techniques for real-world applications.

**Degree Requirements**

Students will need to complete the core program objectives (p. 769) in addition to the emphasis area electives below.

**MS in Data Science and Analytics with Emphasis in High Performance Computing**

In addition to the core program objectives (p. 769), graduates of the Master of Science in Data Science and Analytics who pursue the High Performance Computing (HPC) emphasis area will achieve the following educational objectives, in addition to the core program objectives while becoming immersed in Big Data computational ecosystems:

- Students will have an in depth understanding of the state-of-the-art technologies which enable big data analytics and high performance computing; such that they can successfully investigate the data analysis problems presented in their work.
and analytical needs, then guide the decision making process on deployments into HPC infrastructure.

• Students will acquire knowledge to exploit cloud-based computing infrastructure, including virtualization, distributed architectures, on-demand resource scaling, container technology, and other cloud-based computing concepts in support of Big Data management, processing, and analytics.

• Students will have a thorough understanding of advanced technologies and techniques in Big Data analytics, which facilitate the extraction of new data intelligence using state-of-the-art, leading analytical platforms.

• Students will gain a solid understanding of techniques for exploiting advanced co-processing hardware, including graphics processing units (GPU) and many-core units (e.g., Intel Phi) to achieve cost effective, massively parallel data analytics.

**Degree Requirements**

Students will need to complete the core program objectives (p. 769) in addition to the emphasis area electives below.

**MS in Data Science and Analytics with Emphasis in Human Centered Science Design**

In addition to the core program objectives (p. 769), graduates of the Masters of Science in Data Science and Analytics who pursue the Human-Centered Science Design emphasis area will achieve the following educational objectives:

• Students will develop a deep understanding of the theoretical foundations and hands-on experience necessary to understand the strengths and limitations of different analytical methods.

• Combines both the technical (databases, social networking, data mining, and text mining) and social (economic, ethical, policy, and political) aspects of data analytics.

• Students will build an understanding of the complex interplay between the decisions made during the collection, curation, and transformation steps in the information lifecycle, and their impact on the analytical methods that should be employed.

**Degree Requirements**

Students will need to complete the core program objectives (p. 769) in addition to the emphasis area electives below.

**MS in Data Science and Analytics with Emphasis in Strategic Communications and Data Journalism**

In addition to the core program objectives (p. 769), graduates of the Masters of Science in Data Science and Analytics who pursue the Strategic Communication and Data Journalism emphasis area will achieve the following educational objectives:

• Students will have in-depth capabilities and understanding of big data management, including gathering and interpreting customer and viewer behavior patterns and developing strategies to enhance marketing objectives for organizations and clients.

• Students will have highly marketable skills in analyzing media markets and will be able to develop sophisticated methodologies to optimize usage of apps, social networks, and other technologies for media businesses and brands.

• Students will be able to apply their analytic skills to understanding and optimizing patterns of search, programmatic advertising buying and behavioral targeting.

• Students will have a deep understanding of issues of privacy and ethics in obtaining and utilizing data from a broad range of sources.

• Students will be able to obtain and analyze publicly available data in a variety of structured and unstructured formats. As such, they will develop an understanding of open-records laws and how to effectively use them.

• Students will develop the skills necessary to work as a data journalist for a news organization.

• As data journalism and data science/analytics are constantly evolving, students will develop strategies that enable them to continue to learn on the job.

• Students will develop an understanding of their audiences and how to best communicate with them.

**Degree Requirements**

Students will need to complete the core program objectives in addition to the emphasis area electives.

**Graduate Certificate in Data Science and Analytics**

The objective of the Graduate Certificate in Data Science and Analytics is to enable students from multiple different graduate programs at the University of Missouri to receive education and training in the emerging field of Data Science. Data science skills are increasingly necessary for
all fields of advanced study due to the emergence of large scale data and the incumbent challenges across academia and industry.

At the conclusion of the Graduate Certificate in Data Science and Analytics, students will:

1. Have experience in applying state-of-the-art data science tools and techniques to solve industry, academic, and/or business data and decision-making challenges.
2. Have a comprehensive understanding of modern data analytics, statistical analysis, and visualization tools that facilitate timely, large data analysis.
3. Be able to effectively communicate to a broad audience the relevant information derived from large data collections using a variety of visualization and presentation methods.
4. Understand the fundamental and advanced statistical and mathematical principles upon which advanced data analysis techniques are built.

**Requirements**

A total of 15 credit hours of coursework is required.

Dispute Resolution Field

DR professionals work in many different areas. To illustrate, the Association for Conflict Resolution has sections dealing with commercial, community, consumer, court, criminal justice, education, environmental / public policy, family, health care, international, ombudsman, online disputes, organizational conflict management, spirituality, training, and workplace issues.

Faculty

**Professor** R. Gely*, J. Lande*, I. Lee*, R. Uphoff*

**Associate Professor** C. Conklin*, D. Crouch*, S. I. Strong*

Adjunct Assistant Professor J. Levin*

- Graduate Faculty Member - membership is required to teach graduate-level courses, chair master's thesis committees, and serve on doctoral examination and dissertation committees.

**Doctoral Faculty Member - membership is required to chair doctoral examination or dissertation committees. Graduate faculty membership is a prerequisite for Doctoral faculty membership.

Undergraduate

While MU does not offer undergraduate degrees specifically in dispute resolution, the University does offer baccalaureate opportunities in a number of related areas in the other Schools and Colleges that make up the University. The catalog provides a complete list of these degree options (p. 20).

Graduate

- LLM in Dispute Resolution (p. 772)

About the Dispute Resolution Program

Students in the Master of Laws (LL.M.) dispute resolution program have a unique opportunity to gain a deeper understanding of theoretical, policy, design and ethical issues in dispute resolution. They study with leading dispute resolution scholars who generate important academic work influencing dispute resolution theory and practice around the world. Small class sizes create a close community with faculty and students.

Our program blends theoretical analysis, practitioner skills, and systems design work in courses usually limited to LL.M. students. Our diverse student body — by age, race, nationality, legal background — enriches the level of discussion, inside and outside the classroom.

The LL.M. meets the needs of those with backgrounds as advocates, neutrals, law-trained court administrators and government agency personnel, among others.

Admission Requirements

Applicants must have completed the first degree in law (JD, LLB or equivalent) required for law practice or law teaching in the country in which law studies were pursued. Note: U.S. applicants must have satisfied the JD requirements of an ABA-accredited law school. In exceptional cases, U.S. applicants may be admitted if they have satisfied the JD requirements of a non-ABA-accredited law school.

- Applicants may be admitted without a JD degree if they have a bachelor's degree and substantial experience in dispute resolution.
- Applicants must possess a minimum 2.5 (A = 4.0) grade point average in their law program, and a 3.0 GPA for work completed in any additional graduate or advanced degree program.
- Applicants must be able to start the program in the fall semester (which begins in mid-August). New students are not admitted in the spring or summer semesters.

LLM in Dispute Resolution

Degree Requirements

The LL.M. program requires 24 credit hours of study. A minimum of 12 credits are required courses in dispute resolution and the remaining 12 credits are electives. Students choose electives according to their interests. With approval of the director of the LL.M. Program, students
can apply six (6) credits of graduate-level courses outside the Law School toward the LL.M. graduation requirements.

Students studying full-time can complete degree requirements within one academic year. Part-time students in a continuous course of study can complete the program within two academic years.

**Required Courses**
- LAW 6905 LLM Arbitration Seminar 3
- LAW 6930 LL.M. Major Research Project 3
- LAW 6935 Dispute System Design 3
- LAW 6945 Non-Binding Methods of Dispute Resolution 3

**Possible Electives**
- LAW 5450 Conflict and Conflict Management
- LAW 5485 Cross-Cultural Dispute Resolution
- LAW 5537 Emotional Intelligence in Law
- LAW 6920 LL.M. Externship
- LAW 6925 LL.M. Independent Study
- LAW 6770 Mediation Clinic
- LAW 6950 Practicum on Dispute Resolution Training and Education
- PUB_AF 8610 Group Dynamics and Conflict Resolution
- PUB_AF 8620 Organizational Analysis and Change
- PUB_AF 8630 Organizational Change in a Community and Global Context
- PUB_AF 8640 Organizational Dynamics and Leadership
- THEATR 4240 Theory and Practice of Theatre of the Oppressed

**Tailoring the Program**

In addition to the recommended electives outlined above, the MU Law School offers courses in many areas. Refer to the Courses tab above for course descriptions. Please note: Every effort is made to teach each of these courses every year, but the ability to offer them depends on faculty availability and budget constraints.

Some of the concentrated areas in the J.D. curriculum include:
- Business Planning/Corporations
- E-commerce
- Employment
- Environmental Law
- Family
- Governmental Processes
- Healthcare
- International Law
- Normative Theory and Diversity
- Tax
- Trial Practice

**Genetics Area Program**

Genetics Area Program
241 Engineering West
Columbia, MO 65211
573-882-9007
877-GENE-PHD (877-436-3743)
Email: gap@missouri.edu

The Genetics Area Program (GAP) is an interdisciplinary Ph.D. program that will prepare you for a research or teaching career in genetics. As genetic analysis is used in all aspects of biological research, our Program has integrated the efforts of approximately 60 life sciences faculty into one of the strongest training programs at MU.

The curriculum provides broad, individualized training tailored to your career objectives.
