Digital Storytelling within the School of Visual Studies puts storytelling first, and combines this with new and emerging technologies. The interdisciplinary program emphasizes skills in video production, emerging media, animation, video art, writing and critical theory. Like other forms of storytelling, digital storytelling reaches audiences for artistic, educational, and commercial purposes, translating human knowledge and experience into multimedia spaces. Students use technology and the universal art of storytelling to connect and entertain audiences, innovate, and solve human-scale problems. They work to tell stories that stimulate, provoke, and inspire.

DST_VS 2810: Story Development
(same as COMMUN 2810). In this course students will learn about storytelling across time and media, beginning with definitions and
fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production. Thus, the course functions as preparation for audio-visual production courses in Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Enrollment limited to declared DST majors during early registration
