Digital Storytelling within the School of Visual Studies combines the ancient practices of narrative with new and emerging tools of multimedia environments. The program emphasizes skills in writing, visual communication and design, and production. Like other forms of storytelling, digital storytelling reaches audiences for artistic, educational, and commercial purposes, translating human knowledge and experience into multimedia spaces. In an age of big data and rapidly changing communication environments, translational skills to connect audiences with interdisciplinary knowledge and expressive arts—from public health to climate science to campaigns to video games—are in high demand across business, government, nonprofit and research sectors. Training in the field requires literacy in narrative, multimedia and networked communication, as well as all elements of digital production, including writing, audio and visual production, and design.

DST_VS 2810: Story Development
(same as COMMUN 2810). In this course students will learn about storytelling across time and media, beginning with definitions and fundamentals of narrative and oral storytelling, theories of narrative and its cultural functions, and basic narrative analysis. The course then turns to the close study of structure, narration, character, plot, action, dialogue, and other narrative elements, with a wide variety of examples and prompts. Throughout the course, students practice the development of their own stories in multiple versions and formats, with attention to the ways that formal structures such as blogs, tweets, podcasts, and scripts affect their storytelling strategies. By the end of the course, students will produce a short shooting script or equivalent project ready for production. Thus, the course functions as preparation for audio-visual production courses in Film Studies, Media Studies, Film and Media Arts, and Digital Storytelling degree programs. Graded on A-F basis only.

Credit Hours: 3

DST_VS 2820: Immersive Storytelling
(same as THEATR 2220). This class introduces the student to the basic principles of immersive theatre and immersive storytelling. Students learn about the history, practice, theory, and critical issues related to immersive theatre and immersive storytelling, including performance art, environmental theatre, happenings, interactive theatre, site specific performance, installation art, video art, projection art, multimedia, intermediality, mediatization, 3D video, 360 video, augmented reality, virtual reality, and mixed reality. Projects provide opportunities for experiences in immersive theatre and immersive storytelling.
