PhD in Psychology with
Emphasis in Clinical and
Quantitative Psychology

Students in the Dual Emphasis Program pursue a graduate degree
with training in both clinical and quantitative psychology. This program
bridges the two training areas, combining intensive training in the area
of quantitative psychology with the added benefit of intensive training
in the research and practice of clinical psychology. To pursue the
joint program, students must be officially admitted into both the clinical
and quantitative training areas within the Department of Psychological
Sciences and complete the requirements for both areas.

Admissions

Applicants are required to meet two sets of minimum qualifications
for admission: the requirements of the PhD in Psychology program
(http://gradstudies.missouri.edu/academics/programs/psychology/
doctorate.php) and the minimum requirements of the Office of Graduate
Studies (http://gradstudies.missouri.edu/admissions/eligibility-process/
minimum-requirements.php). Because requirements vary, you must
refer to a degree program's graduate admission page to learn about
specific admission criteria, application deadlines, eligibility and application
process. Before official admissions to the University of Missouri, your
application materials will be reviewed by both the Office of Graduate
Studies and the degree program to which you've applied.
