

BHS in Pre-Occupational Therapy

The Department of Occupational Therapy no longer offers an undergraduate degree program. The final cohort of students accepted into the previously combined bachelor's / master's program began coursework in Summer 2016 and will complete undergraduate coursework in Fall 2017.

Effective with the admissions cycle that begins in July 2017 for Summer 2018 admission, all applicants must complete a bachelor's degree (in any major), along with necessary program prerequisites, prior to beginning professional coursework in the Department of Occupational Therapy.
