Certificate in Landscape Design

The Certificate in Landscape Design provides students with the knowledge and skills necessary for employment as designers within the Landscape Design/Build industry. Coursework applies topics covered in lecture format directly to hands-on design and landscape project management skills utilized within the landscape industry. This includes basic plant growth requirements, a thorough understanding of preexisting project site conditions, basic landscape design practices and principles, design and implementation requirements for specific and complex landscape systems, a thorough knowledge in the use of prevalent design and graphic software applications, and improved methods to convey and market design concepts to potential landscape clients.

Requirements

List of courses that define the program.

PLNT_SCI 2075	Environmental Horticulture	3
PLNT_SCI 2250	Landscape Site Analysis	2
PLNT_SCI 2254	Landscape Design	3
PLNT_SCI 3254	Digital Landscape Graphics	3
or ARCHST 2220	Introduction to CAD	
PLNT_SCI 4975	Advanced Landscape Design	4

Plan of Study

First Year		
PLNT_SCI 2075	Environmental Horticulture	3
PLNT_SCI 2250	Landscape Site Analysis	2
PLNT_SCI 2254	Landscape Design	3
Second Year		
PLNT_SCI 3254	Digital Landscape Graphics	3
PLNT_SCI 4975	Advanced Landscape Design	4
Total Credits		**15**
