

# BA in Political Science with Emphasis in Pre-Law

## Degree Program Description

Political science is concerned with government, politics and public policies. In political science students learn how government operates and how to analyze and evaluate public policies and political ideas. This training can help students be more effective as active citizens, as political leaders and as government administrators. The curriculum offers opportunities to link academic study with internships and study abroad. Political Science graduates pursue many careers, some related to politics, but many others pursue other paths in a wide variety of areas such as: law, business and finance, consulting, government, public relations, media, advertising, lobbying, and international relations. The political science emphasis in pre-law is recommended for those who may want to enter law school or to prepare for paralegal careers. It is designed to introduce students to the study of law and judicial process and also provides a general orientation for law school. This program is ideal for those seeking careers in intelligence or law enforcement.

Students pursuing the Pre-law emphasis are strongly encouraged to take courses that will challenge them in the areas of critical thinking, critical reading, and writing skills. Writing Intensive courses are especially recommended.
