

# BSAcc in Accountancy

## Degree Program Description

Students in the School of Accountancy acquire practical experience in the field of accounting. The curriculum provides students with a strong technical accountancy background, a broad advanced business background and professional skills such as public speaking and information systems skills. Accountants engage in a wide variety of activities including preparing financial statements, reconciling business transactions, performing audits of public companies, and developing and using information systems to track financial performance and strategy. The field is competitive, challenging and rewarding. Typical careers in accountancy include auditor, tax advisor, wealth manager, forensic accountant, corporate finance officer, and consultant. The undergraduate and master's degree programs with a major in accountancy are merged into an integrated 150-credit curriculum to provide high-quality preparation for a career as a professional accountant in public accounting, business or government.

## Major Program Requirements

The Bachelor of Science with a major in Accountancy is only awarded along with the Master of Accountancy degree upon satisfactory completion of the 150-credit, integrated curriculum. In this integrated program, a minimum of 36 credits in accountancy courses at the 3000-level or above must be completed at MU. Students are required to have a minimum 3.000 University of Missouri GPA of record and at least 45 credit hours earned to apply. Meeting minimum qualifications does not guarantee admission.

# Some students get an opportunity to do a spring internship for 3 or 6 credit hours during the 8th semester. Most internships are the first 8 weeks of the semester and a student earns 3 credit hours for their internship course and then take 6-9 credit hours in the 2nd 8 weeks of the semester upon return to campus. A 16-week internship for the full semester allows a student to earn six credit hours for their internship and limits opportunities to take additional coursework.

\* A grade of C- or better is required in MATH 1300 and MATH 1400 .  
 \*\* Need grade of C- or better to fulfill requirement. Additional writing intensive courses must also earn a grade of C- or better per general education requirements.

\*\*\* Many students are dual-enrolled (taking undergraduate and graduate coursework) during the fourth year. Graduate coursework load is reduced in their fifth year. When a student becomes a graduate student they will begin paying graduate fees for coursework regardless of time spent on campus.

### Note:

ECONOM 1051H/ECONOM 1000 satisfies both ECONOM 1014 and ECONOM 1015 requirement.

One humanity or science must be 2000-level or above.

Professional electives can be non-business electives (2000+ courses) or Business electives (3000+ courses) approved by academic advisor.

Business Electives are business courses (Accountancy, Economics, Finance, Management or Marketing) that are 4000+ level.

Electives must be approved by advisor so that international component is met.
