

BS in Human Development and Family Science with Emphasis in Child Life Specialist

Degree Program Description

The Child Life Specialist emphasis prepares students to support child development and family coping within the context of pediatric illness, injury, medical treatment, and grief in a variety of health care and community settings. Child life specialists use therapeutic play, psychological preparation, and coping skills interventions to help reduce children's anxiety and stress related to illness, disability, hospitalization, and other challenging life experiences. Through a family-centered care approach, they provide parents and other family members reassurance and emotional support, help them understand psychosocial needs, and provide tools to help prevent or minimize psychological trauma. Courses focus on understanding typical and exceptional child and family development, effective methods of supporting children and families, as well as integration of theory and research into hands-on clinical practice experiences. In addition to a 100-hour practicum experience (selection is on a competitive, space-available basis) at MU's Children's Hospital, the student's last semester is spent off-campus completing a 600-hour, unpaid clinical internship in a pediatric hospital setting. Placement at clinical internship sites is not guaranteed by the University of Missouri. Students who successfully complete the degree program with the clinical internship option are eligible to take the Child Life Professional Certification Exam presented by the Child Life Certification Commission (CLCC) after graduation.

Major Program Requirements

The HDFS-Child Life degree program requires that students successfully complete child life volunteer, practicum, and internship experiences to earn this degree. Those who successfully complete the clinical internship capstone option are well prepared to take the child life certification exam to earn the CCLS (Certified Child Life Specialist) credential after graduation. Clinical education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students must also pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any clinical education experience in child life. Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to beginning these experiences may necessitate dismissal from the child life emphasis in HDFS. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (<http://catalog.missouri.edu/academicdegreerequirements/universityrequirements/>), including general education courses (<http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/>), in addition to the HDFS degree requirements below. All students must earn a grade of C- or higher, and a minimum 2.0 GPA overall in all HDFS courses taken to meet the HDFS degree requirements.¹ A minimum of 120 credit hours is required to earn the degree.

 ELECTIVE CREDITS - Can include any of the following:⁷ 9

- Additional HDFS courses not already used to satisfy CORE I, II, or III, or HDFS Elective requirements
- Minor, certificate, or elective courses from other departments

¹ Some courses may require a higher grade than C- to advance in the program. Child life clinical education sites typically require that students have substantially higher GPAs (ex., 3.0+ cumulative) to be considered for clinical education placements.

² H_D_FS 1600 should be taken before H_D_FS 2300 and any 3000/4000-level H_D_FS course.

³ Should be completed no later than the 2nd semester of Sophomore year.

⁴ Seats are limited in H_D_FS 4130. Students are admitted to this course via a competitive application and interview selection process. Applicants are selected one semester prior to enrolling in H_D_FS 4130. A 3.0 cumulative GPA is required for interview eligibility, in addition to completion of selected required courses. See the HDFS Child Life academic advisor for more information. A grade of B (3.0) or higher must be earned in H_D_FS 4130 to be admitted to the child life clinical internship section of H_D_FS 4993.

⁵ Students may plan a program of study which will help prepare them for earning the Certified Family Life Educator (CFLE) credential from the National Council on Family Relations (NCFR). Consultation with the student's academic advisor is recommended to determine the current requirements for this credential.

⁶ Students enter a student-initiated, competitive, nationwide application process to earn a clinical internship placement at a pediatric healthcare facility outside of Columbia, MO, the semester prior to enrolling in H_D_FS 4993. All other coursework requirements must be completed prior to the start of H_D_FS 4993.

⁷ Consult with an HDFS academic advisor for a list of approved elective courses.
