

BS in Human Development and Family Science with Emphasis in Family and Lifespan Development

Degree Program Description

In the Family and Lifespan Development emphasis, students become familiar with theory and research about families and individuals across the lifespan. Coursework focuses on bio-psycho-social development, family functioning, and interpersonal relationships in relevant settings such as at home, in child care, at school, and in the work place. Diversity is emphasized through examining multicultural families and diverse family structures and processes, and variations in individual development and relationships associated with such factors as gender, race, ethnicity, social class and health status. Opportunities are available for the practical application of theory and research in working with individuals, families, schools, and communities.

Major Program Requirements

Students may plan a program of study which will help prepare them for earning the Certified Family Life Educator (CFLE) credential from the National Council on Family Relations (NCFR). Consultation with the student's academic advisor is recommended to determine the current requirements for this credential.

Field education sites require that students provide proof of health insurance, up-to-date immunizations, and student professional liability insurance. Students may also be required to pass mandatory drug screens, criminal background checks, and any other required qualification checks prior to beginning any field education experience in HDFS. Failure to provide appropriate documentation, or pass drug screens and criminal background checks prior to beginning these experiences may necessitate a change of major. The student is responsible for all costs incurred with these qualification checks.

Students must complete all university requirements (<http://catalog.missouri.edu/academicdegreerequirements/universityrequirements/>), including general education (<http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/>), in addition to the degree requirements below. All students must earn a grade of C- or higher and a minimum 2.0 GPA overall in all HDFS courses taken to meet the HDFS degree requirements. A minimum of 120 credit hours is required to earn the degree.
