

BSBE in Biological Engineering

Degree Program Description

Biological Engineering is a science-based engineering curriculum that integrates engineering and biological sciences in the areas of health, sustainability and environmental stewardship. Students are prepared in three engineering areas: biomedical, bioprocess, and bioenvironmental engineering. In addition to the core program courses, the program includes courses in basic sciences; social, behavioral and engineering sciences; and humanities and fine arts. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Graduates are hired by biotechnology, medical, pharmaceutical, food and agricultural companies and government agencies, or opt to further their education in graduate, medical or veterinary medical school. Graduates are well prepared to take the Fundamentals of Engineering exam during their senior year, which is the first step toward obtaining a Professional Engineer license. The BSBE in biological engineering is accredited by the Engineering Accreditation Commission of ABET.

Major Program Requirements

The curriculum encompasses basic sciences, social and behavioral sciences, humanities and fine arts, engineering sciences and topics, and program core courses. The core courses cover topics of biological engineering principles and design. In a capstone design course, each student completes a design project under the direction of a faculty advisor. Technical electives allow students to place emphasis on biomedical, bioprocess or bioenvironmental engineering. The requirements listed below are in addition to University general education (<http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/>) requirements. All pre-requisites required for Basic Engineering, Biological Engineering, and Technical Elective courses must be completed with a grade of C- or better.

Students are also required to complete one 3-hour cultural awareness course which is selected from an approved cultural awareness course list, created and maintained by the College of Engineering or which meets the Arts and Science (A&S) diversity intensive (DI) requirement.

Major Core Requirements

General Requirements		21
ENGLSH 1000	Writing and Rhetoric	3
or ENGLSH 1000H	Honors Writing and Rhetoric	
Two courses that meet the campus designation for Writing Intensive requirements, with one at 3000 level or higher in your major.		
One course that meets the designation of a cultural awareness course (from approved list).		
Social and Behavioral Sciences		9
Economics (from approved list)		3
ECONOM 1014	Principles of Microeconomics (suggested as it meets the requirements for a cultural awareness course.)	
or ECONOM 1014H	Principles of Microeconomics-Honors	
History (from approved list)		3

BIOL_EN 2600	Sustainability Foundations: An Introduction to Sustainability (suggested)	
or BIOL_EN 2600H	Sustainability Foundations: An Introduction to Sustainability - Honors	
Humanities and Fine Arts		9
Suggested to have at least one course that meets requirements for Writing Intensive designation and at least one BS/SS or H/FA course at 2000 level or greater.		
Mathematics and Statistics		19
MATH 1500	Analytic Geometry and Calculus I	5
MATH 1700	Calculus II	5
MATH 2300	Calculus III	3

Accelerated BSBE to MS Option

The accelerated option will allow students to earn a bachelors and masters degree within five years in Biological Engineering. Eligible students who have completed at least 90 credit hours with a cumulative GPA of 3.0 and higher. The academic requirements of the accelerated MS program will require a total of 30 credit hours to graduate. Accepted undergraduate students can take 12 hours of graduate level courses that will count toward both the undergraduate and the graduate degrees. Once the student has completed 126 credit hours, the corresponding bachelor's degree will be conferred and they will become graduate students in our MS programs to complete the remaining 18 hours of graduate credit. A minimum of 15 credit hours must be from courses at the 8000 level or above.

Total credits required for graduation must be at least 138 total credit hours:

- Total undergraduate credit hours: 126
- Total dual enrollment credit hours: 12
- Total graduate credit hours: 30

Thesis/Non-Thesis Options

All MS students must complete an independent research project supervised by their faculty advisors. Students can choose a thesis (MST) or non-thesis (MSNT) option to complete the masters degree. Both require a total of 30 graduate credit hours and a research project. MST students can take 6 to 12 credit hours of masters research and are required to complete a masters thesis conforming to the Graduate School thesis specifications. MSNT students must take a minimum of 27 credit hours of graduate courses, excluding research and problems courses, and complete a project report approved by the examination committee. During their last semester in the program, students must defend their thesis or project report in front of an examination committee composed of their graduate advisor and at least two other faculty members.
