

# BS in Chemical Engineering

## Degree Program Description

The curriculum provides a well-rounded general education and rigorous technical education in order to hone an appreciation of the relationship between technology and society. The technical curriculum focuses on the basic sciences, as well as chemical engineering theory and practice. Throughout the curriculum, problem solving, design, critical thinking, and teamwork skills are built by integrating team-based design projects, laboratories, and reports. Our graduates work in traditional chemical engineering areas such as the petroleum and chemical industries, as well as microelectronics, pharmaceuticals, materials, polymers, environmental protection, consumer products, and engineering consulting. Our graduates also pursue careers in business management or government as well as advanced studies in medicine, law, business, basic sciences, and other engineering disciplines.

## Major Program Requirements

Each graduate must complete the required curriculum designed to demonstrate knowledge and integration of chemical engineering science and practice using analytical, computational, and experimental techniques. Students are also required to complete one cultural awareness course which is selected from an approved list, created and maintained by the College of Engineering or which meets the Arts and Science (A&S) diversity requirement. In addition, each graduate must have a comprehensive background in advanced chemistry. Graduates have a detailed working knowledge of the entire spectrum of chemical engineering activities.

All requirements listed below are in addition to University graduation requirements (<http://catalog.missouri.edu/academicdegreerequirements/universityrequirements/>), including University general education (<http://catalog.missouri.edu/academicdegreerequirements/generaleducationrequirements/>) and College of Engineering requirements. Students may also add an emphasis in the Biochemical (<http://catalog.missouri.edu/collegeofengineering/chemicalengineering/bs-chemical-engineering-emphasis-biochemical/>), Environmental (<http://catalog.missouri.edu/collegeofengineering/chemicalengineering/bs-chemical-engineering-emphasis-environmental/>), or Materials (<http://catalog.missouri.edu/collegeofengineering/chemicalengineering/bs-chemical-engineering-emphasis-materials/>) areas by completing that emphasis area's requirements.
