**MPH in Public Health**

The Master of Public Health (MPH) is the standard professional degree recognized throughout the world for public health practice. The MPH program at the University of Missouri is accredited by the Council on Education for Public Health (CEPH). The MPH trains practitioners, teachers, researchers, and administrators to plan, implement, and evaluate programs aimed at enhancing health in human populations through organized effort on the local, state, and national level.

**Degree Requirements**

Students in the MPH must select an emphasis area from the two available options: Health Promotion and Policy and Veterinary Public Health. Requirements are determined by the emphasis area chosen. All public health students are educated in the core domains of public health and participate in a supervised internship in a public health agency. The combination of course work and practical experience produces individuals who are highly qualified to enter the public health workforce. The MPH curriculum is drawn from a variety of collaborating academic programs and units. Public health coursework reflects the University of Missouri’s strength in the health professions, social work, journalism, public affairs, nursing, medicine, veterinary medicine, and arts and sciences.

**Dual Degree Options**

**DVM in Veterinary Medicine/MPH in Public Health**

For students who are admitted to the Master of Public Health and Doctor of Veterinary Medicine, they will need to take 44 credit hours of public health coursework (22 credit hours of this coursework is with the College of Veterinary Medicine). The Doctor of Veterinary Medicine curriculum, they will need to take 147.5 credit hours of College of Veterinary Medicine courses, for a total of 191.5 credit hours.

A dual degree candidate who subsequently decides to pursue only one of these degrees must complete degree requirements subject to the same rules as a student not pursuing the dual degree.

Dual degree candidates must enroll in the Master of Public Health Program prior to the start of their third semester in the Doctor of Veterinary Medicine program. Likewise, Master of Public Health students who gain admission to the Doctor of Veterinary Medicine curriculum while enrolled as Master of Public Health students must enroll in the Doctor of Veterinary Medicine program prior to the start of their third semester in the Master of Public Health Program for consideration as dual degree students.

There will be a separate advisor and graduate committee for the Master of Public Health degree program. Committee structure and governance will be based upon standards defined for the Master of Public Health Program. Governance and administration of the Doctor of Veterinary Medicine component of the dual degree will remain unchanged.

There will be two separate diplomas awarded upon completion of all degree program requirements.

The Master of Public Health Program and the College of Veterinary Medicine reserve the right to limit participation in the program, including dismissal. Those interested in pursuing the dual degree program are encouraged to discuss the possibility with advisors in both units and to submit applications for admission at the earliest possible time.

---

**MA in Journalism/MPH in Public Health**

The School of Journalism and the program in Public Health have created a dual degree option that allows students to earn a journalism degree in reporting or strategic communication with an emphasis in public health. Students complete a block of courses in public health, as well as in journalism, and complete the dual degree with a public health internship and capstone, in which the focus is on journalism or strategic communication.

**MPA in Public Affairs/MPH in Public Health**

The Master in Public Affairs dual-degree with Master in Public Health is a 54 credit hour program comprised of 18 hours of public affairs coursework, 18 hours of public health coursework, and 18 hours of shared coursework between both programs.

**MSW in Social Work/MPH in Public Health**

with emphasis in Health Promotion and Policy

The dual degree program in Social Work and Public Health is a combination of the MSW in Social Work and the MPH in Public Health. Students can earn a Master of Social Work (http://ssw.missouri.edu/msw.html) (MSW) and a Master of Public Health (http://publichealth.missouri.edu/) (MPH) with an emphasis in Health Promotion and Policy. Graduates of the dual degree will be well-positioned to find employment as a health policy advocate, health agency administrator or in an integrated behavioral health setting as a care managers, health coach, patient advocate, counselor, or team leader. Students pursuing dual degrees must be independently admitted to each program. Only Regular Standing (http://ssw.missouri.edu/msw_options.html) (RS),
full-time MSW students (both clinical or PP&A concentration) will be
admitted to the program.

The dual degree reduces total student credit hours by 24-27 credits
and reduces the length of study by one academic year. If completed
separately, students would be required to complete 105 credit hours (60
credit hours for RS MSW; 45 credit hours for MPH) Students completing
both degrees will be required to complete 78-81 credit hours, with 51-54
of those being discipline specific (18 MPH and 33 [PP&A]- 36 [Clinical]
MSW) and 27 credits shared between the two programs. Students
will complete the both degree programs in 7 semesters, including one
summer session.

Credit requirements, shared hours, and curriculum focus conform to
the requirements of the MU Graduate School, the national accrediting
body for graduate education in public health (CEPH), and the national
accrediting body for graduate education in social work (CSWE). The
capstone and internship will satisfy the requirements of both programs
and will focus on the intersection of subject matter between social work
and public health.

admission-and-application/

Admissions for Dual Degrees

For each of the Dual Degree programs listed above, students will apply
separately to each program and be admitted to both programs before
they are accepted as a dual degree student. Students may apply at any
point before beginning graduate school or during the first year of either
program. Once accepted into both programs, the student must inform
both programs of their intent to complete the dual degree and work with
the MPH Academic Advisor to ensure their plan of study is appropriate.
