Speech, Language, and Hearing Sciences (SLHS)

SLHS 1000: Introduction to Communication Science and Disorders
Nature of communication and its development; types of speech, language and hearing disorders; professional preparation, settings, and work of speech-language pathologists and audiologists. Course graded on S/U basis only.

Credit Hour: 1

SLHS 1060: Human Language
(same as ANTHRO 1060, LINGST 1060 and ENGLISH 1060). General introduction to various aspects of linguistic study. Elementary analysis of language data with some attention to application of linguistic study to other disciplines.

Credit Hours: 3

SLHS 1100: American Sign Language I
Introduction to American Sign Language (ASL). Development of basic expressive and receptive skills in ASL, the manual alphabet, numbers, and signed vocabulary. Includes an overview of ASL syntax and grammar. Course graded on A-F basis only.

Credit Hours: 5

SLHS 1200: American Sign Language II
This course is designed to increase students' understanding of American Sign Language. Students will increase their sign vocabulary, expressive and receptive skills, an understanding of ASL syntax and grammar. Graded on A-F basis only.

Credit Hours: 3

Prerequisites: SLHS 1100 or equivalent

SLHS 2120: Survey of Communication Disorders
Systematic survey of the disorders of speech, language and hearing.

Credit Hours: 3

SLHS 2150: American Sign Language III
This course expands on vocabulary and signing skills developed in ASL II. Includes review of ASL grammar and extensive discussions of ASL linguistic structure and Deaf culture. Class is conducted entirely in ASL. Course graded on A-F basis only.

Credit Hours: 3

Prerequisites: SLHS 1200 with minimum grade of C or instructor's consent

SLHS 2800: Multicultural Considerations in Speech, Language and Hearing Sciences
This course is designed to heighten student awareness and sensitivity to the cultural and linguistic differences that affect the identification, assessment, treatment, and provision of services to individuals with communication disorders or differences. Throughout this course, topics related to diverse cultures and practices will be explored, and opportunities to apply knowledge of cultural considerations to assessment and treatment practices within speech, language and hearing sciences will be provided. Graded on A-F basis only.

Credit Hours: 3

SLHS 3010: American Phonetics
(same as LINGST 3010). Analysis of production and acoustics of the sounds of speech with an emphasis on American English; practice in broad and narrow transcription using the International Phonetic Alphabet.

Credit Hours: 3

Prerequisites: Restricted to SLHS majors only

SLHS 3020: Normal Language Development
Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3

Prerequisites: SLHS majors only

SLHS 3020W: Normal Language Development - Writing Intensive
Language development in children and changes in language processing during normal aging. Cognition and language; language learning processes; language sample analysis; relationship between spoken and written language.

Credit Hours: 3

Prerequisites: SLHS majors only

SLHS 3050: Signed English and Communication Development
This course covers research, theory, and methods of using sign language to assist the communication of the Deaf, individuals with disabilities, and hearing learners. Use of sign language to improve literacy and classroom management also will be targeted. No prior experience with any sign language and/or sign system is required. Development of a basic vocabulary in Signed English will be included in this course.

Credit Hours: 3
SLHS 3210: Anatomy and Physiology of the Speech Mechanism
(same as LINGST 3210). Introduction to anatomical and functional aspects of the speech mechanism.

Credit Hours: 3
Prerequisites: Sophomore standing

SLHS 3220: Speech Acoustics
(same as LINGST 3220). An introduction to the acoustic aspects of speech as they relate to the respiratory, phonatory, resonatory, and articulatory systems.

Credit Hours: 3

SLHS 3230: Hearing Science
Introduction to the nature of sound and its measurement; anatomy and physiology of the auditory and vestibular systems; psychoacoustic methods and phenomena.

Credit Hours: 3
Prerequisites: SLHS 4430

SLHS 3890: Music and the Mind
(same as PSYCH 3890). This course examines music as a universal human behavior, with an emphasis on the perceptual, cognitive and neural processes that underlie it, and their origins in evolution and development.

Credit Hours: 3
Prerequisites: SLHS 4430

SLHS 3950: Research Methods in Speech and Language Sciences
This course is designed to help students gain an understanding of how research in the discipline of speech and language sciences is conducted and how to differentiate between good-quality and poor-quality research design. We will explore the importance of the scientific method in conducting rigorous research. The course will enable students to explore the different types of research conducted within the discipline and will prepare students for an introductory experience in a research lab. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Sophomore standing

SLHS 4001: Topics in Speech, Language and Hearing Science
Organized study of selected topics. Subjects and earnable credit may vary from semester to semester. May be repeated with program consent.

Credit Hour: 1-99
Prerequisites: Junior standing and instructor's consent

SLHS 4020: Language Disorders in Children
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3
Prerequisites: SLHS majors only; SLHS 3020

SLHS 4020W: Language Disorders in Children - Writing Intensive
Overview of language disorders from early childhood through adolescence. Includes language disorders as primary disability and as secondary to other disabilities. Introduction to assessment and intervention.

Credit Hours: 3
Prerequisites: SLHS majors only; SLHS 3020

SLHS 4030: Language Disorders of Adults
Introduction to acquired adult language disorders. Review of neuroanatomy/physiology, etiology and symptomatology, with introduction to assessment and treatment procedures.

Credit Hours: 2
Prerequisites: SLHS 3020

SLHS 4100: Introduction to Interprofessional Practice
(same as HTH_PR 4100; cross-leveled with PH_THR 5100, OC_THR 5100, HTH_PR 7100, SLHS 7100). This course serves as a foundation and introduction to interprofessional education and collaboration. Students who enroll in this course will be assigned to mini-teams of students from a range of disciplines. Through this course, students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on S/U basis only.

Credit Hour: 1
Prerequisites: Restricted to SLHS seniors only

SLHS 4210: Fluency Disorders

Credit Hours: 2
Prerequisites: SLHS majors only
SLHS 4220: Voice Disorders
Introduction to voice disorders in children and adults. Includes overview
of perceptual and instrumental assessment procedures and selected
treatment approaches.

Credit Hours: 1
Prerequisites: SLHS majors only

SLHS 4320: Disorders of Phonology and Articulation
Overview of disorders of use and production of speech sounds with an
emphasis on developmental disorders. Introduction to assessment and
treatment.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

SLHS 4330: Introduction to Audiology
Principles and techniques of audiological testing; etiologies of hearing
impairment; current technologies in rehabilitation.

Credit Hours: 3
Prerequisites: SLHS majors only or instructor's consent

SLHS 4340: Aural Rehabilitation
(cross-leveled with SLHS 7340). Identification, evaluation, and
management of problems associated with hearing impairment in
both children and adults. Includes issues related to speech/language
development, communication, education, and social factors.

Credit Hours: 3
Prerequisites: SLHS 4330

SLHS 4340W: Aural Rehabilitation-Writing Intensive
(cross-leveled with SLHS 7340). Identification, evaluation, and
management of problems associated with hearing impairment in
both children and adults. Includes issues related to speech/language
development, communication, education, and social factors.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

SLHS 4420: Reading and Language Disabilities in School Age
Children
(cross-leveled with SLHS 7420). The focus of this course is on
prevention, identification, assessment, and intervention for language and
reading disorders in school-age children. We will learn about evidence-
based practice in language and reading disorders, as well as develop the
explicit linguistic knowledge necessary to deliver effective intervention.
We will emphasize the roles and responsibilities of speech-language
pathologists in direct service delivery and as members of the educational
team. Graded on A-F basis only.

Credit Hours: 3
Recommended: Junior or Senior standing

SLHS 4430: Neurophysiology for Speech, Language, and Hearing
(cross-leveled with SLHS 7430). Principles of basic neurophysiology,
emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3

SLHS 4830: Individual Differences in Language Processing
(cross-leveled with SLHS 7830). Examination of the normal variations
exhibited across individuals in the acquisition, use, and representation
of language. Also considered are individual differences seen in second
language learning, the aging process, and language disorders.

Credit Hours: 2
Prerequisites: instructor's consent

SLHS 4840: Language and Development in Infancy
(same as PSYCH 4442; cross-leveled with SLHS 7840, PSYCH
7442). Overview of theory and research on the foundations and
development of language in infancy (0 to 2 years), with an emphasis on
relevant, interrelated areas of development, individual differences, early
recognition of delay, and assessment.

Credit Hours: 3
Prerequisites: senior standing required. Instructor's consent required

SLHS 4850: Bilingualism
(cross-leveled with SLHS 7850). This course is intended to establish an
understanding of bilingual language processing and of the consequences
of bilingualism on cognition. The course begins by reviewing the
individual differences that modulate language processing in monolinguals
and the factors that predict good second language learning outcomes in
adults. This sets up the stage of an in-depth discussion of the ways in
which second language proficiency changes the dynamics of language
production and comprehension, as well as the cognitive performance
across the lifespan. Students will be introduced to theories and models of
bilingual language processing and will learn to evaluate evidence for and
against the bilingual advantage and the benefits of bilingualism in healthy
aging and recovery from acquired language deficits, such as aphasia.
Students will also learn to identify patterns of language performance
that distinguish bilinguals from monolinguals and from individuals with
language disorders. Graded on A-F basis only.

Credit Hours: 3
Recommended: Junior or Senior standing
SLHS 4900: Clinical Observation in Communication Disorders
Directed clinical observations designed to prepare the student for clinical practicum. Required for professional certification. Graded on a S/U basis only.

Credit Hours: 2
Prerequisites: SLHS majors only; senior standing required

SLHS 4945: Clinical Apprenticeship in Communication Disorders
Supervised observation and clinical experience in speech-language pathology or audiology for undergraduates.

Credit Hour: 1-3
Prerequisites: Senior standing and departmental consent. SLHS majors only

SLHS 4950: Research Apprenticeship
Research apprenticeship with a faculty member, assisting in the development and execution of research in communication processes and disorders. May be repeated to 9 hrs. maximum.

Credit Hour: 1-9
Prerequisites: Instructor's consent

SLHS 4960: Directed Reading in Communication Science and Disorders
Independent reading; reports.

Credit Hour: 1-3
Prerequisites: Instructor's consent

SLHS 4990: Honors Thesis
Individual honors thesis on a topic selected with a faculty advisor. Requires planning, conducting, and writing up a research project under the guidance of a faculty member. Successful completion of thesis and maintenance of 3.3 GPA, leads to degree with departmental honors. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Senior standing; 3.3 GPA; 3.5 GPA in SLHS courses; instructor's consent. Restricted to SLHS students only

SLHS 7001: Topics in Speech, Language and Hearing Science
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99
Prerequisites: Instructor's consent

SLHS 7085: Problems in Speech, Language and Hearing Science
Individual study not leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: Instructor's consent

SLHS 7100: Introduction to Interprofessional Practice
(same as HTH_PR 7100; cross-leveled with OC_THR 5100, SLHS 4100, PH_THR 5100, HTH_PR 4100). This course serves as a foundation and introduction to interprofessional education and collaboration. Students who enroll in this course will be assigned to mini-teams of students from a range of disciplines. Through this course, students will develop an understanding of their own unique role as a healthcare provider and the importance of client- and community-centered care and effective teamwork, as well as communication skills. Graded on S/U basis only.

Credit Hour: 1

SLHS 7340: Aural Rehabilitation
(cross-leveled with SLHS 4340). Identification, evaluation, and management of problems associated with hearing impairment in both children and adults. Includes issues related to speech/language development, communication, education, and social factors.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors only

SLHS 7420: Reading and Language Disabilities in School Age Children
(cross-leveled with SLHS 4420). This course will focus on three key questions: (1) The science of reading: How do children learn to read? (2) Effective instruction: What kind of teaching helps children learn to read? (3) Intensive intervention: What do struggling readers need to succeed? We will learn about evidence-based practice in reading and language disorders, as well as develop the explicit linguistic knowledge necessary to deliver effective intervention. We will consider the roles and responsibilities of speech-language pathologists in prevention and intervention of reading disorders. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: SLHS 3020

SLHS 7430: Neurophysiology for Speech, Language, and Hearing
(cross-leveled with SLHS 4430). Principles of basic neurophysiology, emphasizing correlation of structure and function of the nervous system.

Credit Hours: 3
Prerequisites: Communication Science and Disorders majors or instructor's consent
SLHS 7840: Language and Development in Infancy
(same as PSYCH 7442; cross-leveled with SLHS 4840, PSYCH 4442). Overview of theory and research on the foundations and development of language in infancy (0 to 2 years), with an emphasis on relevant, interrelated areas of development, individual differences, early recognition of delay, and assessment.

Credit Hours: 3

SLHS 7850: Bilingualism
(cross-leveled with SLHS 4850). This course is intended to establish an understanding of bilingual language processing and of the consequences of bilingualism on cognition. The course begins by reviewing the individual differences that modulate language processing in monolinguals and the factors that predict good second language learning outcomes in adults. This sets up the stage of an in-depth discussion of the ways in which second language proficiency changes the dynamics of language production and comprehension, as well as the cognitive performance across the lifespan. Students will be introduced to theories and models of bilingual language processing and will learn to evaluate evidence for and against the bilingual advantage and the benefits of bilingualism in healthy aging and recovery from acquired language deficits, such as aphasia. Students will also learn to identify patterns of language performance that distinguish bilinguals from monolinguals and from individuals with language disorders. Graded on A-F basis only.

Credit Hours: 3

SLHS 8001: Topics in Speech, Language and Hearing Science
Study of selected topics in speech pathology/audiology. Topic and credit may vary from semester to semester. May be repeated for credit with instructor and departmental consent.

Credit Hour: 1-99
Prerequisites: instructor's consent, instructor's

SLHS 8020: Developmental Language Disorders

Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

SLHS 8030: Acquired Language Disorders
Etiology, symptomatology, assessment and rehabilitation of acquired neurogenic communication disorders in aphasia, traumatic brain injury, and dementia.

Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

SLHS 8050: Research in Speech, Language and Hearing Science
Independent research leading to a report but not to a thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor's consent

SLHS 8085: Problems in Speech, Language and Hearing Science
Individual study not leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor's consent

SLHS 8090: Research in Speech, Language and Hearing Science
Research leading to thesis or dissertation.

Credit Hour: 1-99
Prerequisites: instructor's consent. Graded on a S/U basis only

SLHS 8200: Motor Speech Disorders
Etiology, symptomatology, epidemiology, and prognosis of motor speech disorders resulting from acquired neurological damage. Emphasis on clinical assessment and rehabilitation procedures. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

SLHS 8210: Disorders of Fluency
Identification and remediation of fluency disorders in children and adults.

Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

SLHS 8225: Voice Science and Voice Disorders
Diagnosis and management of communicative disorders resulting from pathologies or misuse of the phonatory system. Includes experience with pertinent laboratory instrumentation. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: restricted to MHS CSD students; or with instructor's consent

SLHS 8230: Dysphagia
Etiology, symptomatology, and epidemiology of acquired and developmental swallowing disorders (dysphagia). Emphasis on instrumental and non-instrumental methods for assessing and treating dysphagia.

Credit Hours: 3
Prerequisites: Communication Science and Disorders students only

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>SLHS 8240</td>
<td>Cleft Palate/Craniofacial Disorders</td>
<td>Nature, causes, diagnosis, and treatment of disorders of communication associated with congenital orofacial anomalies. Emphasis on cleft palate.</td>
<td>1</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8250</td>
<td>Clinical Methods in Speech-Language Pathology</td>
<td>An introduction to clinical procedures and evidence-based intervention methods relating to speech and language disorders. Topics include session design, data collection, measurement of progress, reporting of clinical results, and various treatment options. Graded on A-F basis only.</td>
<td>3</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8260</td>
<td>Diagnosis in Speech-Language Pathology</td>
<td>General principles of diagnosis; specific diagnostic tools and procedures for various speech and language disorders.</td>
<td>3</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8300</td>
<td>Neurological Bases of Speech and Language</td>
<td>Structure and function of the human brain and nervous system including general organization, cranial nerves, basal ganglia, cerebellum, and descending motor pathways as related to the field of speech language pathology. Graded on A-F basis only.</td>
<td>2</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8320</td>
<td>Speech Sound Disorders</td>
<td>Principles of clinical assessment and treatment for speech sound disorders in children. Includes foundations in research on early speech sound acquisition, organic and developmental disorders, and treatment efficacy. Graded on A-F basis only.</td>
<td>2</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8350</td>
<td>Medical Speech-Language Pathology</td>
<td>This course covers topics related to medical speech-language pathology practice, including anatomy and physiology, diagnoses, collaborations, and diagnostic and therapeutic approaches. Graded on A-F basis only.</td>
<td>3</td>
<td>Instructor's consent</td>
</tr>
<tr>
<td>SLHS 8430</td>
<td>Augmentative and Alternative Communication</td>
<td>Students will learn the principles of AAC assessment, methods of intervention, and types of technology available for individuals unable to communicate fully through speech. Graded on A-F basis only.</td>
<td>2</td>
<td>Restricted to MHS in SLHS students only</td>
</tr>
<tr>
<td>SLHS 8500</td>
<td>Issues in Professional Practice</td>
<td>Organizational, inter-professional, economic, legal, and ethical aspects of delivering speech, language, and hearing services. Graded on A/F basis only.</td>
<td>2</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8600</td>
<td>Clinical Language Analysis</td>
<td>This course provides a theoretical framework for understanding the morphology, semantics, syntax, and pragmatics of English as well as practice in the analysis of typical and atypical language samples. Graded on A-F basis only.</td>
<td>3</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8935</td>
<td>Clinical Practice in Audiology</td>
<td>Supervised practice in hearing screening, hearing conservation, and aural re/habilitation. May be repeated for credit. Graded on S/U basis only.</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>SLHS 8945</td>
<td>Clinical Practice in Speech-Language Pathology</td>
<td>Supervised clinical practice in speech pathology for graduate students. May be repeated for credit.</td>
<td>1-10</td>
<td>Communication Science and Disorders students only</td>
</tr>
<tr>
<td>SLHS 8960</td>
<td>Directed Reading in Speech, Language and Hearing Science</td>
<td>Independent reading; reports.</td>
<td>1-3</td>
<td>Instructor's consent</td>
