Veterinary Technology (VET_TCH)

VET_TCH 1010: Biomedical Career Explorations
(same as BIOMED 1010). An introduction to the variety of career possibilities within the growing field of biomedical sciences. Graded on A-F basis only.

Credit Hours: 1
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 2230: Farm Animal Sanitation and Disease Prevention
(same as BIOMED 2230). Preventative measures for diseases and parasites of farm animals. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3000: Specialty Careers for Veterinary Technicians
(same as BIOMED 3000). Specialty careers for veterinary technicians are jobs which required knowledge and skills beyond those needed in primary care clinical veterinary practice. This course will explore veterinary technician specialties, the education required, and the advantages of advanced academic training. Graded on A-F basis only.

Credit Hours: 1
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3001: Topics in Veterinary Technology
This is a temporary course numbering to host a course that is necessary for the BS in Veterinary Technology curriculum but has not completed the academic approval process. This course content is appropriate for students with junior standing by credit hours. Graded on A-F basis only.

Credit Hours: 1-4
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3100: Biomedical Pathophysiology
(same as BIOMED 3100). Pathophysiology is the study of changes in the body resulting from disease. Prior coursework in normal anatomy and physiology is required. This course has been developed for veterinary technicians. Both animal and human examples of disease are covered. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3219: Elements of Comparative Anatomy
(same as BIOMED 3219). This course is designed to give students an appreciation for comparative anatomy of various species encountered in veterinary technology and veterinary medicine. Detailed and labeled photos of dissected specimens are used to aid instruction. Graded on A-F basis only.

Credit Hours: 1-4
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3226: Veterinary Pharmacology
(same as BIOMED 3226). Review and clinical application of basic veterinary pharmacology. Topics to be covered include terminology, calculations, physiology, and pharmacokinetics and pharmacodynamics. Both small and large animal organ systems are discussed. Medicolegal aspects of veterinary pharmacology are also reviewed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3300: Animal Welfare and Ethics
(same as BIOMED 3300). An introductory examination of ethical issues related to animal welfare, including animal use for food, research, and companionship, plus contemporary issues affecting companion animals, farm animals, and horses. Topics related to animal pain and legal status will also be discussed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3326: Veterinary Pharmacology
(same as BIOMED 3326). Review and clinical application of basic veterinary pharmacology. Topics to be covered include terminology, calculations, physiology, and pharmacokinetics and pharmacodynamics. Both small and large animal organ systems are discussed. Medicolegal aspects of veterinary pharmacology are also reviewed. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3400: Domestic Animal Behavior in Veterinary Practice
(same as BIOMED 3400). Students will be introduced to the key characteristics of behavior among common domestic animals such as dogs, cats, horses, cattle, sheep and goats. Topics include communication, aggression, biological rhythms, reproductive behavior, learning and development, ingestive behavior and genetics. This course will enable students to gain a thorough understanding of assessing animal behavior, as well as how to utilize the assessment to better the animal's health. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 3450: General Veterinary Anesthesia
This course is intended to be an introduction to concepts of veterinary anesthesia of all domestic species. Topics include: drugs used for premedication, induction and maintenance of general anesthesia in the domestic species; equipment, including inhalation anesthetic machines, ventilators and monitoring equipment. Anesthetic considerations for patients with specific problems such as cardiac diseases and pregnancy will also be included. Graded on A-F basis only.

Credit Hours: 2
Prerequisites: Restricted to students in the BS in Veterinary Technology Program

VET_TCH 4001: Topics in Veterinary Technology
This is a temporary course numbering to host a course that is necessary for the BS in Veterinary Technology curriculum but has not completed the academic approval process. This course content is appropriate for students with senior standing by credit hours. Graded on A-F basis only.

Credit Hours: 1-4

<tr>
<td>VET_TCH 4110: Veterinary Cytology</td>
<td>(same as BIOMED 4110). This course of Veterinary Cytology is designed to hone the skills of the practicing veterinary technician, and assumes some basic knowledge of microscope usage and normal hematology. The review of normal cells will be minimal and emphasis will be placed on findings associated with inflammatory and neoplastic diseases. The graduate level course will include discussion of ancillary tests, special stains and treatment alternatives. The focus will be on canine and feline diseases but some common equine and bovine disease. Graded on A-F basis only.</td>

VET_TCH 4600W: Leadership and Communication for Veterinary Technicians - Writing Intensive
This writing intensive course challenges students to use critical thinking strategies to study the leadership and coordinating role of the professional veterinary technician within patient care delivery, client communication, the business of a veterinary hospital and the future of the profession. Current theories of management, leadership and change are examined and related to veterinary technicians in practice today. Focus placed on synthesis of knowledge to develop innovative and creative approaches to the responsibilities of a veterinary technician using both written and oral forms of communication. Applies theoretical and empirical concepts of leadership and promotes effective interprofessional communication with all members of the public and veterinary team. Graded on A-F basis only.

Credit Hours: 3
Prerequisites: Restricted to students in the BS in Veterinary Technology Program; ENGLSH 1000, Student should be currently enrolled in final 3 semesters of program
