
School of Medicine

As the first publicly supported medical school west of the Mississippi River, the University of Missouri School of Medicine has improved health, education and research for more than 170 years.

More Missouri physicians received their medical degree from MU than from any other university. The School of Medicine's more than 680 faculty physicians and scientists educate more than 1,000 medical students, residents, fellows and others seeking advanced degrees, as well as more than 1,000 undergraduate students each semester.

Our researchers focus on lifesaving discoveries that address the most prevalent health problems. The school is nationally ranked in such areas as family and community medicine, primary care, pharmacology and physiology, and health management and informatics.
