For more information about this graduate certificate, contact the Sinclair School of Nursing by phone at 573-882-0200 or by e-mail at nursing@missouri.edu.

The Graduate Certificate in Participatory Health Research confirms the completion of graduate level training in the rationale, theoretical underpinnings, methods, and applications of community based participatory health research (CBPR) and patient centered outcomes research (PCOR). Community based participatory approaches are innovative methods that intersect with patient centered outcomes. When used together, CBPR and PCOR, there is significant potential for patient empowerment, enhancement of patient care, and improved population health outcomes. A collaborative effort between the Sinclair School of Nursing, Department of Family and Community Medicine, School of Social Work, and the Masters in Public Health program, individuals completing the Graduate Certificate in Participatory Health Research will gain highly valued skills necessary to conduct clinical research in partnership with a community. Participatory Health Research methods are ideal for addressing patient-centered questions related to informed choices, health outcomes, and quality of life. This graduate certificate is open to all health-related professions. These innovative types of research skills traditionally have not been included in health-related graduate program curricula.

Requirements

Requirements for the Graduate Certificate in Participatory Health Research include a graduate level statistics course, three didactic courses, and one research practicum experience.

Courses for this program are online: no campus visits are required.

Required Coursework:

NURSE 8425	Participatory Approaches for Health and Health Systems	3
or F_C_MD 8425	Participatory Approaches for Health and Health Systems	
NURSE 9080	DNP Residency Project	3
or NURSE 9710	Advanced Research Practicum	
or F_C_MD 8450	Research in Community Health	
Graduate Level Statistics (one course)		3
ESC_PS 7170	Introduction to Applied Statistics	
STAT 7020	Statistical Methods in the Health Sciences	
NURSE 7010	Biostatistical Foundations for Health Researchers	
Graduate Level Epidemiology (one course)		3
NURSE 8100	Principles of Epidemiology	
F_C_MD 8420	Principles of Epidemiology	
Elective (one course)		3
NURSE 9450	Doctoral Seminar: Social Determinants of Health	
NURSE 9460	Theories and Interventions in Health Behavior Science	
P_HLTH 8953	Evaluating Global Public Health Programs
