

DNP in Nursing with Emphasis in Family Nurse Practitioner

Students who pursue the Family Nurse Practitioner area of study will be prepared as primary care nurse clinicians providing comprehensive healthcare from birth through older adulthood. Family Nurse Practitioners diagnose and treat common acute episodic health problems, manage chronic diseases, and provide health education to individuals and families with expertise in health promotion and disease prevention.

NURSE 7010	Biostatistical Foundations for Health Researchers	3

NURSE 8864	Curriculum Development in Nursing	3
NURSE 8820	Health Care Financial Management	4

For more information on Area of Study Information please see the Family Nurse Practitioner page (<http://nursing.missouri.edu/academic-programs/dnp/areas-of-study/>).

Admissions

Applicants are required to meet two sets of minimum qualifications for admission: the requirements of the DNP in Nursing (<http://nursing.missouri.edu/academic-programs/dnp/apply/>) and the minimum requirements of the Graduate School (<http://gradschool.missouri.edu/admissions/eligibility-process/minimum-requirements.php>). Because requirements vary, you *must* refer to a degree program's graduate admission page to learn about specific admission criteria, application deadlines, eligibility, and application process. Your application materials will be reviewed by both the Graduate School and the degree program to which you have applied before official admission to the University of Missouri.
